Rachel has the early shift tomorrow, so you can expect to hear back from her then, rather than tonight. See you in the AM.

Ontario's Fair Hydro Plan is lowering electricity bills by 25 per cent on average for all residential consumers. Alectra, the utility serving customers in Hamilton, St. Catharines, Mississauga, Vaughan, Barrie, Brampton and Markham has provided an illustrative sample of customer bills, before and after these significant rate mitigation measures are implemented.

The above blurb has been approved by my contacts in the Kremlin.
Pink paper, please?

PO would like to stand down on the blurb, but continue with the sample bills for tomorrow's media kits. Please advise of any concerns. Draft blurb PO wants to leave out below.

Through the Fair Hydro Plan, a residential consumer using 750 kWh per month connected to Toronto Hydro would save 25 per cent. There will be variances across the province due to differences in consumption (e.g.: a consumer with electric heat would likely receive a greater reduction). Delivery rates also vary depending on the local distribution company. As an example, a sample bill from Alectra has been provided.
