Subject: Re: Any Questions?

Technically - you're cheating :)

- Could you explain the process that the IESO uses to compensate generators for the power they produce? How is that process similar to what would transpire under the Fair Hydro Plan?
- Some have suggested we could achieve savings by simply opening up and renegotiating the contracts IESO holds with power generators. Do you think this would be a helpful approach to finding electricity system savings?
- How involved has the IESO been in developing the Fair Hydro Plan? How much input has your agency had in terms of IESO's role in crafting this legislation?
