CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act"

Article 1 – Purpose

The Province has and continues to encourage the construction and development of facilities for the long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer, feed in tariff and other similar programs (the "Green Generation Initiative"). The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will continue to benefit present and future electricity consumers in the Province.

The out-of-market costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment").

The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province under the Green Generation Initiative. These amounts paid by the IESO arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with revenue certainty, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. **[NTD: This statement is not correct in respect of all IESO procurement contracts.]** It has been determined that the useful lives of many of the assets developed under the Green Generation Initiative will be in excess of the respective terms of their respective procurement contracts.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective terms of the applicable procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to Regulated Consumers (as defined in Article 2) should be more closely aligned with the benefits that such Regulated Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on general principles and parameters that establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative equitably across present and future Regulated Consumers (the "Fair Allocation Plan"). **[NTD: There is no explanation as to why realignment is limited to Regulated Consumers.]**

If the Fair Allocation Plan determines that the equitable allocation of the costs associated with the Green Generation Initiative to the Regulated Consumers of a particular time period should be reduced below the amount that currently would be charged based on the Green Costs Adjustment, then the amount payable by such Regulated Consumers and in turn available to IESO will, in the aggregate, be less than the amount payable by the IESO to the generators in

respect of such period. In this case, IESO will need to obtain funding from another source to cover such a shortfall. If a funding obligation is incurred to cover such a shortfall during any period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs incurred will become payable in future periods. In order for IESO to obtain a reliable and committed source of cash flows to enable IESO to repay such funding amounts when they become due and payable, this Act imposes irrevocable and non-bypassable financial obligations on Regulated Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts. The right and interest in and to collect such financial obligations will take the form of the Regulatory Asset contemplated in this Act, which will constitute property rights and interests. Interests in the Regulatory Asset may be sold and absolutely assigned by IESO to one or more financing entities, which in turn will finance their acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf of such financing entities by a financial services manager under the Financing Plan contemplated in this Act.

[NTD: Our strong preference is to limit the introduction to the next paragraph and move defined terms from the previous paragraphs to Article 2]

The purpose of this Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Regulated Consumers on an equitable and cost effective basis.

Article 2 – Definitions

In this Act: **[NTD: It would be preferable to use plain language definitions in the legislation and leave the more detailed definitions to either the regulations or the agreements contemplated hereunder.]**

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition other than as security.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Financial Services Manager whose records shall be determinative for the purposes of this Act except to the extent of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by or on behalf of the Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including without limitation such amounts as may be prescribed.
>
> **[NTD: See section 5(11). Remove this concept globally.]**

"Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners. **[NTD: We see this, in effect, as the same thing as the IESO Successor; that is, replacement of the master Servicer.]**

"Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to Retail Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Finance Charges for a Reference Period to Regulated Consumers. **[NTD: We understood that the Ministry accepted that the transition charge would be a volumetric rate.][NTD: Can be moved to Regulations.]**

"Collected Amount Adjustment" means, in respect of a True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the Financial Services Manager, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[2]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee), each Pledgee, and the Financial Services Manager that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis. **[NTD: Move to Regulations.]**

"Delegate" means any of the following person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act: ●. **[NTD: Why is this delegation of authority necessary? This requires further discussion and clarity as to which entity or entities that the Province can select as the Delegate; for example, it would not be acceptable for the Province to select the OEB to be the Delegate. If this is required, an acceptable delegate would be a stakeholder committee comprised of representatives from the Ministry of Energy, the OEB, the IESO, and OPG. In addition, the regulation should prescribe how the stakeholder committee would operate.]**

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of (a) IESO's right to recover all or any portion of an IESO Funding Shortfall or (b) an Investment Interest to an Absolute Assignee, in each case pursuant to a Disposition Document.

---

[1] This allocation may be volumetric or some combination of a flat amount and a volumetric charge. Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

[2] This would pick up adjustments based on actual collection experience, changes in the Regulated Consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which IESO or an Absolute Assignee effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means a rate regulated distributor licensed under Part V of the *Ontario Energy Board Act, 1998*, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received **[NTD: estimated to be received? will each Electricity Distributor know?]** by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to Servicer or if applicable the Alternative Collection Agent in accordance with Section 5(3), including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, by an Alternative Collection Agent), by the Servicer or by a Retailer, in each case to a Regulated Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to such Electricity Distributor's distribution system and in respect of applicable Transition Charges to be charged to the Regulated Consumer under this Act. **[NTD: The Alternative Servicer should only invoice for Transition Charges, not the entire invoice. Also, to avoid confusion, we suggest using the word "invoice" in reference to what the IESO sends out to distributors, and "bills" in reference to what distributors send out to consumers.]**

"Estimate" means (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Financial Services Manager; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to Regulated Consumers, the estimated value (in current dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Act except to the extent of a manifest calculation error.

"Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to Regulated Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to Regulated Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, for a Reference Period, the sum (without duplication) of the following amounts that are or become payable during the Reference Period in respect of all Absolute Assignees: (a) Repayments; (b) Net Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals. **[NTD: Move this to regulation.]**

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan. **[NTD: Move this to regulation.]**

"Financial Services Manager" means OPG or, following any Replacement Event involving OPG, such other person who may be appointed as the financial services manager of the Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[3]

"Financing Entity" means any entity established at the initiative of and managed by the Financial Services Manager to support the Financing Plan.[4]

"Financing Plan" means the written plan prepared by the Financial Services Manager in accordance with Article 9, as the same may be amended, amended and restated or terminated by the Financial Services Manager in accordance with Article 9 from time to time.

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including, without limitation, each obligation to pay: principal, interest, premiums and other financing charge payments; pass-through payments; payment obligations arising under or in respect of derivatives; payment obligations owing to service providers, Financial Services Managers, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all Additional Funding Charges) incurred by or on behalf of the Absolute Assignee under

---

[3] There must only be one Financial Services Manager.

[4] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act.

the Financing Plan, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.

"Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

"Global Adjustment" has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO" means the Independent Electricity System Operator created pursuant to Part II of the *Electricity Act, 1998*.

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO , during the month pursuant to section • of the *Electricity Act* in respect of Regulated Consumers. **[NTD: IESO indicates that it likely does not work to express in regards to "amounts payable by the LDCs" because settlement between the IESO and LDCs entails payments by LDCs to the IESO and then credits/debits by the IESO to LDCs to reflect RPP shortfalls/overages.]**

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month[5].To the extent reasonably necessary to give effect to this Act, or any transaction contemplated hereby, IESO shall calculate the IESO Funding Shortfall for any month taking into account information provided by the Electricity Distributors and (i) such calculation shall be binding for all purposes; and (ii) any demonstrated inaccuracy in the calculation for any month (including any such resulting from inaccuracies in the information provided by Electricity Distributors) shall be accounted for by adjusting the IESO Funding Shortfall for a subsequent month. **[NTD: Need to add the mechanism for IESO to record this shortfall because without that there is no Regulatory Asset. This IESO Funding Shortfall is the regulatory asset owned by IESO.]**

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative

[5] This has been recast to recognize that the shortfall in the first 4.5 years could exceed the entire GA amount. A more refined approach to describing the concept may be considered.

Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Funding Obligations due and payable by all Absolute Assignees in respect of the month.

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"Net Funding Costs" means, for a Reference Period in respect of a Financing Entity, the amount by which (a) the aggregate of all interest, scheduled principal and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Absolute Assignee during the Reference Period in respect of its Funding Obligations, including such amounts as may be prescribed, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of the Funding Obligations referred to in (a), including such amounts as may be prescribed.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount (b) the True-Up Amount in respect of the applicable True-Up Period and (c) an adjustment amount as may be prescribed to account for estimated collection shortfalls and collection delays in respect of amounts under (a) and (b).

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Investment Interest.

"Pledgee" means a person to whom an Absolute Assignee grants a Pledge.

"Program End Date" means •, [2047].

"Province" means the Province of Ontario.

"Redemption Amount" means the amount payable by or on behalf of an Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the Measurement Date to (and including) October 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Absolute Assignee by applying the net proceeds obtained by the Absolute Assignee incurring one or more other Funding Obligations.

"Regulated Consumer" means consumers of electricity in the Province as prescribed.

[NTD: There are a number of issues with this definition. First, the word "Retail" is a source of confusion as it implies customers of licensed retailers. Really, the purpose of the term is to define the group of consumers that are eligible to receive the benefit of the Fair Hydro program and who will bear the cost of the program over the long term. We have proposed "Regulated Consumer" but you could also use the term "Eligible Consumer" or "Fair Hydro Eligible Consumer" and for purposes of the legislation to say that it is a member of a class of consumers prescribed by the regulations for purposes of the relevant section of the legislation. The regulation would then describe who is in the class. Second, it may not be appropriate to rely on the class of consumers prescribed for the purposes of s. 79.16 or under the OREC Act. Section 79.16 is the section that defines the class of RPP consumers. We understand that the "Fair Hydro Eligible Consumers" are not an identical class to that which is eligible for the RPP or for the Ontario Rebate for Electricity Consumers. For example, we have heard that Fair Hydro Eligible Consumers will (a) exclude consumers served by independent power authorities (certain remote communities not served by Hydro One Remotes), and (b) include consumers served by licensed unit sub-metering providers, licensed retailers and certain consumers served directly by the IESO (which may or may not be captured by the classes under 79.16 or OREC). Third, it is not clear why consumers with contracts with retailers who use retailer consolidated billing are removed from the first part of the definition but then added back into the second part of the definition. Fourth, Retailers do not necessarily have physical electricity assets that would be connected to the grid. Some just sell or offer contracts for electricity. As such, the first few lines after (b) are problematic. Fifth, the phrase "purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets" does not make sense. A consumer does not purchase generation services from a transmitter or distributor. Rather, a consumer receives distribution services from a distributor. In addition to charging for its distribution services, the distributor also charges the associated

transmission costs and commodity costs associated with the volumes delivered. Those commodity costs are the price of the electricity itself and are almost entirely made up of the amounts determined under the global adjustment. Sixth, the phrase "whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO" does not make sense. Transmission assets are owned and operated by transmitters. Distribution assets are owned and operated by distributors. The IESO does not own but does administer and direct the operation of the transmission system.]

"Regulatory Asset" means the property rights and interests described in Section 6(1), which collectively is comprised of each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; and (b) for the Servicer, any bank account into which Servicer deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each Absolute Assignee, as owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Rights" means, with respect to a Regulatory Asset Owner's Investment Interest, all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Investment Interest.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to Servicer or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in accordance with any Funding Obligation, then the Business Day **[NTD: Not defined.]** preceding each Settlement Date. **[NTD: Move to Regulations. Remittances will be in accordance with the current rules.]**

"Repayment Obligation" means an obligation to repay or to provide for the repayment (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the Absolute Assignee under a Funding Obligation.

"Repayment" means a payment by an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

"Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.

"Servicer" means IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last Business Day of any month].

"Transition Charge" means, the amount recoverable from a Regulated Consumer in respect of a Reference Period, being the Period Finance Charge as allocated to such Regulated Consumer in accordance with Article 4(3) on a monthly basis. **[NTD: This needs to be grossed up to account for variability associated with expected uncollectables and remittance delays.]** **[NTD: Do not need to create parallel process. The definition should be linked to the OEB process for determining the volumetric rate as part of the RPP process (see s. 4(2)). The OEB will determine volumetric rate based on forecast consumption, number of consumers, etc. to recover the Period Finance Charges.]**

"Transition Charge Collection" means any amount received **[or deemed by this Act to have been received]** by the Absolute Assignees upon the collection of a Transition Charge paid by or on behalf of a Regulated Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Financial Services Manager equal to (a) the Actual Finance Amount for such related True-Up Period, minus (b) the Estimate of the Finance Amount for the related True-Up Period, , plus (c) the Collected Amount Adjustment for such related True-Up Period. **[NTD: need to discuss how this will work for our true-up. What about prior period shortages? An example of how this works needs to be provided.]**

"True-Up Period" means, in relation to a Reference Period, the immediately preceding Reference Period.

"Undertaking of Her Majesty in right of Ontario" means the undertaking of Her Majesty in right of Ontario given under Section 11(2).

Article 3 – Transition Charges

(1) **Regulated Consumer Obligation to Pay a Transition Charge** – Each Regulated Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such Regulated Consumer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Regulated Consumers** – Until paid, a Transition Charge charged to a Regulated Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the

Regulated Consumer to the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset. Such indebtedness shall constitute a single and separate[6] debt obligation owing by the Regulated Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Regulated Consumer under the Electricity Invoice or otherwise.[7]

(3) No Set-Off or Reduction – A Regulated Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Regulated Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) Allocation of Regulated Consumer Payments – If an Electricity Distributor receives a payment made by or on behalf of a Regulated Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be subject to rights and benefits that are no less favourable than the treatment accorded to other amounts payable to the IESO by the Electricity Distributor.

(5) Transition Charges are Irrevocable – The Transition Charges arising under or in respect of Funding Obligations (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 9(3)) are deemed to be irrevocable, final and effective without any further action, except to the extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period regardless of whether the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, and regardless of whether the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) True-Up of Transition Charges? – [NTD: Include specifics regarding the true-up of the charges and the process for the true-up, but move to Regulations. The True-Up Mechanism should require the Transition Charges to be reviewed and adjusted semi-annually to ensure the expected recovery of amounts sufficient to timely provide all payments in respect of Funding Obligations, provided that in some cases it may need to be adjusted more frequently than semi-annually, e.g., as part of a refinancing.]

(7) Commencement of Invoicing and Collection of Transition Charges – [NTD: Please confirm that as drafted, Transition Charges will begin on the Measurement Date.]

---

[6] Determine if this is critical for rating and markets. Logistics under consideration.

[7] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consider if it is helpful to integrate the existing regulatory scheme for invoicing and collections (regarding RPP) in the legislation.

Article 4 – Invoicing of Transition Charges [NTD: Move Article 4 sections (1) to (4) to Regulations. Also note, these sections remain subject to further due diligence by the Dealers.]

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a Regulated Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Servicer to the Regulated Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable Regulated Consumer. **[NTD: Must capture bills issued to eligible consumers served by unit sub-metering providers, retailers and the IESO – not just distributors][NTD: This provision also needs to address the inclusion of Transition Charges in invoices from the IESO to the LDC, consistent with the current process of how the IESO bills LDCs.]**

(2) **Calculation of the Period Finance Charge** – Not later than [35] days prior to the first day of a Reference Period, each Absolute Assignee (or the Financial Services Manager on its behalf) shall provide the OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. Not later than one month prior to the first day of a Reference Period, each Absolute Assignee (or the Financial Services Manager on its behalf) shall calculate the Period Finance Charge applicable to the Reference Period having regard to such amounts specified by the Servicer, which calculations, information and amounts shall be accepted by the OEB and shall be determinative, except to the extent of manifest calculation error or misstatement.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the OEB shall apply the Attribution Methodology to determine the allocation of the Transition Charge for each Regulated Consumer. **[NTD: We think the OEB would be determining the Fair Hydro recovery rate (on a volumetric basis) that distributors would then be required to charge to consumers]**

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the OEB shall inform each Electricity Distributor and if applicable any Alternative Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each Regulated Consumer who is served by the Electricity Distributor.

(5) **Adjustments** – The amount of any Transition Charge charged to a Regulated Consumer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, except to the extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Servicer to perform such obligations and duties on behalf of the Regulatory Asset Owners. **[NTD: We would expect the IESO to manage this in accordance with its normal business practices.]**

(9) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to Regulated Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard. **[NTD: We would like to see the sections on "Standing" to bring an action to remain in the legislation (as opposed to being moved to the regulations as we believe we previously suggested) as we see those provisions as part of ensuring a rigorous enforcement scheme for the Financing Entity (and so something that should be difficult for the Province to change going forward).]**

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Servicer to ensure that Transition Charges are properly charged to Regulated Consumers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances [NTD: Move Article 5 sections (3), (6), (9), (12), (13) and (14) to Regulations.]

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Servicer, collect amounts owing by Regulated Consumers in respect of Transition Charges charged to such Regulated Consumers in

Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent all in accordance with the Regulations. **[NTD: The obligation to collect and remit the Transition Charge should be included as a deemed condition of license for electricity distributors (and retailers and unit sub-metering providers).]**

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from Regulated Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.[8] **[NTD: Determine if this is critical for rating and markets or if segregation can occur in the hands of the IESO]** Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners or its Pledgee.

(3) **Electricity Distributor Remittances** – On each applicable Remittance Date, an Electricity Distributor shall remit all amounts invoiced by the IESO on account of the Transition Charge in respect of the related Reference Period to or to the account of Servicer or if applicable the Alternative Collection Agent. **[NTD: It is the Dealers expectation that the Transition Charge will be paid on the same basis as other amounts invoiced by the IESO, failing which, they will need to be remitted daily.]**

(4) **Duty to Collect Electricity Distributor Remittances** – Servicer or if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, accept and collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from Regulated Consumers that pay their Electricity Invoices directly to IESO on the same basis as it accepts and collects other charges from such Regulated Consumers.[9]

(5) **Segregation of Electricity Distributor Remittances** – Servicer and if applicable the Alternative Collection Agent shall promptly segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, Servicer or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners or Pledgee.

(6) **Servicer Remittances** – On each Settlement Date[10], Servicer shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Absolute Assignees an amount equal to the Investment Remittance for the related month.

---

[8] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.

[9] Consider building this obligation into a deemed condition of licence for the IESO.

[10] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO Successors** – IESO Successors shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[11], then such person shall, if requested by the Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to Regulated Consumers connected to such person's distribution system assets; (b) allocate partial payments by Regulated Consumers as provided in this Act; (c) exercise all enforcement rights of the Absolute Assignees for the benefit of an Absolute Assignee; and (d) remit any Transition Charge Collections to the Absolute Assignees or Pledgees, as applicable, each in accordance with its Investment Interest. **[NTD: Such acquisition of a distribution system would require the person to be an electricity distributor; consider deleting since this is covered off by Section 5(7).]**

(10) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, Servicer, the Alternative Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Regulated Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5, or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

(11) **Not Used. [NTD: The Servicer should manage this process.**]

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Regulated Consumer, any Electricity Distributor, Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, Servicer,

[11] This is in anticipation of a possible future restructuring of the distribution system.

Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[12]

(13) **Sequestration** – If any Electricity Distributor, Servicer, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the Absolute Assignees or Pledgees, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Absolute Assignees, each with respect to its Investment Interest, and the Pledgees as applicable.[13]

[NTD: Suggest considering a more typical remedy such as the ability to appoint a receiver. Concept should be moved to Regulations.]

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to Servicer, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset

[NTD: We believe that the statute should impose a time limit on the ability of IESO to create additional Regulatory Assets under this Act. It is our expectation that this will be no later than 10 years after the commencement of the program.]

[NTD: In addition, additional language is required to address the acquisition of the Regulatory Asset by the Financing Entity, including reference to the consideration being provided for it, funding upfront costs.]

[NTD: The sale of Regulatory Assets must be restricted to Financing Entities controlled by a single entity (initially, OPG).]

[NTD: For greater certainty, a Financing Entity will not be required to purchase Regulatory Assets from IESO.]

---

[12] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a Regulated Consumer reduces its payment of Transition Charges, despite this language. Same for Electricity Distributor Remittances and IESO Remittances.

[13] Consider adding or substituting this provision for a right to appoint a receiver.

(1) **Composition** – The Regulatory Asset shall constitute a current and irrevocable property right and interest consisting, collectively, of the following rights and interests (without duplication):

a. the right of a Regulatory Asset Owner to record its portion of the Regulatory Asset in its accounts;

b. the right to impose, bill, invoice, collect and receive Transition Charges from Regulated Consumers, including the right to determine the amount of Transition Charges in accordance with this Act;

c. the right to enforce the obligations and indebtedness of each Regulated Consumer to pay the Transition Charges charged to the Regulated Consumer from time to time in accordance with Article 3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices; **[NTD: Do we really want and need the ability for the Financing Entities to chase after individual consumers?] [NTD: This should be the right to provide notices to the OEB of the amounts required for recovery, which the OEB would then be required to accept for purposes of determining the amount of Transition Charges to be charged to consumers]**

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of Servicer or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5;

f. the right to enforce the duties and obligations of Servicer and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 5;

g. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. all Related Rights; and

j. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred. The Regulatory Asset shall continue to exist until all Funding Obligations and Additional Funding Charges have been paid in full.

(2) **Validity of Dispositions** – A Disposition by IESO of all or any part of the IESO Funding Shortfall to an Absolute Assignee, or a Disposition of all or any part of an Investment Interest by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under the IESO Funding Shortfall or Investment Interest, as applicable (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the IESO Funding Shortfall or an Absolute Assignee's right, title and interest in, to and under an Investment Interest, as applicable (or relevant portion thereof), and not merely as a Pledge thereof, and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in the IESO Funding Shortfall or Investment Interest (or relevant portion thereof) subject to the Disposition, including all rights under the IESO Funding Shortfall or Investment Interest arising after such Disposition. **[NTD: Subject to review by Osler/dealers.]**

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the IESO or transferring Regulatory Asset Owner, as applicable, and all other persons who have claims of any kind (whether in tort, contract or otherwise) against IESO or the transferring Regulatory Asset Owner, as the case may be, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – A Pledge by an Absolute Assignee may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the related Investment Interest in accordance with the terms of the

Pledge. No consent of, or notice to, any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation shall, subject to the terms thereof, give rise to a security interest of which the PPSA applies, and may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected pursuant to the PPSA.[14] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. A Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. All provisions of the PPSA shall apply to the Regulatory Asset on the basis that it is intangible personal property, except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's rights and interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective and coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement. **[NTD: Move to Regulations.]**

---

[14] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

Article 7 – Establishment of the Fair Allocation Plan[15] [NTD: Move entire Article 7 to Regulations, other than 7(1) and 7(2).]

(1) **Adoption of the Fair Allocation Plan** – The Delegate may, by written declaration, designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Act, except if amended, amended and restated or terminated by a further written declaration made by the Delegate in compliance with **[the Regulations]**

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Future Fair Share of Green Transition Benefits across present and future Regulated Consumers on a basis that the Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters:

[NTD: E&Y will need to see the guidelines of the Fair Allocation Plan set in reference to parameters that will allow it to establish a modeling curve]

- [**Inflation period**: (between November 2017 – and April 2022) bill increases need to be capped at inflation (assumed at 2% for modeling purposes)]

- [**Transition Period**: (May 2022- April 2027) bills increased at a consistent rate which is set so that the borrowing will not exceed the Trust's capacity, which is determined by the Finance Service Manager]

- [**Amortization Period**: (May 2027-April 2047) equitable distribution of Finance Amount among Regulated Consumers]

1. Future Fair Share of Green Transition Benefits should be allocated over the period ending on the Program End Date.

2. The share of Future Fair Share of Green Transition Benefits allocable to a particular Regulated Consumer in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to such Regulated Consumer over such Reference Period, other than in exceptional circumstances.

3. The Fair Allocation Plan should specify the Reference Periods for the purpose of allocating Future Fair Share of Green Transition Benefits among Regulated Consumers on a relative basis over time.

---

15 The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current procurement contracts and not invest in extending service lives to secure further procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

(3) Attribution Methodology – The Fair Allocation Plan shall specify the Attribution Methodology for the purposes of allocating the Period Finance Charges across the Regulated Consumers. The Attribution Methodology shall result in an attribution of such Transition Charges that is considered by the Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation; provided that the Attribution Methodology shall not be used to limit the recovery of Transition Charges. **[NTD: Can the methodology be adjusted outside an amendment? If so, the rating agencies need to understand the limits of any adjustment.]**

(4) Amendments of the Fair Allocation Plan – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation, (b) comply with any restrictions or limitations specified with respect thereto in any Funding Obligation, and (c) not impair any Regulatory Asset, outstanding Funding Obligation or any Transition Charges. **[NTD: If the Fair Allocation Plan is amended, there should be no further Regulatory Assets until the revised Fair Allocation Plan and corresponding Financing Plan have been approved.]**

Article 8 – The IESO Funding Shortfall

(1) Recording of IESO Funding Shortfall -- IESO will record any IESO Funding Shortfall in its books.

(2) Dispositions – IESO may effect a Disposition of all or any part of the IESO Funding Shortfall to an Absolute Assignee if (a) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; and (b) the Financial Services Manager confirms in writing that the Disposition complies with any restrictions or limitations specified with respect thereto in any documents evidencing the Funding Obligations and is permitted under the Financing Plan.

(3) No Continuing Interest in any Investment Interest – IESO shall have no continuing right or interest in any IESO Funding Shortfall subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party.

Article 9 – The Financing Plan **[NTD: Move all of Article 9 to Regulations other than 9(1).]**

(1) Power to Prepare, Implement and Amend the Financing Plan – The Financial Services Manager shall be authorized to prepare, implement and amend a financing plan for the Financing Entities and propose the adoption of such financing plan as the Financing Plan for the purposes of this Act. The Financial Services Manager shall have the right to withdraw its financing plan as the Financing Plan at any time if it determines that implementing the Financing Plan in such manner would not be in the best interests of a Financing Entity.

(2) Principles and Parameters of the Financing Plan – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions having regard to the principles and parameters set forth in Schedule 3.

(3) OEB Approval – Any Additional Funding Charge payable to the Financial Services Manager in respect of services provided by the Financial Services Manager (other than third party costs) shall be subject to review and approval by the OEB.

(4) Review of Financing Plan – The [OEB] shall undertake an annual review of the records maintained by the Financial Services Manager for the purpose of confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan. **[NTD: We would prefer that this be dealt with by an attestation prepared by an officer of the Financial Services Manager.]**

(5) Replacement of the Financial Services Manager – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the Financial Services Manager shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services Manager under the Financing Plan. If the Financial Services Manager is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services Manager. Any replacement must comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations.

(6) Obligation to Apply IESO Remittances – The Financial Services Manager shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Absolute Assignees, or otherwise in respect of or as proceeds from an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose. **[NTD: This can be dealt with by contract.]**

(7) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, any Alternative Collection Agent, the Financial Services Manager, the OEB or Her Majesty in right of Ontario, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount.

(8) Incurrences are Binding – Each Disposition made to or by an Absolute Assignee, all amounts payable or becoming due and payable by or on behalf of an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation and each Pledge entered into by an Absolute Assignee, shall be valid and binding, including in determining the amount of related Transition Charges, notwithstanding any defect in the manner in incurrence or any inconsistency with the Fair Allocation Plan or the Financing Plan.

[Article 10 – Compliance Matters[16]

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Act, the OEB shall have the right, jurisdiction, power and authority to examine the books and records of *[Insert names if any]*.

(2) [OPG's Rate Settings – When setting other rates for or in respect of OPG, the OEB shall not take into account (a) the administrative or servicing fees charged by OPG as Financial Services Manager [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services]; (b) the cost consequences to OPG of being the Financial Services Manager; or (c) the consequence of OPG consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.][17]

Article 11 – Undertaking of the Her Majesty in right of Ontario[18]

(1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – Her Majesty in right of Ontario shall not in any way take or permit (including by any agency or administrative body) any action to reduce, impair, postpone or terminate the obligation of Regulated Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly, including through the introduction of any bill or the passing of any legislation or regulation having such effect. The amount of Transition Charges determined under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by Her Majesty in right of Ontario (including by any agency or administrative body), including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(2) Undertaking and Agreement – Her Majesty in right of Ontario shall not:

---

[16] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article and any potential role for the Auditor General is still under consideration.

[17] As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as Financial Services Manager of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role.

[18] Under consideration, including the dealers' request for a "servicer guarantee" and a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes.

In the event of a market disruption that renders it impossible to refinance debt when required (or where financing of amounts required to service the debt is not available because of a market disruption where the Financing Entity was relying on such further issuance of debt until the recovery is set to begin to fund interest), either the Province must step in and payout the debt or there must be the right to recover the debt from ratepayers as it becomes due, notwithstanding the intended rate cut.

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

(b) except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the Absolute Assignees or any Pledgee from time to time;

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment, amendment and restatement or termination would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder, or would not otherwise comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, an IESO Successor shall immediately be established by Her Majesty in right of Ontario to perform such obligations.

(4) **Compensation for Failure** – Absolute Assignees shall be compensated by Her Majesty in right of Ontario for any losses suffered by them as a result of any failure by Her Majesty in right of Ontario to comply with its undertakings and agreements in this Article 11.[19]

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid. **[NTD: This concept can be contained in the Regulations.]**

(6) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Her Majesty in right of Ontario, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 12 – Regulations

Regulations may be made under this Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional

[19] Requested by Dealers. For discussion.

Funding Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 13- Miscellaneous[20]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Act shall be required with respect to the actions to be taken in compliance with this Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

---

[20] OPG would like the specific amendments related to OPG to be included in the Bill.]

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Act, if any provision of this Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Act that is taken by any person who is or may become obligated or have duties that arise under this Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Act are intended to be severable and that the Legislature would have enacted this Act even if any Article, Section, paragraph or subparagraph of this Act held to be unconstitutional or invalid had not been included in this Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles and Parameters for Establishing the Financing Plan

The following principles and parameters provide a guideline as to what a Financing Plan should address:

(1) consider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that payments made for a Reference Period reasonably correspond to the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

(2) if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Regulated Consumers under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(3) reflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical Regulated Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation **[having regard to the application of the Attribution Methodology][NTD: Are the words in square brackets necessary?]**);

(4) require the Financial Services Manager, for and on behalf of each Regulatory Asset Owner, to use diligent efforts to manage Finance Amounts to be borne by Ratepayers;

(5) include a proposal regarding the compensation of the Financial Services Manager that reflects market terms and conditions; and

(6) require that the Financial Services Manager report annually to the Ministry of Energy on the operation of the Financing Plan including, in particular, with respect to the amount and terms of the Funding Obligations incurred and the sufficiency of such Funding Obligations for the purpose of funding the estimated Funding Shortfalls in accordance with the Fair Allocation Plan.

Subject: "Fair" Legislation (Discussion Draft)

Thanks for your comments, Michael. The attached version picks up many of your, Peter's and H&W's comments. In some cases it defers consideration, pending dealer input (such as your suggestion of tracking individual, standalone Regulatory Assets per transaction; delinking the investors from the LDCs, in favour of having IESO be the main servicer; and deleting some of the US precedent language). The regulatory input included in your mark-up was particularly helpful, although not easily dealt with tonight without the Province's input, so many of those points have simply been brought forward with additional footnotes for now. The manner and extent of delegations (primarily the Financing Plan and the Fair Allocation Plan), the nature of OEB review and regulatory actions, the scope of the undertaking and other similar issues, are still under consideration by MOE. Your comments to the effect that nothing can affect a funding obligation once incurred were referenced, as I think that is a pervasive and correct idea. The ultimate location of provisions (Part of the Electricity Act; new Act; Regulations) is still under consideration – for now it's all in this document to facilitate this group review. Finally, there are a number of "validity" type points, which arose in your mark-up and which we are still thinking about. We can discuss those further in the morning. Steve

Subject: Torys Comments on Blakes Draft Legislation

All,

I am attaching our comments on the last version of the draft legislation sent to us by Blakes. Both a clean and blacklined version are attached.

This is being distributed to OPG at the same time as everyone else and so remains subject to their comments as this is very much a work in process.

We also just received comments from Hunton & Williams but in the interests of time we have not been able to include those in our mark up, but expect to be in a position to raise any of their big issues at our meeting tomorrow. Also, I will send their comments separately to Blakes.

Regards,

Michael K. Feldman

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose[1]

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the construction and development of facilities for the purpose of long-term operation and generation of electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). [The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets]; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging consumers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period[2]. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under

---

[1] Consider the scope and breadth of the Purpose section. This text is considered to be useful to establish the legislative basis for the statute, which text will be useful in the event of a challenge.

[2] Consider modifying this to also refer to gas contracts and hydroelectric contracts, which provide for mechanics that are not based on contracts for differences.

the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall.[3] In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts . The right and interest in and to collect such financial obligations, which will take the form of the Regulatory Asset contemplated in this Part and will constitute property rights and interests. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Financing Plan contemplated in this Part. The Financing Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative charged to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any

[3] Confirm whether any RPP forecasting variance is to be included in (i) a funding shortfall; and (ii) related IESO financing costs to be included in Transition Charges.]

applicable tax amounts) that are or become payable by the Regulatory Asset Owners during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, a Regulatory Asset Owner under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on a Regulatory Asset Owner or incurred by on behalf of a Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of a Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager of director fees; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (o) any rating agency fees; and (p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Financing Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Financing Plan in compliance with the requirements set out in Schedule 2.

"Allocation Factor" means, in respect of a Ratepayer for a Reference Period, the number (expressed as a percentage) determined in respect of the Ratepayer by [IESO] based on the application of the Attribution Methodology in respect of the Reference Period.[4]

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owners.

"Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.

"Attribution Methodology"[5] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group based on its Allocation Factor.

---

[4] Consider basing this on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those would be identified and rolled into the True-Up.

"Bypass Charge" means [To be developed].[6]

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Servicer or the Administrative Agent, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[7]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) and each Pledgee that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which a Regulatory Asset Owner effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor licensed by the OEB in respect of such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Servicer) or by the Servicer in respect of electricity charges and related services and amounts incurred, assessed or charged in respect of connectivity to a distribution network in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of

---

[5] A key question will be how the overall costs will be spread across the rate base. For example, the allocation may be volumetric or not, or some combination of a flat amount and a volumetric charge. This will also impact any discussion regarding any bypass (e.g., grid exit) charge in connection with the bypass discussion.

[6] Consideration needs to be given to any amount that will be charged to a ratepayer who successfully bypasses (e.g., leaves the grid). In allocating Transition Charges, considerations would include whether to reserve Bypass Charges and spread them over the life of the program, and correspondingly how to factor those into the calculation of Transition Charges.

[7] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" [has the meaning given in Article 1].

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owners during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owners under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financing Entity" means an entity established in accordance with the Financing Plan to acquire all or an interest in the Regulatory Asset as an Absolute Assignee and to enter into Funding Obligations to finance such acquisition.[8]

"Financing Plan" means the written plan [prepared by the Administrative Agent] in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be

[8] OPG has suggested that the legislation provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act. These raise issues for consideration by the stakeholders.

given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) the establishment and operation of any Financing Entity; and (i) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including principal, interest and other financing charges, indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies and all taxes payable in connection with the foregoing) incurred by or on behalf of a Regulatory Asset Owner under the Financing Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.[9]

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.[10]

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment [attributable to the Power Contracts] in accordance with the Fair Allocation Plan.[11]

---

[9] OPG has asked whether this should include IESO finance arrangements.

[10] Consider whether to simplify by referring to the calculations of GA, with vs. without Fair. The issue would be that Fair is then linked into the GA calculation specifically, rather than to the specific assets that are subject to revised amortization under Fair. The constitutional position requires a clear nexus to the assets. Also, confirm whether RPP forecasting variances are to be included.

[11] IESO to confirm its ability to allocate a shortfall in a given month between what it receives and what it owes under the GA, in order to calculate (a) existing volume-based variances which are rolled into subsequent month GA and trued-up every 6 months under RPP, (b) existing variances attributable to OREC which are funded by the Province, and (c) new variances attributable to Fair Hydro program.]

"Generator" means a generator of electricity that is subject to [this Act][12].

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.[13]

"Green Generation Initiative" [has the meaning given in Article 1].

"IESO" means the Independent Electricity System Operator created pursuant to [insert].

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Period, exceeds (ii) the GA Power Contract Contribution for the Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for [managing the Province's power system].

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods

---

[12] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*. "Generator is a defined term in other legislation (OEB Act, Electricity Act) so this should ultimately be a distinct term such as "FH Generator" to avoid confusion.

[13] Note that if adjustments for Fair Hydro program are to be applied after existing GA adjustments, then this may need a new name (such as "FH Adjustment").

occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[14]

"Province" means the Province of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.[15]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices[16] during the Reference Period.

---

[14] Consider expanding to include PPAs that are not contracts for differences. Should this contemplate the possibility of additional or amended power contracts?

[15] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk. Consider terminology to align with the description of the eligible customer class provided by the Ministry, e.g., same as OREC-eligible consumers except for consumers served by Independent Power Authorities (who do not pay GA). Also, consider use of the word "retail", to avoid limiting to customers of retailers and confirm removal of reference to transmission-connected customers.

[16] Expand to include eligible consumers who are not customers of Electricity Distributors (e.g., suite-metered customers).

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of a Regulatory Asset Owner by applying the net proceeds obtained by the Regulatory Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1), or if the context requires, a specified portion or undivided interest in such property right and interest that is described in the applicable Disposition Document.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for the Servicer, any bank account into which the Servicer deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each of (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, and "Regulatory Asset Owners" means collectively all of the Regulatory Asset Owners, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7). For greater certainty, where one Regulatory Asset Owner owns the entirety of the Regulatory Asset, "Regulatory Asset Owners" refers to this Regulatory Asset Owner.

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means, with respect to a Regulatory Asset Owner's Regulatory Asset, all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is licensed to distribute electricity in accordance with [this Act[17]].

"Servicer" means [To be determined], as agent for and on behalf of the Regulatory Asset Owner [To be determined – collective invoicing agent, and consider expanding].

"Settlement Date" means the [last Business Day of any month].

"Transition Charge" means, for a Ratepayer in respect of a Reference Period, the sum of (a) [one-sixth] of the Period Transition Charge multiplied by its Allocation Factor and (b) any Bypass Charge charged to the Ratepayer in respect of the Reference Period.

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].[18]

---

[17] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*.

[18] Note that this is the term that describes the "asset" that we are amortizing over a longer period of time.

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge charged to a Ratepayer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the Ratepayer to the Regulatory Asset Owners (each with respect to its Regulatory Asset). Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.[19]

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the Financing Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action, in the absence of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan

---

[19] Torys suggests that we not create a debtor/creditor relationship between ratepayers and regulatory asset owners. Instead, ratepayers would only have relationships with electricity distributors and the Fair program would rely on consumers paying distributors and distributors to collecting those amounts and remitting them to IESO. The current draft goes further to bridge the investors more directly with ratepayers. There are differences in the approaches, including reliance from a credit perspective on the LDCs (rather than an ability to replace the individual LDCs with the investors choice). This depends on the credit analysis, and comfort that a later requirement will not be accommodated without a change in the legislation. Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consideration should be given to whether that achieves the same direct relationship and whether the effectiveness of the current regulatory licensing regime should be suggested as the basis for a market-based credit decision.

applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges charged to a Ratepayer in respect of any Finance Amount incurred under with the Financing Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges[20]

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Servicer to the Ratepayer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable Ratepayer.

(2) **Calculation of the Period Transition Charge** – Not later than [35] days prior to the first day of a Reference Period, each Regulatory Asset Owner (or the Administrative Agent on its behalf) shall provide the Servicer with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. Not later than one month prior to the first day of a Reference Period, the Servicer or if applicable the Alternative Servicer[21] shall calculate the Period Transition Charge applicable to the Reference Period based on the calculations and information set forth in such written notices received from the Regulatory Asset Owners, which shall be determinative in the absence of manifest calculation error or misstatement.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the Servicer or if applicable the Alternative Servicer shall apply the Attribution Methodology to determine the Allocation Factor for each Ratepayer of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the Servicer or if applicable the Alternative Servicer shall inform each Electricity Distributor and if applicable any Alternative Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

---

[20] Details concerning Invoicing of Transition Charges (Article 4) and Collections and Remittances (Article 5) are complex. Consider how much of this can be addressed through regulations, or if acceptable based on existing OEB license conditions/codes, IESO market rules/manuals, etc.

[21] Should this be a designated government official, rather than an agent appointed by investors?

(5) **Adjustments** – The amount of any Transition Charge charged to a Ratepayer by the Servicer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owners shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Servicer to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(9) **Regulatory Asset Owners have Standing** – The Regulatory Asset Owners may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, charge, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by the Regulatory Asset Owners in relation to any such failure.[22]

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Servicer or any [Alternative Collection Agent] to ensure that

---

[22] Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.

Transition Charges are properly charged to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges charged to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for each Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable] efforts to accept and collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from Ratepayers that pay their Electricity Invoices directly to the Servicer.[23]

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall hold such amounts in trust for each Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date][24], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to

[23] Consider building this obligation into a deemed condition of licence for the IESO.

[24] Consider frequency of remittances in light of rating requirements.

the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[25], then such person shall, if requested by the Regulatory Asset Owners, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owners or Pledgee for the benefit of a Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable, each in accordance with its Regulatory Asset.

(10) **Regulatory Asset Owners have Standing** – The Regulatory Asset Owners and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Servicer, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by the Regulatory Asset Owners in relation to any such failure. [26]

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owners shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11)

---

[25] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

[26] Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.

shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owners.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[27]

(13) **Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by the Regulatory Asset Owners or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owners or Pledgee, each with respect to its Regulatory Asset.

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute an existing, present property right and interest consisting, collectively, of the following rights and interests of a Regulatory Asset Owner in the following (without duplication):

a. the right of a Regulatory Asset Owner to record its portion of the Regulatory Asset in its accounts;

[27] Consider whether it makes sense to create a “deemed collection” payment obligation on Electricity Distributors to the extent a Ratepayer reduces its payment of Transition Charges, despite this language, and same for Electricity Distributor Remittances and IESO Remittances.

b. the right to impose, bill, invoice, collect and receive Transition Charges from Ratepayers, including the right to determine the amount of Transition Charges in accordance with this Part;

c. the right to enforce the obligations and indebtedness of each Ratepayer to pay the Transition Charges charged to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

f. the right to enforce the duties and obligations of IESO and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

g. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. all Related Rights; and

j. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any

consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner made under the Financing Plan pursuant to a Disposition Document shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. [A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.][28]

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge. Other than as required by the Financing Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

---

[28] Consider if helpful to investors, or delete.

(5) **Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in respect of a Funding Obligation incurred under the Financing Plan shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset, the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the Regulatory Asset or the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act.[29] A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in Transition Charge Collections or other related proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge on the basis that the Regulatory Asset is "intangible" property, for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.[30]

---

[29] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

[30] This is necessary to ensure that if there are multiple regulatory asset owners and pledgees, they will be coordinated in the application of their rights of enforcement, etc.

Article 7 – Establishment of the Fair Allocation Plan[31]

(1) **Adoption of the Fair Allocation Plan** – The [Minister of Energy][32] may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, [except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy in compliance with Section •].

(2) **Principles and Parameters**[33] – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[34]:

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in

---

31 The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current Power Contracts and not invest in extending service lives to secure further power contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

32 Input required. If the MOE is given this power, conform to applicable authorities (e.g., plans and directives).

33 Consideration will be given as to whether these details should be included in the Regulation.

34 We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][35].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative.

(3) Attribution Methodology – The Fair Allocation Plan [shall] specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation.

(4) [Confirmation][Review] of the Fair Allocation Plan – [OEB?][36]

Article 8 – The Financing Plan[37]

(1) Power to Prepare and Implement the Financing Plan – In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall prepare and propose the adoption of a Financing Plan. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Financing Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Financing Plan.

(2) Required Terms and Conditions of the Financing Plan – The Financing Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Financing Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule 3 and such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation].

---

[35] Consider if a quantitative limit needs to be included in the legislation.

[36] Any approvals or consents by the OEB will be obtained before any Funding Obligation that is dependent on such approval or consent is incurred. Any such approval or consent will be irrevocable and non-appealable. Any regulatory action occurring after any incurrence will not affect the related Funding Obligation or underlying rights in the Regulatory Asset.

[37] Consideration will be given as to whether these details should be included in the Regulation.

(3) **Power to Review and Approve the Financing Plan** – The Minister of Energy may, by written order, designate one or more persons to review the Financing Plan and to review and assess the consistency of the Funding Obligations incurred with such Financing Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the Financing Plan, and submit a revised Financing Plan to the designated reviewer for approval within [the time period specified in such written order]/[[●] days of such written order].[***Consider periodic amendments to the Financing Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***]

(4) **Approval of Financing Plan –** The **[OEB]** shall have the power to and shall approve or disapprove of the Financing Plan based solely on whether the Financing Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the Financing Plan, then such Financing Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the Financing Plan or otherwise fails to approve the Financing Plan, then the Administrative Agent shall re-submit the Financing Plan with such amendments as the Administrative Agent shall consider necessary for the Financing Plan to be approved by the OEB.[38]

(5) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Financing Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Financing Plan shall require the

[38] Once the Financing Plan is reviewed and approved there would be no further OEB review. If there is opportunity for further review, such review will have no impact on prior issued debt. Any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding).

Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(6) Establishment of Special Purpose Entities – If the implementation of the Financing Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations as a Financing Entity under the Financing Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics specified in Schedule 4 in establishing such special purpose entity.]

(7) Obligation to Apply IESO Remittances – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owners, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[39]

(8) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, and Alternative Collection Agent, the Administrative Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part or expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(9) Incurrences are Binding – Despite any failure to adhere to the Financing Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of a Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters[40]

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) Power to Investigate Compliance and Impose Regulatory Sanctions - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the

---

[39] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

[40] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article is under consideration.

Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the [OEB] or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part[41].

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.][42]

Article 10 – Undertaking of the Lieutenant Governor in Council[43]

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The [Lieutenant Governor in Council] shall not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly[,including through the introduction of any bill or the passing of any legislation or regulation]. The amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council[,including through the introduction of any bill or the passing of any legislation or regulation].

(2) **Undertaking and Agreement** – The Lieutenant Governor in Council shall not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owners, including any Absolute Assignee from time to time, and any Pledgee from time to time[,including through the introduction of any bill or the passing of any legislation or regulation].

[If IESO becomes insolvent or otherwise incapable of performing its obligations under this Part, an IESO Successor will be established that is capable of performing such obligations in order that the Regulatory Asset Owners may appoint the IESO Successor as an Alternative Servicer or Alternative Collection Agent. Regulatory Asset Owners

---

[41] Consider scope of OEB regulation and whether a Financing Entity should be subject to this sort of provision in any event.

[42] OPG has indicated that the risks and cost consequences to OPG of being an Administrative Agent or of consolidating a Financing Entity for accounting purposes should not be considered by the OEB in setting the regulated payment amounts for OPG. To be discussed.]

[43] Under consideration.

shall be fully compensated for any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article 10(2) for any loss suffered by the Regulatory Asset Owner as a result of such failure.[44]]

(3) References to the Undertaking and Agreement – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with a Regulatory Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by a Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 12- Miscellaneous[45]

---

[44] Requested by Torys. For discussion.

[45] OPG would like the specific amendments related to OPG to be included in the Bill.]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Financing Plan

The Financing Plan shall have regard to the following principles, parameters, requirements and conditions:[***Consider others.***]

(1) the Financing Plan shall, in respect of each Reference Period, describe the allocations of Unrecovered Transition Costs to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of the Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describe alternative funding arrangements considered to be suitable for the purpose of funding the estimated Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by the Regulatory Asset Owners for such purpose;

(4) such Funding Obligations shall reflect quantities, maturities, payment obligations, prepayment or redemption rights and such other features so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of each Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

(5) the Financing Plan shall reflect the outcome of a financial model that incorporates the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical Ratepayer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the Financing Plan may permit the OEB to check progress against the model from time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the Financing Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***]

(6) the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Regulatory Asset Owners will require committed access to short term liquidity to cover estimated Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate a Regulatory Asset Owner to repay

an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Administrative Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations shall not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Administrative Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Administrative Agent shall cause the applicable Regulatory Asset Owner to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Administrative Agent will select counterparties under any transaction to be entered into by a Regulatory Asset Owner, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Administrative Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Administrative Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the Funding Shortfall from time to time on a basis that is consistent with the allocations of Unrecovered Transition Costs to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Administrative Agent and other agents and service providers to the Regulatory Asset Owners may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by a Regulatory Asset Owner, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) a description of each special purchase entity that will purchase the Regulatory Asset from the IESO, including proposed capitalization, governance, and restrictions on their powers and activities having regard to the parameters in Schedule 4; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

Schedule 4

Creation of any Special Purpose Entity to become a Regulatory Asset Owner]

(1) Powers and Abilities:

a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. Each Regulatory Asset Owner shall be authorized to:

i. incur the Funding Obligations contemplated by a Financing Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Financing Plan and for administrative services; and

iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;

c. So long as any Funding Obligations contemplated under a Financing Plan are outstanding, a Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;

d. a Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Financing Plan;

e. a Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Financing Plan; and

f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a Financing Plan.

(2) Governance of Regulatory Asset Owner – A Regulatory Asset Owner shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

h. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose[1]

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and ~~future~~ quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the ~~long-term~~ construction and development of facilities for the purpose of ~~generating~~long-term operation and generation of electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). [The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets]; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ~~ratepayers~~consumers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period[2]. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power

[1] Consider the scope and breadth of the Purpose section. This text is considered to be useful to establish the legislative basis for the statute, which text will be useful in the event of a challenge.

[2] Consider modifying this to also refer to gas contracts and hydroelectric contracts, which provide for mechanics that are not based on contracts for differences.

Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall.[3] In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable~~. Such~~ and establishes a right to invoice and collect such amounts . The right and interest in and to collect such financial obligations ~~will constitute property rights and interests~~, which will take the form of the Regulatory Asset contemplated in this Part and will constitute property rights and interests. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the ~~Treasury~~Financing Plan contemplated in this Part. The ~~Treasury~~Financing Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative ~~attributed~~charged to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by ~~attributing~~charging the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner ~~assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset~~effects a Disposition.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any

[3] Confirm whether any RPP forecasting variance is to be included in (i) a funding shortfall; and (ii) related IESO financing costs to be included in Transition Charges.]

applicable tax amounts) that are or become payable by the ~~Regulated~~Regulatory Asset ~~Owner~~Owners during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the ~~Treasury~~Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, ~~the~~a Regulatory Asset Owner under the ~~Treasury~~Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on ~~the~~a Regulatory Asset Owner or incurred by on behalf of ~~the~~a Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the ~~Treasury~~Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative ~~Invoicing Agent~~Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of ~~the~~a Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager of director fees; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (~~m~~o) any rating agency fees; and (~~n~~p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the ~~Treasury~~Financing Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the ~~Treasury~~Financing Plan in compliance with the requirements set out in Schedule 2.

"Allocation Factor" means, in respect of a Ratepayer for a Reference Period, the number (expressed as a percentage) determined in respect of the Ratepayer by [IESO] based on the application of the Attribution Methodology in respect of the Reference Period.[4]

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset ~~Owner~~Owners.

"Alternative ~~Invoicing Agent~~Servicer" means a person appointed under Section 4(8) to assume the ~~invoicing and other activities of any Electricity Distributor~~obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset ~~Owner~~Owners.

[4] Consider basing this on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those would be identified and rolled into the True-Up.

"Attribution Methodology"[15] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group based on its Allocation Factor.

"Bypass Charge" means [To be developed].[6]

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Servicer or the Administrative Agent, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[27]

~~["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [30th] day immediately preceding the first day of the Reference Period.]~~

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) and each Pledgee that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which a Regulatory Asset Owner effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor ~~of electricity to residences located in~~licensed by the OEB in respect of such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the

[15] A key question will be how the overall costs will be spread across the rate base. For ~~simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified~~example, the allocation may be volumetric or not, or some combination of a flat amount and a volumetric charge. This will also impact any discussion regarding any bypass (e.g., grid exit) charge in connection with the bypass discussion.

[6] Consideration needs to be given to any amount that will be charged to a ratepayer who successfully bypasses (e.g., leaves the grid). In allocating Transition Charges, considerations would include whether to reserve Bypass Charges and spread them over the life of the program, and correspondingly how to factor those into the calculation of Transition Charges.

[27] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative ~~Invoicing Agent)~~Servicer) or by the Servicer in respect of electricity charges and related services and amounts incurred, assessed or ~~attributed~~charged in respect of ~~a residence located~~connectivity to a distribution network in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" [has the meaning given in Article ~~1.~~1].

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset ~~Owner~~Owners during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset ~~Owner~~Owners under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the ~~Treasury~~Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the ~~Treasury~~Financing Plan.

"Financing Entity" means an entity established in accordance with the Financing Plan to acquire all or an interest in the Regulatory Asset as an Absolute Assignee and to enter into Funding Obligations to finance such acquisition.[8]

"Financing Plan" means the written plan [prepared by the Administrative Agent] in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) the establishment and operation of any Financing Entity; and (i) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including principal, interest and other financing charges, indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies and all taxes payable in connection with the foregoing) incurred by or on behalf of ~~the~~a Regulatory Asset Owner under the ~~Treasury~~Financing Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.[9]

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.[10]

[8] OPG has suggested that the legislation provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act. These raise issues for consideration by the stakeholders.

[9] OPG has asked whether this should include IESO finance arrangements.

[10] Consider whether to simplify by referring to the calculations of GA, with vs. without Fair. The issue would be that Fair is then linked into the GA calculation specifically, rather than to the specific assets that are subject to revised amortization under Fair. The constitutional position requires a clear nexus to the assets. Also, confirm whether RPP forecasting variances are to be included.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment [attributable to the Power Contracts] in accordance with the Fair Allocation Plan.[11]

"Generator" means a generator of electricity that is subject to [this Act][12].

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.[13]

"Green Generation Initiative" [has the meaning given in Article ~~1.~~1].

"IESO" means the Independent Electricity System Operator created pursuant to [insert].

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference ~~Periods~~Period, exceeds (ii) the GA Power Contract Contribution for the Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators ~~to IESO~~ under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators ~~to IESO~~ under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset ~~Owner~~Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for [managing the Province's power system].

[11] IESO to confirm its ability to allocate a shortfall in a given month between what it receives and what it owes under the GA, in order to calculate (a) existing volume-based variances which are rolled into subsequent month GA and trued-up every 6 months under RPP, (b) existing variances attributable to OREC which are funded by the Province, and (c) new variances attributable to Fair Hydro program.]

[12] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*. "Generator is a defined term in other legislation (OEB Act, Electricity Act) so this should ultimately be a distinct term such as "FH Generator" to avoid confusion.

[13] Note that if adjustments for Fair Hydro program are to be applied after existing GA adjustments, then this may need a new name (such as "FH Adjustment").

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge~~, right of set-off~~ or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom ~~[or for whose benefit]~~ a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[~~3~~14]

"Province" means the Province of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.[~~4~~15]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices[16] during the Reference Period.

[~~3~~14] Consider expanding to include PPAs that are not contracts for differences. Should this contemplate the possibility of additional or amended power contracts?

[~~4~~15] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk. Consider terminology to align with the description of the eligible customer class provided by the Ministry, e.g., same as OREC-eligible consumers except for consumers served by Independent Power Authorities (who do not pay GA). Also, consider use of the word "retail", to avoid limiting to customers of retailers and confirm removal of reference to transmission-connected customers.

[16] Expand to include eligible consumers who are not customers of Electricity Distributors (e.g., suite-metered customers).

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [~~July~~May 1st and ~~January~~November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of ~~the Regulated~~a Regulatory Asset Owner by applying the net proceeds obtained by the ~~Regulated~~Regulatory Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1), or if the context requires, a specified portion or undivided interest in such property right and interest that is described in the applicable Disposition Document.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for ~~IESO~~the Servicer, any bank account into which ~~IESO~~the Servicer deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means~~, collectively,~~ each of (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, ~~which~~and "Regulatory Asset Owners" means collectively all of the Regulatory Asset Owners, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7). For greater certainty, where one Regulatory Asset Owner owns the entirety of the Regulatory Asset, "Regulatory Asset Owners" refers to this Regulatory Asset Owner.

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means, with respect to a Regulatory Asset Owner's Regulatory Asset, all rights of any kind (whether in tort, contract or otherwise) ~~of the Regulatory Asset Owner~~ that attach or are attendant or incidental to any of the other property rights or interests that comprise ~~the~~such Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is ~~[permitted]~~licensed to distribute electricity ~~to residences~~ in accordance with [this Act[17]].

"Servicer" means [To be determined], as agent for and on behalf of the Regulatory Asset Owner [To be determined – collective invoicing agent, and consider expanding].

"Settlement Date" means the [last Business Day of any month].

~~"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.~~

"Transition Charge" means, for a Ratepayer in respect of a Reference Period, the sum of (a) [one-sixth] of the Period Transition Charge~~, [divided by the Consumer Base[5]]~~, multiplied by its Allocation Factor and (b) any Bypass Charge charged to the Ratepayer in respect of the Reference Period.

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

[17] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*.
~~[5] See footnote 1, above.~~

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].[18]

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge ~~attributed~~charged to it ~~and specified as such~~ in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative ~~Invoicing Agent~~Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge ~~attributed~~charged to a Ratepayer ~~and recorded~~ in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the Ratepayer to the Regulatory Asset ~~Owner~~Owners (each with respect to its Regulatory Asset). Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.[19]

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, ~~the~~any Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

[18] Note that this is the term that describes the "asset" that we are amortizing over a longer period of time.

[19] Torys suggests that we not create a debtor/creditor relationship between ratepayers and regulatory asset owners. Instead, ratepayers would only have relationships with electricity distributors and the Fair program would rely on consumers paying distributors and distributors to collecting those amounts and remitting them to IESO. The current draft goes further to bridge the investors more directly with ratepayers. There are differences in the approaches, including reliance from a credit perspective on the LDCs (rather than an ability to replace the individual LDCs with the investors choice). This depends on the credit analysis, and comfort that a later requirement will not be accommodated without a change in the legislation. Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consideration should be given to whether that achieves the same direct relationship and whether the effectiveness of the current regulatory licensing regime should be suggested as the basis for a market-based credit decision.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the ~~Treasury~~Financing Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the ~~Treasury~~Financing Plan or as a result of amendments to the ~~Treasury~~Financing Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action, in the absence of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred under the ~~Treasury~~Financing Plan. In no case shall a Funding Obligation incurred under the ~~Treasury~~Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges ~~attributed~~charged to a Ratepayer in respect of any Finance Amount incurred under with the ~~Treasury~~Financing Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges[20]

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative ~~Invoicing Agent~~Servicer shall, as an agent of the Regulatory Asset ~~Owner~~Owners, specify the Transition Charge to be ~~attributed~~charged to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative ~~Invoicing Agent~~Servicer to the Ratepayer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be ~~deemed to have been imposed on and billed to~~binding on the applicable Ratepayer.

(2) **Calculation of the Period Transition Charge** – Not later than [35] days prior to the first day of a Reference Period, each Regulatory Asset Owner (or the Administrative Agent on its behalf) shall provide the Servicer with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. Not later than one month prior to the first day of a Reference Period, ~~[IESO]~~[6]the Servicer or if applicable the ~~[~~Alternative ~~Collection Agent]~~[7]Servicer[21] shall calculate the Period Transition Charge applicable to the Reference Period~~.~~ based on the calculations and information set forth in such written notices received from the Regulatory Asset Owners, which shall be determinative in the absence of manifest calculation error or misstatement.

[20] Details concerning Invoicing of Transition Charges (Article 4) and Collections and Remittances (Article 5) are complex. Consider how much of this can be addressed through regulations, or if acceptable based on existing OEB license conditions/codes, IESO market rules/manuals, etc.

~~[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.~~

[7][21] Should this be a designated government official, rather than an agent appointed by investors?

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, ~~[IESO]~~the Servicer or if applicable the ~~[~~Alternative ~~Collection Agent]~~Servicer shall apply the Attribution Methodology to determine the ~~Transition Charges to be attributed to the Ratepayers~~Allocation Factor for each Ratepayer of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, ~~[IESO]~~the Servicer or if applicable the ~~[~~Alternative ~~Collection Agent]~~Servicer shall inform each Electricity Distributor and if applicable any Alternative ~~Invoicing Agent~~Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge ~~attributed~~charged to a Ratepayer by ~~[IESO]~~the Servicer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **~~Successors of~~ IESO Successor** – Any ~~successor of~~ IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative ~~Invoicing Agent~~Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset ~~Owner shall~~Owners shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative ~~Invoicing Agent~~Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative ~~Invoicing Agent~~Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative ~~Invoicing Agent~~Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative ~~Invoicing Agent~~Servicer to perform such obligations and duties on behalf of the Regulatory Asset ~~Owner~~Owners.

(9) **Regulatory Asset ~~Owner has~~Owners have Standing** – The Regulatory Asset ~~Owner~~Owners may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative ~~Invoicing Agent~~Servicer or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, charge, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over

any actions brought before it by ~~a~~the Regulatory Asset ~~Owner~~Owners in relation to any such failure.[22]

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) ~~**(10)**~~ **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative ~~Invoicing Agent~~Servicer or any [Alternative Collection Agent] to ensure that Transition Charges are properly ~~attributed~~charged to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset ~~Owner~~Owners, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges ~~attributed~~charged to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall ~~[~~promptly~~]~~ segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall ~~be deemed to~~ hold such amounts in trust for ~~the~~each Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset ~~Owner~~Owners, undertake [diligent][reasonable] efforts~~]~~ to accept and collect Electricity Distributor Remittances~~.~~ from Electricity Distributors and Transition Charge Collections from Ratepayers that pay their Electricity Invoices directly to the Servicer.[23]

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall ~~be deemed to~~ hold such amounts in trust for ~~the~~each Regulatory Asset Owner.

[22] Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.

[23] Consider building this obligation into a deemed condition of licence for the IESO.

(6) **IESO Remittances** – On each [Settlement Date][24], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[8][25], then such person shall, if requested by the Regulatory Asset ~~Owner~~Owners, be obligated to act diligently to (a) facilitate the invoicing and ~~collect~~collection of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset ~~Owner~~Owners or Pledgee for the benefit of ~~the~~a Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable, each in accordance with its Regulatory Asset.

(10) **Regulatory Asset ~~Owner has~~Owners have Standing** – The Regulatory Asset ~~Owner~~Owners and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative ~~Invoicing Agent~~Servicer, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by ~~a~~the Regulatory Asset ~~Owner~~Owners in relation to any such failure.[26]

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset ~~Owner~~Owners shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the

[24] Consider frequency of remittances in light of rating requirements.

[8][25] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

[26] Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.

collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset ~~Owner~~Owners.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of ~~the~~a Regulatory Asset Owner, ~~any~~an Absolute Assignee and ~~any~~a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province ~~[~~or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.~~]~~[27]

(13) ~~[~~**Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by ~~a~~the Regulatory Asset ~~Owner~~Owners or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset ~~Owner~~Owners or Pledgee~~.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]~~, each with respect to its Regulatory Asset.

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

[27] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a Ratepayer reduces its payment of Transition Charges, despite this language, and same for Electricity Distributor Remittances and IESO Remittances.

(1) **Composition** – The Regulatory Asset shall constitute ~~a~~an existing, present property right and interest ~~of the~~consisting, collectively, of the following rights and interests of a Regulatory Asset Owner in the following (without duplication):

a. the right of a Regulatory Asset Owner to record its portion of the Regulatory Asset in its accounts;

b. the right to impose, bill, invoice, collect and receive Transition Charges from Ratepayers, including the right to determine the amount of Transition Charges in accordance with this Part;

c. ~~a.~~ the ~~present and future~~right to enforce the obligations and indebtedness of each Ratepayer to pay the Transition Charges ~~attributed~~charged to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

d. ~~b.~~ the ~~present and future~~right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative ~~Invoicing Agent~~Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. ~~c.~~ the ~~present and future~~right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

f. ~~d.~~ the ~~present and future~~right to enforce the duties and obligations of IESO and if applicable the Alternative Collection Agent to ~~accept~~collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the ~~account~~accounts of the Regulatory Asset ~~Owner~~Owners, each with respect to its Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

g. ~~e.~~ the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. ~~f.~~ all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. ~~g.~~ all Related Rights; and

j. ~~h.~~ all ~~proceeds of or derived from the foregoing.~~revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments

and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

~~The~~A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, ~~attributed~~charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner made under the ~~Treasury~~Financing Plan pursuant to a Disposition Document shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition ~~[~~, provided that the ~~description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.]~~ parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. [A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.][28]

(3) ~~**Deemed** **Perfection and Priority of Dispositions** – At the time a~~Any Disposition ~~is made, the absolute assignment of the property rights and~~of an interest in ~~the~~a Regulatory Asset ~~subject to the Disposition shall be deemed to have been and~~shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and

[28] Consider if helpful to investors, or delete.

interests acquired by the Absolute Assignee under such Disposition shall ~~have priority over~~be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge~~[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]~~. Other than as required by the ~~Treasury~~Financing Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) ~~**Deemed**~~ **Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in respect of a Funding Obligation incurred under the ~~Treasury~~Financing Plan ~~shall be deemed to have been and~~ shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset, the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the Regulatory Asset or the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act.[29] A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in Transition Charge Collections or other related proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge on the basis that the Regulatory Asset is "intangible" property, for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein. In no circumstance may the specified portions of the rights

[29] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) ~~(7)~~ **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner~~, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.~~ in accordance with the Collective Rights Agreement.[30]

Article 7 – Establishment of the Fair Allocation Plan[31]

(1) Adoption of the Fair Allocation Plan – The [Minister of Energy][32] may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, [except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy ~~[~~in compliance with Section •].

(2) Principles and Parameters[33] – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters~~9~~[34]:

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable

[30] This is necessary to ensure that if there are multiple regulatory asset owners and pledgees, they will be coordinated in the application of their rights of enforcement, etc.

[31] The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current Power Contracts and not invest in extending service lives to secure further power contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

[32] Input required. If the MOE is given this power, conform to applicable authorities (e.g., plans and directives).

[33] Consideration will be given as to whether these details should be included in the Regulation.

~~9~~[34] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just il lustrative to advance a discussion among the stakeholders.

assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][~~10~~35] .

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative ~~to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs~~.

(3) Attribution Methodology – The Fair Allocation Plan [shall] specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. ~~[may have regard to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*~~

(4) [Confirmation][Review] of the Fair Allocation Plan – [OEB?][36]

Article 8 – The ~~Treasury~~Financing Plan[37]

(1) Power to Prepare and Implement the ~~Treasury~~Financing Plan – In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall prepare and propose the adoption of a ~~Treasury~~Financing Plan. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a

[~~10~~35] Consider if a quantitative limit needs to be included in the legislation.

[36] Any approvals or consents by the OEB will be obtained before any Funding Obligation that is dependent on such approval or consent is incurred. Any such approval or consent will be irrevocable and non-appealable. Any regulatory action occurring after any incurrence will not affect the related Funding Obligation or underlying rights in the Regulatory Asset.

[37] Consideration will be given as to whether these details should be included in the Regulation.

~~Treasury~~Financing Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a ~~Treasury~~Financing Plan.

(2) **Required Terms and Conditions of the ~~Treasury~~Financing Plan** – The ~~Treasury~~Financing Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The ~~Treasury~~Financing Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule 3 and such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation].

(3) **Power to Review and Approve the ~~Treasury~~Financing Plan** – The Minister of Energy may, by written order, designate one or more persons to review the ~~Treasury~~Financing Plan and to review and assess the consistency of the Funding Obligations incurred with such ~~Treasury~~Financing Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the ~~Treasury~~Financing Plan, and submit a revised ~~Treasury~~Financing Plan to the ~~**[OEB]**~~designated reviewer for approval within [the time period specified in such written order]/[[●] days of such written order].[***Consider periodic amendments to the ~~Treasury~~Financing Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***]

(4) **Approval of ~~Treasury~~Financing Plan –** The **[OEB]** shall have the power to and shall approve or disapprove of the ~~Treasury~~Financing Plan based solely on whether the ~~Treasury~~Financing Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the ~~Treasury~~Financing Plan, then such ~~Treasury~~Financing Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the ~~Treasury~~Financing Plan or otherwise fails to approve the ~~Treasury~~Financing Plan, then the Administrative Agent shall re-submit the ~~Treasury~~Financing Plan with such amendments as the Administrative Agent shall consider necessary for the ~~Treasury~~Financing Plan to be approved by the OEB.[38]

(5) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the

[38] Once the Financing Plan is reviewed and approved there would be no further OEB review. If there is opportunity for further review, such review will have no impact on prior issued debt. Any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding).

Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the ~~Treasury~~Financing Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the ~~Treasury~~Financing Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(6) Establishment of Special Purpose Entities – If the implementation of the ~~Treasury~~Financing Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations as a Financing Entity under the ~~Treasury~~Financing Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics specified in Schedule 4 in establishing such special purpose entity.]

(7) Obligation to Apply IESO Remittances – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset ~~Owner~~Owners, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.~~11~~[39]

(8) Non-Recourse – The ~~Treasury~~Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative ~~Invoicing Agent~~Servicer, and Alternative Collection Agent, the Administrative Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part or expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(9) Incurrences are Binding – Despite any failure to adhere to the ~~Treasury~~Financing Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of ~~the~~a Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall ~~be deemed to~~ be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters[40]

~~11~~[39] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

[40] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article is under consideration.

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the ~~authority~~[OEB] or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part[41].

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.][42]

Article 10 – Undertaking of the Lieutenant Governor in Council[43]

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The [Lieutenant Governor in Council ~~may~~] shall not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly[, including through the introduction of any bill or the passing of any legislation or regulation]. The ~~Lieutenant Governor in Council undertakes that the~~ amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council[, including through the introduction of any bill or the passing of any legislation or regulation].

(2) **Undertaking and Agreement** – The Lieutenant Governor in Council ~~undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Lieutenant Governor in Council will~~shall not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset ~~Owner~~Owners,

[41] Consider scope of OEB regulation and whether a Financing Entity should be subject to this sort of provision in any event.

[42] OPG has indicated that the risks and cost consequences to OPG of being an Administrative Agent or of consolidating a Financing Entity for accounting purposes should not be considered by the OEB in setting the regulated payment amounts for OPG. To be discussed.]

[43] Under consideration.

including any Absolute Assignee from time to time, and any Pledgee from time to time[,including through the introduction of any bill or the passing of any legislation or regulation].

[If IESO becomes insolvent or otherwise incapable of performing its obligations under this Part, an IESO Successor will be established that is capable of performing such obligations in order that the Regulatory Asset Owners may appoint the IESO Successor as an Alternative Servicer or Alternative Collection Agent. Regulatory Asset Owners shall be fully compensated for any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article 10(2) for any loss suffered by the Regulatory Asset Owner as a result of such failure.[44]]

(3) References to the Undertaking and Agreement – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable ~~expectations~~requirements of the Province associated with ~~any Regulated~~a Regulatory Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a ~~Treasury~~Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable ~~expectations~~requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by ~~the~~a Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the ~~Treasury~~Financing Plan.

[44] Requested by Torys. For discussion.

Article 12- Miscellaneous[45]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the ~~Treasury~~Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the ~~Treasury~~Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the ~~Treasury~~Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part ~~[or under any Funding Obligation]~~ and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

[45] OPG would like the specific amendments related to OPG to be included in the Bill.]

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the ~~Treasury~~Financing Plan

The ~~Treasury~~Financing Plan shall have regard to the following principles, parameters, requirements and conditions:[***Consider others.***]

(1) the ~~Treasury~~Financing Plan shall, in respect of each Reference Period, describe the allocations of Unrecovered Transition Costs to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of the Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describe alternative funding arrangements considered to be suitable for the purpose of funding the estimated Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by the Regulatory Asset ~~Owner~~Owners for such purpose;

(4) such Funding Obligations shall reflect quantities, maturities, payment obligations, prepayment or redemption rights and such other features so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of each Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

(5) the ~~Treasury~~Financing Plan shall reflect the outcome of a financial model that incorporates the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges ~~attributed~~charged to a hypothetical Ratepayer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the ~~Treasury~~Financing Plan may permit the OEB to check progress against the model from time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the ~~Treasury~~Financing Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***]

(6) the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Regulatory Asset ~~Owner[s]~~Owners will require committed access to short term liquidity to cover estimated Funding Shortfalls prior to incurring fixed

term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the ~~Treasury~~Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Administrative Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations shall not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the ~~Treasury~~Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Administrative Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Administrative Agent shall cause the ~~[~~applicable~~]~~ Regulatory Asset Owner to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Administrative Agent will select counterparties under any transaction to be entered into by a Regulatory Asset Owner, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Administrative Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Administrative Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and

other Funding Costs, and the need to maintain a stable funding platform to finance the Funding Shortfall from time to time on a basis that is consistent with the allocations of Unrecovered Transition Costs to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Administrative Agent and other agents and service providers to the Regulatory Asset ~~Owner[s]~~Owners may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by a Regulatory Asset Owner, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) a description of each special purchase entity that will purchase the Regulatory Asset from the IESO, including proposed capitalization, governance, and restrictions on their powers and activities having regard to the parameters in Schedule 4; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

Schedule 4

Creation of any Special Purpose Entity to become a Regulatory Asset Owner]

(1) Powers and Abilities:

a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. Each Regulatory Asset Owner shall be authorized to:

i. incur the Funding Obligations contemplated by a ~~Treasury~~Financing Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a ~~Treasury~~Financing Plan and for administrative services; and

iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;

c. So long as any Funding Obligations contemplated under a ~~Treasury~~Financing Plan are outstanding, ~~the~~a Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;

d. ~~the~~a Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a ~~Treasury~~Financing Plan;

e. ~~the~~a Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a ~~Treasury~~Financing Plan; and

f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a ~~Treasury~~Financing Plan.

(2) Governance of Regulatory Asset Owner – ~~The~~A Regulatory Asset Owner ~~shall~~ shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

h. **[Delegation of powers and duties to administrative agents]**

Hi Team,

Please find attached the draft legislation for FHP.

Adam – John would the summary note to be updated based on this draft, would you be able to work on that?

Thanks,
Gavin He

Subject: "Fair" Legislation (Discussion Draft)

Thanks for your comments, Michael. The attached version picks up many of your, Peter's and H&W's comments. In some cases it defers consideration, pending dealer input (such as your suggestion of tracking individual, standalone Regulatory Assets per transaction; delinking the investors from the LDCs, in favour of having IESO be the main servicer; and deleting some of the US precedent language). The regulatory input included in your mark-up was particularly helpful, although not easily dealt with tonight without the Province's input, so many of those points have simply been brought forward with additional footnotes for now. The manner and extent of delegations (primarily the Financing Plan and the Fair Allocation Plan), the nature of OEB review and regulatory actions, the scope of the undertaking and other similar issues, are still under consideration by MOE. Your comments to the effect that nothing can affect a funding obligation once incurred were referenced, as I think that is a pervasive and correct idea. The ultimate location

of provisions (Part of the Electricity Act; new Act; Regulations) is still under consideration – for now it's all in this document to facilitate this group review. Finally, there are a number of "validity" type points, which arose in your mark-up and which we are still thinking about. We can discuss those further in the morning. Steve

Subject: Torys Comments on Blakes Draft Legislation

All,

I am attaching our comments on the last version of the draft legislation sent to us by Blakes. Both a clean and blacklined version are attached.

This is being distributed to OPG at the same time as everyone else and so remains subject to their comments as this is very much a work in process.

We also just received comments from Hunton & Williams but in the interests of time we have not been able to include those in our mark up, but expect to be in a position to raise any of their big issues at our meeting tomorrow. Also, I will send their comments separately to Blakes.

Regards,

Michael K. Feldman

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose[1]

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the construction and development of facilities for the purpose of long-term operation and generation of electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). [The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets]; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging consumers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period[2]. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under

---

[1] Consider the scope and breadth of the Purpose section. This text is considered to be useful to establish the legislative basis for the statute, which text will be useful in the event of a challenge.

[2] Consider modifying this to also refer to gas contracts and hydroelectric contracts, which provide for mechanics that are not based on contracts for differences.

the Power Contracts in respect of such period. If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall.[3] In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts . The right and interest in and to collect such financial obligations, which will take the form of the Regulatory Asset contemplated in this Part and will constitute property rights and interests. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the Financing Plan contemplated in this Part. The Financing Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative charged to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any

[3] Confirm whether any RPP forecasting variance is to be included in (i) a funding shortfall; and (ii) related IESO financing costs to be included in Transition Charges.]

applicable tax amounts) that are or become payable by the Regulatory Asset Owners during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, a Regulatory Asset Owner under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on a Regulatory Asset Owner or incurred by on behalf of a Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of a Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager of director fees; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (o) any rating agency fees; and (p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the Financing Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Financing Plan in compliance with the requirements set out in Schedule 2.

"Allocation Factor" means, in respect of a Ratepayer for a Reference Period, the number (expressed as a percentage) determined in respect of the Ratepayer by [IESO] based on the application of the Attribution Methodology in respect of the Reference Period.[4]

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owners.

"Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.

"Attribution Methodology"[5] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group based on its Allocation Factor.

---

[4] Consider basing this on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those would be identified and rolled into the True-Up.

"Bypass Charge" means [To be developed].[6]

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Servicer or the Administrative Agent, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[7]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) and each Pledgee that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which a Regulatory Asset Owner effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor licensed by the OEB in respect of such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative Servicer) or by the Servicer in respect of electricity charges and related services and amounts incurred, assessed or charged in respect of connectivity to a distribution network in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of

---

[5] A key question will be how the overall costs will be spread across the rate base. For example, the allocation may be volumetric or not, or some combination of a flat amount and a volumetric charge. This will also impact any discussion regarding any bypass (e.g., grid exit) charge in connection with the bypass discussion.

[6] Consideration needs to be given to any amount that will be charged to a ratepayer who successfully bypasses (e.g., leaves the grid). In allocating Transition Charges, considerations would include whether to reserve Bypass Charges and spread them over the life of the program, and correspondingly how to factor those into the calculation of Transition Charges.

[7] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" [has the meaning given in Article 1].

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owners during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owners under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financing Entity" means an entity established in accordance with the Financing Plan to acquire all or an interest in the Regulatory Asset as an Absolute Assignee and to enter into Funding Obligations to finance such acquisition.[8]

"Financing Plan" means the written plan [prepared by the Administrative Agent] in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be

[8] OPG has suggested that the legislation provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act. These raise issues for consideration by the stakeholders.

given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) the establishment and operation of any Financing Entity; and (i) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including principal, interest and other financing charges, indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies and all taxes payable in connection with the foregoing) incurred by or on behalf of a Regulatory Asset Owner under the Financing Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.[9]

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.[10]

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment [attributable to the Power Contracts] in accordance with the Fair Allocation Plan.[11]

---

[9] OPG has asked whether this should include IESO finance arrangements.

[10] Consider whether to simplify by referring to the calculations of GA, with vs. without Fair. The issue would be that Fair is then linked into the GA calculation specifically, rather than to the specific assets that are subject to revised amortization under Fair. The constitutional position requires a clear nexus to the assets. Also, confirm whether RPP forecasting variances are to be included.

[11] IESO to confirm its ability to allocate a shortfall in a given month between what it receives and what it owes under the GA, in order to calculate (a) existing volume-based variances which are rolled into subsequent month GA and trued-up every 6 months under RPP, (b) existing variances attributable to OREC which are funded by the Province, and (c) new variances attributable to Fair Hydro program.]

"Generator" means a generator of electricity that is subject to [this Act][12].

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.[13]

"Green Generation Initiative" [has the meaning given in Article 1].

"IESO" means the Independent Electricity System Operator created pursuant to [insert].

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Period, exceeds (ii) the GA Power Contract Contribution for the Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for [managing the Province's power system].

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods

---

[12] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*. "Generator is a defined term in other legislation (OEB Act, Electricity Act) so this should ultimately be a distinct term such as "FH Generator" to avoid confusion.

[13] Note that if adjustments for Fair Hydro program are to be applied after existing GA adjustments, then this may need a new name (such as "FH Adjustment").

occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[14]

"Province" means the Province of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.[15]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices[16] during the Reference Period.

---

[14] Consider expanding to include PPAs that are not contracts for differences. Should this contemplate the possibility of additional or amended power contracts?

[15] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk. Consider terminology to align with the description of the eligible customer class provided by the Ministry, e.g., same as OREC-eligible consumers except for consumers served by Independent Power Authorities (who do not pay GA). Also, consider use of the word "retail", to avoid limiting to customers of retailers and confirm removal of reference to transmission-connected customers.

[16] Expand to include eligible consumers who are not customers of Electricity Distributors (e.g., suite-metered customers).

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of a Regulatory Asset Owner by applying the net proceeds obtained by the Regulatory Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1), or if the context requires, a specified portion or undivided interest in such property right and interest that is described in the applicable Disposition Document.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for the Servicer, any bank account into which the Servicer deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each of (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, and "Regulatory Asset Owners" means collectively all of the Regulatory Asset Owners, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7). For greater certainty, where one Regulatory Asset Owner owns the entirety of the Regulatory Asset, "Regulatory Asset Owners" refers to this Regulatory Asset Owner.

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means, with respect to a Regulatory Asset Owner's Regulatory Asset, all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is licensed to distribute electricity in accordance with [this Act[17]].

"Servicer" means [To be determined], as agent for and on behalf of the Regulatory Asset Owner [To be determined – collective invoicing agent, and consider expanding].

"Settlement Date" means the [last Business Day of any month].

"Transition Charge" means, for a Ratepayer in respect of a Reference Period, the sum of (a) [one-sixth] of the Period Transition Charge multiplied by its Allocation Factor and (b) any Bypass Charge charged to the Ratepayer in respect of the Reference Period.

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].[18]

---

[17] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*.

[18] Note that this is the term that describes the "asset" that we are amortizing over a longer period of time.

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge charged to a Ratepayer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the Ratepayer to the Regulatory Asset Owners (each with respect to its Regulatory Asset). Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.[19]

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the Financing Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action, in the absence of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan

---

[19] Torys suggests that we not create a debtor/creditor relationship between ratepayers and regulatory asset owners. Instead, ratepayers would only have relationships with electricity distributors and the Fair program would rely on consumers paying distributors and distributors to collecting those amounts and remitting them to IESO. The current draft goes further to bridge the investors more directly with ratepayers. There are differences in the approaches, including reliance from a credit perspective on the LDCs (rather than an ability to replace the individual LDCs with the investors choice). This depends on the credit analysis, and comfort that a later requirement will not be accommodated without a change in the legislation. Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consideration should be given to whether that achieves the same direct relationship and whether the effectiveness of the current regulatory licensing regime should be suggested as the basis for a market-based credit decision.

applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges charged to a Ratepayer in respect of any Finance Amount incurred under with the Financing Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges[20]

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Servicer to the Ratepayer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable Ratepayer.

(2) **Calculation of the Period Transition Charge** – Not later than [35] days prior to the first day of a Reference Period, each Regulatory Asset Owner (or the Administrative Agent on its behalf) shall provide the Servicer with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. Not later than one month prior to the first day of a Reference Period, the Servicer or if applicable the Alternative Servicer[21] shall calculate the Period Transition Charge applicable to the Reference Period based on the calculations and information set forth in such written notices received from the Regulatory Asset Owners, which shall be determinative in the absence of manifest calculation error or misstatement.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the Servicer or if applicable the Alternative Servicer shall apply the Attribution Methodology to determine the Allocation Factor for each Ratepayer of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the Servicer or if applicable the Alternative Servicer shall inform each Electricity Distributor and if applicable any Alternative Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

---

[20] Details concerning Invoicing of Transition Charges (Article 4) and Collections and Remittances (Article 5) are complex. Consider how much of this can be addressed through regulations, or if acceptable based on existing OEB license conditions/codes, IESO market rules/manuals, etc.

[21] Should this be a designated government official, rather than an agent appointed by investors?

(5) **Adjustments** – The amount of any Transition Charge charged to a Ratepayer by the Servicer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset Owners shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Servicer to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(9) **Regulatory Asset Owners have Standing** – The Regulatory Asset Owners may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, charge, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by the Regulatory Asset Owners in relation to any such failure.[22]

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative Servicer or any [Alternative Collection Agent] to ensure that

---

[22] Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.

Transition Charges are properly charged to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges charged to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for each Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable] efforts to accept and collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from Ratepayers that pay their Electricity Invoices directly to the Servicer.[23]

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall hold such amounts in trust for each Regulatory Asset Owner.

(6) **IESO Remittances** – On each [Settlement Date][24], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to

[23] Consider building this obligation into a deemed condition of licence for the IESO.

[24] Consider frequency of remittances in light of rating requirements.

the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[25], then such person shall, if requested by the Regulatory Asset Owners, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset Owners or Pledgee for the benefit of a Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable, each in accordance with its Regulatory Asset.

(10) **Regulatory Asset Owners have Standing** – The Regulatory Asset Owners and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative Servicer, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by the Regulatory Asset Owners in relation to any such failure. [26]

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset Owners shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11)

---

[25] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

[26] Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.

shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset Owners.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[27]

(13) **Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by the Regulatory Asset Owners or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owners or Pledgee, each with respect to its Regulatory Asset.

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute an existing, present property right and interest consisting, collectively, of the following rights and interests of a Regulatory Asset Owner in the following (without duplication):

a. the right of a Regulatory Asset Owner to record its portion of the Regulatory Asset in its accounts;

[27] Consider whether it makes sense to create a “deemed collection” payment obligation on Electricity Distributors to the extent a Ratepayer reduces its payment of Transition Charges, despite this language, and same for Electricity Distributor Remittances and IESO Remittances.

b. the right to impose, bill, invoice, collect and receive Transition Charges from Ratepayers, including the right to determine the amount of Transition Charges in accordance with this Part;

c. the right to enforce the obligations and indebtedness of each Ratepayer to pay the Transition Charges charged to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

f. the right to enforce the duties and obligations of IESO and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

g. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. all Related Rights; and

j. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any

consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner made under the Financing Plan pursuant to a Disposition Document shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. [A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.][28]

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge. Other than as required by the Financing Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

---

[28] Consider if helpful to investors, or delete.

(5) **Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in respect of a Funding Obligation incurred under the Financing Plan shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset, the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the Regulatory Asset or the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act.[29] A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in Transition Charge Collections or other related proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge on the basis that the Regulatory Asset is "intangible" property, for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.[30]

---

[29] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

[30] This is necessary to ensure that if there are multiple regulatory asset owners and pledgees, they will be coordinated in the application of their rights of enforcement, etc.

Article 7 – Establishment of the Fair Allocation Plan[31]

(1) **Adoption of the Fair Allocation Plan** – The [Minister of Energy][32] may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, [except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy in compliance with Section •].

(2) **Principles and Parameters**[33] – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[34]:

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in

---

31 The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current Power Contracts and not invest in extending service lives to secure further power contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

32 Input required. If the MOE is given this power, conform to applicable authorities (e.g., plans and directives).

33 Consideration will be given as to whether these details should be included in the Regulation.

34 We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.

the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][35].

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative.

(3) Attribution Methodology – The Fair Allocation Plan [shall] specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation.

(4) [Confirmation][Review] of the Fair Allocation Plan – [OEB?][36]

Article 8 – The Financing Plan[37]

(1) Power to Prepare and Implement the Financing Plan – In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall prepare and propose the adoption of a Financing Plan. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a Financing Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a Financing Plan.

(2) Required Terms and Conditions of the Financing Plan – The Financing Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The Financing Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule 3 and such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation].

---

[35] Consider if a quantitative limit needs to be included in the legislation.

[36] Any approvals or consents by the OEB will be obtained before any Funding Obligation that is dependent on such approval or consent is incurred. Any such approval or consent will be irrevocable and non-appealable. Any regulatory action occurring after any incurrence will not affect the related Funding Obligation or underlying rights in the Regulatory Asset.

[37] Consideration will be given as to whether these details should be included in the Regulation.

(3) **Power to Review and Approve the Financing Plan** – The Minister of Energy may, by written order, designate one or more persons to review the Financing Plan and to review and assess the consistency of the Funding Obligations incurred with such Financing Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the Financing Plan, and submit a revised Financing Plan to the designated reviewer for approval within [the time period specified in such written order]/[[●] days of such written order].[***Consider periodic amendments to the Financing Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***]

(4) **Approval of Financing Plan –** The **[OEB]** shall have the power to and shall approve or disapprove of the Financing Plan based solely on whether the Financing Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the Financing Plan, then such Financing Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the Financing Plan or otherwise fails to approve the Financing Plan, then the Administrative Agent shall re-submit the Financing Plan with such amendments as the Administrative Agent shall consider necessary for the Financing Plan to be approved by the OEB.[38]

(5) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Financing Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Financing Plan shall require the

[38] Once the Financing Plan is reviewed and approved there would be no further OEB review. If there is opportunity for further review, such review will have no impact on prior issued debt. Any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding).

Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(6) Establishment of Special Purpose Entities – If the implementation of the Financing Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations as a Financing Entity under the Financing Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics specified in Schedule 4 in establishing such special purpose entity.]

(7) Obligation to Apply IESO Remittances – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset Owners, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.[39]

(8) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, and Alternative Collection Agent, the Administrative Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part or expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(9) Incurrences are Binding – Despite any failure to adhere to the Financing Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of a Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters[40]

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) Power to Investigate Compliance and Impose Regulatory Sanctions - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the

---

[39] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

[40] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article is under consideration.

Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the [OEB] or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part[41].

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.][42]

Article 10 – Undertaking of the Lieutenant Governor in Council[43]

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The [Lieutenant Governor in Council] shall not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly[,including through the introduction of any bill or the passing of any legislation or regulation]. The amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council[,including through the introduction of any bill or the passing of any legislation or regulation].

(2) **Undertaking and Agreement** – The Lieutenant Governor in Council shall not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset Owners, including any Absolute Assignee from time to time, and any Pledgee from time to time[,including through the introduction of any bill or the passing of any legislation or regulation].

[If IESO becomes insolvent or otherwise incapable of performing its obligations under this Part, an IESO Successor will be established that is capable of performing such obligations in order that the Regulatory Asset Owners may appoint the IESO Successor as an Alternative Servicer or Alternative Collection Agent. Regulatory Asset Owners

---

[41] Consider scope of OEB regulation and whether a Financing Entity should be subject to this sort of provision in any event.

[42] OPG has indicated that the risks and cost consequences to OPG of being an Administrative Agent or of consolidating a Financing Entity for accounting purposes should not be considered by the OEB in setting the regulated payment amounts for OPG. To be discussed.]

[43] Under consideration.

shall be fully compensated for any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article 10(2) for any loss suffered by the Regulatory Asset Owner as a result of such failure.[44]]

(3) References to the Undertaking and Agreement – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with a Regulatory Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by a Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 12- Miscellaneous[45]

---

[44] Requested by Torys. For discussion.

[45] OPG would like the specific amendments related to OPG to be included in the Bill.]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the Financing Plan

The Financing Plan shall have regard to the following principles, parameters, requirements and conditions:[***Consider others.***]

(1) the Financing Plan shall, in respect of each Reference Period, describe the allocations of Unrecovered Transition Costs to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of the Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describe alternative funding arrangements considered to be suitable for the purpose of funding the estimated Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by the Regulatory Asset Owners for such purpose;

(4) such Funding Obligations shall reflect quantities, maturities, payment obligations, prepayment or redemption rights and such other features so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of each Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

(5) the Financing Plan shall reflect the outcome of a financial model that incorporates the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical Ratepayer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the Financing Plan may permit the OEB to check progress against the model from time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the Financing Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***]

(6) the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Regulatory Asset Owners will require committed access to short term liquidity to cover estimated Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate a Regulatory Asset Owner to repay

an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Administrative Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations shall not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Administrative Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Administrative Agent shall cause the applicable Regulatory Asset Owner to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Administrative Agent will select counterparties under any transaction to be entered into by a Regulatory Asset Owner, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Administrative Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Administrative Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the Funding Shortfall from time to time on a basis that is consistent with the allocations of Unrecovered Transition Costs to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Administrative Agent and other agents and service providers to the Regulatory Asset Owners may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by a Regulatory Asset Owner, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) a description of each special purchase entity that will purchase the Regulatory Asset from the IESO, including proposed capitalization, governance, and restrictions on their powers and activities having regard to the parameters in Schedule 4; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

Schedule 4

Creation of any Special Purpose Entity to become a Regulatory Asset Owner]

(1) Powers and Abilities:

a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. Each Regulatory Asset Owner shall be authorized to:

i. incur the Funding Obligations contemplated by a Financing Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Financing Plan and for administrative services; and

iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;

c. So long as any Funding Obligations contemplated under a Financing Plan are outstanding, a Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;

d. a Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Financing Plan;

e. a Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Financing Plan; and

f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a Financing Plan.

(2) Governance of Regulatory Asset Owner – A Regulatory Asset Owner shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

h. **[Delegation of powers and duties to administrative agents]**

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro" – Part V.2

Article 1 – Purpose[1]

IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and ~~future~~ quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as to encourage the ~~long-term~~ construction and development of facilities for the purpose of ~~generating~~long-term operation and generation of electricity using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer and feed in tariff programs (the "Green Generation Initiative"). [The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets]; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers. The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging ~~ratepayers~~consumers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).

Each month, the IESO determines the Global Adjustment payable by consumers for the consumption of electricity in the Province. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts exceed the market price for electricity for the quantities of electricity specified under the Power Contracts for the relevant period[2]. The relationship between the past, present and future benefits to Ratepayers from the Green Generation Initiative, on the one hand, and the costs of the Green Generation Initiative borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect principles and parameters that can be applied from time to time in order to establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative across present and future Ratepayers. A plan to allocate such costs and benefits equitably across present and future Ratepayers may be developed based on those principles and parameters (a "Fair Allocation Plan").

If a Fair Allocation Plan determines that the equitable allocation of the Global Adjustment to the Ratepayers of a particular time period in respect of the Power Contracts should be reduced below the amount otherwise determined, the amount payable by such Ratepayers to Electricity Distributors in respect of such period, and in turn by the Electricity Distributors to the IESO, would, in the aggregate, be less than the amount payable by the IESO to the Generators under the Power Contracts in respect of such period. If the difference is greater than any net Power

[1] Consider the scope and breadth of the Purpose section. This text is considered to be useful to establish the legislative basis for the statute, which text will be useful in the event of a challenge.

[2] Consider modifying this to also refer to gas contracts and hydroelectric contracts, which provide for mechanics that are not based on contracts for differences.

Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall.[3] In order for IESO to cover such a funding shortfall for a period, IESO will need to obtain funding from another source, which could include funding from third party sources operating in public and private capital markets. If a funding obligation is incurred in order to enable the IESO to cover a funding shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs will be incurred and may become payable in one or more other periods.

It will be necessary to provide a reliable and committed source of cash flows to enable IESO to repay such funding obligations and to pay related funding costs with certainty when the funding obligations become due and payable. This Part imposes irrevocable and non-bypassable financial obligations of Ratepayers to pay amounts incurred in respect of such funding obligations when they become due and payable~~. Such~~ and establishes a right to invoice and collect such amounts . The right and interest in and to collect such financial obligations ~~will constitute property rights and interests~~, which will take the form of the Regulatory Asset contemplated in this Part and will constitute property rights and interests. The Regulatory Asset will be sold and absolutely assigned and will belong to one or more newly created financing entities, which in turn will finance their purchase of such Regulatory Asset by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf the financing entities by an administrative agent (initially OPG), under the ~~Treasury~~Financing Plan contemplated in this Part. The ~~Treasury~~Financing Plan will seek to reasonably match the payment obligations arising under funding obligations and borne by the future Ratepayers of the period in which such payment obligations become due, with the costs and benefits of the Green Generation Initiative ~~attributed~~charged to such future Ratepayers under the Fair Allocation Plan.

The purpose of this Part is to establish the basis upon which intergenerational fairness can be achieved by ~~attributing~~charging the costs and benefits of the Green Generation Initiative to present and future Ratepayers on an equitable and cost effective basis.

Article 2 - Definitions

In this Part:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner ~~assigns, transfers, conveys, sells, contributes, sets over, exchanges or disposes all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the transferring Regulatory Asset Owner's right, title and interest in, to and in respect of the Regulatory Asset~~effects a Disposition.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Administrative Agent whose records shall be determinative for the purposes of this Part in the absence of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any

[3] Confirm whether any RPP forecasting variance is to be included in (i) a funding shortfall; and (ii) related IESO financing costs to be included in Transition Charges.]

applicable tax amounts) that are or become payable by the ~~Regulated~~Regulatory Asset ~~Owner~~Owners during the Reference Period and that were incurred or committed to directly or indirectly in connection with the incurrence of Funding Obligations under the ~~Treasury~~Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Administrative Agent on behalf of, ~~the~~a Regulatory Asset Owner under the ~~Treasury~~Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on ~~the~~a Regulatory Asset Owner or incurred by on behalf of ~~the~~a Regulatory Asset Owner under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Administrative Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the ~~Treasury~~Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative ~~Invoicing Agent~~Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of ~~the~~a Regulatory Asset Owner; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager of director fees; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (~~m~~o) any rating agency fees; and (~~n~~p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith for recovery and payment under the ~~Treasury~~Financing Plan.

"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the ~~Treasury~~Financing Plan in compliance with the requirements set out in Schedule 2.

"Allocation Factor" means, in respect of a Ratepayer for a Reference Period, the number (expressed as a percentage) determined in respect of the Ratepayer by [IESO] based on the application of the Attribution Methodology in respect of the Reference Period.[4]

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset ~~Owner~~Owners.

"Alternative ~~Invoicing Agent~~Servicer" means a person appointed under Section 4(8) to assume the ~~invoicing and other activities of any Electricity Distributor~~obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset ~~Owner~~Owners.

[4] Consider basing this on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those would be identified and rolled into the True-Up.

"Attribution Methodology"[15] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to the individual Ratepayers of the applicable Ratepayer Group based on its Allocation Factor.

"Bypass Charge" means [To be developed].[6]

"Collected Amount Adjustment" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Servicer or the Administrative Agent, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[27]

~~["Consumer Base" means, for a Reference Period, the total number of Ratepayers in the Ratepayer Group determined by the Administrative Agent as of the [30th] day immediately preceding the first day of the Reference Period.]~~

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) and each Pledgee that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which a Regulatory Asset Owner effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the distributor ~~of electricity to residences located in~~licensed by the OEB in respect of such Service Area.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the

[15] A key question will be how the overall costs will be spread across the rate base. For ~~simplicity, overall costs could be spread across the rate base based on a *per capita* (ratepayer) concept. This would generally mean that all consumers who are invoiced in a month would pay the same Transition Charge, and to the extent that the invoiced amounts (i.e., the Transition Charges billed for a month) are higher or lower than the actual costs, due to a change in the Consumer Base, that difference should (among other things) be reflected in the True-Up calculation for the relevant reference period (see "Collected Amount Adjustment"). To the extent that a different allocation method is adopted (such as based on actual electricity use by individual consumers), the divisor for the Transition Charge will need to be modified~~example, the allocation may be volumetric or not, or some combination of a flat amount and a volumetric charge. This will also impact any discussion regarding any bypass (e.g., grid exit) charge in connection with the bypass discussion.

[6] Consideration needs to be given to any amount that will be charged to a ratepayer who successfully bypasses (e.g., leaves the grid). In allocating Transition Charges, considerations would include whether to reserve Bypass Charges and spread them over the life of the program, and correspondingly how to factor those into the calculation of Transition Charges.

[27] This would pick up adjustments based on actual collection experience, changes in the Consumer Base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, an Alternative ~~Invoicing Agent)~~Servicer) or by the Servicer in respect of electricity charges and related services and amounts incurred, assessed or ~~attributed~~charged in respect of ~~a residence located~~connectivity to a distribution network in the Electricity Distributor's designated Service Area.

"Estimate" means, in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Administrative Agent having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Part in the absence of a manifest calculation error.

"Fair Allocation Plan" [has the meaning given in Article ~~1.~~1].

"Finance Amount" means, in respect of a Reference Period, the sum (without duplication) of the following amounts for the Reference Period: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset ~~Owner~~Owners during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset ~~Owner~~Owners under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the ~~Treasury~~Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the ~~Treasury~~Financing Plan.

"Financing Entity" means an entity established in accordance with the Financing Plan to acquire all or an interest in the Regulatory Asset as an Absolute Assignee and to enter into Funding Obligations to finance such acquisition.[8]

"Financing Plan" means the written plan [prepared by the Administrative Agent] in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) the establishment and operation of any Financing Entity; and (i) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.

"Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset Owner during the Reference Period in respect of all Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation, exceeds (b) the aggregate of all Finance Receipts for the Reference Period.

"Funding Obligation" means each payment obligation (including principal, interest and other financing charges, indebtedness, payment obligations arising under or in respect of derivatives, payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies and all taxes payable in connection with the foregoing) incurred by or on behalf of ~~the~~a Regulatory Asset Owner under the ~~Treasury~~Financing Plan in order to fund a Funding Shortfall for a Reference Period, including any Refinancing of another such payment obligation.[9]

"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.[10]

[8] OPG has suggested that the legislation provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act. These raise issues for consideration by the stakeholders.

[9] OPG has asked whether this should include IESO finance arrangements.

[10] Consider whether to simplify by referring to the calculations of GA, with vs. without Fair. The issue would be that Fair is then linked into the GA calculation specifically, rather than to the specific assets that are subject to revised amortization under Fair. The constitutional position requires a clear nexus to the assets. Also, confirm whether RPP forecasting variances are to be included.

"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment [attributable to the Power Contracts] in accordance with the Fair Allocation Plan.[11]

"Generator" means a generator of electricity that is subject to [this Act][12].

"Global Adjustment" means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.[13]

"Green Generation Initiative" [has the meaning given in Article ~~1.~~1].

"IESO" means the Independent Electricity System Operator created pursuant to [insert].

"IESO Applied Surplus" means, for a Reference Period, the lesser of (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference ~~Periods~~Period, exceeds (ii) the GA Power Contract Contribution for the Reference Period and (b) the IESO Unapplied Surplus on the last day of the immediately preceding Reference Period.

"IESO Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators ~~to IESO~~ under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.

"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators ~~to IESO~~ under all Power Contracts for the Reference Period.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset ~~Owner~~Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for [managing the Province's power system].

[11] IESO to confirm its ability to allocate a shortfall in a given month between what it receives and what it owes under the GA, in order to calculate (a) existing volume-based variances which are rolled into subsequent month GA and trued-up every 6 months under RPP, (b) existing variances attributable to OREC which are funded by the Province, and (c) new variances attributable to Fair Hydro program.]

[12] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*. "Generator is a defined term in other legislation (OEB Act, Electricity Act) so this should ultimately be a distinct term such as "FH Generator" to avoid confusion.

[13] Note that if adjustments for Fair Hydro program are to be applied after existing GA adjustments, then this may need a new name (such as "FH Adjustment").

"IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.

"Period Transition Charge" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Pledge" means a lien, mortgage, charge~~, right of set-off~~ or security interest granted to or in favour of a Pledgee by a Regulatory Asset Owner in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Regulatory Asset.

"Pledgee" means a person to whom ~~[or for whose benefit]~~ a Regulatory Asset Owner grants a Pledge.

"Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.[~~3~~14]

"Province" means the Province of Ontario.

"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.[~~4~~15]

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices[16] during the Reference Period.

[~~3~~14] Consider expanding to include PPAs that are not contracts for differences. Should this contemplate the possibility of additional or amended power contracts?

[~~4~~15] Need to describe consumers in a fashion that is broad and not weakened by a bypass risk. Consider terminology to align with the description of the eligible customer class provided by the Ministry, e.g., same as OREC-eligible consumers except for consumers served by Independent Power Authorities (who do not pay GA). Also, consider use of the word "retail", to avoid limiting to customers of retailers and confirm removal of reference to transmission-connected customers.

[16] Expand to include eligible consumers who are not customers of Electricity Distributors (e.g., suite-metered customers).

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owner to redeem, prepay or repurchase a Funding Obligation, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation Implementation Date] to (and including) June 30, 2017, (b) each six month period commencing [~~July~~May 1st and ~~January~~November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means that a Funding Obligation is repaid or repurchased for cancellation by or on behalf of ~~the Regulated~~a Regulatory Asset Owner by applying the net proceeds obtained by the ~~Regulated~~Regulatory Asset Owner incurring one or more other Funding Obligations.

"Regulatory Asset" means the property right and interest described in Section 6(1), or if the context requires, a specified portion or undivided interest in such property right and interest that is described in the applicable Disposition Document.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for ~~IESO~~the Servicer, any bank account into which ~~IESO~~the Servicer deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means~~, collectively,~~ each of (a) IESO, to the extent that it has retained any ownership interest in, to or under the Regulatory Asset and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Asset, ~~which~~and "Regulatory Asset Owners" means collectively all of the Regulatory Asset Owners, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7). For greater certainty, where one Regulatory Asset Owner owns the entirety of the Regulatory Asset, "Regulatory Asset Owners" refers to this Regulatory Asset Owner.

"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.

"Related Rights" means, with respect to a Regulatory Asset Owner's Regulatory Asset, all rights of any kind (whether in tort, contract or otherwise) ~~of the Regulatory Asset Owner~~ that attach or are attendant or incidental to any of the other property rights or interests that comprise ~~the~~such Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent in accordance with any Funding Obligation or, if no such day is specified in relation to any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a Finance Reserve Deposit) of, all or a portion of the amount advanced to the Regulatory Asset Owner under a Funding Obligation.

"Repayment" means a payment by a Regulatory Asset Owner made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is ~~[permitted]~~licensed to distribute electricity ~~to residences~~ in accordance with [this Act[17]].

"Servicer" means [To be determined], as agent for and on behalf of the Regulatory Asset Owner [To be determined – collective invoicing agent, and consider expanding].

"Settlement Date" means the [last Business Day of any month].

~~"Treasury Plan" means the written plan prepared by the Administrative Agent in compliance with Article 8 to set forth the basis upon which, among other things: (a) any Disposition may be made or effected; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfall, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; and (h) the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied.~~

"Transition Charge" means, for a Ratepayer in respect of a Reference Period, the sum of (a) [one-sixth] of the Period Transition Charge~~, [divided by the Consumer Base[5]]~~, multiplied by its Allocation Factor and (b) any Bypass Charge charged to the Ratepayer in respect of the Reference Period.

"Transition Charge Collection" means any amount received or deemed by this Part to have been received upon the collection of a Transition Charge paid by or on behalf of a Ratepayer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Administrative Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

[17] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*.
~~[5] See footnote 1, above.~~

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 10(2).

"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].[18]

Article 3 – Transition Charges

(1) **Ratepayer Obligation to Pay a Transition Charge** – Each Ratepayer shall pay each Transition Charge ~~attributed~~charged to it ~~and specified as such~~ in any Electricity Invoice issued to such Ratepayer by its Electricity Distributor or by an Alternative ~~Invoicing Agent~~Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Ratepayers** – Until paid, a Transition Charge ~~attributed~~charged to a Ratepayer ~~and recorded~~ in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the Ratepayer to the Regulatory Asset ~~Owner~~Owners (each with respect to its Regulatory Asset). Such indebtedness shall constitute a single and separate debt obligation owing by the Ratepayer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Ratepayer under the Electricity Invoice or otherwise.[19]

(3) **No Set-Off or Reduction** – A Ratepayer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Ratepayer by its Electricity Distributor, ~~the~~any Regulatory Asset Owner or any other person.

(4) **Allocation of Ratepayer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Ratepayer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

[18] Note that this is the term that describes the "asset" that we are amortizing over a longer period of time.

[19] Torys suggests that we not create a debtor/creditor relationship between ratepayers and regulatory asset owners. Instead, ratepayers would only have relationships with electricity distributors and the Fair program would rely on consumers paying distributors and distributors to collecting those amounts and remitting them to IESO. The current draft goes further to bridge the investors more directly with ratepayers. There are differences in the approaches, including reliance from a credit perspective on the LDCs (rather than an ability to replace the individual LDCs with the investors choice). This depends on the credit analysis, and comfort that a later requirement will not be accommodated without a change in the legislation. Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consideration should be given to whether that achieves the same direct relationship and whether the effectiveness of the current regulatory licensing regime should be suggested as the basis for a market-based credit decision.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the ~~Treasury~~Financing Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the ~~Treasury~~Financing Plan or as a result of amendments to the ~~Treasury~~Financing Plan made in accordance with Section 8(3)) are deemed to be irrevocable, final and effective without any further action, in the absence of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable whether or not the related Funding Obligation was properly incurred under the ~~Treasury~~Financing Plan. In no case shall a Funding Obligation incurred under the ~~Treasury~~Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) **[Anti-avoidance; No-by-pass** – Transition Charges ~~attributed~~charged to a Ratepayer in respect of any Finance Amount incurred under with the ~~Treasury~~Financing Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]

Article 4 – Invoicing of Transition Charges[20]

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative ~~Invoicing Agent~~Servicer shall, as an agent of the Regulatory Asset ~~Owner~~Owners, specify the Transition Charge to be ~~attributed~~charged to a Ratepayer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative ~~Invoicing Agent~~Servicer to the Ratepayer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be ~~deemed to have been imposed on and billed to~~binding on the applicable Ratepayer.

(2) **Calculation of the Period Transition Charge** – Not later than [35] days prior to the first day of a Reference Period, each Regulatory Asset Owner (or the Administrative Agent on its behalf) shall provide the Servicer with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. Not later than one month prior to the first day of a Reference Period, ~~[IESO]~~[6]the Servicer or if applicable the ~~[~~Alternative ~~Collection Agent]~~[7]Servicer[21] shall calculate the Period Transition Charge applicable to the Reference Period~~.~~ based on the calculations and information set forth in such written notices received from the Regulatory Asset Owners, which shall be determinative in the absence of manifest calculation error or misstatement.

[20] Details concerning Invoicing of Transition Charges (Article 4) and Collections and Remittances (Article 5) are complex. Consider how much of this can be addressed through regulations, or if acceptable based on existing OEB license conditions/codes, IESO market rules/manuals, etc.

~~[6] IESO's role will need to be discussed. Not sure if this mechanism is an IESO role or perhaps it's an OEB role. That will need to be discussed with the stakeholders. Currently, the rates for this class of customer are established by the OEB every six months having regard to the projections etc., of GA, and any variances from the prior period. This might end up fitting into that regime (although presumably we wouldn't want it to be built into the rate like GA is today- ie., it would be a separate line item). This section will also need to catch "bypass" customers.~~

[7][21] Should this be a designated government official, rather than an agent appointed by investors?

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, ~~[IESO]~~the Servicer or if applicable the ~~[~~Alternative ~~Collection Agent]~~Servicer shall apply the Attribution Methodology to determine the ~~Transition Charges to be attributed to the Ratepayers~~Allocation Factor for each Ratepayer of the applicable Ratepayer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, ~~[IESO]~~the Servicer or if applicable the ~~[~~Alternative ~~Collection Agent]~~Servicer shall inform each Electricity Distributor and if applicable any Alternative ~~Invoicing Agent~~Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each Ratepayer of the applicable Ratepayer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge ~~attributed~~charged to a Ratepayer by ~~[IESO]~~the Servicer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, in the absence of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **~~Successors of~~ IESO Successor** – Any ~~successor of~~ IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative ~~Invoicing Agent~~Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the Regulatory Asset ~~Owner shall~~Owners shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative ~~Invoicing Agent~~Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative ~~Invoicing Agent~~Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative ~~Invoicing Agent~~Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative ~~Invoicing Agent~~Servicer to perform such obligations and duties on behalf of the Regulatory Asset ~~Owner~~Owners.

(9) **Regulatory Asset ~~Owner has~~Owners have Standing** – The Regulatory Asset ~~Owner~~Owners may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative ~~Invoicing Agent~~Servicer or any other person who may be authorized to issue Electricity Invoices to Ratepayers for a failure to impose, attribute, charge, bill or invoice Transition Charges. Any court of the Province [and the OEB] shall have jurisdiction over

any actions brought before it by ~~a~~the Regulatory Asset ~~Owner~~Owners in relation to any such failure.[22]

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) ~~**(10)**~~ **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor, any Alternative ~~Invoicing Agent~~Servicer or any [Alternative Collection Agent] to ensure that Transition Charges are properly ~~attributed~~charged to Ratepayers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset ~~Owner~~Owners, undertake [diligent efforts] to collect amounts owing by Ratepayers in respect of Transition Charges ~~attributed~~charged to such Ratepayers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall ~~[~~promptly~~]~~ segregate Transition Charge Collections from other payments received by it from Ratepayers and deposit such Transition Charge Collections into its Regulatory Asset Account. Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall ~~be deemed to~~ hold such amounts in trust for ~~the~~each Regulatory Asset Owner.

(3) **Electricity Distributor Remittances** – On each [applicable Remittance Date], an Electricity Distributor shall remit all Transition Charge Collections received by it from Ratepayers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset ~~Owner~~Owners, undertake [diligent][reasonable] efforts~~]~~ to accept and collect Electricity Distributor Remittances~~.~~ from Electricity Distributors and Transition Charge Collections from Ratepayers that pay their Electricity Invoices directly to the Servicer.[23]

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall [promptly] segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall ~~be deemed to~~ hold such amounts in trust for ~~the~~each Regulatory Asset Owner.

[22] Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.

[23] Consider building this obligation into a deemed condition of licence for the IESO.

(6) **IESO Remittances** – On each [Settlement Date][24], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Regulatory Asset Owner.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **Successors of IESO** – Any successor of IESO shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[8][25], then such person shall, if requested by the Regulatory Asset ~~Owner~~Owners, be obligated to act diligently to (a) facilitate the invoicing and ~~collect~~collection of any Transition Charges applicable to Ratepayers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Ratepayers as provided in this Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d) exercise all enforcement rights of the Regulatory Asset ~~Owner~~Owners or Pledgee for the benefit of ~~the~~a Regulatory Asset Owner or Pledgee; and (e) remit any Transition Charge Collections to the Regulatory Asset Owner or Pledgee, as applicable, each in accordance with its Regulatory Asset.

(10) **Regulatory Asset ~~Owner has~~Owners have Standing** – The Regulatory Asset ~~Owner~~Owners and any Pledgee may bring actions against any Electricity Distributor, IESO, Alternative ~~Invoicing Agent~~Servicer, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Ratepayers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5. Any court of the Province [and the OEB] shall have jurisdiction over any actions brought before it by ~~a~~the Regulatory Asset ~~Owner~~Owners in relation to any such failure.[26]

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Regulatory Asset ~~Owner~~Owners shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the

[24] Consider frequency of remittances in light of rating requirements.

[8][25] This is in anticipation of a possible future restructuring of the distribution system. Also, this would cover any OREC-eligible customer (market participant) of IESO.

[26] Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.

collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Regulatory Asset ~~Owner~~Owners.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of ~~the~~a Regulatory Asset Owner, ~~any~~an Absolute Assignee and ~~any~~a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Ratepayer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province ~~[~~or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.~~]~~[27]

(13) ~~[~~**Sequestration** – If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by ~~a~~the Regulatory Asset ~~Owner~~Owners or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset ~~Owner~~Owners or Pledgee~~.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Transition Charges, as applicable.]~~, each with respect to its Regulatory Asset.

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by the Regulatory Asset Owner.

Article 6 – The Regulatory Asset

[27] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a Ratepayer reduces its payment of Transition Charges, despite this language, and same for Electricity Distributor Remittances and IESO Remittances.

(1) **Composition** – The Regulatory Asset shall constitute ~~a~~an existing, present property right and interest ~~of the~~consisting, collectively, of the following rights and interests of a Regulatory Asset Owner in the following (without duplication):

a. the right of a Regulatory Asset Owner to record its portion of the Regulatory Asset in its accounts;

b. the right to impose, bill, invoice, collect and receive Transition Charges from Ratepayers, including the right to determine the amount of Transition Charges in accordance with this Part;

c. ~~a.~~ the ~~present and future~~right to enforce the obligations and indebtedness of each Ratepayer to pay the Transition Charges ~~attributed~~charged to the Ratepayer from time to time in accordance with Article 2, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

d. ~~b.~~ the ~~present and future~~right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative ~~Invoicing Agent~~Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. ~~c.~~ the ~~present and future~~right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 4;

f. ~~d.~~ the ~~present and future~~right to enforce the duties and obligations of IESO and if applicable the Alternative Collection Agent to ~~accept~~collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the ~~account~~accounts of the Regulatory Asset ~~Owner~~Owners, each with respect to its Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 4;

g. ~~e.~~ the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. ~~f.~~ all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. ~~g.~~ all Related Rights; and

j. ~~h.~~ all ~~proceeds of or derived from the foregoing.~~revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments

and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

~~The~~A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, ~~attributed~~charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Disposition that may arise by contract or by operation of any applicable law of the Province], a Disposition by a Regulatory Asset Owner made under the ~~Treasury~~Financing Plan pursuant to a Disposition Document shall be permitted and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Absolute Assignee a valid property right and interest in, to and under the Regulatory Asset (or relevant portion thereof) in accordance with the terms of such Disposition ~~[~~, provided that the ~~description of Regulatory Asset in the agreement giving effect to the Disposition expressly refers to this Part]. [Other than as required by the Treasury Plan, no consent of any person shall be required to give effect to a Disposition.]~~ parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof. [A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.][28]

(3) ~~**Deemed** **Perfection and Priority of Dispositions** – At the time a~~Any Disposition ~~is made, the absolute assignment of the property rights and~~of an interest in ~~the~~a Regulatory Asset ~~subject to the Disposition shall be deemed to have been and~~shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and

[28] Consider if helpful to investors, or delete.

interests acquired by the Absolute Assignee under such Disposition shall ~~have priority over~~be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province [or any consent requirement applicable to a Pledge that may arise by contract or by operation of any applicable law of the Province], a Pledge by a Regulatory Asset Owner may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the Regulatory Asset in accordance with the terms of the Pledge~~[, provided that the description of Regulatory Asset in the agreement giving effect to the Pledge expressly refers to this Part]~~. Other than as required by the ~~Treasury~~Financing Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) ~~**Deemed**~~ **Perfection and Priority of Pledges** - Any Pledge made by a Regulatory Asset Owner in respect of a Funding Obligation incurred under the ~~Treasury~~Financing Plan ~~shall be deemed to have been and~~ shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset, the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the Regulatory Asset or the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset that are subject to such a Pledge that are received by the Regulatory Asset Owner shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected, without any physical delivery thereof, registration of any financing statement with respect thereto pursuant to the [PPSA] or any other further act.[29] A Pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the Regulatory Asset subject to the Pledge unless the Pledgee has otherwise agreed in writing. Any Pledgee shall have a perfected security interest in Transition Charge Collections or other related proceeds that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. [A Pledgee shall cause a financing statement to be filed in respect of a Pledge on the basis that the Regulatory Asset is "intangible" property, for informational purposes only under the [PPSA].

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein. In no circumstance may the specified portions of the rights

[29] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) ~~(7)~~ **Collective Action Required** – If a Regulatory Asset Owner's right and interest in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective [and joint] basis with each other Regulatory Asset Owner~~, and any agreement among all of the Regulatory Asset Owners in furtherance of such collective action shall be valid and binding on each Regulatory Asset Owner and each Absolute Assignee, Pledgee and successor of a Regulatory Asset Owner in accordance with its terms.~~ in accordance with the Collective Rights Agreement.[30]

Article 7 – Establishment of the Fair Allocation Plan[31]

(1) Adoption of the Fair Allocation Plan – The [Minister of Energy][32] may by written order designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Part, [except if amended, amended and restated or terminated by a further written order issued by the Minister of Energy ~~[~~in compliance with Section •].

(2) Principles and Parameters[33] – A Fair Allocation Plan shall seek to allocate Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that the Minister of Energy, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters~~9~~[34]:

1. Unrecovered Transition Costs should be allocated over a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts.

2. The Fair Allocation Plan should specify the Reference Periods (e.g., 6 month periods), for the purpose of identifying applicable Ratepayer Groups and allocating among them responsibility to bear the Unrecovered Transition Costs on a relative basis over time.

3. The share of Unrecovered Transition Costs allocable to a particular Ratepayer Group in respect of a Reference Period should be proportionate to a reasonable

[30] This is necessary to ensure that if there are multiple regulatory asset owners and pledgees, they will be coordinated in the application of their rights of enforcement, etc.

[31] The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current Power Contracts and not invest in extending service lives to secure further power contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

[32] Input required. If the MOE is given this power, conform to applicable authorities (e.g., plans and directives).

[33] Consideration will be given as to whether these details should be included in the Regulation.

~~9~~[34] We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just il lustrative to advance a discussion among the stakeholders.

assessment of the benefits of the Green Generation Initiative to the Ratepayer Group over such Reference Period.

4. The estimated Unrecovered Transition Costs to be allocated to a Ratepayer Group and any future Ratepayer Group at a particular time should not exceed the estimated value of the Related Generating Assets based on their remaining useful lives or terms, measured in respect of the period following such particular time.

5. No future Ratepayer Group should bear an unreasonably disproportionate share of the Unrecovered Transition Costs. Except in exceptional circumstances or in the case of any backward-looking adjustment made as contemplated in 7, below, the share of the Unrecovered Transition Costs to be allocated under a Fair Allocation Plan to any future Ratepayer Group should have regard to [Insert formula if a year-over-year maximum amount is determined to be appropriate][~~10~~35] .

6. A reasonable estimate of the rate of inflation should be applied to equate the relative values of the nominal amount of Unrecovered Transition Costs to be allocable to Ratepayer Groups over time.

7. Backward-looking adjustments to a Fair Allocation Plan may be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative ~~to that Ratepayer Group over an applicable Reference Period, including to provide an abatement to one or more Ratepayer Groups to the extent that one or more earlier Ratepayer Groups are considered by the Minister of Energy to have borne an unfair share of the Unrecovered Transition Costs~~.

(3) Attribution Methodology – The Fair Allocation Plan [shall] specify an objective methodology (the "Attribution Methodology") for the purposes of allocating the Period Transition Charges across all of the Ratepayers of a particular Ratepayer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that are considered by the Minister of Energy to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation. ~~[may have regard to considerations such as their relative electricity usage rates and usage patterns; the relative geographic density of individual Ratepayer's residence *[See basis for GA allocation method for other principles]]*~~

(4) [Confirmation][Review] of the Fair Allocation Plan – [OEB?][36]

Article 8 – The ~~Treasury~~Financing Plan[37]

(1) Power to Prepare and Implement the ~~Treasury~~Financing Plan – In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall prepare and propose the adoption of a ~~Treasury~~Financing Plan. If the Administrative Agent is unwilling or unable to prepare and propose the adoption of a

[~~10~~35] Consider if a quantitative limit needs to be included in the legislation.

[36] Any approvals or consents by the OEB will be obtained before any Funding Obligation that is dependent on such approval or consent is incurred. Any such approval or consent will be irrevocable and non-appealable. Any regulatory action occurring after any incurrence will not affect the related Funding Obligation or underlying rights in the Regulatory Asset.

[37] Consideration will be given as to whether these details should be included in the Regulation.

~~Treasury~~Financing Plan, the Minister of Energy may by written order designate one or more other persons to prepare and implement such a ~~Treasury~~Financing Plan.

(2) **Required Terms and Conditions of the ~~Treasury~~Financing Plan** – The ~~Treasury~~Financing Plan shall establish the basis for funding decisions that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan. The ~~Treasury~~Financing Plan shall be consistent with the principles, parameters, requirements and conditions set forth in Schedule 3 and such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation].

(3) **Power to Review and Approve the ~~Treasury~~Financing Plan** – The Minister of Energy may, by written order, designate one or more persons to review the ~~Treasury~~Financing Plan and to review and assess the consistency of the Funding Obligations incurred with such ~~Treasury~~Financing Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the ~~Treasury~~Financing Plan, and submit a revised ~~Treasury~~Financing Plan to the ~~**[OEB]**~~designated reviewer for approval within [the time period specified in such written order]/[[●] days of such written order].[***Consider periodic amendments to the ~~Treasury~~Financing Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***]

(4) **Approval of ~~Treasury~~Financing Plan –** The **[OEB]** shall have the power to and shall approve or disapprove of the ~~Treasury~~Financing Plan based solely on whether the ~~Treasury~~Financing Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the ~~Treasury~~Financing Plan, then such ~~Treasury~~Financing Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the ~~Treasury~~Financing Plan or otherwise fails to approve the ~~Treasury~~Financing Plan, then the Administrative Agent shall re-submit the ~~Treasury~~Financing Plan with such amendments as the Administrative Agent shall consider necessary for the ~~Treasury~~Financing Plan to be approved by the OEB.[38]

(5) **Consistency with the Fair Allocation Plan** - Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the

[38] Once the Financing Plan is reviewed and approved there would be no further OEB review. If there is opportunity for further review, such review will have no impact on prior issued debt. Any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding).

Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the ~~Treasury~~Financing Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the ~~Treasury~~Financing Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(6) Establishment of Special Purpose Entities – If the implementation of the ~~Treasury~~Financing Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations as a Financing Entity under the ~~Treasury~~Financing Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics specified in Schedule 4 in establishing such special purpose entity.]

(7) Obligation to Apply IESO Remittances – The Administrative Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset ~~Owner~~Owners, or otherwise in respect of or as proceeds from the Regulatory Asset shall only be applied or used to pay Finance Amounts when they are due and payable and for no other purpose.~~11~~[39]

(8) Non-Recourse – The ~~Treasury~~Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative ~~Invoicing Agent~~Servicer, and Alternative Collection Agent, the Administrative Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Part or expressly pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(9) Incurrences are Binding – Despite any failure to adhere to the ~~Treasury~~Financing Plan or to comply with any requirement of this Part, all amounts payable or becoming due and payable by or on behalf of ~~the~~a Regulatory Asset Owner under or in connection with any obligation purporting to be a Funding Obligation, shall ~~be deemed to~~ be binding for the purposes of this Part, including in determining the amount of Transition Charges, despite any impairment or defect resulting from such failure.

Article 9 – Compliance Matters[40]

~~11~~[39] We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.

[40] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article is under consideration.

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this Part, the [OEB] shall have the right, jurisdiction, power and authority to examine the books and records of any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation.

(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the ~~authority~~[OEB] or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part[41].

(3) **[Other Rating Settings** – When setting other rates for or in respect of any person who is or may become obligated or have duties that arise under this Part, including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking into account the collection by or attribution to such person of administrative or servicing fees in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.][42]

Article 10 – Undertaking of the Lieutenant Governor in Council[43]

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The [Lieutenant Governor in Council ~~may~~] shall not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Ratepayers to pay Transition Charges or impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, either directly or indirectly[, including through the introduction of any bill or the passing of any legislation or regulation]. The ~~Lieutenant Governor in Council undertakes that the~~ amount of Transition Charges determined hereunder shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council[, including through the introduction of any bill or the passing of any legislation or regulation].

(2) **Undertaking and Agreement** – The Lieutenant Governor in Council ~~undertakes to and agrees with the Regulatory Asset Owner, including any Absolute Assignee from time to time, and any Pledgee from time to time, that the Lieutenant Governor in Council will~~shall not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or, except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, collected and remitted for the benefit of the Regulatory Asset ~~Owner~~Owners,

[41] Consider scope of OEB regulation and whether a Financing Entity should be subject to this sort of provision in any event.

[42] OPG has indicated that the risks and cost consequences to OPG of being an Administrative Agent or of consolidating a Financing Entity for accounting purposes should not be considered by the OEB in setting the regulated payment amounts for OPG. To be discussed.]

[43] Under consideration.

including any Absolute Assignee from time to time, and any Pledgee from time to time[,including through the introduction of any bill or the passing of any legislation or regulation].

[If IESO becomes insolvent or otherwise incapable of performing its obligations under this Part, an IESO Successor will be established that is capable of performing such obligations in order that the Regulatory Asset Owners may appoint the IESO Successor as an Alternative Servicer or Alternative Collection Agent. Regulatory Asset Owners shall be fully compensated for any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article 10(2) for any loss suffered by the Regulatory Asset Owner as a result of such failure.[44]]

(3) References to the Undertaking and Agreement – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 11 – Regulations

Regulations may be made under this Part for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable ~~expectations~~requirements of the Province associated with ~~any Regulated~~a Regulatory Asset Owner incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Costs; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a ~~Treasury~~Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Part;

(c) to set out reasonable ~~expectations~~requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Part [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by ~~the~~a Regulatory Asset Owner of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the ~~Treasury~~Financing Plan.

[44] Requested by Torys. For discussion.

Article 12- Miscellaneous[45]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Part and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Part shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Part shall be required with respect to the actions to be taken in compliance with this Part, including under the ~~Treasury~~Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Part or the ~~Treasury~~Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the ~~Treasury~~Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Part, if any provision of this Part is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Part that is taken by any person who is or may become obligated or have duties that arise under this Part ~~[or under any Funding Obligation]~~ and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Part or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Part are intended to be severable and that the Legislature would have enacted this Part even if any Article, Section, paragraph or subparagraph of this Part held to be unconstitutional or invalid had not been included in this Part.

[45] OPG would like the specific amendments related to OPG to be included in the Bill.]

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles, Parameters, Requirements and Conditions for Establishing the ~~Treasury~~Financing Plan

The ~~Treasury~~Financing Plan shall have regard to the following principles, parameters, requirements and conditions:[***Consider others.***]

(1) the ~~Treasury~~Financing Plan shall, in respect of each Reference Period, describe the allocations of Unrecovered Transition Costs to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of the Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describe alternative funding arrangements considered to be suitable for the purpose of funding the estimated Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by the Regulatory Asset ~~Owner~~Owners for such purpose;

(4) such Funding Obligations shall reflect quantities, maturities, payment obligations, prepayment or redemption rights and such other features so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of each Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

(5) the ~~Treasury~~Financing Plan shall reflect the outcome of a financial model that incorporates the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges ~~attributed~~charged to a hypothetical Ratepayer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the ~~Treasury~~Financing Plan may permit the OEB to check progress against the model from time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the ~~Treasury~~Financing Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***]

(6) the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Regulatory Asset ~~Owner[s]~~Owners will require committed access to short term liquidity to cover estimated Funding Shortfalls prior to incurring fixed

term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the ~~Treasury~~Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Administrative Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations shall not obligate a Regulatory Asset Owner to repay an amount in relation to a Reference Period that would have the effect of the ~~Treasury~~Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Unrecovered Transition Costs to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Administrative Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Administrative Agent shall cause the ~~[~~applicable~~]~~ Regulatory Asset Owner to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Administrative Agent will select counterparties under any transaction to be entered into by a Regulatory Asset Owner, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Administrative Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Administrative Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and

other Funding Costs, and the need to maintain a stable funding platform to finance the Funding Shortfall from time to time on a basis that is consistent with the allocations of Unrecovered Transition Costs to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Administrative Agent and other agents and service providers to the Regulatory Asset ~~Owner[s]~~Owners may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by a Regulatory Asset Owner, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) a description of each special purchase entity that will purchase the Regulatory Asset from the IESO, including proposed capitalization, governance, and restrictions on their powers and activities having regard to the parameters in Schedule 4; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

Schedule 4

Creation of any Special Purpose Entity to become a Regulatory Asset Owner]

(1) Powers and Abilities:

a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;

b. Each Regulatory Asset Owner shall be authorized to:

i. incur the Funding Obligations contemplated by a ~~Treasury~~Financing Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;

ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a ~~Treasury~~Financing Plan and for administrative services; and

iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;

c. So long as any Funding Obligations contemplated under a ~~Treasury~~Financing Plan are outstanding, ~~the~~a Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;

d. ~~the~~a Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a ~~Treasury~~Financing Plan;

e. ~~the~~a Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a ~~Treasury~~Financing Plan; and

f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a ~~Treasury~~Financing Plan.

(2) Governance of Regulatory Asset Owner – ~~The~~A Regulatory Asset Owner ~~shall~~ shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]

a. **[Number of trustees]**

b. **[Replacement of trustees; vacancies; appointment of successors]**

c. **[Removal of trustees for neglect of duty or misconduct]**

d. **[Quorum and meetings]**

e. **[Fiduciary duty]**

f. **[Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]**

g. **[Delegation of powers and duties to administrative agents]**

h. **[Delegation of powers and duties to administrative agents]**

Subject: FW: equity injection at book value?

John, Scott,

The issue of what to value the equity injection per share has come up; at book value or some other determination if there is to be a redeemable/retractable option to them, or whether it is even needed given the Province owns 100%. Can you let me know if OPG and/or MOF has any thoughts on this.

Thanks.

Hi John.
Please see Cindy's feedback below. I think it would be wise to include OPG in the conversation. As a minimum, you should include John Lee. Scott Nelms should likely also be involved. N

Cc: Patel, Bharat (TBS)
Subject: RE: equity injection at book value?

Probably needs all parties to be involved.

At the meeting last Thursday there was a comment made that there would be a new class of shares issues as they would be redeemable/retractable -- to essentially enable repayment of the injection. We should understand where that is at re: the design of the new shares.

Subject: FW: equity injection at book value?

Cindy,
Any advice? I'm not sure that OPCD should be giving advice on this request. Perhaps OPG should provide input. n

Subject: FW: equity injection at book value?

Nadine,

We would like OPCD to weigh in what to value the shares for the upcoming electricity relief equity injection. OPG has disclosed that they are authorized to issue an unlimited number of common shares without nominal or par value.

The book value appears to be $20 exactly based on the current number of shares, but we don't know if there were any previous injections that brought the BV to $20 now. Perhaps OPCD would know.

5,126 B
.256300010 B = $20

Some clarification is needed:

1) Is share price needed?
2) If so, what value is to be used? Book value, fair value, etc.

Thanks.

DESCRIPTION OF CAPITAL STRUCTURE

The authorized share capital of OPG consists of an unlimited number of common shares (the voting shares of the Company). As at December 31, 2016, OPG had 256,300,010 common shares issued and outstanding, all of which are owned directly by the Province at a stated value of $5,126 million. OPG is authorized to issue an unlimited number of common shares without nominal or par value. Holders of common shares are entitled to one vote per share at meetings of the shareholders of the Company and to receive dividends if, as, and when declared by the Board of Directors of the Company. Holders of common shares would participate, pro rata to their holding of common shares, in any distribution of the assets of the Company upon its liquidation, dissolution, or winding up. Any issue of new shares is subject to the consent of all of OPG's shareholders.

All of the Company's voting securities are held by the Province. Accordingly, the Company is controlled by the Province.

DESCRIPTION OF CAPITAL STRUCTURE

The authorized share capital of OPG consists of an unlimited number of common shares (the voting shares of the Company). As at December 31, 2016, OPG had 256,300,010 common shares issued and outstanding, all of which are owned directly by the Province at a stated value of $5,126 million. OPG is authorized to issue an unlimited number of common shares without nominal or par value. Holders of common shares are entitled to one vote per share at meetings of the shareholders of the Company and to receive dividends if, as, and when declared by the Board of Directors of the Company. Holders of common shares would participate, pro rata to their holding of common shares, in any distribution of the assets of the Company upon its liquidation, dissolution, or winding up. Any issue of new shares is subject to the consent of all of OPG's shareholders.

All of the Company's voting securities are held by the Province. Accordingly, the Company is controlled by the Province.

Subject: RE: follow up from call - OPG GA

Hi John,

Just two:

1. Not sure why future BV is relevant at this point. Future BV of OPG shares would be a function of historic carrying costs, net income and dividends so not sure we need to go there at this point. Transactions between the Province and OPG have been deemed as related party transactions by OPCD so in absence of a specific rule or change in policy I'm not sure we would have to account for FMV. Also, given the Province is not taxable it should be a non-issue.

2. I'm not sure why Kaitlin thinks that OPG shares are in Energy's books (she is saying ENE holds the shares). If you check page 504 (Vol 1, 4-2) you will see that the initial $5.1B investment in OPG is under MOF. Furthermore, under the new reporting structure I understand the accountability of OPG is now with MOF although from a legal perspective the Minister of Energy remains as the sole shareholder.

Thanks,

Francisco

Regarding this statement

On the value of the shares-My understanding is it doesn't matter, but for simplicity I think we should keep it the same as the current shares unless anyone raises benefits/considerations otherwise

If the new shares will have a retractable/redeemable option, doesn't that option have a value to it, in addition to the $20 BV? If the equity injection were to happen every year at different amounts, a valuation of that option will have to be calculated, which will in turn revise the total BV/per share.

The value of the shares doesn't matter now, but in the future, if we were to sell the shares to the public, we would need to calculate BV in order to calculate the gain/loss. Will have to get some documentation from 20 years ago on how $20 was derived in the first place.

Thanks.

Revised version. Everything in here is up for discussion, I just wanted to share a straw man for people to react to.

Key changes relative to the last version:

- I've positioned as an ENE TB approval/appropriation request (though I haven't actually run this by ENE yet….)– they already have an operating asset, and hold the current OPG shares so I think any new shares would be held in the same place. I'm thinking about it similar to the equity injection that was done for H1 departure tax payment (ENE booked it but OFA actually flowed the funds). I've embedded within the OPG BP process for simplicity but if you think it should be on a separate track I'm happy to explore that.
- On the value of the shares-My understanding is it doesn't matter, but for simplicity I think we should keep it the same as the current shares unless anyone raises benefits/considerations otherwise

Realise you guys are still thinking this through, but if your schedule permits It would be helpful if we could regroup today/tomorrow on this so I can hear what you guys are considering and chat next steps

Hi,

My understanding though it'd be good to check with accountants (assuming OPG accountants) would be that it would not matter given OPG does not have its shares trading. I think there are more technical ways of describing this but will leave at that.

On the diagram, it is my understanding that it'd be the Province.

Thanks,

John

Kaitlin,
After the relevant legislation, Provincial approvals, OPG approvals ….. The funding of the Global Adjustment equity injection, will have a line on the Financing Table that feeds the Ontario Budget → and will then be incorporated on the Long Term Borrowing requirements for the Province.

-We are flexible on working with OPG on setting the required advance notice period that OPG needs to provide the Province (Energy, OFA-Corporate and Electricity Finance, OFA Capital Markets, etc).

-Quarterly equity injections looks ok.

-OPG will need to determine who needs to sign-off on the equity injection requests.

-I don't know if OPG has any recommendations wrt how to determine how share price will be determined or if it will be a "par value" – will have to get our accountants involved as how it is booked

John or Kaitlin – the diagram has OEFC funding the equity injection – is that correct?

GA Financing – Equity Injection

Briefing Note

PURPOSE:

- Develop a timeline / mechanism to facilitate equity injections by the Province to OPG to support GA financing

CONTEXT:

- IESO will effectively sell the "right to collect" deferred future revenue from ratepayers (GA Asset) to the SPV in return for cash proceeds
- In order for the SPV to finance the GA asset on a long-term will obtain financing from two sources on an ongoing basis
    - 51% from capital markets
    - 49% as subordinated debt from OPG, which OPG will finance through:
        - **44% from equity injections from the Province**
        - 5% from capital markets
- OPG will require equity injections on an ongoing basis in order to keep its capital structure in line, and will require flexibility in order to issues shares as needed

GA FINANCING IMPLEMENTATION TIMING:

- **April:** Proposed Legislative Changes Drafted (retroactive to May 1)
- **May 1**: GA smoothing incorporated into "RRP" rates
- **Early June:** Legislation may be passed and SPV created. OPG uses short term facility to accommodate GA asset purchase [OPG TBC]. This represents the earliest possible equity injection [OPG TBC]
- **September**:
    - SPV long-term borrowing begins and would continue

POTENTIAL PROVINCIAL PROCESS FOR EQUITY INJECTIONS

<u>Required Approvals for Equity Injection in May 2017</u>

- ENERGY would seek TB/MBC approval for equity injection up to $xxM over next three years
- Seek approval to use the Operating Asset (vote xx) [ENE CORP TBC]
- Seek appropriation for $xxM in 2017-18 and Note that the out-year requests will be included in ENE's PRRT submission

<u>Ongoing Provincial Approvals Process</u>

- **Nov/Dec**: OPG includes forecasted equity injection requirements in rolling 3-year Business Plan

- **Feb/Mar**: ENERGY seeks TB/MBC approval for equity injection/OPG issuance as part of annual Business Plan concurrence process
    - ENE would seek TB/MBC approval for authority to inject up to $xx in OPG, in exchange for up to xx shares over the next 3 year term [OPG TBC: does this satisfy requirements in articles]
    - Seek approval delegating authority to Minister of Energy to work with the Ministry of Finance to execute equity injections, working with the OFA
    - Seek approval to include the 3-year equity request in ENE's PRRT submission through the operating asset in vote xx
- **Oct/Nov**: ENE would seek appropriation for out-year funding of equity injections

<u>Ongoing Implementation Process</u>

- OPG would send a letter to the Minister of Energy requesting an equity injection of $xx, in exchange for xx shares
- If Minister approves, ENE would work with OFA to flow the money [OFA TBC: Do you need something formal to do this? How much notice do you need to flow the cash? Any other mechanical requirements we should flag?]

Further Considerations

- Share Price Determination:
    - As of December 31, 2016 OPG had 256,300,010 common shares issued and outstanding at a stated value of $5,126 million ($20/share book value)
    - All new issuances would be priced at the same value as existing shares ($20/share)

Hi – This is based on my read of relevant docs so far, one meeting I attended with OPG last week and our call – I'm sure I'm missing lots but just wanted to get something in the system for us to build on.

If you could layer in any relevant info/thoughts that would be great.

Happy to chat
Kaitlin

Hey guys – I can pull a one-pager together on what I know in terms of timing/what I was thinking in terms of process (with placeholders) to share with you guys for review/input --- does that work?

Kaitlin

GA Financing – Equity Injection

Briefing Note

PURPOSE:

- Develop a timeline / mechanism to facilitate equity injections by the Province to OPG to support GA financing

CONTEXT:

- IESO will effectively sell the "right to collect" deferred future revenue from ratepayers (GA Asset) to the SPV in return for cash proceeds
- In order for the SPV to finance the GA asset on a long-term will obtain financing from two sources on an ongoing basis
    - 51% from capital markets
    - 49% as subordinated debt from OPG, which OPG will finance through:
        - **44% from equity injections from the Province**
        - 5% from capital markets
- OPG will require equity injections on an ongoing basis in order to keep its capital structure in line, and will require flexibility in order to issues shares as needed

GA FINANCING IMPLEMENTATION TIMING:

- **April:** Proposed Legislative Changes Drafted (retroactive to May 1)
- **May 1**: GA smoothing incorporated into "RRP" rates
- **Early June:** Legislation may be passed and SPV created. OPG uses short term facility to accommodate GA asset purchase [OPG TBC]. This represents the earliest possible equity injection [OPG TBC]
- **September**:
    - SPV long-term borrowing begins and would continue

POTENTIAL PROVINCIAL PROCESS FOR EQUITY INJECTIONS

<u>Required Approvals for Equity Injection in May 2017</u>

- ENERGY would seek TB/MBC approval for equity injection up to $xxM over next three years
- Seek approval to use the Operating Asset (vote xx) [ENE CORP TBC]
- Seek appropriation for $xxM in 2017-18 and Note that the out-year requests will be included in ENE's PRRT submission

<u>Ongoing Provincial Approvals Process</u>

- **Nov/Dec**: OPG includes forecasted equity injection requirements in rolling 3-year Business Plan

- **Feb/Mar**: ENERGY seeks TB/MBC approval for equity injection/OPG issuance as part of annual Business Plan concurrence process
    - ENE would seek TB/MBC approval for authority to inject up to $xx in OPG, in exchange for up to xx shares over the next 3 year term [OPG TBC: does this satisfy requirements in articles]
    - Seek approval delegating authority to Minister of Energy to work with the Ministry of Finance to execute equity injections, working with the OFA
    - Seek approval to include the 3-year equity request in ENE's PRRT submission through the operating asset in vote xx
- **Oct/Nov**: ENE would seek appropriation for out-year funding of equity injections

<u>Ongoing Implementation Process</u>

- OPG would send a letter to the Minister of Energy requesting an equity injection of $xx, in exchange for xx shares
- If Minister approves, ENE would work with OFA to flow the money [OFA TBC: Do you need something formal to do this? How much notice do you need to flow the cash? Any other mechanical requirements we should flag?]

Further Considerations

- Share Price Determination:
    - As of December 31, 2016 OPG had 256,300,010 common shares issued and outstanding at a stated value of $5,126 million ($20/share book value)
    - All new issuances would be priced at the same value as existing shares ($20/share)

Attachments:	2017 03 22 GA Financing - Equity Injection Discussion v02.docx

Ken,

At today's electricity relief working group, the question of the value of the shares came up. OPG would prefer to keep it simple and leave it at $20. When I asked about the value of the redeemable option being proposed, OPG still preferred not to factor that in, and keep it simple, especially as the equity injection is going to be monthly.

The timing is to introduce the relief program legislatively in May, with it being passed in early June.

On a monthly basis, IESO will send a notice to OPG on the amount of the purchase 5 business days before the actual injection. OPG will calculate 44% and notify us.

OPG will manage the financing shortfall over the course of the summer. The initial plan will be financing with their short term facilities, and then issue debt for long term in the Cdn money market.

When the 44% funding request comes to us every month, the thinking is capital markets will book the ticket, and then settlements and us in accounting will get involved in the normal manner.

There is another teleconference next week.

Thanks.

Subject: FW: follow up from call - OPG GA

Regarding this statement

On the value of the shares-My understanding is it doesn't matter, but for simplicity I think we should keep it the same as the current shares unless anyone raises benefits/considerations otherwise

If the new shares will have a retractable/redeemable option, doesn't that option have a value to it, in addition to the $20 BV? If the equity injection were to happen every year at different amounts, a valuation of that option will have to be calculated, which will in turn revise the total BV/per share.

The value of the shares doesn't matter now, but in the future, if we were to sell the shares to the public, we would need to calculate BV in order to calculate the gain/loss. Will have to get some documentation from 20 years ago on how $20 was derived in the first place.

Thanks.

Revised version. Everything in here is up for discussion, I just wanted to share a straw man for people to react to.

Key changes relative to the last version:

- I've positioned as an ENE TB approval/appropriation request (though I haven't actually run this by ENE yet….)– they already have an operating asset, and hold the current OPG shares so I think any new shares would be held in the same place. I'm thinking about it similar to the equity injection that was done for H1 departure tax payment (ENE booked it but OFA actually flowed the funds). I've embedded within the OPG BP process for simplicity but if you think it should be on a separate track I'm happy to explore that.
- On the value of the shares-My understanding is it doesn't matter, but for simplicity I think we should keep it the same as the current shares unless anyone raises benefits/considerations otherwise

Realise you guys are still thinking this through, but if your schedule permits It would be helpful if we could regroup today/tomorrow on this so I can hear what you guys are considering and chat next

Hi,

My understanding though it'd be good to check with accountants (assuming OPG accountants) would be that it would not matter given OPG does not have its shares trading. I think there are more technical ways of describing this but will leave at that.

On the diagram, it is my understanding that it'd be the Province.

Thanks,

John

Subject: RE: follow up from call

Kaitlin,
After the relevant legislation, Provincial approvals, OPG approvals ….. The funding of the Global Adjustment equity injection, will have a line on the Financing Table that feeds the Ontario Budget → and will then be incorporated on the Long Term Borrowing requirements for the Province.

-We are flexible on working with OPG on setting the required advance notice period that OPG needs

to provide the Province (Energy, OFA-Corporate and Electricity Finance, OFA Capital Markets, etc).

-Quarterly equity injections looks ok.

-OPG will need to determine who needs to sign-off on the equity injection requests.

-I don't know if OPG has any recommendations wrt how to determine how share price will be determined or if it will be a "par value" – will have to get our accountants involved as how it is booked

John or Kaitlin – the diagram has OEFC funding the equity injection – is that correct?

Regards
carlos

Hi all – just checking in – do you think you'll have any edits to provide today? I have some further thoughts/ considerations I'd like to build in and am hoping to run our thinking up the chain (ENE/MOF) before we discuss with OPG.

Legal is also looking into timing for me so I am hoping to provide a bit more insight on that in the next turn.

Thanks,
Kaitlin

GA Financing – Equity Injection

Briefing Note

PURPOSE:

- Develop a timeline / mechanism to facilitate equity injections by the Province to OPG to support GA financing

CONTEXT:

- IESO will effectively sell the "right to collect" deferred future revenue from ratepayers (GA Asset) to the SPV in return for cash proceeds
- In order for the SPV to finance the GA asset on a long-term will obtain financing from two sources on an ongoing basis
    - 51% from capital markets
    - 49% as subordinated debt from OPG, which OPG will finance through:
        - **44% from equity injections from the Province**
        - 5% from capital markets
- OPG will require equity injections on an ongoing basis in order to keep its capital structure in line, and will require flexibility in order to issues shares as needed

GA FINANCING IMPLEMENTATION TIMING:

- **April:** Proposed Legislative Changes Drafted (retroactive to May 1)
- **May 1**: GA smoothing incorporated into "RRP" rates
- **Early June:** Legislation may be passed and SPV created. OPG uses short term facility to accommodate GA asset purchase [OPG TBC]. This represents the earliest possible equity injection [OPG TBC]
- **September**:
    - SPV long-term borrowing begins and would continue

POTENTIAL PROVINCIAL PROCESS FOR EQUITY INJECTIONS

<u>Required Approvals for Equity Injection in May 2017</u>

- ENERGY would seek TB/MBC approval for equity injection up to $xxM over next three years
- Seek approval to use the Operating Asset (vote xx) [ENE CORP TBC]
- Seek appropriation for $xxM in 2017-18 and Note that the out-year requests will be included in ENE's PRRT submission

<u>Ongoing Provincial Approvals Process</u>

- **Nov/Dec**: OPG includes forecasted equity injection requirements in rolling 3-year Business Plan

- **Feb/Mar**: ENERGY seeks TB/MBC approval for equity injection/OPG issuance as part of annual Business Plan concurrence process
    - ENE would seek TB/MBC approval for authority to inject up to $xx in OPG, in exchange for up to xx shares over the next 3 year term [OPG TBC: does this satisfy requirements in articles]
    - Seek approval delegating authority to Minister of Energy to work with the Ministry of Finance to execute equity injections, working with the OFA
    - Seek approval to include the 3-year equity request in ENE's PRRT submission through the operating asset in vote xx
- **Oct/Nov**: ENE would seek appropriation for out-year funding of equity injections

<u>Ongoing Implementation Process</u>

- OPG would send a letter to the Minister of Energy requesting an equity injection of $xx, in exchange for xx shares
- If Minister approves, ENE would work with OFA to flow the money [OFA TBC: Do you need something formal to do this? How much notice do you need to flow the cash? Any other mechanical requirements we should flag?]

Further Considerations

- Share Price Determination:
    - As of December 31, 2016 OPG had 256,300,010 common shares issued and outstanding at a stated value of $5,126 million ($20/share book value)
    - All new issuances would be priced at the same value as existing shares ($20/share)

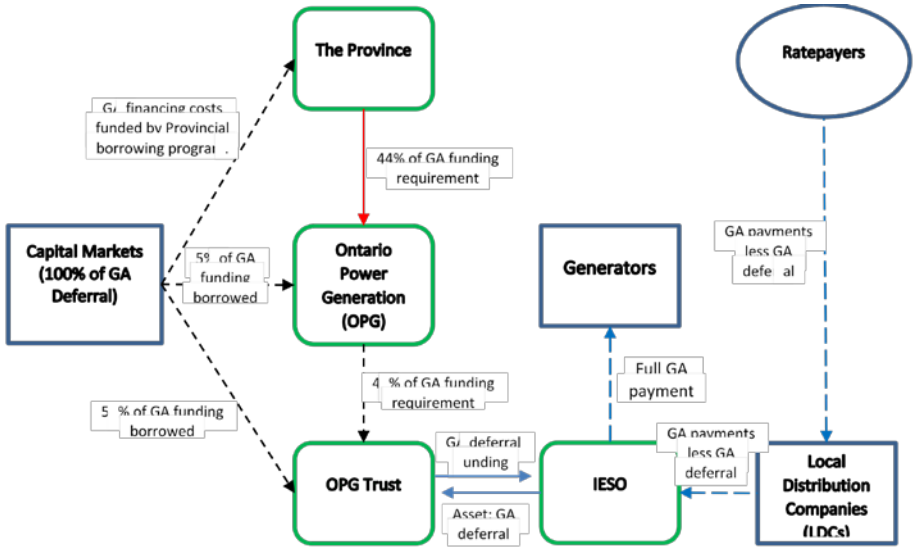
GA FINANCING – TD'S ADVICE SOUGHT ON CAPITAL CONTRIBUTION MECHANISM

The Capital Markets Division of the Ontario Financing Authority require TD advisors' recommendations and detailed descriptions of options vis-à-vis the proposal to provide capital ~~equity injection~~ to the Global Adjustment (GA) deferral proposal as part of the larger Ontario's Fair Hydro Plan, as announced on March 2, 2017.

Context

The Ministry of Energy, Ministry of Finance and the Ontario Financing Authority (OFA) are coordinating with OPG to implement a Global Adjustment (GA) smoothing mechanism.

Under the current proposal, OPG would develop a Special Purpose Vehicle (SPV) referred to as "OPG Trust" which will use 100% debt financing to purchase regulatory assets from the IESO. These regulatory assets represent the portion of RPP GA expenses recovery deferred to future years. IESO would use the cash from the OPG Trust to make up the shortfall in GA recoveries from ratepayers versus the cost of full payment to~~in order to fully compensate~~ generators.



OPG Trust would finance 51% of its funding requirements through the capital markets as senior debt with the remaining 49% being provided by OPG as subordinated debt. The 49% subordinated debt from OPG will be financed through debt OPG issues in its own corporate capacity, from the capital markets (5%) and through equity injections from the Province (44%). The Province will finance its capital

contributions ~~equity injection~~ through its annual borrowing program - from issuing debt into the capital markets.

Options for Equity Injection from TD Securities

The advice sought from TD could be summarized as follows:

When developing options for structuring the capital contributions ~~equity injection~~ from the Province to OPG for the~~amounting to~~ 44% of the ~~debt incurred~~financing requirement ~~-~~by the OPG Trust ~~set up~~ to purchase the regulatory asset from IESO, a number of ~~the following~~ underlying principles need to be addressed.

- While the Province is a sole shareholder of OPG, advice is sought to address potentially higher degrees of complexity of shareholder structure.
    - For example, options should include options for mechanism to create a level of certainty for recovering the capital ~~money~~ provided to OPG ~~no matter if~~whether this is done as common equity or through other mechanisms, including the potential use~~d~~ of preferred shares.~~as 'equity injection' for the purpose of the GA deferral proposal.~~
- Under the current state of discussion, t~~T~~he capital contribution ~~equity injection~~ would~~ill~~ be provided on a monthly/quarterly basis to OPG by the Province.
- The capital contribution ~~equity injection~~ results in the Province, the sole shareholder of OPG receiving common shares, or another type of security, from OPG whose valuation is based on a determined and agreed upon methodology. The Province will require an internal discussion before proceeding with a dialogue with OPG on the details.
- This methodology can be as simple as book value or can be based on some ~~kind~~ form of a discounted cash flow (DCF) mechanism but TD's expertise in structuring deals is sought in this request [keeping in mind the first bullet above].
- Given the time limited nature of the capital contribution ~~equity injection~~ the Province would anticipate~~s~~ repayment at a future date.
- The potential for repayment can be implemented as follows:
    - The Province as the sole shareholder~~, as well as having vested legislative authority~~, can require OPG to issue dividends annually.
- The shares issues by OPG can include some ~~kind~~ form of optionality to be exercised by the Province as and when repayment is ~~required~~due under the GA deferral plan. The nature of the repayment should be flexible enough to request payment at a much earlier date than anticipated, ~~given the potentiality of a new government's different policies subsequent to future elections~~with any number of possible causes, e.g. changes in government policy.

Commented [1]:
I suggest we delete this and have TD opine on options.

- ~~OPG c~~Could~~an~~ the structure involve issuing~~e~~ ~~preference~~ preferred shares ~~again~~ with some ~~kind~~ form of optionality for repayment. Preferredence~~e~~ shares, especially those with a specified annual dividend schedule could potentially~~will~~ ensure that the Province remain~~s~~ whole in terms of the incremental interest costs it would incur~~s~~ on the ~~equity injection~~capital contribution.

- Other factors to be considered for repayment:
  - Should the senior and subordinated debt be ranked as the same and if so does this impact market access
  - Should the senior debt be repaid first or should repayment be on a pari-passu basis
  - OPG may have concerns about their own credit rating if the number of shares issued to the Province substantially dilutes key ratios.
  - Eventually, the Province would need to have a discussion with OPG on the path forward.

Summarizing Issues to Work Around [Pls. Add More CMD and FTD]

- The Province will need to consider various levels of options for certainty in being able to recover its capital ~~getting the money back,~~ as stipulated in the GA deferral plan.
- The Province needs to be kept whole with respect to any financial cost that may arise from making and carrying forward the capital contributions.
- For regulatory purposes, there may be an interest in insuring that the capital contributions ~~equity injection is~~are considered a true equity in OPG's capital structure [TBD but still require consideration].
- The plan require that OPG operates on a commercial basis for the SPV with its Board needing to make independent decisions[, thus the need to have a discussion].
-

Commented [2]:
Not sure if this is needed here.

Date: Tuesday, March 14, 2017 11:50:41 AM

Hello everyone
I'm hoping to have a quick kick off call this week amongst ourselves to discuss developing the work plan for this portion of the plan. OPG will need some input from the Province in order to structure the equity injection process on our side.
I will send a meeting invite for later this week with a brief agenda of some of the items we will need to consider.
Hope to talk to you all then.

Further to my last email, here is a set of proposed amendments focused on the PILs issue.

Sent with BlackBerry Work (www.blackberry.com)

Version 2

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply:

1. In respect of any income, gain or profit of Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of or by virtue of:

(A) where a Financing Entity established is a corporation, acquiring, holding or disposing of any equity interest in the Financing Entity, including in respect of any dividends or other distributions paid or payable or otherwise accrued to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. in respect of any such equity, or

(B) where a Financing Entity is a trust, acquiring, holding or disposing of any beneficial interest in the Financing Entity, including in respect of any amounts paid or payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a beneficiary of such entity, or

2. To a Financing Entity that is a subsidiary of Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc.

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply:

1. In respect of any income, gain or profit of Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of or by virtue of:

(A) where a Financing Entity established is a corporation, acquiring, holding or disposing of any equity interest in the Financing Entity, including in respect of any dividends or other distributions paid or payable or otherwise accrued to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. in respect of any such equity, or

(B) where a Financing Entity is a trust, acquiring, holding or disposing of any beneficial interest in the Financing Entity, including in respect of any amounts paid or payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a beneficiary of such entity, or

2. To a Financing Entity that is a subsidiary of Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc.

Electricity Price Mitigation

Ministry of Energy

March 1, 2017

Minister

Deputy Minister

Context

- Electricity costs are increasing as the necessary investments are made to decarbonize and modernize the province's electricity infrastructure (i.e., $35 billion+ investment in cleaner generation and $15.5 billion investment in transmission and local distribution systems).

- Ontario has taken a number of actions to lower electricity costs for all consumers by:
  - Deferring investments in generation (e.g., new build nuclear), improving market efficiency (e.g., wind dispatch) and decreasing the cost of renewable procurements (e.g., Green Energy Investment Agreement (GEIA) renegotiation, decreasing Feed-In Tariff (FIT) prices, competitive Large Renewable Procurement (LRP)).
  - Increasing cost effectiveness and improving efficiency by adopting new electricity market approaches (e.g., no new NUG contracting and demand response).

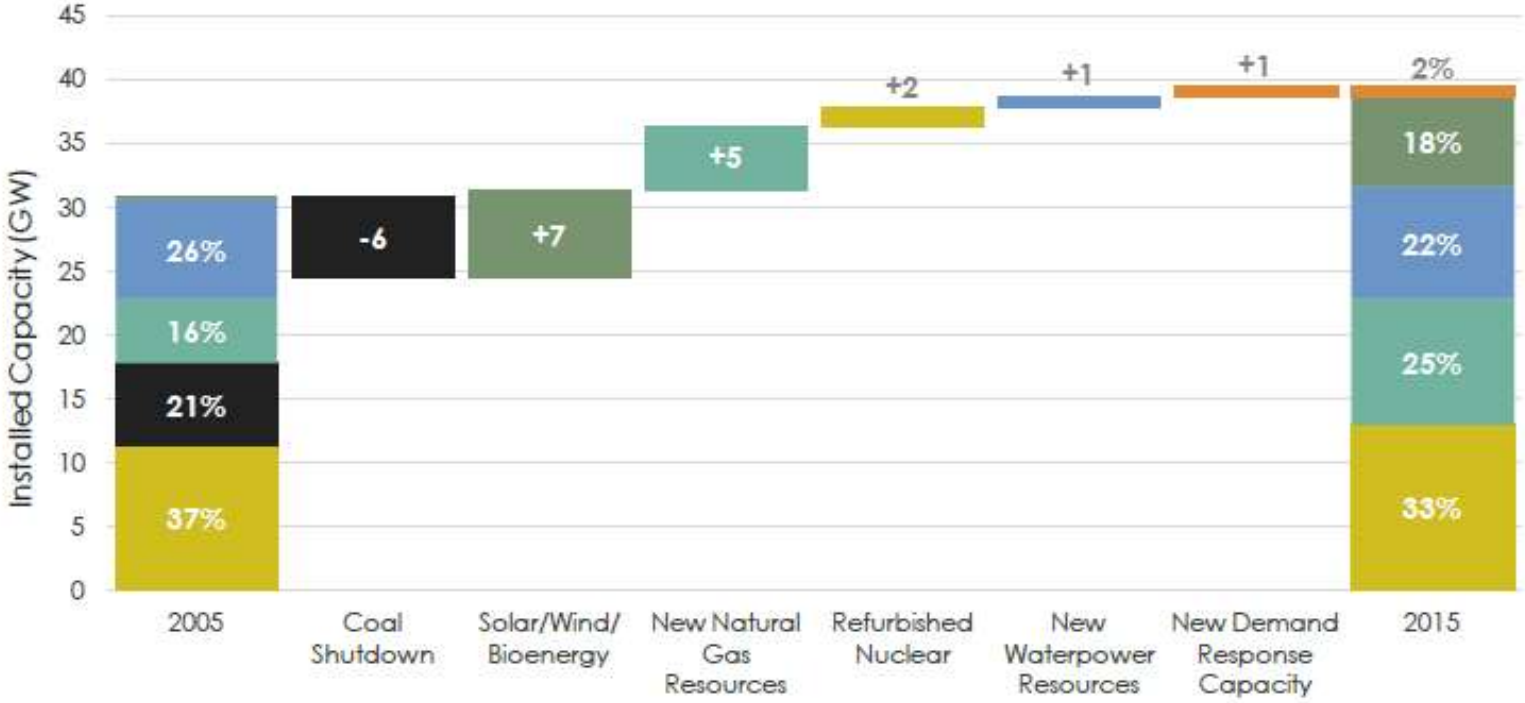
- On November 28, 2016, the Minister of Energy announced the need for changes in how electricity resources are procured, the need for wholesale market renewal and greater electricity consumer choice.

- The Ministry of Energy is currently updating its Long-Term Energy Plan (LTEP), which provides an opportunity to consider a range of policy changes to how the Ontario energy sector operates.

- On a number of occasions the Premier has indicated publicly that further relief on electricity prices will be provided to consumers in the near term.

Context – Infrastructure Investments

- In the eleven year period between 2005 and 2015, government added new electrical capacity to Ontario's grid to restore reliability, replace coal and meet environmental objectives.



Source: IESO Ontario Planning Outlook

Context – Electricity Prices

- Electricity price increases have generally outpaced inflation. There have been several government policies that have impacted electricity prices over the past several years, including: HST, the Industrial Conservation Initiative, the Ontario Clean Energy Benefit (OCEB) and the Debt Retirement Charge (DRC).

Context – Recent and Existing Government Funded Electricity Cost Mitigations

($Millions)	14-15	15-16	16-17[1]	17-18[1]	18-19[1]	19-20[1]	20-21[1]	Who Benefits
Ontario Clean Energy Benefit (OCEB) [2]	1,078	860	***OCEB ended on December 31, 2015***					• Residential customers, farms, small business (i.e., 10% off, on up to 3,000 kWh/month)
Ontario Rebate for Electricity Consumers (OREC or 8% rebate)*	-	-	300	1,100	1,200	1,200	1,200	• Residential customers, farms, small business (i.e., amount equal to the 8% Provincial portion of HST)
Ending Debt Retirement Charge (DRC) for Residential[3]	-	85	330	330	--	--	--	• Residential customers (i.e., saves about $70 per year for a typical residential consumer)
Northern Ontario Energy Credit (NOEC) [4]	24	26	25	25	25	25	25	• For eligible northern Ontario residents (i.e., for 2017, single people can receive up to $148,and families up to $227, depending on adjusted family income)
Ontario Energy and Property Tax Credit (OEPTC) (Energy component only)[4]	429	444	450	460	470	481	481	• For eligible low-to moderate-income individuals and families, & qualifying seniors (i.e., for 2017, up to $227, depending on adjusted family income)
Northern Industrial Electricity Rate Program (NIERP)	108	120	120	120	120	120	120	• Qualifying northern Ontario large industrial electricity consumers (i.e., rebate of 2cents/kilowatt-hour)
TOTAL	**1,639**	**1,535**	**1,225**	**2,035**	**1,815**	**1,826**	**1,826**	

Notes:

1. 2016-17 to 2020-21 based on forecasted numbers
2. OCEB ended December 31, 2015
3. 2015-16 estimated for 3 months of reduced DRC revenue. Estimated impact up to March 31, 2018.
4. Part of the Ontario Trillium Benefit. While related to energy generally, key policy driver for OEPTC when introduced in 2010 was electricity, as prices were forecast to rise, while fossil fuel prices, particularly natural gas, were low and falling.

CONFIDENTIAL CABINET DOCUMENT

Context – Recent Actions Taken To Mitigate Electricity Rates

- Following the 2016 Throne Speech, the several actions were announced to further reduce electricity costs.

1. As of January 1, 2017, Ontario is rebating an amount equal to the provincial portion of the HST to reduce eligible residential, small business and farm electricity bills by 8%.

2. Expanded support available to eligible rural ratepayers by updating Rural or Remote Rate Protection (RRRP) with additional relief, decreasing total electricity bills by an average of $45 each month when combined with the 8% rebate.

3. Expanding the Industrial Conservation Initiative (ICI) – up to one-third savings for participants.

4. Suspending the LRP II and the Energy from Waste Standard Offer Program (EFWSOP) – up to $3.8 billion in cost savings.

5. Limiting the Feed-In Tariff (FIT) 5 procurement target to 150 MW and suspending future FIT procurements – an average annual savings of $15 million.

Rate Mitigation Proposal

- The following approaches are proposed:

1) Smoothing the global adjustment (GA) to provide significant and immediate rate relief through cost deferral of the GA:
   - Smoothing Mechanism (i.e., 25% reduction); and
   - Implementation Model.

2) Enhancing competitiveness for Class B electricity consumers (i.e. manufacturing) by lowering the eligibility threshold for Industrial Conservation Initiative (ICI).

3) Helping vulnerable electricity consumers by enhancing electricity support and conservation programs and shifting cost onto the tax-base:
   - Rural or Remote Electricity Rate Protection (RRRP) Enhancement (Delivery Charge Relief);
   - Ontario Electricity Support Program (OESP) Expansion;
   - New Affordability Fund; and
   - On-Reserve First Nations Delivery Credit.

4) Ongoing activities to bend the future cost curve of electricity:
   - Ontario Energy Board (OEB) – Identify opportunities for future LDC efficiencies and rates;
   - Independent Electricity System Operator (IESO) – Modernize Ontario's electricity market through electricity Market Renewal initiatives.

GLOBAL ADJUSTMENT (GA) SMOOTHING

Overview – GA Smoothing

- The Global Adjustment (GA) has risen over the past decade as the province's electricity system has decarbonized.
  - The vast majority of GA costs now stem from greenhouse gas (GHG) emissions-free renewable and nuclear generation facilities, as well as natural gas plants that were constructed to restore system reliability and replace coal-fired capacity.
  - Generators in Ontario received contracted or regulated rates, which are typically designed to recover capital, financing, and fixed operations costs. The GA recovers these fixed costs of running the province's generation fleet, as well as the cost of conservation programs.
- The majority of the province's electricity generators are under 20-year contracts and account for less than half of the GA. Some of these generators will continue to provide value to the electricity system beyond their contract lives (i.e., beyond 20-years).
  - There is an opportunity to recognize the long-term benefit of these assets to the electricity system and "bring forward" that benefit for ratepayers today by deferring some of the current costs.
  - GA Smoothing would spread these costs over a longer period and provide immediate ratepayer relief (i.e., similar to re-financing a mortgage). By recognizing that generation assets are expected to continue to provide residual benefit to future ratepayers, beyond the term of current contracts, future ratepayers are expected to be able to utilize these assets and reduce the need to finance the development of new generation assets.
- The GA Smoothing option under consideration is illustrative and show potential rate mitigation measures to meet a targeted 25% reduction from the projected residential bill in 2017.
  - These residential impacts are based on a forecast for a household connected to Toronto Hydro that consumes 750 kWh per month.
  - Actual ratepayer savings would vary due to differences in consumption patterns.
  - Targeted to Regulated Price Plan (RPP) -eligible;
  - Rate increases would be capped at Consumer Price Index (CPI) for the first four years. Subsequent years would be set above CPI in order to ensure that bill increases due to repayments are capped at around 10% of the total bill.

GA Smoothing – Cost Breakout

- The Global Adjustment (GA) accounts for the fixed costs, including capital costs, of running Ontario's generation fleet, as well as the cost of conservation programs. The GA is instrumental in maintaining a reliable electricity system by ensuring that sufficient generating capacity is available.
  - Generators in Ontario received contracted or regulated rates, which are typically designed to recover capital, financing and fixed operations costs. Most generators are on 20-year contracts with the exception of hydroelectric and nuclear plants. They operate on longer contracts (or are regulated on a cost-of-service basis by the OEB) in recognition of the much longer operating lives of these facilities.
- Chart below shows the breakout of the GA by generator and program types. In 2016, the GA costs were $12.3 billion. These costs will evolve over time as 2,181 MW of previously contracted generation comes online in the coming years.

2016 GA Cost: $12.3 billion

	GA ($M)
Nuclear	5,053
Hydro	1,473
Natural Gas	985
Wind	1,552
Solar	1,630
Biomass, Landfill and Byproduct	278
Conservation	467
IEI Program	60
OEFC*	842

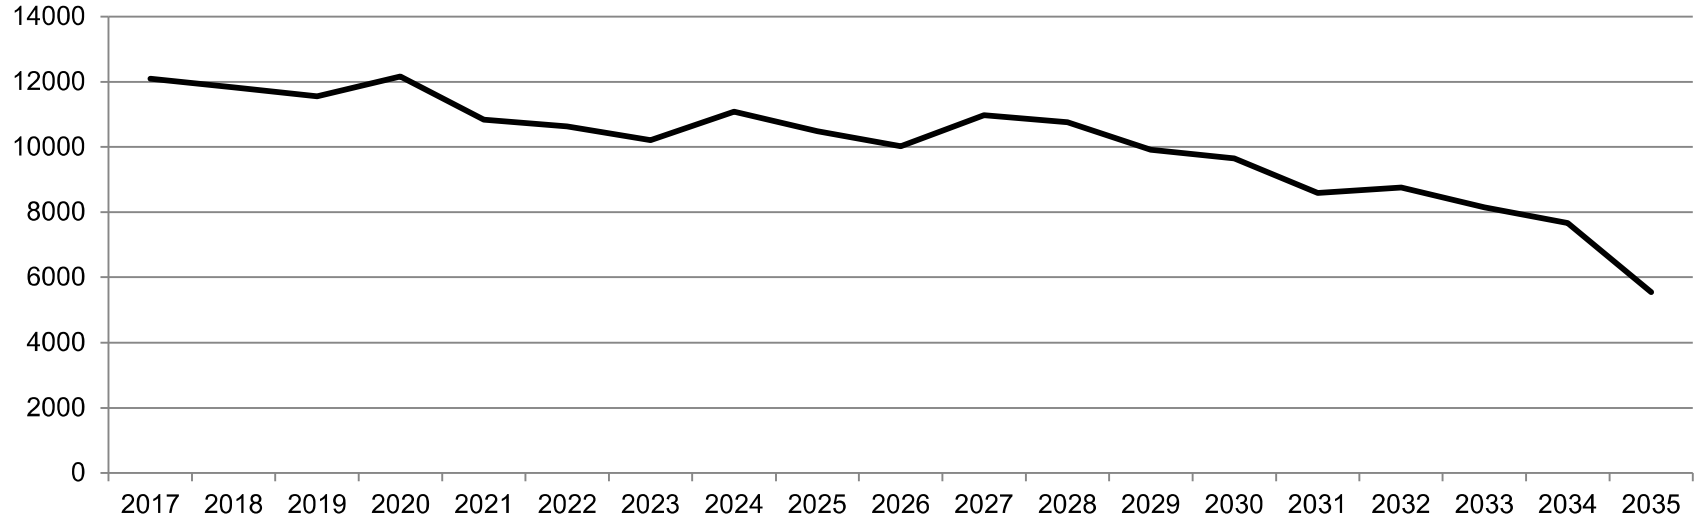
CONFIDENTIAL CABINET DOCUMENT

***Note:** OEFC indicates the cost of generator contracts managed by the OEFC which include contracts for natural gas, hydro and biomass generators**.**
**** Note:** Conservation measures, not quantified here, serve to reduce Ontario energy demand. Actual electricity generation would be larger than 155 TWh in the absence of conservation programs.

GA Smoothing – Global Adjustment Forecast

- The amount of Global Adjustment (GA) is forecast to decrease through the forecast period. Several factors contribute to the decline of GA, including:
  - Expiry of electricity generation contracts;
  - Cost of existing contracts reduced due to Inflation; and
  - Higher wholesale electricity prices due to higher natural gas/carbon prices, higher demand and reduced nuclear generating capacity.

Forecast Global Adjustment Cost (nominal $ million)



CONFIDENTIAL CABINET DOCUMENT

GA Smoothing – Expected Life of Electricity Generating Assets

- Gas, wind and solar generators are typically contracted for a 20-year period (e.g., with the Ontario Electricity System Operator (IESO), etc).
  - Nuclear and hydroelectric generators are contracted for a much longer period or regulated by the Ontario Energy Board (OEB) on a cost-of-service basis.
- While it is likely that gas, wind and solar generators will be able to operate beyond their current contracts, IESO advises that generators will need to decide what level of capital investment is appropriate for ongoing operations (i.e., by replacing and/or refurbishing major facility components).
  - In IESO's 2016 Ontario Planning Outlook (OPO), it was assumed that the service lives of generators could be extended beyond their contract term based on additional investments and ongoing costs. **Note:** This was not an assessment of the cost/benefits or a prediction of what the generators would actually do at the end of their contracts.
- The table below outlines IESO's current estimates for service lives of gas, wind and solar facilities. The ongoing service lives of these facilities depend on: initial facility design & build, operating activities (e.g., hours of operation, etc.) and level of facility maintenance (i.e., ongoing component repair and replacement).

Technology	Contract Life (yrs)	Expected Life (yrs)	Expected Cost Post-Contract Life
Gas	20	Up to 30	Life varies with initial design, how it is operated and maintained.
Wind	20	Up to 30	Older technologies may deteriorate faster. Elements such as foundations and electrical integration can last longer.
Solar	20	Up to 30	Performance deteriorates to about 80% by end of contract. Some facilities built in the initial contract periods may deteriorate more; however, technology is improving rapidly. Components need to replaced 5 to 30 years depending on design.

Notes: Assumes 30 year financing period and a nominal interest rate of 5% (compounded monthly). Ratepayer GA payments increase annually beyond 2021 such that the average monthly residential electricity bill increases by 6.5% per year with a limit of $2.2 billion above the true cost of GA in any given year to cap repayment charges at around 10% of total bill. IESO forecast is based on IESO's revised OPO forecast as of February 2017. Includes the cancellation of LRP II and EFW, expansion of ICI. Does not include smoothed OPG rates. Above residential bill is based on a 750 kWh per month Toronto Hydro customer.

CONFIDENTIAL CABINET DOCUMENT

A. GA Smoothing for RPP-Eligible Only – Residential Bills Lowered 25% (with Tax-base Funded 8% Rebate and Social Programs, 2% increase)

- Total bill below is based on a revised IESO forecast. See footnotes for more information.

Residential (750 kWh/month)	Actual 2016	2017	2018	2019	2020	2021

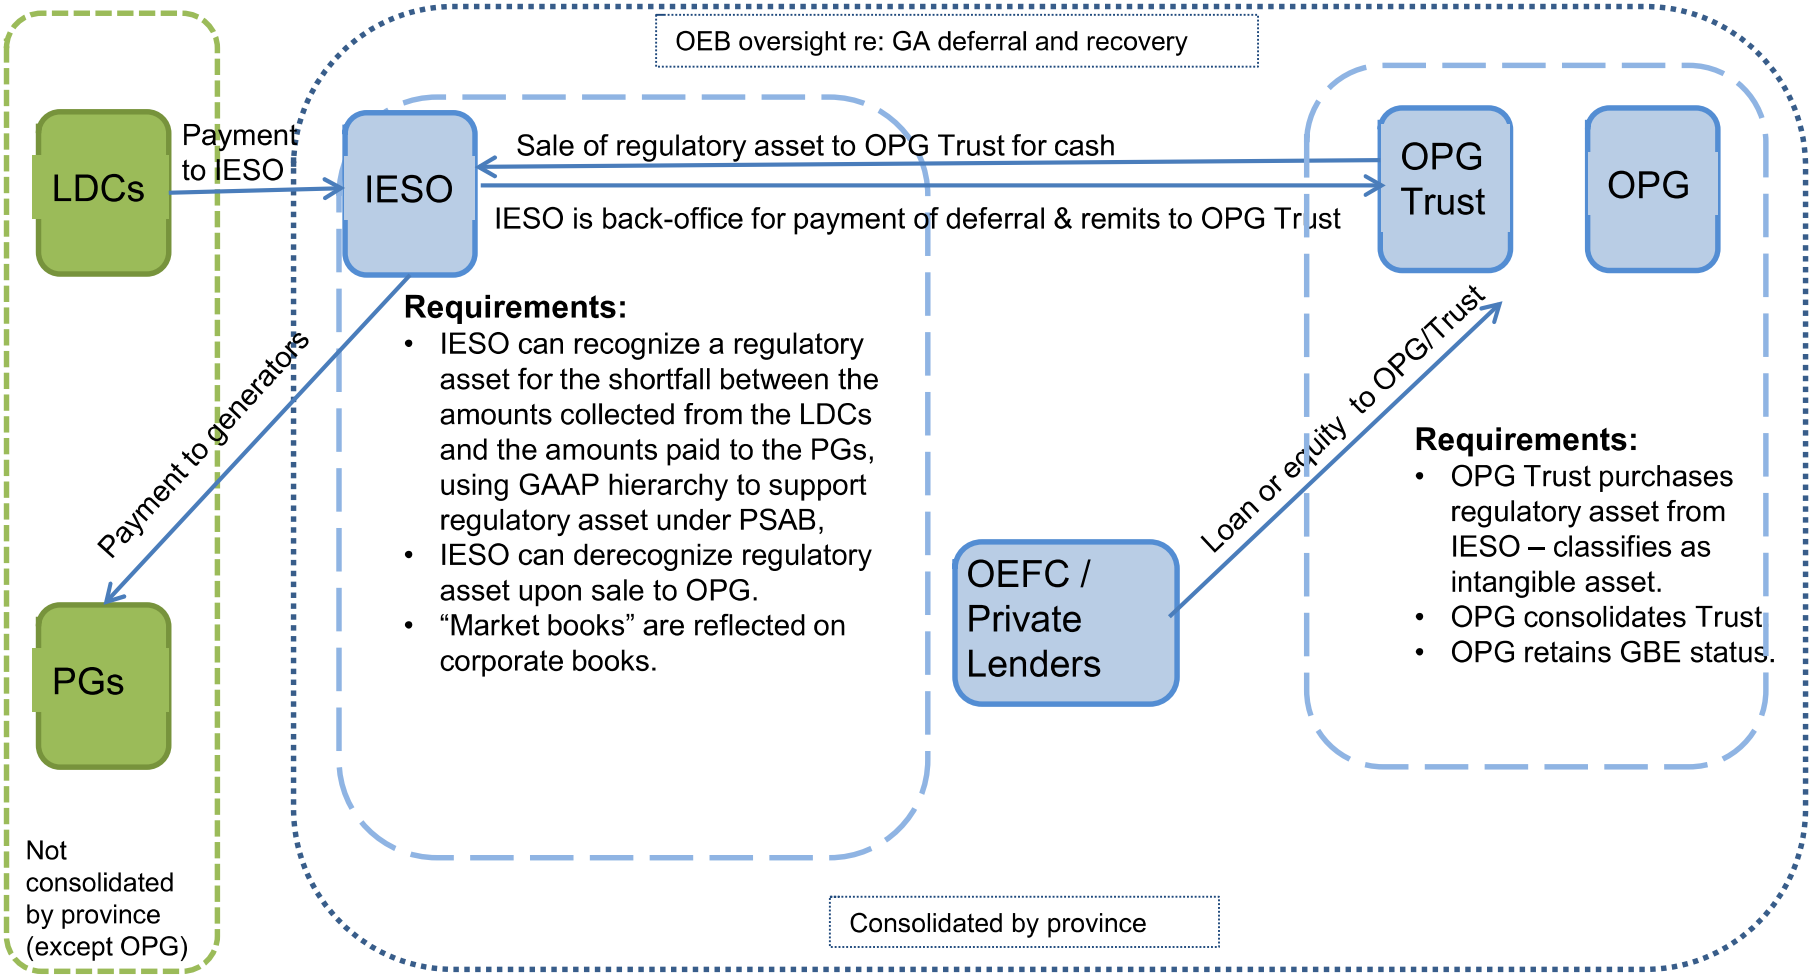
Large Industrial ($/MWh)	Actual 2016	2017	2018	2019	2020	2021
Class A Total (excludes HST)	**90**	**91**	**93**	**88**	**95**	**96**
Class A Revised Total (excludes HST)	**90**	**88**	**90**	**84**	**92**	**93**
Year-over-Year Change		-2%	2%	-6%	9%	1%
Change from Forecast		-4%	-4%	-4%	-4%	-4%

Notes: Based on IESO's revised OPO forecast as of February 2017. Includes the cancellation of LRP II and EFW, expansion of ICI. Does not include smoothed OPG rates. Above residential bill is based on a 750 kWh per month Toronto Hydro customer. Above Class B estimate based on a 1 MW customer connected to Toronto Hydro, assumes delivery charge escalates as per residential forecast. "Social programs" refers to existing RRRP and OESP. While initiatives would take several months to implement, the above estimate for 2017 reflects a full-year impact. The 8% rebate above represents savings compared to status quo due to the reduction in the sub-total from GA financing.

B. GA Smoothing – Potential Structure

- The following diagram provides an overview of a potential GA smoothing structure, as well as interactions between sector entities and elements required to meet accounting objectives.



CONFIDENTIAL CABINET DOCUMENT

Note: Proposed structure is subject to legal and accounting confirmation, absent that confirmation, there would be a fiscal impact to the province.

B. GA Smoothing – Accounting Considerations

- OPCD advises that analysis is not complete; several requirements (below) are high risk re: satisfactory resolution.
- Complexity of the structure and length of deferral/recovery increase risk and decrease transparency
- If all requirements can be met, an accounting analysis is expected to support: (1) increase in provincial borrowing (2) no increase in net debt, and (3) no impact on annual surplus/deficit, but depending on funding to OPG/Trust from Province, an increase in interest on debt and an increase in income from OPG will result.
- IESO requirements – IESO Finance, KPMG (Energy advisor and IESO auditor), OPCD and EY (OPCD advisor) are evaluating accounting risks:
  - IESO can recognize a regulatory asset for the shortfall between the amounts collected from the LDCs and the amounts paid to the PGs using GAAP hierarchy to support regulatory asset under PSAB
  - IESO can derecognize regulatory asset upon sale to OPG; and
  - "Market books" are reflected on corporate books.
- OPG requirements – OPG Finance, EY (OPG auditor), PwC (OPG Advisor), and OPCD are evaluating accounting risks:
  - OPG Trust purchases regulatory asset from IESO – classifies as intangible asset;
  - OPG consolidates Trust; and
  - OPG retains GBE status.
- No discussion with OAG; in previous Annual Reports, the OAG has raised concerns about the appropriateness of recognizing rate regulated assets and liabilities.

B. GA Smoothing – IESO Considerations

- The Electricity Act enables the Independent Electricity System Operator (IESO) to recover from ratepayers the amounts paid to generators, distributors or other contracted entities.
- The accounting advice received by IESO is that reflecting market balances and regulated assets is a more appropriate presentation for its financial statements going forward.
- IESO is characterized as an "Other Government Organization" (OGO) and consolidated on a line-by-line basis into the Provincial books.

Issue	Response
1. Can IESO adopt regulatory accounting?	• Public sector accounting does not address regulated assets. • Guidance can be drawn from other accounting bodies. • US Federal Accounting Standards Advisory Board (FASB), US Governmental Accounting Standards Board (GASB) and International Accounting Standards Board (IASB) do provide guidance. • FASB accounting standard 980 and IASB have specific references that support the adoption of regulatory accounting. **Conclusion:** There is a hierarchy of accounting principles that support this approach.

B. GA Smoothing – IESO Considerations

Issue	Response
2. Can IESO recognize the GA deferral as a regulatory variance account?	Criteria for recognition are: • Rates are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers. • Rates are designed to recover the specific costs of regulated business-type activities. • In view of demand, it is reasonable to assume that rates will be set to recover the regulated business-type and can be collected from customers. **Conclusion:** Legislation creates the right to collection, currently and in the future. With either OEB or IESO board involvement a regulatory asset can be recognized.
3. Can IESO sell the variance account related to the deferral of the annual Global Adjustment account?	• The sale of the variance account to OPG Trust must be structured as an absolute assignment of future economic benefits of the Asset with no obligations, rights or benefits remaining of IESO. • In that case, this would represent a sale of the future right to collect these amounts from the ratepayer. **Conclusion:** Based upon proposed terms of the sale agreement, there would be no future economic benefit for IESO. Risk and rewards are entirely transferred to OPG Trust.

B. GA Smoothing – OPG Accounting Considerations

- OPG's Special Purpose Vehicle (SPV)/Trust is a stand-alone entity able to conduct business separately under a Trust agreement. **Note:** The conditions required for OPG to consolidate the SPV/Trust are outlined in the following table:

Issue	Response
1. Decision Making	• OPG must have decision making authority on the operation of the SPV/Trust (without a veto right by the Province), including naming of trustees, establishing operating plans and budgets, setting or changing financing policies. • The SPV/Trust while operating within the legislation, must be controlled by OPG to operate freely and to alter terms and conditions not specified in the legislation to ensure recovery of the deferred amounts.
2. Business Risk	• The SPV/Trust must have variability of returns as a normal business enterprise would, including such things as interest charged on deferred amounts, decisions on how to finance these deferred amounts, the ability to make / lose and keep any spread from financing.
3. Funding	• The Province cannot directly or indirectly fund more than 50% of SPV/Trust or any investment in the SPV/Trust. • OPG must own at least 50% of the most exposed equity /sub-debt in the SPV/Trust.
4. Directive	• Directive that is issued should not be prescriptive or direct OPG to set up this business. The directive should only be "guiding" i.e. to allow OPG to evaluate options and put forward to the OPG Board a recommended plan for Shareholder approval.

B. GA Smoothing – OPG Accounting Considerations (cont'd)

Issue	Response
5. Other required Attributes	• The legislation that supports the formation of the SPV/Trust must have the following attributes: – Must require interest, carrying and administrative costs be paid to the Trust to allow for Revenue recognition; – The amount to be deferred must either be specified or be calculated based on a specific formula that is not subject to ongoing decision making by the Province. **The Province cannot have the ability to override this formula;** – SPV/Trust and its debt holders will require their capital guaranteed and paid for directly by the Province if the Province revokes the legislation; and – The spirit of the legislation should be reflected in the Trust Indenture Agreement.

B. GA Smoothing – OPG's Financing Structure Requirements

KEY ELEMENTS REQUIRED TO ENSURE THE DEFERRAL OF GA CHARGES CAN BE FINANCED:

Creating the Right to Recover Deferred GA

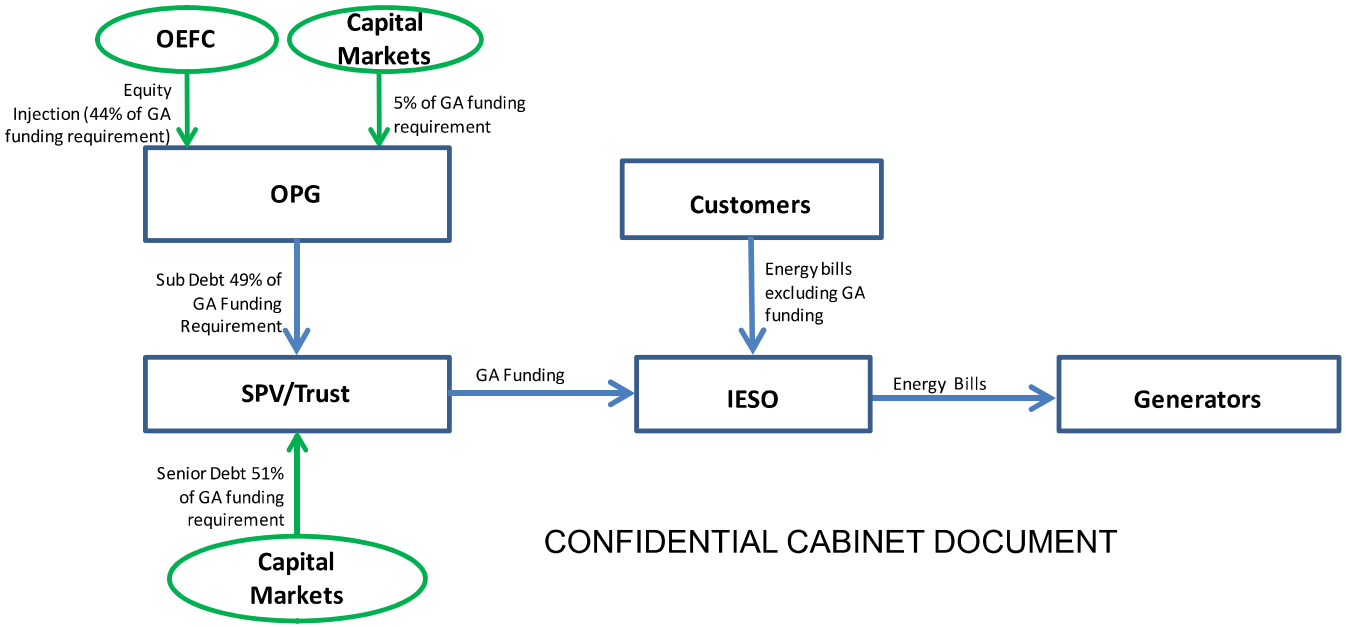
- Legislation enshrines the ability of the IESO to create a Right to charge customers in the future for the Global Adjustment (GA) deferred today including principal amount deferred, interest and other financing costs on the amount deferred and fees, expenses and other administrative costs.
- The Right can be sold to an appropriate Trust or Special Purpose Vehicle (SPV) to obtain funds to pay amounts due to generators under contracts or regulation. These SPVs are generally single purpose entities with no other operations that could add risk to the entity, dilute debt holder rights, allow parties from other operations to claim rights to the future recovery from customers or allow these other parties to initiate bankruptcy proceedings.
- Right must be irrevocable and if the Right is amended by future governments the debt holders have the right of action against the government to recover the amount outstanding including interest, fees, expenses and any damages resulting from the amendment.
- Right must specify the recovery period or the mechanism for setting the recovery rate including true up of the rate to ensure all amounts are recovered.

Economic Factors

- Limits on the recovery amount (principal, interest, fees and expenses) charged to customers in future periods must have compensating elements such as longer recovery period to ensure the full amount deferred plus interest, financing and other administration costs is recovered from customers.
- Need to balance customer relief with debt holder risk. Longer recovery periods and larger deferred balances increase risk to the debt holder of future government intervention.
- The amount required by the SPV to purchase and service the Right will be funded 51% from debt holders, 5% from OPG through capital markets and 44% from OPG via equity injection to OPG from the Province. The funding from OPG will be loaned to the SPV as subordinated debt.

B. GA Smoothing – OPG's Financing Structure Requirements (cont'd)

- Special Purpose Vehicle (SPV) will be used to raise the GA financing and ring fence OPG from its legal obligations
- SPV will be structured to allow for GBE accounting consolidation into OPG
- Given that SPV will be consolidated into OPG for accounting purposes, the significant amount of debt required to fund the GA deferral will have a severe impact on OPG's credit rating. If 100% of the requirement is funded by debt OPG would be downgraded.
- To manage this exposure and minimize the cost of funding. The required funding would be split into 2 buckets:
  1. 56% from capital markets; and
  2. The remainder provided by the Province via equity injection, which would be loaned to SPV as subordinated debt.
- The use of equity to fund a portion of the GA deferral also allows for an improvement in both Net Income and EBITDA as incremental revenue is captured by the increase in the value of the deferral which would offset the fiscal impact of the borrowing at Province level.
- Credit rating metrics are generally maintained within established limits.



CONFIDENTIAL CABINET DOCUMENT

Ontario

GA Smoothing – OEB Considerations

- Ontario Energy Board (OEB) oversight may be required as part of creating a regulatory asset.
- Subject to final confirmation, there are several other spheres for possible OEB oversight:
  - The rate payer impact of IESO deferral account and eventual repayment of the deferred Global Adjustment (GA), within pre-defined legislative parameters;
  - The administrative costs of the OPG's Special Purpose Vehicle (SPV) /Trust (e.g., as the OEB reviews and approves IESO's expenditure and revenue requirements and makes orders fixing just and reasonable rates for the Smart Metering Entity);
  - The SPV/Trust's returns (e.g., as the OEB does with OPG's regulated assets) and whether any income to OPG can be used for the benefit of rate payers;
  - The review of the final structure of the debt issuance for the limited purpose of ensuring requirements of law have been met; and
  - In out years, review of the collection of charges to ensure that collection is sufficient, and not greater than necessary, to pay debt service.
- The scope of OEB oversight will ultimately need to balance the interests and needs of rate payers, the market, OPG and the Province.

B. GA Smoothing – Ontario Financing Authority (OFA) Considerations

- Under the proposed structure, the financing of the deferred Global Adjustment (GA) costs would be effectively done in part by each of the OPG Special Purpose Vehicle (SPV)/Trust, the Province and OPG: the OPG SPV/Trust would borrow 51%, the Province 44% and OPG 5% of the required GA amounts needed to be financed.
  - In the alternative, the Province (through the OFA/OEFC) could borrow the required amounts each year, likely at a lower cost. However, the target for an arms-length trust and potential risk transfer would not be achieved.

	OPG Structured Financing	OFA/OEFC/Provincial Financing
Financing Considerations	• As the OPG SPV/Trust would be borrowing in its own corporate capacity from the public markets, it will likely incur a higher interest cost compared to the Province's borrowing. • This would increase the cost of GA smoothing and the ultimate rate impact on future consumers. • The Trust would be exposed to interest rate changes. • Availability of debt financing may also be limited, depending on the overall amount of deferral, and the subsequent rate impact during the recovery period. OPG has cited examples of a 10% threshold on overall rate impacts of the deferral recovery amounts. • With a potential guarantee from the Province for the borrowing of the OPG SPV/Trust, OPG could see borrowing costs closer to the Province. However, this would redirect the risk back to the Province, removing the intended benefits of using this particular structure, and could add risk to the targeted accounting treatment. • With, or potentially even without a provincial guarantee, OPG SPV/Trust's borrowing could be seen as debt effectively supported by the Province by credit rating agencies and included in their analysis and determination of the Province's ratings. • If a Provincial guarantee endangers the targeted accounting treatment, it may be hard to justify the higher cost borrowing by OPG SPV/Trust to be passed through to ratepayers.	• Province's borrowing from the public markets would add to the borrowing program and the Province's gross debt. • The Province would expect to be able to finance the GA deferral at a lower financing cost than the OPG SPV/Trust, but would likely not achieve the targeted accounting treatment based on OPG's analysis. • Net debt would not increase, to the extent supported by increased equity in OPG under that model, and/or if the accounting treatment can be achieved as backed by a GA-related asset (OPG does not consider that the accounting can be achieved if the SPV/Trust is financed by the Province). • The Province's interest on debt (IOD)cost would need to be effectively recovered through the GA. – E.g., an OPG equity return to cover the cost of borrowing for the equity injection. – Or more directly if the Province is providing financing directly to the GA entity. • The cost of borrowing for the Province could change: 1. The Province's credit rating could be at risk of being re-evaluated by Rating Agencies, which may negatively impact the cost at which the Province borrows and 2. An increase in the Province`s borrowing rates, as a result of increased borrowing. The market may not have adequate demand for the Province to carry-out these borrowings without increasing the interest rate on the debt issues for GA financing and for all of the Province's borrowings. • The interest cost of GA deferral would be exposed to changes in the interest rate environment generally.

GA Smoothing – Legal Considerations

- In principle, refinancing the Global Adjustment (GA) to spread the costs of generation and conservation assets over the useful life of the assets presents only a low risk of being a tax, as each cohort of consumers pays for a proportion of the GA cost roughly equal to the proportion of the benefit they receive from the useful life of the assets.

- Legal risk arises if it becomes apparent that the Government is not spreading cost so that it is shared proportionately by future consumers who cause a need for or benefit from the generation asset, but rather is doing so in order to lower the price in the short term by increasing the price in the long term. If the proposed financing served to encumber future consumers with a premium payment to cover the GA financing in order to subsidize current ratepayers, then there would be a moderately high constitutional risk that the financing proposal would result in an unconstitutional tax.

- Former Supreme Court Justice Ian Binnie has provided a legal opinion concluding that the current proposal is at a moderately high risk of being a tax, for the following reasons:
  - The degree of constitutional risk is in direct proportion to the extent the government is not able to show a proper match between the cost of providing facilities for electricity generation and the group of consumers who benefit year to year from electricity generated by those facilities.
  - If the government fails to establish that the relevant electricity generating assets will continue to perform economically over the 30 year period, or if the GA charge is in the opinion of the Court disproportionately backend loaded, the GA will not qualify as a regulatory charge (and would be characterized as a tax).
  - By shifting costs to the 20-30 year customers, the government may in reality be disproportionately back-end loading the GA with the effect that the 20-30 year consumers will be subsidizing the 1-20 year consumers.
  - The judges can be expected to be aware of the difficult political problem of high energy costs in in Ontario, and will take a careful look at the government's evidence in support of the re-allocation of the GA.

GA Smoothing – Policy Considerations

- Borrowing money to smooth the Global Adjustment (GA), while lowering costs in the short term, results in a more rapid rise in electricity prices beyond the rate of increase already expected.
  - In addition, should Ontario electricity demand be lower than forecasted, the cost of paying off the debt will be spread over a smaller pool of consumption, further increasing future costs for individual ratepayers.

- The impacts are also based on a GA forecast. Since the GA fluctuates, actuals will vary based on demand, the addition of new generation and natural gas prices.
  - A "true-up" mechanism will be required to account for the difference between the "estimate" and "actual" GA costs.

- Although Class B electricity consumers, such as commercial and small industries, do not receive the benefit of GA smoothing (i.e., because it is only targeted to RPP consumers), the Ministry has a proposal later in the submission to address competitiveness for Class B consumers (i.e., targeted lowering of the Industrial Conservation Initiative (ICI) eligibility thresholder from 1 MW to 500 kW).
  - Class B consumers have raised concerns about the cost of electricity and its impact on their business competitiveness.
  - **Note:** Although Class B and Class A consumers will not receive the rate relief benefits of GA smoothing, both consumers will benefit from tax-basing the electricity social programs.

- Given the legal framework the amount of GA smoothing needs to be proportionate to the generating contracts (i.e., 20-year) and the additional years of generation services still available (i.e., additional 10-years of service).

- Rating agencies and investors in the Province's debt may view this borrowing as an obligation of the Province, regardless of accounting treatment. Depending on the magnitude of the debt to be incurred could have an impact on the Province's borrowing cost.

- The GA smoothing proposal will accrue total interest of $25 billion based on the proposed option. This amount of interest is sensitive to many factors, including interest rate, natural gas and carbon prices, generation costs and demand levels.
  - An increase in the borrowing rate from 5% to 6% would increase the total interest costs by almost $9 billion and would require an extension of the financing term beyond 30 years.

GA Smoothing – Fiscal Considerations

- If the proposed legal and accounting treatment of the GA financing smoothing proposal is not implemented, there would be a negative impact on the province's fiscal plan, as shown below.

Fiscal Impact ($M)	2017-18	2018-19	2019-20	2020-21	2021-22
Bills Lowered by 25%, RPP-Eligible Only*	2,534	2,668	2,942	3,420	3,232

*Numerical values represent amount borrowed in indicated fiscal year plus accumulated interest from previous year's accumulated debt

Source: Ministry of Energy

ENHANCING COMPETITIVENESS FOR CLASS B ELECTRICITY CONSUMERS

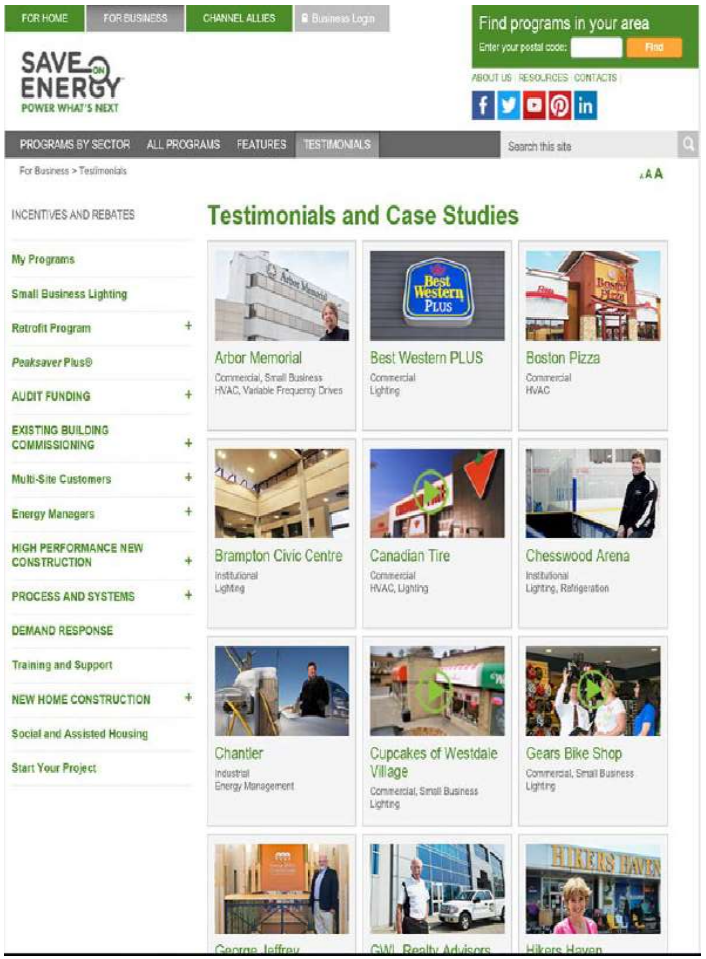
Support for Class B Consumers

- Class B electricity consumers comprise about 50,000 customers, including many mid-size manufacturers (i.e., automotive parts suppliers, plastics manufacturers), large commercial buildings (i.e., office blocks, mid-sized shopping malls) and broader public sector facilities (i.e., hospitals, college campuses).

- Through saveONenergy, many Class B consumers have already taken advantage of energy efficiency programs.

  - Although saveONenergy programs like Process and Systems Upgrade Incentive exist, these programs generally require significant investment on behalf of the customer in addition to the incentives and therefore may be difficult to take advantage of.

  - For Class B manufacturers whose electricity consumption is primarily based on process activities (e.g., injection moulding, welding, etc), traditional conservation measures like lighting and ventilation upgrades have limited benefit.



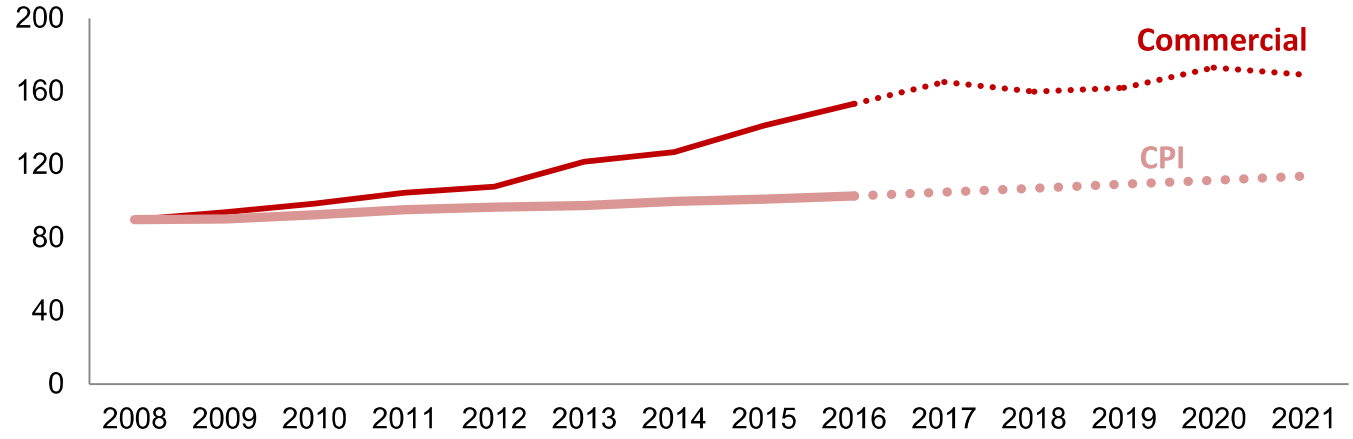
Support for Class B Consumers (cont'd)

- Class B consumers are too large for the Regulated Price Plan (so do not qualify for the 8% rebate for small businesses or Time-Of-Use pricing) and too small to be Class A (so do not qualify for the Industrial Conservation Initiative (ICI) for large consumers).

- Price mitigation initiatives could be provided to Class B to address stakeholders' concerns (e.g., Coalition of Concerned Manufacturers of Ontario, etc).

- The chart below highlights that the cost of electricity for Class B consumers has risen faster than CPI.

Illustrative Electricity Prices
in $/MWh



***Source*:** IESO; OEB; Ministry of Energy

CONFIDENTIAL CABINET DOCUMENT

Lower ICI Threshold Below 1 MW for Energy Intensive Industry

- The Industrial Conservation Initiative's (ICI) eligibility threshold for participation was recently lowered to 1 MW. The lowering of the ICI eligibility threshold provides an opportunity for additional Class B consumers to save on their electricity costs if they choose to opt-in to ICI (i.e., and become new Class A consumers):
  - Beginning in July 2017, new participants will be billed Global Adjustment (GA) on the basis of their contribution to province-wide peak demand.
  - Prior to lowering the ICI eligibility threshold, electricity consumers with peak demand between 3 and 5 MW could only participate in ICI if they belonged to the following sectors: manufacturing, mining, data processing, refrigerated warehousing and greenhouses. **Note:** To achieve the benefits of ICI, participants must reduce their electricity demand during the five system peak hours.

- To enhance the competitiveness of larger Class B consumers whose electricity demand are too low to currently qualify for ICI, the Ministry proposed to:
  1. Expand ICI by extending eligibility to larger Class B consumers with average monthly peak demand over 500 kilowatts; and
  2. Target the expansion to energy intensive industries with the North American Industry Classification System (NAICS) codes 31 - 33 (i.e., Manufacturing).

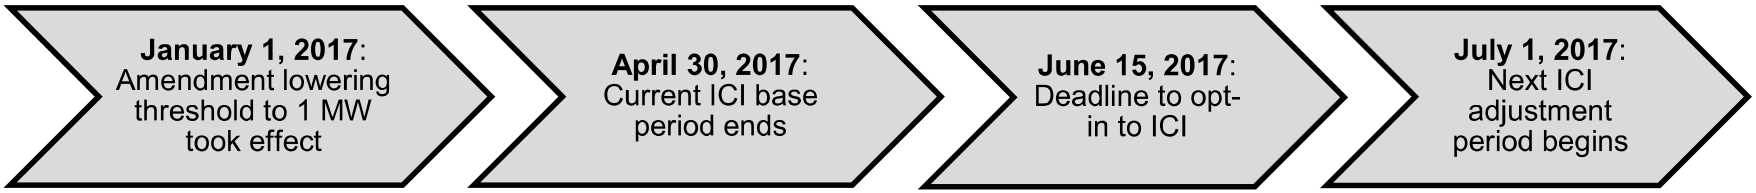
- In addition, the Ministry will assist Class B participation in ICI through a targeted outreach campaign delivered by the Ontario Chamber of Commerce (OCC).

Lower ICI Threshold Below 1 MW – Considerations

- A targeted lowering of the ICI eligibility threshold from 1 MW to 500 kW provides benefit to larger Class B consumers (i.e., manufacturing) while limiting the cost shift to other electricity consumers.
  - **Note:** A Class B consumer that run only a day shift, resulting in fairly peaky load profiles would need to adjusted its behaviour to maximize the benefits of ICI.

- Preliminary analysis by ENERGY staff show that the estimated impact of a targeted lowering of the ICI eligibility threshold from 1 MW to 500 kW would increase a typical residential bill by up to 0.66% or just over $1/month based on a 2016 bill of about $158.
  - The actual impact would vary depending on uptake and consumer responsiveness.
  - With the recent lowering of the ICI eligibility threshold to 1 MW, there is no information available regarding the actual impact on new participants and the electricity system.

- In order for any changes to ICI eligibility to take effect before the next 12-month billing period beginning July 1, 2017, regulatory amendments would have to be made before the end of April 2017.



Lower ICI Threshold Below 1 MW – Legal Considerations

- The quantum of a regulatory charge may be set at different rates within a regulatory structure where the differential prices are intended to serve other regulatory goals including an intention to modify the behavior of persons within the scheme.

- Expanding access to the Class A pricing regime is intended to serve regulatory goals by encouraging consumers to shift their electricity use away from peak hours, which benefits the electricity system as a whole. While Class B consumers will have to pay more of the GA cost in order to finance the reduction for Class A consumers, this is generally permissible since Class B consumers are not modifying their behaviour and the total amount recovered for the GA does not exceed its cost. CLB has previously advised that the differential pricing structure generally only attracts a **moderately low risk** of being a tax, and this risk level does not change if the option of Class A pricing is extended to a broader class of consumers.

- It is more difficult to justify a differential regulatory charge on the basis of behavioral modification when the lower charge is not available to some participants in the regulatory scheme whose conduct could equally serve the same goals. To the extent that there is not a regulatory rationale for extending the new class A option only to certain sectors, risk increases. The amount of risk in this scenario will vary depending on the quantum of the premium that Class B consumers pay to create the behavior modification incentive for Class A and the degree to which the excluded sectors can credibly claim to be able to achieve the same outcome were they permitted to participate in this aspect of the program.

ELECTRICITY SUPPORT AND CONSERVATION PROGRAMS TO HELP VULNERABLE ELECTRICITY CONSUMERS

Electricity Support and Conservation Programs to Help Vulnerable Electricity Consumers

- To date, a number of electricity support programs are funded through the electricity rate-base. There is opportunity to provide support to a more targeted subset of customers who are disproportionately affected by increased electricity costs and to shift these costs to the tax base.

- These customers include:
  - **High Delivery Cost Customers:** Some customers in rural areas where the cost to deliver electricity is high can experience difficulty in reducing their electricity bill through conservation, particularly when reliant on electric heating.
  - **Low-Income Customers:** Rising electricity costs make up a disproportionally large amount of the household expenditures for low-income households.
  - **First Nation On-Reserve Customers:** On-Reserve First Nations customers experience challenges with energy affordability and are seeking to address historical grievances associated with electricity system infrastructure.

- To provide targeted assistance to the customers and alleviate electricity cost burden, ENERGY proposes to:

  A. **Enhance Rural or Remote Rate Protection** (RRRP) by funding its costs through the tax base and providing additional support to customers of designated Hydro One rate classes and other high distribution cost Local Distribution Companies (LDCs).

  B. **Enhance Ontario Electricity Support Program** (OESP) by funding its costs through the tax base and increasing eligible benefits by 50%.

  C. **Establish a new Affordability Fund**, providing energy efficiency measures at no or minimal cost to those who are ineligible for low-income conservation programs, have difficulty paying their electricity bills and who cannot make energy efficiency upgrades without financial assistance.

  D. **Implementing On-Reserve First Nations Delivery Credit**, to remove Delivery charges for on-reserve First Nations customers.

A. Delivery and Distribution Charge – Background

- The **Delivery** line on a typical consumer bill is specific to a consumer's Local Distribution Company (LDCs) and accounts for roughly 25-35% of the total bill before taxes.
- Delivery covers the costs of getting electricity from generating stations across the province to homes and businesses and combines three cost components of the electricity sector into one line item charge:
  - **Transmission:** The costs of moving electricity across high voltage lines from generating stations to the distribution system. This cost is recovered through a variable charge that is approved by the OEB.
  - **Distribution:** The costs of moving electricity from the transmission system to homes and businesses. Depending on the LDC, distribution costs makes up about 60% to 80% of the Delivery line.
    - This cost is currently recovered through both a variable charge and fixed charge, approved by the OEB. Distribution rates are moving to a fully-fixed charge over next 5 years.
  - **Line Loss:** The costs to recover electricity that is lost as heat when its delivered over a power line. Each LDC is assigned by the OEB a specific line-loss adjustment factor to reflect their loses particular to their assets. This factor is multiplied against the monthly electricity cost to determine the monthly cost.

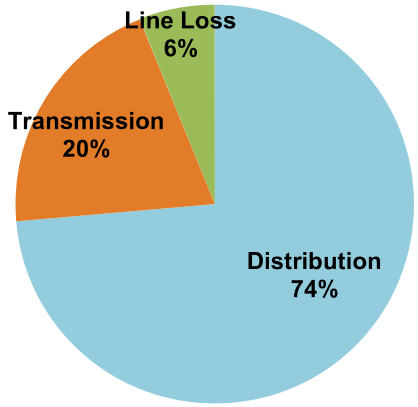
Cost breakdown of Delivery Line for an Average Residential Bill*



* Toronto Hydro Bill @ 750kWhs

A. Rural or Remote Rate Protection Program – Background

- Rural or Remote Rate Protection (RRRP) mitigates some of the high costs of electricity distribution in rural or remote areas of the Province. It is a legacy program of the old Ontario Hydro and has existed in its current form since 2001.
  - RRRP is funded by ratepayers in Ontario and funded through the regulatory line of the electricity bill. Currently costs $1.58/month for a 750kWh consumer.
- Part of the program helps fund the costs of Hydro One customers classified into the "R2" residential rate class. There are 335,000 R2 customers across the Province. These customers have some of the highest Delivery costs in the Province.
  - From 2001-2016 the program provided $125.4 million annually to help defray these costs.
  - In the 2016 Speech from the Throne, this funding was expanded by $116.4M to a total of $241.9 million.
  - As of Jan 2017 R2 customers receive $60.50/month off their distribution costs.
- These customers still have high delivery and high distribution costs and are often faced with significantly higher than average bills.
  - The higher than average consumption patterns coupled with higher than average distribution rates has resulted in monthly bills many view as no longer affordable or equitable.

A. Enhancing the Rural or Remote Protection Program (RRRP)

- While the RRRP helps mitigate some of the higher distribution costs for Hydro One R2 customers, there is an opportunity to provide further relief to consumers in relatively high-distribution cost outlier LDCs (top ~1/8th of distribution rate classes).
  - If expanded to the top 1/8th of distribution costs, this enhancement would also include Hydro One R1 customers (medium density), as well as LDCs with high distribution costs including: Northern Ontario Wires, Lakeland Parry Sound, Chapleau, Sioux Lookout, InnPower, Atikokan and Algoma.
- Mitigation could be provided by harmonizing distribution rates for these LDCs at the lowest distribution rate paid by an average consumer in this group.
  - Based on projected 2017 LDC rates, the lowest distribution rate paid by an average consumer in this group would be ~$38/month (with the highest being $65).
  - Is consistent with the OEB's mandated move to fully fixed distribution rates for all LDCs.
  - Roughly 800,000 customers would receive benefits from the current RRRP program and from these additional enhancements.
  - Setting a lowest distribution rate across these LDCs would help mitigate geographic-based differences in rates for the consumers who are most impacted and often see such differences as inequitable.
- Mitigation for all electricity consumers would be provided by moving the existing RRRP program costs and the proposed enhancements from the electricity rate base to the tax-base.

A. Enhancing the Rural or Remote Protection Program (RRRP)

- The table below shows what 2017 distribution costs are projected to be for the average consumer within each LDC across the province, and highlights the highest-cost distribution rates.
- The charts on the following slides show what the benefits would be in each LDC if the fiscal plan was used to support harmonizing distribution costs for customers of the LDCs in the top ~1/8th of rate classes at $38/month.

Note: *Rates are for 2017 (either approved or proposed)*
Distribution is one component of Delivery line charge.
Transmission and line loss charges not shown.

CONFIDENTIAL CABINET DOCUMENT

A. RRRP Enhancement – Considerations

Implementation

- The Ministry will need to ensure that only the high distribution cost LDCs are captured within the program framework
  - LDCs may need to be named explicitly in the legislation/regulation
  - A mechanism would also need to be created to ensure the level of benefit changes year to year
- LDCs will need to change their billing and customer information systems. OEB estimates that the implementation would take at least 6 months or more, following finalized regulations
- New legislation would be required to establish this program.
- Providing a tax-based subsidy outside of exiting rate setting mechanism reduces incentives for customers and distributors to engage on operating costs and capital planning.
- A mechanism will need to be created to ensure that LDCs/OEB/IESO/Province are aligned in the year-to-year forecasting and costing of the RRRP program and the enhancements.

A. RRRP Enhancement – Considerations (cont'd)

Fiscal

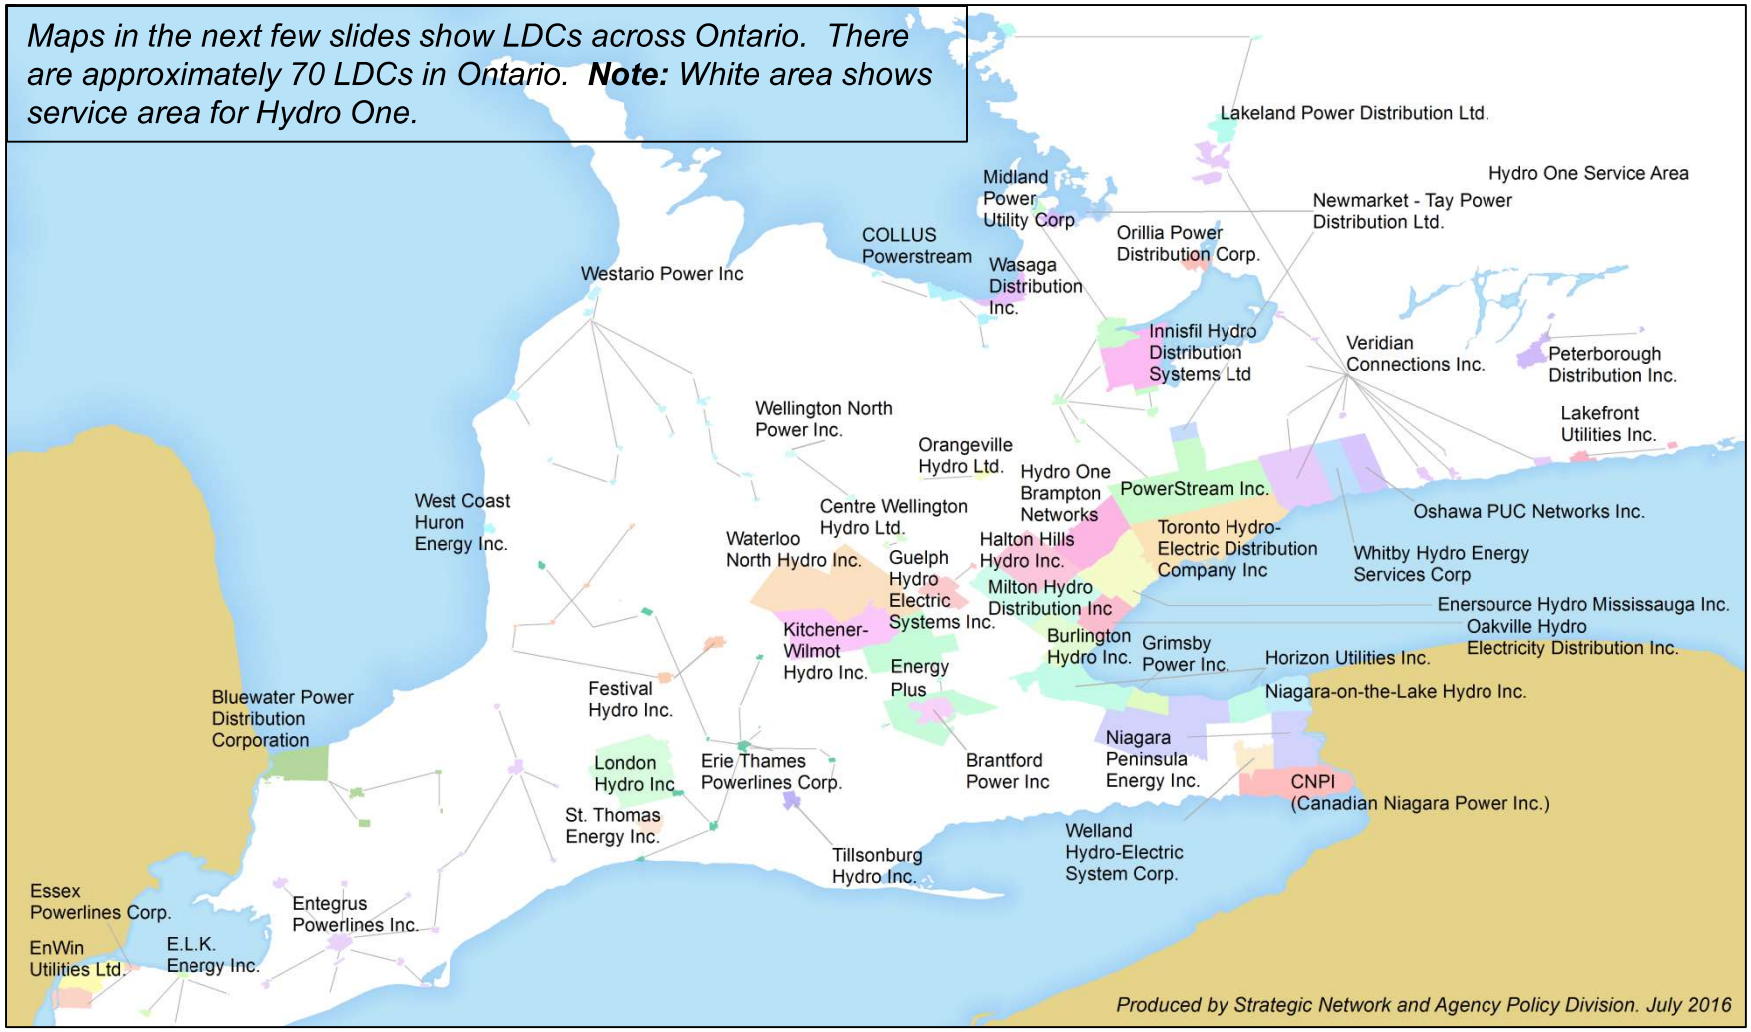
- As distribution costs vary year to year, forecasting fiscal impacts are challenging:
  - Hydro One is expected to submit its cost of service application for 2018 and beyond (3-5 years) in spring 2017. The rate increases requested in this application could potentially increase the proposed fixed rate which could have a significant impact on fiscal requirements and ratepayer impacts.
  - The other high distribution cost LDCs generally have lower distribution cost increases, however, it is difficult to forecast fiscally the impact of the program until LDCs submit their cost of service applications to the Ontario Energy Board (OEB).

Fiscal Impact ($M)	16-17	17-18	18-19	19-20	20-21
Legacy RRRP to Hydro One R2 Customers	-	126	130	133	136
2016 Speech from the Throne Enhancements to R2 Customers	-	117	120	123	127
Proposed Enhancements to Hydro One and Identified LDCs	-	216	222	228	234
TOTAL	-	**459**	**472**	**484**	**497**

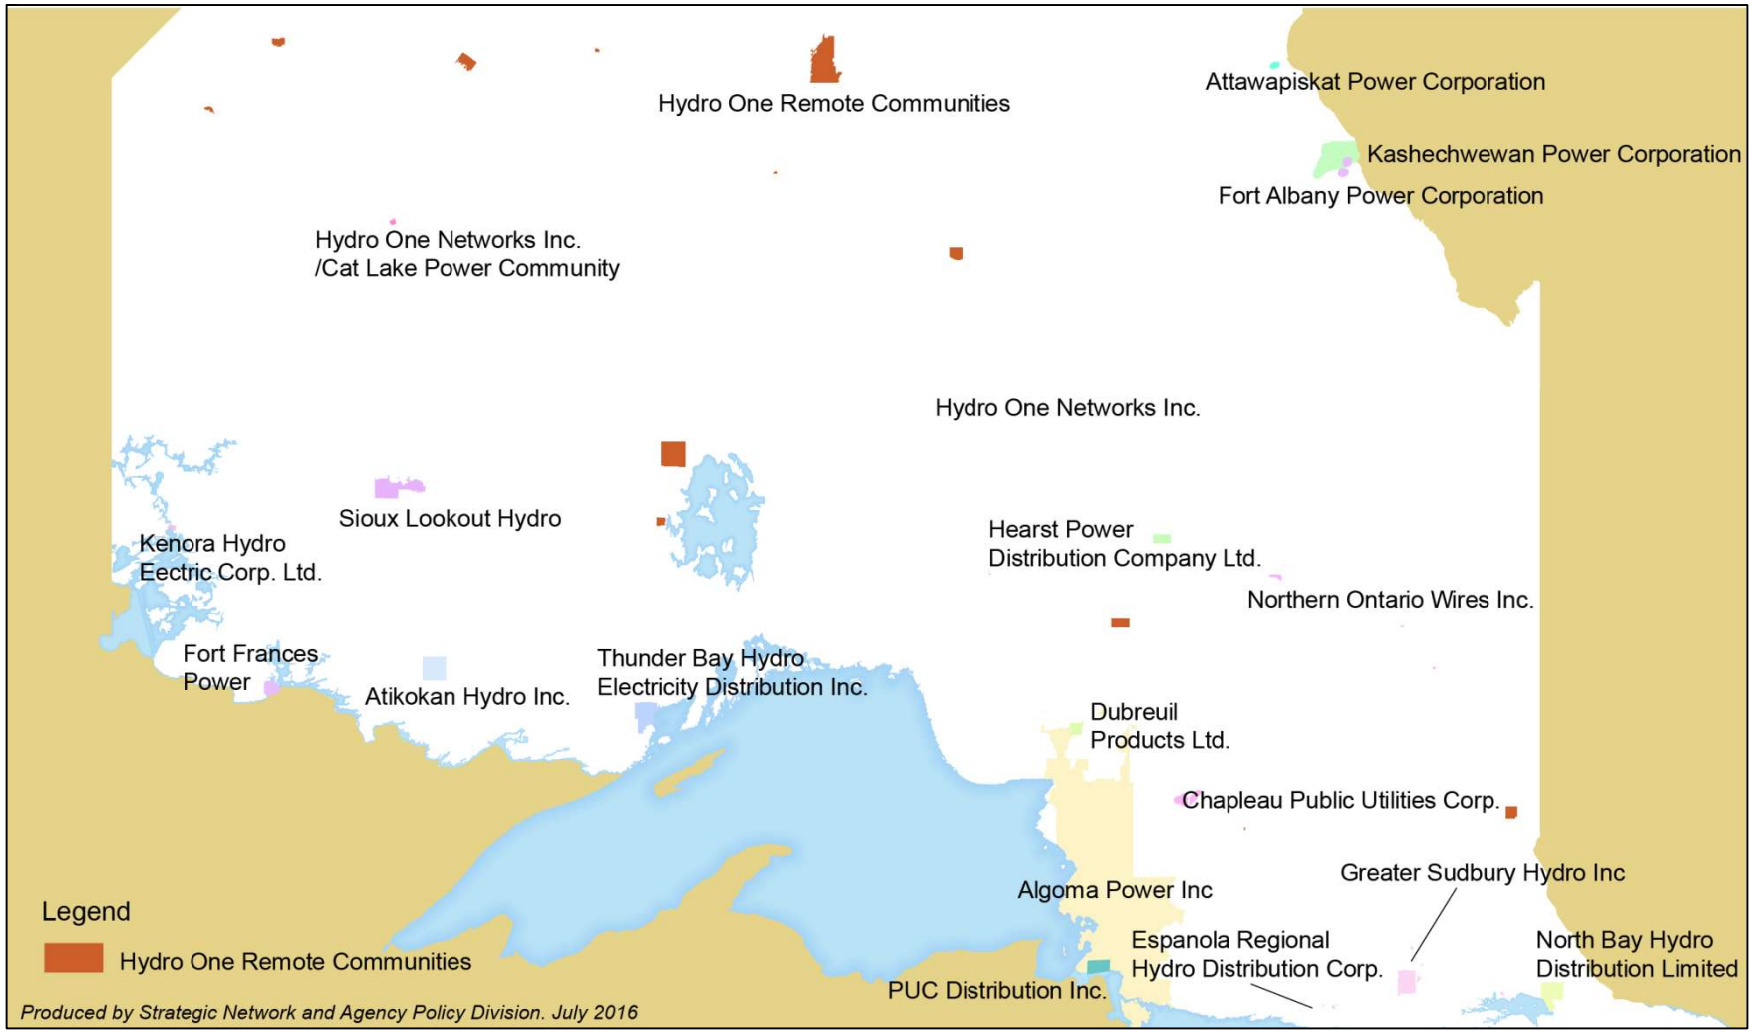
Note: Current regulatory framework calls for RRRP to increase by average distribution rate increase. Forecast assumes 2.6% annually though is subject to OEB proceedings. Fiscal projection is subject to consumer consumption patterns that may change due to extreme weather or other factors. Does not include Algoma Power or Hydro One Remotes, which would continue to be on the rate-base.

A. RRRP Enhancement – LDC Service Territory (Southwestern Ontario)

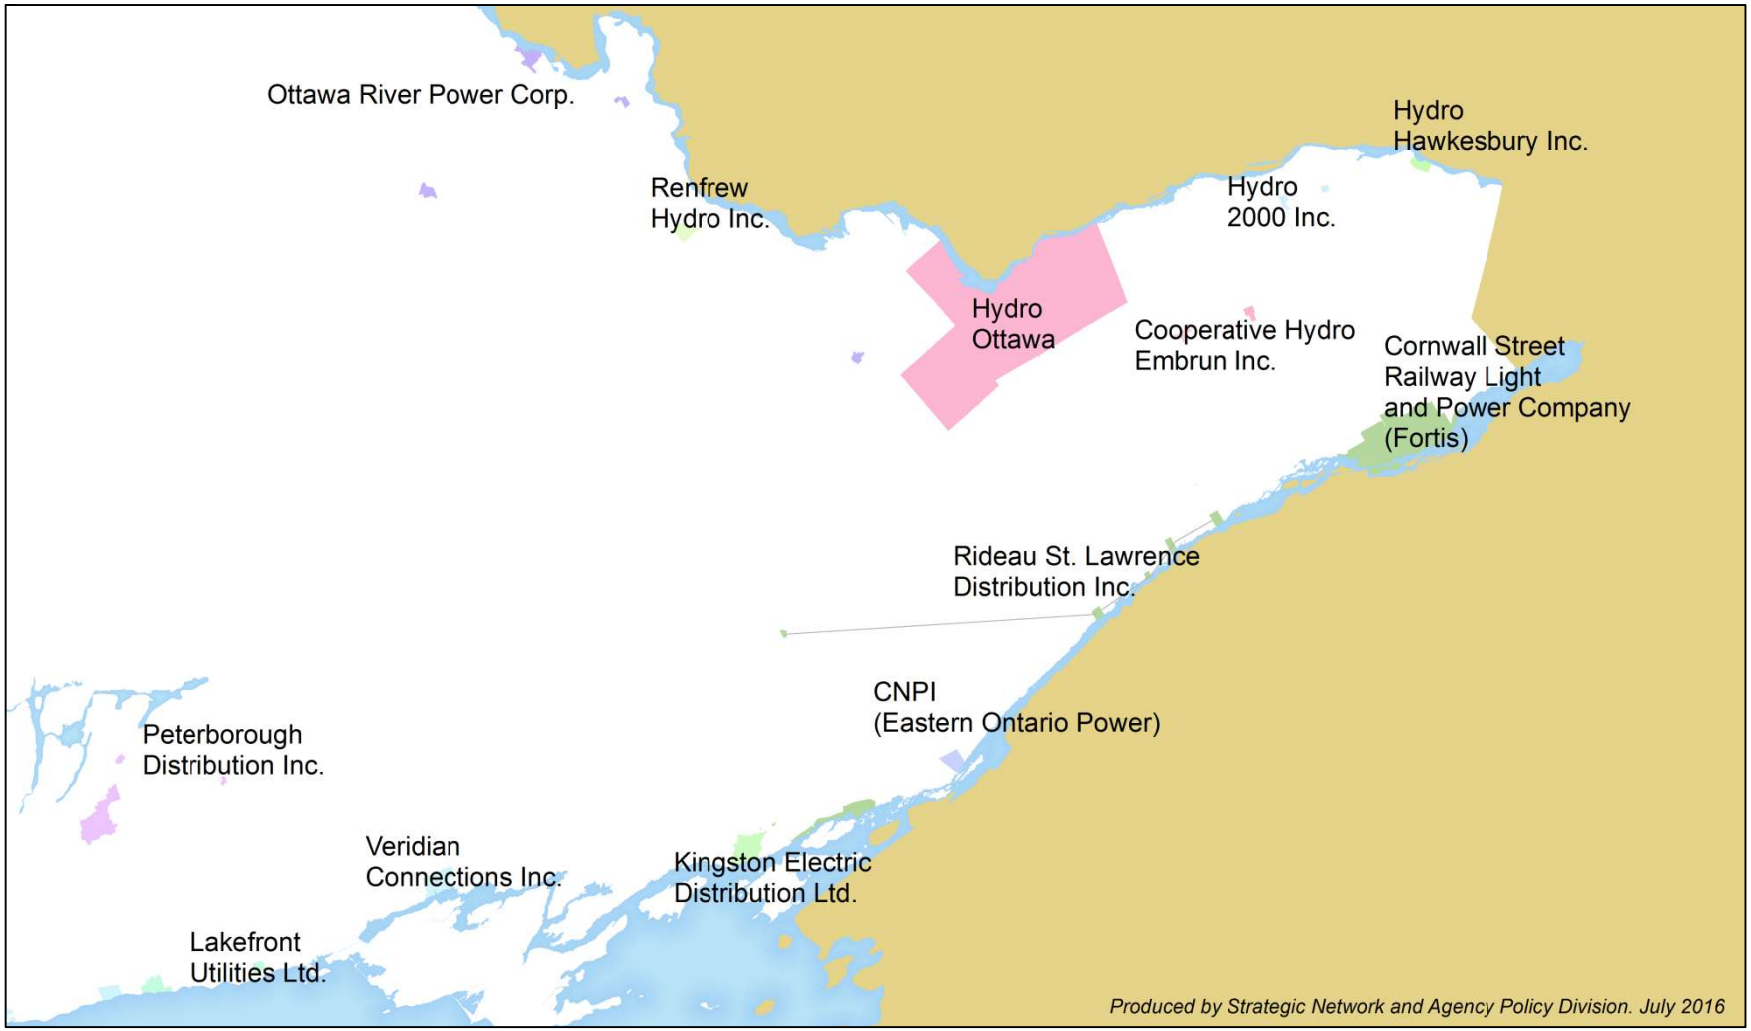
Maps in the next few slides show LDCs across Ontario. There are approximately 70 LDCs in Ontario. ***Note:*** *White area shows service area for Hydro One.*



A. RRRP Enhancement – LDC Service Territory (Northern Ontario)



A. RRRP Enhancement – LDC Service Territory (Eastern Ontario)



B. Ontario Electricity Support Program (OESP)

- The OESP is an income-tested, application based program that lowers electricity costs of the most vulnerable consumers by a rebate directly on bills. The OESP is currently funded by the rate base.
- OESP credits vary by income level and family size, and there are two credit scales that include:
  - The basic program credit ranges from $30/month to $50/month.
  - An enhanced credit that ranges from $45/month to $75/month for consumers that are either Indigenous, use electric heat or have certain medical devices.
- The OESP launched on January 1, 2016, and in just over a year:
  - Almost 180,000 have been enrolled in the program representing 30% of the total targeted low-income population and some 278,000 applications have been received.
  - Almost $50 million in credits have been provided to vulnerable consumers.
  - Some 172 intake agencies have been mobilized to assist low income consumers to apply for the OESP.
- To drive this uptake, the OEB has engaged in extensive outreach, including advertising in multiple languages, and continuing to work with partner agencies to develop a model for “application clinics” across the province to increase program awareness and uptake across the province.

B. Ontario Electricity Support Program (OESP) (cont'd)

- There are a numbers of ways that the OESP program can be enhanced:
  - Streamline the OESP process to drive participation toward 100%:
    - ENERGY and the Ministry of Community and Social Services (MCSS) have been working on automatic OESP qualification for Ontario Works (OW) and Ontario's Disability Support Program (ODSP) recipients who pay electricity bills.
      - MCSS estimates some 110,000 OW and ODSP recipients pay electricity bills;
      - This process could follow the "deemed eligibility" model used for the Healthy Smiles program. Using an existing model should simplify the implementation process.
      - The qualification process may have to be done manually at first, with a more automated IT solution in the longer-term.
    - Working with the CRA to make the application process easier / quicker to get through by finding an alternative to the requirement to mail-in signed consent forms;
    - Putting in place a more aggressive communications strategy and application intake clinics across the Province to increase awareness of/enrollment in the OESP.
  - Increasing the existing OESP credit scales by an additional 50%; and
  - Expanding the categories of OESP credits.

- It is also recommended that the OESP be supported from the tax-base as part of the rate mitigation package.

B. Ontario Electricity Support Program (OESP) (cont'd)

- The tables below outline the existing OESP credit scales and how the scales would be enhanced if increased by 50% and credits are extended to additional groups (represented in the circled boxes):

Existing OESP Credit Scales

Sliding Scale #1		Household Size						
		1	2	3	4	5	6	7 +
Income Bracket	< $28,000	$30	$30	$34	$38	$42	$50	$50
	$28,001 - $39,000			$30	$34	$38	$42	$50
	$39,001 - $48,000					$30	$34	$38
	$48,001 - $52,000							$30

Sliding Scale #2		Household Size						
		1	2	3	4	5	6	7 +
Income Bracket	< $28,000	$45	$45	$50	$55	$60	$75	$75
	$28,001 - $39,000			$45	$50	$55	$60	$75
	$39,001 - $48,000					$45	$50	$55
	$48,001 - $52,000							$45

Proposed +50% OESP Credit Increase*

Sliding Scale #1		Household Size						
		1	2	3	4	5	6	7 +
Income Bracket	< $28,000	$45	$45	$51	$57	$63	$75	$75
	$28,001 - $39,000		$40	$45	$51	$57	$63	$75
	$39,001 - $48,000			$35	$40	$45	$51	$57
	$48,001 - $52,000					$35	$40	$45

Sliding Scale #2		Household Size						
		1	2	3	4	5	6	7 +
Income Bracket	< $28,000	$68	$68	$75	$83	$90	$113	$113
	$28,001 - $39,000		$60	$68	$75	$83	$90	$113
	$39,001 - $48,000			$52	$60	$68	$75	$83
	$48,001 - $52,000					$52	$60	$68

CONFIDENTIAL CABINET DOCUMENT

***Note:** The proposed higher scale, including the amounts in circles are proposed and will be refined in consultation with the OEB.

B. Ontario Electricity Support Program (OESP) – Considerations

Fiscal Impact

- Changes to legislation / regulation may be required to establish and define the parameters for OESP to receive funding from the tax-base. The scope of changes would depend on the implementation / delivery mechanisms.
- The OESP regulation will likely require changes to enable OW and ODSP recipients to be "deemed eligible" for the OESP.
- Financial flow-through mechanisms would need to be considered in consultation with IESO and LDCs. Likely to be modeled after processes used for the Ontario Rebate for Electricity Consumers (OREC).
- The OEB has been collecting program funding in excess of program costs and has accrued a positive balance. This balance must be addressed when moving to the tax base.
- If OESP amounts are increased, it will need to be confirmed that the credit is not treated as taxable income. This was addressed in the current iteration of the OESP.
- Adding additional categories to the OESP matrix will take time to implement as it will require changes to the central system as well as LDCs' billing systems. As well, the matrix will no longer follow the Low Income Measure (LIM), which could put additional pressure on the OESP and other provincial programs.

Fiscal Impact ($M)	**16-17**	**17-18**	**18-19**	**19-20**	**20-21**
Existing OESP credits	–	118	159	193	222
Incremental Enhance OESP credits by +50%	–	59	80	97	111
Incremental additional OESP categories	–	8	22	35	42
Total	–	**186**	**261**	**325**	**375**

C. Establishing a New Affordability Fund

- For eligible low-income customers, the Home Assistance Program (HAP), delivered by LDCs under the Conservation First Framework, provides efficiency upgrades and education, at no cost, to help improve the energy efficiency and comfort of their homes and help customers manage their electricity bills.

- HAP does not address the needs of those customers that do not qualify as “low-income” but could benefit from conservation programs.
  - At the end of 2015, there were over 560,000* residential electricity accounts in arrears; of these about 19,900** (~3.6%) accounts were eligible to participate in low-income conservation and support programs.
  - According to the Ontario Energy Board (OEB), in 2015 about 60,000 customers had their electricity service disconnected.

Proposal: Establish Affordability Fund to Provide Existing Low-Income Conservation Program to Other Electricity Customers

- The Ministry proposes establishing an Affordability Fund which would be available to LDCs to provide similar energy efficiency measures as provided under HAP to targeted customers.

* **Note:** Unverified numbers reported by LDCs to the OEB
** **Note:** Low-income customers identified through participation in LEAP

Ontario

C. Establishing a New Affordability Fund (cont'd)

Fund Details:

- An Affordability Fund would be accessible to LDCs only, and would target those customers who cannot qualify for low-income conservation programs and are in need, such as those who are facing disconnection.
  - By providing support for energy efficiency improvements, the Fund could help these customers reduce their future bills and avoid future disconnections.
  - The Fund would provide LDCs with an additional tool to provide assistance to their customers.

Eligibility Criteria/Fund Principles:

- Determination of eligibility could involve a number of factors and metrics:
  - Do not meet the definition of "low-income";
  - May have triggered action by an LDC collection department (e.g., are in arrears, have been placed on one or more payment plans, are due to be disconnected, etc.);
  - Priority could be given to eligible customers in electrically-heated homes, or other unique circumstances; and
  - Require financial assistance to pay for energy efficiency measures.

C. Establishing a New Affordability Fund (cont'd)

Implementation

- ENERGY is currently in discussions with several large LDCs to determine the principles of the Fund and is working with Hydro One to set up an independent Trust to serve as the Fund Administrator.
  - The Fund Administrator would manage the flow of funds to LDCs based on principles set by the province, and be responsible for establishing processes, administration, and criteria for funding applications, thereby ensuring the program is managed on a consistent basis across the province.
  - LDCs would apply for funding to the Fund administrator, to offer energy efficiency measures to those customers in their service territories that meet the targeted eligibility criteria.
  - LDCs have over 10 years of experience in delivering conservation programs, including experience specific to contracting for programs that target low-income customers.
  - LDCs are best positioned to identify and target their customers who are most in need.

- Given the scope of the Fund, an LDC would need a firm financial commitment up front before implementation. LDCs rely on rate-payer funding for most of their activities. The Affordability Fund would be a unique venture from an LDC perspective given that it is tax funded.

C. Establishing a New Affordability Fund (cont'd)

<u>Implementation</u> (cont'd)

- Recipients could receive measures ranging from an average of $3,000 to $5,000 per customer, at no or minimal cost. For example, measures available in the Home Assistance Program include:
  - Energy-saving light bulbs (LEDs); power bars; energy efficient window ACs, refrigerators, freezers, dehumidifiers; low-flow showerheads, hot water blankets, pipe wrap and faucet aerators (in homes with electric water heating); and
  - Programmable thermostats, weather stripping, insulation (in homes with electric heating).

- Cold climate air source heat pumps would also be an eligible measure under the Affordability Fund. Heat pumps range in cost from $7,000 to $13,000.

- As an illustration, with $200 million, the estimated reach of the fund could be 15,000 to 65,000 households, depending on measures and uptake.

C. Establishing a New Affordability Fund – Considerations

Considerations

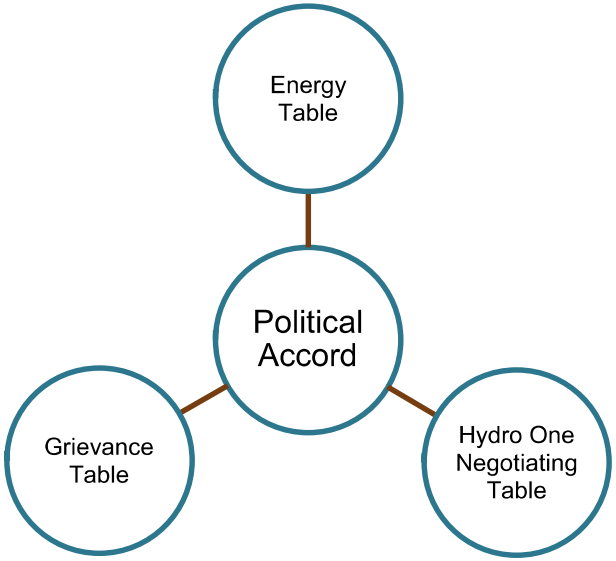
- The Affordability Fund addresses a real need.
  - LDCs have expressed the need for an additional tool to provide assistance to their customers.
- Determining allocation of funds to LDCs:
  - Some LDCs may have a disproportionate number of customers in need of assistance; and
  - ENERGY is proposing to seek input from the OEB, LDCs and potentially low income organizations to help develop funding allocation and eligibility principles for the Trust.
- While eligibility principles will be established, LDCs will need a degree of flexibility to target customers:
  - Not all customers who are in need will actively seek help;
  - Some customers in arrears may be "gaming the system" and not truly in need; and
  - LDCs recommend targeted outreach as opposed to broad marketing; a high volume of applications would limit the ability to deliver assistance to customers who need it most.

Fiscal Impact

- The Affordability Fund would represent a fiscal impact of $200 million in fiscal year (FY) 2016/17.
- To allow for funds to flow in FY 2016/17, ENERGY would sign a Transfer Payment Agreement (TPA) with Hydro One and transfer money before end of fiscal year to ensure Hydro One can establish the Trust and the Trust can begin operation as the Fund Administrator.
- There is a fiscal risk if monies used for the Fund do not flow before FY year-end 2016/17 and for monies that are sitting in Hydro One at year-end (because of consolidation with province), and a corresponding fiscal pressure in the following years when the funds are flowed from Hydro One (H1) to ratepayers.

D. Implementing On-Reserve First Nations Delivery Credit

- ENERGY has a number of Tables with the Chiefs of Ontario (COO) and First Nations that include the Energy Table to discuss policy issues, the Hydro One Negotiating Table to discuss Hydro One shares, and the Grievance Table.
- The Grievance Table process was established at the request of COO as a means to avoid litigation to resolve historic grievances related to the energy sector and prevent these issues from impeding progress on broadening the ownership of Hydro One (H1).
- The cost of electricity and delivery charges were identified as the prevailing grievance at the First Nations-Ontario Energy Table meeting in Timmins in 2016, and the Minister of Energy agreed to explore options for a First Nations Rate through the Grievance Table process.



- On June 27, 2016, following discussions on Hydro One shares and rates at COO's All Chiefs Conference, the Minister of Energy issued a letter directing the OEB to prepare a report providing "*advice on options for an appropriate electricity rate (or rate assistance) for on-reserve First Nations electricity consumers*".
  - OEB engaged with First Nations, including remote communities, the distributors serving them, and consumer groups such as the Low Income Energy Network. It also established an Advisory Committee with the Chiefs of Ontario's Grievance Committee.
- The Ontario Energy Board (OEB) has worked with COO to engage with First Nations to develop options for a First Nations electricity rate. The OEB provided a report to the Minister on December 29, 2016.

D. Implementing On-Reserve First Nations Delivery Credit (cont'd)

- On-reserve First Nations customers face unique challenges that impact electricity affordability, such as the poor quality of the housing stock on-reserve. These challenges result in significantly higher electricity consumption levels and costs.
- First Nations living on reserve are particularly vulnerable low-income consumers: the average income is considerably lower compared to First Nations living off reserve and compared to non-Indigenous populations:
  - Average income of First Nations on reserve in Ontario: $21,100;
  - Average income of First Nations off reserve in Ontario: $31,527;
  - Average income of Non-Indigenous people in Ontario: $42,506; and
  - Median incomes on smaller reserves can fall below $10,000 (e.g., Cat Lake FN).
- Employment rates also differ between on-reserve First Nations, off-reserve First Nations and Non-Indigenous individuals, as well as other indices of social vulnerability:
  - 54% of Indigenous people over 15 years old and living on-reserve in Ontario are unemployed or not in the labour force;
  - The on-reserve unemployment rate is 18.3% compared to 6.4% in Ontario generally; and
  - 67% of families residing on-reserve are single parent families, compared to the Canadian equivalent of 19%.
- First Nations are seeking redress for historic grievances related to lands affected by energy developments, such as transmission or distribution infrastructure built on reserve lands and traditional territories where, in some cases, they may not have been appropriately consulted.
- Further, in some circumstances, linear infrastructure corridors cut First Nation reserves in half, significantly disturbing the use and management of an already small land base; the First Nation communities disturbed by energy infrastructure report having experienced long wait times (e.g., 20 years) for their communities to get connected and receive the benefits of the energy derived from the local infrastructure.

D. Implementing On-Reserve First Nations Delivery Credit (cont'd)

- The OEB report to the Minister of Energy on a First Nation on-reserve rate recommended:
  - Eliminate the delivery charge for all on-reserve First Nations residential customers and eliminate the monthly service charge for customers of licensed distributors which charge a bundled rate;
    - The OEB estimates this would provide residential customers an average monthly benefit of $85 at a total annual cost of $13 to $20 million.
  - Automatically qualify on-reserve First Nations residential customers (~21,500 customers);
  - Enable greater information sharing between distributors and band councils to identify all on-reserve First Nations customers; and
  - Continue to provide assistance through OESP and LEAP to eligible on-reserve First Nations customers.
- The OEB suggested the program should be funded from the tax base as it is targeted to a particular segment of the provincial population, or, if rate based, to use a province-wide charge.
- ENERGY recommends moving forward with the implementation of the OEB's recommendations as part of the wider electricity rate relief package and as the Hydro One share agreement with COO continues to be implemented.

Distributor	Number of On-Reserve Residential Customers
Algoma Power Inc.	473
Attawapiskat Power Corporation	336
Bluewater Power Distribution Corporation	237
Cat Lake Power Utility Ltd.	80
Cornwall Electric Distribution	514
Hydro One Networks Inc.	16,679
Hydro One Remote Communities Inc.	2,579
PUC Distribution Inc. (Sault Ste. Marie)	264
Thunder Bay Hydro Electricity Distribution	332
Total Number of Customers	**21,494**

Source: OEB Report to Minister: Options for an Appropriate Rate Assistance Program for On-Reserve First Nations Electricity Consumers (Page 5).

D. Implementing On-Reserve First Nations Delivery Credit – Considerations

- Legislative and regulatory will be required to implement this program.
- The OEB will need to work with the LDCs to identify on-reserve consumers to administer the delivery rebate.
- Development of a communications plan containing the following elements:
  - Public release of the OEB report;
  - Commitment to working with LDCs on implementation details; and
  - Advanced notice to the OEB and COO regarding the ministry's decision to move forward on the OEB's recommendation and indicate a willingness to work collaboratively with COO on ways in improve community-LDC communication to ease implementation.
- The rebate will appear on customer's electricity bills, either as a specific line item or a communicated call-out.
- Recipients would continue to be eligible for programs such as the Ontario Electricity Support Program (OESP) and the Low-Income Electricity Assistance Program (LEAP).
- There is a risk that either non-status Indigenous communities without reserves or Métis could challenge the program on the grounds that it discriminates against them contrary to section 15 of the Charter. A genuinely ameliorative program that targets some people but excludes others is shielded from a s. 15 challenge if it serves or advances the ameliorative goal. The proposal has an ameliorative purpose as it targets First Nations communities for a reserve-based program corresponds to the distinct circumstances of reserve-based communities, relative to other Indigenous communities, that affect electricity affordability.

Fiscal Impact ($M)	**16-17**	**17-18**	**18-19**	**19-20**	**20-21**
On-Reserve First Nation Delivery Credit	-	20	20	20	20

Fiscal Roll-Up

Fiscal Impact ($M)	16-17	17-18	18-19	19-20	20-21
RRRP Enhancements*	-	459	472	484	497
Ontario Electricity Support Program, including the 50% Enhancement & New Matrix Categories	-	186	261	325	375
On-Reserve First Nation Delivery Credit	-	20	20	20	20
Affordability Fund**	200	-	-	-	-
Total	200	665	753	829	892

***Note:** Current regulatory framework calls for RRRP to increase by average distribution rate increase. Forecast assumes 2.6% annually though is subject to OEB proceedings. Fiscal projection is subject to consumer consumption patterns that may change due to extreme weather or other factors. Does not include Algoma Power or Hydro One Remotes, which would continue to be on the rate-base.
****Note:** Funding for the Affordability Fund is one-time in 2016/17.

BENDING THE FUTURE COST CURVE OF ELECTRICITY

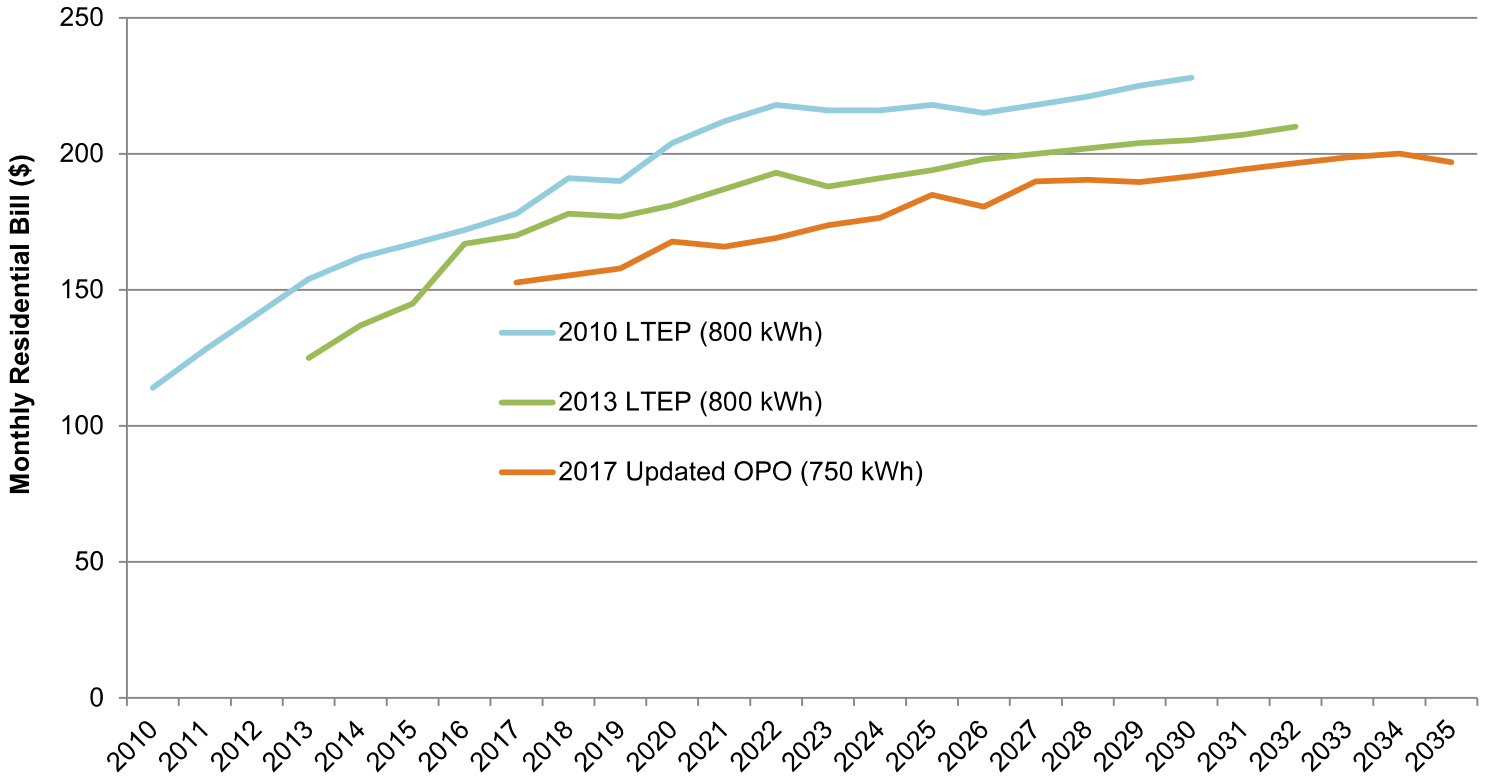
Existing Rate Mitigation Actions To Bend The Cost Curve

- Since 2013, the government has taken a number of actions to reduce electricity ratepayer costs, including:
  - Renegotiating the Green Energy Investment Agreement to reduce contract costs by $3.7 billion.
  - Reducing Feed-In Tariff (FIT) prices saving ratepayers at least $1.9 billion.
  - Introducing a competitive Large Renewable Procurement (LRP) process to drive down costs approximately $1.5 billion lower than the 2013 LTEP forecast.
  - Deferring the construction of two new nuclear reactors at Darlington, avoiding an estimated $15 billion in new construction costs.
  - Maximizing the value of our existing nuclear fleet by starting Bruce refurbishments in 2020 instead of 2016, thus helping to achieve $1.7 billion in savings and by continuing to operate Pickering up to 2024, pending regulatory approvals, which could save ratepayers about $600 million.
  - Suspending the second round of the LRP process and the Energy-from-Waste Standard Offer Program, which is expected to save up to $3.8 billion in costs.
  - Limiting the Feed-In Tariff (FIT) 5 procurement target to 150 MW and suspending future FIT procurements – up to [$xx] cost savings.

CONFIDENTIAL CABINET DOCUMENT

Existing Rate Mitigation Actions To Bend The Cost Curve (cont'd)

- The chart below shows how electricity rate forecasts have trended down over time.



Sources: *2010 LTEP (800 kWh/month); 2013 LTEP (800 kWh/month); Revised Ontario Planning Outlook (750 kWh/month as of February 2017) which includes: ICI expansion, RRRP update, 8% rebate, HQ agreement, suspension of LRP II and EFWSOP.*

A. OEB – LDC Efficiencies and Rates

Leveraging the OEB

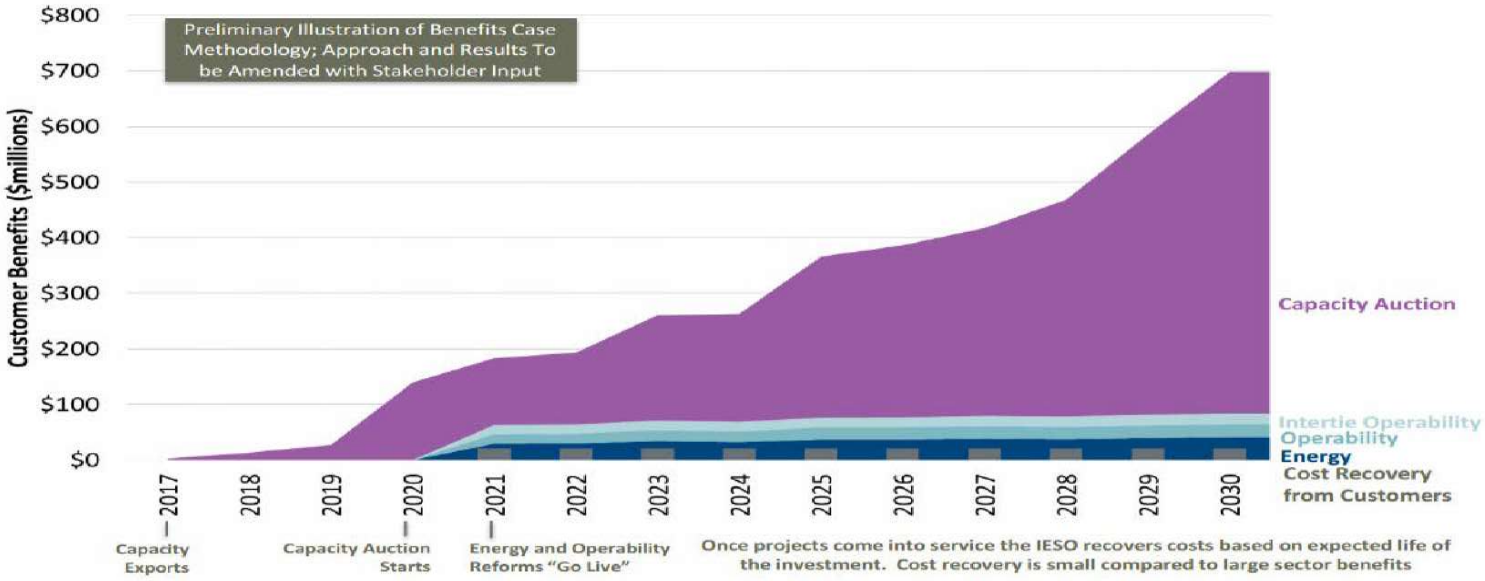
- The Ontario Energy Board (OEB) has a mandate to regulate the electricity distribution sector in the public interest, ensuring the financial viability of the sector while promoting reliable service to customers at just and reasonable rates.
- The OEB, through the Renewed Regulatory Framework for Energy (RRFE), has since 2012 attempted to move the distribution sector towards a performance/outcomes-based regulatory framework.
  - While new reporting requirements such as the LDC performance scorecard are positive developments, RRFE does not tie these system performance expectations to LDC financial performance.
- Encouraging shared partnerships on services between utilities will help reduce costs in the back end and encourage further innovation for small to medium sized utilities.
- In 2012, the government asked the Ontario Distribution Sector Review Panel to make recommendations about how the distribution sector could become more efficient. The Panel concluded that a $1.2 billion net present value in savings could be achieved by consolidating LDCs into 8-12 regional entities.

Opportunities

- ENERGY could help promote and accelerate these efforts by asking the OEB to look at opportunities to further drive LDC efficiencies and productivity. This may indirectly incent LDC consolidation.
- In parallel, the OEB could be instructed to review business cases behind its own regulatory requirements to reduce “red tape” and eliminate costs that LDCs indicate are creating pressures on operating expenses.
- This could be done through the Minister's letter, the LTEP Implementation Directive, s. 35 of the *Ontario Energy Board Act, 1998*, and/or the 2017 Mandate Letter and other agency business planning processes.

B. IESO – Market Renewal

- Continue to move forward with Independent Electricity System Operator's (IESO) Market Renewal initiatives:
  - Moving to "technology-agnostic" procurements will provide new opportunities for innovation and modernization and ensure ratepayers receive the best prices possible.
  - Market Renewal encompasses projects such as a single-schedule system (from the current two-schedule system), more frequent intertie scheduling to better align with other jurisdictions and a day-ahead market. There will be up front capital costs to enable the initiative. IESO is currently assessing these costs.
- Changes related to IESO's Market Renewal initiatives, reflected in HOEP and uplifts, are estimated to save up to $300 million per year, starting in 2021, leading to a reduction of:
  - About $1/month or less than 1% at current retail prices for a typical residential bill; and
  - About $1.30/MWh at current all-in prices for industrial and SME electricity consumers.



CONFIDENTIAL CABINET DOCUMENT

SUPPORT FOR TENANTS

Support for Tenants – Context

- The government is considering measures to provide relief from high electricity prices, and is interested in ensuring that tenants also receive electricity cost reductions and/or relief.

- Currently, tenants generally either pay for their own electricity use through suite meters (i.e., sub-meters or direct arrangements with hydro providers) or pay for electricity indirectly as a service included in their rent:
  - Tenants who pay for their own electricity will receive electricity costs savings directly through their bills; and
  - Low-income tenants who pay own electricity bills can access energy support programs such as the Ontario Electricity Support Program administered by the Ontario Energy Board (OEB).

- Any potential initiatives could focus on the following options:

For tenants who pay own electricity bills

1. Expand OESP to increase relief or raise income thresholds.

For tenants whose electricity is included in rent

2. Require that landlords pass savings on to tenants (could be addressed by MHO through RTA amendments).
   - Options could include requiring landlords to automatically reduce rents, or allow tenants to apply the Landlord and Tenant Board for relief.
3. Provide energy rebates directly to tenants whose rent includes electricity.

Support for Tenants – Potential RTA Hydro Relief Measures / Considerations

- RTA amendments with respect to tenant relief, remedies, and enforcement would be complex, and unable to provide immediate, direct and transparent cost remedies to tenants:
  - Impact of hydro relief measures and electricity cost savings for landlords may vary depending on size of rental building and location (urban/rural):
    - One size fits all approaches would not match actual landlord savings to direct tenant relief; and
    - More targeted approaches would add extreme complexity, leading to greater confusion for landlords and tenants, and difficulty administering enforcement.
  - Passing on actual savings could likely only be done after landlords have experienced decreased costs for a period of time (i.e. one year).
  - Difficulty in informing landlords of their responsibilities and enforcing reductions; would likely have significant resource implications for the Landlord & Tenant Board/Ministry of Attorney General.
  - Difficult for tenants to understand, with the most vulnerable tenants potentially less able to pursue remedies through the LTB.
- The kinds of potential RTA remedies would depend on various specifics regarding the way in which relief was being provided to landlords including whether:
  - The actual electricity cost savings for landlords are transparent to facilitate easy calculation of rent reductions or relief;
  - Hydro relief measures are permanent or temporary; and
  - All relief should be passed on to tenants, or just a portion of the relief (e.g., global adjustment fund, 8% rebate, any other relief).

Support for Tenants – Potential RTA Hydro Relief Measures / Other Considerations (cont'd)

- As part of Climate Change Action Plan, MHO has been directed to mitigate the impact of carbon costs on tenants, and is proposing to prevent landlords from charging above-guideline rent increases for extraordinary utility costs increases.
  - May seem unfair that landlords are required to reduce rents or provide relief when utility costs decrease but cannot increase rents when utility costs increase.
- Relief would be limited to certain segments of tenant population:
  - Post-1991 buildings are exempt from the Rent Increase Guideline and landlords could negate any savings to tenants in these buildings through a higher subsequent rent increase.
    - Over 19% of tenant households are estimated to live in post-1991 private rental units including individually rented condos; a high proportion may already pay for electricity separately.
  - Relief may not be required for social housing tenants:
    - Most social housing tenants (80%) pay as per utility scales, which covers electricity usage other than electric heat; and
    - Utility scales were last updated in 2000 and are reflective electricity prices at that time.
- MHO, working with ENERGY and MAG will report back in Spring 2017 with options for electricity rate mitigation for tenants.

Legislative Authority – Considerations

GA Smoothing

- **Amendments to *Electricity Act, 1998* (EA) and *Ontario Energy Board Act, 1998* (OEBA)**
  - The OPG Trust will require authority to recover principle, interest and administrative costs through GA from customers.
  - Legislation would authorize IESO to collect amounts on behalf of the OPG's SPV/Trust and settle accounts with the OPG Trust as a service provider. Regulatory amendments to GA Regulations would require IESO to:
    - Separately settle and track amounts received from the SPV/Trust to lower GA (including maintaining variance accounts).
    - Separately settle and track amounts paid back to the SPV/Trust (including maintaining variance accounts).
    - Distributors would continue to collect from consumers and settle with IESO. Generators would continue to be paid by IESO.
  - OEBA-related amendments would allow for OEB oversight. Light touch would focus on the borrowing entity's recovery of administrative costs and its calculation of amounts owing in a period. Heavy touch would give OEB the discretion to determine repayment over time.
  - The certainty of the legislative mechanism to recover the debt and interest, and the extent of discretion of the OEB to alter either amount over time, will have impacts on the availability and cost of capital.
  - Further legal analysis is required as the GA option is developed.

Class B

- **Targeted Lowering ICI Threshold Below 1 MW (to 500kW):** Regulatory amendments (O.Reg. 429/04) will be required to address program details.

Legislative Authority – Considerations (cont'd)

Electricity Support Programs

- **RRRP, OESP and First Nations Rate:** Moving costs to the tax base and creating a First Nations rate will require amendments to OEBA. Regulatory amendments (442/01, 314/15, 275/04) will be required to address program details.

- **Affordability Fund:** In order to implement new affordability fund the Province would need to enter into Transfer Payment Agreements with qualified third parties to administer the fund.

Bending the Future Cost Curve of Electricity

- No specific legislative or regulatory amendments identified. IESO may need to amend market rules. Agency MOUs/MOAs may require amendment.

Communication Plan

Objective:

- Demonstrate Ontario's commitment to lower electricity costs for ratepayers through new rate relief initiatives.

Strategic Approach

- High-profile Premier's announcement and Technical Briefing
- News release, backgrounders, QA's are being prepared.
- A multimedia marketing and advertising campaign is being prepared on the topic of rate mitigation for electricity consumers.

Thinking of using this 2-pager, just to have something to speak to an put in front of Deputy. It is the high level summary. Let me know if you are OK with this approach.

Thanks
Bruno

Financial Accountability Office of Ontario

Question on The Financial Impact of Ontario's Fair Hydro Plan

- FAO questions are largely seeking background data and information on which Ontario's Fair Hydro Plan is based. This includes,
  - Projected costs of electricity over 2017 – 2048 period – Status Que vs. OFHP
  - Projected Global adjustment deferral and repayment schedule 2017-20148
  - Costs projections for other OFHP programs 2017-18 to 20147-48
    - Details on customers affected
  - Information on IESO Market Renewal Initiative and OEB efficiency initiatives
  - Explanation of financial impact of using OPG to conduct financing operations rather than OEFC

- Ministry of Energy and Ministry of Finance are largely responsive to FAO questions
  - ENE provides supporting data, where available, including IESO electricity costs forecast, market data from OEB (including Local Distribution Company summary data) and Hydro One market data.
  - Much of the data was included Energy's cabinet submission

Financial Accountability Office of Ontario
Question on The Financial Impact of Ontario's Fair Hydro Plan

- Main areas where ENE/MOF do not provide response to FAO questions:
  - Request for long term cost estimates to 2047 for OFHP programs. ENE provides cost estimates to 2020-21 for these, per information provided in cabinet submission
  - Two questions had limited responses as responsive records are not authorized to be released under records OC 1412/2016
    - Information requested on Affordability Fund cash payments. ENE identifies a TB/MBC cabinet submission as Affordability Fund as unauthorized for release
    - FAO question 6 asks for explanation of financial impact of using OPG rather than OEFC to conduct financing operations. MoF (CEFD) does not provide the OEFC comparison as OC 1412/2016 prohibits sharing of policy or costing options or recommendations, with FAO, unless the option or recommendation was selected by Cabinet or one of its committees. FAO is provided with GA financing table.

Hi Scott, Rob,

Would it be helpful to have a call so that TPD can get some more context on the proposed Fair Hydro Plan and proposed structure?

Scott, if you're busy, staff here could provide Rob some context if you're not available.

Ron

On Apr 20, 2017, at 8:46 AM, Lewis, Robin (MOF) <Robin.Lewis@ontario.ca<mailto:Robin.Lewis@ontario.ca>> wrote:
Scott,

The proposal appears to have some characteristics of a tax avoidance scheme.

The Electricity Act, 1998 applies to OPG and its subsidiaries but not a trust. The trust would appear to be subject to regular income tax. However, a trust gets a deduction in computing income for any income paid to a beneficiary. The trust will pay no income tax to the extent that the trust pays out net income to the beneficiaries. Regular tax will not apply on the distribution of income to OPG because OPG is exempt from regular tax.

I would expect that the income would normally be included in the income of the OPG subsidiary for PIL purposes. I suspect that funds borrowed by the trust may generate significant tax shelter such that the income of the trust will be negligible.

We will certainly need more information. In particular, the nature of the asset that is being acquired and the vendor. SPV's are generally used to move assets off balance sheet.

This matter ought to be the subject of a ruling request.

Regards,

Rob Lewis

Subject: RE: EXTERNAL - RE: Fair Hydro Plan - question on taxation

Hi Rob, John Bruno,

Further to the emails below, I received from OPG the attached draft changes to pertinent legislation. These are somewhat broader than the tax / PILs specific elements. I am hoping you get you something more focused, but in the interest of time I thought I would share this version. These changes are essentially consistent with the earlier descriptions below in terms of content. My understanding is that OPG Trust is unlikely to generate significant (non-PILs applied) revenues, so this is largely an administrative change designed to avoid unintended consequences arising from potentially large, unrealized gains associated with swaps etc.

Please let me know if we should loop anyone else into this conversation (e.g. MoF legal) and whether you would benefit from a conversation with OPG, Torys (OPG's external counsel) and ENE legal directly. I am also available to answer questions on concept. As John knows, all of this is moving extremely quickly so comments as soon as possible would be extremely helpful. My legal colleagues only semi-joking suggested yesterday would be ideal. In the mean time the draft legislation will continue to take up these concepts as they are currently written.

Thanks very much and apologies for the short notice,
Scott

Thanks Sriram. We still working with OPG and Torys to understand what exactly they are requesting and why. Based on conversations so far, I think the risk of creating a loophole should be limited, as net revenues from the Trust would be subject to PILs once they flow up from the sub into to OPG corporate entity.

Subject: Fwd: EXTERNAL - RE: Fair Hydro Plan - question on taxation

Hi Sriram,

See the email chain on a tax / PILs exempt ask by OPG with respect to the OPG Trust / special purpose vehicle (SPV) for the Fair Hydro Plan.

Perhaps to over-simplify, The SPV would be a new OPG subsidiary that would, in part, obtain financing from the capital markets in order to have the funds to acquire a regulatory asset from the IESO so that the IESO can cover the difference between what it is paying generators and what it is passing through to consumers under the "global adjustment" mechanism. The regulatory asset is the IESO's right to collect from consumers in the future the amounts to cover the global adjustment deferral (including a financing cost).

Note that the timelines for drafting legislation generally for the Plan is very tight.

Scott N. will ask for more detail from OPG.

Would Ann and Rob be the right people to loop in on this?

Ron

Thanks Ron. Do you mind reaching out? We probably need to land this in the next few days. I'll let OPG know that we may need to get them to provide TPD with a more detailed explanation.

Subject: Re: EXTERNAL - RE: Fair Hydro Plan - question on taxation

Hi Gadi, Scott,

I'd think we'd need to loop in TPD on this as well, to get the drafting right, and see about any such policy concerns.

Ron

Ron always understands the nature of these sorts of complexities around electricity financing way better than I do, so I'm sure he'll have more thoughts or questions, but the only one that comes to mind for me is how this would be structured in legislation to ensure that there isn't the ability for OPG to move income to the non-taxable (I don't think there is a term "non-PiLable") entity from the taxable part of the company? This may seem nit-picky, but in the past I believe we've seen both Hydro One, when it was 100% government owned, and OPG behave the same way as private companies would, and spend considerable time having their accountants endeavour to minimize their PiLs.

Hi Ron, Gadi,

I hope you are enjoying the long weekend.

As outlined in the chain below, OPG has requested to make tax-exempt / PILs exempt any net earnings of the OPG SPV. It is not anticipated that the trust itself would earn substantial revenues (as explained to

me, this would be limited to swap spreads, currency fluctuations etc.). Any revenues that OPG would receive from the trust would be subject to PILs, therefore I'm not sure this will make any difference to the Province. Please let me know if you have any concerns.

Thanks,
Scott

Scott,
It is meant to exempt the net earnings of the trust. Any income OPG earns from its services to the trust would still be subject to taxation. As well, revenue that OPG receives from the subordinated debt to the trust would be subject to taxation.
Thanks,
Ken

Hi Ryan,

I appreciate the explanation. I want to make sure I understand the scope of the exclusion. Does this exempt any earnings in the trust and any earnings that OPG derives from the trust (interest income) from both income tax and PILs?

Thanks,
Scott

Subject: Fair Hydro Plan - question on taxation

Scott,

I understand there was a question regarding the taxation exclusion reference in Summary document. I understand this question is in reference to the following footnote (which is footnote 4 on page 5):

4 MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the Electricity Act (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the Income Tax Act (Canada) or the Taxation Act, 2007 Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act.

Overall it is expected that the financing entity, either as a trust or a corporation, will have minimal net income. However, there could be tax situations creating a larger income or loss due to differences in timing or treatment (income vs capital). Given the unique nature of the transaction and lack of precedent to guide treatment then there are uncertainties with respect to tax. The objective is to minimize the tax consequences on both entities hence the request identified in the footnote.

Hope this helps.
Thanks,
Ken

Hi,

Please review and provide comments, highlights.

Emily, note the "Non-bypassability (exiting the electricity system / going off grid)" comment.

BTW, I seem to have not yet signed the letter back to Northland. Is that right? Would you get me the signing package on that.

Thanks,
Ron

Subject: OFHP Update

Hi Dave,

Please see the following update (and attached materials) from this morning's rate mitigation meeting:

GA Financing

Legal Update
Fair allocation plan (think of this as the line showing savings and costs to ratepayers associated with this program over time)
Province has set plan for deferrals for the first 4 years (25% and annual increases tied to inflation)
Need process (within pre-set parameters and input from OPG) to determine path for deferrals and recovery for subsequent years (5-30)
Originally viewed Province as taking a role in setting out this path
Feedback from market that Province should not be involved
Need to determine appropriate lead entity (e.g. OPG or IESO)

Need to be linked to life of underlying assets in order to mitigate constitutional risk
Consider 1-2 year refresh on the plan
Structure is still in flux
Treasury Plan
OPG Trust sets this plan
Limited oversight in order to ensure OPG Trust can raise $ in the market at a reasonable cost
Must fit within the limits set by fair allocation plan (but can vary under the cost curve depending on market and interest rate realities)
Once specific bonds issued, fair allocation plan cannot override
Role for OEB
Needs to be extremely limited in order to meet market requirements
However need to project consumer confidence
Options are currently under reivew
Collectability is a key point that requires a number of provisions in legislation including
Irrevocable charges
Role of LDCs, IESO in collections
Non-bypassability (exiting the electricity system / going off grid)
Provincial back-stops
Springing guarantees that arise in the event Province takes certain actions that erode value to bondholders
Need to be limited and contingent in order to meet accounting tests
Dealers considering whether this needs to be in legislation or in a side agreement
Want to make sure that it is narrowly focused in terms of triggering events to cover only material impacts and avoid unintended consequences (investors taking legal action)

- Over time as relevant policy changes are implemented, trustee may look to a 3rd party (e.g. opinion, ratings confirmation) to ensure that value of debt is not degraded

If Province takes on any of the debt, need to determine what can happen from an accounting perspective. Situations to review:
Temporary freeze on borrowing markets
Permanent impairment of OPG's ability to purchase a portion of the asset from IESO (in this case may need a guarantee from the Province)
Timeline for legislation
Pens down April 21
May 1st TB, LRC, Cab
May 4th introduction
Currently working from a Blakes document as a straw-person that would act as instructions to legislative counsel
Driving to timeline, very aggressive

OPG
Special committee of the board met last week
RBC, CIBC, Goldman included
Discussed this is much larger than past models
Imperative that this structure follows past transaction models

Also reviewed stress scenarios (interest rates are most impactful)
Shareholder letter
Providing to committee tomorrow and will share with government thereafter
Reviewing sub-debt attributes
Certain characteristics needed in order to support senior debt financing (most notably will take on longevity risk)
Characteristics of the sub-debt would drive pricing (not tied to Province's cost of funds; likely to be higher interest rate)
At minimum, want to ensure that OPG's earnings are higher to offset incremental IOD to the Province

OEB
Comfort letter from the Province is nearly ready, hopefully tomorrow
Balancing amount of information needed

IESO
Want to narrow issues to what is needed in legislation
Regulatory asset
Speaking with KPMG today
Meeting with ENE today to discuss business issues

Affordability Fund
Advisory committee established to recommend final trustees
Will start mid-month deliberations
By May 31
3 from LDCs and 2 from social services
Hydro One is providing logistical support

Social programs (OESP, FN Rate, RRRP)
Same timelines for approvals as GA
Lots of details to sort through in regulation once legislation in place
Give comfort to LDCs, IESO, Board in terms of what will be included in regulations in order for them to begin implementation
Appearance on Energy Financials:
Will have flexibility to flow funds between programs while ensuring transparncy (4 line items but not executive control on each)
ENE could move $ between programs without TBS approval
OESP: May 1 implementation of enhancements, OEB using up existing funds so no immediate draw on fiscal plan, working with social program ministries to assist with implementation, working with MoF / CRA to remove wet signature requirement
RRRP: plan to have in place by July 1 for 8 utilities; retro-active start as safety valve if needed for utilities with more limited capacity to move quickly
FN Rate: working to set up a meeting with COO to discuss options (for next week), Province does not want to be involved in choosing who is FN therefore plan to determine eligibility solely on the basis of geography

ICI

Expanded to include greenhouses
Need to meet 500kw threshold
Were already eligible at 1MW; therefore, not many that aren't already been captured
Seeking LRC regulatory approval April 10th
Working with CME, OCC on outreach campaigns on benefits of ICI and other conservation initiatives

Bill Presentment

Will not attempt to change the bill for July 1

- If try to be more aggressive on changes to the bill may jeopardize implementation

Want a larger re-work, look at all the constraints and regulations

- For example, reconsider changing name of "delivery"
- Timing: fall for re-design

In the interim, want an insert that shows %

AG

Walk through with ENE / MoF staff on April 19th
TBS will share technical materials in advance

FAO

Submitted materials last week
Will circle back to determine status

Thanks,
Scott

WEEKLY RATE MITIGATION IMPLEMENTATION GROUP
April 6, 2017

Agenda

1) GA Refinancing
    - Legislative Drafting (LSB)
    - OPG Update
    - IESO Update
    - OEB Update

2) Other OFHP Initiatives
    - Affordability Fund (CRED)
    - RRRP, OESP and FN (SNAP)
    - ICI (ESPD)

3) Bill Presentment (SNAP)

4) Update on Action Items / Policy Matrix

Notes:

Implementation of Ontario's Fair Hydro Plan
Week of April 3, 2017

Item	Key Deliverables / Considerations	Timing / Next Steps
1) Refinancing the Global Adjustment (ESP/IGS)		
• ENERGY, LSB, IESO, OPG, OEB, TBS and MOF	• Legislation • Defining mitigation and recovery mechanism; and • Establishing roles for IESO, OPG and OEB • Regulation (amend O.Reg. 95/05) • Shareholder Resolution (work with OPG to determine form) • Third Party Technical Report re Long Lived Assets (TBD) • Accounting opinions from E&Y (OPG) and KPMG (IESO) • Financing: o How long will IESO hold short term liability (weeks/months); o When and how frequently will OPG purchase the asset from IESO; o OPG trust rating agency review and 3rd party lender market sounding (e.g., cost/term, etc); o OPG to confirm if it is considering more than one SPV/subsidiary; o OPG to explore tax considerations; o OPG to indicate how it would determine interest rate on sub-debt; and o OPG to provide amount/frequency of equity required and indicate trigger <u>Recent Action Items</u> **OPG:** • OPG to continue to work with lead banks / rating agencies / OFA on financing issues • OPG to confirm accounting if OFA were to act as lead order on borrowing • OPG to determine who will finance / hold the asset until it goes to the market	• IESO Board meeting on April 11, 2017 (TBD) – ESP to present on OFHP • AG briefing on April 19, 2017 (TBD) • Provide comfort level to allow OEB to include in May 2017 RPP • Approval dates: o TB/LRC on May 1 2017; and o Cabinet on May 3, 2017 • Legislation introduced May 4, 2017. o Opposition Briefing (TBD) • Summer 2017 implementation (June/July). OPG preference for July 1 to align with quarter-end

Item	Key Deliverables / Considerations	Timing / Next Steps
	• OPG to embed OFA/Energy (as necessary) in their ongoing internal discussions • ESPD, IESO and OPG to continue discussions around refining refinancing modelling • OPG /LSB to work through requirements / help draft a shareholder resolution in a form to be determined. OPG to continue to consider requirements for enhanced indemnification for Board member **IESO:** • IESO to work through technical aspects with IT (i.e., operationalizing the back-office functions) • IESO to work with KPMG in the development of a formal opinion once first draft of legislation is available • IESO to discuss LDC issues with OEB **OEB:** • OEB to continue to work with ENERGY to finalize draft comfort letter regarding May 1 – Regulated Price Plan (RPP) and OESP • OEB to draft RPP communique to be released publicly by April 20, 2017 **Legislative Drafting:** • LSB / Blakes will continue to work through legislative drafting issues • LSB has drafted a letter for the Minister to send to LDCs re: contempt of the Legislature. • Legislative walk-through and working group meetings Monday and Tuesday • ENERGY / Blakes / IESO / OEB / OPG to meet on Tuesday to work through issues related to legislation • LSB / Blakes to brief OPCD on legislation • KPMG / E&Y to continue to be informed so that they can eventually confirm we've met all conditions • Blakes / OPG to work through financing issues related to 10% cap • Blakes / LSB to work with MAG on a second constitutional law	

Item	Key Deliverables / Considerations	Timing / Next Steps
	opinion from Peter Hogg • TD being engaged through OFA to provide financial advice • ESP to make presentation on GA financing at upcoming IESO Board meeting <u>Considerations</u> • OEB-RPP Filing in May 2017. OEB may also be required to set new GA rate for RPP-eligible consumers. • Ongoing legal, accounting and financing risk assessments. • Impact on Electricity Sector Dedicated Income.	
2) Broadening Rural or Remote Rate Protection (RRRP) (SNAP)		
• ENERGY, LSB and LDCs	• Legislation • Regulation (TBD) <u>Recent Action Items</u> • SNAP convened LDC working group on March 23rd and March 24th • SNAP to continue to monitor rate hearings for RRRP LDCs • SNAP to collect billing implementation timeline estimates from LDCs <u>Considerations</u> • Consideration of revising definitions of RRRP program for broadening to other LDCs and continue to have current structure in place to provide to existing consumers in Algoma and Remotes. May require separation of RRRP and broader distribution rate protection into separate programs. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF. • Work with LDCs to consider any bill messaging.	• Report back to TB/MBC on May 1, 2017 (TBD) • Fall 2017 implementation (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
3) Expanding Ontario Electricity Support Program (OESP) (SNAP)		
• ENERGY, LSB, MCSS and OEB	• Legislation • Regulation <u>Recent Action Items</u> • SNAP/LSB working on LRC package for OESP enhancements • SNAP to continue to work through OESP automatic qualification with MCSS / OEB • SNAP to continue to work with, MOF, OEB and CRA on OESP wet signature • Board decision this week on removing OESP from bill as of May 1. • SNAP to work with TBS to ensure funds flow from fiscal plan as soon as legislation passes <u>Considerations</u> • OEB has been engaged on implementation timelines for 50% + new eligibility – OEB working with LDCs to ensure systems are upgraded to reflect new credit amounts • Ongoing work with MCSS to auto-enroll those receiving / applying to social programs. Work plan for implementation being developed with OEB support. • As part of legislation / regulatory amendment work, investigating steps required to use OESP variance (approx. $100M) to reduce current OESP charge to zero and continue funding existing program until tax changes in place. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF.	• Report back to TB/MBC on May 1, 2017 (TBD) • LRC on April 10, 2016 • Program in place in 2017 (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
4) Providing a First Nations On-Reserve Delivery Credit (SNAP)		
• ENERGY and LSB	• Legislation • Regulation (TBD) <u>Recent Action Items</u> • SNAP convened LDC working group on March 24th • SNAP to move forward with including COO in FN rate implementation / work through implementation issues. SNAP working to meet with COO to have preliminary discussion of the FNDC • OEB has not posted FN rate report just yet as conversations are ongoing between Ministry on a letter from the Minister to the OEB acknowledging receipt of the report and outlining the plan for implementation <u>Considerations</u> • Work with LDCs on implementation details that need to be captured in legislation. • Legislation required to have program funded by taxpayers. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF. • Work with LDCs to consider any bill messaging.	• Report back to TB/MBC by Spring 2017 with final program details, including performance management framework, and clarifying how the programs aligns with the significant OEB estimate of program costs, from $13 million to $20 million • Program in place in 2017 (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
5) Establishing an Affordability Fund (CRED)		
• ENERGY, IGS, LSB, Blakes, CSD, OPCD, TBS, MOF and H1 (KPMG and Osler)	• TBC/MBC Submission • Declaration of Trust ("Trust Deed") • Transfer Payment Agreement (TPA) • Administrative Services Agreement (H1-Trust) <u>Recent Action Items</u> • March 23 and 24: Trust Deed and TPA executed. • March 30: Funds transferred to Computershare. <u>Considerations</u> • Legislative changes not required.	**April 7, 2017:** • Briefing for Advisory Committee members **April to May 2017:** • Advisory Committee recommends Board of Trustees by May 31, 2017; Computershare appoints full Board of Trustees **June 2017:** • Trustees expected to engage with distributors, IESO, OEB, others, to define funding criteria and processes. **June 2017:** • Report back to TB/MBC with final program details and a performance management framework including outcome measures and targets **Summer 2017:** • LDCs begin to apply to the Trust for funds **Late 2017/early 2018:** • ENERGY can apply for additional funds through 2018-19 PRRT based on performance and need. Trust term can be extended with amended/new TPA if agreed by Trust

Item	Key Deliverables / Considerations	Timing / Next Steps
6) Expanding ICI (ESP)		
• ENERGY, LSB, IESO and LDCs	• Regulation (amend O.Reg.429/04) • Regulatory Registry (RR) posting <u>Recent Action Items</u> • ESP working to finalize materials for LRC on April 10, 2017 – draft language from leg. Counsel has been shared with ESP staff • Communications finalized TPA with OCC / ESP, CRED and COMMS to consider providing support to CME (outreach with CME ongoing) • ESP to consider implications of dropping below 500kw threshold due to investments in conservation <u>Considerations</u> • Amendments need to be in effect as much in advance of the consumer notification date as possible to impact electricity bills this year (May 31, 2017). • Ongoing outreach with LDCs being undertaken by IESO	• RR posting on the proposed amendment – posted March 9, 2017 for 30 days • LRC on April 10, 2016 • Report back to TB/MBC on May 1, 2017 • Effective April/May 2017 (TBD)
7) Energy Sector Efficiencies (i.e., Ontario Energy Board and IESO) (SNAP / ESP)		
• ENERGY, LSB, OEB and IESO	**OEB:** • Directive / Letter (TBD) <u>Considerations</u> • Signal efficiencies intent in OEB business plan letter • Work with OEB/LDCs on LTEP document and proposed directive to OEB **IESO:** • Directive / Letter (TBD) <u>Considerations</u> • IESO's stakeholder engagement re Market Renewal is ongoing.	• Continue this work as part of LTEP

Item	Key Deliverables / Considerations	Timing / Next Steps
8) Additional Initiatives for Small Business and Industrials (i.e., Class B) (ESP)		
• ENERGY, MEDG, MOF, MOECC, MOL and Small Business	• Identify additional opportunities to assist Class B electricity consumers and small and medium sized manufacturers' <u>Recent Action Items</u> • ESP to work with other ministries regarding other measures that can be considered for SMEs <u>Considerations</u> • TBD	• Report back to TBC/MBC and Cabinet in spring 2017 (per Cabinet Minute)
9) Initiatives for Tenants (SNAP)		
• ENERGY and MOH	• Explore ways to provide direct assistance to tenants that are not sub-metered and do not directly benefit under the existing and proposed rate mitigation programs <u>Considerations</u> • MHO leading any legislative/regulatory changes needed to have tenants benefit from program. Consider whether benefits are limited to 8% and GA (rather than OESP which is harder to provide to tenants who do not pay their bills). • ENERGY working with MCSS to streamline/automate enrollment for ODSP/OW consumers into OESP.	• Report back to TBC/MBC and Cabinet in fall 2017 (Per Cabinet Minute)
10) Stakeholder/Agency Outreach (Communications)		
• ENERGY	• Minister's letters to: o Ratepayers; o LDCs; o Business (e.g., OCC, CME, Concerned Manufactures, etc); and o Agencies (i.e., IESO, OPG, OEB and H1)	• Early-mid March

Item	Key Deliverables / Considerations	Timing / Next Steps
11) Engagement with Officers of the Legislature		
• ENERGY, MOF/OFA, Financial Accountability Officer (FAO)	• Provide FAO staff with a technical briefing on the OFHP	• March 9, 2017: Preliminary discussion • March 14, 2017: Letter received requesting additional information by March 24, 2017 • Ministry preparing responsive materials
• ENERGY, MOF/OFA, Auditor General (AG)	• Provide the AG with a technical briefing on the OFHP	• Preliminary discussion on April 19, 2017 (TBD)
12) Bill Presentment (SNAP/LSB)		
• ENERGY	• Ministry to begin work on bill presentment	• Initial discussion on March 31, 2017

Policy and Legal Foundations for the Proposed Ontario Fair Hydro Plan Act
April 4, 2017

Creating the Regulatory Framework

- Principles will link the benefit of the "Green Generation Initiative" with the regulatory cost that future rate payers will pay
- Need to name and articulate "Green Generation Initiative"

Fair Allocation Plan

- Policy direction around intergenerational funding will be established by the Minister of Energy
- The Fair Allocation Plan has been determined for the 1st four years, as set out in the March 2nd announcement
- Should there be a process around the Fair Allocation Plan [or as necessary]?
- [Role for the OEB?]

Treasury Plan

- Created by OPG to implement the Fair Allocation Plan
- Will pass through actual costs and expenses of funding obligations incurred
- 3 components:
    - Treasury Plan must be compliant with principles and parameters of the Fair Allocation Plan;
    - The Plan must match maturities to allocations under the Fair Allocation Plan, as well as achieve funding efficiencies and cost management articulated in the Fair Allocation Plan; and
    - Implementation
- Should [Minister?] [OEB?] review [and approve?] the Treasury Plan? At what point in process?

Establishment of the Regulatory Asset

- Right to recover from rate payers, through collection by LDCs and IESO, the regulatory charge, late fees, interest established by legislation
- IESO may dispose of (by assignment, transfer, sale, etc.) its right, title and interest in the Regulatory Asset
- Legislation will create property rights and allow for security interests in the Regulatory Asset
- [Role of the OEB in establishing the Regulatory Asset?]
- Role of OPG in acquiring the asset?

Ensuring Collectability

- Clearly defined class of rate payers that receive and pay for the benefit
- Charges are irrevocable
- LDCs have duty to invoice rate payers for the charge
- IESO and LDCs have duty to collect charges as agent and pay remittances to IESO
- IESO has duty to pay remittances to the Regulatory Asset Owner
- Non-by-passability – subject rate payers who opt to go off grid to a penalty (prepayment)?
- True up mechanism to reconcile collections with incurrences
- Province shall not take steps to reduce, alter, impair or terminate the Regulatory Asset or collection

OEB Role

- [Inspect books and records?]

DRAFT

- [Approve administrative costs?]
- [Prudence review of financing costs?]
- [Consequences of OEB review?]
    - Ability to review
    - Ability to review and make recommendations (non-binding)
    - Review and approve or refer back for reconsideration (binding)

Provincial Guarantee

- Scope / Triggers / Consequences / Form

DRAFT

Subject: RE: Ontario Fair Hydro Plan

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Version 3

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

Confidential Draft

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

[Notes re this draft:
- all numbering of provisions may need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)
- need to check consistency of various phrases (e.g. *during/for/in respect of* reference period; *owner of RA/IA vs. RA/IA owner; etc.)*]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1]

The Government of Ontario has established a regulatory framework related to the generation and sale of electricity, which has promoted and continues to promote significant investment to enable phasing out of coal fired generation, modernizing sites and facilities in the Province for the generation of electrical energy and the production therefrom,[2] and conservation and demand management.

The Government of Ontario is committed to ensuring that the costs of these investments, and the raising of money to fund the investments,[3] are allocated fairly among present and future generations of consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

[1] Note: please see the preamble of the *Green Energy Act, 2009.*
[2] Note: please see clause 92A (4) (b) of the Constitution, 1867: "des emplacements et des installations de la province destinés à la production d'énergie électrique, ainsi que de cette production meme".
[3] Note: please see opening flush of s. 92A (4) of the Constitution Act, 1867

Schedule 1 Estimated finance amount

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")
[Note - will need to check throughout the draft that references to CEA are clear as to whether it's the total CEA in respect of a reference period vs. the portion payable by a specified consumer.]

"clean energy benefits" means, in respect of a reference period, the value of the benefits determined to be derived by the specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected future incurrences of clean energy costs; ("French")

"clean energy costs" means, in respect of a reference period, the value of the costs allocated to specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated costs to be incurred by the IESO under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management, including storage,

(iii) energy efficiency,

(iv) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(v) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

Confidential Draft

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[4] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"fair adjustment" means the determination of the rate payable for electricity in accordance with Part II; ("French")

"Financial Services Manager" means Ontario Power Generation Inc. [or such other person or entity as may be appointed as the Financial Services Manager by the Minister under section **]; ("French")

"Financing Plan" means the plan prepared under section X, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means a payment obligation incurred by or on behalf of the regulatory asset owner or an investment asset owner under section x; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means, in respect of a reference period, the amount determined under section 20xx for the reference period; ("French")

"investment asset" means the investment asset created as described in section 22xx; ("French")

"investment asset owner" means a financing entity that acquires an investment interest in the investment asset; ("French")

[4] Note - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

Confidential Draft

"investment interest" means an ownership interest in the investment asset, which entitles an investment asset owner to the rights and benefits specified in the agreement under which the ownership interest is transferred;

"invoice amount" means the amount, determined in accordance with subsections (2.1) and (2.2) and the regulations, that is payable by a specified consumer for the provision of electricity in Ontario during a period of time specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a) or such shorter period as may be set out in the Fair Allocation Plan; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of an investment asset owner by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right established under section X to recover the IESO funding shortfall; ("French")

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French")

"specified consumer" means,

Confidential Draft

(a) a person who has an account with an electricity vendor for the supply of electricity, receives an invoice in respect of the account and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French")

"transfer" means an assignment, conveyance, disposition or sale; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Confidential Draft

Invoice amount

(2.1) Subject to subsection (2.2) and the regulations, the invoice amount for a specified consumer includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following:

    i. The commodity price of the electricity used during the invoice period.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

    iv. The amount of any harmonized sales tax payable [by the consumer?] under Part IX of the *Excise Tax Act* (Canada);

    v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO, such amounts as may be prescribed. ("French")

Same, exclusions

(2.2) Except as otherwise prescribed by the regulations, the invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

    i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

    ii. A charge labelled as a "specific service charge" or "retail service charge".

Confidential Draft

iii. A rate rider.

5. Any other prescribed amounts.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer,

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the *Ontario Energy Board Act, 1998*;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Transfer

(4) For greater certainty, a transfer of the regulatory asset or a portion of the regulatory asset includes any act of the IESO by which the IESO purports to dispose of its interest in the regulatory asset with the result of a named person becoming the owner of an investment interest.

Effect of invalidity, etc.[5]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect a funding obligation that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

3xx. (1) The purposes of this Act are,[6]

[5] Note: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

Confidential Draft

(a) to ensure that clean energy costs are fairly allocated among specified consumers over time and that the process by which the Province raises money to fund the costs reflects the fair allocation; and

(b) to recognize that clean energy benefits that have accrued and that will accrue over time will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding financial commitments, financial arrangements, indemnities or similar transactions.

PART II
FAIR ADJUSTMENT

[6] Note: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Confidential Draft

Fair adjustment, May 1, 2017 to April 30, 2018
Definition

6xx. (1) In this section,

"average baseline invoice amount" means the average monthly invoice amount that would be payable by a representative consumer under the average baseline rate; ("French")

"average baseline rate" means the average rate that would be payable effective May 1, 2017 by the class of consumers prescribed by the regulations under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act, as determined by the Board by applying the method prescribed by the regulations under clause 79.16 (1) (b) of that Act; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

Rate determination

(2) Subject to subsection (3), [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] the rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 is the average rate that would be payable by a representative consumer in order for the representative consumer to receive a monthly invoice amount that is 25 per cent less than the average baseline invoice amount.

Sub-meter customers

(3) A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the rate determined under subsection (2).

Determining rate

(4) The rate mentioned in subsection (2) shall be,

(a) determined by the Board within seven business days after this section receives Royal Assent; and

(b) effective as of the first day of the calendar month immediately following the determination.

Confidential Draft

Transition

(5) If, for technical or operational reasons, an electricity vendor, specified consumer or unit sub-meter provider is unable to adapt its invoices to comply with this section by the time it issues its first invoice for electricity consumed on or after May 1, 2017,

(a) the electricity vendor, specified consumer or unit sub-meter provider shall adapt its invoices as soon as possible and, in any event, no later than [August 1, 2017]; and

(b) the electricity vendor, specified consumer or unit sub-meter provider shall ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Fair adjustment, May 1, 2018 to April 30, 2022

7xx. The Lieutenant Governor in Council may, [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] make regulations prescribing the rate for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay clean energy adjustment

8xx. (1) Upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor, as agent of the investment asset owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment is inconsistent with the fair allocation calculation applicable at the time when the payment is due; and

(b) whether the clean energy adjustment relates to funding obligations that were incurred in a manner that was inconsistent with the Financing Plan.

Confidential Draft

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to each investment asset owner in respect of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise.

Irrevocability of clean energy adjustment

9xx. (1) The amount of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a calculation error by the electricity vendor.

Determination of clean energy adjustment

10xx. (1) The clean energy adjustment payable by all specified consumers in respect of a reference period shall be determined as follows:

1. Calculate the estimated finance amount for the reference period in accordance with Schedule 1 and such additional rules as may be prescribed.

2. Add the true up amount for the reference period, as determined in accordance with the prescribed method, to the estimated finance amount calculated under paragraph 1.

True up amount

(2) For the purposes of paragraph 2 of subsection (1), the Lieutenant Governor in Council may make regulations prescribing the method for determining the true up amount, having regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the estimated finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

Confidential Draft

i. differences between amounts billed and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

IESO to issue remittance notice to electricity vendors

11xx. (1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion, as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period.

IESO to collect

(2) The IESO shall, as an agent of the investment asset owners, collect the clean energy adjustment from electricity vendors [in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998]*.

Collection account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of collecting those accounts:

1. Amounts described in subsection 12 (4).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8 (1).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (6), be held in trust for the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment asset owners in accordance with the regulations.

Collection of outstanding amounts, regulatory asset

(6) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the

Confidential Draft

applicable fair allocation calculation made by the Financial Services Manager under Part IV, the IESO may collect the difference from specified consumers.

Electricity vendor to invoice specified consumers

12xx. (1) The electricity vendor shall issue an invoice to each specified consumer for the consumer's amount of the clean energy adjustment in accordance with the regulations.

Electricity vendor to collect

(2) Each electricity vendor shall, as an agent of the IESO and the investment asset owners, collect the clean energy adjustment from specified consumers [in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998]*.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges for the same invoice period.

Held in trust

(4) All of the following amounts received by an electricity vendor shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be held in trust for the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act:

1. Payments received from or on behalf of specified consumers under subsection 8 (1).

2. Portions of payments received from or on behalf of specified consumers under subsection 8 (1) that are allocated to the clean energy adjustment under subsection (3).

3. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Remittance to IESO

(5) Each electricity vendor other than the IESO shall remit amounts described in subsection (5) to the IESO for the benefit of the investment asset owners or secured parties in accordance with the regulations.

Confidential Draft

Regulations

(6) If an electricity vendor fails, in the manner described in the regulations, to comply with the requirements of this section, the electricity vendor shall take such steps as the regulations may prescribe.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) [Note: To be elaborated.]

Termination

(2) The Minister may by written order terminate the appointment of an appointee as the Financial Services Manager if,

(a) the Minister has advised the appointee that the Financing Plan is either inconsistent with or is being implemented in a manner that is inconsistent with the principles set out in section x;

(b) the appointee has been afforded a reasonable opportunity to consider and address the inconsistency; and

(c) the appointee is unwilling or unable to address the inconsistency to the satisfaction of the Minister.

Replacement

(3) Upon terminating an appointment, the Minister may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment asset owner.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section XX.

Confidential Draft

2. Providing information to electricity vendors, including the IESO, in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate the fair allocation amount for the purposes of,

(a) fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of each reference period; and

(b) aligning funding obligations that may be incurred during each reference period with the allocation of the estimated clean energy costs and estimated clean energy benefits across present and future generations of specified consumers.

Amount

(1.1) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which the estimated [clean energy costs] [clean energy benefits] to be allocated to specified consumers in respect of the reference period exceeds the estimated amount of [the global adjustment] that would be borne by the specified consumers in respect of clean energy costs [in the absence of this Act].

2. An allocable portion of the value of any fair adjustment, determined in accordance with subsection (3).

Principles

(2) In calculating the fair allocation amount [or in developing the fair allocation calculation?], subject to subsection (3), the Financial Services Manager shall have regard to the following principles:

Confidential Draft

1. Clean energy costs allocated to the specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits attributed to the specified consumers in respect of a reference period should be determined based on *[Insert principles]*.

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers for each reference period.

    iii. The expected electricity consumption rates for each reference period.

Allocation of fair adjustment

(3) If, before the Financial Services Manager has calculated the fair allocation amount in respect of a reference period, a fair adjustment has been made under Part II in respect of the reference period, the calculation shall include a portion of the value of the fair adjustment in the fair allocation calculation for each future reference period.

Amendments to the fair allocation calculation

(4) The Financial Services Manager may amend the fair allocation calculation from time to time, as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Submission of fair allocation to Minister

(5) The Financial Services Manager shall provide to the Minister the fair allocation calculation and any amendments to the fair allocation calculation.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

Confidential Draft

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare and provide to the Minister a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred or potential transfers should be made for the purposes of this Act.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align the expected finance amount determined under Schedule 1 that would become due and payable during a reference period with the fair allocation amount determined for the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment for the reference period.

2. Incurrences and transfers should be implemented in a manner that, as the Financial Services Manager considers to be reasonable, is cost effective and reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

[Note for reference: List of items for consideration in regulation: (a) anticipated IESO funding shortfalls and related transfer amounts; (b) the maturities of funding obligations; (c) the availability of refinancings, redemption opportunities and liquidity terms and conditions in order to achieve the objective contemplated in section X(1)(a); (d) the availability of currency and interest rate hedging facilities for the purpose of mitigating any differences between the expected finance amounts becoming due and payable during a reference period and the fair allocation amount for the reference period; (d) the amount and potential variability of interest rates and related financing costs; (e) available capital markets in which funding obligations may be incurred.]

Amendments to approved plan

(3) The Financial Services Manager may amend the Financing Plan at any time, without the approval of the Minister, subject to the requirements set out in this section.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in a clean energy adjustment for the reference period unless,

Confidential Draft

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount for the reference period and the amount of the fair adjustment for the reference period].

Confidentiality of plan

(4) The Financing Plan is deemed to be a record subject to section 17 of the *Freedom of Information and Protection of Privacy Act.*

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations and make transfers in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, section [paramountcy of funding obligations] applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish one or more financing entities that may incur funding obligations and make transfers.

Prohibition

(3) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation.

Effect of amendment to Fair Allocation Plan

(4) No funding obligation incurred and no transfer made by the Financial Services Manager shall be affected by any inconsistency with the Financing Plan, including any inconsistency with the principles set out in section X.

Confidential Draft

PART V
THE REGULATORY ASSET

Interpretation, portion of regulatory asset

18xx. If a transfer under this Part provides for the transfer of a portion of the regulatory asset, any references in this Part to the regulatory asset are deemed to be references to the portion of the regulatory asset transferred.

[Note: This is meant to assist with clarity in the subsequent provisions.]

Variance account

19xx. (1) The Board shall issue an accounting order to authorize the IESO to do the following:

1. Create a variance account for the purposes of this Act.

2. Record the IESO funding shortfall in the variance account from time to time.

3. Recover the IESO funding shortfall in accordance with section X and the regulations.

No hearing

(2) The order of the Board shall be made in writing and without holding a hearing.

No appeals, etc.

(3) No appeal lies from the order of the Board.

IESO funding shortfall

20xx. (1) The IESO shall determine the IESO funding shortfall for each month in the following manner:

1. Calculate the sum of all invoice amounts issued to specified consumers for the month if Part II of this Act did not apply.

2. Calculate the sum of all invoice amounts issued to specified consumers for the month.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1, and make any other adjustments as may be prescribed.

Same

(2) To the extent that the IESO funding shortfall for any month is based on an estimate of the electricity used by specified consumers, the IESO shall record an

Confidential Draft

adjustment in the variance account in the following month to reflect the difference between the estimate and the electricity actually used by specified consumers.

Recording of IESO funding shortfall

(3) IESO shall record the IESO funding shortfall from time to time, including adjustments resulting from the exercise of the right of recovery under section 21 and any transfer under section 22, in the variance account.

Recording determinative

(4) A recording of the IESO funding shortfall in the variance account is determinative of the amount of IESO funding shortfall at the time of the recording.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the IESO funding shortfall.

Same, restrictions

(2) The IESO's right to recover the IESO funding shortfall under subsection (1) is subject to the following:

1. The IESO shall not be entitled to collect the IESO funding shortfall from specified consumers before May 1, 2022.

2. The process by which the IESO may recover the IESO funding shortfall shall be established by the Board, having regard to the amount of the IESO funding shortfall from time to time and the [fair allocation calculation].

3. Such other restrictions as may be prescribed.

Transfer of regulatory asset

22xx. (1) The IESO may transfer all or a portion of the regulatory asset to any financing entity under the Financing Plan, which transfer creates the investment asset.

Same

(2) Upon receipt of any payment in consideration for the transfer,

(a) the IESO shall record the payment as a reduction of the IESO funding shortfall in the variance account; and

(b) unless otherwise provided for in this Act, the IESO shall have no further right, title or interest in, or any obligations in respect of, the regulatory asset or in the investment asset created by the transfer.

Confidential Draft

Same

(3) Upon transfer, the financing entity becomes an investment asset owner and acquires an investment interest.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment asset owner of the regulatory asset, and the investment asset created by the transfer shall be immediately vested in the transferee.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Interpretation, investment asset

24xx. If a transfer under this Part provides for the transfer of an investment asset, any references in this Part to the investment interest are deemed to be references to the specific investment interest transferred.

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication:

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

Confidential Draft

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any amounts that all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

No set off, etc.

(2) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, an agent of the investment asset owner or an owner of distribution system assets in the Province;

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Confidential Draft

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with section [xx] of the *Personal Property Security Act*.

Collective action required

(4) If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: Successors may need to be addressed here.]

Transfer of investment interest

26xx. An investment asset owner may transfer all or a portion of its rights and interests in an investment interest to any other investment asset owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the owner of the investment interest acquired a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment asset owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment asset owner shall have priority over any liens in favour of such other persons.

Confidential Draft

Investment asset owner may grant security interest

28xx. (1) An investment asset owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the owner of an investment interest to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment asset owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person who may have commingled such revenues or other proceeds with other funds.

Confidential Draft

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment asset owner or a secured party, order the sequestration and payment of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment asset owner or secured party by any person or entity authorized to collect the clean energy adjustment, defaults on any required remittance of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Same

(3) An order under subsection (1) shall remain in full force and effect despite any bankruptcy, reorganization or other insolvency proceedings with respect to the person or entity who is subject to the order.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

Confidential Draft

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan or in relation to the establishment of the Fair Allocation Plan.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under this section unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[7]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations,

(a) defining any term used in this Act….

(b) prescribing types of payment obligations that constitute funding obligations;

(a) governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment.

(b) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

[7] Note - see s. 51 of the Electricity Act, 1998

Confidential Draft

[Note: reg-making powers to be dealt with in subsequent draft]

PART VII
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

201x. Section 53.1 of the Act would be amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under that Act and engaging in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including the following:

Confidential Draft

1. Entering into contracts and undertakings on behalf of special purpose financing entities, including pre-formation contracts and undertakings and as principal in relation to matters permitted by the *Ontario Fair Hydro Plan Act, 2017* subject to the right of reimbursement from amounts available to the financing entity.

2. Preparing reports on behalf of the financing entity.

3. Enforcing the rights of the financing entity.

4. Signing offering documents as sponsor or otherwise on behalf of the financing entity.

5. Exercising the powers and performing the duties of the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*

6. Issuing non-equity securities in Ontario Power Generation Inc. or on if its subsidiaries, for the purpose of raising funds to acquire debt or equity interests in a financing entity whose activities are limited to the incurrence of funding obligations pursuant to the *Ontario Fair Hydro Plan Act, 2017*.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create one or more subsidiaries, trusts or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

Confidential Draft

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 70 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1)]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Confidential Draft

SCHEDULE 1
ESTIMATED FINANCE AMOUNT

Estimated finance amount

1. The estimated finance amount for a reference period shall be determined by estimating, prior to the start of a reference period, the sum of the following:

1. The sum of all amounts that are payable during the reference period by or on behalf of the investment asset owners to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

2. The sum of all funding costs for the reference period, determined as follows:

    i. Calculate the aggregate of all interest, scheduled principal and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of investment assets owners during the reference period in respect of all funding obligations, including such amounts as may be prescribed.

    ii. Calculate the sum of the aggregate of all amounts received by or on behalf of investment asset owners during the reference period in respect of all funding obligations and such other amounts as may be prescribed.

    iii. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

3. The sum of all amounts payable during the reference period by or on behalf of investment asset owners to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable during the reference period by or on behalf of investment asset owners that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

Confidential Draft

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

1. Calculate the sum of all amounts deposited by or on behalf of investment asset owners during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn by or on behalf of investment asset owners during the reference period from deposits previously made as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

Attachments:	Fair Hydro Plan Act (April 26 2017) Consultation v4.docx

Please see attached the latest draft of the legislation. My understanding is that there is only room to make small tweaks based on the timeline right now.

Please note that Energy has not removed the exemption from section 28 in this draft. I am not sure if there has been any further discussion on that subject, but I think that if we want to push back on this issue it needs to be communicated as soon as possible.

Also, there is new language around the guarantee, but it does not contemplate the current plan to have both Ministers sign the guarantee. I have let Energy Legal know that this would make sense to change.

Confidential/Solicitor & Client Privileged

April 26, 2017

Hi, Toby. I am pleased to attach the most recent version of the draft legislation pertaining to the electricity rate reductions and intergenerational cost transfer.

Thanks for your help on all of this, and note that this version does not include amendments to EA ss.89 and 90 (PILS amendments). Those discussions are ongoing between MOF policy, OPG/Tory's and ENERGY is awaiting those discussions to close before finalizing the legislation on these matters.

Best regards,

James

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Confidential Draft

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the value of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

Confidential Draft

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined in under section 15xx;

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

(a) a payment obligation incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

Confidential Draft

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section 22xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

Confidential Draft

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means, subject to the regulations, a redemption, repayment or repurchase of a funding obligation; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" means [TBD]; ("French")

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

Confidential Draft

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

    i. The commodity price of the electricity used.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017.

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

Confidential Draft

iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge".

   iii. A rate rider [of the prescribed type or class].

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

Confidential Draft

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers and reflect the fair allocation; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Confidential Draft

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French")

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive a monthly invoice

Confidential Draft

amount that is 25 per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2).

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*.

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

Specified consumers (non-RPP), first fair adjustment

6.2xx The rate for electricity payable by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1).

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt is billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Confidential Draft

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Confidential Draft

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment was determined in a manner that was inconsistent with this Act; and

(b) whether the amount payable in respect of the clean energy adjustment relates to funding obligations that were incurred in a manner that was not in material conformity with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the estimated finance amount in respect of the reference period to the true up amount in respect of the reference period.

Confidential Draft

Estimated finance amount, true up amount

(2) The estimated finance amount and the true up amount shall be determined in accordance with the regulations.

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the immediately preceding reference period,

    ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

    ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) The Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period.

IESO to receive amounts

11xx. (2) The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

Confidential Draft

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same period.

Confidential Draft

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

Confidential Draft

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of calculation

(1.1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period before any funding obligation is incurred [by a financing entity during the reference period].

Amount

(1.2) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Financial Services Manager shall [comply with the regulations and] have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.

Confidential Draft

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

Method

(3) The Financial Services Manager shall calculate a fair allocation amount in accordance with such methods as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Notification to Minister

(4) The Financial Services Manager shall notify the Minister of the methods used to calculate the fair allocation amount and any changes to those methods.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment interest in accordance with this Act.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Confidential Draft

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align with the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during a reference period with the fair allocation amount determined in respect of the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period.

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Confidentiality

(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:

Confidential Draft

1. The Financing Plan.

2. Reports referred to in subsection (3.1).

3. Any other document that would reveal information contained in the Financing Plan or the reports.

Amendments to plan

(6) The Financial Services Manager may amend the Financing Plan at any time.

Same

(7) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, subsection 17xx (5) applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

Confidential Draft

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) Subject to any finding of [manifest error], a recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the balance at the time.

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Confidential Draft

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in, or any obligations in respect of, the regulatory asset or in the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment asset owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner of the regulatory asset.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Confidential Draft

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) The first transfer of the regulatory asset or a portion of it creates the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover amounts in respect of the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for amounts in respect of the clean energy adjustment.

Confidential Draft

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of amounts in respect of the clean energy adjustment.

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Confidential Draft

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment asset owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property,

Confidential Draft

except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ccount of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Confidential Draft

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Confidential Draft

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

Confidential Draft

the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*
[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

Confidential Draft

200.1xx (1) Subsection 25.33 (1) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:

(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and

(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.

(1.1) Subsection 25.33 (2) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:

(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and

(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

   i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017*, or

   ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998]*.

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Confidential Draft

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a special purpose financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017*.

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017*.

206x. Section 78.1 of the Act is amended by adding the following subsection:

Confidential Draft

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Subject: Rate Mitigation Implementation Meeting - April 6, 2017

Good evening,
Please find attached material for tomorrow's meeting.
Keley

Action Items – April 6, 2017

Global Adjustment Refinancing

- Legislation pens down April 21 for May 4 introduction
- OPG / IESO / Blakes to provide feedback on document that will provide instructions to Leg Counsel today
- MOs/PO meeting on Friday
- OPG providing shareholder resolution to OPG Board committee tomorrow and will be provided to Ministry following that
- OEB working with Ministry to finalize comfort letter

Affordability Fund

- Briefing of Advisory Committee scheduled for April 7

RRRP, OESP , FN Rate

- SNAP working with CSD / TBS on allocation for each program (RRRP, OESP, FN Rate and OREC) without executive control on each
- SNAP working with MOF / CRA on waiving wet signature

ICI

- ESP / Comms continue to work with chamber of commerce / CME on outreach campaigns to business communities

Bill Presentment

- MO to clarify bill presentment expectations with PO (Bill inserts will be ready for July 1 with bill redesign to occur in the Fall)

Other Items

- AG meeting on April 19 will walk through a technical briefing deck (OFA / ENERGY / MOF / TBS to attend)

Letter from Province to OPG.DOCX

Hi John, Emily,

FYI and please review.

Emily, note the point on the GA Refinancing and tying to individual customers.:

Ratepayers: final responsibility for repayment and there needs to be a direct link (normal course will be through IESO and LDCs but OPG SPV will need look through capabilities if necessary)
Cannot depend on intermediaries because that would result in degradation of credit ratings (would intermingle with ratings of intermediaries)
OEB has concerns around this tie to individual customers as it breaks from current practice
However it is required to meet credit requirements and in order to ensure IESO / LDCs do not take on incremental risk

Ron

Subject: Rate Mitigation Implementation Meeting - April 13, 2017

Hi Dave,

Please see the following summary of today's OFHP discussion (Gadi note that there are a few references to OFA – that's what happens when you leave the room early):

GA Refinancing:
Past week has involved several "all day, all hands" meetings to come to ground on legislative instructions
Included IESO, OPG, OEB, ENE, TB, MoF, Torys, Oslers, Blakes, Stikeman, Goldman, RBC, CIBC, TD
Now moving into drafting of legislation itself and anticipate several turns over the weekend
This week's theme: who does what
OPG SPV: remains consistent, setting out and executing on a financing plan to purchase the regulatory asset from IESO

IESO: establishes the asset, sells it and acts as collection agent (not principle)
LDCs: also as collectors, but not at the table so have no voice, cannot impose incremental risk / burden on them, leverage existing structures
Ratepayers: final responsibility for repayment and there needs to be a direct link (normal course will be through IESO and LDCs but OPG SPV will need look through capabilities if necessary)
Cannot depend on intermediaries because that would result in degradation of credit ratings (would intermingle with ratings of intermediaries)
OEB has concerns around this tie to individual customers as it breaks from current practice
However it is required to meet credit requirements and in order to ensure IESO / LDCs do not take on incremental risk
Provincial guarantees:
Focused on a springing guarantee (not a blanket guarantee) in the event of government action and/or unconstitutionality
Dealers will need them
Planning to park this for now as it is not viewed as a requirement ion legislation
Based on Gadi's feedback and the importance of this element, the team will attempt to clarify this point prior to introduction of legislation (consider whether anything is needed in legislation)
Rationale for AAA rating
Need to access broadest possible set of markets for these securities including securitization market which requires AAA
Also first of a kind transaction in Canada, and very large scale so need to aim for strongest possible rating
Constitutional Law
Legislation is being drafted with the fairness concept at its core (tie to underlying generation assets in concept)
Making this defensible, but will need to tie back to cost curve of underlying contracts
- Work is underway to develop this linkage

Approvals
9 am May 1 for TB approvals
External reports to be available at that meeting
E&Y: opinion 1-2 pages, plan to include in May 1 submission (based on facts and assumptions)
KPMG: opinion 4-5 pages approx., coordinate to also have for May 1 submission (based on facts and assumptions)
OPCD:
Would reference accounting opinions in the TB note
Still layers of detail on regulation and commercial agreements that will impact, therefore opinions likely to reference facts in legislation and assumptions around what will be in regulation / contracts
OFA / OPG / Dealers
Will be asked to prepare an assessment of financeability of the structure
OPG
Accounting
Several calls + meetings set up for next week to begin to socialize and bring up to speed OPCD, E&Y, KPMG
Attempt is to be ready for accounting opinions to be delivered on a common set of facts
OPG Letter (earlier draft attached)

Comments from Province to be turned today
Provides choice to OPG Board to decide to participate based on commercial opportunity

OPG Actions:
Need a note describing why 49% / 51% split is necessary (need for accounting opinion on day 1 and throughout the program)
Need to better understand why OPG / Torys is seeking tax exempt status for the OPG SPV (and what that means)

IESO

Ministry briefed Board earlier this week
Fair bit of work required on mechanics once legislation is in place
Will need to work with OFA on LoC, including enhancements to deal with adverse situations (if OPG does not purchase the asset)
Can affect credit ratings
Need to ensure we preserve IESO's ability and right to collect

OEB

Minister's letter has been delivered to OEB in support of OEB rates
Comfort letter forming the basis of discussions of the RPP panel
April 20th announcement for May 1 rates

Affordability Fund
Up and running
First meeting of the advisors has occurred and they are getting ready to select Trustees

Social Programs
Leveraging existing structures
LDC working group next meets on Wednesday
Most focus on bill presentment (Province will propose minimal changes at implementation, more fundamental changes in fall, this will reduce anxiety)

OESP

Reg to LRC on April 10th, approved, to be filed and posted
Working with MCSS for automatic enrollment (and with OEB);
Appear to have a path forward
Align with existing social assistance programs + OESP
FN Rate
Meeting with Chiefs of Ontario set up on April 26th
Focused on implementation to move forward as quickly as possible to align with July 1 roll out

RRRP

In discussions with OEB on mechanism
Continue to monitor rate filings including H Dx application filed last Friday and recently file InnPower application
Revise fiscal projections accordingly
Need a memo explaining why important to continue with OEB rate application process and not freeze all applications
OEB process allows for a fair and responsible mechanism to review rates (sometimes leads to decreases)

Need to maintain reliability
Increases may have an impact on fiscal plan
Critical Path
Once legislation introduced May 1, quickly move to regulations
Late June LRC for July 1 implementation

ICI
Working on promoting program, in partnership with industry partners
Need for engagement as there is limited capacity in these organizations

---

Good evening,
Please find attached the material for discussion tomorrow morning.
Thanks,
Keley

Implementation of Ontario's Fair Hydro Plan
Week of April 10, 2017

Item	Key Deliverables / Considerations	Timing / Next Steps
1) Refinancing the Global Adjustment (ESP/IGS)		

• ENERGY, LSB, IESO, OPG, OEB, TBS and MOF	• Legislation
	• Defining mitigation and recovery mechanism
	• Establishing roles for IESO, OPG and OEB
	• Regulation (amend O.Reg. 95/05)
	• Shareholder Resolution (work with OPG to determine form)
	• Accounting opinions from E&Y (OPG) and KPMG (IESO)
	• Financing:
	  o How long will IESO hold short term liability (weeks/months);
	  o When and how frequently will OPG purchase the asset from IESO;
	  o OPG trust rating agency review and 3rd party lender market sounding (e.g., cost/term, etc);
	  o OPG to confirm if it is considering more than one SPV/subsidiary;
	  o OPG to explore tax considerations;
	  o OPG to indicate how it would determine interest rate on sub-debt; and
	  o OPG to provide amount/frequency of equity required and indicate trigger
	• Third Party Technical Report (e.g., long lived assets, associated assessment of social, health and environmental benefits)
	
	<u>Recent Action Items</u>
	
	OPG:
	• OPG to continue to work with lead banks / rating agencies / OFA on financing issues
	• OPG to confirm accounting if OFA were to act as lead order on borrowing
	• OPG to determine who will finance / hold the asset until it goes to
		• IESO Board meeting on April 12, 2017 – ESP to present on OFHP
		
		• AG briefing on April 19, 2017 (TBD)
		
		• Provide comfort letter to allow OEB to include in May 2017 RPP
		
		• April 21, 2017, "pens down" on Legislative drafting
		
		• Approval dates:
		  o TB/LRC on May 1 2017; and
		  o Cabinet on May 3, 2017
		
		• Legislation introduced May 4, 2017.
		  o Opposition Briefing (TBD)
		
		• Summer 2017 implementation (June/July). OPG preference for July 1 to align with quarter-end

Item	Key Deliverables / Considerations	Timing / Next Steps
	the market • OPG to embed OFA/Energy (as necessary) in their ongoing internal discussions • ESPD, IESO and OPG to continue discussions around refining refinancing modelling • OPG /LSB to work through requirements / help draft a shareholder resolution in a form to be determined. OPG to continue to consider requirements for enhanced indemnification for Board member • OPG providing shareholder resolution to OPG Board committee April 7, 2017 and will be provided to Ministry following that **IESO:** • IESO to work through technical aspects with IT (i.e., operationalizing the back-office functions) • IESO to work with KPMG in the development of a formal opinion once first draft of legislation is available • IESO to discuss LDC issues with OEB **OEB:** • OEB to continue to work with ENERGY to finalize draft comfort letter regarding May 1 – Regulated Price Plan (RPP) and OESP • OEB to draft RPP communique to be released publicly by April 20, 2017 **Legislative Drafting:** • LSB / Blakes / OPG / IESO will continue to work through legislative drafting issues • LSB has drafted a letter for the Minister to send to LDCs re: contempt of the Legislature • Working group meetings Monday and Tuesday • ENERGY / Blakes / IESO / OEB / OPG to meet on Monday to work through issues related to legislation • KPMG / E&Y to continue to be informed so that they can eventually confirm we've met all conditions • Blakes / OPG to work through financing issues related to 10% cap	

Item	Key Deliverables / Considerations	Timing / Next Steps
	• Blakes / LSB to work with MAG on a second constitutional law opinion from Peter Hogg • TD engaged through OFA to provide financial advice <u>Considerations</u> • OEB-RPP Filing in May 2017. OEB may also be required to set new GA rate for RPP-eligible consumers. • Ongoing legal, accounting and financing risk assessments. • Impact on Electricity Sector Dedicated Income.	
2) Broadening Rural or Remote Rate Protection (RRRP) (SNAP)		
• ENERGY, LSB and LDCs	• Legislation • Regulation (TBD) <u>Recent Action Items</u> • SNAP convened LDC working group on March 23rd and March 24th • SNAP to continue to monitor rate hearings for RRRP LDCs • SNAP to collect billing implementation timeline estimates from LDCs • SNAP working with CSD / TBS on allocation for each program (RRRP, OESP, FN Rate and OREC) without executive control on each <u>Considerations</u> • Consideration of revising definitions of RRRP program for broadening to other LDCs and continue to have current structure in place to provide to existing consumers in Algoma and Remotes. May require separation of RRRP and broader distribution rate protection into separate programs. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF. • Work with LDCs to consider any bill messaging.	• Report back to TB/MBC on May 1, 2017 (TBD) • Fall 2017 implementation (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
3) Expanding Ontario Electricity Support Program (OESP) (SNAP)		
• ENERGY, LSB, MCSS and OEB	• Legislation • Regulation <u>Recent Action Items</u> • LRC package for OESP enhancements (50% increase, expanded eligibility) approved by LRC and Cabinet. o Implementation on May 1 to align with OEB decision to end OESP charge on May 1, and to finance program through variance account. • SNAP to continue to work through OESP automatic qualification with MCSS / OEB • SNAP to continue to work with, MOF, OEB and CRA on OESP wet signature • SNAP to work with TBS map out how funds will flow from fiscal plan after legislation passes <u>Considerations</u> • Ministry is working with OEB on how the OESP enhancement will be announced as part of a communications exercise. • Positive progress with OEB on implementation: o OEB has been engaged on implementation timelines for 50% + new eligibility – OEB working with LDCs to ensure systems are upgraded to reflect new credit amounts o Ongoing work with MCSS to auto-enroll those receiving / applying to social programs. Work plan for implementation being developed with OEB support. • As part of legislation / regulatory amendment work, investigating steps required to transition from OESP variance (approx. $100 million) to finance the program to financing with tax funds. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF.	• Report back to TB/MBC on May 1, 2017 (TBD) • LRC on April 10, 2016 • Program in place in 2017 (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
4) Providing a First Nations On-Reserve Delivery Credit (SNAP)		
• ENERGY and LSB	• Legislation • Regulation (TBD) <u>Recent Action Items</u> • SNAP convened LDC working group on March 24th • SNAP to move forward with including COO in FN rate implementation / work through implementation issues. SNAP working to meet with COO to have preliminary discussion of the FNDC • OEB has not posted FN rate report just yet as conversations are ongoing between Ministry on a letter from the Minister to the OEB acknowledging receipt of the report and outlining the plan for implementation <u>Considerations</u> • On-reserve eligibility considerations require discussion with Chiefs of Ontario • Work with LDCs on implementation details that need to be captured in legislation. • Legislation required to have program funded by taxpayers. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF. • Work with LDCs to consider any bill messaging.	• Report back to TB/MBC by Spring 2017 with final program details, including performance management framework, and clarifying how the programs aligns with the significant OEB estimate of program costs, from $13 million to $20 million • Program in place in 2017 (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
5) Establishing an Affordability Fund (CRED)		
• ENERGY, IGS, LSB, Blakes, CSD, OPCD, TBS, MOF and H1 (KPMG and Osler)	• TBC/MBC Submission • Declaration of Trust ("Trust Deed") • Transfer Payment Agreement (TPA) • Administrative Services Agreement (H1-Trust) <u>Recent Action Items</u> • March 23 and 24: Trust Deed and TPA executed. • March 30: Funds transferred to Computershare. • April 7, 2017: Briefing for Advisory Committee members <u>Considerations</u> • Legislative changes not required.	**April to May 2017:** • Advisory Committee recommends Board of Trustees by May 31, 2017; Computershare appoints full Board of Trustees **June 2017:** • Trustees expected to engage with distributors, IESO, OEB, others, to define funding criteria and processes. **June 2017:** • Report back to TB/MBC with final program details and a performance management framework including outcome measures and targets **Summer 2017:** • LDCs begin to apply to the Trust for funds **Late 2017/early 2018:** • ENERGY can apply for additional funds through 2018-19 PRRT based on performance and need. Trust term can be extended with amended/new TPA if agreed by Trust

Item	Key Deliverables / Considerations	Timing / Next Steps
6) Expanding ICI (ESP)		
• ENERGY, LSB, IESO and LDCs	• Regulation (amend O.Reg.429/04) • Regulatory Registry (RR) posting <u>Recent Action Items</u> • ESP working to finalize materials for LRC on April 10, 2017 – draft language from leg. Counsel has been shared with ESP staff • Communications finalized TPA with OCC / ESP, CRED and COMMS to consider providing support to CME (outreach with CME ongoing) <u>Considerations</u> • Amendments need to be in effect as much in advance of the consumer notification date as possible to impact electricity bills this year (May 31, 2017). • Ongoing outreach with LDCs being undertaken by IESO	• RR posting on the proposed amendment – posted March 9, 2017 for 30 days • LRC on April 10, 2016 • Report back to TB/MBC on May 1, 2017 • Effective April/May 2017 (TBD)
7) Energy Sector Efficiencies (i.e., Ontario Energy Board and IESO) (SNAP / ESP)		
• ENERGY, LSB, OEB and IESO	**OEB:** • Directive / Letter (TBD) <u>Considerations</u> • Signal efficiencies intent in OEB business plan letter • Work with OEB/LDCs on LTEP document and proposed directive to OEB **IESO:** • Directive / Letter (TBD) <u>Considerations</u> • IESO's stakeholder engagement re Market Renewal is ongoing.	• Continue this work as part of LTEP

Item	Key Deliverables / Considerations	Timing / Next Steps
8) Additional Initiatives for Small Business and Industrials (i.e., Class B) (ESP)		
• ENERGY, MEDG, MOF, MOECC, MOL and Small Business	• Identify additional opportunities to assist Class B electricity consumers and small and medium sized manufacturers' <u>Recent Action Items</u> • ESP to work with other ministries regarding other measures that can be considered for SMEs <u>Considerations</u> • TBD	• Report back to TBC/MBC and Cabinet in spring 2017 (per Cabinet Minute)
9) Initiatives for Tenants (SNAP)		
• ENERGY and MOH	• Explore ways to provide direct assistance to tenants that are not sub-metered and do not directly benefit under the existing and proposed rate mitigation programs <u>Considerations</u> • MHO leading any legislative/regulatory changes needed to have tenants benefit from program. Consider whether benefits are limited to 8% and GA (rather than OESP which is harder to provide to tenants who do not pay their bills). • ENERGY working with MCSS to streamline/automate enrollment for ODSP/OW consumers into OESP.	• Report back to TBC/MBC and Cabinet in fall 2017 (Per Cabinet Minute)
10) Stakeholder/Agency Outreach (Communications)		
• ENERGY	• Minister's letters to: o Ratepayers; o LDCs; o Business (e.g., OCC, CME, Concerned Manufactures, etc); and o Agencies (i.e., IESO, OPG, OEB and H1)	• Early-mid March

Item	Key Deliverables / Considerations	Timing / Next Steps
11) Engagement with Officers of the Legislature		
• ENERGY, MOF/OFA, Financial Accountability Officer (FAO)	• Provide FAO staff with a technical briefing on the OFHP	• March 9, 2017: Preliminary discussion • March 14, 2017: Letter received requesting additional information. March 31, 2017, information provided to the FAO
• ENERGY, MOF/OFA, Auditor General (AG)	• Provide the AG with a technical briefing on the OFHP <u>Recent Action Items</u> • Provide AG technical briefing presentation used in media lock-up on OFHP in advance of the technical briefing	• March 2017: Cabinet submissions provided to AG • April 19, 2017: Preliminary discussion on (TBD)
12) Bill Presentment (SNAP/LSB)		
• ENERGY	• Ministry to begin work on bill presentment <u>Recent Action Items</u> • MO to clarify bill presentment expectations with PO (Bill inserts will be ready for July 1 with bill redesign to occur in the Fall)	• Initial discussion on March 31, 2017

WEEKLY RATE MITIGATION IMPLEMENTATION GROUP
April 13, 2017

Agenda

1) GA Refinancing
    - Legislative Drafting (LSB / Blakes)
    - OPG Update
    - IESO Update
    - OEB Update

2) OPG Letter

3) Other OFHP Initiatives
    - Affordability Fund (CRED)
    - RRRP, OESP and FN (SNAP)
    - ICI (ESPD)

4) Update on Action Items / Policy Matrix

Notes:

DRAFT: April 11, 2017

[Letterhead of Minister of Energy]

April [●], 2017

Bernard Lord
Board Chair
Ontario Power Generation Inc.
700 University Avenue, 19th Floor
Toronto, Ontario
M5G 1X6

Dear Mr. Lord:

I am writing further to the Premier's news release of March 2, 2017, in which the Province announced the Fair Hydro Plan to lower electricity bills by 25 per cent on average for certain customers starting in the summer of 2017, as part of a significant system restructuring that will address long-standing policy challenges and ensure greater fairness. Given OPG's expertise as a participant in the electricity market and its expertise in rate regulated accounting and investment stewardship over significant pension and nuclear funds, I am writing specifically to request OPG's involvement in the implementation of the Global Adjustment Refinancing component of the Fair Hydro Plan

As you will have read, the 25 percent reduction in residential electricity bills referred to in the March 2nd announcement includes the 8 per cent reduction resulting from the rebate of the provincial portion of the harmonized sales tax on electricity bills effective January 1, 2017. The Province has also committed that certain customer bills would not increase by more than the rate of inflation for the four years following the 25 per cent average reduction.

In addition, as you know, Ministry of Energy staff have been working on preparing the draft legislation and regulations to implement the Fair Hydro Plan, with input from the IESO, the OEB, OPG and their respective advisors.

The Province is requesting that OPG, working with the Ministry of Energy, the IESO, the OEB, and their respective advisors, consider and recommend a plan for financing mechanisms that could achieve the Province's objectives for the reduction in consumer bills and the limitation on bill increases outlined above and in the Fair Hydro Plan, all in accordance with the legislation and regulations designed to facilitate the Fair Hydro Plan.

In particular, the Province would like OPG's financing plan to consider, among other things, structures and methods that would permit viable refinancing of a portion of the Global

Adjustment to reduce electricity prices for certain of today's electricity ratepayers, with the costs of the refinancing to be recovered over a period of up to 30 years, all in accordance with the legislation and regulations designed to facilitate the Fair Hydro Plan. We would expect the financing plan to include:

i) potential structures for the financing, which may include, as appropriate, a special purpose vehicle created for the financing;

ii) potential financing mechanisms and instruments, including senior debt and subordinated debt; and

iii) identification of the capital markets and jurisdictions that can be accessed to finance the rate mitigation.

The Province recognizes the need to provide OPG with the necessary assurances with respect to recovery of the principal, interest, and operating and other costs of any financing and will address the specific requirements identified by OPG and its financial advisors, including in the pending legislation and regulations that will govern the mechanics and requirements of the financing entity. We would also request that your plan identify any amendments to OPG's governing legislation and constating documents needed to facilitate the implementation of the financing plan in a commercial manner.

We would further expect that the financing plan would be implemented in an effective and cost-efficient manner by OPG.

I look forward to receiving a detailed plan that has the support of the OPG Board of Directors by June 1, 2017.

Yours truly,

The Honourable Glenn Thibeault
Minister of Energy

Stephen,
This version does not reflect the top issues raised by the Dealers. We are sitting down with the Dealers now working on a comprehensive mark-up that we will send later today, but it will not be ready by 2 PM. We would like to use tomorrow's meeting to discuss the mark-up we are preparing rather than a further revised version that will not reflect our feedback.

Elliot

Electricity Price Mitigation – Appendix

Ministry of Energy

March 1, 2017

Electricity Bonds - Asset Securitization Transactions in U.S.: Long Island Power Authority and Duke Energy

	Long Island Power Authority (LIPA)	Duke Energy
Key Terms	Up to $4.5 billion, in one or more series/tranches, with maturity no longer than 30 years. Fixed interest rates for each tranche. Estimated net present value savings to ratepayers from securitization: $446 million.	$1.283 billion plus bond issuance costs, in one or more series/tranches, with maturity up to 23 years. Fixed interest rates for each tranche. Estimated total savings to ratepayers from securitization: $708 million.
Bond Issuer	Special-purpose “public benefit” corporation created by statute.	Wholly owned “limited liability corporation” (structure not available in Ontario) of investor-owned Utility.
Covered Costs	Outstanding debt arising mostly from the closing of Shoreham nuclear power plant.	Costs from early retirement or abandonment of nuclear power plants and ongoing financing costs.
Collateral Property	Revenues from usage-based “transition charges” (part of delivery charge) on all customer bills.	Revenues from usage-based Asset Securitization Charge (separate line item on all customer bills.
Covered Customers	All existing and future grid-connected customers; charges not by-passable.	All existing and future customers; charges not by-passable.
Issuance Approval Process	Financing order issued by LIPA setting out the amount and terms of bond. Public hearings must be held before order finalized.	Utility petitions for financing order from Florida Public Service Commission (FPSC), which sets out details of bond issuance, including amount and terms. Final structure of transaction reviewed by FPSC for limited purpose of ensuring all requirements of law and financing order are met.
Status of Bond	Not debt of the State, although State provides statutory pledge not to impair the value of the collateral property.	Not debt of the State, although State provides statutory pledge not to impair the value of the collateral property.
Governance of Bond Issuer	Board of Trustees appointed by Governor	“Bond team” is established by order of the FPSC, which is “visibly involved”.
Adjustment Mechanisms	“Transition charges” adjusted annually based on mathematical formula in financing order, to ensure charges are adequate for servicing the bond; transitions charges may increase or decrease depending on variations in consumption.	Mandatory biannual petition by Utility to FPSC to adjust charges for any over or under collection, based on mathematical formula provided in the financing order and estimates of consumption for each rate class.

Deputy Minister Serge Imbrogno
Ontario Ministry of Energy
900 Bay Street
Hearst Block, 4th Floor
Toronto, ON M7A 2E1

Dear Deputy Imbrogno:

Attached are two documents prepared in conjunction with our KPMG advisors. The first outlines the proposed adoption by the IESO of the guidance in *ASC980 Regulated Operations* and the recognition of regulatory assets, as a more appropriate and transparent presentation in our financial statements.

The second is associated with the potential recognition and de-recognition of the regulatory assets associated with the IESO's role under the Global Adjustment Smoothing Account.

The conclusions of the second analysis are based on the structure of the account as the IESO currently understands it, and may vary depending on the final legislative materials.

We are available to address any questions you may have on these matters.

Sincerely,

Bruce B. Campbell

Attach.

White Paper - Adoption of the guidance in ASC 980 Regulated Operations

Independent Electricity System Operator ("IESO" or the "Company") is considering making changes in its accounting policies to reflect the balances of market participants within the IESO-administered markets (see separate technical analysis) and the economic impacts of rate regulation, as the changes would result in a more appropriate presentation of events or transactions in its financial statements.

Issue being considered in this document is: Can the IESO adopt the guidance in ASC 980 *Regulated Operations (US GAAP in FASB)*?

Background and Assumptions

The facts, circumstances, and assumptions relevant to the specific transactions are as follows:

1. The IESO's legal status is a not-for-profit, non-taxable, corporation established pursuant to Part II of the *Electricity Act, 1998*. IESO is classified as an Other Governmental Organization and prepares its financial statements in accordance with Canadian public sector accounting standards (PSAB).
2. IESO is rate regulated by the OEB in accordance with the Electricity Act, 1998 and the Ontario Energy Board ("OEB") Act, 1998 but currently does not recognize the economic impacts of rate regulation in its general purpose financial statements.
3. The IESO is required to obtain approval from the OEB under s. 25(1) of the Electricity Act, 1998 for the approval of its own expenditures, revenue requirement and fees. The last rate approval was obtained on December 29, 2016[1].
4. The OEB issued a Decision and Order on March 28, 2013 that permits IESO to recover the MDMR costs (the Smart Metering Charge) (see Appendix A). *(i.e. Costs incurred in the past will be fully recovered through future rates)*
5. Furthermore, in accordance with the *Electricity Act, 1998* and the *OEB Act, 1998*, the IESO has approved variance accounts to record all amounts payable or receivable by it in connection with the amounts paid to generators, the Financial Corporation, distributors and to entities with whom the IESO has a procurement contract. (i.e. costs incurred in the past will be fully recovered through future rates)
6. The IESO would change its accounting policies to permit the recognition of the economic impacts of rate regulation as from the 2016 financial year. IESO would adopt the guidance of ASC 980 *Regulated Operations* to better reflect the economic substance of its operations and enhance the transparency and accountability of its financial reporting.

Appropriate Accounting Principle

PS2120.02, "*a change in an accounting policy may be made… if it is considered that the change would result in a more appropriate presentation of events or transactions in the financial statements of the government.*"

PS1150.05 "*When the primary sources of GAAP do not deal with the accounting and reporting in financial statements of transactions or events encountered by the public sector reporting entity, or additional guidance is needed to apply a primary source to specific circumstances, the selection of an appropriate accounting policy requires the exercise of professional judgment. In these circumstances, a public sector reporting entity should adopt accounting policies and disclosures that are consistent with:*

[1] http://www.rds.ontarioenergyboard.ca/webdrawer/webdrawer.dll/webdrawer/rec/556699/view/Dec_Order_IESO_20161229.PDF

(a) *the primary sources of GAAP; and*

(b) *the application of the concepts described in FINANCIAL STATEMENT CONCEPTS, Section PS 1000."*

PS1150.19 *"Pronouncements issued by other bodies authorized to issue accounting standards may be useful sources to consult. For example, accounting pronouncements published with the authority of the Canadian Accounting Standards Board (AcSB), International Accounting Standards Board (IASB), US Federal Accounting Standards Advisory Board (FASB), US Governmental Accounting Standards Board (GASB), or International Public Sector Accounting Standards Board (IPSASB) are often important sources to consult on matters not covered by primary sources of GAAP or for assistance in applying a primary source of GAAP to specific circumstances."*

PS1150.08 "A public sector reporting entity consults sources other than primary sources of GAAP to assist in selecting accounting policies and disclosures only when these sources comply with paragraph PS1150.05. The public sector reporting entity evaluates sources in selecting the appropriate accounting policies and disclosures based on all of the following criteria:

(a) *The specificity of the source — A source that deals with the specific circumstances is likely to be more relevant than one from which the public sector reporting entity must analogize.*

(b) *The authority of the issuer or author — A source issued by an accounting standard setter in its own jurisdiction is likely to be more relevant than a source issued by others in the same jurisdiction.*

(c) *The continued relevance of the source — The passage of time may diminish the relevance of certain sources.*

(d) *The development process for the source — A source developed after extensive consultation and debate is likely to be more relevant than a source developed without such discipline."*

PS1150.10 "PSAB considers a source to be consistent with the concepts in paragraph PS 1150.05(b) when the guidance in that source is compatible with the (i) qualitative characteristics of financial information, (ii) the elements of financial statements, and (iii) the recognition and measurement criteria in paragraph PS 1150.05(b)."

PS1000.58 "In the absence of appropriate public sector recognition and measurement criteria for intangibles, all intangibles, including those that have been purchased, developed, constructed or inherited in right of the Crown, are not recognized as assets in government financial statements. The intangible often called "human capital" that embodies the talent or intellectual capital of government employees is not recognized as an asset under existing accounting principles."

PS3210.03 "Assets are economic resources controlled by a public sector entity as a result of past transactions or events and from which future economic benefits are expected to be obtained."

PS3210.04 "Assets have three essential characteristics:

(a) *They embody future economic benefits that involve a capacity, singly or in combination with other assets, to provide goods and services, to provide future cash inflows, or to reduce cash outflows.*

(b) *The public sector entity can control the economic resource and access to the future economic benefits.*

(c) *The transaction or event giving rise to the public sector entity's control has already occurred."*

Issue: Can the IESO adopt the guidance in ASC 980 *Regulated Operations*?

In accordance with PS2120.02, the IESO can reflect the economic impacts of rate regulation only if it is considered that the change of accounting policy would result in a more appropriate presentation of events or transactions in the financial statements of the government. As mentioned in the Agenda ref. 9A of the IASB meeting of February 2017[2], rate regulated entities have long argued that, without recognizing regulatory assets and regulatory liabilities, the entity's performance is distorted by the rate regulator's intervention in the imposition of performance obligations on the entity and the timing of cash flows from the ratepayers.

[2] http://www.ifrs.org/Meetings/MeetingDocs/IASB/2017/February/AP09-Rate-regulated-Activities.pdf

Ontario

The recognition of regulatory assets and liabilities would better reflect the economic substance of IESO's operations and enhance the transparency and accountability of its financial reporting. For example, during the period from 2007 to April 2013 the IESO incurred costs relating to the Smart Meter Program amounting to $90.9 million, and these costs were expensed and are included in the accumulated deficit. In the absence of applicable regulatory accounting under PSAS, the IESO was unable to recognize a regulatory asset for this charge, despite receiving a rate order to recover it over the period from May 1, 2013 to October 31, 2018. Should the IESO choose to adopt ASC 980, a regulatory asset for the Smart Metering Charge would be recognized at December 31, 2016 for an amount of approximately $21.6 million, which would represent the remaining unamortized amount that would have been reported if the asset was recognized originally in 2013.

PSAS does not address accounting concepts in a rate regulated environment. Since there is no guidance in PSAS regarding the recognition and measurement of regulatory assets and liabilities, IESO may consider other sources based upon PSAS 1150.05 in the GAAP hierarchy to determine appropriate accounting policies in a rate regulated environment.

Within AcSB, Accounting Standards for Private Enterprises (ASPE) defines a rate regulated entity but provides no guidance on regulatory assets and liabilities however requires disclosure of such balances if they are recognized. IASB has not completed their project on rate regulated activities and current standards only include a holding standard based upon what was done under previous GAAP. It will be important for the IESO to monitor the IASB's ongoing project on rate regulated activities as this may affect the recognition, measurement, presentation and disclosures of the regulatory assets and liabilities. Both FASB and GASB have guidance on accounting in a regulatory environment. IPSASB does not provide any guidance on accounting by rate regulated entities.

It is important to note that rate regulated entities in Canada that prepare their general purpose financial statements in accordance with US GAAP (e.g. Hydro One and Ontario Power Generation), ASPE (e.g. the three Fortis subsidiaries in Ontario), as well as those rate regulated entities that are eligible to elect to apply the requirements of IFRS 14 and elected to do so when they adopted IFRS (e.g. over 60 LDCs in Ontario), generally all recognize regulatory deferral and variance accounts in accordance with US GAAP accounting principles set out ASC 980 *Regulated Operations.*

Statement 62 issued by GASB in December 2010 is effective for financial statements for periods beginning after December 15, 2011. The objective of the Statement is to incorporate into the GASB's authoritative literature certain accounting and financial reporting guidance that is included in the Financial Accounting Standards Board (FASB) Statements and Interpretations issued on or before November 30, 1989, which does not conflict with or contradict GASB pronouncements. Paragraphs 476–500 may be applied to activities reported in business-type activities that have regulated operations that meet all of the three criteria in paragraph 476 as follows:

(a) The regulated business-type activity's rates for regulated services provided to its customers are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.

(b) The regulated rates are designed to recover the specific regulated business-type activity's costs of providing the regulated services.

(c) In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the regulated business-type activity's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs.

The criteria above and the guidance in paragraphs 476-500 are based on ASC 980 *Regulated Operations.*

It is also important to note that in its statement of financial position, the Ontario Electricity Financial Corporation ("OEFC"), which reports under Canadian public sector accounting standards, recognizes a net unamortized liability balance for power purchase contracts, as detailed in the summary of significant accounting policies:

Ontario

"The liability for power purchase contracts was originally calculated by discounting estimated losses over the life of the contracts. Under the *Electricity Restructuring Act, 2004*, OEFC began receiving actual contract prices for power from electricity consumers, effective January 1, 2005, and no longer incurs losses on these power purchase contracts. At that time, the Ministry of Finance estimated that the bulk of the liability would be eliminated over 12 years as existing electricity contracts expire. As a result, the bulk of the liability is being amortized to revenue over that period."

Although this liability is not defined as a regulatory liability in the OEFC's financial statements, the argument can be made that it substantively meets the definition under ASC 980 of a regulatory liability, as the OEFC had no further obligation and should have reversed the liability into income. After consultation with the AG at that time, it was decided to amortize the gain over the remaining term of the contracts.

In summary

Rate regulated entities in North America reporting under US GAAP, ASPE, IFRS (entities which have elected to use IFRS 14) and GASB generally all recognize regulatory deferral and variance accounts in accordance with US GAAP accounting principles based on ASC 980 *Regulated Operations* (see Appendix B for the accounting framework used by the Canadian rate regulated entities).

Evaluation of Other Sources of GAAP

When looking to other sources of GAAP, PSAS requires the other sources of GAAP to be evaluated

1. *as to whether they are consistent with accounting policies and disclosure within PSAS,*
2. *as to whether they are consistent with the application of concepts in PS 1000 and*
3. *as to all of the following criteria:*
   - *(a) Source deals with the specific circumstance*
   - *(b) Source is issued by an accounting standard setter*
   - *(c) Source continues to be relevant*
   - *(d) Source uses a consultative process and deliberation when developing policies*

As required by PS 1150.05(b), we need to analyze whether the concepts in the other source (i.e. ASC 980) are compatible with the (i) qualitative characteristics of financial information, (ii) the elements of financial statements, and (iii) the recognition and measurement criteria in PS 1000.

(i) Qualitative Characteristics of Financial Information

FASB	PSAS 1000	Evaluation
Concepts and objectives are for both business and non-business organizations as well as governmental units (Concept #4.3 to 4.5)	Public, legislators, councilors, investors, analysts, other governments (par. 14)	FASB considers governmental units
Financial reporting should: – Be useful in making resource allocation decisions – Be useful in assessing services and ability to provide services – Be useful in assessing management stewardship and performance – Provide information about economic resources, obligations, net resources and changes in them (Concept # 4.33-.54)	Financial statements should be relevant to the needs of the users and reliable. Relevance is achieved through timeliness, predictability and accountability value. Reliable information has the following characteristics: representational faithfulness, completeness, neutrality, conservatism and verifiability. (par. 28-29)	Similar

Ontario

(ii) Elements of Financial Statements

FASB	PSAS	Evaluation
Assets		
Probable future economic benefits obtained or controlled by the entity as a result of past transactions or events. (Concept #6.25-.34)	Economic resources controlled by a government as a result of past transactions or event and from which future economic benefits are expected to be obtained. (par. 35)	Essential characteristics similar
Liabilities		
Probable future sacrifices of economic benefits arising from present obligations of the entity to transfer assets or provide services in the future as a result of past transactions or events. (Concept #6.35-.43)	Present obligations to others arising from past transactions or events, the settlement of which is expected to result in the future sacrifice of economic benefits with little or no discretion to avoid settlement. (par. 44)	Essential characteristics similar
Revenues		
Inflows from delivering or producing goods, rendering services or other activities that constitute the entity's central operations. (Concept #6.78-.79)	Increases in economic resources resulting from operations, transactions and events of the accounting period. (par. 46)	Similar
Expenses		
Outflows from delivering or producing goods, rendering services or carrying out other activities that constitute the entity's central operations. (Concept # 6.80-.81)	Decreases in economic resources resulting from operations, transactions and events of the accounting period. (par. 49)	Similar

(iii) Recognition Criteria

FASB	PSAS	Evaluation
To be recognized, an item must meet the definition of an element of the financial statements, must be measurable with sufficient reliability, be relevant and be reliable. (Concept # 5.64)	Item must have an appropriate basis of measurement, a reasonable estimate can be made of the amount and if the item involves obtaining or giving up future economic benefits, it is expected those benefits will be obtained or given up. (par. 55)	Similar

(iii) Measurement Criteria

FASB	PSAS	Evaluation
Measurement basis dependent upon nature of item. Historical cost basis, replacement cost, market value. (Concept # 5.65-.70)	Primarily using historical cost basis. Replacement cost and realizable value are also used, but in limited circumstances. (par. 60)	Similar

Ontario

Criteria of PS 1150.08

Criteria	Evaluation
Source deals with the specific circumstance	Yes, ASC 980 Regulated Operations
Source is issued by an accounting standard setter	Yes, FASB
Source continues to be relevant	Yes, still used by rate regulated entities
Source uses a consultative process and deliberation when developing policies	Yes, comprehensive consultative process and deliberation

Evaluation whether regulatory assets meet the definition of Assets as per Section PS3210

PS3210 defines assets as *"economic resources controlled by a public sector entity as a result of past transactions or events and from which future economic benefits are expected to be obtained."* (par. 03)

The analysis of the three essential characteristics as defined by PS3210.4 are analyzed in the next table.

Characteristics	Additional guidance	Comments
They embody future economic benefits that involve a capacity, singly or in combination with other assets, to provide goods and services, to provide future cash inflows, or to reduce cash outflows. (par. 4(a))	The essence of assets are their future economic benefits. Assets embody future economic benefits that allow public sector entities to achieve their objectives. The future economic benefits embodied in assets involve a capacity, singly or in combination with other assets, to provide goods and services, to provide future cash inflows or to reduce cash outflows. (par. 11) The future economic benefits embodied in an asset may also be in the form of generating future cash inflows. Cash inflows benefit the public sector entity because cash can be used to purchase or to provide goods and services, redistribute wealth or settle liabilities. (par. 13)	The economic benefit embodied in the variance accounts (i.e regulatory asset) is the right to collect the incurred costs from ratepayers in order to settle the liability for the energy already consumed by the ratepayers. The electricity Act, 1998 ("EA") section 25.33(1) states: *"The IESO shall, through its billing and settlement systems, make adjustments in accordance with the regulations that ensure that, over time, payments by classes of market participants in Ontario that are prescribed by regulation reflect,* *a) amounts paid to generators, the Financial Corporation and distributors, whether the amounts are determined under the market rules or under section 78.1, 78.2 or 78.5 of the Ontario Energy Board Act, 1998; and* *b) amounts paid to entities with whom the IESO has a procurement contract, as determined under the procurement contract."*
The public sector entity can control the economic resource and access to the future economic benefits. (par. 4(b))	Economic resources can arise from, but are not limited to, the following: government's own legislation (for example, taxes, fines and penalties); (par. 08(c)) A public sector entity controls the economic resource and access to the	The economic resources is the right created by the legislation that the energy costs IESO incurs will result in future cash flows. In the regulatory environments, incurring costs creates an enforceable right to set rates at a level that permits

Ontario

	future economic benefits when it: a. can benefit from the economic resource through its capacity to provide goods and services, to provide future cash inflows or to reduce cash outflows; b. can deny or regulate access to those benefits by others; and c. is exposed to the risks associated with the economic resource. (par.16)	IESO to recover those costs. The adjustment of future rates is the mechanism the OEB uses to implement the right. Currently, the EA section 25.33(5) states: *"The IESO shall establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by it under this section."* The legislation would be amended to permit IESO to collect specifically the deferral of the energy costs and the related interest and administrative costs.
The transaction or event giving rise to the public sector entity's control has already occurred. (par.4(c))	It is the occurrence of a past transaction or event on or before the financial statement date that distinguishes a present economic resource controlled by a public sector entity from an economic resource that may be controlled by a public sector entity in the future. (par. 25) The past transaction or event that gives rise to control of an economic resource resulting from exchange agreements or contracts usually occurs at the point of exchange. This arises when substantially all the benefits and risks of ownership have been transferred to the public sector entity and normally coincides with the disbursement of funds, exchange of other assets or assumption of liabilities. (par. 26)	The past event giving rise to IESO's control occurs as the energy cost is incurred, as IESO has a right to collect it from the ratepayers.
Conclusion: The right to collect the deferral of the energy costs and the related interest and administrative costs meets the definition of assets.		

When concepts are in conflict with PSAS then PSAS prevails (PS 1150.12). For example, PSAS does not recognize intangible assets (PS 3150.03, .14 and PS1000.58). So if regulatory assets are considered to be intangible assets, they would not be allowed to be recognized through another source of GAAP.

It is worth noting that the economic impacts of rate regulation are not recognized under US GAAP as intangible assets as the FASB has specific guidance to deal with this type of asset. It is also worth noting that the IASB has an ongoing project on rate regulated activities and are currently developing an accounting model based on the principles of IFRS 15 *Revenue from contracts with customers* to provide a principle-based framework for recognizing regulatory assets (see Agenda Ref. 9 for the IASB meeting on February 23, 2017). Furthermore, the Summary Comment Letter Analysis related to the ED/2009/8 on Rate Regulated Activities published by the IASB in July 2009 states on page 2 of 50:

"The International Financial Reporting Interpretations Committee ("IFRIC") observed that it had previously discussed whether a regulatory asset should be recognized in the context of service concession arrangements, either as deferred costs or as an intangible asset to reflect an expectation that the entity will

Ontario

recover these costs as part of the price charged in future periods. It had concluded that entities applying IFRSs should recognize only assets that qualified for recognition in accordance with the IASB's *Framework for the Preparation and Presentation of Financial Statements* and relevant accounting standards, such as IAS 11 *Construction Contracts*, IAS 18 *Revenue*, IAS 16 *Property, Plant and Equipment* and IAS 38 *Intangible Assets*."

Entities that are not eligible to elect to apply the requirements of IFRS 14 do not recognize regulatory assets because in 2009 the IFRIC determined they did not meet the criteria for recognition of an intangible asset under IAS 38.

Therefore, we can conclude that ASC 980 is NOT in conflict with PS 3150.03, .14 and PS1000.58 with respect to intangible assets.

Conclusion:
FASB is appropriate to use as "*other source of GAAP*". FASB standard ASC 980 has extensive guidance for rate regulated entities including the recognition of regulatory assets and use of rate regulated accounting by IESO would be consistent with current reporting practices of H1, OPG and OEFC.

Ontario

Extract from the "DECISION and ORDER issued by the OEB on March 28, 2013" available on the IFRS website

Proceeding on the Ontario Energy Board's own motion to review the options for and ultimately determine the appropriate allocation and recovery of the Smart Metering Charge pursuant to section 19 of the Ontario Energy Board Act, 1998.

THE BOARD ORDERS THAT:

Effective May 1, 2013, the Smart Metering Entity charge to be levied and collected by the Smart Metering Entity from all Distributors identified in the Board's annual Yearbook of Electricity Distributors shall be $0.788 per month for each Residential and General Service <50kW customers for each distributor. The Smart Metering Entity charge shall be in effect from May 1, 2013 to October 31, 2018. The number of Residential and General Service <50kW customers to which the Smart Metering Entity charge will be applied to shall be in accordance with the methodology set forth in the Settlement Agreement attached as Appendix A.

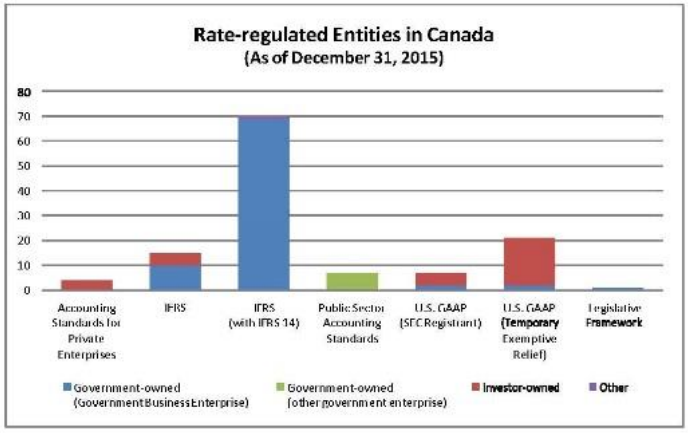
Appendix B:

Extract from the "Accounting Standards Advisory Forum Agenda Ref: 3A dated September 29, 2016" available on the IFRS website

Canadian Rate-regulated Entities

18. The accounting framework landscape for Canadian rate-regulated entities is currently diverse. For annual periods beginning on or after January 1, 2015, rate-regulated entities that are Canadian publicly accountable enterprises are required to apply IFRS. Rate-regulated entities that adopted IFRS for the first time after IFRS 14 *Regulatory Deferral Accounts* was issued continue to recognize these balances. Government Business Enterprises (which operate to generate a profit or on a break-even basis) that are also rate-regulated entities are also directed to apply standards applicable to for-profit entities, and thus apply IFRS. Canadian securities legislation permits dual-listed entities (i.e., Canadian entities also registered with the U.S. Securities and Exchange Commission) to apply U.S. GAAP in the normal course. Temporary exemptive relief is also available from the Canadian Securities Administrators that permits rate-regulated entities that are not dual-listed to apply U.S. GAAP in place of IFRS. If a rate-regulated entity is not a publicly accountable enterprise or a Government Business Enterprise, additional accounting framework options may also include Accounting Standards for Private Enterprises or Public Sector Accounting Standards. A non-GAAP reporting framework is used when legislated by the provincial owner of a government-owned rate-regulated entity.

19. As of December 31, 2015, there were approximately 125 rate-regulated entities in Canada. These entities mainly range in size from small entities owned by municipal governments to large investor-owned entities or entities owned by provincial governments.



Source: Information compiled based on audited financial statements for fiscal year 2015, or information from rate filings that confirmed the accounting framework used by these entities. Due to data collection constraints, the population could be slightly larger.

20. The chart above highlights two key points:

Ontario

(a) The majority of investor-owned entities have chosen U.S. GAAP over IFRS. A few entities that are not reporting issuers apply Accounting Standards for Private Enterprises. Both U.S. GAAP and Accounting Standards for Private Enterprises permit the recognition of balances arising from rate regulation. Several entities that apply U.S. GAAP have told us this choice was influenced by the need to provide their users with financial statements that accurately reflect the economics of their business. Further, some entities presently using the temporary exemptive relief described in paragraph18 have said they are considering incurring the cost and effort necessary to become a registrant of the U.S. Securities and Exchange Commission in order to have the permanent ability to apply U.S. GAAP. While such a decision could be primarily for business reasons such as the entity expanding its operations into the U.S., it could also be attributed to the continuing uncertainty about the ultimate outcome of the IASB's Rate-regulated Activities project and the approaching expiry date of the securities regulators' exemptive relief.

(b) Public sector entities that are Government Business Enterprises tend to apply IFRS. The majority of these entities is made up of several large provincially-owned utilities, and many small municipally-owned local distribution utilities that do not issue debt or list in the U.S. stock market, and are not subject to Canadian securities legislation. As a result, they cannot apply U.S. GAAP. As shown in the chart, many of these entities adopted IFRS for the first time after the IASB issued IFRS 14, which allowed them to continue their previous accounting practices for rate-regulated activities.

21. Within the pool of government-owned rate-regulated entities, there are entities that do not meet the characteristics of Government Business Enterprises and are required to apply Public Sector Accounting Standards.

22. The data on the different accounting frameworks in Canada is unique. It demonstrates that when given a choice, rate-regulated entities select an accounting framework that captures the effects of rate regulation on their financial position and financial performance in order to communicate more decision-useful information to users.

White Paper on the Province's proposed Global Adjustment Smoothing Account

Below is a summary of IESO's preliminary views on the implementation of the Province's proposed Global Adjustment Smoothing Account.

Understanding that the finalization of the legal terms, the financing structure and other detailed terms will take several months and will involve collaboration between legal counsel, parties involved and other stakeholders, this letter is intended to provide the guideline and framework which could form the foundation of the plan.

Issues being considered in this document are:

Issue #1: Can the IESO recognize deferral or variance accounts related to the annual Global Adjustment Smoothing Account as a regulatory asset on its statement of financial position?

Issue #2: Can the IESO derecognize the deferral or variance accounts related to the Global Adjustment Smoothing Account upon sale to the OPG Trust?

1. Recognition of regulatory assets (deferral and variance accounts)

Background and Assumptions for issue #1

The facts, circumstances, and assumptions relevant to the specific transactions are as follows:

1. The IESO's legal status is a not-for-profit, non-taxable, corporation established pursuant to Part II of the *Electricity Act, 1998*. IESO is classified as an Other Governmental Organization and prepares its financial statements in accordance with Canadian public sector accounting standards (PSAB).
2. IESO is rate regulated by the OEB in accordance with the Electricity Act, 1998 and the Ontario Energy Board ("OEB") Act, 1998 but currently does not recognize the economic impacts of rate regulation in its general purpose financial statements.
3. The IESO is required to obtain approval from the OEB under s. 25(1) of the Electricity Act, 1998 for the approval of its own expenditures, revenue requirement and fees. The last rate approval was obtained on December 29, 2016[1].
4. The OEB issued a Decision and Order on March 28, 2013 that permits IESO to recover the MDMR costs (the Smart Metering Charge) (see Appendix A). *(i.e. Costs incurred in the past will be fully recovered through future rates)*
5. Furthermore, in accordance with the *Electricity Act, 1998* and the *OEB Act, 1998*, the IESO has approved variance accounts to record all amounts payable or receivable by it in connection with the amounts paid to generators, the Financial Corporation, distributors and to entities with whom the IESO has a procurement contract. (i.e. costs incurred in the past will be fully recovered through future rates)
6. The province is contemplating deferring the recovery of a portion of the annual Global Adjustment Smoothing Account (comprised primarily of the electricity costs paid to the generators) over a period of 25-30 years, so that costs incurred would be fully recovered through future rates.
7. The *Electricity Act, 1998* and the *OEB Act, 1998* would be amended through legislation to require the deferral of the recovery of the Global Adjustment Smoothing Account and the future recovery in rates charged to customers.

[1] http://www.rds.ontarioenergyboard.ca/webdrawer/webdrawer.dll/webdrawer/rec/556699/view/Dec_Order_IESO_20161229.PDF

Ontario

8. The OEB would grant generic deferral or variance accounts to capture the difference between the amounts paid to generators and others, and the amounts collected in rates. Furthermore, the interest and ancillary costs related to the contemplated transaction would also be included in future rates charged to customers. In summary, the legislation would create a right to collect the incurred cost.

9. The IESO would change its accounting policies to permit the recognition of the economic impacts of rate regulation as from the 2016 financial year. IESO would adopt the guidance of ASC 980 *Regulated Operations* to better reflect the economic substance of its operations and enhance the transparency and accountability of its financial reporting.

Appropriate Accounting Principle for issue #1

ASC 980 Regulated Operations

- 980-10-15-2 *"The guidance in the Regulated Operations Topic applies to general-purpose external financial statements of an entity that has regulated operations that meet all of the following criteria:*

  (a) The entity's rates for regulated services or products provided to its customers are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.

  (b) The regulated rates are designed to recover the specific entity's costs of providing the regulated services or products. This criterion is intended to be applied to the substance of the regulation, rather than its form. If an entity's regulated rates are based on the costs of a group of entities and the entity is so large in relation to the group of entities that its costs are, in essence, the group's costs, the regulation would meet this criterion for that entity.

  (c) In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the entity's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs."

- 980-10-20 Glossary, Definition of incurred costs *"A cost arising from cash paid out or obligation to pay for an acquired asset or service, a loss from any cause that has been sustained and has been or must be paid for."*

- 980-10-05-8 *"Unless an accounting order indicates the way a cost will be handled for rate-making purposes, it causes no economic effects that would justify deviation from the GAAP applicable to business entities in general. The mere issuance of an accounting order not tied to rate treatment does not change an entity's economic resources or obligations. In other words, the economic effect of regulatory decisions—not the mere existence of regulation—is the pervasive factor that determines the application of GAAP. 980-340 – Other Assets and Deferred Costs."*

- 980-340-25-1 *"Rate actions of a regulator can provide reasonable assurance of the existence of an asset. An entity shall capitalize all or part of an incurred cost that would otherwise be charged to expense if both of the following criteria are met:*

  (a) It is probable (as defined in Topic 450) that future revenue in an amount at least equal to the capitalized cost will result from inclusion of that cost in allowable costs for rate-making purposes.

  (b) Based on available evidence, the future revenue will be provided to permit recovery of the previously incurred cost rather than to provide for expected levels of similar future costs. If the revenue will be provided through an automatic rate-adjustment clause, this criterion requires that the regulator's intent clearly be to permit recovery of the previously incurred cost.

  A cost that does not meet these asset recognition criteria at the date the cost is incurred shall be recognized as a regulatory asset when it does meet those criteria at a later date."

- 980-340-40-1: *"If at any time an entity's incurred cost no longer meets the criteria for the capitalization of an incurred cost (see paragraph 980-340-25-1), that cost shall be charged to earnings."*

Ontario

- 980-350-50-1: *"In some cases, a regulator may permit an entity to include a cost that would be charged to expense by an unregulated entity as an allowable cost over a period of time by amortizing that cost for rate-making purposes, but the regulator does not include the unrecovered amount in the rate base. That procedure does not provide a return on investment during the recovery period. If recovery of such major costs is provided without a return on investment during the recovery period, the entity shall disclose the remaining amounts of such assets and the remaining recovery period applicable to them."*
- 980-340-55-2: *"In some cases, a regulator may approve rates that are intended to recover an incurred cost over an extended period without a return on the unrecovered cost during the recovery period."*
- 980-340-55-3: *"The regulator's action provides reasonable assurance of the existence of an asset (see paragraph 980-340-25-1). Accordingly, the regulated entity would capitalize the cost and amortize it over the period during which it will be allowed for rate-making purposes. That cost would not be recorded at discounted present value. An exception to this general rule is provided for costs of abandoned plants."*

Issue #1: Can the IESO recognize deferral or variance accounts related to the annual Global Adjustment Smoothing Account as a regulatory asset on its statement of financial position?

US GAAP includes special accounting provisions that are applicable to entities with activities that are subject to rate regulation (see White Paper - Adoption of the Guidance in ASC 980 Regulated Operations). The result is that rate regulated entities are required to recognize regulatory assets and liabilities provided the following three criteria are met:

Criteria	Comment	Evaluation
The entity's rates for regulated services or products provided to its customers are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.	IESO has unrecognized variance accounts related to the MDMR (smart meters), that have been approved by the OEB in accordance with the Electricity Act and the OEB Act (see Appendix A). It is important to note that Hydro One and OPG are both consolidated into the province's books, are both regulated by the OEB and their respective regulatory assets and liabilities are reported in the province`s books.	Met
The regulated rates are designed to recover the specific entity's costs of providing the regulated services or products.	Currently, the rates approved by the OEB are designed to recover the IESO's costs of providing the regulated services and the pass-through related to the energy purchased from the generators. The contemplated transaction is based on the fact that the OEB would grant generic deferral or variance accounts to capture the difference between the amounts paid to generators and others, and the amounts collected in rates. Furthermore, the interest and ancillary costs related to the contemplated transaction would also be included in future rates charged to customers. In summary, the legislation would create a right to collect the incurred costs.	Met

Ontario

In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the entity's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs."	Since the deferral or variance accounts would be sold to the OPG Trust at least on a monthly basis and cash would be received on the same day, this criteria would be met. This criteria would need to be monitored on a yearly basis to ensure that IESO and the OPG Trust would be able to recover the future deferred amount taking into account the levels of demand or competition during the recovery period.	Met
Conclusion: The three criteria would be met.		

Conclusion: Based on the assumptions mentioned above, IESO should be able to recognize a regulatory asset for the deferral of the annual Global Adjustment Smoothing Account. As mentioned in the ASC 980 guidance above, it is important that an accounting order be issued by the OEB which indicates the way the incurred costs would be handled for rate-making purposes as the OEB's action provides reasonable assurance of the existence of a regulatory asset.

Ontario

2. Derecognition of regulatory assets (deferral and variance accounts)

Background and Assumptions for issue #2

The facts, circumstances, and assumptions relevant to the specific transactions are as follows:

1. The annual Global Adjustment Smoothing Account that would be deferred in the deferral or variance accounts (the "Asset") would be significant.
2. The IESO does not currently have the financial capability to finance the Asset and is contemplating selling the Asset to a Trust to be set-up by OPG (the "OPG Trust").
3. The OPG Trust would be consolidated by OPG.
4. Proposed terms of the sale agreement between the IESO and the OPG Trust:
   - The sale contract would be structured as an absolute sale, which would assign future economic benefits or cash flows related to the Asset exclusively to the OPG Trust.
   - The arrangement would be structured whereby there is no recourse or obligations remaining of IESO related to the Asset.
   - The arrangement is not considered to be a financing transaction as IESO would have no obligations to the OPG Trust after the Asset is sold to the OPG Trust.
   - IESO would not retain any rights or benefits from the Asset.
   - IESO would not have any rights to interest or penalties on the Asset once it has been transferred to the OPG Trust.
   - The contract would be clear that IESO cannot pledge the Asset as collateral to obtain future cash flows or financing.
   - IESO would continue to collect related cash flows on the OPG Trust's behalf and remit those cash flows to the OPG Trust without material delay. In addition, IESO would not be entitled to reinvest such cash flows, except for investments in cash or cash equivalents during the short settlement period from the collection date to the date of required remittance to the OPG Trust, and interest earned on such cash and cash equivalents is passed to the OPG Trust. The contract would define IESO's role strictly as that of agent, under a pass-through arrangement.
   - Servicing, origination, and arrangement fees, would be collected by IESO in rates charged to ratepayers as part of its market dealings.
   - The Asset would be sold to the OPG Trust at least, on a monthly basis and cash would be received on the same day.

Appropriate Accounting Principles for issue #2

Public Sector Accounting Standard ("PSAS") 3210, *Assets*, defines an asset as "*... economic resources controlled by a government as a result of past transactions or events and from which future economic benefits are expected to be obtained.*" [par. 3]

.04 *"Assets have three essential characteristics:*

(a) they embody future economic benefits that involve a capacity, singly or in combination with other assets, to provide goods and services, to provide future cash inflows, or to reduce cash outflows;

(b) the public sector entity can control the economic resource and access to the future economic benefits; and

(c) the transaction or event giving rise to the public sector entity's control has already occurred."

.22 *"Control of an economic resource and of access to the future economic benefits are essential characteristics of an asset, whereas possession or ownership is not."*

.24 *"A public sector entity may act as trustee when it administers trusts on behalf of the beneficiaries specified in the agreement or statute. As trustee, the public sector entity merely administers the assets, following the terms*

Ontario

and conditions set out in the agreement. It does not control the asset because it does not have access to the future economic benefits. Those benefits flow to the beneficiaries."

As noted in PS1000 Financial statement concepts:

.37 *"An item is not an asset of a government if it lacks one or more of the essential characteristics listed in the preceding paragraph. Thus, for example, an item does not qualify as an asset of a government if the item involves:*

(a) no future economic benefit;

(b) future economic benefit, but the government cannot obtain it; or

(c) future economic benefit that the government may obtain, but the events or circumstances that give the government control of the benefit have not yet occurred."

As noted in PS3450, derecognition of a financial liability:

.042 *"A government should remove a financial liability (or part of a financial liability) from its statement of financial position when, and only when, it is extinguished (i.e., when the obligation specified in the contract is discharged or cancelled, or expires)."*

.043 *"A financial liability (or part of a financial liability) is extinguished when the debtor either:*

(a) discharges the liability (or part of it) by paying the creditor, normally with cash, other financial assets, goods or services; or

(b) is legally released from primary responsibility for the liability (or part of it) either by process of law or by the creditor. (When the debtor has given a guarantee, this condition may still be met.)"

.046 *"Payment to a third party, including a trust (sometimes called "in-substance defeasance"), does not, by itself, relieve the debtor of its primary obligation to the creditor in the absence of legal release."*

.047 *"If a debtor pays a third party to assume an obligation and notifies its creditor that the third party has assumed its debt obligation, the debtor does not derecognize the debt obligation, unless the condition in paragraph PS 3450.043(b) is met. If the debtor pays a third party to assume an obligation and obtains a legal release from its creditor, the debtor has extinguished the debt. However, if the debtor agrees to make payments on the debt to the third party or direct to the original creditor, the debtor recognizes a new debt obligation to the third party."*

Issue #2: Can the IESO derecognize the deferral or variance accounts related to the annual Global Adjustment Smoothing Account upon sale to the OPG Trust?

PS3210 does not specifically address the derecognition of a regulatory asset as the concept of a regulatory asset does not exist under PSAS.

As mentioned above, regulatory assets do not meet the definition of intangible asset or financial asset. Specifically, regulatory assets do not meet the definition of financial asset because they are imposed on customers through the tariff (i.e., imposed by the OEB) and do not represent a right to receive payments from another party as a result of a contract.

More generally, PSAS.3210.37 suggests that an asset would no longer be recognized when it fails to meet the definition of an asset.

Based on PS1000.37(b), an item does not qualify as an asset of a government if the item involves future economic benefit, but the government cannot obtain it.

Based on the assumptions mentioned above, the legal title of the Asset would be transferred to the OPG Trust, as well as, ALL risks and rewards, including the following:

- the contract would define IESO's role strictly as that of agent, under a pass-through arrangement;
- all cash flows related to the Asset would be transferred without material delay to the OPG Trust;
- rights to interest or penalties on the Asset would be for the benefits of the OPG Trust;
- IESO cannot pledge the Asset; and
- no recourse or obligations remaining of IESO related to the Asset.

Ontario

IESO should also evaluate whether the sale of the Asset should in fact be considered as a borrowing arrangement. In the absence of detailed guidance on this subject, we can analogize to the guidance in PS3450 *Financial Instruments* for the derecognition of a financial liability. Par. 43 states that *"A financial liability (or part of a financial liability) is extinguished when the debtor is legally released from primary responsibility for the liability (or part of it) either by process of law or by the creditor. (When the debtor has given a guarantee, this condition may still be met.)"* Based on the assumptions mentioned above, since the legal title of the Asset would be transferred to the OPG Trust, as well as, ALL risks and rewards, it can be concluded that the sale of the Asset is not a borrowing arrangement.

Conclusion: Based on the proposed terms of the sale agreement between the IESO and OPG Trust mentioned above, the deferral or variance accounts would be derecognized at the point where the IESO would derive no future economic benefit from it. This would occur where the IESO ultimately transfers the rights, risk and rewards related to those deferral or variance accounts to the OPG Trust. This would occur on the receipt of cash from the OPG Trust.

Ontario

Appendix A:

Extract from the "DECISION and ORDER issued by the OEB on March 28, 2013" available on the IFRS website

Proceeding on the Ontario Energy Board's own motion to review the options for and ultimately determine the appropriate allocation and recovery of the Smart Metering Charge pursuant to section 19 of the Ontario Energy Board Act, 1998.

THE BOARD ORDERS THAT:

Effective May 1, 2013, the Smart Metering Entity charge to be levied and collected by the Smart Metering Entity from all Distributors identified in the Board's annual Yearbook of Electricity Distributors shall be $0.788 per month for each Residential and General Service <50kW customers for each distributor. The Smart Metering Entity charge shall be in effect from May 1, 2013 to October 31, 2018. The number of Residential and General Service <50kW customers to which the Smart Metering Entity charge will be applied to shall be in accordance with the methodology set forth in the Settlement Agreement attached as Appendix A.

OPG Memo

ONTARIO POWER GENERATION

February 27, 2017

Mr. Serge Imbrogno
Deputy Minister,
Ministry of Energy
4th Floor, Hearst Block
900 Bay Street
Toronto, Ontario
M7A 2E1

Dear Deputy:

Below is a summary of OPG's preliminary views on the implementation of the Province's proposed Global Adjustment Smoothing Account and financing structure. These views are contingent on the proposed terms and conditions that were sent to the Ministry of Energy on February 21, 2017.

Understanding that the finalization of the legal terms, the Trust indentures, financing structure and other detailed terms will take several months and will involve collaboration between legal counsel, input from capital markets, parties involved and other stakeholders, this letter is intended to provide the guideline and framework which could form the foundation of the plan.

Please do not hesitate to contact me if you have any questions regarding this summary.

Sincerely,

Mr. Ken Hartwick
Chief Financial Officer and Senior Vice President, Finance
Ontario Power Generation
W: 416-592-6985
C: 647-544-6985
ken.hartwick@ opg.com

cc. Jeff Lyash, President and CEO, OPG

Background:

The Province has indicated that it will take steps to reduce electricity bills in the near term. It has identified reductions in the Global Adjustment Charge (GAC) charged to electricity customers as a means to achieve its policy goals. The Province is proposing to temporarily reduce the amount of the GAC charged to electricity customers (primarily RPP-eligible customers). The exact quantum and duration of the program is still not known but based on discussions with the Province GAC charges of approximately $2-5B per year for the next 5-10 years would be deferred and collected over future periods commencing after the deferral period. A combination of senior debt and subordinated debt (mainly sourced by additional equity from the shareholder) would be issued to fund the amount deferred. The financing cost of the debt and other costs of running the program would form part of the amounts recovered from customers over the term of the program.

The Province has requested that OPG administer the GAC deferral, because of OPG's participation in the market, regulatory knowledge and the potential ability to consolidate the activity and accounting with OPG. Given the significant amount of financing required for the GAC deferral, OPG has developed a financing structure (depicted below) to:

- restrict the risk to OPG;

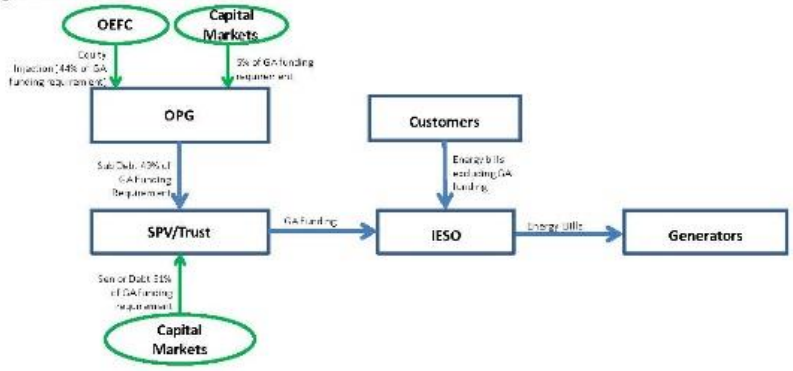
Ontario

- maximize the cost-effectiveness of the Trust or the Special Purpose Vehicle ("SPV") financing vehicle; and
- allow for consolidation into OPG financial statements.

The success of this structure is dependent on achieving a number of objectives which are reviewed in the following sections:

A. Ability to Recognize an Asset and Record Revenue
B. Ability to Consolidate the SPV into OPG
C. Ability to Finance
D. External Assessment
E. Risk Summary

All of the percentages shown in the graphic below are indicative and will be highly dependent on the legislation that the Province will enact:



Process:

The IESO will effectively sell the 'right to collect' deferred future revenue from ratepayers (GA Recovery Right asset) to the SPV in return for cash proceeds. In order for the SPV to purchase this asset the SPV will obtain the financing from two key sources: 51% directly from capital markets and 49% as subordinated debt from OPG. OPG will obtain 44% of this financing as an equity injection from the Province and 5% from capital markets.

A. Ability to Recognize an Asset and Record Revenue

Accounting Requirements under International Financial Reporting Standards (IFRS)

1) It is our understanding that the IESO and KPMG have concluded that the sale of this 'right to collect' future revenue (or regulatory asset) is not a financing transaction and will not be recorded as a financial liability. Based on that conclusion, the right to collect will be accounted for as an intangible asset in the SPV.

2) In order to the SPV to record this right as an intangible asset, the right must meet the following conditions:
   - The intangible asset must be separable and arise from a contractual or legal right (i.e. mandated by the Legislation and SPV Indenture Agreement).
   - The SPV must have the control and power to obtain future economic benefits from the intangible asset.
   - The SPV must be able to demonstrate that the intangible asset is purchased at fair value.

3) In order for the SPV to recognize appropriate revenue to offset any ongoing costs, the Legislation must require interest, carrying and administrative costs to be paid to the SPV on a monthly basis. This may result in additional amounts to be deferred to achieve the desired customer impact. Payment of revenue to the SPV is also important to service the interest expenses of the debt.

B. Ability to Consolidate the SPV into OPG under IFRS

OPG 'Control' of the SPV - Accounting Requirements

1) In order to meet the accounting definition of 'control', accounting guidance must be considered. There are no bright lines to determine whether OPG has exposure, or rights, to variable returns from its involvement with the SPV, or whether it has the ability to affect the returns of the SPV through its power over the SPV. Rather, all facts and circumstances are considered when assessing whether an entity has control over another entity. Based on the relevant accounting guidance under IFRS, OPG has proposed terms necessary to demonstrate that OPG has control over the SPV. OPG's external auditors, Ernst & Young, has provided their concurrence that based on the information provided to them to date that the following conditions should permit consolidation of the SPV by OPG.

Directive:

1. The SPV must be undertaken by OPG as a business initiative on its merits. A Shareholder Directive is to be limited to direct OPG to investigate the option of establishing a SPV vehicle to administer, finance and operate the Global Adjustment plan. The control, risk and rewards of that SPV will determine its consolidation into OPG as a business enterprise.

SPV:

2. The SPV should not operate in a predetermined way such that OPG does not have decision-making authority over the SPV's ongoing activities after its formation (i.e. should not operate on 'autopilot').
3. OPG must have the ability to appoint and remove the Trustee (or Board of Trustees), with no veto right by the Province. No party shall have the ability to remove OPG from its role and authority in the SPV.
4. The Province cannot have the right to veto OPG's decisions about the relevant activities of the SPV. OPG must have the power over the relevant activities of the SPV and be compensated. The relevant activities of the SPV include (but are not limited to) the evaluation and decisions on financing alternatives, duration, and the strategy to minimize financing costs. OPG must have the power to establish operating and capital budgets of the SPV.
5. OPG must have the power to determine or change operating and financing policies of the SPV, which will affect the variability of risks and returns.
6. The Province or its agencies must not directly or indirectly fund (through debt or equity) more than 50% of the following:
    - The SPV
    - Any of OPG's investments in the most subordinated debt of the Trust
7. OPG must own greater than 50% of the most subordinated debt and targeted to be no less than 5%[1] of the total debt of the SPV. Such ownership must be financed entirely by OPG through operating cash flows or external debt, without assistance from Provincial sources. A quantitative analysis should be performed at a later date to corroborate the appropriateness of the 5% threshold to support that the 5% subordinated debt investment is sufficient to absorb most of the expected variability in the SPV.
8. OPG must have the ability to earn variable returns by exercising its authority, which shall be accomplished as follows:

[1] While the rest of the letter refers to a 10% investment in the most junior subordinated debt with OPG owning 5%, it should be noted that OPG should own more than 50% of the most subordinate debt. For simplicity, the degree to which OPG's ownership beyond 50% is not shown in this letter.

Ontario

a. The cash flow from the restructured asset shall include interest determined based on a relevant benchmark that is appropriate relative to the restructured asset, plus an appropriate margin consistent with the relevant market and other risks
b. OPG shall have the authority to determine the financing strategy, which will vary the financing costs with the objective of enabling the SPV to achieve a more favourable return compared to the return from the restructured asset
c. The SPV shall establish classes of liabilities (senior, subordinated and the most subordinated). The classes would allow the SPV to delineate financing of lower risk investment and investment that would bear higher residual risk. The delineation would limit OPG's self-funded investment to a reasonable level in order to allow OPG to remain a self-sustaining entity.
d. OPG shall, through its ownership of the most subordinated liability, be able to capture and retain the pricing difference between cost of financing and benchmark for interest on the restructured asset, or any residual risk of restructured asset. The targeted return of the subordinated liability should be reflective of the underlying risks and compensate holders for active management that would be required.
e. OPG should participate in the detailed design of the above and the SPV documentation to ensure that it has substantive power and variability, which will allow OPG's Board of Directors to evaluate the opportunity as a business initiative instead of through a shareholder directive.

Nothwithstanding the above, under certain Defined Forced Majeure for emergency events (e.g. unlikely credit market event or disruption where it is not possible to borrow from the market at a reasonable rate), the OEFC may provide bridge financing beyond the designated percentage for a defined period. The relevant terms should ensure that this temporary measure does not detract from the rights of OPG to direct all of the relevant activities of the SPV. Additionally, OPG should not be protected from risk of loss by the OEFC with respect to its subordinated investment, nor should it lose its right to derive the residual returns should such bridge financing be required.

Legislation

9. The Legislation must require interest, carrying and administrative costs to be paid to the SPV on a monthly basis, so that the SPV is able to recognize appropriate revenue to offset any ongoing costs.
10. The Legislation must dictate the manner in which the restructured asset would be determined, collected, and the period of collection, so that the determination of the restructured asset will not be subject to the Province's decisions on an ongoing basis, but determined based on a formula. Alternatively, the Legislation may allow for an adjustment to the pre-determined deferral formula based on specific parameters that would limit the adjustment to the restructured asset. Adjustments beyond the specific parameters would require approval by the Board of Trustees.
11. The Legislation must be written to avoid legal or constitutional challenges and be irrevocable to reduce the cost of borrowing and with a specific formula which determines the deferral amount. As irrevocability would be difficult under Canadian law one mitigation would be to provide a Provincial guarantee which only applies with cancellation or amendment of the legislation.
12. The spirit of the above terms should be reflected in the SPV Indenture Agreement as well as Legislation, wherever possible.

2) The Trust is expected to be financed as follows:
- 51% senior secured debt from external markets
- 39% senior subordinated debt from OPG (via Province equity injection into OPG)

Ontario

- 10% junior subordinated debt from OPG (5% from external markets and 5% from Province equity injection into OPG).

When assessing control, an investor shall consider the nature of its relationship with other parties and whether those parties are acting on the investor's behalf (i.e. they are 'de facto agents'). If OPG is assessed to be a 'de facto agent' of the Province, it will compromise the ability for OPG to consolidate the Trust. The split above is to meet the following conditions to ensure that OPG is not considered a 'de facto agent' of the Province:

- The Province or its agencies must not directly or indirectly fund (through debt or equity) more than 50% of the following:
  - The Trust
  - Any of OPG's investments in the most subordinated debt of the Trust
- OPG must own greater than 50% of the most subordinated debt and targeted to own no less than 5% of the total debt of the Trust. Such ownership must be financed entirely by OPG through operating cash flows or external debt, without assistance from Provincial sources.

3) The Province will need to conclude on whether OPG still meets the definition of a Government Business Enterprise as defined under Public Sector Accounting Board standards in order to obtain the preferred consolidation treatment after the transaction. We also recommend that the Province to undertake the analysis deemed necessary to confirm the accounting treatment in its consolidated Public Accounts, including if the recognition of the intangible asset would result in an offsetting liability in the Public Accounts.

C. Ability to Finance

Property Right or Right to Collect
Legislative Requirements for Financing

The GA Recovery Right must be structured to encompass the following elements:

- Right to recover from and bill Ontario electricity customers for (1) the principal amount of GA that is being deferred, (2) all interest and other financing costs incurred in respect of the deferral of the GA, (3) all fees, expenses and other administrative costs associated with such financing;
- Repayment/amortization schedule as agreed by the IESO and any purchaser of such GA Recovery Right (or pursuant to a pre-defined schedule/formula that covers all of the purchaser's principal, interest and ongoing financing costs on a monthly basis);
- Repayment/amortization schedule must include a true up mechanism to ensure all costs associated with the deferral can be recovered from customers;
- IESO may dispose of the GA Recovery Right, provided that any such disposition shall be a true sale and absolute transfer to the purchaser of the IESO's right, title and interest in and to the GA Recovery Right;
- Purchaser will have the right to require the IESO (or any successor) to collect the principal amount of GA Recovery Right, together with interest, financing and administration costs, on the agreed repayment/amortization schedule;
- Right must be irrevocable and, if amended by future governments, debt holders have the right of action against the government to recover the amount outstanding including interest, fees, expenses and any damages resulting from the amendment;
- GA Recovery Right will not be subject to any set-off, counterclaim or other defence by the IESO or any successor or affiliated entity; and
- Make certain amendments to the Electricity Act to allow OPG to implement the SPV financing structure (e.g. allowing OPG to create subsidiaries and holding companies, and to have a beneficial interest in the SPV, etc). This would provide flexibility to accommodate possible variations to the financing structure that may be desirable over time.

Detailed legislative requirements are specified in the attachments as follows:

Ontario

Attachment 1 Legislative requirements to allow deferral of global adjustment amounts to be financeable

Attachment 2 Statutory amendments

The proposed financing structure for the SPV is:

	Risk Profile	Source	% of Total Funding Requirements
Tranche A Senior Debt	The least risky	Capital Markets	51%
Tranche B Sub Debt	In between A&C	OPG via OEFC	39%
Tranche C Sub Debt)	The most risky	OPG via OEFC	5%
		OPG via Capital Markets	5%

SPV structure is used to accomplish the following:

- SPV holds right to charge customers for the benefit of debt holders;
- Allows the financing vehicle to be ring-fenced from OPG as an SPV structure is set up as generally single purpose entities with no other operations that could add risk to the SPV, dilute debt holder rights, allow parties from other operations to claim rights to the future recovery from customers or allow these other parties to initiate bankruptcy proceedings;
- Enables SPV to potentially get a higher credit rating than OPG;
- Supports consolidation with OPG provided accounting requirements are satisfied;

This approach supports a number of objectives of the GA Recovery Right:

- 51% external senior debt supports separation of the SPV from the Province
- 5% junior subordinated debt establishes OPG's "at risk" equity which supports separation of the SPV from the Province
- Subordinated debt provides flexibility to the financing structure and additional credit support to external debt holders
- Subordinated debt sourced from OPG (mainly funded by equity injection from the Province) minimizes impact on OPG credit metrics reducing risk of an OPG rating downgrade that could result in the SPV being consolidated directly with the Province as the SPV would be considered an arm of the Province.

Recent transactions used as precedents are:

Duke Energy Florida Project Finance LLC
June 2016
5 series of bonds totalling USD$1.3B
Weighted average life from 2 to 19 years with interest rates from 1.2% to 3.1%
Credit rating AAA

Utility Debt Securitization Authority
Sponsored by Long Island Power Authority
March 2016
Amount issued USD$0.6B
Weighted average life of 12 years and weighted average yield of 2.7%

August 2016
Amount issued USD$0.5B
Weighted average life of 7 years and weighted average yield of 2.0%

Credit rating AAA

Cumulative outstanding (including previous issuances): USD$4.2B

D. External Assessment

Shakerhill Partners, an external advisor, identified the following items in an assessment of the structure and financeability of the structure:

- The structure is financeable however there are a number of significant risks to the structure:
  - Canadian and Ontario law does not provide the same protection to property right as exists in the US federal and state constitutions to limit the ability of governments to adversely impair contracts to the detriment of the holder;
  - Legislation could mitigate some of the risks – deferred recovery asset to be "uncapped", regular semi-annual true up to ensure recovery, Province provides sufficient committed liquidity to the IESO so that temporary shortfall in recovery does not affect payments to SPV, term of the deferral recovery substantially exceeds the longest maturity of debt of the SPV and that true-up mechanism take account of potential for currency, interest rate and duration mis-match between the debt of the SPV and the recovery mechanism;
  - Size of the program may be too large for Canadian securitization market requiring access to the US securitization market;
- Final maturity of debt should not exceed 30 years from inception of the program
- True up mechanism should be designed such that the forecast of recovery is less than 10% of the customer bill under downside scenarios to limit growth of the deferral balance as a higher portion of the customer bill increases the political risk to debt holders which could result in a lower credit rating and potential impact on financeability
- Securitized debt products are specialized and price at a premium to other fixed rate instruments however a successful program supported by a strong credit rating this premium could shrink over time to a minor spread over Provincial debt
- OPG's credit rating should be maintained provided sufficient equity is injected to maintain credit metrics
- While the structure is not expected to impact the Province there are risks that the program could negatively impact the rating agencies view of the Province's financial management.

E. Risk Summary

i. Consolidation

- Elements of the proposed structure were established to support consolidation of the SPV into OPG. These items may not be sufficient to establish OPG as risk owner of the SPV and the SPV may need to be consolidated directly with the Province.

ii. Financeability

- The legislation establishing the structure and the property right for recovering the financing and associated costs may not be adequate for financing purposes resulting in more expensive financing or an inability to obtain the required external financing.

iii. Cost of Financing

- Future governments may enact legislation that changes the right of the SPV to recover amounts from customers.
- The right to recover amounts from future customers must be irrevocable and subject to full recovery from the government in the event that future governments reduce or eliminate the recovery. A legal structure that is weaker than the precedent US transactions increases the risk to debt holders and the cost of financing.
- Interest rates on bonds in the securitization market are higher than equivalent rated bonds. Rate for a AAA securitization credit is about 50 bps higher than GOC (rated AAA) for a 5 year term. This difference is attributable to the specialized structure of the bond, smaller investor pool for this bond, smaller size of the market and higher perceived risks of the bond.
- Any regulator involvement must not be seen to modify any terms of debt issued or the property right securing the debt as this would increase risk to debt holders.

- It may not be possible to issue debt to match the terms of the deferred asset so shorter term debt would be used which raises risk to re-finance the maturing debt as the market may no longer be interested in this product. As well, underlying reference interest rates may be higher and the market may require a higher spread to invest in this product.
- With the GA Recovery Right program continuing for 10 years, debt issued over this period is subject to changes in both the underlying reference interest rates and appetite of the market for this product.

iv. OPG Credit Rating

- Minimizing the impact of significant additional debt on OPG's credit rating is dependent on higher EBITDA arising from earned income on the GA Recovery Right in excess of external debt. Ability of the SPV to record revenue reflecting the growth in asset value.
- Potential OPG credit rating downgrade if legislative structure is not adequate to support long term recoverability, inability to record revenue from growth in asset value or agencies view equity injection as debt.
- OPG credit rating downgrade could result in loss of GBE status or result in SPV being consolidated directly with the Province.

Attachment 1

LEGISLATIVE REQUIREMENTS TO ALLOW DEFERRAL OF GLOBAL ADJUSTMENT AMOUNTS TO BE FINANCEABLE

The IESO currently has a right to collect GA monthly from ratepayers through provisions in the *Electricity Act, 1998*. It is proposed that collection of a certain portion of the monthly GA be deferred for collection in the future, and that the right to recover the deferred GA from ratepayers be used as a basis for structured financing/securitization.

The current proposal is for a trust to be created as a financing vehicle (the "**Trust**") in connection the deferred GA. The Trust will finance the deferral of the GA by purchasing the right to recover such deferred GA from the IESO for the principal amount of the GA being deferred. For example, if the amount of GA that is being deferred is $200 million in a given month, the Trust will purchase from the IESO the right to future recovery of the deferred GA and the associated financing costs (including interest and transaction costs) for $200 million in cash.

The Trust is expected to finance these purchases from the IESO through a combination of senior secured financing raised in the capital markets and subordinated financing from OPG (the funding for which will mostly be from equity injections from the OEFC/Province).

For accounting purposes, OPG will need to have the ability to direct the activities of the Trust, through a services agreement and/or through the Trust's constating document.

Based on securitized financing raised by utilities in the US (backed by utility cost recovery orders) and the current regulatory framework in Ontario, the legislation in Ontario would need to be amended to provide the following, at a minimum:

1. The IESO will be empowered to create an asset (the "**Regulatory Asset**") consisting of all right, title and interest in and to:

   (a) right to recover from and bill Ontario electricity ratepayers for:

   (i) the principal amount of GA that is being deferred for collection;
   (ii) all interest and other financing costs incurred in respect of the deferral of the GA (whether through senior debt raised in the public markets or subordinated debt raised from OPG or others); and
   (iii) (subject to the comments in paragraph 5 below in respect of OPG's internal administrative costs only) all fees, expenses and other administrative costs associated with such financing, including up-front and ongoing financing costs and any indemnity payments;

Ontario

all on such repayment/amortization schedule as agreed by the IESO and any purchaser of such right (or pursuant to a pre-defined schedule/formula in the legislation that covers all of the purchaser's principal, interest and ongoing financing costs on a monthly basis); and

(b) all revenues, collections, claims, rights to payments, money or proceeds arising from the rights and interests set out in paragraph (a) above, regardless of whether such revenues, collections, claims, rights to payments, money or proceeds are imposed, billed, received, collected or maintained together with or commingled with other revenues, collections, rights to payments, payments, money or proceeds.

2. The IESO may dispose of the Regulatory Assets created from time to time on such terms as the IESO determines in accordance with the terms of directives to be issued to the IESO from time to time by the Minister, provided that any such disposition shall be a true sale and absolute transfer of the IESO's right, title and interest in and to a Regulatory Asset to the purchaser of the Regulatory Asset.

3. The Regulatory Assets will not be subject to any set-off, counterclaim or other defence by the IESO or any successor or affiliated entity thereof.

4. The legislation will need to recognize the Regulatory Assets as amounts that may be recovered by the IESO (e.g. it could be designated as a "GA Deferral" and would be included in the amounts collectible by the IESO through the GA collection mechanism, and would include interest and financing costs).

5. The purchaser of the Regulatory Asset will have the right to require the IESO (or any successor) to collect the principal amount of GA deferred, together with interest, financing and administration costs, on the agreed repayment/amortization schedule. **[NTD: In the LIPA securitization rate order, if the entity that is authorized to collect rates to service the bonds ends up defaulting, there is the ability to request a court to order "sequestration" and payments of amounts owing to the owner of the Regulatory Asset. Consider whether to include a similar right here. Alternatively, consider whether a security interest over the moneys collected by the IESO could be provided to the purchaser.]**

OEB would be provided with oversight over the internal administrative costs collected by the Financing Trust. This could be accomplished by (a) providing the purchaser of the Regulatory Asset with the right to require

Ontario

the IESO or a successor to collect only the principal amount of GA together with interest and financing costs and third party fees and expenses, and (b) requiring the IESO to collect amounts through the global adjustment and make payments to the purchaser of the Regulatory Asset with respect to the internal administrative costs incurred by the purchaser in connection with the purchase and management of the Regulatory Asset and the Financing Trust, in accordance with the order of the OEB then in effect. Under this mechanism, the OEB would be required to review the purchaser's internal administrative costs through a streamlined process and issue such orders in accordance with rules to be prescribed under a new regulation under the OEB Act, which would clearly limit the OEB's scope of review and could establish the basis for the purchaser to receive an appropriate fee for its services.

6. In the event that any action is taken or permitted by the Province or any regulatory authority that limits, alters, or impairs the value of a Regulatory Asset or reduces the ability of the IESO or the purchaser of the Regulatory Asset to collect or recover the costs associated therewith, the owner of the Regulatory Asset and the holders of any bonds or other securities issued to finance the purchase of the Regulatory Asset, will have a right of action against the Province for any damages suffered as a result of such amendment.

Ontario

Attachment 2

STATUTORY AMENDMENTS

The following is preliminary and is based on our current understanding of the proposed structure and objectives. For example, we have assumed that the structure will not entail the insertion of a new Holdco between OPG and the Province. As these aspects are refined, some of the suggested amendments described below may not be needed and other aspects that we are not aware of may need to be considered. Accordingly, these suggested amendments are provided for discussion purposes and are subject to change. We would welcome the opportunity to work with OPG and the Ministry on refining the scope and substance of required legislative and regulatory amendments.

A. Amendments to Implement Structure

Certain *Electricity Act, 1998* amendments would be needed to implement the anticipated structure (which we understand, as noted above, would not include a Holdco), as follows:

- **Section 53.1(1):** Amend to permit owning and operating generation facilities through subsidiaries (not only directly through OPG). In addition, amend to permit OPG to administer, manage, loan moneys to and have a beneficial interest in, if applicable, Financing Trust.

- **Section 53.2:** Amend to permit the Minister to acquire, hold, dispose of or otherwise deal with securities or debt obligations of, or any other interest in, OPG or any subsidiaries. This is to accommodate possible variations to the financing structure that may be desirable over time.

- **Section 53.■ (new):** New statutory section to permit the Minister to enter into arrangements relating to an exercise of powers under 53.2.

- **Section 53.■ (new):** New statutory section providing that creditors of Financing Trust have no recourse to the assets of OPG or any of its subsidiaries (other than Financing Trust, if applicable). In addition, consideration should be given as to whether the Act should be amended so that the Financing Trust cannot be wound up or liquidated.

B. Miscellaneous Corporate Items to Address

- **OPG Articles:** Amend the OPG's articles to remove the private company restrictions.

- **MOA with Province:** Consider whether any amendments to OPG's MOA with the Province are required to contemplate the Financing Trust.

C. Amendments Under Electricity Act to Implement GA Smoothing

Ontario

Based on our understanding that the global adjustment smoothing mechanism is intended to benefit residential and small business customers only and that the Minister will be responsible for determining how much global adjustment smoothing is to be applied in a given month, if any, amendments to the *Electricity Act, 1998* and Ontario Regulation 429/04 (Adjustments Under Section 25.33 of the Act) would be needed to implement the mechanism, as follows:

(i) Electricity Act:

- **Section ■ (New):** Establish a new power for the Minister to make directives to the IESO in relation to the global adjustment smoothing mechanism and, particularly, for purposes of establishing global adjustment smoothing amounts from time to time (expected to be monthly). To the extent possible, the directive power should be drafted so as to limit the ability for a future Minister to require the IESO to do anything that would materially and adversely affect the Financing Trust or its lenders. **[NTD: While our understanding is that the Minister would direct this, we note from other materials we have seen that OPG may instead be recommending a formula approach. It is not clear what the formula would look like, where it would be set out or how it would be applied and by whom]**

- **Paragraph 25.33(1):** This section says that IESO shall make adjustments in accordance with the regulations to ensure that, over time, payments by prescribed classes of market participants reflect amounts paid to OPG, OEFC and distributors, as well as amounts paid to entities with whom IESO has a procurement contract. Add new subsection (c) so as to require IESO to ensure that, over time, payments by prescribed classes of market participants also reflect amounts paid to Financing Trust. **[NTD: Not certain this is needed if only to benefit residential and small business consumers, who are not market participants. May be needed in reference to payments from distributors and retailers]**

- **Paragraph 25.33(2):** This section says that distributors and retailers shall make adjustments in accordance with the regulations to ensure that, over time, payments by prescribed classes of consumers reflect amounts paid to OPG, OEFC and distributors, as well as amounts paid to entities with whom IESO has a procurement contract. Add new subsection (c) so as to require distributors and retailers to ensure that, over time, payments by prescribed classes of consumers also reflect amounts paid to Financing Trust.

- **Note**: As described below, the regulation will need to include new requirements for the IESO to record the global adjustment smoothing amounts in one or more variance accounts and to use those amounts to offset amounts otherwise recorded in the variance accounts under Section 25.33(3) of the Act. For context, we note:

    - Section 25.33(3) says that adjustments under (1) or (2) relating to electricity consumed by consumers whose rates are determined by

Ontario

the OEB under s. 79.16 of the OEB Act (i.e. RPP Customers) shall instead be made in accordance with the regulations to one or more variance accounts established and maintained by the IESO.

- Section 25.33(4) says IESO, distributors and retailers shall make and receive such payments, set-offs and credits as may be required or permitted by the regulations with respect to consumers described in (3), i.e. RPP Customers.

- Section 25.33(5) says that IESO shall establish and maintain such variance accounts as may be needed to record all amounts payable or receivable by it under 25.33.

(ii) O. Reg. 429/04 (Adjustments Under Section 25.33 of the Act):

- **Section 1(1):** Consider adding definitions for "Financing Trust" and "global adjustment smoothing amount" or such other terms as may be preferred.

- **Section 1.2(1) (New):** Add section providing that, for the purposes of this Regulation, the global adjustment smoothing amount for a month is the amount determined by the IESO in accordance with a directive from the Minister under section ■ of the Electricity Act in respect of the month. **[NTD: See above note re use of Minister directives]**

- **Section 1.2(2) (New):** Consider adding a section providing that the IESO shall publish the global adjustment smoothing amount for a month by no later than the 10th business day of the following month [to align with general publication requirements for global adjustment under s. 1.1(2)].

- **Section 10(1):** Amend formula for calculating Class B GA rate by subtracting the global adjustment smoothing amount for a month from "M", which is the total amount of the global adjustment for the month. The global adjustment smoothing amount could be designated as "X", such that the formula would be (M-X-N)/(P-Q). Define "X" as the global adjustment smoothing amount for the month as determined by the IESO in accordance with the Minister's directive under section ■ of the Electricity Act for the month. **[NTD: See above note re use of Minister directives]**

- **Section 10.1 (New):** Add new section to deal with adjustments under subsection 25.33(3) of the Act, i.e. in respect of RPP consumers. This section should require the IESO to establish, within the variance account(s) it maintains pursuant to subsection 25.33(3) of the Act, one or more subaccounts in which it shall record the global adjustment smoothing amounts applicable to the classes of consumers described in subsection 25.33(3) of the Act. This section must also specify that the IESO shall apply the amounts recorded in the subaccounts against the balances in the variance accounts for purposes of section 79.16(3) of the OEB Act.

Ontario

- **Note:** This is a key aspect because, when the OEB determines RPP rates, it must take into account the balances in the variance accounts established by the IESO under s. 25.33 of the Electricity Act and make adjustments with a view to eliminating the balances within 12 months. This proposed new section 10.1 causes the IESO to reduce (in the near term) the variance account balances by the global adjustment smoothing amounts, as provided by Financing Trust, thereby enabling the OEB to determine RPP rates that, despite being lower for RPP consumers in the near term, still eliminate the relevant variance account balances within 12 months.

- **Paragraph 11(2)2.ii:** Amend the formula for calculating the allocation of global adjustment for a month to a licensed distributor that is a market participant by subtracting the global adjustment smoothing amount for a month from "M", which has the same meaning as under section 10(1). The global adjustment smoothing amount could be designated as "X", such that the formula would be [(M-X-N) x (R+S-T)]/(P-Q). Define "X" as suggested under section 10(1).

- **Paragraph 11(2)3:** Amend the formula for calculating the allocation of global adjustment for a month to each Class B market participant by subtracting the global adjustment smoothing amount for a month from "M", which has the same meaning as under section 10(1). The global adjustment smoothing amount could be designated as "X", such that the formula would be [(M-X-N) x U]/(P-Q). Define "X" as suggested under section 10(1).

- **Paragraph 16(7)4:** Consider amending the description of "Global Adjustment" that is required to be included on certain invoices so as to inform consumers that their portion of the global adjustment for the month (i) may have been reduced by the application of a global adjustment smoothing amount from the Financing Trust, or (ii) may include amounts payable to the Financing Trust in respect of global adjustment smoothing amounts previously applied.

- **Section 20(1):** This section establishes an obligation for the Ontario Electricity Financial Corporation and every licensed distributor that is a market participant to give the IESO such information as the IESO may require for the purposes of the Regulation in the form specified by the IESO and before the expiry of the period specified by the IESO. Consider amending to extend this obligation to the Financing Trust.

- **Section 20(6):** This section provides that on request by the OEB, the IESO, a licensed distributor, an embedded generator, a retailer or the OEFC shall give the OEB such information relating to this Regulation as the OEB may require, in the form and within the period specified by the OEB. Consider amending to extend this obligation to the Financing Trust.

Ontario

D. Amendments Under OEB Act to Implement Cost Recovery for Financing Trust

Amendments to the *Ontario Energy Board Act*, including amendments to O. Reg. 95/05 (Classes of Consumers and Determination of Rates) and the introduction of a new regulation, would be needed to implement a cost recovery process for the Financing Trust in relation to the global adjustment smoothing mechanism, potentially with limited OEB oversight, as follows:

(i) Ontario Energy Board Act:

- **Section 78(3.3):** This provision establishes an obligation for the OEB, when determining rates for the retailing of electricity, to take into account balances in variance accounts established under section 25.33 of the Electricity Act and to make adjustments "with a view to eliminating those balances within 12 months or such shorter time periods as the Minister may direct." Consider whether any amendments are needed, and confirm this works with the framework being proposed.

- **Section 78.7 (New):** We understand that the Province may want the OEB to have an oversight role. One possible approach would be to establish a new statutory section establishing that the IESO shall make payments to the Financing Trust with respect to the internal administrative costs incurred by the Financing Trust in connection with the purchase and management of the Regulatory Asset and the Financing Trust. Such payments by the IESO would need to be made in accordance with the order of the OEB then in effect, which orders shall be made by the OEB in accordance with rules prescribed under a new regulation.

    - The new regulation would need to be clear that the OEB does not have jurisdiction to consider the principal amount or any interest, financing costs, third party fees or expenses. Rather, OEB's role would be limited to considering the internal administrative costs of the Financing Trust and ensuring the Financing Trust receives an appropriate fee for its services, all of which would be recovered by the Financing Trust from the IESO, which would collect those amounts in the global adjustment. Note that, if this approach is accepted, the IESO and distributors and retailers would need the authority to collect such amounts as part of the GA and IESO would need the authority to pay such amounts to the Financing Trust. As such, additional amendments would be needed under O. Reg. 429/04.

- **Note:** Section 79.16 of the OEB Act does not require changes, but the significance of this provision should be understood.

    - Section 79.16 gives the OEB responsibility for determining electricity commodity prices for eligible consumers. Eligibility is determined under Reg. 95/05 (Classes of Consumers and Determination of Rates), which is also known as the Regulated Price Plan (RPP) Regulation.
    - Section 4(2) of the RPP Regulation defines RPP-eligible consumers as low volume consumers (i.e. those who annually use less than 150,000 kWh

Ontario

or such other amount as prescribed), consumers with demand of 50 kW or less, residential consumers that have accounts with distributors, consumers who annually use 150,000 to 250,000 kW of electricity, and consumers who have accounts with distributors if in the farming business.

- Paragraph 6(1)3 of the RPP Regulation provides that "In determining the rates (for RPP-eligible consumers), the Board shall forecast the cost of electricity to be consumed by the consumers to whom the rates apply, taking into consideration adjustments required under section 25.33 of the *Electricity Act, 1998* and shall ensure that the rates reflect those costs."
- The Ontario Energy Board has developed a Regulated Price Plan Manual (revised February 16, 2016) to describe the processes and methodologies it uses for determining electricity commodity prices that are charged to RPP consumers pursuant to Section 79.16 of the OEB Act and paragraph 6(1)3 of the RPP Regulation.

(ii) O. Reg. 95/05 (Classes of Consumers and Determination of Rates)

- **Paragraph 6(1)3:** Amend so as to require the Board, when forecasting the cost of electricity to be consumed by the consumers to whom the rates apply, to take into consideration not only the adjustments required under section 25.33 of the Electricity Act but also the application or prior application of global adjustment smoothing amounts determined by the IESO in accordance with Minister directives under section ■ of the Electricity Act, and to ensure that the RPP rates reflect those amounts. **[NTD: See above note re use of Minister directives]**

(iii) New Regulation (Payments to the Financing Trust)

- If the OEB is to be given the role of reviewing and approving the recovery of OPG's internal administrative costs for the Financing Trust under the potential section 78.7 (see above), then this regulation should describe the process and criteria pursuant through which the OEB would determine the amounts that the IESO would be required to collect through the global adjustment, in accordance with section 25.33 of the Electricity Act, and pay to the Financing Trust in respect of the provision of global adjustment smoothing amounts. This part of the regulation should establish:

  - any reporting requirements from the Financing Trust and/or the IESO to the OEB in connection with the global adjustment smoothing mechanism;
  - the frequency of the OEB making determinations under this part of the regulation;
  - the process through which the OEB shall make these determinations, which should be a streamlined administrative process rather than a public hearing process or, if a hearing is needed, then the scope of the proceeding should be clearly and narrowly constrained so as to deter intervenor involvement, lengthy proceedings and reduce/eliminate risk to recovery by Financing Trust;

Ontario

- the basis for the OEB's determinations as to the payments that shall be made to the Financing Trust, which should specify that:
  - the Financing Trust shall recover its prudently incurred internal administrative costs on a forecast basis each year;
  - the Financing Trust shall receive an appropriate fee each year (with some guidance as to what would be appropriate); and
  - the approved payment amounts shall be collected by the IESO through the global adjustment and paid to the Financing Trust in accordance with the order of the OEB then in effect. Note that O. Reg. 429/04 would likely need amendments to permit IESO (and distributors and retailers) to collect these amounts through the global adjustment.

Mr. Patrick Monahan
Deputy Attorney General
Ministry of the Attorney General
720 Bay Street
8th Floor
Toronto, ON M7A 2S9

Dear Mr. Deputy Attorney General:

RE: Proposal to Reconfigure Global Adjustment Charges

You have asked for my opinion on the degree of constitutional risk if the government were to reconfigure the Global Adjustment Charge to residential and small business users so as to pay down the debt over 30 years instead of the current 20 year period. The 20 year period was designed to coincide with the duration of current contracts between ISEO and the relevant electrical generation companies. The 30 year period is the assumed useful life of 30 years of the relevant electricity generating equipment.

To the extent either the 1 to 20 year consumer group or the 20-30 year consumer group is subsidizing one or other, there will be a mismatch between the cost of facilities and those whom the facilities benefit, which may attract a constitutional challenge on the basis that the Global Adjustment has become a tax rather than a regulatory charge.

The degree of constitutional risk, in my opinion, is in direct proportion to the extent the government is **not** able to show a proper match between the cost of providing facilities

Ontario

for electricity generation and the group of consumers who benefit year to year from electricity generated by those facilities.

The legal principles applicable to regulatory charges are quite straight-forward (although there is not much jurisprudence in the area). The hurdle for the government in any constitutional challenge will be to assemble credible expert evidence to demonstrate that (1) indeed the relevant electricity generating facilities *do* have a useful life of 30 years or more, subject to maintenance and refurbishment costs, and (2) that the allocation of the Global Adjustment aligns, to the extent practicable, with the costs and benefits of the electricity generators and avoids cross-subsidization of current consumers by future consumers.

In terms of Risk Assessment, I understand the government has not yet obtained an expert opinion from outside experts on the expected economic lifetime of the electrical generators now subject to the Global Assessment. I suspect there may be difficulty in obtaining such a comprehensive opinion from credible experts for the reasons discussed below. On that basis, I would assess the current proposal as **moderately high risk**, defined as being an outcome difficult to predict because there are good arguments on both sides, but in the end the Supreme Court of Canada would be more likely than not to find *against* constitutional validity.

If the government were able to assemble the necessary expert evidence, of course, the risk would be re-assessed at a lower level, but how much lower depends on the quality of the expert evidence and the extent to which the Global Adjustment is shifted, i.e. reduced

Ontario

to current consumers at the expense of the back end (20 to 30 year) consumers, who are assumed to be still benefitting from the current generating equipment.

Overview

The Global Adjustment Charge reflects all of the fixed costs, including capital costs, of Ontario's electrical generation facilities subject to 20 year contracts[1], as well as the premium paid to renewal energy producers and the cost of conservation programs (such as subsidies to small scale manufactures to replace inefficient equipment with more efficient equipment). In 2016, the Global Adjustment Charge, allocated in different amounts to different classes of consumer, stood at $12.3 billion dollars.

Much of the Global Adjustment was necessitated by substantial capital investment promoted by the Province with financial incentives to reduce greenhouse gas emissions and decarbonize and modernize Ontario's electricity infrastructure.

The Global Adjustment paid by consumers is a regulatory charge. Residential and small business users [class B consumers] pay the Global Adjustment based on the volume of electricity they use each month. One of the requirements of a valid regulatory charge (as opposed to a tax) is that the person paying the charge either benefits from the facilities that are subject to the regulatory scheme or they create the need for (and benefit from) those facilities in the future.

---

[1] Most generators in Ontario are on 20 year contracts. Assets with longer operating lives are provided longer term contracts in recognition of their extended benefit. These longer term assets are not part of the current proposal.

Ontario

The Ministry of Energy is concerned that the present allocation of the Global Adjustment over 20 years is "*front*-end loaded" in that the consumers in the initial 20 year period are paying upfront for facilities that will still be utilized to provide electricity to consumers in the 20-30 period who will, to that extent, get a free ride. There is an equal and opposite concern that by shifting costs to the 20-30 year customers, the government may in reality be disproportionality *back*-end loading the Global Adjustment with the effect that the 20-30 year users will be subsidizing the 1-20 year users.

Accordingly, the Ministry of Energy anticipates a constitutional challenge based on the shifting of a portion of the existing Global Adjustment charges from current users to the 20-30 year group.

The judges can be expected to be aware of the difficult political problem of high energy costs in Ontario, and will therefore take a careful look at the government's evidence in support of the re-allocation of the Global Adjustment.

The Elements of a Proper Regulatory Scheme

In *Westbank First Nation vs. British Columbia Hydro and Power Authority*, 1999 [3 SCR] 134 at para. 30, the Supreme Court of Canada grappled with the distinction between a tax, a user fee and a regulatory charge. This was said to depend on:

> ...whether the levy's primary purpose is, in pith and substance; (1) to tax, i.e. to raise revenue for general purposes; (2) to finance or constitute a regulatory scheme i.e. to be a regulatory charge or to be ancillary or adhesive to a regulatory scheme; or (3) to charge for services directly rendered i.e. to be a user fee

In a regulatory scheme, as stated, the regulator is expected to align costs and benefits. While this can rarely be done with precision, and the courts will defer to some extent to

Ontario

the regulator's attempt to approximate a "smoothing out" of the allocation of the costs associated with the regulatory scheme, nevertheless a court would have to be satisfied that the regulator is attempting in good faith to match the cost of facilities with the class of consumers who will benefit from the generation capacity of those facilities, or whose energy needs have required their creation. As Gonthier J. stated in *Westbank* at para. 28:

> **Finally, the individual subject to the regulatory charge will usually either benefit from the regulation, or cause the need for the regulation:** *Magnet*, supra at page 459. In *Allard*, supra, the gravel trucks caused the need for the repair to the roads; in *Ontario Home Builders*, supra, the developers and the new homeowners caused the need for the new schools. In both cases, the individuals being charged also benefited from the regulation. (emphasis added)

A levy will be held to be **a regulatory charge** where there is:

(i) A complete, complex and detailed code of regulation;

(ii) A regulatory purpose which seeks to affect some behaviour;

(iii) The presence of actual or properly estimated costs of the regulation; and

(iv) A relationship between the person being regulated and the regulation, where the person being regulated either benefits from, or causes the need for, the regulation.

See: *620 Connaught Limited vs. Canada (Attorney General)*, 2008 SCC 7, 2008 1 SCR 132 While each of these four elements would have to be addressed in the evidence, the third and fourth elements can be expected to be the most contentious.

On the other hand, a levy will be held to be **a tax** if it is:

(i) Enforceable by law;

(ii) Imposed under the authority of the legislature;

Ontario

(iii) Levied by a public body;

(iv) Intended for a public purpose; and

(v) Unconnected to any form of regulatory scheme.

Re: Eurig Estate, [1998] 2 SCR 565 at paras. 15 and 43. The anticipated constitutional challenge is expected to argue that the Global Adjustment imposed on the 20-30 year consumers is a direct tax beyond the legislative competence of the Province.

The Estimated Costs and Useful Life of the Generating Facilities

(i) "Smoothing" the Charges Over 30 Years

The Global Adjustment would be funded by loans. The OPG or OPG Trust would need to borrow an additional amount each year equivalent to the shortfall brought about by the reduction in the Global Adjustment charge to current consumers. If for example the OPG Trust were to borrow $2.2 billion dollars in the current year, and transfer that amount to ISEO, the need to impose a Global Adjustment for 2017 would be reduced by that amount, and the charge to the 2017 consumer would be lowered. However, the shortfall will have to be recouped from future consumers to repay the loan. In other words, the total debt shifted into the 20-30 year period would be increased by a like amount (plus accumulating interest). The court would require an explanation of how the debt is created, financed, and allocated year by year to year 30.

Of course the lower the amount of Global Adjustment allocated in the early years, the higher the borrowings that will have to be paid off in subsequent years and the greater the need to demonstrate that consumers in those later years will still benefit economically and proportionally from the current generating equipment.

Ontario

In the figures I have been shown, the borrowings necessary to defray part of the Global Adjustment otherwise to be imposed on Ontario Consumers in years 1 to 20 would peak around the midpoint of the 30 year period and thereafter decline to zero.

(ii) Impact of Projections of Potential Reductions in the Cost of Generating Electricity in years 1 to 20

The Ministry of Energy has projected electricity demand over the 30 year period. It is noted that if energy demand in Ontario is not as great in year 25 as predicted, there will be fewer consumers paying higher electricity bills than anticipated. Equally, of course, there could be developments (a drop in the price of natural gas for example) that will reduce the actual cost of generating electricity (as represented in the wholesale "spot" market). Such forecasts are inevitably somewhat speculative over this period. Such speculation is **not** relevant to the Global Adjustment analysis, in my opinion, because the Global Adjustment will be paid *in addition to* the cost of generation, whether the cost of generation is eventually shown to be higher or lower than anticipated. Declining costs would not affect the Global Adjustment levy, but would bring the overall burden on the consumer in year 25 below the currently anticipated level.

(iii) Useful Life of the Assets Financed by the General Adjustment

I am asked to assume that the bulk of the electricity generating assets have a useful life well beyond 20 years, but if (as expected) there is a challenge to the provincial re-allocation of the Global Adjustment, the Province will of course have to call expert evidence on that point.

Ontario

It may be a very complicated calculus to address the relative useful lifetimes of different types of electrical generators including wind, solar and biomass. There seem to be a number of question marks in this respect. Renewable energy technology is advancing rapidly. Prices of solar panels, it seems, have dropped over 20% in the last year. How much will 25 year old wind turbine technology be worth in 2040? Who can say? Developers of solar and wind power are obliged to put in place a "decommissioning" plan backed up (at least in some cases) by a performance bond. It will have to be established that the decommissioning is not triggered at the conclusion of the 20 year FIT plan (and the use of the land then restored to landowners). Much of Ontario's renewable energy facilities may have little economic value to consumers in the 20-30 year period, even though still able to produce electricity inefficiently.

If the government fails to establish that the relevant electricity generating assets will continue to perform economically over the 30 year period, thereby failing to justify the imposition of an amortization of current equipment cost over the extended 30 year period, or if the Global Adjustment Charge is in the opinion of the Court disproportionality backend loaded in light of that declining benefit to future consumers, the Global Adjustment will not qualify as a regulatory charge.

(iv) Impact of Choosing Option 1 (Residential Bills Lowered 25%), Option 2 (20%) or Option 3 (18%)

The choice of option is significant because the greater the reduction of bills to current residential consumers, the greater the debt load pushed onto future consumers, and the more the Ministry's 30 year projections will attract judicial scrutiny. I expect the

Ontario

Province's expert would have to concede that projections into the 20-30 year time frame are inherently speculative (as to the useful economic life of the current renewable energy technology for example).

The constitutional issue remains the same: can it be demonstrated that the Global Adjustment will match costs and benefits as closely as is practicable, and not operate as a cross-subsidy of present consumers, who are the source of considerable political pressure. Judges do, as we know, read newspapers. The more the debt load is pushed onto future consumers based on 20-30 year projections, the bigger the challenge to the Province's experts to satisfy a court that the reduction is based on sound economics and a realistic appraisal of the future value of the current electrical generation facilities. In short, the bigger the reduction in charges to current consumers, the greater the constitutional risk, in my opinion.

Conclusion

If it can be established that the underlying electricity generating assets have useful life-expectancies beyond the terms of their 20 year contracts, with the result that future consumers whose electricity needs require the existence of the electricity generating infrastructure put in place in the initial 1 to 20 year period, and who will benefit from the existence of that capacity, I believe a Court would, in those circumstances, conclude that the consumers in the 20 to 30 year period could constitutionally be required to share equitably and proportionately in the cost of financing the required assets.

The challenge, in my view, is not with establishing the legal principles. The problem will be to find leading experts to convincingly establish the necessary facts.

Ontario

I would be glad to expand on this analysis or respond to any questions.

Yours truly,

Hon. Ian Binnie, C.C., Q.C.

PROVIDING TARGETED AND EXPANDED RELIEF FOR RURAL, REMOTE, LOW-INCOME AND FIRST NATIONS CUSTOMERS

ISSUE

Ontario's Fair Hydro Plan would lower electricity bills by 25 per cent on average for all residential consumers in the province. The plan also provides additional relief for people with low incomes and those living in eligible rural communities.

These new measures will cost the government up to $2.5 billion over the next three years.

Reference: Chapter 2: Helping You and Your Family; Section [X]: Reducing the Cost of Living

KEY FACTS

- The Ontario Electricity Support Program (OESP) is an income-tested, application-based program that lowers electricity costs for the most vulnerable, providing a rebate directly on bills. The Province is working with the Ontario Energy Board on the Province's proposal to increase the OESP monthly benefit amounts by 50 per cent which will significantly enhance the benefit eligible consumers receive. The OESP would also become available to more Ontarians by introducing new eligibility categories.
    - To help OESP-eligible Ontarians receive their credits, the government is pursuing automatic qualifications for customers who are enrolled in other provincial social assistance programs.
- The Rural or Remote Electricity Rate Protection (RRRP) program currently provides a rate subsidy to eligible rural and remote residential customers who face higher distribution costs compared to those in urban areas.
    - The Province intends to expand the RRRP to provide distribution delivery charge relief to a total of about 800,000 customers served by local distribution companies (LDCs) with the highest rates, including Hydro One R2 and R1 rate classes (residential low and medium density areas, respectively), Northern Ontario Wires Inc., Lakeland Power Distribution Ltd. (Parry Sound service territory), Chapleau Public Utilities Corporation, Sioux Lookout Hydro Electric Inc., InnPower Corporation, Atikokan Hydro Inc. and Algoma Power Inc.
- The Province is planning to introduce legislation that, if passed, would enable a First Nations On-Reserve Delivery Credit that would eliminate delivery charges for eligible households, saving them an average of about $1,020 per year.
- The Province has established an Affordability Fund to provide to provide support to Ontarians who do not qualify for low-income conservation programs so that they can adopt energy efficiency improvements to help reduce their future electricity bills. The fund was developed with input from electricity distributors and other stakeholders.

BACKGROUND

Ontario Electricity Support Program

- On April 23, 2014, the Minister of Energy requested that the Ontario Energy Board (OEB) provide options for the design, development and implementation of a long-term, rate-payer funded program, which is intended to provide qualifying low-income electricity consumers with a credit on their electricity bills. On March 26, 2015, the Ministry of Energy announced that it was proposing to launch the Ontario Electricity Support Program (OESP), which would provide an ongoing credit directly on the bills of eligible low-income customers. In late October 2015, the OESP began accepting applications.

- On March 2, 2017, the Ministry of Energy announced that the government would be increasing the available credits under the OESP by 50 per cent. It was also announced that OESP would now be funded by the government instead of by ratepayers.

Proposed Credit

- Ontario is increasing the OESP by 50 per cent, meaning that single, low-income consumers who receive the lowest credit amount would get an increase from $30 to $45 per month ($540 per year, an increase of $180), and the lowest credit for the enhanced scale would increase from $45 to $68 ($816 per year, an increase of $276).

- The higher credits resulting from the announced 50 per cent increase would be refined in consultation with the Ontario Energy Board. The tables below show the current monthly credits.

Current OESP Monthly Credit Amounts

Stepped sliding scale - benefit level		**Household size**						
		1 person	**2 persons**	**3 persons**	**4 persons**	**5 persons**	**6 persons**	**7+ persons**
Income bracket	**< $28,000**	$30	$30	$34	$38	$42	$50	$50
	$28,001 - $39,000	-	-	$30	$34	$38	$42	$50
	$39,001 - $48,000	-	-	-	-	$30	$34	$38
	$48,001 - $52,000	-	-	-	-	-	-	$30

- The OESP offers a larger credit to consumers whose homes are electrically heated, and those who rely on certain medical devices. Eligible First Nation and Métis households also qualify for a larger credit. The credit for those receiving a larger reduction is between $45 and $75 a month. The household income amounts listed in the table below are after tax, or net income.

Current OESP Monthly Credit Amounts – Energy Intensive

Stepped sliding scale - benefit level		Household size						
		1 person	2 persons	3 persons	4 persons	5 persons	6 persons	7+ persons
Income bracket	< $28,000	$45	$45	$50	$55	$60	$75	$75
	$28,001 - $39,000	-	-	$45	$50	$55	$60	$75
	$39,001 - $48,000	-	-	-	-	$45	$50	$55
	$48,001 - $52,000	-	-	-	-	-	-	$45

- The program is available to low-income customers who have accounts with electric utilities, unit sub-meter providers and retail energy companies.

- Customers must apply to the program online or through a designated intake agency. Ontarians requiring assistance with the application process would be supported by local social agency partners. A tailored communications and application process has been developed to support First Nation communities.
  - The Province is exploring automatic qualification for customers who are enrolled in other provincial low-income social programs

- Most eligible customers need to re-apply every two years or whenever their personal circumstances change. For example, eligible customers would need to re-apply if they move or experience a change in income level. An extended program eligibility period of five years is applicable for any account holder aged 65 and over, or those receiving a Canada Pension Plan disability pension.

- Ontario's Fair Hydro Plan announced that starting this summer, OESP will be funded by the government instead of ratepayers.
  - Currently, OESP is ratepayer funded through a per kilowatt hour charge on electricity bills. The charge is currently set at $0.0011 per kilowatt hour.

Rural or Remote Rate Protection

- Rural or Remote Rate Protection (RRRP) is a rate subsidy provided to rural or remote residential customers because the cost of distributing power to rural and remote areas is much higher than for urban areas.

- The RRRP is currently provided to approximately 350,000 rural residential customers in Ontario.
  - On January 1, 2017, the annual funding cap for RRRP was increased from $127 million to $243.4 million. This increase was announced during the speech from the Throne on September 12, 2016.
  - Currently, the RRRP program cost is recovered from all electricity customers in the province through a volumetric charge as required by O. Reg. 442/01, under the *Ontario Energy Board Act, 1998*.
  - The RRRP charge for 2017 is 0.21 cents per kilowatt hour, increasing from the 2016 charge of 0.13 cents per kilowatt hour.

- As part of the Fair Hydro Plan, the Province announced that it will expand the RRRP to provide distribution charge relief to additional customers served by LDCs with the highest rates. About 800,000 customers in total would benefit from the enhanced RRRP program.
    - LDCs that could benefit from the expanded RRRP include: Hydro One R2 and R1 customers, Northern Ontario Wires, Lakeland Parry Sound, Chapleau, Sioux lookout, InnPower, Atikokan and Algoma. The benefits would differ from LDC to LDC. Credit amounts would be set using the lowest cost distribution LDC from the group, as set by the Ontario Energy Board (OEB).

- Ontario's Fair Hydro Plan also announced that starting this summer, the Province would move to fund RRRP costs through the tax base.

First Nations On-Reserve Delivery Credit

- In 2016, the Ontario Energy Board (OEB) engaged with First Nations, including remote communities, the distributors serving them, and consumer groups such as the Low Income Energy Network.

- Following the engagement process the OEB recommended:
    - Eliminating the delivery charge for all on-reserve First Nations residential customers and removing the monthly service charge for customers of licensed distributors which charge a bundled rate. The OEB estimates this would provide residential customers an average monthly benefit of $85.
    - Automatically qualifying on-reserve First Nations residential customers (approximately 21,500 customers).
    - Enabling greater information sharing between distributors and Band Councils to identify all on-reserve First Nations customers.

- The Province is also moving forward in having the First Nations On-Reserve Delivery Credit funded by provincial revenues.

Affordability Fund

- As part of the Fair Hydro Plan, the Province also announced that it will launch a new Affordability Fund. The Affordability Fund will assist electricity customers who cannot qualify for low-income conservation programs.
    - The Affordability Fund will provide LDCs with an additional tool to help customers in need. LDCs would use the Fund to provide support to customers for energy efficiency improvements to help reduce their future electricity bills.

- The Province will work with Hydro One, in consultation with all other LDCs, to establish a Trust to serve as the administrator of the Affordability Fund.

- The Province will pay for the Affordability Fund through provincial revenues. No legislative amendments are required for this fund.

Subject: Edits from Bevan

Hey Ron and Alana,

Please see below some notes/edits from Bevan. Is it possible to incorporate the first three edits for Monday's sign off?

Also we're expecting PO to get back to us on the name for KidsPharma as well as providing further language /detail on the Basic Income sites and the pilot project itself. I'll touch base with you guys as soon as I know more. We've been clear we need them to follow up by Monday morning.

Happy to discuss!

Cheers,

Kelsey

1 - On page 5 of Chapter 2 for the Fair Hydro Plan:

It currently reads: the reduction in the GA charge would be about

2.5B per year on average over the first ten years.

This is factually true but is not how we are presenting this (and I realise it is not as written about costs) as it might imply the cost is an additional 25B for the first and the following ten years which is not true for example. So we use 25B as total cost over x years. Or something like that. We had aproved language.

2 - On pg 16 of CH2- attached to charts of new osap examples

Can the osap calculator url be added

3 - A question related to Section B - Finances and Econ outlook, page 3 - Ontario's level of Accumulated Deficit as per cent of gdp.

Are there other jurisdictions, national or subnational (of a certain size) that use this measure as their overall deficit? Ie do not have to include capital debt expense. Top subnational etc, which we need (and already have) a full response to.

(this one is anticipating what the primary critique will be of our fiscal plan and trying to proactively defend our record...if we don't have time to incorporate it, we can look to include info into our comms materials).

Sent from my BlackBerry 10 smartphone on the Rogers network.

CONFIDENTAL **April 18, 2017**

Ontario Power Generation

Issue: OPG has indicated that for the Trust to be consolidated into OPG there is a need to have at least 51% of the debt financing of the Trust originate directly from the external market. This requirement is supported by specific technical guidance on the topic as set out below.

IFRS 10 – Consolidated Financial Statements requires an investor to consider whether there are other parties who are acting on behalf of the investor by virtue of their relationship with it. That is, IFRS 10 requires consideration of whether the other parties (i.e. OPG) are acting as de facto agents for the investor (i.e. Province). If OPG is considered a de facto agent, the consolidation accounting objective will **not** be met.

There are a series of references in IFRS 10 (Section B75) that support this conclusion. Each of these elements must be examined in their totality to successfully address the consolidation principal of the Trust. The importance of each element is amplified due to the fact that OPG is a related party to the Province, which increases the importance of other tests being met. These tests include:

a) a party that received its interest in the investee as a contribution or loan from the investor.
OPG will receive a 44% equity injection from the Province of Ontario, indirectly through the Ontario Financing Authority. Given that currently, the majority (currently 51%) of the Trust debt will be from External Markets and not the Province, it can be argued that OPG did not receive the majority of its interest in the investee as a contribution or loan from the Province. This criterion is not met and shows that OPG is a principal, not a de-facto agent.

b) a party that has agreed not to sell, transfer or encumber its interests in the investee without the investor's prior approval
There is a proposed clause that the Trust cannot be wound up without approval from the Minister of Energy, this criterion is met.

c) a party that cannot finance its operations without subordinated financial support from the investor.
OPG can finance its operations without subordinated financial support from the Province – criterion is not met.

d) an investee for which the majority of the members of its governing body or for which its key management personnel are the same as those of the investor.
OPG is a related party of the Province of Ontario, therefore this criterion is met.

e) a party that has a close business relationship with the investor, such as the relationship between a professional service provider and one of its significant clients.
OPG is a related party of the Province of Ontario, therefore this criterion is met.

Given the number of factors met above, there may be a view that OPG could be considered a de facto agent of the Province through its related party relationship (4 out of 6 items are met). It is of vital importance, and as concurred by EY, that the majority of the debt in the Trust is not more than 44% funded by the Province (note that the remaining 5% of debt has to be funded externally by OPG in order to show that OPG has equity that is not sourced from the Province at risk). If the debt in the Trust is seen by the External Auditors as being principally funded by the Province, OPG would fail 5 out of 6 criteria above and be considered a de facto agent. As a result, proposed consolidation accounting would fail.

E: Hilary.cox@ontario.ca

A proposal to create Legislation.

Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

ELECTRICITY ACT, 1998

1. (1) Section 1 of the *Electricity Act, 1998* would be amended by adding the following clause:

[Note: GGRA provisions have been removed for now. Please confirm if they should be re-inserted.]

(2) Clause 1 (f) of the Act would be struck out and the following substituted:

(f) to protect the interests of consumers with respect to the adequacy, reliability and quality of electricity service;

(f.1) to protect the interests of consumers with respect to the prices they pay for electricity, including protection of those interests through the Hydro financing initiative;

[Note: Since the Hydro financing initiative is a defined term and is clearly required to be implemented under the new substantive provisions of the Act, I'm still not sure why this needs to be addressed in the purpose clause. However, I have included a purpose provision as per your instructions.]

Article 1 – Purpose

The proposed new legislation will likely include a large number of provisions intended to support the "financeability" of the structure. As a result, it may make sense for (LSB is exploring the potential) the Bill to create a new stand-alone energy statute, much like the *Green Energy and Green Economy Act, 2009* created the *Green Energy Act, 2009*.

The new legislation would have a purpose clause that explains the objective of intergenerational fairness. This would be useful for the markets to see, and may

Confidential Draft

help support the validity of the legislation from a constitutional law perspective (charge vs. tax)

x. Subsection 2 (1) of the Act would be amended by adding the following definitions:

"Financing Entity" means the trust established by Ontario Power Generation Inc. under clause XX (a) or the entity prescribed for the purposes of clause XX (b); ("French")

"hydro financing initiative" means those policies of the Government of Ontario related to its decision to ensure costs to Ontario electricity consumers are allocated fairly over time, taking into account the useful life of new sources of and technologies for electricity; ("French")

[Note: I have applied the precedent of the "smart metering initiative" as per your instructions. Just want to reiterate my concern that the reference to government policies is really vague (which initiative/ policies? At which point in time?) and I think this could cause lots of confusion, particularly if the policies evolve over time. It could also have unintended consequences.]

[Note: To consider -- by describing the initiative as we have in the above definition, we are potentially linking the deferred amount to amounts that would otherwise be paid for by consumers as part of the GA. If the deferred amounts are not all about "the useful life of new sources and technologies" then the description of the initiative should likely be broadened. (For example, if some of the deferred amount may be used to cover high wholesale prices, one could argue that the initiative is NOT about allocating costs fairly over time… it's just about pushing the cost increase to future consumers without considering what is "fair" across the generations.]

Article 2 - Definitions

The new legislation will include many new defined terms. One important term will be "Funding Shortfall" (or equivalent wording). This will be the net reduction in cash flows to IESO as a result of the reallocation of a portion of the Global Adjustment to later periods of time. Currently, the "Funding Shortfall" would be limited to the Global Adjustment attributable to the procurement contracts, but this is a question that still has to be settled.

Another important defined term that is worth noting is "Replacement Event". This is an event under which the market would want to replace a person who has responsibility to take essential actions under the program (including LDCs, IESO and OPG), like invoicing and collecting amounts.

Confidential Draft

The triggering events are likely to include insolvency and breach of duty/obligation.

Another key defined term is "Transition Charge". This is the amount that will be calculated and applied to the "deferral consumers", based on the amounts of payments due under funding obligations incurred to cover the funding shortfall (i.e., what we have until now been calling "deferral repayments").

Another important defined term will be "Treasury Plan". This will be the written plan prepared by OPG relating to the sale of the "regulatory asset(s)" to the OPG Financing Entity (sometimes previously referred to as the "Financing Trust") and the debt issued by the OPG Financing Entity to the markets.

Another defined term will be "True-up Amount". This is a key provision for the market. It allows for a catch-up for estimate/actual adjustments and to address consumer non-payment credit losses.

A further defined term will be "Undertaking of the Province". This will be a promise by the Government not to impair the program. This will be expected by the market, even though it will be understood that there may be issues for investors to enforce the promise, or get damages if there is a breach.

x. (1) Subsection 6 (1) of the Act would be amended by adding the following clauses:

(q.1) to enter into agreements or arrangements with the Financing Entity;

(q.2) to engage in activities related to making payments to and receiving payments from the Financing Entity under Part V.2, as required under this Act, and to engage in related settlement activities;

Note: Is some of this covered already by clause (i)? Could we address this by expanding upon clause (i)? Trying to understand whether there is any potential overlap.]

(q.3) to engage in activities related to the [sale/disposition/conveyance/assignment] of the [right/regulatory asset] created under section XX, which activities may include,

[Note: As discussed, please confirm terminology.]

(i) incurring liabilities in relation to the [right/asset];

Confidential Draft

(ii) [selling/assigning/disposing of?] the [right/asset] to the Financing Entity;

(iii) assigning [the right/asset] to third parties;

[Note: I don't understand (iii) -- I thought the rights to the asset were being assigned to the trust and nobody else?]

(q.4) acting as a recovery agent for the Financing Entity in relation to [the right/asset];

x. (1) Subsections 25.33 (1) and (2) of the Act would be repealed and the following substituted [TBD].

[Note: As per our telephone discussion today (March 27), there seems to be ongoing debate about the policy direction:

1. Do you want to amend the GAM so that the money received from the FE and the money recovered by the FE are part of the initial GA calculation?

2. Do you want to leave the GAM section as is and add a requirement (in a new section) for the IESO to conduct additional adjustments for a subset of the payments referred to in s. 25.33? This second adjustment would be engaged in after the existing GAM is calculated. So it would be a further adjustment of what has already been adjusted under the GAM.

Until this fundamental question is answered, we would be removing the proposed amendments to s. 25.33.]

OPTION 2:

Deferral adjustments, 25.33 amounts.

25.33.2 (0.1) For the purposes of this section and sections 25.34 and 25.35,

(a) "authorized entity" means **[the hydro financing trust established by Ontario Power Generation Inc. for the sole purpose of financing the recovery of the balance in the deferral account, or]** such **[other]** entity as may be prescribed by regulation;

(b) "deferral account" means the deferral account established under section 25.34;

(c) "deferral amount" means the amount recorded in the deferral account for each month during the deferral and recovery period;

(d) "deferral and recovery period" means the period from May 1, 2017 to April 30, 2047;

(e) "deferral consumer" means a consumer who is a member of a class of consumers prescribed by the regulations for the purposes of sections 25.34 and 25.35;

Confidential Draft

[NTD: This will be set out in a new subection 4(3) of O. Reg. 95/05 and will reflect OREC-eligible consumers other than non-grid connected customers of IPAs (who would not pay a GA charge anyway). Note that this is not quite the same as "RPP-eligible" consumers.]

(f) "electricity supply cost" means the amount calculated according to the formula:

(A + B + C + D) - E

where,

A is the amounts paid by the IESO to generators, the Financial Corporation and distributors, whether the amounts are determined under the market rules or under section 78.1, 78.2 or 78.5 of the *Ontario Energy Board Act, 1998,*

B is the amounts paid by the IESO to entities with whom the IESO has a procurement contract, as determined under the procurement contract,

[NTD: A and B use exactly the same wording as is set out in (a) and (b) of the existing ss. 25.33(1).]

C is

[NTD: C is the "net new" costs associated with the GA deferral. These are costs that the IESO will record in the GA deferral account established under s. 25.34, and that the IESO (or its assignee) will subsequently recover. These costs consist of the interest and financing-related admin costs associated with the GA deferral (which costs will be flowed through from the hydro financing trust to the IESO). These costs do not include the principal amount deferred and recovered, since that is already captured as part of A and B.

The "net new" costs in C will be recoverable solely from a newly prescribed class of consumers - deferral consumers (i.e. those consumers who will benefit from the GA deferral). The rules for the recovery of these costs will be part of a new subsection 4(3) of the RPP Regulation.]

D is any other amounts that may be prescribed by regulation,

[NTD: Paragraph D would give us flexibility to add new cost categories by reg. if/as needed now or later.]

[GGRA-related amendments are removed for the time-being]

and

E is any other amounts that may be prescribed by regulation;

[NTD: Paragraph E would give us flexibility to add new cost categories by reg.

Question for leg counsel: If in the future HOEP were to exceed contract prices and/or regulated rates, presumably the formula would still work (i.e. in such case the amounts for A and B would simply be negative amounts)?] *[ntd-LSB: IESO appears to agree with that idea, based on our shared appreciation of how EA s.25.33 works today.]*

(f) "reduction period" means the period commencing May 1, 2017 and ending April 30, 2018;

(g) "RPP Regulation" means Ontario Regulation 95/05 (Classes of Consumers and Determination of Rates).

Electricity pricing adjustments

Adjustments by IESO

(1) The IESO shall, through its billing and settlement systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of market participants in Ontario as are prescribed by regulation, reflect the electricity supply cost.

Adjustments by distributors and retailers

(2) Distributors and retailers shall, through their billing systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of consumers in Ontario as are prescribed by regulation, reflect the electricity supply cost.

[NTD: There will be two "classes of consumers in Ontario that are prescribed" for the purposes of RPP-"plus" deferral – the EA regulation that "prescribes" these two classes will refer to (or be aligned with) the two classes as described in the RPP Regulation. 1) The first class are the deferral consumers (see definition above), and 2) the second class (or defined base consumer) will be the "proxy" Toronto Hydro consumer whose bill will only be allowed to increase year-over-year according to rules prescribed in a new s. 6.1 of the RPP Regulation.]

Variance accounts

(3) The IESO shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by it under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation. *[ntd-DAN: I left "this section"*

even though this provision is part of a new s.25.33.2 – did you want "this section" to refer to "section 25.33"? If so, then we'd add this to the list we've started referencing proposed new s.25.34 and s.25.35. Consider.]

[Drafting note: We can prescribe the different variance accounts that must be maintained, and the different amounts that must be tracked and accounted for, by the IESO. Among other things, the IESO will presumably need to establish variance accounts related to the GA deferral and payback, to take into account timing and other differences. Any financing costs associated with these variance accounts (over and above the financing costs passed through to the IESO by the authorized entity (the hydro financing trust) would be subject to Board scrutiny.]

Same, distributors and retailers

(4) Distributors and retailers shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by them under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation.

x. The Act would be amended by adding the following sections:

Deferral account

25.34 (1) The IESO shall establish a deferral account to record, for each month during the reduction period and the deferral and recovery period, the difference between,

(a) the amounts that would be payable by deferral consumers in respect of the electricity supply cost for the month under section 6.1 of the RPP Regulation; and

(b) the amounts payable by deferral consumers in respect of the electricity supply cost for the month under section 6.2 of the RPP Regulation.

[NTD: IESO to confirm whether the differences between (a) and (b) would be recorded monthly.

Explanatory note: The Board will determine a rate under a new s. 6.1 of the RPP Regulation that will essentially follow the same process the Board uses to establish the RPP rate, except that it will establish a rate for the deferral consumers (which is a slightly broader class than RPP consumers). The Board will also determine a "proxy" rate for the deferral consumers, calculated according to a different set of rules set out in a new s. 6.2 of the RPP Regulation. The rules in s. 6.2 will establish the "proxy" rate for a "proxy" Toronto Hydro customer consuming an average of 750 kWh/mth, to achieve an all-in tax-included total bill amount reduction of approximately 17% (the bill reduction for GA deferral + 8% OREC will result in an all-in bill reduction for May 1, 2017 – April 30, 2018 of 25% over the May 1, 2016 – April 30, 2017 period). There will be

additional rules dealing with bill increases and full repayment of the GA deferral by April 30, 2047.]

Note that because we refer to the new provisions in the RPP Regulation, we will need to amend that regulation *before* the introduction of the proposed legislative amendments. Drafting of the proposed RPP Regulation amendments is underway.

Do we need to create a parallel provision requiring distributors and retailers to establish deferral accounts as well?]

(2) The IESO shall record interest on the balance of the deferral account at a rate or rates reflecting the costs incurred by the IESO, or by any assignee under section 25.35, to finance the amounts recorded in the deferral account.

(3) The IESO shall also record in the deferral account the costs incurred by the IESO to finance the amounts recorded in the deferral account.

[NTD: This is a placeholder for what we will need here. The concept is that ss. (2) and (3) will ultimately apply to the interest and admin costs incurred by the hydro financing trust (assignee of the right of recovery under s. 25.35) in providing funds to the IESO to finance the GA deferral. Those interest costs and admin costs will be fully recoverable through section 25.35, subject to Board scrutiny presumably limited to verifying the calculations. This is not intended to address interest and costs incurred by the IESO and recorded in the variance accounts established under ss. 25.33(5).]

Recovery of GA deferral amounts

25.35 (1) The IESO shall have the right to fully recover the balance recorded in the deferral account. **[The Board shall authorize?]** recovery of the balance from the deferral consumers over the deferral recovery period in accordance with the prescribed rules.

[NTD: What role should the Board play in determining the amounts recovered each year (within the smoothing parameters that are prescribed)? For e.g., could the Board set rates such that the year-over-year increase in the proxy Toronto Hydro customer's all-in bill was less than the maximum permitted under the prescribed rules?

The prescribed rules will be set out in the new s. 6.2 of the RPP Regulation, which will determine how much the "proxy" Toronto Hydro customer's monthly average bill can increase year-over-year (after the reduction period). Basically, for the first four years after the reduction period, the increase will be limited to CPI. For the balance of the deferral and recovery period, the increases will be limited to 10%, with an overarching requirement that the deferral amounts be fully repaid by April 30, 2047.]

Assignment of right of recovery

(2) The IESO shall have the right to assign**[, in whole or in part?,]** to **[one or more?]** authorized entities, the IESO's rights under subsection (1).

[NTD: This is largely a placeholder for what needs to be addressed here. We will need to determine how to characterize this transaction. For e.g., will it be an outright assignment? Will it be a series of assignments? Should it be characterized as a "sale"? How will this transaction be implemented – e.g. by way of a contract between the IESO and the Trust? We will need the input of external counsel and others to ensure that it adequately supports the contemplated financings.]

Payments to assignee

(3) In the event of an assignment to an authorized entity under subsection (2), the IESO shall, through its billing and settlement systems, make payments to the authorized entity of the full amounts paid to the IESO in respect of the rights assigned.

[NTD: This is largely a placeholder for what needs to be addressed here. Iin addition to requiring IESO to make payments to the authorized entity, do we need to include explicit provisions giving the assignee the right to recover the amounts in the deferral account that are covered by the assignment?

We will need provisions dealing with billing and payment as between the authorized entity and IESO. We will also have to decide whether the interest and admin costs incurred by the authorized entity will simply be passed through to IESO, or whether the authorized entity (or OPG) will have an opportunity to keep any profits made on financing activities (swaps, etc.) by establishing some sort of "reference rate" that IESO would have to pay (and that might be different than the rate(s) the authorized entity would have to pay). A middle ground that could be considered would be to cap the amount of profits the authorized entity (or OPG) could make.

Along similar lines, the amounts charged by OPG to the authorized entity to provide admin services should be subject to Board review (e.g. for reasonableness). This would not jeopardize the ability of the authorized entity to recover all of its costs (since it would affect the amounts OPG could recover from the authorized entity).

We also need to contemplate a provision that if there is a change of law by the Government of Ontario that materially adversely affects the ability of the authorized entity to fully recover the assigned deferral account amounts, then repayment of those amounts will be accelerated and become immediately due and payable.]

x. The Act would be amended by adding the following provisions after s.29:

Transition Charges -- Ratepayer Obligation to Pay a Transition Charge

s.29.0.1 (1) Each consumer in the class of ratepayers to which this program applies (previously referred to as the "deferral consumers") will have a direct statutory obligation to the OPG Financing Entity to pay its share of the deferral repayments (principal, interest, financing costs).

Indebtedness of Ratepayers –
(2) This will be a debt owed by the consumer directly to the OPG Financing Entity. If it is not paid, the OPG Financing Entity can sue the consumer directly through the agreed procedures. This is identifying an explicit and identifiable revenue stream for the comfort of investors.

Separate tracking - distributors,
(3) This debt is separate from the debt owed by the consumer to its LDC, although the LDC will be the collection agent.

No set-off, etc. *[see similar provision at EA s.29.0.3(2)]*
(4) This debt cannot be netted out against any amount owed by the LDC to the consumer (e.g. year-end credit to consumer on equal monthly billing).

Allocation of Ratepayer Payments
(5) If a consumer pays less than its total invoiced amount, the payment will be allocated pro rata between the deferral repayment and the amounts owing to the LDC.

Transition Charges are Irrevocable

(6). This is intended to prohibit any reversal of amounts that must be paid to meet the terms and conditions of the funding obligations to be incurred under the program.

> **The deferral repayments are due regardless of whether a financing obligation incurred under the treasury plan is consistent with government policy at the time a related payment obligation arises.**
>
> **If the Fair Allocation Plan is amended after a funding obligation is properly incurred, any inconsistency in the payment profile will not impair the existing funding obligation or the pass-through of related payment amounts as Transition Charges.**

Anti-avoidance; No-by-pass

Confidential Draft

(7) The idea here tracks the U.S. transactions, which say that the obligation of a consumer to pay Transition Charges cannot be "by-passed". If a consumer leaves the grid, he or she will still be obligated. See the highlighted text in the definition of "Ratepayer" for a sense of how this may be accomplished.

> **This concept is a key to a rated market financing and will need to be developed further.**
>
> **For example, self-generating customers could be charged a flat fee (for example, equal to the amount that would be payable by the "representative" Toronto Hydro customer that underpins the current government policy on the 25% or some other basis.)**

Distributor, agent for Financing Entity,
s.29.0.2(1) LDC is agent for the OPG Financing Entity. LDC must invoice the deferral consumer the deferral repayment amount - referable to the items described in "Finance Amount" (i.e., an amount already borrowed).

IESO - Calculation of the Period Transition Charge

(2) IESO will calculate the total amount of deferral financing that will be repayable in an applicable [e.g. 6 month] period.

(3) IESO will then determine the deferral repayments due from deferral consumers based on a prescribed methodology for allocating payments to individual deferral consumers.

Notice of Transition Charges, IESO to distributors

(4) IESO will then inform each LDC of the amount of the deferral repayments to be included in the invoices issued to each deferral consumer in the LDC's service territory.

Adjustments *[ntd: Consider – Deferral repayment amount final]*

(5) Deferral consumers cannot challenge the amount of the deferral repayment showing on their invoice unless there is a substantial calculation error.

Successors of Electricity Distributors –
(6) Any successor of an LDC will be bound by the same obligations as the original LDC re: billing and collecting deferral repayments.

Confidential Draft

Successors of IESO –

(7) Any successor of the IESO will be bound by the same obligations as the original IES re: billing and collecting deferral repayments from distributors *[ntd-LSB: what about from consumers?].*

Appointment of an Alternative Invoicing Agent *[NTD – this provision may be moved closer to the powers/authorities of the OPG financing entity.]*

(8) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect deferral repayments. The LDC must sign whatever agreements and assignments are needed to enable the replacement agent to collect the deferral repayments from the LDC's deferral consumers.

Regulatory Asset Owner has Standing

(9) The OPG Financing Entity (or investors through their security) will be able to sue LDCs for failing to properly calculate or invoice the financing repayments.

29.0.3 Collections and Remittances [Collecting and Remitting Deferral Repayments]

(1) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC or the IESO, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect and remit deferral repayments. The LDC (or IESO, as applicable) must sign whatever agreements and assignments are needed to enable the replacement agent to collect and remit the deferral repayments. "Replacement Events" are necessary to investors to safeguard against a person holding money in a distressed circumstance.

No Set-off, etc. *[see similar provision at EA s.29.0.1(3)]*

(2) The deferral repayments cannot be netted out against any amounts owed by the party responsible for collecting those repayments.

Sequestration,

(3) If any LDC or the IESO fails to remit deferral repayments, the OPG Financing Entity can get a court to order the LDC (or IESO, as applicable) to require them do so.

Confidential Draft

x. Subsection 53.1 (1) of the Act would be repealed and the following substituted:

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, the following:

[Note: I know that the words "in addition to any other objects" appears in the current provision, but it seems very odd. This suggests that the objects are unlimited, which doesn't seem to be the intention but I could be wrong.]

1. Owning and operating generation facilities.

2. Establishing, operating and supervising the activities of entities for the purposes of supporting and promoting the government's hydro financing initiative.

3. Providing financial and other support to the IESO in its activities in relation to the hydro financing initiative.

4. Engaging in such financing, borrowing, lending and related activities and transactions to support the IESO with short-term or long-term financing.

5. Providing equity, not exceeding the prescribed amount, to support the financing capacity of the Financing Entity.

Subsidiaries

(1.1) Ontario Power Generation Inc. may create one or more subsidiaries in order to more efficiently conduct its activities or achieve its objects.

x. Section 53.2 of the Act would be repealed and the following substituted:

Rights of the Minister[1]

53.2 (1) The Minister, on behalf of Her Majesty in right of Ontario, may acquire, hold, dispose of and otherwise deal with securities or debt obligations of, or any other interest in, Ontario Power Generation Inc. or any of its subsidiaries.

Confidential Draft

[1] FLS - this provision is based on s. 49 of the Act

Agreements

(2) The Minister, on behalf of Her Majesty in right of Ontario, may enter into any agreement or arrangement that the Minister considers necessary or incidental to the exercise of a power under subsection (1).

x. The Act would be amended by adding the following Part:

PART V.2
HYDRO FINANCING INITIATIVE

FAIR HYDRO FINANCING PLAN

Establishment and adoption of the Fair Allocation Plan

A. 1 (1) The Minister of Energy [may/shall] establish a "fair allocation plan"

(a) The purpose of the plan is generally to try and reallocate the portion of GA attributable to the procurement contracts over the anticipated useful life of the generation assets under those contracts.

- **This is the intergenerational funding of the Green Generation Initiaitves.**
- **One policy question is whether the amounts deferred and the period over which the deferred amounts are repaid are to be limited to the portion of GA attributable to the procurement contracts and to the anticipated useful life of the [renewable] generation assets under those contracts.**

- From a constitutional validity perspective (and hence a financeability perspective) these limits are very important.

-Financial/economic modelling to verify this link is required.

Principles and Parameters,

(2) Based on this initial description (which is only illustrative to advance the initial stakeholder discussion), the Minister would determine the details of the "fair allocation plan", but must take into consideration the following principles:

- **The deferred GA costs should be spread over a period not exceeding the anticipated remaining useful life of the generation assets under the procurement contracts**
- **The plan should specify the length of the "reference periods", to identify which deferral consumers are responsible for which deferral repayments**

Confidential Draft

- **The share of the deferral repayments to be allocated to deferral consumers in each "reference period" should reflect a reasonable assessment of the remaining anticipated useful life of the generation assets under procurement contracts and perhaps to the benefits received by those deferral consumers from the procurement contracts (e.g. transition off coal)]**

- **No deferral consumer group should bear an unreasonably disproportionate share of the deferral repayments. That could be limited to a maximum amount, determined on a formula basis, if it makes sense tot he stakeholders**

- **In making the allocations, real (i.e. inflation-adjusted) dollars should be usedThe fair allocation plan is made using forward-looking information and projections.**

- **If, after the fact, the Minister determines that a Ratepayer Group paid more than would otherwise would have been the case had the projections for such period been accurate or other considerations come to light, adjustments to the plan could be made.**

Attribution Methodology

(3) The program will need to define how deferral consumers will be allocated an appropriate share of aggregate adjustment amount.

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

(4) Consideration will be needed regarding the level of review and confirmation of the plan is needed or appropriate. For example, should the scope of review be limited to calculations only? If there is a need for review, then consideration will be needed as to who will be the reviewer and under what authority, etc.

THE TREASURY PLAN

Power to Prepare and Implement the Treasury Plan –

A.2 (1) The "Treasury Plan" will be prepared by OPG. It must follow the requirements set out in this Part. Accounting considerations will need to be factored into this delegation, as well as the degree of province input initially and on an on-

Confidential Draft

going basis. [Note for leg counsel: We will need to create the necessary sub-delegation authority]

Required Terms and Conditions of the Treasury Plan

(2) The Treasury Plan will establish the basis for OPG making funding decisions, which will need to align with the Fair Allocation Plan.

Power to Review and Approve the Treasury Plan

(3) The Minister may designate one or more persons to review, and require changes to the Treasury Plan. (This review could also be given to the Minister.) *[NTD-: Assumin no role for OEB – confirm. Any role for MOF/OFA here?]*

Obligation to Apply IESO Remittances,

(4) OPG will need to ensure that pass-through amounts, transferred to it as agent for the OPG Financing Entity, are only used to repay the debt and related costs.

Non-Recourse,

(5) The Treasury Plan will provide that the investors and other contracting parties will not have recourse to the IESO, LDCs, agents, the OEB or the Province, except where such parties fail to comply with applicable law. This may be modified in the contracts under which a financing arises.

> **NOTE: The documentation creating the Funding Obligations must expressly state that such obligations are not guaranteed by the Province.**
>
> **NOTE: See IESO/Stikeman's language for "Regulatory Asset" above.**

Incurrences are Binding,

(6) A failure to implement the Treasury Plan will not impair the pass-through of the deferral amounts or the validity of an otherwise valid funding obligation.

- **NOTE: Separate from the legislative provisions, we will also be preparing a very rough sketch of some of the items that might be included in the Treasury Plan direction.**
- **The sketch will be for illustration purposes only and will be for use in discussions with stakeholders including OPG and IESO.**

Crown bound, actions prohibited,

A.3 (1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – *[NTD: alternative* - Crown bound, prohibition against discriminatory action.

Confidential Draft

(2) The Province will be prohibited from taking or permitting any action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or collections.

Undertaking and Agreement

(3) Under this Undertaking, the Province will agree for the benefit the OPG Financing Entity that it will not impair the value of the Regulatory Asset or the Transition Charges imposed under this Part. This "pledge" is in line with market expectations. Enforcement issues arise in this sort of undertaking, which will be assessed by the market and rating agencies based on the likelihood that a failure by the Province would lead to a successful damages claim. Unlike in the U.S., the law regarding such a claim is uncertain. Nevertheless, we expect that this sort of Undertaking will be requested in the legislation itself (i.e., requiring an act of the legislature to disavow – which is a higher bar than simply walking away from a contractual undertaking.

[Note: TBD where to place this Part within the Act and how to structure this Part. Temporary number (e.g. A1, A2, A3 etc.) has been used for now.]

FINANCING ENTITY

Financing Entity, established or prescribed

A1. (1) For the purpose of accomplishing the hydro financing initiative, the Minister may,

(a) direct Ontario Power Generation Inc. to establish and operate a trust; or

(b) direct Ontario Power Generation Inc. to [oversee? Administer?] an entity prescribed by the regulations.

[Note: Would the direction of the Minister include any additional instructions re timing etc.?]

Duty of Ontario Power Generation Inc.

(2) Ontario Power Generation Inc. shall comply with the direction of the Minister.

[Note: Once OPG takes action under A1 in accordance with the Minister's direction, what happens if at some point in the future, the Minister wants a different entity to take over the role of the FE? Is this a concern that needs to be addressed?]

Confidential Draft

Object of Financing Entity

A2. (1) The object of the Financing Entity is to finance the amounts required to accomplish the hydro financing initiative.

[Note: We are imposing several obligations on the Financing Entity (FE). As a practical matter, how will these obligations be enforced? Who will be responsible for meeting these obligations? (e.g. would there be directors or officers of the trust?). Or will the OPG be responsible for meeting these obligations as the body that establishes/manages the trust or oversees the designated entity?]

Activities

(2) To achieve the object, the Financing Entity shall engage in the following activities:

[Note: Just want to confirm that this should be "shall" and not "may".]

1. Borrowing funds from the Financial Corporation or from such other persons or entities [as may be prescribed?].

2. Investing funds.

3. Making payments and loans to the IESO or such other entity as may be prescribed in accordance with the regulations [or an order of the Board].

[Note: I think it would be best to specify whether the rules would be set out in a reg or in a Board order to avoid confusion.]

[Note: Should the "loans" language be removed, since you noted that the IESO is not "borrowing" from the FE?]

4. Receiving payments from the IESO or such other person or entity as may be prescribed in accordance with the regulations.

5. Issuing securities or debt ***[in the manner prescribed?].***

6. Engaging in any activities, including entering into such transactions, agreements or arrangements as may be prescribed and in accordance with the regulations.

Board review of expenditures, etc.

A3. (1) The Financing Entity shall, at least 60 days after the end of each fiscal year, submit its expenditures relating to its operations for the fiscal year including the expenses it has charged to Ontario Power Generation Inc. or the IESO, or that it has been charged by the Financial Corporation, in relation to those operations, to the Board for review.

Confidential Draft

[Note: The list of items that have to be reported on could be more prescriptive (e.g. specifying specific amounts to be set out) or it could also allow for the Board to specify what it wants to see in the report. Let me know if you'd like to adjust the wording of the requirement.]

Board recommendations, etc.

(2) The Board may review the expenditures and charges referred to in subsection (1) and make recommendations to the Financing Entity as are appropriate in order to ensure the most efficient operation and management of the Financing Entity in order to protect consumers.

[Note: Rather than saying "in order to protect consumers", should this say "in order to achieve the object of the FE"? Or perhaps this could just be deleted altogether with no need for replacement language.]

Deemed assets, entity,

A4. Despite any other provision of this Act or the *Business Corporations Act*, the assets and liabilities which are resident in and form part of the property of the Financing Entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries for any purpose.

[Note: You posed a question about excluding an OPG subsidiary from this rule. Please instruct.]

OBTAINING FINANCING

[Note: It will be important to read all of the provisions that follow against the provisions in the existing Act, to ensure there is no overlap/confusion being created due to potential interactions between existing authority and new authority. The drafting focus so far has just been to get the relevant substantive provisions into the draft without evaluating how they fit into the broader scheme of the Act.]

Ontario Power Generation Inc. to obtain financing

A5. (1) The IESO may direct Ontario Power Generation Inc. to cause the Financing Entity to engage in any of the following activities in order to accomplish the hydro financing initiative:

[Note: As a practical matter, how would OPG "cause the FE" to do these things? How is this different from "directing"?]

1. Financing, borrowing or lending to provide the IESO with short-term or long-term financing.

2. [Purchasing/receiving/obtaining the right created under section XX] and making any payments to the IESO that relate to the IESO's activities in support of the hydro financing initiative.

Confidential Draft

[Note: Not sure if the regulated assets would always be "purchased" or if other terminology might be needed. Please advise.]

3. Collecting from the IESO amounts that the IESO is required to pay in relation to its activities in support of the hydro financing initiative.

4. Assigning its [the IESO's?] rights to all or part of the regulatory assets established under section XXXX.

[Note: What is para. 4 about? If this is about forcing OPG to make the FE do things, then does this belong in the list? I thought that it was only the IESO that would be assigning the rights to the FE]

5. Such other activities as may be prescribed.

Same

(2) Ontario Power Generation Inc. shall comply with a direction under subsection (1) within the time specified in the direction [and any prescribed rules?].

IESO to enter into transactions

A6. (1) The IESO shall, in order to support the achievement of the hydro financing initiative, enter into transactions with the Financing Entity or any other entity for such amounts as are necessary to support the hydro financing initiative.

[Note: My understanding is that the need for "or any other entity" stems from the need to allow for the IESO to obtain temporary financing in the immediate term, before it is able to access the FE. Do you want to narrow this so that the IESO is only authorized to do this before the FE is up and running? Or do you want to keep it available on an ongoing basis?]

Same

(2) In entering into transactions under subsection (1), the IESO shall comply with the regulations.

RIGHT OF RECOVERY [CREATION OF REGULATORY ASSET]

[Note re the following provisions:
I found a provision dealing with the concept of "regulatory asset" in Bill 210 from 2002 (see s. 79.13 of the OEBA). It deems certain things to be regulatory assets but does not say much more. On the phone, you noted that the term "regulatory asset" does not have any legal meaning on its own but is just an accounting term that has been used to describe the statutorily created right of recovery. However, you also said that there may be a need to use this term in order to convey the intended meaning from an accounting perspective.

Confidential Draft

In order to ensure that the drafting captures the policy intent, please answer/address the following questions:

1. Should we be creating a statutory right of recovery or deeming certain amounts to be a regulatory asset? [NTD-LSB: Yes. The term "Regulatory Asset" has currency in commercial law (parliance) and since much of what we're doing is to support a securitization model, the term should remain for now. Further, the term "regulatory asset" was consistently referred to in the documents provided to ENERGY LSB by Blakes. Further, IESO/Stikemans offered up alternative language for the creation of a "regulatory asset" (as an intangible asset of sorts). You said you'd consult on whether the regulatory asset terminology is important to flag in the Bill.

2. You said you're not sure whether or not the Act will require the IESO to sell/assign the right. Please instruct. If it is optional for the IESO to sell/assign, then it seems that the right could in theory remain with the IESO (unless you are saying that the statute can just create the right of the FE to recover without any need for the right to be assigned/sold by the IESO… in which case please explain why we need to deal with the sale/assignment at all). Please clarify.

3. I'm assuming that if we are creating a right, then the right must be held by someone (e.g. the IESO) before it can be assigned/sold? So should the right be created in the Act for the IESO (e.g. the IESO has a right to recover the amounts from distributors and prescribed consumers) since the IESO would then sell/assign/transfer the right to the FE? The FE must also have the right to recover from the IESO itself, so that creates an extra complication.

4. Should there be some indication of when the right of recovery/regulatory assets will no longer continue to exist (e.g. once all of the amounts have been paid?). I notice that your instructions below about the debt indicate that the debt is no longer owing once the amounts are paid, but do we need to indicate that the regulatory asset also ceases to exist at that point?

Right of recovery created

A7. A right to recover the following amounts in full from the IESO, distributors and prescribed consumers is created.

1. The [deferred amount].

2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.

[Note: How will the Board be approving these costs? Is this related to the expenditure report submitted to the Board? That provision dealing with Board expenditures doesn't refer to any approval taking place… just a review and recommendations.]

Confidential Draft

[Note: Need to mention expenditures?]

3. Other amounts as may be prescribed or as may be approved by the Board.

Note: Are you going to be saying anything about how the interest will be calculated?

Sale [and/or?] assignment of [right? Regulatory assets?]

A8. (1) The IESO [may? Shall?], in accordance with the regulations, sell [and/or?] convey to the Financing Entity the right to recovery created established under section A7 on such terms and conditions as are provided for by the Financing Entity.

[Note: Your instructions include the terms "sell", "assign" and "convey" -- which are correct?]

[Note: Your instructions suggested that something other than the "regulatory assets" may need to be assigned to the FE. Are you referring to the "warehousing" liabilities assumed by the IESO in the early days? What else would need to be assigned? Could these items be listed above in A7 or is there a reason why they need to be kept separate?]

Sale deemed final

(2) The sale and conveyance referred to in subsection (1) is deemed to be final for all purposes.

[Note: What is this intended to achieve? Is this based on precedent language that has been interpreted to have the desired effect?]

Debts

(3) For greater certainty, the [amounts to which the FE has a right of recovery] are debts owing by the IESO, distributors and prescribed consumers to the Financial Entity until the amounts have been fully paid and fully discharged.

[Note: Why is subs. (3) necessary? Isn't it inherent in the sale of the regulatory assets that the FE would have acquired the future right to collect these amounts? Perhaps it is unclear that the amount can be collected from not just the IESO but from others down the chain. But isn't that what the "right of recovery" section above is meant to cover?]

[Note: I haven't checked to see how other similar provisions dealing with debts are drafted. Not sure we need the "for greater certainty" and also not sure what the distinction is between "fully paid" and "fully discharged". This provision will need further consideration. You also noted that you may want to specify who determines when all obligations have been satisfied.]

IESO to recover amounts

A9. The IESO shall recover the amounts set out in section A7 from distributors and prescribed consumers, in accordance with […]:

Note: how are the requirements that would determine recovery for this subsection meant to interact with the GAM reg?

Confidential Draft

[Note: The following two subsections are placeholders. You noted that *the provision is going to have to evolve to deal with consumers who exit the grid (disconnect) completely either because they leave the province or they decide to generate their own electricity and completely disconnect. You also want to be able to prescribe* methods of ensuring that the amounts required cannot be "by-passed". I'll need to understand what is meant by "by-passed".]

Distributors liable

(x) The IESO and distributors are entitled to compensation for any shortfall in relation to the amounts the IESO must pay to generators, the Financial Corporation or other persons including prescribed persons, under section 25.33 resulting from the IESO's activities under the hydro financing initiative.

Consumers liable

(X) Prescribed consumers are required to contribute towards the amount of any compensation referred to in subsection (4) in accordance with the amounts and methods prescribed by the regulations and such amounts shall not be by-passed.

USE OF FUNDS TO REDUCE ELECTRICITY BILLS

[Note: Depending on how things land with s. 25.33, this might be a place to explain how the transactions between the IESO and the FE translate into reduction in the electricity bills of RPP consumers. Regulations could specify how the IESO would ensure that the short-term rate reductions that flow from the FE amounts are only received by the targeted class of consumers and that this same class of consumers is the only class responsible for the repayment of FE funds in the long-term.]

ALTERNATIVE LANGUAGE – REGULATORY ASSET -- PROPOSED BY IESO (STIKEMANS)

Regulatory Asset Created

A7. (1) There is hereby created and conferred upon the IESO a "Regulatory Asset" consisting of the right to recover, in addition to the amounts otherwise recoverable, in accordance with the Regulations, the aggregate of the following amounts [from distributors and] prescribed consumers. **[Quare: do we regard the Regulatory Asset as a single asset in a variable amount or as different assets arising on each deferral]:**

1. The [deferred amount, including interest accrued thereon].
2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.
3. Other amounts as may be prescribed or as may be approved by the Board.

Confidential Draft

(2) The Regulatory Asset created by (1), shall constitute, for all purposes, a property right, shall be transferable by the IESO in accordance with Section A8, and shall constitute an intangible in which a security interest can be created for purposes of the *Personal Property Security Act*.

Election to Transfer Regulatory Asset

A8. (1) The IESO shall, from time to time, in accordance with the Regulations, elect to transfer to the Financing Entity all or any portion of the Regulatory Asset, on such terms and conditions as IESO may determine.

(2) Upon any election by the IESO pursuant to (1), the Financing Entity shall pay to the IESO in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, an amount, not less than the Deferred Amount, determined in accordance with the Regulations.

(3) Upon any election by the IESO pursuant to (1), the Financing Entity shall become the person entitled to the benefit of the Regulatory Asset, or the portion thereof in respect of which the election was made, free and clear of any adverse claim (other than any such claim created by the Financing Entity) and shall be entitled to exercise all of the rights and remedies conferred by or arising in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the IESO shall cease to have any rights (except as provided in Section A9) to or in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, all as if the Regulatory Asset, or the portion thereof in respect of which the election was made, had originally been conferred upon the Financing Entity and not the IESO.

(4) Upon any election by the IESO pursuant to (1), the IESO shall have no further rights or obligations in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the Regulatory Asset, or the portion thereof in respect of which the election was made, shall not form part of the assets and liabilities of IESO for any purpose.

(5) The LG in Council may adopt regulations providing for the circumstances in which IESO shall make the election or elections provided for in (1).

Financing Entity may Grant Security Interest

A9. (1) The Financing Entity may, at any time after an election referred to in Section A8(1), create a security interest in favour of any person in all or any portion of the Regulatory Asset subject to such election, all on such terms and conditions as the Financing Entity may determine.

(2) Except as provided for in Regulations adopted pursuant to (3), *The Personal Property Security Act* shall apply to any security interest created pursuant to (1), except that the rights of the secured party on default shall be limited to receiving the amounts collected in respect of the Regulatory Asset, or the portion thereof subject to the security interest, as and when collected by the IESO in accordance with A10.

Confidential Draft

(3) The LG in Council may adopt regulations providing for the terms on which the security interest provided for in (1) can be created and perfected and for the priority of any such security interest.

IESO to Collect Amounts in Respect of the Regulatory Asset

A10. Subsequent to any election pursuant to Section A8, the IESO shall, as agent on behalf of the Financing Entity and any secured party, use reasonable efforts to collect the amounts owing in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and shall promptly pay over to the Financing Entity or the secured party the amounts collected.

--------*END OF IESO/BLAKES ALTERNATIVE LANGUAGE FOR REG. ASSET ---*

------- ***BLAKES VERSION OF LANGUAGE FOR REGULATORY ASSET***

The Regulatory Asset, Composition,

A7(1) The "regulatory asset" consists of the following:

- **present and future statutory obligation of:**
  - **deferral consumers - to make all deferral repayments (including interest and late payment fees)**
  - **LDCs - to invoice the deferral consumers for the deferral repayments and to remit the amounts collected to the IESO**
  - **IESO - to receive and remit the deferral repayments from LDCs to the OPG Financing Entity**
- **All deferral repayment amounts collected**
- **All amounts in LDC or IESO deferral payment bank accounts**

Validity of Dispositions

(2) This section is reinforcing by statute the "sale" of the asset to the Financing Entity. This has been an important feature of the legislation in other jurisdictions in similar circumstances. Specifically, it says that "Dispositions" of the Regulatory Asset are "true sales", and not subject to challenge. This is an essential requirement for a securitization transaction. This provision identifies possible grounds for a challenge that a sale took place and indicates that those events do not affect the validity of the sale.

Deemed Perfection and Priority of Dispositions

Confidential Draft

(3) This is reinforcing the automatic nature of the "sale" of the asset. It Provides for a clean sale to the OPG Financing Entity, free and clear of encumbrances (i.e., no specific need to "perfect" the sale.

Validity of Pledges,
(4) Statutory override permitting the OPG Financing Entity to give a security interest in the "regulatory asset" to investors.

> **This would give the investors (through an indenture) the right to enforce collection of the deferral repayments to pay off amounts owed by the OPG Financing Entity to the investors upon certain defaults by the OPG Financing Entity under an indenture.**

Deemed Perfection and Priority of Pledges
(5) This is reinforcing that a commercial pledge given by OPG Financing Entity is valid and will have priority without specific "perfection". The result is that a pledge of the Regulatory Asset as security in accordance with the Treasury Plan will be given priority to other claims. The Pledge includes proceeds from the Regulatory Asset and is not affected by comingling or the ordinary requirement to file a financing statement under the PPSA.

Enforcement of Property Rights –

(6) The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5. *[ntd-: NOT an annotation – pulled directly from Blakes' document.]*

Collective Action Required –
(7) This anticipates that the Regulatory Asset will be structured as a variable interest that can be divided between IESO (until it sells) and one or more OPG Financing Entitys. The likely format will be a co-ownership agreement, that will allow for different owners to have a fractional undivided ownership interest in the Regulatory Asset. Those will entitle the owners to a specified share of the cash flows, which will correspond to their finance payment obligations. This will allow for future financing flexibility.

MISCELLANEOUS

Fair Hydro Financing Plan, miscellaneous,

A.8 (1) Consideration will be given to whether any additional 'miscellaneous' provisions are needed (and expected by the market) to support the financing of this

Confidential Draft

structure. Some of these provisions are not typical in legislation, and so will need further consideration (in consultation with leg counsel).

Regulations

114(1.5) The LGIC may make regulations to implement the Fair Hydro Financing Initiative

-(a) The power to implement the program (and to set out some of the details of the program) through regulations is important. Decisions remain to be made (once the drafting is a little further advanced) about what provisions/details need to appear in the proposed legislation, and what provisions/details can be set out in regulations.

Confidential Draft

ONTARIO ENERGY BOARD ACT, 1998

x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [hydro financing initiative].

[Note: Would need to link with definition in the EA or else spell out the definition here - TBD.]

x. Section 27.1 of the Act would be amended by adding the following paragraph:

Hearings

(1.1) A directive may specify whether the Board is to hold a hearing, the circumstances under which a hearing may or may not be held and, if a hearing is to be held, the type of hearing to be held and the time within which it must be held.

The underlined is what makes this different from the other provisions in the Act that basically have the same wording. There are already a number of places in the Act where you have this type of hearings provision re directives (e.g., s. 27.2 (7)). If you basically want the same authority in each instance, then the wording should be consistent in each case. There are already some discrepancies between the current provisions (e.g., s. 27.2

(7) talks about types of hearings, whereas s. 28 (2) doesn't). Differences in wording will typically be presumed to be differences in meaning. So, the question is what you're intending to authorize in each case, and whether differences are intended. If you want the same thing everywhere, it should all be worded the same. Let me know.

[Note: Waiting for confirmation whether amendments to s. 78.7 are needed. Please advise.]

x. Section 78 of the Act would be amended by adding the following subsection after subsection (3.0.5):

Rates, fair hydro financing initiative activities -IESO, OPG, distributors, etc.
(3.0.6) The OEB would not be precluded from taking into account the performance of duties under this Part by any entity regulated by the OEB, including fees received by such entity in excess of the incremental costs of the provision of such services.

x. Section 79.16 (3) of the Act would be repealed and the following substituted:

Adjustment to eliminate variances

(3) In determining rates under clause (1) (b), the Board shall take into account balances in variance accounts established under section 25.33 of the *Electricity Act, 1998* and, subject to section X of that Act, make adjustments with a view to eliminating those balances within 12 months or such shorter time periods as the Minister may direct.
[Note: Please let me know what section the highlighted portion is supposed to refer to… is it the provision that says the IESO has the 30 year period to pay off the amount in the variance account for the hydro financing initiative? I wonder if this is confusing and whether the amendment to subs. (3) above works… it almost seems unnecessary to say that the Board has to "take into account" this balance, given that we are setting up a bunch of very specific rules about what has to be done by various entities in order to eliminate this amount. What would the Board be expected to do with information about this variance account? For consideration.]

PART VII.3

COMPLIANCE – FAIR HYDRO FINANCING INITIATIVE

Right of the [OEB] to Inspect Books and Records,
113 (1) OEB may be given the power to investigate compliance with the legislation and the power to examine books and records, etc.

Power to Investigate Compliance and Impose Regulatory Sanctions

Confidential Draft

(2) This legislation will not limit the OEB's power to investigate compliance or prevent or preclude the OEB's power to impose sanctions. The OEB can investigate compliance with this part and to impose regulatory sanctions for non-compliance.

Limitation, Board,

(2.1) The OEB cannot, however, take any action to affect the irrevocability of the Transition Charges or the Undertaking of the Province.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

> **Subject:** OPG Equity Injection Summary
>
> Hey Bruno,
>
> Just a quick recap of the meeting today.

OPG Comments

- <!--[if !supportLists]-->• <!--[endif]-->Suggesting that equity injection would take place after the legislation and trust structure in place.
- <!--[if !supportLists]-->• <!--[endif]-->First introduction to legislation in April.
- <!--[if !supportLists]-->• <!--[endif]-->May timeline for completion of all requirements, with a target of the reduction occurring on June or July bills.
- <!--[if !supportLists]-->• <!--[endif]-->Ministry of Energy is focusing on the legislation.
- <!--[if !supportLists]-->• <!--[endif]-->The OFA side will be working on the Provincial approvals for equity injection.
- <!--[if !supportLists]-->• <!--[endif]-->Interim financing might be required for OPG Trust, particularly for the 51% of the GA funded through capital markets.
- <!--[if !supportLists]-->• <!--[endif]-->Equity injection is meant to be as simple as possible – quarterly injections is being tabled with annual shareholder and board approval.
- <!--[if !supportLists]-->• <!--[endif]-->Would likely need a ten-year plan (requiring annual approval), with a description of the aggregate shares to be issued from time-to-time drafted in official documentation.
- <!--[if !supportLists]-->• <!--[endif]-->Thus, seeking a type of “blanket approval” mechanism.
- <!--[if !supportLists]-->• <!--[endif]-->Timing is an issue; there may be a shortfall between funds received from the Province/Market and funds needed to purchase assets from IESO.
- <!--[if !supportLists]-->• <!--[endif]-->Special board meetings from OPG are likely to meet the May target.
- <!--[if !supportLists]-->• <!--[endif]-->Recognizes that the scheduled timeline is a moving target.

Discussion Questions

- <!--[if !supportLists]-->• <!--[endif]-->Is May a realistic timeline?
- <!--[if !supportLists]-->• <!--[endif]-->How will the approval process work with OPG and Province; will it be timed with other annual approvals?
- <!--[if !supportLists]-->• <!--[endif]-->The source of interim financing has not yet been determined.
- <!--[if !supportLists]-->• <!--[endif]-->OFA needs to open discussion with TBS to determine what approvals are needed and what process should be implemented.
- <!--[if !supportLists]-->• <!--[endif]-->There may be a conflict between the targeted irrevocability of the future revenues from ratepayers and the aspect of share redemption – a Provincial guarantee may be required.
- <!--[if !supportLists]-->• <!--[endif]-->OFA would act as support to TBS.
- <!--[if !supportLists]-->• <!--[endif]-->There are accounting considerations with the equity injections for the par value, additional paid-in capital, and number of

shares in the subscription.

<!--[if !supportLists]-->• <!--[endif]-->What funding does OPG have available now, and what could be used for interim financing for OPG Trust? (They have $700M line of credit for Darlington refurbishment and general corporate purposes, and $1B revolving bank credit facility, both which have been untapped as of Dec 31, 2016. Short term credit of $460M only has $74M in availability.)

Overall, the meeting was very high level. A placeholder meeting will be scheduled for next week.

Kind regards,

Adam Prokop

Ontario Fair Hydro Plan – Equity Injection Discussion

Purpose

On March 16, 2017, members from OEFC, OFA capital markets, Ministry of Finance, and OPG held a teleconference to discuss the mechanics behind an equity injection between the Province and OPG to support the Ontario Fair Hydro Plan (OFHP). These members are part of a working group established to facilitate the financing process for the OFHP.

Context

In early March 2017, the Province announced Ontario's Fair Hydro Plan (OFHP) aimed at reducing electricity bills by 25 percent on average for all residential consumers in the province. The Province has proposed refinancing a portion of the Global Adjustment costs over a longer time period for Regulated Price Plan eligible customers (e.g., residential, farm, small businesses). According to the Plan, the Province intends to introduce legislation that would, if passed, enable the IESO and OPG to work together to undertake this financing.

The legislation is intended to setup a special purpose vehicle, referred to herein as "OPG Trust", which would handle the deferral of the global adjustment as well as the eventual recovery of the deferred amount, along with financing and administration costs, from ratepayers. OPG Trust would be financed directly from the capital markets (51% of OPG Trust's capital structure) and 49% from loans from OPG. OPG would fund the majority of its loan to OPG Trust (44% of the capital structure) via an equity injection from the Province.

The teleconference call held on March 16, 2017, set out the initial discussion for the working group to set objectives, relay relevant information that the parties had gathered, and determine what information is required to move forward.

Teleconference Call

OPG Comments

- Suggested that the equity injection would take place after the legislation and trust structure in place.
- First introduction to legislation is planned for April.
- May timeline for completion of all requirements, with a target of the reduction occurring on June or July bills.
- Ministry of Energy is focusing on the legislation.
- The OFA side will be working on the Provincial approvals for the equity injection.
- Interim financing might be required for OPG Trust, particularly for the 51% of the GA funded through capital markets.
- Equity injection is meant to be as simple as possible – quarterly injections is being tabled with annual shareholder and board approval.
- Would likely need a ten-year plan (requiring annual approval), with a description of the aggregate shares to be issued from time-to-time drafted in official documentation.
- Thus, seeking a type of "blanket approval" mechanism.

- Timing is an issue; there may be a shortfall between funds received from the Province/Market and funds needed to purchase assets from IESO.
- Special board meetings from OPG are likely to meet the May target.
- Recognizes that the scheduled timeline is a moving target.

Discussion Questions

- Is May a realistic timeline?
- How will the approval process work with OPG and Province; will it be timed with other annual approvals?
- The source of interim financing has not yet been determined.
- OFA needs to open discussion with TBS to determine what approvals are needed and what process should be implemented.
- There may be a conflict between the targeted irrevocability of the future revenues from ratepayers and the aspect of share redemption – a Provincial guarantee may be required.
- OFA would act as support to TBS.
- There are accounting considerations with the equity injections for the par value, additional paid-in capital, and number of shares in the subscription.
- What funding does OPG have available now, and what could be used for interim financing for OPG Trust? (Update – OPG has $700M line of credit for Darlington refurbishment and general corporate purposes, and $1B revolving bank credit facility which DBRS refers to as commercial paper, both which have been untapped as of Dec 31, 2016. Short term credit of $460M only has $74M in availability.)

The initial meeting was a general overview of the goals and requirements from the working group. A placeholder meeting will be scheduled for next week.

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Version 3

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

Confidential Draft

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

[Notes re this draft:
- all numbering of provisions may need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)
- need to check consistency of various phrases (e.g. *during/for/in respect of* reference period; *owner of RA/IA vs. RA/IA owner; etc.)*]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1]

The Government of Ontario has established a regulatory framework related to the generation and sale of electricity, which has promoted and continues to promote significant investment to enable phasing out of coal fired generation, modernizing sites and facilities in the Province for the generation of electrical energy and the production therefrom,[2] and conservation and demand management.

The Government of Ontario is committed to ensuring that the costs of these investments, and the raising of money to fund the investments,[3] are allocated fairly among present and future generations of consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

[1] Note: please see the preamble of the *Green Energy Act, 2009.*
[2] Note: please see clause 92A (4) (b) of the Constitution, 1867: "des emplacements et des installations de la province destinés à la production d'énergie électrique, ainsi que de cette production meme".
[3] Note: please see opening flush of s. 92A (4) of the Constitution Act, 1867

CONTENTS

PART I
GENERAL

1. Interpretation
2. Effect of invalidity, etc.
3. Purpose
4. Crown bound
5. Protection and assurances

PART II
FAIR ADJUSTMENT

6. Fair adjustment, May 1, 2017 to April 30, 2018
7. Fair adjustment, May 1, 2018 to April 30, 2022

PART III
CLEAN ENERGY ADJUSTMENT

8. Specified consumers to pay clean energy adjustment
9. Irrevocability of clean energy adjustment
10. Determination of clean energy adjustment
11. IESO to issue remittance notice to electricity vendors
12. Electricity vendor to invoice specified consumers

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

13. Appointment
14. Duties and powers

FAIR ALLOCATION AMOUNT

15. Financial Services Manager to calculate fair allocation amount

FINANCING PLAN

16. Financial Services Manager to prepare Financing Plan
17. Implementation of Financing Plan

PART V
THE REGULATORY ASSET

18. Interpretation, portion of regulatory asset
19. Variance account
20. IESO funding shortfall
21. Regulatory asset established
22. Transfer of regulatory asset
23. Validity of transfer

PART VI
THE INVESTMENT ASSET

24. Interpretation, investment asset
25. Investment asset established
26. Transfer of investment interest
27. Validity of transfer
28. Investment asset owner may grant security interest

PART VI
MISCELLANEOUS

29. Appointment of agent, invoicing or collection
30. Not Crown agent
31. Sequestration
32. Choice of law
33. Conflict
34. No further approvals, etc.
35. Immunity
36. References in marketing materials and offering documents
37. Non-application, Financial Administration Act, s. 28
38. Regulations

PART VII
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

PART VII
COMMENCEMENT AND SHORT TITLE

103. Commencement
104. Short title

Confidential Draft

Schedule 1 Estimated finance amount

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")
[Note - will need to check throughout the draft that references to CEA are clear as to whether it's the total CEA in respect of a reference period vs. the portion payable by a specified consumer.]

"clean energy benefits" means, in respect of a reference period, the value of the benefits determined to be derived by the specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected future incurrences of clean energy costs; ("French")

"clean energy costs" means, in respect of a reference period, the value of the costs allocated to specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated costs to be incurred by the IESO under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management, including storage,

(iii) energy efficiency,

(iv) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(v) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

Confidential Draft

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[4] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"fair adjustment" means the determination of the rate payable for electricity in accordance with Part II; ("French")

"Financial Services Manager" means Ontario Power Generation Inc. [or such other person or entity as may be appointed as the Financial Services Manager by the Minister under section **]; ("French")

"Financing Plan" means the plan prepared under section X, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means a payment obligation incurred by or on behalf of the regulatory asset owner or an investment asset owner under section x; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means, in respect of a reference period, the amount determined under section 20xx for the reference period; ("French")

"investment asset" means the investment asset created as described in section 22xx; ("French")

"investment asset owner" means a financing entity that acquires an investment interest in the investment asset; ("French")

[4] Note - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

Confidential Draft

"investment interest" means an ownership interest in the investment asset, which entitles an investment asset owner to the rights and benefits specified in the agreement under which the ownership interest is transferred;

"invoice amount" means the amount, determined in accordance with subsections (2.1) and (2.2) and the regulations, that is payable by a specified consumer for the provision of electricity in Ontario during a period of time specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a) or such shorter period as may be set out in the Fair Allocation Plan; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of an investment asset owner by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right established under section X to recover the IESO funding shortfall; ("French")

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French")

"specified consumer" means,

Confidential Draft

(a) a person who has an account with an electricity vendor for the supply of electricity, receives an invoice in respect of the account and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French")

"transfer" means an assignment, conveyance, disposition or sale; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Confidential Draft

Invoice amount

(2.1) Subject to subsection (2.2) and the regulations, the invoice amount for a specified consumer includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following:

    i. The commodity price of the electricity used during the invoice period.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

    iv. The amount of any harmonized sales tax payable [by the consumer?] under Part IX of the *Excise Tax Act* (Canada);

    v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO, such amounts as may be prescribed. ("French")

Same, exclusions

(2.2) Except as otherwise prescribed by the regulations, the invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

    i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

    ii. A charge labelled as a "specific service charge" or "retail service charge".

Confidential Draft

iii. A rate rider.

5. Any other prescribed amounts.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer,

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the *Ontario Energy Board Act, 1998*;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Transfer

(4) For greater certainty, a transfer of the regulatory asset or a portion of the regulatory asset includes any act of the IESO by which the IESO purports to dispose of its interest in the regulatory asset with the result of a named person becoming the owner of an investment interest.

Effect of invalidity, etc.[5]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect a funding obligation that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

3xx. (1) The purposes of this Act are,[6]

[5] Note: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

Confidential Draft

(a) to ensure that clean energy costs are fairly allocated among specified consumers over time and that the process by which the Province raises money to fund the costs reflects the fair allocation; and

(b) to recognize that clean energy benefits that have accrued and that will accrue over time will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding financial commitments, financial arrangements, indemnities or similar transactions.

PART II
FAIR ADJUSTMENT

[6] Note: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Confidential Draft

Fair adjustment, May 1, 2017 to April 30, 2018
Definition

6xx. (1) In this section,

"average baseline invoice amount" means the average monthly invoice amount that would be payable by a representative consumer under the average baseline rate; ("French")

"average baseline rate" means the average rate that would be payable effective May 1, 2017 by the class of consumers prescribed by the regulations under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act, as determined by the Board by applying the method prescribed by the regulations under clause 79.16 (1) (b) of that Act; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

Rate determination

(2) Subject to subsection (3), [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] the rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 is the average rate that would be payable by a representative consumer in order for the representative consumer to receive a monthly invoice amount that is 25 per cent less than the average baseline invoice amount.

Sub-meter customers

(3) A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the rate determined under subsection (2).

Determining rate

(4) The rate mentioned in subsection (2) shall be,

(a) determined by the Board within seven business days after this section receives Royal Assent; and

(b) effective as of the first day of the calendar month immediately following the determination.

Confidential Draft

Transition

(5) If, for technical or operational reasons, an electricity vendor, specified consumer or unit sub-meter provider is unable to adapt its invoices to comply with this section by the time it issues its first invoice for electricity consumed on or after May 1, 2017,

(a) the electricity vendor, specified consumer or unit sub-meter provider shall adapt its invoices as soon as possible and, in any event, no later than [August 1, 2017]; and

(b) the electricity vendor, specified consumer or unit sub-meter provider shall ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Fair adjustment, May 1, 2018 to April 30, 2022

7xx. The Lieutenant Governor in Council may, [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] make regulations prescribing the rate for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay clean energy adjustment

8xx. (1) Upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor, as agent of the investment asset owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment is inconsistent with the fair allocation calculation applicable at the time when the payment is due; and

(b) whether the clean energy adjustment relates to funding obligations that were incurred in a manner that was inconsistent with the Financing Plan.

Confidential Draft

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to each investment asset owner in respect of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise.

Irrevocability of clean energy adjustment

9xx. (1) The amount of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a calculation error by the electricity vendor.

Determination of clean energy adjustment

10xx. (1) The clean energy adjustment payable by all specified consumers in respect of a reference period shall be determined as follows:

1. Calculate the estimated finance amount for the reference period in accordance with Schedule 1 and such additional rules as may be prescribed.

2. Add the true up amount for the reference period, as determined in accordance with the prescribed method, to the estimated finance amount calculated under paragraph 1.

True up amount

(2) For the purposes of paragraph 2 of subsection (1), the Lieutenant Governor in Council may make regulations prescribing the method for determining the true up amount, having regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the estimated finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

Confidential Draft

i. differences between amounts billed and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

IESO to issue remittance notice to electricity vendors

11xx. (1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion, as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period.

IESO to collect

(2) The IESO shall, as an agent of the investment asset owners, collect the clean energy adjustment from electricity vendors [in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998]*.

Collection account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of collecting those accounts:

1. Amounts described in subsection 12 (4).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8 (1).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (6), be held in trust for the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment asset owners in accordance with the regulations.

Collection of outstanding amounts, regulatory asset

(6) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the

Confidential Draft

applicable fair allocation calculation made by the Financial Services Manager under Part IV, the IESO may collect the difference from specified consumers.

Electricity vendor to invoice specified consumers

12xx. (1) The electricity vendor shall issue an invoice to each specified consumer for the consumer's amount of the clean energy adjustment in accordance with the regulations.

Electricity vendor to collect

(2) Each electricity vendor shall, as an agent of the IESO and the investment asset owners, collect the clean energy adjustment from specified consumers [in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998]*.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges for the same invoice period.

Held in trust

(4) All of the following amounts received by an electricity vendor shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be held in trust for the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act:

1. Payments received from or on behalf of specified consumers under subsection 8 (1).

2. Portions of payments received from or on behalf of specified consumers under subsection 8 (1) that are allocated to the clean energy adjustment under subsection (3).

3. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Remittance to IESO

(5) Each electricity vendor other than the IESO shall remit amounts described in subsection (5) to the IESO for the benefit of the investment asset owners or secured parties in accordance with the regulations.

Confidential Draft

Regulations

(6) If an electricity vendor fails, in the manner described in the regulations, to comply with the requirements of this section, the electricity vendor shall take such steps as the regulations may prescribe.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) [Note: To be elaborated.]

Termination

(2) The Minister may by written order terminate the appointment of an appointee as the Financial Services Manager if,

(a) the Minister has advised the appointee that the Financing Plan is either inconsistent with or is being implemented in a manner that is inconsistent with the principles set out in section x;

(b) the appointee has been afforded a reasonable opportunity to consider and address the inconsistency; and

(c) the appointee is unwilling or unable to address the inconsistency to the satisfaction of the Minister.

Replacement

(3) Upon terminating an appointment, the Minister may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment asset owner.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section XX.

Confidential Draft

2. Providing information to electricity vendors, including the IESO, in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate the fair allocation amount for the purposes of,

(a) fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of each reference period; and

(b) aligning funding obligations that may be incurred during each reference period with the allocation of the estimated clean energy costs and estimated clean energy benefits across present and future generations of specified consumers.

Amount

(1.1) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which the estimated [clean energy costs] [clean energy benefits] to be allocated to specified consumers in respect of the reference period exceeds the estimated amount of [the global adjustment] that would be borne by the specified consumers in respect of clean energy costs [in the absence of this Act].

2. An allocable portion of the value of any fair adjustment, determined in accordance with subsection (3).

Principles

(2) In calculating the fair allocation amount [or in developing the fair allocation calculation?], subject to subsection (3), the Financial Services Manager shall have regard to the following principles:

Confidential Draft

1. Clean energy costs allocated to the specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits attributed to the specified consumers in respect of a reference period should be determined based on *[Insert principles]*.

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers for each reference period.

    iii. The expected electricity consumption rates for each reference period.

Allocation of fair adjustment

(3) If, before the Financial Services Manager has calculated the fair allocation amount in respect of a reference period, a fair adjustment has been made under Part II in respect of the reference period, the calculation shall include a portion of the value of the fair adjustment in the fair allocation calculation for each future reference period.

Amendments to the fair allocation calculation

(4) The Financial Services Manager may amend the fair allocation calculation from time to time, as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Submission of fair allocation to Minister

(5) The Financial Services Manager shall provide to the Minister the fair allocation calculation and any amendments to the fair allocation calculation.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

Confidential Draft

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare and provide to the Minister a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred or potential transfers should be made for the purposes of this Act.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align the expected finance amount determined under Schedule 1 that would become due and payable during a reference period with the fair allocation amount determined for the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment for the reference period.

2. Incurrences and transfers should be implemented in a manner that, as the Financial Services Manager considers to be reasonable, is cost effective and reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

[Note for reference: List of items for consideration in regulation: (a) anticipated IESO funding shortfalls and related transfer amounts; (b) the maturities of funding obligations; (c) the availability of refinancings, redemption opportunities and liquidity terms and conditions in order to achieve the objective contemplated in section X(1)(a); (d) the availability of currency and interest rate hedging facilities for the purpose of mitigating any differences between the expected finance amounts becoming due and payable during a reference period and the fair allocation amount for the reference period; (d) the amount and potential variability of interest rates and related financing costs; (e) available capital markets in which funding obligations may be incurred.]

Amendments to approved plan

(3) The Financial Services Manager may amend the Financing Plan at any time, without the approval of the Minister, subject to the requirements set out in this section.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in a clean energy adjustment for the reference period unless,

Confidential Draft

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount for the reference period and the amount of the fair adjustment for the reference period].

Confidentiality of plan

(4) The Financing Plan is deemed to be a record subject to section 17 of the *Freedom of Information and Protection of Privacy Act.*

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations and make transfers in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, section [paramountcy of funding obligations] applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish one or more financing entities that may incur funding obligations and make transfers.

Prohibition

(3) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation.

Effect of amendment to Fair Allocation Plan

(4) No funding obligation incurred and no transfer made by the Financial Services Manager shall be affected by any inconsistency with the Financing Plan, including any inconsistency with the principles set out in section X.

Confidential Draft

PART V
THE REGULATORY ASSET

Interpretation, portion of regulatory asset

18xx. If a transfer under this Part provides for the transfer of a portion of the regulatory asset, any references in this Part to the regulatory asset are deemed to be references to the portion of the regulatory asset transferred.

[Note: This is meant to assist with clarity in the subsequent provisions.]

Variance account

19xx. (1) The Board shall issue an accounting order to authorize the IESO to do the following:

1. Create a variance account for the purposes of this Act.

2. Record the IESO funding shortfall in the variance account from time to time.

3. Recover the IESO funding shortfall in accordance with section X and the regulations.

No hearing

(2) The order of the Board shall be made in writing and without holding a hearing.

No appeals, etc.

(3) No appeal lies from the order of the Board.

IESO funding shortfall

20xx. (1) The IESO shall determine the IESO funding shortfall for each month in the following manner:

1. Calculate the sum of all invoice amounts issued to specified consumers for the month if Part II of this Act did not apply.

2. Calculate the sum of all invoice amounts issued to specified consumers for the month.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1, and make any other adjustments as may be prescribed.

Same

(2) To the extent that the IESO funding shortfall for any month is based on an estimate of the electricity used by specified consumers, the IESO shall record an

Confidential Draft

adjustment in the variance account in the following month to reflect the difference between the estimate and the electricity actually used by specified consumers.

Recording of IESO funding shortfall

(3) IESO shall record the IESO funding shortfall from time to time, including adjustments resulting from the exercise of the right of recovery under section 21 and any transfer under section 22, in the variance account.

Recording determinative

(4) A recording of the IESO funding shortfall in the variance account is determinative of the amount of IESO funding shortfall at the time of the recording.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the IESO funding shortfall.

Same, restrictions

(2) The IESO's right to recover the IESO funding shortfall under subsection (1) is subject to the following:

1. The IESO shall not be entitled to collect the IESO funding shortfall from specified consumers before May 1, 2022.

2. The process by which the IESO may recover the IESO funding shortfall shall be established by the Board, having regard to the amount of the IESO funding shortfall from time to time and the [fair allocation calculation].

3. Such other restrictions as may be prescribed.

Transfer of regulatory asset

22xx. (1) The IESO may transfer all or a portion of the regulatory asset to any financing entity under the Financing Plan, which transfer creates the investment asset.

Same

(2) Upon receipt of any payment in consideration for the transfer,

(a) the IESO shall record the payment as a reduction of the IESO funding shortfall in the variance account; and

(b) unless otherwise provided for in this Act, the IESO shall have no further right, title or interest in, or any obligations in respect of, the regulatory asset or in the investment asset created by the transfer.

Confidential Draft

Same

(3) Upon transfer, the financing entity becomes an investment asset owner and acquires an investment interest.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment asset owner of the regulatory asset, and the investment asset created by the transfer shall be immediately vested in the transferee.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Interpretation, investment asset

24xx. If a transfer under this Part provides for the transfer of an investment asset, any references in this Part to the investment interest are deemed to be references to the specific investment interest transferred.

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication:

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

Confidential Draft

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any amounts that all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

No set off, etc.

(2) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, an agent of the investment asset owner or an owner of distribution system assets in the Province;

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Confidential Draft

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with section [xx] of the *Personal Property Security Act*.

Collective action required

(4) If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: Successors may need to be addressed here.]

Transfer of investment interest

26xx. An investment asset owner may transfer all or a portion of its rights and interests in an investment interest to any other investment asset owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the owner of the investment interest acquired a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment asset owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment asset owner shall have priority over any liens in favour of such other persons.

Confidential Draft

Investment asset owner may grant security interest

28xx. (1) An investment asset owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the owner of an investment interest to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment asset owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person who may have commingled such revenues or other proceeds with other funds.

Confidential Draft

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment asset owner or a secured party, order the sequestration and payment of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment asset owner or secured party by any person or entity authorized to collect the clean energy adjustment, defaults on any required remittance of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Same

(3) An order under subsection (1) shall remain in full force and effect despite any bankruptcy, reorganization or other insolvency proceedings with respect to the person or entity who is subject to the order.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

Confidential Draft

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan or in relation to the establishment of the Fair Allocation Plan.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under this section unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[7]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations,

(a) defining any term used in this Act….

(b) prescribing types of payment obligations that constitute funding obligations;

(a) governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment.

(b) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

[7] Note - see s. 51 of the Electricity Act, 1998

Confidential Draft

[Note: reg-making powers to be dealt with in subsequent draft]

PART VII
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

201x. Section 53.1 of the Act would be amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under that Act and engaging in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including the following:

Confidential Draft

1. Entering into contracts and undertakings on behalf of special purpose financing entities, including pre-formation contracts and undertakings and as principal in relation to matters permitted by the *Ontario Fair Hydro Plan Act, 2017* subject to the right of reimbursement from amounts available to the financing entity.

2. Preparing reports on behalf of the financing entity.

3. Enforcing the rights of the financing entity.

4. Signing offering documents as sponsor or otherwise on behalf of the financing entity.

5. Exercising the powers and performing the duties of the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*

6. Issuing non-equity securities in Ontario Power Generation Inc. or on if its subsidiaries, for the purpose of raising funds to acquire debt or equity interests in a financing entity whose activities are limited to the incurrence of funding obligations pursuant to the *Ontario Fair Hydro Plan Act, 2017*.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create one or more subsidiaries, trusts or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

Confidential Draft

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 70 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1)]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Confidential Draft

SCHEDULE 1
ESTIMATED FINANCE AMOUNT

Estimated finance amount

1. The estimated finance amount for a reference period shall be determined by estimating, prior to the start of a reference period, the sum of the following:

1. The sum of all amounts that are payable during the reference period by or on behalf of the investment asset owners to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

2. The sum of all funding costs for the reference period, determined as follows:

    i. Calculate the aggregate of all interest, scheduled principal and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of investment assets owners during the reference period in respect of all funding obligations, including such amounts as may be prescribed.

    ii. Calculate the sum of the aggregate of all amounts received by or on behalf of investment asset owners during the reference period in respect of all funding obligations and such other amounts as may be prescribed.

    iii. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

3. The sum of all amounts payable during the reference period by or on behalf of investment asset owners to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable during the reference period by or on behalf of investment asset owners that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

Confidential Draft

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

1. Calculate the sum of all amounts deposited by or on behalf of investment asset owners during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn by or on behalf of investment asset owners during the reference period from deposits previously made as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April

28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Version 3

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

Confidential Draft

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

[Notes re this draft:
- all numbering of provisions may need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)
- need to check consistency of various phrases (e.g. *during/for/in respect of* reference period; *owner of RA/IA vs. RA/IA owner; etc.)*]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1]

The Government of Ontario has established a regulatory framework related to the generation and sale of electricity, which has promoted and continues to promote significant investment to enable phasing out of coal fired generation, modernizing sites and facilities in the Province for the generation of electrical energy and the production therefrom,[2] and conservation and demand management.

The Government of Ontario is committed to ensuring that the costs of these investments, and the raising of money to fund the investments,[3] are allocated fairly among present and future generations of consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

[1] Note: please see the preamble of the *Green Energy Act, 2009.*
[2] Note: please see clause 92A (4) (b) of the Constitution, 1867: "des emplacements et des installations de la province destinés à la production d'énergie électrique, ainsi que de cette production meme".
[3] Note: please see opening flush of s. 92A (4) of the Constitution Act, 1867

Schedule 1 Estimated finance amount

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")
[Note - will need to check throughout the draft that references to CEA are clear as to whether it's the total CEA in respect of a reference period vs. the portion payable by a specified consumer.]

"clean energy benefits" means, in respect of a reference period, the value of the benefits determined to be derived by the specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected future incurrences of clean energy costs; ("French")

"clean energy costs" means, in respect of a reference period, the value of the costs allocated to specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated costs to be incurred by the IESO under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management, including storage,

(iii) energy efficiency,

(iv) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(v) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

Confidential Draft

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[4] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"fair adjustment" means the determination of the rate payable for electricity in accordance with Part II; ("French")

"Financial Services Manager" means Ontario Power Generation Inc. [or such other person or entity as may be appointed as the Financial Services Manager by the Minister under section **]; ("French")

"Financing Plan" means the plan prepared under section X, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means a payment obligation incurred by or on behalf of the regulatory asset owner or an investment asset owner under section x; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means, in respect of a reference period, the amount determined under section 20xx for the reference period; ("French")

"investment asset" means the investment asset created as described in section 22xx; ("French")

"investment asset owner" means a financing entity that acquires an investment interest in the investment asset; ("French")

[4] Note - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

Confidential Draft

"investment interest" means an ownership interest in the investment asset, which entitles an investment asset owner to the rights and benefits specified in the agreement under which the ownership interest is transferred;

"invoice amount" means the amount, determined in accordance with subsections (2.1) and (2.2) and the regulations, that is payable by a specified consumer for the provision of electricity in Ontario during a period of time specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a) or such shorter period as may be set out in the Fair Allocation Plan; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of an investment asset owner by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right established under section X to recover the IESO funding shortfall; ("French")

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French")

"specified consumer" means,

Confidential Draft

(a) a person who has an account with an electricity vendor for the supply of electricity, receives an invoice in respect of the account and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French")

"transfer" means an assignment, conveyance, disposition or sale; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Confidential Draft

Invoice amount

(2.1) Subject to subsection (2.2) and the regulations, the invoice amount for a specified consumer includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following:

    i. The commodity price of the electricity used during the invoice period.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

    iv. The amount of any harmonized sales tax payable [by the consumer?] under Part IX of the *Excise Tax Act* (Canada);

    v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO, such amounts as may be prescribed. ("French")

Same, exclusions

(2.2) Except as otherwise prescribed by the regulations, the invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

    i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

    ii. A charge labelled as a "specific service charge" or "retail service charge".

Confidential Draft

iii. A rate rider.

5. Any other prescribed amounts.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer,

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the *Ontario Energy Board Act, 1998*;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Transfer

(4) For greater certainty, a transfer of the regulatory asset or a portion of the regulatory asset includes any act of the IESO by which the IESO purports to dispose of its interest in the regulatory asset with the result of a named person becoming the owner of an investment interest.

Effect of invalidity, etc.[5]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect a funding obligation that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

3xx. (1) The purposes of this Act are,[6]

[5] Note: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

Confidential Draft

(a) to ensure that clean energy costs are fairly allocated among specified consumers over time and that the process by which the Province raises money to fund the costs reflects the fair allocation; and

(b) to recognize that clean energy benefits that have accrued and that will accrue over time will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding financial commitments, financial arrangements, indemnities or similar transactions.

PART II
FAIR ADJUSTMENT

[6] Note: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Confidential Draft

Fair adjustment, May 1, 2017 to April 30, 2018
Definition

6xx. (1) In this section,

"average baseline invoice amount" means the average monthly invoice amount that would be payable by a representative consumer under the average baseline rate; ("French")

"average baseline rate" means the average rate that would be payable effective May 1, 2017 by the class of consumers prescribed by the regulations under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act, as determined by the Board by applying the method prescribed by the regulations under clause 79.16 (1) (b) of that Act; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

Rate determination

(2) Subject to subsection (3), [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] the rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 is the average rate that would be payable by a representative consumer in order for the representative consumer to receive a monthly invoice amount that is 25 per cent less than the average baseline invoice amount.

Sub-meter customers

(3) A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the rate determined under subsection (2).

Determining rate

(4) The rate mentioned in subsection (2) shall be,

(a) determined by the Board within seven business days after this section receives Royal Assent; and

(b) effective as of the first day of the calendar month immediately following the determination.

Confidential Draft

Transition

(5) If, for technical or operational reasons, an electricity vendor, specified consumer or unit sub-meter provider is unable to adapt its invoices to comply with this section by the time it issues its first invoice for electricity consumed on or after May 1, 2017,

(a) the electricity vendor, specified consumer or unit sub-meter provider shall adapt its invoices as soon as possible and, in any event, no later than [August 1, 2017]; and

(b) the electricity vendor, specified consumer or unit sub-meter provider shall ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Fair adjustment, May 1, 2018 to April 30, 2022

7xx. The Lieutenant Governor in Council may, [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] make regulations prescribing the rate for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay clean energy adjustment

8xx. (1) Upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor, as agent of the investment asset owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment is inconsistent with the fair allocation calculation applicable at the time when the payment is due; and

(b) whether the clean energy adjustment relates to funding obligations that were incurred in a manner that was inconsistent with the Financing Plan.

Confidential Draft

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to each investment asset owner in respect of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise.

Irrevocability of clean energy adjustment

9xx. (1) The amount of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a calculation error by the electricity vendor.

Determination of clean energy adjustment

10xx. (1) The clean energy adjustment payable by all specified consumers in respect of a reference period shall be determined as follows:

1. Calculate the estimated finance amount for the reference period in accordance with Schedule 1 and such additional rules as may be prescribed.

2. Add the true up amount for the reference period, as determined in accordance with the prescribed method, to the estimated finance amount calculated under paragraph 1.

True up amount

(2) For the purposes of paragraph 2 of subsection (1), the Lieutenant Governor in Council may make regulations prescribing the method for determining the true up amount, having regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the estimated finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

Confidential Draft

i. differences between amounts billed and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

IESO to issue remittance notice to electricity vendors

11xx. (1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion, as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period.

IESO to collect

(2) The IESO shall, as an agent of the investment asset owners, collect the clean energy adjustment from electricity vendors [in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998]*.

Collection account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of collecting those accounts:

1. Amounts described in subsection 12 (4).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8 (1).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (6), be held in trust for the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment asset owners in accordance with the regulations.

Collection of outstanding amounts, regulatory asset

(6) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the

Confidential Draft

applicable fair allocation calculation made by the Financial Services Manager under Part IV, the IESO may collect the difference from specified consumers.

Electricity vendor to invoice specified consumers

12xx. (1) The electricity vendor shall issue an invoice to each specified consumer for the consumer's amount of the clean energy adjustment in accordance with the regulations.

Electricity vendor to collect

(2) Each electricity vendor shall, as an agent of the IESO and the investment asset owners, collect the clean energy adjustment from specified consumers [in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998]*.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges for the same invoice period.

Held in trust

(4) All of the following amounts received by an electricity vendor shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be held in trust for the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act:

1. Payments received from or on behalf of specified consumers under subsection 8 (1).

2. Portions of payments received from or on behalf of specified consumers under subsection 8 (1) that are allocated to the clean energy adjustment under subsection (3).

3. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Remittance to IESO

(5) Each electricity vendor other than the IESO shall remit amounts described in subsection (5) to the IESO for the benefit of the investment asset owners or secured parties in accordance with the regulations.

Confidential Draft

Regulations

(6) If an electricity vendor fails, in the manner described in the regulations, to comply with the requirements of this section, the electricity vendor shall take such steps as the regulations may prescribe.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) [Note: To be elaborated.]

Termination

(2) The Minister may by written order terminate the appointment of an appointee as the Financial Services Manager if,

(a) the Minister has advised the appointee that the Financing Plan is either inconsistent with or is being implemented in a manner that is inconsistent with the principles set out in section x;

(b) the appointee has been afforded a reasonable opportunity to consider and address the inconsistency; and

(c) the appointee is unwilling or unable to address the inconsistency to the satisfaction of the Minister.

Replacement

(3) Upon terminating an appointment, the Minister may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment asset owner.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section XX.

Confidential Draft

2. Providing information to electricity vendors, including the IESO, in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate the fair allocation amount for the purposes of,

(a) fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of each reference period; and

(b) aligning funding obligations that may be incurred during each reference period with the allocation of the estimated clean energy costs and estimated clean energy benefits across present and future generations of specified consumers.

Amount

(1.1) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which the estimated [clean energy costs] [clean energy benefits] to be allocated to specified consumers in respect of the reference period exceeds the estimated amount of [the global adjustment] that would be borne by the specified consumers in respect of clean energy costs [in the absence of this Act].

2. An allocable portion of the value of any fair adjustment, determined in accordance with subsection (3).

Principles

(2) In calculating the fair allocation amount [or in developing the fair allocation calculation?], subject to subsection (3), the Financial Services Manager shall have regard to the following principles:

Confidential Draft

1. Clean energy costs allocated to the specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits attributed to the specified consumers in respect of a reference period should be determined based on *[Insert principles]*.

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers for each reference period.

    iii. The expected electricity consumption rates for each reference period.

Allocation of fair adjustment

(3) If, before the Financial Services Manager has calculated the fair allocation amount in respect of a reference period, a fair adjustment has been made under Part II in respect of the reference period, the calculation shall include a portion of the value of the fair adjustment in the fair allocation calculation for each future reference period.

Amendments to the fair allocation calculation

(4) The Financial Services Manager may amend the fair allocation calculation from time to time, as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Submission of fair allocation to Minister

(5) The Financial Services Manager shall provide to the Minister the fair allocation calculation and any amendments to the fair allocation calculation.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

Confidential Draft

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare and provide to the Minister a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred or potential transfers should be made for the purposes of this Act.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align the expected finance amount determined under Schedule 1 that would become due and payable during a reference period with the fair allocation amount determined for the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment for the reference period.

2. Incurrences and transfers should be implemented in a manner that, as the Financial Services Manager considers to be reasonable, is cost effective and reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

[Note for reference: List of items for consideration in regulation: (a) anticipated IESO funding shortfalls and related transfer amounts; (b) the maturities of funding obligations; (c) the availability of refinancings, redemption opportunities and liquidity terms and conditions in order to achieve the objective contemplated in section X(1)(a); (d) the availability of currency and interest rate hedging facilities for the purpose of mitigating any differences between the expected finance amounts becoming due and payable during a reference period and the fair allocation amount for the reference period; (d) the amount and potential variability of interest rates and related financing costs; (e) available capital markets in which funding obligations may be incurred.]

Amendments to approved plan

(3) The Financial Services Manager may amend the Financing Plan at any time, without the approval of the Minister, subject to the requirements set out in this section.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in a clean energy adjustment for the reference period unless,

Confidential Draft

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount for the reference period and the amount of the fair adjustment for the reference period].

Confidentiality of plan

(4) The Financing Plan is deemed to be a record subject to section 17 of the *Freedom of Information and Protection of Privacy Act.*

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations and make transfers in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, section [paramountcy of funding obligations] applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish one or more financing entities that may incur funding obligations and make transfers.

Prohibition

(3) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation.

Effect of amendment to Fair Allocation Plan

(4) No funding obligation incurred and no transfer made by the Financial Services Manager shall be affected by any inconsistency with the Financing Plan, including any inconsistency with the principles set out in section X.

Confidential Draft

PART V
THE REGULATORY ASSET

Interpretation, portion of regulatory asset

18xx. If a transfer under this Part provides for the transfer of a portion of the regulatory asset, any references in this Part to the regulatory asset are deemed to be references to the portion of the regulatory asset transferred.

[Note: This is meant to assist with clarity in the subsequent provisions.]

Variance account

19xx. (1) The Board shall issue an accounting order to authorize the IESO to do the following:

1. Create a variance account for the purposes of this Act.

2. Record the IESO funding shortfall in the variance account from time to time.

3. Recover the IESO funding shortfall in accordance with section X and the regulations.

No hearing

(2) The order of the Board shall be made in writing and without holding a hearing.

No appeals, etc.

(3) No appeal lies from the order of the Board.

IESO funding shortfall

20xx. (1) The IESO shall determine the IESO funding shortfall for each month in the following manner:

1. Calculate the sum of all invoice amounts issued to specified consumers for the month if Part II of this Act did not apply.

2. Calculate the sum of all invoice amounts issued to specified consumers for the month.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1, and make any other adjustments as may be prescribed.

Same

(2) To the extent that the IESO funding shortfall for any month is based on an estimate of the electricity used by specified consumers, the IESO shall record an

Confidential Draft

adjustment in the variance account in the following month to reflect the difference between the estimate and the electricity actually used by specified consumers.

Recording of IESO funding shortfall

(3) IESO shall record the IESO funding shortfall from time to time, including adjustments resulting from the exercise of the right of recovery under section 21 and any transfer under section 22, in the variance account.

Recording determinative

(4) A recording of the IESO funding shortfall in the variance account is determinative of the amount of IESO funding shortfall at the time of the recording.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the IESO funding shortfall.

Same, restrictions

(2) The IESO's right to recover the IESO funding shortfall under subsection (1) is subject to the following:

1. The IESO shall not be entitled to collect the IESO funding shortfall from specified consumers before May 1, 2022.

2. The process by which the IESO may recover the IESO funding shortfall shall be established by the Board, having regard to the amount of the IESO funding shortfall from time to time and the [fair allocation calculation].

3. Such other restrictions as may be prescribed.

Transfer of regulatory asset

22xx. (1) The IESO may transfer all or a portion of the regulatory asset to any financing entity under the Financing Plan, which transfer creates the investment asset.

Same

(2) Upon receipt of any payment in consideration for the transfer,

(a) the IESO shall record the payment as a reduction of the IESO funding shortfall in the variance account; and

(b) unless otherwise provided for in this Act, the IESO shall have no further right, title or interest in, or any obligations in respect of, the regulatory asset or in the investment asset created by the transfer.

Confidential Draft

Same

(3) Upon transfer, the financing entity becomes an investment asset owner and acquires an investment interest.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment asset owner of the regulatory asset, and the investment asset created by the transfer shall be immediately vested in the transferee.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Interpretation, investment asset

24xx. If a transfer under this Part provides for the transfer of an investment asset, any references in this Part to the investment interest are deemed to be references to the specific investment interest transferred.

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication:

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

Confidential Draft

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any amounts that all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

No set off, etc.

(2) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, an agent of the investment asset owner or an owner of distribution system assets in the Province;

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Confidential Draft

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with section [xx] of the *Personal Property Security Act*.

Collective action required

(4) If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: Successors may need to be addressed here.]

Transfer of investment interest

26xx. An investment asset owner may transfer all or a portion of its rights and interests in an investment interest to any other investment asset owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the owner of the investment interest acquired a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment asset owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment asset owner shall have priority over any liens in favour of such other persons.

Confidential Draft

Investment asset owner may grant security interest

28xx. (1) An investment asset owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the owner of an investment interest to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment asset owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person who may have commingled such revenues or other proceeds with other funds.

Confidential Draft

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment asset owner or a secured party, order the sequestration and payment of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment asset owner or secured party by any person or entity authorized to collect the clean energy adjustment, defaults on any required remittance of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Same

(3) An order under subsection (1) shall remain in full force and effect despite any bankruptcy, reorganization or other insolvency proceedings with respect to the person or entity who is subject to the order.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

Confidential Draft

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan or in relation to the establishment of the Fair Allocation Plan.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under this section unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[7]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations,

(a) defining any term used in this Act….

(b) prescribing types of payment obligations that constitute funding obligations;

(a) governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment.

(b) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

[7] Note - see s. 51 of the Electricity Act, 1998

Confidential Draft

[Note: reg-making powers to be dealt with in subsequent draft]

PART VII
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

201x. Section 53.1 of the Act would be amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under that Act and engaging in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including the following:

Confidential Draft

1. Entering into contracts and undertakings on behalf of special purpose financing entities, including pre-formation contracts and undertakings and as principal in relation to matters permitted by the *Ontario Fair Hydro Plan Act, 2017* subject to the right of reimbursement from amounts available to the financing entity.

2. Preparing reports on behalf of the financing entity.

3. Enforcing the rights of the financing entity.

4. Signing offering documents as sponsor or otherwise on behalf of the financing entity.

5. Exercising the powers and performing the duties of the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*

6. Issuing non-equity securities in Ontario Power Generation Inc. or on if its subsidiaries, for the purpose of raising funds to acquire debt or equity interests in a financing entity whose activities are limited to the incurrence of funding obligations pursuant to the *Ontario Fair Hydro Plan Act, 2017*.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create one or more subsidiaries, trusts or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

Confidential Draft

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 70 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1)]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Confidential Draft

SCHEDULE 1
ESTIMATED FINANCE AMOUNT

Estimated finance amount

1. The estimated finance amount for a reference period shall be determined by estimating, prior to the start of a reference period, the sum of the following:

1. The sum of all amounts that are payable during the reference period by or on behalf of the investment asset owners to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

2. The sum of all funding costs for the reference period, determined as follows:

    i. Calculate the aggregate of all interest, scheduled principal and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of investment assets owners during the reference period in respect of all funding obligations, including such amounts as may be prescribed.

    ii. Calculate the sum of the aggregate of all amounts received by or on behalf of investment asset owners during the reference period in respect of all funding obligations and such other amounts as may be prescribed.

    iii. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

3. The sum of all amounts payable during the reference period by or on behalf of investment asset owners to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable during the reference period by or on behalf of investment asset owners that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

Confidential Draft

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

1. Calculate the sum of all amounts deposited by or on behalf of investment asset owners during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn by or on behalf of investment asset owners during the reference period from deposits previously made as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

WEEKLY RATE MITIGATION IMPLEMENTATION GROUP
April 6, 2017

Agenda

1) GA Refinancing
    - Legislative Drafting (LSB)
    - OPG Update
    - IESO Update
    - OEB Update

2) Other OFHP Initiatives
    - Affordability Fund (CRED)
    - RRRP, OESP and FN (SNAP)
    - ICI (ESPD)

3) Bill Presentment (SNAP)

4) Update on Action Items / Policy Matrix

Notes:

Implementation of Ontario's Fair Hydro Plan
Week of April 3, 2017

Item	Key Deliverables / Considerations	Timing / Next Steps
1) Refinancing the Global Adjustment (ESP/IGS)		
• ENERGY, LSB, IESO, OPG, OEB, TBS and MOF	• Legislation • Defining mitigation and recovery mechanism; and • Establishing roles for IESO, OPG and OEB • Regulation (amend O.Reg. 95/05) • Shareholder Resolution (work with OPG to determine form) • Third Party Technical Report re Long Lived Assets (TBD) • Accounting opinions from E&Y (OPG) and KPMG (IESO) • Financing: o How long will IESO hold short term liability (weeks/months); o When and how frequently will OPG purchase the asset from IESO; o OPG trust rating agency review and 3rd party lender market sounding (e.g., cost/term, etc); o OPG to confirm if it is considering more than one SPV/subsidiary; o OPG to explore tax considerations; o OPG to indicate how it would determine interest rate on sub-debt; and o OPG to provide amount/frequency of equity required and indicate trigger <u>Recent Action Items</u> **OPG:** • OPG to continue to work with lead banks / rating agencies / OFA on financing issues • OPG to confirm accounting if OFA were to act as lead order on borrowing • OPG to determine who will finance / hold the asset until it goes to the market	• IESO Board meeting on April 11, 2017 (TBD) – ESP to present on OFHP • AG briefing on April 19, 2017 (TBD) • Provide comfort level to allow OEB to include in May 2017 RPP • Approval dates: o TB/LRC on May 1 2017; and o Cabinet on May 3, 2017 • Legislation introduced May 4, 2017. o Opposition Briefing (TBD) • Summer 2017 implementation (June/July). OPG preference for July 1 to align with quarter-end

Item	Key Deliverables / Considerations	Timing / Next Steps
	• OPG to embed OFA/Energy (as necessary) in their ongoing internal discussions • ESPD, IESO and OPG to continue discussions around refining refinancing modelling • OPG /LSB to work through requirements / help draft a shareholder resolution in a form to be determined. OPG to continue to consider requirements for enhanced indemnification for Board member **IESO:** • IESO to work through technical aspects with IT (i.e., operationalizing the back-office functions) • IESO to work with KPMG in the development of a formal opinion once first draft of legislation is available • IESO to discuss LDC issues with OEB **OEB:** • OEB to continue to work with ENERGY to finalize draft comfort letter regarding May 1 – Regulated Price Plan (RPP) and OESP • OEB to draft RPP communique to be released publicly by April 20, 2017 **Legislative Drafting:** • LSB / Blakes will continue to work through legislative drafting issues • LSB has drafted a letter for the Minister to send to LDCs re: contempt of the Legislature. • Legislative walk-through and working group meetings Monday and Tuesday • ENERGY / Blakes / IESO / OEB / OPG to meet on Tuesday to work through issues related to legislation • LSB / Blakes to brief OPCD on legislation • KPMG / E&Y to continue to be informed so that they can eventually confirm we've met all conditions • Blakes / OPG to work through financing issues related to 10% cap • Blakes / LSB to work with MAG on a second constitutional law	

Item	Key Deliverables / Considerations	Timing / Next Steps
	opinion from Peter Hogg • TD being engaged through OFA to provide financial advice • ESP to make presentation on GA financing at upcoming IESO Board meeting <u>Considerations</u> • OEB-RPP Filing in May 2017. OEB may also be required to set new GA rate for RPP-eligible consumers. • Ongoing legal, accounting and financing risk assessments. • Impact on Electricity Sector Dedicated Income.	
2) Broadening Rural or Remote Rate Protection (RRRP) (SNAP)		
• ENERGY, LSB and LDCs	• Legislation • Regulation (TBD) <u>Recent Action Items</u> • SNAP convened LDC working group on March 23rd and March 24th • SNAP to continue to monitor rate hearings for RRRP LDCs • SNAP to collect billing implementation timeline estimates from LDCs <u>Considerations</u> • Consideration of revising definitions of RRRP program for broadening to other LDCs and continue to have current structure in place to provide to existing consumers in Algoma and Remotes. May require separation of RRRP and broader distribution rate protection into separate programs. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF. • Work with LDCs to consider any bill messaging.	• Report back to TB/MBC on May 1, 2017 (TBD) • Fall 2017 implementation (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
3) Expanding Ontario Electricity Support Program (OESP) (SNAP)		
• ENERGY, LSB, MCSS and OEB	• Legislation • Regulation <u>Recent Action Items</u> • SNAP/LSB working on LRC package for OESP enhancements • SNAP to continue to work through OESP automatic qualification with MCSS / OEB • SNAP to continue to work with, MOF, OEB and CRA on OESP wet signature • Board decision this week on removing OESP from bill as of May 1. • SNAP to work with TBS to ensure funds flow from fiscal plan as soon as legislation passes <u>Considerations</u> • OEB has been engaged on implementation timelines for 50% + new eligibility – OEB working with LDCs to ensure systems are upgraded to reflect new credit amounts • Ongoing work with MCSS to auto-enroll those receiving / applying to social programs. Work plan for implementation being developed with OEB support. • As part of legislation / regulatory amendment work, investigating steps required to use OESP variance (approx. $100M) to reduce current OESP charge to zero and continue funding existing program until tax changes in place. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF.	• Report back to TB/MBC on May 1, 2017 (TBD) • LRC on April 10, 2016 • Program in place in 2017 (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
4) Providing a First Nations On-Reserve Delivery Credit (SNAP)		
• ENERGY and LSB	• Legislation • Regulation (TBD) <u>Recent Action Items</u> • SNAP convened LDC working group on March 24th • SNAP to move forward with including COO in FN rate implementation / work through implementation issues. SNAP working to meet with COO to have preliminary discussion of the FNDC • OEB has not posted FN rate report just yet as conversations are ongoing between Ministry on a letter from the Minister to the OEB acknowledging receipt of the report and outlining the plan for implementation <u>Considerations</u> • Work with LDCs on implementation details that need to be captured in legislation. • Legislation required to have program funded by taxpayers. • Technical/governance structures needed to flow taxpayer money to programs. Need to work with IESO/OEB/MOF. • Work with LDCs to consider any bill messaging.	• Report back to TB/MBC by Spring 2017 with final program details, including performance management framework, and clarifying how the programs aligns with the significant OEB estimate of program costs, from $13 million to $20 million • Program in place in 2017 (per Cabinet Minute)

Item	Key Deliverables / Considerations	Timing / Next Steps
5) Establishing an Affordability Fund (CRED)		
• ENERGY, IGS, LSB, Blakes, CSD, OPCD, TBS, MOF and H1 (KPMG and Osler)	• TBC/MBC Submission • Declaration of Trust ("Trust Deed") • Transfer Payment Agreement (TPA) • Administrative Services Agreement (H1-Trust) <u>Recent Action Items</u> • March 23 and 24: Trust Deed and TPA executed. • March 30: Funds transferred to Computershare. <u>Considerations</u> • Legislative changes not required.	**April 7, 2017:** • Briefing for Advisory Committee members **April to May 2017:** • Advisory Committee recommends Board of Trustees by May 31, 2017; Computershare appoints full Board of Trustees **June 2017:** • Trustees expected to engage with distributors, IESO, OEB, others, to define funding criteria and processes. **June 2017:** • Report back to TB/MBC with final program details and a performance management framework including outcome measures and targets **Summer 2017:** • LDCs begin to apply to the Trust for funds **Late 2017/early 2018:** • ENERGY can apply for additional funds through 2018-19 PRRT based on performance and need. Trust term can be extended with amended/new TPA if agreed by Trust

Item	Key Deliverables / Considerations	Timing / Next Steps
6) Expanding ICI (ESP)		
• ENERGY, LSB, IESO and LDCs	• Regulation (amend O.Reg.429/04) • Regulatory Registry (RR) posting <u>Recent Action Items</u> • ESP working to finalize materials for LRC on April 10, 2017 – draft language from leg. Counsel has been shared with ESP staff • Communications finalized TPA with OCC / ESP, CRED and COMMS to consider providing support to CME (outreach with CME ongoing) • ESP to consider implications of dropping below 500kw threshold due to investments in conservation <u>Considerations</u> • Amendments need to be in effect as much in advance of the consumer notification date as possible to impact electricity bills this year (May 31, 2017). • Ongoing outreach with LDCs being undertaken by IESO	• RR posting on the proposed amendment – posted March 9, 2017 for 30 days • LRC on April 10, 2016 • Report back to TB/MBC on May 1, 2017 • Effective April/May 2017 (TBD)
7) Energy Sector Efficiencies (i.e., Ontario Energy Board and IESO) (SNAP / ESP)		
• ENERGY, LSB, OEB and IESO	**OEB:** • Directive / Letter (TBD) <u>Considerations</u> • Signal efficiencies intent in OEB business plan letter • Work with OEB/LDCs on LTEP document and proposed directive to OEB **IESO:** • Directive / Letter (TBD) <u>Considerations</u> • IESO's stakeholder engagement re Market Renewal is ongoing.	• Continue this work as part of LTEP

Item	Key Deliverables / Considerations	Timing / Next Steps
8) Additional Initiatives for Small Business and Industrials (i.e., Class B) (ESP)		
• ENERGY, MEDG, MOF, MOECC, MOL and Small Business	• Identify additional opportunities to assist Class B electricity consumers and small and medium sized manufacturers' <u>Recent Action Items</u> • ESP to work with other ministries regarding other measures that can be considered for SMEs <u>Considerations</u> • TBD	• Report back to TBC/MBC and Cabinet in spring 2017 (per Cabinet Minute)
9) Initiatives for Tenants (SNAP)		
• ENERGY and MOH	• Explore ways to provide direct assistance to tenants that are not sub-metered and do not directly benefit under the existing and proposed rate mitigation programs <u>Considerations</u> • MHO leading any legislative/regulatory changes needed to have tenants benefit from program. Consider whether benefits are limited to 8% and GA (rather than OESP which is harder to provide to tenants who do not pay their bills). • ENERGY working with MCSS to streamline/automate enrollment for ODSP/OW consumers into OESP.	• Report back to TBC/MBC and Cabinet in fall 2017 (Per Cabinet Minute)
10) Stakeholder/Agency Outreach (Communications)		
• ENERGY	• Minister's letters to: o Ratepayers; o LDCs; o Business (e.g., OCC, CME, Concerned Manufactures, etc); and o Agencies (i.e., IESO, OPG, OEB and H1)	• Early-mid March

Item	Key Deliverables / Considerations	Timing / Next Steps
11) Engagement with Officers of the Legislature		
• ENERGY, MOF/OFA, Financial Accountability Officer (FAO)	• Provide FAO staff with a technical briefing on the OFHP	• March 9, 2017: Preliminary discussion • March 14, 2017: Letter received requesting additional information by March 24, 2017 • Ministry preparing responsive materials
• ENERGY, MOF/OFA, Auditor General (AG)	• Provide the AG with a technical briefing on the OFHP	• Preliminary discussion on April 19, 2017 (TBD)
12) Bill Presentment (SNAP/LSB)		
• ENERGY	• Ministry to begin work on bill presentment	• Initial discussion on March 31, 2017

Policy and Legal Foundations for the Proposed Ontario Fair Hydro Plan Act
April 4, 2017

Creating the Regulatory Framework

- Principles will link the benefit of the "Green Generation Initiative" with the regulatory cost that future rate payers will pay
- Need to name and articulate "Green Generation Initiative"

Fair Allocation Plan

- Policy direction around intergenerational funding will be established by the Minister of Energy
- The Fair Allocation Plan has been determined for the 1st four years, as set out in the March 2nd announcement
- Should there be a process around the Fair Allocation Plan [or as necessary]?
- [Role for the OEB?]

Treasury Plan

- Created by OPG to implement the Fair Allocation Plan
- Will pass through actual costs and expenses of funding obligations incurred
- 3 components:
    - Treasury Plan must be compliant with principles and parameters of the Fair Allocation Plan;
    - The Plan must match maturities to allocations under the Fair Allocation Plan, as well as achieve funding efficiencies and cost management articulated in the Fair Allocation Plan; and
    - Implementation
- Should [Minister?] [OEB?] review [and approve?] the Treasury Plan? At what point in process?

Establishment of the Regulatory Asset

- Right to recover from rate payers, through collection by LDCs and IESO, the regulatory charge, late fees, interest established by legislation
- IESO may dispose of (by assignment, transfer, sale, etc.) its right, title and interest in the Regulatory Asset
- Legislation will create property rights and allow for security interests in the Regulatory Asset
- [Role of the OEB in establishing the Regulatory Asset?]
- Role of OPG in acquiring the asset?

Ensuring Collectability

- Clearly defined class of rate payers that receive and pay for the benefit
- Charges are irrevocable
- LDCs have duty to invoice rate payers for the charge
- IESO and LDCs have duty to collect charges as agent and pay remittances to IESO
- IESO has duty to pay remittances to the Regulatory Asset Owner
- Non-by-passability – subject rate payers who opt to go off grid to a penalty (prepayment)?
- True up mechanism to reconcile collections with incurrences
- Province shall not take steps to reduce, alter, impair or terminate the Regulatory Asset or collection

OEB Role

- [Inspect books and records?]

DRAFT

- [Approve administrative costs?]
- [Prudence review of financing costs?]
- [Consequences of OEB review?]
    - Ability to review
    - Ability to review and make recommendations (non-binding)
    - Review and approve or refer back for reconsideration (binding)

Provincial Guarantee

- Scope / Triggers / Consequences / Form

Good evening,
Please find attached the material for discussion tomorrow morning.
Thanks,
Keley

Action Items – April 13, 2017

1) GA Refinancing
    - LSB / Blakes / OPG to ask dealers about whether a rate class can be named as the backstop in legislation instead of individual ratepayers
    - LSB to circulate legislation for review and comment over the weekend
    - OPG Board to meet on May 1 for approval (Committee meetings to occur in advance)
    - TB / MBC to meet at 9am on May 1
    - OEB working to finalize RPP rates and release by April 20
    - OPG to develop note on why we can't revisit the financing structure (51/49)
    - KPMG, E&Y opinions to be provided by May 1
    - Constitutional Law opinion to be provided at a later date
    - 'Navigant Report' tracking for a later date; Ministry and OPG to work together to ensure alignment with internal OPG report for their Board
    - Ministry to work with OFA / TD to support report back to TB / MBC on overall structure and financibility

2) OPG Letter
    - Ministry to turn around comments on letter for end of day April 13

3) Other Items
    - RRRP / OESP / FN Rate
        - Ministry to meet with COO on April 26 re: FN Rate implementation
        - Ministry to develop briefing note on why LDCs with RRRP continue to track to OEB for rate increases
    - ICI
        - CME / OCC outreach continues

4) Other: Ministry to develop deck on bill presentment with high level slides on legislation

Hi John,

I'm cc'ing John Kim on this email chain, as he can be Clara Greco's contact on this from my team.

Thanks,
Ron

Steen/Mike/Ron:

Further to our call, can you identify a member from your team who can work with OPG (Clara Greco) on this joint initiative to establish a process to facilitate the equity injection requirements necessary to support the GA deferral financing.

Thanks

John

Hi Megan and John,

We got a revised forecast from ENE on OREC and on the 2017-18 figure for the electricity support program. Please see attached.

Thanks,
Felix

Hi Keley,

We were on a teleconference with Karen and she mentioned there's a revised

forecast for OREC as a result of the approval of the electricity mitigation package from earlier this week. Do you have the updated forecast that you can share with us, to ensure we are tracking the right numbers as part of the planning process?

Thanks
Felix

Q&A Response

Q. What is the revised cost forecast for the 8% rebate as result of the measures announced in Ontario's Fair Hydro Plan?

Key measures announced in Ontario's Fair Hydro Plan (OFHP) are expected to reduce the cost of the 8% rebate for the Province. The cost to the Province is expected to decrease as the total cost of electricity paid by eligible customers, upon which the rebate is based, will be reduced.

ENERGY has updated the cost forecast for the 8% rebate based upon the following:

- Independent Electricity System Operator updated its Ontario Planning Outlook (OPO) with respect to a typical bill for a residential consumer as outlined in the March 1, 2017 Cabinet Submission. This revised OPO price outlook is inclusive of all the recently announced measures including cancellation of LRP II and EFW and expansion of ICI.

- ENERGY's estimates of the reduction to a typical bill for a residential consumer as a result of the Global Adjustment (GA) refinancing and funding electricity support programs through provincial revenues as announced in the OFHP.

- ENERGY's estimates of the reduction in costs for consumers that benefit from electricity support programs as announced in the OFHP (i.e., expanded Rural or Remote Rate Protection, enhanced Ontario Electricity Support Program and the First Nations Delivery Rebate). For Fiscal Year 2017-2018 this includes a 50% adjustment to the cost given that implementation of the expanded programs is expected to be deferred to September 2017.

	2017-2018	**2018-2019**	**2019-2020**
ENERGY Estimate **(August 26, 2016)** ($ million)	1,006	1,004	944
ENERGY's Revised Cost Estimate **(September 8, 2016)** ($ million)	1,119	1,086	1,171
ENERGY Revised Estimate **(March 15, 2017)** ($ million)	939	882	882
Change: **March 15, 2017** vs **August 26, 2016**	-7%	-12%	-7%
Change: **March 15, 2017** vs **September 8, 2016**	-16%	-19%	-25%

NOTE: The above estimates are subject to variances as result of uncertainties in demand, natural gas prices and other factors. These uncertainties also impact the variance account for the Regulated Price Plan (RPP).

Estimate Assumptions:

	2017	2018	2019	2020
Annual Average Electricity Price, Pre-tax, after Mitigation Programs ($ per month)	127*	120	122	125

***Note:** Value adjusted from $117 to account for deferral of implementation to May 2017 (GA refinancing) and July 2017 (tax-basing electricity support programs).
Source: OPO February 2017 and ENERGY estimates / Cabinet Submission March 1, 2017

	2017-2018	2018-2019	2019-2020	2020-2021
Cost of Expanded Electricity Support Programs in OFHP ($m)	499**	753	829	892

****Note:** Value adjusted from $665 million to account for deferral of implementation to July 2017.
Source: ENERGY estimates / Cabinet Submission March 1, 2017

	Base year
Total volume eligible for rebate (TWh)	71
Residential sector total eligible for rebate (TWh)	42
Portion of residential sector on retail contract (%)	10
Retail Premium: Residential ($/kWh)	0.03
Multi-unit sector total eligible for rebate (TWh)	7
Portion of multi-unit sector on retail contract (%)	10
Retail Premium: multi-unit ($/kWh)	0.02
Commercial sector total eligible for rebate (TWh)	20
Portion of commercial sector on retail contract (%)	26
Retail Premium: Commercial ($/kWh)	0.02
Agricultural sector total eligible for rebate (TWh)	1.9
Residential demand growth (2016-2023)	-0.6%
Commercial demand growth (2016-2023)	0.3%

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act"

Article 1 – Purpose

The Province has and continues to encourage the construction and development of facilities for the long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer, feed in tariff and other similar programs (the "Green Generation Initiative"). The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future electricity consumers in the Province.

The imputed costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment"). The Global Adjustment is included as a charge billed to electricity consumers in their monthly electricity invoices.

The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province under the Green Generation Initiative, which may be higher than prevailing market price for electricity. These differences arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with long-term price certainty for electricity, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. In general, whenever amounts payable under these procurement contracts exceed the market price for electricity, the Green Costs Adjustment passes through the amount of such differences as part of the monthly charge to electricity consumers. Such amount then becomes available to IESO to meet its obligations under the procurement contracts. It has been determined that the useful lives of many of the assets encouraged by the Green Generation Initiative will be well in excess of the respective terms of the related procurement contracts, and in many cases may extend over more than one generation of electricity consumers.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective durations of the procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to Retail Consumers (as defined in Article 2) should be more closely aligned with the benefits that such Retail Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on principles and parameters that establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative equitably across present and future Retail Consumers (the "Fair Allocation Plan").

If the Fair Allocation Plan determines that the equitable allocation of the costs associated with the Green Generation Initiative to the Retail Consumers of a particular time period should be reduced below the amount that currently would be charged based on the Green Costs

Adjustment, then the amount payable by such Retail Consumers and in turn available to IESO will, in the aggregate, be less than the amount payable by the IESO to the generators in respect of such period. In this case IESO will need to obtain funding from another source to cover such a shortfall. If a funding obligation is incurred by IESO to cover such a shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs incurred will become payable in one or more future periods. In order for IESO to obtain a reliable and committed source of cash flows to enable IESO to repay such funding amounts when they become due and payable, this Act imposes irrevocable and non-bypassable financial obligations on Retail Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts. The right and interest in and to collect such financial obligations will take the form of the Regulatory Asset contemplated in this Act, which will constitute property rights and interests. Interests in the Regulatory Asset may be sold and absolutely assigned by IESO to one or more financing entities, which in turn will finance their acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf such financing entities by a financial services agent under the Financing Plan contemplated in this Act. The Financing Plan will seek to reasonably match the payment obligations arising under such funding obligations, to be borne by the future Retail Consumers of the period in which such payment obligations become due, with the benefits of the Green Generation Initiative allocated to such future Retail Consumers under the Fair Allocation Plan.

The purpose of this Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Retail Consumers on an equitable and cost effective basis.

Article 2 - Definitions

In this Act:

> “Absolute Assignee” means a person to whom a Regulatory Asset Owner effects a Disposition.
>
> “Actual” means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Financial Services Agent whose records shall be determinative for the purposes of this Act except to the extent of a manifest calculation error.
>
> “Additional Funding Charges” means, for a Reference Period in respect of an Absolute Assignee, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by or on behalf of the Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Financial Services Agent on behalf of, the Absolute Assignee under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Absolute

Assignee or incurred by on behalf of the Absolute Assignee under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Financial Services Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Absolute Assignee; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager or director fees of a Financing Entity; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (o) any rating agency fees; and (p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith by the Financial Services Agent for recovery and payment under the Financing Plan.

"Allocation Factor" means, in respect of a Retail Consumer for a Reference Period, the number (expressed as a percentage) determined in respect of the Retail Consumer by the OEB based on the application of the Attribution Methodology in respect of the Reference Period.[1]

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owners.

"Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.

"Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to Retail Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"[2] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to individual Retail Consumers of the applicable Retail Consumer Group based on its Allocation Factor.

"Collected Amount Adjustment" means, in respect of a True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the Financial Services

---

[1] Confirm that this will be based on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those may be identified and caught by the True-Up.

[2] This allocation may be volumetric or some combination of a flat amount and a volumetric charge. Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

Agent, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[3]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) and each Pledgee that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.[4]

"Delegate" means the person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of an Investment Interest to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which a Regulatory Asset Owner effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the rate regulated distributor licensed under Part V of the *Ontario Energy Board Act, 1998* in respect of such Service Area, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3), including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by any of a Electricity Distributor (or in its stead, by an Alternative Servicer), by the Servicer or by a Retailer, in each case to a Retail Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to a distribution network in the Electricity Distributor's designated Service Area and in respect of applicable Transition Charges to be charged to the Retail Consumer under this Act.

"Estimate" means (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Financial Services Agent; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to any

---

[3] This would pick up adjustments based on actual collection experience, changes in the retail consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

[4] Consider adding the Financial Services Agent and the Servicer as parties.

Retail Consumer Group, the estimated value (in current dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Act except to the extent of a manifest calculation error.

"Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to Retail Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to Retail Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, for a Reference Period in respect of an Absolute Assignee, the sum (without duplication) of the following amounts that are or become payable during the Reference Period in respect of the Absolute Assignee: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financial Services Agent" means OPG or, following any Replacement Event, such other person or persons who may be appointed as the Financial Services Agent of the Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[5]

[5] Discuss whether to accommodate multiple Financial Services Agents. MOE to consider.

"Financing Entity" means an entity established in accordance with the Financing Plan to acquire all or an interest in the Regulatory Asset as an Absolute Assignee and to enter into Funding Obligations to finance such acquisition under the Financing Plan.[6]

"Financing Plan" means the written plan prepared by the Financial Services Agent on behalf of each Absolute Assignee in compliance with Article 9 to set forth the basis upon which, among other things: (a) any Disposition may be made to, financed by or effected by an Absolute Assignee; (b) any Funding Obligations may be incurred by an Absolute Assignee, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) any Finance Reserve Withdrawals may be made; (i) the establishment and operation of any Financing Entity may be effected; and (j) the cash flows arising from time to time or otherwise derived from an Investment Interest may otherwise be applied, as the same may be amended, amended and restated or terminated by the Financial Services Agent in compliance with Article 9 from time to time.

"Funding Costs" means, for a Reference Period in respect of an Absolute Assignee, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Absolute Assignee during the Reference Period in respect of its Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to its Funding Obligations, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Absolute Assignee under derivatives and any Finance Reserve Withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to the payment of the Funding Costs payable in respect of a Funding Obligation for the Reference Period.

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including each obligation to pay: principal, interest, premiums and other

---

[6] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act.

financing charge payments; pass-through payments; payment obligations arising under or in respect of derivatives; payment obligations owing to service providers, Financial Services Agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all Additional Funding Charges incurred by or on behalf of the Absolute Assignee under the Financing Plan, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.

"Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

"Generator" means a generator of electricity that is subject to the *Electricity Act, 1998*.

"Global Adjustment" has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO" means the Independent Electricity System Operator created pursuant to Part II of the *Electricity Act, 1998*.

"IESO Available Amount" means, for a Reference Period, the lesser of (a) the amount (if any) by which (i) the Maximum Transition Charge Amount for the Reference Period, exceeds (ii) Period Finance Amount for the Reference Period, and (b) the IESO Retained Interest Amount as of the [35th] day prior to the first day of a Reference Period plus any IESO Financing Costs that are due and payable and remain unpaid as of the [35th] day prior to the first day of a Reference Period.

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO during the month pursuant to section • of the *Electricity Act*.

"IESO Financing Costs" means, for a Reference Period, the financing costs (if any) incurred by IESO pursuant to Section 8(4) in order to finance its ownership of the IESO Retained Interest during the Reference Period.

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month[7]; provided that if the amount of any such shortfall is determined to have been based on incomplete information, variances or

[7] This has been recast to recognize that the shortfall in the first 4.5 years could exceed the entire GA amount. A more refined approach to describing the concept may be considered.

estimates that were inaccurate, an adjustment shall be made in determining the amount of any subsequent shortfall for the month in which the inaccuracy is identified.

"IESO Recovery" means each amount remitted to IESO (including by IESO retaining such amount) in respect of the IESO Retained Interest pursuant to Section 5(6)(b), and "IESO Recoveries" means, collectively, all such amounts received by IESO.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Retained Interest" means IESO's right, title and ownership interest (if any) in, to and under the Regulatory Asset, which shall exclude each Investment Interest.

"IESO Retained Interest Amount" means, on a day, (a) the sum of all IESO Funding Shortfalls incurred prior to the day, plus (b) the sum of all IESO Funding Costs incurred prior to the day in accordance with Section 8(4), minus (c) the net proceeds received by IESO from or on behalf of each Absolute Assignee as consideration for the Disposition of each Investment Interest paid to IESO by or on behalf of such Absolute Assignee prior to the day, and minus (d) the IESO Recoveries received by IESO prior to the day.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition, which ownership interest may include (without limitation) ownership of a specified portion on a divided basis of the assets comprising the Regulatory Asset and ownership of an undivided ownership interest in the Regulatory Asset, in each case as may be described in the applicable Disposition Document.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Finance Amounts due and payable by all Absolute Assignees in respect of the month.

"Maximum IESO Recovery" means, for a month, the amount (if any) by which (a) the IESO Remittances for the month, exceed (b) the sum of all Finance Amounts that are due and payable by Absolute Assignees in respect of the month.

"Maximum Transition Charge Amount" means, for a Reference Period, (a) the aggregate amount of Future Fair Share of Green Transition Benefits that are allocable to the applicable Retail Consumer Group in accordance with the Fair Allocation Plan, divided by (b) the applicable Reference Period Length.

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Period Transition Charges" means, for a Reference Period, the sum of (a) the Period Finance Charges for the Reference Period and (b) the IESO Available Amount for the Reference Period.

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Investment Interest.

"Pledgee" means a person to whom an Absolute Assignee grants a Pledge.

"Program End Date" means •, [2047].

"Province" means the Province of Ontario.

"Redemption Amount" means the amount payable by or on behalf of an Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the Measurement Date to (and including) June 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Reference Period Length" means, for a Reference Period, the number of months in the Reference Period.

"Refinancing" means, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Absolute Assignee by applying the net proceeds obtained by the Absolute Assignee incurring one or more other Funding Obligations.

"Regulatory Asset" means the property rights and interests described in Section 6(1), which collectively is comprised of the IESO Retained Interest and each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for the Servicer, any bank account into which IESO deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each of (a) IESO, as owner of (and to the extent of) the IESO Retained Interest and (b) each Absolute Assignee, as owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively IESO and each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in accordance with any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the Absolute Assignee under a Funding Obligation.

"Repayment" means a payment by an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retail Consumer" means:

(a) present and future consumers of electricity in the Province who are (i) consumers designated under section 79.16 of[, and O.Reg 95/05 under,] the *Ontario Energy Board Act, 1998*, or (ii) hold or are deemed to hold an "eligible account" under the *Ontario Rebate for Electricity Consumers Act, 2016*, other than any such consumer who has a contract with a Retailer who uses Retailer Consolidated Billing; and

(b) present and future Retailers who use Retailer Consolidated Billing,

and each case includes all such consumers and Retailers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their

own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.

"Retail Consumer Group" means, in relation to a Reference Period, the Retail Consumers who receive Electricity Invoices during the Reference Period.

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

"Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is licensed to distribute electricity in accordance with the *Electricity Act, 1998*.

"Servicer" means IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last Business Day of any month].

"Transition Charge" means, for a Retail Consumer in respect of a Reference Period, (a) the Period Transition Charge, (b) multiplied by its Allocation Factor in respect of the Reference Period, divided by (c) the applicable Reference Period Length.

"Transition Charge Collection" means any amount received or deemed by this Act to have been received upon the collection of a Transition Charge paid by or on behalf of a Retail Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Financial Services Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment for such related True-Up Period.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 11(2).

Article 3 – Transition Charges

(1) Retail Consumer Obligation to Pay a Transition Charge – Each Retail Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such Retail Consumer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Retail Consumers** – Until paid, a Transition Charge charged to a Retail Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the Retail Consumer to the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset. Such indebtedness shall constitute a single and separate[8] debt obligation owing by the Retail Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Retail Consumer under the Electricity Invoice or otherwise.[9]

(3) **No Set-Off or Reduction** – A Retail Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Retail Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) **Allocation of Retail Consumer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Retail Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the Financing Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 9(3)) are deemed to be irrevocable, final and effective without any further action, except to the extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, whether or not the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a Retail Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued

---

[8] Determine if this is critical for rating and markets. Logistics under consideration.

[9] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consider if it is helpful to integrate the existing regulatory scheme for invoicing and collections (regarding RPP) in the legislation.

by the Electricity Distributor or if applicable by the Alternative Servicer to the Retail Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable Retail Consumer.

(2) **Calculation of the Period Transition Charge** – Not later than [35] days prior to the first day of a Reference Period, each Absolute Assignee (or the Financial Services Agent on its behalf) shall provide the OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. [35] days prior to the first day of a Reference Period, IESO or Successor IESO if applicable shall specify the IESO Retained Interest Amount and any IESO Financing Costs that are due and payable and remain unpaid on such day. Not later than one month prior to the first day of a Reference Period, the OEB shall calculate the Period Transition Charge applicable to the Reference Period based on the calculations and information set forth in such written notices received from the Absolute Assignees and based on such amounts specified by IESO or Successor IESO, which calculations, information and amounts shall be determinative, except to the extent of manifest calculation error or misstatement.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the OEB shall apply the Attribution Methodology to determine the Allocation Factor for each Retail Consumer of the applicable Retail Consumer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the OEB shall inform each Electricity Distributor and if applicable any Alternative Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each Retail Consumer of the applicable Retail Consumer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge charged to a Retail Consumer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, except to the extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative

Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Servicer to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(9) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to Retail Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure.

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Servicer to ensure that Transition Charges are properly charged to Retail Consumers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable][10] efforts to collect amounts owing by Retail Consumers in respect of Transition Charges charged to such Retail Consumers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from Retail Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.[11] Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners.

(3) **Electricity Distributor Remittances** – On each applicable Remittance Date, an Electricity Distributor shall remit all Transition Charge Collections received by it from Retail Consumers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

---

[10] Mirror collection “standard of care” under applicable legislation.

[11] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable] efforts to accept and collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from Retail Consumers that pay their Electricity Invoices directly to IESO.[12]

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall promptly segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners.

(6) **IESO Remittances** – On each Settlement Date[13], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account (a) first, to or to the account of the Absolute Assignees an amount equal to the Investment Remittance for the related month and (b) second, to IESO (including by IESO retaining such amount) an amount equal to the lesser of (i) the Maximum IESO Recovery for the related month and (ii) the IESO Retained Interest Amount as of the Settlement Date.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO Successor** – IESO Successor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[14], then such person shall, if requested by the Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to Retail Consumers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Retail Consumers as provided in this Act; (c) exercise all enforcement rights of the Absolute Assignees for the benefit of an Absolute Assignee; and (d) remit any Transition Charge Collections to the Absolute Assignees or Pledgees, as applicable, each in accordance with its Investment Interest.

---

[12] Consider building this obligation into a deemed condition of licence for the IESO.

[13] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

[14] This is in anticipation of a possible future restructuring of the distribution system.

(10) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Alternative Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Retail Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Absolute Assignees.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Retail Consumer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[15]

(13) **Sequestration** – If any Electricity Distributor, IESO, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the Absolute Assignees or Pledgees, shall order the sequestration and payment of the Transition Charge Collections, Electricity

[15] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a Retail Consumer reduces its payment of Transition Charges, despite this language. Same for Electricity Distributor Remittances and IESO Remittances.

Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Absolute Assignees, each with respect to its Investment Interest, and the Pledgees as applicable.[16]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a current and irrevocable property right and interest consisting, collectively, of the following rights and interests (without duplication):

a. the right of IESO (i) to record its IESO Retained Interest in its accounts in accordance with Section 8(1), having a stated amount from time to time equal to the IESO Retained Interest Amount; and (ii) to receive IESO Recoveries from time to time in accordance with Section 5(6)(b);

b. the right to impose, bill, invoice, collect and receive Transition Charges from Retail Consumers, including the right to determine the amount of Transition Charges in accordance with this Act;

c. the right to enforce the obligations and indebtedness of each Retail Consumer to pay the Transition Charges charged to the Retail Consumer from time to time in accordance with Article 3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5;

f. the right to enforce the duties and obligations of IESO and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the

[16] Consider adding or substituting this provision for a right to appoint a receiver.

Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 5;

g. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. all Related Rights; and

j. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province or any consent requirement applicable to a Disposition that may arise by operation of any applicable law of the Province, a Disposition by IESO to an Absolute Assignee made under the Financing Plan, or by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under the applicable Investment Interest (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof, and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in the Investment Interest subject to the Disposition, including all rights under the Investment Interest arising after such Disposition.

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and

the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province or any consent requirement applicable to a Pledge that may arise by operation of any applicable law of the Province, a Pledge by an Absolute Assignee may be made to secure any related Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the related Investment Interest in accordance with the terms of the Pledge. Other than as required by the Financing Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected pursuant to the PPSA.[17] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. Subject to the terms of the Collective Action Agreement, a Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. All provisions of the PPSA shall apply to the Regulatory Asset on the basis that it is intangible personal property, except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document, in each case under the Financing Plan. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

---

[17] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

(8) **Collective Action Required** – If a Regulatory Asset Owner's rights and interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective and coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.

Article 7 – Establishment of the Fair Allocation Plan[18]

(1) Adoption of the Fair Allocation Plan – The Delegate may, [by written declaration,] designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Act, except if amended, amended and restated or terminated by a further written declaration made by the Delegate in compliance with Section 7(4).

(2) Principles and Parameters – A Fair Allocation Plan shall seek to allocate Future Fair Share of Green Transition Benefits across present and future Retail Consumer Groups on a basis that the Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters:

1. Future Fair Share of Green Transition Benefits should be allocated over the period ending on the Program End Date.

2. The Fair Allocation Plan should specify the Reference Periods for the purpose of identifying applicable Retail Consumer Groups and allocating Future Fair Share of Green Transition Benefits among them on a relative basis over time.

3. The share of Future Fair Share of Green Transition Benefits allocable to a particular Retail Consumer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Retail Consumer Group over such Reference Period.

4. The share of Future Fair Share of Green Transition Benefits to be allocated to a Retail Consumer Group and any future Retail Consumer Group at a particular time should not exceed the Estimated Future Green Transition Benefits, measured in respect of the Reference Periods following such particular time and to the Program End Date.

5. No future Retail Consumer Group should be allocated an unreasonably disproportionate share of Estimated Future Green Transition Benefits. Except in exceptional circumstances or in the case of any reallocation of an Over-Assessed Amount as contemplated in 7, below, the Future Fair Share of Green Transition Benefits to be allocated under a Fair Allocation Plan to any future

18 The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current procurement contracts and not invest in extending service lives to secure further procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

Retail Consumer Group should have regard to *[Insert formula if a year-over-year maximum amount is determined to be appropriate]*.

6. The time value of money should be reflected in the Fair Allocation Plan, in order to equate the relative values of the nominal allocations of Future Fair Share of Green Transition Benefits, calculated in current dollars, to future Retail Consumer Groups over time.

7. To the extent there has been an Over-Assessed Amount, the Fair Allocation Plan may determine that an adjustment should fairly be made to rebate Retail Consumers for such an amount, by reducing the costs otherwise attributable under the Act to such Retail Consumers. The relative costs of the Green Generation Initiative are reflected under the Act by the attribution of Transition Charges to such Consumer Groups, based on the Financing Plan seeking to track the allocations of benefits under the Fair Allocation Plan. Accordingly, the Maximum Transition Charge Amount determined for one or more Retail Consumer Groups having regard to the Fair Allocation Plan otherwise applicable may be appropriately reduced to recognize the effect of the Over-Assessed Amount. In such a case, a determination to reduce the Maximum Transition Charge Amount applicable for certain related Reference Periods should have regard to the principle that the corresponding rebate should be extended to benefit the Consumer Group or Consumer Groups in closest proximity to the Legislative Implementation Date.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify the Attribution Methodology for the purposes of allocating the Period Transition Charges across the Retail Consumers of a particular Retail Consumer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that is considered by the Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation.

(4) **Amendments of the Fair Allocation Plan** – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation and (b) comply with any restrictions or limitations specified with respect thereto in any Funding Obligation.

Article 8 – The IESO Retained Interest

(1) **Maintain Books of Account** – IESO may maintain books of account to record the IESO Retained Interest Amount and all adjustments thereto from time to time. Such books of account shall be determinative with respect to the amount of IESO's related regulatory asset.

(2) **Limitation on Additions** – IESO shall not record additions to the IESO Retained Interest Amount in respect of IESO Funding Shortfalls (a) if such additions are restricted by the terms of any Disposition Document or the Collective Action Agreement, or (b) on or after •, 2017.

(3) **Dispositions** – IESO may effect a Disposition to an Absolute Assignee if (a) the Absolute Assignee has or will concurrently become bound by the Collective Rights Agreement; (b) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; (c) the Financial Services Agent confirms in writing that the Disposition is permitted under the Financing Plan; and (d) the net proceeds payable to IESO from the sale of the related Investment Interest would not exceed the IESO Retained Interest Amount immediately before the time of such Disposition.

(4) **No Continuing Interest in any Investment Interest** – IESO shall have no continuing right or interest in any Investment Interest subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party and IESO shall not assert any such right or interest or take or omit to take any action to exercise or enforce its rights or interests under the IESO Retained Interest if such action or omission would impede or obstruct the rights of any Absolute Assignee or a Pledgee to enforce its rights and interests in any Investment Interest, except if IESO is expressly permitted to take or omit to take such action, respectively, under the related Disposition Document or the Collective Rights Agreement.

(5) **IESO Financing Costs** – IESO shall be entitled in good faith to incur reasonable financing costs (including interest and other reasonable financing charges) reflecting market terms and conditions and which are payable in arrears, in order to finance its ownership of the IESO Retained Interest from time to time.

(6) **IESO Recoveries** – IESO shall, in respect of a month, be entitled to receive from IESO Remittances on a related Settlement Date the amount (if any) available to IESO under Section 5(6)(b).

Article 9 – The Financing Plan

(1) **Power to Prepare, Implement and Amend the Financing Plan** – The Financial Services Agent shall be authorized to prepare, implement and amend the Financing Plan. If the Financial Services Agent is unwilling or unable to prepare and propose the adoption of the Financing Plan, the Delegate may by written declaration designate one or more other persons who shall be authorized to prepare, implement and amend the Financing Plan.

(2) **Terms and Conditions of the Financing Plan** – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions. The Financing Plan shall have regard to the principles and parameters set forth in Schedule 3 and such other conditions and requirements as may be specified in a written declaration of the Delegate or in accordance with the Regulation.

(3) **OEB Approval** – Any Additional Funding Charge payable to or for the benefit of the Financial Services Agent shall be subject to review and approval by the OEB.

(4) **OEB Review** – The OEB [shall] undertake an annual review of the records maintained by the Financial Services Agent for the purpose of confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan.

(5) Replacement of the Administrative Agent – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the Administrative Agent shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services Agent under the Financing Plan. If the Financial Services Agent is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services.

(6) Obligation to Apply IESO Remittances – The Financial Services Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Absolute Assignees, or otherwise in respect of or as proceeds from an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose.

(7) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, any Alternative Collection Agent, the Financial Services Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(8) Incurrences are Binding – Notwithstanding anything to the contrary in this Act, each Disposition made to or by an Absolute Assignee and all amounts payable or becoming due and payable by or on behalf of an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation, shall be binding for the purposes of this Act, including in determining the amount of related Transition Charges, despite any impairment or defect resulting from such failure.

[Article 10 – Compliance Matters[19]

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Act, the OEB shall have the right, jurisdiction, power and authority to examine the books and records of *[Insert names if any]*.

(2) [OPG's Rate Settings – When setting other rates for or in respect of OPG, the OEB shall not take into account (a) the administrative or servicing fees charged by OPG as Financial Services Agent [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services]; (b) the cost consequences to OPG of being the Financial Services Agent; or (c) the consequence of OPG

[19] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article and any potential role for the Auditor General is still under consideration.

consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.][20]

Article 11 – Undertaking of the Lieutenant Governor in Council[21]

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The [Lieutenant Governor in Council] shall not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Retail Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly, including through the introduction of any bill or the passing of any legislation or regulation having such effect. The amount of Transition Charges determined under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council, including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(2) **Undertaking and Agreement** – The [Lieutenant Governor in Council] shall not:

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

(b) except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the Absolute Assignees or any Pledgee from time to time;

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment , amendment and restatement or termination would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, Successor IESO shall be established to perform such obligations.

---

[20] As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as Administrative Agent of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role.

[21] Under consideration, including the dealers' request for a "servicer guarantee" and a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes.

(4) **Compensation for Failure** – Absolute Assignees shall be compensated for any losses suffered by them as a result of any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article 11.[22]

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid.

(6) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 12 – Regulations

Regulations may be made under this Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 13- Miscellaneous[23]

---

[22] Requested by Torys. For discussion.

[23] OPG would like the specific amendments related to OPG to be included in the Bill.]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Act shall be required with respect to the actions to be taken in compliance with this Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Act, if any provision of this Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Act that is taken by any person who is or may become obligated or have duties that arise under this Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Act are intended to be severable and that the Legislature would have enacted this Act even if any Article, Section, paragraph or subparagraph of this Act held to be unconstitutional or invalid had not been included in this Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3[24]

Principles and Parameters for Establishing the Financing Plan

The following principles and parameters provide a guideline as to what a Financing Plan should address:

(1) in respect of each Reference Period, make reference to the allocations of Future Fair Share of Green Transition Benefits to each Reference Group contemplated by the Fair Allocation Plan;

(2) estimate IESO Funding Shortfalls for each Reference Period;

(3) consider alternative funding arrangements suitable to fund the estimated IESO Funding Shortfalls, including short term and/or long term Funding Obligations;

(9) consider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that payments made for a Reference Period reasonably correspond to the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

(4) if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Retail Consumer Group under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(5) reflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical Retail Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology);

(6) incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Absolute Assignees will require committed access to short term liquidity to cover estimated IESO Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of

[24] Awaiting input from Torys based on OPG mark-up of Financing Plan sections.

Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Financial Services Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations should not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Financial Services Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Financial Services Agent shall cause the applicable Absolute Assignee to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Financial Services Agent will select counterparties under any transaction to be entered into by an Absolute Assignee, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Financial Services Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Financial Services Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the IESO Funding Shortfalls from time to time on a basis that is consistent with the allocations of Future Fair Share of Green Transition Benefits to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Financial Services Agent and other agents and service providers to the Absolute Assignees may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by an Absolute Assignee, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) describe the requirements applicable to any special purchase entity that will purchase an Investment Interest, including proposed capitalization, governance, and restrictions on their powers and activities; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act" ~~– Part V.2~~

Article 1 – Purpose[1]

~~IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as~~The Province has and continues to encourage the construction and development of facilities for the ~~purpose of~~ long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer ~~and~~, feed in tariff and other similar programs (the "Green Generation Initiative"). ~~[The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets]; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers.~~ The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ~~ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging consumers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).~~electricity consumers in the Province.

The imputed costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment"). The Global Adjustment is included as a charge billed to electricity consumers in their monthly electricity invoices.

~~Each month, the IESO determines the Global Adjustment payable by consumers for the consumption~~The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province~~. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts~~ under the Green Generation Initiative, which may be higher than prevailing market price for electricity. These differences arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with long-term price certainty for electricity, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. In general, whenever amounts payable under these procurement contracts exceed the market price for electricity~~ for the quantities of electricity specified under the Power Contracts for the relevant period[2]. The relationship between the past, present and future benefits to Ratepayers from~~, the Green Costs Adjustment passes through the amount of such differences as part of the monthly charge to electricity consumers. Such amount then becomes available to IESO to meet its obligations under the procurement contracts. It has been determined that the useful lives of many of the assets encouraged by the Green Generation Initiative~~, on the one hand, and the costs of~~ will be well in

[1] ~~Consider the scope and breadth of the Purpose section. This text is considered to be useful to establish the legislative basis for the statute, which text will be useful in the event of a challenge.~~

[2] ~~Consider modifying this to also refer to gas contracts and hydroelectric contracts, which provide for mechanics that are not based on contracts for differences.~~

excess of the respective terms of the related procurement contracts, and in many cases may extend over more than one generation of electricity consumers.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative ~~borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect~~will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective durations of the procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to Retail Consumers (as defined in Article 2) should be more closely aligned with the benefits that such Retail Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on principles and parameters that ~~can be applied from time to time in order to~~ establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative ~~across present and future Ratepayers. A plan to allocate such costs and benefits~~ equitably across present and future ~~Ratepayers may be developed based on those principles and parameters (a~~Retail Consumers (the "Fair Allocation Plan").

If ~~a~~the Fair Allocation Plan determines that the equitable allocation of the ~~Global Adjustment to the Ratepayers~~costs associated with the Green Generation Initiative to the Retail Consumers of a particular time period ~~in respect of the Power Contracts~~ should be reduced below the amount ~~otherwise determined,~~that currently would be charged based on the Green Costs Adjustment, then the amount payable by such ~~Ratepayers to Electricity Distributors in respect of such period,~~Retail Consumers and in turn ~~by the Electricity Distributors to the~~available to IESO~~, would~~ will, in the aggregate, be less than the amount payable by the IESO to the ~~Generators under the Power Contracts~~generators in respect of such period. ~~If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall.[3] In order for IESO to cover such a funding shortfall for a period,~~In this case IESO will need to obtain funding from another source~~, which could include funding from third party sources operating in public and private capital markets~~ to cover such a shortfall. If a funding obligation is incurred ~~in order to enable the~~by IESO to cover such a ~~funding~~ shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs ~~will be~~ incurred ~~and may~~will become payable in one or more ~~other~~future periods. ~~It will be necessary to provide~~In order for IESO to obtain a reliable and committed source of cash flows to enable IESO to repay such funding ~~obligations and to pay related funding costs with certainty when the funding obligations~~amounts when they become due and payable~~. This Part~~, this Act imposes irrevocable and non-bypassable financial obligations ~~of Ratepayers~~on Retail Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts . The right and interest in and to collect such financial obligations~~, which~~ will take the form of the Regulatory Asset contemplated in this ~~Part and~~Act, which will constitute property rights and interests. ~~The~~Interests in the Regulatory Asset ~~will~~may be sold and absolutely assigned ~~and will belong~~by IESO to one or more~~ newly created~~ financing entities, which in turn will finance their ~~purchase of such Regulatory Asset~~acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf ~~the~~such financing entities by ~~an administrative~~a financial services agent~~ (initially OPG),~~ under the Financing Plan

~~[3] Confirm whether any RPP forecasting variance is to be included in (i) a funding shortfall; and (ii) related IESO financing costs to be included in Transition Charges.]~~

contemplated in this ~~Part~~Act. The Financing Plan will seek to reasonably match the payment obligations arising under such funding obligations ~~and~~, to be borne by the future ~~Ratepayers~~Retail Consumers of the period in which such payment obligations become due, with the ~~costs and~~ benefits of the Green Generation Initiative ~~charged~~allocated to such future ~~Ratepayers~~Retail Consumers under the Fair Allocation Plan.

The purpose of this ~~Part~~Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future ~~Ratepayers~~Retail Consumers on an equitable and cost effective basis.

Article 2 - Definitions

In this ~~Part~~Act:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the ~~Administrative~~Financial Services Agent whose records shall be determinative for the purposes of this ~~Part in~~Act except to the ~~absence~~extent of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period in respect of an Absolute Assignee, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by ~~the Regulatory Asset Owners~~or on behalf of the Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the ~~Administrative~~Financial Services Agent on behalf of, ~~a Regulatory Asset Owner~~the Absolute Assignee under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on ~~a Regulatory Asset Owner~~the Absolute Assignee or incurred by on behalf of ~~a Regulatory Asset Owner~~the Absolute Assignee under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the ~~Administrative~~Financial Services Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of ~~a Regulatory Asset Owner~~the Absolute Assignee; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager ~~of~~or director fees of a Financing Entity; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (o) any rating agency fees; and (p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in

good faith by the Financial Services Agent for recovery and payment under the Financing Plan.

~~"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Financing Plan in compliance with the requirements set out in Schedule 2.~~

"Allocation Factor" means, in respect of a ~~Ratepayer~~Retail Consumer for a Reference Period, the number (expressed as a percentage) determined in respect of the ~~Ratepayer~~Retail Consumer by ~~[IESO]~~the OEB based on the application of the Attribution Methodology in respect of the Reference Period.[4][1]

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owners.

"Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.

"Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to Retail Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"[5][2] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to ~~the~~ individual ~~Ratepayers~~Retail Consumers of the applicable ~~Ratepayer~~Retail Consumer Group based on its Allocation Factor.

~~"Bypass Charge" means [To be developed].~~[6]

"Collected Amount Adjustment" means, in respect of a ~~Reference~~True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the ~~Administrative~~Financial Services Agent, as applicable, equal to (a) the Estimate of the

[4] ~~Consider basing~~[1] Confirm that this will be based on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those ~~would~~may be identified and ~~rolled into~~caught by the True-Up.

[5] ~~A key question will be how the overall costs will be spread across the rate base. For example, the~~[2] This allocation may be volumetric ~~or not,~~ or some combination of a flat amount and a volumetric charge. ~~This will also impact any discussion regarding any bypass (e.g., grid exit) charge in connection with the bypass discussion~~Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

[6] ~~Consideration needs to be given to any amount that will be charged to a ratepayer who successfully bypasses (e.g., leaves the grid). In allocating Transition Charges, considerations would include whether to reserve Bypass Charges and spread them over the life of the program, and correspondingly how to factor those into the calculation of Transition Charges.~~

Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.~~7~~[3]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) and each Pledgee that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.[4]

"Delegate" means the person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of ~~all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset~~an Investment Interest to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which a Regulatory Asset Owner effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the rate regulated distributor licensed ~~by the OEB~~under Part V of the *Ontario Energy Board Act, 1998* in respect of such Service Area, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by ~~an~~any of a Electricity Distributor (or in its stead, by an Alternative Servicer)~~ or~~, by the Servicer or by a Retailer, in each case to a Retail Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to a distribution network in the Electricity Distributor's designated Service Area and in respect of applicable Transition Charges to be charged to the Retail Consumer under this Act.

"Estimate" means~~,~~ (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the ~~Administrative Agent~~Financial Services Agent; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to any Retail Consumer Group, the estimated value (in current

[3] This would pick up adjustments based on actual collection experience, changes in the ~~Consumer Base~~retail consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

[4] Consider adding the Financial Services Agent and the Servicer as parties.

dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this ~~Part in~~Act except to the ~~absence~~extent of a manifest calculation error.

"~~Fair Allocation Plan" [has the meaning given in Article 1].~~Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to Retail Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to Retail Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, ~~in respect of~~for a Reference Period in respect of an Absolute Assignee, the sum (without duplication) of the following amounts ~~for~~that are or become payable during the Reference Period in respect of the Absolute Assignee: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.~~"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owners during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owners under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.~~

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financial Services Agent" means OPG or, following any Replacement Event, such other person or persons who may be appointed as the Financial Services Agent of the

Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[5]

"Financing Entity" means an entity established in accordance with the Financing Plan to acquire all or an interest in the Regulatory Asset as an Absolute Assignee and to enter into Funding Obligations to finance such acquisition.[8] under the Financing Plan.[6]

"Financing Plan" means the written plan [prepared by the Administrative Agent]Financial Services Agent on behalf of each Absolute Assignee in compliance with Article 89 to set forth the basis upon which, among other things: (a) any Disposition may be made to, financed by or effected by an Absolute Assignee; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfallby an Absolute Assignee, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) any Finance Reserve Withdrawals may be made; (i) the establishment and operation of any Financing Entity may be effected; and (ij) the cash flows arising from time to time or otherwise derived from the Regulatory Assetan Investment Interest may otherwise be applied, as the same may be amended, amended and restated or terminated by the Financial Services Agent in compliance with Article 9 from time to time.

"Funding Costs" means, for a Reference Period in respect of an Absolute Assignee, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset OwnerAbsolute Assignee during the Reference Period in respect of allits Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to aits Funding ObligationObligations, exceeds (b) the aggregate of all Finance Receiptsamounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Absolute Assignee under derivatives and any Finance Reserve Withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to the payment of the Funding Costs payable in respect of a Funding Obligation for the Reference Period.

[5] Discuss whether to accommodate multiple Financial Services Agents. MOE to consider.

[8] OPG has suggested[6] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act. These raise issues for consideration by the stakeholders.

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including each obligation to pay: principal, interest, premiums and other financing ~~charges, indebtedness,~~charge payments; pass-through payments; payment obligations arising under or in respect of derivatives~~,~~; payment obligations owing to service providers, ~~administrative agents~~Financial Services Agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all ~~taxes payable in connection with the foregoing)~~Additional Funding Charges incurred by or on behalf of ~~a Regulatory Asset Owner~~the Absolute Assignee under the Financing Plan ~~in order to fund a Funding Shortfall for a Reference Period~~, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.[9]

~~"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.~~[10]Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

~~"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment [attributable to the Power Contracts] in accordance with the Fair Allocation Plan.~~[11]

"Generator" means a generator of electricity that is subject to ~~[this~~the *Electricity Act*~~]~~[12]~~.~~, *1998*.

"Global Adjustment" ~~means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.~~[13]has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" ~~[~~has the meaning given in Article ~~1]~~.1.

~~[9] OPG has asked whether this should include IESO finance arrangements.~~

~~[10] Consider whether to simplify by referring to the calculations of GA, with vs. without Fair. The issue would be that Fair is then linked into the GA calculation specifically, rather than to the specific assets that are subject to revised amortization under Fair. The constitutional position requires a clear nexus to the assets. Also, confirm whether RPP forecasting variances are to be included.~~

~~[11] IESO to confirm its ability to allocate a shortfall in a given month between what it receives and what it owes under the GA, in order to calculate (a) existing volume-based variances which are rolled into subsequent month GA and trued-up every 6 months under RPP, (b) existing variances attributable to OREC which are funded by the Province, and (c) new variances attributable to Fair Hydro program.]~~

~~[12] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*. "Generator is a defined term in other legislation (OEB Act, Electricity Act) so this should ultimately be a distinct term such as "FH Generator" to avoid confusion.~~

~~[13] Note that if adjustments for Fair Hydro program are to be applied after existing GA adjustments, then this may need a new name (such as "FH Adjustment").~~

"IESO" means the Independent Electricity System Operator created pursuant to ~~[insert].~~Part II of the *Electricity Act, 1998*.

"IESO ~~Applied Surplus~~Available Amount" means, for a Reference Period, the lesser of (a) the amount~~,~~ (if any~~,~~) by which (i) the ~~IESO Power Contract Net Payment~~Maximum Transition Charge Amount for the Reference Period, exceeds (ii) ~~the GA Power Contract Contribution~~Period Finance Amount for the Reference Period, and (b) the IESO ~~Unapplied Surplus on the last day of the immediately preceding Reference Period.~~ Retained Interest Amount as of the [35th] day prior to the first day of a Reference Period plus any IESO Financing Costs that are due and payable and remain unpaid as of the [35th] day prior to the first day of a Reference Period.

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO during the month pursuant to section • of the *Electricity Act*.

"IESO Financing Costs" means, for a Reference Period, the financing costs (if any) incurred by IESO pursuant to Section 8(4) in order to finance its ownership of the IESO Retained Interest during the Reference Period.

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month[7]; provided that if the amount of any such shortfall is determined to have been based on incomplete information, variances or estimates that were inaccurate, an adjustment shall be made in determining the amount of any subsequent shortfall for the month in which the inaccuracy is identified.

"IESO ~~Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.~~Recovery" means each amount remitted to IESO (including by IESO retaining such amount) in respect of the IESO Retained Interest pursuant to Section 5(6)(b), and "IESO Recoveries" means, collectively, all such amounts received by IESO.

~~"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators under all Power Contracts for the Reference Period.~~

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative

[7] This has been recast to recognize that the shortfall in the first 4.5 years could exceed the entire GA amount. A more refined approach to describing the concept may be considered.

Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO ~~Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for [managing the Province's power system].~~Retained Interest" means IESO's right, title and ownership interest (if any) in, to and under the Regulatory Asset, which shall exclude each Investment Interest.

"IESO Retained Interest Amount" means, on a day, (a) the sum of all IESO Funding Shortfalls incurred prior to the day, plus (b) the sum of all IESO Funding Costs incurred prior to the day in accordance with Section 8(4), minus (c) the net proceeds received by IESO from or on behalf of each Absolute Assignee as consideration for the Disposition of each Investment Interest paid to IESO by or on behalf of such Absolute Assignee prior to the day, and minus (d) the IESO Recoveries received by IESO prior to the day.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition, which ownership interest may include (without limitation) ownership of a specified portion on a divided basis of the assets comprising the Regulatory Asset and ownership of an undivided ownership interest in the Regulatory Asset, in each case as may be described in the applicable Disposition Document.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Finance Amounts due and payable by all Absolute Assignees in respect of the month.

"Maximum IESO Recovery" means, for a month, the amount (if any) by which (a) the IESO Remittances for the month, exceed (b) the sum of all Finance Amounts that are due and payable by Absolute Assignees in respect of the month.

"Maximum Transition Charge Amount" means, for a Reference Period, (a) the aggregate amount of Future Fair Share of Green Transition Benefits that are allocable to the applicable Retail Consumer Group in accordance with the Fair Allocation Plan, divided by (b) the applicable Reference Period Length.

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"~~IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net~~

~~Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.~~ Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period ~~Transition Charge~~Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Period Transition Charges" means, for a Reference Period, the sum of (a) the Period Finance Charges for the Reference Period and (b) the IESO Available Amount for the Reference Period.

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by ~~a Regulatory Asset Owner~~the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the ~~Regulatory Asset~~Investment Interest.

"Pledgee" means a person to whom ~~a Regulatory Asset Owner~~an Absolute Assignee grants a Pledge.

"~~Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.~~[14]Program End Date" means •, [2047].

"Province" means the Province of Ontario.

~~"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.~~[15]

[14] ~~Consider expanding to include PPAs that are not contracts for differences. Should this contemplate the possibility of additional or amended power contracts?~~

[15] ~~Need to describe consumers in a fashion that is broad and not weakened by a bypass risk. Consider terminology to align with the description of the eligible customer class provided by the Ministry, e.g., same as OREC-eligible consumers except for consumers served by Independent Power Authorities (who do not pay GA). Also, consider use of the word "retail", to avoid limiting to customers of retailers and confirm removal of reference to transmission-connected customers.~~

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices[16] during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owneran Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation ImplementationMeasurement Date] to (and including) June 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Reference Period Length" means, for a Reference Period, the number of months in the Reference Period.

"Refinancing" means that a, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of a Regulatory Asset Ownerthe Absolute Assignee by applying the net proceeds obtained by the Regulatory Asset OwnerAbsolute Assignee incurring one or more other Funding Obligations.

"Regulatory Asset" means the property rightrights and interestinterests described in Section 6(1), or if the context requires, a specified portion or undivided interest in such property right and interest that is described in the applicable Disposition Documentwhich collectively is comprised of the IESO Retained Interest and each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for the Servicer, any bank account into which the ServicerIESO deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each of (a) IESO, as owner of (and to the extent that it has retained any ownership interest in, to or under the Regulatory Assetof) the IESO Retained Interest and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Assetas owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively all of the Regulatory Asset OwnersIESO and each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7). For greater certainty, where one Regulatory Asset Owner owns the entirety of the Regulatory Asset, "Regulatory Asset Owners" refers to this Regulatory Asset Owner.

[16] Expand to include eligible consumers who are not customers of Electricity Distributors (e.g., suite-metered customers).

~~"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.~~

"Related Rights" means~~, with respect to a Regulatory Asset Owner's Regulatory Asset,~~ all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in ~~relation to~~accordance with any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the ~~Regulatory Asset Owner~~Absolute Assignee under a Funding Obligation.

"Repayment" means a payment by ~~a Regulatory Asset Owner~~an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retail Consumer" means:

(a) present and future consumers of electricity in the Province who are (i) consumers designated under section 79.16 of[, and O.Reg 95/05 under,] the *Ontario Energy Board Act, 1998*, or (ii) hold or are deemed to hold an "eligible account" under the *Ontario Rebate for Electricity Consumers Act, 2016*, other than any such consumer who has a contract with a Retailer who uses Retailer Consolidated Billing; and

(b) present and future Retailers who use Retailer Consolidated Billing,

and each case includes all such consumers and Retailers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.

"Retail Consumer Group" means, in relation to a Reference Period, the Retail Consumers who receive Electricity Invoices during the Reference Period.

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

"Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is licensed to distribute electricity in accordance with ~~[this~~the *Electricity Act*[17]~~]~~, *1998*.

"Servicer" means ~~[To be determined]~~IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset ~~Owner [To be determined – collective invoicing agent, and consider expanding].~~Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last Business Day of any month].

"Transition Charge" means, for a ~~Ratepayer~~Retail Consumer in respect of a Reference Period, ~~the sum of~~ (a) ~~[one sixth] of~~ the Period Transition Charge, (b) multiplied by its Allocation Factor ~~and (b) any Bypass Charge charged to the Ratepayer~~ in respect of the Reference Period, divided by (c) the applicable Reference Period Length.

"Transition Charge Collection" means any amount received or deemed by this ~~Part~~Act to have been received upon the collection of a Transition Charge paid by or on behalf of a ~~Ratepayer~~Retail Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the ~~Administrative~~Financial Services Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment for such related True-Up Period.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section ~~10~~11(2).

~~"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].~~[18]

Article 3 – Transition Charges

(1) **~~Ratepayer~~Retail Consumer Obligation to Pay a Transition Charge** – Each ~~Ratepayer~~Retail Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such ~~Ratepayer~~Retail Consumer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

[17] ~~Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*.~~
[18] ~~Note that this is the term that describes the "asset" that we are amortizing over a longer period of time.~~

(2) **Indebtedness of ~~Ratepayers~~Retail Consumers** – Until paid, a Transition Charge charged to a ~~Ratepayer~~Retail Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the ~~Ratepayer~~Retail Consumer to the Regulatory Asset Owners, ~~(~~each with respect to its respective interest in the Regulatory Asset~~)~~. Such indebtedness shall constitute a single and separate[8] debt obligation owing by the ~~Ratepayer~~Retail Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the ~~Ratepayer~~Retail Consumer under the Electricity Invoice or otherwise.~~[19]~~[9]

(3) **No Set-Off or Reduction** – A ~~Ratepayer~~Retail Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such ~~Ratepayer~~Retail Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) **Allocation of ~~Ratepayer~~Retail Consumer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a ~~Ratepayer~~Retail Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the Financing Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section ~~8~~9(3)) are deemed to be irrevocable, final and effective without any further action, ~~in~~except to the ~~absence~~extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, whether or not the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

[8] Determine if this is critical for rating and markets. Logistics under consideration.

~~[19] Torys suggests that we not create a debtor/creditor relationship between ratepayers and regulatory asset owners. Instead, ratepayers would only have relationships with electricity distributors and the Fair program would rely on consumers paying distributors and distributors to collecting those amounts and remitting them to IESO. The current draft goes further to bridge the investors more directly with ratepayers. There are differences in the approaches, including reliance from a credit perspective on the LDCs (rather than an ability to replace the individual LDCs with the investors choice). This depends on the credit analysis, and comfort that a later requirement will not be accommodated without a change in the legislation.~~[9] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. ~~Consideration should be given to whether that achieves the same direct relationship and whether the effectiveness of the current regulatory licensing regime should be suggested as the basis~~Consider if it is helpful to integrate the existing regulatory scheme for ~~a market based credit decision.~~invoicing and collections (regarding RPP) in the legislation.

~~(6) [Anti-avoidance; No-by-pass – Transition Charges charged to a Ratepayer in respect of any Finance Amount incurred under with the Financing Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]~~

Article 4 – Invoicing of Transition Charges[20]

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a ~~Ratepayer~~Retail Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Servicer to the ~~Ratepayer~~Retail Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable ~~Ratepayer~~Retail Consumer.

(2) **Calculation of the Period Transition Charge** – Not later than [35] days prior to the first day of a Reference Period, each ~~Regulatory Asset Owner~~Absolute Assignee (or the ~~Administrative~~Financial Services Agent on its behalf) shall provide the ~~Servicer~~OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. [35] days prior to the first day of a Reference Period, IESO or Successor IESO if applicable shall specify the IESO Retained Interest Amount and any IESO Financing Costs that are due and payable and remain unpaid on such day. Not later than one month prior to the first day of a Reference Period, the ~~Servicer or if applicable the Alternative Servicer~~[21]OEB shall calculate the Period Transition Charge applicable to the Reference Period based on the calculations and information set forth in such written notices received from the ~~Regulatory Asset Owners, which~~Absolute Assignees and based on such amounts specified by IESO or Successor IESO, which calculations, information and amounts shall be determinative ~~in~~, except to the ~~absence~~extent of manifest calculation error or misstatement.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the ~~Servicer or if applicable the Alternative Servicer~~OEB shall apply the Attribution Methodology to determine the Allocation Factor for each ~~Ratepayer~~Retail Consumer of the applicable ~~Ratepayer~~Retail Consumer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the ~~Servicer or if applicable the Alternative Servicer~~OEB shall inform each Electricity Distributor and if applicable any Alternative Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each ~~Ratepayer~~Retail Consumer of the applicable ~~Ratepayer~~Retail Consumer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge charged to a ~~Ratepayer by the Servicer~~Retail Consumer and specified as such in an Electricity Invoice shall be

[20] ~~Details concerning Invoicing of Transition Charges (Article 4) and Collections and Remittances (Article 5) are complex. Consider how much of this can be addressed through regulations, or if acceptable based on existing OEB license conditions/codes, IESO market rules/manuals, etc.~~

[21] ~~Should this be a designated government official, rather than an agent appointed by investors?~~

determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, ~~in~~except to the ~~absence~~extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the ~~Regulatory Asset Owners~~Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Servicer to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(9) **~~Regulatory Asset Owners~~Absolute Assignees have Standing** – The ~~Regulatory Asset Owners~~Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to ~~Ratepayers~~Retail Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges. Any court of the Province ~~[and the OEB]~~ shall have jurisdiction over any actions brought before it by the ~~Regulatory Asset Owners~~Absolute Assignees in relation to any such failure.[22]

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor~~,~~ or any Alternative Servicer ~~or any [Alternative Collection Agent]~~ to ensure that Transition Charges are properly charged to ~~Ratepayers~~Retail Consumers and specified as such in Electricity Invoices.

[22] ~~Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.~~

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable][10] efforts~~]~~ to collect amounts owing by ~~Ratepayers~~Retail Consumers in respect of Transition Charges charged to such ~~Ratepayers~~Retail Consumers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from ~~Ratepayers~~Retail Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.[11] Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for ~~each~~the Regulatory Asset ~~Owner~~Owners.

(3) **Electricity Distributor Remittances** – On each ~~[~~applicable Remittance Date~~]~~, an Electricity Distributor shall remit all Transition Charge Collections received by it from ~~Ratepayers~~Retail Consumers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable] efforts to accept and collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from ~~Ratepayers~~Retail Consumers that pay their Electricity Invoices directly to ~~the Servicer.~~[23]IESO.[12]

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall ~~[~~promptly~~]~~ segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall hold such amounts in trust for ~~each~~the Regulatory Asset ~~Owner~~Owners.

(6) **IESO Remittances** – On each ~~[~~Settlement Date~~]~~[24][13], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account (a) first, to or to the account of the ~~Regulatory Asset Owner~~Absolute Assignees an amount equal to the Investment Remittance for the related month and (b) second, to IESO (including by IESO retaining such amount) an amount equal to the lesser of (i) the Maximum IESO Recovery for the related month and (ii) the IESO Retained Interest Amount as of the Settlement Date.

[10] Mirror collection "standard of care" under applicable legislation.
[11] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.
~~[23]~~[12] Consider building this obligation into a deemed condition of licence for the IESO.
~~[24]~~[13] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **~~Successors of~~ IESO Successor** – ~~Any successor of~~ IESO Successor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province~~25~~14, then such person shall, if requested by the ~~Regulatory Asset Owners~~Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to ~~Ratepayers~~Retail Consumers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by ~~Ratepayers~~Retail Consumers as provided in this ~~Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d~~Act; (c) exercise all enforcement rights of the ~~Regulatory Asset Owners or Pledgee~~Absolute Assignees for the benefit of ~~a Regulatory Asset Owner or Pledgee~~an Absolute Assignee; and (~~e~~d) remit any Transition Charge Collections to the ~~Regulatory Asset Owner or Pledgee~~Absolute Assignees or Pledgees, as applicable, each in accordance with its ~~Regulatory Asset~~Investment Interest.

(10) **~~Regulatory Asset Owners~~Absolute Assignees have Standing** – The ~~Regulatory Asset Owners and any Pledgee~~Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Alternative ~~Servicer~~Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from ~~Ratepayers~~Retail Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5. Any court of the Province ~~[and the OEB]~~ shall have jurisdiction over any actions brought before it by the ~~Regulatory Asset Owners~~Absolute Assignees in relation to any such failure. ~~26~~

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the ~~Regulatory Asset Owners~~Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the

~~25~~14 This is in anticipation of a possible future restructuring of the distribution system. ~~Also, this would cover any OREC-eligible customer (market participant) of IESO.~~

~~26 Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.~~

Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the ~~Regulatory Asset Owners~~Absolute Assignees.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any ~~Ratepayer~~Retail Consumer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.~~27~~15

(13) **Sequestration** – If any Electricity Distributor, IESO, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by ~~the Regulatory Asset Owners or Pledgee~~and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the ~~applying party~~Absolute Assignees or Pledgees, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the ~~Regulatory Asset Owners or Pledgee~~Absolute Assignees, each with respect to its ~~Regulatory Asset.~~ Investment Interest, and the Pledgees as applicable.[16]

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by ~~the Regulatory Asset Owner~~some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute ~~an existing, present~~a current and irrevocable property right and interest consisting, collectively, of the following rights and interests ~~of a Regulatory Asset Owner in the following~~ (without duplication):

~~27~~15 Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a ~~Ratepayer~~Retail Consumer reduces its payment of Transition Charges, despite this language~~, and same~~. Same for Electricity Distributor Remittances and IESO Remittances.

[16] Consider adding or substituting this provision for a right to appoint a receiver.

a. the right of ~~a Regulatory Asset Owner to record its portion of the Regulatory Asset in its accounts~~IESO (i) to record its IESO Retained Interest in its accounts in accordance with Section 8(1), having a stated amount from time to time equal to the IESO Retained Interest Amount; and (ii) to receive IESO Recoveries from time to time in accordance with Section 5(6)(b);

b. the right to impose, bill, invoice, collect and receive Transition Charges from ~~Ratepayers~~Retail Consumers, including the right to determine the amount of Transition Charges in accordance with this ~~Part~~Act;

c. the right to enforce the obligations and indebtedness of each ~~Ratepayer~~Retail Consumer to pay the Transition Charges charged to the ~~Ratepayer~~Retail Consumer from time to time in accordance with Article ~~2~~,3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article ~~4~~5;

f. the right to enforce the duties and obligations of IESO and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article ~~4~~5;

g. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. all Related Rights; and

j. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province ~~[~~or any consent requirement applicable to a Disposition that may arise by ~~contract or by~~ operation of any applicable law of the Province~~]~~, a Disposition by ~~a Regulatory Asset Owner~~IESO to an Absolute Assignee made under the Financing Plan ~~pursuant to a Disposition Document~~, or by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with ~~its~~the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under the ~~Regulatory Asset~~applicable Investment Interest (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof~~. [A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.]~~[28], and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in the Investment Interest subject to the Disposition, including all rights under the Investment Interest arising after such Disposition.

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

~~[28] Consider if helpful to investors, or delete.~~

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province ~~[~~or any consent requirement applicable to a Pledge that may arise by ~~contract or by~~ operation of any applicable law of the Province~~]~~, a Pledge by ~~a Regulatory Asset Owner~~an Absolute Assignee may be made to secure any related Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the ~~Regulatory Asset~~related Investment Interest in accordance with the terms of the Pledge. Other than as required by the Financing Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - ~~Any Pledge made by a~~For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset ~~Owner~~shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation ~~incurred under the Financing Plan shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset, the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the Regulatory Asset or the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset~~may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the ~~Regulatory Asset Owner~~Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected~~, without any physical delivery thereof, registration of any financing statement with respect thereto~~ pursuant to the ~~[~~PPSA~~]~~ ~~or any other further act.~~[29].[17] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may ~~subsequently~~ attach to the property rights and interests in the ~~Regulatory Asset~~Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. ~~Any~~Subject to the terms of the Collective Action Agreement, a Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. ~~[A Pledgee~~All provisions of the PPSA shall ~~cause a financing statement to be filed in respect of a Pledge on the basis that~~apply to the Regulatory Asset on the basis that it is ~~"~~intangible~~"~~ personal property, ~~for informational purposes only under the [PPSA].~~except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and

~~[29]~~[17] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document, in each case under the Financing Plan. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's ~~right~~rights and ~~interest~~interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective ~~[~~and ~~joint]~~coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.[30]

Article 7 – Establishment of the Fair Allocation Plan[31][18]

(1) Adoption of the Fair Allocation Plan – The ~~[Minister of Energy]~~[32]Delegate may , [by written ~~order~~declaration,] designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this ~~Part~~Act, ~~[~~except if amended, amended and restated or terminated by a further written ~~order issued~~declaration made by the ~~Minister of Energy~~Delegate in compliance with Section ~~•~~]7(4).

(2) Principles and Parameters[33] – A Fair Allocation Plan shall seek to allocate ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits across present and future ~~Ratepayer~~Retail Consumer Groups on a basis that the ~~Minister of Energy~~Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[34]:

1. ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits should be allocated over ~~a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts~~the period ending on the Program End Date.

2. The Fair Allocation Plan should specify the Reference Periods ~~(e.g., 6 month periods),~~ for the purpose of identifying applicable ~~Ratepayer~~Retail Consumer Groups and allocating ~~among them responsibility to bear the Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits among them on a relative basis over time.

[30] ~~This is necessary to ensure that if there are multiple regulatory asset owners and pledgees, they will be coordinated in the application of their rights of enforcement, etc.~~

[31][18] The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current ~~Power Contracts~~procurement contracts and not invest in extending service lives to secure further ~~power~~procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

[32] ~~Input required. If the MOE is given this power, conform to applicable authorities (e.g., plans and directives).~~

[33] ~~Consideration will be given as to whether these details should be included in the Regulation.~~

[34] ~~We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.~~

3. The share of ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits allocable to a particular ~~Ratepayer~~Retail Consumer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the ~~Ratepayer~~Retail Consumer Group over such Reference Period.

4. The ~~estimated Unrecovered~~share of Future Fair Share of Green Transition ~~Costs~~Benefits to be allocated to a ~~Ratepayer~~Retail Consumer Group and any future ~~Ratepayer~~Retail Consumer Group at a particular time should not exceed the ~~estimated value of the Related Generating Assets based on their remaining useful lives or terms~~Estimated Future Green Transition Benefits, measured in respect of the ~~period~~Reference Periods following such particular time and to the Program End Date.

5. No future ~~Ratepayer~~Retail Consumer Group should ~~bear~~be allocated an unreasonably disproportionate share of ~~the Unrecovered~~Estimated Future Green Transition ~~Costs~~Benefits. Except in exceptional circumstances or in the case of any ~~backward-looking adjustment made~~reallocation of an Over-Assessed Amount as contemplated in 7, below, the ~~share of the Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits to be allocated under a Fair Allocation Plan to any future ~~Ratepayer~~Retail Consumer Group should have regard to *[Insert formula if a year-over-year maximum amount is determined to be appropriate]*[35].

6. ~~A reasonable estimate of the rate of inflation~~The time value of money should be ~~applied~~reflected in the Fair Allocation Plan, in order to equate the relative values of the nominal ~~amount of Unrecovered Transition Costs to be allocable to Ratepayer~~allocations of Future Fair Share of Green Transition Benefits, calculated in current dollars, to future Retail Consumer Groups over time.

7. ~~Backward-looking adjustments to a~~To the extent there has been an Over-Assessed Amount, the Fair Allocation Plan may ~~be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative.~~determine that an adjustment should fairly be made to rebate Retail Consumers for such an amount, by reducing the costs otherwise attributable under the Act to such Retail Consumers. The relative costs of the Green Generation Initiative are reflected under the Act by the attribution of Transition Charges to such Consumer Groups, based on the Financing Plan seeking to track the allocations of benefits under the Fair Allocation Plan. Accordingly, the Maximum Transition Charge Amount determined for one or more Retail Consumer Groups having regard to the Fair Allocation Plan otherwise applicable may be appropriately reduced to recognize the effect of the Over-Assessed Amount. In such a case, a determination to reduce the Maximum Transition Charge Amount applicable for certain related Reference Periods should have regard to the principle that the corresponding rebate should be extended to benefit the Consumer Group or Consumer Groups in closest proximity to the Legislative Implementation Date.

(3) Attribution Methodology – The Fair Allocation Plan ~~[~~shall~~]~~ specify ~~an objective methodology (~~the "~~Attribution Methodology~~")~~ for the purposes of allocating the Period

~~[35] Consider if a quantitative limit needs to be included in the legislation.~~

Transition Charges across ~~all of~~ the ~~Ratepayers~~Retail Consumers of a particular ~~Ratepayer~~Retail Consumer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that ~~are~~is considered by the ~~Minister of Energy~~Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation.

(4) ~~**[Confirmation][Review] of the Fair Allocation Plan** – [OEB?][36]~~**Amendments of the Fair Allocation Plan** – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation and (b) comply with any restrictions or limitations specified with respect thereto in any Funding Obligation.

Article 8 – The ~~Financing Plan~~[37]IESO Retained Interest

(1) **Maintain Books of Account** – IESO may maintain books of account to record the IESO Retained Interest Amount and all adjustments thereto from time to time. Such books of account shall be determinative with respect to the amount of IESO's related regulatory asset.

(2) **Limitation on Additions** – IESO shall not record additions to the IESO Retained Interest Amount in respect of IESO Funding Shortfalls (a) if such additions are restricted by the terms of any Disposition Document or the Collective Action Agreement, or (b) on or after •, 2017.

(3) **Dispositions** – IESO may effect a Disposition to an Absolute Assignee if (a) the Absolute Assignee has or will concurrently become bound by the Collective Rights Agreement; (b) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; (c) the Financial Services Agent confirms in writing that the Disposition is permitted under the Financing Plan; and (d) the net proceeds payable to IESO from the sale of the related Investment Interest would not exceed the IESO Retained Interest Amount immediately before the time of such Disposition.

(4) **No Continuing Interest in any Investment Interest** – IESO shall have no continuing right or interest in any Investment Interest subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party and IESO shall not assert any such right or interest or take or omit to take any action to exercise or enforce its rights or interests under the IESO Retained Interest if such action or omission would impede or obstruct the rights of any Absolute Assignee or a Pledgee to enforce its rights and interests in any Investment Interest, except if IESO is expressly permitted to take or omit to take such action, respectively, under the related Disposition Document or the Collective Rights Agreement.

(5) **IESO Financing Costs** – IESO shall be entitled in good faith to incur reasonable financing costs (including interest and other reasonable financing charges) reflecting

~~[36] Any approvals or consents by the OEB will be obtained before any Funding Obligation that is dependent on such approval or consent is incurred. Any such approval or consent will be irrevocable and non-appealable. Any regulatory action occurring after any incurrence will not affect the related Funding Obligation or underlying rights in the Regulatory Asset.~~

~~[37] Consideration will be given as to whether these details should be included in the Regulation.~~

market terms and conditions and which are payable in arrears, in order to finance its ownership of the IESO Retained Interest from time to time.

(6) **IESO Recoveries** – IESO shall, in respect of a month, be entitled to receive from IESO Remittances on a related Settlement Date the amount (if any) available to IESO under Section 5(6)(b).

Article 9 – The Financing Plan

(1) **Power to Prepare ~~and~~, Implement and Amend the Financing Plan** – ~~In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall~~The Financial Services Agent shall be authorized to prepare, implement and ~~propose~~amend the~~ adoption of a~~ Financing Plan. If the ~~Administrative~~Financial Services Agent is unwilling or unable to prepare and propose the adoption of ~~a~~the Financing Plan, the ~~Minister of Energy~~Delegate may by written ~~order~~declaration designate one or more other persons who shall be authorized to prepare ~~and~~, implement ~~such a~~and amend the Financing Plan.

(2) ~~**Required**~~ **Terms and Conditions of the Financing Plan** – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions ~~that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan~~. The Financing Plan shall ~~be consistent with~~have regard to the principles~~,~~ and parameters~~, requirements and conditions~~ set forth in Schedule 3 and such other conditions and requirements as may be specified in a written ~~order~~declaration of the ~~Minister of Energy [~~Delegate or in accordance with the Regulation~~]~~.

(3) ~~**Power to Review and Approve the Financing Plan** – The Minister of Energy may, by written order, designate one or more persons to review the Financing Plan and to review and assess the consistency of the Funding Obligations incurred with such Financing Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the Financing Plan, and submit a revised Financing Plan to the designated reviewer for approval within [the time period specified in such written order]/[[●] days of such written order].[***Consider periodic amendments to the Financing Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***]~~**OEB Approval** – Any Additional Funding Charge payable to or for the benefit of the Financial Services Agent shall be subject to review and approval by the OEB.

(4) ~~**Approval of Financing Plan –** The **[OEB]** shall have the power to and shall approve or disapprove of the Financing Plan based solely on whether the Financing Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the Financing Plan, then such Financing Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the Financing Plan or otherwise fails to approve the Financing Plan, then the Administrative Agent shall re-submit the Financing Plan with such amendments as the Administrative~~

Agent shall consider necessary for the Financing Plan to be approved by the OEB.[38] **OEB Review** – The OEB [shall] undertake an annual review of the records maintained by the Financial Services Agent for the purpose of confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan.

(5) **Consistency with the Fair Allocation Plan** – Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Financing Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Financing Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **(6) Establishment of Special Purpose Entities** – If the implementation of the Financing Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations as a Financing Entity under the Financing Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics specified in Schedule 4 in establishing such special purpose entity.]**Replacement of the Administrative Agent** – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the Administrative Agent shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services Agent under the Financing Plan. If the Financial Services Agent is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services.

(6) **(7) Obligation to Apply IESO Remittances** – The AdministrativeFinancial Services Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset OwnersAbsolute Assignees, or otherwise in respect of or

[38] Once the Financing Plan is reviewed and approved there would be no further OEB review. If there is opportunity for further review, such review will have no impact on prior issued debt. Any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding).

as proceeds from ~~the Regulatory Asset~~an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose.[39]

(7) ~~(8)~~ **Non-Recourse** – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, ~~and~~any Alternative Collection Agent, the ~~Administrative~~Financial Services Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this ~~Part~~Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(8) ~~(9)~~ **Incurrences are Binding** – ~~Despite any failure to adhere to the Financing Plan or to comply with any requirement of this Part,~~Notwithstanding anything to the contrary in this Act, each Disposition made to or by an Absolute Assignee and all amounts payable or becoming due and payable by or on behalf of ~~a Regulatory Asset Owner~~an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation, shall be binding for the purposes of this ~~Part~~Act, including in determining the amount of related Transition Charges, despite any impairment or defect resulting from such failure.

[Article ~~9~~10 – Compliance Matters[40~~19~~]

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this ~~Part~~Act, the ~~[~~OEB~~]~~ shall have the right, jurisdiction, power and authority to examine the books and records of ~~any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation~~*~~[Insert names if any]~~*.

~~(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the [OEB] or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part[41].~~

(2) ~~(3) [Other Rating~~**OPG's Rate Settings** – When setting other rates for or in respect of ~~any person who is or may become obligated or have duties that arise under this Part,~~

[39] ~~We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.~~

[40~~19~~] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article ~~is~~and any potential role for the Auditor General is still under consideration.

[41] ~~Consider scope of OEB regulation and whether a Financing Entity should be subject to this sort of provision in any event.~~

~~including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking~~OPG, the OEB shall not take into account (a) the ~~collection by or attribution to such person of~~ administrative or servicing fees charged by OPG as Financial Services Agent [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.~~]~~[42]; (b) the cost consequences to OPG of being the Financial Services Agent; or (c) the consequence of OPG consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.][20]

Article ~~10~~11 – Undertaking of the Lieutenant Governor in Council[43][21]

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The [Lieutenant Governor in Council] shall not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of ~~Ratepayers~~Retail Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly~~[~~, including through the introduction of any bill or the passing of any legislation or regulation~~]~~ having such effect. The amount of Transition Charges determined ~~hereunder~~under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council~~[~~, including through the introduction of any bill or the passing of any legislation or regulation~~]~~ having such effect.

(2) **Undertaking and Agreement** – The [Lieutenant Governor in Council] shall not:

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

(b) ~~**(2) Undertaking and Agreement** – The Lieutenant Governor in Council shall not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or,~~ except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the ~~Regulatory Asset Owners, including any~~ Absolute ~~Assignee from time to time, and~~Assignees or any Pledgee from time to time~~[~~,~~including through the introduction of any bill or the passing of any legislation or regulation~~]~~.;

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment , amendment and restatement or termination

[42] ~~OPG has indicated that the risks and cost consequences to OPG of being an~~[20] As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as Administrative Agent ~~or of consolidating a Financing Entity for accounting purposes should not be considered by the OEB in setting the regulated payment amounts for~~of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role. ~~To be discussed.]~~

[43] ~~Under consideration~~[21] Under consideration, including the dealers' request for a "servicer guarantee" and a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes.

would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, Successor IESO shall be established to perform such obligations.

(4) ~~[If IESO becomes insolvent or otherwise incapable of performing its obligations under this Part, an IESO Successor will be established that is capable of performing such obligations in order that the Regulatory Asset Owners may appoint the IESO Successor as an Alternative Servicer or Alternative Collection Agent. Regulatory Asset Owners shall be fully~~**Compensation for Failure** – Absolute Assignees shall be compensated for any losses suffered by them as a result of any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article ~~10(2) for any loss suffered by the Regulatory Asset Owner as a result of such failure.~~[44]11.[22]~~]~~

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid.

(6) ~~**(3)**~~ **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article ~~11~~12 – Regulations

Regulations may be made under this ~~Part~~Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with ~~a Regulatory Asset Owner~~an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding ~~Costs~~Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this ~~Part~~Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

[44][22] Requested by Torys. For discussion.

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this ~~Part~~Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by ~~a Regulatory Asset Owner~~an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article ~~12~~13- Miscellaneous[~~45~~23]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this ~~Part~~Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this ~~Part~~Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this ~~Part~~Act shall be required with respect to the actions to be taken in compliance with this ~~Part~~Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this ~~Part~~Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this ~~Part~~Act, if any provision of this ~~Part~~Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this ~~Part~~Act that is taken by any person who is or may become obligated or have duties that arise under this ~~Part~~Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this ~~Part~~Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this ~~Part~~Act are intended to be

[~~45~~23] OPG would like the specific amendments related to OPG to be included in the Bill.]

severable and that the Legislature would have enacted this ~~Part~~Act even if any Article, Section, paragraph or subparagraph of this ~~Part~~Act held to be unconstitutional or invalid had not been included in this ~~Part~~Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3[24]

Principles, and Parameters, Requirements and Conditions for Establishing the Financing Plan

The Financing Plan shall have regard to the following principles, and parameters, requirements and conditions:[***Consider others.***] provide a guideline as to what a Financing Plan should address:

(1) the Financing Plan shall, in respect of each Reference Period, describemake reference to the allocations of UnrecoveredFuture Fair Share of Green Transition CostsBenefits to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of theIESO Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describeconsider alternative funding arrangements considered to be suitable for the purpose of fundingto fund the estimated IESO Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by the Regulatory Asset Owners for such purpose;

(9) **(4)** such Funding Obligations shall reflectconsider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of eachfor a Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of UnrecoveredFuture Fair Share of Green Transition CostsBenefits to the applicable Reference Group under the Fair Allocation Plan;

(4) if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Retail Consumer Group under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(5) the Financing Plan shall reflect the outcome of a financial model that incorporatesreflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical RatepayerRetail Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the Financing Plan may permit the OEB to check progress against the model from***

[24] Awaiting input from Torys based on OPG mark-up of Financing Plan sections.

~~***time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the Financing Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***~~]

(6) ~~the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to~~ incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the ~~Regulatory Asset Owners~~Absolute Assignees will require committed access to short term liquidity to cover estimated IESO Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate ~~a Regulatory Asset Owner~~an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the ~~Administrative~~Financial Services Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations ~~shall~~should not obligate ~~a Regulatory Asset Owner~~an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the ~~Administrative~~Financial Services Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the ~~Administrative~~Financial Services Agent shall cause the applicable ~~Regulatory Asset Owner~~Absolute Assignee to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the ~~Administrative~~Financial Services Agent will select counterparties under any transaction to be entered into by ~~a Regulatory Asset Owner~~an Absolute Assignee, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note

trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the ~~Administrative~~Financial Services Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the ~~Administrative~~Financial Services Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the IESO Funding ~~Shortfall~~Shortfalls from time to time on a basis that is consistent with the allocations of ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the ~~Administrative~~Financial Services Agent and other agents and service providers to the ~~Regulatory Asset Owners~~Absolute Assignees may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by ~~a Regulatory Asset Owner~~an Absolute Assignee, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) ~~a description of each~~describe the requirements applicable to any special purchase entity that will purchase ~~the Regulatory Asset from the IESO~~an Investment Interest, including proposed capitalization, governance, and restrictions on their powers and activities ~~having regard to the parameters in Schedule 4~~; and

(16) the basis on which any Pledge may be given or effected.

~~**Schedule 4**~~

~~**Creation of any Special Purpose Entity to become a Regulatory Asset Owner]**~~

~~**(1) Powers and Abilities**:~~

~~a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;~~

~~b. Each Regulatory Asset Owner shall be authorized to:~~

~~i. incur the Funding Obligations contemplated by a Financing Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;~~

~~ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Financing Plan and for administrative services; and~~

~~iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;~~

~~c. So long as any Funding Obligations contemplated under a Financing Plan are outstanding, a Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;~~

~~d. a Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Financing Plan;~~

~~e. a Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Financing Plan; and~~

~~f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a Financing Plan.~~

~~**(2) Governance of Regulatory Asset Owner –** A Regulatory Asset Owner shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]~~

~~a. [Number of trustees]~~

~~b. [Replacement of trustees; vacancies; appointment of successors]~~

~~c. [Removal of trustees for neglect of duty or misconduct]~~

~~d. [Quorum and meetings]~~

~~e. [Fiduciary duty]~~

~~f. [Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]~~

~~g. [Delegation of powers and duties to administrative agents]~~

~~h. [Delegation of powers and duties to administrative agents]~~

---

Pls. Have a look. Not necessarily our part but anything related to the equity injection, if any, would be primary focus.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act"

Article 1 – Purpose

The Province has and continues to encourage the construction and development of facilities for the long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer, feed in tariff and other similar programs (the "Green Generation Initiative"). The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future electricity consumers in the Province.

The imputed costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment"). The Global Adjustment is included as a charge billed to electricity consumers in their monthly electricity invoices.

The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province under the Green Generation Initiative, which may be higher than prevailing market price for electricity. These differences arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with long-term price certainty for electricity, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. In general, whenever amounts payable under these procurement contracts exceed the market price for electricity, the Green Costs Adjustment passes through the amount of such differences as part of the monthly charge to electricity consumers. Such amount then becomes available to IESO to meet its obligations under the procurement contracts. It has been determined that the useful lives of many of the assets encouraged by the Green Generation Initiative will be well in excess of the respective terms of the related procurement contracts, and in many cases may extend over more than one generation of electricity consumers.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective durations of the procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to Retail Consumers (as defined in Article 2) should be more closely aligned with the benefits that such Retail Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on principles and parameters that establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative equitably across present and future Retail Consumers (the "Fair Allocation Plan").

If the Fair Allocation Plan determines that the equitable allocation of the costs associated with the Green Generation Initiative to the Retail Consumers of a particular time period should be reduced below the amount that currently would be charged based on the Green Costs

Adjustment, then the amount payable by such Retail Consumers and in turn available to IESO will, in the aggregate, be less than the amount payable by the IESO to the generators in respect of such period. In this case IESO will need to obtain funding from another source to cover such a shortfall. If a funding obligation is incurred by IESO to cover such a shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs incurred will become payable in one or more future periods. In order for IESO to obtain a reliable and committed source of cash flows to enable IESO to repay such funding amounts when they become due and payable, this Act imposes irrevocable and non-bypassable financial obligations on Retail Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts. The right and interest in and to collect such financial obligations will take the form of the Regulatory Asset contemplated in this Act, which will constitute property rights and interests. Interests in the Regulatory Asset may be sold and absolutely assigned by IESO to one or more financing entities, which in turn will finance their acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf such financing entities by a financial services agent under the Financing Plan contemplated in this Act. The Financing Plan will seek to reasonably match the payment obligations arising under such funding obligations, to be borne by the future Retail Consumers of the period in which such payment obligations become due, with the benefits of the Green Generation Initiative allocated to such future Retail Consumers under the Fair Allocation Plan.

The purpose of this Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Retail Consumers on an equitable and cost effective basis.

Article 2 - Definitions

In this Act:

> “Absolute Assignee” means a person to whom a Regulatory Asset Owner effects a Disposition.
>
> “Actual” means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Financial Services Agent whose records shall be determinative for the purposes of this Act except to the extent of a manifest calculation error.
>
> “Additional Funding Charges” means, for a Reference Period in respect of an Absolute Assignee, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by or on behalf of the Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Financial Services Agent on behalf of, the Absolute Assignee under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Absolute

Assignee or incurred by on behalf of the Absolute Assignee under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Financial Services Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Absolute Assignee; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager or director fees of a Financing Entity; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (o) any rating agency fees; and (p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith by the Financial Services Agent for recovery and payment under the Financing Plan.

"Allocation Factor" means, in respect of a Retail Consumer for a Reference Period, the number (expressed as a percentage) determined in respect of the Retail Consumer by the OEB based on the application of the Attribution Methodology in respect of the Reference Period.[1]

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owners.

"Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.

"Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to Retail Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"[2] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to individual Retail Consumers of the applicable Retail Consumer Group based on its Allocation Factor.

"Collected Amount Adjustment" means, in respect of a True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the Financial Services

---

[1] Confirm that this will be based on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those may be identified and caught by the True-Up.

[2] This allocation may be volumetric or some combination of a flat amount and a volumetric charge. Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

Agent, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.[3]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) and each Pledgee that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.[4]

"Delegate" means the person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of an Investment Interest to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which a Regulatory Asset Owner effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the rate regulated distributor licensed under Part V of the *Ontario Energy Board Act, 1998* in respect of such Service Area, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3), including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by any of a Electricity Distributor (or in its stead, by an Alternative Servicer), by the Servicer or by a Retailer, in each case to a Retail Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to a distribution network in the Electricity Distributor's designated Service Area and in respect of applicable Transition Charges to be charged to the Retail Consumer under this Act.

"Estimate" means (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Financial Services Agent; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to any

---

[3] This would pick up adjustments based on actual collection experience, changes in the retail consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

[4] Consider adding the Financial Services Agent and the Servicer as parties.

Retail Consumer Group, the estimated value (in current dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Act except to the extent of a manifest calculation error.

"Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to Retail Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to Retail Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, for a Reference Period in respect of an Absolute Assignee, the sum (without duplication) of the following amounts that are or become payable during the Reference Period in respect of the Absolute Assignee: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financial Services Agent" means OPG or, following any Replacement Event, such other person or persons who may be appointed as the Financial Services Agent of the Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[5]

[5] Discuss whether to accommodate multiple Financial Services Agents. MOE to consider.

"Financing Entity" means an entity established in accordance with the Financing Plan to acquire all or an interest in the Regulatory Asset as an Absolute Assignee and to enter into Funding Obligations to finance such acquisition under the Financing Plan.[6]

"Financing Plan" means the written plan prepared by the Financial Services Agent on behalf of each Absolute Assignee in compliance with Article 9 to set forth the basis upon which, among other things: (a) any Disposition may be made to, financed by or effected by an Absolute Assignee; (b) any Funding Obligations may be incurred by an Absolute Assignee, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) any Finance Reserve Withdrawals may be made; (i) the establishment and operation of any Financing Entity may be effected; and (j) the cash flows arising from time to time or otherwise derived from an Investment Interest may otherwise be applied, as the same may be amended, amended and restated or terminated by the Financial Services Agent in compliance with Article 9 from time to time.

"Funding Costs" means, for a Reference Period in respect of an Absolute Assignee, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Absolute Assignee during the Reference Period in respect of its Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to its Funding Obligations, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Absolute Assignee under derivatives and any Finance Reserve Withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to the payment of the Funding Costs payable in respect of a Funding Obligation for the Reference Period.

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including each obligation to pay: principal, interest, premiums and other

---

[6] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act.

financing charge payments; pass-through payments; payment obligations arising under or in respect of derivatives; payment obligations owing to service providers, Financial Services Agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all Additional Funding Charges incurred by or on behalf of the Absolute Assignee under the Financing Plan, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.

"Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

"Generator" means a generator of electricity that is subject to the *Electricity Act, 1998*.

"Global Adjustment" has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO" means the Independent Electricity System Operator created pursuant to Part II of the *Electricity Act, 1998*.

"IESO Available Amount" means, for a Reference Period, the lesser of (a) the amount (if any) by which (i) the Maximum Transition Charge Amount for the Reference Period, exceeds (ii) Period Finance Amount for the Reference Period, and (b) the IESO Retained Interest Amount as of the [35th] day prior to the first day of a Reference Period plus any IESO Financing Costs that are due and payable and remain unpaid as of the [35th] day prior to the first day of a Reference Period.

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO during the month pursuant to section • of the *Electricity Act*.

"IESO Financing Costs" means, for a Reference Period, the financing costs (if any) incurred by IESO pursuant to Section 8(4) in order to finance its ownership of the IESO Retained Interest during the Reference Period.

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month[7]; provided that if the amount of any such shortfall is determined to have been based on incomplete information, variances or

[7] This has been recast to recognize that the shortfall in the first 4.5 years could exceed the entire GA amount. A more refined approach to describing the concept may be considered.

estimates that were inaccurate, an adjustment shall be made in determining the amount of any subsequent shortfall for the month in which the inaccuracy is identified.

"IESO Recovery" means each amount remitted to IESO (including by IESO retaining such amount) in respect of the IESO Retained Interest pursuant to Section 5(6)(b), and "IESO Recoveries" means, collectively, all such amounts received by IESO.

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Retained Interest" means IESO's right, title and ownership interest (if any) in, to and under the Regulatory Asset, which shall exclude each Investment Interest.

"IESO Retained Interest Amount" means, on a day, (a) the sum of all IESO Funding Shortfalls incurred prior to the day, plus (b) the sum of all IESO Funding Costs incurred prior to the day in accordance with Section 8(4), minus (c) the net proceeds received by IESO from or on behalf of each Absolute Assignee as consideration for the Disposition of each Investment Interest paid to IESO by or on behalf of such Absolute Assignee prior to the day, and minus (d) the IESO Recoveries received by IESO prior to the day.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition, which ownership interest may include (without limitation) ownership of a specified portion on a divided basis of the assets comprising the Regulatory Asset and ownership of an undivided ownership interest in the Regulatory Asset, in each case as may be described in the applicable Disposition Document.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Finance Amounts due and payable by all Absolute Assignees in respect of the month.

"Maximum IESO Recovery" means, for a month, the amount (if any) by which (a) the IESO Remittances for the month, exceed (b) the sum of all Finance Amounts that are due and payable by Absolute Assignees in respect of the month.

"Maximum Transition Charge Amount" means, for a Reference Period, (a) the aggregate amount of Future Fair Share of Green Transition Benefits that are allocable to the applicable Retail Consumer Group in accordance with the Fair Allocation Plan, divided by (b) the applicable Reference Period Length.

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Period Transition Charges" means, for a Reference Period, the sum of (a) the Period Finance Charges for the Reference Period and (b) the IESO Available Amount for the Reference Period.

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Investment Interest.

"Pledgee" means a person to whom an Absolute Assignee grants a Pledge.

"Program End Date" means •, [2047].

"Province" means the Province of Ontario.

"Redemption Amount" means the amount payable by or on behalf of an Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the Measurement Date to (and including) June 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Reference Period Length" means, for a Reference Period, the number of months in the Reference Period.

"Refinancing" means, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Absolute Assignee by applying the net proceeds obtained by the Absolute Assignee incurring one or more other Funding Obligations.

"Regulatory Asset" means the property rights and interests described in Section 6(1), which collectively is comprised of the IESO Retained Interest and each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for the Servicer, any bank account into which IESO deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each of (a) IESO, as owner of (and to the extent of) the IESO Retained Interest and (b) each Absolute Assignee, as owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively IESO and each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Rights" means all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in accordance with any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the Absolute Assignee under a Funding Obligation.

"Repayment" means a payment by an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retail Consumer" means:

(a) present and future consumers of electricity in the Province who are (i) consumers designated under section 79.16 of[, and O.Reg 95/05 under,] the *Ontario Energy Board Act, 1998*, or (ii) hold or are deemed to hold an "eligible account" under the *Ontario Rebate for Electricity Consumers Act, 2016*, other than any such consumer who has a contract with a Retailer who uses Retailer Consolidated Billing; and

(b) present and future Retailers who use Retailer Consolidated Billing,

and each case includes all such consumers and Retailers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their

own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.

"Retail Consumer Group" means, in relation to a Reference Period, the Retail Consumers who receive Electricity Invoices during the Reference Period.

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

"Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is licensed to distribute electricity in accordance with the *Electricity Act, 1998*.

"Servicer" means IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last Business Day of any month].

"Transition Charge" means, for a Retail Consumer in respect of a Reference Period, (a) the Period Transition Charge, (b) multiplied by its Allocation Factor in respect of the Reference Period, divided by (c) the applicable Reference Period Length.

"Transition Charge Collection" means any amount received or deemed by this Act to have been received upon the collection of a Transition Charge paid by or on behalf of a Retail Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Financial Services Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment for such related True-Up Period.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section 11(2).

Article 3 – Transition Charges

(1) Retail Consumer Obligation to Pay a Transition Charge – Each Retail Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such Retail Consumer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Retail Consumers** – Until paid, a Transition Charge charged to a Retail Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the Retail Consumer to the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset. Such indebtedness shall constitute a single and separate[8] debt obligation owing by the Retail Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Retail Consumer under the Electricity Invoice or otherwise.[9]

(3) **No Set-Off or Reduction** – A Retail Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Retail Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) **Allocation of Retail Consumer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Retail Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the Financing Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 9(3)) are deemed to be irrevocable, final and effective without any further action, except to the extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, whether or not the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

Article 4 – Invoicing of Transition Charges

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a Retail Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued

---

[8] Determine if this is critical for rating and markets. Logistics under consideration.

[9] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consider if it is helpful to integrate the existing regulatory scheme for invoicing and collections (regarding RPP) in the legislation.

by the Electricity Distributor or if applicable by the Alternative Servicer to the Retail Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable Retail Consumer.

(2) **Calculation of the Period Transition Charge** – Not later than [35] days prior to the first day of a Reference Period, each Absolute Assignee (or the Financial Services Agent on its behalf) shall provide the OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. [35] days prior to the first day of a Reference Period, IESO or Successor IESO if applicable shall specify the IESO Retained Interest Amount and any IESO Financing Costs that are due and payable and remain unpaid on such day. Not later than one month prior to the first day of a Reference Period, the OEB shall calculate the Period Transition Charge applicable to the Reference Period based on the calculations and information set forth in such written notices received from the Absolute Assignees and based on such amounts specified by IESO or Successor IESO, which calculations, information and amounts shall be determinative, except to the extent of manifest calculation error or misstatement.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the OEB shall apply the Attribution Methodology to determine the Allocation Factor for each Retail Consumer of the applicable Retail Consumer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the OEB shall inform each Electricity Distributor and if applicable any Alternative Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each Retail Consumer of the applicable Retail Consumer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge charged to a Retail Consumer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, except to the extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative

Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Servicer to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(9) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to Retail Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure.

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Servicer to ensure that Transition Charges are properly charged to Retail Consumers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable][10] efforts to collect amounts owing by Retail Consumers in respect of Transition Charges charged to such Retail Consumers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from Retail Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.[11] Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners.

(3) **Electricity Distributor Remittances** – On each applicable Remittance Date, an Electricity Distributor shall remit all Transition Charge Collections received by it from Retail Consumers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

---

[10] Mirror collection “standard of care” under applicable legislation.

[11] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable] efforts to accept and collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from Retail Consumers that pay their Electricity Invoices directly to IESO.[12]

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall promptly segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners.

(6) **IESO Remittances** – On each Settlement Date[13], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account (a) first, to or to the account of the Absolute Assignees an amount equal to the Investment Remittance for the related month and (b) second, to IESO (including by IESO retaining such amount) an amount equal to the lesser of (i) the Maximum IESO Recovery for the related month and (ii) the IESO Retained Interest Amount as of the Settlement Date.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO Successor** – IESO Successor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[14], then such person shall, if requested by the Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to Retail Consumers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by Retail Consumers as provided in this Act; (c) exercise all enforcement rights of the Absolute Assignees for the benefit of an Absolute Assignee; and (d) remit any Transition Charge Collections to the Absolute Assignees or Pledgees, as applicable, each in accordance with its Investment Interest.

---

[12] Consider building this obligation into a deemed condition of licence for the IESO.

[13] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

[14] This is in anticipation of a possible future restructuring of the distribution system.

(10) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Alternative Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Retail Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure.

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Absolute Assignees.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Retail Consumer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[15]

(13) **Sequestration** – If any Electricity Distributor, IESO, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the Absolute Assignees or Pledgees, shall order the sequestration and payment of the Transition Charge Collections, Electricity

[15] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a Retail Consumer reduces its payment of Transition Charges, despite this language. Same for Electricity Distributor Remittances and IESO Remittances.

Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Absolute Assignees, each with respect to its Investment Interest, and the Pledgees as applicable.[16]

(14) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute a current and irrevocable property right and interest consisting, collectively, of the following rights and interests (without duplication):

a. the right of IESO (i) to record its IESO Retained Interest in its accounts in accordance with Section 8(1), having a stated amount from time to time equal to the IESO Retained Interest Amount; and (ii) to receive IESO Recoveries from time to time in accordance with Section 5(6)(b);

b. the right to impose, bill, invoice, collect and receive Transition Charges from Retail Consumers, including the right to determine the amount of Transition Charges in accordance with this Act;

c. the right to enforce the obligations and indebtedness of each Retail Consumer to pay the Transition Charges charged to the Retail Consumer from time to time in accordance with Article 3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5;

f. the right to enforce the duties and obligations of IESO and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the

[16] Consider adding or substituting this provision for a right to appoint a receiver.

Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 5;

g. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. all Related Rights; and

j. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province or any consent requirement applicable to a Disposition that may arise by operation of any applicable law of the Province, a Disposition by IESO to an Absolute Assignee made under the Financing Plan, or by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under the applicable Investment Interest (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof, and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in the Investment Interest subject to the Disposition, including all rights under the Investment Interest arising after such Disposition.

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and

the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province or any consent requirement applicable to a Pledge that may arise by operation of any applicable law of the Province, a Pledge by an Absolute Assignee may be made to secure any related Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the related Investment Interest in accordance with the terms of the Pledge. Other than as required by the Financing Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected pursuant to the PPSA.[17] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. Subject to the terms of the Collective Action Agreement, a Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. All provisions of the PPSA shall apply to the Regulatory Asset on the basis that it is intangible personal property, except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document, in each case under the Financing Plan. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

---

[17] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

(8) **Collective Action Required** – If a Regulatory Asset Owner's rights and interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective and coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.

Article 7 – Establishment of the Fair Allocation Plan[18]

(1) Adoption of the Fair Allocation Plan – The Delegate may, [by written declaration,] designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Act, except if amended, amended and restated or terminated by a further written declaration made by the Delegate in compliance with Section 7(4).

(2) Principles and Parameters – A Fair Allocation Plan shall seek to allocate Future Fair Share of Green Transition Benefits across present and future Retail Consumer Groups on a basis that the Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters:

1. Future Fair Share of Green Transition Benefits should be allocated over the period ending on the Program End Date.

2. The Fair Allocation Plan should specify the Reference Periods for the purpose of identifying applicable Retail Consumer Groups and allocating Future Fair Share of Green Transition Benefits among them on a relative basis over time.

3. The share of Future Fair Share of Green Transition Benefits allocable to a particular Retail Consumer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the Retail Consumer Group over such Reference Period.

4. The share of Future Fair Share of Green Transition Benefits to be allocated to a Retail Consumer Group and any future Retail Consumer Group at a particular time should not exceed the Estimated Future Green Transition Benefits, measured in respect of the Reference Periods following such particular time and to the Program End Date.

5. No future Retail Consumer Group should be allocated an unreasonably disproportionate share of Estimated Future Green Transition Benefits. Except in exceptional circumstances or in the case of any reallocation of an Over-Assessed Amount as contemplated in 7, below, the Future Fair Share of Green Transition Benefits to be allocated under a Fair Allocation Plan to any future

18 The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current procurement contracts and not invest in extending service lives to secure further procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

Retail Consumer Group should have regard to *[Insert formula if a year-over-year maximum amount is determined to be appropriate]*.

6. The time value of money should be reflected in the Fair Allocation Plan, in order to equate the relative values of the nominal allocations of Future Fair Share of Green Transition Benefits, calculated in current dollars, to future Retail Consumer Groups over time.

7. To the extent there has been an Over-Assessed Amount, the Fair Allocation Plan may determine that an adjustment should fairly be made to rebate Retail Consumers for such an amount, by reducing the costs otherwise attributable under the Act to such Retail Consumers. The relative costs of the Green Generation Initiative are reflected under the Act by the attribution of Transition Charges to such Consumer Groups, based on the Financing Plan seeking to track the allocations of benefits under the Fair Allocation Plan. Accordingly, the Maximum Transition Charge Amount determined for one or more Retail Consumer Groups having regard to the Fair Allocation Plan otherwise applicable may be appropriately reduced to recognize the effect of the Over-Assessed Amount. In such a case, a determination to reduce the Maximum Transition Charge Amount applicable for certain related Reference Periods should have regard to the principle that the corresponding rebate should be extended to benefit the Consumer Group or Consumer Groups in closest proximity to the Legislative Implementation Date.

(3) **Attribution Methodology** – The Fair Allocation Plan shall specify the Attribution Methodology for the purposes of allocating the Period Transition Charges across the Retail Consumers of a particular Retail Consumer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that is considered by the Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation.

(4) **Amendments of the Fair Allocation Plan** – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation and (b) comply with any restrictions or limitations specified with respect thereto in any Funding Obligation.

Article 8 – The IESO Retained Interest

(1) **Maintain Books of Account** – IESO may maintain books of account to record the IESO Retained Interest Amount and all adjustments thereto from time to time. Such books of account shall be determinative with respect to the amount of IESO's related regulatory asset.

(2) **Limitation on Additions** – IESO shall not record additions to the IESO Retained Interest Amount in respect of IESO Funding Shortfalls (a) if such additions are restricted by the terms of any Disposition Document or the Collective Action Agreement, or (b) on or after •, 2017.

(3) **Dispositions** – IESO may effect a Disposition to an Absolute Assignee if (a) the Absolute Assignee has or will concurrently become bound by the Collective Rights Agreement; (b) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; (c) the Financial Services Agent confirms in writing that the Disposition is permitted under the Financing Plan; and (d) the net proceeds payable to IESO from the sale of the related Investment Interest would not exceed the IESO Retained Interest Amount immediately before the time of such Disposition.

(4) **No Continuing Interest in any Investment Interest** – IESO shall have no continuing right or interest in any Investment Interest subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party and IESO shall not assert any such right or interest or take or omit to take any action to exercise or enforce its rights or interests under the IESO Retained Interest if such action or omission would impede or obstruct the rights of any Absolute Assignee or a Pledgee to enforce its rights and interests in any Investment Interest, except if IESO is expressly permitted to take or omit to take such action, respectively, under the related Disposition Document or the Collective Rights Agreement.

(5) **IESO Financing Costs** – IESO shall be entitled in good faith to incur reasonable financing costs (including interest and other reasonable financing charges) reflecting market terms and conditions and which are payable in arrears, in order to finance its ownership of the IESO Retained Interest from time to time.

(6) **IESO Recoveries** – IESO shall, in respect of a month, be entitled to receive from IESO Remittances on a related Settlement Date the amount (if any) available to IESO under Section 5(6)(b).

Article 9 – The Financing Plan

(1) **Power to Prepare, Implement and Amend the Financing Plan** – The Financial Services Agent shall be authorized to prepare, implement and amend the Financing Plan. If the Financial Services Agent is unwilling or unable to prepare and propose the adoption of the Financing Plan, the Delegate may by written declaration designate one or more other persons who shall be authorized to prepare, implement and amend the Financing Plan.

(2) **Terms and Conditions of the Financing Plan** – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions. The Financing Plan shall have regard to the principles and parameters set forth in Schedule 3 and such other conditions and requirements as may be specified in a written declaration of the Delegate or in accordance with the Regulation.

(3) **OEB Approval** – Any Additional Funding Charge payable to or for the benefit of the Financial Services Agent shall be subject to review and approval by the OEB.

(4) **OEB Review** – The OEB [shall] undertake an annual review of the records maintained by the Financial Services Agent for the purpose of confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan.

(5) Replacement of the Administrative Agent – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the Administrative Agent shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services Agent under the Financing Plan. If the Financial Services Agent is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services.

(6) Obligation to Apply IESO Remittances – The Financial Services Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Absolute Assignees, or otherwise in respect of or as proceeds from an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose.

(7) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, any Alternative Collection Agent, the Financial Services Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(8) Incurrences are Binding – Notwithstanding anything to the contrary in this Act, each Disposition made to or by an Absolute Assignee and all amounts payable or becoming due and payable by or on behalf of an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation, shall be binding for the purposes of this Act, including in determining the amount of related Transition Charges, despite any impairment or defect resulting from such failure.

[Article 10 – Compliance Matters[19]

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Act, the OEB shall have the right, jurisdiction, power and authority to examine the books and records of *[Insert names if any]*.

(2) [OPG's Rate Settings – When setting other rates for or in respect of OPG, the OEB shall not take into account (a) the administrative or servicing fees charged by OPG as Financial Services Agent [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services]; (b) the cost consequences to OPG of being the Financial Services Agent; or (c) the consequence of OPG

[19] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article and any potential role for the Auditor General is still under consideration.

consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.][20]

Article 11 – Undertaking of the Lieutenant Governor in Council[21]

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The [Lieutenant Governor in Council] shall not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of Retail Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly, including through the introduction of any bill or the passing of any legislation or regulation having such effect. The amount of Transition Charges determined under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council, including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(2) **Undertaking and Agreement** – The [Lieutenant Governor in Council] shall not:

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

(b) except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the Absolute Assignees or any Pledgee from time to time;

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment , amendment and restatement or termination would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, Successor IESO shall be established to perform such obligations.

---

[20] As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as Administrative Agent of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role.

[21] Under consideration, including the dealers' request for a "servicer guarantee" and a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes.

(4) **Compensation for Failure** – Absolute Assignees shall be compensated for any losses suffered by them as a result of any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article 11.[22]

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid.

(6) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 12 – Regulations

Regulations may be made under this Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 13- Miscellaneous[23]

---

[22] Requested by Torys. For discussion.

[23] OPG would like the specific amendments related to OPG to be included in the Bill.]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Act shall be required with respect to the actions to be taken in compliance with this Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Act, if any provision of this Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Act that is taken by any person who is or may become obligated or have duties that arise under this Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Act are intended to be severable and that the Legislature would have enacted this Act even if any Article, Section, paragraph or subparagraph of this Act held to be unconstitutional or invalid had not been included in this Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3[24]

Principles and Parameters for Establishing the Financing Plan

The following principles and parameters provide a guideline as to what a Financing Plan should address:

(1) in respect of each Reference Period, make reference to the allocations of Future Fair Share of Green Transition Benefits to each Reference Group contemplated by the Fair Allocation Plan;

(2) estimate IESO Funding Shortfalls for each Reference Period;

(3) consider alternative funding arrangements suitable to fund the estimated IESO Funding Shortfalls, including short term and/or long term Funding Obligations;

(9) consider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that payments made for a Reference Period reasonably correspond to the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

(4) if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Retail Consumer Group under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(5) reflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical Retail Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology);

(6) incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Absolute Assignees will require committed access to short term liquidity to cover estimated IESO Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of

[24] Awaiting input from Torys based on OPG mark-up of Financing Plan sections.

Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Financial Services Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations should not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Financial Services Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Financial Services Agent shall cause the applicable Absolute Assignee to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Financial Services Agent will select counterparties under any transaction to be entered into by an Absolute Assignee, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Financial Services Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Financial Services Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the IESO Funding Shortfalls from time to time on a basis that is consistent with the allocations of Future Fair Share of Green Transition Benefits to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Financial Services Agent and other agents and service providers to the Absolute Assignees may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by an Absolute Assignee, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) describe the requirements applicable to any special purchase entity that will purchase an Investment Interest, including proposed capitalization, governance, and restrictions on their powers and activities; and

(16) the basis on which any Pledge may be given or effected.

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act" ~~– Part V.2~~

Article 1 – Purpose[1]

~~IESO has entered into Power Contracts with Generators. The agreed-upon reference prices and quantities set out therein were determined based on commitments made by IESO to provide Generators with long-term price certainty, so as~~The Province has and continues to encourage the construction and development of facilities for the ~~purpose of~~ long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer ~~and~~, feed in tariff and other similar programs (the "Green Generation Initiative"). ~~[The terms of the Power Contracts were intended to approximate the anticipated useful life of the related generation assets]; however, it has been determined that the useful life of many of these assets will be well in excess of the actual term of the related Power Contracts and will extend over more than one generation of ratepayers.~~ The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will benefit present and future ~~ratepayers of the Province. Currently, market prices for electricity are less than the reference prices set out in the Power Contracts, leaving a gap in funding which is funded by charging consumers a "Global Adjustment" (part of which is available to IESO to pay this shortfall).~~electricity consumers in the Province.

The imputed costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment"). The Global Adjustment is included as a charge billed to electricity consumers in their monthly electricity invoices.

~~Each month, the IESO determines the Global Adjustment payable by consumers for the consumption~~The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province~~. A component of the Global Adjustment is the amount by which the reference prices in the Power Contracts~~ under the Green Generation Initiative, which may be higher than prevailing market price for electricity. These differences arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with long-term price certainty for electricity, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. In general, whenever amounts payable under these procurement contracts exceed the market price for electricity~~ for the quantities of electricity specified under the Power Contracts for the relevant period[2]. The relationship between the past, present and future benefits to Ratepayers from~~, the Green Costs Adjustment passes through the amount of such differences as part of the monthly charge to electricity consumers. Such amount then becomes available to IESO to meet its obligations under the procurement contracts. It has been determined that the useful lives of many of the assets encouraged by the Green Generation Initiative~~, on the one hand, and the costs of~~ will be well in

[1] ~~Consider the scope and breadth of the Purpose section. This text is considered to be useful to establish the legislative basis for the statute, which text will be useful in the event of a challenge.~~

[2] ~~Consider modifying this to also refer to gas contracts and hydroelectric contracts, which provide for mechanics that are not based on contracts for differences.~~

excess of the respective terms of the related procurement contracts, and in many cases may extend over more than one generation of electricity consumers.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative ~~borne by past, present and future Ratepayers through their respective allocations of the Global Adjustment, on the other hand, do not necessarily reflect an equitable allocation of such benefits and costs over time, with the result that an adjustment may be appropriate to address inter-generational fairness considerations. Such an adjustment should reflect~~will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective durations of the procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to Retail Consumers (as defined in Article 2) should be more closely aligned with the benefits that such Retail Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on principles and parameters that ~~can be applied from time to time in order to~~ establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative ~~across present and future Ratepayers. A plan to allocate such costs and benefits~~ equitably across present and future ~~Ratepayers may be developed based on those principles and parameters (a~~Retail Consumers (the "Fair Allocation Plan").

If ~~a~~the Fair Allocation Plan determines that the equitable allocation of the ~~Global Adjustment to the Ratepayers~~costs associated with the Green Generation Initiative to the Retail Consumers of a particular time period ~~in respect of the Power Contracts~~ should be reduced below the amount ~~otherwise determined,~~that currently would be charged based on the Green Costs Adjustment, then the amount payable by such ~~Ratepayers to Electricity Distributors in respect of such period,~~Retail Consumers and in turn ~~by the Electricity Distributors to the~~available to IESO~~, would~~ will, in the aggregate, be less than the amount payable by the IESO to the ~~Generators under the Power Contracts~~generators in respect of such period. ~~If the difference is greater than any net Power Contract surpluses available to IESO from earlier periods, IESO will have a funding shortfall.[3] In order for IESO to cover such a funding shortfall for a period,~~In this case IESO will need to obtain funding from another source~~, which could include funding from third party sources operating in public and private capital markets~~ to cover such a shortfall. If a funding obligation is incurred ~~in order to enable the~~by IESO to cover such a ~~funding~~ shortfall during one period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs ~~will be~~ incurred ~~and may~~will become payable in one or more ~~other~~future periods. ~~It will be necessary to provide~~In order for IESO to obtain a reliable and committed source of cash flows to enable IESO to repay such funding ~~obligations and to pay related funding costs with certainty when the funding obligations~~amounts when they become due and payable~~. This Part~~, this Act imposes irrevocable and non-bypassable financial obligations ~~of Ratepayers~~on Retail Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts . The right and interest in and to collect such financial obligations~~, which~~ will take the form of the Regulatory Asset contemplated in this ~~Part and~~Act, which will constitute property rights and interests. ~~The~~Interests in the Regulatory Asset ~~will~~may be sold and absolutely assigned ~~and will belong~~by IESO to one or more~~ newly created~~ financing entities, which in turn will finance their ~~purchase of such Regulatory Asset~~acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf ~~the~~such financing entities by ~~an administrative~~a financial services agent~~ (initially OPG),~~ under the Financing Plan

~~[3] Confirm whether any RPP forecasting variance is to be included in (i) a funding shortfall; and (ii) related IESO financing costs to be included in Transition Charges.]~~

contemplated in this ~~Part~~Act. The Financing Plan will seek to reasonably match the payment obligations arising under such funding obligations ~~and~~, to be borne by the future ~~Ratepayers~~Retail Consumers of the period in which such payment obligations become due, with the ~~costs and~~ benefits of the Green Generation Initiative ~~charged~~allocated to such future ~~Ratepayers~~Retail Consumers under the Fair Allocation Plan.

The purpose of this ~~Part~~Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future ~~Ratepayers~~Retail Consumers on an equitable and cost effective basis.

Article 2 - Definitions

In this ~~Part~~Act:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the ~~Administrative~~Financial Services Agent whose records shall be determinative for the purposes of this ~~Part in~~Act except to the ~~absence~~extent of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period in respect of an Absolute Assignee, the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by ~~the Regulatory Asset Owners~~or on behalf of the Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including (without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the ~~Administrative~~Financial Services Agent on behalf of, ~~a Regulatory Asset Owner~~the Absolute Assignee under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on ~~a Regulatory Asset Owner~~the Absolute Assignee or incurred by on behalf of ~~a Regulatory Asset Owner~~the Absolute Assignee under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the ~~Administrative~~Financial Services Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of ~~a Regulatory Asset Owner~~the Absolute Assignee; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager ~~of~~or director fees of a Financing Entity; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (o) any rating agency fees; and (p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in

good faith by the Financial Services Agent for recovery and payment under the Financing Plan.

~~"Administrative Agent" means [OPG] or, following any Replacement Event, such other person or persons who may be appointed as the administrative agent of the Regulatory Asset Owner under the Financing Plan in compliance with the requirements set out in Schedule 2.~~

"Allocation Factor" means, in respect of a ~~Ratepayer~~Retail Consumer for a Reference Period, the number (expressed as a percentage) determined in respect of the ~~Ratepayer~~Retail Consumer by ~~[IESO]~~the OEB based on the application of the Attribution Methodology in respect of the Reference Period.[4][1]

"Alternative Collection Agent" means a person appointed under Section 5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owners.

"Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.

"Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to Retail Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"[5][2] means the methodology specified in the Fair Allocation Plan for allocating the Period Transition Charges for a Reference Period to ~~the~~ individual ~~Ratepayers~~Retail Consumers of the applicable ~~Ratepayer~~Retail Consumer Group based on its Allocation Factor.

~~"Bypass Charge" means [To be developed].~~[6]

"Collected Amount Adjustment" means, in respect of a ~~Reference~~True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the ~~Administrative~~Financial Services Agent, as applicable, equal to (a) the Estimate of the

[4] ~~Consider basing~~[1] Confirm that this will be based on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those ~~would~~may be identified and ~~rolled into~~caught by the True-Up.

[5] ~~A key question will be how the overall costs will be spread across the rate base. For example, the~~[2] This allocation may be volumetric ~~or not,~~ or some combination of a flat amount and a volumetric charge. ~~This will also impact any discussion regarding any bypass (e.g., grid exit) charge in connection with the bypass discussion~~Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

[6] ~~Consideration needs to be given to any amount that will be charged to a ratepayer who successfully bypasses (e.g., leaves the grid). In allocating Transition Charges, considerations would include whether to reserve Bypass Charges and spread them over the life of the program, and correspondingly how to factor those into the calculation of Transition Charges.~~

Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period.~~7~~[3]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) and each Pledgee that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.[4]

"Delegate" means the person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act.

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition of ~~all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of a Regulatory Asset Owner's right, title and interest in, to and under the Regulatory Asset~~an Investment Interest to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which a Regulatory Asset Owner effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means, in respect of a Service Area, the rate regulated distributor licensed ~~by the OEB~~under Part V of the *Ontario Energy Board Act, 1998* in respect of such Service Area, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to IESO or if applicable the Alternative Collection Agent in accordance with Section 5(3) , including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.

"Electricity Invoice" means an invoice issued by ~~an~~any of a Electricity Distributor (or in its stead, by an Alternative Servicer)~~ or~~, by the Servicer or by a Retailer, in each case to a Retail Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to a distribution network in the Electricity Distributor's designated Service Area and in respect of applicable Transition Charges to be charged to the Retail Consumer under this Act.

"Estimate" means~~,~~ (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the ~~Administrative Agent~~Financial Services Agent; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to any Retail Consumer Group, the estimated value (in current

[3] This would pick up adjustments based on actual collection experience, changes in the ~~Consumer Base~~retail consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc.

[4] Consider adding the Financial Services Agent and the Servicer as parties.

dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this ~~Part in~~Act except to the ~~absence~~extent of a manifest calculation error.

"~~Fair Allocation Plan" [has the meaning given in Article 1].~~Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to Retail Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to Retail Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, ~~in respect of~~for a Reference Period in respect of an Absolute Assignee, the sum (without duplication) of the following amounts ~~for~~that are or become payable during the Reference Period in respect of the Absolute Assignee: (a) Repayments; (b) Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.~~"Finance Receipts" means, for a Reference Period, all amounts received by or on behalf of the Regulatory Asset Owners during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Regulatory Asset Owners under derivatives and any withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a Funding Obligation.~~

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financial Services Agent" means OPG or, following any Replacement Event, such other person or persons who may be appointed as the Financial Services Agent of the

Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[5]

"Financing Entity" means an entity established in accordance with the Financing Plan to acquire all or an interest in the Regulatory Asset as an Absolute Assignee and to enter into Funding Obligations to finance such acquisition.[8] under the Financing Plan.[6]

"Financing Plan" means the written plan [prepared by the Administrative Agent]Financial Services Agent on behalf of each Absolute Assignee in compliance with Article 89 to set forth the basis upon which, among other things: (a) any Disposition may be made to, financed by or effected by an Absolute Assignee; (b) any Funding Obligations may be incurred in order to fund a Funding Shortfallby an Absolute Assignee, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) any Finance Reserve Withdrawals may be made; (i) the establishment and operation of any Financing Entity may be effected; and (ij) the cash flows arising from time to time or otherwise derived from the Regulatory Assetan Investment Interest may otherwise be applied, as the same may be amended, amended and restated or terminated by the Financial Services Agent in compliance with Article 9 from time to time.

"Funding Costs" means, for a Reference Period in respect of an Absolute Assignee, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Regulatory Asset OwnerAbsolute Assignee during the Reference Period in respect of allits Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to aits Funding ObligationObligations, exceeds (b) the aggregate of all Finance Receiptsamounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Absolute Assignee under derivatives and any Finance Reserve Withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to the payment of the Funding Costs payable in respect of a Funding Obligation for the Reference Period.

[5] Discuss whether to accommodate multiple Financial Services Agents. MOE to consider.

[8] OPG has suggested[6] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act. These raise issues for consideration by the stakeholders.

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including each obligation to pay: principal, interest, premiums and other financing ~~charges, indebtedness,~~charge payments; pass-through payments; payment obligations arising under or in respect of derivatives~~,~~; payment obligations owing to service providers, ~~administrative agents~~Financial Services Agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all ~~taxes payable in connection with the foregoing)~~Additional Funding Charges incurred by or on behalf of ~~a Regulatory Asset Owner~~the Absolute Assignee under the Financing Plan ~~in order to fund a Funding Shortfall for a Reference Period~~, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.[9]

~~"Funding Shortfall" means, for a Reference Period, (a) the amount, if any, by which (i) the IESO Power Contract Net Payment for the Reference Periods, exceeds (ii) the GA Power Contract Contribution for Reference Period, minus (b) the IESO Applied Surplus for the Reference Period.~~[10]Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

~~"GA Power Contract Contribution" means, for a Reference Period, the aggregate of the payments to be made by the applicable Ratepayer Group in respect of the portion of the Global Adjustment [attributable to the Power Contracts] in accordance with the Fair Allocation Plan.~~[11]

"Generator" means a generator of electricity that is subject to ~~[this~~the *Electricity Act*~~]~~[12]~~.~~, *1998*.

"Global Adjustment" ~~means the amount calculated from time to time under [Section • of the *Electricity Act*], which includes among other things an amount determined in respect of the costs associated with the Green Generation Initiative, including amounts attributable to the Power Contracts.~~[13]has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" ~~[~~has the meaning given in Article ~~1]~~.1.

~~[9] OPG has asked whether this should include IESO finance arrangements.~~

~~[10] Consider whether to simplify by referring to the calculations of GA, with vs. without Fair. The issue would be that Fair is then linked into the GA calculation specifically, rather than to the specific assets that are subject to revised amortization under Fair. The constitutional position requires a clear nexus to the assets. Also, confirm whether RPP forecasting variances are to be included.~~

~~[11] IESO to confirm its ability to allocate a shortfall in a given month between what it receives and what it owes under the GA, in order to calculate (a) existing volume-based variances which are rolled into subsequent month GA and trued-up every 6 months under RPP, (b) existing variances attributable to OREC which are funded by the Province, and (c) new variances attributable to Fair Hydro program.]~~

~~[12] Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*. "Generator is a defined term in other legislation (OEB Act, Electricity Act) so this should ultimately be a distinct term such as "FH Generator" to avoid confusion.~~

~~[13] Note that if adjustments for Fair Hydro program are to be applied after existing GA adjustments, then this may need a new name (such as "FH Adjustment").~~

"IESO" means the Independent Electricity System Operator created pursuant to ~~[insert].~~Part II of the *Electricity Act, 1998*.

"IESO ~~Applied Surplus~~Available Amount" means, for a Reference Period, the lesser of (a) the amount~~,~~ (if any~~,~~) by which (i) the ~~IESO Power Contract Net Payment~~Maximum Transition Charge Amount for the Reference Period, exceeds (ii) ~~the GA Power Contract Contribution~~Period Finance Amount for the Reference Period, and (b) the IESO ~~Unapplied Surplus on the last day of the immediately preceding Reference Period.~~ Retained Interest Amount as of the [35th] day prior to the first day of a Reference Period plus any IESO Financing Costs that are due and payable and remain unpaid as of the [35th] day prior to the first day of a Reference Period.

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO during the month pursuant to section • of the *Electricity Act*.

"IESO Financing Costs" means, for a Reference Period, the financing costs (if any) incurred by IESO pursuant to Section 8(4) in order to finance its ownership of the IESO Retained Interest during the Reference Period.

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month[7]; provided that if the amount of any such shortfall is determined to have been based on incomplete information, variances or estimates that were inaccurate, an adjustment shall be made in determining the amount of any subsequent shortfall for the month in which the inaccuracy is identified.

"IESO ~~Power Contract Net Payment" means, for a Reference Period, the amount by which (a) the sum of amounts payable by IESO to the Generators under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period.~~Recovery" means each amount remitted to IESO (including by IESO retaining such amount) in respect of the IESO Retained Interest pursuant to Section 5(6)(b), and "IESO Recoveries" means, collectively, all such amounts received by IESO.

~~"IESO Power Contract Net Receipt" means, for a Reference Period, the amount by which (a) the sum of amounts payable by the Generators to IESO under all Power Contracts for the Reference Period, exceeds (b) the sum of amounts payable by IESO to the Generators under all Power Contracts for the Reference Period.~~

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative

[7] This has been recast to recognize that the shortfall in the first 4.5 years could exceed the entire GA amount. A more refined approach to describing the concept may be considered.

Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO ~~Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for [managing the Province's power system].~~Retained Interest" means IESO's right, title and ownership interest (if any) in, to and under the Regulatory Asset, which shall exclude each Investment Interest.

"IESO Retained Interest Amount" means, on a day, (a) the sum of all IESO Funding Shortfalls incurred prior to the day, plus (b) the sum of all IESO Funding Costs incurred prior to the day in accordance with Section 8(4), minus (c) the net proceeds received by IESO from or on behalf of each Absolute Assignee as consideration for the Disposition of each Investment Interest paid to IESO by or on behalf of such Absolute Assignee prior to the day, and minus (d) the IESO Recoveries received by IESO prior to the day.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition, which ownership interest may include (without limitation) ownership of a specified portion on a divided basis of the assets comprising the Regulatory Asset and ownership of an undivided ownership interest in the Regulatory Asset, in each case as may be described in the applicable Disposition Document.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Finance Amounts due and payable by all Absolute Assignees in respect of the month.

"Maximum IESO Recovery" means, for a month, the amount (if any) by which (a) the IESO Remittances for the month, exceed (b) the sum of all Finance Amounts that are due and payable by Absolute Assignees in respect of the month.

"Maximum Transition Charge Amount" means, for a Reference Period, (a) the aggregate amount of Future Fair Share of Green Transition Benefits that are allocable to the applicable Retail Consumer Group in accordance with the Fair Allocation Plan, divided by (b) the applicable Reference Period Length.

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"~~IESO Unapplied Surplus" means, at a particular time, the amount, if any, by which (a) the sum of (i) all IESO Power Contract Net Receipts for Reference Periods occurring prior to the time, and (ii) all GA Power Contract Contributions for Reference Periods occurring prior to the time, exceeds (b) the sum of (i) all IESO Power Contract Net~~

~~Payments for Reference Periods occurring prior to the time, and (ii) all IESO Applied Surpluses for Reference Periods occurring prior to the time.~~ Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period ~~Transition Charge~~Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount and (b) the True-Up Amount in respect of the immediately preceding Reference Period.

"Period Transition Charges" means, for a Reference Period, the sum of (a) the Period Finance Charges for the Reference Period and (b) the IESO Available Amount for the Reference Period.

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by ~~a Regulatory Asset Owner~~the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the ~~Regulatory Asset~~Investment Interest.

"Pledgee" means a person to whom ~~a Regulatory Asset Owner~~an Absolute Assignee grants a Pledge.

"~~Power Contracts" means long-term power contracts entered into by IESO with certain Generators, under which IESO has agreed to pay such Generators amounts, determined in respect of quantities of electricity over specified periods, to the extent that applicable market prices for such quantities of electricity during a specified period are less than specified reference prices for such quantities of electricity, and, correspondingly, Generators have agreed to pay IESO amounts if the market prices for such quantities exceed the applicable reference prices for such quantities.~~[14]Program End Date" means •, [2047].

"Province" means the Province of Ontario.

~~"Ratepayer" means present and future [retail] consumers of electricity [in the Province] who are [RPP][or OREC-eligible] consumers, which shall include all such retail consumers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.~~[15]

[14] ~~Consider expanding to include PPAs that are not contracts for differences. Should this contemplate the possibility of additional or amended power contracts?~~

[15] ~~Need to describe consumers in a fashion that is broad and not weakened by a bypass risk. Consider terminology to align with the description of the eligible customer class provided by the Ministry, e.g., same as OREC-eligible consumers except for consumers served by Independent Power Authorities (who do not pay GA). Also, consider use of the word "retail", to avoid limiting to customers of retailers and confirm removal of reference to transmission-connected customers.~~

"Ratepayer Group" means, in relation to a Reference Period, the Ratepayers who receive Electricity Invoices[16] during the Reference Period.

"Redemption Amount" means the amount payable by or on behalf of a Regulatory Asset Owneran Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the [Legislation ImplementationMeasurement Date] to (and including) June 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Reference Period Length" means, for a Reference Period, the number of months in the Reference Period.

"Refinancing" means that a, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of a Regulatory Asset Ownerthe Absolute Assignee by applying the net proceeds obtained by the Regulatory Asset OwnerAbsolute Assignee incurring one or more other Funding Obligations.

"Regulatory Asset" means the property rightrights and interestinterests described in Section 6(1), or if the context requires, a specified portion or undivided interest in such property right and interest that is described in the applicable Disposition Documentwhich collectively is comprised of the IESO Retained Interest and each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; (b) for the Servicer, any bank account into which the ServicerIESO deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each of (a) IESO, as owner of (and to the extent that it has retained any ownership interest in, to or under the Regulatory Assetof) the IESO Retained Interest and (b) each Absolute Assignee, to the extent that it has acquired and owns any ownership interest (including a specified portion on a divided basis or by way of an undivided interest) in, to or under the Regulatory Assetas owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively all of the Regulatory Asset OwnersIESO and each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7). For greater certainty, where one Regulatory Asset Owner owns the entirety of the Regulatory Asset, "Regulatory Asset Owners" refers to this Regulatory Asset Owner.

[16] Expand to include eligible consumers who are not customers of Electricity Distributors (e.g., suite-metered customers).

~~"Related Generation Assets" means the [facilities, plants and equipment] constructed, acquired or developed in connection with the Green Generation Initiative.~~

"Related Rights" means~~, with respect to a Regulatory Asset Owner's Regulatory Asset,~~ all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Regulatory Asset.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to IESO or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in ~~relation to~~accordance with any Funding Obligation, then the Business Day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the ~~Regulatory Asset Owner~~Absolute Assignee under a Funding Obligation.

"Repayment" means a payment by ~~a Regulatory Asset Owner~~an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retail Consumer" means:

(a) present and future consumers of electricity in the Province who are (i) consumers designated under section 79.16 of[, and O.Reg 95/05 under,] the *Ontario Energy Board Act, 1998*, or (ii) hold or are deemed to hold an "eligible account" under the *Ontario Rebate for Electricity Consumers Act, 2016*, other than any such consumer who has a contract with a Retailer who uses Retailer Consolidated Billing; and

(b) present and future Retailers who use Retailer Consolidated Billing,

and each case includes all such consumers and Retailers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.

"Retail Consumer Group" means, in relation to a Reference Period, the Retail Consumers who receive Electricity Invoices during the Reference Period.

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

"Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.

"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is licensed to distribute electricity in accordance with ~~[this~~the *Electricity Act*[17]~~]~~, *1998*.

"Servicer" means ~~[To be determined]~~IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset ~~Owner [To be determined – collective invoicing agent, and consider expanding].~~Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last Business Day of any month].

"Transition Charge" means, for a ~~Ratepayer~~Retail Consumer in respect of a Reference Period, ~~the sum of~~ (a) ~~[one sixth] of~~ the Period Transition Charge, (b) multiplied by its Allocation Factor ~~and (b) any Bypass Charge charged to the Ratepayer~~ in respect of the Reference Period, divided by (c) the applicable Reference Period Length.

"Transition Charge Collection" means any amount received or deemed by this ~~Part~~Act to have been received upon the collection of a Transition Charge paid by or on behalf of a ~~Ratepayer~~Retail Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the ~~Administrative~~Financial Services Agent equal to (a) the Estimate of the Finance Amount for the related True-Up Period, minus (b) the Actual Finance Amount for such related True-Up Period, plus (c) the Collected Amount Adjustment for such related True-Up Period.

"True-Up Period" means, in relation to a Reference Period, the period from and including the [30th] day immediately preceding the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the Reference Period.

"Undertaking of the Lieutenant Governor in Council" means the undertaking of the Lieutenant Governor in Council given under Section ~~10~~11(2).

~~"Unrecovered Transition Costs" means the [unrecovered][unamortized] costs incurred in connection with the creation, adoption and implementation of the Green Generation Initiative, including any negative value of the Power Contracts and [other].~~[18]

Article 3 – Transition Charges

(1) **~~Ratepayer~~Retail Consumer Obligation to Pay a Transition Charge** – Each ~~Ratepayer~~Retail Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such ~~Ratepayer~~Retail Consumer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

[17] ~~Revise once determine whether this will be a standalone Act or remain part of the *Electricity Act*.~~
[18] ~~Note that this is the term that describes the "asset" that we are amortizing over a longer period of time.~~

(2) **Indebtedness of ~~Ratepayers~~Retail Consumers** – Until paid, a Transition Charge charged to a ~~Ratepayer~~Retail Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the ~~Ratepayer~~Retail Consumer to the Regulatory Asset Owners, ~~(~~each with respect to its respective interest in the Regulatory Asset~~)~~. Such indebtedness shall constitute a single and separate[8] debt obligation owing by the ~~Ratepayer~~Retail Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the ~~Ratepayer~~Retail Consumer under the Electricity Invoice or otherwise.~~[19]~~[9]

(3) **No Set-Off or Reduction** – A ~~Ratepayer~~Retail Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such ~~Ratepayer~~Retail Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) **Allocation of ~~Ratepayer~~Retail Consumer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a ~~Ratepayer~~Retail Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) **Transition Charges are Irrevocable** – The Transition Charges arising under or in respect of Funding Obligations incurred under the Financing Plan (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section ~~8~~9(3)) are deemed to be irrevocable, final and effective without any further action, ~~in~~except to the ~~absence~~extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period whether or not the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, whether or not the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

[8] Determine if this is critical for rating and markets. Logistics under consideration.

~~[19] Torys suggests that we not create a debtor/creditor relationship between ratepayers and regulatory asset owners. Instead, ratepayers would only have relationships with electricity distributors and the Fair program would rely on consumers paying distributors and distributors to collecting those amounts and remitting them to IESO. The current draft goes further to bridge the investors more directly with ratepayers. There are differences in the approaches, including reliance from a credit perspective on the LDCs (rather than an ability to replace the individual LDCs with the investors choice). This depends on the credit analysis, and comfort that a later requirement will not be accommodated without a change in the legislation.~~[9] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. ~~Consideration should be given to whether that achieves the same direct relationship and whether the effectiveness of the current regulatory licensing regime should be suggested as the basis~~Consider if it is helpful to integrate the existing regulatory scheme for ~~a market based credit decision.~~invoicing and collections (regarding RPP) in the legislation.

~~(6) [Anti-avoidance; No-by-pass – Transition Charges charged to a Ratepayer in respect of any Finance Amount incurred under with the Financing Plan applicable at the time the related Funding Obligation was incurred may not be avoided and shall be [non-by-passable].]~~

Article 4 – Invoicing of Transition Charges[20]

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a ~~Ratepayer~~Retail Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice issued by the Electricity Distributor or if applicable by the Alternative Servicer to the ~~Ratepayer~~Retail Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable ~~Ratepayer~~Retail Consumer.

(2) **Calculation of the Period Transition Charge** – Not later than [35] days prior to the first day of a Reference Period, each ~~Regulatory Asset Owner~~Absolute Assignee (or the ~~Administrative~~Financial Services Agent on its behalf) shall provide the ~~Servicer~~OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. [35] days prior to the first day of a Reference Period, IESO or Successor IESO if applicable shall specify the IESO Retained Interest Amount and any IESO Financing Costs that are due and payable and remain unpaid on such day. Not later than one month prior to the first day of a Reference Period, the ~~Servicer or if applicable the Alternative Servicer~~[21]OEB shall calculate the Period Transition Charge applicable to the Reference Period based on the calculations and information set forth in such written notices received from the ~~Regulatory Asset Owners, which~~Absolute Assignees and based on such amounts specified by IESO or Successor IESO, which calculations, information and amounts shall be determinative ~~in~~, except to the ~~absence~~extent of manifest calculation error or misstatement.

(3) **Calculation and Attribution of Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the ~~Servicer or if applicable the Alternative Servicer~~OEB shall apply the Attribution Methodology to determine the Allocation Factor for each ~~Ratepayer~~Retail Consumer of the applicable ~~Ratepayer~~Retail Consumer Group.

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the ~~Servicer or if applicable the Alternative Servicer~~OEB shall inform each Electricity Distributor and if applicable any Alternative Servicer of the Transition Charges to be specified in the Electricity Invoices to be issued to each ~~Ratepayer~~Retail Consumer of the applicable ~~Ratepayer~~Retail Consumer Group who has a billing address in the Electricity Distributor's Service Area.

(5) **Adjustments** – The amount of any Transition Charge charged to a ~~Ratepayer by the Servicer~~Retail Consumer and specified as such in an Electricity Invoice shall be

[20] ~~Details concerning Invoicing of Transition Charges (Article 4) and Collections and Remittances (Article 5) are complex. Consider how much of this can be addressed through regulations, or if acceptable based on existing OEB license conditions/codes, IESO market rules/manuals, etc.~~

[21] ~~Should this be a designated government official, rather than an agent appointed by investors?~~

determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, ~~in~~except to the ~~absence~~extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.

(8) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, the ~~Regulatory Asset Owners~~Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor. Any Electricity Distributor that is replaced under this Section 4(8) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to the Alternative Servicer and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Servicer to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(9) **~~Regulatory Asset Owners~~Absolute Assignees have Standing** – The ~~Regulatory Asset Owners~~Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to ~~Ratepayers~~Retail Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges. Any court of the Province ~~[and the OEB]~~ shall have jurisdiction over any actions brought before it by the ~~Regulatory Asset Owners~~Absolute Assignees in relation to any such failure.[22]

(10) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(11) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor~~,~~ or any Alternative Servicer ~~or any [Alternative Collection Agent]~~ to ensure that Transition Charges are properly charged to ~~Ratepayers~~Retail Consumers and specified as such in Electricity Invoices.

[22] ~~Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.~~

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable][10] efforts~~]~~ to collect amounts owing by ~~Ratepayers~~Retail Consumers in respect of Transition Charges charged to such ~~Ratepayers~~Retail Consumers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent.

(2) **Segregation of Transition Charge Collections** – An Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from ~~Ratepayers~~Retail Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.[11] Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for ~~each~~the Regulatory Asset ~~Owner~~Owners.

(3) **Electricity Distributor Remittances** – On each ~~[~~applicable Remittance Date~~]~~, an Electricity Distributor shall remit all Transition Charge Collections received by it from ~~Ratepayers~~Retail Consumers in respect of the related Reference Period to or to the account of IESO or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – IESO or if applicable any Alternative Collection Agent shall, as an agent of the Regulatory Asset Owners, undertake [diligent][reasonable] efforts to accept and collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from ~~Ratepayers~~Retail Consumers that pay their Electricity Invoices directly to ~~the Servicer.~~[23]IESO.[12]

(5) **Segregation of Electricity Distributor Remittances** – IESO and if applicable the Alternative Collection Agent shall ~~[~~promptly~~]~~ segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, IESO or if applicable any Alternative Collection Agent shall hold such amounts in trust for ~~each~~the Regulatory Asset ~~Owner~~Owners.

(6) **IESO Remittances** – On each ~~[~~Settlement Date~~]~~[24][13], IESO and if applicable the Alternative Collection Agent shall remit all amounts on deposit in its Regulatory Asset Account (a) first, to or to the account of the ~~Regulatory Asset Owner~~Absolute Assignees an amount equal to the Investment Remittance for the related month and (b) second, to IESO (including by IESO retaining such amount) an amount equal to the lesser of (i) the Maximum IESO Recovery for the related month and (ii) the IESO Retained Interest Amount as of the Settlement Date.

[10] Mirror collection "standard of care" under applicable legislation.
[11] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.
~~[23]~~[12] Consider building this obligation into a deemed condition of licence for the IESO.
~~[24]~~[13] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **~~Successors of~~ IESO Successor** – ~~Any successor of~~ IESO Successor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province~~25~~14, then such person shall, if requested by the ~~Regulatory Asset Owners~~Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to ~~Ratepayers~~Retail Consumers in its applicable service area, including all consumers connected to the electricity distribution system assets and taking electric delivery service located within such service area; (b) allocate partial payments by ~~Ratepayers~~Retail Consumers as provided in this ~~Part; (c) terminate service to non-paying Ratepayers on the same basis as termination of service is permitted for non-payment of electricity transmission and distribution rates; (d~~Act; (c) exercise all enforcement rights of the ~~Regulatory Asset Owners or Pledgee~~Absolute Assignees for the benefit of ~~a Regulatory Asset Owner or Pledgee~~an Absolute Assignee; and (~~e~~d) remit any Transition Charge Collections to the ~~Regulatory Asset Owner or Pledgee~~Absolute Assignees or Pledgees, as applicable, each in accordance with its ~~Regulatory Asset~~Investment Interest.

(10) **~~Regulatory Asset Owners~~Absolute Assignees have Standing** – The ~~Regulatory Asset Owners and any Pledgee~~Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Alternative ~~Servicer~~Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from ~~Ratepayers~~Retail Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5. Any court of the Province ~~[and the OEB]~~ shall have jurisdiction over any actions brought before it by the ~~Regulatory Asset Owners~~Absolute Assignees in relation to any such failure. ~~26~~

(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the ~~Regulatory Asset Owners~~Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the

~~25~~14 This is in anticipation of a possible future restructuring of the distribution system. ~~Also, this would cover any OREC-eligible customer (market participant) of IESO.~~

~~26 Consider having such matters first go through the OEB, particularly if the obligation to bill, collect or remit is deemed to be a condition of license for distributors, IESO, retailers and unit sub-metering providers, which would be enforceable provisions under the OEB Act and within OEB jurisdiction to enforce.~~

Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the ~~Regulatory Asset Owners~~Absolute Assignees.

(12) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any ~~Ratepayer~~Retail Consumer, any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.~~27~~15

(13) **Sequestration** – If any Electricity Distributor, IESO, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by ~~the Regulatory Asset Owners or Pledgee~~and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the ~~applying party~~Absolute Assignees or Pledgees, shall order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the ~~Regulatory Asset Owners or Pledgee~~Absolute Assignees, each with respect to its ~~Regulatory Asset.~~ Investment Interest, and the Pledgees as applicable.[16]

(14) Regulations – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by ~~the Regulatory Asset Owner~~some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset

(1) **Composition** – The Regulatory Asset shall constitute ~~an existing, present~~a current and irrevocable property right and interest consisting, collectively, of the following rights and interests ~~of a Regulatory Asset Owner in the following~~ (without duplication):

~~27~~15 Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a ~~Ratepayer~~Retail Consumer reduces its payment of Transition Charges, despite this language~~, and same~~. Same for Electricity Distributor Remittances and IESO Remittances.

[16] Consider adding or substituting this provision for a right to appoint a receiver.

a. the right of ~~a Regulatory Asset Owner to record its portion of the Regulatory Asset in its accounts~~IESO (i) to record its IESO Retained Interest in its accounts in accordance with Section 8(1), having a stated amount from time to time equal to the IESO Retained Interest Amount; and (ii) to receive IESO Recoveries from time to time in accordance with Section 5(6)(b);

b. the right to impose, bill, invoice, collect and receive Transition Charges from ~~Ratepayers~~Retail Consumers, including the right to determine the amount of Transition Charges in accordance with this ~~Part~~Act;

c. the right to enforce the obligations and indebtedness of each ~~Ratepayer~~Retail Consumer to pay the Transition Charges charged to the ~~Ratepayer~~Retail Consumer from time to time in accordance with Article ~~2~~,3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices;

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

e. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of IESO or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article ~~4~~5;

f. the right to enforce the duties and obligations of IESO and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article ~~4~~5;

g. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

h. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

i. all Related Rights; and

j. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred.

(2) **Validity of Dispositions** – Despite any limitations or restrictions on a Disposition that may arise by contract or by operation of any applicable law of the Province ~~[~~or any consent requirement applicable to a Disposition that may arise by ~~contract or by~~ operation of any applicable law of the Province~~]~~, a Disposition by ~~a Regulatory Asset Owner~~IESO to an Absolute Assignee made under the Financing Plan ~~pursuant to a Disposition Document~~, or by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with ~~its~~the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under the ~~Regulatory Asset~~applicable Investment Interest (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of the Regulatory Asset Owner's applicable right, title, and interest in, to and under the Regulatory Asset (or relevant portion thereof), and not merely as a Pledge thereof~~. [A Disposition shall not be subject to recharacterization or challenge on any other basis and the validity of a Disposition shall not be affected or impaired by: (a) the commingling of Transition Charge Collections or other proceeds from Transition Charges with other amounts; (b) the retention of any interest (including any partial, residual or subordinated interest, whether direct or indirect) in the Regulatory Asset by the transferring Regulatory Asset Owner; (c) any right to repurchase the Regulatory Asset in favour of the transferring Regulatory Asset Owner; (d) any recourse that an Absolute Assignee may have against the transferring Regulatory Asset Owner; (e) any indemnification rights or obligations provided by the transferring Regulatory Asset Owner; (f) any obligation of the transferring Regulatory Asset Owner to collect and remit Transition Charge Collections on behalf of an Absolute Assignee, including but not limited to, any retention by the transferring Regulatory Asset Owner to bare legal title for the purpose of collecting Transition Charges; or (g) the ascribed or intended treatment of the Disposition by the transferring Regulatory Asset Owner or the Absolute Assignee on any different basis including for tax, financial reporting or other purposes.]~~[28], and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in the Investment Interest subject to the Disposition, including all rights under the Investment Interest arising after such Disposition.

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the transferring Regulatory Asset Owner and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the transferring Regulatory Asset Owner, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

~~[28] Consider if helpful to investors, or delete.~~

(4) **Validity of Pledges** – Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province ~~[~~or any consent requirement applicable to a Pledge that may arise by ~~contract or by~~ operation of any applicable law of the Province~~]~~, a Pledge by ~~a Regulatory Asset Owner~~an Absolute Assignee may be made to secure any related Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the ~~Regulatory Asset~~related Investment Interest in accordance with the terms of the Pledge. Other than as required by the Financing Plan, no consent of any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - ~~Any Pledge made by a~~For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset ~~Owner~~shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation ~~incurred under the Financing Plan shall be perfected, valid and binding from the time when the Pledge is made and shall be valid and binding as against the Regulatory Asset, the Regulatory Asset Owner making the Pledge and all other persons who have claims of any kind (whether in tort, contract or otherwise) against the Regulatory Asset or the pledging Regulatory Asset Owner, irrespective of whether such persons have notice of the Pledge and the security interests of the Pledgee under such Pledge shall have priority over any liens in favour of such other persons. All proceeds of the Regulatory Asset~~may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the ~~Regulatory Asset Owner~~Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected~~, without any physical delivery thereof, registration of any financing statement with respect thereto~~ pursuant to the ~~[~~PPSA~~]~~ ~~or any other further act.~~[29].[17] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may ~~subsequently~~ attach to the property rights and interests in the ~~Regulatory Asset~~Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. ~~Any~~Subject to the terms of the Collective Action Agreement, a Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. ~~[A Pledgee~~All provisions of the PPSA shall ~~cause a financing statement to be filed in respect of a Pledge on the basis that~~apply to the Regulatory Asset on the basis that it is ~~"~~intangible~~"~~ personal property, ~~for informational purposes only under the [PPSA].~~except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and

~~[29]~~[17] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document, in each case under the Financing Plan. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's ~~right~~rights and ~~interest~~interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective ~~[~~and ~~joint]~~coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.[30]

Article 7 – Establishment of the Fair Allocation Plan[31][18]

(1) Adoption of the Fair Allocation Plan – The ~~[Minister of Energy]~~[32]Delegate may ~~,~~ [by written ~~order~~declaration,] designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this ~~Part~~Act, ~~[~~except if amended, amended and restated or terminated by a further written ~~order issued~~declaration made by the ~~Minister of Energy~~Delegate in compliance with Section ~~•~~]7(4).

(2) Principles and Parameters[33] – A Fair Allocation Plan shall seek to allocate ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits across present and future ~~Ratepayer~~Retail Consumer Groups on a basis that the ~~Minister of Energy~~Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters[34]:

1. ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits should be allocated over ~~a period not to exceed the later of (a) the estimated remaining useful life of the Related Generating Assets and (b) the remaining term of IESO's commitments under the Power Contracts~~the period ending on the Program End Date.

2. The Fair Allocation Plan should specify the Reference Periods ~~(e.g., 6 month periods),~~ for the purpose of identifying applicable ~~Ratepayer~~Retail Consumer Groups and allocating ~~among them responsibility to bear the Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits among them on a relative basis over time.

[30] ~~This is necessary to ensure that if there are multiple regulatory asset owners and pledgees, they will be coordinated in the application of their rights of enforcement, etc.~~

[31][18] The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current ~~Power Contracts~~procurement contracts and not invest in extending service lives to secure further ~~power~~procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

[32] ~~Input required. If the MOE is given this power, conform to applicable authorities (e.g., plans and directives).~~

[33] ~~Consideration will be given as to whether these details should be included in the Regulation.~~

[34] ~~We have provided a few examples of what could be the basic principles. These will depend on market considerations, the Province's decision on the required amount of detail and the ability to sustain the legal basis for the program. These examples are not meant to suggest the appropriate balance – just illustrative to advance a discussion among the stakeholders.~~

3. The share of ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits allocable to a particular ~~Ratepayer~~Retail Consumer Group in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to the ~~Ratepayer~~Retail Consumer Group over such Reference Period.

4. The ~~estimated Unrecovered~~share of Future Fair Share of Green Transition ~~Costs~~Benefits to be allocated to a ~~Ratepayer~~Retail Consumer Group and any future ~~Ratepayer~~Retail Consumer Group at a particular time should not exceed the ~~estimated value of the Related Generating Assets based on their remaining useful lives or terms~~Estimated Future Green Transition Benefits, measured in respect of the ~~period~~Reference Periods following such particular time and to the Program End Date.

5. No future ~~Ratepayer~~Retail Consumer Group should ~~bear~~be allocated an unreasonably disproportionate share of ~~the Unrecovered~~Estimated Future Green Transition ~~Costs~~Benefits. Except in exceptional circumstances or in the case of any ~~backward-looking adjustment made~~reallocation of an Over-Assessed Amount as contemplated in 7, below, the ~~share of the Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits to be allocated under a Fair Allocation Plan to any future ~~Ratepayer~~Retail Consumer Group should have regard to *[Insert formula if a year-over-year maximum amount is determined to be appropriate]*[35].

6. ~~A reasonable estimate of the rate of inflation~~The time value of money should be ~~applied~~reflected in the Fair Allocation Plan, in order to equate the relative values of the nominal ~~amount of Unrecovered Transition Costs to be allocable to Ratepayer~~allocations of Future Fair Share of Green Transition Benefits, calculated in current dollars, to future Retail Consumer Groups over time.

7. ~~Backward-looking adjustments to a~~To the extent there has been an Over-Assessed Amount, the Fair Allocation Plan may ~~be made to achieve a fair distribution among Ratepayers of the benefits of the Green Generation Initiative.~~determine that an adjustment should fairly be made to rebate Retail Consumers for such an amount, by reducing the costs otherwise attributable under the Act to such Retail Consumers. The relative costs of the Green Generation Initiative are reflected under the Act by the attribution of Transition Charges to such Consumer Groups, based on the Financing Plan seeking to track the allocations of benefits under the Fair Allocation Plan. Accordingly, the Maximum Transition Charge Amount determined for one or more Retail Consumer Groups having regard to the Fair Allocation Plan otherwise applicable may be appropriately reduced to recognize the effect of the Over-Assessed Amount. In such a case, a determination to reduce the Maximum Transition Charge Amount applicable for certain related Reference Periods should have regard to the principle that the corresponding rebate should be extended to benefit the Consumer Group or Consumer Groups in closest proximity to the Legislative Implementation Date.

(3) Attribution Methodology – The Fair Allocation Plan ~~[~~shall~~]~~ specify ~~an objective methodology (~~the "~~Attribution Methodology~~")~~ for the purposes of allocating the Period

~~[35] Consider if a quantitative limit needs to be included in the legislation.~~

Transition Charges across ~~all of~~ the ~~Ratepayers~~Retail Consumers of a particular ~~Ratepayer~~Retail Consumer Group. The Attribution Methodology shall result in an attribution of such Transition Charges that ~~are~~is considered by the ~~Minister of Energy~~Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation.

(4) ~~**[Confirmation][Review] of the Fair Allocation Plan** – [OEB?][36]~~**Amendments of the Fair Allocation Plan** – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation and (b) comply with any restrictions or limitations specified with respect thereto in any Funding Obligation.

Article 8 – The ~~Financing Plan~~[37]IESO Retained Interest

(1) **Maintain Books of Account** – IESO may maintain books of account to record the IESO Retained Interest Amount and all adjustments thereto from time to time. Such books of account shall be determinative with respect to the amount of IESO's related regulatory asset.

(2) **Limitation on Additions** – IESO shall not record additions to the IESO Retained Interest Amount in respect of IESO Funding Shortfalls (a) if such additions are restricted by the terms of any Disposition Document or the Collective Action Agreement, or (b) on or after •, 2017.

(3) **Dispositions** – IESO may effect a Disposition to an Absolute Assignee if (a) the Absolute Assignee has or will concurrently become bound by the Collective Rights Agreement; (b) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; (c) the Financial Services Agent confirms in writing that the Disposition is permitted under the Financing Plan; and (d) the net proceeds payable to IESO from the sale of the related Investment Interest would not exceed the IESO Retained Interest Amount immediately before the time of such Disposition.

(4) **No Continuing Interest in any Investment Interest** – IESO shall have no continuing right or interest in any Investment Interest subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party and IESO shall not assert any such right or interest or take or omit to take any action to exercise or enforce its rights or interests under the IESO Retained Interest if such action or omission would impede or obstruct the rights of any Absolute Assignee or a Pledgee to enforce its rights and interests in any Investment Interest, except if IESO is expressly permitted to take or omit to take such action, respectively, under the related Disposition Document or the Collective Rights Agreement.

(5) **IESO Financing Costs** – IESO shall be entitled in good faith to incur reasonable financing costs (including interest and other reasonable financing charges) reflecting

~~[36] Any approvals or consents by the OEB will be obtained before any Funding Obligation that is dependent on such approval or consent is incurred. Any such approval or consent will be irrevocable and non-appealable. Any regulatory action occurring after any incurrence will not affect the related Funding Obligation or underlying rights in the Regulatory Asset.~~

~~[37] Consideration will be given as to whether these details should be included in the Regulation.~~

market terms and conditions and which are payable in arrears, in order to finance its ownership of the IESO Retained Interest from time to time.

(6) **IESO Recoveries** – IESO shall, in respect of a month, be entitled to receive from IESO Remittances on a related Settlement Date the amount (if any) available to IESO under Section 5(6)(b).

Article 9 – The Financing Plan

(1) **Power to Prepare ~~and~~, Implement and Amend the Financing Plan** – ~~In compliance with a [written order][***MOE to confirm process.***] of the Minister of Energy, the Administrative Agent shall~~The Financial Services Agent shall be authorized to prepare, implement and ~~propose~~amend the~~ adoption of a~~ Financing Plan. If the ~~Administrative~~Financial Services Agent is unwilling or unable to prepare and propose the adoption of ~~a~~the Financing Plan, the ~~Minister of Energy~~Delegate may by written ~~order~~declaration designate one or more other persons who shall be authorized to prepare ~~and~~, implement ~~such a~~and amend the Financing Plan.

(2) ~~**Required**~~ **Terms and Conditions of the Financing Plan** – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions ~~that have the effect of allocating the Unrecovered Transition Costs across present and future Ratepayer Groups on a basis that is consistent with the Fair Allocation Plan~~. The Financing Plan shall ~~be consistent with~~have regard to the principles~~,~~ and parameters~~, requirements and conditions~~ set forth in Schedule 3 and such other conditions and requirements as may be specified in a written ~~order~~declaration of the ~~Minister of Energy [~~Delegate or in accordance with the Regulation~~]~~.

(3) ~~**Power to Review and Approve the Financing Plan** – The Minister of Energy may, by written order, designate one or more persons to review the Financing Plan and to review and assess the consistency of the Funding Obligations incurred with such Financing Plan, and the Minister of Energy may specify requirements in respect of such review in such written order. The Administrative Agent, or such other person(s) as may be designated by written order of the Minister of Energy made pursuant to Section 8(1), shall make any such amendments to the Financing Plan, and submit a revised Financing Plan to the designated reviewer for approval within [the time period specified in such written order]/[[●] days of such written order].[***Consider periodic amendments to the Financing Plan following an annual review; provided that amendments cannot affect the existing Funding Obligations. Consider the level of oversight the MoE/OEB will have over this process?***]~~**OEB Approval** – Any Additional Funding Charge payable to or for the benefit of the Financial Services Agent shall be subject to review and approval by the OEB.

(4) ~~**Approval of Financing Plan –** The **[OEB]** shall have the power to and shall approve or disapprove of the Financing Plan based solely on whether the Financing Plan is consistent with (i) the principles, parameters, requirements and conditions set forth in Schedule 3, (ii) such other conditions and requirements as may be specified in a written order of the Minister of Energy [or in accordance with the Regulation] [and (iii) the Fair Allocation Plan]. If the **[OEB]** approves the Financing Plan, then such Financing Plan shall be implemented by the Administrative Agent. If the OEB disapproves of the Financing Plan or otherwise fails to approve the Financing Plan, then the Administrative Agent shall re-submit the Financing Plan with such amendments as the Administrative~~

Agent shall consider necessary for the Financing Plan to be approved by the OEB.[38] **OEB Review** – The OEB [shall] undertake an annual review of the records maintained by the Financial Services Agent for the purpose of confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan.

(5) **Consistency with the Fair Allocation Plan** – Funding Obligations should only be incurred if Repayments and Funding Costs would be borne by present and future Designated Ratepayers on a basis that is [generally] consistent with their respective allocations of the costs and benefits of the Green Generation Initiative contemplated in the Fair Allocation Plan. In that regard, at the time of setting the Fair Allocation Plan for any particular period, the aggregate amount payable during future Reference Periods on account of Funding Obligations incurred on or before the date on which a new Funding Obligation is incurred should not exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group contemplated in the Fair Allocation Plan. If, despite the foregoing, the Administrative Agent determines that the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Ratepayer Group under the then current Fair Allocation Plan, the Financing Plan shall require the Administrative Agent to make diligent efforts to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances, if such a Refinancing or deferral is determined to be available the Financing Plan shall require the Administrative Agent to make diligent efforts to implement such Refinancing or deferral on a basis that is consistent with the Fair Allocation Plan.

(5) **(6) Establishment of Special Purpose Entities** – If the implementation of the Financing Plan contemplates the establishment of one or more special purpose finance entities to incur Funding Obligations as a Financing Entity under the Financing Plan, as an Absolute Assignee and on a basis that limits the recourse for the payment of such Funding Obligations to such Absolute Assignee's interest in, to and under the Regulatory Asset, the Administrative Agent shall have regard to the characteristics specified in Schedule 4 in establishing such special purpose entity.]**Replacement of the Administrative Agent** – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the Administrative Agent shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services Agent under the Financing Plan. If the Financial Services Agent is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services.

(6) **(7) Obligation to Apply IESO Remittances** – The AdministrativeFinancial Services Agent shall ensure that amounts transferred to it under Article 5, as agent for and on behalf of the Regulatory Asset OwnersAbsolute Assignees, or otherwise in respect of or

[38] Once the Financing Plan is reviewed and approved there would be no further OEB review. If there is opportunity for further review, such review will have no impact on prior issued debt. Any further financings would be put on hold until such review is completed (during which time the IESO would again need to fund the shortfall on an interim basis and obtain necessary funding).[1]

as proceeds from ~~the Regulatory Asset~~an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose.[39]

(7) ~~(8)~~ **Non-Recourse** – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, ~~and~~any Alternative Collection Agent, the ~~Administrative~~Financial Services Agent, the OEB, the Province or the Lieutenant Governor in Council, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this ~~Part~~Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount. [All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]

(8) ~~(9)~~ **Incurrences are Binding** – ~~Despite any failure to adhere to the Financing Plan or to comply with any requirement of this Part,~~Notwithstanding anything to the contrary in this Act, each Disposition made to or by an Absolute Assignee and all amounts payable or becoming due and payable by or on behalf of ~~a Regulatory Asset Owner~~an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation, shall be binding for the purposes of this ~~Part~~Act, including in determining the amount of related Transition Charges, despite any impairment or defect resulting from such failure.

[Article ~~9~~10 – Compliance Matters[40~~19~~]

(1) **Right of the [OEB] to Inspect Books and Records** - For the purpose of investigating compliance with the provisions of this ~~Part~~Act, the ~~[~~OEB~~]~~ shall have the right, jurisdiction, power and authority to examine the books and records of ~~any person who is or may become obligated or have duties that arise under this Part or any Funding Obligation~~*~~[Insert names if any]~~*.

~~(2) **Power to Investigate Compliance and Impose Regulatory Sanctions** - Subject to the limitations set forth regarding the irrevocability of Transition Charges and the Undertaking of the Lieutenant Governor in Council, nothing in this Part shall (a) prevent or preclude the [OEB] from investigating the compliance of any person who is or may become obligated or have duties that arise under this Part [or any Funding Obligation] with the terms and conditions of this Part and requiring compliance by such person therewith; or (b) prevent or preclude the [OEB] or any successor regulator from imposing regulatory sanctions against any person who is or may become obligated or have duties that arise under this Part for its failure to comply with the terms and conditions of this Part[41].~~

(2) ~~(3) [Other Rating~~**OPG's Rate Settings** – When setting other rates for or in respect of ~~any person who is or may become obligated or have duties that arise under this Part,~~

[39] ~~We need to work in the idea that there may be Finance Reserve Deposits or other amounts that remain after paying Finance Amounts. Those surplus amounts should be credited back to Ratepayers.~~

[40~~19~~] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article ~~is~~and any potential role for the Auditor General is still under consideration.

[41] ~~Consider scope of OEB regulation and whether a Financing Entity should be subject to this sort of provision in any event.~~

~~including any Electricity Distributor, IESO, Generator or the Administrative Agent, nothing in this Part shall prevent the [OEB] or any successor regulator from taking~~OPG, the OEB shall not take into account (a) the ~~collection by or attribution to such person of~~ administrative or servicing fees charged by OPG as Financial Services Agent [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services.~~]~~[42]; (b) the cost consequences to OPG of being the Financial Services Agent; or (c) the consequence of OPG consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.][20]

Article ~~10~~11 – Undertaking of the Lieutenant Governor in Council[43][21]

(1) **No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections** – The [Lieutenant Governor in Council] shall not in any way take or permit any action to reduce, impair, postpone or terminate the obligation of ~~Ratepayers~~Retail Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly~~[~~, including through the introduction of any bill or the passing of any legislation or regulation~~]~~ having such effect. The amount of Transition Charges determined ~~hereunder~~under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by the Lieutenant Governor in Council~~[~~, including through the introduction of any bill or the passing of any legislation or regulation~~]~~ having such effect.

(2) **Undertaking and Agreement** – The [Lieutenant Governor in Council] shall not:

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

(b) ~~**(2) Undertaking and Agreement** – The Lieutenant Governor in Council shall not in any way take or permit any action that limits, alters or impairs the value of the Regulatory Asset or,~~ except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the ~~Regulatory Asset Owners, including any~~ Absolute ~~Assignee from time to time, and~~Assignees or any Pledgee from time to time~~[~~,~~including through the introduction of any bill or the passing of any legislation or regulation~~]~~.;

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment , amendment and restatement or termination

[42] ~~OPG has indicated that the risks and cost consequences to OPG of being an~~[20] As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as Administrative Agent ~~or of consolidating a Financing Entity for accounting purposes should not be considered by the OEB in setting the regulated payment amounts for~~of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role. ~~To be discussed.]~~

[43] ~~Under consideration~~[21] Under consideration, including the dealers' request for a "servicer guarantee" and a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes.

would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, Successor IESO shall be established to perform such obligations.

(4) ~~[If IESO becomes insolvent or otherwise incapable of performing its obligations under this Part, an IESO Successor will be established that is capable of performing such obligations in order that the Regulatory Asset Owners may appoint the IESO Successor as an Alternative Servicer or Alternative Collection Agent. Regulatory Asset Owners shall be fully~~**Compensation for Failure** – Absolute Assignees shall be compensated for any losses suffered by them as a result of any failure by the Lieutenant Governor in Council to comply with its undertakings and agreements in this Article ~~10(2) for any loss suffered by the Regulatory Asset Owner as a result of such failure.~~[44]11.[22]~~]~~

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid.

(6) ~~**(3)**~~ **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Lieutenant Governor in Council, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article ~~11~~12 – Regulations

Regulations may be made under this ~~Part~~Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with ~~a Regulatory Asset Owner~~an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding ~~Costs~~Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this ~~Part~~Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

[44][22] Requested by Torys. For discussion.

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this ~~Part~~Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by ~~a Regulatory Asset Owner~~an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article ~~12~~13- Miscellaneous[~~45~~23]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this ~~Part~~Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this ~~Part~~Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this ~~Part~~Act shall be required with respect to the actions to be taken in compliance with this ~~Part~~Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this ~~Part~~Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this ~~Part~~Act, if any provision of this ~~Part~~Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this ~~Part~~Act that is taken by any person who is or may become obligated or have duties that arise under this ~~Part~~Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this ~~Part~~Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this ~~Part~~Act are intended to be

[~~45~~23] OPG would like the specific amendments related to OPG to be included in the Bill.]

severable and that the Legislature would have enacted this ~~Part~~Act even if any Article, Section, paragraph or subparagraph of this ~~Part~~Act held to be unconstitutional or invalid had not been included in this ~~Part~~Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3[24]

Principles, and Parameters, Requirements and Conditions for Establishing the Financing Plan

The Financing Plan shall have regard to the following principles, and parameters, requirements and conditions:[***Consider others.***] provide a guideline as to what a Financing Plan should address:

(1) the Financing Plan shall, in respect of each Reference Period, describemake reference to the allocations of UnrecoveredFuture Fair Share of Green Transition CostsBenefits to each Reference Group as contemplated by the Fair Allocation Plan;

(2) the Administrative Agent shall make a good faith estimate of theIESO Funding Shortfalls for each Reference Period, based on the terms of the Power Contracts and assumptions considered to be reasonable respecting forward market prices for electricity;

(3) the Administrative Agent shall describeconsider alternative funding arrangements considered to be suitable for the purpose of fundingto fund the estimated IESO Funding Shortfalls, including by reference to short term and/or long term Funding Obligations that could reasonably be incurred by the Regulatory Asset Owners for such purpose;

(9) **(4)** such Funding Obligations shall reflectconsider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that the effect of incurring such Funding Obligations would be that the payments made thereunder in respect of eachfor a Reference Period (including the anticipated Finance Amounts becoming payable in relation to such Funding Obligations) would reasonably correspond to the allocations of UnrecoveredFuture Fair Share of Green Transition CostsBenefits to the applicable Reference Group under the Fair Allocation Plan;

(4) if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Retail Consumer Group under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(5) the Financing Plan shall reflect the outcome of a financial model that incorporatesreflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical RatepayerRetail Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation having regard to the application of the Allocation Methodology); [***Consider what outputs from OPG will be tested by the OEB and when. The modelling in the Financing Plan may permit the OEB to check progress against the model from***

[24] Awaiting input from Torys based on OPG mark-up of Financing Plan sections.

~~***time to time, which may provide a basis for the MoE/OEB to require a review/amendment to the Financing Plan if the ongoing operation of the program results in significant deviation from the model. Consider whether this flexibility is desirable.***~~]

(6) ~~the Administrative Agent, for and on behalf of each Regulatory Asset Owner, shall seek to~~ incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the ~~Regulatory Asset Owners~~Absolute Assignees will require committed access to short term liquidity to cover estimated IESO Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate ~~a Regulatory Asset Owner~~an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the ~~Administrative~~Financial Services Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations ~~shall~~should not obligate ~~a Regulatory Asset Owner~~an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the ~~Administrative~~Financial Services Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the ~~Administrative~~Financial Services Agent shall cause the applicable ~~Regulatory Asset Owner~~Absolute Assignee to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the ~~Administrative~~Financial Services Agent will select counterparties under any transaction to be entered into by ~~a Regulatory Asset Owner~~an Absolute Assignee, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note

trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the ~~Administrative~~Financial Services Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the ~~Administrative~~Financial Services Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(7) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the IESO Funding ~~Shortfall~~Shortfalls from time to time on a basis that is consistent with the allocations of ~~Unrecovered~~Future Fair Share of Green Transition ~~Costs~~Benefits to applicable Reference Groups under the Fair Allocation Plan;

(8) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(9) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the ~~Administrative~~Financial Services Agent and other agents and service providers to the ~~Regulatory Asset Owners~~Absolute Assignees may be determined, allocated and paid;

(10) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(11) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(12) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(13) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(14) the basis upon which any Disposition may be made or effected by ~~a Regulatory Asset Owner~~an Absolute Assignee, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(15) ~~a description of each~~describe the requirements applicable to any special purchase entity that will purchase ~~the Regulatory Asset from the IESO~~an Investment Interest, including proposed capitalization, governance, and restrictions on their powers and activities ~~having regard to the parameters in Schedule 4~~; and

(16) the basis on which any Pledge may be given or effected.

~~**Schedule 4**~~

~~**Creation of any Special Purpose Entity to become a Regulatory Asset Owner]**~~

~~**(1) Powers and Abilities**:~~

~~a. No part of the revenue or assets of a Regulatory Asset Owner shall enure to the benefit or be distributable to its trustees, officers or directors, as the case may be, or any other private persons, except as may be provided for actual services rendered;~~

~~b. Each Regulatory Asset Owner shall be authorized to:~~

~~i. incur the Funding Obligations contemplated by a Financing Plan and use the proceeds thereof to purchase or acquire, and to own, hold and use the Regulatory Asset;~~

~~ii. contract for servicing of the Restructuring Asset and any bonds contemplated by a Financing Plan and for administrative services; and~~

~~iii. pledge the Regulatory Asset to secure the Funding Obligations incurred by the Regulatory Asset Owner;~~

~~c. So long as any Funding Obligations contemplated under a Financing Plan are outstanding, a Regulatory Asset Owner shall not be authorized to merge or consolidate, directly or indirectly, with any person or entity;~~

~~d. a Regulatory Asset Owner shall not have the power or authority to incur or guarantee or otherwise become obligated to pay any debt or obligations other than what is contemplated under a Financing Plan;~~

~~e. a Regulatory Asset Owner shall cause the proceeds obtained by incurring any Funding Obligation to be placed in one or more separate accounts and used only to purchase the Regulatory Asset and pay any costs as provided for in a Financing Plan; and~~

~~f. so long as the Regulatory Asset is pledged to secure Funding Obligations, the Regulatory Asset Owner must apply revenues from the collection of Transition Charges only to repay such Funding Obligations and other costs as provided for in a Financing Plan.~~

~~**(2) Governance of Regulatory Asset Owner –** A Regulatory Asset Owner shall be created having regard to the following principles:[***OPG to confirm if SPE will be a trust or another type of entity.***]~~

~~a. [Number of trustees]~~

~~b. [Replacement of trustees; vacancies; appointment of successors]~~

~~c. [Removal of trustees for neglect of duty or misconduct]~~

~~d. [Quorum and meetings]~~

~~e. [Fiduciary duty]~~

~~f. [Isolation, separateness and other "non-consolidation" and "bankruptcy remoteness" criteria]~~

~~g. [Delegation of powers and duties to administrative agents]~~

~~h. [Delegation of powers and duties to administrative agents]~~

Subject:	GA Equity Injection
Date:	Wednesday, April 05, 2017 12:21:19 PM
Attachments:	BN - GA Equity Injection Structure v7. Markup6.docx

Hello,

Most of the considerations were added in a version of the note but I have added a few more points for the discussion this afternoon. The file can be found here: \\ofina.on.ca\ofadfs\Users\CEF\Hydro 2017\Electricity Prices\Mitigation Proposals\Debt Financing the GA\GA Structure

Kind regards,

Adam Prokop
Economic Specialist

COMMERCIALLY SENSITIVE AND CONFIDENTIAL

GA FINANCING – EQUITY INJECTION OVERVIEW

This document serves to provide an overview of the implementation mechanism, timelines and other issues for the GA Financing and the Equity Injection for Ontario Power Generation (OPG) from the Province.

OVERVIEW

- The Ministry of Energy, Ministry of Finance and the Ontario Financing Authority (OFA) are coordinating with OPG to implement a Global Adjustment (GA) smoothing mechanism.
- OPG will develop a Special Purpose Vehicle (SPV) referred to as "OPG Trust" to purchase the "right to collect" assets from the IESO in return for cash proceeds. IESO will use the cash proceeds to make up the shortfall in GA payments from ratepayers.
- OPG Trust will be structured to finance 51% of its funding requirements through the capital markets with the remaining 49% being provided by OPG as subordinated debt.
    - The 49% subordinated debt from OPG will be financed through debt from the capital markets (5%) and through equity injections from the Province (44%).
    - Annual payments will be received by OPG Trust for financing & administrative costs.
        - Staff Comments: Unclear if these financing costs/annual payments will be received by OPG Trust [TBC: from IESO or ratepayers directly]?
- The mechanism by which the financing is conducted is yet to be finalized. Both OPG on behalf of OPG Trust and the OFA on behalf of the Province are separately looking to engage 'financial advisors' for the purpose of determining optimal financing structures, e.g. debt covenants, terms and conditions such as if to be callable, redeemable, etc. [Also see below.]

BORROWING

- The 51% financing conducted by OPG Trust and the 5% financing via OPG will initially be financed through a short term credit facility which will be obtained by OPG. OPG has communicated that this may be through short term debt, raised from the Canadian money markets.
    - OPG staff further clarified that this would be facilitated through a new facility and to be put in place by OPG Trust and not any of the existing facilities OPG currently has in place.

Commented [BA1]: May be good to make 2nd part clear upfront. Redraft if I didn't get language right.

Commented [BA2]: Confused here. Are we referring to interest received or OPG annual payments to Trust.

Commented [AP3]: From IESO according to white paper who would collect the payments and remit to OPG.

Commented [BA4]: Also confused about comment: Should that be ".....received by OPG Trust"

Commented [AP5R4]: Yes, you are right. Corrected.

Commented [JK6]: Check with SIFB or CMD on the right terminology.

Commented [FC7]: To me this is part of the terms and conditions

Commented [JK8]: Did I get this right?

Commented [FC9]: If this is the case wouldn't they need a minimum amount of equity to be put in the Trust at the onset? I'm assuming OPG nor the Province will be providing a back stop to the Trust.

- Longer term debt will be issued as soon as possible, subject to market timing constraints.
  - OPG to retain 3 dealers to advice on the long-term borrowing and financing of the GA.
  - The OFA is also expected to retain a dealer to provide due diligence and independent advice for the Province's equity injection [TBC] into OPG and long-term borrowing by OPG Trust [TBC].
- The long term debt issued by OPG Trust may also be callable to buy back the bonds once the financed GA starts to be repaid. [TBC]

Commented [JK10]: I understood OFA's interest was more on how to structure its borrowing than other aspects but open to hearing different view.

Commented [JK11]: Why would OFA's borrowing be different? Carlos mentioned certain features, though would involve premiums?

EQUITY INJECTION MECHANISM

OVERVIEW

- The Province is expected to provide monthly equity injections to OPG.
- In return, OPG would issue new shares to the Province at a value of $20 per share.
- These share issuances currently ~~environed~~ envisioned to be redeemable by the Province and OPG may also have rights to buy back the shares [TBC].
  - This would provide the Province with a flexible mechanism to redeem its equity investment in OPG, and allow OPG to return to a more suitable capital structure once the GA financing program has subsided.
  - Redeemable terms may include a lock-out period that permits the Province to redeem after a set time period.
  - [TBC] Shares may be considered preferred shares. Unclear whether at redemption these shares will have a non-par value (ie. not $20 per share).
  - [TBC] OPG staff have indicated that the current plan is to pay no interest or dividends for the 44% equity injection. Under such a scenario, an appropriate pricing or premium on buyback would need to be priced in or would potentially entail risks described under the Consideration section below.

Commented [FC12]: Not quarterly?

Commented [JK13]: Monthly now.

Commented [BA14R13]: For clarity, should we start with the broader statement that IESO will require monthly payments from the Trust, which in turn requires the Province to make monthly equity injections to OPG?

Commented [FC15]: Redeemable rights are really a call or put option and should be priced accordingly. In absence of this one of the parties is providing a subsidy to the other side.

Commented [AP16]: OPG TB has mentioned a 10% premium on buyback, but this could still be construed as a benefit as the 10% return over a 10 year period does not reflect the risk premium. Threatens the GBE status of OPG, which could lead to full consolidation in Public Accounts.

PROCESS

- OPG Trust would receive the notice to purchase the asset from IESO.
- A notice would be received from OPG by the OFA for 44% of the asset for the equity injection.

- Separately OPG and OPG Trust would take out debt from the capital markets totaling 56% of the IESO asset value.
- There is a 5 business day transaction window from the timing of the notice received by the OFA to payment and settlement with the [or OPG?] IESO.

Commented [SQ217]: [TBC whether 5 business days required for OFA to provide payment to OPG or whether 5 business days is for the entire process of OFA->OPG->OPGT].

LEGISLATION AND TIMING

- The proposed timing for the legislation is May, early June.
- It's unclear how these rates would be effective to consumers if the RPP prices are reset on May 1 and November 1 of every year.
  - Furthermore, the RPP prices are announced by the OEB in mid-April and mid-October annually.
  - Unclear on whether the timing for this implementation mechanism would be sufficient for May 1, RPP prices.

[TBC] TBS would provide an annual allocation, with a three-year program review cycle.

-

~~ADDITIONAL CONCERNS~~CONSIDERATIONS / POTENTIAL RISKS TO THE SPV ARRANGEMENT

- OPG staff have signaled to CEFD staff that their current plan is to not provide the Province with a cash flow, in dividends or otherwise, for the 44% equity injection until the ~~proposed lock-up period ends~~'~~inflection~~' point in time where the ratepayers start to pay down the deferred GA.
- Under the current plan, only the 56% funded through capital markets, directly by OPG Trust or by OPG, would be paid interest over time.
- While the implementation of the~~is~~ proposed structure is ~~hypothetically~~currently viewed as fiscally neutral on an accounting basis, there is some concern over the cash flow-through of this structure with no flow through of interest or dividends over time.
- The Province would~~ill have~~~~incurr~~incur interest associated with the debt it borrows to finance the 44% equity injection. OPG should have an equal or greater amount related to this 44% interest cost collected from ratepayers through annual cash payments.

Commented [BA18]: I'll stand to be corrected by you CFA types, but in economics an inflection point is the point where a curve changes from concave to convex or vice versa. Here we are talking about two lines are crossing. Just want to make sure we have correct terminology so that we don't get called us out later by some (other) smarty pants.

- ~~The interest cost will continue to build during the lock-up period as more principal is borrowed, resulting in potentially billions of aggregate interest owed by the Province to the capital markets.~~

- OPG may have the potential to lower its borrowing/equity injection costs with the "unpaid portion" of interest related to the Provincial debt for the 44% equity injections. Establishing a redemption premium that takes into account the compounded cost of the equity financing could "make the province whole" upon redemption on a further date. Valuation options are currently being discussed.

- It may be necessary to establish a flow-through of cash from OPG to the Province through some type of return, such as a dividend ~~or the SPV arrangement could be viewed as receiving an interest free loan or subsidy from the Province~~

- In order to reasonably guarantee ~~this~~a return to the Province, it may be necessary to establish a separate class of preferred shares with a dividend yield ~~related~~associated with ~~to~~ the interest cost of the Province's ~~related debt~~borrowing costs or provide a mechanism for the interest cost to be recovered on a non-cash basis, e.g. through a form of dividend reinvestment plan.

- A preferred equity structure~~This~~ could potentially impact OPG's credit ratings if rating agencies view the preferred shares as debt rather than equity.

- Legislation is still determining the actual rate to be charged to ratepayers. In the most recent shared draft, a few options were being considered

    - Interest and other financing (e.g., admin costs), as well as the principal portion of the GA financing when those payments commence.

    - The ability for OPG to earn a return, i.e., a higher rate charged to ratepayers than the actual total financing and principal costs.

    - The ability for OPG to earn a return, but with a cap on profits.

Commented [AP19]: This is not necessarily true as an acceptable premium associated with the buyback feature would mitigate this concern. Maybe keep the subsidy issue separate as mentioned above? The main risk is that the Province will be paying several hundred millions to billions of interest over time with no cash flow from OPG. OPG in turn would have the same amount of cash on its books – either idle or used for their own initiatives.

Commented [JK20]: Explain. Is this risk to OPG Trust, OPG or the Province.

Commented [AP21R20]: Risk is to OPG Trust/OPG because, if preferred equity is issued, then it could be viewed as debt.

Subject: GA Equity Injection
Date: Wednesday, April 05, 2017 1:55:37 PM

Hello John,

I would agree that as long as the return from the Trust is above/at the cost of capital, there is a low risk of the GBE status being threatened if the Province does an equity injection. If the return is just the financing costs, there may be some additional risk from the GBE status.

An important element for retaining the GBE status is if the GBE can continue to operate free of government funding or assistance as a going concern. For example, a GBE may need a one-time subsidy to get itself out of a tough pickle, but is projected to return to long-term profitability afterwards. In this case, it is unlikely that the GBE status would be threatened by the subsidy. What needs to be considered for this Trust is that these equity injections are monthly and over a long period of time of several years. At what point, if at all, would this continued reliance on government funding be considered as a form of a subsidy? If OPG (or the Trust) were to get this equity from a third-party, what would be the expected return to make this structure feasible (i.e., the market consistent equity costs)?

With a common equity injection, there is no guarantee that OPG will return the principal payments or give dividends. The proposed legislation also states that the Province cannot interfere with the Trust, which gives OPG an additional advantage.

The way I am viewing the problem is like buying a house with a 100% mortgage – I (the buyer) represent the Province. The house represents the 44% equity injection of OPG Trust, and the bank providing the mortgage represents the capital markets. Let's say the bank charges me an interest rate of 5% and the capital appreciation of the house is 10% annually.

I am putting my equity into the house, so I expect my return to at least be at the interest rate the bank is giving me (5%). My house will grow in value by 10% and my interest cost will be 5%, so I am getting a return. However, I am owing that cash in interest payments every year while getting no cash return from the house even though it's going up in value.

So on paper, I am growing in value, but my cash flows are actually negative. Eventually, I would need to exit the investment as it is unsustainable. In terms of the Province, this means that if not enough of the investment is returned as a cash inflow, the risk of loss and credit rating downgrades arise. What further complicates things is the fact that OPG is 100% owned by the Province

This is where the considerations of redeemable preferred equity (with a return and a redemption feature but no premium for the Province) or a redemption feature on common equity (redeemable by the Province and at a significant premium to par value after a lock-up period) could protect the cash flow concerns.

I have looked at several wholly-owned state-owned enterprises (SOEs) and their recapitalizations. Australia, Estonia, Hungary, New Zealand, Slovenia, and Norway all demonstrate that wholly-owned unlisted SOEs have requirements that recapitalizations from the public are subject to minimum expected rates-of-return. This is usually at least the cost of capital or market comparable rate. However, other countries (Chile, Finland, Israel, Korea, Lithuania, Netherlands, Poland, and UK) have no specific mechanisms to ensure market-consistent equity costs, but have several other methods including

- Subject to a regular feasibility study
- Takes both public interest and expected financial return into account.
- Considering a market consistent benchmark
- Considering the risk of the investment.

What it boils down to is the main point of the entire structure in the first place – to have 56% of the debt related to the GA financing structure off of the Province's books (on consolidation) to maintain the current credit rating as well as other political reasons regarding the Province's debt levels and balancing the budget. If the structure just involved the Province borrowing from the capital markets and getting payments from the ratepayers, it would be considerably less complicated. Since it is going through OPG, a separate commercial entity expected to be profitable, the rationale for this decision and the feasibility needs to be justifiable. The Hydro One equity injection was justified for protecting Hydro One's valuation; will the Province be compensate for the risk?

Just my continued mulling, will keep working on this.

Attachments: GA financing Flow Model.xlsx

Hello John and Bruno,

Here is the flow diagram model based on the recent information from Energy, OPG, and the latest model from . I believe the current proposition accounting wise is for the OPG Trust to actually start collecting the interest cost from ratepayers (or recognize it in income only with a receivable as an offsetting entry).

Kind regards,

Adam Prokop

---

Hi John

Re Kaitlin's note and our balancing act, how about attached if we want to provide some feedback.

We update the chart we used based on the chart that Adam pulled together, and add some language to reflect our discussion this morning with TBS. I think this is minimal based on comments we already provided on the chart and our TBS discussion, but it does add some value. If that makes sense I could get Adam to review chart. I relabelled some of the arrows to make it more generic.

We could also provide this to TBS as follow-up to this morning's conversation. We said we would provide more details. It is mainly the chart that I think would help them. Maybe it's too early to get into the GA Financing model and all the issues we have been discussion e.g., interest recovered/capitalized etc.

Bruno

GA Financing – Equity Injection

Briefing Note

PURPOSE:

- Develop a timeline / mechanism to facilitate equity injections by the Province to OPG to support GA financing

CONTEXT:

- IESO will effectively sell the "right to collect" deferred future revenue from ratepayers (GA Asset) to the SPV in return for cash proceeds
- In order for the SPV to purchase the GA Asset from the IESO it will obtain financing from two sources
    - 51% from capital markets
    - 49% as subordinated debt from OPG, which OPG will finance through:
        - **44% from an equity injection from the Province**
        - 5% from capital markets

TIMING:

- **Assumed implementation: July 1, 2017 (to be confirmed)**
- **April:** Legislative Changes Proposed
- **May 1**: GA smoothing incorporated into RRP rates
- **May – August**: OPG/IESO bridge financing in place to manage debt
- **September**:
    - SPV borrowing begins and would continue on a quarterly basis (ie. Sept/Dec/Mar/June)
        - Bridge financing is used to fund the GA shortfall in the interim months
    - Province would fund equity injection as required by OPG (quarterly basis)

POTENTIAL PROVINCIAL PROCESS

Illustrative Timeline/ Approvals Process

- OPG includes equity injection requirements in Business Plan
    - Target delivery to the Province in November of each year
    - Incorporate forecasted equity injection requirements for Province's fiscal year into business plan (March 31 year-end)
- Province seeks TB/MBC approval for equity issuances as part of Business Plan concurrence process
    - Target February TB date each year to ensure approvals in place as of April 1st of each year
    - TB approval would provide approval for OPG to issue up to x amount of shares within the next year (would need to cover approvals required in articles)
    - TB approval would provide appropriation to ENE/MOF for equity injections to OPG

Formatted: Font: Not Bold

- TB approval would delegate authority [to minister/deputy minister] to execute equity injections

- 2017 Document Approvals Process
  - ENE to report back in Spring 2017 with respect to GA Financing
  - Under current timing, approval for appropriation for ENE/MOF for equity injections to OPG would be post 2017 Document
  - TB / MBC approval is being sought as part of 2017 PRRT for other components of Ontario Fair Hydro Plan that have a fiscal impact.

Formatted: Justified

Formatted: Justified

Provincial Mechanism

- Is there a more granular mechanism on the loan side? (ie. OPG provides x days notice that they require x amount, x person needs to sign off, etc.)

Attachments:	GA Financing - Interest Cost Scenarios - Mar 1 Deck - Anonymised_Energy-PW.pptx

Hi Selena, Daniel,

We have the attached deck with footers that we hope meet the protocol in sending information to FAO. Could you let us know if it does fit with the protocol.

We have sent a version of this deck up the line and assume that this had gone up to the Minister for something that had gone to Cabinet.

Thanks,

John.

GA Financing:
Interest Rate Base Scenario & Sensitivities
March 1, 2017, Energy Deck Case

March 2017

GA Financing *(Calendar Year Basis) – (**Effective January 1, 2017**)* March 1 Deck

- The interest cost estimates are based on Ministry of Energy estimates of the Global Adjustment cost amounts to be deferred as per its modelling as at March 1, 2017.
  - GA deferral estimates are subject to updates from the Ministry of Energy.
  - Actual annual and cumulative interest costs are very sensitive to actual borrowing rates. Table below is illustrative.
  - Sensitivities shown on lower interest rates assume faster debt pay down. Alternatively, pay down could be stretched out, but would result in relatively higher cumulative interest costs than shown for that interest rate.
- Interest cost estimates are slightly adjusted from Ministry of Energy amounts, to reflect in-year interest costs. Energy's base case interest costs shown were an assumed 5%, compounded monthly, calculated in the following year, with a term of 30-years (2047).

Interest Rate	Peak Annual Interest Cost	Total Life-cycle Accumulated Interest Costs	Term (Approximate)
3.5%	$0.879 billion in 2027	$12.6 billion	2042 (25-year term)
4.2%	$1.1 billion in 2027	$17.4 billion	2044 (27-year term)
5.0%	$1.4 billion in 2028	$25.1 billion	2047 (30-year term)

Total GA deferral amount being financed is approximately $20.3 billion (plus deferred, capitalised interest, that can increase peak debt to about $28 bn under the 5% scenario). If interest is paid and passed through in each period, more GA would have to be deferred to achieve the same net rate impact; however, there would be lower cumulative interest costs than modelled.

Base Scenario – *5% Interest Rate* with GA draw downs occurring on an equal monthly basis.

Annual Interest Cost	1,156	1,101	1,043	981	917	849	778	703	624	541	454	363	267	166	60	**25,137**
Additional GA Debt Drawdown Required	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	
Accumulated debt in present year	22,537	21,397	20,198	18,937	17,613	16,220	14,756	13,218	11,600	9,900	8,113	6,234	4,260	2,184	2	

Actuals are subject to actual prices and actual interest rates.
1 Based on an interest rate of 5%. Interest Cost in 2017 adjusted to represent implementation in July 2017.
2 Higher interest rates results in extended the term of the financing. It is assumed that a cap of $2.242 bn above the true cost of GA in any given year is continued to be applied to repay any remaining debt. Thus, every year a maximum of $2.242 bn is recovered by ratepayers until the debt is paid down, with interest still accumulating over this period. In this Scenario, the term would be extended to Year 2056.

Provided in Response to Request from the Financial Accountability Officer: Confidential -- subject to the disclosure restrictions under the Cabinet records order-in-council

GA Financing *(Calendar Year Basis) – (**Effective July 1, 2017**)*

March 1 Deck

- Ministry of Energy modelling estimates provided have been based on a full-year of GA deferral in 2017. Annual and cumulative interest and debt estimates would be sensitive to an in-year start date of, e.g., July 1, 2017, as below.
  - Otherwise, as before, modelling is based on Ministry of Energy estimates of the Global Adjustment cost amounts to be deferred as per its modelling as at March 1, 2017.
  - GA deferral cost estimates are subject to updates from the Ministry of Energy.
  - Actual annual and cumulative interest costs are very sensitive to actual borrowing rates. Table below is illustrative.
  - Sensitivities shown on lower interest rates assume faster debt pay down. Alternatively, pay down could be stretched out, but would result in relatively higher cumulative interest costs than shown for that interest rate.
- Interest cost estimates are adjusted from Ministry of Energy amounts, to reflect in-year interest costs and an assumed July 1, 2017 implementation date. Half-a-year of reduced deferred GA significantly reduces estimated cumulative interest costs.

Interest Rate	Peak Annual Interest Cost	Total Life-cycle Accumulated Interest Costs	Term (Approximate)
3.5%	$0.817 billion in 2027	$11 billion	2041 (24-year term)
4.2%	$1.0 billion in 2027	$14.9 billion	2042 (25-year term)
5.0%	$1.3 billion in 2028	$21.0 billion	2045 (28-year term)

Total GA deferral amount being financed is approximately $19.1 billion (plus deferred, capitalised interest, that can increase peak debt to about $26 bn under the 5% scenario). If interest is paid and passed through in each period, more GA would have to be deferred to achieve the same net rate impact; however, there would be lower cumulative interest costs than modelled.

Base Scenario – *5% Interest Rate* with GA draw downs occurring on an equal monthly basis.

Fyi, heard from Gadi's EA that he really liked this deck.

DRAFT

GA Financing:
Interest Rate Base Scenario & Sensitivities
March 1, 2017, Energy Deck Case

Corporate and Electricity Finance Division
March 6, 2017

DRAFT

GA Financing *(Calendar Year Basis) – (**Effective January 1, 2017**)* March 1 Deck

- The interest cost estimates are based on Ministry of Energy estimates of the Global Adjustment cost amounts to be deferred, per its March 1 Cabinet submission.
  - GA deferral estimates are subject to updates from the Ministry of Energy.
  - Actual annual and cumulative interest costs are very sensitive to actual borrowing rates. Table below is illustrative.
  - Sensitivities shown on lower interest rates assume faster debt pay down. Alternatively, pay down could be stretched out, but would result in relatively higher cumulative interest costs than shown for that interest rate.
- Interest cost estimates are slightly adjusted from Ministry of Energy amounts, to reflect in-year interest costs. Energy's base case interest costs shown were an assumed 5%, compounded monthly, calculated in the following year, with a term of 30-years (2047).

Interest Rate	Peak Annual Interest Cost	Total Life-cycle Accumulated Interest Costs	Term (Approximate)
3.5%	$0.879 billion in 2027	$12.6 billion	2042 (25-year term)
4.2%	$1.1 billion in 2027	$17.4 billion	2044 (27-year term)
5.0%	$1.4 billion in 2028	$25.1 billion	2047 (30-year term)

Total GA deferral amount being financed is approximately $20.3 billion (plus deferred, capitalised interest, that can increase peak debt to about $28 bn under the 5% scenario.

Base Scenario – *5% Interest Rate* with GA draw downs occurring on an equal monthly basis.

	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032
Total Debt, Beginning of Year	-	2,559	5,256	8,084	11,643	14,961	18,237	21,255	23,761	26,215	27,349	28,305	27,460	26,571	25,637	24,655

	2033	2034	2035	2036	2037	2038	2039	2040	2041	2042	2043	2044	2045	2046	2047	Total
Total Debt, Beginning of Year	23,622	22,537	21,397	20,198	18,937	17,613	16,220	14,756	13,218	11,600	9,900	8,113	6,234	4,260	2,184	
Annual Interest Cost	1,156	1,101	1,043	981	917	849	778	703	624	541	454	363	267	166	60	**25,137**
Additional GA Debt Drawdown Required	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	
Accumulated debt in present year	22,537	21,397	20,198	18,937	17,613	16,220	14,756	13,218	11,600	9,900	8,113	6,234	4,260	2,184	2	

Actuals are subject to actual prices and actual interest rates.
1 Based on an interest rate of 5%. Interest Cost in 2017 adjusted to represent implementation in July 2017.
2 Higher interest rates results in extended the term of the financing. It is assumed that a cap of $2.242 bn above the true cost of GA in any given year is continued to be applied to repay any remaining debt. Thus, every year a maximum of $2.242 bn is recovered by ratepayers until the debt is paid down, with interest still accumulating over this period. In this Scenario, the term would be extended to Year 2056.

DRAFT

GA Financing *(Calendar Year Basis) – (**Effective July 1, 2017**)* *March 1 Deck*

- Ministry of Energy modelling estimates provided have been based on a full-year of GA deferral in 2017. Annual and cumulative interest and debt estimates would be sensitive to an in-year start date of, e.g., July 1, 2017, as below.
  - Otherwise, as before, modelling is based on Ministry of Energy estimates of the Global Adjustment cost amounts to be deferred in its March 1, 2017, Cabinet Submission.
  - GA deferral cost estimates are subject to updates from the Ministry of Energy.
  - Actual annual and cumulative interest costs are very sensitive to actual borrowing rates. Table below is illustrative.
  - Sensitivities shown on lower interest rates assume faster debt pay down. Alternatively, pay down could be stretched out, but would result in relatively higher cumulative interest costs than shown for that interest rate.
- Interest cost estimates are adjusted from Ministry of Energy amounts, to reflect in-year interest costs and an assumed July 1, 2017 implementation date. Half-a-year of reduced deferred GA significantly reduces estimated cumulative interest costs.

Interest Rate	Peak Annual Interest Cost	Total Life-cycle Accumulated Interest Costs	Term (Approximate)
3.5%	$0.817 billion in 2027	$11 billion	2041 (24-year term)
4.2%	$1.0 billion in 2027	$14.9 billion	2042 (25-year term)
5.0%	$1.3 billion in 2028	$21.0 billion	2045 (28-year term)

Total GA deferral amount being financed is approximately $19.1 billion (plus deferred, capitalised interest, that can increase peak debt to about $26 bn under the 5% scenario.

Base Scenario – *5% Interest Rate* with GA draw downs occurring on an equal monthly basis.

	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032

GA Financing:
Interest Rate Base Scenario & Sensitivities
March 1, 2017, Energy Deck Case

March 2017

GA Financing *(Calendar Year Basis) – (**Effective January 1, 2017**)* March 1 Deck

- The interest cost estimates are based on Ministry of Energy estimates of the Global Adjustment cost amounts to be deferred as per its modelling as at March 1, 2017.
  - GA deferral estimates are subject to updates from the Ministry of Energy.
  - Actual annual and cumulative interest costs are very sensitive to actual borrowing rates. Table below is illustrative.
  - Sensitivities shown on lower interest rates assume faster debt pay down. Alternatively, pay down could be stretched out, but would result in relatively higher cumulative interest costs than shown for that interest rate.
- Interest cost estimates are slightly adjusted from Ministry of Energy amounts, to reflect in-year interest costs. Energy's base case interest costs shown were an assumed 5%, compounded monthly, calculated in the following year, with a term of 30-years (2047).

Interest Rate	Peak Annual Interest Cost	Total Life-cycle Accumulated Interest Costs	Term (Approximate)
3.5%	$0.879 billion in 2027	$12.6 billion	2042 (25-year term)
4.2%	$1.1 billion in 2027	$17.4 billion	2044 (27-year term)
5.0%	$1.4 billion in 2028	$25.1 billion	2047 (30-year term)

Total GA deferral amount being financed is approximately $20.3 billion (plus deferred, capitalised interest, that can increase peak debt to about $28 bn under the 5% scenario). If interest is paid and passed through in each period, more GA would have to be deferred to achieve the same net rate impact; however, there would be lower cumulative interest costs than modelled.

Base Scenario – *5% Interest Rate* with GA draw downs occurring on an equal monthly basis.

	2017	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032

Total Debt, Beginning of Year	23,622	22,537	21,397	20,198	18,937	17,613	16,220	14,756	13,218	11,600	9,900	8,113	6,234	4,260	2,184	
Annual Interest Cost	1,156	1,101	1,043	981	917	849	778	703	624	541	454	363	267	166	60	**25,137**
Additional GA Debt Drawdown Required	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	-2,242	
Accumulated debt in present year	22,537	21,397	20,198	18,937	17,613	16,220	14,756	13,218	11,600	9,900	8,113	6,234	4,260	2,184	2	

Actuals are subject to actual prices and actual interest rates.
1 Based on an interest rate of 5%. Interest Cost in 2017 adjusted to represent implementation in July 2017.
2 Higher interest rates results in extended the term of the financing. It is assumed that a cap of $2.242 bn above the true cost of GA in any given year is continued to be applied to repay any remaining debt. Thus, every year a maximum of $2.242 bn is recovered by ratepayers until the debt is paid down, with interest still accumulating over this period. In this Scenario, the term would be extended to Year 2056.

Provided in Response to Request from the Financial Accountability Officer: Confidential -- subject to the disclosure restrictions under the Cabinet records order-in-council

GA Financing *(Calendar Year Basis) – (**Effective July 1, 2017**)*

March 1 Deck

- Ministry of Energy modelling estimates provided have been based on a full-year of GA deferral in 2017. Annual and cumulative interest and debt estimates would be sensitive to an in-year start date of, e.g., July 1, 2017, as below.
  - Otherwise, as before, modelling is based on Ministry of Energy estimates of the Global Adjustment cost amounts to be deferred as per its modelling as at March 1, 2017.
  - GA deferral cost estimates are subject to updates from the Ministry of Energy.
  - Actual annual and cumulative interest costs are very sensitive to actual borrowing rates. Table below is illustrative.
  - Sensitivities shown on lower interest rates assume faster debt pay down. Alternatively, pay down could be stretched out, but would result in relatively higher cumulative interest costs than shown for that interest rate.
- Interest cost estimates are adjusted from Ministry of Energy amounts, to reflect in-year interest costs and an assumed July 1, 2017 implementation date. Half-a-year of reduced deferred GA significantly reduces estimated cumulative interest costs.

Interest Rate	Peak Annual Interest Cost	Total Life-cycle Accumulated Interest Costs	Term (Approximate)
3.5%	$0.817 billion in 2027	$11 billion	2041 (24-year term)
4.2%	$1.0 billion in 2027	$14.9 billion	2042 (25-year term)
5.0%	$1.3 billion in 2028	$21.0 billion	2045 (28-year term)

Total GA deferral amount being financed is approximately $19.1 billion (plus deferred, capitalised interest, that can increase peak debt to about $26 bn under the 5% scenario). If interest is paid and passed through in each period, more GA would have to be deferred to achieve the same net rate impact; however, there would be lower cumulative interest costs than modelled.

Base Scenario – *5% Interest Rate* with GA draw downs occurring on an equal monthly basis.

Actuals are subject to actual prices and actual interest rates.
1 Based on an interest rate of 5%. Interest Cost in 2017 adjusted to represent implementation in July 2017.
2 Higher interest rates results in extended the term of the financing. It is assumed that a cap of $2.242 bn above the true cost of GA in any given year is continued to be applied to repay any remaining debt. Thus, every year a maximum of $2.242 bn is recovered by ratepayers until the debt is paid down, with interest still accumulating over this period. In this Scenario, the term would be extended to Year 2056.

Hey John,

Just following up on our conversation Friday. You had asked about the rationale for certain levels of financing – passing this note along that we just received from OPG. Let me know if you have further questions on this.

Secondly, I'm starting to pull together materials for the TB submission. The first is seeking appropriation for the equity injections, second is any PILs exemptions that the Province is comfortable with. Lastly, Scott thought you guys might also want something built into the submission about increased borrowing requirements of the IESO – would you be able to draft something for inclusion in the submission on this (if required)?

Let me know what you think.
Kaitlin

CONFIDENTAL **April 18, 2017**

Ontario Power Generation

Issue: OPG has indicated that for the Trust to be consolidated into OPG there is a need to have at least 51% of the debt financing of the Trust originate directly from the external market. This requirement is supported by specific technical guidance on the topic as set out below.

IFRS 10 – Consolidated Financial Statements requires an investor to consider whether there are other parties who are acting on behalf of the investor by virtue of their relationship with it. That is, IFRS 10 requires consideration of whether the other parties (i.e. OPG) are acting as de facto agents for the investor (i.e. Province). If OPG is considered a de facto agent, the consolidation accounting objective will **not** be met.

There are a series of references in IFRS 10 (Section B75) that support this conclusion. Each of these elements must be examined in their totality to successfully address the consolidation principal of the Trust. The importance of each element is amplified due to the fact that OPG is a related party to the Province, which increases the importance of other tests being met. These tests include:

a) a party that received its interest in the investee as a contribution or loan from the investor.
OPG will receive a 44% equity injection from the Province of Ontario, indirectly through the Ontario Financing Authority. Given that currently, the majority (currently 51%) of the Trust debt will be from External Markets and not the Province, it can be argued that OPG did not receive the majority of its interest in the investee as a contribution or loan from the Province. This criterion is not met and shows that OPG is a principal, not a de-facto agent.

b) a party that has agreed not to sell, transfer or encumber its interests in the investee without the investor's prior approval
There is a proposed clause that the Trust cannot be wound up without approval from the Minister of Energy, this criterion is met.

c) a party that cannot finance its operations without subordinated financial support from the investor.
OPG can finance its operations without subordinated financial support from the Province – criterion is not met.

d) an investee for which the majority of the members of its governing body or for which its key management personnel are the same as those of the investor.
OPG is a related party of the Province of Ontario, therefore this criterion is met.

e) a party that has a close business relationship with the investor, such as the relationship between a professional service provider and one of its significant clients.
OPG is a related party of the Province of Ontario, therefore this criterion is met.

Given the number of factors met above, there may be a view that OPG could be considered a de facto agent of the Province through its related party relationship (4 out of 6 items are met). It is of vital importance, and as concurred by EY, that the majority of the debt in the Trust is not more than 44% funded by the Province (note that the remaining 5% of debt has to be funded externally by OPG in order to show that OPG has equity that is not sourced from the Province at risk). If the debt in the Trust is seen by the External Auditors as being principally funded by the Province, OPG would fail 5 out of 6 criteria above and be considered a de facto agent. As a result, proposed consolidation accounting would fail.

Hi Felix

Per our discussion yesterday morning I've attached an internal draft staff note on GA Financing (Doc pw). Please note that at this point this is not ADM approved so advise to keep it close. It is based on our understanding to date based on various discussions. Some parts of the mechanism are still speculative. As you noted ENE will come back in Spring with further details. And implementation discussions are ongoing among involved parties including OPCD. But hopefully this will be of some help for now. Happy to discuss.

Thanks
Bruno

Structure of the Global Adjustment Deferral Mechanism

Issue

The Province is working with Ontario Power Generation (OPG), the Ontario Energy Board (OEB), IESO, external accountants, and other agencies to develop a mechanism to defer the global adjustment (GA) payment as part of the recently announced Ontario Fair Hydro Plan. This note outlines current proposals for this mechanism.

Context

- Smoothing of GA costs over time would involve ratepayers paying only a portion of the GA cost in earlier years, while this shortfall would be made up by future rate payers paying more than the true cost of the GA in later years.
    - There will be a proposed cap of $2.242B on the annual additional cost over the GA to lessen the burden on ratepayers.

- The shortfall in GA payments in earlier years would represent deferred costs to ratepayers. However, the mechanism would still need to compensate power generators on an ongoing basis for the full cost of the GA and would therefore need to borrow and take on debt to make cash payments to power generators.
- Principal payments on debt would be mandatory, but there has been no clarification on whether or not interest payments will be capitalized (i.e., interest accumulates resulting in compounding) or if interest will be recovered from ratepayers on an on-going basis.
    - If interest payments are made by ratepayers on an on-going basis debt costs would be lower, however this would also have the effect of reducing ratepayer savings from the GA deferral mechanism. The commitment is for a 25% reduction on average for all residential customers, which would mean that the amount of principal needs to be larger to offset this effect.
- It has also been proposed that all administrative and other costs from the GA deferral would need to be collected from ratepayers immediately or recognized at the very least as a future benefit to the Province, adding to the costs passed on to ratepayers.

Structure (*refer to Exhibit A*)

- The deferred portion of the GA needs to be recognized as an asset – likely a regulatory asset – by the IESO, which gives the IESO the right to collect the deferred amount from ratepayers at a future date.
- This asset, in turn, would be sold to another party that would receive the revenues associated with this asset.
    - It is proposed that the IESO be required to recover the costs associated with this asset even after selling it.
    - To do this the IESO would need to sell the asset in order to settle its arrangements with generators, and ensure generators are not affected by the deferral.
        - Alternatively, the IESO could simply borrow funds (using the regulatory asset as collateral), but this poses risks for both consolidation on public accounts and credit ratings.
        - With respect to the credit rating risk, DBRS stated in a March 3, 2017 report that "*Provided the debt continues to be fully supported through the electricity rate base, DBRS will treat it as self-supported and exclude it from the calculation of tax-supported debt*".
- OPG is proposing to set up a special purpose vehicle, "OPG Trust", which would purchase the regulatory asset from the IESO.
    - The purchase would be funded by debt from the capital markets (51% of the deferred GA Cost), and OPG (49% of the deferred GA).
    - OPG would finance that 49% through debt from the capital markets (5%) and an equity injection from the Province (44%).

    - The debt would be set-up in tranches to ensure that the 51% of debt directly from the market would be senior, potentially mitigating the risk premium associated with high amounts of borrowing with an intangible, unique asset as collateral.
- There are several other considerations and requirements that would need to be attained in order for the mechanism to work, as detailed in the OPG White Paper sent to the Deputy Minister of Energy on February 27, 2017.

Equity Injection (*refer to Exhibit A & B*)

- The equity injection could lead to increasing, and then stabilizing dividend payouts in consistent with OPG's's risk profile and comparable business entities.
    - Principal and interest payments flowing from the ratepayers through the IESO and the Trust could be paid back to the Province.
    - This would increase steadily as ratepayers begin to pay back principal in about 10 years' time, eventually reaching a cap of $2.242B in principal and interest per year based on Energy's March estimates (based on the capitalized interest scenario).
    - The administrative costs and return for OPG/OPG Trust would also need to be collected by ratepayers, but the dividend payments would be net of these amounts and should still allow the Province to earn a substantial return.
    - Dividend payments could also allow OPG to eventually optimize its capital structure to the targeted or deemed 55%-45% debt to equity split, as dividends allow OPG to reduce its retained earnings thereby reducing equity.
- Recapitalization from the Province is preferable as there are no associated interest expenses or large principal payments that could affect OPG's credit rating.
- If debt financing was utilized, the change in the cost of borrowing could also impact OPG's rate applications for the return recovered from ratepayers through payment amounts, potentially offsetting ratepayer benefit of the GA deferral mechanism.
- The financing structure split between equity (44%) and debt (5% borrowed by OPG and 51% borrowed by OPG Trust) is roughly equivalent to the deemed capital structure of 55% debt and 45% equity for regulated distributors in Ontario.

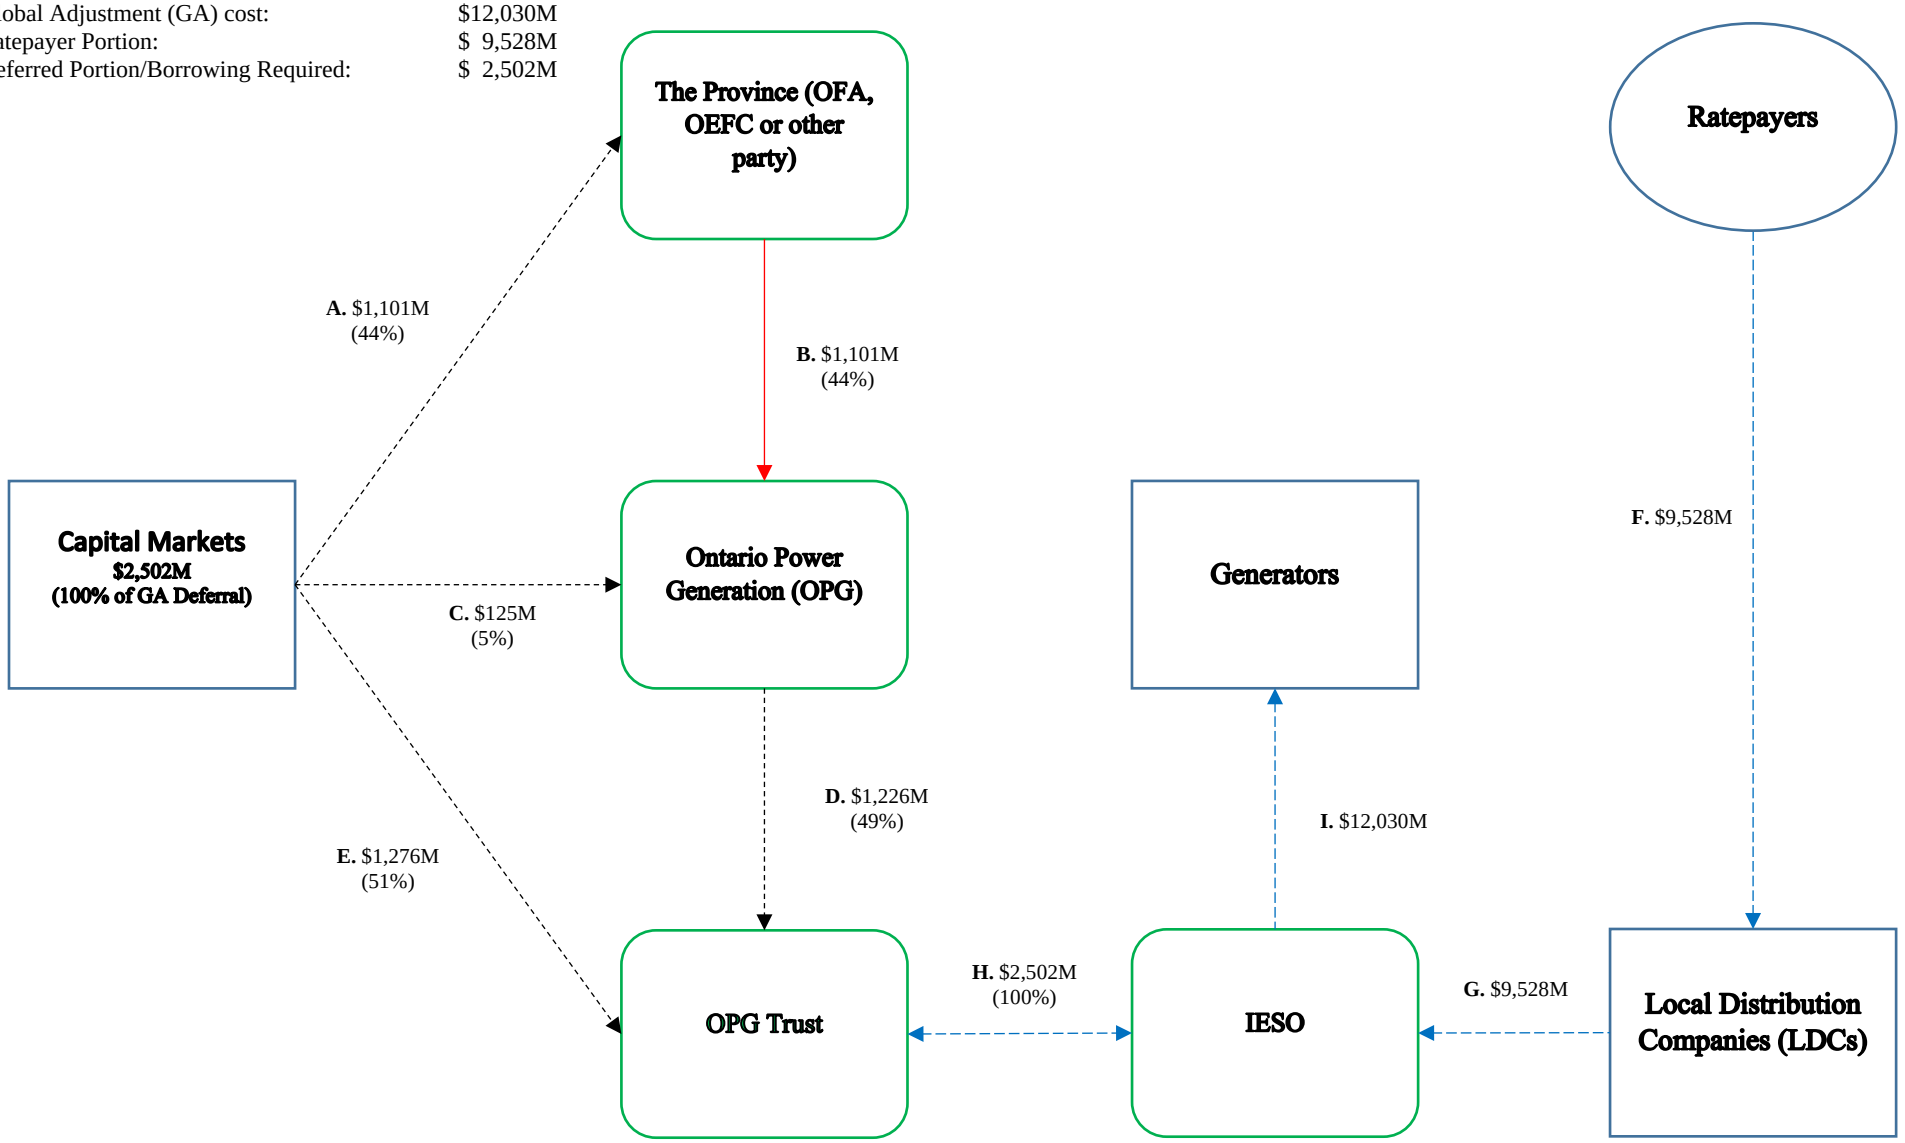
Collection of Interest Payments (*refer to Exhibit C*)

- There are different potential accounting treatments, depending on legislative and regulatory approval, that would impact the amount of borrowing and interest over the long term as well as the total fiscal impact.
    - **Option 1: Collect interest and administrative costs from ratepayers on an on-going basis:** Interest and the costs to finance/administer the GA deferral mechanism would be recovered from ratepayers along the way. This would allow cash and income to be recognized by OPG Trust equivalent to the total borrowing cost from the market (i.e., the interest on the 44% of the GA the Province borrowed from the market, the 5% of the GA OPG borrowed, and the 51% of the GA OPG Trust borrowed). Furthermore, some type of additional return for the risk premium could be made. Overall, there would be no fiscal cost, and less debt would build up over time due to the elimination of the compound effects on interest.
    - **Option 2: Collect interest costs associated with the senior debt**: There are variations on this concept which essentially proposes to only collect some of the interest costs from ratepayers, with the senior debt that OPG Trust borrows directly from the market of primary concern. This is "meeting halfway" between deferring all interest payments and collecting all interest payments from ratepayers immediately.

- Option 3: **Do not collect from ratepayers**. There is a fiscal impact equal to 100% of the interest on the total borrowings as an expense still needs to be recognized, even though cash interest has not been paid. There is also a compounding effect on interest.
- Option 4: **No collection from ratepayers but deferral of expense recognition (Same as Energy's analysis in its Cabinet Submission)**. For this option, there is no collection of interest payments from ratepayers, but OPG Trust is somehow allowed to defer the recognition of interest expense on its books and recognize as a regulatory asset, thus eliminating the fiscal impact.
    - If OPG Trust were allowed to recognize a regulatory asset, then it could defer the interest expense, instead recognizing it as an asset (similar to the idea of a prepaid expense).
    - Thus, OPG would recognize interest income from OPG Trust, but OPG Trust would not recognize an expense related to the amount owed to OPG and instead would increase the regulatory asset by the same amount.
    - The interest income earned by OPG for the 49% of the GA deferral it borrowed would offset the borrowing the Province made from the capital markets.
    - OPG Trust would also defer the recognition of the interest associated with the 51% of the GA deferral it borrowed from the market. The deferred amount would be recognized in a regulatory asset.
    - When OPG starts collecting principal and interest from ratepayers, it will recognize income, but will also amortize the regulatory asset at the same time, thus matching revenue and expenses with each other in the time period and potentially eliminating the fiscal impact.
    - Many factors, including the initial accounting treatment and the effect of consolidation, are significant barriers to the application of this approach.
    - **Alternatively, OPG Trust might be able to recognize income (with a receivable created to balance the transaction) to offset the interest expense without collecting from ratepayers**, i.e., it will be a cash transaction in the future (cash received offset by a decrease in the receivable; no effect on income statement).

Exhibit A; 2017-2018 Estimates for Balance Sheet Transactions

Global Adjustment (GA) cost:	$12,030M
Ratepayer Portion:	$ 9,528M
Deferred Portion/Borrowing Required:	$ 2,502M



Setting up the Trust

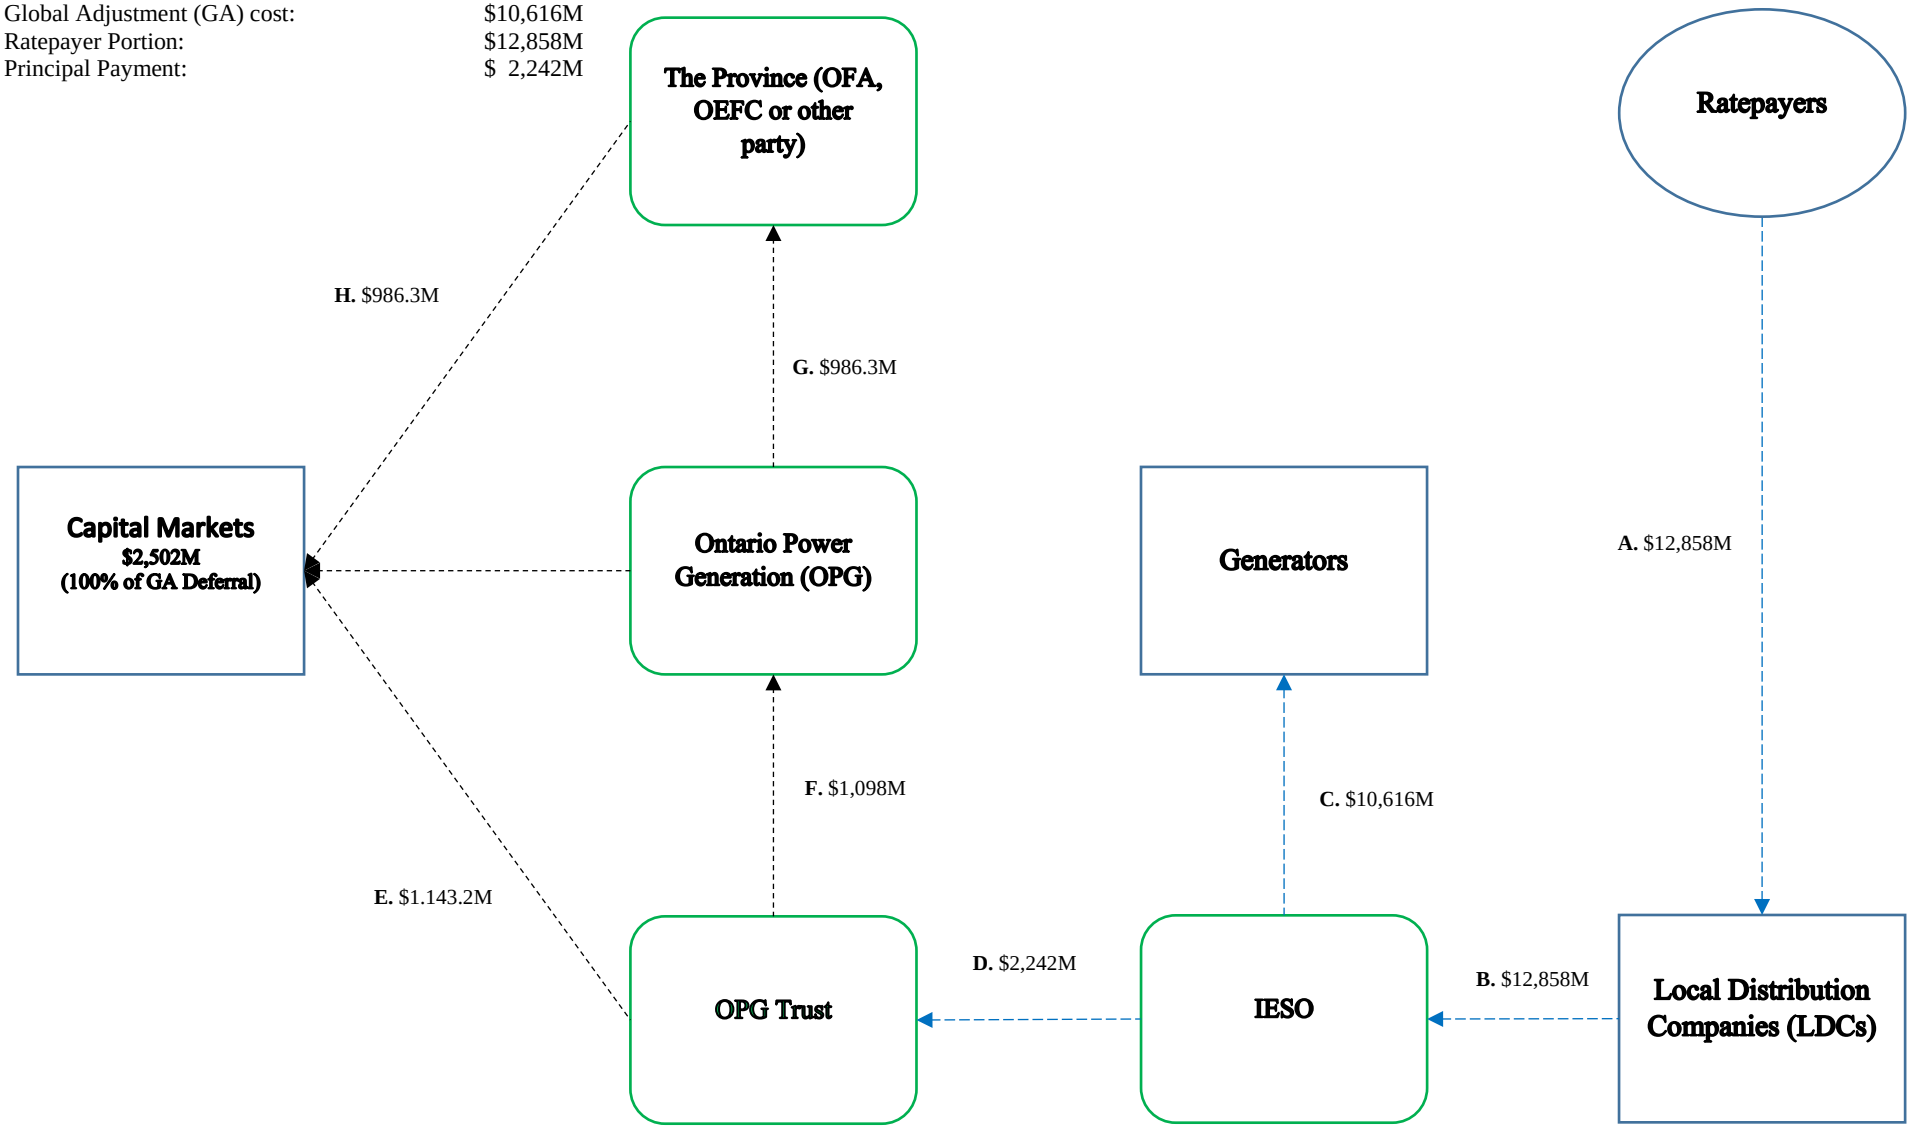
A. The Province borrows 44% of the deferred GA from the market.
B. The Province then funnels this amount to OPG through an equity injection.
C. OPG borrows 5% of the deferred GA from the market.
D. OPG lends an amount equal to the 5% and 44% from the market and the Province, respectively, to a separate legal entity called OPG Trust.
E. OPG Trust borrows 51% of the deferred GA from the market, ending up with 100% of the total $2.502M deferred GA in cash.

Deferral Mechanism

F. Ratepayers pay their portion of the GA to LDCs.
G. The LDCs remit this amount to IESO.
H. IESO, with the proper legislation and accounting treatment, is allowed to recognize a regulatory asset – the right to collect the deferred amount of $2,502M from ratepayers. It then sells this asset for cash to OPG Trust.
I. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA to Generators.

Exhibit B: 2028-2029 Estimates for Principal Payments

Global Adjustment (GA) cost:	$10,616M
Ratepayer Portion:	$12,858M
Principal Payment:	$ 2,242M



Collection of the GA

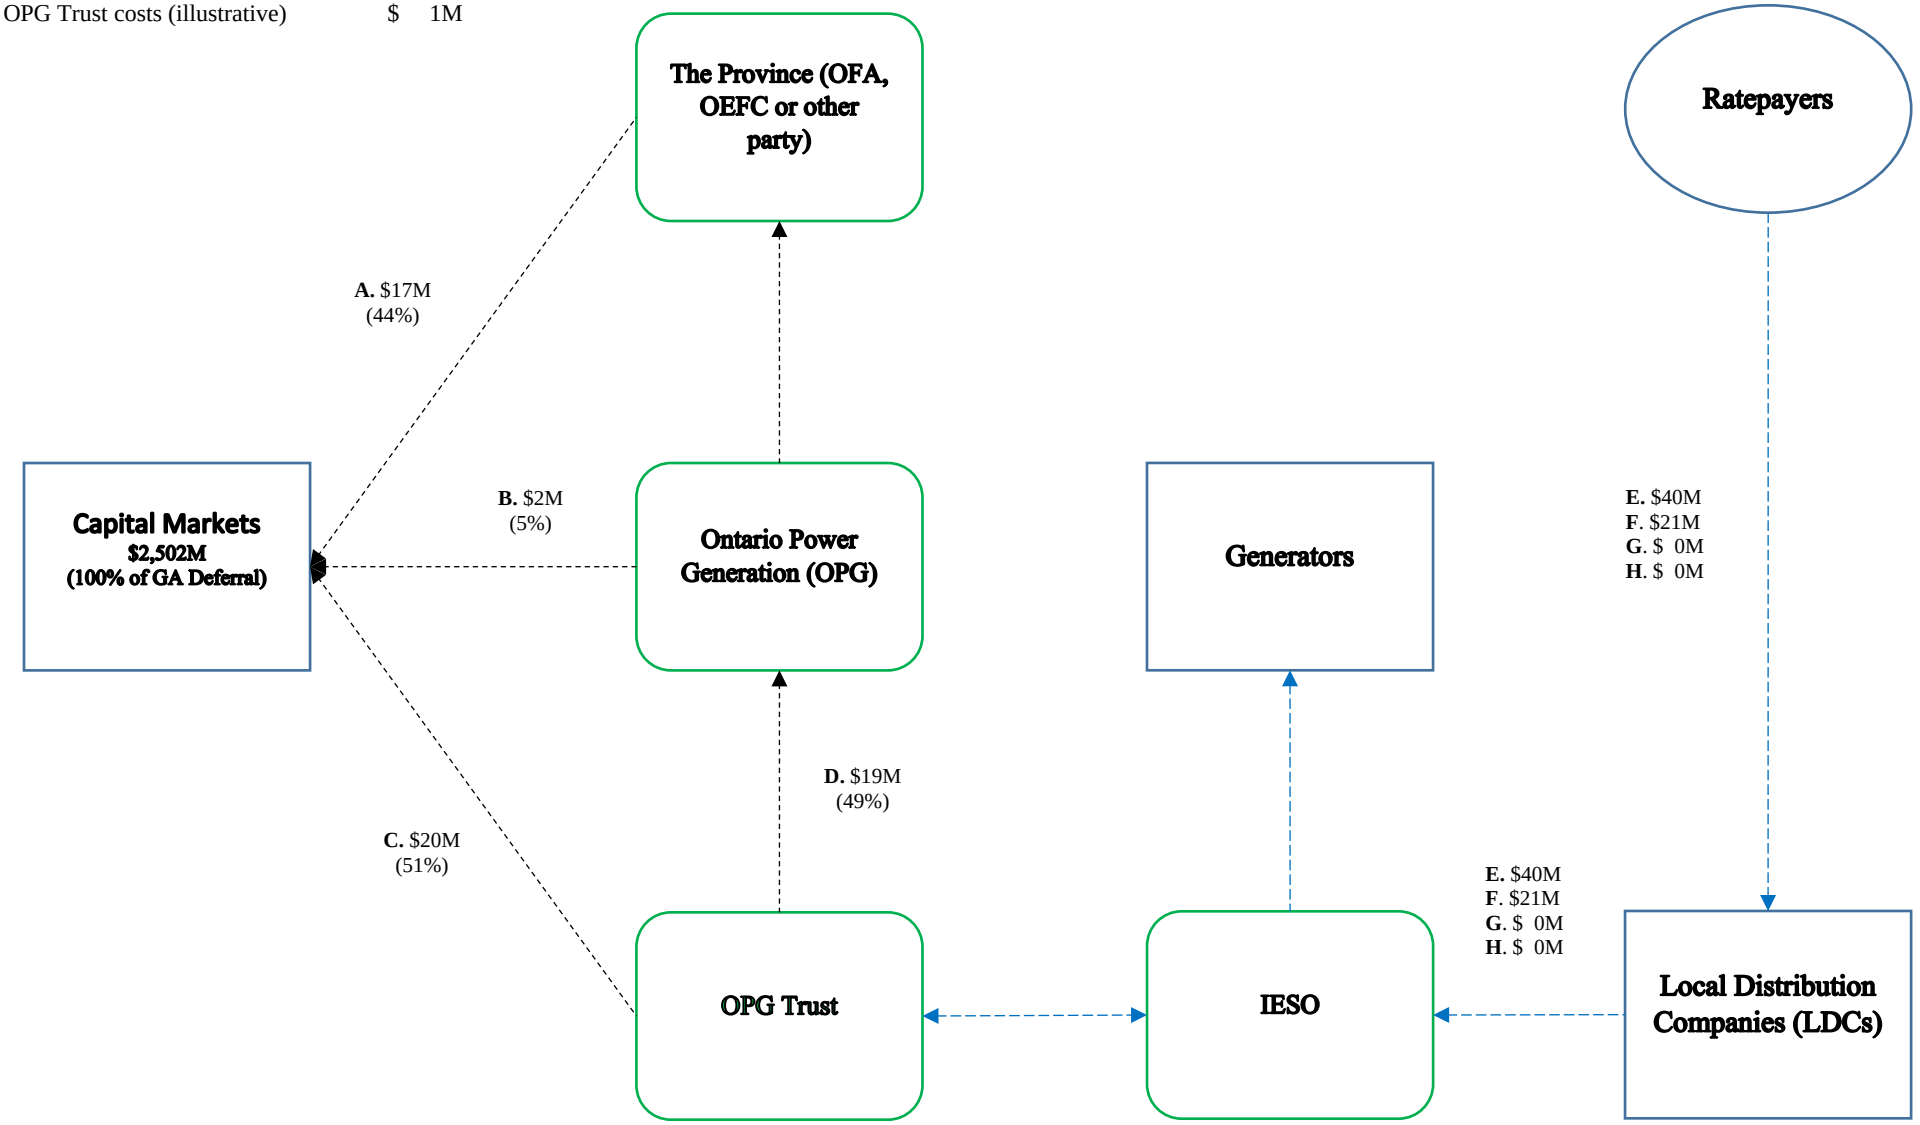
A. Ratepayers pay to LDCs the full cost of the GA plus an additional $2.242M that will be used to reduce the principal of the borrowing (or principal and interest if there is "interest on interest").
B. LDCs remit this amount to IESO.
C. IESO pays the full cost of the actual GA to generators.
D. IESO pays to OPG Trust the additional payment from the ratepayers over the actual GA cost. OPG Trust reduces the asset (for the right to collect GA deferral costs from ratepayers) by an equivalent amount.

Settlement of Principal.

E. OPG Trust pays off principal to the market. In this example, pays off 51%, but could pay more or less depending on various factors (e.g., subordinate debt, managing weighted average interest cost, etc.).
F. OPG Trust pays down principal related to the 49% of the GA Deferral it borrowed from OPG.
G. OPG could give a dividend to the Province equal in order to pay off the outstanding principal it borrowed from the market (44% of the total GA deferral cost)
H. The Province pays back principal to the market.

Exhibit C: 2017-2018 Estimates for Interest Recognition

Interest Recognized	$ 39M
OPG Trust costs (illustrative)	$ 1M



Recognition of Interest

A. The Province recognizes interest on the 44% of the deferred GA it borrowed from the market.

B. OPG recognizes interest on the 5% of the deferred GA it borrowed from the market.

C. OPG recognizes interest on the 51% of the deferred GA it borrowed from the market.

D. OPG Trust recognizes interest on the 49% of the GA it borrowed from OPG; OPG recognizes income for this transaction.

Options for Ratepayer collection

E. Option 1 – collect the entire interest amount from ratepayers plus the Trust administrative costs, thus offsetting the interest expense from total borrowing with the recognition of income. The end result is no fiscal impact.

F. Option 2 – only collect interest income for the 51% of deferred GA from the market and admin costs; OPG Trust would recognize income to offset the interest expense to the market but fiscal impact of 49% of the interest ($19M)

G. Option 3 – Do not collect from ratepayers – fiscal cost of 100% interest.

H. Option 4 – No collection from ratepayers, but OPG Trust is allowed to defer the recognition of interest expense on 100% of debt, leading to no fiscal impact.

Notes

- Assumptions based on Energy models and data, IESO forecasts, and CEFD validation models.

Hi Ron,

Pls. see attached on the GA structure, as we understand things.

It's very complex and not sure if an average person on the street would be able to follow.

Thanks,

John.

Structure of the Global Adjustment Deferral Mechanism

Issue

The Province is working with Ontario Power Generation (OPG), the Ontario Energy Board (OEB), IESO, external accountants, and other agencies to develop a mechanism to defer the global adjustment (GA) payment as part of the recently announced Ontario Fair Hydro Plan. This note outlines current proposals for this mechanism.

Context

- Smoothing of GA costs over time would involve ratepayers paying only a portion of the GA cost in earlier years, while this shortfall would be made up by future rate payers paying more than the true cost of the GA in later years.
    - There will be a proposed cap of $2.242B on the annual additional cost over the GA to lessen the burden on ratepayers.

- The shortfall in GA payments in earlier years would represent deferred costs to ratepayers. However, the mechanism would still need to compensate power generators on an ongoing basis for the full cost of the GA and would therefore need to borrow and take on debt to make cash payments to power generators.
- Principal payments on debt would be mandatory, but there has been no clarification on whether or not interest payments will be capitalized (i.e., interest accumulates resulting in compounding) or if interest will be recovered from ratepayers on an on-going basis.
    - If interest payments are made by ratepayers on an on-going basis debt costs would be lower, however this would also have the effect of reducing ratepayer savings from the GA deferral mechanism. The commitment is for a 25% reduction on average for all residential customers, which would mean that the amount of principal needs to be larger to offset this effect.
- It has also been proposed that all administrative and other costs from the GA deferral would need to be collected from ratepayers immediately or recognized at the very least as a future benefit to the Province, adding to the costs passed on to ratepayers.

Structure (*refer to Exhibit A*)

- The deferred portion of the GA needs to be recognized as an asset – likely a regulatory asset – by the IESO, which gives the IESO the right to collect the deferred amount from ratepayers at a future date.
- This asset, in turn, would be sold to another party that would receive the revenues associated with this asset.
    - It is proposed that the IESO be required to recover the costs associated with this asset even after selling it.
    - To do this the IESO would need to sell the asset in order to settle its arrangements with generators, and ensure generators are not affected by the deferral.
        - Alternatively, the IESO could simply borrow funds (using the regulatory asset as collateral), but this poses risks for both consolidation on public accounts and credit ratings.
        - With respect to the credit rating risk, DBRS stated in a March 3, 2017 report that "*Provided the debt continues to be fully supported through the electricity rate base, DBRS will treat it as self-supported and exclude it from the calculation of tax-supported debt*".
- OPG is proposing to set up a special purpose vehicle, "OPG Trust", which would purchase the regulatory asset from the IESO.
    - The purchase would be funded by debt from the capital markets (51% of the deferred GA Cost), and OPG (49% of the deferred GA).
    - OPG would finance that 49% through debt from the capital markets (5%) and an equity injection from the Province (44%).

    - The debt would be set-up in tranches to ensure that the 51% of debt directly from the market would be senior, potentially mitigating the risk premium associated with high amounts of borrowing with an intangible, unique asset as collateral.
- There are several other considerations and requirements that would need to be attained in order for the mechanism to work, as detailed in the OPG White Paper sent to the Deputy Minister of Energy on February 27, 2017.

Equity Injection (*refer to Exhibit A & B*)

- The equity injection could lead to increasing, and then stabilizing dividend payouts in consistent with OPG's's risk profile and comparable business entities.
    - Principal and interest payments flowing from the ratepayers through the IESO and the Trust could be paid back to the Province.
    - This would increase steadily as ratepayers begin to pay back principal in about 10 years time, eventually reaching a cap of $2.242B in principal and interest per year based on Energy's March estimates (based on the capitalized interest scenario).
    - The administrative costs and return for OPG/OPG Trust would also need to be collected by ratepayers, but the dividend payments would be net of these amounts and should still allow the Province to earn a substantial return.
    - Dividend payments could also allow OPG to eventually optimize its capital structure to the targeted or deemed 55%-45% debt to equity split, as dividends allow OPG to reduce its retained earnings thereby reducing equity.
- Recapitalization from the Province is preferable as there are no associated interest expenses or large principal payments that could affect OPG's credit rating.
- If debt financing was utilized, the change in the cost of borrowing could also impact OPG's rate applications for the return recovered from ratepayers through payment amounts, potentially offsetting ratepayer benefit of the GA deferral mechanism.
- The financing structure split between equity (44%) and debt (5% borrowed by OPG and 51% borrowed by OPG Trust) is roughly equivalent to the deemed capital structure of 55% debt and 45% equity for regulated distributors in Ontario.

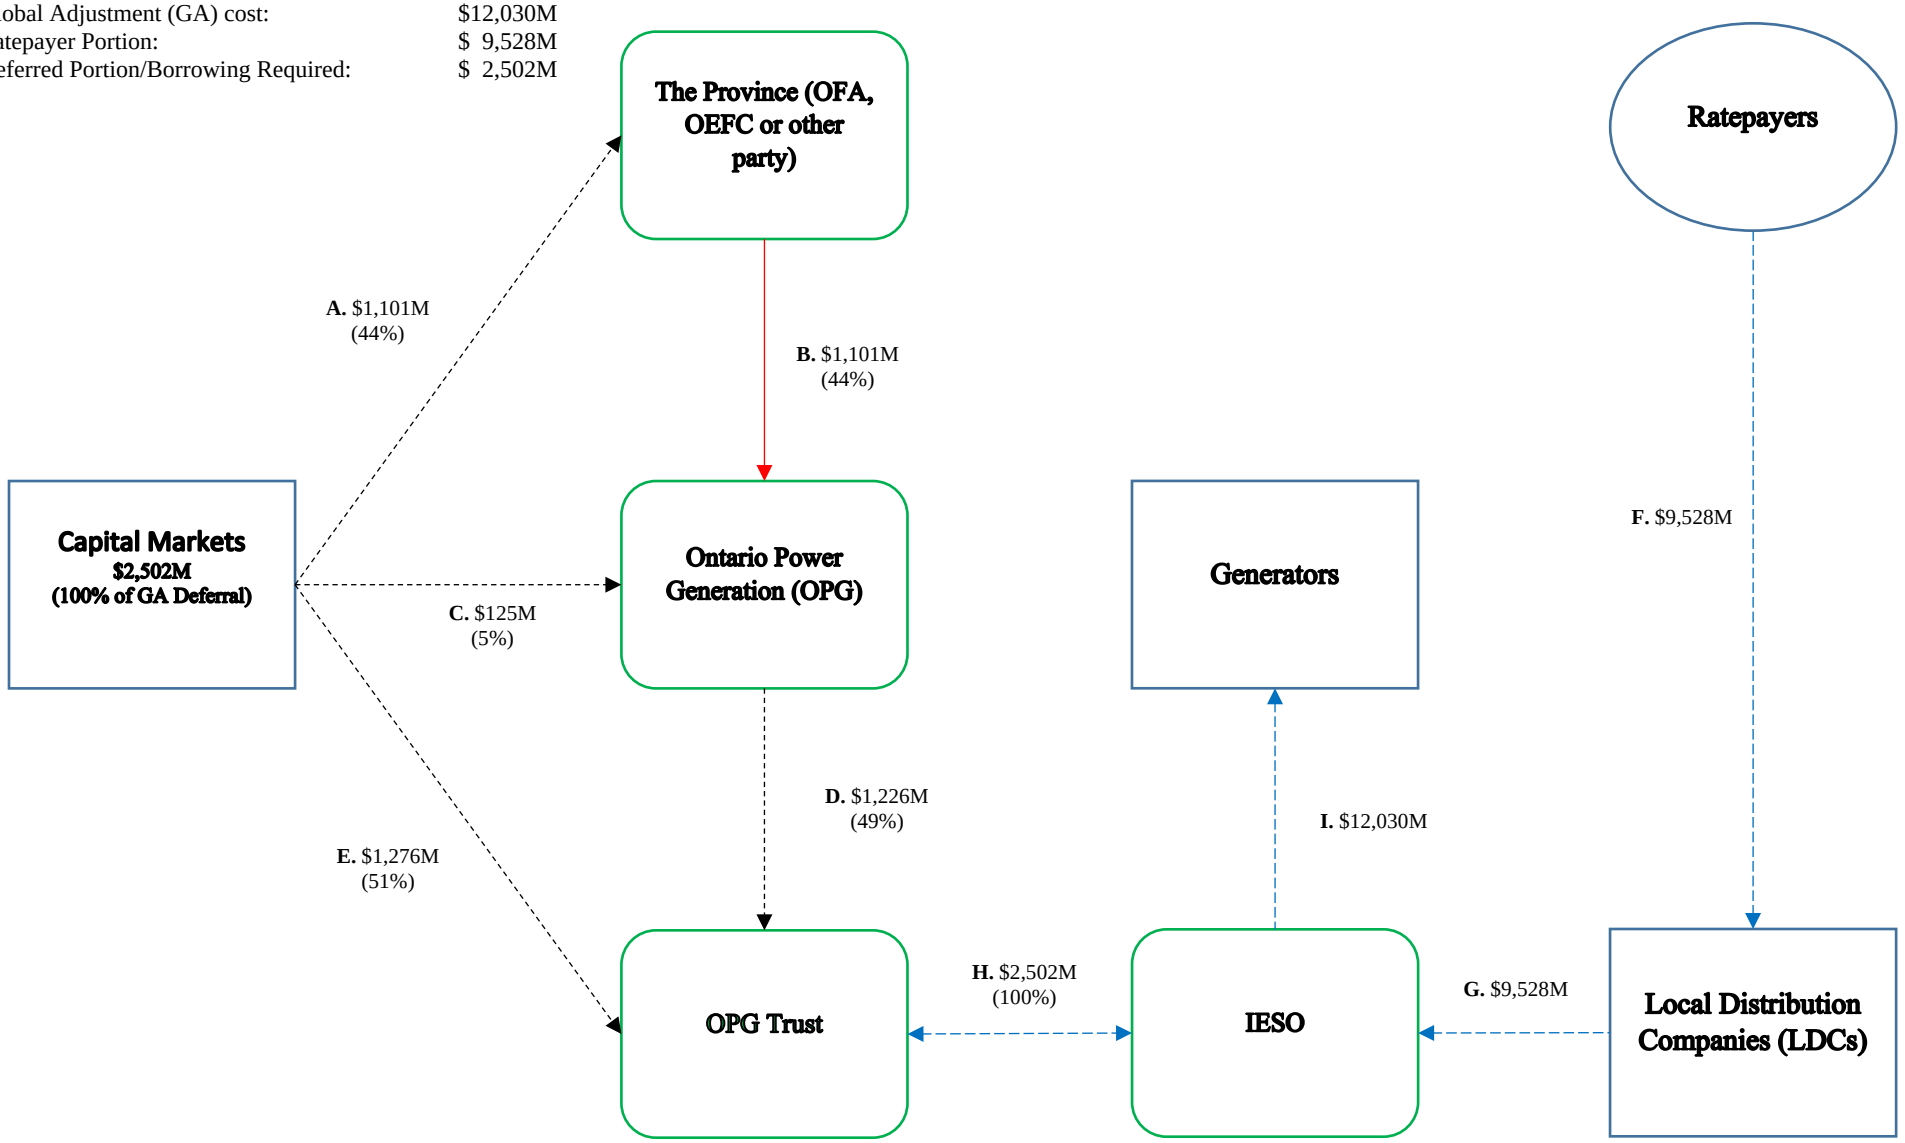
Collection of Interest Payments (*refer to Exhibit C*)

- There are different potential accounting treatments, depending on legislative and regulatory approval, that would impact the amount of borrowing and interest over the long term as well as the total fiscal impact.
    - **Option 1: Collect interest and administrative costs from ratepayers on an on-going basis:** Interest and the costs to finance/administer the GA deferral mechanism would be recovered from ratepayers along the way. This would allow cash and income to be recognized by OPG Trust equivalent to the total borrowing cost from the market (i.e., the interest on the 44% of the GA the Province borrowed from the market, the 5% of the GA OPG borrowed, and the 51% of the GA OPG Trust borrowed). Furthermore, some type of additional return for the risk premium could be made. Overall, there would be no fiscal cost, and less debt would build up over time due to the elimination of the compound effects on interest.
    - **Option 2: Collect interest costs associated with the senior debt**: There are variations on this concept which essentially proposes to only collect some of the interest costs from ratepayers, with the senior debt that OPG Trust borrows directly from the market of primary concern. This is "meeting halfway" between deferring all interest payments and collecting all interest payments from ratepayers immediately.

- Option 3: **Do not collect from ratepayers**. There is a fiscal impact equal to 100% of the interest on the total borrowings as an expense still needs to be recognized, even though cash interest has not been paid. There is also a compounding effect on interest.
- Option 4: **No collection from ratepayers but deferral of expense recognition (Same as Energy's analysis in its Cabinet Submission)**. For this option, there is no collection of interest payments from ratepayers, but OPG Trust is somehow allowed to defer the recognition of interest expense on its books and recognize as a regulatory asset, thus eliminating the fiscal impact.
    - If OPG Trust were allowed to recognize a regulatory asset, then it could defer the interest expense, instead recognizing it as an asset (similar to the idea of a prepaid expense).
    - Thus, OPG would recognize interest income from OPG Trust, but OPG Trust would not recognize an expense related to the amount owed to OPG and instead would increase the regulatory asset by the same amount.
    - The interest income earned by OPG for the 49% of the GA deferral it borrowed would offset the borrowing the Province made from the capital markets.
    - OPG Trust would also defer the recognition of the interest associated with the 51% of the GA deferral it borrowed from the market. The deferred amount would be recognized in a regulatory asset.
    - When OPG starts collecting principal and interest from ratepayers, it will recognize income, but will also amortize the regulatory asset at the same time, thus matching revenue and expenses with each other in the time period and potentially eliminating the fiscal impact.
    - Many factors, including the initial accounting treatment and the effect of consolidation, are significant barriers to the application of this approach.
    - **Alternatively, OPG Trust might be able to recognize income (with a receivable created to balance the transaction) to offset the interest expense without collecting from ratepayers**, i.e., it will be a cash transaction in the future (cash received offset by a decrease in the receivable; no effect on income statement).

Exhibit A; 2017-2018 Estimates for Balance Sheet Transactions

Global Adjustment (GA) cost:	$12,030M
Ratepayer Portion:	$ 9,528M
Deferred Portion/Borrowing Required:	$ 2,502M



Setting up the Trust

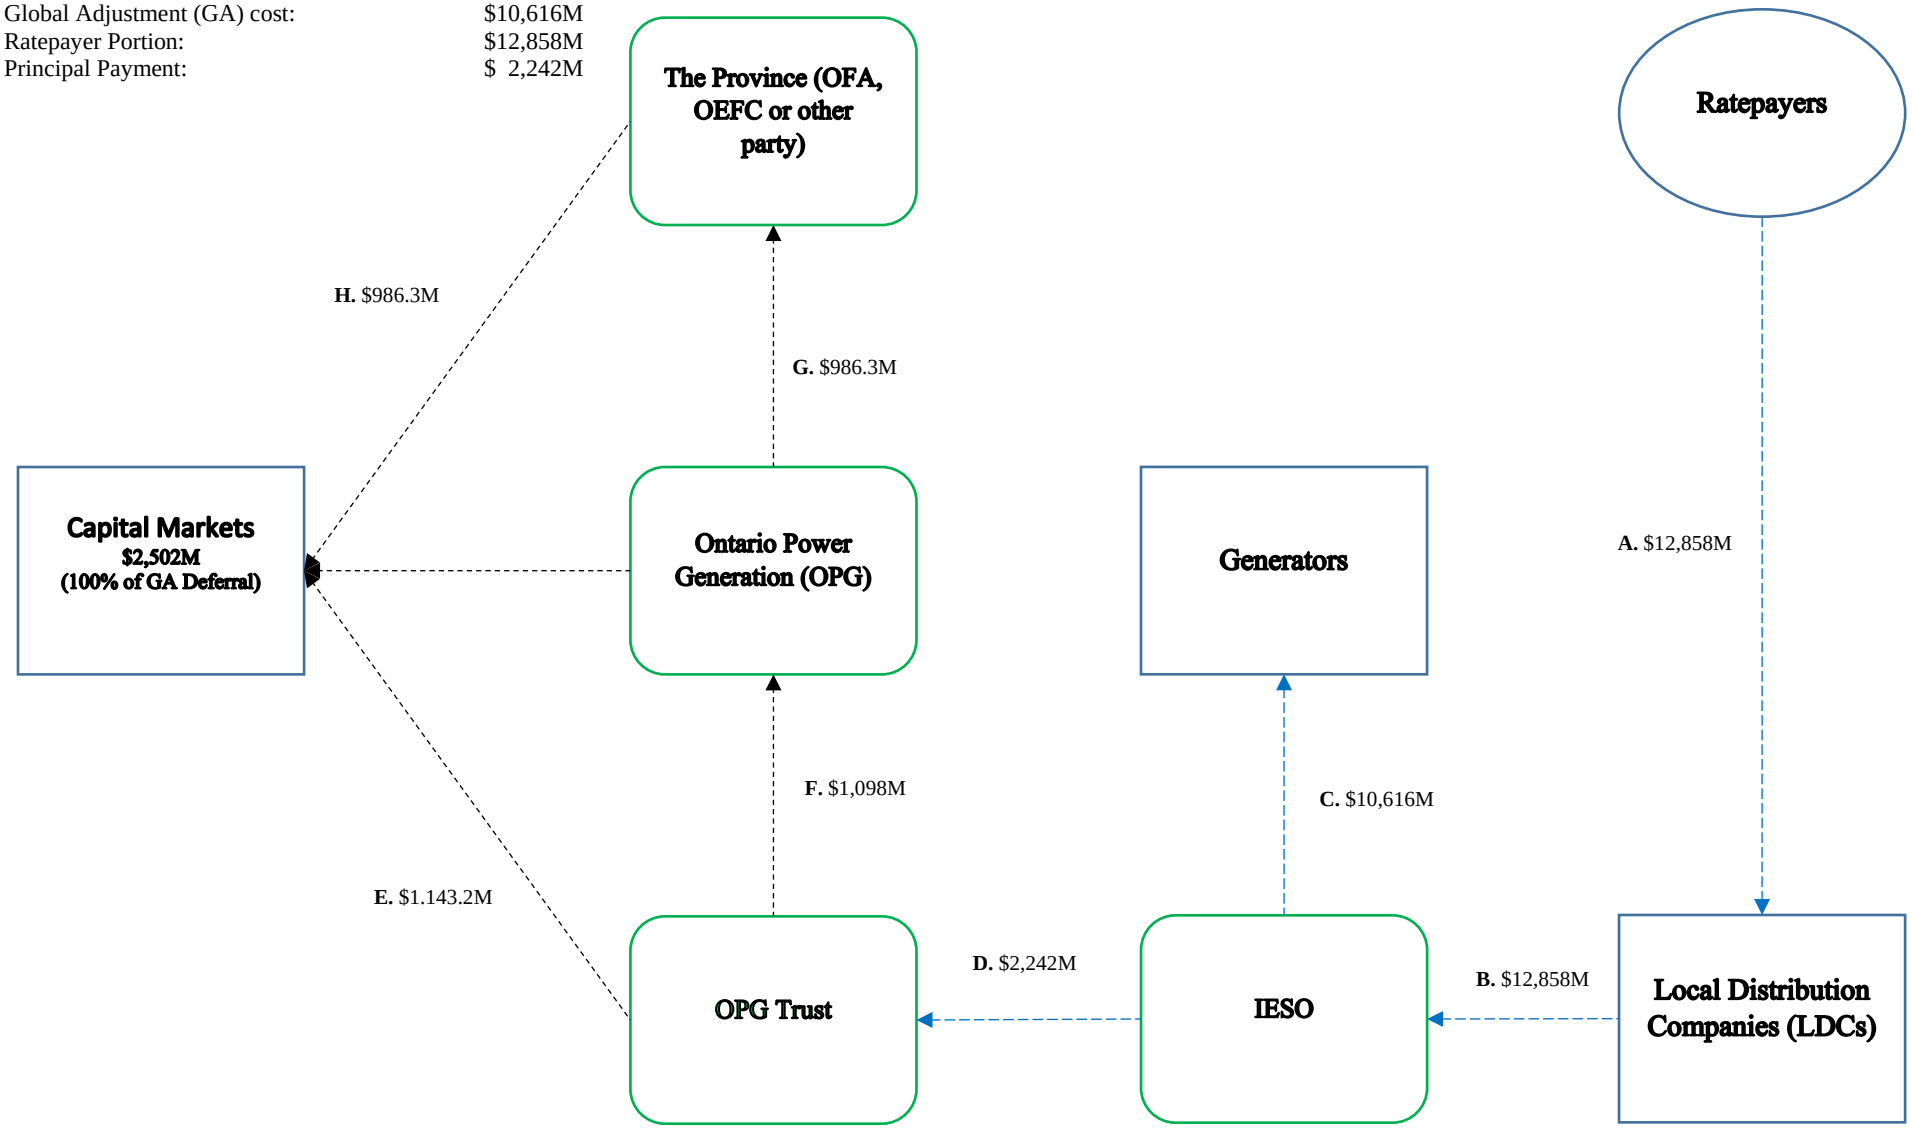
A. The Province borrows 44% of the deferred GA from the market.
B. The Province then funnels this amount to OPG through an equity injection.
C. OPG borrows 5% of the deferred GA from the market.
D. OPG lends an amount equal to the 5% and 44% from the market and the Province, respectively, to a separate legal entity called OPG Trust.
E. OPG Trust borrows 51% of the deferred GA from the market, ending up with 100% of the total $2.502M deferred GA in cash.

Deferral Mechanism

F. Ratepayers pay their portion of the GA to LDCs.
G. The LDCs remit this amount to IESO.
H. IESO, with the proper legislation and accounting treatment, is allowed to recognize a regulatory asset – the right to collect the deferred amount of $2,502M from ratepayers. It then sells this asset for cash to OPG Trust.
I. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA to Generators.

Exhibit B: 2028-2029 Estimates for Principal Payments

Global Adjustment (GA) cost:	$10,616M
Ratepayer Portion:	$12,858M
Principal Payment:	$ 2,242M



Collection of the GA

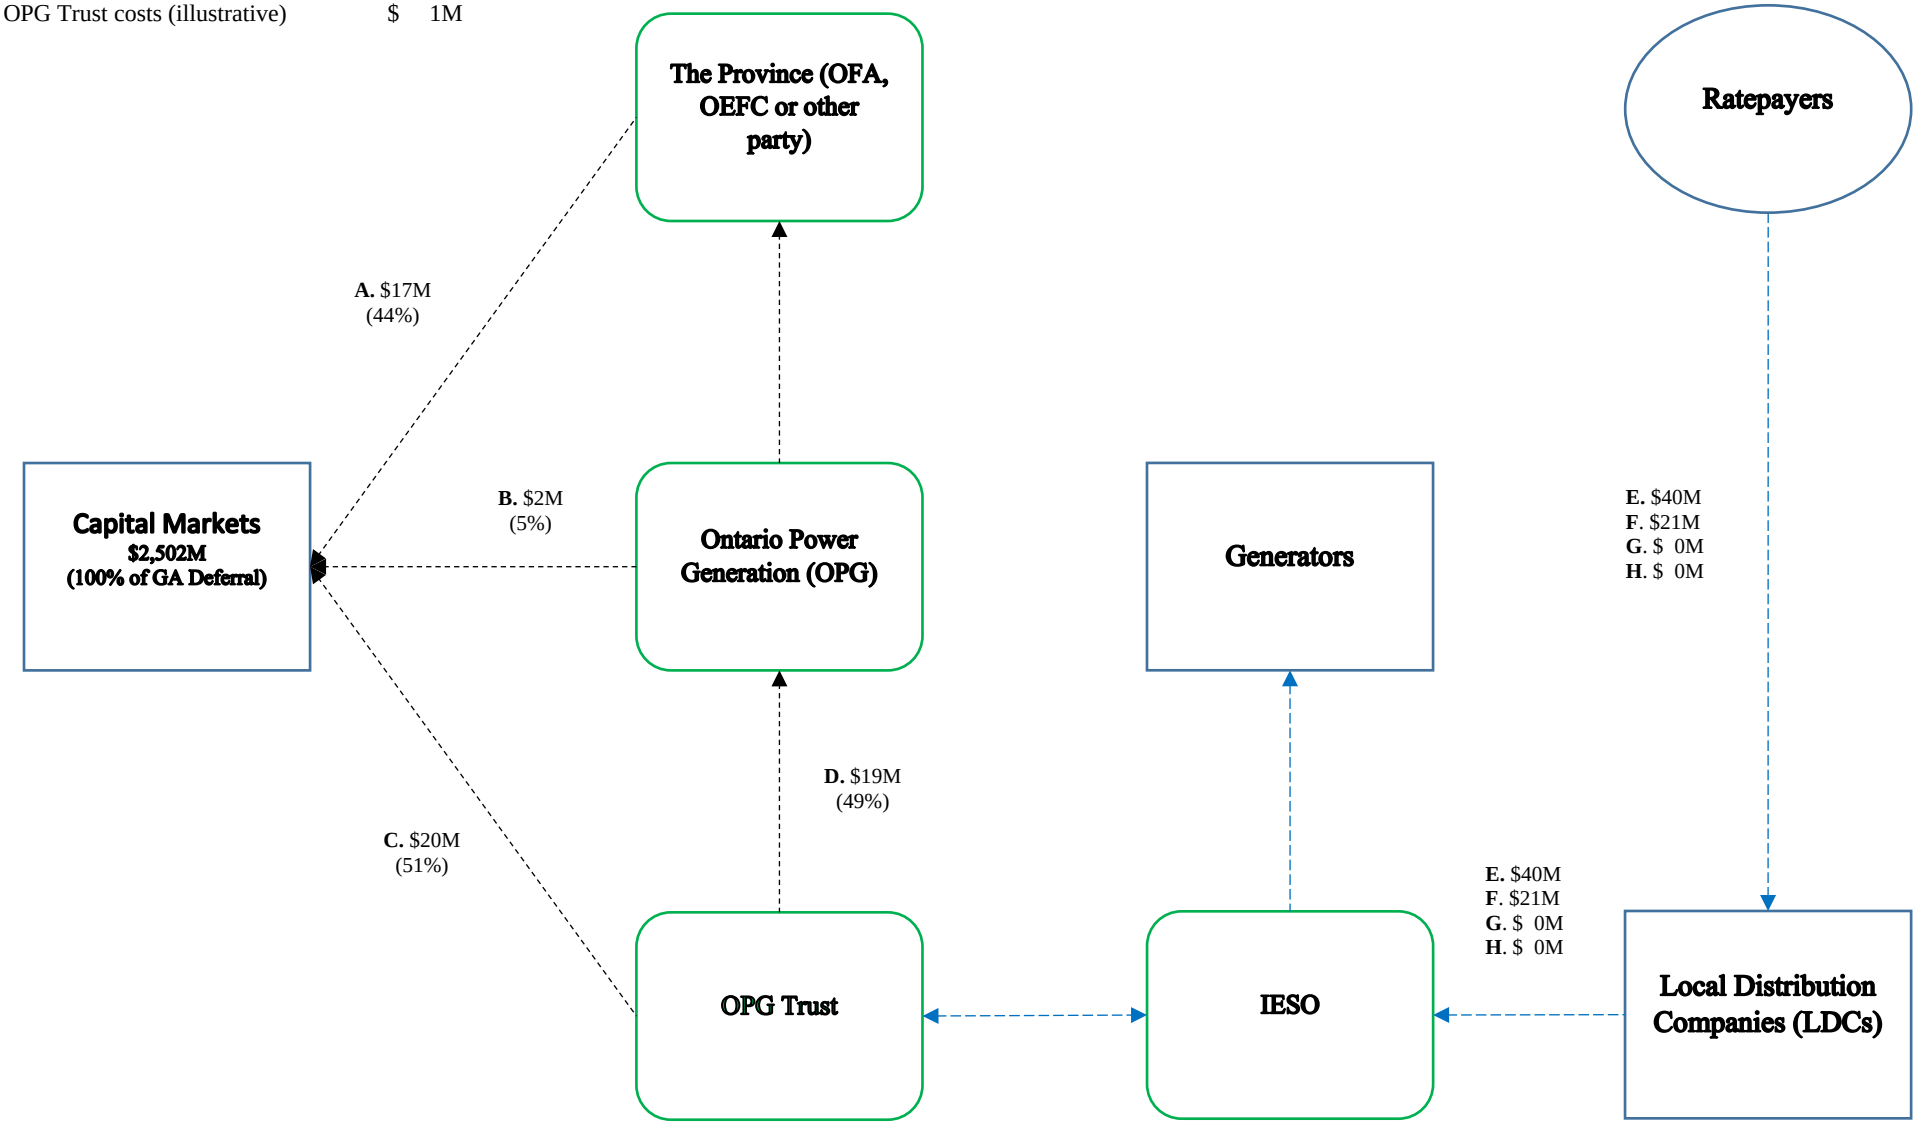
A. Ratepayers pay to LDCs the full cost of the GA plus an additional $2.242M that will be used to reduce the principal of the borrowing (or principal and interest if there is "interest on interest").
B. LDCs remit this amount to IESO.
C. IESO pays the full cost of the actual GA to generators.
D. IESO pays to OPG Trust the additional payment from the ratepayers over the actual GA cost. OPG Trust reduces the asset (for the right to collect GA deferral costs from ratepayers) by an equivalent amount.

Settlement of Principal.

E. OPG Trust pays off principal to the market. In this example, pays off 51%, but could pay more or less depending on various factors (e.g., subordinate debt, managing weighted average interest cost, etc.).
F. OPG Trust pays down principal related to the 49% of the GA Deferral it borrowed from OPG.
G. OPG could give a dividend to the Province equal in order to pay off the outstanding principal it borrowed from the market (44% of the total GA deferral cost)
H. The Province pays back principal to the market.

Exhibit C: 2017-2018 Estimates for Interest Recognition

Interest Recognized	$ 39M
OPG Trust costs (illustrative)	$ 1M



Recognition of Interest

A. The Province recognizes interest on the 44% of the deferred GA it borrowed from the market.

B. OPG recognizes interest on the 5% of the deferred GA it borrowed from the market.

C. OPG recognizes interest on the 51% of the deferred GA it borrowed from the market.

D. OPG Trust recognizes interest on the 49% of the GA it borrowed from OPG; OPG recognizes income for this transaction.

Options for Ratepayer collection

E. Option 1 – collect the entire interest amount from ratepayers plus the Trust administrative costs, thus offsetting the interest expense from total borrowing with the recognition of income. The end result is no fiscal impact.

F. Option 2 – only collect interest income for the 51% of deferred GA from the market and admin costs; OPG Trust would recognize income to offset the interest expense to the market but fiscal impact of 49% of the interest ($19M)

G. Option 3 – Do not collect from ratepayers – fiscal cost of 100% interest.

H. Option 4 – No collection from ratepayers, but OPG Trust is allowed to defer the recognition of interest expense on 100% of debt, leading to no fiscal impact.

Hi John

See attached note from Adam. A good summary of a complex subject. We have reviewed and made a few minor edits to Adam's note. But I would like to take a bit more time on Monday to review again and ask questions. As discussed, I think Adam's note and SIFB's complement each other. Adam's note focusses on explaining the proposed plan and the proposed financial structure. SIFB's does some of this but also focusses on mechanics of what the Province needs to do to make this happen. I.e. setting up an operating asset. They could be merged to one note, with a bit of time.

Thanks
Bruno

Structure of the Global Adjustment Deferral Mechanism

Issue

The Province is working with Ontario Power Generation (OPG), the Ontario Energy Board (OEB), IESO, external accountants, and other agencies to develop a mechanism to defer the global adjustment (GA) payment as part of the recently announced Ontario Fair Hydro Plan.

Context

- Smoothing of GA costs over time would involve ratepayers paying only a portion of the GA cost in earlier years, while this shortfall would be made up by future rate payers paying more than the true cost of the GA in later years.
    - There will be a cap on the annual additional cost over the GA to lessen the burden on ratepayers

- The shortfall in GA payments in earlier years would represent deferred costs to ratepayers. However, the Province would still need to compensate power generators on an ongoing basis for the full cost of the GA and would therefore need to borrow and take on debt to make cash payments to power generators.
- Principal payments on debt would be mandatory, but there has been no clarification on whether or not interest payments will be capitalized or if interest will be recovered from ratepayers on a frequent basis.
    - Having "interest on interest" (i.e., compounding effect) with deferrals on interest payments increases peak debt by approximately $5B and leads additional accumulated interest costs, based on preliminary estimates.
    - However, if interest payments are made by ratepayers on a frequent basis, it lessens the relief provided by the GA deferral mechanism.
- Furthermore, it has also been proposed that all administrative and other costs from the GA deferral would need to be collected from ratepayers or recognized at the very least, adding to the costs passed on to ratepayers.

Structure (*refer to Exhibit A*)

- The deferred portion of the GA needs to be recognized as an asset by IESO, likely as a regulatory asset that gives IESO the right to collect the deferred amount from ratepayers at a future date.
- This asset, in turn, would be sold to another party that would receive the revenues associated with this asset.
    - The proposal states that IESO would be required to collect the costs associated with this asset even after selling it.
    - IESO needs to sell the asset in order to secure cash to settle its arrangements with generators, thus ensuring that generators are not affected by the deferral.
        - Alternatively, IESO could simply borrow funds (using the regulatory asset as collateral), but this has implications for consolidation on public accounts including the impact on credit ratings.
        - On the other hand, DBRS stated in a March 3, 2017 report that "*Provided the debt continues to be fully supported through the electricity rate base, DBRS will treat it as self-supported and exclude it from the calculation of tax-supported debt*".
- OPG is proposing to set up a special purpose vehicle, "OPG Trust" that would purchase the regulatory asset from IESO.
    - The purchase would be funded by the capital markets (51% of the deferred GA Cost), and OPG (49% of the deferred GA).
    - OPG would finance that 49% through a loan from the capital markets (5%) and an equity injection from the province (44%).

    - The debt would be set-up in tranches to ensure that the 51% of debt directly from the market would be senior, potentially mitigating the risk premium associated with high amounts of borrowing with an intangible, unique asset as collateral.
- There are several other considerations and requirements that would need to be attained in order for the mechanism to work, as detailed in the OPG White Paper released on February 27, 2017.

Equity Injection (*refer to Exhibit A & B*)

- The rationale behind an equity injection is that it could lead to increasing, and then stabilizing, dividend payouts in commensurate with the Ontario Power Generation's risk profile and comparable business entities.
    - Principal payments and interest flowing from the ratepayers through IESO and the Trust could be relayed back to the Province.
    - This would increase steadily as ratepayers begin to pay back principal in an estimated ten years' time, eventually reaching a cap of an estimated $2.242B in principal and interest per year based on Energy's March estimates (with interest on interest).
    - The administrative costs and return for OPG/OPG Trust would also need to be collected by ratepayers, but the dividend payments would be net of these amounts and should still allow the Province to earn a substantial return.
    - Dividend payments could also allow OPG to eventually optimize its capital structure to the targeted 55%-45% debt to equity split.
- Recapitalization from the Province is preferable as there are no associated interest expenses or large principal payments that could affect OPG's credit rating.
- If debt financing was utilized, the change in the cost of borrowing could also impact OPG's rate applications for the return recovered from ratepayers through payment amounts.
- The financing structure split between equity (44%) and debt (56% - 5% borrowed by OPG and 51% borrowed by OPG Trust) is roughly equivalent to the deemed capital structure of 55% debt and 45% equity for regulated distributors in Ontario.

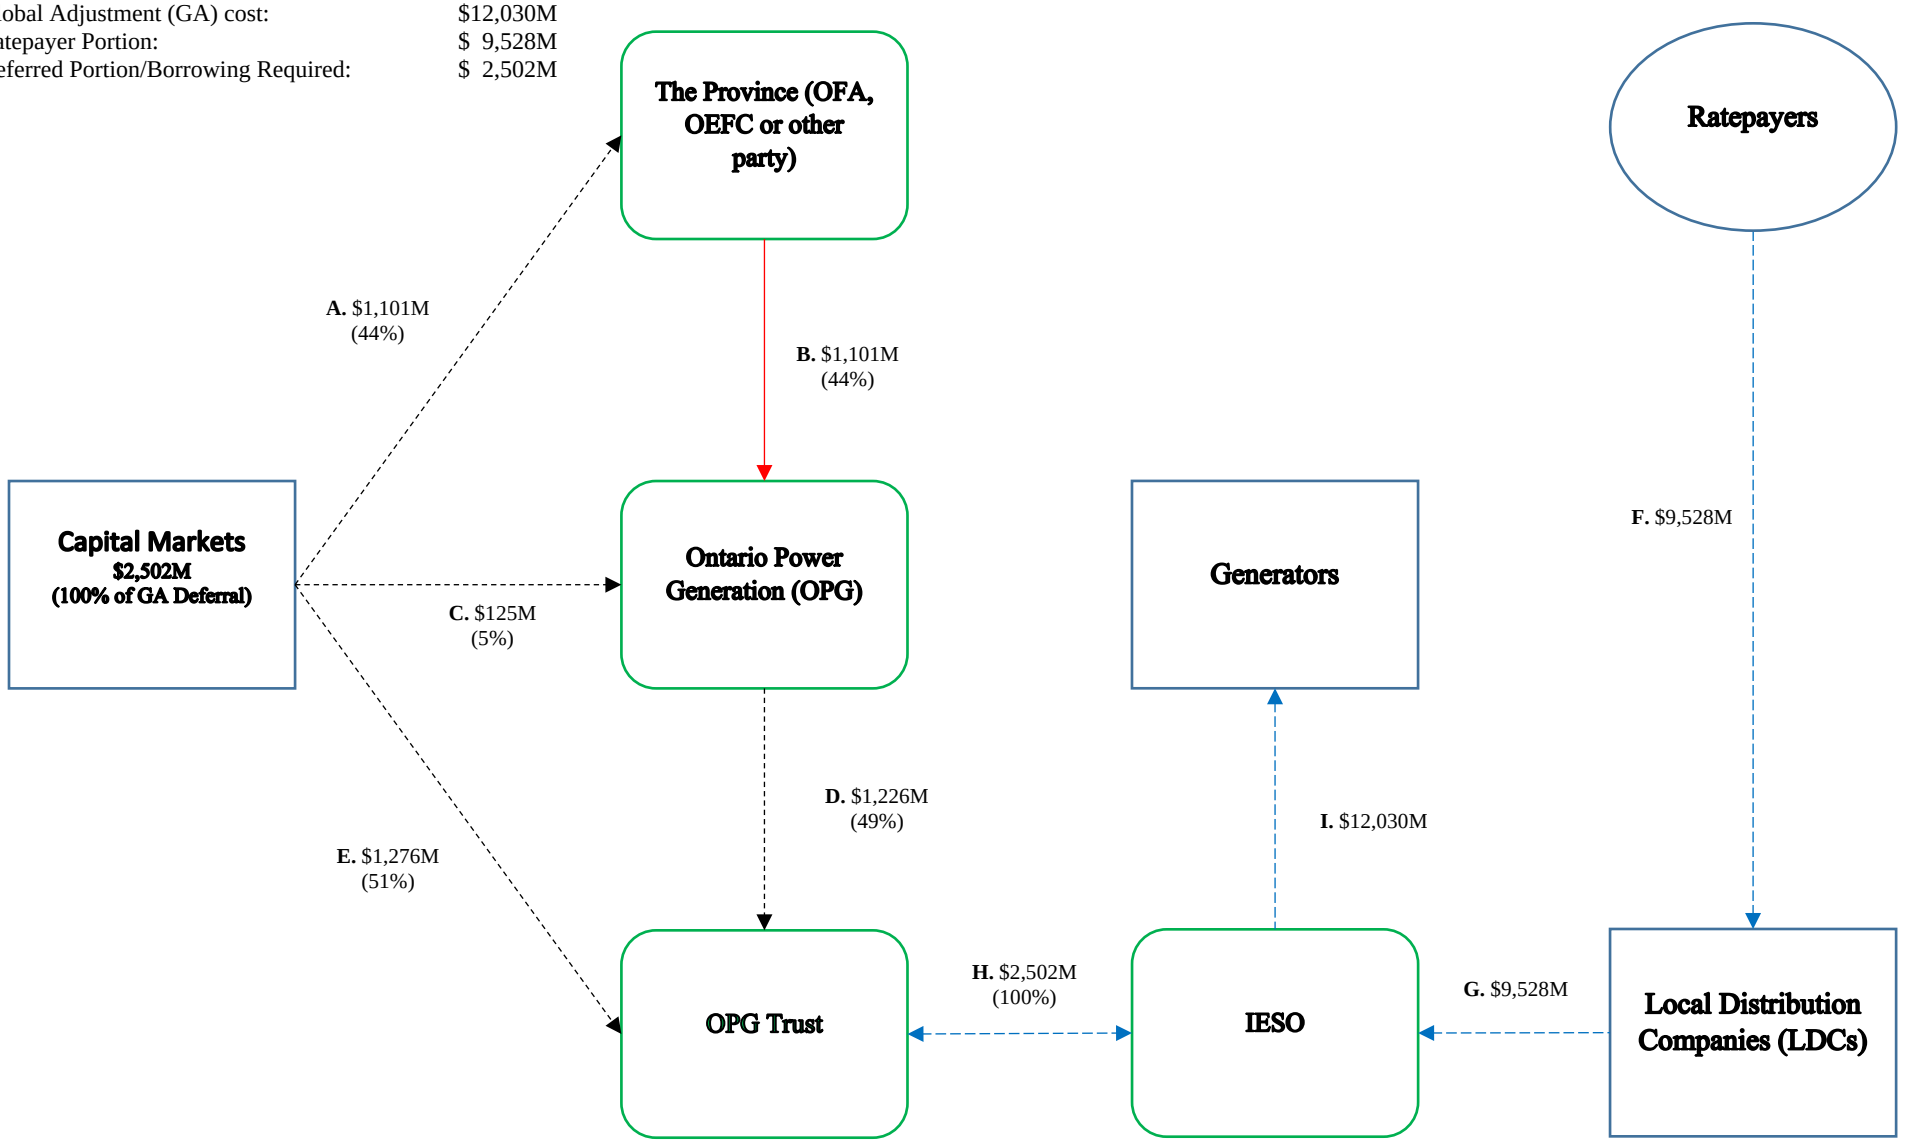
Collection of Interest Payments (*refer to Exhibit C*)

- There are different potential accounting treatments that can be undertaken, depending on legislative and regulatory approval that will impact the amount of borrowing and interest over the long term as well as the total fiscal impact.
    - **Option 1: Collect interest and administrative costs from ratepayers immediately:** Interest and the costs to finance/administer the GA deferral mechanism would be recovered from ratepayers immediately. This would allow cash and income to be recognized by OPG Trust equivalent to the total borrowing cost from the market (i.e., the interest on the 44% of the GA the Province borrowed from the market, the 5% of the GA OPG borrowed, and the 51% of the GA OPG Trust borrowed). Furthermore, some type of additional return for the risk premium could be collected as well. Overall, there would be no fiscal cost, and less debt will build up over time due to the elimination of the compound effects on interest. However, the relief provided to ratepayers from the principal payments on deferred costs would be mitigated by this interest payment, although it is quite low for the initial 4 -5 years.
    - **Option 2: Collect interest costs associated with the senior debt**: There are variations on this concept which is essentially proposing to only collect some of the interest costs from ratepayers, with the senior debt that OPG Trust borrows directly from the market of primary concern. This is "meeting halfway" between deferring all interest payments and collecting all interest payments from ratepayers immediately.

- Option 3: **Do not collect from ratepayers**. There is a fiscal impact equal to 100% of the interest on the total borrowings. There is also a compounding effect on interest as even though cash interest has not been paid, an expense still needs to be recognized.
- Option 4: **No collection from ratepayers but deferral of expense recognition**. For this option, there is no collection of interest payments from ratepayers, but OPG Trust is somehow allowed to defer the recognition of interest expense on its books, thus eliminating the fiscal impact.
    - If OPG Trust were allowed to recognize a regulatory asset, then it could defer the interest expense, instead recognizing it as an asset (similar to the idea of a prepaid expense).
    - Thus, OPG would recognize interest income from OPG Trust, but OPG Trust would not recognize an expense related to the amount owed to OPG and instead would increase the regulatory asset by the same amount.
    - The interest income earned by OPG for the 49% of the GA deferral it borrowed would offset the borrowing the Province made from the capital markets.
    - OPG Trust would also defer the recognition of the interest associated with the 51% of the GA deferral it borrowed from the market. The deferred amount would be recognized in a regulatory asset.
    - When OPG starts collecting principal and interest from ratepayers, it will recognize income, but will also amortize the regulatory asset at the same time, thus matching revenue and expenses with each other in the time period and potentially eliminating the fiscal impact.
    - Many factors, including the initial accounting treatment and the effect of consolidation, are significant barriers to the application of this approach.
    - **Alternatively, OPG Trust might be able to recognize income (with a receivable created to balance the transaction) to offset the interest expense without collecting from ratepayers**, i.e., it will be a cash transaction in the future (cash received offset by a decrease in the receivable; no effect on income statement).

Exhibit A; 2017-2018 Estimates for Balance Sheet Transactions

Global Adjustment (GA) cost:	$12,030M
Ratepayer Portion:	$ 9,528M
Deferred Portion/Borrowing Required:	$ 2,502M



Setting up the Trust

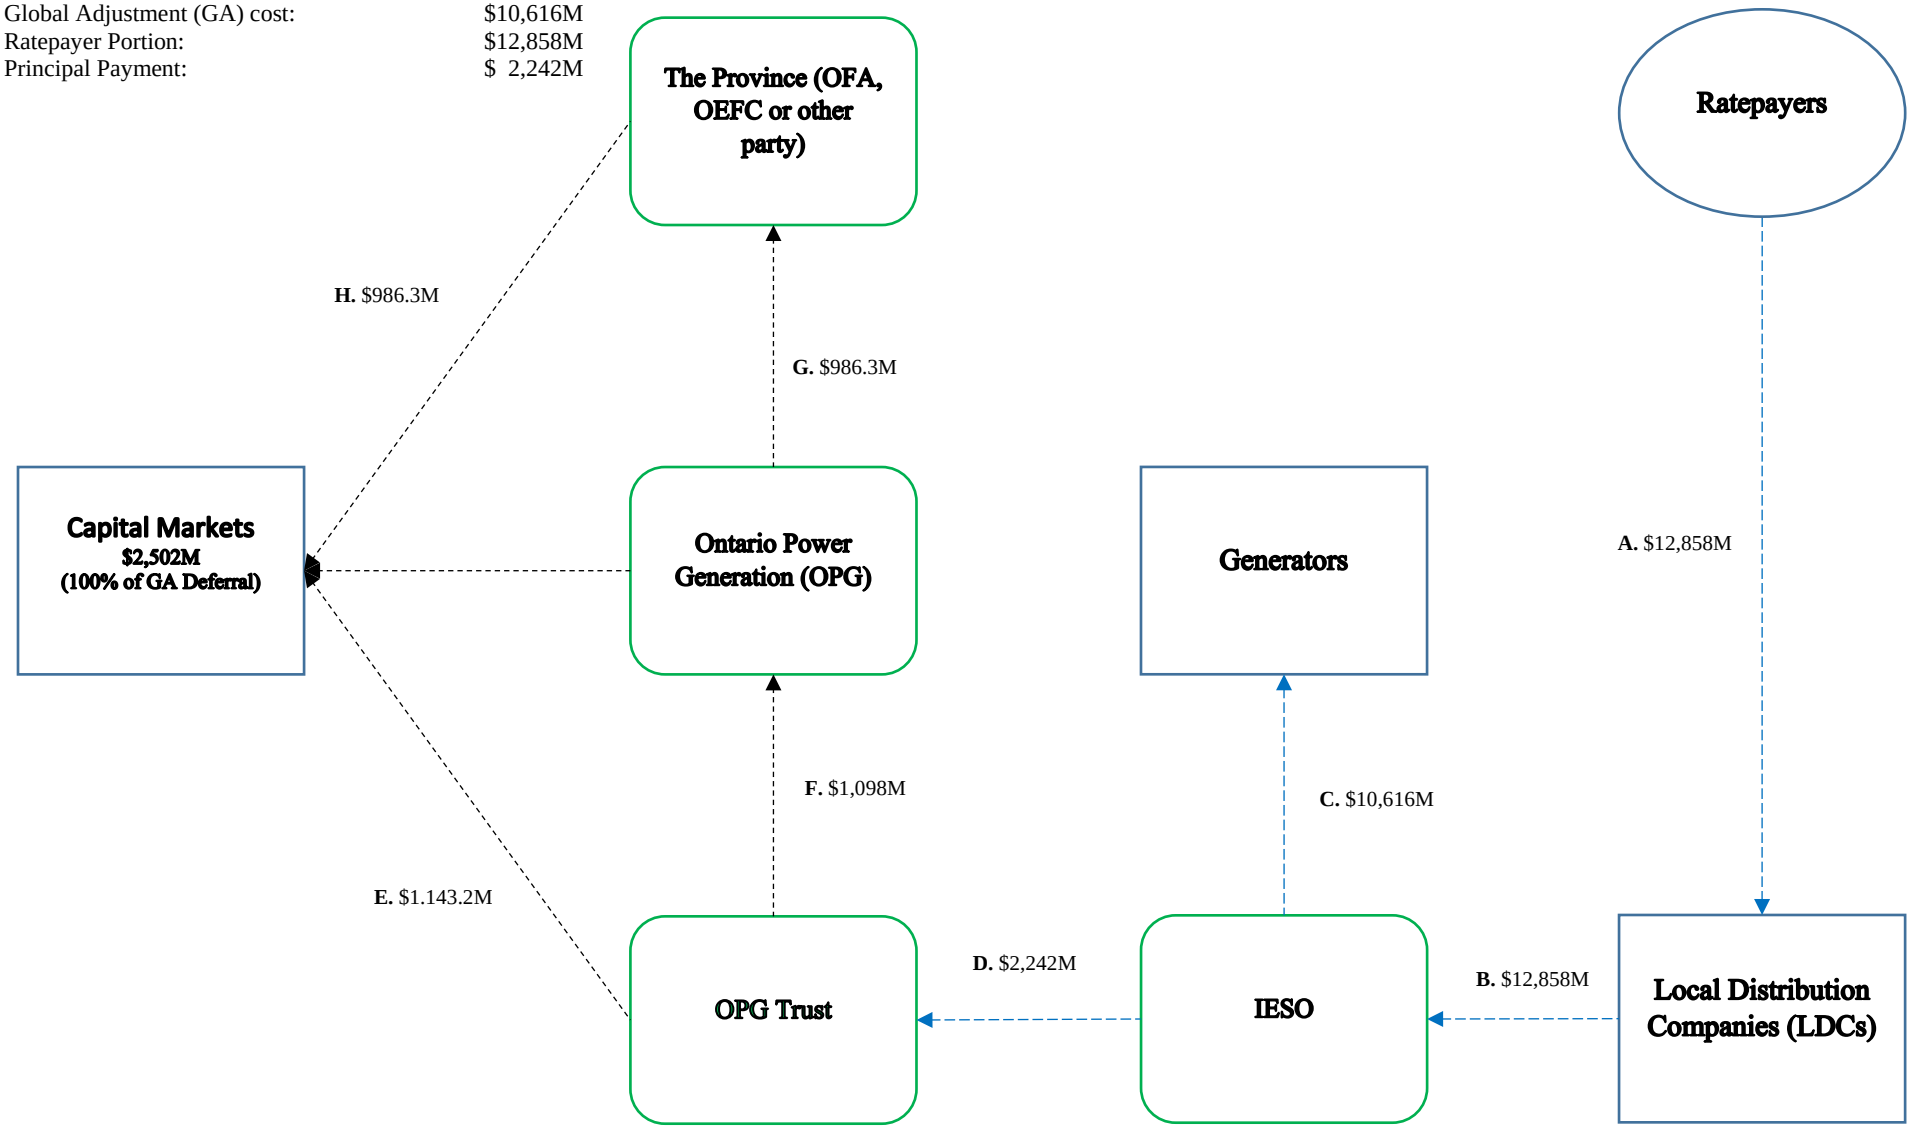
A. The Province borrows 44% of the deferred GA from the market.
B. The Province then funnels this amount to OPG through an equity injection.
C. OPG borrows 5% of the deferred GA from the market.
D. OPG lends an amount equal to the 5% and 44% from the market and the Province, respectively, to a separate legal entity called OPG Trust.
E. OPG Trust borrows 51% of the deferred GA from the market, ending up with 100% of the total $2.502M deferred GA in cash.

Deferral Mechanism

F. Ratepayers pay their portion of the GA to LDCs.
G. The LDCs remit this amount to IESO.
H. IESO, with the proper legislation and accounting treatment, is allowed to recognize a regulatory asset – the right to collect the deferred amount of $2,502M from ratepayers. It then sells this asset for cash to OPG Trust.
I. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA to Generators.

Exhibit B: 2028-2029 Estimates for Principal Payments

Global Adjustment (GA) cost:	$10,616M
Ratepayer Portion:	$12,858M
Principal Payment:	$ 2,242M



Collection of the GA

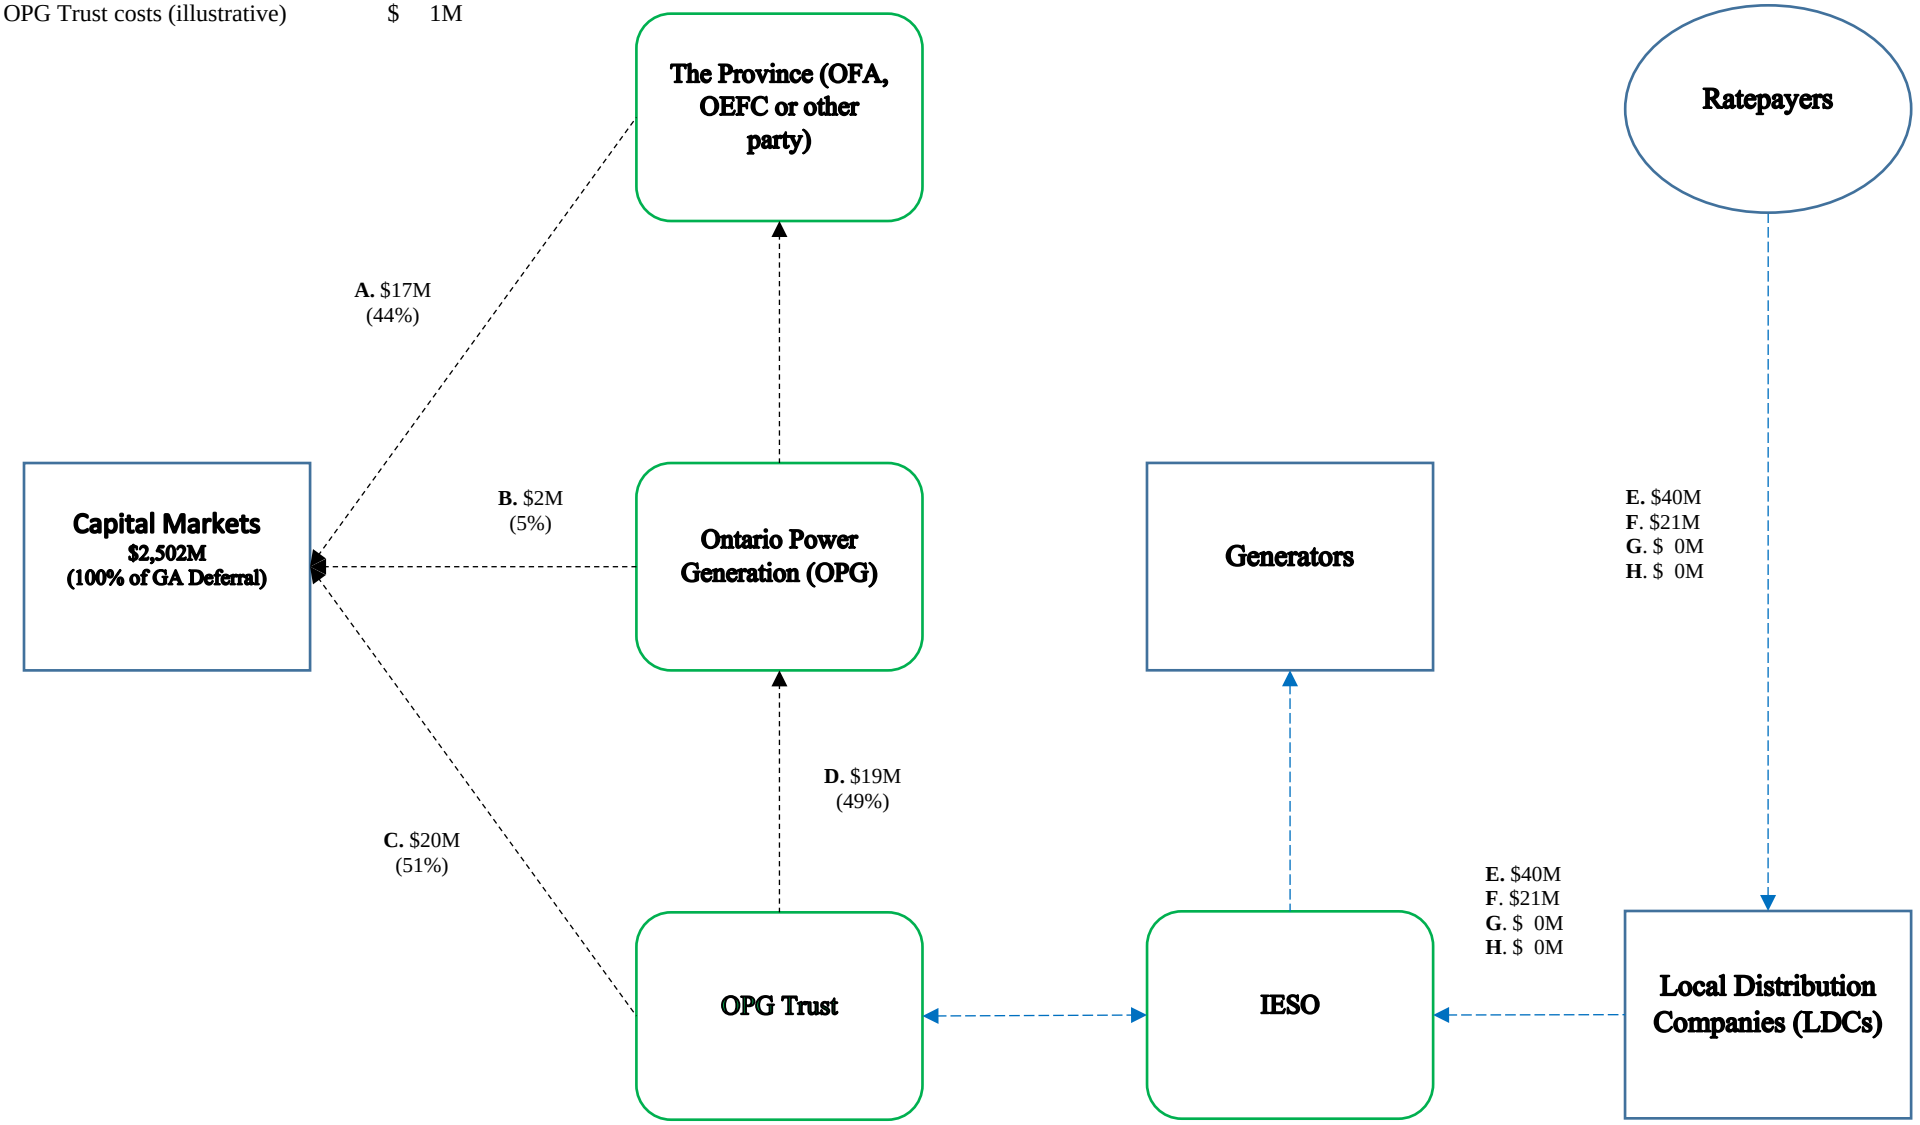
A. Ratepayers pay to LDCs the full cost of the GA plus an additional $2.242M that will be used to reduce the principal of the borrowing (or principal and interest if there is "interest on interest").
B. LDCs remit this amount to IESO.
C. IESO pays the full cost of the actual GA to generators.
D. IESO pays to OPG Trust the additional payment from the ratepayers over the actual GA cost. OPG Trust reduces the asset (for the right to collect GA deferral costs from ratepayers) by an equivalent amount.

Settlement of Principal.

E. OPG Trust pays off principal to the market. In this example, pays off 51%, but could pay more or less depending on various factors (e.g., subordinate debt, managing weighted average interest cost, etc.).
F. OPG Trust pays down principal related to the 49% of the GA Deferral it borrowed from OPG.
G. OPG could give a dividend to the Province equal in order to pay off the outstanding principal it borrowed from the market (44% of the total GA deferral cost)
H. The Province pays back principal to the market.

Exhibit C: 2017-2018 Estimates for Interest Recognition

Interest Recognized	$ 39M
OPG Trust costs (illustrative)	$ 1M



Recognition of Interest

A. The Province recognizes interest on the 44% of the deferred GA it borrowed from the market.

B. OPG recognizes interest on the 5% of the deferred GA it borrowed from the market.

C. OPG recognizes interest on the 51% of the deferred GA it borrowed from the market.

D. OPG Trust recognizes interest on the 49% of the GA it borrowed from OPG; OPG recognizes income for this transaction.

Options for Ratepayer collection

E. Option 1 – collect the entire interest amount from ratepayers plus the Trust administrative costs, thus offsetting the interest expense from total borrowing with the recognition of income. The end result is no fiscal impact.

F. Option 2 – only collect interest income for the 51% of deferred GA from the market and admin costs; OPG Trust would recognize income to offset the interest expense to the market but fiscal impact of 49% of the interest ($19M)

G. Option 3 – Do not collect from ratepayers – fiscal cost of 100% interest.

H. Option 4 – No collection from ratepayers, but OPG Trust is allowed to defer the recognition of interest expense on 100% of debt, leading to no fiscal impact.

Notes

- Assumptions based on Energy models and data, IESO forecasts, and CEFD validation models.
- Sources include Ministry of Energy decks, OPG reports and discussions, external accounting reports, and internal reports/discussions.

Hi all,

I wanted to do a quick calculation to show what I was trying to refer to in the meeting. In essence, if we stick with the interest rate forecast in the model and say that the trust borrows at 5%, there is a difference of approximately $3.4 billion – which is a result of the Province being able to borrow at a lower rate than the Trust. This benefit results in a short term for the Province's portion of the debt (due to lower interest rate). With 5% across the board modelling, you are effectively sharing that $3.4 billion between the Province and the Trust.

This is just rough but just some thoughts.

Regards,
Salman

Hi,

I added some more edits to the note. Hopefully I edited the previous version 8. It's mostly wordsmithing, but a some comments/questions as well.

Thanks, the note has helped me grasp this much better but check my edits as some may reflect my not fully understanding.

Thanks
Bruno

Structure of the Global Adjustment Deferral Mechanism

Issue

The Province is working with Ontario Power Generation (OPG), the Ontario Energy Board (OEB), IESO, external accountants, and other agencies to develop a mechanism to defer the global adjustment (GA) payment as part of the recently announced Ontario Fair Hydro Plan. This note outlines current proposals for this mechanism.

Context

- Smoothing of GA costs over time would involve ratepayers paying only a portion of the GA cost in earlier years, while this shortfall would be made up by future rate payers paying more than the true cost of the GA in later years.
    - There will be a cap on the annual additional cost over the GA to lessen the burden on ratepayers
- The shortfall in GA payments in earlier years would represent deferred costs to ratepayers. However, the ~~Province~~ mechanism would still need to compensate power generators on an ongoing basis for the full cost of the GA and would therefore need to borrow and take on debt to make cash payments to power generators.
- Principal payments on debt would be mandatory, but there has been no clarification on whether or not interest payments will be capitalized (i.e., interest accumulates resulting in interest on interest costs) or if interest will be recovered from ratepayers on an ~~frequent~~ on-going basis.
    - If interest costs are capitalized, ~~Having "interest on interest" (i.e., compounding effect) with deferrals on interest payments increases~~ peak debt would increase by approximately $5B and ~~leads additional~~ accumulated interest costs would increase by an estimated $xxx~~, based on preliminary estimates~~.
    - Alternatively, if ~~However, if~~ interest payments are made by ratepayers on an ~~frequent~~ on-going basis~~,~~ debt costs would be lower, however this ~~it lessens the relief provided by the GA deferral mechanism and~~ would also have the effect of reducing ratepayer savings from the GA deferral mechanism. The commitment is for a 25% reduction on average for all residential customers, which would mean that the amount of borrowing simply needs to be larger to offset this effect.
- ~~Furthermore, i~~It has also been proposed that all administrative and other costs from the GA deferral would need to be collected from ratepayers or recognized at the very least, adding to the costs passed on to ratepayers.

Structure (*refer to Exhibit A*)

- The deferred portion of the GA needs to be recognized as an asset – likely a regulatory asset – by the IESO, ~~likely as a regulatory asset that~~ which gives the IESO the right to collect the deferred amount from ratepayers at a future date.
- This asset, in turn, would be sold to another party that would receive the revenues associated with this asset.
    - It is proposed that ~~The proposal states that~~ the IESO ~~would~~ be required to recover ~~collect~~ the costs associated with this asset even after selling it.
    - To do this t~~T~~he IESO would need~~s~~ to sell the asset in order to secure cash to settle its arrangements with generators, thus ensuring ~~that~~ generators are not affected by the deferral.
        - Alternatively, IESO could simply borrow funds (using the regulatory asset as collateral), but poses risks ~~this has implications~~ for both consolidation on public accounts and ~~including the impact on~~ credit ratings.
        - With respect to the credit rating risk, ~~On the other hand,~~ DBRS stated in a March 3, 2017 report that "*Provided the debt continues to be fully supported through the electricity rate base, DBRS will treat it as self-supported and exclude it from the calculation of tax-supported debt*".

Commented [JK1]: A cap of $ amount?

Commented [BA2]: Can we put in a figure?

Commented [BA3]: ? borrowing would be less if ratepayers pay interest on an ongoing basis.. No?

Commented [BA4]: Recognized as expense with fiscal impact (or does this also get passed on to ratepayers?

- OPG is proposing to set up a special purpose vehicle, "OPG Trust~~" that~~", which would purchase the regulatory asset from IESO.
    - The purchase would be funded by the capital markets (51% of the deferred GA Cost), and OPG (49% of the deferred GA).
    - OPG would finance that 49% through a loan from the capital markets (5%) and an equity injection from the P~~p~~rovince (44%).
    - The debt would be set-up in tranches to ensure that the 51% of debt directly from the market would be senior, potentially mitigating the risk premium associated with high amounts of borrowing with an intangible, unique asset as collateral.
- There are several other considerations and requirements that would need to be attained in order for the mechanism to work, as detailed in the OPG White Paper released on February 27, 2017.

Equity Injection (*refer to Exhibit A & B*)

- The ~~rationale behind an~~ equity injection ~~is that it~~ could lead to increasing, and then stabilizing, dividend payouts in ~~commensurate~~ consistent with ~~the~~ O~~ntario~~ PG'~~s~~ower Generation~~'~~s risk profile and comparable business entities.
    - Principal ~~payments~~ and interest payements flowing from the ratepayers through the IESO and the Trust could be ~~relayed~~ paid back to the Province.
    - This would increase steadily as ratepayers begin to pay back principal in about~~n estimated ten~~ 10 years[2] time, eventually reaching a cap of ~~an estimated~~ $2.242B in principal and interest per year based on Energy's March estimates (based on the capitalized ~~with the interest on~~ interest scenario).
    - The administrative costs and return for OPG/OPG Trust would also need to be collected by ratepayers, but the dividend payments would be net of these amounts and should still allow the Province to earn a substantial return.
    - Dividend payments could also allow OPG to eventually optimize its capital structure to the targeted or deemed 55%-45% debt to equity split.
- Recapitalization from the Province is preferable as there are no associated interest expenses or large principal payments that could affect OPG's credit rating.
- If debt financing was utilized, the change in the cost of borrowing could also impact OPG's rate applications for the return recovered from ratepayers through payment amounts, potentially offsetting ratepayer benefit of the GA deferral mechanism.
- The financing structure split between equity (44%) and debt (~~56% -~~ 5% borrowed by OPG and 51% borrowed by OPG Trust) is roughly equivalent to the deemed capital structure of 55% debt and 45% equity for regulated distributors in Ontario.

Collection of Interest Payments (*refer to Exhibit C*)

- There are different potential accounting treatments ~~that can be undertaken~~, depending on legislative and regulatory approval, that would~~ill~~ impact the amount of borrowing and interest over the long term as well as the total fiscal impact.
    - **Option 1: Collect interest and administrative costs from ratepayers ~~immediately~~on an on-going basis:** Interest and the costs to finance/administer the GA deferral mechanism would be recovered from ratepayers ~~immediately~~along the way. This would allow cash and income to be recognized by OPG Trust equivalent to the total borrowing cost from the market (i.e., the interest on the 44% of the GA the Province borrowed from the market, the 5% of the GA OPG borrowed, and the 51% of the GA OPG Trust borrowed). Furthermore, some type of additional return for the risk premium could be ~~collected as well~~made. Overall, there would be no fiscal cost, and less debt

Commented [JK5]: Released? Is this in reference to the 14 conditions?

Commented [SK86]: Please confirm if this is Feb 17.

Commented [BA7]: I am unsure of what the key message of this section is? My lack of understanding.

Is this mainly about how the Province gets repaid for its equity injection?
Is the optimizing capital structure a key message and is this capital structure something the market is looking for, or the Auditor General?

Commented [JK8]: Might want to clarify as what you're saying here is to lower equity in the immediate sense to get to 55-45 right away before starting to inject equity.

Commented [JK9]: Not sure what this means. Does this mean that it is preferable to OPG doing its own borrowing?

would~~ill~~ build up over time due to the elimination of the compound effects on interest. However, the relief provided to ratepayers from the principal payments on deferred costs would be lowered ~~mitigated~~ by the amount of these~~is~~ interest payments, although this would be fairly moderate~~it is quite low~~ for the initial 4 -5 years.

- **Option 2: Collect interest costs associated with the senior debt**: There are variations on this concept which ~~is~~ essentially proposes~~ing~~ to only collect some of the interest costs from ratepayers, with the senior debt that OPG Trust borrows directly from the market of primary concern. This is "meeting halfway" between deferring all interest payments and collecting all interest payments from ratepayers immediately.
- Option 3: **Do not collect from ratepayers**. There is a fiscal impact equal to 100% of the interest on the total borrowings. There is also a compounding effect on interest as ~~even though cash interest has not been paid,~~ an expense still needs to be recognized~~.~~, even though cash interest has not been paid.
- Option 4: **No collection from ratepayers but deferral of expense recognition (Same as Energy's analysis in its Cabinet Submission)**. For this option, there is no collection of interest payments from ratepayers, but OPG Trust is somehow allowed to defer the recognition of interest expense on its books and recognize as a regulatory asset, thus eliminating the fiscal impact.
  - If OPG Trust were allowed to recognize a regulatory asset, then it could defer the interest expense, instead recognizing it as an asset (similar to the idea of a prepaid expense).
  - Thus, OPG would recognize interest income from OPG Trust, but OPG Trust would not recognize an expense related to the amount owed to OPG and instead would increase the regulatory asset by the same amount.
  - The interest income earned by OPG for the 49% of the GA deferral it borrowed would offset the borrowing the Province made from the capital markets.
  - OPG Trust would also defer the recognition of the interest associated with the 51% of the GA deferral it borrowed from the market. The deferred amount would be recognized in a regulatory asset.
  - When OPG starts collecting principal and interest from ratepayers, it will recognize income, but will also amortize the regulatory asset at the same time, thus matching revenue and expenses with each other in the time period and potentially eliminating the fiscal impact.
  - Many factors, including the initial accounting treatment and the effect of consolidation, are significant barriers to the application of this approach.
  - **Alternatively, OPG Trust might be able to recognize income (with a receivable created to balance the transaction) to offset the interest expense without collecting from ratepayers**, i.e., it will be a cash transaction in the future (cash received offset by a decrease in the receivable; no effect on income statement).

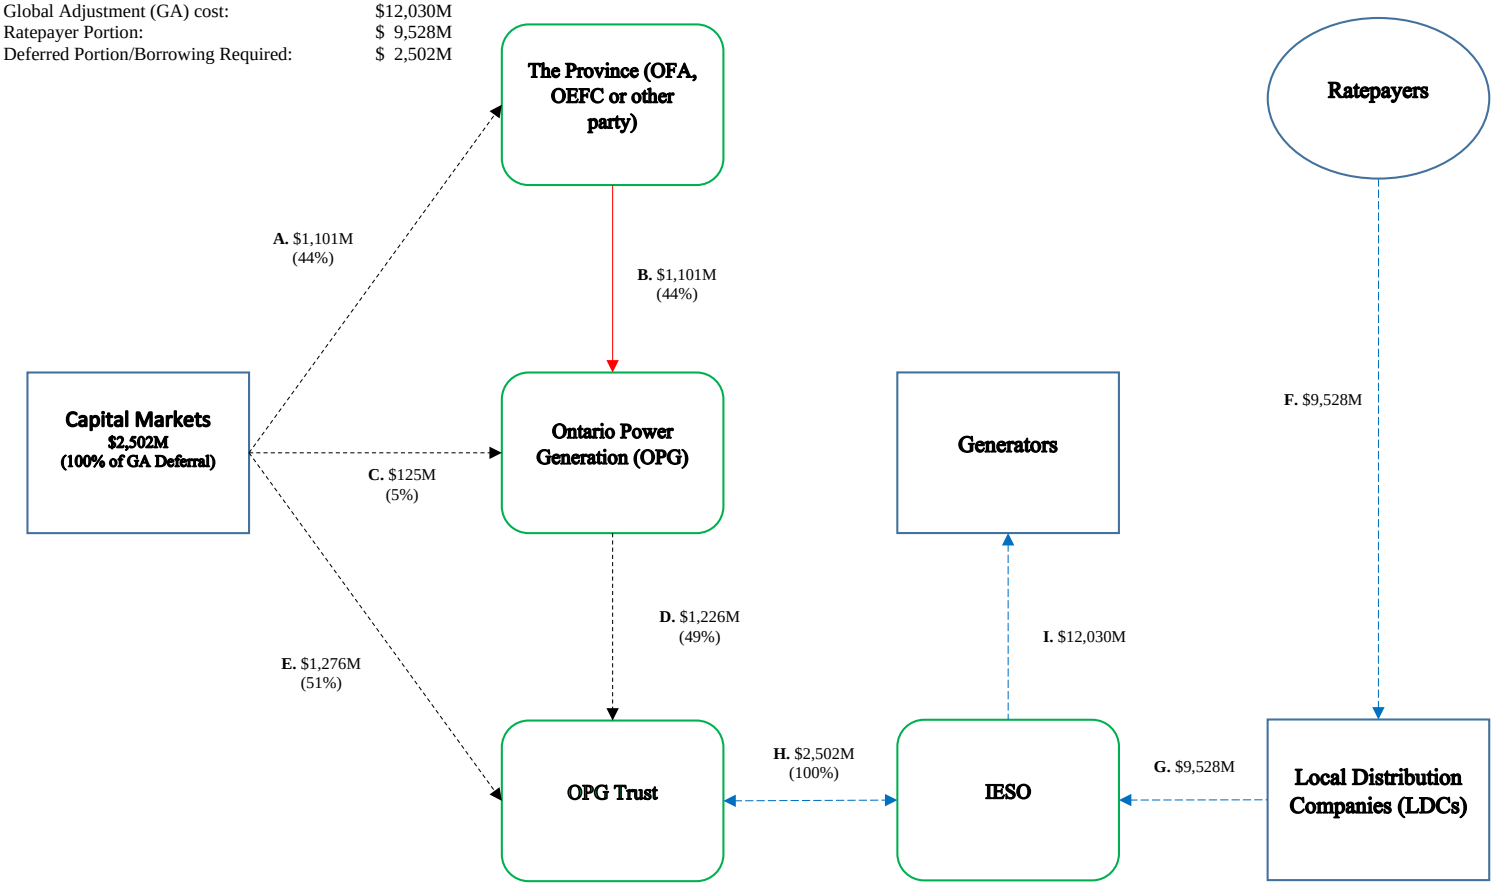
Commented [JK10]: I'd suggest delete as in the end the 25% commitment would lead to more GA deferral over time.

Commented [BA11]: Not sure I fully understand but does the last part of the 2nd sentence need to be moved up per the following:.

There is a fiscal impact equal to 100% of the interest on the total borrowings as an expense still needs to be recognized, even though cash interest has not been paid. There is also a compounding effect on interest.

Exhibit A; 2017-2018 Estimates for Balance Sheet Transactions

Global Adjustment (GA) cost:	$12,030M
Ratepayer Portion:	$ 9,528M
Deferred Portion/Borrowing Required:	$ 2,502M

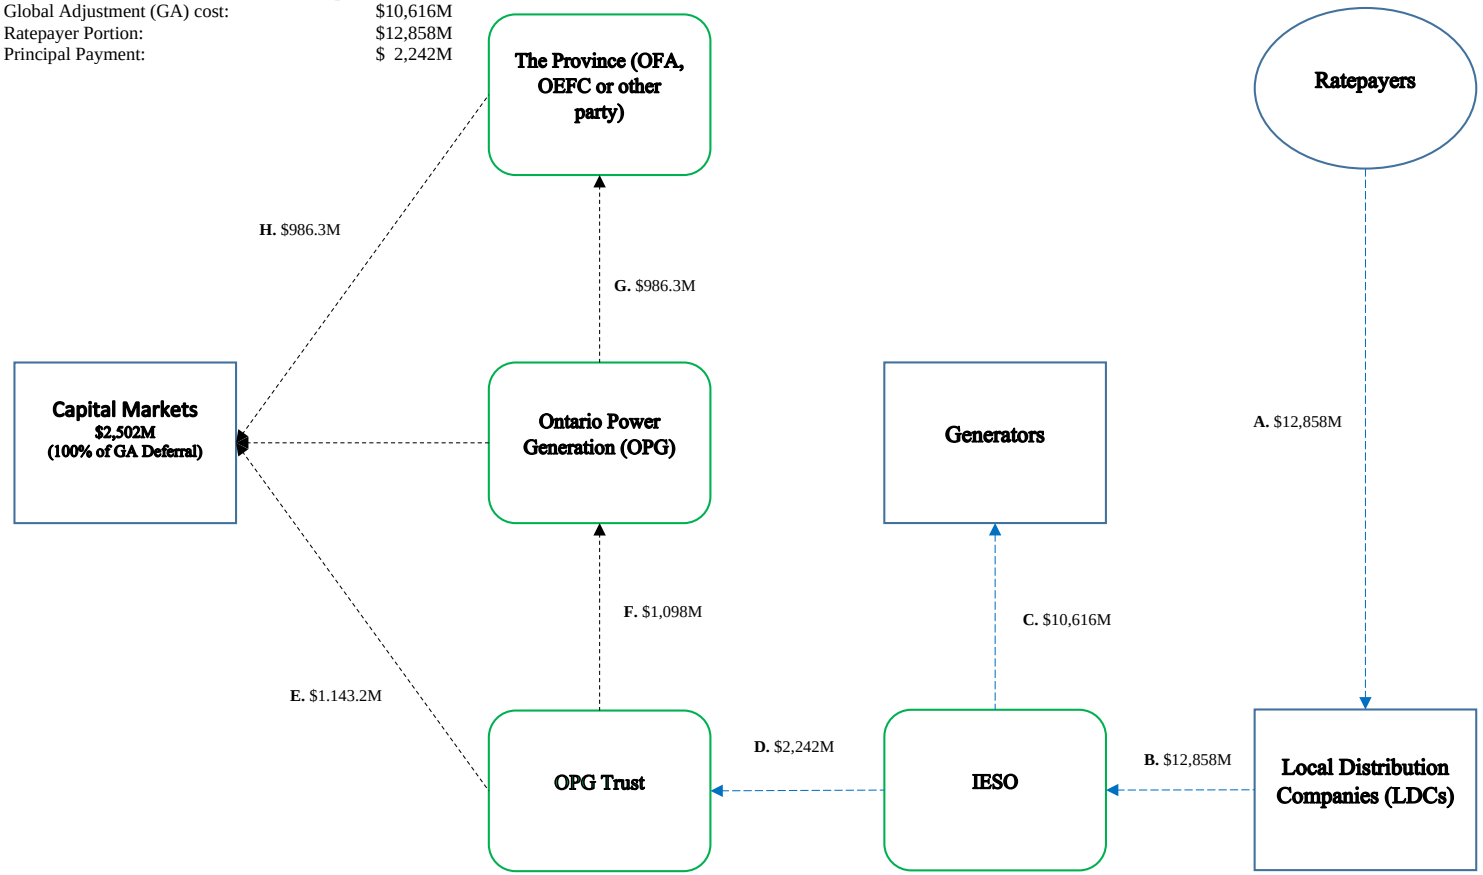


Setting up the Trust
A. The Province borrows 44% of the deferred GA from the market.
B. The Province then funnels this amount to OPG through an equity injection.
C. OPG borrows 5% of the deferred GA from the market.
D. OPG lends an amount equal to the 5% and 44% from the market and the Province, respectively, to a separate legal entity called OPG Trust.
E. OPG Trust borrows 51% of the deferred GA from the market, ending up with 100% of the total $2.502M deferred GA in cash.

Deferral Mechanism
F. Ratepayers pay their portion of the GA to LDCs.
G. The LDCs remit this amount to IESO.
H. IESO, with the proper legislation and accounting treatment, is allowed to recognize a regulatory asset – the right to collect the deferred amount of $2,502M from ratepayers. It then sells this asset for cash to OPG Trust.
I. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA to Generators.

Exhibit B: 2028-2029 Estimates for Principal Payments

Global Adjustment (GA) cost:	$10,616M
Ratepayer Portion:	$12,858M
Principal Payment:	$ 2,242M



Collection of the GA

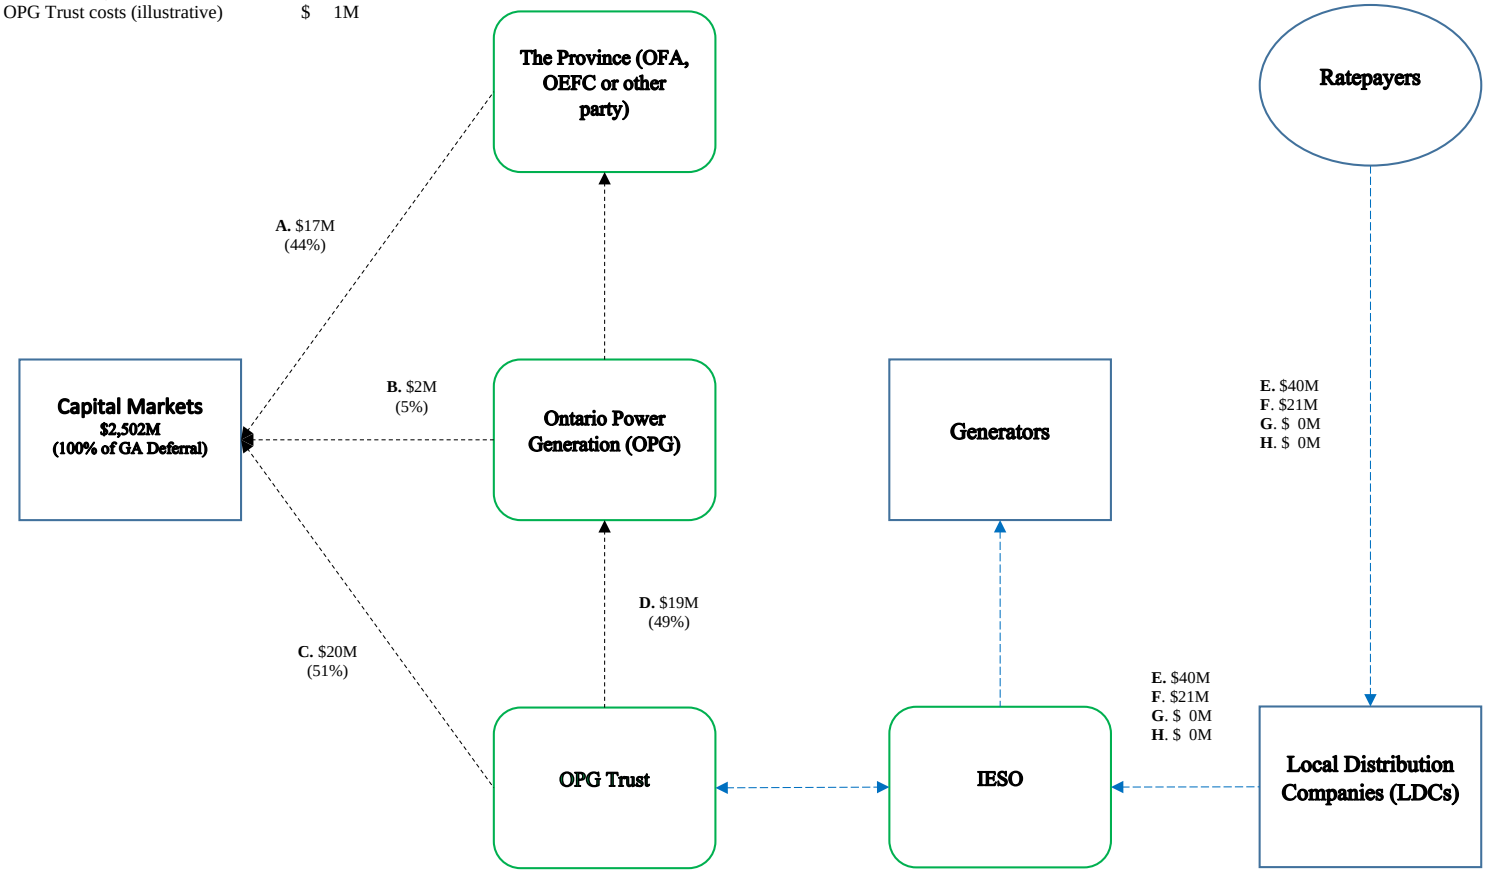
A. Ratepayers pay to LDCs the full cost of the GA plus an additional $2.242M that will be used to reduce the principal of the borrowing (or principal and interest if there is "interest on interest").
B. LDCs remit this amount to IESO.
C. IESO pays the full cost of the actual GA to generators.
D. IESO pays to OPG Trust the additional payment from the ratepayers over the actual GA cost. OPG Trust reduces the asset (for the right to collect GA deferral costs from ratepayers) by an equivalent amount.

Settlement of Principal.

E. OPG Trust pays off principal to the market. In this example, pays off 51%, but could pay more or less depending on various factors (e.g., subordinate debt, managing weighted average interest cost, etc.).
F. OPG Trust pays down principal related to the 49% of the GA Deferral it borrowed from OPG.
G. OPG could give a dividend to the Province equal in order to pay off the outstanding principal it borrowed from the market (44% of the total GA deferral cost)
H. The Province pays back principal to the market.

Exhibit C: 2017-2018 Estimates for Interest Recognition

Interest Recognized	$ 39M
OPG Trust costs (illustrative)	$ 1M



Recognition of Interest

A. The Province recognizes interest on the 44% of the deferred GA it borrowed from the market.

B. OPG recognizes interest on the 5% of the deferred GA it borrowed from the market.

C. OPG recognizes interest on the 51% of the deferred GA it borrowed from the market.

D. OPG Trust recognizes interest on the 49% of the GA it borrowed from OPG; OPG recognizes income for this transaction.

Options for Ratepayer collection

E. Option 1 – collect the entire interest amount from ratepayers plus the Trust administrative costs, thus offsetting the interest expense from total borrowing with the recognition of income. The end result is no fiscal impact.

F. Option 2 – only collect interest income for the 51% of deferred GA from the market and admin costs; OPG Trust would recognize income to offset the interest expense to the market but fiscal impact of 49% of the interest ($19M)

G. Option 3 – Do not collect from ratepayers – fiscal cost of 100% interest.

H. Option 4 – No collection from ratepayers, but OPG Trust is allowed to defer the recognition of interest expense on 100% of debt, leading to no fiscal impact.

Notes

- Assumptions based on Energy models and data, IESO forecasts, and CEFD validation models.
- Sources include Ministry of Energy decks, OPG reports and discussions, external accounting reports, and internal reports/discussions.

Hi Salman,

I have a fairly urgent request (hoping for end of day)….in the attached (SpringBreak17 and p. 15 of 80), we have slide 14 that shows the GA diagram. I want to insert the potential IESO funding requirement that we have summarized in our deck of yesterday. I'm open to an updated look but want to have it sent to Energy soon.

Looking for maybe 2 slides to potentially suggest Energy put in their TB submission.

Ontario

Electricity Price Mitigation

Ministry of Energy

March 1, 2017

Minister

Deputy Minister

Context

- Electricity costs are increasing as the necessary investments are made to decarbonize and modernize the province's electricity infrastructure (i.e., $35 billion+ investment in cleaner generation and $15.5 billion investment in transmission and local distribution systems).

- Ontario has taken a number of actions to lower electricity costs for all consumers by:
  - Deferring investments in generation (e.g., new build nuclear), improving market efficiency (e.g., wind dispatch) and decreasing the cost of renewable procurements (e.g., Green Energy Investment Agreement (GEIA) renegotiation, decreasing Feed-In Tariff (FIT) prices, competitive Large Renewable Procurement (LRP)).
  - Increasing cost effectiveness and improving efficiency by adopting new electricity market approaches (e.g., no new NUG contracting and demand response).

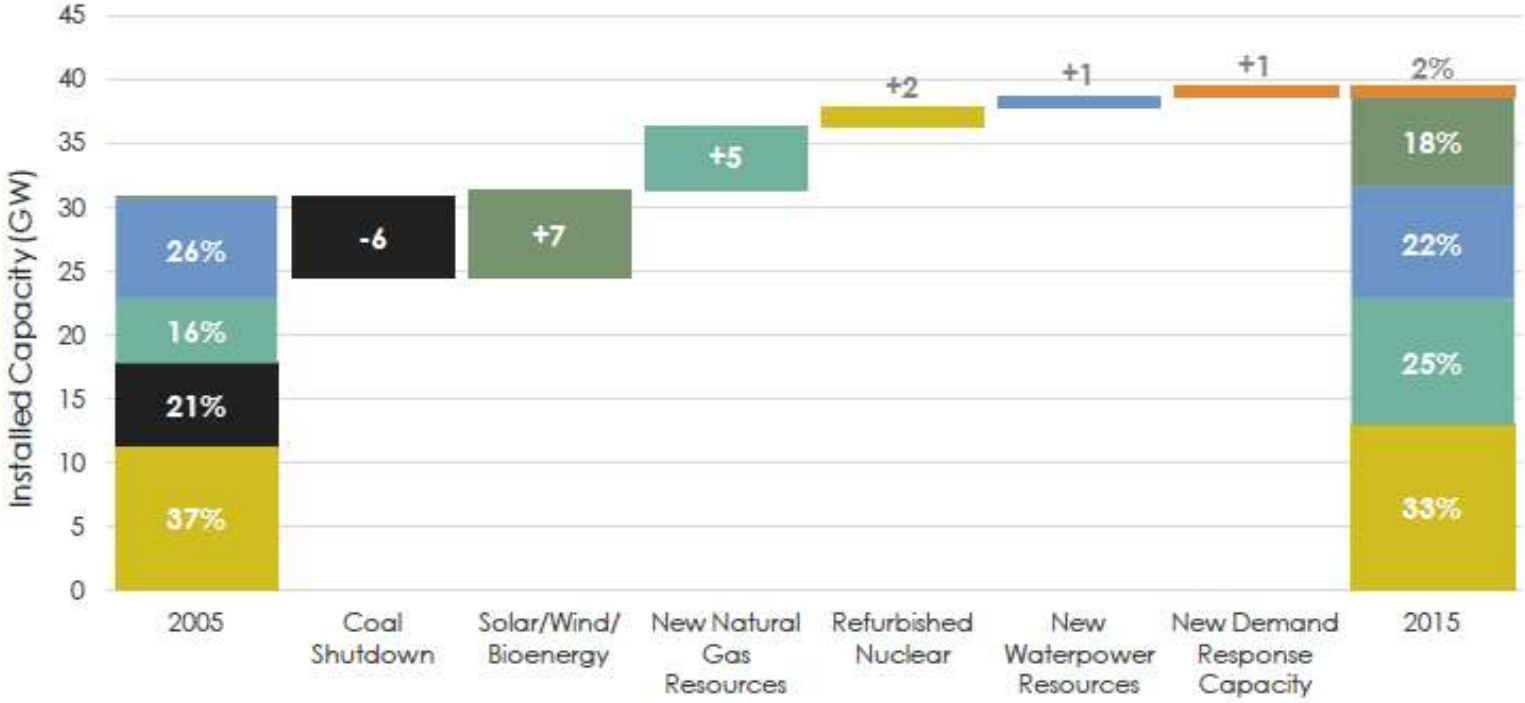
- On November 28, 2016, the Minister of Energy announced the need for changes in how electricity resources are procured, the need for wholesale market renewal and greater electricity consumer choice.

- The Ministry of Energy is currently updating its Long-Term Energy Plan (LTEP), which provides an opportunity to consider a range of policy changes to how the Ontario energy sector operates.

- On a number of occasions the Premier has indicated publicly that further relief on electricity prices will be provided to consumers in the near term.

Context – Infrastructure Investments

- In the eleven year period between 2005 and 2015, government added new electrical capacity to Ontario's grid to restore reliability, replace coal and meet environmental objectives.



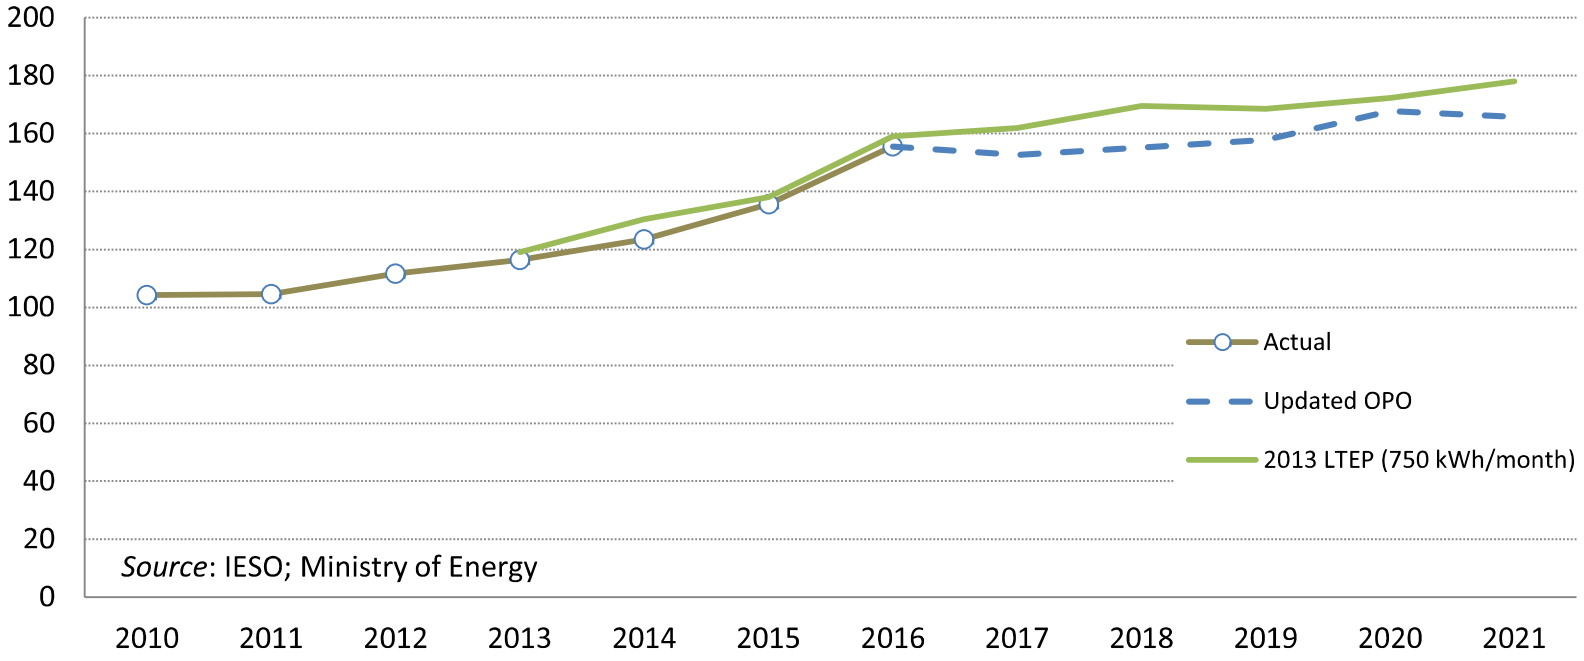
Source: IESO Ontario Planning Outlook

Context – Electricity Prices

- Electricity price increases have generally outpaced inflation. There have been several government policies that have impacted electricity prices over the past several years, including: HST, the Industrial Conservation Initiative, the Ontario Clean Energy Benefit (OCEB) and the Debt Retirement Charge (DRC).

Illustrative Typical Residential Electricity Bills

Historical and Forecast in $/month



CONFIDENTIAL CABINET DOCUMENT

Context – Recent and Existing Government Funded Electricity Cost Mitigations

($Millions)	14-15	15-16	16-17[1]	17-18[1]	18-19[1]	19-20[1]	20-21[1]	Who Benefits
Ontario Clean Energy Benefit (OCEB) [2]	1,078	860	***OCEB ended on December 31, 2015***					• Residential customers, farms, small business (i.e., 10% off, on up to 3,000 kWh/month)
Ontario Rebate for Electricity Consumers (OREC or 8% rebate)*	-	-	300	1,100	1,200	1,200	1,200	• Residential customers, farms, small business (i.e., amount equal to the 8% Provincial portion of HST)
Ending Debt Retirement Charge (DRC) for Residential[3]	-	85	330	330	--	--	--	• Residential customers (i.e., saves about $70 per year for a typical residential consumer)
Northern Ontario Energy Credit (NOEC) [4]	24	26	25	25	25	25	25	• For eligible northern Ontario residents (i.e., for 2017, single people can receive up to $148,and families up to $227, depending on adjusted family income)
Ontario Energy and Property Tax Credit (OEPTC) (Energy component only)[4]	429	444	450	460	470	481	481	• For eligible low-to moderate-income individuals and families, & qualifying seniors (i.e., for 2017, up to $227, depending on adjusted family income)
Northern Industrial Electricity Rate Program (NIERP)	108	120	120	120	120	120	120	• Qualifying northern Ontario large industrial electricity consumers (i.e., rebate of 2cents/kilowatt-hour)
TOTAL	**1,639**	**1,535**	**1,225**	**2,035**	**1,815**	**1,826**	**1,826**	

Notes:

1. 2016-17 to 2020-21 based on forecasted numbers
2. OCEB ended December 31, 2015
3. 2015-16 estimated for 3 months of reduced DRC revenue. Estimated impact up to March 31, 2018.
4. Part of the Ontario Trillium Benefit. While related to energy generally, key policy driver for OEPTC when introduced in 2010 was electricity, as prices were forecast to rise, while fossil fuel prices, particularly natural gas, were low and falling.

* Sourced from Energy PRRT submission

Source: Ministry of Finance

CONFIDENTIAL CABINET DOCUMENT

Context – Recent Actions Taken To Mitigate Electricity Rates

- Following the 2016 Throne Speech, the several actions were announced to further reduce electricity costs.

1. As of January 1, 2017, Ontario is rebating an amount equal to the provincial portion of the HST to reduce eligible residential, small business and farm electricity bills by 8%.

2. Expanded support available to eligible rural ratepayers by updating Rural or Remote Rate Protection (RRRP) with additional relief, decreasing total electricity bills by an average of $45 each month when combined with the 8% rebate.

3. Expanding the Industrial Conservation Initiative (ICI) – up to one-third savings for participants.

4. Suspending the LRP II and the Energy from Waste Standard Offer Program (EFWSOP) – up to $3.8 billion in cost savings.

5. Limiting the Feed-In Tariff (FIT) 5 procurement target to 150 MW and suspending future FIT procurements – an average annual savings of $15 million.

Rate Mitigation Proposal

- The following approaches are proposed:

1) Smoothing the global adjustment (GA) to provide significant and immediate rate relief through cost deferral of the GA:
   - Smoothing Mechanism (i.e., 25% reduction); and
   - Implementation Model.

2) Enhancing competitiveness for Class B electricity consumers (i.e. manufacturing) by lowering the eligibility threshold for Industrial Conservation Initiative (ICI).

3) Helping vulnerable electricity consumers by enhancing electricity support and conservation programs and shifting cost onto the tax-base:
   - Rural or Remote Electricity Rate Protection (RRRP) Enhancement (Delivery Charge Relief);
   - Ontario Electricity Support Program (OESP) Expansion;
   - New Affordability Fund; and
   - On-Reserve First Nations Delivery Credit.

4) Ongoing activities to bend the future cost curve of electricity:
   - Ontario Energy Board (OEB) – Identify opportunities for future LDC efficiencies and rates;
   - Independent Electricity System Operator (IESO) – Modernize Ontario's electricity market through electricity Market Renewal initiatives.

GLOBAL ADJUSTMENT (GA) SMOOTHING

Overview – GA Smoothing

- The Global Adjustment (GA) has risen over the past decade as the province's electricity system has decarbonized.
  - The vast majority of GA costs now stem from greenhouse gas (GHG) emissions-free renewable and nuclear generation facilities, as well as natural gas plants that were constructed to restore system reliability and replace coal-fired capacity.
  - Generators in Ontario received contracted or regulated rates, which are typically designed to recover capital, financing, and fixed operations costs. The GA recovers these fixed costs of running the province's generation fleet, as well as the cost of conservation programs.
- The majority of the province's electricity generators are under 20-year contracts and account for less than half of the GA. Some of these generators will continue to provide value to the electricity system beyond their contract lives (i.e., beyond 20-years).
  - There is an opportunity to recognize the long-term benefit of these assets to the electricity system and "bring forward" that benefit for ratepayers today by deferring some of the current costs.
  - GA Smoothing would spread these costs over a longer period and provide immediate ratepayer relief (i.e., similar to re-financing a mortgage). By recognizing that generation assets are expected to continue to provide residual benefit to future ratepayers, beyond the term of current contracts, future ratepayers are expected to be able to utilize these assets and reduce the need to finance the development of new generation assets.
- The GA Smoothing option under consideration is illustrative and show potential rate mitigation measures to meet a targeted 25% reduction from the projected residential bill in 2017.
  - These residential impacts are based on a forecast for a household connected to Toronto Hydro that consumes 750 kWh per month.
  - Actual ratepayer savings would vary due to differences in consumption patterns.
  - Targeted to Regulated Price Plan (RPP) -eligible;
  - Rate increases would be capped at Consumer Price Index (CPI) for the first four years. Subsequent years would be set above CPI in order to ensure that bill increases due to repayments are capped at around 10% of the total bill.

GA Smoothing – Cost Breakout

- The Global Adjustment (GA) accounts for the fixed costs, including capital costs, of running Ontario's generation fleet, as well as the cost of conservation programs. The GA is instrumental in maintaining a reliable electricity system by ensuring that sufficient generating capacity is available.
  - Generators in Ontario received contracted or regulated rates, which are typically designed to recover capital, financing and fixed operations costs. Most generators are on 20-year contracts with the exception of hydroelectric and nuclear plants. They operate on longer contracts (or are regulated on a cost-of-service basis by the OEB) in recognition of the much longer operating lives of these facilities.
- Chart below shows the breakout of the GA by generator and program types. In 2016, the GA costs were $12.3 billion. These costs will evolve over time as 2,181 MW of previously contracted generation comes online in the coming years.

2016 GA Cost: $12.3 billion

	GA ($M)
Nuclear	5,053
Hydro	1,473
Natural Gas	985
Wind	1,552
Solar	1,630
Biomass, Landfill and Byproduct	278
Conservation	467
IEI Program	60
OEFC*	842

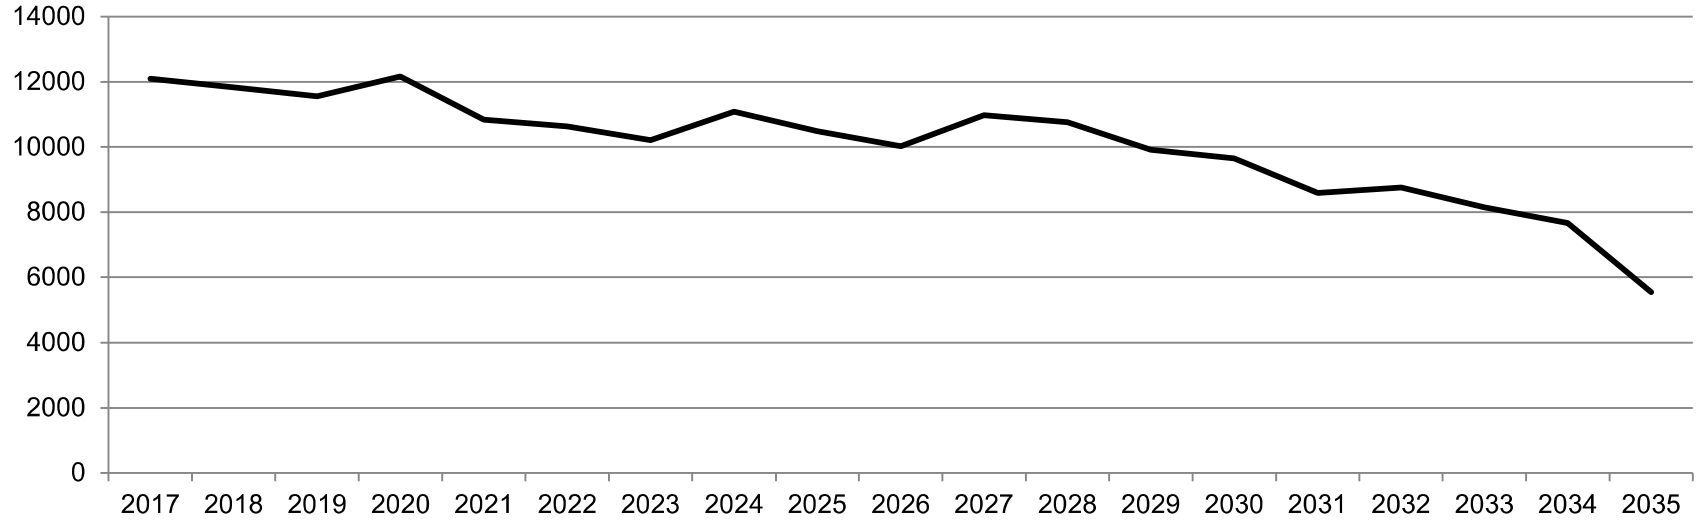
CONFIDENTIAL CABINET DOCUMENT

***Note:** OEFC indicates the cost of generator contracts managed by the OEFC which include contracts for natural gas, hydro and biomass generators**.**
**** Note:** Conservation measures, not quantified here, serve to reduce Ontario energy demand. Actual electricity generation would be larger than 155 TWh in the absence of conservation programs.

GA Smoothing – Global Adjustment Forecast

- The amount of Global Adjustment (GA) is forecast to decrease through the forecast period. Several factors contribute to the decline of GA, including:
  - Expiry of electricity generation contracts;
  - Cost of existing contracts reduced due to Inflation; and
  - Higher wholesale electricity prices due to higher natural gas/carbon prices, higher demand and reduced nuclear generating capacity.

Forecast Global Adjustment Cost (nominal $ million)



CONFIDENTIAL CABINET DOCUMENT

GA Smoothing – Expected Life of Electricity Generating Assets

- Gas, wind and solar generators are typically contracted for a 20-year period (e.g., with the Ontario Electricity System Operator (IESO), etc).
  - Nuclear and hydroelectric generators are contracted for a much longer period or regulated by the Ontario Energy Board (OEB) on a cost-of-service basis.
- While it is likely that gas, wind and solar generators will be able to operate beyond their current contracts, IESO advises that generators will need to decide what level of capital investment is appropriate for ongoing operations (i.e., by replacing and/or refurbishing major facility components).
  - In IESO's 2016 Ontario Planning Outlook (OPO), it was assumed that the service lives of generators could be extended beyond their contract term based on additional investments and ongoing costs. **Note:** This was not an assessment of the cost/benefits or a prediction of what the generators would actually do at the end of their contracts.
- The table below outlines IESO's current estimates for service lives of gas, wind and solar facilities. The ongoing service lives of these facilities depend on: initial facility design & build, operating activities (e.g., hours of operation, etc.) and level of facility maintenance (i.e., ongoing component repair and replacement).

Technology	Contract Life (yrs)	Expected Life (yrs)	Expected Cost Post-Contract Life
Gas	20	Up to 30	Life varies with initial design, how it is operated and maintained.
Wind	20	Up to 30	Older technologies may deteriorate faster. Elements such as foundations and electrical integration can last longer.
Solar	20	Up to 30	Performance deteriorates to about 80% by end of contract. Some facilities built in the initial contract periods may deteriorate more; however, technology is improving rapidly. Components need to replaced 5 to 30 years depending on design.

Notes: Assumes 30 year financing period and a nominal interest rate of 5% (compounded monthly). Ratepayer GA payments increase annually beyond 2021 such that the average monthly residential electricity bill increases by 6.5% per year with a limit of $2.2 billion above the true cost of GA in any given year to cap repayment charges at around 10% of total bill. IESO forecast is based on IESO's revised OPO forecast as of February 2017. Includes the cancellation of LRP II and EFW, expansion of ICI. Does not include smoothed OPG rates. Above residential bill is based on a 750 kWh per month Toronto Hydro customer.

CONFIDENTIAL CABINET DOCUMENT

A. GA Smoothing for RPP-Eligible Only – Residential Bills Lowered 25% (with Tax-base Funded 8% Rebate and Social Programs, 2% increase)

- Total bill below is based on a revised IESO forecast. See footnotes for more information.

Residential (750 kWh/month)	Actual 2016	2017	2018	2019	2020	2021
Total Bill (includes HST)	**158**	**164**	**167**	**170**	**181**	**178**
Total Bill (excludes HST)	140	145	148	150	160	158

HST		15	16	16	16	17
Revised Bill (includes HST)	**158**	**123**	**126**	**128**	**131**	**133**
Year-over-Year Change		-22%	2%	2%	2%	2%
Change from Forecast		**-25%**	**-25%**	**-25%**	**-28%**	**-25%**

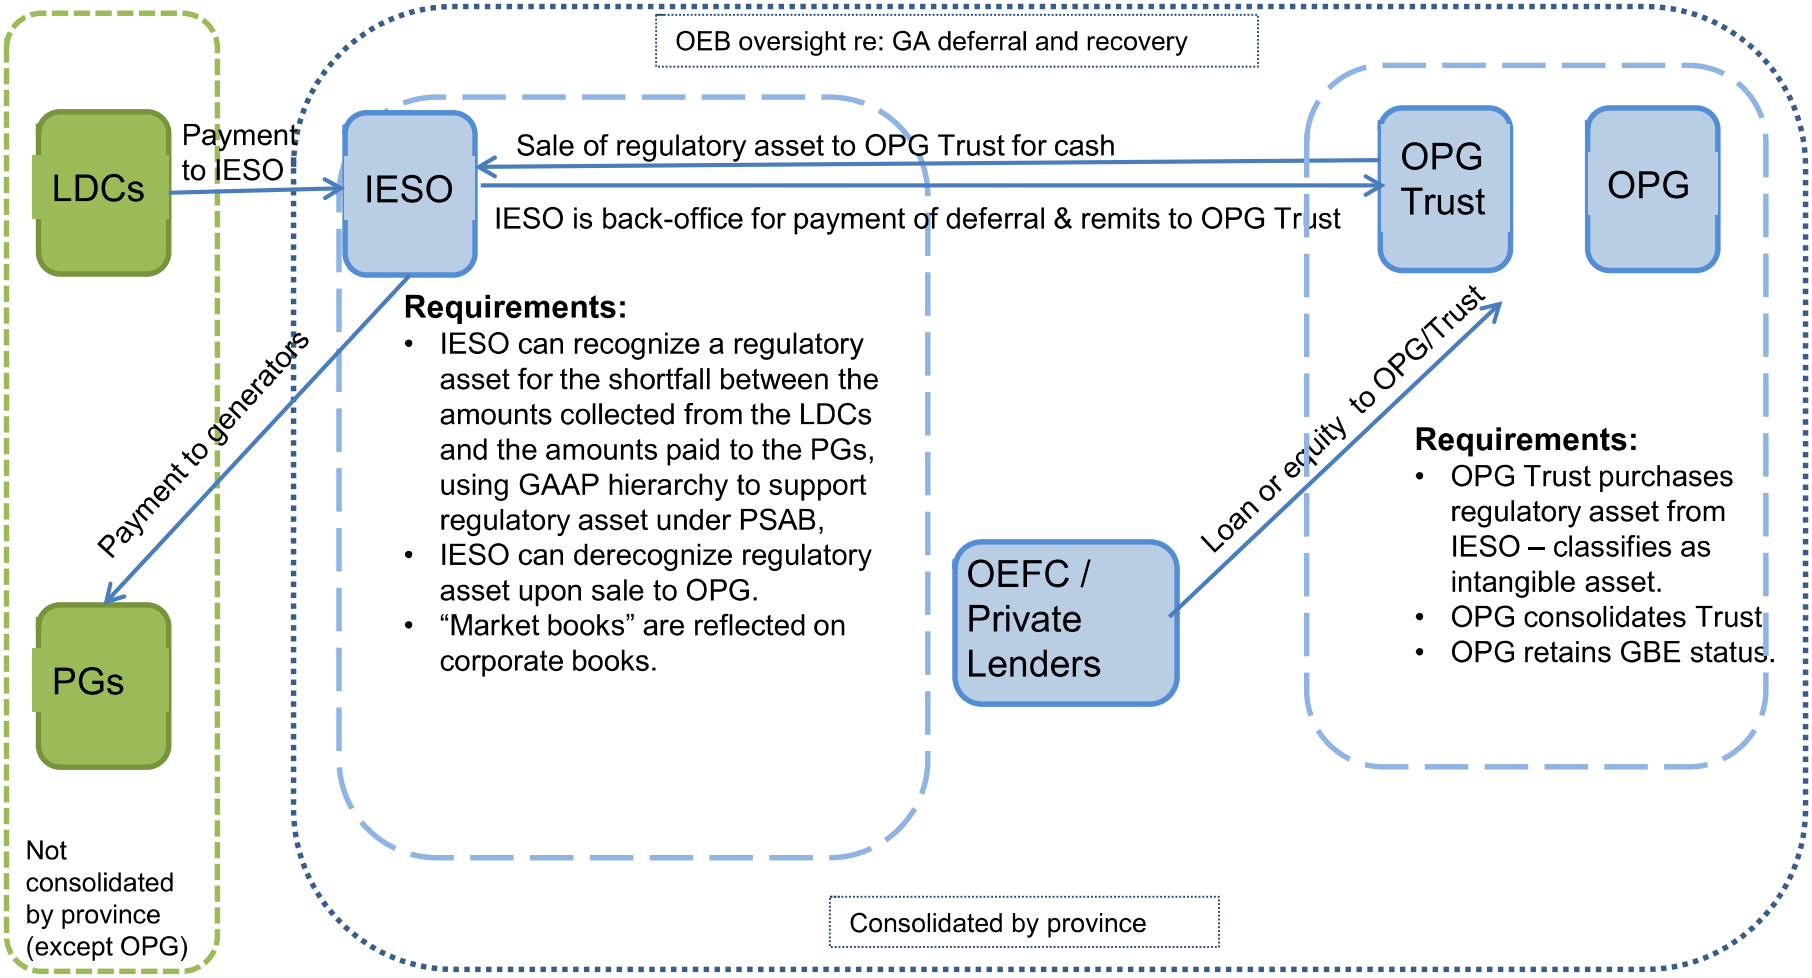
Commercial & Small Industrial ($/MWh)	Actual 2016	2017	2018	2019	2020	2021
Class B Total (excludes HST)	**160**	**165**	**160**	**162**	**173**	**169**
Class B Revised Total (excludes HST)	**160**	**162**	**157**	**159**	**170**	**166**
Year-over-Year Change		1%	-3%	1%	7%	-2%
Change from Forecast		-2%	-2%	-2%	-2%	-2%

Large Industrial ($/MWh)	Actual 2016	2017	2018	2019	2020	2021
Class A Total (excludes HST)	**90**	**91**	**93**	**88**	**95**	**96**
Class A Revised Total (excludes HST)	**90**	**88**	**90**	**84**	**92**	**93**
Year-over-Year Change		-2%	2%	-6%	9%	1%
Change from Forecast		-4%	-4%	-4%	-4%	-4%

Notes: Based on IESO's revised OPO forecast as of February 2017. Includes the cancellation of LRP II and EFW, expansion of ICI. Does not include smoothed OPG rates. Above residential bill is based on a 750 kWh per month Toronto Hydro customer. Above Class B estimate based on a 1 MW customer connected to Toronto Hydro, assumes delivery charge escalates as per residential forecast. "Social programs" refers to existing RRRP and OESP. While initiatives would take several months to implement, the above estimate for 2017 reflects a full-year impact. The 8% rebate above represents savings compared to status quo due to the reduction in the sub-total from GA financing.

B. GA Smoothing – Potential Structure

- The following diagram provides an overview of a potential GA smoothing structure, as well as interactions between sector entities and elements required to meet accounting objectives.



CONFIDENTIAL CABINET DOCUMENT

Note: Proposed structure is subject to legal and accounting confirmation, absent that confirmation, there would be a fiscal impact to the province.

B. GA Smoothing – Accounting Considerations

- OPCD advises that analysis is not complete; several requirements (below) are high risk re: satisfactory resolution.
- Complexity of the structure and length of deferral/recovery increase risk and decrease transparency
- If all requirements can be met, an accounting analysis is expected to support: (1) increase in provincial borrowing (2) no increase in net debt, and (3) no impact on annual surplus/deficit, but depending on funding to OPG/Trust from Province, an increase in interest on debt and an increase in income from OPG will result.
- IESO requirements – IESO Finance, KPMG (Energy advisor and IESO auditor), OPCD and EY (OPCD advisor) are evaluating accounting risks:
  - IESO can recognize a regulatory asset for the shortfall between the amounts collected from the LDCs and the amounts paid to the PGs using GAAP hierarchy to support regulatory asset under PSAB
  - IESO can derecognize regulatory asset upon sale to OPG; and
  - "Market books" are reflected on corporate books.
- OPG requirements – OPG Finance, EY (OPG auditor), PwC (OPG Advisor), and OPCD are evaluating accounting risks:
  - OPG Trust purchases regulatory asset from IESO – classifies as intangible asset;
  - OPG consolidates Trust; and
  - OPG retains GBE status.
- No discussion with OAG; in previous Annual Reports, the OAG has raised concerns about the appropriateness of recognizing rate regulated assets and liabilities.

B. GA Smoothing – IESO Considerations

- The Electricity Act enables the Independent Electricity System Operator (IESO) to recover from ratepayers the amounts paid to generators, distributors or other contracted entities.
- The accounting advice received by IESO is that reflecting market balances and regulated assets is a more appropriate presentation for its financial statements going forward.
- IESO is characterized as an "Other Government Organization" (OGO) and consolidated on a line-by-line basis into the Provincial books.

Issue	Response
1. Can IESO adopt regulatory accounting?	• Public sector accounting does not address regulated assets. • Guidance can be drawn from other accounting bodies. • US Federal Accounting Standards Advisory Board (FASB), US Governmental Accounting Standards Board (GASB) and International Accounting Standards Board (IASB) do provide guidance. • FASB accounting standard 980 and IASB have specific references that support the adoption of regulatory accounting. **Conclusion:** There is a hierarchy of accounting principles that support this approach.

B. GA Smoothing – IESO Considerations

Issue	Response
2. Can IESO recognize the GA deferral as a regulatory variance account?	Criteria for recognition are: • Rates are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers. • Rates are designed to recover the specific costs of regulated business-type activities. • In view of demand, it is reasonable to assume that rates will be set to recover the regulated business-type and can be collected from customers. **Conclusion:** Legislation creates the right to collection, currently and in the future. With either OEB or IESO board involvement a regulatory asset can be recognized.
3. Can IESO sell the variance account related to the deferral of the annual Global Adjustment account?	• The sale of the variance account to OPG Trust must be structured as an absolute assignment of future economic benefits of the Asset with no obligations, rights or benefits remaining of IESO. • In that case, this would represent a sale of the future right to collect these amounts from the ratepayer. **Conclusion:** Based upon proposed terms of the sale agreement, there would be no future economic benefit for IESO. Risk and rewards are entirely transferred to OPG Trust.

B. GA Smoothing – OPG Accounting Considerations

- OPG's Special Purpose Vehicle (SPV)/Trust is a stand-alone entity able to conduct business separately under a Trust agreement. **Note:** The conditions required for OPG to consolidate the SPV/Trust are outlined in the following table:

Issue	Response
1. Decision Making	• OPG must have decision making authority on the operation of the SPV/Trust (without a veto right by the Province), including naming of trustees, establishing operating plans and budgets, setting or changing financing policies. • The SPV/Trust while operating within the legislation, must be controlled by OPG to operate freely and to alter terms and conditions not specified in the legislation to ensure recovery of the deferred amounts.
2. Business Risk	• The SPV/Trust must have variability of returns as a normal business enterprise would, including such things as interest charged on deferred amounts, decisions on how to finance these deferred amounts, the ability to make / lose and keep any spread from financing.
3. Funding	• The Province cannot directly or indirectly fund more than 50% of SPV/Trust or any investment in the SPV/Trust. • OPG must own at least 50% of the most exposed equity /sub-debt in the SPV/Trust.
4. Directive	• Directive that is issued should not be prescriptive or direct OPG to set up this business. The directive should only be "guiding" i.e. to allow OPG to evaluate options and put forward to the OPG Board a recommended plan for Shareholder approval.

B. GA Smoothing – OPG Accounting Considerations (cont'd)

Issue	Response
5. Other required Attributes	• The legislation that supports the formation of the SPV/Trust must have the following attributes: – Must require interest, carrying and administrative costs be paid to the Trust to allow for Revenue recognition; – The amount to be deferred must either be specified or be calculated based on a specific formula that is not subject to ongoing decision making by the Province. **The Province cannot have the ability to override this formula;** – SPV/Trust and its debt holders will require their capital guaranteed and paid for directly by the Province if the Province revokes the legislation; and – The spirit of the legislation should be reflected in the Trust Indenture Agreement.

B. GA Smoothing – OPG's Financing Structure Requirements

KEY ELEMENTS REQUIRED TO ENSURE THE DEFERRAL OF GA CHARGES CAN BE FINANCED:

Creating the Right to Recover Deferred GA

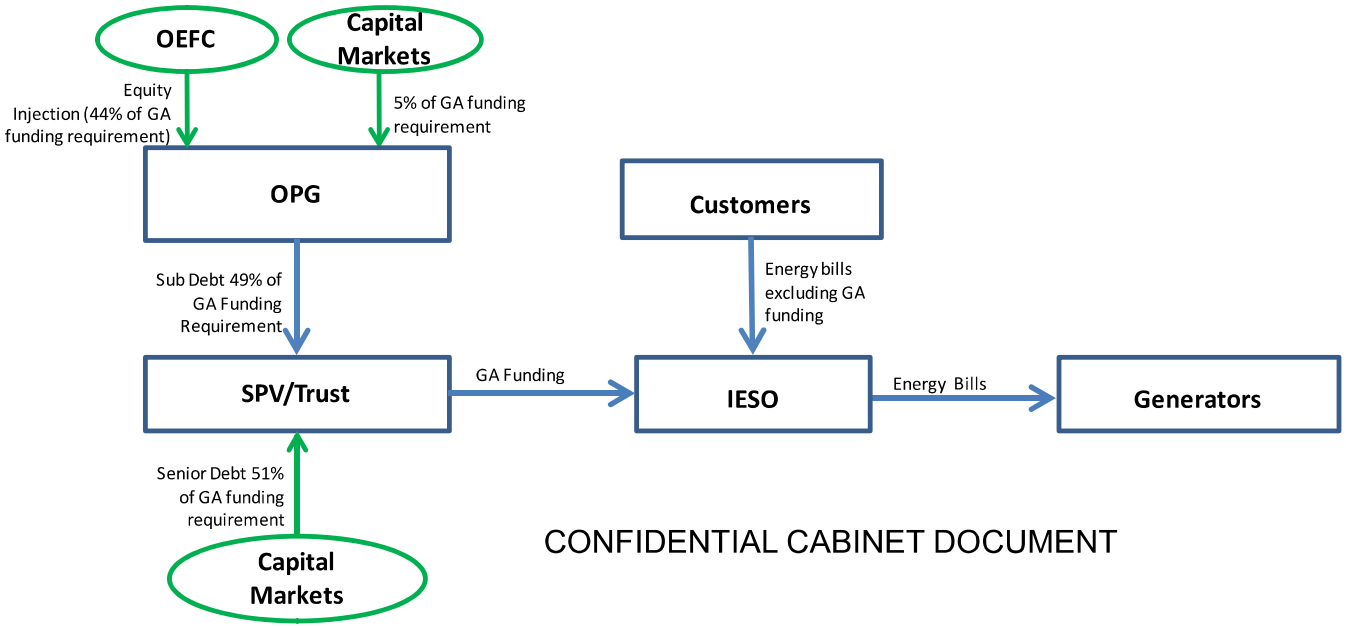
- Legislation enshrines the ability of the IESO to create a Right to charge customers in the future for the Global Adjustment (GA) deferred today including principal amount deferred, interest and other financing costs on the amount deferred and fees, expenses and other administrative costs.
- The Right can be sold to an appropriate Trust or Special Purpose Vehicle (SPV) to obtain funds to pay amounts due to generators under contracts or regulation. These SPVs are generally single purpose entities with no other operations that could add risk to the entity, dilute debt holder rights, allow parties from other operations to claim rights to the future recovery from customers or allow these other parties to initiate bankruptcy proceedings.
- Right must be irrevocable and if the Right is amended by future governments the debt holders have the right of action against the government to recover the amount outstanding including interest, fees, expenses and any damages resulting from the amendment.
- Right must specify the recovery period or the mechanism for setting the recovery rate including true up of the rate to ensure all amounts are recovered.

Economic Factors

- Limits on the recovery amount (principal, interest, fees and expenses) charged to customers in future periods must have compensating elements such as longer recovery period to ensure the full amount deferred plus interest, financing and other administration costs is recovered from customers.
- Need to balance customer relief with debt holder risk. Longer recovery periods and larger deferred balances increase risk to the debt holder of future government intervention.
- The amount required by the SPV to purchase and service the Right will be funded 51% from debt holders, 5% from OPG through capital markets and 44% from OPG via equity injection to OPG from the Province. The funding from OPG will be loaned to the SPV as subordinated debt.

B. GA Smoothing – OPG's Financing Structure Requirements (cont'd)

- Special Purpose Vehicle (SPV) will be used to raise the GA financing and ring fence OPG from its legal obligations
- SPV will be structured to allow for GBE accounting consolidation into OPG
- Given that SPV will be consolidated into OPG for accounting purposes, the significant amount of debt required to fund the GA deferral will have a severe impact on OPG's credit rating. If 100% of the requirement is funded by debt OPG would be downgraded.
- To manage this exposure and minimize the cost of funding. The required funding would be split into 2 buckets:
  1. 56% from capital markets; and
  2. The remainder provided by the Province via equity injection, which would be loaned to SPV as subordinated debt.
- The use of equity to fund a portion of the GA deferral also allows for an improvement in both Net Income and EBITDA as incremental revenue is captured by the increase in the value of the deferral which would offset the fiscal impact of the borrowing at Province level.
- Credit rating metrics are generally maintained within established limits.



CONFIDENTIAL CABINET DOCUMENT

Ontario

GA Smoothing – OEB Considerations

- Ontario Energy Board (OEB) oversight may be required as part of creating a regulatory asset.
- Subject to final confirmation, there are several other spheres for possible OEB oversight:
  - The rate payer impact of IESO deferral account and eventual repayment of the deferred Global Adjustment (GA), within pre-defined legislative parameters;
  - The administrative costs of the OPG's Special Purpose Vehicle (SPV) /Trust (e.g., as the OEB reviews and approves IESO's expenditure and revenue requirements and makes orders fixing just and reasonable rates for the Smart Metering Entity);
  - The SPV/Trust's returns (e.g., as the OEB does with OPG's regulated assets) and whether any income to OPG can be used for the benefit of rate payers;
  - The review of the final structure of the debt issuance for the limited purpose of ensuring requirements of law have been met; and
  - In out years, review of the collection of charges to ensure that collection is sufficient, and not greater than necessary, to pay debt service.
- The scope of OEB oversight will ultimately need to balance the interests and needs of rate payers, the market, OPG and the Province.

B. GA Smoothing – Ontario Financing Authority (OFA) Considerations

- Under the proposed structure, the financing of the deferred Global Adjustment (GA) costs would be effectively done in part by each of the OPG Special Purpose Vehicle (SPV)/Trust, the Province and OPG: the OPG SPV/Trust would borrow 51%, the Province 44% and OPG 5% of the required GA amounts needed to be financed.
  - In the alternative, the Province (through the OFA/OEFC) could borrow the required amounts each year, likely at a lower cost. However, the target for an arms-length trust and potential risk transfer would not be achieved.

	OPG Structured Financing	OFA/OEFC/Provincial Financing
Financing Considerations	• As the OPG SPV/Trust would be borrowing in its own corporate capacity from the public markets, it will likely incur a higher interest cost compared to the Province's borrowing. • This would increase the cost of GA smoothing and the ultimate rate impact on future consumers. • The Trust would be exposed to interest rate changes. • Availability of debt financing may also be limited, depending on the overall amount of deferral, and the subsequent rate impact during the recovery period. OPG has cited examples of a 10% threshold on overall rate impacts of the deferral recovery amounts. • With a potential guarantee from the Province for the borrowing of the OPG SPV/Trust, OPG could see borrowing costs closer to the Province. However, this would redirect the risk back to the Province, removing the intended benefits of using this particular structure, and could add risk to the targeted accounting treatment. • With, or potentially even without a provincial guarantee, OPG SPV/Trust's borrowing could be seen as debt effectively supported by the Province by credit rating agencies and included in their analysis and determination of the Province's ratings. • If a Provincial guarantee endangers the targeted accounting treatment, it may be hard to justify the higher cost borrowing by OPG SPV/Trust to be passed through to ratepayers.	• Province's borrowing from the public markets would add to the borrowing program and the Province's gross debt. • The Province would expect to be able to finance the GA deferral at a lower financing cost than the OPG SPV/Trust, but would likely not achieve the targeted accounting treatment based on OPG's analysis. • Net debt would not increase, to the extent supported by increased equity in OPG under that model, and/or if the accounting treatment can be achieved as backed by a GA-related asset (OPG does not consider that the accounting can be achieved if the SPV/Trust is financed by the Province). • The Province's interest on debt (IOD)cost would need to be effectively recovered through the GA. – E.g., an OPG equity return to cover the cost of borrowing for the equity injection. – Or more directly if the Province is providing financing directly to the GA entity. • The cost of borrowing for the Province could change: 1. The Province's credit rating could be at risk of being re-evaluated by Rating Agencies, which may negatively impact the cost at which the Province borrows and 2. An increase in the Province`s borrowing rates, as a result of increased borrowing. The market may not have adequate demand for the Province to carry-out these borrowings without increasing the interest rate on the debt issues for GA financing and for all of the Province's borrowings. • The interest cost of GA deferral would be exposed to changes in the interest rate environment generally.

GA Smoothing – Legal Considerations

- In principle, refinancing the Global Adjustment (GA) to spread the costs of generation and conservation assets over the useful life of the assets presents only a low risk of being a tax, as each cohort of consumers pays for a proportion of the GA cost roughly equal to the proportion of the benefit they receive from the useful life of the assets.

- Legal risk arises if it becomes apparent that the Government is not spreading cost so that it is shared proportionately by future consumers who cause a need for or benefit from the generation asset, but rather is doing so in order to lower the price in the short term by increasing the price in the long term. If the proposed financing served to encumber future consumers with a premium payment to cover the GA financing in order to subsidize current ratepayers, then there would be a moderately high constitutional risk that the financing proposal would result in an unconstitutional tax.

- Former Supreme Court Justice Ian Binnie has provided a legal opinion concluding that the current proposal is at a moderately high risk of being a tax, for the following reasons:
  - The degree of constitutional risk is in direct proportion to the extent the government is not able to show a proper match between the cost of providing facilities for electricity generation and the group of consumers who benefit year to year from electricity generated by those facilities.
  - If the government fails to establish that the relevant electricity generating assets will continue to perform economically over the 30 year period, or if the GA charge is in the opinion of the Court disproportionately backend loaded, the GA will not qualify as a regulatory charge (and would be characterized as a tax).
  - By shifting costs to the 20-30 year customers, the government may in reality be disproportionately back-end loading the GA with the effect that the 20-30 year consumers will be subsidizing the 1-20 year consumers.
  - The judges can be expected to be aware of the difficult political problem of high energy costs in in Ontario, and will take a careful look at the government's evidence in support of the re-allocation of the GA.

GA Smoothing – Policy Considerations

- Borrowing money to smooth the Global Adjustment (GA), while lowering costs in the short term, results in a more rapid rise in electricity prices beyond the rate of increase already expected.
  - In addition, should Ontario electricity demand be lower than forecasted, the cost of paying off the debt will be spread over a smaller pool of consumption, further increasing future costs for individual ratepayers.

- The impacts are also based on a GA forecast. Since the GA fluctuates, actuals will vary based on demand, the addition of new generation and natural gas prices.
  - A "true-up" mechanism will be required to account for the difference between the "estimate" and "actual" GA costs.

- Although Class B electricity consumers, such as commercial and small industries, do not receive the benefit of GA smoothing (i.e., because it is only targeted to RPP consumers), the Ministry has a proposal later in the submission to address competitiveness for Class B consumers (i.e., targeted lowering of the Industrial Conservation Initiative (ICI) eligibility thresholder from 1 MW to 500 kW).
  - Class B consumers have raised concerns about the cost of electricity and its impact on their business competitiveness.
  - **Note:** Although Class B and Class A consumers will not receive the rate relief benefits of GA smoothing, both consumers will benefit from tax-basing the electricity social programs.

- Given the legal framework the amount of GA smoothing needs to be proportionate to the generating contracts (i.e., 20-year) and the additional years of generation services still available (i.e., additional 10-years of service).

- Rating agencies and investors in the Province's debt may view this borrowing as an obligation of the Province, regardless of accounting treatment. Depending on the magnitude of the debt to be incurred could have an impact on the Province's borrowing cost.

- The GA smoothing proposal will accrue total interest of $25 billion based on the proposed option. This amount of interest is sensitive to many factors, including interest rate, natural gas and carbon prices, generation costs and demand levels.
  - An increase in the borrowing rate from 5% to 6% would increase the total interest costs by almost $9 billion and would require an extension of the financing term beyond 30 years.

GA Smoothing – Fiscal Considerations

- If the proposed legal and accounting treatment of the GA financing smoothing proposal is not implemented, there would be a negative impact on the province's fiscal plan, as shown below.

Fiscal Impact ($M)	2017-18	2018-19	2019-20	2020-21	2021-22
Bills Lowered by 25%, RPP-Eligible Only*	2,534	2,668	2,942	3,420	3,232

*Numerical values represent amount borrowed in indicated fiscal year plus accumulated interest from previous year's accumulated debt

Source: Ministry of Energy

ENHANCING COMPETITIVENESS FOR CLASS B ELECTRICITY CONSUMERS

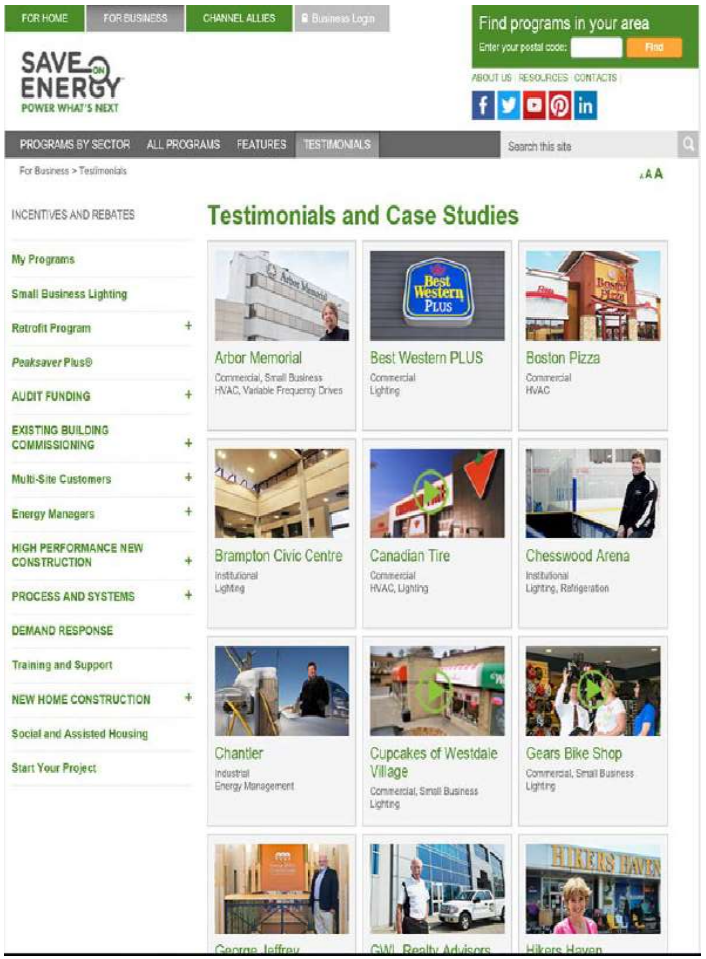
Support for Class B Consumers

- Class B electricity consumers comprise about 50,000 customers, including many mid-size manufacturers (i.e., automotive parts suppliers, plastics manufacturers), large commercial buildings (i.e., office blocks, mid-sized shopping malls) and broader public sector facilities (i.e., hospitals, college campuses).

- Through saveONenergy, many Class B consumers have already taken advantage of energy efficiency programs.

  - Although saveONenergy programs like Process and Systems Upgrade Incentive exist, these programs generally require significant investment on behalf of the customer in addition to the incentives and therefore may be difficult to take advantage of.

  - For Class B manufacturers whose electricity consumption is primarily based on process activities (e.g., injection moulding, welding, etc), traditional conservation measures like lighting and ventilation upgrades have limited benefit.



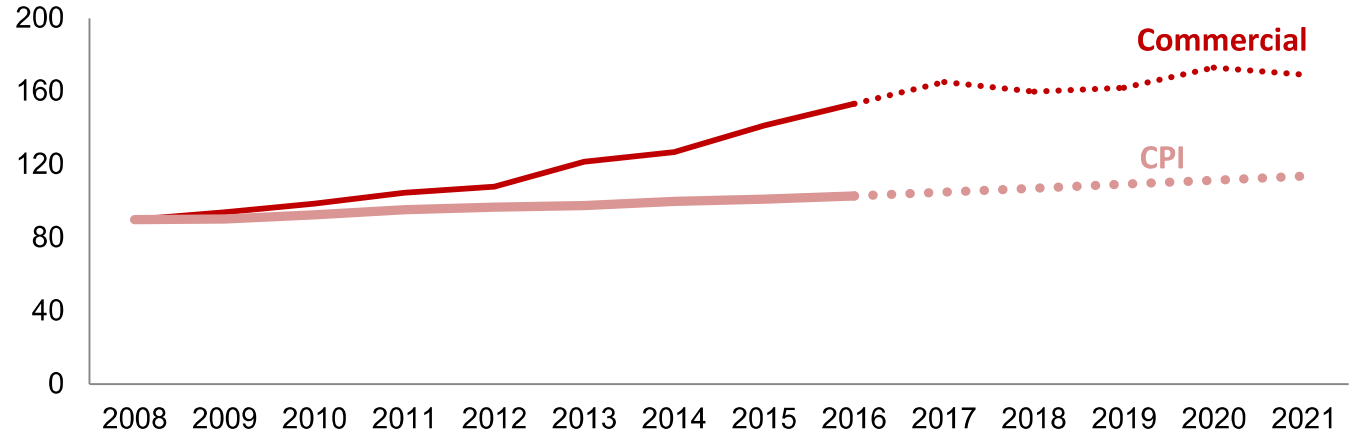
Support for Class B Consumers (cont'd)

- Class B consumers are too large for the Regulated Price Plan (so do not qualify for the 8% rebate for small businesses or Time-Of-Use pricing) and too small to be Class A (so do not qualify for the Industrial Conservation Initiative (ICI) for large consumers).

- Price mitigation initiatives could be provided to Class B to address stakeholders' concerns (e.g., Coalition of Concerned Manufacturers of Ontario, etc).

- The chart below highlights that the cost of electricity for Class B consumers has risen faster than CPI.

Illustrative Electricity Prices
in $/MWh



***Source*:** IESO; OEB; Ministry of Energy

CONFIDENTIAL CABINET DOCUMENT

Lower ICI Threshold Below 1 MW for Energy Intensive Industry

- The Industrial Conservation Initiative's (ICI) eligibility threshold for participation was recently lowered to 1 MW. The lowering of the ICI eligibility threshold provides an opportunity for additional Class B consumers to save on their electricity costs if they choose to opt-in to ICI (i.e., and become new Class A consumers):
  - Beginning in July 2017, new participants will be billed Global Adjustment (GA) on the basis of their contribution to province-wide peak demand.
  - Prior to lowering the ICI eligibility threshold, electricity consumers with peak demand between 3 and 5 MW could only participate in ICI if they belonged to the following sectors: manufacturing, mining, data processing, refrigerated warehousing and greenhouses. **Note:** To achieve the benefits of ICI, participants must reduce their electricity demand during the five system peak hours.

- To enhance the competitiveness of larger Class B consumers whose electricity demand are too low to currently qualify for ICI, the Ministry proposed to:
  1. Expand ICI by extending eligibility to larger Class B consumers with average monthly peak demand over 500 kilowatts; and
  2. Target the expansion to energy intensive industries with the North American Industry Classification System (NAICS) codes 31 - 33 (i.e., Manufacturing).

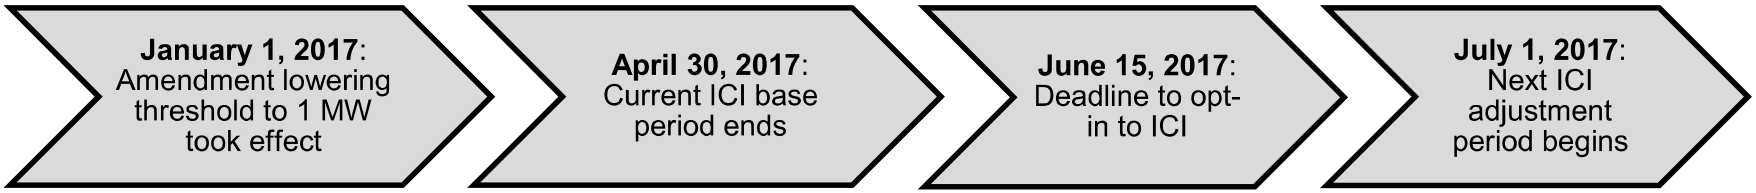
- In addition, the Ministry will assist Class B participation in ICI through a targeted outreach campaign delivered by the Ontario Chamber of Commerce (OCC).

Lower ICI Threshold Below 1 MW – Considerations

- A targeted lowering of the ICI eligibility threshold from 1 MW to 500 kW provides benefit to larger Class B consumers (i.e., manufacturing) while limiting the cost shift to other electricity consumers.
  - **Note:** A Class B consumer that run only a day shift, resulting in fairly peaky load profiles would need to adjusted its behaviour to maximize the benefits of ICI.

- Preliminary analysis by ENERGY staff show that the estimated impact of a targeted lowering of the ICI eligibility threshold from 1 MW to 500 kW would increase a typical residential bill by up to 0.66% or just over $1/month based on a 2016 bill of about $158.
  - The actual impact would vary depending on uptake and consumer responsiveness.
  - With the recent lowering of the ICI eligibility threshold to 1 MW, there is no information available regarding the actual impact on new participants and the electricity system.

- In order for any changes to ICI eligibility to take effect before the next 12-month billing period beginning July 1, 2017, regulatory amendments would have to be made before the end of April 2017.



Lower ICI Threshold Below 1 MW – Legal Considerations

- The quantum of a regulatory charge may be set at different rates within a regulatory structure where the differential prices are intended to serve other regulatory goals including an intention to modify the behavior of persons within the scheme.

- Expanding access to the Class A pricing regime is intended to serve regulatory goals by encouraging consumers to shift their electricity use away from peak hours, which benefits the electricity system as a whole. While Class B consumers will have to pay more of the GA cost in order to finance the reduction for Class A consumers, this is generally permissible since Class B consumers are not modifying their behaviour and the total amount recovered for the GA does not exceed its cost. CLB has previously advised that the differential pricing structure generally only attracts a **moderately low risk** of being a tax, and this risk level does not change if the option of Class A pricing is extended to a broader class of consumers.

- It is more difficult to justify a differential regulatory charge on the basis of behavioral modification when the lower charge is not available to some participants in the regulatory scheme whose conduct could equally serve the same goals. To the extent that there is not a regulatory rationale for extending the new class A option only to certain sectors, risk increases. The amount of risk in this scenario will vary depending on the quantum of the premium that Class B consumers pay to create the behavior modification incentive for Class A and the degree to which the excluded sectors can credibly claim to be able to achieve the same outcome were they permitted to participate in this aspect of the program.

ELECTRICITY SUPPORT AND CONSERVATION PROGRAMS TO HELP VULNERABLE ELECTRICITY CONSUMERS

Electricity Support and Conservation Programs to Help Vulnerable Electricity Consumers

- To date, a number of electricity support programs are funded through the electricity rate-base. There is opportunity to provide support to a more targeted subset of customers who are disproportionately affected by increased electricity costs and to shift these costs to the tax base.

- These customers include:
  - **High Delivery Cost Customers:** Some customers in rural areas where the cost to deliver electricity is high can experience difficulty in reducing their electricity bill through conservation, particularly when reliant on electric heating.
  - **Low-Income Customers:** Rising electricity costs make up a disproportionally large amount of the household expenditures for low-income households.
  - **First Nation On-Reserve Customers:** On-Reserve First Nations customers experience challenges with energy affordability and are seeking to address historical grievances associated with electricity system infrastructure.

- To provide targeted assistance to the customers and alleviate electricity cost burden, ENERGY proposes to:

  A. **Enhance Rural or Remote Rate Protection** (RRRP) by funding its costs through the tax base and providing additional support to customers of designated Hydro One rate classes and other high distribution cost Local Distribution Companies (LDCs).

  B. **Enhance Ontario Electricity Support Program** (OESP) by funding its costs through the tax base and increasing eligible benefits by 50%.

  C. **Establish a new Affordability Fund**, providing energy efficiency measures at no or minimal cost to those who are ineligible for low-income conservation programs, have difficulty paying their electricity bills and who cannot make energy efficiency upgrades without financial assistance.

  D. **Implementing On-Reserve First Nations Delivery Credit**, to remove Delivery charges for on-reserve First Nations customers.

A. Delivery and Distribution Charge – Background

- The **Delivery** line on a typical consumer bill is specific to a consumer's Local Distribution Company (LDCs) and accounts for roughly 25-35% of the total bill before taxes.
- Delivery covers the costs of getting electricity from generating stations across the province to homes and businesses and combines three cost components of the electricity sector into one line item charge:
  - **Transmission:** The costs of moving electricity across high voltage lines from generating stations to the distribution system. This cost is recovered through a variable charge that is approved by the OEB.
  - **Distribution:** The costs of moving electricity from the transmission system to homes and businesses. Depending on the LDC, distribution costs makes up about 60% to 80% of the Delivery line.
    - This cost is currently recovered through both a variable charge and fixed charge, approved by the OEB. Distribution rates are moving to a fully-fixed charge over next 5 years.
  - **Line Loss:** The costs to recover electricity that is lost as heat when its delivered over a power line. Each LDC is assigned by the OEB a specific line-loss adjustment factor to reflect their loses particular to their assets. This factor is multiplied against the monthly electricity cost to determine the monthly cost.

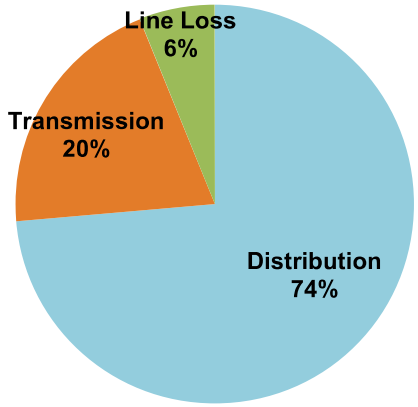
Cost breakdown of Delivery Line for an Average Residential Bill*



* Toronto Hydro Bill @ 750kWhs

A. Rural or Remote Rate Protection Program – Background

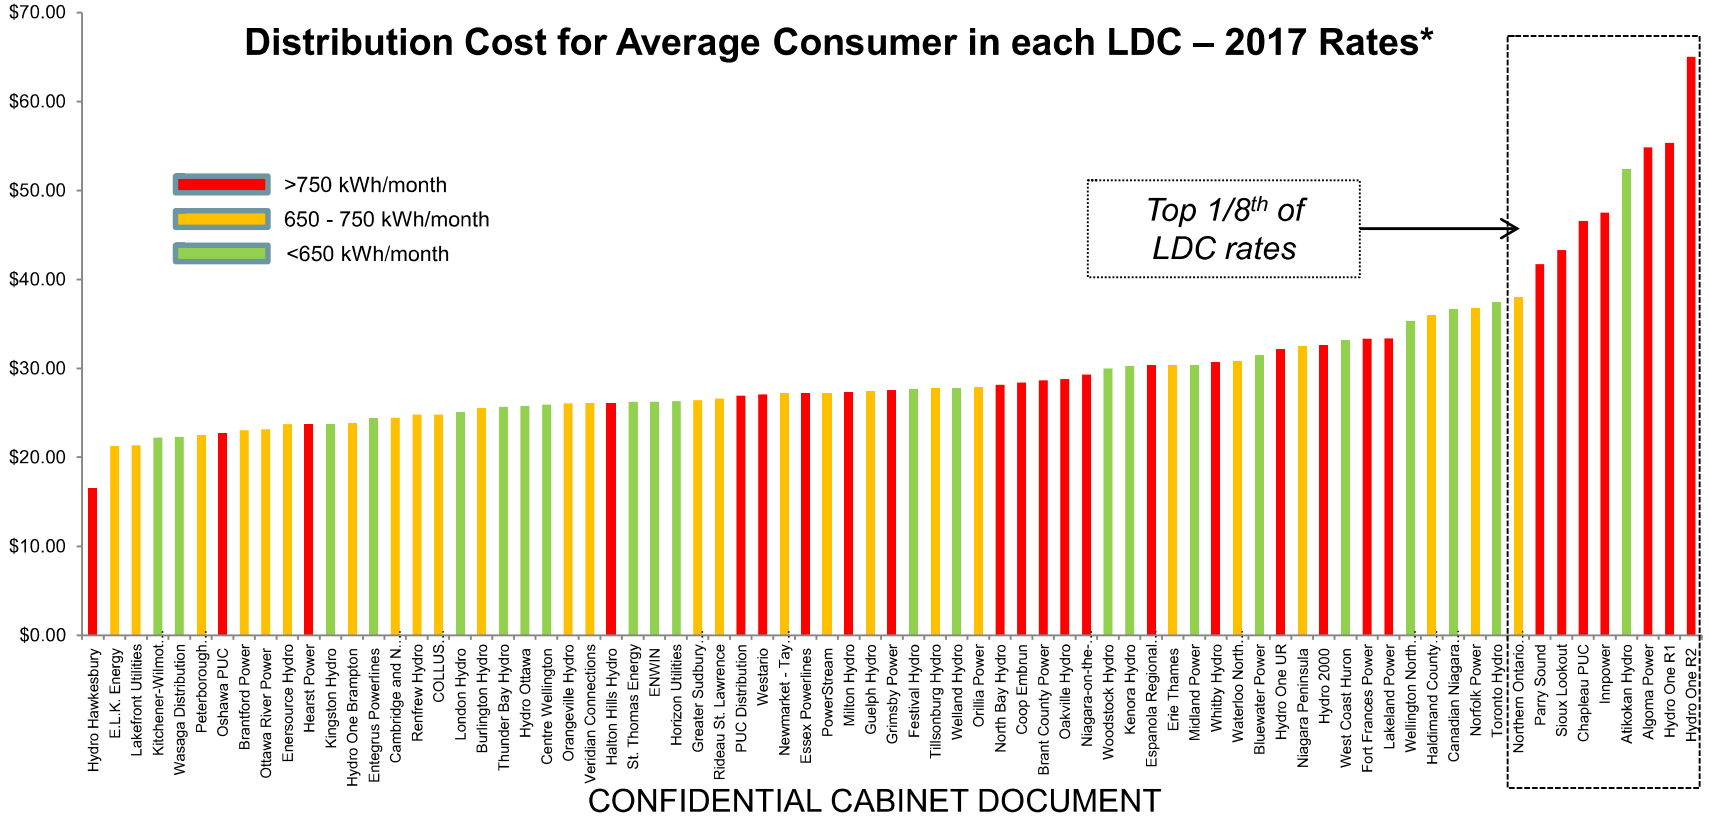
- Rural or Remote Rate Protection (RRRP) mitigates some of the high costs of electricity distribution in rural or remote areas of the Province. It is a legacy program of the old Ontario Hydro and has existed in its current form since 2001.
  - RRRP is funded by ratepayers in Ontario and funded through the regulatory line of the electricity bill. Currently costs $1.58/month for a 750kWh consumer.
- Part of the program helps fund the costs of Hydro One customers classified into the "R2" residential rate class. There are 335,000 R2 customers across the Province. These customers have some of the highest Delivery costs in the Province.
  - From 2001-2016 the program provided $125.4 million annually to help defray these costs.
  - In the 2016 Speech from the Throne, this funding was expanded by $116.4M to a total of $241.9 million.
  - As of Jan 2017 R2 customers receive $60.50/month off their distribution costs.
- These customers still have high delivery and high distribution costs and are often faced with significantly higher than average bills.
  - The higher than average consumption patterns coupled with higher than average distribution rates has resulted in monthly bills many view as no longer affordable or equitable.

A. Enhancing the Rural or Remote Protection Program (RRRP)

- While the RRRP helps mitigate some of the higher distribution costs for Hydro One R2 customers, there is an opportunity to provide further relief to consumers in relatively high-distribution cost outlier LDCs (top ~1/8th of distribution rate classes).
  - If expanded to the top 1/8th of distribution costs, this enhancement would also include Hydro One R1 customers (medium density), as well as LDCs with high distribution costs including: Northern Ontario Wires, Lakeland Parry Sound, Chapleau, Sioux Lookout, InnPower, Atikokan and Algoma.
- Mitigation could be provided by harmonizing distribution rates for these LDCs at the lowest distribution rate paid by an average consumer in this group.
  - Based on projected 2017 LDC rates, the lowest distribution rate paid by an average consumer in this group would be ~$38/month (with the highest being $65).
  - Is consistent with the OEB's mandated move to fully fixed distribution rates for all LDCs.
  - Roughly 800,000 customers would receive benefits from the current RRRP program and from these additional enhancements.
  - Setting a lowest distribution rate across these LDCs would help mitigate geographic-based differences in rates for the consumers who are most impacted and often see such differences as inequitable.
- Mitigation for all electricity consumers would be provided by moving the existing RRRP program costs and the proposed enhancements from the electricity rate base to the tax-base.

A. Enhancing the Rural or Remote Protection Program (RRRP)

- The table below shows what 2017 distribution costs are projected to be for the average consumer within each LDC across the province, and highlights the highest-cost distribution rates.
- The charts on the following slides show what the benefits would be in each LDC if the fiscal plan was used to support harmonizing distribution costs for customers of the LDCs in the top ~1/8th of rate classes at $38/month.



CONFIDENTIAL CABINET DOCUMENT

A. RRRP Enhancement – Considerations

Implementation

- The Ministry will need to ensure that only the high distribution cost LDCs are captured within the program framework
  - LDCs may need to be named explicitly in the legislation/regulation
  - A mechanism would also need to be created to ensure the level of benefit changes year to year
- LDCs will need to change their billing and customer information systems. OEB estimates that the implementation would take at least 6 months or more, following finalized regulations
- New legislation would be required to establish this program.
- Providing a tax-based subsidy outside of exiting rate setting mechanism reduces incentives for customers and distributors to engage on operating costs and capital planning.
- A mechanism will need to be created to ensure that LDCs/OEB/IESO/Province are aligned in the year-to-year forecasting and costing of the RRRP program and the enhancements.

A. RRRP Enhancement – Considerations (cont'd)

Fiscal

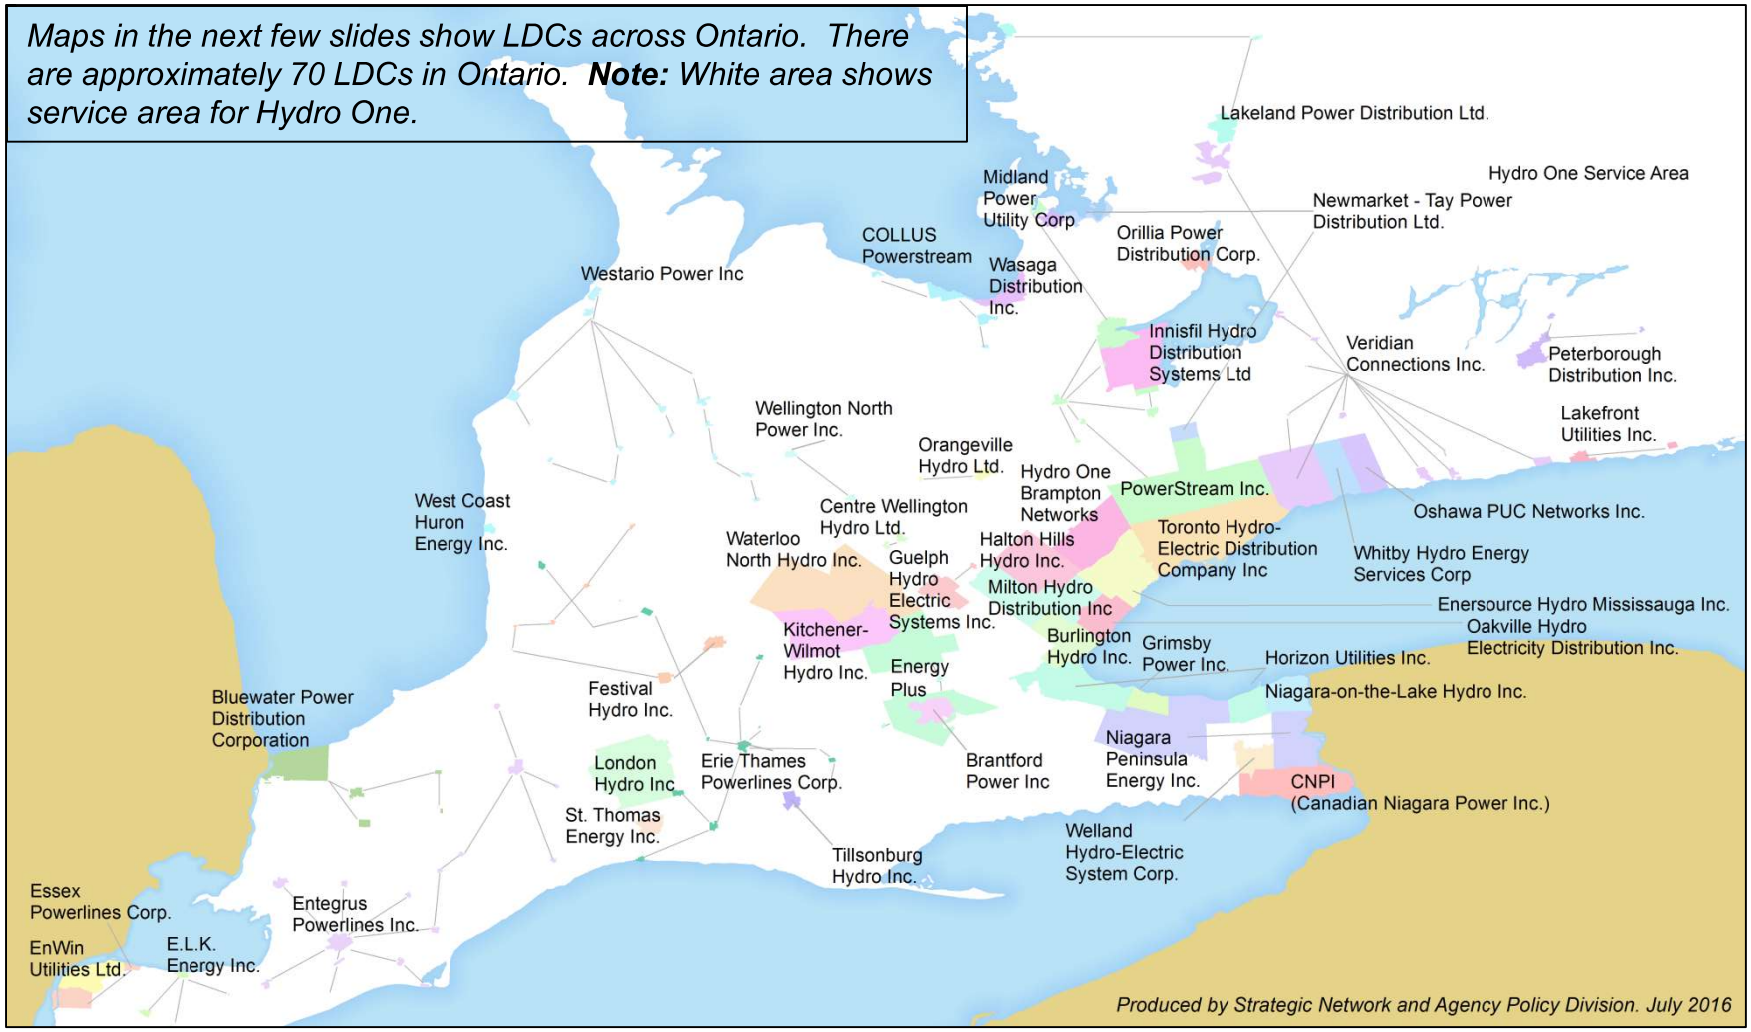
- As distribution costs vary year to year, forecasting fiscal impacts are challenging:
  - Hydro One is expected to submit its cost of service application for 2018 and beyond (3-5 years) in spring 2017. The rate increases requested in this application could potentially increase the proposed fixed rate which could have a significant impact on fiscal requirements and ratepayer impacts.
  - The other high distribution cost LDCs generally have lower distribution cost increases, however, it is difficult to forecast fiscally the impact of the program until LDCs submit their cost of service applications to the Ontario Energy Board (OEB).

Fiscal Impact ($M)	16-17	17-18	18-19	19-20	20-21
Legacy RRRP to Hydro One R2 Customers	-	126	130	133	136
2016 Speech from the Throne Enhancements to R2 Customers	-	117	120	123	127
Proposed Enhancements to Hydro One and Identified LDCs	-	216	222	228	234
TOTAL	-	**459**	**472**	**484**	**497**

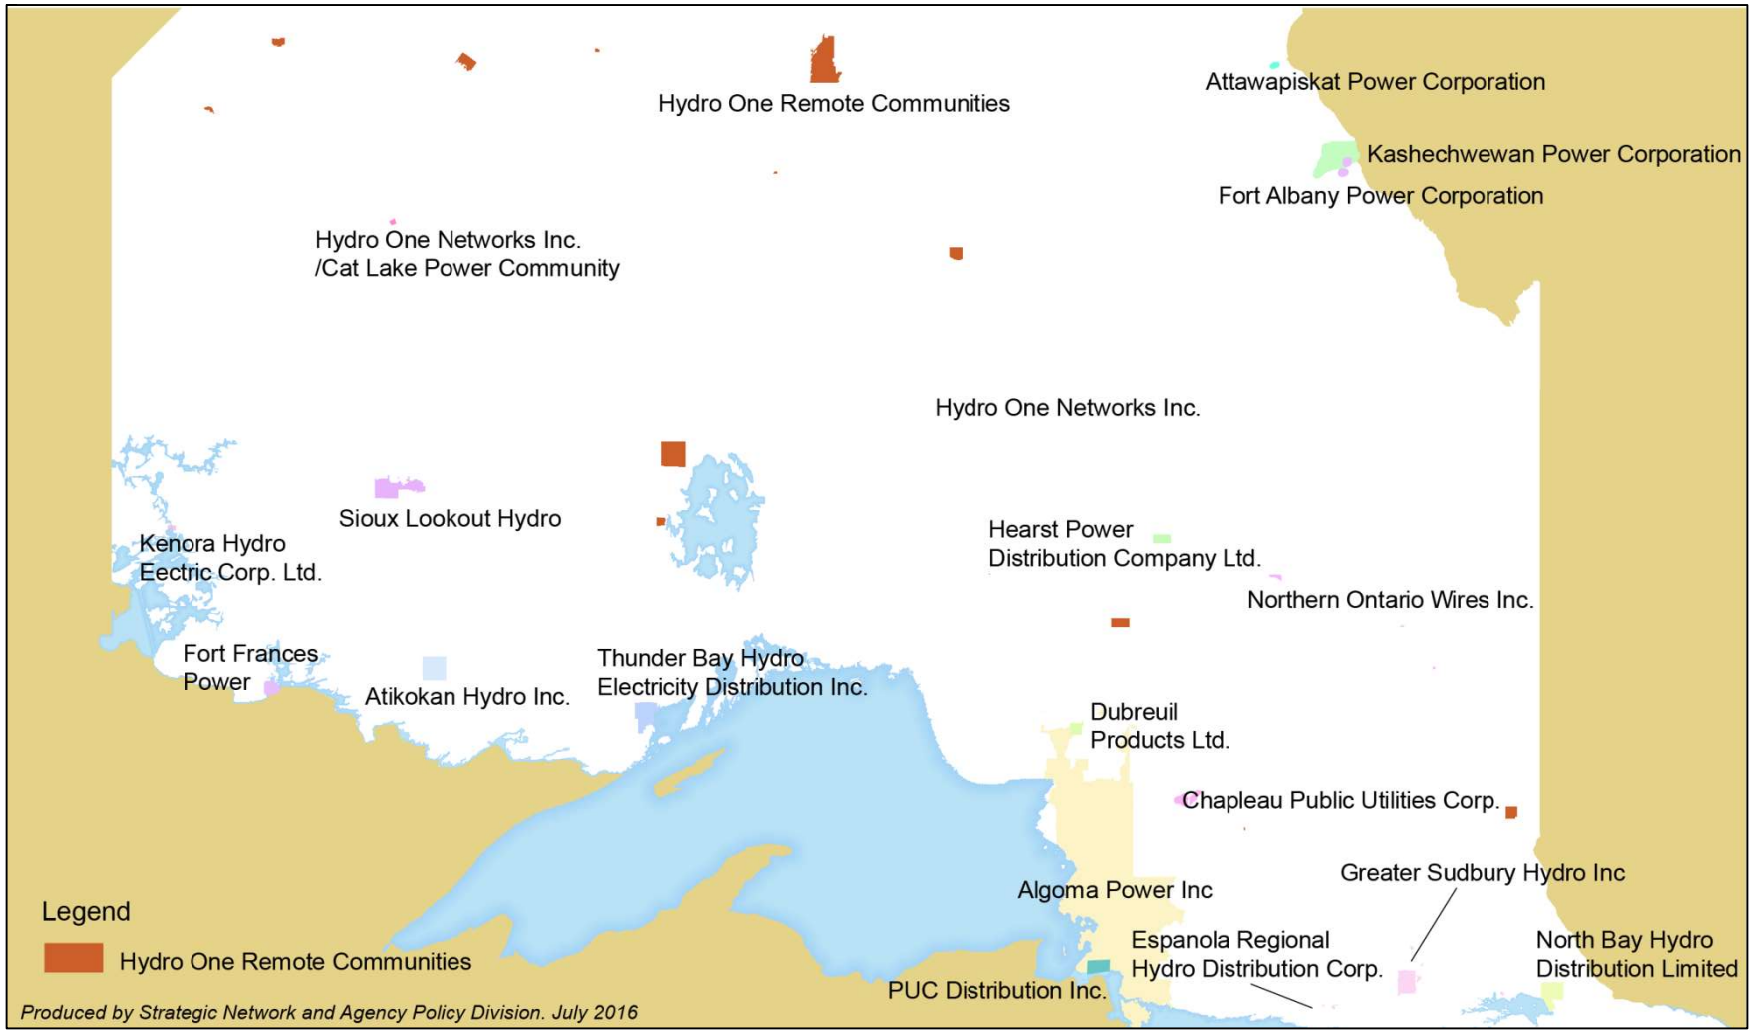
Note: Current regulatory framework calls for RRRP to increase by average distribution rate increase. Forecast assumes 2.6% annually though is subject to OEB proceedings. Fiscal projection is subject to consumer consumption patterns that may change due to extreme weather or other factors. Does not include Algoma Power or Hydro One Remotes, which would continue to be on the rate-base.

A. RRRP Enhancement – LDC Service Territory (Southwestern Ontario)

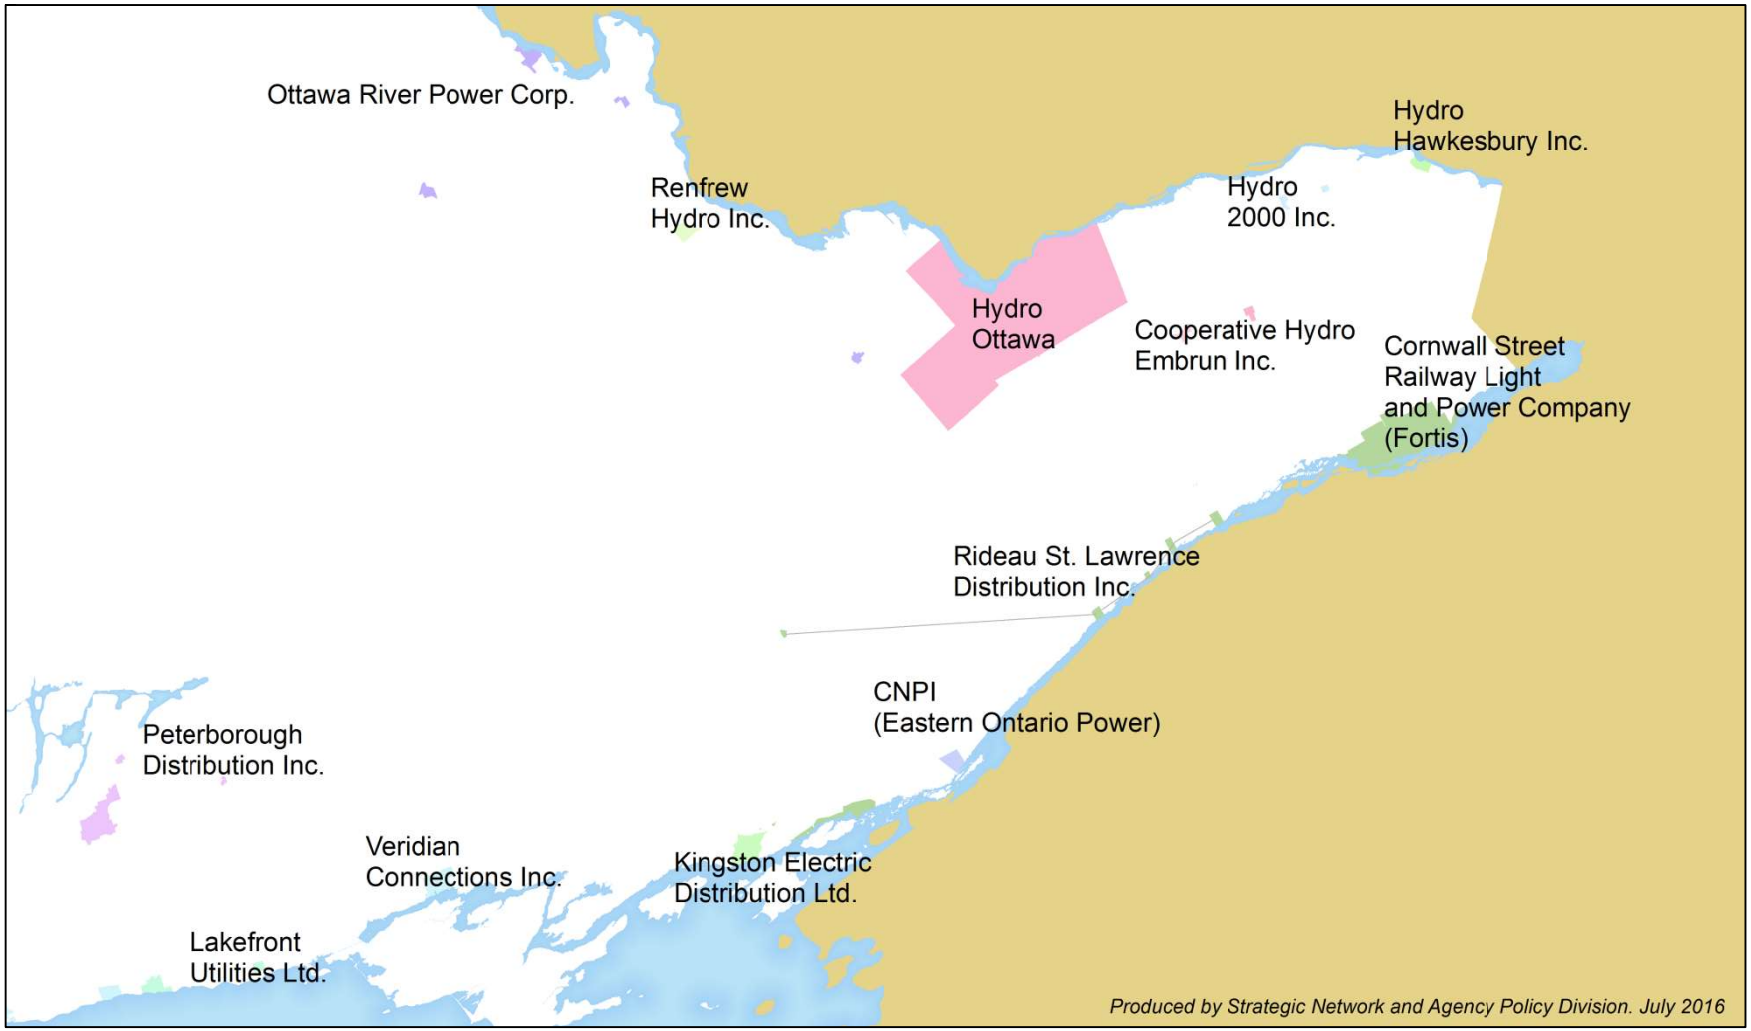
Maps in the next few slides show LDCs across Ontario. There are approximately 70 LDCs in Ontario. ***Note:*** *White area shows service area for Hydro One.*



A. RRRP Enhancement – LDC Service Territory (Northern Ontario)



A. RRRP Enhancement – LDC Service Territory (Eastern Ontario)



B. Ontario Electricity Support Program (OESP)

- The OESP is an income-tested, application based program that lowers electricity costs of the most vulnerable consumers by a rebate directly on bills. The OESP is currently funded by the rate base.
- OESP credits vary by income level and family size, and there are two credit scales that include:
  - The basic program credit ranges from $30/month to $50/month.
  - An enhanced credit that ranges from $45/month to $75/month for consumers that are either Indigenous, use electric heat or have certain medical devices.
- The OESP launched on January 1, 2016, and in just over a year:
  - Almost 180,000 have been enrolled in the program representing 30% of the total targeted low-income population and some 278,000 applications have been received.
  - Almost $50 million in credits have been provided to vulnerable consumers.
  - Some 172 intake agencies have been mobilized to assist low income consumers to apply for the OESP.
- To drive this uptake, the OEB has engaged in extensive outreach, including advertising in multiple languages, and continuing to work with partner agencies to develop a model for “application clinics” across the province to increase program awareness and uptake across the province.

B. Ontario Electricity Support Program (OESP) (cont'd)

- There are a numbers of ways that the OESP program can be enhanced:
  - Streamline the OESP process to drive participation toward 100%:
    - ENERGY and the Ministry of Community and Social Services (MCSS) have been working on automatic OESP qualification for Ontario Works (OW) and Ontario's Disability Support Program (ODSP) recipients who pay electricity bills.
      - MCSS estimates some 110,000 OW and ODSP recipients pay electricity bills;
      - This process could follow the "deemed eligibility" model used for the Healthy Smiles program. Using an existing model should simplify the implementation process.
      - The qualification process may have to be done manually at first, with a more automated IT solution in the longer-term.
    - Working with the CRA to make the application process easier / quicker to get through by finding an alternative to the requirement to mail-in signed consent forms;
    - Putting in place a more aggressive communications strategy and application intake clinics across the Province to increase awareness of/enrollment in the OESP.
  - Increasing the existing OESP credit scales by an additional 50%; and
  - Expanding the categories of OESP credits.

- It is also recommended that the OESP be supported from the tax-base as part of the rate mitigation package.

B. Ontario Electricity Support Program (OESP) (cont'd)

- The tables below outline the existing OESP credit scales and how the scales would be enhanced if increased by 50% and credits are extended to additional groups (represented in the circled boxes):

Existing OESP Credit Scales

Sliding Scale #1		Household Size						
		1	2	3	4	5	6	7 +
Income Bracket	< $28,000	$30	$30	$34	$38	$42	$50	$50
	$28,001 - $39,000			$30	$34	$38	$42	$50
	$39,001 - $48,000					$30	$34	$38
	$48,001 - $52,000							$30

Sliding Scale #2		Household Size						
		1	2	3	4	5	6	7 +
Income Bracket	< $28,000	$45	$45	$50	$55	$60	$75	$75
	$28,001 - $39,000			$45	$50	$55	$60	$75
	$39,001 - $48,000					$45	$50	$55
	$48,001 - $52,000							$45

Proposed +50% OESP Credit Increase*

Sliding Scale #1		Household Size						
		1	2	3	4	5	6	7 +
Income Bracket	< $28,000	$45	$45	$51	$57	$63	$75	$75
	$28,001 - $39,000		$40	$45	$51	$57	$63	$75
	$39,001 - $48,000			$35	$40	$45	$51	$57
	$48,001 - $52,000					$35	$40	$45

Sliding Scale #2		Household Size						
		1	2	3	4	5	6	7 +
Income Bracket	< $28,000	$68	$68	$75	$83	$90	$113	$113
	$28,001 - $39,000		$60	$68	$75	$83	$90	$113
	$39,001 - $48,000			$52	$60	$68	$75	$83
	$48,001 - $52,000					$52	$60	$68

CONFIDENTIAL CABINET DOCUMENT

***Note:** The proposed higher scale, including the amounts in circles are proposed and will be refined in consultation with the OEB.

B. Ontario Electricity Support Program (OESP) – Considerations

Fiscal Impact

- Changes to legislation / regulation may be required to establish and define the parameters for OESP to receive funding from the tax-base. The scope of changes would depend on the implementation / delivery mechanisms.
- The OESP regulation will likely require changes to enable OW and ODSP recipients to be "deemed eligible" for the OESP.
- Financial flow-through mechanisms would need to be considered in consultation with IESO and LDCs. Likely to be modeled after processes used for the Ontario Rebate for Electricity Consumers (OREC).
- The OEB has been collecting program funding in excess of program costs and has accrued a positive balance. This balance must be addressed when moving to the tax base.
- If OESP amounts are increased, it will need to be confirmed that the credit is not treated as taxable income. This was addressed in the current iteration of the OESP.
- Adding additional categories to the OESP matrix will take time to implement as it will require changes to the central system as well as LDCs' billing systems. As well, the matrix will no longer follow the Low Income Measure (LIM), which could put additional pressure on the OESP and other provincial programs.

Fiscal Impact ($M)	**16-17**	**17-18**	**18-19**	**19-20**	**20-21**
Existing OESP credits	–	118	159	193	222
Incremental Enhance OESP credits by +50%	–	59	80	97	111
Incremental additional OESP categories	–	8	22	35	42
Total	–	**186**	**261**	**325**	**375**

C. Establishing a New Affordability Fund

- For eligible low-income customers, the Home Assistance Program (HAP), delivered by LDCs under the Conservation First Framework, provides efficiency upgrades and education, at no cost, to help improve the energy efficiency and comfort of their homes and help customers manage their electricity bills.

- HAP does not address the needs of those customers that do not qualify as “low-income” but could benefit from conservation programs.
  - At the end of 2015, there were over 560,000* residential electricity accounts in arrears; of these about 19,900** (~3.6%) accounts were eligible to participate in low-income conservation and support programs.
  - According to the Ontario Energy Board (OEB), in 2015 about 60,000 customers had their electricity service disconnected.

Proposal: Establish Affordability Fund to Provide Existing Low-Income Conservation Program to Other Electricity Customers

- The Ministry proposes establishing an Affordability Fund which would be available to LDCs to provide similar energy efficiency measures as provided under HAP to targeted customers.

* **Note:** Unverified numbers reported by LDCs to the OEB
** **Note:** Low-income customers identified through participation in LEAP

Ontario

C. Establishing a New Affordability Fund (cont'd)

Fund Details:

- An Affordability Fund would be accessible to LDCs only, and would target those customers who cannot qualify for low-income conservation programs and are in need, such as those who are facing disconnection.
  - By providing support for energy efficiency improvements, the Fund could help these customers reduce their future bills and avoid future disconnections.
  - The Fund would provide LDCs with an additional tool to provide assistance to their customers.

Eligibility Criteria/Fund Principles:

- Determination of eligibility could involve a number of factors and metrics:
  - Do not meet the definition of "low-income";
  - May have triggered action by an LDC collection department (e.g., are in arrears, have been placed on one or more payment plans, are due to be disconnected, etc.);
  - Priority could be given to eligible customers in electrically-heated homes, or other unique circumstances; and
  - Require financial assistance to pay for energy efficiency measures.

C. Establishing a New Affordability Fund (cont'd)

Implementation

- ENERGY is currently in discussions with several large LDCs to determine the principles of the Fund and is working with Hydro One to set up an independent Trust to serve as the Fund Administrator.
  - The Fund Administrator would manage the flow of funds to LDCs based on principles set by the province, and be responsible for establishing processes, administration, and criteria for funding applications, thereby ensuring the program is managed on a consistent basis across the province.
  - LDCs would apply for funding to the Fund administrator, to offer energy efficiency measures to those customers in their service territories that meet the targeted eligibility criteria.
  - LDCs have over 10 years of experience in delivering conservation programs, including experience specific to contracting for programs that target low-income customers.
  - LDCs are best positioned to identify and target their customers who are most in need.

- Given the scope of the Fund, an LDC would need a firm financial commitment up front before implementation. LDCs rely on rate-payer funding for most of their activities. The Affordability Fund would be a unique venture from an LDC perspective given that it is tax funded.

C. Establishing a New Affordability Fund (cont'd)

<u>Implementation</u> (cont'd)

- Recipients could receive measures ranging from an average of $3,000 to $5,000 per customer, at no or minimal cost. For example, measures available in the Home Assistance Program include:
  - Energy-saving light bulbs (LEDs); power bars; energy efficient window ACs, refrigerators, freezers, dehumidifiers; low-flow showerheads, hot water blankets, pipe wrap and faucet aerators (in homes with electric water heating); and
  - Programmable thermostats, weather stripping, insulation (in homes with electric heating).

- Cold climate air source heat pumps would also be an eligible measure under the Affordability Fund. Heat pumps range in cost from $7,000 to $13,000.

- As an illustration, with $200 million, the estimated reach of the fund could be 15,000 to 65,000 households, depending on measures and uptake.

C. Establishing a New Affordability Fund – Considerations

Considerations

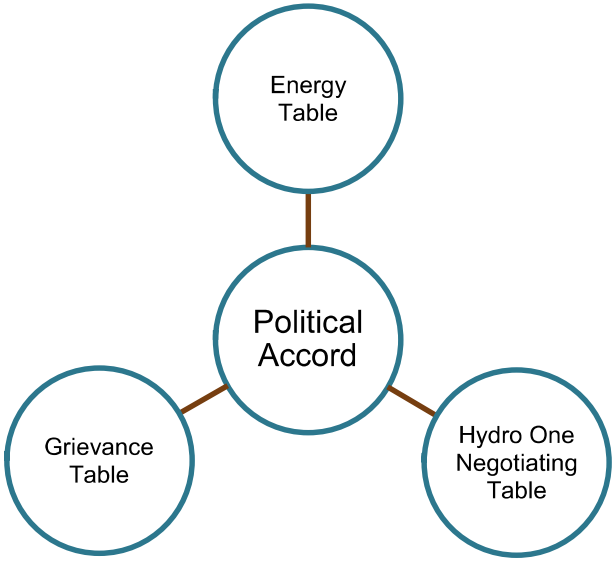
- The Affordability Fund addresses a real need.
  - LDCs have expressed the need for an additional tool to provide assistance to their customers.
- Determining allocation of funds to LDCs:
  - Some LDCs may have a disproportionate number of customers in need of assistance; and
  - ENERGY is proposing to seek input from the OEB, LDCs and potentially low income organizations to help develop funding allocation and eligibility principles for the Trust.
- While eligibility principles will be established, LDCs will need a degree of flexibility to target customers:
  - Not all customers who are in need will actively seek help;
  - Some customers in arrears may be "gaming the system" and not truly in need; and
  - LDCs recommend targeted outreach as opposed to broad marketing; a high volume of applications would limit the ability to deliver assistance to customers who need it most.

Fiscal Impact

- The Affordability Fund would represent a fiscal impact of $200 million in fiscal year (FY) 2016/17.
- To allow for funds to flow in FY 2016/17, ENERGY would sign a Transfer Payment Agreement (TPA) with Hydro One and transfer money before end of fiscal year to ensure Hydro One can establish the Trust and the Trust can begin operation as the Fund Administrator.
- There is a fiscal risk if monies used for the Fund do not flow before FY year-end 2016/17 and for monies that are sitting in Hydro One at year-end (because of consolidation with province), and a corresponding fiscal pressure in the following years when the funds are flowed from Hydro One (H1) to ratepayers.

D. Implementing On-Reserve First Nations Delivery Credit

- ENERGY has a number of Tables with the Chiefs of Ontario (COO) and First Nations that include the Energy Table to discuss policy issues, the Hydro One Negotiating Table to discuss Hydro One shares, and the Grievance Table.
- The Grievance Table process was established at the request of COO as a means to avoid litigation to resolve historic grievances related to the energy sector and prevent these issues from impeding progress on broadening the ownership of Hydro One (H1).
- The cost of electricity and delivery charges were identified as the prevailing grievance at the First Nations-Ontario Energy Table meeting in Timmins in 2016, and the Minister of Energy agreed to explore options for a First Nations Rate through the Grievance Table process.



- On June 27, 2016, following discussions on Hydro One shares and rates at COO's All Chiefs Conference, the Minister of Energy issued a letter directing the OEB to prepare a report providing "*advice on options for an appropriate electricity rate (or rate assistance) for on-reserve First Nations electricity consumers*".
  - OEB engaged with First Nations, including remote communities, the distributors serving them, and consumer groups such as the Low Income Energy Network. It also established an Advisory Committee with the Chiefs of Ontario's Grievance Committee.
- The Ontario Energy Board (OEB) has worked with COO to engage with First Nations to develop options for a First Nations electricity rate. The OEB provided a report to the Minister on December 29, 2016.

D. Implementing On-Reserve First Nations Delivery Credit (cont'd)

- On-reserve First Nations customers face unique challenges that impact electricity affordability, such as the poor quality of the housing stock on-reserve. These challenges result in significantly higher electricity consumption levels and costs.
- First Nations living on reserve are particularly vulnerable low-income consumers: the average income is considerably lower compared to First Nations living off reserve and compared to non-Indigenous populations:
  - Average income of First Nations on reserve in Ontario: $21,100;
  - Average income of First Nations off reserve in Ontario: $31,527;
  - Average income of Non-Indigenous people in Ontario: $42,506; and
  - Median incomes on smaller reserves can fall below $10,000 (e.g., Cat Lake FN).
- Employment rates also differ between on-reserve First Nations, off-reserve First Nations and Non-Indigenous individuals, as well as other indices of social vulnerability:
  - 54% of Indigenous people over 15 years old and living on-reserve in Ontario are unemployed or not in the labour force;
  - The on-reserve unemployment rate is 18.3% compared to 6.4% in Ontario generally; and
  - 67% of families residing on-reserve are single parent families, compared to the Canadian equivalent of 19%.
- First Nations are seeking redress for historic grievances related to lands affected by energy developments, such as transmission or distribution infrastructure built on reserve lands and traditional territories where, in some cases, they may not have been appropriately consulted.
- Further, in some circumstances, linear infrastructure corridors cut First Nation reserves in half, significantly disturbing the use and management of an already small land base; the First Nation communities disturbed by energy infrastructure report having experienced long wait times (e.g., 20 years) for their communities to get connected and receive the benefits of the energy derived from the local infrastructure.

D. Implementing On-Reserve First Nations Delivery Credit (cont'd)

- The OEB report to the Minister of Energy on a First Nation on-reserve rate recommended:
  - Eliminate the delivery charge for all on-reserve First Nations residential customers and eliminate the monthly service charge for customers of licensed distributors which charge a bundled rate;
    - The OEB estimates this would provide residential customers an average monthly benefit of $85 at a total annual cost of $13 to $20 million.
  - Automatically qualify on-reserve First Nations residential customers (~21,500 customers);
  - Enable greater information sharing between distributors and band councils to identify all on-reserve First Nations customers; and
  - Continue to provide assistance through OESP and LEAP to eligible on-reserve First Nations customers.
- The OEB suggested the program should be funded from the tax base as it is targeted to a particular segment of the provincial population, or, if rate based, to use a province-wide charge.
- ENERGY recommends moving forward with the implementation of the OEB's recommendations as part of the wider electricity rate relief package and as the Hydro One share agreement with COO continues to be implemented.

Distributor	Number of On-Reserve Residential Customers
Algoma Power Inc.	473
Attawapiskat Power Corporation	336
Bluewater Power Distribution Corporation	237
Cat Lake Power Utility Ltd.	80
Cornwall Electric Distribution	514
Hydro One Networks Inc.	16,679
Hydro One Remote Communities Inc.	2,579
PUC Distribution Inc. (Sault Ste. Marie)	264
Thunder Bay Hydro Electricity Distribution	332
Total Number of Customers	**21,494**

Source: OEB Report to Minister: Options for an Appropriate Rate Assistance Program for On-Reserve First Nations Electricity Consumers (Page 5).

D. Implementing On-Reserve First Nations Delivery Credit – Considerations

- Legislative and regulatory will be required to implement this program.
- The OEB will need to work with the LDCs to identify on-reserve consumers to administer the delivery rebate.
- Development of a communications plan containing the following elements:
  - Public release of the OEB report;
  - Commitment to working with LDCs on implementation details; and
  - Advanced notice to the OEB and COO regarding the ministry's decision to move forward on the OEB's recommendation and indicate a willingness to work collaboratively with COO on ways in improve community-LDC communication to ease implementation.
- The rebate will appear on customer's electricity bills, either as a specific line item or a communicated call-out.
- Recipients would continue to be eligible for programs such as the Ontario Electricity Support Program (OESP) and the Low-Income Electricity Assistance Program (LEAP).
- There is a risk that either non-status Indigenous communities without reserves or Métis could challenge the program on the grounds that it discriminates against them contrary to section 15 of the Charter. A genuinely ameliorative program that targets some people but excludes others is shielded from a s. 15 challenge if it serves or advances the ameliorative goal. The proposal has an ameliorative purpose as it targets First Nations communities for a reserve-based program corresponds to the distinct circumstances of reserve-based communities, relative to other Indigenous communities, that affect electricity affordability.

Fiscal Impact ($M)	**16-17**	**17-18**	**18-19**	**19-20**	**20-21**
On-Reserve First Nation Delivery Credit	-	20	20	20	20

Fiscal Roll-Up

Fiscal Impact ($M)	16-17	17-18	18-19	19-20	20-21
RRRP Enhancements*	-	459	472	484	497
Ontario Electricity Support Program, including the 50% Enhancement & New Matrix Categories	-	186	261	325	375
On-Reserve First Nation Delivery Credit	-	20	20	20	20
Affordability Fund**	200	-	-	-	-
Total	200	665	753	829	892

***Note:** Current regulatory framework calls for RRRP to increase by average distribution rate increase. Forecast assumes 2.6% annually though is subject to OEB proceedings. Fiscal projection is subject to consumer consumption patterns that may change due to extreme weather or other factors. Does not include Algoma Power or Hydro One Remotes, which would continue to be on the rate-base.
****Note:** Funding for the Affordability Fund is one-time in 2016/17.

BENDING THE FUTURE COST CURVE OF ELECTRICITY

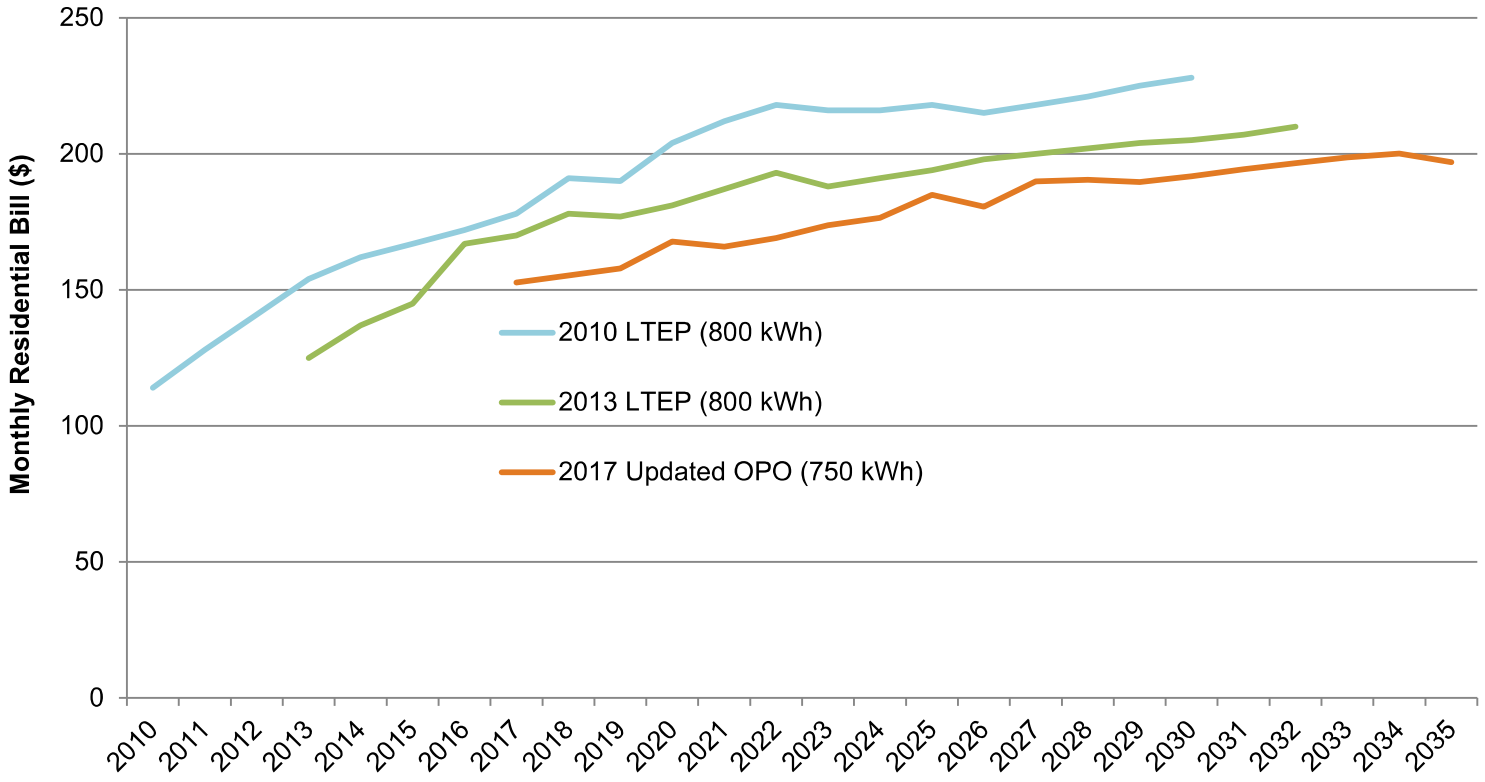
Existing Rate Mitigation Actions To Bend The Cost Curve

- Since 2013, the government has taken a number of actions to reduce electricity ratepayer costs, including:
  - Renegotiating the Green Energy Investment Agreement to reduce contract costs by $3.7 billion.
  - Reducing Feed-In Tariff (FIT) prices saving ratepayers at least $1.9 billion.
  - Introducing a competitive Large Renewable Procurement (LRP) process to drive down costs approximately $1.5 billion lower than the 2013 LTEP forecast.
  - Deferring the construction of two new nuclear reactors at Darlington, avoiding an estimated $15 billion in new construction costs.
  - Maximizing the value of our existing nuclear fleet by starting Bruce refurbishments in 2020 instead of 2016, thus helping to achieve $1.7 billion in savings and by continuing to operate Pickering up to 2024, pending regulatory approvals, which could save ratepayers about $600 million.
  - Suspending the second round of the LRP process and the Energy-from-Waste Standard Offer Program, which is expected to save up to $3.8 billion in costs.
  - Limiting the Feed-In Tariff (FIT) 5 procurement target to 150 MW and suspending future FIT procurements – up to [$xx] cost savings.

CONFIDENTIAL CABINET DOCUMENT

Existing Rate Mitigation Actions To Bend The Cost Curve (cont'd)

- The chart below shows how electricity rate forecasts have trended down over time.



Sources: *2010 LTEP (800 kWh/month); 2013 LTEP (800 kWh/month); Revised Ontario Planning Outlook (750 kWh/month as of February 2017) which includes: ICI expansion, RRRP update, 8% rebate, HQ agreement, suspension of LRP II and EFWSOP.*

A. OEB – LDC Efficiencies and Rates

Leveraging the OEB

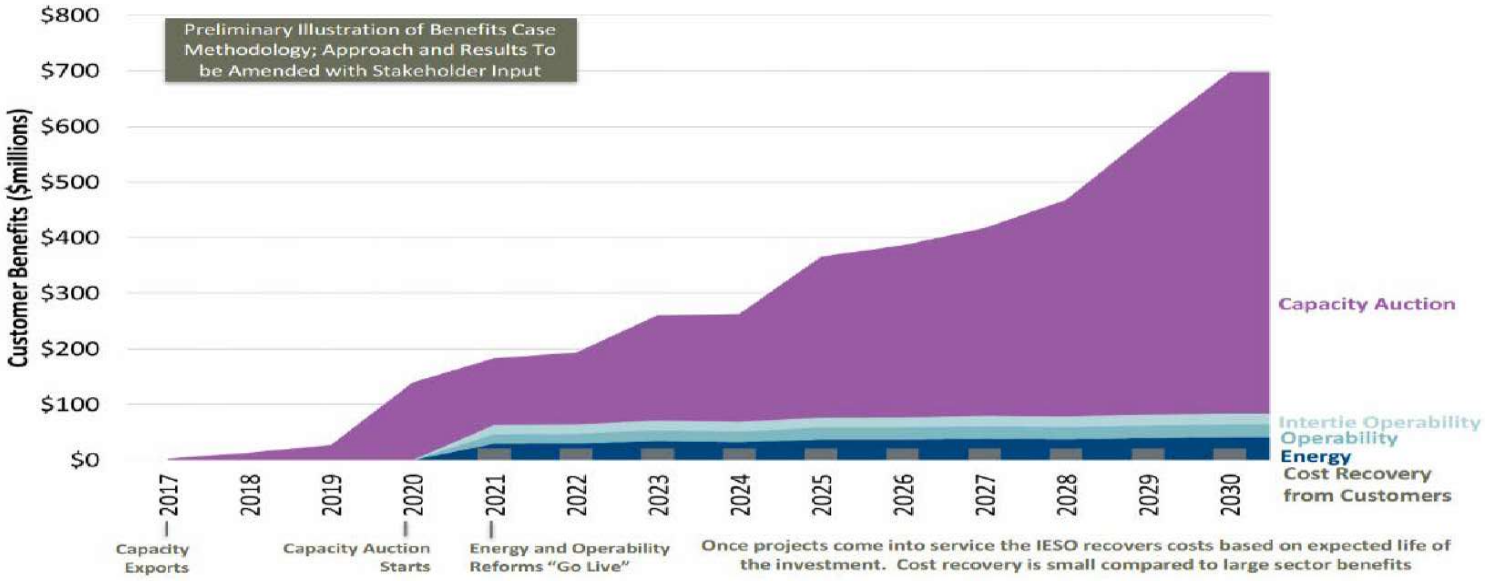
- The Ontario Energy Board (OEB) has a mandate to regulate the electricity distribution sector in the public interest, ensuring the financial viability of the sector while promoting reliable service to customers at just and reasonable rates.
- The OEB, through the Renewed Regulatory Framework for Energy (RRFE), has since 2012 attempted to move the distribution sector towards a performance/outcomes-based regulatory framework.
  - While new reporting requirements such as the LDC performance scorecard are positive developments, RRFE does not tie these system performance expectations to LDC financial performance.
- Encouraging shared partnerships on services between utilities will help reduce costs in the back end and encourage further innovation for small to medium sized utilities.
- In 2012, the government asked the Ontario Distribution Sector Review Panel to make recommendations about how the distribution sector could become more efficient. The Panel concluded that a $1.2 billion net present value in savings could be achieved by consolidating LDCs into 8-12 regional entities.

Opportunities

- ENERGY could help promote and accelerate these efforts by asking the OEB to look at opportunities to further drive LDC efficiencies and productivity. This may indirectly incent LDC consolidation.
- In parallel, the OEB could be instructed to review business cases behind its own regulatory requirements to reduce “red tape” and eliminate costs that LDCs indicate are creating pressures on operating expenses.
- This could be done through the Minister's letter, the LTEP Implementation Directive, s. 35 of the *Ontario Energy Board Act, 1998*, and/or the 2017 Mandate Letter and other agency business planning processes.

B. IESO – Market Renewal

- Continue to move forward with Independent Electricity System Operator's (IESO) Market Renewal initiatives:
  - Moving to "technology-agnostic" procurements will provide new opportunities for innovation and modernization and ensure ratepayers receive the best prices possible.
  - Market Renewal encompasses projects such as a single-schedule system (from the current two-schedule system), more frequent intertie scheduling to better align with other jurisdictions and a day-ahead market. There will be up front capital costs to enable the initiative. IESO is currently assessing these costs.
- Changes related to IESO's Market Renewal initiatives, reflected in HOEP and uplifts, are estimated to save up to $300 million per year, starting in 2021, leading to a reduction of:
  - About $1/month or less than 1% at current retail prices for a typical residential bill; and
  - About $1.30/MWh at current all-in prices for industrial and SME electricity consumers.



CONFIDENTIAL CABINET DOCUMENT

SUPPORT FOR TENANTS

Support for Tenants – Context

- The government is considering measures to provide relief from high electricity prices, and is interested in ensuring that tenants also receive electricity cost reductions and/or relief.

- Currently, tenants generally either pay for their own electricity use through suite meters (i.e., sub-meters or direct arrangements with hydro providers) or pay for electricity indirectly as a service included in their rent:
  - Tenants who pay for their own electricity will receive electricity costs savings directly through their bills; and
  - Low-income tenants who pay own electricity bills can access energy support programs such as the Ontario Electricity Support Program administered by the Ontario Energy Board (OEB).

- Any potential initiatives could focus on the following options:

For tenants who pay own electricity bills

1. Expand OESP to increase relief or raise income thresholds.

For tenants whose electricity is included in rent

2. Require that landlords pass savings on to tenants (could be addressed by MHO through RTA amendments).
   - Options could include requiring landlords to automatically reduce rents, or allow tenants to apply the Landlord and Tenant Board for relief.
3. Provide energy rebates directly to tenants whose rent includes electricity.

Support for Tenants – Potential RTA Hydro Relief Measures / Considerations

- RTA amendments with respect to tenant relief, remedies, and enforcement would be complex, and unable to provide immediate, direct and transparent cost remedies to tenants:
  - Impact of hydro relief measures and electricity cost savings for landlords may vary depending on size of rental building and location (urban/rural):
    - One size fits all approaches would not match actual landlord savings to direct tenant relief; and
    - More targeted approaches would add extreme complexity, leading to greater confusion for landlords and tenants, and difficulty administering enforcement.
  - Passing on actual savings could likely only be done after landlords have experienced decreased costs for a period of time (i.e. one year).
  - Difficulty in informing landlords of their responsibilities and enforcing reductions; would likely have significant resource implications for the Landlord & Tenant Board/Ministry of Attorney General.
  - Difficult for tenants to understand, with the most vulnerable tenants potentially less able to pursue remedies through the LTB.
- The kinds of potential RTA remedies would depend on various specifics regarding the way in which relief was being provided to landlords including whether:
  - The actual electricity cost savings for landlords are transparent to facilitate easy calculation of rent reductions or relief;
  - Hydro relief measures are permanent or temporary; and
  - All relief should be passed on to tenants, or just a portion of the relief (e.g., global adjustment fund, 8% rebate, any other relief).

Support for Tenants – Potential RTA Hydro Relief Measures / Other Considerations (cont'd)

- As part of Climate Change Action Plan, MHO has been directed to mitigate the impact of carbon costs on tenants, and is proposing to prevent landlords from charging above-guideline rent increases for extraordinary utility costs increases.
  - May seem unfair that landlords are required to reduce rents or provide relief when utility costs decrease but cannot increase rents when utility costs increase.
- Relief would be limited to certain segments of tenant population:
  - Post-1991 buildings are exempt from the Rent Increase Guideline and landlords could negate any savings to tenants in these buildings through a higher subsequent rent increase.
    - Over 19% of tenant households are estimated to live in post-1991 private rental units including individually rented condos; a high proportion may already pay for electricity separately.
  - Relief may not be required for social housing tenants:
    - Most social housing tenants (80%) pay as per utility scales, which covers electricity usage other than electric heat; and
    - Utility scales were last updated in 2000 and are reflective electricity prices at that time.
- MHO, working with ENERGY and MAG will report back in Spring 2017 with options for electricity rate mitigation for tenants.

Legislative Authority – Considerations

GA Smoothing

- **Amendments to *Electricity Act, 1998* (EA) and *Ontario Energy Board Act, 1998* (OEBA)**
  - The OPG Trust will require authority to recover principle, interest and administrative costs through GA from customers.
  - Legislation would authorize IESO to collect amounts on behalf of the OPG's SPV/Trust and settle accounts with the OPG Trust as a service provider. Regulatory amendments to GA Regulations would require IESO to:
    - Separately settle and track amounts received from the SPV/Trust to lower GA (including maintaining variance accounts).
    - Separately settle and track amounts paid back to the SPV/Trust (including maintaining variance accounts).
    - Distributors would continue to collect from consumers and settle with IESO. Generators would continue to be paid by IESO.
  - OEBA-related amendments would allow for OEB oversight. Light touch would focus on the borrowing entity's recovery of administrative costs and its calculation of amounts owing in a period. Heavy touch would give OEB the discretion to determine repayment over time.
  - The certainty of the legislative mechanism to recover the debt and interest, and the extent of discretion of the OEB to alter either amount over time, will have impacts on the availability and cost of capital.
  - Further legal analysis is required as the GA option is developed.

Class B

- **Targeted Lowering ICI Threshold Below 1 MW (to 500kW):** Regulatory amendments (O.Reg. 429/04) will be required to address program details.

Legislative Authority – Considerations (cont'd)

Electricity Support Programs

- **RRRP, OESP and First Nations Rate:** Moving costs to the tax base and creating a First Nations rate will require amendments to OEBA. Regulatory amendments (442/01, 314/15, 275/04) will be required to address program details.

- **Affordability Fund:** In order to implement new affordability fund the Province would need to enter into Transfer Payment Agreements with qualified third parties to administer the fund.

Bending the Future Cost Curve of Electricity

- No specific legislative or regulatory amendments identified. IESO may need to amend market rules. Agency MOUs/MOAs may require amendment.

Communication Plan

Objective:

- Demonstrate Ontario's commitment to lower electricity costs for ratepayers through new rate relief initiatives.

Strategic Approach

- High-profile Premier's announcement and Technical Briefing
- News release, backgrounders, QA's are being prepared.
- A multimedia marketing and advertising campaign is being prepared on the topic of rate mitigation for electricity consumers.

---

For the meeting today, there is a short two-page summary attached as well as a more detailed document on the legislation.

Kind regards,

Adam Prokop

Legislation Overview

Article 1 - Basis of the act

- **Intergenerational fairness** can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Regulated Consumers on an equitable and cost effective basis.
- It has been determined that the **useful lives of many of the assets** developed under the Green Generation Initiative will **be in excess of the respective terms of their respective procurement contracts**.

Article 2 – Definitions

- **Transition charge** will be a **volumetric rate.**
- Suggests that there be a separate class, e.g., **Fair Hydro Eligible Consumers** or **Regulated Consumers**, used to define those who are eligible for the Fair Hydro Plan as it is not identical to RPP or OREC customers.
- There is a true-up clause that allows for any differences between actual and estimate costs to be recovered from (or returned to) ratepayers.

Article 4 – Transition Charges

- "**Transition Charge**" vaguely refers to all costs under the financing plan.
- Until paid by regulated consumers, the transition charge is a **non-bypassable indebtness** of the Regulated Consumer **to the Regulatory Asset Owner**.
    - Independent of other charges on a consumer's bill.
    - Irrevocable except for a manifest calculation error.
    - "In no case shall a funding obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan".
- The legislation determines the attribution methodology (i.e., how much each customer pays) for recovering the transition charges through the fair allocation plan, as well as the actual transition charges.
- The LDCs estimate the regulatory assets (consisting of the deferred charges) during the beginning of the period and remit this information to OEB.
- **Invoicing of Transition Charges**
    - Each LDC determines the transition charge, and before 35 days prior to the start of the reference period, must provide the OEB written notice of its estimate to OEB.
    - The OEB determines the allocation factor which is based on the legislation – what the Fair Hydro recovery rate will be on a volumetric basis. No later than 20 days before the reference period starts, the OEB informs each LDC of the charge for each consumer.

Article 5 – Collections and Remittances

- Essentially, the transition charges will be collected by LDCs and other agents similar to how other costs are recovered from ratepayers.
- On the last business day of each month, Servicer shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Absolute Assignees an amount equal to less of obligations and collections.
    - Daily remittance was suggested as "US rating agencies favour daily remittances".
- Under the legislation, sequestration may be permitted if collecting agents such as LDCs are not performing their duties.

Article 6 – Regulatory Asset

- There is no requirement for the OPG Trust to purchase regulatory assets from IESO
- It is suggested that there be a restriction on the sale of regulatory assets only to "Financing entities controlled by a single entity".
- Suggested that there be a time limit on the ability of IESO to create additional Regulatory Assets (10 years suggested) – in the Energy projections repayments start being made in 2026.
- Regulator asset owners have the right to bill, invoice, collect, and receive Transition Charges
    - This include **the right to determine the amount of Transition Charges** in accordance with the act.
    - It has not been decided if regulatory asset owners will be able to chase after individual consumers for payments or provide notice of amounts required for recovery by the OEB.

        - **OEB would be required to accept the amounts required for recovery for purposes of determining the amount of Transition Charges to be charged to consumers.**
    - Classifying the intangible asset as personal property upon which a pledge can be made.
        - Basically secures the rights of the regulatory assets as colalteral to the credit holders.

Article 7 – Fair Allocation Plan

- Allocation principles
    a. **Inflation period**: (between November 2017 – and April 2022) bill increases need to be capped at inflation (assumed at 2% for modeling purposes)]
    b. [**Transition Period**: (May 2022- April 2027) bills increased at a **consistent rate which is set so that the borrowing will not exceed the Trust's capacity**, which is determined by the Finance Service Manager (i.e., OPG**)**]
    c. [**Amortization Period**: (May 2027-April 2047) equitable distribution of **Finance Amount** among Regulated Consumers]
- The Province determines what is considered "equitable distribution" with **sole and absolute discretion**.
- The Province can terminate the plan as long as it does not impair any regulatory asset, outstanding funding obligation, or any transition charges.

Article 8 – The IESO Funding Shortfall

- The IESO is only allowed to sell (i.e., a disposition) its regulatory asset to OPG if **OPG confirms in writing that the disposition complies with the financing plan** and is supported by evidence of the related funding obligations.

Article 9 – The Financing Plan

- **OPG is the entity with the power to prepare, implement, and amend the financing plan for OPG Trust.**
- **OPG has the right to withdraw its financing plan at any time** if it determines that implementing the Financing Plan in such manner would not be in the best interests of OPG Trust.
- OEB has been suggested to review the financing plan charges (although an attested by an officer from OPG has been suggested as a replacement).

Article 10 – Compliance Matters

- The legislation is attempting to have the OPG Trust mechanism excluding from OPG's rate regulation and any rate setting process except for any operating fees that me be received by OPG (i.e., any actual profits earned in excess of the cost of financing).

Article 11 – Province's role

- Legislation to ensure that Province cannot interfere
- Still considering if a guarantee needs to be in place in case there is a change in law, or if there is a market disruption.
- Province must compensate losses from interference.

Article 12 and 13

- If any conflict from laws, this legislation governs the **conflict**.
- **Severability** – if one part of the act is unconstitutional, this does not affect the other parts of the act.

Schedules 1, 2 and 3

- Nothing material for estimates and only guidelines for the Financing Plan.

Legislation Overview

Article 1 - Basis of the act

- Intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Regulated Consumers on an equitable and cost effective basis.
- It has been determined that the useful lives of many of the assets developed under the Green Generation Initiative will be in excess of the respective terms of their respective procurement contracts.

Article 2 – Definitions

- Transition charge will be a volumetric rate.
- **"Funding Obligation**" means, in respect of an Absolute Assignee, each payment obligation (including, without limitation, each obligation to pay: principal, interest, premiums and other financing charge payments; pass-through payments; payment obligations arising under or in respect of derivatives; payment obligations owing to service providers, Financial Services Managers, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all Additional Funding Charges) incurred by or on behalf of the Absolute Assignee under the Financing Plan, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.
- **Financing Plan**:
    - Only a "guideline is provided".
    - The financing plan can be amended in accordance with Article 9, from time to time, by OPG.
- Suggests that there be a separate class, e.g., **Fair Hydro Eligible Consumers** or **Regulated Consumers**, used to define those who are eligible for the Fair Hydro Plan as it is not identical to RPP or OREC customers.
- There is a true-up clause that allows for any differences between actual and estimate costs to be recovered from (or returned to) ratepayers.

Article 4 – Transition Charges

- "**Transition Charge**" means, the amount recoverable from a Regulated Consumer in respect of a Reference Period, being the Period Finance Charge as allocated to such Regulated Consumer in accordance with Article 4(3) on a monthly basis.
    - "**Period Finance Charges**" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount (b) the True-Up Amount in respect of the applicable True-Up Period and (c) an adjustment amount as may be prescribed to account for estimated collection shortfalls and collection delays in respect of amounts under (a) and (b).
    - "**Finance Amount**" means, for a Reference Period, the sum (without duplication) of the following amounts that are or become payable during the Reference Period in respect of all Absolute Assignees
        - (a) **Repayments**; a payment by an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.
        - (b) **Net Funding Costs**: the amount by which (a) the aggregate of all interest, scheduled principal and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Absolute Assignee during the Reference Period in respect of its Funding Obligations
        - **(c) Redemption Amounts:** the amount payable by or on behalf of an Absolute Assignee to redeem, prepay or repurchase a **Funding Obligation** incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.
        - (d) **Finance Reserve Deposits**: the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment

of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan

- (e) **Additional Funding Charges:** the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by or on behalf of the Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan

- Until paid by regulated consumers, the transition charge is a **non-bypassable indebtness** of the Regulated Consumer **to the Regulatory Asset Owner**.
  - Independent of other charges on a consumer's bill.
  - Irrevocable except for a manifest calculation error.
  - "In no case shall a funding obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan".
- The legislation determines the attribution methodology (i.e., how much each customer pays) for recovering the transition charges through the fair allocation plan, as well as the actual transition charges.
- The LDCs estimate the regulatory assets (consisting of the deferred charges) during the beginning of the period and remit this information to OEB.
- **Invoicing of Transition Charges**
  - Each LDC determines the transition charge, and before 35 days prior to the start of the reference period[1], must provide the OEB written notice of its estimate to OEB.
  - The OEB determines the allocation factor which is based on the legislation – what the Fair Hydro recovery rate will be on a volumetric basis. No later than 20 days before the reference period starts, the OEB informs each LDC of the charge for each consumer.

Article 5 – Collections and Remittances

- Essentially, the transition charges will be collected by LDCs and other agents similar to how other costs are recovered from ratepayers.
- On each Settlement Date[2], Servicer shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Absolute Assignees an amount equal to the Investment Remittance[3] for the related month.
  - Daily remittance was suggested as "US rating agencies favour daily remittances".
- Under the legislation, sequestration may be permitted if collecting agents such as LDCs are not performing their duties.

Article 6 – Regulatory Asset

- There is no requirement for the OPG Trust to purchase regulatory assets from IESO
- It is suggested that there be a restriction on the sale of regulatory assets only to "Financing entities controlled by a single entity".
- Suggested that there be a time limit on the ability of IESO to create additional Regulatory Assets (10 years suggested) – in the Energy projections repayments start being made in 2026.
- Regulator asset owners have the right to bill, invoice, collect, and receive Transition Charges
  - This include **the right to determine the amount of Transition Charges** in accordance with the act.
  - It has not been decided if regulatory asset owners will be able to chase after individual consumers for payments or provide notice of amounts required for recovery by the OEB.

[1] "Reference Period" means (a) the period from (and including) the Measurement Date to (and including) October 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

[2] Last business day of any month.

[3] Lesser of the sum of funding obligations due and payable by all absolute assignees in the month, and the actual payments remitted.

        - **OEB would be required to accept the amounts required for recovery for purposes of determining the amount of Transition Charges to be charged to consumers.**
    - Classifying the intangible asset as personal property upon which a pledge can be made.
        - Basically secures the rights of the regulatory assets to the credit holders.

Article 7 – Fair Allocation Plan

- Allocation principles
    a. **Inflation period**: (between November 2017 – and April 2022) bill increases need to be capped at inflation (assumed at 2% for modeling purposes)]
    b. [**Transition Period**: (May 2022- April 2027) bills increased at a **consistent rate which is set so that the borrowing will not exceed the Trust's capacity**, which is determined by the Finance Service Manager (i.e., OPG**)**]
    c. [**Amortization Period**: (May 2027-April 2047) equitable distribution of **Finance Amount** among Regulated Consumers]
- The Delegate (the Province) determines what is considered "equitable distribution" with **sole and absolute discretion**.
- The Province can terminate the plan as long as it does not impair any regulatory asset, outstanding funding obligation, or any transition charges.

Article 8 – The IESO Funding Shortfall

- The IESO is only allowed to sell (i.e., a disposition) its regulatory asset to OPG if OPG confirms in writing that the disposition complies with the financing plan and is supported by evidence of the related funding obligations.

Article 9 – The Financing Plan

- OPG is the entity with the power to prepare, implement, and amend the financing plan for OPG Trust (or any replacement entity).
- OPG has the right to withdraw its financing plan at any time if it determines that implementing the Financing Plan in such manner would not be in the best interests of OPG Trust.
- OEB has been suggested to review the financing plan charges (although an attested by an officer from OPG has been suggested as a replacement).

Article 10 – Compliance Matters

- The legislation is attempting to have the OPG Trust mechanism excluding from OPG's rate regulation and any rate setting process except for any operating fees that me be received by OPG (i.e., any actual profits earned in excess of the cost of financing).

Article 11 – Province's role

- Legislation to ensure that Province cannot interfere
- Still considering if a guarantee needs to be in place in case there is a change in law, or if there is a market disruption.
- Province must compensate losses from interference.

Article 12 and 13

- (2) Conflict of law – In the event of conflict between this Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Act shall govern to the extent of the conflict

- **Severability** - If any Article, Section, paragraph or subparagraph of this Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections.

Schedules 1, 2 and 3

- Nothing material for estimates and only guidelines for the Financing Plan.

Subject:	Legislation rates and OEB
Date:	Tuesday, April 18, 2017 5:08:55 PM
Attachments:	Transition Charges draft legislation.docx

For the transition charges, this is my initial understanding based off of the latest draft legislation

- The legislation determines the attribution methodology (i.e., how much each customer pays) for recovering the transition charges through the fair allocation plan, as well as the actual transition charges.
- The OEB determines the allocation factor which is based on the legislation.
- The LDCs estimate the regulatory assetS (consisting of the deferred charges) during the beginning of the period and remit this information to OEB.
- There is a true-up clause that allows for any differences between actual and estimate costs to be recovered from (or returned to) ratepayers.
- The legislation is attempting to have the OPG Trust mechanism excluding from OPG's rate regulation and any rate setting process except for any operating fees that me be received by OPG (i.e., any actual profits earned in excess of the cost of financing).

Thus, my view is that OEB is acting more of an enforcer of the legislation and rates rather than setting them. The finer points have been included in the word file attached.

Kind regards,

Adam Prokop

adam.prokop@ofina.on.ca

Key parts from legislation for Transition Charges

(3) Calculation and Attribution of Transition Charges – Not later than 25 days prior to the first day of a Reference Period, the OEB shall apply the Attribution Methodology to determine the allocation of the Transition Charge for each Regulated Consumer. [NTD: We think the OEB would be determining the Fair Hydro recovery rate (on a volumetric basis) that distributors would then be required to charge to consumers]

Article 9

(2) Principles and Parameters of the Financing Plan – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions having regard to the principles and parameters set forth in Schedule 3.

(3) OEB Approval – Any Additional Funding Charge payable to the Financial Services Manager in respect of services provided by the Financial Services Manager (other than third party costs) shall be subject to review and approval by the OEB.

(7) **Non-Recourse** – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, any Alternative Collection Agent, the Financial Services Manager, the OEB or Her Majesty in right of Ontario, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount.

Article 10 - As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article and any potential role for the Auditor General is still under consideration.

(1) [OPG's Rate Settings – When setting other rates for or in respect of OPG, the OEB shall not take into account (a) the administrative or servicing fees charged by OPG as Financial Services Manager [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services]; (b) the cost consequences to OPG of being the Financial Services Manager; or (c) the consequence of OPG consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.][1]
