Hi everyone –

Mike Jancik has asked that we pull together a list of risks/issues we have with electricity mitigation and Kyle has indicated that he'd like to receive today (my guess is this is back pocket document to help inform discussions at Major Projects tomorrow)

Can you please work to update the attached document to reflect all the risks we are tracking against this item? I think that that much of this can be pulled from the draft AN but I know there were a few placeholders in the note I saw that needed updating.

Felix has agreed to coordinate but will need Cindy/Helen and Didem/Sophie to update for their content as needed.

Many thanks,

P.

Subject: COE Thoughts and Feedback

Karen and Felix,

Please find attached the notes Sophie and I put together, that is intended to summarize the key issues and questions. In a number of instances (OESP Enhancement and Affordability Fund), it makes a number of observations and recommends alternative courses of action. These are our staff level thoughts and we would fully understand if that is not the feedback/recommendation carried in the note. We wanted to highlight these areas, as we think BIU can help support improvements that are no or low cost in these areas, rather than allocating significant new resources.

Felix, as promised, we will take this feedback/observations and work them into the draft note you kindly shared with us. Should have that over to you in the next hour or so. In the meantime, we thought you may want to see this.

Thank you,
Didem
