Hi all – thanks for your work on this. As discussed, here's where we have landed. CO needs to send out the binders asap.

Modelling: ENERGY continue to work with MOECC, IESO, and partner ministries to explore LTEP modelling outlooks that align with Ontario's greenhouse gas reduction targets and report back to Cabinet in summer 2017 with modelling outlooks to be included in the 2017 LTEP.

Market Renewal: Working with the IESO to ensure Market Renewal acknowledges the objectives of the Climate Change Action Plan and is designed to reduce greenhouse gas emissions and ratepayer costs.

Also a reminder as we've discussed, we're taking out the Green Button language, but note that the CCAP minute for water/wastewater hasn't yet been fulfilled, and aren't comfortable removing the DR target.
