---

Hi Francisco,

Hoping to get back to Scott Nelms group tomorrow. There is a slide on AO. Also, a mention of ONFA in the concurrence memo.

Take a quick look.

John

Ontario

MINISTRY OF
ENERGY

# OPG Business Plan

May 2017

# Context

- As required by the Memorandum of Agreement (MOA) between Ontario Power Generation and the Minister of Energy, OPG provided its Business Plan for 2017-2019 to the Ministry of Energy on November 29, 2016 for concurrence
  - Note that while OPG is seeking concurrence for its three year 2017-19 business plan, the plan also includes financial projections for 2020 and 2021
- The Minister's concurrence requires presentation of OPG's business plan before and acknowledgement by TB/MBC
- The Ministry of Energy review and analysis of OPG's business plan is supported by the Electricity Investment and Governance Secretariat, a unit within the Ministry of Finance and the Corporate and Electricity Finance Division of the Ontario Financing Authority
- The following presentation provides an overview of OPG's business plan, including:
  1. Business Plan Overview
  2. Other Considerations

# Context *(cont'd)*

- Proceeding with Provincial concurrence now will demonstrate that OPG has support from its shareholder as it implements the plan and provides clarity to the Ontario Energy Board (OEB) as it reviews OPG's current rate application covering the 2017-2021 period

- Business plan forecasts may be affected by Ontario's Fair Hydro Plan (OFHP). Given the stage of implementation of OFHP and the timing of the receipt of the business plan in November 2016, these changes are not reflected in OPG's plan

  - The Ministry anticipates that as part of supporting the financing and administration of the global adjustment smoothing mechanism, OPG would purchase the right to future cash flows from IESO, financed partly by capital infusions from the Province, and majority by third-party lending

  - These changes are generally expected to be fiscally neutral as they would result in an increase in Provincial interest on debt, offset by increases in OPG net income

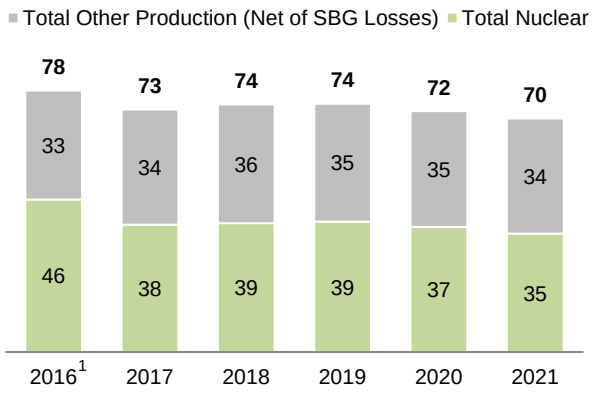
  - In addition, the Province's net debt position should remain unchanged

# 1. Business Plan Overview

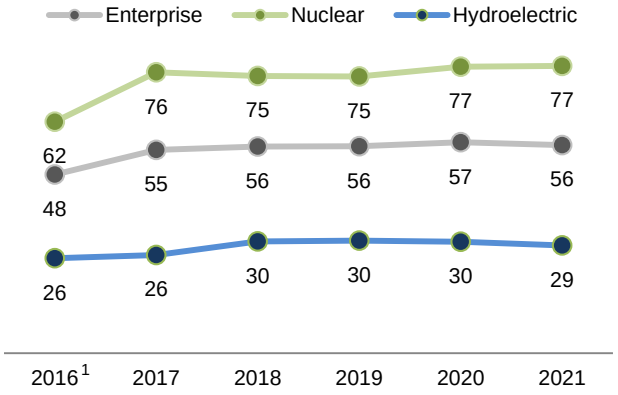
## *a) Production & Total Cost of Generation*

- OPG's production is expected to fall to 69.8 TWh by 2021 from 78.2 TWh in 2016
  - Reflects a declining trend in the Darlington production due to refurbishment outages starting in October 2016
  - Also includes a partial overlap starting in 2021 between second and third unit refurbishments
- While Operations, Maintenance and Administration (OM&A) remains relatively stable over the planning period (see next slide), total generating cost (TGC)* shows an increasing trend over the planning period relative to 2016, reflecting:
  - Lower nuclear production due to Darlington refurbishment outages, and
  - Increased sustaining capital spending (included in TGC) on two large hydroelectric projects, the Lower Mattagami dam safety upgrade and the Sir Adam Beck I GS power canal liner rehabilitation

### Production (TWh)



### Total Generating Cost ($/MWh)



1. Actuals

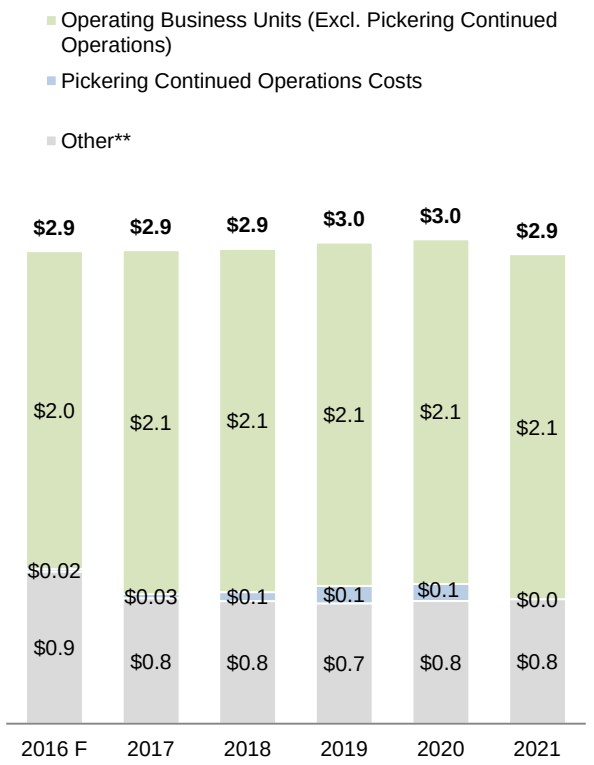
*TGC = OM&A expenses from ongoing operations + fuel and Gross Revenue Charge expenses for OPG-operated stations + sustaining capital expenditures) divided by OPG generation adjusted for surplus baseload generation losses

# 1. Business Plan Overview

## *b) Operations, Maintenance and Administration (OM&A) Expenses*

- Annual OM&A expenses from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year
- Increases over 2016 are mainly attributable to:
  - Increases in business unit expenditures, including changes in nuclear outage scope at Darlington, and planned hiring to fill staffing gaps
  - Incremental outage and other program costs to enable Pickering continued operations
  - Partially offset by declining pension and OPEB costs over the period due to projected pension asset returns, increased employee contributions, and adoption of a new method for applying discount rates to determine interest components of pension costs

### OM&A from Ongoing Operations* ($B)



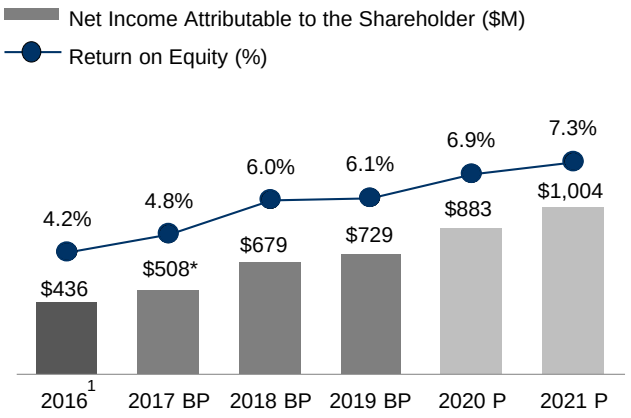
*Excludes Darlington refurbishment OM&A expenses and all OEB variance and deferral account offsets
** Includes centrally held pension /OPEB costs and support services

# 1. Business Plan Overview

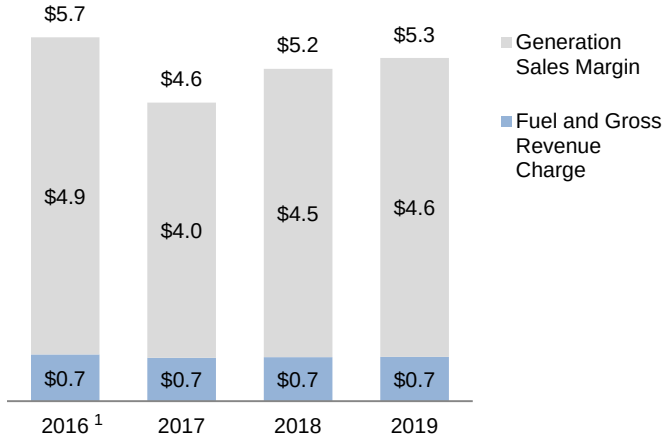
## *c) Financials*

- OPG is forecasting net income attributable to the Shareholder to reach $1B in 2021, from $436M in 2016
  - 2017 net income is forecast to increase as a result of new regulated rates, a gain on sale of OPG's head office, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations
  - Net income in 2018 and 2019 is planned to increase, primarily due to higher production, and earnings from oncoming stations including Nanticoke solar in 2019
- As a result, return-on-equity (ROE) is estimated to increase from 4.2% in 2016 to 7.3% by 2021
- Overall, the 2017-19 Business Plan is largely unchanged relative to last year's plan in terms of commitments for Net Income, and Total Shareholder Return

### Net Income ($M) and ROE (%)



### Revenue Margin ($B)



*Includes extraordinary gain associated with the sale of OPG head office

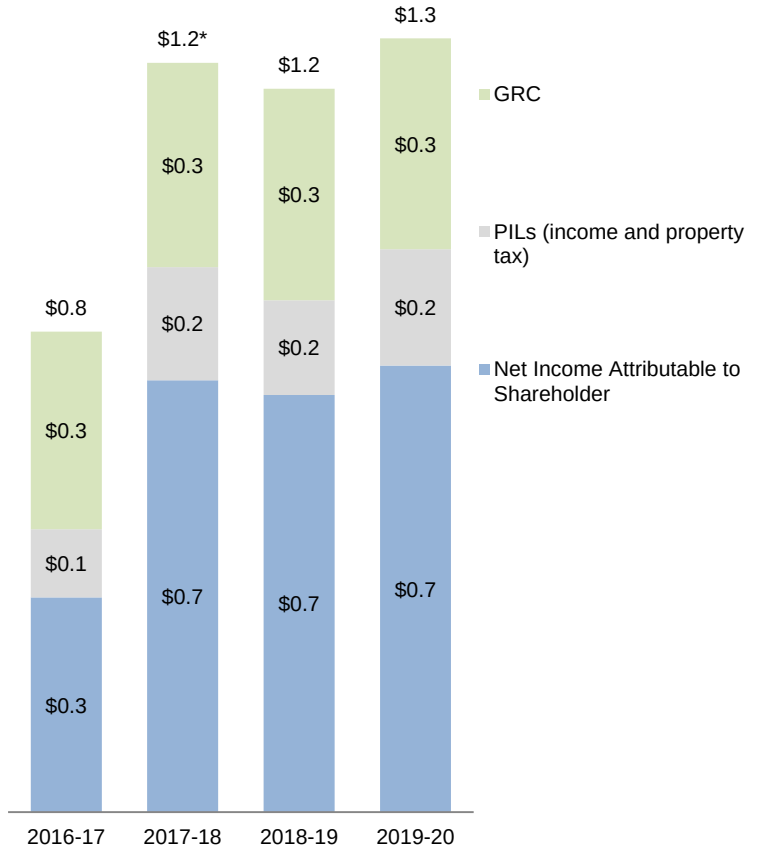
1. Actuals

# 1. Business Plan Overview

## *d) Shareholder Return*

- Total return to the shareholder averages ~$1B over the period
- Total return to the shareholder improves over the period largely due to changes in net income, which OPG attributes to:
  - Assumed OEB rate outcomes
  - Completion of the first Darlington unit refurbishment
  - Further cost efficiencies
- Net income is consolidated by the Province as Revenue from Government Business Enterprises (GBEs) income tax PILs are consolidated by the Ontario Electricity Financial Corporation (OEFC)
- OPG also pays a Gross Revenue Charge (GRC) and Property Taxes to the OEFC

**Total Shareholder Return ($B)**



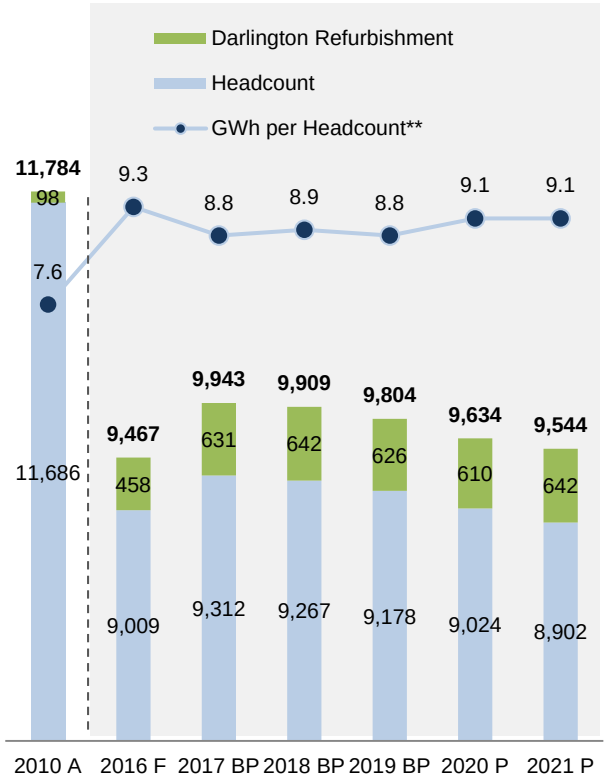
*Includes gain associated with the sale of OPG head office

# 1. Business Plan Overview

## *e) Business Transformation Initiative & Labour Costs*

- As part of a company-wide business transformation, OPG has saved over $1B in costs from January 2011 to December 2016
  - Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3
- However, OPG is ramping up recruitment between 2016 and 2017 to fill key vacancies in certain areas (particularly in the Nuclear business unit) due to high levels of attrition from employee demographics, as well as continued Pickering operations beyond 2020
  - OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower than 2017 levels in 2021
- In addition, to date OPG has hired ~60 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015
  - Intention is to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations

**Ongoing Operations Regular Headcount and Productivity**



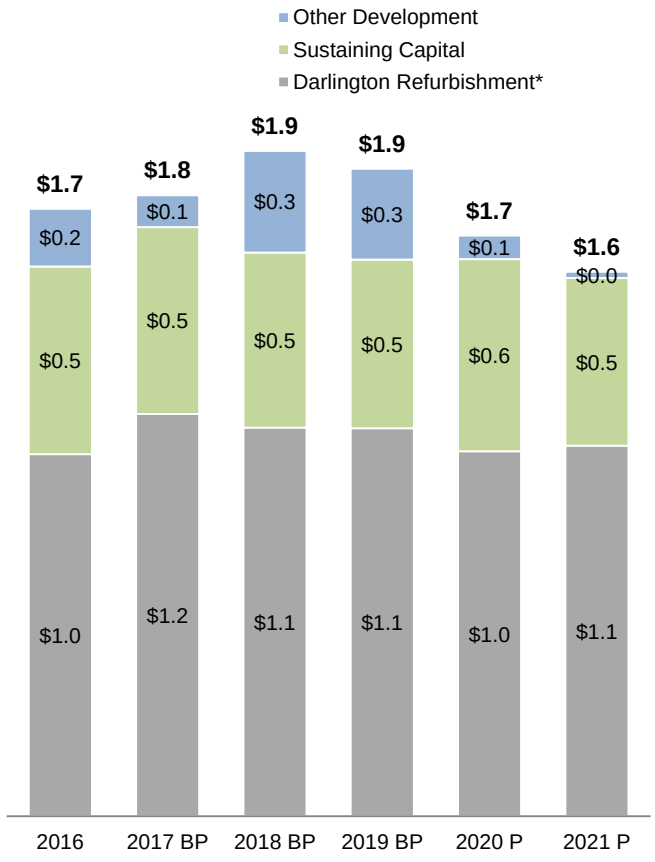
**Production is normalized by adding back hydroelectric surplus baseload generation losses and, in 2017- 2021, the lower production due to the Darlington refurbishment outages

# 1. Business Plan Overview

## *f) Operating Highlights - Projects and Capital Expenditures*

- OPG continues to focus on delivery of its major projects over the plan period, including:
  - **Darlington Refurbishment**: Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, assuming necessary concurrence from the Province is obtained
  - **Sustaining Capital:** Expenditures average $570M, including:
    - Nuclear expenditures unrelated to refurbishment at Darlington and costs for continued operation of Pickering
    - Regulated hydro expenditures including upgrades at Sir Adam Beck and upgrades to DeCew II
    - Lower Mattagami upgrades in 2018 and 2019
  - **Other Developments:** Investments in current and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility

**Capital Expenditure Estimates ($B)**



*Includes expenditures budgeted by Support Services

# 2. Other Considerations

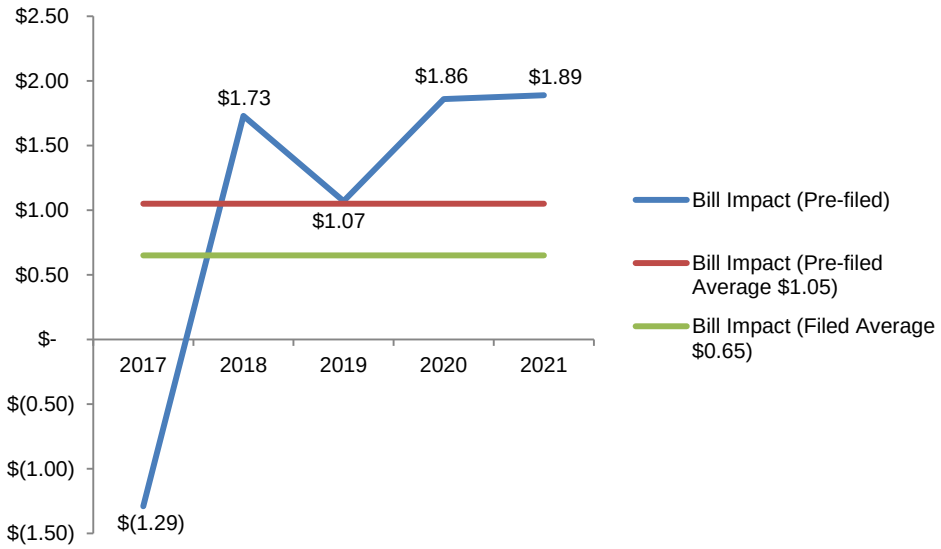
## *Rate Application*

- OPG's 2017-19 Business Plan is dependent on the outcome of its rate filing with the OEB for the five-year period from 2017-2021
- Oral hearings began February 21, 2017 with a decision expected in Q3 2017
- OPG's 2017-19 Business Plan assumes new rates are effective January 1, 2017
  - The OEB setting a later effective date would negatively impact OPG's 2017-18 fiscal year net income by ~$50-60M per month of delay*

**Rate-Smoothing Proposal:**

- On March 2, 2017 the Province filed an amendment to O.Reg.53/05, which enables OPG to smooth its rates based on OPG's total bill impact, rather than on the basis of nuclear rates only
- On March 8, 2017 OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year

**Comparison of Annual Bill Impact ($/Month per year)**



*Forecasted in May 2016

# 2. Other Considerations

*Sales*

| | OPG Head Office | R.L. Hearn Site | Lakeview Site |
|---|---|---|---|
| **Current Status** | Completed | Agreement Reached | OPG and Infrastructure Ontario are preparing for marketing |
| **Site Description** | 700 University Ave. and parking garage at 40 Murray St. in Toronto | ~33 acres at the R.L. Hearn site in Toronto | ~67 acres to be transferred by the purchaser to the City of Mississauga (Municipal Park Lands) and ~110 acres to be developed for mixed uses (Uplands) |
| **Buyer** | KingSett Canadian Real Estate Income Fund LP | Studios of America Limited Partner | TBD |
| **Value** | Estimated up-front 2017-18 fiscal impact of ~$375M | TBD | TBD |
| **Other Considerations** | N/A | N/A | Negotiations with the City have been lengthy and costs to remediate/prepare site may be significant due to concerns regarding site condition |
| **Timing** | The sale closed in April 2017 | Anticipated to close in Q3 2017 | Marketing is planned to start in April 2017, pending negotiations with the City, with an anticipated closing in 2017 |

# 2. Other Considerations

## *Special Status for OPG to Approve International Travel*

- On January 24, 2017, OPG's President and CEO wrote to the Deputy Minister requesting authority for OPG to approve international travel for its employees
  - Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business
- OPG has indicated that international travel is integral to the safe and prudent operation of its business and that special status will enable efficient decision-making while lowering travel costs
  - OPG cites the importance of enabling its engagement with the international community (in particular in regards to nuclear safety), procurement activities, and investment and due diligence processes for its pension fund and nuclear funds
  - OPG requires a high level of international business travel at approximately 90-100 trips annually, while Darlington accounts for 45% and is expected see increases
  - OPG indicated that the approval process, which took 23 days on average in 2016, delays flight bookings which results in higher costs as airlines raise fares closer to the travel date
  - OPG believes the inability to make timely commitments on events and meetings impacts employee engagement as well as its international relationships and reputation
- OPG has asked that this application be included with the Ministry's submission to TB/MBC seeking concurrence with OPG's 2017-19 business plan

# Appendix

Mr. Bernard Lord
Chair
Ontario Power Generation
1900-700 University Avenue
Toronto ON M5G 1X6

Dear Mr. Lord,

Thank you for your submission of Ontario Power Generation's (OPG) 2017-2019 Business Plan ("the Plan"). We have reviewed the Plan and find it to be consistent with our government's expectations.

I support the operational and financial targets set by OPG in its business plan. We recognize the substantial cost reductions that OPG has recently achieved and expect OPG to work closely with the Province to fully realize the additional efficiencies incorporated in the Plan in a manner that is consistent with the continued safe and environmentally responsible operation of OPG's facilities.

We commend OPG on its successful start to the Darlington Refurbishment Project, a key objective of Ontario's 2013 Long-Term Energy Plan (2013 LTEP). As a priority project for the government, I expect that OPG will continue to focus on delivering the project as per the schedule and budget contained in the Release Quality Estimate approved by the OPG Board and by the government. I also expect OPG to continue to minimize project risks consistent with the nuclear refurbishment principles set out in the 2013 LTEP, and seek concurrence prior to commencing subsequent unit refurbishments after Unit 2 is successfully returned to service.

We continue to support the planned operation of Pickering units up to 2024 as the station's output will provide reliable, cost-effective and emission-free electricity supply during the Darlington and initial Bruce refurbishments. I expect OPG to seek concurrence to proceed with ongoing Pickering operation after the necessary regulatory approvals are complete.

I understand that the recently approved Ontario Nuclear Funds Agreement (ONFA) Reference Plan has resulted in a reduction of costs to consumers for future decommissioning and long-term management of waste from Ontario's nuclear plants. In addition, the segregated nuclear funds set aside under ONFA have reached fully funded status. With many decades of nuclear generation in the Province's future, the decision to fund these costs now provides security for future generations of Ontarians.

I appreciate the efforts of OPG staff, management and the Board of Directors to date as we worked to develop a plan to refinance the Global Adjustment (GA). Refinancing the GA would provide significant and immediate rate relief by spreading the cost of electricity investments over the expected lifecycle of the infrastructure that has been built. OPG will be instrumental to the success of this initiative and we plan to introduce legislation that would, if passed, enable OPG to work with the Independent Electricity System Operator (IESO) to implement this plan.

I expect OPG to continue to keep the government informed with regard to the company's key ongoing and emerging initiatives and progress in achieving its financial

and operational performance commitments. As OPG's performance directly impacts Ontario's fiscal plan, we note the importance of achieving or exceeding OPG's financial performance commitments.

This letter constitutes our concurrence with OPG's Board approved 2017-2019 Business Plan as provided for under the Memorandum of Agreement between OPG and the Shareholder dated July 17, 2015.

Sincerely,

Glenn Thibeault
Minister of Energy

c: Jeff Lyash, President and Chief Executive Officer, OPG
Serge Imbrogno, Deputy Minister, Ministry of Energy

Hi Adam,

Does the chart on slide 9 make sense to you?

If it does, can you explain?

John

MINISTRY OF
ENERGY

# OPG Business Plan

May 2017

# Context

- As required by the Memorandum of Agreement (MOA) between Ontario Power Generation and the Minister of Energy, OPG provided its Business Plan for 2017-2019 to the Ministry of Energy on November 29, 2016 for concurrence
  - Note that while OPG is seeking concurrence for its three year 2017-19 business plan, the plan also includes financial projections for 2020 and 2021
- The Minister's concurrence requires presentation of OPG's business plan before and acknowledgement by TB/MBC
- The Ministry of Energy review and analysis of OPG's business plan is supported by the Electricity Investment and Governance Secretariat, a unit within the Ministry of Finance and the Corporate and Electricity Finance Division of the Ontario Financing Authority
- The following presentation provides an overview of OPG's business plan, including:
  1. Business Plan Overview
  2. Other Considerations

# Context *(cont'd)*

- Proceeding with Provincial concurrence now will demonstrate that OPG has support from its shareholder as it implements the plan and provides clarity to the Ontario Energy Board (OEB) as it reviews OPG's current rate application covering the 2017-2021 period

- Business plan forecasts may be affected by Ontario's Fair Hydro Plan (OFHP). Given the stage of implementation of OFHP and the timing of the receipt of the business plan in November 2016, these changes are not reflected in OPG's plan

  - The Ministry anticipates that as part of supporting the financing and administration of the global adjustment smoothing mechanism, OPG would purchase the right to future cash flows from IESO, financed partly by capital infusions from the Province, and majority by third-party lending

  - These changes are generally expected to be fiscally neutral as they would result in an increase in Provincial interest on debt, offset by increases in OPG net income

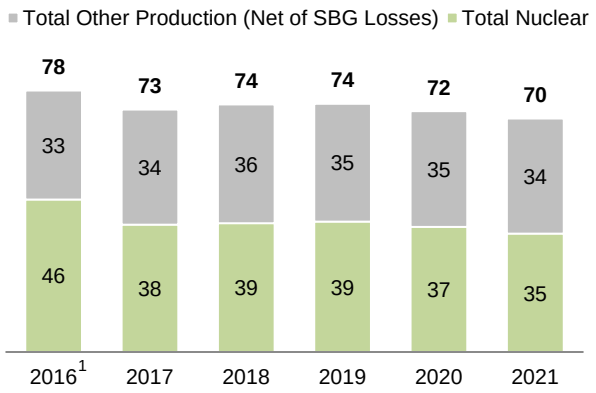
  - In addition, the Province's net debt position should remain unchanged

# 1. Business Plan Overview

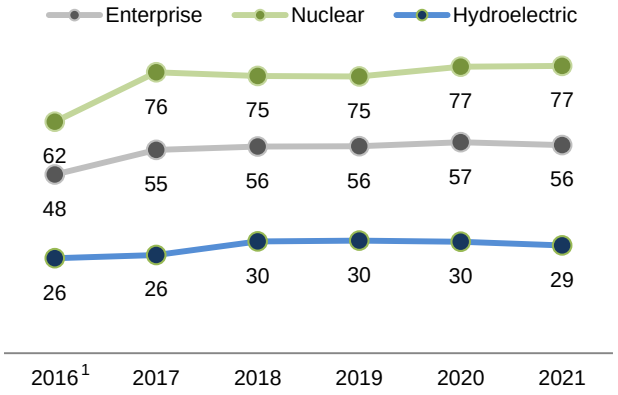
## *a) Production & Total Cost of Generation*

- OPG's production is expected to fall to 69.8 TWh by 2021 from 78.2 TWh in 2016
  - Reflects a declining trend in the Darlington production due to refurbishment outages starting in October 2016
  - Also includes a partial overlap starting in 2021 between second and third unit refurbishments
- While Operations, Maintenance and Administration (OM&A) remains relatively stable over the planning period (see next slide), total generating cost (TGC)* shows an increasing trend over the planning period relative to 2016, reflecting:
  - Lower nuclear production due to Darlington refurbishment outages, and
  - Increased sustaining capital spending (included in TGC) on two large hydroelectric projects, the Lower Mattagami dam safety upgrade and the Sir Adam Beck I GS power canal liner rehabilitation

### Production (TWh)



### Total Generating Cost ($/MWh)



1. Actuals

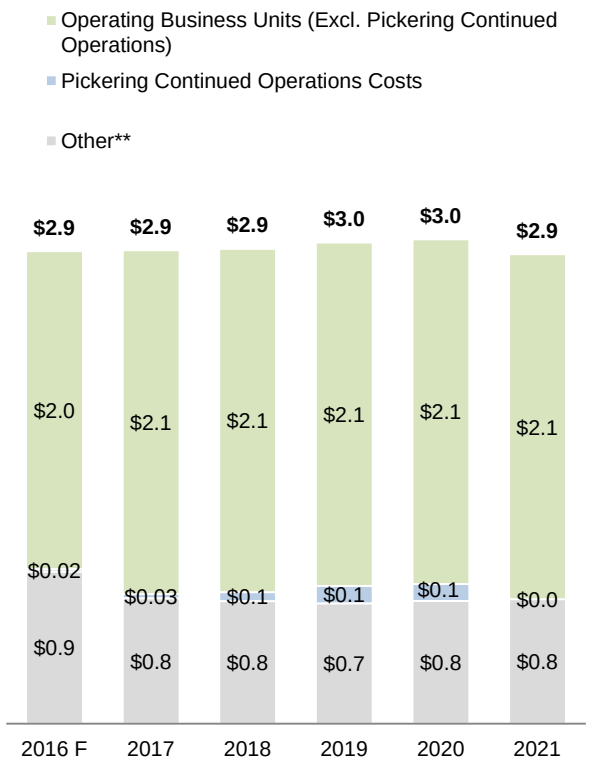
*TGC = OM&A expenses from ongoing operations + fuel and Gross Revenue Charge expenses for OPG-operated stations + sustaining capital expenditures) divided by OPG generation adjusted for surplus baseload generation losses

# 1. Business Plan Overview

## *b) Operations, Maintenance and Administration (OM&A) Expenses*

- Annual OM&A expenses from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year
- Increases over 2016 are mainly attributable to:
  - Increases in business unit expenditures, including changes in nuclear outage scope at Darlington, and planned hiring to fill staffing gaps
  - Incremental outage and other program costs to enable Pickering continued operations
  - Partially offset by declining pension and OPEB costs over the period due to projected pension asset returns, increased employee contributions, and adoption of a new method for applying discount rates to determine interest components of pension costs

### OM&A from Ongoing Operations* ($B)



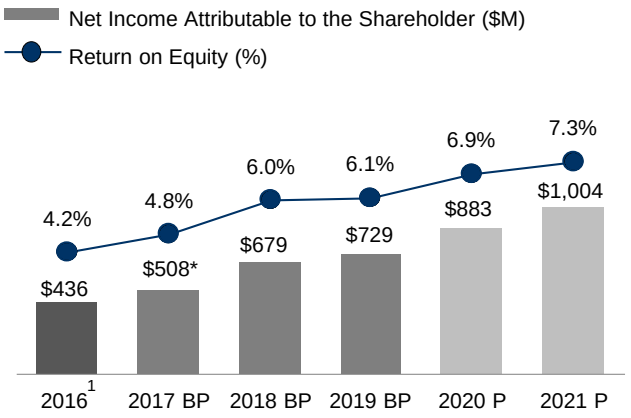
*Excludes Darlington refurbishment OM&A expenses and all OEB variance and deferral account offsets
** Includes centrally held pension /OPEB costs and support services

# 1. Business Plan Overview

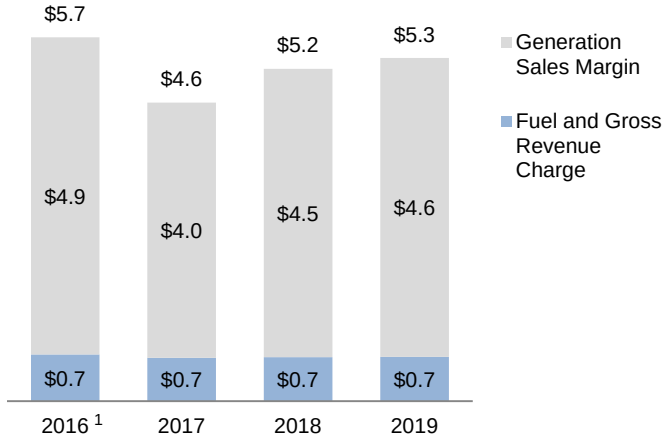
## *c) Financials*

- OPG is forecasting net income attributable to the Shareholder to reach $1B in 2021, from $436M in 2016
  - 2017 net income is forecast to increase as a result of new regulated rates, a gain on sale of OPG's head office, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations
  - Net income in 2018 and 2019 is planned to increase, primarily due to higher production, and earnings from oncoming stations including Nanticoke solar in 2019
- As a result, return-on-equity (ROE) is estimated to increase from 4.2% in 2016 to 7.3% by 2021
- Overall, the 2017-19 Business Plan is largely unchanged relative to last year's plan in terms of commitments for Net Income, and Total Shareholder Return

### Net Income ($M) and ROE (%)



### Revenue Margin ($B)



*Includes extraordinary gain associated with the sale of OPG head office

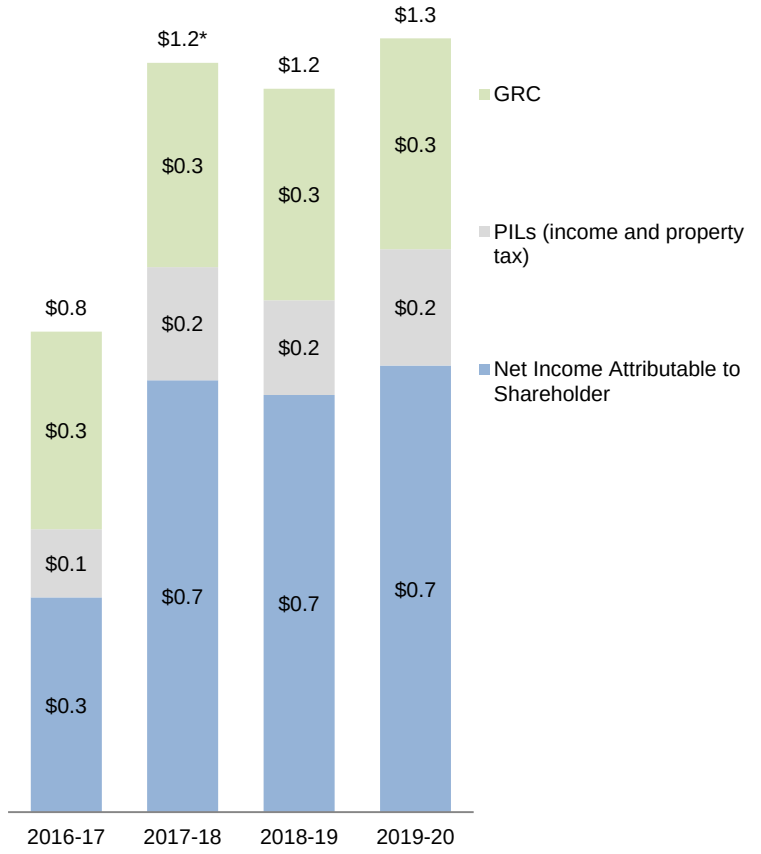
1. Actuals

# 1. Business Plan Overview

## *d) Shareholder Return*

- Total return to the shareholder averages ~$1B over the period
- Total return to the shareholder improves over the period largely due to changes in net income, which OPG attributes to:
  - Assumed OEB rate outcomes
  - Completion of the first Darlington unit refurbishment
  - Further cost efficiencies
- Net income is consolidated by the Province as Revenue from Government Business Enterprises (GBEs) income tax PILs are consolidated by the Ontario Electricity Financial Corporation (OEFC)
- OPG also pays a Gross Revenue Charge (GRC) and Property Taxes to the OEFC

**Total Shareholder Return ($B)**



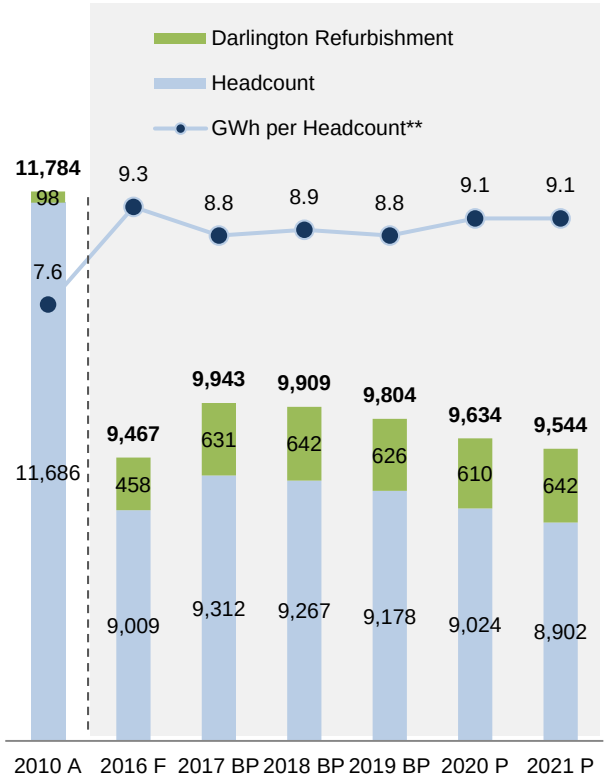
*Includes gain associated with the sale of OPG head office

# 1. Business Plan Overview

## *e) Business Transformation Initiative & Labour Costs*

- As part of a company-wide business transformation, OPG has saved over $1B in costs from January 2011 to December 2016
  - Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3
- However, OPG is ramping up recruitment between 2016 and 2017 to fill key vacancies in certain areas (particularly in the Nuclear business unit) due to high levels of attrition from employee demographics, as well as continued Pickering operations beyond 2020
  - OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower than 2017 levels in 2021
- In addition, to date OPG has hired ~60 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015
  - Intention is to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations

**Ongoing Operations Regular Headcount and Productivity**



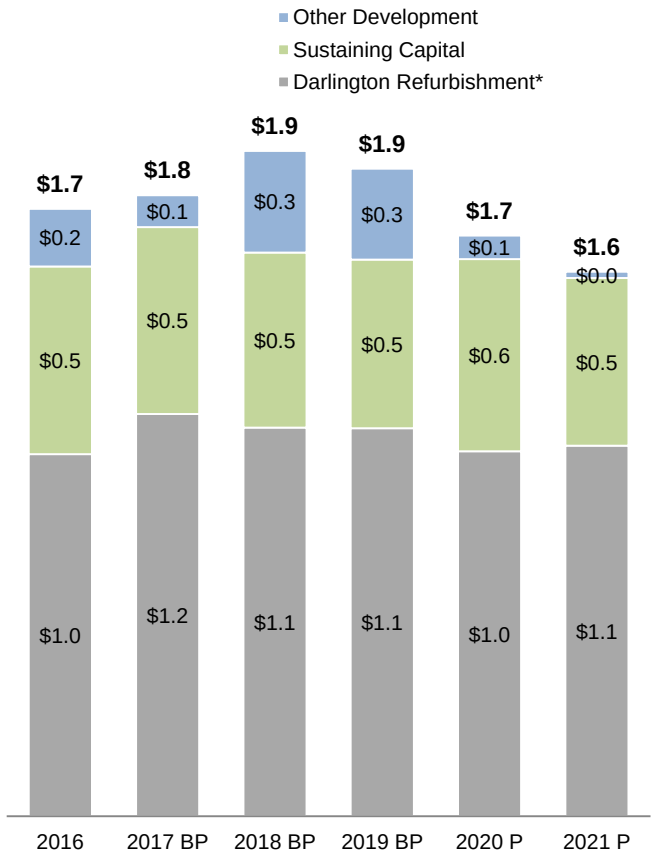
**Production is normalized by adding back hydroelectric surplus baseload generation losses and, in 2017- 2021, the lower production due to the Darlington refurbishment outages

# 1. Business Plan Overview

## *f) Operating Highlights - Projects and Capital Expenditures*

- OPG continues to focus on delivery of its major projects over the plan period, including:
  - **Darlington Refurbishment**: Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, assuming necessary concurrence from the Province is obtained
  - **Sustaining Capital:** Expenditures average $570M, including:
    - Nuclear expenditures unrelated to refurbishment at Darlington and costs for continued operation of Pickering
    - Regulated hydro expenditures including upgrades at Sir Adam Beck and upgrades to DeCew II
    - Lower Mattagami upgrades in 2018 and 2019
  - **Other Developments:** Investments in current and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility

**Capital Expenditure Estimates ($B)**



*Includes expenditures budgeted by Support Services

# 2. Other Considerations

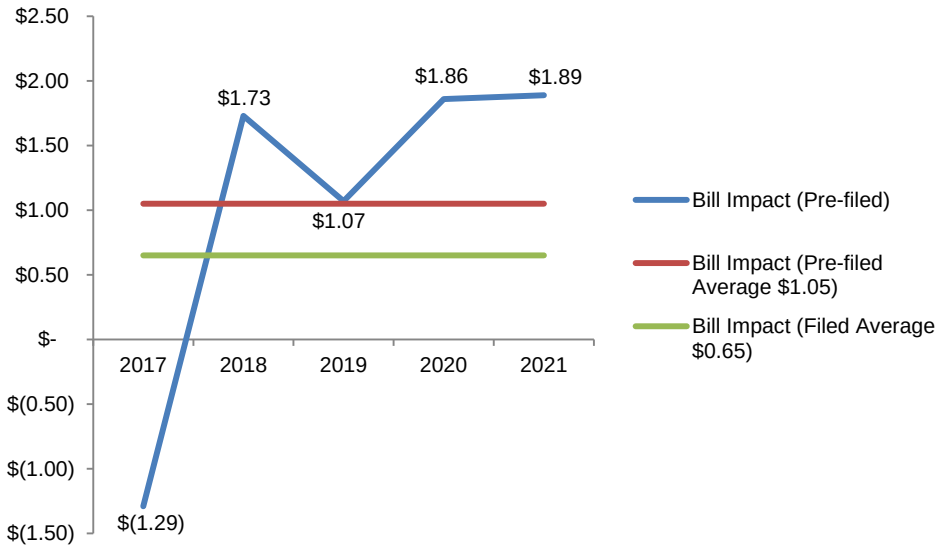
## *Rate Application*

- OPG's 2017-19 Business Plan is dependent on the outcome of its rate filing with the OEB for the five-year period from 2017-2021
- Oral hearings began February 21, 2017 with a decision expected in Q3 2017
- OPG's 2017-19 Business Plan assumes new rates are effective January 1, 2017
  - The OEB setting a later effective date would negatively impact OPG's 2017-18 fiscal year net income by ~$50-60M per month of delay*

**Rate-Smoothing Proposal:**

- On March 2, 2017 the Province filed an amendment to O.Reg.53/05, which enables OPG to smooth its rates based on OPG's total bill impact, rather than on the basis of nuclear rates only
- On March 8, 2017 OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year

**Comparison of Annual Bill Impact ($/Month per year)**



*Forecasted in May 2016

# 2. Other Considerations

*Sales*

| | OPG Head Office | R.L. Hearn Site | Lakeview Site |
|---|---|---|---|
| **Current Status** | Completed | Agreement Reached | OPG and Infrastructure Ontario are preparing for marketing |
| **Site Description** | 700 University Ave. and parking garage at 40 Murray St. in Toronto | ~33 acres at the R.L. Hearn site in Toronto | ~67 acres to be transferred by the purchaser to the City of Mississauga (Municipal Park Lands) and ~110 acres to be developed for mixed uses (Uplands) |
| **Buyer** | KingSett Canadian Real Estate Income Fund LP | Studios of America Limited Partner | TBD |
| **Value** | Estimated up-front 2017-18 fiscal impact of ~$375M | TBD | TBD |

# 2. Other Considerations

## *Special Status for OPG to Approve International Travel*

- On January 24, 2017, OPG's President and CEO wrote to the Deputy Minister requesting authority for OPG to approve international travel for its employees
  - Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business
- OPG has indicated that international travel is integral to the safe and prudent operation of its business and that special status will enable efficient decision-making while lowering travel costs
  - OPG cites the importance of enabling its engagement with the international community (in particular in regards to nuclear safety), procurement activities, and investment and due diligence processes for its pension fund and nuclear funds
  - OPG requires a high level of international business travel at approximately 90-100 trips annually, while Darlington accounts for 45% and is expected see increases
  - OPG indicated that the approval process, which took 23 days on average in 2016, delays flight bookings which results in higher costs as airlines raise fares closer to the travel date
  - OPG believes the inability to make timely commitments on events and meetings impacts employee engagement as well as its international relationships and reputation
- OPG has asked that this application be included with the Ministry's submission to TB/MBC seeking concurrence with OPG's 2017-19 business plan

# TREASURY BOARD / MANAGEMENT BOARD OF CABINET
# REQUEST ASSESSMENT NOTE

| | |
|---|---|
| **Ministry:** | Energy |
| **Meeting Date:** | May 9, 2017 |
| **Agenda Class:** | Discussion (In Camera) |
| **Last reviewed by:** TB/MBC March 24, 2015 | **Tracking to: Fast Track** Cabinet (May 10, 2017) |

| **SUBMISSION TITLE:** | 2017-2019 Business Plan for Ontario Power Generation |
|---|---|

**Prepared based on draft submission**

## I. DECISION BEFORE THE BOARD

- Receive Ontario Power Generation's (OPG) 2017-2019 Business Plan

## II. RECOMMENDATIONS:

| | |
|---|---|
| • Receive the 2016-2018 business plan for Ontario Power Generation | *Receive* |
| • Note Minister of Energy will provide concurrence with OPG's Business Plan | *Note* |
| • Approval giving special status to OPG under Section 5.3 of the MBC Travel, Meal and Hospitality Expenses Directive, giving it the authority to approve international travel for its employees. | *tbd* |

## III. FINANCIAL SUMMARY

| **$ Millions** | **2014-15** | **2015-16** | **2016-17** |
|---|---|---|---|
| Initiative cost requested | 0.0 | 0.0 | 0.0 |
| Initiative cost recommended | 0.0 | 0.0 | 0.0 |
| Recommended program base | 0.0 | 0.0 | 0.0 |
| Offset Recommended (Specify Ministry/Program) | 0.0 | 0.0 | 0.0 |
| Total Fiscal Impact | 0.0 | 0.0 | 0.0 |

## IV. KEY COMMENTS AND CONSIDERATIONS

As stipulated as part of the 2013-14 Results-based Planning process, the Ministry of Energy is submitting OPG's annual business plans for review by Treasury Board to facilitate incorporating implications into the Province's fiscal plan.

It is under the responsibility of the Minister of Energy on whether or not to provide the Minister's concurrence of OPG's annual multi-year business plan. The Treasury Board submission provides the Minister of Energy with an opportunity to highlight why concurrence is being given and any conditions placed on it. Appendix C provides more information on the concurrence process and the 2013-14 minute.

Under the memorandum of agreement (MOA, July 2015) between the Province (as sole shareholder and the Ministry of Energy as representative of the shareholder) and OPG, the company is required to annually submit its board-approved multi-year business plan to the Minister of Energy for concurrence. The concurrence letter from the Minister to the company will note key elements of the business plan,

how these elements relate to the policy direction and priorities of the Province, and the government's expectation for the performance of the company including indicating any elements of the business plan the government does not concur.

In November 2016, OPG submitted its 2017-2019 Business Plan (Board-approved?) to the Ministry.

Ontario's Fair Hydro Plan (OFHP) is not reflected in OPG's latest Business Plan. The Ministry notes the following OFHP implications for OPG:

- As part of supporting the financing and administration of the global adjustment smoothing mechanism, OPG would purchase the right to future cash flows from IESO, financed by capital infusions from the Province (Equity injection via an operating asset, raised from higher debt, with additional shares to the Province as sole shareholder), and by third-party lending (check with OFA – currently 256.3M common shares increasing to….needed? Perhaps explain why there are shares given province is sole shareholder, linked to value of OPG assets/equity)
  - These changes are expected to be fiscally neutral as they would result in an increase in Provincial interest on debt, offset by increases in OPG net income
  - In addition, the Province's net debt position should remain unchanged (Check is OFA)

Financial figures from the OPG Business Plan are included and supplemented with forecast changes for the Ontario Financing Authriy, MOF for OFHP implications as part of Province's finalized fiscal plan for the 2017 Budget. The Ministry of Energy indicates it is generally supportive of the fiscal, financial and operational strategies laid out in the business plan.

The earnings before tax (net income and income tax payments in lieu – PILs) of OPG are consolidated on the Province's financial statements and have one-for-one impact on the Province's surplus/deficit position, excluding adjustments that the Province may make upon consolidation of OPG's financials (e.g., unrealized gains or losses). OPG is expected to submit its next multi-year business plan later this year for the period starting January 1, 2017.

***Overview of Current Business Plan***

OPG's 2017-19 Business Plan details key company undertakings such as business transformation and nuclear refurbishment that will have a substantial electricity system benefit, ratepayer and shareholder impacts. These items were flagged in the previous year's multi-year business plan as well.

- Key Income Statement Forecasts:
  - The figures in the OPG Board approved 2017-2019 Business Plan, along with OFA forecast updates for OFHP (TBC), show a decrease in earnings before tax of $84M in 2017-18 and $89M in 2017-18, followed by increases of $59M in 2018-19 and $120M in 2019-20 over the estimates in the 2016 Budget..

    OPG is forecasting net income attributable to the Shareholder to reach $1B in 2021, from $436M in 2016. Net income in 2017 is forecast to increase as a result of new regulated rates, a gain on sale of OPG's head office, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations

    Net income in 2018 and 2019 is planned to increase, primarily due to higher production, and earnings from oncoming stations including Nanticoke solar in 2019. Return-on-equity (ROE) is estimated to increase from 4.2% in 2016 to 7.3% by 2021.

    In early January 2017, subsequent to the OPG Board's approval of the 2017-2019 Business Plan, OPG reached an agreement with KingSett Canadian Real Estate Income Fund LP for the purchase of OPG's head office property. The net gain is estimated to be

$285M and will be distributed to the Trillium Trust.

These estimates are highly dependent on electricity and financial market conditions, regulatory decisions by the Ontario Energy Board (OEB), potential changes to accounting standards or the basis of consolidation in Public Accounts, operational performance, and/or government policy, which can change materially. The first table in Appendix G shows the changes to Province's fiscal plan.

- Annual Operations, Maintenance & Administration (OM&A) expenses from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year.
- The cost of OPG generated electricity to customers is projected to remain ~40% below the average non-OPG cost of electricity to 2018, and over ~30% by 2021. Note: OPG provides predominantly, lower-cost baseload generating capability, rather than more expensive peaking generating capability.
- Headcount Efficiencies – Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3.

  OPG continues ramping up recruitment in 2017 to fill key vacancies in certain areas (particularly in the nuclear business unit) due to high levels of attrition, as well as continued Pickering operations beyond 2020. OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower than 2017 levels in 2021.

  OPG has hired ~95 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015. OPG intends to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations.

- Key Projects:
  - The plan assumes ongoing operations at Pickering for about four years beyond 2020, and as approved by Cabinet, the execution of the Darlington refurbishment consistent with approved budget of $12.8 billion (including escalation and interest), is now under way. First unit refurbishment began in October 2016, Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, assuming necessary concurrence from the Province is obtained.
  - Sustaining capital expenditures average $570M per year include nuclear expenditures unrelated to Darlington refurbishment and costs for continued operation of Pickering (e.g., Upgrades at Sir Adam Beck and upgrades to DeCewII, and investments in current and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility).
- Rate Application to the OEB:
  - OPG's 2017-19 Business Plan is dependent on the outcome of its rate filing with the OEB for the five-year period from 2017-2021. Oral hearings began February 2017, decision expected in Q3 2017.
    - OPG 2017-2019 BP assumes new rates effective January 1, 2017. The OEB setting a later effective date would negatively impact OPG's 2017-18 fiscal year net income by ~$50-60M per month of delay.
  - On March 2, 2017 the Province filed an amendment to O.Reg.53/05, which enables OPG to smooth its rates based on OPG's total bill impact, rather than on the basis of nuclear

rates only.

- On March 8, 2017 OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year

- OPG Request – Special Stats for OPG to Approve International Travel (Appendix F provides more information):
  - OPG has placed a request with the Ministry for authority to approve international travel for its employees. OPG has asked that this application be included with its BP submission to TB/MBC.
    - Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business.
    - OPG cites the importance of enabling its engagement with the international community (in particular in regards to nuclear safety), procurement activities, and investment and due diligence processes for its pension fund and nuclear funds.
    - OPG requires a high level of international business travel at approximately 90-100 trips annually, while Darlington accounts for 45% and is expected see increases.
    - OPG indicated that the approval process, which took 23 days on average in 2016, delays flight bookings which results in higher costs as airlines raise fares closer to the travel date.

*Other Key Fiscal Risks:*

Regulatory risks: Potential disallowance of recovery of OPG's current or future deferral and variance account balances (including for the proposed nuclear rate smoothing), future treatment of pension costs.

Accounting risks: Any change in the basis of accounting used for consolidation of OPG on the Province's financial statements could result in potentially significant fiscal impacts.

Financing Costs: Higher cost public capital market borrowing (vs the Province's borrowing cost for OEFC to lend to OPG) would have a negative fiscal impact.

## APPENDIX A: PROPOSED MINUTE (UNDER DEVELOPMENT)

Note receipt of a Business Plan for Ontario Power Generation.

In this regard,

i.) Note the Minister of Energy will provide Ontario Power Generation (OPG) with a concurrence letter for its Business Plan.

ii.) …..request for special status…international travel

iii.) Direct the Ministry, in consultation with the Ministry of Finance / Ontario Financing Authority, to report back to the Board in early January each year with the approved or latest draft business plans for Ontario Power Generation for fiscal planning purposes.

## APPENDIX C: CONCURRENCE OVERVIEW

Under agreements between the Province (as sole shareholder) and OPG, the company is required to annually submit its multi-year business plan to the Minister of Energy for concurrence. Review of the business plan by Treasury Board prior to concurrence was stipulated as part of the 2013-14 Results-based Planning process (see below).

Concurrence is typically provided to OPG via a letter from the Minister of Energy. The letter will note key elements of the business plan, how these elements relate to the policy direction and priorities of the Province, and the government's expectation for the performance of the company. The letter may also indicate any elements of the business plan of which the government does not concur and/or provide additional guidance on expectations going forward.

The current submission looks at the multi-year business plan for OPG covering 2016-2018. Concurrence with the plan is still pending.

Below is the 2013-14 Results-based Plan Minute:

Directed the Ministry of Energy and its agencies, Ontario Power Generation Inc. and Hydro One Inc., in consultation with the Ontario Financing Authority, to report back:

- Annually each autumn with the respective multi-year business plans of the agencies as approved by the Boards of the companies, for review by Treasury Board/Management Board of Cabinet.
  - In this regard, the report should include the following, on a calendar and government fiscal year basis:
  - Multi-year financial and operational targets, including net income and earnings-before-tax.
  - Projected revenues and cash flows to the Province, including the Ontario Electricity Financial Corporation.
  - Planned financings from the Ontario Electricity Financial Corporation.
- Quarterly with financial projection updates and progress reports on the agencies' respective business plan targets and any other new developments, initiatives or risks that may have a material fiscal impact on the Province including variance analysis of last quarter and year-to-date against the annual business plan reviewed by Treasury Board/Management Board of Cabinet.

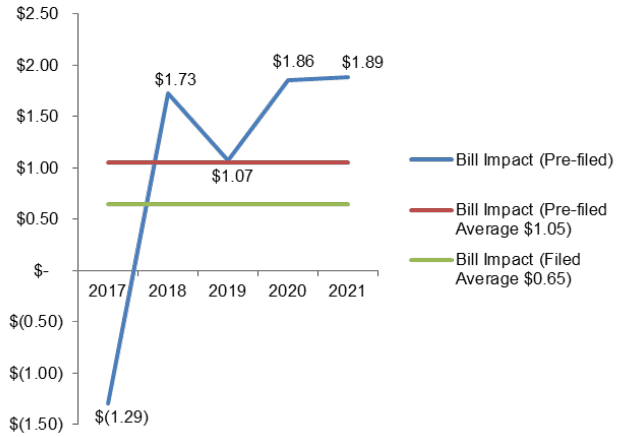
## APPENDIX D: SUMMARY OF KEY HIGHLIGHTS FROM OPG BUSINESS PLAN

The Ministry indicates OPG financial and ratepayer forecasts show some changes from last year's business plan projections, as reviewed by Treasury Board in September 2016.

This is in part because 2017 net income is forecast to increase as a result of new regulated rates, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations.

Also, actions taken by the Province and OPG in early 2017 to enable OPG to smooth its rates based on OPG's weighted average hydroelectric and nuclear all-in rates (which approximates total bill impact), rather than on the basis of nuclear base rates only. OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average year-over-year annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year.

**Comparison of Annual Bill Impact ($/Month per year)**



*Production and Total Cost of Generation*

OPG's production is expected to fall to 69.8 TWh by 2021 from 77.6 TWh in 2016. This reflects a declining trend in the Darlington production due to refurbishment outages starting in October 2016 and overlaps between unit refurbishments, as well as, the Pickering Vacuum Building Outage (VBO) in 2021 requiring the shutdown of all units for the duration of the outage.

Total generating cost shows an increasing trend over the planning period relative to 2016, reflecting Lower nuclear production due to Darlington refurbishment outages, increased sustaining capital spending on two large hydroelectric projects (The Lower Mattagami dam safety upgrade and the Sir Adam Beck I GS power canal liner rehabilitation).

*Operations, Maintenance and Administration (OM&A) Expenses*

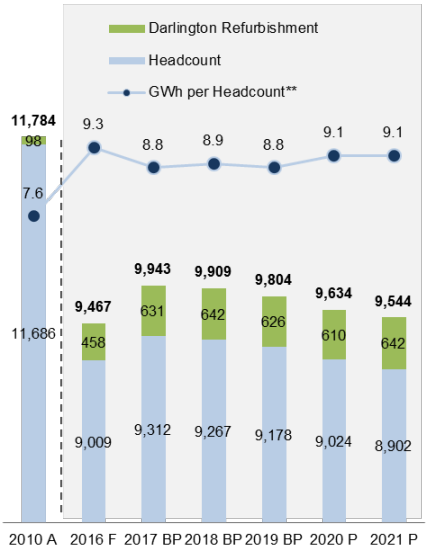
Annual OM&A expenses (excluding Darlington refurbishment OM&A) from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year. Increases related to changes in nuclear outage scope at Darlington and planned hiring to fill staffing gaps, and enabling Pickering continued operations, offset by declining pension related costs, due to projected pension asset returns, increases employee contributions, and new method for dermining interest components of pension costs.

*Business Transformation and Labour Costs*

As part of a company-wide business transformation, OPG saved over $1B in costs from January 2011 to December 2016:

- Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3.
- OPG continues recruitment in 2017 to fill key vacancies in certain areas (particularly in the Nuclear business unit) due to high levels of attrition, as well as continued Pickering operations beyond 2020
  - OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower than 2017 levels in 2021
  - To date in 2017, OPG has hired ~95 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015
    - Intention is to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations, per the terms of the collective agreement

**Ongoing Operations Regular Headcount and Productivity**



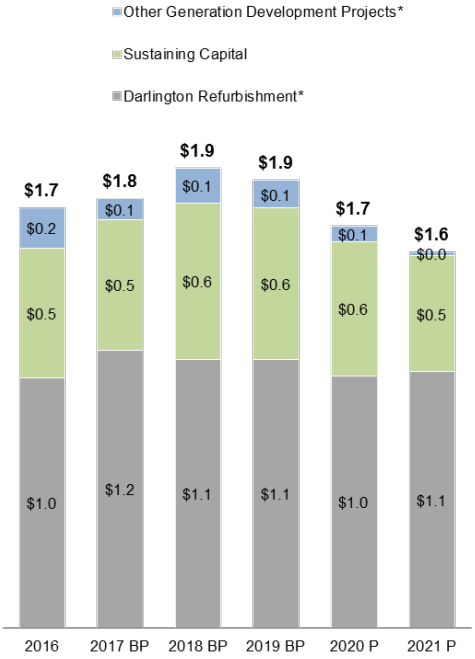
**Production is normalized by adding back hydroelectric surplus baseload generation losses and, in 2017- 2021, the lower production due to the Darlington refurbishment outages

*Projects and Capital Expenditures*

OPG continues delivery of major projects over the plan period, including:

- Darlington Refurbishment – Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, requiring concurrence from the Province prior to commencement
- Sustaining Capital – Expenditures average $570M, including:
  - Nuclear expenditures unrelated to refurbishment at Darlington and costs for continued operation of Pickering
  - Regulated hydro expenditures including upgrades at Sir Adam Beck and upgrades to DeCew ll
  - Lower Mattagami upgrades in 2018 and 2019
- Other Generation Development Projects – Investments in current (e.g., hydroelectric) and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility by 2019

**Capital Expenditure Estimates ($B)**



*Includes expenditures budgeted by Support Services

*Sales*

The following table summarizes sales recently completed and currently underway (as of April 2017). The fiscal plan implications of the completed OPG Head Office sale is reflected in the 2017 Budget. (TBC).

| | OPG Head Office | R.L. Hearn Site | Lakeview Site |
|---|---|---|---|
| **Current Status** | Completed | Agreement Reached | OPG and Infrastructure Ontario are preparing for marketing |
| **Site Description** | 700 University Ave. and parking garage at 40 Murray St. in Toronto | ~33 acres at the R.L. Hearn site in Toronto | ~67 acres to be transferred by the purchaser to the City of Mississauga (Municipal Park Lands) and ~110 acres to be developed for mixed uses (Uplands) |
| **Buyer** | KingSett Canadian Real Estate Income Fund LP | Studios of America Limited Partner | TBD |
| **Value** | Estimated up-front 2017-18 fiscal impact of ~$375M (includes after-tax gain as well as PILs to OEFC) | TBD | TBD |
| **Other Considerations** | N/A | N/A | Negotiations with the City have been lengthy and costs to remediate/prepare site may be significant due to concerns regarding site condition |
| **Timing** | The sale closed in April 2017 | Anticipated to close in Q3 2017 | Marketing is planned to start in April 2017, pending negotiations with the City, with an anticipated closing in 2017 |

## APPENDIX E: PROVINCIAL FISCAL PLAN IMPLICATIONS OF BUSINESS PLANS PROCEEDING – (UNDER DEVELOPMENT)

Ontario Power Generation is a Government Business Enterprises (GBE), and consolidated to the Province's financials on a modified equity basis. The Province's Fiscal Plan reflects the entity as Income from Business Enterprises and Electricity Payments-in-Lieu of Taxes (PILs) (As Revenue only).

| **Revenue** ($millions) | **2016-17** | **2017-18** | **2018-19** | **2019-20** |
|---|---|---|---|---|
| **2016 Ontario Budget** | | | | |
| Ontario Power Generation | | | | |
| Net Income | 471 | 586 | 673 | 705 |

| **TOTAL OF OPG CHANGES** | ? | ? | ? | ? |

OPG's fiscal results are also impacted by Other PILs to the Ontario Electricity Financial Corporation (OEFC) and the Province. The following table reflects these others impacts in addition to the latest net income and income tax PILs from OPG's August update.

Table below to be updated – OFA

| **Revenue** ($millions) | **2016-17** | **2017-18** | **2018-19** | **2019-20** |
|---|---|---|---|---|
| **2016 Ontario Budget** | | | | |
| Combined Other PILs & Other GRC | 342 | 351 | 359 | |
| Other PILs (GRC to OEFC, Proxy Property Tax) | 213 | 223 | 232 | |
| Other GRC (to MOF & Niagara Parks Commission)[1] | 129 | 128 | 137 | |
| **2016-18 OPG Business Plan** | | | | |
| Combined Other PILs & Other GRC[2] | 353 | 358 | 366 | |
| Other PILs (GRC to OEFC, Proxy Property Tax)[3] | 215 | 220 | 220 | |
| Other PILs (GRC to MOF & Niagara Parks Commission)[3] | 135 | 140 | 140 | |
| **OPG Monthly Update (August 2016)** | | | | |
| Net Income | 361 | - | - | |
| Income Tax PILs to OEFC | 98 | - | - | |

1. The GRC to MOF & Niagara Parks Commission (NPC) is provided to enable comparison to the 2016-18 Business Plan.
2. Include GRC to OEFC, GRC to MOF and NPC and Proxy Property Tax, provided to TBS by Energy on September 14, 2016.
3. Preliminary 2016-19 Business Plan forecast provided by Energy, January 29, 2016. (Do not add to the Combined Other PILs & Other GRC row, likely due to rounding.)

---

Hi John, below is proposed cover email for when we send out the updated electricity outlook attached. We are still confirming with SIFB that we are coordinated on the "unpacking" and will also try and get other updates as we can e.g., NUGs, IOD, IFRS. But let us know of any general comments you may have.

S:\Users\CEF\Hydro 2017\OEFC\RbP\Outlook\12. December

Hi

Attached is our Electricity update as of December xx, 2017. **Key changes** in the electricity outlook since our previous update include the following.

- The full projected IFRS adjustments are reflected in OPG's net income outlook lowering OPG net income by $475M in 2018-19, $500M in 2019-20 and $750M in 2020-21
- The revenue impact related to the asset optimization strategy are now re-categorized from sales and rental to respective electricity lines as dispositions have been completed. This includes impacts of OPG's head office sale in 2017-18 and ongoing net income impact of Hydro One share sales. These re-categorizations should be largely fiscally-neutral
- The negative impact of the OEB tax decision (about $15M per year) with respect to Hydro One's transmission rate application, which was reflected in the previous electricity outlook has been reversed pending decision on Hydro One's motion to review and appeal. In addition, Hydro One clarified that if the OEB decision is upheld it would be reflected as a one-time write-down rather than an ongoing annual impact. This risk is reflected in the Risk table in the "Revenue (Risks)" tab.
- Other minor updates.

**Key risks** that could affect the electricity outlook include

- The final outcome of Hydro One's motion to review OEB decision with respect to sharing of tax savings (negative risk)
- OEB decision on OPG's rate application for the 2017 to 2021 period (one-time negative impact in 2017-18)
- ONFA adjustment (currently a positive risk in 2017-18)

There is still **information to come** that could change the outlook before the Document. Key information to come includes the following

- OEB decision and order with respect to OPG's rate application for the 2017 to 2021 period (expected soon)
- OEB decision on Hydro One's distribution rate application (expected 1$^{st}$ half of 2018)
- Year-end results for OPG and Hydro One

- Monthly results for OPG
- ONFA adjustment result as of December 31, 2017
- Decision on PRRT submission to continue ESDI payments to OEFC beyond 2017-18

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's current 70% ownership share, after the initial IPO in 2015 [and the secondary offering in April 2016]. Net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 outlook reflects OPG's latest monthly update. Out-years reflect OPG's preliminary 2017-19 business plan and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections and as fiscalized by CEFD staff.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering are currently reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

## Electricity Sector Change Since Budget

**$ Millions**

| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|
| **Changes from Budget 2017 as of October 2017** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | 333 | (487) | (517) | (774) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 increase mainly due to re-categorization of of OPG head office facilities from Sales and Rentals to OPG net income. Also deferral of Pickering Unit 6 planned outage to Jan 18, deferral of sale of land at Hearn site from Q1 2017 to later in 2017, partially offsdet by lower gropss margin.<br><br>Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS afdjustment impacts in those years. |
| ONFA and other Fair Value Adjustments | 35 | - | - | - | - | Largely revision to ONFA fair value as of March 31, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (190) | (235) | (216) | (234) | 2016-17 slight decrease from Budget 2017 Interim projection.<br>2017-18 onwards reflects i) recategorization of Hydro One disposition impacts from sales and Rentals to Hydro One net income, ii) impact of OEB decision on Hydro One rates, iii) interest expense on Avitsa debentures (in 2017-18 and 2018-19) and iv) update to Hydro One model update based on Hydro One Q2 results. |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **142.8** | **(722)** | **(733)** | **(1,008)** | |
| **Other Fees and Licences** | **-** | **-** | **-** | **-** | **-** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | (181) | - | - | - | Changes in the Proviision (ESDI) expense reflect net changes in the outlook for Public Debt Interest, and OPG and HOI net income (excludinging ONFA adjustments). |
| Public Debt Interest - Electricity Sector | (22) | 38 | 38 | 38 | 38 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to Hydro equity. |
| **Total Electricity Expenses of the Province** | **31** | **(143)** | **38** | **38** | **38** | |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | 71 | 3 | (7) | (10) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | - | - | - | - | |
| Power Supply Contract Recoveries | 99 | (0) | (0) | (0) | 0 | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Net Reduction of Power Purchase Contracts | 0.1 | (0) | (0) | (0) | (0) | |
| Other Fees and Licences | - | - | - | - | - | |
| Revenue Pool Residual | - | - | - | | - | |
| Miscellaneous | 14 | - | - | - | - | Higher than projected at Interim. |
| **Expenses** | | | | | | |
| Interest on Debt | 19 | (53) | (64) | (69) | (98) | 2016-17 higher than projected at Interim.<br>2017-18 reflects revised debt interest outlook net of revisions to OEFC interest revenue from OPG and Province. |
| Power Supply Contract Costs | (99) | 0 | 0 | 0 | (0) | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Electricity Consumer Price Protection Fund | - | - | - | - | - | |
| Demand Management Support Costs | 1.8 | - | - | - | - | |
| Provision for Electricity Sector | (53) | 181 | - | - | - | Changes in the Proviision (ESDI) expense (negative expense or revenue to OEFC) reflect net changes in the outlook for Public Debt Interest, and OPG and HOI net income (excludinging ONFA adjustments). |
| Other (Finance) | (1.0) | - | - | - | - | |
| **Total OEFC Income** | **(63)** | **199** | **(61)** | **(76)** | **(108)** | |

## Electricity Sector Outlook (PSAB)

| Negative Revenue Risks | $ Millions | | | |
|---|---|---|---|---|
| ($ millions) | Plan | | | |
| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | (120) | (120) | (120) | (120) |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) |
| **Regulatory** | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | (600) | | | |
| Regulatory Risk - Timing of Rate Decision[7] | (540) | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | (187) | (162) | (179) | (210) |
| Nuclear Liabilities Cash vs. Accrual[9] | (450) | (450) | (450) | (450) |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | |
| **Accounting** | | | | |
| OPG IFRS Consolidation Risks | | | | |
| **Other Risks** | | | | |
| Avista Acquisition - Termination fee | (51) | | | |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimi**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. The OEB directed a switch to cash-based accounting for years 2014 and 2015. However, the OEB also directed OPG to track the difference between cash based and accrual based accounting in a deferral account, while a generic proceeding is underway for all OEB-regulated electric and gas utilities. OEB September 2017 Report, recommends continuance of variance account which would mitigate this risk. However, the final decision (expected in Fall 2017) will be with the OEB Board.

7. Risk refelects OPG impact if the OEB rate rulings are applied as of the final decision date rather than retroactive to January 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive.

8. Reflects OEB staff report (May 2017) reccomendations with respect to OPG's rate application. (Inlcudes OPG rate application updates).

9. Risk refelects impact of OEB decision that OPG switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB staff report (May 2017) appears to mitigate this risk as it makes no decision and recommends revisiting this issue in 5 years at next OEB application.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. The estimated annual ongoing impact of this is factored into the current outlook. This risk reflects the impact if a decision is made by Hydro One that the impact of the ruling has to be accounted for as an immediate one-time write-down.
Note: Corresponding Positive Revenue Risks would also need to be incorporated for 2018-19 to 2020-21 if this risk is to be recognized. The risk reflect ther roughly 50% proncial ownership pending recategorization from teh AO Sales and Rentals outlook.

11. OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. This Electricity Outlook pick up teh additional IFRS risk.
Table below outlines OPG IFRS Risks versus what is built into the Fiscal Plan.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

**zation strategy or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income.

**Changes from Budget 2017 as of October 2017** **$ Millions**

| | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|
| **Revenue** | | | | | | |
| Debt Retirement Charge | (4) | - | - | - | - | |
| Payments-in-lieu of tax: | | | | | | |
| OPG | (78) | 79 | 12 | 4 | 2 | 2016-17 variance is largely due to method of reporting OPG PILs by OEFC and OPG. |
| Legacy Hydro One (Including Brampton) | (3) | - | - | - | - | |
| Hydro One CIT dedicated to OEFC | 5 | (8) | (9) | (10) | (12) | Adjustment based on updated information in Hydro One rate application |
| MEUs | 68 | - | - | - | - | Large increase in 2016-17 from $80M payment during transfer of H01 Brampton to new consolidated MEU Alectra. |
| Total PILs | (9) | 71 | 3 | (7) | (10) | |
| Interest : | | | | | | |
| OPG | (12) | 1 | 26 | 40 | 13 | Update to OPG interest outlook (wrt interest on OEFC loan). |
| H1 | - | - | - | - | - | |
| IESO | (1) | - | - | - | - | |
| Province | 22 | (38) | (38) | (38) | (38) | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to Hydro equity. |
| Other | 10 | 15 | 15 | 5 | 5 | |
| Total Interest | 19 | (22) | 3 | 7 | (20) | |
| Power Supply Contract Recoveries | 99 | (0) | (0) | (0) | 0 | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Amortization of NUG liability | 0 | (0) | (0) | (0) | (0) | |
| Electricity sector dedicated income | (41) | (219) | - | - | - | Changes to ESDI (offset ny MoF Provision expense) largely reflect combined revisions to OPG and Hydro One net income and revisions to public debt intetest. |
| Gain to OEFC under s. 50.3 | 411 | 550 | - | - | - | |
| Miscellaneous | 14 | - | - | - | - | |
| | 489 | 380 | 6 | (0) | (30) | |
| **Expense** | | | | | | |
| Debt interest | - | 31 | 67 | 76 | 78 | Revised outlook for OEFC debt interest outlook |
| Interest on nuclear risk funding | - | - | - | - | - | |
| Demand Management Support Costs | (2) | - | - | - | - | |
| Amortization of deferred debt costs | - | - | - | - | - | |
| Power Supply Contract Costs | 99 | (0) | (0) | (0) | 0 | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Debt Guarantee fee | - | - | - | - | - | |
| Operating | 1 | - | - | - | - | |
| | 98 | 31 | 67 | 76 | 78 | |

| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **306** | **118** | **41** | **255** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **306** | | | |

**Notes:**

1. The Hydro One financials above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering are currently reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**1. PROGRAM/BRANCH:** Corporate and Electricity Finance Division / Electricity Finance Branch

## 2. SUMMARY OF REQUEST:

The Ministry of Finance requests Treasury Board to approve a Treasury Board Order under section 1.0.8 of the Financial Administration Act for $432,261,237 for Ontario Electricity Financial Corporation (OEFC) Dedicated Electricity Earnings Other Transactions (Vote-Item 1203-12) for the fiscal year 2017-18 offset from the Contingency Fund (Vote-Item 3404-02).

The current estimate for Electricity Sector Dedicated Income (ESDI) for 2017-18 stands at $957,079,537. The 2017-18 Printed Estimated amount approved was $524,818,300. As a result, a Treasury Board Order (TBO) approval is requested in the amount of $432,261,237 to make up the funding shortfall.

This request is fiscally neutral as the expense related to Vote Item 1203-12 is fully offset by OEFC Electricity Sector Dedicated Income on consolidation.

This supports the Province's policy commitment to dedicate the cumulative combined net income of OPG and Hydro One in excess of the Province's interest cost of its investment in these companies to OEFC in order to help pay down the legacy debt and other liabilities of the former Ontario Hydro.

## 3. SUMMARY OF FINANCIAL IMPLICATIONS

The following two tables provide a summary of the funding request for the Ministry, by standard account and by program area. Detailed financial information is provided in the Appendices.

**$Million (except FTEs)**

| Ministry Summary | | | | | |
|---|---|---|---|---|---|
| PSAB * | **2015-16** | **2016-17** | **2017-18** | **2018-19** | **Total** |
| Salaries/Wages | | | | | |
| Employee Benefits | | | | | |
| Transportation & communication | | | | | |
| Services | | | | | |
| Supplies & Equipment | | | | | |
| Other Transactions | | | 432.3 | | |

| Division/Branch | X | X | | | |
| Total | | | 432.3 | | |

## 4. BACKGROUND:

The estimated final year-end 2017-18 ESDI of $957.1 million, is based on Ontario Power Generation's (OPG) net income, including the performance of OPG's segregated nuclear funds as at March 31, 2018 and the Province's share of Hydro One net income as at March 31, 2018, as reported in their respective financial statements. The ESDI amount reflects the following adjustments:

- a net adjustment of -$300 million, comprised of adjustments to OPG net income to report based on International Financial Reporting Standards. The corporations' stand-alone financials are reported based on U.S. Generally Accepted Accounting Principles, and

- 2017-18 ESDI will also include a prior-year adjustment of $15 million related to Hydro One Brampton 2016-17 net income. This amount was used in reporting Electricity Sector Dedicated Income in the Ontario Electricity Financial Corporation's 2016-17 ESDI amounts but was not included in the 2016-17 Public Accounts as Hydro One Brampton financials had not been finalized. This prior-year adjustment aligns the Province's Public Accounts with OEFC financial reporting.

The 2017-18 Printed Estimates ESDI provision from Budget 2017 was $524.8 million. The increased ESDI compared to the 2017-18 printed estimates is due to higher than expected OPG income.

| | $ Millions | | |
|---|---|---|---|
| | **Printed Estimates ESDI 2017-18** | **Actual ESDI 2017-18** | **Change** |
| OPG Net Income (US GAAP) | 497 | 1,331 | 834 |
| OPG - IFRS Adjustment[1] | - | (300) | (300) |
| Hydro One Net Income (US GAAP) | 520 | 368 | (152) |
| **Total** | **1,017** | **1,399** | **382** |
| OPG – Public Debt Interest | (300) | (300) | - |
| OPG FHT Equity Injection Interest Cost[2] | - | (3) | (3) |
| Hydro One – Public Debt Interest | (192) | (154) | 38 |
| Prior-year adjustment | | 15 | 15 |
| **ESDI (Actual per OEFC Financial Statement)** | **525** | **957** | **432** |

Note: Numbers may not add up due to rounding.

1 This reflects the estimated impact of a provincial accounting consolidation adjustment from U.S. Generally Accepted Accounting Principles (US GAAP, the companies' reporting basis) to International Financial Reporting Standards (IFRS) in reflecting the financial results of the electricity GBEs in the Province's financial statements.

2 See Appendix 1 for explanatory note

OEFC is an Agency of the Province and is consolidated into the financial statements of the Province of Ontario on a line-by-line basis.

OEFC is the legal successor to the former Ontario Hydro and is responsible for managing and paying down the former Ontario Hydro's debt and certain other liabilities, including the portion that is "stranded debt".

The transfer of electricity sector dedicated earnings to OEFC is in accordance with policy adopted by the Government in 1999-2000.

The Province has committed to dedicate the cumulative combined net income of OPG and Hydro One, in excess of the Province's interest cost of its investment in its electricity subsidiaries, to OEFC.

Since Estimates moved from a cash basis to an accrual basis, Treasury Board has supported this policy, approving in the Ministry of Finance's appropriations of

the transfer of electricity sector earnings in excess of the interest carrying cost of the investment in the sector to OEFC for the benefit of electricity consumers.

The Province's net income from OPG and Hydro One in excess of the Province's interest cost of its investment in its electricity subsidiaries would be reflected as revenue in the operation of OEFC by way of receiving this ESDI provision from the Ministry of Finance.

## 5. ADMINISTRATIVE IMPACTS:

N/A

## 6. RISKS:

*Past and Future ESDI transfers to OEFC*
This transaction is consistent with government policy to dedicate its electricity sector revenues to OEFC to service and pay down the legacy debt and other liabilities of the former Ontario Hydro.

If approval not be provided for this transfer it calls into question prior policy commitments to the OEFC as well as future commitments, as part of the responsible management and pay down of electricity sector debt and other liabilities.

# APPENDIX 1

## INTEREST COST PROPOSAL – OPG EQUITY INJECTION

The cost of funding the Province's increasing investment into OPG as a result of the Fair Hydro Plan should be included in the determination of Electricity Sector Dedicated Income to the Ontario Electricity Financial Corporation (OEFC). This note outlines why and how this would be calculated and reported.

**CONTEXT**

- The Province has long held a policy commitment to dedicate to OEFC the Electricity Sector Dedicated Income (ESDI), defined as:
  *the combined net incomes of Ontario Power Generation (OPG) and Hydro One (in proportion to provincial ownership) in excess of the costs of its investment in its electricity subsidiaries.*

  - In other words:

| (i) | | (ii) | | (iii) | | (iv) |
|---|---|---|---|---|---|---|
| ESDI | = | Net Income of OPG | + | Net Income of Hydro One (proportionate to Provincial ownership) | - | Cost of Investment in OPG and Hydro One |

- As a result of implementation of the Fair Hydro Plan, the Province provides an equity injection to OPG to lend to its wholly-owned subsidiary, the Fair Hydro Trust, which purchases investment assets from the IESO. In return for the equity injection, the Province receives Class A non-voting shares from OPG.

- The Provincial equity injection - as part of the Fair Hydro Plan - affects ESDI by
  - increasing the return or net income (ii from above) OPG provides to the province, and
  - increasing the costs of the (Provincial) investment in OPG (iv from above) due to provincial borrowing to fund the equity injection.

- While the increase in net income due to the Fair Hydro Plan will be recorded in OPG's financial statements, additional consideration is required as to how the Province will account for the cost of its increased investment in OPG.

- Over the 2017-18 fiscal year, the Province borrowed $721 million to invest in OPG. In return OPG issued 16.8 million Class A shares.

- To remain consistent with original policy commitment of the ESDI, the Provincial borrowing to fund this equity investment will need to be included in the cost of investment in OPG (iv from above).

**BACKGROUND**

- As a result of the electricity sector restructuring on April 1, 1999, the Province exchanged equity of $5,126 million and $3,759 million in OPG and Hydro One respectively for notes payable (debt) to OEFC. This debt had an interest rate of 5.85%, charged monthly with a maturity date from 2039-2041. At the outset this resulted in an interest cost of approximately $520 million.
  - For example, the 2000 OEFC Annual report lists ESDI as $383 million, where OPG and Hydro One earned an aggregate of $903 million less the provincial interest cost of $520 million.

  - Note: As a result of broadening the ownership of Hydro One, the Provincial ownership in Hydro One was reduced. The Province used part of the proceeds to pay off the original $3,759 million notes payable to OEFC. As a result, the cost of its investment in OPG and Hydro One decreased as well. In the 2017 OEFC Annual Report this cost of investment dropped from $520 million to $514 million.

**PROVINCIAL BORROWING COSTS**

- The $721M equity injection occurred over two installments in the 2017-18 fiscal year:

| Transaction Date | OFA's equity injection amount ($) |
|---|---|
| **2017-12-20** | 518,760,000.00 |
| **2018-03-22** | 202,400,000.00 |

- To assess the provincial borrowing costs, the fiscal year 2017-18 weighted average cost of capital of 2.23% was used1.
  - Though this weighted average cost of capital does not reflect the interest rate at each transaction date, these equity injections came via funding from the provincial liquid reserves, rather than through incremental borrowing on those dates.

- This results in $3M in additional interest costs for the provincial ownership in OPG in 2017-18.

Hi John

Attached is our DRAFT preliminary ESDI estimate (not yet approved by Ron). It is preliminary as we are still waiting for the final OPG IFRS adjustments from OPCD. So the figure could still change. I have asked OPCD if we could get this early next week. No reply on that yet.

Will provide finals as soon as we are able.

Thanks, Have a good long weekend.

# ELECTRICTY SECTOR DEDICTED NET INCOME TREASURY BOARD ORDER [DRAFT]

**1. PROGRAM/BRANCH:** Corporate and Electricity Finance Division / Electricity Finance Branch

## 2. SUMMARY OF REQUEST:

The Ministry of Finance requests Treasury Board to approve a Treasury Board Order under section 1.0.8 of the Financial Administration Act for $432,261,237 for Ontario Electricity Financial Corporation (OEFC) Dedicated Electricity Earnings Other Transactions (Vote-Item 1203-12) for the fiscal year 2017-18 offset from the Contingency Fund (Vote-Item 3404-02).

The current estimate for Electricity Sector Dedicated Income (ESDI) for 2017-18 stands at $957,079,537. The 2017-18 Printed Estimated amount approved was $524,818,300. As a result, a Treasury Board Order (TBO) approval is requested in the amount of $432,261,237 to make up the funding shortfall.

This request is fiscally neutral as the expense related to Vote Item 1203-12 is fully offset by OEFC Electricity Sector Dedicated Income on consolidation.

This supports the Province's policy commitment to dedicate the cumulative combined net income of OPG and Hydro One in excess of the Province's interest cost of its investment in these companies to OEFC in order to help pay down the legacy debt and other liabilities of the former Ontario Hydro.

## 3. SUMMARY OF FINANCIAL IMPLICATIONS

## 4. BACKGROUND:

The estimated final year-end 2017-18 ESDI of $957.1 million, is based on Ontario Power Generation's (OPG) net income, including the performance of OPG's segregated nuclear funds as at March 31, 2018 and the Province's share of Hydro One net income as at March 31, 2018, as reported in their respective financial statements. The ESDI amount reflects the following adjustments:

- a net adjustment of -$300 million, comprised of adjustments to OPG net income to report based on International Financial Reporting Standards. The corporations' stand-alone financials are reported based on U.S. Generally Accepted Accounting Principles, and

- 2017-18 ESDI will also include a prior-year adjustment of $15 million related to Hydro One Brampton 2016-17 net income. This amount was used in reporting Electricity Sector Dedicated Income in the Ontario Electricity Financial Corporation's 2016-17 ESDI amounts but was not included in the 2016-17 Public Accounts as Hydro One Brampton financials had not been finalized. This prior-year adjustment aligns the Province's Public Accounts with OEFC financial reporting.

The 2017-18 Printed Estimates ESDI provision from Budget 2017 was $524.8 million. The increased ESDI compared to the 2017-18 printed estimates is due to higher than expected OPG income.

| | $ Millions | | |
|---|---|---|---|
| | **Printed Estimates ESDI 2017-18** | **Actual ESDI 2017-18** | **Change** |
| OPG Net Income (US GAAP) | 497 | 1,331 | 834 |
| OPG - IFRS Adjustment[1] | - | (300) | (300) |
| Hydro One Net Income (US GAAP) | 520 | 368 | (152) |

# APPENDIX 1

## INTEREST COST PROPOSAL – OPG EQUITY INJECTION

The cost of funding the Province's increasing investment into OPG as a result of the Fair Hydro Plan should be included in the determination of Electricity Sector Dedicated Income to the Ontario Electricity Financial Corporation (OEFC). This note outlines why and how this would be calculated and reported.

**CONTEXT**

- The Province has long held a policy commitment to dedicate to OEFC the Electricity Sector Dedicated Income (ESDI), defined as:
  *the combined net incomes of Ontario Power Generation (OPG) and Hydro One (in proportion to provincial ownership) in excess of the costs of its investment in its electricity subsidiaries.*

  - In other words:

| (i) | | (ii) | | (iii) | | (iv) |
|---|---|---|---|---|---|---|
| ESDI | = | Net Income of OPG | + | Net Income of Hydro One (proportionate to Provincial ownership) | - | Cost of Investment in OPG and Hydro One |

- As a result of implementation of the Fair Hydro Plan, the Province provides an equity injection to OPG to lend to its wholly-owned subsidiary, the Fair Hydro Trust, which purchases investment assets from the IESO. In return for the equity injection, the Province receives Class A non-voting shares from OPG.

- The Provincial equity injection - as part of the Fair Hydro Plan - affects ESDI by
  - increasing the return or net income (ii from above) OPG provides to the province, and
  - increasing the costs of the (Provincial) investment in OPG (iv from above) due to provincial borrowing to fund the equity injection.

- While the increase in net income due to the Fair Hydro Plan will be recorded in OPG's financial statements, additional consideration is required as to how the Province will account for the cost of its increased investment in OPG.

- Over the 2017-18 fiscal year, the Province borrowed $721 million to invest in OPG. In return OPG issued 16.8 million Class A shares.

- To remain consistent with original policy commitment of the ESDI, the Provincial borrowing to fund this equity investment will need to be included in the cost of investment in OPG (iv from above).

**BACKGROUND**

- As a result of the electricity sector restructuring on April 1, 1999, the Province exchanged equity of $5,126 million and $3,759 million in OPG and Hydro One respectively for notes payable (debt) to OEFC. This debt had an interest rate of 5.85%, charged monthly with a maturity date from 2039-2041. At the outset this resulted in an interest cost of approximately $520 million.
  - For example, the 2000 OEFC Annual report lists ESDI as $383 million, where OPG and Hydro One earned an aggregate of $903 million less the provincial interest cost of $520 million.

  - Note: As a result of broadening the ownership of Hydro One, the Provincial ownership in Hydro One was reduced. The Province used part of the proceeds to pay off the original $3,759 million notes payable to OEFC. As a result, the cost of its investment in OPG and Hydro One decreased as well. In the 2017 OEFC Annual Report this cost of investment dropped from $520 million to $514 million.

**PROVINCIAL BORROWING COSTS**

- The $721M equity injection occurred over two installments in the 2017-18 fiscal year:

| Transaction Date | OFA's equity injection amount ($) |
|---|---|
| **2017-12-20** | 518,760,000.00 |
| **2018-03-22** | 202,400,000.00 |

- To assess the provincial borrowing costs, the fiscal year 2017-18 weighted average cost of capital of 2.23% was used1.
  - Though this weighted average cost of capital does not reflect the interest rate at each transaction date, these equity injections came via funding from the provincial liquid reserves, rather than through incremental borrowing on those dates.

- This results in $3M in additional interest costs for the provincial ownership in OPG in 2017-18.

**Attachments:** Electricity Sector Outlook (2018 01 03v4)_reverse unpacking.xlsm

---

Hi John

Attached is the Electricity Update (No AO unpacking). The main changes from the previous distribution are i) IFRS risk moved to outlook ii) OEB OPG rate decision built in iii) ONFA risk moved to outlook iv) OPG in-year updates.

See below proposed cover email.

Bruno

S:\Users\CEF\Hydro 2018\OEFC\RbP\Outlook\01. January

Attached is our Electricity update as of January 4, 2018. **Key changes** in the electricity outlook since our previous update include the following.

- The full projected IFRS adjustments are reflected in OPG's net income outlook lowering OPG net income by $475M in 2018-19, $500M in 2019-20 and $750M in 2020-21
- The estimated impact of OEB's Dec. 28, 2017 decision on OPG's rate application is reflected in the Outlook
- Other OPG updates for 2017-18 include moving the positive projected ONFA adjustment (+$171m) into the OPG forecast rather than reflecting as "risk" and reflecting Other positive in-year updates.
- Eliminating some material OPG "reporting" risks (pension and nuclear liability) as a result of OEB's December decision.
- Based on PRRT approval in principal, current update assumes ESDI continues beyond 2017-18. No bottom line impact, but does affect
- The negative impact of the OEB tax decision (about $15M per year) with respect to Hydro One's transmission rate application, which was reflected in the previous electricity outlook has been reversed pending decision on Hydro One's motion to review and appeal. In addition, Hydro One clarified that if the OEB decision is upheld it would be reflected as a one-time write-down rather than an ongoing annual impact. This risk is reflected in the Risk table in the "Revenue (Risks)" tab.
- Other minor updates.

Note. This Electricity Outlook does not reflect re-categorization of Asset Optimization impacts. CEFD will work with OB and OEP to re-categorize these impacts. Re-categorization will be largely fiscally-neutral.

There is still **information to come** that could change the outlook before the Document. Key

information to come includes the following

- OPG's 2018-2020 Business Plan (expected in February) could change OPG's outlook.
- OEB decision on Hydro One's distribution rate application (expected 1st half of 2018)
- Year-end results for OPG and Hydro One
- Monthly results for OPG
- Final ONFA adjustment result for 2017 (late January or February)
- Final Decision on PRRT submission to continue ESDI payments to OEFC beyond 2017-18 (currently approved in principle)

**Description of Update**

ONFA Update as of March 31 2017
s. 50.3 Update for 2016-17
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Debt Interest
OPG IFRS Risk in 2019-20
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Power Purchase Supply
H1 Model Forecasts - No Fiscal Update Resaving Data
Update Budget 2017 Tabs to reflect fiscal plan
Update OPG forecasted PILS to reflect sources
Update H1 2016-17 CIT
Re-inputting ONFA updates
Updating H1 Net Income to include Pref Shares in 16-17
Updating OPG Income Tax Expense for 2016-17
Updating OPG non-income tax PILs
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2017
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2018
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2019
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
**[NOT APPLIED]** Updating H1 Brampton (Interim Adjustments)
Shifted H1 Brampton 2016-17 NI to the 2017-18
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)

add prior-year adjustment for 2016-17

add prior-year adjustment for 2016-18
Reconfigured calculation of ESDI and MOF ESDI Expense
Reconfigured calculation of OPG 2017-18 Net Income
Backup for the Provincial Interest cost
Linking source for Revenue Risks Tab
New source for Revenue Risks Tab
Revenue Risks Tab - ROE Risks
Updating OEB Risk for OPG
OEB Staff Report - H1 Tx - Revenue Risks
OPG Pensions - Cash vs Accrual Deferral Accounts
Updating Links in Electricity Summary Change and OEFC Change
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton

Updating DRC for Actuals 2016-17 (Based on draft FS)
Updating PILs for 2016-17 Baced on Actuals
OPG: Non-ONFA Fair Value Adjustment
Round all Hydro One ownership assumptions to two decimal places
H1 Equity Adjustment rounding.
Round all Hydro One ownership assumptions to two decimal places
Round all Hydro One ownership assumptions to two decimal places
Revising source of ESDI, Dedicated Electricity Earnings
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Updating Miscellaneous OEFC Revenue to Actuals
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Public Accts: Updated IESO debt interest Interest On Debt, 2016-17
Public Accts: 2016-17 - Demand Management Support Costs Update
2017-18 - Demand Management Support Costs (no change)
Public Accts: 2016-17 - Updating Operating Expense in OEFC
Sourcing Provision for Electricity Sector from Actual Public Accounts
Revised 2016-17 Brampton Amount for Public Accounts
OPG Pensions - Cash vs Accrual Deferral Accounts (Revenue Risks Tab)

Updating ROE Risks
Updating H1 Load Risks based on model output
Updating ONFA Risks for September 2017
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Updating OPG
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpack PILs related to HQ gain on sale
Updating IFRS Risk
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
November 1 and November 7 Hydro One model updates

November 1 and November 7 Hydro One model updates
November 1 and November 7 Hydro One model updates
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Updating OPG Revenue Risks from rate application
Update Hydro One PILs (reverses update on line 119 whuich did not account fro Dx side)
Updating Debt Guarantee Fee
Updating OEFC Operating Expense
small changes - linking the net income numbers

Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Updated OPG Net Income (based on their Q3 update, Sep 30, 2017)
Updated OPG ONFA adjustment (up to Sep 30, 2017) in OPG tab (removed it from Risks table)
Removal of OPG ONFA Sep 2017 adjustment in Risks table
Included possible range (-50M to 50M) of impact for future OPG ONFA adjustment in the negative
Removal of negative regulatory risk: "OPG Switch from accrual based to cash based accounting f
Removal of negative regulatory risk: "Timing of OPG Rate Decision" from Risks table
Removal of negative regulatory risk: "OEB Staff Recommendations wrt OPG rate application(May
Removal of negative regulatory risk: "Nuclear Liabilities Cash vs. Accrual" from Risks table
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| *variance to OEFC check* | *(156)* | *(454)* | *(550)* | *0* | *0* | *-* |

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 reflects OPG's lates monthly update. 2018 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its projected net income adjusted for the Province's ownership share in Hydro One following the final offering in May 2017 and including the planned First Nations sale in December 2017. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018. There is currently a PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of October 2017** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | (269) | (596) | (632) | (909) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 due largely to OEB Dec. 28, 2017 rate decision including effective date of June 1, 2017 rather than jan. 1, 2017. Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS adjustment impacts in those years as well as OEB Dec. 28, 2017 rate decision. |
| ONFA and other Fair Value Adjustments | 35 | 171 | - | - | - | Largely revision to ONFA fair value as of September 30, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (73) | (88) | (39) | (42) | 2016-17 slight decrease from Budget 2017 Interim projection.<br>2017-18 onwards reflects i) impact of OEB Sep. 2017 decision on Hydro One transmission rates and ii) interest expense on Avitsa debentures (in 2017-18 and 2018-19). |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **(170.7)** | **(684)** | **(671)** | **(951)** | |
| **Other Fees and Licences** | **-** | **-** | **8** | **10** | **10** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | 125 | - | (80) | (312) | Changes to the Proviision (ESDI) expense in 2017-18 mainly reflect lower OPG net income due to OEB's Dec. 28, 2017 rate decision and lower Hydro One net income due to OEB's Sep. 2017 transmission rate decision. The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |
| Public Debt Interest - Electricity Sector | (22) | 38 | 38 | 38 | 38 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to HydroOne's April 2016 offering. Note the impact of the final offering will be refelected in PDI during 2018. |

| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | – | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | – | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | |
| **Accounting** | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — |
| **Other Risks** | | | | |
| ONFA adjustment decrease[12] | (50) | | | |
| Avista Acquisition - Termination fee | | (49) | | |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimizati**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. **Previous risk removed** with timing impact now reflected in OPG outlook. OEB September 2017 Report, established accrual method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. OEB December 28, decision and order instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application.

7. **Previous risk removed**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed.** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previos risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful teh company would record a one-time write-down of $885 million reflecting the OEB decision. The risk above reflects this risk at teh Province's 49.9% average share allocation for 2017-18. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2.

11. **Previous risk removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | |
|---|---|---|---|---|
| **($ millions)** | **Plan** | | | |
| | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (+1.1 TWh)[1] | 85 | 85 | 85 | 85 |
| 1% increase in Hydro One actual load[2] | 57 | 59 | 61 | 63 |
| Higher OPG Return on Equity (ROE)[3] | 6 | 22 | 19 | 33 |
| Higher Hydro One Return on Equity (ROE)[4] | 19 | 69 | 50 | 50 |
| **Regulatory** | | | | |
| **Accounting** | | | | |
| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 50 | | | |

**on strategy or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $171M positive adjustment is included in the OPG outlook. The ONFA adjustment is expected to be finalized in February 2018.

| Ending Balance | 0 | 0 | (179) | (23) | 0 | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **0** | **0** | **80** | **312** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **0** | **0** | **80** | **312** |

**Notes:**

1. The Hydro One financials above currently reflects the Provincial share allocation as the May 2017 final offering.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

## Ontario Power Generation

### OPG Income - Budget 2017

$ Millions

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

| **Attachments:** | Electricity Sector Outlook (2017 10 13)_v03.xlsm |

Hi John,

Attached is the Current Electricity Outlook File. Let me know if you want to walk through again.

The updated outlook reflects the following.

- OPG net income increase due to higher generation and lower expenses from labour savings and delay of Pickering planned outage.,
- Lower Hydro One net income largely reflects the impact of OEB transmission rate decisions on September 29, 2017. [Note Hydro One results are now directly through the model. The OEB decision impacts are very similar to those calculated outside the model.]
- Electricity PIL's update largely reflects impacts of OPG and Hydro One earnings updates.

Note that the outlook update does not reflect the update to OPG's gain on sale of head office. This would add a further $82M to OPG EBT. We held off updating to avoid any confusion with current fiscal plan where gain on sale is still in Sales and Rentals. This update is flagged as a positive revenue risk in the Risk worksheet.

Some of the structural/format changes in the Electricity Outlook include

- A new Cover sheet to summarize, for TBS/OB/OEP, all expenses and revenues for electricity sector.
    - EFB met with OB, TBS and OEP earlier in the year to respond to a request that the required fiscal plan entries be made clear. (Mainly necessary due to turnover on TBS side and analysts unfamiliar with OEFC consolidation and MoF entries.
    - The Cover Sheet is just a summary of "Electricity Summary – Budget, Electricity Summary – On Deck, and Electricity Summary – Change" that have always been part of the Outlook.
- New Tracking worksheet (for EFB only) to track impact by expense/revenue line of each individual update to the outlook.
    - This is useful for variance analysis as you can trace all the updates made to a revenue/expense line during the year and reasons for the update.
    - Useful for quality control e.g. , a check that impacts of updates are as expected (both expected line, expected sign and expected magnitude) and a check that updates correspond to those shown on Electricity Summary – Change worksheet
- Documentation of data sources has been updated
- Hydro One worksheet is simplified with some calculations/information moved to separate worksheets. E.g. , Public Debt interest calculation on separate worksheet, Provincial share ownership on separate worksheet and current assumptions clarified.
- Formatting of each worksheet is standardized in terms of fiscal years shown, labelling etc.

There are a couple of updates to come Monday on Risk table, mostly around generic risks.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's current 70% ownership share, after the initial IPO in 2015 [and the secondary offering in April 2016]. Net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2015-16 outlook reflected its reported earnings. 2016-17 outlook reflected OPG's November monthly update. Out-years reflect OPG's preliminary 2017-19 business plan and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections and as fiscalized by CEFD staff.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2015-16 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2016-17 to 2020-21 projections are based on CEFD projections based on latest public information and modelling, including its 2015-17 distribution rate decision, adjustments to forecast ROEs based on current interest rate outlook and estimated Hydro One IPO and secondary share offering impacts.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable ~~costs~~ to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Expenses | 2015-16 | 2016-17 | 2017-18 | 2018-19 |

## Electricity Sector Change Since Budget

**$ Millions**

| ($million) | 2015-16 | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|---|
| **Changes from Budget 2017 as of October 2017** | | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | | |
| OPG Income | - | (5) | 55 | - | - | - | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 increase mainly due to deferral of Pickering Unit 6 planned outage to jan 18, deferral of sale of land at Hearn site from Q1 2017 to later in 2017, partially offsdet by lower gropss margin. |
| ONFA and other Fair Value Adjustments | - | 35 | - | - | - | - | Largely revision to ONFA fair value as of March 31, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | - | |
| HOI Income | 20 | (16) | (89) | (105) | (58) | (61) | 2016-17 slight decrease from Budget 2017 Interim projection.<br>2017-18 onwards reflects impacts of OEB decision on Hydro One rates, interest expense on Avitsa debentures (in 2017-18 and 2018-19) and update to Hydro One model update based on Hydro One Q2 results. |
| Brampton Income | | 3.3 | | | | | |
| **Total OPG and HOI Income** | **-** | **17** | **(34.1)** | **(105)** | **(58)** | **(61)** | |
| **Other Fees and Licences** | **-** | **-** | **-** | **-** | **-** | **-** | |
| **Electricity Expenses of the Province** | | | | | | | |
| Provision for Electricity Sector | 3 | 53 | (4) | - | - | - | Changes in the Provision (ESDI) expense reflect net changes in the outlook for Public Debt Interest, and OPG and HOI net income (excludinging ONFA adjustments). |
| Public Debt Interest - Electricity Sector | - | (22) | 38 | 38 | 38 | 38 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to Hydro equity. |
| **Total Electricity Expenses of the Province** | **3** | **31** | **34** | **38** | **38** | **38** | |
| **OEFC Income** | | | | | | | |
| **Taxation Revenue** | | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | 19 | (40) | (24) | 3 | (7) | (10) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected. |
| **Other Revenue** | | | | | | | |
| Electricity Debt Retirement Charge | - | (4) | - | - | - | - | |
| Power Supply Contract Recoveries | - | 99 | (0) | (0) | (0) | 0 | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Net Reduction of Power Purchase Contracts | - | 0.1 | (0) | (0) | (0) | (0) | |
| Other Fees and Licences | - | - | - | - | - | - | |
| Revenue Pool Residual | - | - | - | - | | - | |
| Miscellaneous | - | 14 | - | - | - | - | Higher than projected at Interim. |
| **Expenses** | | | | | | | |
| Interest on Debt | - | 19 | (53) | (64) | (69) | (98) | 2016-17 higher than projected at Interim.<br>2017-18 reflects revised debt interest outlook net of revisions to OEFC interest revenue from OPG and Province. |
| Power Supply Contract Costs | - | (99) | 0 | 0 | 0 | (0) | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Electricity Consumer Price Protection Fund | - | - | - | - | - | - | |
| Demand Management Support Costs | - | 1.8 | - | - | - | - | |
| Provision for Electricity Sector | (3) | (53) | 4 | - | - | - | Changes in the Provision (ESDI) expense (negative expense or revenue to OEFC) reflect net changes in the outlook for Public Debt Interest, and OPG and HOI net income (excludinging ONFA adjustments). |
| Other (Finance) | - | (1.0) | - | - | - | - | |
| **Total OEFC Income** | **16** | **(63)** | **(73)** | **(61)** | **(76)** | **(108)** | |

| Ending Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **129** | **735** | **716** | **1,202** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **129** | | | |

**Notes:**

1. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16. $3M Serves to the rectify this discrepancy

2. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

| **Subject:** | Electricity Outlook Update |
| **Date:** | Thursday, January 04, 2018 5:38:27 PM |
| **Attachments:** | Electricity Sector Outlook (2018 01 04)_Distribution.xlsm |

Hi Guys, please see attached Electricity Update and our notes below. In particular, note that this does not include any AO re-categorization. Just wanted to get this to OEP and OB. We will do broader distribution tomorrow.

Attached is our Electricity update as of January 4, 2018, which is preliminary and subject to change. **Key changes** in the electricity outlook since our previous update include the following.

- The full projected IFRS adjustments are reflected in OPG's net income outlook lowering OPG net income by $475M in 2018-19, $500M in 2019-20 and $750M in 2020-21
- The estimated impact of OEB's Dec. 28, 2017 decision on OPG's rate application is reflected in the Outlook. The estimated impact was split between net income and income tax PILs on a 75%-25% basis. OPG is expected to do a full impact analysis and share the result in the coming weeks.
- Other OPG updates for 2017-18 include moving the positive projected ONFA adjustment (+$171m) into the OPG forecast rather than reflecting as "risk" and reflecting Other positive in-year updates.
- Eliminating some material OPG "reporting" risks (pension and nuclear liability) as a result of OEB's December decision. (See below Key Changes to Risks)
- Based on PRRT approval in principal, current update assumes ESDI continues beyond 2017-18. No bottom line impact, but does affect expense and revenue - ESDI
- Other minor updates.

Note. This Electricity Outlook does not reflect re-categorization of Asset Optimization impacts. CEFD will work with OB and OEP to re-categorize these impacts. Re-categorization is fiscally-neutral.

There is still **information to come** that could change the outlook before the Document. Key information to come includes the following

- OPG's 2018-2020 Business Plan (expected in February) could change OPG's outlook.
- OPG will provide its own impact analysis of OEB Dec. 28 decision which could differ from CEFD estimates
- OEB decision on Hydro One's distribution rate application (expected 1st half of 2018)
- Calendar Year-end results for OPG and Hydro One
- Monthly results for OPG
- Final ONFA adjustment result for 2017 (late January or February)
- Final Decision on PRRT submission to continue ESDI payments to OEFC beyond 2017-18 (currently approved in principle)
- Final net proceeds from the sale of the Lakeview lands (expected close in March 2018)

Key Changes to Risks

- Risk related to Pensions and Other Pension Benefits (OPEBs) is removed. OEB's September 2017 Report, established accrual accounting method is the default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. OEB's December 28 OPG rate decision restates this and OEB instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application.
- Risk related to effective date for OPG rates is removed as the estimated impact is now built into the OPG outlook.
- OEB Staff recommendation wrt OPG rate application risk removed as Dec. 28, 2017 OEB decision estimated impacts are now built into the OPG outlook.
- Nuclear liabilities risk removed as OEB has deferred consideration of this issue until next OPG rate application in 2021.
- The negative impact of the OEB tax decision (about $15M per year) with respect to Hydro One's transmission rate application, which was reflected in the previous electricity outlook has been reversed pending decision on Hydro One's motion to review and appeal. In addition, Hydro One clarified that if the OEB decision is upheld it would be reflected as a one-time write-down rather than an ongoing annual impact. This risk is reflected in the Risk table in the "Revenue (Risks)" tab.
- The previous ONFA adjustment positive risk is removed as it is now incorporated into the OPG outlook.

As usual, let us know if you have any questions.

Thanks
Bruno

| **Total OEFC Income** | **3,533** | **800** | **687** | **46** | **132** | **370** |
| **Impact on Surplus/(Deficit)** | **3,856** | **930** | **789** | **939** | **957** | **1,676** |

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

## Electricity Sector Outlook

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 reflects OPG's lates monthly update. 2018 to 2019-20 reflects OPG's 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget and OEB Dec. 28 rate decision. Note rate decsion impact is alloacted to net income and PILs on a 75%/25% basis respectively.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2016-17 income reflects its projected net income adjusted for the Province's ownership share in Hydro One following the final offering in May 2017 and including the First Nations sale in December 2017. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18. There is currently a PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of October 2017** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | (231) | (596) | (632) | (909) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 due largely to OEB Dec. 28, 2017 rate decision including effective date of June 1, 2017 rather than jan. 1, 2017. Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS adjustment impacts in those years as well as OEB Dec. 28, 2017 rate decision. The OEB Dec. 28, 2017 rate decision estimated impacts are allocated between OPG net income and PILs on a 75%/25% basis. |
| ONFA and other Fair Value Adjustments | 35 | 171 | - | - | - | Largely revision to ONFA fair value as of September 30, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (73) | (88) | (39) | (42) | 2016-17 slight decrease from Budget 2017 Interim projection.<br>2017-18 onwards reflects i) impact of OEB Sep. 2017 decision on Hydro One transmission rates and ii) interest expense on Avitsa debentures (in 2017-18 and 2018-19). |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **(133.2)** | **(684)** | **(671)** | **(951)** | |
| **Other Fees and Licences** | **-** | **-** | **8** | **10** | **10** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | 125 | (14) | (103) | (312) | Changes to the Proviision (ESDI) expense in 2017-18 mainly reflect lower OPG net income due to OEB's Dec. 28, 2017 rate decision and lower Hydro One net income due to OEB's Sep. 2017 transmission rate decision. The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |
| Public Debt Interest - Electricity Sector | (22) | 38 | 38 | 38 | 38 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to HydroOne's April 2016 offering. Note the impact of the final offering will be refelected in PDI during 2018. |
| **Total Electricity Expenses of the Province** | **31** | **163** | **24** | **(65)** | **(274)** | |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | (123) | (24) | (35) | (43) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | - | - | - | - | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | 2016-17 variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision.<br><br>2017-18 and onward changes reflect recent NUG terminations and suspensions |
| Net Reduction of Power Purchase Contracts | 0.1 | (0) | (0) | (0) | (0) | |
| Other Fees and Licences | - | - | (8) | (10) | (10) | |
| Revenue Pool Residual | - | - | - | | - | |
| Miscellaneous | 14 | - | - | - | - | |
| **Expenses** | | | | | | |
| Interest on Debt | 19 | (53) | (64) | (69) | (98) | 2017-18 reflects revised debt interest outlook net of revisions to OEFC interest revenue from OPG and Province. |
| Power Supply Contract Costs | (99) | 110 | 142 | 167 | 170 | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Electricity Consumer Price Protection Fund | - | - | - | - | - | |
| Demand Management Support Costs | 1.8 | - | - | - | - | |
| Provision for Electricity Sector | (53) | (125) | 14 | 103 | 312 | see explanation above for "Provision for Electriocty Sector" (line 17) |

|---|---|---|---|---|
| ($ millions) | Plan | | | |
| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | (120) | (120) | (120) | (120) |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) |
| **Regulatory** | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | – | | | |
| Regulatory Risk - Timing of OPG Rate Decision[7] | – | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | – | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | – | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | |
| **Accounting** | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — |
| **Other Risks** | | | | |
| ONFA adjustment decrease[12] | (50) | | | |
| Avista Acquisition - Termination fee | | (49) | | |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimizati**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed from 2017-18. OEB September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful teh company would record a one-time write-down of $885 million reflecting the OEB decision. The risk above reflects this risk at teh Province's 49.9% average share allocation for 2017-18. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2.

11. **Previous risk removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | |
|---|---|---|---|---|
| **($ millions)** | **Plan** | | | |
| | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (+1.1 TWh)[1] | 85 | 85 | 85 | 85 |
| 1% increase in Hydro One actual load[2] | 57 | 59 | 61 | 63 |
| Higher OPG Return on Equity (ROE)[3] | 6 | 22 | 19 | 33 |
| Higher Hydro One Return on Equity (ROE)[4] | 19 | 69 | 50 | 50 |
| **Regulatory** | | | | |
| **Accounting** | | | | |
| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 50 | | | |

**on strategy or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $171M positive adjustment is included in the OPG outlook. The ONFA adjustment is expected to be finalized in February 2018.

## ONTARIO ELECTRICITY FINANCIAL CORPORATION

**Changes from Budget 2017 as of October 2017** **$ Millions**

| | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|
| **Revenue** | | | | | | |
| Debt Retirement Charge | (4) | - | - | - | - | |
| Payments-in-lieu of tax: | | | | | | |
| OPG | (78) | (123) | (24) | (35) | (43) | 2016-17 decrease largely due to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 and onward decrease is due to estimated impact of OEB Dec. 29, 2017 rate decision. |
| Legacy Hydro One (Including Brampton) | (3) | - | - | - | - | |
| Hydro One CIT dedicated to OEFC | 5 | - | - | - | - | Adjustment based on updated information in Hydro One rate application |
| MEUs | 68 | - | - | - | - | Large increase in 2016-17 from $80M payment during transfer of H01 Brampton to new consolidated MEU Alectra. |
| Total PILs | (9) | (123) | (24) | (35) | (43) | |
| Interest : | | | | | | |
| OPG | (12) | 1 | 26 | 40 | 13 | Update to OPG interest outlook (wrt interest on OEFC loan). |
| H1 | - | - | - | - | - | |
| IESO | (1) | - | - | - | - | |
| Province | 22 | (38) | (38) | (38) | (38) | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to Hydro equity. |
| Other | 10 | 15 | 15 | 5 | 5 | |
| Total Interest | 19 | (22) | 3 | 7 | (20) | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Amortization of NUG liability | 0 | (0) | (0) | (0) | (0) | |
| Electricity sector dedicated income | (41) | (525) | 14 | 103 | 312 | The decrease in OEFC ESDI in 2017-18 reflects i) the IFRS adjustment of $400 million in 2017-18 that was not reflected in the OEFC ESDI projection at the time of the 2017 Budget (Note the IFRS adjustment was reflected in OPG net income for the 2017 Budget fiscal plan) and ii) the lower OPG and Hydro One net income due to OEB's 2017 rate decisions.<br><br>The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |
| Gain to OEFC under s. 50.3 | 411 | 550 | - | - | - | |
| Miscellaneous | 14 | - | - | - | - | |
| | 489 | (230) | (149) | (91) | 78 | |
| **Expense** | | | | | | |
| Debt interest | - | 31 | 67 | 76 | 78 | Revised outlook for OEFC debt interest outlook |
| Interest on nuclear risk funding | - | - | - | - | - | |
| Demand Management Support Costs | (2) | - | - | - | - | |
| Amortization of deferred debt costs | - | - | - | - | - | |
| Power Supply Contract Costs | 99 | (110) | (142) | (167) | (170) | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Debt Guarantee fee | - | - | 8 | 10 | 10 | |

| Ending Balance | 0 | 0 | (142) | 0 | 0 | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **0** | **14** | **103** | **312** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **0** | **14** | **103** | **312** |

**Notes:**

1. The Hydro One financials above currently reflects the Provincial share allocation as the May 2017 final offering.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

## Ontario Power Generation

### OPG Income - Budget 2017

Hi Ron

Please see attached our updated Electricity Sector Outlook.

This includes

- OPG 2018-2021 Business plan updates including the inclusion now of the proceeds in 2017-18 from Lakeview properties.
- Hydro One has also been updated to reflect year-end results for Hydro One. In particular 2017-18 is driven mainly by quarterly actual (the 2018 quarter is model projection. 2018-19 onward are also model projections.
- The outlook also incorporates the latest figures from SIFB wrt s. 50.3 and the debt OEF H1 debt paydown related to last May 2017 disposition.
- We also have updated IOD numbers from FTD today
- SPFB indicated they will updated power purchase/recovery outlook early next week.

We have added an additional year to the Outlook, 2021-22.

On risk table we added possible PILs transfer to municipalities. Note that this outlook has SD defeased as of 2021-22.

I have added a temporary worksheet showing the changes since the last Outlook distribution in January. The main changes related to OPG, particularly the 2017-18 increase only partly explained by inclusion of Lakeview. Note that the OPG business plan noted that 2017-18 included a $325 hit related to the later effective date. That is consistent with our estimate.

Thanks
Bruno

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

## Electricity Sector Outlook

$ Millions

**Notes:**

1.OPG's 2017-18 to 2020-21 outlook reflects OPG's 2018-2021 Business Plan and Includes OPG head office properties sale proceeds and Lakeview property sale proceeds. 2021-22 estimates are based on OPG's calendar year-based business plan projections for 2021 and a CEFD projection for 2022. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2017-18 is based on actual Hydro One results for 2017 and CEFD projection for 2018. Quarterly earnings are adjusted for the provincial ownership share during the quarter. 2018-19 and onwards are CEFD projections using the latest public information and reflects the Province's ownership share following the May 2017 share disposition and including the First Nations sale in December 2017. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18 based on TB/MBC approval of the PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of February 2018** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | 708 | (332) | (122) | (714) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 increase is largely due to the re-categorization from Sales and Rentals to OPG net income proceeds from the sale of OPG head office and Lakeview properties. This accounts for $483M of the increase. Note that whicle the re-categorization itself is fiscally-neutral proceeds from property sales are $206M higher than projected at the time of the 2017 Budget.<br><br>2017-18 results are also boosted by lower expenses than assumed at the time of Budget 2017.<br><br>Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS adjustment impacts in those years as well as OEB Dec. 28, 2017 rate decision. The OEB Dec. 28, 2017 rate decision estimated impacts are allocated between OPG net income and PILs on a 75%/25% basis. |
| ONFA and other Fair Value Adjustments | 35 | 194 | - | - | - | Largely revision to ONFA fair value as of December 31, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (173) | (209) | (191) | (214) | 2016-17 slight decrease from Budget 2017 Interim projection.<br><br>2017-18 onwards mainly reflects i) re-categorization from Sales and Rentals to Hydro One net income of the impact of a lower Provincial share of Hydro One net income from Hydro One share sales ii) impact of OEB Sep. 2017 decision on Hydro One transmission rates and iii) interest expense on Avitsa debentures (in 2017-18 and 2018-19). |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **728.5** | **(541)** | **(314)** | **(928)** | |
| **Other Fees and Licences** | **-** | **-** | **8** | **10** | **10** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | (572) | (349) | (511) | (386) | **[NOTE: A positive number on this line indicates a decrease in the provision, while a negative number means an increase in provision expense.]**<br>Changes to the Provision (ESDI) expense in 2017-18 mainly reflect higher OPG net income due to recategorisation from Sales and Rentals (see above).<br><br>Change in out-years reflects TB/MBC approval in 2017-18 PRRT approval to continue Provision for the Electricity Sector (i.e., Electricity Sector Dedicated Income to OEFC) beyond 2017-18. 2017 Budget assumed previous policy whereby ESDI ended after 2017-18. |
| Public Debt Interest - Electricity Sector | (22) | 38 | 88 | 88 | 88 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br><br>2017-18 and 2018-19 and onward change reflects revised projections for Provincial debt interest as a result of debt pay downs related to Hydro One's April 2016 and April 2017 offerings, repectively. |
| **Total Electricity Expenses of the Province** | **31** | **(535)** | **(261)** | **(423)** | **(298)** | |

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | 125 | (89) | (7) | (143) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 increase is largely due to inclusion of PILs related to disposition of OPG headquarters and Lakeview properties. 2018-19 onward lower mainly due to lower OPG income tax PILs. Property tax componenst are close to Budget 2017. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | - | - | - | - | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance in 16-17 is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement (PPA) contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. Going-forward, variance is largely due to suspension or early termination of some NUG PPAs in response to the IESO's NUG curtailment initiative. |

| **Generic** | | | | | |
| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | (120) | (120) | (120) | (120) | |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) | |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) | |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) | |
| **Regulatory** | | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) | |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | — | (600) | | | |
| Regulatory Risk - Timing of OPG Rate Decision[7] | — | | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | — | | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | — | | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | | |
| **Accounting** | | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — | |
| **Other Risks** | | | | | |
| ONFA adjustment decrease[12] | (100) | | | | |
| Avista Acquisition - Termination fee | | (49) | | | |
| PILs risk related to defesement of Stranded debt and potential wind down of OEFC[13] | | | | | (340) |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimization strategy**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed shifted from 2017-18 to 2018-19. OEB's September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. This finding mitigates this risk. However, OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application. OEB's final decision will be made at that time. Note, the impact of a decision could fall in 2019-20 depending on timing of the OEB decision.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful the company would record a one-time write-down of $885 million (for transmission and distribution net income) reflecting the OEB decision. The risk above reflects this risk at teh Province's 49.9% average share allocation for 2017-18. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2.

11. **Previous risk figures removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan. The new IFRS adjustments figures are pending from OPG via Energy in the next few days.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | |
|---|---|---|---|---|
| **($ millions)** | **Plan** | | | |
| | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (+1.1 TWh)[1] | 85 | 85 | 85 | 85 |
| 1% increase in Hydro One actual load[2] | 57 | 59 | 61 | 63 |
| Higher OPG Return on Equity (ROE)[3] | 6 | 22 | 19 | 33 |
| Higher Hydro One Return on Equity (ROE)[4] | 19 | 69 | 50 | 50 |
| **Regulatory** | | | | |
| **Accounting** | | | | |
| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 100 | | | |

**or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $194M positive adjustment reflecting valuations as of December 31, 2017 is included in the OPG outlook. Given current market volatility the ONFA adjustment could change significantly by the end of the Province's fiscal year, March 31, 2018. The net debt adjustment to be included in the fiscal plan consistent with the December 31, 2017 valuations/reports would also be subject to the same type of volatility.

## ONTARIO ELECTRICITY FINANCIAL CORPORATION

## On Deck Outlook as of March 2017

**$ Millions**

## ONTARIO ELECTRICITY FINANCIAL CORPORATION

**Changes from Budget 2017 as of February 2018** **$ Millions**

| | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|
| **Revenue** | | | | | | |
| Debt Retirement Charge | (4) | - | - | - | - | |
| Payments-in-lieu of tax: | | | | | | |
| OPG | (78) | 125 | (89) | (7) | (143) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 increase is largely due to inclusion of PILs related to disposition of OPG headquarters and Lakeview properties. 2018-19 onward lower mainly due to lower OPG income tax PILs. Property tax componenst are close to Budget 2017. . |
| Legacy Hydro One (Including Brampton) | (3) | - | - | - | - | |
| Hydro One CIT dedicated to OEFC | 5 | - | - | - | - | Adjustment based on updated information in Hydro One rate application |
| MEUs | 68 | - | - | - | - | Large increase in 2016-17 from $80M payment during transfer of H01 Brampton to new consolidated MEU Alectra. |
| Total PILs | (9) | 125 | (89) | (7) | (143) | |
| Interest : | | | | | | |
| OPG | (12) | (8) | 29 | 23 | (4) | Update to OPG interest outlook (wrt interest on OEFC loan). |
| H1 | - | - | - | - | - | |
| IESO | (1) | - | - | - | - | |
| Province | 22 | (38) | (88) | (88) | (88) | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br><br>2017-18 and 2018-19 and onward change reflects revised projections for Provincial debt interest as a result of debt pay downs related to Hydro One's April 2016 and April 2017 offerings, repectively. |
| Other | 10 | 15 | 15 | 5 | 5 | |
| Total Interest | 19 | (31) | (44) | (60) | (87) | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Amortization of NUG liability | 0 | (0) | (0) | (0) | (0) | |
| Electricity sector dedicated income | (41) | 172 | 349 | 511 | 386 | The decrease in OEFC ESDI in 2017-18 reflects i) the IFRS adjustment of $400 million in 2017-18 that was not reflected in the OEFC ESDI projection at the time of the 2017 Budget (Note the IFRS adjustment was reflected in OPG net income for the 2017 Budget fiscal plan) and ii) the lower OPG and Hydro One net income due to OEB's 2017 rate decisions.<br><br>Changes to the Provision (ESDI) expense in 2017-18 mainly reflect higher OPG net income due to recategorisation from Sales and Rentals of proceeds from the sale of OPG headquarters properties and Lakeview properties.<br><br>Th eincrease in 2018-19 onward reflects TB/MBC approval in 2017-18 PRRT approval to continue Provision for the Electricity Sector (i.e., Electricity Sector Dedicated Income to OEFC) beyond 2017-18. 2017 Budget assumed previous policy whereby ESDI ended after 2017-18. |
| Gain to OEFC under s. 50.3 | 411 | 531 | - | - | - | |
| Miscellaneous | 14 | - | - | - | - | |
| | 489 | 688 | 73 | 277 | (15) | |
| **Expense** | | | | | | |
| Debt interest | - | 19 | 50 | 71 | 65 | Revised outlook for OEFC debt interest outlook |
| Interest on nuclear risk funding | - | - | - | - | - | |
| Demand Management Support Costs | (2) | - | - | - | - | |
| Amortization of deferred debt costs | - | - | - | - | - | |
| Power Supply Contract Costs | 99 | (110) | (142) | (167) | (170) | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Debt Guarantee fee | - | - | 8 | 10 | 10 | |
| Operating | 1 | - | 1 | 1 | 1 | |
| | 98 | (91) | (83) | (85) | (94) | |
| **Excess (Deficiency) of Revenue over Expense** | **391** | **779** | **157** | | | |
| **Stranded Debt - Year End** | **3,202** | **1,336** | **1,134** | **639** | **190** | |

| **Cumulative Shortfall Adjustment** | | | | | | |
| Opening Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| Deduction / (Addition) | 0 | 0 | 0 | 0 | 0 | 0 |
| Ending Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **697** | **349** | **511** | **386** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **697** | **349** | **511** | **386** |

**Notes:**

1. The Hydro One financials above now reflects the Provincial share allocation as of January 2018.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**Attachments:** Electricity Sector Outlook (2018 02 15)_v3.xlsm

---

Hi John

See attached first Draft for review. Take a quick high level look before sending on if you could.

We still have to update

- Risk table
- variance explanations and footnotes

SPFB expects revised PP numbers next week. Also I've checked with FTD for updated IOD for OEFC and also 202-22 numbers (we've extended the forecast).

Will keep working on this to a=have a 2nd draft for later today.

S:\Users\CEF\Hydro 2018\OEFC\RbP\Outlook\02. February1

Thanks

**FOR EFB USE ONLY**

**Budget 2017 Outlook**
**Current Outlook**
**Change Since Budget**

**Description of Update**

ONFA Update as of March 31 2017
s. 50.3 Update for 2016-17
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Debt Interest
OPG IFRS Risk in 2019-20
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Power Purchase Supply
H1 Model Forecasts - No Fiscal Update Resaving Data
Update Budget 2017 Tabs to reflect fiscal plan
Update OPG forecasted PILS to reflect sources
Update H1 2016-17 CIT
Re-inputting ONFA updates
Updating H1 Net Income to include Pref Shares in 16-17
Updating OPG Income Tax Expense for 2016-17
Updating OPG non-income tax PILs
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2017
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2018
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2019
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
**[NOT APPLIED]** Updating H1 Brampton (Interim Adjustments)
Shifted H1 Brampton 2016-17 NI to the 2017-18
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)

add prior-year adjustment for 2016-17

add prior-year adjustment for 2016-18
Reconfigured calculation of ESDI and MOF ESDI Expense
Reconfigured calculation of OPG 2017-18 Net Income
Backup for the Provincial Interest cost
Linking source for Revenue Risks Tab
New source for Revenue Risks Tab
Revenue Risks Tab - ROE Risks
Updating OEB Risk for OPG
OEB Staff Report - H1 Tx - Revenue Risks
OPG Pensions - Cash vs Accrual Deferral Accounts
Updating Links in Electricity Summary Change and OEFC Change
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton

Updating DRC for Actuals 2016-17 (Based on draft FS)
Updating PILs for 2016-17 Baced on Actuals
OPG: Non-ONFA Fair Value Adjustment
Round all Hydro One ownership assumptions to two decimal places
H1 Equity Adjustment rounding.
Round all Hydro One ownership assumptions to two decimal places
Round all Hydro One ownership assumptions to two decimal places
Revising source of ESDI, Dedicated Electricity Earnings
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Updating Miscellaneous OEFC Revenue to Actuals
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Public Accts: Updated IESO debt interest Interest On Debt, 2016-17
Public Accts: 2016-17 - Demand Management Support Costs Update
2017-18 - Demand Management Support Costs (no change)

Remove update of gain on sale of head office(assume in Sales and Rentals)
Debenture Interest Costs - Removing from Revenue (Risks) and adding it ot H1 Model
Debenture Interest Costs - Removing from Revenue (Risks) and adding it ot H1 Model
Debenture Interest Costs - Removing from Revenue (Risks) and adding it ot H1 Model
Updated OPG Net Income and PILs based on monthly report (August 2017 results)
Updated OPG Net Income and PILs based on monthly report (August 2017 results)
Updated OPG Net Income and PILs based on monthly report (August 2017 results)
Correction to PILs on OPG sheet
Correction to PILs on OPG sheet
Correction to PILs on OPG sheet
Correction to PILs on OPG sheet
Switch to Direct from Model
Switch to Direct from Model
Switch to Direct from Model
Updating ROE Risks
Updating H1 Load Risks based on model output
Updating ONFA Risks for September 2017
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Updating OPG
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpack PILs related to HQ gain on sale
Updating IFRS Risk
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
November 1 and November 7 Hydro One model updates

November 1 and November 7 Hydro One model updates
November 1 and November 7 Hydro One model updates
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Updating OPG Revenue Risks from rate application
Update Hydro One PILs (reverses update on line 119 whuich did not account fro Dx side)
Updating Debt Guarantee Fee
Updating OEFC Operating Expense
small changes - linking the net income numbers

Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Updated OPG Net Income (based on their Q3 update, Sep 30, 2017)
Updated OPG ONFA adjustment (up to Sep 30, 2017) in OPG tab (removed it from Risks table)
Removal of OPG ONFA Sep 2017 adjustment in Risks table
Included possible range (-50M to 50M) of impact for future OPG ONFA adjustment in the negative
Removal of negative regulatory risk: "OPG Switch from accrual based to cash based accounting f
Removal of negative regulatory risk: "Timing of OPG Rate Decision" from Risks table
Removal of negative regulatory risk: "OEB Staff Recommendations wrt OPG rate application(May
Removal of negative regulatory risk: "Nuclear Liabilities Cash vs. Accrual" from Risks table
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon

| Power Supply Contract Costs | (875) | (739) | (292) | (325) | (301) | (273) |
| Electricity Consumer Price Protection Fund | - | - | - | - | - | - |
| Demand Management Support Costs[6] | (8) | (10) | (10) | - | - | - |
| Provision for Electricity Sector | 3 | 342 | 125 | - | - | - |
| Other (Finance) | (7) | (6) | (6) | (6) | (6) | (6) |
| **Total OEFC Income** | **3,533** | **800** | **687** | **46** | **132** | **370** |
| **Impact on Surplus/(Deficit)** | **3,856** | **930** | **789** | **939** | **957** | **1,676** |

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

## Electricity Sector Outlook

$ Millions

| | Actual 2015-16 | Actual 2016-17 | Current Outlook 2017-18 | 2018-19 | 2019-20 | 2020-21 |

| *variance to OEFC check* | *(156)* | *(454)* | *(531)* | - | - | - |

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 reflects OPG's latest monthly update and now includes re-caztegorization from Sales and Rentals to OPG net income (and OPG PILs) of OPG head office properties sale. 2018 to 2019-20 reflects OPG's 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget and OEB Dec. 28 rate decision. Note rate decsion impact is alloacted to net income and PILs on a 75%/25% basis respectively.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2016-17 income reflects its projected net income adjusted for the Province's ownership share in Hydro One following the final offering in May 2017 and including the First Nations sale in December 2017. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information and now reflect the re-categorization from sales and Rentals to Hydro One net income of the full impact of Hydro One broadening.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18. There is currently a PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of October 2017** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | 708 | (332) | (122) | (714) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 increase is largely from re-categorization from Sales and Rentals to OPG net income (and OPG PILs) of the sale of OPG head office properties -- re-categorisation itself is fiscally-neutral, as Sales and Rentals, following re-categorisation, will be lower than shown in Budget 2017; plus some in-year upside (about $95M), before the OEB rate decision for OPG. Recategorisation amount in net income (about $280 million) is largely offset by estimated negative fiscal impact (about -$320M in net income, -$110M in PILs below) from OEB Dec. 28, 2017 rate decision for OPG, including effective date of new OPG rates of June 1, 2017 rather than Jan. 1, 2017 . (See OPG worksheet for detailed numbers.)<br>Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS adjustment impacts in those years as well as OEB Dec. 28, 2017 rate decision. The OEB Dec. 28, 2017 rate decision estimated impacts are allocated between OPG net income and PILs on a 75%/25% basis. |
| ONFA and other Fair Value Adjustments | 35 | 194 | - | - | - | Largely revision to ONFA fair value as of September 30, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (173) | (209) | (191) | (214) | 2016-17 slight decrease from Budget 2017 Interim projection.<br>2017-18 onwards reflects i) re-categorization from Sales and Rentals to Hydro One net income of the impact of a lower Provincial share of Hydro One net income from Hydro One share sales ii) impact of OEB Sep. 2017 decision on Hydro One transmission rates and iii) interest expense on Avitsa debentures (in 2017-18 and 2018-19). |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **728.5** | **(541)** | **(314)** | **(928)** | |
| **Other Fees and Licences** | **-** | **-** | **8** | **10** | **10** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | (572) | (349) | (511) | (386) | **[NOTE: A positive number on this line indicates a decrease in the provision, while a negative number means an increase in provision expense.]**<br>Changes to the Provision (ESDI) expense in 2017-18 mainly reflect higher OPG net income due to recategorisation from Sales and Rentals (see above), offset by lower OPG net income due to OEB's Dec. 28, 2017 rate decision and lower Hydro One net income due to OEB's Sep. 2017 transmission rate decision. Note ESDI is also lowered as HYdro One net income now reflects the full impact of Hydro One share sales. Part of this impact was previously reflected in Sales and Rentals. The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |
| Public Debt Interest - Electricity Sector | (22) | 38 | 88 | 88 | 88 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to HydroOne's April 2016 offering. Note the impact of the final offering will be refelected in PDI during 2018. |
| **Total Electricity Expenses of the Province** | **31** | **(535)** | **(261)** | **(423)** | **(298)** | |

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | 125 | (89) | (7) | (143) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | - | - | - | - | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance in 16-17 is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement (PPA) contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. Going-forward, variance is largely due to suspension or early termination of some NUG PPAs in response to the IESO's NUG curtailment initiative. |
| Net Reduction of Power Purchase Contracts | 0.1 | (0) | (0) | (0) | (0) | |
| Other Fees and Licences | - | - | (8) | (10) | (10) | |
| Revenue Pool Residual | - | - | - | | - | |
| Miscellaneous | 14 | - | - | - | - | |
| **Expenses** | | | | | | |
| Interest on Debt | 19 | (55) | (106) | (126) | (148) | 2017-18 reflects revised debt interest outlook net of revisions to OEFC interest revenue from OPG and Province. |
| Power Supply Contract Costs | (99) | 110 | 142 | 167 | 170 | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Electricity Consumer Price Protection Fund | - | - | - | - | - | |
| Demand Management Support Costs | 1.8 | - | - | - | - | |
| Provision for Electricity Sector | (53) | 572 | 349 | 511 | 386 | see explanation above for "Provision for Electriocty Sector" (line 17) |
| Other (Finance) | (1.0) | - | (1) | (1) | (1) | |
| **Total OEFC Income** | **(63)** | **642** | **145** | **367** | **84** | |
| **Impact on Surplus/(Deficit)[1]** | **-15** | **836** | **-649** | **-359** | **-1,131** | Note: A significant component of the changes above affecting this net is from a fiscally-neutral recategorisation of revenue impacts from the Asset Optimisation (AO) initiative previously shown in Sales and Rentals in Budget 2017 for commercial confidentiality.<br><br>The pure changes to non-AO electricity sector changes is significantly fiscally negative. See summary table below for breakdown of total change between these components. |
| **Information: Breakdown of change between revenue and expense** | | | | | | |
| Total Revenue Impact | 87 | 743 | (772) | (487) | (1,241) | |
| Total Expenditure impact | 101 | (93) | (123) | (128) | (110) | |

## Electricity Sector Outlook (PSAB)

| **Generic** | | | | | |
| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | (120) | (120) | (120) | (120) | |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) | |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) | |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) | |
| **Regulatory** | | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) | |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | — | (600) | | | |
| Regulatory Risk - Timing of OPG Rate Decision[7] | — | | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | — | | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | — | | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | | |
| **Accounting** | | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — | |
| **Other Risks** | | | | | |
| ONFA adjustment decrease[12] | (50) | | | | |
| Avista Acquisition - Termination fee | | (49) | | | |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimization strategy**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed shifted from 2017-18 to 2018-19. OEB's September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. This finding mitigates this risk. However, OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application. OEB's final decision will be made at that time. Note, the impact of a decision could fall in 2019-20 depending on timing of the OEB decision.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful the company would record a one-time write-down of $885 million (for transmission and distribution net income) reflecting the OEB decision. The risk above reflects this risk at teh Province's 49.9% average share allocation for 2017-18. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2.

11. **Previous risk removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks<br>($ millions) | Plan<br>2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (+1.1 TWh)[1] | 85 | 85 | 85 | 85 |
| 1% increase in Hydro One actual load[2] | 57 | 59 | 61 | 63 |
| Higher OPG Return on Equity (ROE)[3] | 6 | 22 | 19 | 33 |

| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 50 | | | |

**or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $171M positive adjustment is included in the OPG outlook. The ONFA adjustment is expected to be finalized in February 2018.

## ONTARIO ELECTRICITY FINANCIAL CORPORATION

## ONTARIO ELECTRICITY FINANCIAL CORPORATION

**Changes from Budget 2017 as of October 2017** **$ Millions**

| | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|
| **Revenue** | | | | | | |
| Debt Retirement Charge | (4) | - | - | - | - | |
| Payments-in-lieu of tax: | | | | | | |
| OPG | (78) | 125 | (89) | (7) | (143) | 2016-17 decrease largely due to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 and onward decrease is due to estimated impact of OEB Dec. 29=8, 2017 rate decision. |
| Legacy Hydro One (Including Brampton) | (3) | - | - | - | - | |
| Hydro One CIT dedicated to OEFC | 5 | - | - | - | - | Adjustment based on updated information in Hydro One rate application |
| MEUs | 68 | - | - | - | - | Large increase in 2016-17 from $80M payment during transfer of H01 Brampton to new consolidated MEU Alectra. |
| Total PILs | (9) | 125 | (89) | (7) | (143) | |
| Interest : | | | | | | |
| OPG | (12) | (8) | 29 | 40 | 13 | Update to OPG interest outlook (wrt interest on OEFC loan). |
| H1 | - | - | - | - | - | |
| IESO | (1) | - | - | - | - | |
| Province | 22 | (38) | (88) | (88) | (88) | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to Hydro equity. |
| Other | 10 | 15 | 15 | 5 | 5 | |
| Total Interest | 19 | (31) | (44) | (43) | (70) | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Amortization of NUG liability | 0 | (0) | (0) | (0) | (0) | |
| Electricity sector dedicated income | (41) | 172 | 349 | 511 | 386 | The decrease in OEFC ESDI in 2017-18 reflects i) the IFRS adjustment of $400 million in 2017-18 that was not reflected in the OEFC ESDI projection at the time of the 2017 Budget (Note the IFRS adjustment was reflected in OPG net income for the 2017 Budget fiscal plan) and ii) the lower OPG and Hydro One net income due to OEB's 2017 rate decisions.<br><br>ESDI is alo lowered as the full impact of Hydro One share dispositions is now refelected in lower Hydro One net income tothe Province. Part of this impact was previously reflected in Sales and Rentals.<br><br>The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |
| Gain to OEFC under s. 50.3 | 411 | 531 | - | - | - | |
| Miscellaneous | 14 | - | - | - | - | |
| | 489 | 688 | 73 | 294 | 2 | |
| **Expense** | | | | | | |
| Debt interest | - | 25 | 62 | 83 | 78 | Revised outlook for OEFC debt interest outlook |
| Interest on nuclear risk funding | - | - | - | - | - | |
| Demand Management Support Costs | (2) | - | - | - | - | |
| Amortization of deferred debt costs | - | - | - | - | - | |
| Power Supply Contract Costs | 99 | (110) | (142) | (167) | (170) | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Debt Guarantee fee | - | - | 8 | 10 | 10 | |
| Operating | 1 | - | 1 | 1 | 1 | |
| | 98 | (86) | (71) | (73) | (82) | |
| **Excess (Deficiency) of Revenue over Expense** | **391** | **773** | **145** | | | |
| **Stranded Debt - Year End** | **3,202** | **1,342** | **1,151** | **652** | **198** | |

| **Cumulative Shortfall Adjustment** | | | | | | |
| Opening Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| Deduction / (Addition) | 0 | 0 | 0 | 0 | 0 | 0 |
| Ending Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **697** | **349** | **511** | **386** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **697** | **349** | **511** | **386** |

**Notes:**

1. The Hydro One financials above now reflects the Provincial share allocation as of January 2018.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Otherwise expect

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation, adjustment

it to be cleared

should be done. Even if its just making a negative to a positive. Perform all the calculations on the source tab then

bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AR29+'Hydro

One'!AR31+'Hydro One'!AR32 ), let's avoid them.

| Other OEFC FS / Public Accounts Updates | | | | | | |
| Electricity Debt Retirement Charge | (9) | 0 | 0 | 0 | 0 | 0 |
| Miscellaneous | 4 | (5) | (5) | (5) | (5) | (5) |
| Power Supply Contract Recoveries[5] | 91 | 96 | (171) | (71) | 25 | 25 |
| **Total Revenue Items On Deck** | 387 | (390) | (863) | (980) | (841) | (988) |

**Notes:**

1. OPG's 2015-16 outlook reflected its reported earnings. Out-years reflect OPG's 2017-19 business plan, November monthly update, and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based long-term projections from the November business plan and fiscalized by CEFD staff. OPG Business Plan projections are also adjusted to remove amounts related to asset optimisation amounts (for real estate sales, to avoid double-counting) that are reflected in the fiscal plan under sales and rentals.

1. OPG Net Income is also adjusted for assumed equity return on Provincial equity injection to partially finance the Global Adjustment deferral -- designed to match FTD estimated IOD to finance the equity injection. See OPG Worksheet for annual breakdown.

2. Reflects provincial adjustment as at December 31, 2016, for net unrealized earnings in the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated fund. Adjustment for 2014-15 also includes non-ONFA financial instruments.

3. Reflects CEFD forecasts based on latest available public information and modelling. Reflects an 70% Provincial share ownership, with impacts of future share sales incorporated into the asset optimisation projection in Other Non-Tax Revenues, Sales and Rentals

5. Reflects retroactive payment to applicant NUGs under the Global Adjustment lawsuit, based on payment in October 2016. Reflect updated forecast from 2016-17 to 2020-21, with the latest forecast from February 2017.

| On Deck Revenue Outlook as of June 2017 | Budget 2015-16 | 2016-17 | 2017-18 | Plan 2018-19 | 2019-20 | 2020-21 |

| | | | | |
| **Impact on Surplus/(Deficit)** | **3,433** | **1,180** | **1,215** | **810** |

**Notes: All the Hydro One ownership broadening impacts, other than the initial IPO in 2015, are in the asset optimisation line (Sales and Rental) and not in the current Outlook file.**

**Notes:**

1.Reflects OPG October 2015 report for 2015-16. Out-years reflect OPG's 2015 business plan and long-term outlook to 2018-19 (as fiscalized by OPG, received February 11, 2015). 2019-20 and 2020-21 estimates are preliminary and based on OPG's long-term model provided in 2015 and fiscalized by CEFD staff, to be updated.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2015.

3. Hydro One 2015-16 to 2020-21 projections are based on its 2015 Business plan, adjusted for latest information, including its 2015-17 distribution rate decIsion, adjustments to forecast ROEs based on current interest rate outlook and estimated Hydro One IPO impacts.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial consolidation adjustments, minus the interest costs to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's current 70% ownership share, after the initial IPO in 2015 [and the secondary offering in April 2016]. Net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2015-16 outlook reflected its reported earnings. 2016-17 outlook reflected OPG's November monthly update. Out-years reflect OPG's preliminary 2017-19 business plan and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections and as fiscalized by CEFD staff.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2015-16 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2016-17 to 2020-21 projections are based on CEFD projections based on latest public information and modelling, including its 2015-17 distribution rate decision, adjustments to forecast ROEs based on current interest rate outlook and estimated Hydro One IPO and secondary share offering impacts.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable costs to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's current 70% ownership share, after the initial IPO in 2015 [and the secondary offering in April 2016]. Net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2015-16 outlook reflected its reported earnings. 2016-17 outlook reflected OPG's November monthly update. Out-years reflect OPG's preliminary 2017-19 business plan and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections and as fiscalized by CEFD staff.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2015-16 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2016-17 to 2020-21 projections are based on CEFD projections based on latest public information and modelling, including its 2015-17 distribution rate decision, adjustments to forecast ROEs based on current interest rate outlook and estimated Hydro One IPO and secondary share offering impacts.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable ~~costs~~ to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

## Electricity Sector Outlook (PSAB)

| ($million) | Actual 2014-15 | Plan 2015-16 | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|---|---|
| **Changes from Budget 2016 as of June 2017** | | | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | | | |
| OPG Income | - | 34 | (172) | (489) | 59 | (79) | 332 | The explanation for the drop of OPG's Income are related to a number of OEB regulatory risks related to the pe application for the 5-year period starting in 2017. Budget 2016 figures were primarily based on OPG's 2015-17 Plan as its board-approved multi-year business plan had not yet been approved and provided when the 2016 Bu plan was locked. OPG's revenues are projected to improve over time as the regulated rate increases on the ba custom incentive regulation approach, and the first refurbished Darlington unit will return to service in February |
| ONFA and other Fair Value Adjustments | - | (69) | 49 | - | - | - | - | |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | - | - | |
| HOI Income | - | 424 | (62) | (234) | (294) | (304) | (296) | The variance primarily reflects impacts of new Hydro One net income and corporate income tax projections prc CEFD. Hydro One's net income increased due to the stronger than anticipated results for Q3 2016. Corporate i are also lower to reflect the corporate minimum cash taxes Hydro One will pay due to the benefit from the defe reducing cash taxes. Hydro One Brampton's net income is removed from 2017-18 onwards due to the merger v Inc. |
| **Total OPG and HOI Income** | **-** | **389** | (185) | (723) | (235) | (384) | 36 | |
| **Other Fees and Licences** | **-** | **-** | (5) | (23) | (32) | (34) | (41) | |
| **Electricity Expenses of the Province** | | | | | | | | |
| Provision for Electricity Sector | - | (3) | (149) | 685 | - | - | - | The variance is primarily due to the updated revenue figures from OPG and Hydro One. As well, at the time of the forecast was for a significant negative provision, which would have then be kept at zero to have the negative clawed back from the subsequent year (2016-17). As a result of larger than anticipated deferred tax benefit rep Hydro One and proportionate share attributed to the Province based on its ownership interest, the provision in 2 came out to be $3 million [and not the large negative provision previously anticipated]. The variance in 2016-17 explained by the reversal in the actual amount for 2015-16 versus the Budget 2016 forecast. The forecast for th after 2017-18 fiscal is zero since the ESDI payments are assumed to discontinue after DRC ends on April 1, 20 will consider policy options on the continuation of ESDI in 2017.] |
| Public Debt Interest - Electricity Sector | - | (12) | (22) | 38 | 38 | 38 | 38 | |
| **Subtotal** | - | (15) | (170) | 723 | 38 | 38 | 38 | |
| Public Debt Interest - Impact of ONFA | - | - | - | - | - | | - | |
| Amortization of Deferred Revenue re profit on sale of H1 notes | - | - | - | - | - | | - | |
| **Total Electricity Expenses of the Province** | **-** | **(15)** | (170) | 723 | 38 | 38 | 38 | |
| **OEFC Income** | | | | | | | | |
| **Taxation Revenue** | | | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | - | (4) | (122) | (66) | (44) | 60 | 116 | The variance is primarily due to updated OPG revenue figures in OPG's 2017-19 Business Plan, including lowe 2016-17, which impact its PIL payments as well. |
| **Other Revenue** | | | | | | | | |
| Electricity Debt Retirement Charge | - | (9) | - | - | - | - | - | Updated with December 2016 Ontario Planning Outlook forecast Scenario A |
| Power Supply Contract Recoveries | - | 91 | 96 | (171) | (71) | 25 | 25 | • The declines in volumes, payments and rates in 2017-18 and 2018-19 compared to the earlier forecast are du termination and suspension of several NUG PPAs for curtailments.<br>- The NUG suspensions/terminations coincide with the assumptions used by the IESO for LTEP modelling.<br>• The increase in volumes from 2019-2023 compared to the earlier forecast is from the correction of generatior Nagagami and The Power Limited Partnership, which lowered the forecasted rates.<br>• The latest model from Navigant includes more detailed modelling for Kirkland Lake, which resulted in lower o payments, however this decline was balanced by a higher payments due to an increase in forecasted TMC/DC<br>- The decline in payments in 2022-2023 is due to Iroquois Falls and Nipigon expiring, leaving Kirkland Lake as remaining gas facility. |
| Net Reduction of Power Purchase Contracts | - | - | - | - | - | - | - | |

## Electricity Sector Outlook (PSAB)

| Negative Revenue Risks | | | | | | |
|---|---|---|---|---|---|---|
| **($ millions)** | **Plan** | | | | | |
| | **2015-16** | **2016-17** | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| **OPG Global Adjustment Trust** | | | **TBD** | **TBD** | **TBD** | **TBD** |
| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | - | (120) | (120) | (120) | (120) | (120) |
| ONFA Funds Return Risk[2] | - | (90) | (95) | (100) | (105) | (110) |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | | (2) | (12) | (20) | (25) | (43) |
| Ministry of Energy's price mitigation initiative - OPG operational efficiencies[9] | | (60) | (240) | (240) | (240) | (180) |
| Lower Hydro One Return on Equity (ROE)[4] | | | (10) | (39) | (41) | (43) |
| Hydro One Tx rate application - OEB staff report[8] | | (13) | (50) | (50) | (50) | (50) |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[5] | | | (475) | | | |
| OPG IFRS Consolidation Risks - Scenario 1: 15 year historical, update discount rate each year.[6] | - | (75) | (425) | (525) | (675) | TBD |
| OPG IFRS Consolidation Risk - Scenario 2: 15 year historical + 5 forward, update every 5 year.[6] | | (1,000) | (375) | (400) | (400) | TBD |
| Additional regulatory risk - Timing, Darlington Refurb Project & Others[7] | - | | (660) | | | |
| **Total - Scenario 1** | - | (360) | (1,661) | (568) | (581) | (547) |
| **Total - Scenario 2** | - | (1,285) | (1,611) | (443) | (306) | (547) |

**Notes: The cumulative downside risk is presented as additive, which may overstate off-setting risks.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Under the Ontario Nuclear Funds Agreement (ONFA), OPG has established two segregated funds, the Decommissioning Segregated Fund (DSF) and for the Used Fuel Segregated Fund (UFSF). The risk shown is based on 1% decline on a realized basis in the DSF and UFSF, less the portion in the DSF assumed to be attributable to OPG's Bruce assets that is recoverable from consumers through the Bruce Variance Account.

3. Risk range for OPG reflects potential risk of lower ROE by 0.5% vs assumed ROEs in OPG's 2016 business plan and corresponding rate application. Also reflects how the proposed deemed equity of 49% might actually revert to the prior approved 45% weighting.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. The OEB directed a switch to cash-based accounting for years 2014 and 2015. However, the OEB also directed OPG to track the difference between cash based and accrual based accounting in a deferral account, while a generic proceeding is underway for all OEB-regulated electric and gas utilities.

6. The Ontario Auditor General recommended in the 2016 AG Report that the Province of Ontario include Hydro One and OPG financial information in the consolidated financial statements using the IFRS reporting framework as required by PSAB standards potentially as soon as the 2016-17 fiscal year. Estimated impacts to the Province by OPG being consolidated on an IFRS basis with respect to its nuclear liabilities under two methodologies are summarized in Scenarios 1 and 2. (Following work on the next Reference Plan, the potential impact to the 2021-22 fiscal year and going forward would be known.) **NOTE: The scenario 1 risk for 2017-18 to 2019-20 is reflected in the current fiscal plan.**

7. Additional regulatory risks related to the-rate application in spring 2016, including risks related to effective date timing, and a portion of refurb. costs-to-date of about $700-800M.

8. On January 25, 2017, the Ontario Energy Board (OEB) staff released their review of the Hydro One Transmission rate application (EB-2016-0160), and proposed a number of changes for the Board to rule on including a reduction in allowed capital expenditure, which would reduce the rate base and related return on capital, and OM&A related primarily to the compensation levels beyond the benchmark.

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | | | |
|---|---|---|---|---|---|---|
| **($ millions)** | **Plan** | | | | | |
| | **2015-16** | **2016-17** | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| **OPG Global Adjustment Trust** | | | | | | |
| OPG Generation Risk: Nuclear Reliability (+1.1 TWh)[1] | - | 85 | 85 | 85 | 85 | 85 |
| Positive OPG regulatory risk - Motion to Review[2] | - | - | - | - | - | - |
| 1% increase in Hydro One actual load[3] | - | 15 | 15 | 15 | 15 | 15 |
| Higher Hydro One Return on Equity (ROE)[4] | | - | 15 | 60 | 65 | 65 |
| Higher OPG Return on Equity (ROE)[5] | | - | 6 | 25 | 30 | 55 |
| Revenue risk if Scenario 2 IFRS Consolidation risk.[6] | | | 50 | 125 | 275 | |
| | - | 100 | 171 | 310 | 470 | 220 |

**Notes: The cumulative upside risk is presented as additive, which may overstate off-setting risks.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Reflects OPG's Motion to Review application with the OEB for the Niagara Tunnel cost disallowance and the 2013 tax loss.

3. A 1% change in the forecast represents a change of approximately 206MW for Tx in peak demand based on 2015/2016revenue requirement.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE by 1% vs assumed ROEs in the Hydro One CEFD Forecast. Rounded to the nearest $5M.

5. Risk range for OPG reflects potential risk of higher ROE by 1% (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Rounded to the nearest $5M.

6. NOTE: The Scenario 1 risk for 2017-18 to 2019-20 is reflected in the current fiscal plan. This is the impact if Scenario 2 is realized.

**Notes:**

1. OEFC interest income includes $520 million, or less (after H1 ownership broadening), annual interest payment from Province related to the Province's investment in OPG and Hydro One.

2. OEFC receives Electricity Sector Dedicated Income from the Province for the combined net income of OPG and Hydro One in excess of the Province's annual interest cost for its investment in these companies.

3. OEFC pays a Debt Guarantee Fee to the Province that is eliminated upon consolidation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Otherwise expect

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation, adjustment

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

it to be cleared

should be done. Even if its just making a negative to a positive. Perform all the calculations on the source tab then

bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AR29+'Hydro

One'!AR31+'Hydro One'!AR32 ), let's avoid them.

# Track Changes in Surplus/Defic

## Electricity Sector Outlook (PSAB)

| ($ millions) | Budget 2015-16 | 2016-17 | 2017-18 | Plan 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|---|---|
| **Approved Revenue Outlook as of [illegible] 2016** | | | | | | |
| **Electricity Revenues** | | | | | | |
| Income from Investment in Government Business Enterprises[1] | [illegible] | 1,049 | 1,198 | 1,347 | [illegible] | [illegible] |
| Taxation Revenue | | | | | | |
| Electricity Payments-in-Lieu of Taxes | 3,232 | 515 | 480 | 532 | 481 | 565 |
| Other Revenue | | | | | | |
| Electricity Debt Retirement Charge | 868 | 625 | 623 | - | - | - |
| Power Supply Contract Recoveries | 784 | 643 | 463 | 396 | 276 | 248 |
| Net reduction of Power Purchase Contracts[2] | 172 | 129 | 74 | 41 | 30 | 28 |
| Miscellaneous | 5 | 5 | 5 | 5 | 5 | 5 |
| **Total Electricity Revenue[3]** | 5,391 | 2,966 | 2,843 | 2,321 | 2,209 | 2,317 |

**Notes:**

1. Includes provincial consolidation adjustments for OPG's nuclear funds

2. Reflects the effective elimination of above-market NUG liability over a number of years starting January 1, 2005 (on a predetermined schedule).

3. Total reflects revenues from OPG, Hydro One, OEFC and PILS from MEUs, and excludes OPA and IESO and OEB.

## Revenue Items On Deck - Changes Compared to Budget 2016

| ($ millions) | Budget 2015-16 | 2016-17 | 2017-18 | Plan 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|---|---|

| **Total Revenue Items On Deck** | 387 | (405) | (863) | (980) | (841) | (988) |

**Notes:**

1. OPG's 2015-16 outlook reflected its reported earnings. Out-years reflect OPG's 2017-19 business plan, November monthly update, and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based long-term projections from the November business plan and fiscalized by CEFD staff. OPG Business Plan projections are also adjusted to remove amounts related to asset optimisation amounts (for real estate sales, to avoid double-counting) that are reflected in the fiscal plan under sales and rentals.

1. OPG Net Income is also adjusted for assumed equity return on Provincial equity injection to partially finance the Global Adjustment deferral -- designed to match FTD estimated IOD to finance the equity injection. See OPG Worksheet for annual breakdown.

2. Reflects provincial adjustment as at December 31, 2016, for net unrealized earnings in the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated fund. Adjustment for 2014-15 also includes non-ONFA financial instruments.

3. Reflects CEFD forecasts based on latest available public information and modelling. Reflects an 70% Provincial share ownership, with impacts of future share sales incorporated into the asset optimisation projection in Other Non-Tax Revenues, Sales and Rentals

5. Reflects retroactive payment to applicant NUGs under the Global Adjustment lawsuit, based on payment in October 2016. Reflect updated forecast from 2016-17 to 2020-21, with the latest forecast from February 2017.

| **Impact on Surplus/(Deficit)** | **3,433** | **1,180** | **1,215** | **810** |

**Notes: All the Hydro One ownership broadening impacts, other than the initial IPO in 2015, are in the asset optimisation line (Sales and Rental) and not in the current Outlook file.**

**Notes:**

1.Reflects OPG October 2015 report for 2015-16. Out-years reflect OPG's 2015 business plan and long-term outlook to 2018-19 (as fiscalized by OPG, received February 11, 2015). 2019-20 and 2020-21 estimates are preliminary and based on OPG's long-term model provided in 2015 and fiscalized by CEFD staff, to be updated.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2015.

3. Hydro One 2015-16 to 2020-21 projections are based on its 2015 Business plan, adjusted for latest information, including its 2015-17 distribution rate decIsion, adjustments to forecast ROEs based on current interest rate outlook and estimated Hydro One IPO impacts.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial consolidation adjustments, minus the interest costs to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's current 70% ownership share, after the initial IPO in 2015 [and the secondary offering in April 2016]. Net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2015-16 outlook reflected its reported earnings. 2016-17 outlook reflected OPG's November monthly update. Out-years reflect OPG's preliminary 2017-19 business plan and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections and as fiscalized by CEFD staff.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2015-16 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2016-17 to 2020-21 projections are based on CEFD projections based on latest public information and modelling, including its 2015-17 distribution rate decision, adjustments to forecast ROEs based on current interest rate outlook and estimated Hydro One IPO and secondary share offering impacts.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable costs to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

## Electricity Sector Outlook (PSAB)

| ($million) | Actual 2014-15 | Plan 2015-16 | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|---|---|
| **Changes from Budget 2016 as of July 2017** | | | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | | | |
| OPG Income | - | 34 | (172) | (489) | 59 | (79) | 332 | The explanation for the drop of OPG's Income are related to a number of OEB regulatory risks related to the pe application for the 5-year period starting in 2017. Budget 2016 figures were primarily based on OPG's 2015-17 Plan as its board-approved multi-year business plan had not yet been approved and provided when the 2016 Bu plan was locked. OPG's revenues are projected to improve over time as the regulated rate increases on the ba custom incentive regulation approach, and the first refurbished Darlington unit will return to service in February |
| ONFA and other Fair Value Adjustments | - | (69) | 49 | - | - | - | - | |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | - | - | |
| HOI Income | - | 424 | (77) | (234) | (294) | (304) | (296) | The variance primarily reflects impacts of new Hydro One net income and corporate income tax projections prc CEFD. Hydro One's net income increased due to the stronger than anticipated results for Q3 2016. Corporate i are also lower to reflect the corporate minimum cash taxes Hydro One will pay due to the benefit from the defe reducing cash taxes. Hydro One Brampton's net income is removed from 2017-18 onwards due to the merger v Inc. |
| **Total OPG and HOI Income** | **-** | **389** | (200) | (723) | (235) | (384) | 36 | |
| **Other Fees and Licences** | **-** | **-** | (5) | (23) | (32) | (34) | (41) | |
| **Electricity Expenses of the Province** | | | | | | | | |
| Provision for Electricity Sector | - | (3) | (149) | 685 | - | - | - | The variance is primarily due to the updated revenue figures from OPG and Hydro One. As well, at the time of the forecast was for a significant negative provision, which would have then be kept at zero to have the negative clawed back from the subsequent year (2016-17). As a result of larger than anticipated deferred tax benefit rep Hydro One and proportionate share attributed to the Province based on its ownership interest, the provision in 2 came out to be $3 million [and not the large negative provision previously anticipated]. The variance in 2016-17 explained by the reversal in the actual amount for 2015-16 versus the Budget 2016 forecast. The forecast for th after 2017-18 fiscal is zero since the ESDI payments are assumed to discontinue after DRC ends on April 1, 20 will consider policy options on the continuation of ESDI in 2017.] |
| Public Debt Interest - Electricity Sector | - | (12) | (22) | 38 | 38 | 38 | 38 | |
| **Subtotal** | - | (15) | (170) | 723 | 38 | 38 | 38 | |
| Public Debt Interest - Impact of ONFA | - | - | - | - | - | | - | |
| Amortization of Deferred Revenue re profit on sale of H1 notes | - | - | - | - | - | | - | |
| **Total Electricity Expenses of the Province** | **-** | **(15)** | (170) | 723 | 38 | 38 | 38 | |
| **OEFC Income** | | | | | | | | |
| **Taxation Revenue** | | | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | - | (4) | (122) | (66) | (44) | 60 | 116 | The variance is primarily due to updated OPG revenue figures in OPG's 2017-19 Business Plan, including lowe 2016-17, which impact its PIL payments as well. |
| **Other Revenue** | | | | | | | | |
| Electricity Debt Retirement Charge | - | (9) | - | - | - | - | - | Updated with December 2016 Ontario Planning Outlook forecast Scenario A |
| Power Supply Contract Recoveries | - | 91 | 96 | (171) | (71) | 25 | 25 | • The declines in volumes, payments and rates in 2017-18 and 2018-19 compared to the earlier forecast are du termination and suspension of several NUG PPAs for curtailments.<br>- The NUG suspensions/terminations coincide with the assumptions used by the IESO for LTEP modelling.<br>• The increase in volumes from 2019-2023 compared to the earlier forecast is from the correction of generatior Nagagami and The Power Limited Partnership, which lowered the forecasted rates.<br>• The latest model from Navigant includes more detailed modelling for Kirkland Lake, which resulted in lower o payments, however this decline was balanced by a higher payments due to an increase in forecasted TMC/DCI<br>- The decline in payments in 2022-2023 is due to Iroquois Falls and Nipigon expiring, leaving Kirkland Lake as remaining gas facility. |
| Net Reduction of Power Purchase Contracts | - | - | - | - | - | - | - | |

## Electricity Sector Outlook (PSAB)

### Negative Revenue Risks

| ($ millions) | Plan | | | | | |
|---|---|---|---|---|---|---|
| | 2015-16 | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
| **OPG Global Adjustment Trust** | | | TBD | TBD | TBD | TBD |
| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | - | (120) | (120) | (120) | (120) | (120) |
| ONFA Funds Return Risk[2] | - | (90) | (95) | (100) | (105) | (110) |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | | (2) | (12) | (20) | (25) | (43) |
| Ministry of Energy's price mitigation initiative - OPG operational efficiencies[9] | | (60) | (240) | (240) | (240) | (180) |
| Lower Hydro One Return on Equity (ROE)[4] | | | (10) | (39) | (41) | (43) |
| Hydro One Tx rate application - OEB staff report[8] | | (14) | (50) | (50) | (50) | (50) |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[5] | | | (475) | | | |
| OPG IFRS Consolidation Risks - Scenario 1: 15 year historical, update discount rate each year.[6] | - | (75) | (425) | (525) | (675) | TBD |
| OPG IFRS Consolidation Risks - Scenario 1b: 15 year historical, update discount rate each year.[6] | | (75) | (400) | (475) | (700) | (750) |
| OPG IFRS Consolidation Risk - Scenario 2: 15 year historical + 5 forward, update every 5 year.[6] | | (1,000) | (375) | (400) | (400) | TBD |
| Additional regulatory risk - Timing, Darlington Refurb Project & Others[7] | - | | (660) | | | |
| **Total - Scenario 1** | - | (436) | (2,061) | (1,043) | (1,281) | (547) |
| **Total - Scenario 2** | - | (1,361) | (2,011) | (918) | (1,006) | (547) |

**Notes: The cumulative downside risk is presented as additive, which may overstate off-setting risks.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Under the Ontario Nuclear Funds Agreement (ONFA), OPG has established two segregated funds, the Decommissioning Segregated Fund (DSF) and for the Used Fuel Segregated Fund (UFSF). The risk shown is based on 1% decline on a realized basis in the DSF and UFSF, less the portion in the DSF assumed to be attributable to OPG's Bruce assets that is recoverable from consumers through the Bruce Variance Account.

3. Risk range for OPG reflects potential risk of lower ROE by 0.5% vs assumed ROEs in OPG's 2016 business plan and corresponding rate application. Also reflects how the proposed deemed equity of 49% might actually revert to the prior approved 45% weighting.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. The OEB directed a switch to cash-based accounting for years 2014 and 2015. However, the OEB also directed OPG to track the difference between cash based and accrual based accounting in a deferral account, while a generic proceeding is underway for all OEB-regulated electric and gas utilities.

6. The Ontario Auditor General recommended in the 2016 AG Report that the Province of Ontario include Hydro One and OPG financial information in the consolidated financial statements using the IFRS reporting framework as required by PSAB standards potentially as soon as the 2016-17 fiscal year. Estimated impacts to the Province by OPG being consolidated on an IFRS basis with respect to its nuclear liabilities under two methodologies are summarized in Scenarios 1 and 2. (Following work on the next Reference Plan, the potential impact to the 2021-22 fiscal year and going forward would be known.) **NOTE: The scenario 1 risk for 2017-18 to 2019-20 is reflected in the current fiscal plan.**

7. Additional regulatory risks related to the rate application in spring 2016, including risks related to effective date timing, and a portion of refurb. costs-to-date of about $700-800M.

8. On January 25, 2017, the Ontario Energy Board (OEB) staff released their review of the Hydro One Transmission rate application (EB-2016-0160), and proposed a number of changes for the Board to rule on including a reduction in allowed capital expenditure, which would reduce the rate base and related return on capital, and OM&A related primarily to the compensation levels beyond the benchmark.

## Electricity Sector Outlook (PSAB)

### Positive Revenue Risks

| ($ millions) | Plan | | | | | |
|---|---|---|---|---|---|---|
| | 2015-16 | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
| **OPG Global Adjustment Trust** | | | | | | |
| OPG Generation Risk: Nuclear Reliability (+1.1 TWh)[1] | - | 85 | 85 | 85 | 85 | 85 |
| Positive OPG regulatory risk - Motion to Review[2] | - | - | - | - | - | - |
| 1% increase in Hydro One actual load[3] | - | 15 | 15 | 15 | 15 | 15 |
| Higher Hydro One Return on Equity (ROE)[4] | | - | 15 | 60 | 65 | 65 |
| Higher OPG Return on Equity (ROE)[5] | | - | 6 | 25 | 30 | 55 |
| Revenue risk if Scenario 2 IFRS Consolidation risk.[6] | | | 50 | 125 | 275 | |
| | - | 100 | 171 | 310 | 470 | 220 |

**Notes: The cumulative upside risk is presented as additive, which may overstate off-setting risks.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Reflects OPG's Motion to Review application with the OEB for the Niagara Tunnel cost disallowance and the 2013 tax loss.

3. A 1% change in the forecast represents a change of approximately 206MW for Tx in peak demand based on 2015/2016revenue requirement.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE by 1% vs assumed ROEs in the Hydro One CEFD Forecast. Rounded to the nearest $5M.

5. Risk range for OPG reflects potential risk of higher ROE by 1% (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Rounded to the nearest $5M.

6. NOTE: The Scenario 1 risk for 2017-18 to 2019-20 is reflected in the current fiscal plan. This is the impact if Scenario 2 is realized.

**Notes:**

1. OEFC interest income includes $520 million, or less (after H1 ownership broadening), annual interest payment from Province related to the Province's investment in OPG and Hydro One.

2. OEFC receives Electricity Sector Dedicated Income from the Province for the combined net income of OPG and Hydro One in excess of the Province's annual interest cost for its investment in these companies.

3. OEFC pays a Debt Guarantee Fee to the Province that is eliminated upon consolidation.

## Ontario Power Generation

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**Notes:**

1. OPG's 2015-16 outlook reflected its reported earnings. Out-years reflect OPG's 2017-19 business plan, November monthly update, and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based long-term projections from the November business plan and fiscalized by CEFD staff. OPG Business Plan projections are also adjusted to remove amounts related to asset optimisation amounts (for real estate sales, to avoid double-counting) that are reflected in the fiscal plan under sales and rentals.

1. OPG Net Income is also adjusted for assumed equity return on Provincial equity injection to partially finance the Global Adjustment deferral -- designed to match FTD estimated IOD to finance the equity injection. See OPG Worksheet for annual breakdown.

2. Reflects provincial adjustment as at December 31, 2016, for net unrealized earnings in the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated fund. Adjustment for 2014-15 also includes non-ONFA financial instruments.

3. Reflects CEFD forecasts based on latest available public information and modelling. Reflects an 70% Provincial share ownership, with impacts of future share sales incorporated into the asset optimisation projection in Other Non-Tax Revenues, Sales and Rentals

5. Reflects retroactive payment to applicant NUGs under the Global Adjustment lawsuit, based on payment in October 2016. Reflect updated forecast from 2016-17 to 2020-21, with the latest forecast from February 2017.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's current 70% ownership share, after the initial IPO in 2015 [and the secondary offering in April 2016]. Net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2015-16 outlook reflected its reported earnings. 2016-17 outlook reflected OPG's November monthly update. Out-years reflect OPG's preliminary 2017-19 business plan and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections and as fiscalized by CEFD staff.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2015-16 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2016-17 to 2020-21 projections are based on CEFD projections based on latest public information and modelling, including its 2015-17 distribution rate decision, adjustments to forecast ROEs based on current interest rate outlook and estimated Hydro One IPO and secondary share offering impacts.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable costs to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

## Electricity Sector Outlook (PSAB)

| ($million) | Actual 2014-15 | Plan 2015-16 | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|---|---|
| **Changes from Budget 2017 as of August 2017** | | | | | | | | ***Last updated X, to be updated upon next request*** |
| **Income from Investment in Government Business Enterprises** | | | | | | | | |
| OPG Income | - | - | (5) | 85 | - | - | - | The explanation for the drop of OPG's Income are related to a number of OEB regulatory risks related to the pe application for the 5-year period starting in 2017. Budget 2016 figures were primarily based on OPG's 2015-17 Plan as its board-approved multi-year business plan had not yet been approved and provided when the 2016 Bu plan was locked. OPG's revenues are projected to improve over time as the regulated rate increases on the ba custom incentive regulation approach, and the first refurbished Darlington unit will return to service in February |
| ONFA and other Fair Value Adjustments | - | - | 35 | - | - | - | - | |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | - | - | |
| HOI Income | - | 20 | 2 | 0 | 0 | 0 | 0 | The variance primarily reflects impacts of new Hydro One net income and corporate income tax projections pro CEFD. Hydro One's net income increased due to the stronger than anticipated results for Q3 2016. Corporate i are also lower to reflect the corporate minimum cash taxes Hydro One will pay due to the benefit from the defe reducing cash taxes. Hydro One Brampton's net income is removed from 2017-18 onwards due to the merger Inc. |
| **Total OPG and HOI Income** | **-** | **-** | 17 | 85 | 0 | 0 | 0 | |
| **Other Fees and Licences** | **-** | **-** | - | - | - | - | - | |
| **Electricity Expenses of the Province** | | | | | | | | |
| Provision for Electricity Sector | - | 3 | 53 | (123) | - | - | - | The variance is primarily due to the updated revenue figures from OPG and Hydro One. As well, at the time of the forecast was for a significant negative provision, which would have then be kept at zero to have the negative clawed back from the subsequent year (2016-17). As a result of larger than anticipated deferred tax benefit rep Hydro One and proportionate share attributed to the Province based on its ownership interest, the provision in came out to be $3 million [and not the large negative provision previously anticipated]. The variance in 2016-1 explained by the reversal in the actual amount for 2015-16 versus the Budget 2016 forecast. The forecast for t after 2017-18 fiscal is zero since the ESDI payments are assumed to discontinue after DRC ends on April 1, 20 will consider policy options on the continuation of ESDI in 2017.] |

| | Rounded |
| 20170817-1 | 2015-16 |

**Notes:**

1. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16. $3M Serves to the rectify this discrepancy
2. Brampton was excluded from the Ministry of Finance's ESDI allocation.

---

Update risk page to included nuclear liability cash vs. accrual risk. I also update the footnotes to suggest this and pension risk are mitigated by OEB staff report recommendations and Pension report recommendation. But notes that OEB Board could make its own decision.

Risk page still to be updated, including ordering footnotes properly, updating H1 risk as necessary, reviewing upside risks.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's current 70% ownership share, after the initial IPO in 2015 [and the secondary offering in April 2016]. Net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2015-16 outlook reflected its reported earnings. 2016-17 outlook reflected OPG's November monthly update. Out-years reflect OPG's preliminary 2017-19 business plan and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections and as fiscalized by CEFD staff.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2015-16 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2016-17 to 2020-21 projections are based on CEFD projections based on latest public information and modelling, including its 2015-17 distribution rate decision, adjustments to forecast ROEs based on current interest rate outlook and estimated Hydro One IPO and secondary share offering impacts.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable ~~costs~~ to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Expenses | 2015-16 | 2016-17 | 2017-18 | 2018-19 |

| Deduction / (Addition) | 0 | 0 | 0 | 0 | 0 | 0 |
| Ending Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **269** | **846** | **780** | **1,269** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **269** | | | |

**Notes:**

1. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16. $3M Serves to the rectify this discrepancy
2. Brampton was excluded from the Ministry of Finance's ESDI allocation.

| Other Revenue | | | | | | |
| Electricity Debt Retirement Charge | 859 | 625 | 623 | - | - | - |
| Power Supply Contract Recoveries | 875 | 739 | 292 | 325 | 301 | 273 |
| Net reduction of Power Purchase Contracts[2] | 172 | 129 | 74 | 41 | 30 | 28 |
| Miscellaneous | 9 | - | - | - | - | - |
| **Total Electricity Revenue[3]** | 5,862 | 2,709 | 2,011 | 2,136 | 2,098 | 2,697 |

**Notes:**

1. Includes provincial consolidation adjustments for OPG's nuclear funds

2. Reflects the effective elimination of above-market NUG liability over a number of years starting January 1, 2005 (on a predetermined schedule).

3. Total reflects revenues from OPG, Hydro One, OEFC and PILS from MEUs, and excludes OPA and IESO and OEB.

## Revenue Items On Deck - Changes Compared to Budget 2016

| ($ millions) | Budget 2015-16 | 2016-17 | 2017-18 | Plan 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|---|---|
| OPG August 2017 Financial Outlook[1] | 0 | (83) | 103 | 12 | 4 | 2 |
| ONFA and other Fair Value Accounting Adjustments[2] | (119) | (336) | (480) | (678) | (726) | (913) |
| Hydro One August 2017 Financial Outlook Update[3] | 20 | (23) | (12) | (12) | (12) | (12) |
| MEUs PILs | 0 | 68 | 0 | 0 | 0 | 0 |
| Other OEFC FS / Public Accounts Updates | | | | | | |
| Electricity Debt Retirement Charge | 0 | (4) | 0 | 0 | 0 | 0 |
| Miscellaneous | 0 | 14 | 0 | 0 | 0 | 0 |
| ; | 0 | 99 | (0) | (0) | (0) | 0 |
| **Total Revenue Items On Deck** | (99) | (266) | (389) | (678) | (735) | (923) |

**Notes:**

1. OPG's 2015-16 outlook reflected its reported earnings. Out-years reflect OPG's 2017-19 business plan, November monthly update, and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based long-term projections from the November business plan and fiscalized by CEFD staff. OPG Business Plan projections are also adjusted to remove amounts related to asset optimisation amounts (for real estate sales, to avoid double-counting) that are reflected in the fiscal plan under sales and rentals.

1. OPG Net Income is also adjusted for assumed equity return on Provincial equity injection to partially finance the Global Adjustment deferral -- designed to match FTD estimated IOD to finance the equity injection. See OPG Worksheet for annual breakdown.

2. Reflects provincial adjustment as at December 31, 2016, for net unrealized earnings in the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated fund. Adjustment for 2014-15 also includes non-ONFA financial instruments.

3. Reflects CEFD forecasts based on latest available public information and modelling. Reflects an 70% Provincial share ownership, with impacts of future share sales incorporated into the asset optimisation projection in Other Non-Tax Revenues, Sales and Rentals

5. Reflects retroactive payment to applicant NUGs under the Global Adjustment lawsuit, based on payment in October 2016. Reflect updated forecast from 2016-17 to 2020-21, with the latest forecast from February 2017.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's current 70% ownership share, after the initial IPO in 2015 [and the secondary offering in April 2016]. Net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 outlook reflects OPG's latest monthly update. Out-years reflect OPG's preliminary 2017-19 business plan and long-term outlook to 2019-20 (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections and as fiscalized by CEFD staff.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering are currently reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | (120) | (120) | (120) | (120) |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) |
| **Regulatory** | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | (600) | | | |
| Regulatory Risk - Timing of Rate Decision[7] | (540) | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | (187) | (162) | (179) | (210) |
| Nuclear Liabilities Cash vs. Accrual[9] | (450) | (450) | (450) | (450) |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | |
| **Accounting** | | | | |
| OPG IFRS Consolidation Risks | | | | |
| **Other Risks** | | | | |
| Avista Acquisition - Termination fee | (51) | | | |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimi**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. The OEB directed a switch to cash-based accounting for years 2014 and 2015. However, the OEB also directed OPG to track the difference between cash based and accrual based accounting in a deferral account, while a generic proceeding is underway for all OEB-regulated electric and gas utilities. OEB September 2017 Report, recommends continuance of variance account which would mitigate this risk. However, the final decision (expected in Fall 2017) will be with the OEB Board.

7. Risk refelects OPG impact if the OEB rate rulings are applied as of the final decision date rather than retroactive to January 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive.

8. Reflects OEB staff report (May 2017) reccomendations with respect to OPG's rate application. (Inlcudes OPG rate application updates).

9. Risk refelects impact of OEB decision that OPG switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB staff report (May 2017) appears to mitigate this risk as it makes no decision and recommends revisiting this issue in 5 years at next OEB application.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. The estimated annual ongoing impact of this is factored into the current outlook. This risk reflects the impact if a decision is made by Hydro One that the impact of the ruling has to be accounted for as an immediate one-time write-down.
Note: Corresponding Positive Revenue Risks would also need to be incorporated for 2018-19 to 2020-21 if this risk is to be recognized. The risk reflect ther roughly 50% proncial ownership pending recategorization from teh AO Sales and Rentals outlook.

11. OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. This Electricity Outlook pick up teh additional IFRS risk.
Table below outlines OPG IFRS Risks versus what is built into the Fiscal Plan.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | |
|---|---|---|---|---|
| **($ millions)** | **Plan** | | | |
| | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (+1.1 TWh)[1] | 85 | 85 | 85 | 85 |
| 1% increase in Hydro One actual load[2] | 57 | 59 | 61 | 63 |
| Higher OPG Return on Equity (ROE)[3] | 6 | 22 | 19 | 33 |
| Higher Hydro One Return on Equity (ROE)[4] | 19 | 69 | 50 | 50 |

| ONFA adjustment increase (as of September 2017 Q3)[5] | 171 | | | |

**zation strategy or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income.

**Notes:**

1. The Hydro One financials above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering are currently reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

---

John

Attached is the Electricity Outlook with re-categorization for Asset Optimization. Unpacking involved two changes. 1) building back in net income and PILs impacts of OPG's 2017-18 head office properties sale and 2) updating provincial ownership of Hydro One , form about 70% at Budget to around 50% or lower for the current outlook.

We included a summary table on Cover Sheet (line 97) which shows all the changes since Budget due to forecast updates and unpacking. The unpacking impacts are fiscally-neutral n=but there were relatively small updates to AO targets. These are summarized in this table.

There may be further changes to AO related to Lakeview sales expected before the end of the fiscal year. As this has not yet occurred that amount would remain in Sales and Rentals for now. We have coordinated with SIFB and FTD on this outlook and "unpacking" exercise".

Bruno

**FOR EFB USE ONLY**

**Budget 2017 Outlook**
**Current Outlook**
**Change Since Budget**

**Description of Update**

ONFA Update as of March 31 2017
s. 50.3 Update for 2016-17
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Debt Interest
OPG IFRS Risk in 2019-20
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Power Purchase Supply
H1 Model Forecasts - No Fiscal Update Resaving Data
Update Budget 2017 Tabs to reflect fiscal plan
Update OPG forecasted PILS to reflect sources
Update H1 2016-17 CIT
Re-inputting ONFA updates
Updating H1 Net Income to include Pref Shares in 16-17
Updating OPG Income Tax Expense for 2016-17
Updating OPG non-income tax PILs
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2017
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2018
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2019
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
**[NOT APPLIED]** Updating H1 Brampton (Interim Adjustments)
Shifted H1 Brampton 2016-17 NI to the 2017-18
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)

add prior-year adjustment for 2016-17

add prior-year adjustment for 2016-18
Reconfigured calculation of ESDI and MOF ESDI Expense
Reconfigured calculation of OPG 2017-18 Net Income
Backup for the Provincial Interest cost
Linking source for Revenue Risks Tab
New source for Revenue Risks Tab
Revenue Risks Tab - ROE Risks
Updating OEB Risk for OPG
OEB Staff Report - H1 Tx - Revenue Risks
OPG Pensions - Cash vs Accrual Deferral Accounts
Updating Links in Electricity Summary Change and OEFC Change
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton

Updating DRC for Actuals 2016-17 (Based on draft FS)
Updating PILs for 2016-17 Baced on Actuals
OPG: Non-ONFA Fair Value Adjustment
Round all Hydro One ownership assumptions to two decimal places
H1 Equity Adjustment rounding.
Round all Hydro One ownership assumptions to two decimal places
Round all Hydro One ownership assumptions to two decimal places
Revising source of ESDI, Dedicated Electricity Earnings
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Updating Miscellaneous OEFC Revenue to Actuals
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Public Accts: Updated IESO debt interest Interest On Debt, 2016-17
Public Accts: 2016-17 - Demand Management Support Costs Update
2017-18 - Demand Management Support Costs (no change)
Public Accts: 2016-17 - Updating Operating Expense in OEFC
Sourcing Provision for Electricity Sector from Actual Public Accounts
Revised 2016-17 Brampton Amount for Public Accounts
OPG Pensions - Cash vs Accrual Deferral Accounts (Revenue Risks Tab)
OPG Net Income and PILs for June Results

Switch to Direct from Model
Switch to Direct from Model
Updating ROE Risks
Updating H1 Load Risks based on model output
Updating ONFA Risks for September 2017
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Updating OPG
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpack PILs related to HQ gain on sale
Updating IFRS Risk
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
November 1 and November 7 Hydro One model updates

November 1 and November 7 Hydro One model updates
November 1 and November 7 Hydro One model updates
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Updating OPG Revenue Risks from rate application
Update Hydro One PILs (reverses update on line 119 whuich did not account fro Dx side)
Updating Debt Guarantee Fee
Updating OEFC Operating Expense
small changes - linking the net income numbers

Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Updated OPG Net Income (based on their Q3 update, Sep 30, 2017)
Updated OPG ONFA adjustment (up to Sep 30, 2017) in OPG tab (removed it from Risks table)
Removal of OPG ONFA Sep 2017 adjustment in Risks table
Included possible range (-50M to 50M) of impact for future OPG ONFA adjustment in the negative
Removal of negative regulatory risk: "OPG Switch from accrual based to cash based accounting f
Removal of negative regulatory risk: "Timing of OPG Rate Decision" from Risks table
Removal of negative regulatory risk: "OEB Staff Recommendations wrt OPG rate application(May
Removal of negative regulatory risk: "Nuclear Liabilities Cash vs. Accrual" from Risks table
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| *variance to OEFC check* | *(156)* | *(454)* | *(550)* | *(0)* | *(0)* | - |

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 reflects OPG's lates monthly update. 2018 to 2019-20 reflects OPG's 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget and OEB Dec. 28 rate decision. Note rate decsion impact is alloacted to net income and PILs on a 75%/25% basis respectively.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2016-17 income reflects its projected net income adjusted for the Province's ownership share in Hydro One following the final offering in May 2017 and including the First Nations sale in December 2017. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18. There is currently a PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of October 2017** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | 52 | (596) | (632) | (909) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 due largely to OEB Dec. 28, 2017 rate decision including effective date of June 1, 2017 rather than jan. 1, 2017. Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS adjustment impacts in those years as well as OEB Dec. 28, 2017 rate decision. The OEB Dec. 28, 2017 rate decision estimated impacts are allocated between OPG net income and PILs on a 75%/25% basis. |
| ONFA and other Fair Value Adjustments | 35 | 171 | - | - | - | Largely revision to ONFA fair value as of September 30, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (190) | (235) | (216) | (233) | 2016-17 slight decrease from Budget 2017 Interim projection.<br>2017-18 onwards reflects i) impact of OEB Sep. 2017 decision on Hydro One transmission rates and ii) interest expense on Avitsa debentures (in 2017-18 and 2018-19). |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **33.0** | **(831)** | **(848)** | **(1,143)** | |
| **Other Fees and Licences** | **-** | **-** | **8** | **10** | **10** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | 101 | (9) | - | (48) | Changes to the Proviision (ESDI) expense in 2017-18 mainly reflect lower OPG net income due to OEB's Dec. 28, 2017 rate decision and lower Hydro One net income due to OEB's Sep. 2017 transmission rate decision. The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |
| Public Debt Interest - Electricity Sector | (22) | 38 | 38 | 38 | 38 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to HydroOne's April 2016 offering. Note the impact of the final offering will be refelected in PDI during 2018. |
| **Total Electricity Expenses of the Province** | **31** | **138** | **29** | **38** | **(10)** | |

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | (28) | (24) | (35) | (43) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | - | - | - | - | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Net Reduction of Power Purchase Contracts | 0.1 | (0) | (0) | (0) | (0) | |
| Other Fees and Licences | - | - | (8) | (10) | (10) | |
| Revenue Pool Residual | - | - | - | | - | |
| Miscellaneous | 14 | - | - | - | - | |
| **Expenses** | | | | | | |
| Interest on Debt | 19 | (53) | (64) | (69) | (98) | 2017-18 reflects revised debt interest outlook net of revisions to OEFC interest revenue from OPG and Province. |
| Power Supply Contract Costs | (99) | 110 | 142 | 167 | 170 | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Electricity Consumer Price Protection Fund | - | - | - | - | - | |
| Demand Management Support Costs | 1.8 | - | - | - | - | |
| Provision for Electricity Sector | (53) | (101) | 9 | - | 48 | see explanation above for "Provision for Electriocty Sector" (line 17) |

|---|---|---|---|---|
| ($ millions) | Plan | | | |
| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | (120) | (120) | (120) | (120) |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) |
| **Regulatory** | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | – | TBD | TBD | TBD |
| Regulatory Risk - Timing of OPG Rate Decision[7] | – | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | – | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | – | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | |
| **Accounting** | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — |
| **Other Risks** | | | | |
| ONFA adjustment decrease[12] | (50) | | | |
| Avista Acquisition - Termination fee | | (49) | | |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimizati**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed from 2017-18. OEB September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful teh company would record a one-time write-down of $885 million reflecting the OEB decision. The risk above reflects this risk at teh Province's 49.9% average share allocation for 2017-18. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2.

11. **Previous risk removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $171M positive adjustment is included in the OPG outlook. The ONFA adjustment is expected to be finalized in February 2018.

## ONTARIO ELECTRICITY FINANCIAL CORPORATION

**Changes from Budget 2017 as of October 2017** **$ Millions**

| | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|
| **Revenue** | | | | | | |
| Debt Retirement Charge | (4) | - | - | - | - | |
| Payments-in-lieu of tax: | | | | | | |
| OPG | (78) | (28) | (24) | (35) | (43) | 2016-17 decrease largely due to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 and onward decrease is due to estimated impact of OEB Dec. 29=8, 2017 rate decision. |
| Legacy Hydro One (Including Brampton) | (3) | - | - | - | - | |
| Hydro One CIT dedicated to OEFC | 5 | - | - | - | - | Adjustment based on updated information in Hydro One rate application |
| MEUs | 68 | - | - | - | - | Large increase in 2016-17 from $80M payment during transfer of H01 Brampton to new consolidated MEU Alectra. |
| Total PILs | (9) | (28) | (24) | (35) | (43) | |
| Interest : | | | | | | |
| OPG | (12) | 1 | 26 | 40 | 13 | Update to OPG interest outlook (wrt interest on OEFC loan). |
| H1 | - | - | - | - | - | |
| IESO | (1) | - | - | - | - | |
| Province | 22 | (38) | (38) | (38) | (38) | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to Hydro equity. |
| Other | 10 | 15 | 15 | 5 | 5 | |
| Total Interest | 19 | (22) | 3 | 7 | (20) | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Amortization of NUG liability | 0 | (0) | (0) | (0) | (0) | |
| Electricity sector dedicated income | (41) | (501) | 9 | - | 48 | The decrease in OEFC ESDI in 2017-18 reflects i) the IFRS adjustment of $400 million in 2017-18 that was not reflected in the OEFC ESDI projection at the time of the 2017 Budget (Note the IFRS adjustment was reflected in OPG net income for the 2017 Budget fiscal plan) and ii) the lower OPG and Hydro One net income due to OEB's 2017 rate decisions.<br><br>The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |
| Gain to OEFC under s. 50.3 | 411 | 550 | - | - | - | |
| Miscellaneous | 14 | - | - | - | - | |
| | 489 | (111) | (155) | (195) | (186) | |
| **Expense** | | | | | | |
| Debt interest | - | 31 | 67 | 76 | 78 | Revised outlook for OEFC debt interest outlook |
| Interest on nuclear risk funding | - | - | - | - | - | |
| Demand Management Support Costs | (2) | - | - | - | - | |
| Amortization of deferred debt costs | - | - | - | - | - | |
| Power Supply Contract Costs | 99 | (110) | (142) | (167) | (170) | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Debt Guarantee fee | - | - | 8 | 10 | 10 | |

| Deduction / (Addition) | 0 | 0 | 0 | 0 | (73) | 73 |
| Ending Balance | 0 | 0 | 0 | 0 | (73) | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **24** | **9** | **0** | **48** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **24** | **9** | **0** | **48** |

**Notes:**

1. The Hydro One financials above currently reflects the Provincial share allocation as the May 2017 final offering.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**FOR EFB USE ONLY**

**Budget 2017 Outlook**
**Current Outlook**
**Change Since Budget**

**Description of Update**

ONFA Update as of March 31 2017
s. 50.3 Update for 2016-17
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Debt Interest
OPG IFRS Risk in 2019-20
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Power Purchase Supply
H1 Model Forecasts - No Fiscal Update Resaving Data
Update Budget 2017 Tabs to reflect fiscal plan
Update OPG forecasted PILS to reflect sources
Update H1 2016-17 CIT
Re-inputting ONFA updates
Updating H1 Net Income to include Pref Shares in 16-17
Updating OPG Income Tax Expense for 2016-17
Updating OPG non-income tax PILs
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2017
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2018
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2019
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
**[NOT APPLIED]** Updating H1 Brampton (Interim Adjustments)
Shifted H1 Brampton 2016-17 NI to the 2017-18
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)

add prior-year adjustment for 2016-17

add prior-year adjustment for 2016-18
Reconfigured calculation of ESDI and MOF ESDI Expense
Reconfigured calculation of OPG 2017-18 Net Income
Backup for the Provincial Interest cost
Linking source for Revenue Risks Tab
New source for Revenue Risks Tab
Revenue Risks Tab - ROE Risks
Updating OEB Risk for OPG
OEB Staff Report - H1 Tx - Revenue Risks
OPG Pensions - Cash vs Accrual Deferral Accounts
Updating Links in Electricity Summary Change and OEFC Change
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton

Updating DRC for Actuals 2016-17 (Based on draft FS)
Updating PILs for 2016-17 Baced on Actuals
OPG: Non-ONFA Fair Value Adjustment
Round all Hydro One ownership assumptions to two decimal places
H1 Equity Adjustment rounding.
Round all Hydro One ownership assumptions to two decimal places
Round all Hydro One ownership assumptions to two decimal places
Revising source of ESDI, Dedicated Electricity Earnings
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Updating Miscellaneous OEFC Revenue to Actuals
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Public Accts: Updated IESO debt interest Interest On Debt, 2016-17
Public Accts: 2016-17 - Demand Management Support Costs Update
2017-18 - Demand Management Support Costs (no change)
Public Accts: 2016-17 - Updating Operating Expense in OEFC
Sourcing Provision for Electricity Sector from Actual Public Accounts
Revised 2016-17 Brampton Amount for Public Accounts
OPG Pensions - Cash vs Accrual Deferral Accounts (Revenue Risks Tab)
OPG Net Income and PILs for June Results
OPG Net Income and PILs for June Results

Correction to PILs on OPG sheet
Switch to Direct from Model
Switch to Direct from Model
Switch to Direct from Model
Updating ROE Risks
Updating H1 Load Risks based on model output
Updating ONFA Risks for September 2017
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Updating OPG
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpack PILs related to HQ gain on sale
Updating IFRS Risk
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
November 1 and November 7 Hydro One model updates

November 1 and November 7 Hydro One model updates
November 1 and November 7 Hydro One model updates
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Updating OPG Revenue Risks from rate application
Update Hydro One PILs (reverses update on line 119 whuich did not account fro Dx side)
Updating Debt Guarantee Fee
Updating OEFC Operating Expense
small changes - linking the net income numbers

Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Updated OPG Net Income (based on their Q3 update, Sep 30, 2017)
Updated OPG ONFA adjustment (up to Sep 30, 2017) in OPG tab (removed it from Risks table)
Removal of OPG ONFA Sep 2017 adjustment in Risks table
Included possible range (-50M to 50M) of impact for future OPG ONFA adjustment in the negative
Removal of negative regulatory risk: "OPG Switch from accrual based to cash based accounting f
Removal of negative regulatory risk: "Timing of OPG Rate Decision" from Risks table
Removal of negative regulatory risk: "OEB Staff Recommendations wrt OPG rate application(May
Removal of negative regulatory risk: "Nuclear Liabilities Cash vs. Accrual" from Risks table
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| *variance to OEFC check* | *(156)* | *(454)* | *(531)* | - | - | - |

**Notes:**

1.OPG's 2017-18 to 2020-21 outlook reflects OPG's 2018-2021 Business Plan and Includes OPG head office properties sale proceeds and Lakeview property sale proceeds. 2021-22 estimates are based on OPG's calendar year-based business plan projections for 2021 and a CEFD projection for 2022. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2017-18 is based on actual Hydro One results for 2017 and CEFD projection for 2018. Quarterly earnings are adjusted for the provincial ownership share during the quarter. 2018-19 and onwards are CEFD projections using the latest public information and reflects the Province's ownership share following the May 2017 share disposition and including the First Nations sale in December 2017. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18 based on TB/MBC approval of the PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of February 2018** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | 708 | (332) | (122) | (714) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 increase is largely due to the re-categorization from Sales and Rentals to OPG net income proceeds from the sale of OPG head office and Lakeview properties. This accounts for $483M of the increase. Note that whicle the re-categorization itself is fiscally-neutral proceeds from property sales are $206M higher than projected at the time of the 2017 Budget.<br><br>2017-18 results are also boosted by lower expenses than assumed at the time of Budget 2017.<br><br>Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS adjustment impacts in those years as well as OEB Dec. 28, 2017 rate decision. The OEB Dec. 28, 2017 rate decision estimated impacts are allocated between OPG net income and PILs on a 75%/25% basis. |
| ONFA and other Fair Value Adjustments | 35 | 194 | - | - | - | Largely revision to ONFA fair value as of December 31, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (173) | (209) | (191) | (214) | 2016-17 slight decrease from Budget 2017 Interim projection.<br><br>2017-18 onwards mainly reflects i) re-categorization from Sales and Rentals to Hydro One net income of the impact of a lower Provincial share of Hydro One net income from Hydro One share sales ii) impact of OEB Sep. 2017 decision on Hydro One transmission rates and iii) interest expense on Avitsa debentures (in 2017-18 and 2018-19). |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **728.5** | **(541)** | **(314)** | **(928)** | |
| **Other Fees and Licences** | **-** | **-** | **8** | **10** | **10** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | (572) | (349) | (511) | (386) | **[NOTE: A positive number on this line indicates a decrease in the provision, while a negative number means an increase in provision expense.]**<br>Changes to the Provision (ESDI) expense in 2017-18 mainly reflect higher OPG net income due to recategorisation from Sales and Rentals (see above).<br><br>Change in out-years reflects TB/MBC approval in 2017-18 PRRT approval to continue Provision for the Electricity Sector (i.e., Electricity Sector Dedicated Income to OEFC) beyond 2017-18. 2017 Budget assumed previous policy whereby ESDI ended after 2017-18. |
| Public Debt Interest - Electricity Sector | (22) | 38 | 88 | 88 | 88 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br><br>2017-18 and 2018-19 and onward change reflects revised projections for Provincial debt interest as a result of debt pay downs related to Hydro One's April 2016 and April 2017 offerings, repectively. |
| **Total Electricity Expenses of the Province** | **31** | **(535)** | **(261)** | **(423)** | **(298)** | |

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | 125 | (89) | (7) | (143) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 increase is largely due to inclusion of PILs related to disposition of OPG headquarters and Lakeview properties. 2018-19 onward lower mainly due to lower OPG income tax PILs. Property tax componenst are close to Budget 2017. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | - | - | - | - | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance in 16-17 is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement (PPA) contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. Going-forward, variance is largely due to suspension or early termination of some NUG PPAs in response to the IESO's NUG curtailment initiative. |
| Net Reduction of Power Purchase Contracts | 0.1 | (0) | (0) | (0) | (0) | |
| Other Fees and Licences | - | - | (8) | (10) | (10) | |
| Revenue Pool Residual | - | - | - | | - | |

| **Generic** | | | | | |
| OPG Generation Risk: Nuclear Reliability (-1.6 TWh)[1] | (120) | (120) | (120) | (120) | |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) | |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) | |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) | |
| **Regulatory** | | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) | |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | — | (600) | | | |
| Regulatory Risk - Timing of OPG Rate Decision[7] | — | | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | — | | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | — | | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | | |
| **Accounting** | | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — | |
| **Other Risks** | | | | | |
| ONFA adjustment decrease[12] | (100) | | | | |
| Avista Acquisition - Termination fee | | (49) | | | |
| PILs risk related to defesement of Stranded debt and potential wind down of OEFC[13] | | | | | (340) |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimization strategy**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed shifted from 2017-18 to 2018-19. OEB's September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. This finding mitigates this risk. However, OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application. OEB's final decision will be made at that time. Note, the impact of a decision could fall in 2019-20 depending on timing of the OEB decision.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful the company would record a one-time write-down of $885 million (for transmission and distribution net income) reflecting the OEB decision. The risk above reflects this risk at teh Province's 49.9% average share allocation for 2017-18. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2.

11. **Previous risk removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks<br>($ millions) | Plan<br>2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Reliability (+1.1 TWh)[1] | 85 | 85 | 85 | 85 |
| 1% increase in Hydro One actual load[2] | 57 | 59 | 61 | 63 |
| Higher OPG Return on Equity (ROE)[3] | 6 | 22 | 19 | 33 |

**' or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $171M positive adjustment is included in the OPG outlook. The ONFA adjustment is expected to be finalized in February 2018.

## ONTARIO ELECTRICITY FINANCIAL CORPORATION

## On Deck Outlook as of March 2017

## ONTARIO ELECTRICITY FINANCIAL CORPORATION

**Changes from Budget 2017 as of February 2018** **$ Millions**

| | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|
| **Revenue** | | | | | | |
| Debt Retirement Charge | (4) | - | - | - | - | |
| Payments-in-lieu of tax: | | | | | | |
| OPG | (78) | 125 | (89) | (7) | (143) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 increase is largely due to inclusion of PILs related to disposition of OPG headquarters and Lakeview properties. 2018-19 onward lower mainly due to lower OPG income tax PILs. Property tax componenst are close to Budget 2017. . |
| Legacy Hydro One (Including Brampton) | (3) | - | - | - | - | |
| Hydro One CIT dedicated to OEFC | 5 | - | - | - | - | Adjustment based on updated information in Hydro One rate application |
| MEUs | 68 | - | - | - | - | Large increase in 2016-17 from $80M payment during transfer of H01 Brampton to new consolidated MEU Alectra. |
| Total PILs | (9) | 125 | (89) | (7) | (143) | |
| Interest : | | | | | | |
| OPG | (12) | (8) | 29 | 23 | (4) | Update to OPG interest outlook (wrt interest on OEFC loan). |
| H1 | - | - | - | - | - | |
| IESO | (1) | - | - | - | - | |
| Province | 22 | (38) | (88) | (88) | (88) | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br><br>2017-18 and 2018-19 and onward change reflects revised projections for Provincial debt interest as a result of debt pay downs related to Hydro One's April 2016 and April 2017 offerings, repectively. |
| Other | 10 | 15 | 15 | 5 | 5 | |
| Total Interest | 19 | (31) | (44) | (60) | (87) | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Amortization of NUG liability | 0 | (0) | (0) | (0) | (0) | |
| Electricity sector dedicated income | (41) | 172 | 349 | 511 | 386 | The decrease in OEFC ESDI in 2017-18 reflects i) the IFRS adjustment of $400 million in 2017-18 that was not reflected in the OEFC ESDI projection at the time of the 2017 Budget (Note the IFRS adjustment was reflected in OPG net income for the 2017 Budget fiscal plan) and ii) the lower OPG and Hydro One net income due to OEB's 2017 rate decisions.<br><br>Changes to the Provision (ESDI) expense in 2017-18 mainly reflect higher OPG net income due to recategorisation from Sales and Rentals of proceeds from the sale of OPG headquarters properties and Lakeview properties.<br><br>Th eincrease in 2018-19 onward reflects TB/MBC approval in 2017-18 PRRT approval to continue Provision for the Electricity Sector (i.e., Electricity Sector Dedicated Income to OEFC) beyond 2017-18. 2017 Budget assumed previous policy whereby ESDI ended after 2017-18. |
| Gain to OEFC under s. 50.3 | 411 | 531 | - | - | - | |
| Miscellaneous | 14 | - | - | - | - | |
| | 489 | 688 | 73 | 277 | (15) | |
| **Expense** | | | | | | |
| Debt interest | - | 19 | 50 | 71 | 65 | Revised outlook for OEFC debt interest outlook |
| Interest on nuclear risk funding | - | - | - | - | - | |
| Demand Management Support Costs | (2) | - | - | - | - | |
| Amortization of deferred debt costs | - | - | - | - | - | |
| Power Supply Contract Costs | 99 | (110) | (142) | (167) | (170) | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Debt Guarantee fee | - | - | 8 | 10 | 10 | |
| Operating | 1 | - | 1 | 1 | 1 | |
| | 98 | (91) | (83) | (85) | (94) | |
| **Excess (Deficiency) of Revenue over Expense** | **391** | **779** | **157** | | | |
| **Stranded Debt - Year End** | **3,202** | **1,336** | **1,134** | **639** | **190** | |

| **Exclude Brampton[3]** | | (15) | | | | |
| **MOF Provision Expense (after other adjustments)** | **0** | **290** | **697** | **349** | **511** | **386** |
| **Cumulative Shortfall Adjustment** | | | | | | |
| Opening Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| Deduction / (Addition) | 0 | 0 | 0 | 0 | 0 | 0 |
| Ending Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **697** | **349** | **511** | **386** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **697** | **349** | **511** | **386** |

**Notes:**

1. The Hydro One financials above now reflects the Provincial share allocation as of January 2018.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

## Electricity Sector Outlook

| *variance to OEFC check* | *(454)* | *(531)* | - | - | - |

**Notes:**

1.OPG's 2017-18 to 2020-21 outlook reflects OPG's 2018-2021 Business Plan and Includes OPG head office properties sale proceeds and Lakeview property sale proceeds. 2021-22 estimates are based on OPG's calendar year-based business plan projections for 2021 and a CEFD projection for 2022. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2017-18 is based on actual Hydro One results for 2017 and CEFD projection for 2018. Quarterly earnings are adjusted for the provincial ownership share during the quarter. 2018-19 and onwards are CEFD projections using the latest public information and reflects the Province's ownership share following the May 2017 share disposition and including the First Nations sale in December 2017. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18 based on TB/MBC approval of the PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| OPG IFRS Consolidation Risks[11] | | — | — | — | |
| **Other Risks** | | | | | |
| ONFA adjustment decrease[12] | (100) | | | | |
| Avista Acquisition - Termination fee | | (49) | | | |
| PILs risk related to retirement of Stranded debt and potential wind down of OEFC[13] | | | | | (20) |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimization strategy**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed shifted from 2017-18 to 2018-19. OEB's September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. This finding mitigates this risk. However, OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application. OEB's final decision will be made at that time. Note, the impact of a decision could fall in 2019-20 depending on timing of the OEB decision.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful the company would record a one-time write-down of $885 million (for transmission and distribution net income) reflecting the OEB decision. The risk above reflects this risk at the Province's current 47.4% average share allocation. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2. As a result the impact could occur in 2018-19.

11. **Previous risk figures removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan. The new IFRS adjustments figures are pending from OPG via Energy in the next few days.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

| OPG earnings impact due to June 1, 2017 effective date[6] | 325 | | | |
| **Accounting** | | | | |
| | | | | |
| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 100 | | | |

**or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $194M positive adjustment reflecting valuations as of December 31, 2017 is included in the OPG outlook. Given current market volatility the ONFA adjustment could change significantly by the end of the Province's fiscal year, March 31, 2018. The net debt adjustment to be included in the fiscal plan consistent with the December 31, 2017 valuations/reports would also be subject to the same type of volatility.

6.OPG earnings in 2017 are negatively impacted by a partial-year effective date of June 1, 2017 for new regulated rates, which resulted in forgone net income of $325 million. On January 17, 2018, OPG filed a Notice of Motion to review and vary the Decision in relation to the approval of an effective date of June 1, 2017 for new payment amounts rather than the January 1, 2017 effective date requested in OPG's application. The final decision is still pending

**Notes:**

1. The Hydro One financials above now reflects the Provincial share allocation as of January 2018.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

## Ontario Power Generation

### OPG Income - Budget 2018

$ Millions

| | Actual 2015-16 | Actual 2016-17 | Current Outlook 2017-18 | 2018-19 | 2019-20 | 2020-21 | 2021-22 |

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**Description of Update**

ONFA Update as of March 31 2017
s. 50.3 Update for 2016-17
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Debt Interest
OPG IFRS Risk in 2019-20
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Power Purchase Supply
H1 Model Forecasts - No Fiscal Update Resaving Data
Update Budget 2017 Tabs to reflect fiscal plan
Update OPG forecasted PILS to reflect sources
Update H1 2016-17 CIT
Re-inputting ONFA updates
Updating H1 Net Income to include Pref Shares in 16-17
Updating OPG Income Tax Expense for 2016-17
Updating OPG non-income tax PILs
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2017
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2018
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2019
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
**[NOT APPLIED]** Updating H1 Brampton (Interim Adjustments)
Shifted H1 Brampton 2016-17 NI to the 2017-18
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)

add prior-year adjustment for 2016-17

add prior-year adjustment for 2016-18
Reconfigured calculation of ESDI and MOF ESDI Expense
Reconfigured calculation of OPG 2017-18 Net Income
Backup for the Provincial Interest cost
Linking source for Revenue Risks Tab
New source for Revenue Risks Tab
Revenue Risks Tab - ROE Risks
Updating OEB Risk for OPG
OEB Staff Report - H1 Tx - Revenue Risks
OPG Pensions - Cash vs Accrual Deferral Accounts
Updating Links in Electricity Summary Change and OEFC Change
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton

Updating DRC for Actuals 2016-17 (Based on draft FS)
Updating PILs for 2016-17 Baced on Actuals
OPG: Non-ONFA Fair Value Adjustment
Round all Hydro One ownership assumptions to two decimal places
H1 Equity Adjustment rounding.
Round all Hydro One ownership assumptions to two decimal places
Round all Hydro One ownership assumptions to two decimal places
Revising source of ESDI, Dedicated Electricity Earnings
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Updating Miscellaneous OEFC Revenue to Actuals
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Public Accts: Updated IESO debt interest Interest On Debt, 2016-17
Public Accts: 2016-17 - Demand Management Support Costs Update
2017-18 - Demand Management Support Costs (no change)

Switch to Direct from Model
Switch to Direct from Model
Updating ROE Risks
Updating H1 Load Risks based on model output
Updating ONFA Risks for September 2017
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Updating OPG
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpack PILs related to HQ gain on sale
Updating IFRS Risk
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
November 1 and November 7 Hydro One model updates

November 1 and November 7 Hydro One model updates
November 1 and November 7 Hydro One model updates
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Updating OPG Revenue Risks from rate application
Update Hydro One PILs (reverses update on line 119 whuich did not account fro Dx side)
Updating Debt Guarantee Fee
Updating OEFC Operating Expense
small changes - linking the net income numbers
Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Updated OPG Net Income (based on their Q3 update, Sep 30, 2017)
Updated OPG ONFA adjustment (up to Sep 30, 2017) in OPG tab (removed it from Risks table)
Removal of OPG ONFA Sep 2017 adjustment in Risks table
Included possible range (-50M to 50M) of impact for future OPG ONFA adjustment in the negative
Removal of negative regulatory risk: "OPG Switch from accrual based to cash based accounting f
Removal of negative regulatory risk: "Timing of OPG Rate Decision" from Risks table
Removal of negative regulatory risk: "OEB Staff Recommendations wrt OPG rate application(May
Removal of negative regulatory risk: "Nuclear Liabilities Cash vs. Accrual" from Risks table
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon
Allocated 75% of Dec 2017 OEB payment amounts decision (CEFD Analysis) impact to Net Incon

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

**Notes:**

1.OPG's 2017-18 to 2020-21 outlook reflects OPG's 2018-2021 Business Plan and Includes OPG head office properties sale proceeds and Lakeview property sale proceeds. 2021-22 estimates are based on OPG's calendar year-based business plan projections for 2021 and a CEFD projection for 2022. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2017-18 is based on actual Hydro One results for 2017 and CEFD projection for 2018. Quarterly earnings are adjusted for the provincial ownership share during the quarter. 2018-19 and onwards are CEFD projections using the latest public information and reflects the Province's ownership share following the May 2017 share disposition and including the First Nations sale in December 2017. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18 based on TB/MBC approval of the PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of February 2018** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | 808 | (232) | 103 | (389) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 increase is largely due to the re-categorization from Sales and Rentals to OPG net income proceeds from the completed sale of OPG head office properties and prospective sale of Lakeview lands. This accounts for $483M of the increase. Note that while the re-categorization itself is fiscally-neutral, net income impacts of the proceeds from property sales are $206M higher than projected at the time of the 2017 Budget.<br><br>2017-18 results are also boosted by lower projected IFRS adjustment (by $100M) for 2017-18 and lower OPG expenses than estimated at the time of Budget 2017.<br><br>2018-19 to 2020-21 chnages reflect the negative impact of higher projeceted IFRS adjustment impacts over that period partially offset by higher OPG net income in 2018-19 and 2020-21 and more than offset by higher OPG net income in 2019-20. |
| ONFA and other Fair Value Adjustments | 35 | 194 | - | - | - | Largely due to revision to ONFA fair value as of December 31, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (173) | (209) | (191) | (214) | 2016-17 slight decrease from Budget 2017 Interim projection.<br><br>2017-18 onwards mainly reflects i) re-categorization from Sales and Rentals to Hydro One net income of the impact of a lower Provincial share of Hydro One net income from Hydro One share sales ii) impact of OEB Sep. 2017 decision on Hydro One transmission rates and iii) interest expense on Avitsa debentures (in 2017-18 and 2018-19). |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **828.5** | **(441)** | **(89)** | **(603)** | |
| **Other Fees and Licences** | **-** | **-** | **8** | **10** | **10** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | (672) | (449) | (736) | (711) | **[NOTE: A positive number on this line indicates a decrease in the provision, while a negative number means an increase in provision expense.]**<br>Changes to the Provision (ESDI) expense in 2017-18 mainly reflect higher OPG net income due to recategorisation from Sales and Rentals (see above).<br><br>Change in out-years reflects TB/MBC approval in 2017-18 PRRT approval to continue Provision for the Electricity Sector (i.e., Electricity Sector Dedicated Income to OEFC) beyond 2017-18. 2017 Budget assumed previous policy whereby ESDI ended after 2017-18. |
| Public Debt Interest - Electricity Sector | (22) | 38 | 88 | 88 | 88 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br><br>2017-18 and 2018-19 and onward change reflects revised projections for Provincial debt interest as a result of debt pay downs related to Hydro One's April 2016 and April 2017 offerings, repectively. |
| **Total Electricity Expenses of the Province** | **31** | **(635)** | **(361)** | **(648)** | **(623)** | |

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | 93 | (107) | (26) | (152) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 increase is largely due to inclusion of PILs related to disposition of OPG headquarters and Lakeview properties. 2018-19 onward lower mainly due to lower OPG income tax PILs. Property tax components are close to Budget 2017. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | (19) | - | - | - | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance in 16-17 is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement (PPA) contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. Going-forward, variance is largely due to suspension or early termination of some NUG PPAs in response to the IESO's NUG curtailment initiative. |
| Net Reduction of Power Purchase Contracts | 0.1 | (0) | (0) | (0) | (0) | |
| Other Fees and Licences | - | - | (8) | (10) | (10) | |
| Revenue Pool Residual | - | - | - | | - | |
| Miscellaneous | 14 | - | - | - | - | |
| **Expenses** | | | | | | |
| Interest on Debt | 19 | (55) | (110) | (131) | (152) | 2017-18 and onward reflects revised debt interest outlook net of revisions to OEFC interest revenue from OPG, Hyro One IESO and Province. |
| Power Supply Contract Costs | (99) | 110 | 142 | 167 | 170 | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Electricity Consumer Price Protection Fund | - | - | - | - | - | |
| Demand Management Support Costs | 1.8 | - | - | - | - | |
| Provision for Electricity Sector | (53) | 672 | 449 | 736 | 711 | see explanation above for "Provision for Electriocty Sector" (line 17) |
| Other (Finance) | (1.0) | - | (1) | (1) | (1) | |
| **Total OEFC Income** | **(63)** | **692** | **223** | **568** | **395** | |
| **Impact on Surplus/(Deficit)[1]** | **-15** | **886** | **-571** | **-158** | **-820** | Note: A significant component of the changes above affecting this net is from a fiscally-neutral recategorisation of revenue impacts from the Asset Optimisation (AO) initiative previously shown in Sales and Rentals in Budget 2017 for commercial confidentiality.<br><br>The pure changes to non-AO electricity sector changes is significantly fiscally negative. IN 2018-19 ONWARD. See summary table below for breakdown of total change between these components. |
| **Information: Breakdown of change between revenue and expense** | | | | | | |
| Total Revenue Impact | 87 | 793 | (690) | (281) | (925) | |
| Total Expenditure impact | 101 | (93) | (119) | (123) | (105) | |

## Electricity Sector Outlook (PSAB)

| Negative Revenue Risks | $ Millions | | | | |
|---|---|---|---|---|---|
| ($ millions) | Plan | | | | |
| | 2017-18 | 2018-19 | 2019-20 | 2020-21 | 2021-22 |
| **Generic** | | | | | |
| OPG Generation Risk: Nuclear Output (-1.6 TWh)[1] | (120) | (120) | (120) | (120) | (120) |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) | (63) |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) | (45) |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) | (40) |
| Operations Maintainance & Administration (labour costs etc.) | | 0 - (100) | 0 - (100) | 0 - (100) | 0 - (100) |
| ONFA adjsutment risk | | (400) to 0 | (400) to 0 | (400) to 0 | (400) to 0 |
| **Regulatory** | | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) | (50) |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | — | (600) | | | |
| Regulatory Risk - Timing of OPG Rate Decision[7] | — | | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | — | | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | — | | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (420) | | | | |
| **Accounting** | | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — | |
| **Other Risks** | | | | | |
| ONFA adjustment decrease[12] | (100) | | | | |
| Avista Acquisition - Termination fee | | (49) | | | |
| PILs risk related to retirement of Stranded debt and potential wind down of OEFC[13] | | | | | (20) |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimization strategy o**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed shifted from 2017-18 to 2018-19. OEB's September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. This finding mitigates this risk. However, OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application. OEB's final decision will be made at that time. Note, the impact of a decision could fall in 2019-20 depending on timing of the OEB decision.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful the company would record a one-time write-down of $885 million (for transmission and distribution net income) reflecting the OEB decision. The risk above reflects this risk at the Province's current 47.4% average share allocation. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2. As a result the impact could occur in 2018-19.

11. **Previous risk figures removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan. The new IFRS adjustments figures are pending from OPG via Energy in the next few days.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | |
|---|---|---|---|---|
| **($ millions)** | **Plan** | | | |
| | **2017-18** | **2018-19** | **2019-20** | **2020-21** |

| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 100 | | | |

**r updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $194M positive adjustment reflecting valuations as of December 31, 2017 is included in the OPG outlook. Given current market volatility the ONFA adjustment could change significantly by the end of the Province's fiscal year, March 31, 2018. The net debt adjustment to be included in the fiscal plan consistent with the December 31, 2017 valuations/reports would also be subject to the same type of volatility.

**Notes:**

1. The Hydro One financials above now reflects the Provincial share allocation as of January 2018.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

Hi Francisco

Let me know if you want a high level walk through of the Outlook before we send. See below the proposed cover email for the distribution.

Bruno

**To:** John Kim <John.Kim@ofina.on.ca>
**Subject:** RE: Electricity Outlook Update (FES pw)

Hi John

Just fyi. My draft cover email. I have taken care of most of Ron's comments. I will respond to him to let him know what we did/did not do.

Bruno

Hi

Please see attached ADM-approved Electricity Update and our notes below. The main change since the last January 10, 2018 distribution is the inclusion of results from OPG's 2018-2021 Business Plan. Note that OPG's Business Plan outlooks includes the impacts of the OEB rate decision. Notwithstanding these impacts, OPG results are higher in each year compared to the previous outlook. Note that Dedicated Electricity Earnings (or Electricity Sector Dedicated net income) outlook is updated based on these changes.

As in the previous electricity Outlook asset optimization impacts are now re-categorized. OPG net income now reflects estimated proceeds from OPG Lakeview properties as well as OPG head office sales in 2017-18. The full impacts of Hydro One broadening are fully reflected in Hydro One net income, lowering Hydro One net income. I.e., the current outlook now reflects provincial Hydro One ownership of about 50% in 2017-18 and 47% thereafter compared to 70% ownership assumed at Budget. These changes to OPG and Hydro One net income also affect the electricity provision (or ESDI).

The attached Electricity update as of February 16, 2018, which is subject to further updates.

Key changes to the electricity outlook since our January 10, 2018 update include the following.

- Inclusion of OPG 2018-2021 Business Plan results, including estimated proceeds from Lakeview in 2017-18 which were not previously included in OPG net income.
- Note: this also results in a update to Dedicated Electricity earnings expense lines (see Provision for the Electricity Sector)
- Based on PRRT approval, the current electricity update assumes that the electricity provision (ESDI) continues beyond 2017-18. There is no bottom line impact on consolidation, but does affect MOF provision expense and OEFC revenue.

There is still information to come that could change the outlook before the Document. Key information to come includes the following

- OEB decision on Hydro One's distribution rate application (expected 1st half of 2018)
- Updates to ONFA adjustment result for 2017 (end of February results would be available early March)

Key Changes to Risks

- Added risk range for future ONFA adjustment amounts reflecting historic range of outcomes. Give the high degree of uncertainty and range of results ONFA adjustments are not forecasted.

Please let us know if you have any questions.

Thanks
Bruno

**Change Since Budget**

**Description of Update**

ONFA Update as of March 31 2017
s. 50.3 Update for 2016-17
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Debt Interest
OPG IFRS Risk in 2019-20
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Power Purchase Supply
H1 Model Forecasts - No Fiscal Update Resaving Data
Update Budget 2017 Tabs to reflect fiscal plan
Update OPG forecasted PILS to reflect sources
Update H1 2016-17 CIT
Re-inputting ONFA updates
Updating H1 Net Income to include Pref Shares in 16-17
Updating OPG Income Tax Expense for 2016-17
Updating OPG non-income tax PILs
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2017
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2018
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2019
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
**[NOT APPLIED]** Updating H1 Brampton (Interim Adjustments)
Shifted H1 Brampton 2016-17 NI to the 2017-18
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)

add prior-year adjustment for 2016-17

add prior-year adjustment for 2016-18
Reconfigured calculation of ESDI and MOF ESDI Expense
Reconfigured calculation of OPG 2017-18 Net Income
Backup for the Provincial Interest cost
Linking source for Revenue Risks Tab
New source for Revenue Risks Tab
Revenue Risks Tab - ROE Risks
Updating OEB Risk for OPG
OEB Staff Report - H1 Tx - Revenue Risks
OPG Pensions - Cash vs Accrual Deferral Accounts
Updating Links in Electricity Summary Change and OEFC Change
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton

Updating DRC for Actuals 2016-17 (Based on draft FS)
Updating PILs for 2016-17 Baced on Actuals
OPG: Non-ONFA Fair Value Adjustment
Round all Hydro One ownership assumptions to two decimal places
H1 Equity Adjustment rounding.
Round all Hydro One ownership assumptions to two decimal places
Round all Hydro One ownership assumptions to two decimal places
Revising source of ESDI, Dedicated Electricity Earnings
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Updating Miscellaneous OEFC Revenue to Actuals
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Public Accts: Updated IESO debt interest Interest On Debt, 2016-17
Public Accts: 2016-17 - Demand Management Support Costs Update
2017-18 - Demand Management Support Costs (no change)

OPG Net Income and PILs for July Results

Interest Revenue for IESO and "Other"
OPG Revenue Risks from OEB Filings
Net income corrected for Preferred Shares
Net income corrected for Preferred Shares
Net income corrected for Preferred Shares
Made link edits to OPG sheet so that the "Net Income Before Tax" 2017-18 number is not a hardc
Updated PILs to include OPCD public accounts adjustment
Provision tab fix to pick up Hydro One preferred share net income
Provision tab fix to pick up Hydro One preferred share net income
FTD Update to OEFC Outlook (Sep 19, 2017) OPG Interest
FTD Update to OEFC Outlook (Sep 19, 2017) Other Interest
Update to Hydro One PILs from information in Transmission rate application material
OEB September 28, 2017 Hydro One decision and order impact - incl. rebasing
OEB September 28, 2017 Hydro One decision and order impact - incl. rebasing
OEB September 28, 2017 Hydro One decision and order impact - incl. rebasing
Remove update of gain on sale of head office(assume in Sales and Rentals)
Remove update of gain on sale of head office(assume in Sales and Rentals)
Remove update of gain on sale of head office(assume in Sales and Rentals)
Remove update of gain on sale of head office(assume in Sales and Rentals)
Remove update of gain on sale of head office(assume in Sales and Rentals)
Remove update of gain on sale of head office(assume in Sales and Rentals)
Remove update of gain on sale of head office(assume in Sales and Rentals)
Remove update of gain on sale of head office(assume in Sales and Rentals)
Debenture Interest Costs - Removing from Revenue (Risks) and adding it ot H1 Model
Debenture Interest Costs - Removing from Revenue (Risks) and adding it ot H1 Model
Debenture Interest Costs - Removing from Revenue (Risks) and adding it ot H1 Model
Updated OPG Net Income and PILs based on monthly report (August 2017 results)
Updated OPG Net Income and PILs based on monthly report (August 2017 results)
Updated OPG Net Income and PILs based on monthly report (August 2017 results)
Correction to PILs on OPG sheet
Correction to PILs on OPG sheet
Correction to PILs on OPG sheet
Correction to PILs on OPG sheet
Switch to Direct from Model
Switch to Direct from Model
Switch to Direct from Model
Updating ROE Risks
Updating H1 Load Risks based on model output
Updating ONFA Risks for September 2017
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Adjust OEB decision/rebasing to ~50% provincial ownership
Updating OPG
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
OPG IOD impact from GA Financing, FHP
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpacking updated OPG Gain on sale (net income)
Unpack PILs related to HQ gain on sale
Updating IFRS Risk
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
Adjustment for lower Provincial share (from 70.1% to 50.9 2017-18 & 47.4% after)
November 1 and November 7 Hydro One model updates

November 1 and November 7 Hydro One model updates
November 1 and November 7 Hydro One model updates
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Revise Hydro Model to reverse OEB tax decision ongoing annual impact
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Undo allocation adjustment in H1 tab (now that provincial shares are updated)
Updating OPG Revenue Risks from rate application
Update Hydro One PILs (reverses update on line 119 whuich did not account fro Dx side)
Updating Debt Guarantee Fee
Updating OEFC Operating Expense
small changes - linking the net income numbers

Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Updated number of shares sold for First Nations (Dec 2017) sale
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Implemented OEB's Dec 2017 payment amounts decision for OPG (CEFD Analysis)
Updated OPG Net Income (based on their Q3 update, Sep 30, 2017)
Updated OPG ONFA adjustment (up to Sep 30, 2017) in OPG tab (removed it from Risks table)
Removal of OPG ONFA Sep 2017 adjustment in Risks table
Included possible range (-50M to 50M) of impact for future OPG ONFA adjustment in the negative
Removal of negative regulatory risk: "OPG Switch from accrual based to cash based accounting f
Removal of negative regulatory risk: "Timing of OPG Rate Decision" from Risks table
Removal of negative regulatory risk: "OEB Staff Recommendations wrt OPG rate application(May
Removal of negative regulatory risk: "Nuclear Liabilities Cash vs. Accrual" from Risks table

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| *variance to OEFC check* | | *(156)* | *(454)* | *(531)* | - | - | - |

**Notes:**

1.OPG's 2017-18 to 2020-21 outlook reflects OPG's 2018-2021 Business Plan and Includes OPG head office properties sale proceeds and Lakeview property sale proceeds. 2021-22 estimates are based on OPG's calendar year-based business plan projections for 2021 and a CEFD projection for 2022. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2017-18 is based on actual Hydro One results for 2017 and CEFD projection for 2018. Quarterly earnings are adjusted for the provincial ownership share during the quarter. 2018-19 and onwards are CEFD projections using the latest public information and reflects the Province's ownership share following the May 2017 share disposition and including the First Nations sale in December 2017. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18 based on TB/MBC approval of the PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of February 2018** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | 708 | (332) | (122) | (714) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 increase is largely due to the re-categorization from Sales and Rentals to OPG net income proceeds from the sale of OPG head office and Lakeview properties. This accounts for $483M of the increase. Note that whicle the re-categorization itself is fiscally-neutral proceeds from property sales are $206M higher than projected at the time of the 2017 Budget.<br><br>2017-18 results are also boosted by lower expenses than assumed at the time of Budget 2017.<br><br>Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS adjustment impacts in those years as well as OEB Dec. 28, 2017 rate decision. The OEB Dec. 28, 2017 rate decision estimated impacts are allocated between OPG net income and PILs on a 75%/25% basis. |
| ONFA and other Fair Value Adjustments | 35 | 194 | - | - | - | Largely revision to ONFA fair value as of December 31, 2017 |

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | 128 | (89) | (7) | (143) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 increase is largely due to inclusion of PILs related to disposition of OPG headquarters and Lakeview properties. 2018-19 onward lower mainly due to lower OPG income tax PILs. Property tax componenst are close to Budget 2017. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | (19) | - | - | - | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance in 16-17 is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement (PPA) contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. Going-forward, variance is largely due to suspension or early termination of some NUG PPAs in response to the IESO's NUG curtailment initiative. |
| Net Reduction of Power Purchase Contracts | 0.1 | (0) | (0) | (0) | (0) | |

| OPG Generation Risk: Nuclear Output (-1.6 TWh)[1] | (120) | (120) | (120) | (120) | |
| 1% decrease in Hydro One actual load[2] | (57) | (59) | (62) | (63) | |
| Lower OPG's Equity weighting & Return on Equity (ROE)[3] | (12) | (20) | (26) | (45) | |
| Lower Hydro One Return on Equity (ROE)[4] | (9) | (36) | (38) | (40) | |
| ONFA adjsutment risk | | (400) to 0 | (400) to 0 | (400) to 0 | (400) to 0 |
| **Regulatory** | | | | | |
| Hydro One Distribution rate application[5] | (50) | (50) | (50) | (50) | |
| OPG Switch from accrual based to cash based accounting for pension and OPEB[6] | — | (600) | | | |
| Regulatory Risk - Timing of OPG Rate Decision[7] | — | | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | — | | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | — | | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (420) | | | | |
| **Accounting** | | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — | |
| **Other Risks** | | | | | |
| ONFA adjustment decrease[12] | (100) | | | | |
| Avista Acquisition - Termination fee | | (49) | | | |
| PILs risk related to defesement of Stranded debt and potential wind down of OEFC[13] | | | | | (20) |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimization strategy**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed shifted from 2017-18 to 2018-19. OEB's September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. This finding mitigates this risk. However, OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application. OEB's final decision will be made at that time. Note, the impact of a decision could fall in 2019-20 depending on timing of the OEB decision.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful the company would record a one-time write-down of $885 million (for transmission and distribution net income) reflecting the OEB decision. The risk above reflects this risk at the Province's current 47.4% average share allocation. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2. As a result the impact could occur in 2018-19.

11. **Previous risk figures removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan. The new IFRS adjustments figures are pending from OPG via Energy in the next few days.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | |
|---|---|---|---|---|
| **($ millions)** | **Plan** | | | |
| | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| **Generic** | | | | |
| OPG Generation Risk: Nuclear Output (+1.1 TWh)[1] | 85 | 85 | 85 | 85 |
| 1% increase in Hydro One actual load[2] | 57 | 59 | 61 | 63 |
| Higher OPG Return on Equity (ROE)[3] | 6 | 22 | 19 | 33 |
| Higher Hydro One Return on Equity (ROE)[4] | 19 | 69 | 50 | 50 |
| ONFA adjsutment risk | | 0 to 400 | 0 to 400 | 0 to 400 |
| **Regulatory** | | | | |
| **Accounting** | | | | |
| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 100 | | | |

**or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $194M positive adjustment reflecting valuations as of December 31, 2017 is included in the OPG outlook. Given current market volatility the ONFA adjustment could change significantly by the end of the Province's fiscal year, March 31, 2018. The net debt adjustment to be included in the fiscal plan consistent with the December 31, 2017 valuations/reports would also be subject to the same type of volatility.

| | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
|---|---|---|---|---|---|---|
| **Revenue** | | | | | | |
| Debt Retirement Charge | (4) | (19) | - | - | - | |
| Payments-in-lieu of tax: | | | | | | |
| OPG | (78) | 125 | (89) | (7) | (143) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected.<br><br>2017-18 increase is largely due to inclusion of PILs related to disposition of OPG headquarters and Lakeview properties. 2018-19 onward lower mainly due to lower OPG income tax PILs. Property tax componenst are close to Budget 2017. . |
| Legacy Hydro One (Including Brampton) | (3) | - | - | - | - | |
| Hydro One CIT dedicated to OEFC | 5 | 3 | - | - | - | Adjustment based on updated information in Hydro One rate application |
| MEUs | 68 | - | - | - | - | Large increase in 2016-17 from $80M payment during transfer of H01 Brampton to new consolidated MEU Alectra. |
| Total PILs | (9) | 128 | (89) | (7) | (143) | |
| Interest : | | | | | | |
| OPG | (12) | (13) | 13 | 23 | (4) | Update to OPG interest outlook (wrt interest on OEFC loan). |
| H1 | - | - | - | - | - | |
| IESO | (1) | - | - | - | - | |
| Province | 22 | (38) | (88) | (88) | (88) | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br><br>2017-18 and 2018-19 and onward change reflects revised projections for Provincial debt interest as a result of debt pay downs related to Hydro One's April 2016 and April 2017 offerings, repectively. |
| Other | 10 | 15 | 15 | 5 | 5 | |
| Total Interest | 19 | (36) | (60) | (60) | (87) | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Amortization of NUG liability | 0 | (0) | (0) | (0) | (0) | |
| Electricity sector dedicated income | (41) | 172 | 349 | 511 | 386 | The decrease in OEFC ESDI in 2017-18 reflects i) the IFRS adjustment of $400 million in 2017-18 that was not reflected in the OEFC ESDI projection at the time of the 2017 Budget (Note the IFRS adjustment was reflected in OPG net income for the 2017 Budget fiscal plan) and ii) the lower OPG and Hydro One net income due to OEB's 2017 rate decisions.<br><br>Changes to the Provision (ESDI) expense in 2017-18 mainly reflect higher OPG net income due to recategorisation from Sales and Rentals of proceeds from the sale of OPG headquarters properties and Lakeview properties.<br><br>Th eincrease in 2018-19 onward reflects TB/MBC approval in 2017-18 PRRT approval to continue Provision for the Electricity Sector (i.e., Electricity Sector Dedicated Income to OEFC) beyond 2017-18. 2017 Budget assumed previous policy whereby ESDI ended after 2017-18. |
| Gain to OEFC under s. 50.3 | 411 | 531 | - | - | - | |
| Miscellaneous | 14 | - | - | - | - | |
| | 489 | 667 | 57 | 277 | (15) | |
| **Expense** | | | | | | |
| Debt interest | - | 19 | 50 | 71 | 65 | Revised outlook for OEFC debt interest outlook |
| Interest on nuclear risk funding | - | - | - | - | - | |
| Demand Management Support Costs | (2) | - | - | - | - | |
| Amortization of deferred debt costs | - | - | - | - | - | |
| Power Supply Contract Costs | 99 | (110) | (142) | (167) | (170) | Same as Power supply contract recoveries above. Power supply contract costs are fully recovered by power supply contract recoveries. |
| Debt Guarantee fee | - | - | 8 | 10 | 10 | |
| Operating | 1 | - | 1 | 1 | 1 | |
| | 98 | (91) | (83) | (85) | (94) | |
| **Excess (Deficiency) of Revenue over Expense** | **391** | **758** | **141** | | | |
| **Stranded Debt - Year End** | **3,202** | **1,357** | **1,170** | **676** | **227** | |

## Provision for Electricity Sector (Dedicated Electricity Earnings/Electricity Sector Dedicated Earnings)

**$ Millions**

| **MOF Provision Expense (after other adjustments)** | **0** | **290** | **697** | **349** | **511** | **386** |
| **Cumulative Shortfall Adjustment** | | | | | | |
| Opening Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| Deduction / (Addition) | 0 | 0 | 0 | 0 | 0 | 0 |
| Ending Balance | 0 | 0 | 0 | 0 | 0 | 0 |
| **Dedicated Electricity Earnings (all adjustments) (Public Accounts)** | **0** | **290** | **697** | **349** | **511** | **386** |
| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **697** | **349** | **511** | **386** |

**Notes:**

1. The Hydro One financials above now reflects the Provincial share allocation as of January 2018.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

## Ontario Power Generation

### OPG Income - Budget 2017

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**Subject:** Electricity Update

Hi Ron

I realize we did not update various footnotes to reflect unpacking in the version I sent to you last night. We have now done this. I also revised the Risk table to shift the pension risk forward one-year, noting that while this risk may be mitigated by findings of the OEB report, OEB will make final decision with deferred decision.  I haven't  forwarded this for now to avoid any confusion with edits

you may be making, but happy to do so.

Also we have coordinated with SIFB and FTD on the AO unpacking exercise to make sure we are all on same page before we share with Frost. We are just finalizing some summary tables on our unpacking exercise that we can send to you and/or walk you through.

I heard from CQSD late yesterday that wrap-up is on Monday. They would like to prepare ESDI update today for Helmut's review. I noted that we do have updates that we are finalizing and will send as soon as we can. We can check back to see if tomorrow will be OK as necessary.

I also let OPCD know that we are working on an update that will re-categorize AO impacts and will send them that version as it will be more accurate for Budget consolidation. But I will also offer them our Interim unpacked version if they want to use that for now.

**Description of Update**

ONFA Update as of March 31 2017
s. 50.3 Update for 2016-17
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Provincial Interest Costs, DforE
Revised Debt Interest
OPG IFRS Risk in 2019-20
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
Revised OPG 2016-17 Net Income
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change: slight update to assumed Prov share 70.05% from 70%
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
tech change in calc of Hydro One Equity debt interest
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Updating H1 2016-17 Net Income for ESDI
Power Purchase Supply
H1 Model Forecasts - No Fiscal Update Resaving Data
Update Budget 2017 Tabs to reflect fiscal plan
Update OPG forecasted PILS to reflect sources
Update H1 2016-17 CIT
Re-inputting ONFA updates
Updating H1 Net Income to include Pref Shares in 16-17
Updating OPG Income Tax Expense for 2016-17
Updating OPG non-income tax PILs
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2017
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2018
H1 Final Offering - Net Income Impacts and expected First Nations Sale at Dec 31, 2019
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Updating with actual OPG IFRS Adjustment 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
Utilizing H1 IFRS Adjustment for 2016-17
**[NOT APPLIED]** Updating H1 Brampton (Interim Adjustments)
Shifted H1 Brampton 2016-17 NI to the 2017-18
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)
Removed H1 Brampton for 2016-17 (pending finals)

add prior-year adjustment for 2016-17

add prior-year adjustment for 2016-18
Reconfigured calculation of ESDI and MOF ESDI Expense
Reconfigured calculation of OPG 2017-18 Net Income
Backup for the Provincial Interest cost
Linking source for Revenue Risks Tab
New source for Revenue Risks Tab
Revenue Risks Tab - ROE Risks
Updating OEB Risk for OPG
OEB Staff Report - H1 Tx - Revenue Risks
OPG Pensions - Cash vs Accrual Deferral Accounts
Updating Links in Electricity Summary Change and OEFC Change
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton
Preliminary estimate for Hydro One Brampton

Updating DRC for Actuals 2016-17 (Based on draft FS)
Updating PILs for 2016-17 Baced on Actuals
OPG: Non-ONFA Fair Value Adjustment
Round all Hydro One ownership assumptions to two decimal places
H1 Equity Adjustment rounding.
Round all Hydro One ownership assumptions to two decimal places
Round all Hydro One ownership assumptions to two decimal places
Revising source of ESDI, Dedicated Electricity Earnings
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Update Power Supply Recoveries to actuals
2016-17 - Updating Miscellaneous OEFC Revenue to Actuals
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Adj: Exclude Bramton $15m add prior year adjustment +$3M
Public Accts: Updated IESO debt interest Interest On Debt, 2016-17
Public Accts: 2016-17 - Demand Management Support Costs Update
2017-18 - Demand Management Support Costs (no change)

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 reflects OPG's latest monthly update and now includes re-caztegorization from Sales and Rentals to OPG net income (and OPG PILs) of OPG head office properties sale. 2018 to 2019-20 reflects OPG's 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget and OEB Dec. 28 rate decision. Note rate decsion impact is alloacted to net income and PILs on a 75%/25% basis respectively.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2016-17 income reflects its projected net income adjusted for the Province's ownership share in Hydro One following the final offering in May 2017 and including the First Nations sale in December 2017. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information and now reflect the re-categorization from sales and Rentals to Hydro One net income of the full impact of Hydro One broadening.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18. There is currently a PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **Changes from Budget 2017 as of October 2017** | | | | | | |
| **Income from Investment in Government Business Enterprises** | | | | | | |
| OPG Income | (5) | 52 | (596) | (632) | (909) | 2016-17 small decrease due to IFRS adjustment revision and OPG Net Income revision.<br><br>2017-18 due largely to OEB Dec. 28, 2017 rate decision including effective date of June 1, 2017 rather than jan. 1, 2017 largely offset by re-categorization from Sales and Rentals to OPG net income (and OPG PILs) of the slae of OPG head office properties. Decrease in 2018-19 onward is due mainly to taking on projeceted IFRS adjustment impacts in those years as well as OEB Dec. 28, 2017 rate decision. The OEB Dec. 28, 2017 rate decision estimated impacts are allocated between OPG net income and PILs on a 75%/25% basis. |
| ONFA and other Fair Value Adjustments | 35 | 171 | - | - | - | Largely revision to ONFA fair value as of September 30, 2017 |
| Hydro One - Unrealized Gains Adjustment | - | - | - | - | - | |
| HOI Income | (16) | (190) | (235) | (216) | (233) | 2016-17 slight decrease from Budget 2017 Interim projection.<br>2017-18 onwards reflects i) re-categorization from Sales and Rentals to Hydro One net income of the fll impact of Hydro One share sales ii) impact of OEB Sep. 2017 decision on Hydro One transmission rates and iii) interest expense on Avitsa debentures (in 2017-18 and 2018-19). |
| Brampton Income | 3.3 | | | | | |
| **Total OPG and HOI Income** | **17** | **33.0** | **(831)** | **(848)** | **(1,143)** | |
| **Other Fees and Licences** | **-** | **-** | **8** | **10** | **10** | |
| **Electricity Expenses of the Province** | | | | | | |
| Provision for Electricity Sector | 53 | 101 | (9) | - | (48) | Changes to the Proviision (ESDI) expense in 2017-18 mainly reflect lower OPG net income due to OEB's Dec. 28, 2017 rate decision and lower Hydro One net income due to OEB's Sep. 2017 transmission rate decision. Note ESDI is also lowered as HYdro One net income now reflects the full impact of Hydro One share sales. Part of this impact was previously reflected in Sales and Rentals. The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |
| Public Debt Interest - Electricity Sector | (22) | 38 | 38 | 38 | 38 | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to HydroOne's April 2016 offering. Note the impact of the final offering will be refelected in PDI during 2018. |
| **Total Electricity Expenses of the Province** | **31** | **138** | **29** | **38** | **(10)** | |

| Electricity Sector Change Since Budget | $ Millions | | | | | |
|---|---|---|---|---|---|---|
| ($million) | 2016-17 | 2017-18 | 2018-19 | 2019-20 | 2020-21 | Explanation of Change |
| **OEFC Income** | | | | | | |
| **Taxation Revenue** | | | | | | |
| Electricity Payments-in-Lieu of Taxes (PILs) | (40) | (28) | (24) | (35) | (43) | 2016-17 decrease largely due to an OPCD Public Accounts PILs adjustment related to reconciling between OPCD and OEFC net opening assets. OPG PILs also slightly lower than projected. |
| **Other Revenue** | | | | | | |
| Electricity Debt Retirement Charge | (4) | - | - | - | - | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |

| Regulatory Risk - Timing of OPG Rate Decision[7] | — | | | |
| OEB Staff Recommendations wrt OPG rate application(May 2017)[8] | — | | | |
| Nuclear Liabilities Cash vs. Accrual[9] | — | | | |
| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (440) | | | |
| **Accounting** | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — |
| **Other Risks** | | | | |
| ONFA adjustment decrease[12] | (50) | | | |
| Avista Acquisition - Termination fee | | (49) | | |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimiza**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed shifted from 2017-18 to 2018-19. OEB's September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. This finding mitigates this risk. Howver, OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application. OEB's final decision will be made at that time.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful teh company would record a one-time write-down of $885 million reflecting the OEB decision. The risk above reflects this risk at teh Province's 49.9% average share allocation for 2017-18. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2.

11. **Previous risk removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | |
|---|---|---|---|---|
| **($ millions)** | **Plan** | | | |

| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 50 | | | |

**ıtion strategy or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $171M positive adjustment is included in the OPG outlook. The ONFA adjustment is expected to be finalized in February 2018.

| Hydro One CIT dedicated to OEFC | 5 | - | - | - | - | Adjustment based on updated information in Hydro One rate application |
| MEUs | 68 | - | - | - | - | Large increase in 2016-17 from $80M payment during transfer of H01 Brampton to new consolidated MEU Alectra. |
| Total PILs | (9) | (28) | (24) | (35) | (43) | |
| Interest : | | | | | | |
| OPG | (12) | 1 | 26 | 40 | 13 | Update to OPG interest outlook (wrt interest on OEFC loan). |
| H1 | - | - | - | - | - | |
| IESO | (1) | - | - | - | - | |
| Province | 22 | (38) | (38) | (38) | (38) | 2016-17 PDI at ($514m) was slightly larger than ($492m) projected at Interim.<br>2017-18 change reflects revised projections for Provincial debt interest related to Hydro equity. |
| Other | 10 | 15 | 15 | 5 | 5 | |
| Total Interest | 19 | (22) | 3 | 7 | (20) | |
| Power Supply Contract Recoveries | 99 | (110) | (142) | (167) | (170) | Variance is largely due to retroactive payments that the OEFC made to certain non-utility-generators (NUGs) with former Ontario Hydro power purchase agreement contracts with OEFC. OEFC was required to make these payment following the dismissal by the Supreme Court of Canada of OEFC's application for leave to appeal a judgment of the Court of Appeal of Ontario on a 2015 court decision. |
| Amortization of NUG liability | 0 | (0) | (0) | (0) | (0) | |
| Electricity sector dedicated income | (41) | (501) | 9 | - | 48 | The decrease in OEFC ESDI in 2017-18 reflects i) the IFRS adjustment of $400 million in 2017-18 that was not reflected in the OEFC ESDI projection at the time of the 2017 Budget (Note the IFRS adjustment was reflected in OPG net income for the 2017 Budget fiscal plan) and ii) the lower OPG and Hydro One net income due to OEB's 2017 rate decisions.<br><br>ESDI is alo lowered as the full impact of Hydro One share dispositions is now refelected in lower Hydro One net income tothe Province. Part of this impact was previously reflected in Sales and Rentals.<br><br>The projected change in 2019-20 and 2020-21 is due to the continuation of ESDI beyond 2017-18 (approved in principle in the current PRRT). In the 2017 Budget outlook, ESDI was assumed to end after 2017-18. ESDI estimates for 2018-19 and 2018-19 are reduced due to negative balances in 2017-18 and 2018-19, |

| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **3** | **302** | **24** | **9** | **0** | **48** |

**Notes:**

1. The Hydro One financials above currently reflects the Provincial share allocation as the May 2017 final offering.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

Hi Alex et al.

Just want to clarify, the number in 2017-18 was 17.17672, not 7.17672. The first digit was caught off when copying/pasting. Sorry about that.

| | Plan | | | |
|---|---|---|---|---|
| | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| *GA - OPG Trust Interest Revenue* | *17.17672* | *54.36776* | *99.39752* | *152.51747* |

We're still looking to find the email/attachment where we got the numbers originally as well so will share that if we find it.

Thanks,
Shajee

**Subject:** RE: Fair Hydro Plan

Hi Christina, Alex

Hope you're well. Not sure if you're the right point of contact so please redirect me if necessary…

Last time when we provided these numbers for Budget, I understand we also asked for estimates from FTD on anticipated revenue for OPG Trust as a result of the Fair Hydro Plan.

The numbers we currently have in our Outlook are:

| | Plan | | | |
|---|---|---|---|---|
| | **2017-18** | **2018-19** | **2019-20** | **2020-21** |
| *GA - OPG Trust Interest Revenue* | *7.17672* | *54.36776* | *99.39752* | *152.51747* |

Would you be able to provide updated numbers for our fiscal planning purposes as well?

Thanks,
Shajee

**Subject:** RE: Fair Hydro Plan

Hi Shajee,

Thanks very much for sending this along. Could you please update and then send me the spreadsheet that I sent yesterday? In an effort to minimize errors and for documentation purposes, we always ask that responsible units to update their respective sections of the financing table.

Regards,
Christina

Hi Christina,

Please find attached a summary of the projections for the OPG Equity Injections.

Slide 4 would be most relevant for your purposes, as it contains the fiscal-year projection.

Please note, these are projections based on preliminary numbers provided from Ministry of Energy, and subject to change.

Thanks,
Shajee

Hi,

We're looking to see whether there's an update to the numbers in the spreadsheet embedded in the attached email. In particular, we're interested in the line titled "Provincial Borrowing Required" line. I believe this is the original email from Ricky. Please use the FES password.

Thanks,
Christina

Hi Ken,

Ron received information from energy which we are working on. Not sure the data is what we need but my team is working on it so we will share the assessment and data soon.

Thanks.

John

Hi John

What Ricky requires for the FES is the forecast amount of the 44% equity injection number for 17-18 and the two out years. Given that the total debt number has reduced to $20 Billion from the $28 B forecast at Budget time I guess there would be reductions in the first three years as well.

Thanks

Ken k

Hi Ricky,

There is no official updated information on the GA modelling. I have been looking for that from the Ministry of Energy without having any success.

Energy's response thus far is that they are still working on finalizing the FHP-related GA forecast.

In terms of FES, let me know what you are looking to do and the timeline you're working towards.

John

Hi John,

In preparation for the upcoming FES, would you be able to provide an update to the Fair Hydro Plan numbers. I have attached the worksheet that we have used for the 2017 Budget (password protected using FES password).

Your input by the end of today would be appreciated.

Thanks.

Ricky

Hey John,

Just following up on our conversation Friday. You had asked about the rationale for certain levels of financing – passing this note along that we just received from OPG. Let me know if you have further questions on this.

Secondly, I'm starting to pull together materials for the TB submission. The first is seeking appropriation for the equity injections, second is any PILs exemptions that the Province is comfortable with. Lastly, Scott thought you guys might also want something built into the submission about increased borrowing requirements of the IESO – would you be able to draft something for inclusion in the submission on this (if required)?

Let me know what you think.
Kaitlin

**CONFIDENTAL** **April 18, 2017**

## Ontario Power Generation

**Issue:** OPG has indicated that for the Trust to be consolidated into OPG there is a need to have at least 51% of the debt financing of the Trust originate directly from the external market. This requirement is supported by specific technical guidance on the topic as set out below.

*IFRS 10 – Consolidated Financial Statements* requires an investor to consider whether there are other parties who are acting on behalf of the investor by virtue of their relationship with it. That is, IFRS 10 requires consideration of whether the other parties (i.e. OPG) are acting as de facto agents for the investor (i.e. Province). If OPG is considered a de facto agent, the consolidation accounting objective will **not** be met.

There are a series of references in IFRS 10 (Section B75) that support this conclusion. Each of these elements must be examined in their totality to successfully address the consolidation principal of the Trust. The importance of each element is amplified due to the fact that OPG is a related party to the Province, which increases the importance of other tests being met. These tests include:

a) a party that received its interest in the investee as a contribution or loan from the investor.
***OPG will receive a 44% equity injection from the Province of Ontario, indirectly through the Ontario Financing Authority. Given that currently, the majority (currently 51%) of the Trust debt will be from External Markets and not the Province, it can be argued that OPG did not receive the majority of its interest in the investee as a contribution or loan from the Province. This criterion is not met and shows that OPG is a principal, not a de-facto agent.***

b) a party that has agreed not to sell, transfer or encumber its interests in the investee without the investor's prior approval
***There is a proposed clause that the Trust cannot be wound up without approval from the Minister of Energy, this criterion is met.***

c) a party that cannot finance its operations without subordinated financial support from the investor.
***OPG can finance its operations without subordinated financial support from the Province – criterion is not met.***

d) an investee for which the majority of the members of its governing body or for which its key management personnel are the same as those of the investor.
***OPG is a related party of the Province of Ontario, therefore this criterion is met.***

e) a party that has a close business relationship with the investor, such as the relationship between a professional service provider and one of its significant clients.
***OPG is a related party of the Province of Ontario, therefore this criterion is met.***

Given the number of factors met above, there may be a view that OPG could be considered a de facto agent of the Province through its related party relationship (4 out of 6 items are met). It is of vital importance, and as concurred by EY, that the majority of the debt in the Trust is not more than 44% funded by the Province (note that the remaining 5% of debt has to be funded externally by OPG in order to show that OPG has equity that is not sourced from the Province at risk). If the debt in the Trust is seen by the External Auditors as being principally funded by the Province, OPG would fail 5 out of 6 criteria above and be considered a de facto agent. As a result, proposed consolidation accounting would fail.

**Subject:** RE: IOD related to OPG Trust

Hi John,

I'm not sure I understand his comment on double-counting, unless he thinks OB/OEP will be automatically adjusting whatever net income number we provide (or they are otherwise carrying, by the IOD adjustment number that FTD provides.

I think it more likely that they expect us to do that at our end, but good to check with OB/OEP, and good to clarify with Ken what he means.

I think it's of course FTD that owns the IOD forecast. But, if he's basing just on the information from the CabSub, and you have more detailed numbers from Tim Christie / Energy, that may help refine the FTD modelling. And, I think it would be good for EFB modelling to at least have an interest rate scenario that aligns with the FTD assumption.

Thanks,
Ron

# 2018
## Annual Report

# OEFC
ONTARIO ELECTRICITY FINANCIAL CORPORATION

## Mandate

Ontario Electricity Financial Corporation (OEFC or the Corporation) is one of five entities established by the *Electricity Act, 1998* (the Act) as part of the restructuring of the former Ontario Hydro.

Under the Act, the former Ontario Hydro was restructured into Ontario Power Generation Inc. (OPG), Hydro One Inc. (now a subsidiary of Hydro One Ltd., or Hydro One), the Independent Electricity System Operator (IESO), the Electrical Safety Authority (ESA) and OEFC.

In accordance with the Act, OEFC has the following mandate:

- managing its debt, financial risks and liabilities, including the debt of the former Ontario Hydro;
- managing the former Ontario Hydro's contracts with non-utility generators (NUGs);
- receiving all payments and administering other assets, liabilities, rights and obligations of the Corporation that were not transferred to another of the former Ontario Hydro successor corporations and disposing of any of these items as it deems appropriate or as directed by the Minister of Finance;
- providing financial assistance to the successor corporations of Ontario Hydro;
- entering into financial and other agreements relating to the supply and demand management of electricity in Ontario; and
- performing any additional objects specified by the Lieutenant Governor in Council.

OEFC retains the services of the Ontario Financing Authority (OFA) and the Ministry of Finance to carry out its daily operations on a cost-recovery basis. The OFA is the agency of the Province of Ontario (the Province) responsible for Provincial borrowing and debt management.

## Statement from the Chair and Chief Executive Officer

We are pleased to present OEFC's 2018 Annual Report, which describes the Corporation's operational highlights and financial results for the year ended March 31, 2018.

Revenue exceeded expense by $1.2xx billion in 2018–19, reducing the Corporation's unfunded liability from $xx4.4 billion to $xx3.2 billion as at March 31, 2018. This represents the second largest -one--year decline in the unfunded liability, driven by the last Provincial offering of Hydro One shares and the sale of OPG real estate properties.

The unfunded liability has declined for ~~thirteen~~ fourteen consecutive years. It is $xx16.2 billion less than the initial unfunded liability on April 1, 1999, when the former Ontario Hydro was restructured. Total debt and liabilities are $xx21.1 billion, down from the $38.1 billion inherited by the Corporation from the restructuring.

Cost savings of $xx14.3 million were achieved through the management of the power purchase agreements with non-utility generators (NUGs).

Looking ahead to 2018–19, and following the end of the DRC, the Corporation will continue to manage its debt and liabilities, using its remaining dedicated revenues under the Electricity Act, in a cost-effective manner and support the implementation of the government's electricity policies and initiatives.

Scott Thompson
Chair

Gadi Mayman
Vice-Chair and Chief Executive Officer

**Commented [RK1]:** I think that the statement should somehow note that 17-18 was the last year of the DRC.

And if this was the second largest one-year decline in the unfunded liability, it should be noted, and noted as driven bythe benefits to OEFC from the sale of OPG real estate properties and by the last Provincial offering of Hydro One shares.

**Commented [SK2R1]:** Sure. Addressed

## Management's Discussion and Analysis

- Financial Results
- Debt and Liabilities
- Risk Management
- Other Responsibilities
- 2018–19 Outlook

# Management's Discussion and Analysis

**201~~6~~7–1~~7~~8 HIGHLIGHTS**

- Annual excess of revenue over expense for OEFC of $xx~~1.2~~ billion, decreasing its unfunded liability by that amount, recording the second largest one-year decline to date.
- ~~Thir~~Fourteenth consecutive annual decline in OEFC's unfunded liability
- The last year of the DRC which ended for residential consumers as of December 31, 2015, and ended for all other consumers on March 31, 2018.
- Achieved cost-savings of $xx~~14.3~~ million by managing power purchase agreements

## Financial Results

### Revenue and Expense

Total revenue for 201~~6~~7–1~~7~~8 was $3,3~~8~~82 million, an ~~decrease~~/increase of $~~2,659~~50x million from 201~~5~~6–1~~6~~7 **[TBC]**. The ~~decrease~~ increasein revenue was primarily due to the last Provincial offering of Hydro One, the sale of OPG real estate properties and increased payments-in-lieu (PIL) of taxes~~significant one-time payments-in-lieu (PIL) of taxes in 2015–16 from Hydro One as a result of its initial public offering (IPO) in November 2015~~.... Revenue included $~~621~~ 604 million from the Debt Retirement Charge (DRC); $838 million in power supply contract recoveries; $~~703~~ 635 million in interest income from the Province, OPG and the IESO; $~~302~~ 942 million **[TBC]** in Electricity Sector Dedicated Income (ESDI) from the Province in respect of OPG~~,~~ and Hydro One Limited ~~and Brampton Distribution Holdco Inc.~~ net incomes; $~~364~~ 497 million in ~~payments in lieu (PIL) of taxes~~PILs; and $531~~411~~ million in financial benefit from the Province.

Total expense was $~~2,191~~xx million, a decrease~~/increase~~ of $~~145~~ xx million from ~~2015~~2016–~~16~~17 **[TBC]** primarily due to reduced debt interest expense and power supply contract costs. Expenses included interest payments on debt of $1,~~216~~ 109 million and power supply contract costs of $~~838~~ 182 million.

Overall, revenue exceeded expense by $~~1,191~~2,056 million. In ~~2015~~2016–~~16~~17, revenue exceeded expense by $~~3,705~~x million.

In comparison to OEFC's budget, revenues came in at about $646 million above projections, primarily due to a financial benefit from the Province and higher than projected ESDI, ~~both~~ related to the sale of Hydro One shares and the sale of real estate assets by OPG; and variances from power supply contract recoveries; partially offset by lower than projected PIL of taxes; while expenses were $194 million above budget, primarily due to higher power supply contract costs.

### Borrowing Program

**Commented [RK3]:** A highlight for 17-18 could include it being the last year of the DRC.

**Commented [SK4R3]:** Sure. Added a bullet.

**Commented [RK5]:** I think we should have some notion of the total revenue amounts and change from 16-17, or if there was relatively little change, and the main reasons. If so, we should put in some potential text. It could be drivem by ESDI and real estate sales, for example.

**Commented [JK6R5]:** TBD once the CEFD receives the financial statements from FTD.

**Commented [RK7]:** As above, wrt to expense in this case.

**Commented [JK8R7]:** TBD pending receipt of the financials from FTD

**Commented [RK9]:** We should have some notiom already and draft some revised text.

**Commented [SK10R9]:** TBD

**Commented [RK11]:** We should have some notion and be able to draft some text.

**Commented [SK12R11]:** TBD

In 20176–178, the OFA undertook $800 million in long-term public borrowing for the Corporation. ~~no long-term borrowing was undertaken as the Agency's cash reserves were used to fund long-term debt maturities of $3.0 billion.~~ Long-term public borrowing was completed in the Canadian dollar market.

Commented [RK13]: We should state why – to match provision of financing to OPG …

The Province paid down electricity sector debt and other payables of $~~2,392~~1,943 million to OEFC in fiscal 20176–187 related to the book value of Hydro One share sales.

## Debt and Liabilities

The Corporation inherited $38.1 billion in total debt and other liabilities from the former Ontario Hydro when the Ontario electricity sector was restructured in 1999. This amount included $30.5 billion in total debt.

A portion of the $38.1 billion was supported by the value of the assets of Ontario Hydro successor companies, leaving $20.9 billion of stranded debt not supported by those assets. The initial unfunded liability of $19.4 billion was the stranded debt adjusted for $1.5 billion of additional assets.

As at March 31, ~~2017~~2018, total debt and liabilities were $~~21.1~~x billion, with total debt of $~~20.4~~x billion **[TBC]**. These figures compare to total debt and liabilities of $~~25.1~~x billion, with total debt of $~~24.3~~x billion, as at March 31, ~~2016~~2017 **[TBC]**.

The unfunded liability was $~~3.2~~x billion as at March 31, ~~2017~~2018, a decrease of $~~1.2~~x billion from March 31, 2016. This is the ~~thirteenth~~ fourteenth consecutive annual decline in the unfunded liability and $~~16.2~~x billion below the $19.4 billion level as at ~~————~~April 1, 1999 **[TBC]**.

### The Debt Retirement Charge, Stranded Debt and Residual Stranded Debt

As originally enacted, the *Electricity Act, 1998*, allowed for the DRC to be paid by consumers until the retirement of the residual stranded debt.

**Debt Repayment Plan**

OEFC services and retires the debt and other liabilities of the former Ontario Hydro from the following revenue and cash flow sources in the electricity sector:

- Outstanding notes receivable from the Province, OPG and IESO.
- PIL of corporate income and property taxes, and Gross Revenue Charges made by OPG, Hydro One and municipal electric utilities.
- Subsequent to the Hydro One IPO in November 2015, Hydro One no longer pays PIL of corporate income tax to OEFC. Under the Electricity Act, 1998, provincial corporate taxes payable by Hydro One Inc. are due and payable by the Province to OEFC.
- DRC paid by electricity consumers, which ended for residential consumers as of December 31, 2015, and ended for all other consumers on March 31, 2018.
- Electricity sector dedicated income – the Province's combined cumulative net income from OPG and Hydro One in excess of the Province's interest cost of its investment in these subsidiaries, which may be ~~is~~ allocated to OEFC, by the Province at its discretion.

The estimated retirement of residual stranded debt was subject to uncertainty in forecasting future OEFC results and dedicated revenues to OEFC, which depended on the financial performance of OPG, Hydro One, and municipal electric utilities, as well as other factors such as interest rates and electricity consumption.

The government has removed the DRC cost from residential electricity users' electricity bills as of January 1, 2016. The residential rate class accounts for about a third of electricity load subject to

the DRC. In addition, the *Budget Measures Act, 2015* legislatesd a fixed end-date for the DRC of ~~April~~ March 31, 2018, for commercial, industrial and all other users.

The *Electricity Act, 1998* was also amended by the *Budget Measures Act, 2015,* to repeal all reference to the "stranded debt" and "residual stranded debt." This included the removal of the requirement to determine the residual stranded debt from time-to-time.

Following the end of the DRC, OEFC will continue to receive other dedicated revenues, such as PILs, the amount equal to Hydro One Inc.'s provincial corporate income taxes, and the gross revenue charge paid to the OEFC, as well as, at the Province's discretion, any Electricity Sector Dedicated Income, to help service and pay down its unfunded liability.

**~~Continued Broadening of Hydro One Ownership~~Impact on OEFC of Hydro One Share Sales**

In May~~,~~ 2017**,** the Province completed ~~its final~~a public offering of Hydro One shares, selling 120 million common shares at $23.25 per share. ~~In December 2017 the Province also completed a sale of about 2.4 per cent of outstanding Hydro One common shares to a group of 129 First Nations of Ontario.~~

~~In April 2016, the Province continued to move forward with the broadening of Hydro One ownership by successfully completing a secondary offering of 14 per cent of Hydro One common shares, reducing the Province's holdings of Hydro One to approximately 70 per cent. This initiative had a number of impacts on OEFC's financial results for the year ended March 31, 2017.~~

- As per section 50.3 of the *Electricity Act, 1998*, OEFC recognized in its Statement of Operations a financial benefit from the Province of $~~411~~531 million in connection with the disposition of Hydro One common shares in May 2017, as well as the disposition of Hydro One Brampton Networks Inc. (Hydro One Brampton) Ccommon shares ~~of Hydro One Brampton~~ in February 2017~~, to Alectra Inc. and the May 2017 final public offering of Hydro One shares.Hydro One common shares in April 2016~~.
- Consistent with the Province's commitment to use proceeds related to the book value of Hydro One shares sold to pay down the Province's electricity sector debt and other payables to OEFC, OEFC has received $~~2,392~~1,943~~2~~ million from the Province related to the book value of Hydro One common shares sold in ~~November 2015 and April 2016~~May 2017, of which the Province applied $1,~~270~~ 082~~1~~ million to reduce its payable related to cumulative electricity dedicated earnings (Due from the Province of Ontario) and $~~1,122~~861 million to reduce the principal amount of notes payable to OEFC, as reflected in OEFC's Statement of Financial Position.

In December 2017, the Province also completed a sale of about 14 million Hydro One common shares at $18 per share to OFN Power Holdings LP, a limited partnership wholly-owned by Ontario First Nations Sovereign Wealth LP, which is in turn owned by 129 First Nations in Ontario. Upon completion of the transaction, the Province's holdings of Hydro One common shares totalled approximately 47.4 per cent.

With ~~broadened Hydro One ownership,~~ the Province's ~~has a~~ reduced ownership interest in Hydro One. ~~T~~this ~~reduced ownership interest~~ results in a reduced share of Hydro One net income, which

**Commented [SK14]:** If we use the word 'end-date' we should write March 31, 2018. If we use the description 'beginning April 1, 2018, DRC is no longer being paid…' then use April 1.

**Commented [DS15]:** To be discussed – if we want to change to "Hydro One Share Sales" or equivalent.

**Commented [DS16]:** Need to discuss with EFB – ensure that we do not double up on shortening Hydro One Brampton Networks Inc. and Brampton Distribution Holdco Inc. to Hydro One Brampton.

**Commented [SK17R16]:** Reference to Brampton is removed in most text (ie. ESDI). It seems only reference to Brampton would be for s50.3 purposes, so it doesn't seem like there's any issues.

**Commented [RK18]:** Can we be silent on this?

is reflected in the Province's discretionary allocation of electricity sector dedicated income to OEFC.

## Risk Management

OEFC's risk management policies and procedures are designed to manage risk exposures associated with the Corporation's debt, derivatives and related capital market transactions.

Foreign exchange and net interest rate resetting exposures remained within policy limits in 2017~~6~~–1~~7~~8.

- Foreign exchange exposure remained effectively at 0.~~0~~1 per cent of outstanding debt as at March 31, 2017~~7~~8. The foreign exchange exposure limit for OEFC is 5.0 per cent.
- Net interest rate resetting exposure was minus 16.9~~3.1~~ per cent of outstanding debt as at March 31, 2018~~7~~, within the limit of 35.0 per cent.

## Other Responsibilities

### Management of Power Supply Contracts

Efficiencies were achieved in managing the existing power purchase agreements with the NUGs in 2016–17. Purchase costs were lower by $14.3 million, compared to being lower by $11.7 million in 2015–16, through OEFC curtailments.

**Commented [RK19]:** Update, and note that curtailment savings are lower as there are significantly fewer active NUG PPAs, primarily due to early termination or suspension agreements etc.

In addition, OEFC continued to support~~ed~~ the IESO's initiative to enter into enhanced dispatch agreements with gas-fired NUGs that had PPAs with OEFC. Since 2016-17, a total of five PPAs have either been suspended or terminated~~Five OEFC PPAs with NUGs were terminated or suspended in 2016-17 in support of the IESO initiative~~. This helped to reduce OEFC's power supply contract costs and recoveries in 2017~~6~~–18~~7~~.

~~Previously,~~ For the period between May 1, 2002 to December 31, 2004, the Corporation purchased power from the NUGs under contractual terms, and sold the power at market prices lower than cost. However, as at January 1, 2005, the Corporation began to receive actual contract prices for power from ratepayers, eliminating losses on power purchase contracts. At that time, the decision was made to amortize the liability to revenue over the period when the liability arising from the prior estimated losses of the electricity contracts were estimated to be realised. The liability for power purchase agreements was valued at $0.2 billion as at March 31, 2017, compared to $0.3 billion as at March 31, 2016.

**Supporting ~~New~~ Electricity Supply Projects**

Beginning in 2005, the Corporation began to provide financing on commercial terms to OPG for general corporate purposes and ~~new~~ electricity supply projects, including Darlington refurbishment.

For instance, OEFC provided financing under a loan agreement with OPG for the Niagara Tunnel Project, which came into service in March 2013, increasing the water available for electricity generation at the Sir Adam Beck hydro complex in Niagara Falls.

Other completed OPG supply projects financed by OEFC are the Portlands Energy Centre and Lac Seul hydroelectric project.

**Supporting the Implementation of the Government's Electricity Policies**

OEFC ~~is~~ also support~~ing~~ed the Independent Electricity System Operator's (IESO) electricity demand management program and the Industrial Electricity Incentive (IEI) program for the period up to March 31, 2018. OEFC support~~s~~ed the IEI by providing payments to the IESO that ~~will~~ served to offset the cost of the DRC portion of the electricity bill paid to OEFC on IEI-eligible incremental consumption by IEI participants. This program ~~i~~was designed to be cost-neutral for OEFC. Note that the contract was originally between the former Ontario Power Authority (OPA) and the OEFC, and, subsequent, to the January 1, 2015, merger of the IESO and the OPA into a new entity, also called the IESO, the contract is now between the IESO and OEFC. With the end of the Debt Retirement Charge beginning April 1, 2018, the OEFC's involvement in the IEI program ~~ha~~is ending~~ed~~.

## 2018–19 Outlook

OEFC will focus on the following:

**Managing debt and other liabilities cost-effectively**

The OFA will continue to manage OEFC's debt and other liabilities in a cost-effective manner.

**Managing financial risk within approved policy limits**

The debt portfolio will be managed within exposure limits approved by OEFC's Board of Directors (the Board) for 2018–19.

**Administering NUG contracts**

The Corporation will continue to minimize costs to ratepayers through effective administration of the NUG contracts.

**Providing financing as required to the Ontario Hydro successor corporations**

The Corporation will facilitate the cash flow requirements of the Ontario Hydro successor corporations as required.

**Supporting the implementation of the government's electricity industry policies and analyzing and monitoring the impact on the Corporation**

The Corporation will continue to support the government's electricity initiatives as requested, and will monitor and analyze their impact on the Corporation.

## Financial Statements

### Responsibility for Financial Reporting

The accompanying financial statements of OEFC have been prepared in accordance with Canadian public sector accounting standards and are management's responsibility. The preparation of financial statements necessarily involves the use of estimates based on management's judgment, particularly when transactions affecting the current accounting period cannot be finalized with certainty until future periods. The financial statements have been properly prepared within reasonable limits of materiality and in light of information available up to mm xx, 2018.

Management maintains a system of internal controls designed to provide reasonable assurance that the assets are safeguarded and that reliable financial information is available on a timely basis. The system includes formal policies and procedures and an organizational structure that provides for appropriate delegation of authority and segregation of responsibilities. The Ontario Internal Audit Division of the Treasury Board Secretariat independently evaluates the effectiveness of these internal controls on an ongoing basis and reports its findings to management and the Audit Committee of the Board.

The Board is responsible for ensuring management fulfills its responsibilities for financial reporting and internal controls. The Audit Committee assists the Board in carrying out these responsibilities. The Audit Committee periodically meets with management, the internal auditors and the external auditors to deal with issues raised by them, and to review the financial statements before recommending Board approval.

The financial statements have been audited by the Auditor General of Ontario (the external auditor). The Auditor's responsibility is to express an opinion on whether OEFC's financial statements fairly present OEFC's financial position in accordance with Canadian public sector accounting standards. The Auditor's Report, which appears on the following page, outlines the scope of the Auditor's examination and opinion.

On behalf of management:

Gadi Mayman
Vice-Chair and Chief Executive Officer

Ken Kandeepan
Chief Financial and Risk Officer

## Auditor's Report [PLACEHOLDER]

**Office of the Auditor General of Ontario**
**Bureau du vérificateur général de l'Ontario**

***Independent Auditor's Report***

**To the Ontario Electricity Financial Corporation**
**and to the Minister of Finance**

I have audited the accompanying financial statements of the Ontario Electricity Financial Corporation, which comprise the statement of financial position as at March 31, 201, and the statements of operations and cash flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

**Management's Responsibility for the Financial Statements**

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Canadian public sector accounting standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

**Auditor's Responsibility**

My responsibility is to express an opinion on these financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

**Opinion**

In my opinion, the financial statements present fairly, in all material respects, the financial position of the Ontario Electricity Financial Corporation as at March 31, 201, and the results of its operations, and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

## Notes to Financial Statements

### 1) Nature of Operations

Effective April 1, 1999, pursuant to the *Electricity Act, 1998* (the Act), Ontario Hydro was continued as a corporation without share capital under the name "Ontario Electricity Financial Corporation" (OEFC or Corporation). The Corporation is one of five entities established by the Act as part of the restructuring of the former Ontario Hydro. It is exempt from federal and provincial income taxes under paragraph 149(1)(d) of the *Income Tax Act* (Canada).

OEFC is a Crown agency whose mandate includes:

- managing the debt and administering the assets, liabilities, rights and obligations of Ontario Hydro not transferred to other successor entities and managing the former Ontario Hydro's non-utility generator (NUG) contracts;
- providing financial assistance to the successor corporations of Ontario Hydro; and
- entering into financial and other agreements relating to the supply and demand management of electricity in Ontario.

These other successor entities are:

- Ontario Power Generation (OPG), an electricity generation company;
- Hydro One, a regulated electricity transmission and distribution company;
- Independent Electricity System Operator (IESO), the regulated, independent system operator responsible for directing system operations, operating the electricity market, planning for and securing resources to meet medium and long-term energy needs, and coordinating conservation efforts; and
- Electrical Safety Authority (ESA), which performs a regulatory function related to electrical inspections.

On April 1, 1999, the Ministry of Finance determined that the estimated value of the assets being transferred to the new entities was $17.2 billion, which was exceeded by the former Ontario Hydro's total debt and other liabilities of $38.1 billion. OPG, Hydro One (and their subsidiaries) and the IESO were transferred assets valued at $8.5 billion, $8.6 billion and $78 million respectively in exchange for debt payable to OEFC. The resulting shortfall of $20.9 billion was determined by the Ministry of Finance to be "stranded debt." After adjusting for $1.5 billion in loans and other assets retained by OEFC, $19.4 billion was the unfunded liability reflected on the OEFC opening balance sheet.

To allow OEFC to service and retire $38.1 billion in total debt including the $20.9 billion in stranded debt, the Province established a long-term plan where debt service and repayment would be through dedicated revenues from electricity-sector companies. This would be broken down for the electricity sector as follows:

- Notes receivable from the Province, OPG, Hydro One and IESO;
- Payments in lieu of taxes (PILs), which are equivalent to the corporate income, property and capital taxes paid by private corporations;

- Debt retirement charge (DRC) paid by electricity consumers; and
- The cumulative combined profits of OPG and Hydro One (proportionate to the Province's ownership share) in excess of the government's annual interest cost of its investments in the two companies.

As of April 1, 1999, the present value of the future PILs and the cumulative combined profits of OPG and Hydro One in excess of the government's $520 million annual interest cost of its investments in the two companies to be dedicated to OEFC was estimated at $13.1 billion. As a result, subtracting the $13.1 billion from the stranded debt of $20.9 billion resulted in an initial estimate of $7.8 billion, for the residual stranded debt.

The Act provided for the DRC to be paid by electricity consumers until the residual stranded debt was retired. The 2014 Budget announced that the government would remove the DRC from residential users' electricity bills as of January 1, 2016. At March 31, 2014, the residual stranded debt was $2.6 billion. In addition, the 2015 Fall Economic Statement announced the proposed removal of the DRC for all commercial, industrial and all other electricity consumers as of April 1, 2018. Pursuant to this announcement, the *Electricity Act, 1998* was amended by the *Budget Measures Act, 2015* and all reference to the "stranded debt" and "residual stranded debt" were removed. This also included the removal of the requirement to determine the residual stranded debt from time-to-time and the regulation-making authority for O. Reg. 89/12 – rendering the regulation obsolete.

## 2) Summary of Significant Accounting Policies

### (a) Basis of Accounting

As OEFC is a government organization, these financial statements are prepared in accordance with Canadian public sector accounting standards.

### (b) Net Debt Presentation

A statement of changes in net debt is not presented since this information is readily apparent. A comparison between budget and actual has been excluded due to the unique nature of OEFC's revenues and expenses over which the agency has minimal control. OEFC is a passive recipient of revenues that it receives on the basis of either legislation (e.g., DRC, GRC, PILs, recovery of NUG contractual costs) or allocated by the Province at its discretion (ESDI).

### (c) Measurement Uncertainty

Uncertainty in the determination of the amount at which an item is recognized in the financial statements is known as measurement uncertainty. Such uncertainty exists when it is reasonably possible there could be a material variance between the recognized amount and another reasonably possible amount, as there is whenever estimates are used. Measurement uncertainty in these financial statements exists in the valuation of the power purchase contracts and payments-in-lieu of tax revenue, payments-in-lieu of tax receivable and tax refundable. Estimates are based on the best information available at the time of preparation of the financial statements.

**(d) Investments**
Investments include term deposits held with the Province recorded at cost and mature within one year.

**(e) Revenue Recognition**
The main sources of revenue are:

- **Debt retirement charge (DRC)** from ratepayers is recognized in the period earned based on the consumption of electricity. With the end of the DRC beginning April 1, 2018, the DRC is no longer a source of revenue for the OEFC.
- **Payments-in-lieu of taxes (PILs)** are recognized in the period that they are earned from OPG, Hydro One and municipal electric utilities. Also included under PILs are Gross Revenue Charge amounts and amounts allocated by the Province to OEFC equal to provincial corporate income taxes payable by Hydro One Inc. (post – IPO).
- **Interest income** is recognized in the period it is earned on notes receivable from the Province, OPG, IESO, and NUGs.
- **Power supply contract recoveries** are recognized as recovered at the same amount as the costs incurred on the Power supply contracts.
- **Electricity sector dedicated income** is allocated at the discretion of the Province of Ontario, using the cumulative combined net income of OPG and Hydro One Limited (related to the Province's ownership share) ~~and Brampton Distribution Holdco Inc.~~ in excess of the Province's interest costs of its investment.
- **Provincial allocation related to the sale of Hydro One and Hydro One Brampton** is recognized in accordance with section 50.3 of the *Electricity Act, 1998* where OEFC receives a benefit as a result of the sales of Hydro One shares and Hydro One Brampton shares.
- ~~**Provincial allocation related to the sale of Hydro One Brampton** is recognized in accordance with section 50.3 of *Electricity Act, 1998* where OEFC receives a benefit as a result of the February 2017 disposition of the common shares of Hydro One Brampton by Brampton Distribution Holdco Inc.~~

**(f) Financial Instruments**
The corporation's financial assets and liabilities are accounted for as follows:

- Cash and investments are subject to an insignificant risk of change in value so carrying value approximates fair value.

- Accounts Receivable, Due from Province and Notes and Loans Receivable are recorded at cost.

- Debt is composed of short, medium and long-term bonds, notes and debentures. Debt denominated in foreign currencies that has been hedged is recorded at the Canadian dollar equivalent using the rates of exchange established by the terms of the hedge agreements. Other foreign currency debt, liabilities and assets are translated to Canadian dollars at year-end rates of exchange and, in accordance with Canadian public sector accounting standards, any exchange gains or losses are deferred and amortized over the remaining term to maturity.

- Discounts, premiums and commissions arising from the issuance of debt or the acquisition of debt prior to maturity are deferred and amortized to operations over the life of the underlying debt. Unamortized debt issue costs are included in total debt.

  Derivatives are financial contracts the value of which is derived from underlying instruments. OEFC uses derivatives for the purpose of hedging and to minimize interest costs. Hedges are created primarily through swaps, which are legal arrangements under which OEFC agrees with another party to exchange cash flows based upon one or more notional amounts during a specified period. Other derivative instruments used by OEFC include forward foreign exchange contracts, forward rate agreements, futures and options. Derivatives are recognized at cost on the date on which derivatives are entered and are not subsequently re-measured at fair value at each reporting date.

**(g) Debt guarantee fee**

A fee equal to 0.5 per cent is payable to the Province annually based on the principal amount of notes, debentures and other indebtedness of the Corporation owed to the Province or guaranteed by the Province excluding adjustments to debt related to unrealized foreign exchange gains and debt issue costs.

**(h) Deferred Costs on Hedging**

Fees and other costs from debt related derivatives are deferred and amortized to operations over the life of the underlying debt. Unamortized amounts are classified under non-financial assets.

**(i) Accounts payable and accrued Liabilities**

Accounts payable relate to normal business transactions with third-party suppliers and are subject to standard commercial terms.

**(j) Power Purchase Contracts**

The liability for power purchase contracts was originally calculated by discounting estimated losses over the life of the contracts. Under the *Electricity Restructuring Act, 2004*, OEFC began receiving actual contract prices for power from electricity consumers, effective January 1, 2005, and no longer incurs losses on these power purchase contracts. At that time, the decision was made to amortize the liability to revenue over the period when most existing electricity contracts expire with the liability fully eliminated in fiscal 2021–22.

## 3) Going Concern

OEFC is dependent on the Province to borrow funds to finance maturing debt and to cover any cash shortfalls in the Corporation, and on OPG repaying its outstanding notes receivable. It is also dependent on the government's long-term plan to defease the unfunded liability as described in Note 12.

## 4) Accounts Receivable

| As at March 31 ($ millions) | 2017 | 2016 |
|---|---|---|
| Debt retirement charge | $ 91 | $ 91 |

| | | |
|---|---|---|
| Payments-in-lieu of tax | 109 | 284 |
| Power supply contract recoveries | 85 | 83 |
| Other receivables | 5 | 8 |
| **Total** | **$ 290** | **$ 466** |

## 5) Due from the Province

| **As at March 31 ($ millions)** | **20187** | **2016** |
|---|---|---|
| Electricity sector dedicated income | $ 3,138 | $ 4,106 |
| Financial benefit related to disposition of Hydro One shares | 411531 | 172 |
| Amount equal to Hydro One Inc. provincial income tax | 28 | 3 |
| **Total** | **$ 3,577** | **$ 4,281** |

**Commented [AJ20]:** To be updated based on book value paydown

**Commented [SK21R20]:** In addition to pay down, will need to be updated based on finalized ESDI amount.

In 1999, the Province put in place a policy commitment to allocate annually the combined net income of OPG and Hydro One in excess of the Province's interest cost of its investment in its electricity subsidiaries to OEFC. Under these arrangements, the Province recoups all costs associated with its investments in electricity subsidiaries on a cumulative basis before any of the combined net income is allocated to and recognized by OEFC.

For the year ended March 31, 20172018, for the purposes of Electricity Sector Dedicated Income, the Province's combined net income of OPG and, Hydro One Limited and Brampton Distribution Holdco Inc. was $816 1,399 million **[TBC]** (2016 2017 – $ 523 x million). After deducting the Province's $514 457 million interest cost of its investment in these subsidiaries (2016 2017 – $520 514 million) [including the Province's interest cost from equity injections into OPG to support Ontario's Fair Hydro Plan] **[TBC]**, the Province at its discretion allocated to OEFC electricity sector dedicated income of $$287 942 million **[TBC]** (2016 2017 – $302 million). OEFC however, is reporting $302 million which includes, estimated income allocated from Brampton Distribution Holdco Inc. (Hydro One Brampton) of $15 million (2016 – $ 15 million) which, at the time of preparation of these statements, had not yet been finalized and approved by the Province as part of the discretionary allocation of ESDI to OEFC (the agency will be requesting provincial approval in due course) but is included in ESDI to ensure consistency and comparability with prior periods. During fiscal 20176–187, the Province paid $1,2701,082 million to OEFC (2017 – $1,270 million) which reduced the balance due.

**Commented [DS22]:** Happy to delete, but given prior year references for other items, this may be appropriate.

Section 50.3 of the *Electricity Act, 1998* governs the payments to be made to the Corporation in respect of the disposition of any securities of Hydro One and Hydro One Brampton. For fiscal 2017~~6~~–1~~8~~7, OEFC recognized $~~411~~ 531 million from the Province under section 50.3 of the Act in connection with the disposition of Hydro One common shares in May 2017 and ~~of~~ Hydro One Brampton common shares in February 2017~~to Alectra Inc. and the final public offering of Hydro One share sales~~ (2017~~6~~ – $411~~72~~ million). During fiscal 2017~~6~~–1~~8~~7, the Province also settled $411~~72~~ million of the amount due through a remission of short-term debt that OEFC held with the Province (2017 – $172 million).

**Commented [DS23]:** Happy to delete, but given prior year references for other items, this may be appropriate.

In addition, section 91.2 of the Electricity Act requires the Province to pay to the Corporation an amount equal to the amount of tax payable under the *Taxation Act, 2007* by Hydro One Inc. (or subsidiaries). For fiscal ~~2016~~2017–~~17~~18, OEFC has recognized $2~~4.8~~3.7 million under section 91.2 of the Act (~~2016~~ 2017 – $2~~4.9~~ 8 million~~, for November 5 – December 31, 2015 post Hydro One IPO~~).

## 6) Notes and Loans Receivable

| ($ millions) | Maturity Date | Interest Rate | Interest Payable | March 31, 2017 | March 31, 2016 |
|---|---|---|---|---|---|
| The Province | 2039–2041 | 5.85 | Monthly | $ 7,763 | $ 8,885 |
| OPG | 2017–2047 | 2.96 to 6.33 | Semi-Annually | 3,445 | 3,465 |
| IESO | 2017 | Variable/2.05 | Monthly/ Semi-Annually | 90 | 90 |
| | | | | 11,298 | 12,440 |
| Add: Loans receivable from NUGs | | | | 77 | 84 |
| **Total** | | | | **$ 11,375** | **$ 12,524** |

**Commented [AJ24]:** Further reduction of note receivable by $861M

OEFC agreed with OPG and the IESO not to sell notes owing from these successor entities without their prior approval.

OEFC's interest income for 2017 of $703 million (2016 – $723 million) included interest from notes receivable of $686 million (2016 – $701 million) and $17 million (2016 – $22 million) from other sources including temporary investments.

**The Province**

As previously noted above, at the time of restructuring the former Ontario Hydro, the Province received equity of $8.9 billion in OPG and Hydro One in exchange for assuming debt payable to OEFC. During fiscal 2017~~6–18~~7, the Province paid $861~~1,122~~ million to OEFC (2017 – $1,122 million) reducing the principal notes outstanding.

Commented [DS25]: Happy to delete, but given prior year references for other items, this may be appropriate.

**OPG**

OEFC agreed to provide OPG financing ~~for new generation project development~~ in the form of 10-year and 30-year notes on commercial terms and conditions.

The OEFC agreed to provide up to $700 million in support of OPG's investment for the Lower Mattagami project. The facility expired June 30, 2016 with no borrowing under this credit facility agreement.

The OEFC agreed to provide up to $800 million for general corporate purposes, including the Darlington refurbishment project, expiring on December 31, 2016 with $100 million advanced under this facility and a $700 million credit facility for the period June 1, 2016 to December 31, 2017. In September 2017, amendments to the credit facility were finalized to increase the facility to $2.35 billion and extend the expiry date to December 31, 2018. As at March 31, ~~2017~~2018, $~~200~~ x million has been advanced under this credit facility.

Set out below is a summary by year of maturity of OPG's debt to OEFC ($ millions):

| Fiscal Year | Amount |
|---|---|
| 2017–18 | $ 1,125 |
| 2018–19 | 260 |
| 2019–20 | 505 |
| 2020–21 | 420 |
| 2021–22 | 185 |
| 2022–23 | 130 |
| 2023–24 | 20 |
| 2026-27 | 50 |
| 2040–41 | 150 |
| 2041–42 | 350 |
| 2046-47 | 250 |
| **Total** | **$ 3,445** |

**IESO**

~~At March 31, 2017, OEFC held a note receivable from IESO of $90 million.~~ In April 2017, OEFC refinanced a note receivable with the IESO, originally maturing on April 30, 2017 for an additional term to June 30, 2020. The refinancing increased the principal outstanding from $90 million to $120 million.

~~At March 31, 2017, IESO had no balance drawn on the following credit facility.~~ In April 2017, OEFC also extended the expiry date of its revolving credit facility to the IESO to June 30, 2020, and increased the credit facility from $95 million to $160 million. The credit facility bears interest at a floating rate equal to the Province's cost of borrowing for a 30 day term plus 50 basis points. The facility will be used for liquidity purposes and to temporarily fund working capital requirements. At March 31, 2018, IESO had [not drawn any funds] **[TBC]** from this credit facility.

**NUGs**

Loans receivable from NUGs at March 31, 2017 totalled $77 million (2016 – $84 million).

## 7) Accounts Payable and Accrued Liabilities

| As at March 31 ($ millions) | 2017 | 2016 |
|---|---|---|
| Power supply contract costs | $ 83 | $ 88 |
| Payments-in-lieu of tax refundable | 6 | 12 |
| Other liabilities | 4 | 4 |
| **Total** | **$ 93** | **$ 104** |

## 8) Debt

Debt at March 31, 2017, is set out below by maturity and by currency of repayment, expressed in Canadian dollars.

| Currency ($ millions) | Canadian Dollars | U.S. Dollars | Other Foreign | 2017 Total | 2016 Total |
|---|---|---|---|---|---|
| Maturing in: | | | | | |
| 1 year | $ 2,299 | $ 295 | $ 179 | $ 2,773 | $ 4,607 |
| 2 years | 482 | 74 | 156 | 712 | 2,119 |
| 3 years | 1,384 | – | – | 1,384 | 709 |
| 4 years | 1,361 | – | – | 1,361 | 1,384 |
| 5 years | 1,805 | – | – | 1,805 | 1,361 |
| 1–5 years | 7,331 | 369 | 335 | 8,035 | 10,180 |
| 6–10 years | 8,844 | – | – | 8,844 | 9,628 |
| 11–15 years | 1,041 | – | – | 1,041 | 1,215 |
| 16–20 years | 846 | – | – | 846 | 850 |
| 21–25 years | 782 | – | – | 782 | 1,328 |
| 26–50 years | 875 | – | – | 875 | 1,157 |
| | **$ 19,719** | **$ 369** | **$ 335** | **$ 20,423** | **$ 24,358** |
| **Debt issue costs** | | | | **(10)** | **(13)** |
| **Total** | | | | **$ 20,413** | **$ 24,345** |

The effective rate of interest on the debt portfolio was 5.39 per cent after considering the effect of derivative instruments used to manage interest rate risk (2016 – 5.14 per cent). The longest term to maturity is to December 2, 2046. Total foreign currency denominated debt at March 31, 2017 was $0.7 billion, 100 per cent of which was fully hedged to Canadian funds (2016 – $1.2 billion or 100 per cent). Bonds and notes payable are either held, or guaranteed as to principal and interest, by the Province as set out below:

| | March 31, 2017 | | | March 31, 2016 | | |
|---|---|---|---|---|---|---|
| ($ millions) | Held by the Province | Guaranteed by the Province | Total | Held by the Province | Guaranteed by the Province | Total |
| Short-term debt | $ 654 | – | $ 654 | $ 1,630 | – | $ 1,630 |
| Current portion of long-term debt | 2,119 | – | 2,119 | 2,977 | – | 2,977 |
| Long-term debt | 11,330 | 6,310 | 17,640 | 13,428 | 6,310 | 19,739 |
| **Total** | **$ 14,103** | **$ 6,310** | **$ 20,413** | **$ 18,035** | **$ 6,310** | **$ 24,345** |

Fair value of debt issued approximates amounts at which debt instruments could be exchanged in a current transaction between willing parties. In valuing OEFC's debt, fair value is estimated using discounted cash flows and other valuation techniques and is compared to public market

quotations where available. These estimates are affected by the assumptions made concerning discount rates and the amount and timing of future cash flows.

The estimated fair value of OEFC debt at March 31, 2017, was $24.5 billion (2016 – $29.3 billion). This is higher than the book value of $20.4 billion (2016 – $24.3 billion) because current interest rates are generally lower than the interest rates at which the debt was issued. The fair value of debt does not reflect the effect of related derivative contracts.

## 9) Risk Management and Derivative Financial Instruments

OEFC operates within strict risk exposure limits to ensure exposure to risk is managed in a prudent and cost-effective manner. A variety of strategies are used including the use of derivative financial instruments ("derivatives"). Derivatives are financial contracts, the value of which is derived from underlying instruments. OEFC uses derivatives for the purpose of hedging and to minimize interest costs. Hedges are created primarily through swaps, which are legal arrangements under which OEFC agrees with another party to exchange cash flows based upon one or more notional amounts during a specified period. This allows OEFC to offset its existing obligations and thereby effectively convert them into obligations with more desirable characteristics. Other derivative instruments used by OEFC include forward foreign exchange contracts, forward rate agreements, futures and options.

### Foreign exchange/currency risk

Foreign exchange or currency risk is the risk foreign currency debt principal and interest payments and foreign currency transactions will vary in Canadian dollar terms due to fluctuations in foreign exchange rates. To manage currency risk, derivative contracts are used to convert foreign currency cash flows into Canadian dollar denominated cash flows. The current policy allows unhedged foreign currency debt principal, net of foreign currency holding, to reach a maximum of 5.0 per cent of total debt. At March 31, 2017, the actual unhedged level was 0.0 per cent of total debt (2016 – 0.0 per cent).

### Net Interest Rate Resetting Risk

Net interest rate resetting risk is the exposure to changes in interest rates. Exposure to rate changes is reduced by entering into derivative contracts that convert floating interest payments to fixed interest payments. The current policy allows unhedged floating rate debt and fixed rate debt maturing within the next 12 months, net of liquid reserves, to reach a maximum of 35.0 per cent of total debt.

At March 31, 2017, net interest rate resetting risk as a percentage of total debt was minus 3.1 per cent (2016 – 7.6 per cent).

## Liquidity Risk

Liquidity risk is the risk OEFC will not be able to meet its current short-term financial obligations. As explained in Note 3, OEFC is dependent on the Province to borrow funds to finance maturing debt and to cover any cash shortfalls in the Corporation, and on OPG repaying its outstanding notes receivable.

The table below presents a maturity schedule of OEFC's derivatives, by type, outstanding at March 31, 2017, based on the notional amounts of the contracts. Notional amounts represent the volume of outstanding derivative contracts and are not indicative of credit risk, market risk or actual cash flows.

**Derivative Portfolio Notional Value**

**As at March 31, 2017 ($ millions)**

| Maturity in years / Fiscal year | 2018 | 2019 | 2020 | 2021 | 2022 | 6–10 Years | Over 10 Years | Total | March 2016 |
|---|---|---|---|---|---|---|---|---|---|
| Cross-currency swaps | $ 670 | $ 203 | $ – | $ – | $ – | $ – | $ – | $ 873 | $ 1,631 |
| Interest rate swaps | 632 | 706 | – | – | 100 | 423 | 230 | 2,091 | 3,205 |
| Forward foreign exchange contracts | 190 | – | – | – | – | – | – | 190 | 498 |
| **Total** | **$ 1,492** | **$ 909** | **$** – | **$ –** | **$ 100** | **$ 423** | **$ 230** | **$ 3,154** | **$ 5,334** |

## Credit Risk

The use of derivatives introduces credit risk, which is the risk of a counterparty defaulting on contractual derivative obligations in which OEFC has an unrealized gain. The table below presents the credit risk associated with the derivative financial instrument portfolio, measured through the replacement value of derivative contracts, at March 31, 2017.

| Credit Risk Exposure ($ millions) | March 31, 2017 | March 31, 2016 |
|---|---|---|
| Gross credit risk exposure | $ 151 | $ 263 |
| Less: Netting | (149) | (218) |
| **Net credit risk exposure** | **$ 2** | **$ 45** |

OEFC manages its credit risk exposure from derivatives by, among other ways, dealing only with high credit quality counterparties and regularly monitoring compliance to credit limits. In addition, OEFC enters into contractual agreements ("master agreements") that provide for termination netting and, if applicable, payment netting with most of its counterparties. Gross credit risk exposure represents the loss OEFC would incur if every counterparty to which OEFC had credit risk exposure were to default at the same time, and the contracted netting provisions were not exercised or could not be enforced. Net credit risk exposure is the loss including the mitigating impact of these netting provisions.

## 10) Power Supply Contracts

Power supply contracts include both power purchase contracts and power supply support agreements. Power purchase contracts and related loan agreements were entered into by the former Ontario Hydro with NUGs located in Ontario. As the legal continuation of the former Ontario Hydro, OEFC is the counterparty to these contracts. The contracts, expiring on various dates to 2048, provide for the purchase of power at prices in excess of future market price. Accordingly, a liability was recorded at $4,286 million on a discounted cash-flow (DCF) basis when the former Ontario Hydro was continued as OEFC on April 1, 1999.

Under legislated reforms to the electricity market, OEFC began receiving actual contract prices for power from ratepayers effective January 1, 2005, and no longer incurs losses on these contracts going forward. At that time, the decision was made to amortize the liability to revenue over the period when most electricity contracts expire with the liability fully eliminated in fiscal 2021-22. The table below presents the unamortized liability.

**Statement of Liability for Power Purchase Contracts**
**As at March 31, 2017 ($ millions)**

| | 2017 | 2016 |
|---|---|---|
| Liability, beginning of year | $ 307 | $ 479 |
| Amortization | (129) | (172) |
| Liability, end of year | **$ 178** | **$ 307** |

~~In addition, effective January 1, 2009, OEFC entered into a support contract, the Contingency Support Agreement (CSA), with OPG whereby OPG agreed to maintain the reliability and availability of Lambton and Nanticoke coal-fired stations following implementation of a greenhouse gas emissions-reduction strategy. Under the contract, OEFC agreed to ensure OPG would recover the actual costs of operating the stations after implementing this strategy. Any costs to OEFC under this agreement are fully recovered from ratepayers. As at December 31, 2013, OEFC triggered an early termination clause in the CSA to reflect the advanced closure of these plants by one year to the end of 2013. OPG is allowed to recover actual costs that cannot reasonably be avoided or mitigated, during the period from the early shut down date until December 31, 2014, consistent with the original end date of the CSA.~~

**Commented [RK26]:** If there were no impacts on the financials in 16-17 or 17-18 under the CSA, can this be dropped?

**Commented [SK27R26]:** Sure. In previous ARs, this was included, but no issues with dropping it this time.

During the year ended March 31, 2017, OEFC's costs under power supply contracts totalled $838 million, including purchases of power from NUGs of $840 million (2016 – $865 million) and OPG support contract costs of $2 million recovered related to the settlement of a property tax assessment (2016 – $10 million costs).

~~Under a decision dated March 12, 2015 the Ontario Superior Court of Justice found that following the enactment of Ontario Regulation 398/10 under which the allocation of the Global Adjustment among electricity consumers was changed effective as of January 1, 2011, the Corporation had incorrectly calculated the price indices under certain power purchase agreements between the Corporation and the applicant non-utility generators (NUGs). In October 2016 the corporation paid $181 million in retroactive payments including interest to the applicant NUGs. Following the January 19, 2017 dismissal of OEFC's application for leave to appeal by the Supreme Court of Canada from the judgment of the Court of Appeal of Ontario, about $79 million became payable to certain NUGs that were not applicants to the original claim but that entered into standstill agreements with OEFC following the original court decision. All amounts are recoverable from the Global Adjustment via the IESO settlement process.~~

**Commented [UZ28]:** SPFB: Even though the standstill NUG payments were made in 2017-18, they reflect earlier periods as Janurary 2017 is when they became payable.

## 11) Industrial Electricity Incentive Program Costs

Consistent with its objects, OEFC ~~is~~ has ~~supporting~~ supported the IESO's electricity demand management program, the Industrial Electricity Incentive (IEI) program. The IEI program assists with the management of electricity demand by encouraging increased industrial production through electricity-based price adjustments. Offered in three streams, qualified participants can receive reduced electricity rates for eligible incremental consumption over a specified term.

On March 31, 2014, OEFC entered into a legal agreement, and as amended on May 13, 2015, with the former OPA to support the IEI program. Subsequent to the January 1, 2015 merger of the IESO and the OPA into a new entity, also called the IESO, the contract is now between the IESO and the OEFC. OEFC is providing payments to the IESO to offset the cost of the DRC portion of the electricity bill paid to OEFC on IEI-eligible incremental consumption by IEI participants. The agreement is currently set to be effective until December 31, 2024, with contracts subject to various termination clauses.

*The Budget Measure Act, 2015*, passed on December 10, 2015 ~~will~~ removed the DRC as of April 1, 2018 for all commercial, industrial and all other electricity consumers. OEFC ~~will~~ no longer provides offsetting payments to the IESO on IEI-eligible incremental electricity consumed beginning April 1, 2018.

### 12) Unfunded Liability

Pursuant to the Act and consistent with the principles of electricity restructuring, the government has a long-term plan to defease the unfunded liability from funds from the electricity sector.

Prior to the Hydro One IPO (see note 15), these funds included Notes Receivable, PILs, Gross Revenue Charges (GRC), DRC and ESDI.

Following the Hydro One IPO, these funds include Notes Receivable, PILs, GRC, Provincial Corporate Income Taxes allocated by the Province to OEFC from taxes payable by Hydro One Inc. in accordance with t~~T~~he *Budget Measures Act, 2015*, DRC, ESDI (at the discretion of the Province) and a financial benefit from the proceeds of the IPO and any future share sales, including the sale of Hydro One Brampton ~~common~~ shares, in accordance with section 50.3 of the *Electricity Act, 1998*.

### 13) Contingencies

OEFC is involved in various legal actions arising out of the ordinary course and conduct of business. For some claims which relate to the former Ontario Hydro prior to the establishment of OEFC on April 1, 1999, OPG or Hydro One is required to indemnify OEFC for any liability arising from the claim. There are currently no such claims. For claims on which OEFC is provided no indemnification and where the outcome and ultimate disposition of these legal actions is not determinable at this time, the settlements, if any, will be reflected in the period in which settlement occurs.

Prior to October 31, 2015, subject to a $10 million deductible, OEFC agreed to indemnify Hydro One in respect of any adverse claim to title to any asset, right or thing transferred or intended to be transferred to the company at April 1, 1999, and any failure of the transfer order to transfer such assets, rights or things and with respect to payment to or from or other dealing with any equity account of Ontario Hydro, including certain related litigation. Effective October 31, 2015, OEFC and Hydro One, with the consent of the Minister of Finance, terminated this indemnity. A similar indemnity provided to OPG was terminated as of May 31, 2006.

## 14) Related Party Transactions

In the normal course of operations, OEFC has transactions with the following related parties:

a) Province of Ontario
b) Ontario Power Generation Inc.
c) Hydro One Inc. (for the period up to October 2015) and Hydro One Ltd. (post IPO)
d) Independent Electricity System Operator

The Corporation has entered into service level agreements with the following entities:

### Ontario Financing Authority

The Ontario Financing Authority (OFA), an agency of the Province responsible for borrowing and investing monies for the Province and other public bodies, provides day-to-day management services to OEFC on a cost-recovery basis of $3.8 million (2016 – $3.7 million).

### Ministry of Finance (MOF)

MOF provides revenue collection and reporting services to OEFC on a cost-recovery basis of $1.7 million (2016 – $1.7 million).

## 15) ~~Broadening~~ Provincial Sales of Hydro One Shares~~Ownership~~

On November 5, 2015, the Province ~~completed the first phase of its plan to broaden Hydro One ownership. It~~ sold about 16 per cent of the Province's outstanding Hydro One common shares at a price of $20.50 per share, through an IPO and through related share sales to electricity sector union trusts. On November 4, 2015, Hydro One paid a departure tax of $2.6 billion to OEFC as a consequence of leaving the PILs regime. Hydro One also paid a one-time additional PIL of tax payment of $191 million associated with the transaction.

Following the IPO, ~~t~~The Province ~~also~~ initiated a secondary ~~share~~ offering of Hydro One shares on April 5, 2016 which upon completion reduced the Province's holdings of Hydro One to approximately 70 per cent.

The Province also initiated a further secondary ~~share~~ offering of Hydro One shares on May 8, 2017, selling 120 million common shares at $23.25 per share, which, upon completion, reduced the Province's holdings of Hydro One common shares to approximately 49.9 per cent.

On December 29, 2017, the Province also completed a sale of about 2.4 per cent of outstanding Hydro One common shares at $18 per share to OFN Power Holdings LP, a limited partnership wholly-owned by Ontario First Nations Sovereign Wealth LP, which is in turn owned by 129 First Nations in~~of~~ Ontario. Upon completion of the transaction, the Province's holdings of Hydro One common shares totalled approximately 47.4 per cent.~~Prior to the end of the third quarter on December 29, 2017 the Province also completed a sale of about 2.4 per cent of outstanding Hydro One common shares to a group of 129 First Nations of Ontario. This transaction fulfills the Province's commitment in its agreement-in-principle with the First Nations in Ontario,as represented by the Chiefs-in-Assembly, which was previously announced on July 12, 2016. The~~

~~Province now holds approximately 47.4 per cent of the outstanding Hydro One common shares following the share sale to the First Nations.~~

As a result of the Hydro One IPO, Hydro One and all its subsidiaries are subject to corporate income taxes (CIT). Under the amendments made to the *Electricity Act, 1998* in the fall *Budget Measures Act, 2015*, the Minister of Finance must pay the OEFC an amount equal to provincial tax payable under the Taxation Act, 2007 by Hydro One Inc., to continue to help service and pay down the electricity sector stranded debt.

Proceeds related to the book value of the shares sold and the special dividend payment of $800 million paid by Hydro One to the Province ~~will be~~are being used to pay down the Province's electricity sector debt and other payables. As noted in Notes 5 and 6, OEFC received $~~2,392~~1,943~~2~~ million (2017 – $2,392 million) from the Province during fiscal 201~~76~~–1~~87~~ related to the book value of Hydro One common shares sold in ~~November 2015 and April 2016~~May 2017, of which the Province applied $1,~~270~~ 08~~21~~ million (2017 – $1,270 million) to reduce its payable related to cumulative electricity dedicated earnings (Due from the Province of Ontario) and $~~1,122~~861 million (2017 – $1,122 million) to reduce the principal amount of notes payable to OEFC that the Province had assumed on acquiring the shares of Hydro One. ~~In February 2016, the Province also paid OEFC the $800 million that it had received as a special dividend from Hydro One prior to the IPO, which the Province applied to reduce its payable related to cumulative electricity sector dedicated earnings (Due from the Province of Ontario).~~

In accordance with section 50.3 of the *Electricity Act, 1998*, in the year ended March 31, 201~~87~~ OEFC recognized a financial benefit from the Province of $531~~411~~ million (201~~76~~ – $411~~172~~ million) in ~~connection with the Province's disposition~~ connection with the ~~Province's~~ disposition of Hydro One common shares in May 2017 and ~~the common shares of~~ Hydro One Brampton common shares in February 2017~~ to Alectra Inc. and the May 2017 final public offering of Hydro One shares~~. ~~of Hydro One common shares in April 2016. As noted in Note 5, during fiscal 2016–17, the Province settled $172 million related to the 2016 benefit through a remission of short-term debt that OEFC held with the Province.~~ As noted in Note 5, during fiscal 2017–18, the Province settled $411 million related to the 2017 benefit through a remission of short-term debt that OEFC held with the Province (2017 – $172 million related to the 2016 benefit).

~~On May 17, 2017 the Province announced that it had completed the final public offering of Hydro One shares, selling 120 million common shares at $23.25 per share.~~

## 16) Comparative Figures

Certain of the prior year's comparative figures have been reclassified to conform with the financial statement presentation adopted for the current period.

## Corporate Governance

- Overview
- Board of Directors
- Risk Management Policies and Procedures

## Corporate Governance

### Overview

OEFC is an agent of the Crown and is classified by Management Board of Cabinet as a board-governed provincial agency.

Corporate governance at OEFC involves processes that permit the effective supervision and management of OEFC's activities by senior management, the Board, its Audit Committee, and the Minister of Finance. It includes identifying individuals and groups responsible for the Corporation's activities and specifying their roles.

#### Accountability and Responsibilities

OEFC's accountability structure flows from its governing statute, the Act. The Act together with policies issued by Management Board of Cabinet and the Minister of Finance form a framework under which OEFC is governed.

Each year, the Minister of Finance is required to submit OEFC's Annual Report to the Lieutenant Governor in Council and then table the Annual Report in the Legislature. In addition, the Minister of Finance reviews and approves OEFC's annual business plan. The Minister also maintains communications with OEFC, through its Chair, regarding government policies and issues relevant to OEFC.

The Chair is accountable to the Minister of Finance for the performance of OEFC in fulfilling its mandate. The current Chair is also the Deputy Minister of Finance. The Chair is responsible for providing advice and information to the Minister of Finance with regard to the operation and affairs of OEFC. In addition, the Chair provides leadership to OEFC. As Deputy Minister of Finance, the Chair ensures organizational capacity in the Ministry to monitor OEFC and ensures that it manages its risks appropriately.

The Board is appointed by the Lieutenant Governor in Council on the recommendation of the Minister of Finance and is accountable to the Minister through the Chair. The Board performs a supervisory role, overseeing the management of the business and affairs of OEFC to ensure OEFC's mandate, as determined by the Province, is fulfilled. The Board is largely comprised of public servants employed by the Crown. The Board meets at least quarterly and receives regular reports from the CEO and OFA staff concerning the operations of OEFC and its compliance with applicable laws and policies. Standards of conduct for Board members are set out in a Board-approved Code of Conduct.

The Audit Committee of the Board approves an annual internal audit plan and liaises with OEFC's internal auditors and the Auditor General of Ontario regarding financial reporting and internal controls. It also reviews financial policies and financial statements and recommends them to the Board. Another function of the Audit Committee is the review of the Corporation's major risks and mitigation strategies.

The CEO is appointed by the Lieutenant Governor in Council on the recommendation of the Minister of Finance. The CEO works under the direction of the Chair and the Board to implement policies and operational decisions, and reports the agency's performance to the Board through the Chair. The CEO is responsible for managing the day-to-day operations and ongoing activities of OEFC in accordance with government policies.

The Corporation does not have employees, although some OFA employees are designated as officers for executing agreements and other instruments on the Corporation's behalf. The OFA carries out the Corporation's day-to-day operations under the supervision of the Board and pursuant to a Services Agreement between the OFA and OEFC. In addition, the Ministry of Finance collects certain payments on behalf of OEFC.

### Financial Reporting

OEFC prepares annual financial statements in accordance with Canadian public sector accounting standards. The financial statements are reviewed and recommended by the Audit Committee and approved by the Board. The annual financial statements are audited by the Auditor General of Ontario who expresses an opinion on whether they present the financial results fairly in accordance with Canadian public sector accounting standards. The financial statements and the audit report are reviewed by the Audit Committee and the Board. These audited financial statements are tabled in the Ontario Legislature as part of the Annual Report and are included as a schedule to the Public Accounts of the Province. Unaudited financial statements are prepared quarterly and presented to the Audit Committee and the Board.

### Internal Controls

Management is responsible for establishing and maintaining internal controls to provide reasonable assurance regarding the reliability of financial reporting and to safeguard OEFC's assets and manage its liabilities.

In meeting its responsibility for the reliability and timeliness of financial information, OEFC, directly and through the OFA, uses a comprehensive system of internal controls, including organizational and procedural controls. The system of internal controls includes:

- comprehensive business planning
- written communication of policies and procedures governing corporate conduct and risk management
- segregation of duties
- maintenance and retention of detailed records
- responsible delegation of authority and personal accountability
- careful selection and training of personnel
- regularly updated accounting and financial risk policies.

As part of its annual business plan, OEFC conducts a risk assessment of corporate-wide risks and develops appropriate mitigation strategies.

The Ontario Internal Audit Division of the Ministry of Finance develops an annual internal audit plan based on input from the OEFC Audit Committee and OFA Management. The internal audit plan is approved by the OEFC Audit Committee. The Internal Audit Division reports to the OEFC Audit Committee on the results of their audit work in OEFC.

## Board of Directors

**Scott Thompson**
Chair and Deputy Minister of Finance
Date of initial appointment to OEFC Board of Directors: October 2014
Current term expires: October 2017

**Gadi Mayman**
Vice-Chair and Chief Executive Officer
Date of initial appointment to OEFC Board of Directors: August 2000
Current term expires: July 2020

**Denise Dwyer**
Assistant Deputy Minister, Indigenous Education and Well-Being Division, Ministry of Education
Date of initial appointment to OEFC Board of Directors: December 2016
Current term expires: December 2019

**Serge Imbrogno**
Deputy Minister of Energy
Date of initial appointment to OEFC Board of Directors: April 2008
Current term expires: April 2020

**Nancy Kennedy**
Associate Deputy Minister, Office of Regulatory Policy and Agency Relations, Ministry of Finance
Date of initial appointment to OEFC Board of Directors: October 2014
Current term expires: October 2017

**Ronald Kwan**
Assistant Deputy Minister, Corporate and Electricity Finance Division, OFA
Date of initial appointment to OEFC Board of Directors: January 2013
Current term expires: January 2019

**John Lieou**
Assistant Deputy Minister, Planning and Policy Division, Ministry of Transportation
Date of initial appointment to OEFC Board of Directors: June 2010
Current term expires: January 2019

**Murray Lindo**
Date of initial appointment to OEFC Board of Directors: October 2014
Current term expires: December 2018

**Maria Mavroyannis**
Assistant Deputy Minister, Strategy, Stewardship and Program Policy Division, Ministry of Finance
Date of initial appointment to OEFC Board of Directors: December 2016
Current term expires: December 2019

## Risk Management Policies and Procedures

### Overview

The Corporation's risk management policies and procedures provide for the management of risk exposures created by capital market activities. Current policies and procedures address market, credit and operational risk exposures as they pertain to debt and derivatives portfolios and capital markets transactions.

These policies were developed following the guidelines and directives of regulatory bodies, such as the Office of the Superintendent of Financial Institutions of Canada and the Bank for International Settlements and by consulting with Canadian bank representatives on their risk management practices.

The Board and Management committees establish and approve risk management policies and monitor the performance of the OFA's capital market activities related to OEFC.

### Market Risk Policy

Market risk is the risk of financial loss attributable to changes in interest rates and foreign exchange rates. This policy provides a framework for borrowing activities and integrates several aspects dealing with the management of market risk. The policy includes several limits:

- **Foreign Exchange Limit** – unhedged foreign currency exposure is limited to 5.0 per cent of outstanding debt. Unhedged foreign exchange exposures are limited to Group of Seven currencies and the Swiss franc.
- **Net Interest Rate Resetting Limit** – the interest rate resetting exposure, net of liquid reserves, is limited to a maximum of 35.0 per cent of outstanding debt.

### Credit Risk Policy

Credit risk is the risk that a counterparty defaults on its financially contracted obligations. Credit risk arises when the OFA undertakes financial and derivative transactions on behalf of OEFC. The minimum credit rating of a new counterparty for swap transactions without collateral is AA- and R1-mid, A-1 or P-1 for money market investments. The resulting exposure to a financial counterparty is capped at mark-to-market limits depending on the counterparty's credit rating and capital base.

### Policy on the Use of Derivatives and Financial Instruments

Use of derivatives and other financial instruments is restricted to those that the OFA can price and whose risk exposures can be measured by the OFA. Derivatives are used to manage exposures arising from the OEFC Treasury program in a sound and efficient manner. Risks arising from the use of derivatives are monitored and managed prudently.

### Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people or systems, or external events. The OFA manages operational risk relating to OEFC through reviews and improvements of work processes, documented policies and procedures, data processing systems, contingency plans and staff training.

The OFA maintains a Business Continuity Plan (which covers OEFC's operations), which is regularly updated to facilitate the continuation of essential operational functions with minimal disruption in the event of an emergency.

### Policy on Risk Management Reporting

At its regular quarterly meetings, the Board is kept informed of the Corporation's activities:

- The CEO of OEFC provides the Board with a progress report on its borrowing activities and other operational matters. The CEO also reports on compliance with applicable government directives.
- The Chief Financial and Risk Officer, OFA Risk Control Division, reports on program exposures and performance, as well as exceptions to policies.

In addition, OFA Management is informed of the Corporation's risk exposures and positions on a daily basis so it can direct appropriate actions on behalf of OEFC.

**Notes: The Hydro One net income outlook above (2016-17 to 2020-21) reflects the Province's 70% ownership share after the initial IPO in 2015 and the secondary offering in April 2016. At the time of 2017 Budget, net estimated fiscal impacts from future Hydro One offerings are reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.**

**Notes:**

1.OPG's 2016-17 outlook reflected its reported earnings. 2017-18 to 2019-20 reflects OPG's preliminary 2017-2019 business plan (as fiscalized by OPG). 2020-21 estimates are based on OPG's calendar year-based business plan projections. OPG net income also reflects IFRS adjustments fiscal impact decisions that were made centrally.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of December 2016.

3. Hydro One 2016-17 income reflects its reported net income, adjusted for Hydro One IPO impacts. 2017-18 to 2020-21 projections are based on CEFD projections using the latest public information. The Hydro One net income outlook above currently reflects a 70.5% Provincial share allocation as of the secondary offering in April 2016. Net estimated fiscal impacts related to the last Hydro One offering as of 2017 Budget were reported along with other planned Asset Optimization proceeds under "Sales and Rentals" in the Provinces Revenue outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, less the interest on the Province's OPG/Hydro One debt payable to OEFC. The provision is currently assumed to end once the DRC ends on a legislated fixed end date of April 1, 2018.

5. Reflects April 23, 2014 announcement that DRC will be eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| *variance to OEFC check* | | *(156)* | *(454)* | *(516)* | - | - | - |

**Notes:**

1.OPG's 2017-18 to 2020-21 outlook reflects OPG's 2018-2021 Business Plan and Includes OPG head office properties sale proceeds and Lakeview property sale proceeds. 2021-22 estimates are based on OPG's calendar year-based business plan projections for 2021 and a CEFD projection for 2022. OPG net income also reflect projected IFRS adjustments as provided by OPCD at the time of the 2017 Budget. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

2. Provincial consolidation adjustments for unrealized earnings on the decommissioning and used fuel segregated funds net of Bruce variance account and change in Due to the Province on the decommissioning and used fuel segregated funds, as of the end of September 2017.

3. Hydro One 2017-18 is based on actual Hydro One results for 2017 and CEFD projection for 2018. Quarterly earnings are adjusted for the provincial ownership share during the quarter. 2018-19 and onwards are CEFD projections using the latest public information and reflects the Province's ownership share following the May 2017 share disposition and including the First Nations sale in December 2017. Note: all Asset Optimization transactions are re-categorised from Sales and Rentals in this Outlook.

4. Provision for electricity sector reflects OPG and Hydro One reported net income, excluding provincial ONFA consolidation adjustments, minus the interest on debt payable to OEFC. The provision is now assumed to continue after 2017-18 based on TB/MBC approval of the PRRT submission to continue ESDI payments to OEFC beyond 2017-18.

5. Reflects that DRC eliminated for residential users, after December 31, 2015. The end date of DRC for remaining users is legislated to be on April 1, 2018. Estimates are subject to change based on actual consumption.

6. Offset by incremental Debt Retirement Charge revenues related to the Industrial Electricity Incentive program.

| OEB decision on Hydro One tax recapture (if one-time write-down)[10] | (420) | | | | |
| **Accounting** | | | | | |
| OPG IFRS Consolidation Risks[11] | | — | — | — | |
| **Other Risks** | | | | | |
| ONFA adjustment decrease[12] | (100) | | | | |
| Avista Acquisition - Termination fee | | (49) | | | |
| PILs risk related to retirement of Stranded debt and potential wind down of OEFC[13] | | | | | (20) |

**Note: These risks do not reflect the impacts on electricity sector revenue and expense of reclassification of the Asset Optimization strategy**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% lower than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in business plan along with reduced deemed debt to equity weighting of 55%/45% from the current 51%/49%.

4. Risk range for Hydro One transmission and distribution reflects potential risk of lower ROE by 0.5% vs assumed ROEs in CEFD Hydro One Forecast based on the most recent rate applications and forecasted ROE rates.

5. OEB is expected to make a decision on Hydro One's Distibution rate application for 2018 during the first half of 2018.

6. Previous risk removed shifted from 2017-18 to 2018-19. OEB's September 2017 Report, established accrual accounting method as default rate setting method to recover Pension and Other Pension Benefits (OPEBs) costs and recommended continuance of variance account tracking the difference between cash vs. accrual basis reporting for Pension and OPEB. This finding mitigates this risk. However, OEB December 28, OPG rate decision instructs OPG to submit request to dispose of Pension and OPEB deferral and variance account balances during 2018 for its 2019 payment application. OEB's final decision will be made at that time. Note, the impact of a decision could fall in 2019-20 depending on timing of the OEB decision.

7. **Previous risk removed with timing impact now reflected in OPG outlook.**. OEB December 28, decision and order provides an effective date for new rates of June 1, 2017. OPG's business plan assumed OEB decision would be effective as of January 1, 2017. OPG estimated an impact of -$60M for each month for which OEB decsion is not retroactive. The resulting $300M estimated impact has been included in the OPG outlook.

8. **Previous risk removed .** Estimated impact of OEB December 28the decision and order with respect to OPG rates is now reflected on the OPG Outlook.

9. **Previous risk removed.** Risk is related to potential switch to cash-basis accounting for regulated recovery of nuclear payment anmounts. OEB December 28, 2017 Decision and Order has deferred this issue to next OPG rate application in 2021 for 2022 to 2027 period.

10. The OEB's Sep. 28, 2017 ruling on Hydro One's Transmission rate application included direction on sharing, with ratepayers, tax savings related to the Hydro One IPO. Hydro One filed a Motion to Review this decision with the OEB and has also filed a court appeal. Hydro One's 2017 Q3 financial report notes that if the Motion to Review and appeal are unsuccesful the company would record a one-time write-down of $885 million (for transmission and distribution net income) reflecting the OEB decision. The risk above reflects this risk at the Province's current 47.4% average share allocation. Hydro One noted that timing for the Motion to Review and appeal is uncertain. It expects the OEB Review to start in Q1 but noted that it could run in to Q2. As a result the impact could occur in 2018-19.

11. **Previous risk figures removed.** OPCD provided IFRS impact estimates (largely related to OPG) at the time of Budget 2017. A portion of these were reflected in in OPG's and Hydro One's net income outlook at the time of the 2017. The current Electricity Outlook now reflects this additional IFRS risk. Table below outlines OPG IFRS Risks versus what is built into the 2017 Budget Fiscal Plan. The new IFRS adjustments figures are pending from OPG via Energy in the next few days.

| | 2017-18 | 2018-19 | 2019-20 | 2020-21 |
|---|---|---|---|---|
| OPG IFRS Risk | (400) | (475) | (700) | (750) |
| Risks Built into Fiscal Plan at 2017 Budget | (400) | 0 | (200) | 0 |
| Additional Risks now picked up in this Electricity Outlook | 0 | (475) | (500) | (750) |

## Electricity Sector Outlook (PSAB)

| Positive Revenue Risks | | | | |

| **Regulatory** | | | | |
| OPG earnings impact due to June 1, 2017 effective date[6] | 325 | | | |
| **Accounting** | | | | |
| | | | | |
| **Other Risks** | | | | |
| ONFA adjustment increase[5] | 100 | | | |

**or updates to AO strategy.**

1. OPG's market and generation risks related to nuclear reliability similar to the scenarios OPG developed for its sales margins to capture major market risk factors (e.g., natural gas prices, coal prices, foreign exchange, nuclear reliability) in its 2012 business plan. Currently, only the nuclear reliability risk is captured at the current regulated rate for OPG's nuclear generation.

2. Estimated revenue impact if Hydro One load for Transmission and Distribution is 1% higher than projected for all years in CEFD Hydro One Forecast. Based on the assumption a 1% increase in load is directly proportional to a 1% change in revenue requirements.

3. Risk range for OPG reflects potential risk of higher ROE in 2018-2021 (for nuclear base) vs assumed ROE in OPG's 2016 business plan and corresponding rate application. Assumed ROE is 9.85%, respresenting recent in 2010.

4. Risk range for Hydro One transmission and distribution reflects potential risk of higher ROE vs assumed ROEs in the Hydro One CEFD Forecast for 2018-2021. Assumed ROE is 9.85%, representing recent high in 2010.

5. Reflects risk around the consolidation adjustment to OPG net income, whereby the realized portion of gains or losses of OPG's nuclear funds are added or subtracted from OPG net income. Currently $194M positive adjustment reflecting valuations as of December 31, 2017 is included in the OPG outlook. Given current market volatility the ONFA adjustment could change significantly by the end of the Province's fiscal year, March 31, 2018. The net debt adjustment to be included in the fiscal plan consistent with the December 31, 2017 valuations/reports would also be subject to the same type of volatility.

6.OPG earnings in 2017 are negatively impacted by a partial-year effective date of June 1, 2017 for new regulated rates, which resulted in forgone net income of $325 million. On January 17, 2018, OPG filed a Notice of Motion to review and vary the Decision in relation to the approval of an effective date of June 1, 2017 for new payment amounts rather than the January 1, 2017 effective date requested in OPG's application. The final decision is still pending

| **Electricity Sector Dedicated Income (OEFC Annual Report)** | **302** | **942** | **449** | **736** | **711** |

**Notes:**

1. The Hydro One financials above now reflects the Provincial share allocation as of January 2018.

2. 2016-17 Adjustment was due to the discrepancy between the numbers in MOF expense in PA 2015-16 and OEFC Financials in 2015-16 due to timing issues. $3M adjustment rectifies this discrepancy

3. Brampton was excluded from the Ministry of Finance's ESDI allocation.

## Ontario Power Generation

### OPG Income - Budget 2018

$ Millions

| | Actual 2015-16 | Actual 2016-17 | Current Outlook 2017-18 | 2018-19 | 2019-20 | 2020-21 | 2021-22 |

**Colour Codes**

Formulas are in black text

Hard coded numbers are in blue text

References elsewhere are in purple

***Green bold text with or without highlights*** mean updates required

## Policies to follow when making updates to the Outlook

*** To quickly jump to the source numbers for a link, press "**Ctrl + [**"

All new numbers must be fully sourced, and follow the colour codes above

Most numbers and text are Arial Size 10, unless it is a title

Add back up materials in a folder with the same numbers as in the 'Track Changes' tab.

If there is a reason for italics, or other colours, or formatting make sure it is clear. Other

Use indents to make things more clear to read

If numbers are taken from another tab they should ONLY be direct links, no calculation,

Electricity Summary - (Budget17/On Deck) - Reflects Public Accounts/Financial Stateme

OEFC - (Budget17/On Deck) - Reflects OEFC Annual Reports

*Due to slight discrepancies between Public Accounts reporting and OEFC Annual Repo

## Outlook Updates Frequency

| Frequency | Description | Tab |
|---|---|---|
| Monthly | OPG Net Income in-year forecast | OPG |
| Monthly | OPG PILs in-year forecast | OPG |
| Quarterly | ONFA Consolidation Adjustment | ONFA |
| Quarterly | OPG Cash vs Accrual Variance Account | Revenue (Risks) |

wise expect it to be cleared

adjustment should be done. Even if its just making a negative to a positive. Perform all the calculations on the sour

ents

orts, the numbers may not be identical

ce tab then bring the number into the next tab. (Eg. Formulas like this become hard to troubleshoot ='Hydro One'!AI

R29+'Hydro One'!AR31+'Hydro One'!AR32 ), let's avoid them.

**Subject:** OPG Business Plan BN - Review and Input Needed

John,

Attached is the note for the OPG Business Plan item going to TB/MBC same time as OFHP May 9, 2017. Please review and provide comments, and clarification regarding what's in the OPG #s in the 2017 Budget numbers (There are references in the note and the tables on the last two pages need updating to be complete).

Sec Briefing is tomorrow afternoon, would it be possible to get the updated tables in the morning tomorrow? Fair Hydro Plan is also scheduled, but not sure if it or both will be bumped to a separate briefing cycle in advance of May 9, 2017.

Laurie (for Judy) – I've included a description of the international travel aspect (around slide 11, deck in the attached email) and a placeholder for a minute (Judy was aware of the item).

James

# TREASURY BOARD / MANAGEMENT BOARD OF CABINET
# REQUEST ASSESSMENT NOTE

| | |
|---|---|
| **Ministry:** | Energy |
| **Meeting Date:** | May 9, 2017 |
| **Agenda Class:** | Discussion (In Camera) |
| **Last reviewed by:** TB/MBC March 24, 2015 | **Tracking to: Fast Track** Cabinet (May 10, 2017) |

| **SUBMISSION TITLE:** | 2017-2019 Business Plan for Ontario Power Generation |
|---|---|

**Prepared based on draft submission**

## I. DECISION BEFORE THE BOARD

- Receive Ontario Power Generation's (OPG) 2017-2019 Business Plan

## II. RECOMMENDATIONS:

| | |
|---|---|
| • Receive the 2016-2018 business plan for Ontario Power Generation | *Receive* |
| • Note Minister of Energy will provide concurrence with OPG's Business Plan | *Note* |
| • Approval giving special status to OPG under Section 5.3 of the MBC Travel, Meal and Hospitality Expenses Directive, giving it the authority to approve international travel for its employees. | *tbd* |

## III. FINANCIAL SUMMARY

| **$ Millions** | **2014-15** | **2015-16** | **2016-17** |

| Offset Recommended (Specify Ministry/Program) | 0.0 | 0.0 | 0.0 |
| Total Fiscal Impact | 0.0 | 0.0 | 0.0 |

## IV. KEY COMMENTS AND CONSIDERATIONS

As stipulated as part of the 2013-14 Results-based Planning process, the Ministry of Energy is submitting OPG's annual business plans for review by Treasury Board to facilitate incorporating implications into the Province's fiscal plan.

It is under the responsibility of the Minister of Energy on whether or not to provide the Minister's concurrence of OPG's annual multi-year business plan. The Treasury Board submission provides the Minister of Energy with an opportunity to highlight why concurrence is being given and any conditions placed on it. Appendix C provides more information on the concurrence process and the 2013-14 minute.

Under the memorandum of agreement (MOA, July 2015) between the Province (as sole shareholder and the Ministry of Energy as representative of the shareholder) and OPG, the company is required to annually submit its board-approved multi-year business plan to the Minister of Energy for concurrence. The concurrence letter from the Minister to the company will note key elements of the business plan,

how these elements relate to the policy direction and priorities of the Province, and the government's expectation for the performance of the company including indicating any elements of the business plan the government does not concur.

In November 2016, OPG submitted its 2017-2019 Business Plan (Board-approved?) to the Ministry.

Ontario's Fair Hydro Plan (OFHP) is not reflected in OPG's latest Business Plan. The Ministry notes the following OFHP implications for OPG:

- As part of supporting the financing and administration of the global adjustment smoothing mechanism, OPG would purchase the right to future cash flows from IESO, financed by capital infusions from the Province (Equity injection via an operating asset, raised from higher debt, with additional shares to the Province as sole shareholder), and by third-party lending (check with OFA – currently 256.3M common shares increasing to….needed? Perhaps explain why there are shares given province is sole shareholder, linked to value of OPG assets/equity)
  - These changes are expected to be fiscally neutral as they would result in an increase in Provincial interest on debt, offset by increases in OPG net income
  - In addition, the Province's net debt position should remain unchanged (Check is OFA)

Financial figures from the OPG Business Plan are included and supplemented with forecast changes for the Ontario Financing Authriy, MOF for OFHP implications as part of Province's finalized fiscal plan for the 2017 Budget. The Ministry of Energy indicates it is generally supportive of the fiscal, financial and operational strategies laid out in the business plan.

The earnings before tax (net income and income tax payments in lieu – PILs) of OPG are consolidated on the Province's financial statements and have one-for-one impact on the Province's surplus/deficit position, excluding adjustments that the Province may make upon consolidation of OPG's financials (e.g., unrealized gains or losses). OPG is expected to submit its next multi-year business plan later this year for the period starting January 1, 2017.

***Overview of Current Business Plan***

OPG's 2017-19 Business Plan details key company undertakings such as business transformation and nuclear refurbishment that will have a substantial electricity system benefit, ratepayer and shareholder impacts. These items were flagged in the previous year's multi-year business plan as well.

- Key Income Statement Forecasts:
  - The figures in the OPG Board approved 2017-2019 Business Plan, along with OFA forecast updates for OFHP (TBC), show a decrease in earnings before tax of $84M in 2017-18 and $89M in 2017-18, followed by increases of $59M in 2018-19 and $120M in 2019-20 over the estimates in the 2016 Budget..

    OPG is forecasting net income attributable to the Shareholder to reach $1B in 2021, from $436M in 2016. Net income in 2017 is forecast to increase as a result of new regulated rates, a gain on sale of OPG's head office, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations

    Net income in 2018 and 2019 is planned to increase, primarily due to higher production, and earnings from oncoming stations including Nanticoke solar in 2019. Return-on-equity (ROE) is estimated to increase from 4.2% in 2016 to 7.3% by 2021.

    In early January 2017, subsequent to the OPG Board's approval of the 2017-2019 Business Plan, OPG reached an agreement with KingSett Canadian Real Estate Income Fund LP for the purchase of OPG's head office property. The net gain is estimated to be

$285M and will be distributed to the Trillium Trust.

These estimates are highly dependent on electricity and financial market conditions, regulatory decisions by the Ontario Energy Board (OEB), potential changes to accounting standards or the basis of consolidation in Public Accounts, operational performance, and/or government policy, which can change materially. The first table in Appendix G shows the changes to Province's fiscal plan.

- Annual Operations, Maintenance & Administration (OM&A) expenses from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year.
- The cost of OPG generated electricity to customers is projected to remain ~40% below the average non-OPG cost of electricity to 2018, and over ~30% by 2021. Note: OPG provides predominantly, lower-cost baseload generating capability, rather than more expensive peaking generating capability.
- Headcount Efficiencies – Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3.

  OPG continues ramping up recruitment in 2017 to fill key vacancies in certain areas (particularly in the nuclear business unit) due to high levels of attrition, as well as continued Pickering operations beyond 2020. OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower than 2017 levels in 2021.

  OPG has hired ~95 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015. OPG intends to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations.

- Key Projects:
  - The plan assumes ongoing operations at Pickering for about four years beyond 2020, and as approved by Cabinet, the execution of the Darlington refurbishment consistent with approved budget of $12.8 billion (including escalation and interest), is now under way. First unit refurbishment began in October 2016, Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, assuming necessary concurrence from the Province is obtained.
  - Sustaining capital expenditures average $570M per year include nuclear expenditures unrelated to Darlington refurbishment and costs for continued operation of Pickering (e.g., Upgrades at Sir Adam Beck and upgrades to DeCewII, and investments in current and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility).
- Rate Application to the OEB:
  - OPG's 2017-19 Business Plan is dependent on the outcome of its rate filing with the OEB for the five-year period from 2017-2021. Oral hearings began February 2017, decision expected in Q3 2017.
    - OPG 2017-2019 BP assumes new rates effective January 1, 2017. The OEB setting a later effective date would negatively impact OPG's 2017-18 fiscal year net income by ~$50-60M per month of delay.
  - On March 2, 2017 the Province filed an amendment to O.Reg.53/05, which enables OPG to smooth its rates based on OPG's total bill impact, rather than on the basis of nuclear

rates only.

- On March 8, 2017 OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year

- OPG Request – Special Stats for OPG to Approve International Travel (Appendix F provides more information):
  - OPG has placed a request with the Ministry for authority to approve international travel for its employees. OPG has asked that this application be included with its BP submission to TB/MBC.
    - Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business.
    - OPG cites the importance of enabling its engagement with the international community (in particular in regards to nuclear safety), procurement activities, and investment and due diligence processes for its pension fund and nuclear funds.
    - OPG requires a high level of international business travel at approximately 90-100 trips annually, while Darlington accounts for 45% and is expected see increases.
    - OPG indicated that the approval process, which took 23 days on average in 2016, delays flight bookings which results in higher costs as airlines raise fares closer to the travel date.

*Other Key Fiscal Risks:*

Regulatory risks: Potential disallowance of recovery of OPG's current or future deferral and variance account balances (including for the proposed nuclear rate smoothing), future treatment of pension costs.

Accounting risks: Any change in the basis of accounting used for consolidation of OPG on the Province's financial statements could result in potentially significant fiscal impacts.

Financing Costs: Higher cost public capital market borrowing (vs the Province's borrowing cost for OEFC to lend to OPG) would have a negative fiscal impact.

## APPENDIX A: PROPOSED MINUTE (UNDER DEVELOPMENT)

Note receipt of a Business Plan for Ontario Power Generation.

In this regard,

i.) Note the Minister of Energy will provide Ontario Power Generation (OPG) with a concurrence letter for its Business Plan.

ii.) …..request for special status…international travel

iii.) Direct the Ministry, in consultation with the Ministry of Finance / Ontario Financing Authority, to report back to the Board in early January each year with the approved or latest draft business plans for Ontario Power Generation for fiscal planning purposes.

## APPENDIX C: CONCURRENCE OVERVIEW

Under agreements between the Province (as sole shareholder) and OPG, the company is required to annually submit its multi-year business plan to the Minister of Energy for concurrence. Review of the business plan by Treasury Board prior to concurrence was stipulated as part of the 2013-14 Results-based Planning process (see below).

Concurrence is typically provided to OPG via a letter from the Minister of Energy. The letter will note key elements of the business plan, how these elements relate to the policy direction and priorities of the Province, and the government's expectation for the performance of the company. The letter may also indicate any elements of the business plan of which the government does not concur and/or provide additional guidance on expectations going forward.

The current submission looks at the multi-year business plan for OPG covering 2016-2018. Concurrence with the plan is still pending.

Below is the 2013-14 Results-based Plan Minute:

Directed the Ministry of Energy and its agencies, Ontario Power Generation Inc. and Hydro One Inc., in consultation with the Ontario Financing Authority, to report back:

- Annually each autumn with the respective multi-year business plans of the agencies as approved by the Boards of the companies, for review by Treasury Board/Management Board of Cabinet.
  - In this regard, the report should include the following, on a calendar and government fiscal year basis:
  - Multi-year financial and operational targets, including net income and earnings-before-tax.
  - Projected revenues and cash flows to the Province, including the Ontario Electricity Financial Corporation.
  - Planned financings from the Ontario Electricity Financial Corporation.
- Quarterly with financial projection updates and progress reports on the agencies' respective business plan targets and any other new developments, initiatives or risks that may have a material fiscal impact on the Province including variance analysis of last quarter and year-to-date against the annual business plan reviewed by Treasury Board/Management Board of Cabinet.

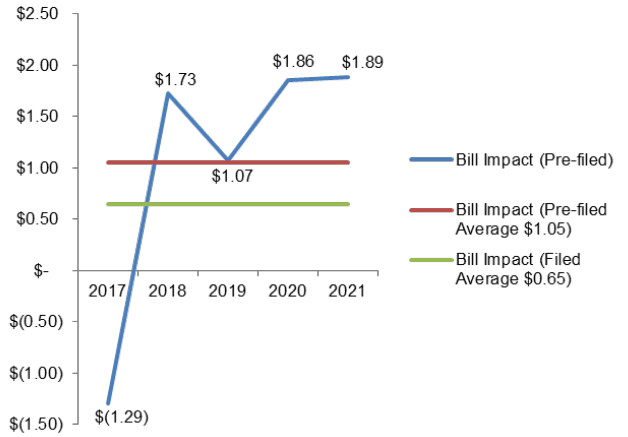
## APPENDIX D: SUMMARY OF KEY HIGHLIGHTS FROM OPG BUSINESS PLAN

The Ministry indicates OPG financial and ratepayer forecasts show some changes from last year's business plan projections, as reviewed by Treasury Board in September 2016.

This is in part because 2017 net income is forecast to increase as a result of new regulated rates, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations.

Also, actions taken by the Province and OPG in early 2017 to enable OPG to smooth its rates based on OPG's weighted average hydroelectric and nuclear all-in rates (which approximates total bill impact), rather than on the basis of nuclear base rates only. OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average year-over-year annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year.

**Comparison of Annual Bill Impact ($/Month per year)**



*Production and Total Cost of Generation*

OPG's production is expected to fall to 69.8 TWh by 2021 from 77.6 TWh in 2016. This reflects a declining trend in the Darlington production due to refurbishment outages starting in October 2016 and overlaps between unit refurbishments, as well as, the Pickering Vacuum Building Outage (VBO) in 2021 requiring the shutdown of all units for the duration of the outage.

Total generating cost shows an increasing trend over the planning period relative to 2016, reflecting Lower nuclear production due to Darlington refurbishment outages, increased sustaining capital spending on two large hydroelectric projects (The Lower Mattagami dam safety upgrade and the Sir Adam Beck I GS power canal liner rehabilitation).

*Operations, Maintenance and Administration (OM&A) Expenses*

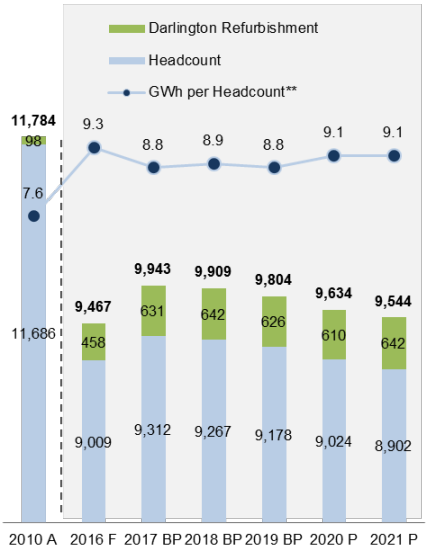
Annual OM&A expenses (excluding Darlington refurbishment OM&A) from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year. Increases related to changes in nuclear outage scope at Darlington and planned hiring to fill staffing gaps, and enabling Pickering continued operations, offset by declining pension related costs, due to projected pension asset returns, increases employee contributions, and new method for dermining interest components of pension costs.

*Business Transformation and Labour Costs*

As part of a company-wide business transformation, OPG saved over $1B in costs from January 2011 to December 2016:

- Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3.
- OPG continues recruitment in 2017 to fill key vacancies in certain areas (particularly in the Nuclear business unit) due to high levels of attrition, as well as continued Pickering operations beyond 2020
  - OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower than 2017 levels in 2021
  - To date in 2017, OPG has hired ~95 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015
    - Intention is to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations, per the terms of the collective agreement

**Ongoing Operations Regular Headcount and Productivity**



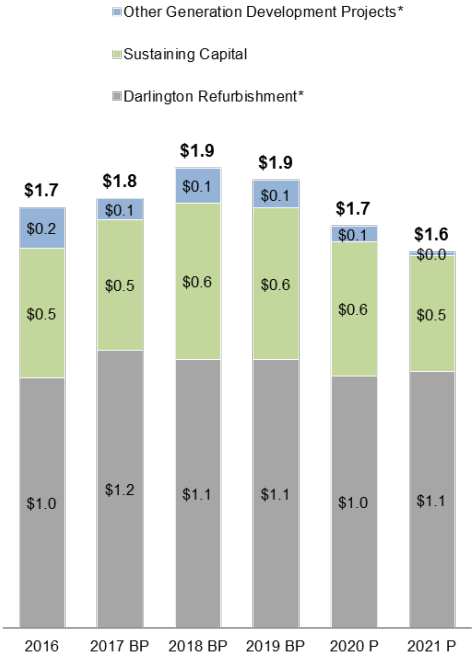
**Production is normalized by adding back hydroelectric surplus baseload generation losses and, in 2017- 2021, the lower production due to the Darlington refurbishment outages

*Projects and Capital Expenditures*

OPG continues delivery of major projects over the plan period, including:

- Darlington Refurbishment – Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, requiring concurrence from the Province prior to commencement
- Sustaining Capital – Expenditures average $570M, including:
  - Nuclear expenditures unrelated to refurbishment at Darlington and costs for continued operation of Pickering
  - Regulated hydro expenditures including upgrades at Sir Adam Beck and upgrades to DeCew ll
  - Lower Mattagami upgrades in 2018 and 2019
- Other Generation Development Projects – Investments in current (e.g., hydroelectric) and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility by 2019

**Capital Expenditure Estimates ($B)**



*Includes expenditures budgeted by Support Services

*Sales*

The following table summarizes sales recently completed and currently underway (as of April 2017). The fiscal plan implications of the completed OPG Head Office sale is reflected in the 2017 Budget. (TBC).

| | OPG Head Office | R.L. Hearn Site | Lakeview Site |
|---|---|---|---|
| **Current Status** | Completed | Agreement Reached | OPG and Infrastructure Ontario are preparing for marketing |
| **Site Description** | 700 University Ave. and parking garage at 40 Murray St. in Toronto | ~33 acres at the R.L. Hearn site in Toronto | ~67 acres to be transferred by the purchaser to the City of Mississauga (Municipal Park Lands) and ~110 acres to be developed for mixed uses (Uplands) |
| **Buyer** | KingSett Canadian Real Estate Income Fund LP | Studios of America Limited Partner | TBD |
| **Value** | Estimated up-front 2017-18 fiscal impact of ~$375M (includes after-tax gain as well as PILs to OEFC) | TBD | TBD |
| **Other Considerations** | N/A | N/A | Negotiations with the City have been lengthy and costs to remediate/prepare site may be significant due to concerns regarding site condition |
| **Timing** | The sale closed in April 2017 | Anticipated to close in Q3 2017 | Marketing is planned to start in April 2017, pending negotiations with the City, with an anticipated closing in 2017 |

## APPENDIX E: PROVINCIAL FISCAL PLAN IMPLICATIONS OF BUSINESS PLANS PROCEEDING – (UNDER DEVELOPMENT)

Ontario Power Generation is a Government Business Enterprises (GBE), and consolidated to the Province's financials on a modified equity basis. The Province's Fiscal Plan reflects the entity as Income from Business Enterprises and Electricity Payments-in-Lieu of Taxes (PILs) (As Revenue only).

| **Revenue** ($millions) | **2016-17** | **2017-18** | **2018-19** | **2019-20** |
|---|---|---|---|---|
| **2016 Ontario Budget** | | | | |
| Ontario Power Generation | | | | |
| Net Income | 471 | 586 | 673 | 705 |
| Income Tax | 224 | 159 | 182 | 108 |
| **2017-2019 OPG Business Plan** | | | | |

| Ontario Power Generation | (84) | (89) | 59 | 120 |
| **Change in GBE Income Tax PILs +/(-)** | | | | |
| Ontario Power Generation | ? | ? | ? | ? |
| **TOTAL OF OPG CHANGES** | ? | ? | ? | ? |

OPG's fiscal results are also impacted by Other PILs to the Ontario Electricity Financial Corporation (OEFC) and the Province. The following table reflects these others impacts in addition to the latest net income and income tax PILs from OPG's August update.

Table below to be updated – OFA

| **Revenue** ($millions) | **2016-17** | **2017-18** | **2018-19** | **2019-20** |
|---|---|---|---|---|
| **2016 Ontario Budget** | | | | |
| Combined Other PILs & Other GRC | 342 | 351 | 359 | |
| Other PILs (GRC to OEFC, Proxy Property Tax) | 213 | 223 | 232 | |
| Other GRC (to MOF & Niagara Parks Commission)[1] | 129 | 128 | 137 | |
| **2016-18 OPG Business Plan** | | | | |
| Combined Other PILs & Other GRC[2] | 353 | 358 | 366 | |
| Other PILs (GRC to OEFC, Proxy Property Tax)[3] | 215 | 220 | 220 | |
| Other PILs (GRC to MOF & Niagara Parks Commission)[3] | 135 | 140 | 140 | |
| **OPG Monthly Update (August 2016)** | | | | |
| Net Income | 361 | - | - | |
| Income Tax PILs to OEFC | 98 | - | - | |

1. The GRC to MOF & Niagara Parks Commission (NPC) is provided to enable comparison to the 2016-18 Business Plan.
2. Include GRC to OEFC, GRC to MOF and NPC and Proxy Property Tax, provided to TBS by Energy on September 14, 2016.
3. Preliminary 2016-19 Business Plan forecast provided by Energy, January 29, 2016. (Do not add to the Combined Other PILs & Other GRC row, likely due to rounding.)

---

Hi James,

Attached is a copy of the signed submission for the OPG Business Plan.

We'll walk the original over to the Agenda Office this afternoon.

Thanks,

Pratima Gounden, Team Lead (A)

# MINISTRY OF ENERGY

---

# TREASURY BOARD / MANAGEMENT BOARD of CABINET SUBMISSION

# ONTARIO POWER GENERATION (OPG) 2017-19 BUSINESS PLAN AND SPECIAL STATUS APPLICATION

**May 2017**

**CONFIDENTIAL**

**MINISTRY OF ENERGY**

**ONTARIO POWER GENERATION (OPG)**
**2017-19 BUSINESS PLAN AND SPECIAL STATUS APPLICATION**

## MINISTRY REQUEST

The Ministry of ENERGY is requesting that Treasury Board/Management Board of Cabinet (TB/MBC):

1. NOTE the receipt of OPG's 2017-2019 Business Plan.
2. NOTE that the Minister of Energy will provide concurrence with OPG's Business Plan.
3. APPROVE OPG's application for Special Status to Approve International Travel under Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive dated January 1, 2017.

## CONTEXT

- As required by the Memorandum of Agreement (MOA) between Ontario Power Generation and the Minister of Energy, OPG provided its Business Plan for 2017-2019 to the Ministry of Energy on November 29, 2016 for concurrence
    - Note that while OPG is seeking concurrence for its three year 2017-19 business plan, the plan also includes financial projections for 2020 and 2021
- With this Business Plan OPG is also making an application for Special Status under the Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive, which allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business
- The Minister's concurrence requires presentation of OPG's business plan before TB/MBC
- The Ministry of Energy review and analysis of OPG's business plan is supported by the Electricity Investment and Governance Secretariat, a unit within the Ministry of Finance and the Corporate and Electricity Finance Division of the Ontario Financing Authority (OFA)
- The following provides an overview of OPG's business plan, including:
    1. Business Plan Overview
    2. Other Considerations
- Proceeding with Provincial concurrence now will demonstrate that OPG has support from its shareholder as it implements the plan and provides clarity to

the Ontario Energy Board (OEB) as it reviews OPG's current rate application covering the 2017-2021 period

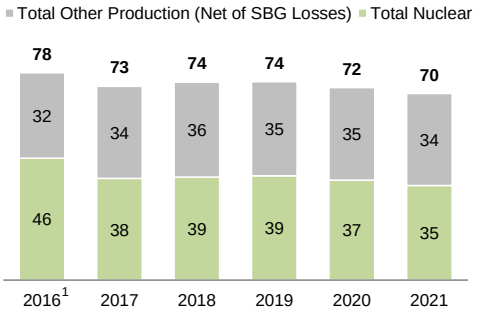
- Business plan forecasts may be affected by Ontario's Fair Hydro Plan (OFHP). Given the stage of implementation of OFHP and the timing of the receipt of the business plan in November 2016, these changes are not reflected in OPG's plan
    - The Ministry anticipates that as part of supporting the financing and administration of the global adjustment smoothing mechanism, OPG would purchase the right to future cash flows from IESO, financed partly by capital infusions from the Province, and majority by third-party lending
    - These changes are generally expected to be fiscally neutral as they would result in an increase in Provincial interest on debt, offset by increases in OPG net income
    - In addition, the Province's net debt position would remain unchanged

## 1. BUSINESS PLAN OVERVIEW

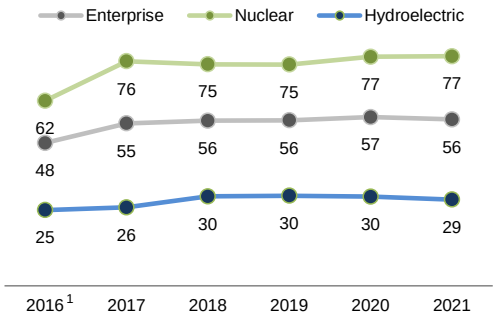
### a) Production & Total Cost of Generation

- OPG's production is expected to fall to 69.8 TWh by 2021 from 77.6 TWh in 2016
    - Reflects a declining trend in the Darlington production due to refurbishment outages starting in October 2016
    - Includes a partial overlap starting in 2021 between second and third unit refurbishments, and
    - Includes the Pickering Vacuum Building Outage (VBO) in 2021 requiring the shutdown of all units for the duration of the outage
- While OM&A remains relatively stable over the planning period (see next slide), total generating cost (TGC)* shows an increasing trend over the planning period relative to 2016, reflecting:
    - Lower nuclear production due to Darlington refurbishment outages, and
    - Increased sustaining capital spending (included in TGC) on two large hydroelectric projects, the Lower Mattagami dam safety upgrade and the Sir Adam Beck I GS power canal liner rehabilitation

**Production (TWh)**



**Total Generating Cost ($/MWh)**



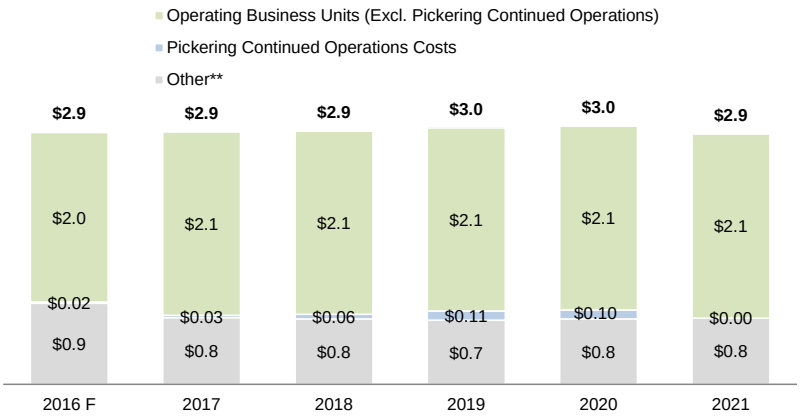
1. Actuals

*TGC = operations, maintenance and administration (OM&A) expenses from ongoing operations + fuel and Gross Revenue Charge expenses for OPG-operated stations + sustaining capital expenditures) divided by OPG generation adjusted for surplus baseload generation losses

## b) Operations, Maintenance and Administration (OM&A) Expenses

- Annual OM&A expenses from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year
- Increases over 2016 are mainly attributable to:
    - Increases in business unit expenditures, including changes in nuclear outage scope at Darlington, and planned hiring to fill staffing gaps
    - Incremental outage and other program costs to enable Pickering continued operations
- These increases are partially offset by declining pension and Other Post-Employment Benefits (OPEB) costs over the period due to projected pension asset returns, increased employee contributions, and adoption of a new method for applying discount rates to determine interest components of pension costs

**OM&A from Ongoing Operations* ($B)**



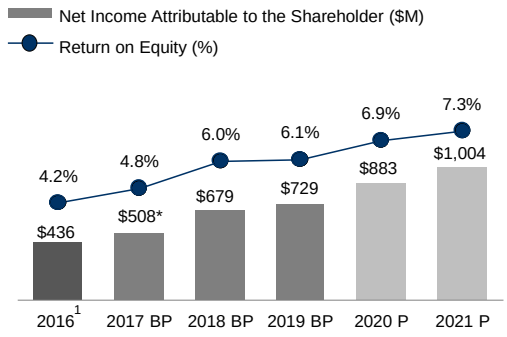
*Excludes Darlington refurbishment OM&A expenses and all OEB variance and deferral account offsets

** Includes centrally held pension /OPEB costs and support services

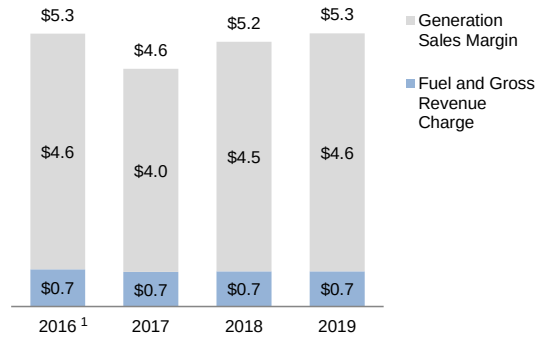
## c) Financials

- OPG is forecasting net income attributable to the Shareholder to reach $1B in 2021, from $436M in 2016
    - 2017 net income is forecast to increase as a result of new regulated rates, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations
    - Net income in 2018 and 2019 is planned to increase, primarily due to higher forecast production, and earnings from Peter Sutherland Sr. GS starting in 2017 and Nanticoke solar facility starting in 2019
- As a result, return-on-equity (ROE) is estimated to increase from 4.2% in 2016 to 7.3% by 2021
- Overall, the 2017-19 Business Plan is largely unchanged relative to last year's plan in terms of commitments for Net Income, and Total Shareholder Return
- In early January 2017, subsequent to the OPG Board's approval of the 2017-2019 Business Plan, OPG reached an agreement with KingSett Canadian Real Estate Income Fund LP for the purchase of OPG's head office property. The net gain is estimated to be $285M and will be distributed to the Trillium Trust.

**Net Income ($M) and ROE (%)**



**Revenue Margin ($B)**



1. Actuals

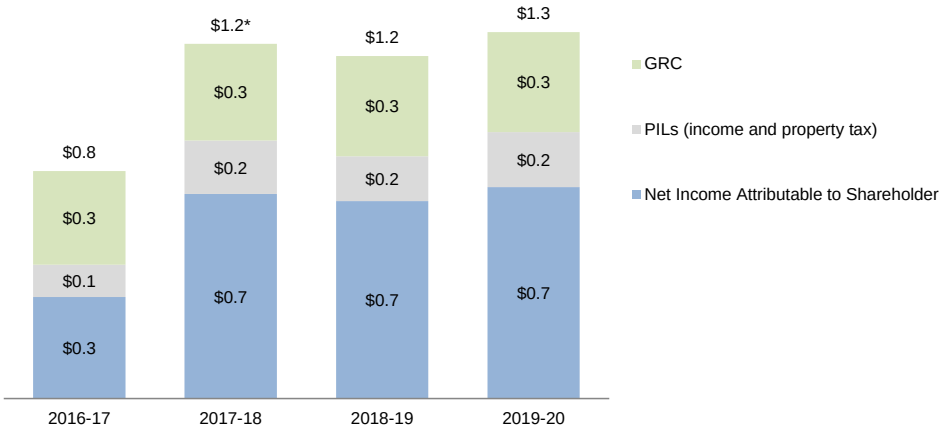
*Includes extraordinary gain associated with the sale of OPG head office

## d) Provincial Fiscal Impacts: Shareholder Return and Payments-in-Lieu of Taxes

- Total fiscal revenue impacts to the Province, including net income return to the shareholder and payments-in-lieu of taxes, averages ~$1B over the period
    - Provincial revenues from OPG are dedicated to servicing and paying down stranded debt and the investment cost of the Province acquiring the equity in OPG[1]

- Return to the shareholder improves due to changes in net income, which OPG attributes to:
    - Assumed OEB rate outcomes
    - Completion of the first Darlington unit refurbishment
    - Further cost efficiencies
- Net income is consolidated by the Province as Revenue from Government Business Enterprises (GBEs)
- Income tax PILs, Gross Revenue Charges (GRC) and property tax PILs paid to the Ontario Electricity Financial Corporation (OEFC) to help service and pay down stranded debt are consolidated in Public Accounts under Taxation Revenue
- OPG also pays a portion of the GRC to the Province's Consolidated Revenue Fund (CRF)

**Total Fiscal Revenues ($B)**



1. Aside from the water power rental portion of the GRC, paid to the CRF.

*Includes gain associated with the sale of OPG head office

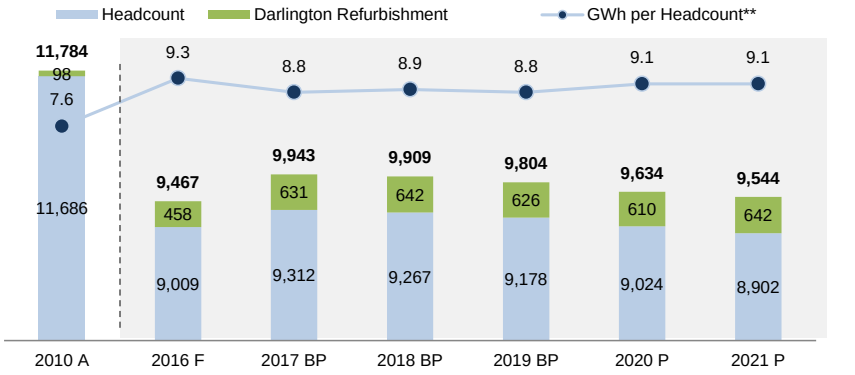
## e) Business Transformation Initiative & Labour Costs

- As part of a company-wide business transformation, OPG saved over $1B in costs from January 2011 to December 2016
    - Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3
- However, OPG is ramping up recruitment between 2016 and 2017 to fill key vacancies in certain areas (particularly in the Nuclear business unit) due to high levels of attrition from employee demographics, as well as continued Pickering operations beyond 2020

- OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower than 2017 levels in 2021

- In addition, to date OPG has hired ~95 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015
  - Intention is to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations, per the terms of the collective agreement

**Ongoing Operations Regular Headcount and Productivity**

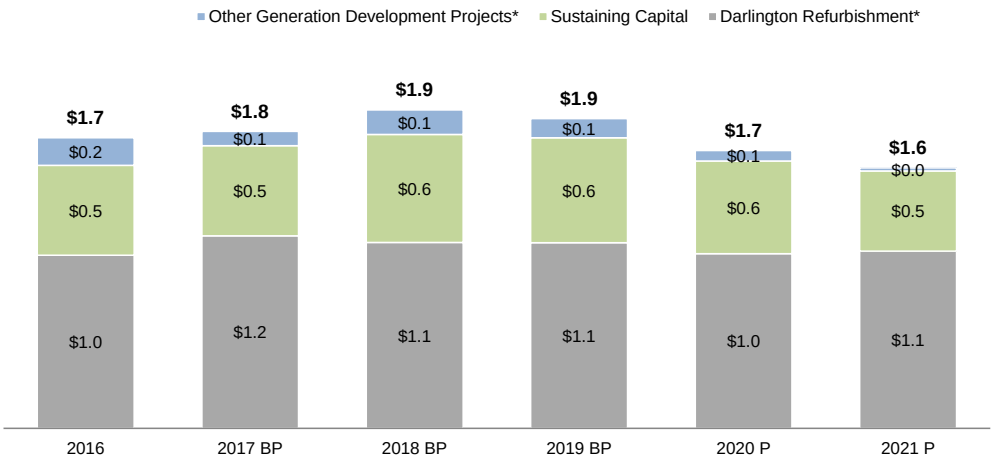


**Production is normalized by adding back hydroelectric surplus baseload generation losses and, in 2017- 2021, the lower production due to the Darlington refurbishment outages

### f) Operating Highlights - Projects and Capital Expenditures

- OPG continues to focus on delivery of its major projects over the plan period, including:
  - **Darlington Refurbishment**: Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, assuming necessary concurrence from the Province is obtained
  - **Sustaining Capital:** Expenditures average $570M, including:
    - Nuclear expenditures unrelated to refurbishment at Darlington and costs for continued operation of Pickering
    - Regulated hydro expenditures including upgrades at Sir Adam Beck and upgrades to DeCew ll
    - Lower Mattagami upgrades in 2018 and 2019
  - **Other Generation Development Projects:** Investments in current (e.g., hydroelectric) and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility by 2019

**Capital Expenditure Estimates ($B)**



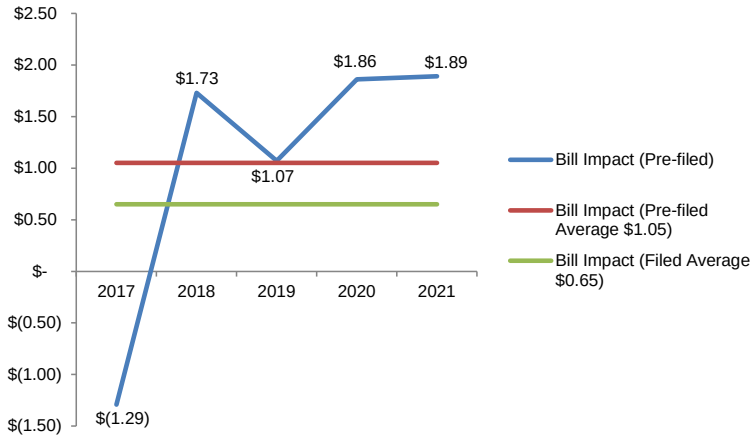
*Includes expenditures budgeted by Support Services

## 2. OTHER CONSIDERATIONS

### Rate Application

- OPG's 2017-19 Business Plan is dependent on the outcome of its rate filing with the OEB for the five-year period from 2017-2021
- Oral hearings began February 21, 2017 with a decision expected in Q4 2017
- OPG's 2017-19 Business Plan assumes new rates are effective January 1, 2017
    - The OEB setting a later effective date would negatively impact OPG's 2017-18 fiscal year net income by ~$50-60M per month of delay*
- Rate-Smoothing Proposal:
    - On March 2, 2017 the Province filed an amendment to O.Reg.53/05, which enables OPG to smooth its rates based on OPG's weighted average hydroelectric and nuclear all-in rates (which approximates total bill impact), rather than on the basis of nuclear base rates only
        - Rate smoothing is expected to be fiscally neutral due to rate regulated accounting
    - On March 8, 2017 OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average year-over-year annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year

**Comparison of Annual Bill Impact ($/Month per year)**



*Forecasted in May 2016

## Sales

| | OPG Head Office | R.L. Hearn Site | Lakeview Site |
|---|---|---|---|
| **Current Status** | Completed | Agreement Reached | OPG and Infrastructure Ontario are preparing for marketing |
| **Site Description** | 700 University Ave. and parking garage at 40 Murray St. in Toronto | ~33 acres at the R.L. Hearn site in Toronto | ~67 acres to be transferred by the purchaser to the City of Mississauga (Municipal Park Lands) and ~110 acres to be developed for mixed uses (Uplands) |
| **Buyer** | KingSett Canadian Real Estate Income Fund LP | Studios of America Limited Partner | TBD |
| **Value** | Estimated up-front 2017-18 fiscal impact of ~$375M (includes after-tax gain as well as PILs to OEFC) | TBD | TBD |
| **Other Considerations** | N/A | N/A | Negotiations with the City have been lengthy and costs to remediate/prepare site may be significant due to concerns regarding site condition |
| **Timing** | The sale closed in April 2017 | Anticipated to close in Q3 2017 | Marketing is planned to start in April 2017, pending negotiations with the City, with an anticipated closing in 2017 |

## Special Status for OPG to Approve International Travel

- On January 24, 2017, OPG's President and CEO wrote to the Deputy Minister to provide a business case and request authority for OPG to approve international travel for its employees. In summary:
    - Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business

  - OPG believes that international travel is integral to the safe and prudent operation of its business and having OPG's CEO approve international travel will enable more efficient decision-making while significantly lowering travel costs
  - OPG cites the importance of enabling its engagement with the international community (in particular in regards to nuclear safety), procurement activities, and investment and due diligence processes for over $30 billion in pension fund and nuclear funds
  - OPG requires a high level of international business travel at approximately 90-100 trips annually, while the Darlington Refurbishment Project accounts for 45% of OPG's international travel and is expected see increases over the 10 year life of the project
  - OPG indicated that the approval process, which took 23 days on average in 2016, delays flight bookings which results in higher costs as airlines raise fares closer to the travel date
  - OPG believes the inability to make timely commitments on events and meetings impacts employee engagement as well as its international relationships and reputation
- OPG is seeking Special Status as part of concurrence with its business plan. OPG has committed to providing semi-annual reports to the Ministry on international travel taken, and continue to be accountable for compliance with all applicable OPS directives, policies and procedures

## RECOMMENDATION

The Ministry of ENERGY is requesting that Treasury Board/Management Board of Cabinet (TB/MBC):

1. NOTE the receipt of OPG's 2017-2019 Business Plan.
2. NOTE that the Minister of Energy will provide concurrence with OPG's Business Plan.
3. APPROVE OPG's application for Special Status to Approve International Travel under Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive dated January 1, 2017.

Ontario

MINISTRY OF
ENERGY

# Ontario Power Generation (OPG)
# 2017-19 Business Plan and
# Special Status Application

May 2017

# Context

- As required by the Memorandum of Agreement (MOA) between Ontario Power Generation and the Minister of Energy, OPG provided its Business Plan for 2017-2019 to the Ministry of Energy on November 29, 2016 for concurrence
  - Note that while OPG is seeking concurrence for its three year 2017-19 business plan, the plan also includes financial projections for 2020 and 2021
- With this Business Plan OPG is also making an application for Special Status under the Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive, which allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business
- The Minister's concurrence requires presentation of OPG's business plan before TB/MBC
- The Ministry of Energy review and analysis of OPG's business plan is supported by the Electricity Investment and Governance Secretariat, a unit within the Ministry of Finance and the Corporate and Electricity Finance Division of the Ontario Financing Authority (OFA)
- The following presentation provides an overview of OPG's business plan, including:
  1. Business Plan Overview
  2. Other Considerations

# Context *(cont'd)*

- Proceeding with Provincial concurrence now will demonstrate that OPG has support from its shareholder as it implements the plan and provides clarity to the Ontario Energy Board (OEB) as it reviews OPG's current rate application covering the 2017-2021 period

- Business plan forecasts may be affected by Ontario's Fair Hydro Plan (OFHP). Given the stage of implementation of OFHP and the timing of the receipt of the business plan in November 2016, these changes are not reflected in OPG's plan

  - The Ministry anticipates that as part of supporting the financing and administration of the global adjustment smoothing mechanism, OPG would purchase the right to future cash flows from IESO, financed partly by capital infusions from the Province, and majority by third-party lending

  - These changes are generally expected to be fiscally neutral as they would result in an increase in Provincial interest on debt, offset by increases in OPG net income

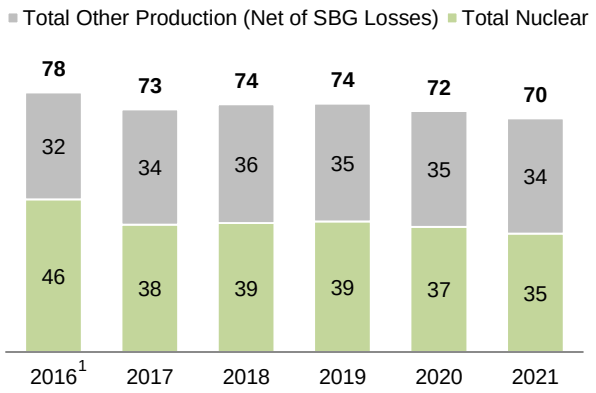
  - In addition, the Province's net debt position would remain unchanged

# 1. Business Plan Overview

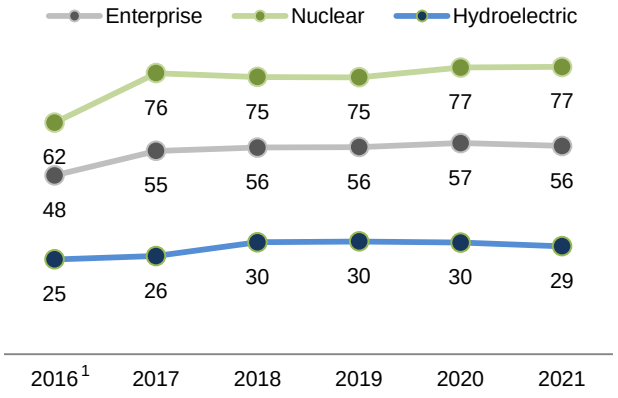
## *a) Production & Total Cost of Generation*

- OPG's production is expected to fall to 69.8 TWh by 2021 from 77.6 TWh in 2016
  - Reflects a declining trend in the Darlington production due to refurbishment outages starting in October 2016
  - Includes a partial overlap starting in 2021 between second and third unit refurbishments, and
  - Includes the Pickering Vacuum Building Outage (VBO) in 2021 requiring the shutdown of all units for the duration of the outage
- While Operations, Maintenance and Administration (OM&A) remains relatively stable over the planning period (see next slide), total generating cost (TGC)* shows an increasing trend over the planning period relative to 2016, reflecting:
  - Lower nuclear production due to Darlington refurbishment outages, and
  - Increased sustaining capital spending (included in TGC) on two large hydroelectric projects, the Lower Mattagami dam safety upgrade and the Sir Adam Beck I GS power canal liner rehabilitation

### Production (TWh)



### Total Generating Cost ($/MWh)



1. Actuals

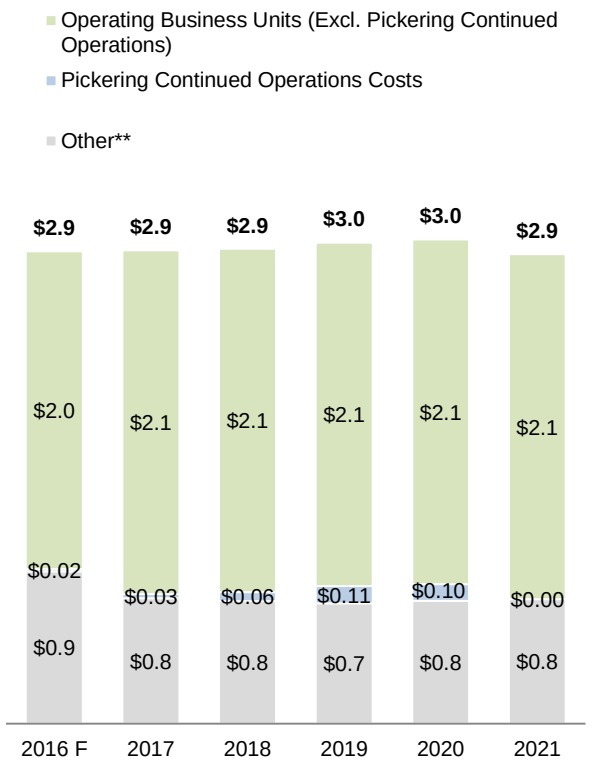
*TGC = OM&A expenses from ongoing operations + fuel and Gross Revenue Charge expenses for OPG-operated stations + sustaining capital expenditures) divided by OPG generation adjusted for surplus baseload generation losses

# 1. Business Plan Overview

## *b) Operations, Maintenance and Administration (OM&A) Expenses*

- Annual OM&A expenses from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year
- Increases over 2016 are mainly attributable to:
  - Increases in business unit expenditures, including changes in nuclear outage scope at Darlington, and planned hiring to fill staffing gaps
  - Incremental outage and other program costs to enable Pickering continued operations
- These increases are partially offset by declining pension and Other Post Employment Benefits (OPEB) costs over the period due to projected pension asset returns, increased employee contributions, and adoption of a new method for applying discount rates to determine interest components of pension costs

### OM&A from Ongoing Operations* ($B)



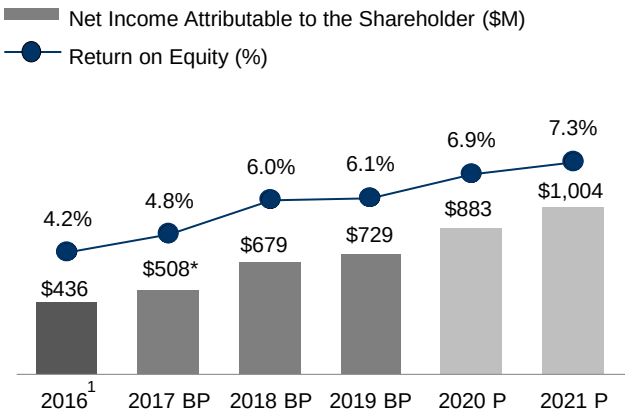
*Excludes Darlington refurbishment OM&A expenses and all OEB variance and deferral account offsets
** Includes centrally held pension /OPEB costs and support services

# 1. Business Plan Overview

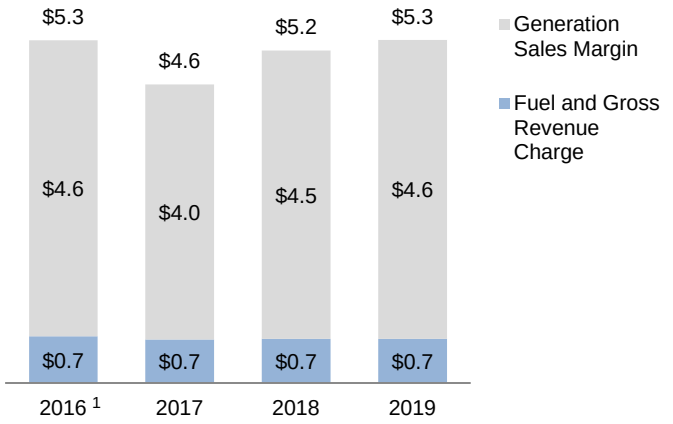
## *c) Financials*

- OPG is forecasting net income attributable to the Shareholder to reach $1B in 2021, from $436M in 2016
  - 2017 net income is forecast to increase as a result of new regulated rates, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations
  - Net income in 2018 and 2019 is planned to increase, primarily due to higher forecast production, and earnings from Peter Sutherland Sr. GS starting in 2017 and Nanticoke solar facility starting in 2019
- As a result, return-on-equity (ROE) is estimated to increase from 4.2% in 2016 to 7.3% by 2021
- Overall, the 2017-19 Business Plan is largely unchanged relative to last year's plan in terms of commitments for Net Income, and Total Shareholder Return
- In early January 2017, subsequent to the OPG Board's approval of the 2017-2019 Business Plan, OPG reached an agreement with KingSett Canadian Real Estate Income Fund LP for the purchase of OPG's head office property. The net gain is estimated to be $285M and will be distributed to the Trillium Trust

### Net Income ($M) and ROE (%)



### Revenue Margin ($B)



*Includes extraordinary gain associated with the sale of OPG head office

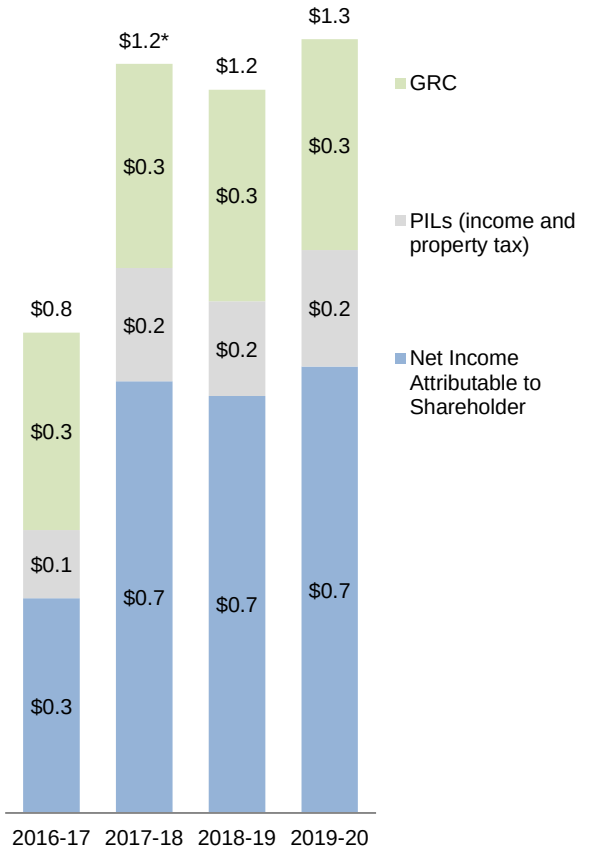
1. Actuals

# 1. Business Plan Overview

## *d) Provincial Fiscal Impacts: Shareholder Return and Payments-in-Lieu of Taxes*

- Total fiscal revenue impacts to the Province, including net income return to the shareholder and payments-in-lieu of taxes, averages ~$1B over the period
  - Provincial revenues from OPG are dedicated to servicing and paying down stranded debt and the investment cost of the Province acquiring the equity in OPG[1]
- Return to the shareholder improves due to changes in net income, which OPG attributes to:
  - Assumed OEB rate outcomes
  - Completion of the first Darlington unit refurbishment
  - Further cost efficiencies
- Net income is consolidated by the Province as Revenue from Government Business Enterprises (GBEs)
- Income tax PILs, Gross Revenue Charges (GRC) and property tax PILs paid to the Ontario Electricity Financial Corporation (OEFC) to help service and pay down stranded debt are consolidated in Public Accounts under Taxation Revenue
- OPG also pays a portion of the GRC to the Province's Consolidated Revenue Fund (CRF)

**Total Fiscal Revenues ($B)**



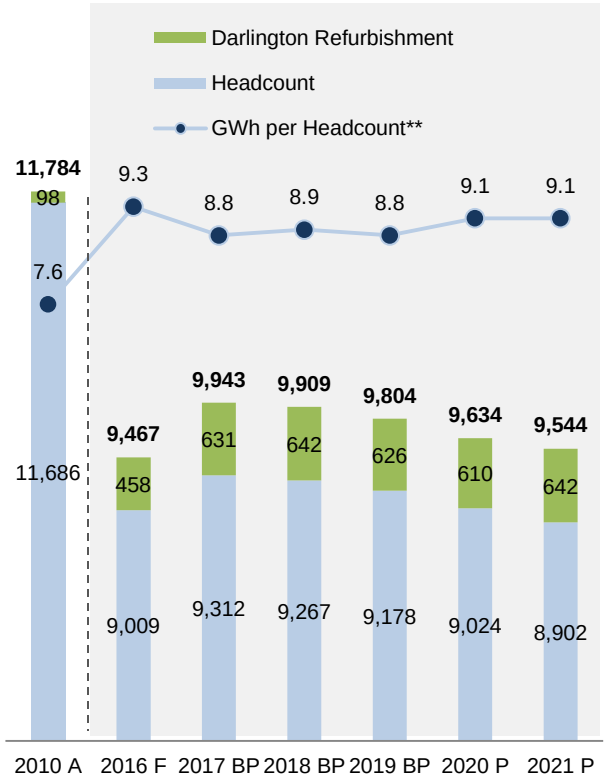
1. Aside from the water power rental portion of the GRC, paid to the CRF.
*Includes gain associated with the sale of OPG head office

# 1. Business Plan Overview

## *e) Business Transformation Initiative & Labour Costs*

- As part of a company-wide business transformation, OPG saved over $1B in costs from January 2011 to December 2016
  - Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3
- However, OPG is ramping up recruitment between 2016 and 2017 to fill key vacancies in certain areas (particularly in the Nuclear business unit) due to high levels of attrition from employee demographics, as well as continued Pickering operations beyond 2020
  - OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower than 2017 levels in 2021
- In addition, to date OPG has hired ~95 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015
  - Intention is to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations, per the terms of the collective agreement

**Ongoing Operations Regular Headcount and Productivity**



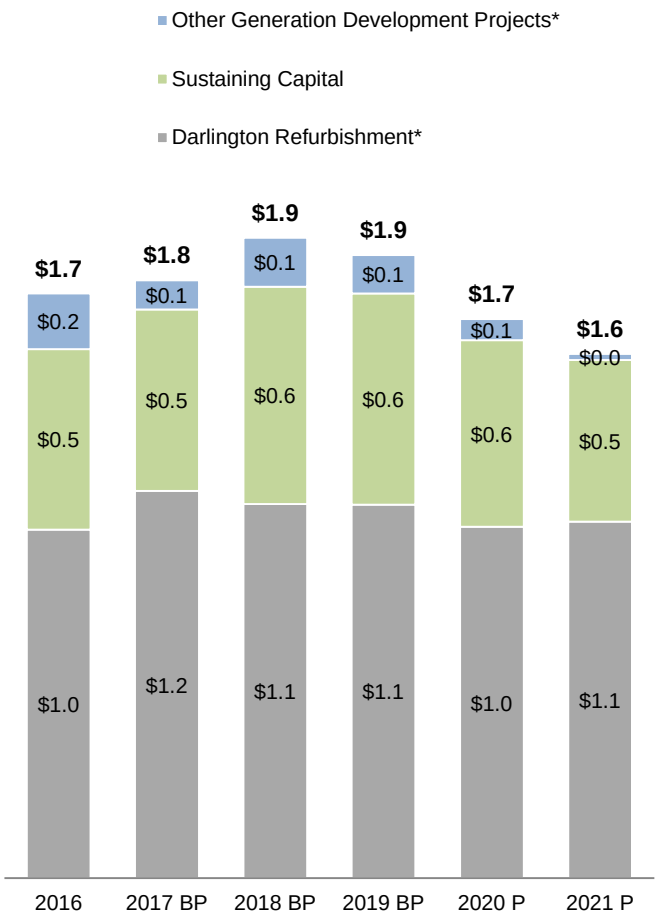
**Production is normalized by adding back hydroelectric surplus baseload generation losses and, in 2017- 2021, the lower production due to the Darlington refurbishment outages

# 1. Business Plan Overview

## *f) Operating Highlights - Projects and Capital Expenditures*

- OPG continues to focus on delivery of its major projects over the plan period, including:
  - **Darlington Refurbishment**: Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, assuming necessary concurrence from the Province is obtained
  - **Sustaining Capital:** Expenditures average $570M, including:
    - Nuclear expenditures unrelated to refurbishment at Darlington and costs for continued operation of Pickering
    - Regulated hydro expenditures including upgrades at Sir Adam Beck and upgrades to DeCew II
    - Lower Mattagami upgrades in 2018 and 2019
  - **Other Generation Development Projects:** Investments in current (e.g., hydroelectric) and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility by 2019

**Capital Expenditure Estimates ($B)**



*Includes expenditures budgeted by Support Services

# 2. Other Considerations

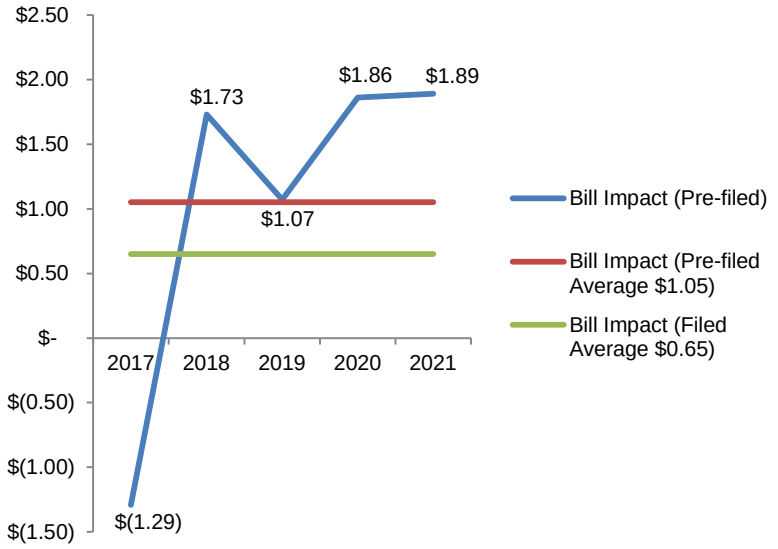
## *Rate Application*

- OPG's 2017-19 Business Plan is dependent on the outcome of its rate filing with the OEB for the five-year period from 2017-2021
- Oral hearings began February 21, 2017 with a decision expected in Q4 2017
- OPG's 2017-19 Business Plan assumes new rates are effective January 1, 2017
  - The OEB setting a later effective date would negatively impact OPG's 2017-18 fiscal year net income by ~$50-60M per month of delay*

**Rate-Smoothing Proposal:**

- On March 2, 2017 the Province filed an amendment to O.Reg.53/05, which enables OPG to smooth its rates based on OPG's weighted average hydroelectric and nuclear all-in rates (which approximates total bill impact), rather than on the basis of nuclear base rates only
  - Rate smoothing is expected to be fiscally neutral due to rate regulated accounting
- On March 8, 2017 OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average year-over-year annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year

**Comparison of Annual Bill Impact ($/Month per year)**



*Forecasted in May 2016

# 2. Other Considerations

# 2. Other Considerations

## *Special Status for OPG to Approve International Travel*

- On January 24, 2017, OPG's President and CEO wrote to the Deputy Minister to provide a business case and request authority for OPG to approve international travel for its employees. In summary:
  - Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business
  - OPG believes that international travel is integral to the safe and prudent operation of its business and having OPG's CEO approve international travel will enable more efficient decision-making while significantly lowering travel costs
  - OPG cites the importance of enabling its engagement with the international community (in particular in regards to nuclear safety), procurement activities, and investment and due diligence processes for over $30 billion in pension fund and nuclear funds
  - OPG requires a high level of international business travel at approximately 90-100 trips annually, while the Darlington Refurbishment Project accounts for 45% of OPG's international travel and is expected see increases over the 10 year life of the project
  - OPG indicated that the approval process, which took 23 days on average in 2016, delays flight bookings which results in higher costs as airlines raise fares closer to the travel date
  - OPG believes the inability to make timely commitments on events and meetings impacts employee engagement as well as its international relationships and reputation
- OPG is seeking Special Status as part of concurrence with its business plan. OPG has committed to providing semi-annual reports to the Ministry on international travel taken, and continue to be accountable for compliance with all applicable OPS directives, policies and procedures

**Subject:** OPG Business Plan

John,

Chair's - Thursday, May 4th 1:00-3:00pm. OPG and FHP towards at the beginning of the Agenda.

OPCD is reviewing the note (Attached). Sec was very brief today. Cindy V (OPCD) Indicated there's a few accounting aspects at play – I caught the IFRS consolidation risk and she referenced another in general terms, I'm guessing nuclear funds related? Please confirm if the first bullet under Key Income Statement Forecasts is correct.

I also noticed the financial table on page 12 repeats amounts appearing on page 11 (for example OPG IFRS consolidation, and Net Income (including OPG Head Office). The blurb at the top of page is talking about the following table being other OPG fiscal results. Perhaps the blurb at the top of page 12 can be updated to reflect what's in the table, and clarify what '2017 budget adjustments" are as adjustments to what?

Thanks in advance,

James

| **SUBMISSION TITLE:** | 2017-2019 Business Plan for Ontario Power Generation |
|---|---|

~~**Prepared based on draft submission**~~

Formatted: Left

Formatted: Font: 9 pt

## I. DECISION BEFORE THE BOARD

- Receive Ontario Power Generation's (OPG) 2017-2019 Business Plan

## II. RECOMMENDATIONS:

| | |
|---|---|
| • Receive the 2016-2018 business plan for Ontario Power Generation | *Receive* |
| • Note Minister of Energy will provide concurrence with OPG's Business Plan | *Note* |
| • Approval giving special status to OPG under Section 5.3 of the MBC Travel, Meal and Hospitality Expenses Directive, giving it the authority to approve international travel for its employees. | *tbd* |

## III. FINANCIAL SUMMARY

| **$ Millions** | **2014-15** | **2015-16** | **2016-17** |
|---|---|---|---|
| Initiative cost requested | 0.0 | 0.0 | 0.0 |
| Initiative cost recommended | 0.0 | 0.0 | 0.0 |

| Offset Recommended (Specify Ministry/Program) | 0.0 | 0.0 | 0.0 |
| Total Fiscal Impact | 0.0 | 0.0 | 0.0 |

## IV. KEY COMMENTS AND CONSIDERATIONS

As stipulated as part of the 2013-14 Results-based Planning process, the Ministry of Energy is submitting OPG's annual business plans for review by Treasury Board to facilitate incorporating implications into the Province's fiscal plan.

It is under the responsibility of the Minister of Energy on whether or not to provide the Minister's concurrence of OPG's annual multi-year business plan. The Treasury Board submission provides the Minister of Energy with an opportunity to highlight why concurrence is being given and any conditions placed on it. Appendix C provides more information on the concurrence process and the 2013-14 minute.

Under the memorandum of agreement (MOA, July 2015) between the Province (as sole shareholder and the Ministry of Energy as representative of the shareholder) and OPG, the company is required to annually submit its board-approved multi-year business plan to the Minister of Energy for concurrence.

The concurrence letter from the Minister to the company will note key elements of the business plan, how these elements relate to the policy direction and priorities of the Province, and the government's expectation for the performance of the company including indicating any elements of the business plan the government does not concur.

In November 2016, OPG submitted its Board approved 2017-2019 Business Plan ~~(Board-approved?)~~ to the Ministry.

Ontario's Fair Hydro Plan (OFHP) is not reflected in OPG's latest Business Plan. The Ministry notes the following OFHP implications for OPG:

- As part of supporting the financing and administration of the global adjustment smoothing mechanism, OPG would develop a Special Purpose Vehicle (OPG Trust) which would use 100 per cent debt financing to purchase the right to future cash flows from IESO. It is proposed that the OPG Trust would raise 51% of required funding directly from capital markets while OPG would provide 49% of the financing requirements. The latter would include 44% debt or equity financing from the Province (Estimates provides for a Ministry of Energy operating asset to make an equity injection) with OPG raising the remaining 5% from capital markets.
  - Provincial borrowing would be offset by an increase in an investment asset in OPG.
  - These changes are expected to be fiscally neutral as they would result in an increase in Provincial interest on debt, offset by increases in OPG net income
  - In addition, the Province's net debt position should remain unchanged
    - ~~As part of supporting the financing and administration of the global adjustment smoothing mechanism, OPG would purchase the right to future cash flows from IESO, financed by capital infusions from the Province (Equity injection via an operating asset, raised from higher debt, with additional shares to the Province as sole shareholder), and by third-party lending (check with OFA – currently 256.3M common shares increasing to….needed? Perhaps explain why there are shares given province is sole shareholder, linked to value of OPG assets/equity)~~
  - ~~These changes are expected to be fiscally neutral as they would result in an increase in Provincial interest on debt, offset by increases in OPG net income~~
  - ~~In addition, the Province's net debt position should remain unchanged~~ ~~(Check is OFA)~~

Financial figures from the OPG Business Plan are included and supplemented with forecast adjustments from the Ontario Financing Authority, MOF for OFHP implications as part of Province's finalized fiscal plan for the 2017 Budget, and for risks related to the Auditor General recommendation that Ontario include Hydro One and OPG financial information in the consolidated financial statements using the International Financial Reporting System (IFRS) reporting framework as required by PSAB standards. The Ministry of Energy indicates it is generally supportive of the fiscal, financial and operational strategies laid out in the business plan. ~~Financial figures from the OPG Business Plan are included and supplemented with forecast changes for the Ontario Financing Authriy, MOF for OFHP implications as part of Province's finalized fiscal plan for the 2017 Budget. The Ministry of Energy indicates it is generally supportive of the fiscal, financial and operational strategies laid out in the business plan.~~

The earnings before tax (net income and income tax payments in lieu – PILs) of OPG are consolidated on the Province's financial statements and have an one-for-one impact on the Province's surplus/deficit position, excluding adjustments that the Province may make upon consolidation of OPG's financials (e.g., unrealized gains or losses in the nuclear funds). OPG is expected to submit its next multi-year business plan later this year for the period starting January 1, 2018~~7~~.

***Overview of Current Business Plan***

OPG's 2017-19 Business Plan details key company undertakings such as business transformation and nuclear refurbishment that will have a substantial electricity system benefit, ratepayer and shareholder impacts. These items were flagged in the previous year's multi-year business plan as well.

- Key Income Statement Forecasts:
  - The figures in the OPG Board approved 2017-2019 Business Plan show a decrease in earnings before tax of $294M in 2016-17 and $556M in 2017-18 [with $75M and $400M of the declines in 2016-17 and 2017-18 due to IFRS-related consolidation risks], primarily due to estimated impact of Ontario Nuclear Funds Agreement-related IFRS risks, followed by an increase of $11M in 2018-19 and a decrease of $14M in 2019-20 versus the estimates in the 2016 Budget. The 2019-20 decrease largely reflects an IFRS-related consolidation risk of $200M) as described above.

  - ~~The figures in the OPG Board approved 2017-2019 Business Plan, along with OFA forecast updates for OFHP (TBC), show a decrease in earnings before tax of $84M in 2017-18 and $89M in 2017-18, followed by increases of $59M in 2018-19 and $120M in 2019-20 over the estimates in the 2016 Budget..~~

    OPG is forecasting net income attributable to the Shareholder to reach $1B in 2021, from $4636M in 2016. Net income in 2017 is forecast to increase as a result of new regulated rates, a gain on sale of OPG's head office, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations

    Net income in 2018 and 2019, before OFA amd MOF adjustments, is projected~~lanned~~ to increase, primarily due to higher production, and earnings from oncoming stations including Nanticoke solar in 2019. Return-on-equity (ROE) is estimated to increase from 4.2% in 2016 to 7.3% by 2021.

    In early January 2017, subsequent to the OPG Board's approval of the 2017-2019 Business Plan, OPG reached an agreement with KingSett Canadian Real Estate Income Fund LP for the purchase of OPG's head office property. The net gain is estimated to be $285M and will be distributed to the Trillium Trust.

    These estimates are highly dependent on electricity and financial market conditions, regulatory decisions by the Ontario Energy Board (OEB), potential changes to accounting standards or the basis of consolidation in Public Accounts, operational performance, and/or government policy, which can change materially. The first table in Appendix G shows the changes to Province's fiscal plan.

  - Annual Operations, Maintenance & Administration (OM&A) expenses from ongoing operations are expected to stay consistent over the plan period, averaging $2.9B per year.

  - The cost of OPG generated electricity to customers is projected to remain ~40% below the average non-OPG cost of electricity to 2018, and over ~30% by 2021. Note: OPG provides predominantly, lower-cost baseload generating capability, rather than more expensive peaking generating capability.

  - Headcount Efficiencies – Headcount has fallen from 11,686 in 2010 to a forecasted 9,009 in 2016 while GWh per headcount has increased from 7.6 to 9.3.

    OPG continues ramping up recruitment in 2017 to fill key vacancies in certain areas (particularly in the nuclear business unit) due to high levels of attrition, as well as continued Pickering operations beyond 2020. OPG is forecasting regular headcount to show a net increase of ~300 by the end of 2017 before gradually decreasing to 4% lower

**Formatted:** Indent: Left: 1", No bullets or numbering

than 2017 levels in 2021.

OPG has hired ~95 Term employees, a new category of non-regular staff negotiated with the Power Workers' Union (PWU) through collective bargaining in 2015. OPG intends to add fewer regular staff in circumstances where they are likely to be laid off as a result of the end of Pickering commercial operations.

- Key Projects:
  - The plan assumes ongoing operations at Pickering for about four years beyond 2020, and as approved by Cabinet, the execution of the Darlington refurbishment consistent with approved budget of $12.8 billion (including escalation and interest), is now under way. First unit refurbishment began in October 2016, Unit 2 is assumed to be returned to service in February 2020 with the second unit refurbishment commencing immediately thereafter and the third unit refurbishment starting in July 2021, assuming necessary concurrence from the Province is obtained.
  - Sustaining capital expenditures average $570M per year include nuclear expenditures unrelated to Darlington refurbishment and costs for continued operation of Pickering (e.g., Upgrades at Sir Adam Beck and upgrades to DeCewII, and investments in current and emerging generation technologies including solar and energy storage including construction and operation of the Nanticoke solar facility).
- Rate Application to the OEB:
  - OPG's 2017-19 Business Plan is dependent on the outcome of its rate filing with the OEB for the five-year period from 2017-2021. Oral hearings began February 2017, decision expected in Q3 2017.
    - OPG 2017-2019 BP assumes new rates effective January 1, 2017. The OEB setting a later effective date would negatively impact OPG's 2017-18 fiscal year net income by ~$50-60M per month of delay.
  - On March 2, 2017 the Province filed an amendment to O.Reg.53/05, which enables OPG to smooth its rates based on OPG's total bill impact, rather than on the basis of nuclear rates only.
  - On March 8, 2017 OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year
- OPG Request – Special Stats for OPG to Approve International Travel (Appendix F provides more information):
  - OPG has placed a request with the Ministry for authority to approve international travel for its employees. OPG has asked that this application be included with its BP submission to TB/MBC.
    - Section 5.3 of the Management Board of Cabinet's Travel, Meal and Hospitality Expenses Directive allows agencies/organizations, for which international travel may be integral to their business, to seek TB/MBC approval for special status to ensure that the approval process does not have an undue negative effect on its ability to conduct business.
    - OPG cites the importance of enabling its engagement with the international community (in particular in regards to nuclear safety), procurement activities, and investment and due diligence processes for its pension fund and nuclear funds.
    - OPG requires a high level of international business travel at approximately 90-100

trips annually, while Darlington accounts for 45% and is expected see increases.

- OPG indicated that the approval process, which took 23 days on average in 2016, delays flight bookings which results in higher costs as airlines raise fares closer to the travel date.

*Other Key Fiscal Risks:*

Regulatory risks: OPG's multi-year rate application to the Ontario Energy Board for the period starting January 1, 2017, is currently in process. Potential OEB decisions providing for lower rates, including disallowance of recovery of OPG's operating costs, current or future deferral and variance account balances (including for the proposed nuclear rate smoothing), future treatment of pension costs.

Accounting risks: A change in the basis of accounting used for consolidation of OPG results from U.S. GAAP to International Financial Reporting Standards (IFRS) on the Province's financial statements is expected to result in potentially significant fiscal impacts.

Financing Costs: Higher cost public capital market borrowing (vs the Province's borrowing cost for OEFC to lend to OPG) would have a negative fiscal impact.~~Regulatory risks: Potential disallowance of recovery of OPG's current or future deferral and variance account balances (including for the proposed nuclear rate smoothing), future treatment of pension costs.~~

~~Accounting risks: Any change in the basis of accounting used for consolidation of OPG on the Province's financial statements could result in potentially significant fiscal impacts.~~

~~Financing Costs: Higher cost public capital market borrowing (vs the Province's borrowing cost for OEFC to lend to OPG) would have a negative fiscal impact.~~

## APPENDIX A: PROPOSED MINUTE (UNDER DEVELOPMENT)

Note receipt of a Business Plan for Ontario Power Generation.

In this regard,

i.) Note the Minister of Energy will provide Ontario Power Generation (OPG) with a concurrence letter for its Business Plan.

ii.) …..request for special status…international travel

iii.) Direct the Ministry, in consultation with the Ministry of Finance / Ontario Financing Authority, to report back to the Board in early January each year with the approved or latest draft business plans for Ontario Power Generation for fiscal planning purposes.

## APPENDIX C: CONCURRENCE OVERVIEW

Under agreements between the Province (as sole shareholder) and OPG, the company is required to annually submit its multi-year business plan to the Minister of Energy for concurrence. Review of the business plan by Treasury Board prior to concurrence was stipulated as part of the 2013-14 Results-based Planning process (see below).

Concurrence is typically provided to OPG via a letter from the Minister of Energy. The letter will note key elements of the business plan, how these elements relate to the policy direction and priorities of the Province, and the government's expectation for the performance of the company. The letter may also indicate any elements of the business plan of which the government does not concur and/or provide additional guidance on expectations going forward.

The current submission looks at the multi-year business plan for OPG covering 2016-2018. Concurrence with the plan is still pending.

Below is the 2013-14 Results-based Plan Minute:

Directed the Ministry of Energy and its agencies, Ontario Power Generation Inc. and Hydro One Inc., in consultation with the Ontario Financing Authority, to report back:

- Annually each autumn with the respective multi-year business plans of the agencies as approved by the Boards of the companies, for review by Treasury Board/Management Board of Cabinet.
  - In this regard, the report should include the following, on a calendar and government fiscal year basis:
  - Multi-year financial and operational targets, including net income and earnings-before-tax.
  - Projected revenues and cash flows to the Province, including the Ontario Electricity Financial Corporation.
  - Planned financings from the Ontario Electricity Financial Corporation.
- Quarterly with financial projection updates and progress reports on the agencies' respective business plan targets and any other new developments, initiatives or risks that may have a material fiscal impact on the Province including variance analysis of last quarter and year-to-date against the annual business plan reviewed by Treasury Board/Management Board of Cabinet.

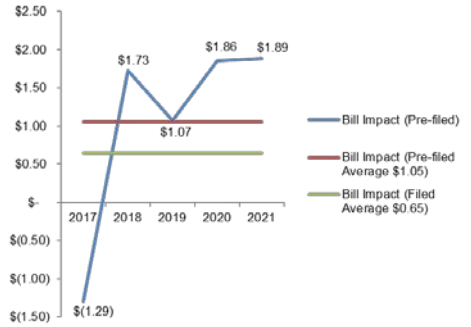
## APPENDIX D: SUMMARY OF KEY HIGHLIGHTS FROM OPG BUSINESS PLAN

The Ministry indicates OPG financial and ratepayer forecasts show some changes from last year's business plan projections, as reviewed by Treasury Board in September 2016.

This is in part because 2017 net income is forecast to increase as a result of new regulated rates, higher capitalized interest for the Darlington Refurbishment expenditures partially offset by reduced production as a result of planned outages at Sir Adam Beck I and DeCew II hydro stations.

Also, actions taken by the Province and OPG in early 2017 to enable OPG to smooth its rates based on OPG's weighted average hydroelectric and nuclear all-in rates (which approximates total bill impact), rather than on the basis of nuclear base rates only. OPG filed a revised rate smoothing proposal with the OEB, which is expected to decrease the average year-over-year annual impact on the monthly customer bill for an average consumption of 750 KWh/month from about $1.05 to 65 cents per month per year.

**Comparison of Annual Bill Impact ($/Month per year)**



*Production and Total Cost of Generation*

OPG's production is expected to fall to 69.8 TWh by 2021 from 77.6 TWh in 2016. This reflects a declining trend in the Darlington production due to refurbishment outages starting in October 2016 and overlaps between unit refurbishments, as well as, the Pickering Vacuum Building Outage (VBO) in 2021 requiring the shutdown of all units for the duration of the outage.
