Hon. Glenn Thibeault, MPP
Minister of Energy

Dear Minister:

Below, please find an email you should have recently received from Dennis Egan: denire@rogers.com.

Mr. Egan received your response to his original email, and it does not address his main concern--the global adjustment charge.

Again, what is your response to Mr. Egan's concerns, and how do you plan to address skyrocketing hydro rates and non-transparent global adjustment rates?

Please respond directly to my constituent and issue a copy of your response to my constituency office.

Thank you for your attention to this serious matter.

Sincerely,

Randy Pettapiece, MPP

Subject: hydro rates

Hello Minister:

Thank you for your long awaited response to my email and questions regarding hydro rates. Your letter although lengthy, and outlines programs which may or may not assist those in need does not answer the original question of " how to deal with the global adjustments charges "?

The budget and response of scrapping the tax portion of the bill is nothing more than a feeble attempt to buy off the electorate and make it more difficult to balance a budget already in trouble. Giving up current cash flow on the hopes of future revenue is fool hearty at best and you know it.

Once again I ask-- When is the government going to address the issue of bad contracts where the people of Ontario are paying to subsidize suppliers which have proven unsuccessful?
To see that (according to news statistics) the true cost of consumption is but 25% of the total cost forwarded on each bill is unconscionable.

One of my rights is to ask questions—one of your responsibilities is to answer them.

Sorry to say but keep it up and the pathway to the exit door only widens.

Respectfully,

Dennis Egan
