Subject: Hi Judy Re: email to Judy Rowe

Hi Judy, Yes, I had sent this. You know I really enjoyed all you folks and I wish this wasn't even happening. Still for the record, it seems it is so I had sent this on in the sincere hope something of substance would be done. No one could say that what it reveals is not truly quite shocking! I am well thank you and hope you are also. Libby

Please pass this on to Premier Kathleen Wynne. A copy has been sent to Minister Glenn Thibeault as well and has been posted on Facebook.
Particularly of importance are the areas shaded in pink. This demonstrated how actually far Hydro One rates in Ontario are outstripping the rate of inflation and/or any Reasonable profit margin for Any corporation by any measure!

The attachment is from a business operating in Ontario. It shows the year over year increase in the cost of their Hydro One service. There is a clear increase of an average of well over 100% year after year since 2009! In light of this testimonial and many, many others I have received I must state that the 8-12% cut in Power rates being considered as of today by Premier Wynne as reported on CTV News is not only completely unacceptable but an insult to the people of Ontario.

Regards,

Libby Keenan
