>> We've been listening bonnielissic. In order to lower the hydro bills I'm joined by vic fedeli. Rarely do you hear anybody use the language as she has. She's a straight-shooter, she

12:11:20 PM

reports to legislature. She's an independent person, if you will, but tell me what your take is from this?

>> It's shocking. The breadth and depth of the deceit that the liberal government had undertaken.

>> This is not an accident. She's saying they changed the rules. She said she's -- everyone agrees this is wrong and she gave a further report in 2015 where she said Ontario hydro has billed \$37 billion more than it should have because it's paying higher than market prices. Tell me -- hydro and the responsibility of the taxpayers?

>> So Bonnie lissic did say we spent 30 billion more than we

12:12:22 PM

ought to have and we have 133 billion still to pay under those contracts, which means we're going to have soaring hydro rates for as long as we are alive. What the government did was try to bring out their so-called fair hydro plan to mask this but not tell us the cost, both the auditor general and our other legislative officer told us this could be

up to the \$93 billion to pay for that 25% reduction.

>> So we have a lot of mismanagement and a lot of it's not a lot to go around not just hydro officials, it's the government. Tell me, the sea the government brought this into place as you know, very cynical to lower bills so it's in a better position they said in their tax paid radio ads. But it's also worked to a degree. They've gone up in the polls. People are saying hydro bills are less.

>> This will certainly clarify

12:13:22 PM

any misgivings people had. Then are temporarily reducing your bills but they are going to sky-rocket afterwards. This is being laid out by the auditor general that they were deceitful that this was done on purpose, they change would the law to be the rules to be able to do this but they knew that they knew that doing what they wanted to do was going to cost \$4 billion more to do yet they ask it anyway in order to hide had a they were doing.

>> \$4 billion is one of the smallest amounts we are losing.

>> Of which 4 billion is just to hide what they were doing.

>> What's the government going to do. This he have a press conference this afternoon. Is he going to lie?

>> They've always blamed the messenger so we'll have to see what they are going to be able toll say. They've always said when Bonnie

12:14:24 PM

brought out the last report they said she doesn't know what she's talking about. When she brought ow the pension report a year ago that showed they were wrong by billions about the debt and deficit they said she doesn't know what she's talking about so we'll see this time. She is one of the very few people in the building that truly understands the breadth and depth of the deceit of this government.

>> Wow, boy, going to be something else on this one.

>> She said you can no longer trust any of the numbers from the government. When they use the words deficit or debt you can not believe them or balanced budget you can not believe them.

>> Something else, vic fedeli. Thank you. Those liberals are something else, back to you for now.
