Hi Everyone – Please see the attached draft assessment note for the electricity reg's tracking to TB/MBC tomorrow. I'd appreciate any input or feedback by first thing tomorrow. As you can see in the below chain, we've also simultaneously shared the latest version with senior management so the note is subject to change.

OPCD/TBS Legal – We've left placeholders in the risk section for accounting and legal risks. I am hoping that risks from previous assessment notes can be re-purposed and used for this note (assuming they haven't been mitigated). Frankly, I just didn't know which ones were the most important to flag. Please let me know if you have any concerns.

Thanks and happy to discuss.

Chris

Subject: Revised Electricity Assessment Note

Hi Everyone – Please see the attached revised electricity note taking into consideration the conversation at today's re-group.

For the financial risks, we were unable to locate any material that spoke about the source of data or assumptions that supports the voted appropriation estimates for the social programs. As such, we haven't been able to address Karen's concern on documenting the assumptions behind the financials. We'll continue to look.

Please let me know if Maria, Cindy or Karen have any further comments on the material. Also, sharing the latest draft of the submission with tracked changes from the version shared this morning.

Thanks,
Chris Skubel
