**Subject:** hydro

Minister of Energy

How much longer can this government continue to raise hydro rates to compensate for the errors of so called clean energy, especially when we are giving electricity away. As a senior citizen on a fixed income, I will soon have to choose between paying my hydro bill or selling my house because I cannot afford both. Our great grand children will be paying for the inefficiencies of this government. We are promised reduced hydro rates only to have distribution rates increased. This is a very deceptive practice. If we ran our households like this government runs our province, we would have been homeless long ago. I remember days when the whole country was flocking to Ontario because it was a very prosperous and well run province. Now we are losing business left right and centre because companies cannot afford Ontario hydro rates and taxes. When will the energy sector come to its senses and realize that damage that is being done to our province, economy and standard of living.

Ann Rodney
