

Ontario HST on Electricity by Household Income

- The table below shows average 8% Ontario HST paid on electricity by household income
 - For all households, the average is \$87 in 2017

Source: SPSP/M v22.0, Statistics Canada, MOF Calculations

Notes:

- Underlying electricity spending data from SPSP/M is based on the 2009 Survey of Household Spending, projected to future years using consumption growth forecasts, which may not reflect current electricity prices or consumption.
- Averages include renters who may not pay electricity directly (i.e. average HST on electricity for the subset of households directly paying electricity would be higher).
