Subject: RE: Meeting with MOE regardig New Bill Design

Good Morning:

With thanks to folks for the brief walk through of the bill design questions late last week, looking if possible to set that meeting with Minister at the next few weeks until the Legislative Assembly's Constituency / Break week (for Easter), as Thibeault will not be in Toronto (week of April 17).

To that end, thinking we can do this in a 45 min timeslot wondering if any of the following line up with your availability :

- 3.15pm Wednesday 5 April
- 6.30pm Wednesday 5 April
- 9am Wednesday 12 April
- 8am Thursday 13 April

Let me know and we will plan accordingly.

Many thanks, in advance.

Andrew Teliszewsky

Subject: Meeting with MOE regardig New Bill Design
Importance: High

Hi Andrew:

As you are aware, over the past several months, we have been working on a redesign of the electricity bill for release to our customers in the third quarter of this year. In our analysis, testing and development we have come up with several mock ups of bills that can be marked improvements to the existing format. One version is what we are calling the "unconstrained bill". It is unconstrained in the sense that we have modified some of the required regulatory language to make the bill easier to understand for the customer and more esthetically pleasing without sacrificing transparency.

The unconstrained format is the format we believe will have the greatest impact on improving satisfaction with all customers and could act as a framework for other LDC's. If you recall this was also an item we discussed at our meeting with the Premier last month. In order to adopt the unconstrained format we would like to propose a modification to the regulation to allow the language to be simplified. If implemented, it is our belief that the combination of the new bill format and the impact of the fair hydro plan will significantly improve customer value and satisfaction. We would like to share these ideas with you and the Minister in the next week if possible and we will adjust our calendars to accommodate. If we are able to arrive at a solution we could be ready for implementation this coming summer.

Many thanks in advance for the consideration.

Best regards,
Ferio
