Hey man – I made a few changes, which was mostly adjusting the dates to be a bit less specific. Let me know if you have any flags with the content.

Subject: OEB Panel Website

Hi James,

Please find attached the proposed web content for the OEB Modernisation Panel's consultation page. This is going up to support the stakeholder engagement of the panel. The discussion paper content mentioned is still under development, but we want to get this across to CO to start building on the back end. Please let me know if you have any concerns. Also, not sure who else to share this with in MO on the policy front, so please forward as required.

Cheers,

S.
