Dear Premier Wynne,

Regarding the Hydro Crisis

You are correct. The Hydro Crisis in Ontario is your fault. You chose to listen to private interest groups instead of the people of Ontario. Hydro is out of control and it has happened on your watch.

The answer is clear to us as well. We all know we must transition away from the current model of Corporate monopoly over necessary utilities to small independent clean sources of supply and storage of electricity.

Rebates are not helping. You need to decrease bills without increasing our current debt. Apparently, you guys are scrambling to find ways to provide relief. Well scramble no more. Here is a direct answer to your prayers.

1.Reduce the charges on our bills to a set universal delivery charge of \$30.00 (still higher than any other province in Canada by the way)

2. Scrap time of use charges and set the price of Hydro at 8.7 cents per kilowatt hour across the board and mandate a price freeze at this price for three years. This will give the people breathing room to conserve and see positive results from their efforts and should provide adequate income for hydro to continue to serve the people in a timely fashion.

3. Develop a clearly defined energy plan which provides timely service to all Ontarians. We want to see clearly defined measurable steps in this plan which will allow us to clearly see you are addressing the issue without further dipping into our pockets or increasing the Provincial debt load. We emphasise clear and measurable. The time for smoke and mirrors is over.

The money train has stopped Ms. Wynne. Adjust your spending to fit into your current means. We do it and so must your Government.

Respectfully,

Donna
