Sir: I am appalled that this is actually happening here in Ontario!.....how dare they even ask for a rate increase given what our current energy costs are.....it is truly beyond belief that you and your government continue to stand by and see what this is doing to the good people of this province yet you do nothing but feed us BS every chance you get.....this application must be denied....denied....denied.....it's outrageous! I don't know how you sleep at night knowing you have caused such financial hardship to thousands.
