Matt,

Attached is an almost complete package for the OESP LRC item.

- 1) Ministry Approval Form
- 2) Reg – almost finalized and will be sealed early next week for Minister to sign on Wed
- 3) TAED Exemption Request

CO is pushing us very hard on taking us off the agenda and pushing us to Feb 20th. Below is staff response. Let us know if any concerns with sharing this with CO.

The reconciliation for February will not happen until March. There is a risk that the variance account could be depleted by the February 20th LRC date.

Aside from risk related to the variance account, delay has other implications. This regulation has been rescheduled from December LRC dates, January LRC and now into February. Ministry staff, the OEB and Legislative Counsel have prioritized this work over other files in order to meet deadlines in each of these months, only to have the deadline slip. The regulation is now ready to go forward. Proceeding at this time would allow staff to move on to other priority files.

Jeet Chatterjee
Senior Policy Advisor, Deputy Minister's Office
Ontario Ministry of Energy
