We appreciated the opportunity to be a part of this policy development - from early this year with the Premier and Minister - through to our written submission yesterday in which we reiterated the points Anthony made verbally to the Committee. As we collectively face a complex landscape in our sector, it is helpful to have a Government that recognizes the value we can contribute to co-navigating the way forward for our sector and the customers we serve.

Subject: Quick note of thanks...

Good Evening:

I should have sent this much sooner, but our side has been going flat out with the Standing Committee on Justice Policy; Financial Accountability Officer (FAO) report and also the regular / major ongoing work for the implementation of the Ontario Fair Hydro Plan - but THANK YOU for the amazing presentation at Committee earlier this week.

We know that the politics of the situation make it more of a spectacle than about substance; but your presentation was among the most impressive and helped to juxtapose against the ill-informed and totally partisan motivated Opposition witnesses.

You came armed with facts and detail where others had complaints and no real ideas to offer.

I appreciate that you and your team are pushing boundaries and on important work-plans of your own, so am further grateful that you were able to quickly mobilize, prepare and present on short notice.

Once more, thanks again.

Take care & chat soon -

Andrew Teliszewsky
