Hi Keley,

When ENERGY and MOECC MOs met with the PO this week, the two MOs confirmed their joint recommended approach for the proceeds recycling discussion (option #3 in the attached - Recycle proceeds volumetrically in off-peak hours). It was noted that your CoS was not a part of that discussion.

CO and PO are requesting that ENERGY and MOECC update the meeting material to indicate the recommended approach. Please send a revised deck before the meeting. Or let me know if you'd like to discuss.

Thx, Megan
