Hi Cindy

In lieu of taking time in your calendar this week, please find attached a revised draft of the slide deck to support working with other areas/ministries on the TB request to approve an FAA reg related to the FN H1 share arrangement. You will see it includes at this point a placeholder slide on accounting and forecast calculation related to the transaction – I have asked Energy/MOF/OFA for an update on that, and Ibrahim will be working with Mark on the accounting (including for the loan) – for your info, I am also attaching the analyst note that went forward for the Sept 2016 reportback to the Board as an update on this, and you will see it has quite a bit of description of the specifics, as well as the 17-18 prrt piece for energy that seems relevant.

Also attached is the timelines doc again, with a new draft page showing roles -

We will continue to work next week with our partners towards the October target date, including to get lsb a step further on the actual drafting and to work on the actual tb submission that will be needed.

Any comments on this draft of the deck, happy to reflect them.

Thanks

Helen
