Bryan / Gen :

Can you log onto a quick teleconference at 9.15pm?

Anyone else as well?

Just want to cut through version control items here, please?

CO is here in my boardroom. But I'd suggest we just connect the small group us to finalize.

Atel/

Hi.

Two core things holding up products right now.

One - quite a factual clearance issue.

For the RRRP enhancements :

Energy adjusted proposed language " ...those served by local distribution companies (LDCs) with the highest distribution costs, many of whose live in rural communities..."

You can't ignore the preamble because rural isn't true. We specifically are going to the top 1/8 by cost LDCs.

Two - this issue of the interest / debt figures. How does this look?

> **Under current forecasts, the immediate reduction in the GA would be about $2.5 billion per year on average over the first ten years. Total accumulated debt would be $28 billion on a forecast basis, with a maximum annual interest cost of about $1.4 billion.**

IF we agree then all the other stuff flows quite quickly.
