Hi Danielle,

ENERGY is proposing to track to April 16 LRC with a proposal for :

1. Amendments to the Net Metering regulation (O. Reg. 541/05) expanding net metering eligibility to include new ownership models;
2. Amendments to the General regulation (O. Reg. 389/10) under the Energy Consumer Protection Act, 2010 to ensure appropriate consumer protections are in place for the new ownership models; and
3. A new regulation under the Electricity Act, 1998 to ensure appropriate siting restrictions are in place.

A draft LRC note is attached for fact check. Please kindly send comments by EOD April 4.

Thank you,
Rebecca
