Subject: FW: Baby now we got bad books: Your morning QP Briefing

Hi all,

FYI – Saturday's Globe & Mail article was highlighted in QP Briefing's "morning briefing – headlines".

Third paragraph in:

The *Globe and Mail* published a long read this weekend on the government's hydro accounting. It's dubbed. " [Bad Books: How Ontario's new hydro accounting could cost taxpayers billions](#) ." It's a comprehensive look at the accounting standoff between the Auditor General and the government. which explains why it might actually matter to we the ratepayers, taxpayers and voters. And as far as features on rate-regulated accounting go, it's thrilling.

Best,

Alisha
