Andrew: Next Wednesday we're coming out with our submission to LTEP. This will be a public facing document as the expectation from our membership is that the OCC demonstrate public-facing leadership on this file.

Attached you will find a draft submission and release. The release is an early draft. I'm sending this to you in advance because we want to get it right and we want to be fair. I think you will find that we have attempted to achieve balance on behalf of our members, but it is also important for me to be fair. And so, please feel free to review and provide feedback, thoughts, or direct me to information should something herein be incorrect.

Ultimately this will remain an advocacy document on behalf of our members but it's key that we continue to enhance our strong working relationship – as that too has enabled us to move policy in a positive direction on behalf of the province's business community. So please review and be in touch. I'm also happy to work with another member of your staff and work through the product.

Thanks, Karl

Karl Baldauf
