Subject: Materials for PO, CO, IESO, IO Meeting | Quebec Electricity Trade

Good Morning:

Please find enclosed materials for Friday afternoon's modeling / update meeting regarding Ontario supply options as it pertains to Hydro Quebec. We've got time in your collective calendars from 3.00-4.00pm tomorrow afternoon.

Two decks:

- A. **Executive Summary** – Slide #8 tells the full story in one slide. Options A & E probably have highest chance of economic success in terms of negotiation with HQEM. They also line up with GHG reductions owing to reduced domestic natural gas. Options B, C, D would be more difficult to negotiate success (given price-point required for break-even) and also these scenarios have requirement for increase to Ontario GHG emissions.
- B. **Full Modeling** – geek out and devour all the slides. Perfect weekend cottage reading!

Many thanks, in advance.
