

LTEP 2017

Table of Contents

Minister's Message

1. Ensuring Affordable and Accessible Energy

- Fair Hydro Plan
- Fossil Fuels Review
- Natural Gas Expansion
- Bringing Electricity to Off-Grid Communities.

2. Delivering Efficiency and Value

- Competitive Procurement
- Technology Neutral
- Using Existing Infrastructure

3. Increasing Consumer Choice

- Flexible Rate Plans
- Net Metering
- Behind the Meter
- Solar Thermal and Ground Source/Air
- Increased Competition for LDCs

4. (Em)Powering Indigenous Communities

- Indigenous Distribution Rate
- Connecting Off-Grid Communities
- Community Energy Plans and Support Programs
- Economic Partnerships.

5. Meeting Regional Priorities

- Differing Regional Requirements
- Community and Regional Planning
- Expansion of Natural Gas
- Urban Needs
- Northwest Transmission
- Supporting Economic Development

6. Building on our Achievements

- Transforming a Dirty and Unreliable System
- Robust Supply of Clean Energy
- Exporting our Renewable and Smart Grid Expertise
- Reduction in Emissions
- Increase in Reliability
- Smart Grid
- Indigenous and Community Involvement

7. Preparing for the Future

- Scope of LTEP Consultations
- Need for Flexibility
- Electricity Supply and Demand Forecast
- Nuclear Refurbishment
- Support for Combatting Climate Change
- Fossil Fuels Supply and Demand Forecast

8. Responding to Climate Change

- Climate Change Action Plan
- Fighting Climate Change while Reducing Costs
- Adaption
- Electrification
- Renewable Natural Gas

9. Enhancing Conservation

- Enhancing Commitment to Conservation
- Achievable Potential
- Home Retrofits
- Reducing Use of Fossil Fuels
- Reducing Emissions
- Fuel Switching

10. Encouraging Innovation

- Microgrids
- DERs
- Storage
- CMRs

- Renewable Technology Upgrades
- Increased Competition/Increased Transparency
- Regulatory Reform
