Hi Cindy,

I had a read through these items. Quite technical w.r.t. formulas and defining eligible costs, but nothing tripped for me that would have an accounting impact. There may be context under the surface I'm not aware of that may be important but not directly evident to me at first read.

Happy to discuss,
Mark

Subject: FW: regs

Mark – let's take a look through these and see if they are at a stage to share with EY.

Thanks,

Subject: FW: regs

Hi Cindy, to keep you in the loop we are working on a number of reg amendments to enable OFHP. The primary one is the fees reg, which lays out OPG's management fees and the OEB's role in approving the fees. The other regs are related to the pass through of interest and fees in the first four years. These are still at a fairly early stage so there are a number of comments and NTDs in the drafts. Let me know if you have any questions.

Tim
