Subject: FW: URGENT: -CLASS A GLOBAL ADJUSTMENT FORM SIGNED

This was interesting. I guess with the new global adjustment credit it's better for some of our growers to opt out of class A for 17/18.

Subject: URGENT: CLASS A GLOBAL ADJUSTMENT FORM SIGNED

Hello,

We received new information yesterday (June 22, 2017) about the 'Global Adjustment (GA) modifier' credit which will come into effect July 1, 2017 as part of the '[Fair Hydro Plan](#)'. The GA Modifier credit will be applied to 'Class B Customers' who are eligible for the 'Regulated Price Plan' (RPP) which includes **Farm** and multi-unit residential services. Our records show that you are a declared Farm customer which would allow you to receive the GA modifier if you had not opted in as a 'Class A' customer.

The GA modifier has been set at \$32.90/MWh (or about 3.3¢/kWh) and will be in effect from July 1, 2017 to April 30, 2018. For May 1, 2018 to April 30, 2019, the Ontario Energy Board will set a new GA modifier in accordance with rules set out in a new regulation.

Below shows the original Class A vs Class B comparison we sent you, along with a new comparison, of the Class A vs New Class B factoring in the GA Modifier. Based on the original comparison, it is estimated you would save 20.7%. In the new comparison, it is estimated you would save an additional 18.6% if you were to opt out of Class A and remain as a Class B customer.

Original Comparison – No Longer Applicable

	Savings Old Class B vs New Class B					\$204,720.87	
	Savings Old Class B vs New Class B with HST					\$231,334.58	

Please review the new results, if you would like to now withdraw your Class A opt-in, please respond back to this email by **Tuesday June 27, 2017** , indicating this.

Sorry for the confusion but we luckily were able to catch this prior to your opt in status being finalized.

Let us know if you want to call to discuss.

Sincerely,

Business Customer Centre
