Hi Martin:

Please find attached the final CBN that contains the final minute. This version is going out in binders now. Thanks again for all the back and forth on this.

Cheers

Thanks Martin. PO and the two MOs are still discussing compromise language so for now this is still on. Please let us know if you hear otherwise.

Hi Tim,

I don't have the details of the conversations between our MO and the PO so I can't speak to the exact elements and where they stand, but I would imagine it is related to the market renewal minute and/or the modelling minute.

I'll see if I can get further details for you.

Thanks,
Martin

Hi Martin.

Are you able to provide a breakdown of what elements have been brokered and which are outstanding? There were several on the go yesterday and it would be helpful to know where each is at. FYI I would be surprised if there was support for pulling it from the agenda.

Thanks

Tim

Hi Karen,

I understand that our MO has gone back and forth with PO on the minute but it doesn't seem as though we are getting much closer to resolving things. As a result, our MO has advised that we may need to pull the item from the agenda if we can't get a resolution in time.

Thanks,
Martin

It has been deferred to tomorrow morning to allow for the minute discussions to conclude. This means the minute will need to be finalized by 9:00am tomorrow.

Hi Karen and Tim, what is the timeline for the mailout? Is the minute being included?

Thanks Martin, appreciate the quick response.

On the market renewal language, PO has asked for something firmer than "enable". Happy to come up with something for your review, unless you have alternate language you think would work.

On the other pieces, PO is reaching out to your MO.

Lastly, on DR targets, I understand PO communicated to your MO that there is not comfort with removing the DR targets. Since this is not in the minute currently it probably does not require a further change to the minute, however, given the ministry materials speak about eliminating the target I wanted to flag it for you to make sure we are on the same page.

Thanks and happy to discuss.

Hi Karen,

Attached is some proposed language that Energy is comfortable with including. With have discussed with our MO and the two items we are proposing be deleted (green button and GHG modelling) did not come up in their conversation with the PO.

We have also made small tweaks to the Market Renewal minute, otherwise we are fine with everything else.

Let us know if you want to discuss.

Thanks,
Martin

Thanks Martin. When you have a minute please give me a call to discuss. At this point we would need your advice on the critical issues with the changes as they came out of the P's briefing so the expectation is that they will be made.

Hi Karen,

We have concerns with these proposed changes and, as our Minister has already signed off on the original proposed minute, we do not want them included at this time. We will be prepared to address the specifics later this evening when we have had a chance to regroup with our MO.

Thanks,

Martin

Importance: High

Hi Martin, Hillary,

Coming out of the Premier's briefing this morning there are changes to the LTEP minute. The specific changes are set out below, for your reference, and in the attached (blue highlights are the changes from the P's briefing; yellow are the TBS changes Tim sent over earlier).

The PO will also share these with your MO. We are working towards mailing out materials to Cabinet members this afternoon (1:30pm deadline). Please let us know ASAP of any major concerns with these changes.

Water / Waste water:

2.D.v. Working with MOECC, explore mandating Green Button for water and wastewater facilities and report back to Cabinet with a proposed approach.

Market Renewal:

2.E.x. Working with the IESO to ensure that Market Renewal is consistent with the objectives of the Climate Change Action Plan and is designed to help reduce GHG emissions from the electricity sector.

Outlooks:

5. ENERGY work with MOECC and the IESO to align LTEP outlooks with Ontario's greenhouse gas reduction targets and report back to Cabinet in summer 2017 with modelling outlooks to be included in the 2017 LTEP.

TB/MBC report backs:

7. ENERGY report back to Treasury Board/Management Board of Cabinet prior to the release of LTEP on the program design, implementation plans, and a funding strategy for the Smart Grid Fund.

8. ENERGY report back to Treasury Board/Management Board of Cabinet through the 2018/19 PRRT process on the program design, implementation plans, and a funding strategy for the International Energy Demonstration Fund pilot.

Thanks,
Karen
