

## Foreword

### A Balanced Approach

...

...We built a clean, sustainable electricity system and put ourselves at the forefront of fighting climate change, leading in green and clean technologies.

### Helping You and Your Family

...

Recognizing that we needed a fairer way to allocate the costs of building a cleaner, more modern and reliable electricity generation system, we are taking action to reduce electricity costs. Through Ontario's Fair Hydro Plan, starting this summer, household electricity costs will be lowered by an average of 25 per cent. We are also capping rate increases to inflation for the next four years. Low-income families, and those living in rural and remote areas will receive additional relief as well.

**Commented [KR(1)]:** Is this suggested change from the MO in Chapter 2's markup too?
