BPS debt for OFA 2016-17.xlsx

Good day John,

Attached you will find an e-copy of OFA's section, from 2016-17 FSD&A that was distributed yesterday. (password protected).

Additionally, School Boards (SB) discovered an error in their 2016 Budget (Interest and Investment Income Line). Attached you will find the updated "BPS Debt to OFA" spreadsheet.

As a result of this change, SB revised their Q&A to reflect the changes in the Interest and Investment Income (please see below).

Please let us know if there is any additional information that you require.

Best regards,

Ruslan

Q1. Why is net interest expense (net of interest and investment income) in 2016-17 $17 million (or 4.4%) lower than projected in the 2016 Budget?

A10. The decrease is mainly due to:
- $15 million higher investment income than expected;
- $2 million lower interest expense than expected.

Ruslan,

Some of the text is general and still valid, so we'd like to keep it as it is. For other updates, we'd rather wait for the final net debt and revenue numbers before making the update.

We do have small edits in the attached though.

Thanks.

John

Good day John,

Hope that you are doing well.

Attached you will find Cindy Veinot's comments on the Key Financial Ratio section (FSD&A). Internal password is used.

Can you please share the updated document by noon tomorrow? We would like to incorporate your latest version in our next distribution (July 25th).

Thank you, and have a good day.

Ruslan

Notes:

[1] Presentation of amounts reported as "Plan" in the 2016 approved Budget have been reclassified to reflect a presentation change for hospitals, school boards and colleges. These BPS organizations are now consolidated on a line-by-line basis, as described in "Accounting Changes."

[2] Actual results for 2015–16 have been restated to reflect both the presentation change as described in footnote 1 as well as the impact of reversing regulated accounting for net pension assets of jointly sponsored pension plans, as described in "Accounting Changes."

Numbers may not add due to rounding.

Comparison to the 2016 Budget plan

Total spending for 2016–17 came in at $141.7 billion, which was $0.1 billion lower than the forecast in the 2016 Budget plan. Program spending was $130.0 billion, up $0.6 billion from the budget of $129.4 billion. Spending in the health, justice, children's and social services and other programs was higher than planned, offset by lower spending in postsecondary and training. Interest on debt expense was $0.7 billion below plan in 2016–17, due mainly to lower-than-forecast interest rates, and cost-effective borrowing and debt management. [OFA to update, including reference to deficit]

Comparison to the 2015–16 fiscal year

Year-over-year, total spending rose by $2.0 billion, or 1.5 per cent, going from $139.7 billion to $141.7 billion. Increases in the health care, education, postsecondary and education, and children's and social services sectors accounted for most of the increase. Interest on debt rose by 1.0 per cent, from $11.6 billion to $11.7 billion, reflecting the increase in total debt from 2015–16 to 2016–17. [OFA]

Comparison to prior year and earlier years [OFA/OEP-To be updated]

Total revenues were up/down $XX billion, or XX per cent, from the previous year.

- Taxation revenues grew/fell by $XX billion, or XX per cent, reflecting […].
- Net income from GBEs [higher/lower] in 2016–17 by $XX billion, mainly due to […].

[Higher/lower] transfers under the […] transfer programs accounted for most of the $XX billion year-over-year increase in Government of Canada transfers. [explanation to be updated]

Change in ownership of energy sector government business enterprises [OFA]

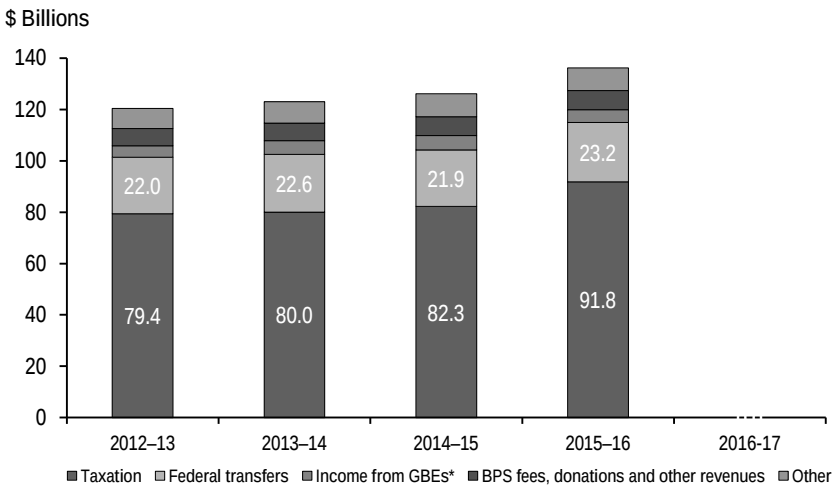
Hydro One secondary offering

In April 2016, the Province completed a secondary offering of Hydro One common shares. The Province sold 14.0 per cent of Hydro One's common shares at a price of $23.65 per share, generating gross proceeds of $2.0 billion. The Province reported a gain of $0.5 billion from the offering and, in March 2017, the government credited the Trillium Trust with $0.5 billion. As of March 31, 2017, the Province owned approximately 70 per cent of Hydro One's common shares.

An additional gain of $70 million was deferred in connection with the purchase by Ontario Power Generation (OPG) of nine million Hydro One common shares through the secondary offering. OPG purchased these shares to distribute to eligible employees as part of future share delivery obligations under collective agreements.

Hydro One Brampton sale

In February 2017, the Province sold its interest in Hydro One Brampton through a sale of shares to Alectra Utilities. As a result of sale, the Province reported a gain of $XX million. The government has committed to crediting the net proceeds from the sale to the Trillium Trust.



The sale of Hydro One Brampton also triggered a one-time payment-in-lieu of taxes (PILs) from Alectra Utilities to the Ontario Electricity Financial Corporation (OEFC), in connection to a step-up in the basis of Hydro One Brampton's assets.

Revenue trend [Chart to be updated]

Chart 2 shows the recent trends in revenue for the Province's major revenue sources.

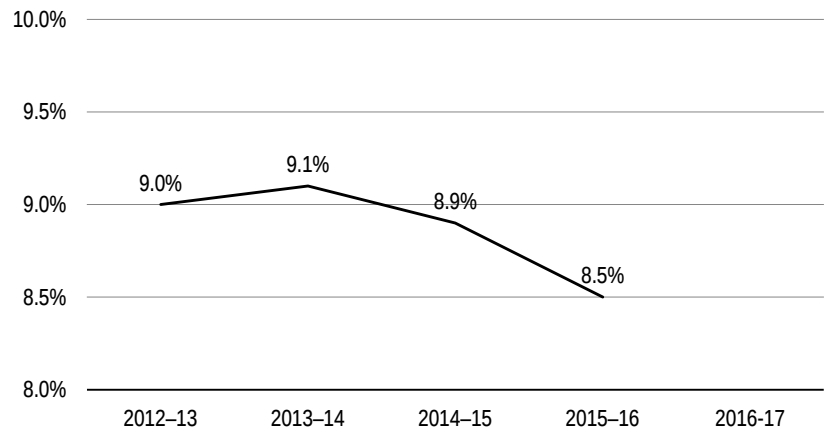
Revenue by source — 5-year comparison

Chart 2

* Government business enterprises (Liquor Control Board of Ontario, Ontario Lottery and Gaming Corporation, Ontario Power Generation Inc., Hydro One Limited and Brampton Distribution Holdco Inc.).

Interest costs [OFA]

Under line-by-line consolidation of BPS organizations, net interest expense on the debt of hospitals, school boards and colleges previously reported as an expense in their respective sector is now included in the interest on debt expense.



Interest on debt expense was $0.7billion below plan in 2016–17, mainly as a result of lower-than-forecast interest rates, the lower-than-planned deficit and cost-effective borrowing and debt management.

Interest expense grew from $11.6 billion in 2015–16 to $11.7 billion in 2016–17 (see Table 2).

Between 2012–13 and 2016–17, interest expense has trended upwards, reflecting higher borrowings required to fund the deficit and investments in infrastructure. Chart 6 shows that although interest costs have grown in absolute terms, they have steadily fallen as a percentage of the Province's revenues. The interest on debt-to-revenue ratio is now at its lowest level since 1990–91 [OFA to confirm]. This is mainly due to historically low interest rates, coupled with cost-effective debt management.

Debt servicing costs to total revenue — 5-year trend

Chart 6

[Chart to be updated]

Liabilities

Debt [OFA]

Debt and other long-term financing make up the largest share of liabilities. Debt increased by $XX billion in 2016–17 to $XX billion by year-end, primarily to finance the operating deficit and investments in infrastructure.

Net debt as at March 31, 2017, was $XX billion, $XX billion lower/higher than forecast in the 2016 Budget. Table 6 summarizes how the Province used its net new financing in 2016–17.

Use of new financing by the Province, 2016–17 ($ Billions)	Table 6
Operating deficit and other transactions[1]	XX
Cash invested in capital assets owned by the Province and its consolidated organizations, including hospitals, school boards and colleges[2]	XX
Increase in the Province's cash and investments	XX
	XX
Increase in other long-term financing[3]	XX
Net new financing	XX

Notes:

1 The Province's operating deficit of $XX billion was offset by a net $XX billion in changes to assets and liabilities that provided cash for operating purposes. See the Consolidated Statement of Cash Flow.

2 New investments of $XX billion less proceeds of $XX billion from the sale of tangible capital assets.

3 Including net increase in financing of capital projects through AFP. See Note 4 to the Consolidated Financial Statements.

The government completed an annual borrowing program of $27.0 billion in 2016–17. This yielded net new financing of $12.4 billion after adjustments and repayment of $21.9 billion in existing debt that matured. [To be updated]

Key Financial Ratios [OFA]

The use of key measures of financial position helps readers of the Annual Report assess the financial position of the Province. Through the levels and trends of these measures, readers are able to gauge the impacts of economic and other events on the Province's finances, as well as how the government has responded. The ratio, and the level of each, over the past five years are outlined in Table 7.

Key Financial Ratios — Table 7

as at the end of the fiscal period

		Restated 2012–13	Restated 2013–14	Restated 2014–15	Restated 2015–16	2016–17
Sustainability	Net Debt to GDP (%)	37.2%	38.6%	39.5%	XX%	XX
	Net Debt to Total Revenue (%)	210.1%	217.9%	226.1%	XX%	XX
	Net Debt per Capita ($)	$ 18,718	$ 19,644	$ 20,746	$ XX	$ XX
Flexibility	Debt Charges to Total Revenue (%)	9.0%	9.1%	8.9%	XX%	XX
	Own-Source Revenue to GDP (%)	14.5%	14.5%	14.4%	XX%	XX
Vulnerability	Federal Transfers to Total Revenue (%)	18.3%	18.4%	17.4%	XX%	XX
	Foreign Currency Debt to Total Debt (%)	24.3%	22.9%	20.9%	18.8%	XX
	Unhedged Foreign Currency Debt (%)	0.7%	0.5%	0.3%	0.3%	XX

Notes:

Actual results for 2012–13 to 2015–16 have been restated to reflect 1) the presentation change for hospitals, school boards and colleges. These BPS organizations are now consolidated on a line-by-line basis, as described in "Accounting Changes"; 2) the impact of reversing regulated accounting for net pension assets of jointly sponsored pension plans, as described in "Accounting Changes".

Measures of sustainability

Net debt provides a measure of the future government revenues that will be required to pay for the government's past transactions. Net debt as a percentage of the Province's GDP shows the financial demands on the economy resulting from the government's spending and taxation policies. A lower ratio of net debt-to-GDP indicates higher sustainability.

The Province's net debt-to-GDP ratio was XX per cent at the end of fiscal year 2016–17. Between 2012–13 and 2016–17, because net debt grew more quickly than GDP, the ratio increased from 37.2 per cent to XX per cent.

The government continues to maintain a target of returning net debt to GDP to the pre-recession level of 27 per cent. An important component in achieving this is to balance the budget. Debt is incurred for two main reasons: to finance deficits and to invest in capital assets. The government plans to invest $156 billion in capital over 10 years. These capital investments will be amortized over a period of time that corresponds to the useful life of the assets. After balancing the budget, increases in debt will be limited to the difference between the cash investment to build the assets and the amortization, which is a non-cash expense. [OFA – to update]

The government's plan to reduce the ratio of net debt to GDP therefore hinges on both balancing the budget and investing in capital assets to help the economy grow, both of which will help achieve the 27 per cent target.

The ratio of net debt to total revenue is another measure of sustainability, since it shows the future revenue that is required to pay for past transactions and events. A lower net debt-to-revenue ratio indicates higher sustainability. In 2012–13, the ratio was 210.1 per cent. It rose to 226.1 per cent in 2014–15, as net debt grew more quickly than revenue. Even with the change in the accounting treatment for pension assets, the ratio fell to XX per cent in 2016–17, indicating that total revenues increased at a greater rate than did net debt.

Measures of flexibility

The ratio of interest on debt to total revenue shows the share of provincial revenue that is being used to pay borrowing costs and is thus not available for programs. A lower ratio indicates that a government has more flexibility to direct its revenues to programs. The ratio has steadily fallen for Ontario over the past five years, from a high of 9.0 per cent in 2012–13 to the current level of XX per cent. Lower interest rates, as well as the Province's strategy of extending the term of its borrowing program and locking in low interest rates for a longer period has also contributed to lower interest costs. This strategy has extended the weighted average term to maturity of provincially issued debt from approximately 9 years in 2009–10 to 14 years in 2016–17. [OFA]

Own-source revenue as a share of the provincial GDP shows the extent to which the government is using funds from the provincial economy collected through taxation, user fees and other revenue sources it controls. Too high a taxation burden makes a jurisdiction uncompetitive, so increases in the ratio can reduce future revenue flexibility. Ontario's ratio was stable between 2011–12 and 2014–15. The increase from 15.1 per cent in 2015–16 to XX per cent in 2016–17 was largely due to the strong growth in tax and other revenues. This caused own-source revenues to increase more sharply than GDP.

Measures of vulnerability

Transfers from the federal government as a percentage of total revenue are an indicator of the degree to which the Province relies on the federal government for revenue. A very high ratio shows that a provincial government is very reliant on federal transfers, a source of revenue over which it has limited or no control, and is therefore vulnerable to shifts in federal policy on transfers. Ontario's highest share of revenue from federal transfers in the past five years was XX per cent, in 201X–1X. The lowest was XX per cent, in 201X–1X. The gradual decline largely represents the expiration of time-limited federal transfers, including the HST transition payment, and the maturing of federal stimulus programs put in place following the global economic crisis in 2008. [to be updated]

Foreign currency debt to total debt is a measure of vulnerability to changes in foreign currency exchange rates. Accessing borrowing opportunities in foreign currencies allows Ontario to diversify its investor base and take advantage of lower borrowing costs. It also ensures that the Province will continue to have access to capital in the event that domestic market conditions become more challenging. Ontario manages foreign currency risk by hedging its exposure to Canadian dollars through the use of financial instruments, which is called hedging. Effective hedging has allowed the Province to consistently limit its exposure to foreign currency fluctuations to 0.6 per cent of debt issued for provincial purposes in 2013–14, declining to 0.2 per cent in 2016–17. [to be updated]

Managing interest on debt

In addition, the interest on debt expense of $11.7 billion reported for 2016–17 was an improvement of $0.7 billion over the forecast of the 2016 Budget. Through a combination of lower-than-forecast deficits and borrowing requirements, lower-than-forecast interest rates and cost-effective debt management, interest on debt has consistently come in below forecast in each year since the 2010 Budget. Hi Ken, I've attached much of the debt content contained in our chapter if you'd like to have a look in advance of tomorrow's sign-off (particularly the material covering the legislated pension adjustment as it is new this year).

The order is not quite the same as seen in the actual document

Thanks,
Daniel

Intro

The Province, adopting a prudent and risk averse approach, has included the pension adjustment in its expense projections in accordance with the legislated basis of accounting adopted for the 2015-16 Public Accounts. The projected pension adjustment of $2.2 billion for 2016-17 is entirely non-cash and does not impact the Province's projected borrowings as well as its total debt.

The pension adjustment increases non-cash adjustments, allowing the Province to reduce both short – term and long- term borrowings from what was projected in the 2016 Budget

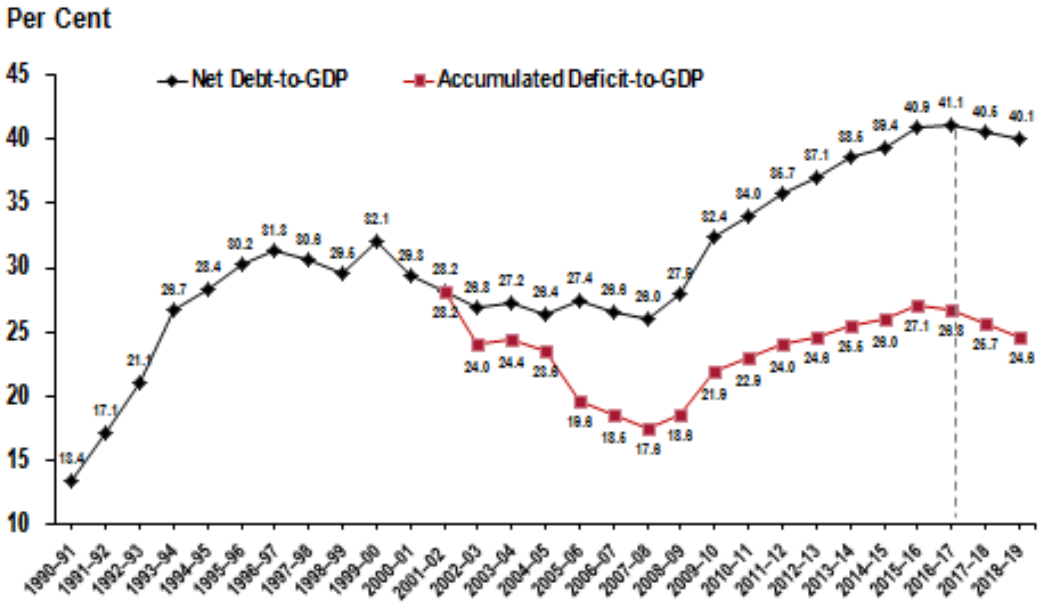
Net Debt-to-GDP

Total debt, which represents all borrowing without offsetting financial assets, is projected to be $328.6 billion for March 31, 2017 (March 31, 2016, $327.4 billion).

Ontario's net debt is the difference between total liabilities and total financial assets. It is projected to be $317.9 billion for March 31, 2017 (March 31, 2016, $305.2 billion). The net debt projection for March 31, 2017, was forecasted to be $308.3 billion in the *2016 Budget,* $311.5 billion in the *2015 Budget* and $317.2 billion in the *2014 Budget.*

The legislated pension adjustment for the 2015-16 Public Accounts resulted in the net debt-to-GDP ratio increasing to 40.9 per cent as of March 31, 2016 and is projected to be 41.1 percent as at March 31, 2017. If not for this adjustment, the ratio at the end of the 2015-16 fiscal year would have remained level with the 2014-15 ratio at 39.4 percent. Likewise, the ratio for March 31, 2017 would have increased slightly to 39.8 per cent and begin to decline from 2017-18 onwards.

The legislated pension adjustment that increased net debt by $10.7 billion in 2015–16 has no impact on the Province's total debt or current and future borrowings.



The Province is forming an independent expert panel to deliver advice and recommendations to the government as to the application of public sector accounting standards to Ontario's pension assets. The report is expected later this year.

Including the legislated pension adjustment of $10.7 billion, accumulated deficit is projected to be $207.0 billion as at March 31, 2017. The projected difference of $110.9 billion between net debt and accumulated deficit is due to the Province's consistent level of investment in infrastructure, as shown by the increase in tangible capital assets.

About 64 per cent of the increase in net debt from 2008–09 to 2015–16 is due to the deficit, with investments in capital assets responsible for most of the balance. Once a balanced budget is reached, the increase in net debt will be limited to the difference between cash investments in capital assets and amortization.

These investments will work to increase economic growth and will result in GDP growing more quickly than debt, thereby helping to lower the net debt-to-GDP ratio to its pre-recession level.

CHART 3.XX **Net Debt-to-GDP and Accumulated Deficit-to-GDP**

Notes: Historical net Debt-to-GDP was revised to reflect historical GDP released by Statistics Canada in November 2015. Net Debt has been restated to include Broader Public Sector Net Debt, starting in 2005–06.
Source: Ontario Ministry of Finance.

Cost of Debt

The interest rate that Ontario pays on its debt has been steadily declining since 1990–91, when the effective interest rate (on a weighted-average basis) on total debt was 10.9 per cent. It was 3.6 per cent as at March 31, 2016 and 3.7 per cent as at March 31, 2015.

The global decline in interest rates over the last 25 years cannot continue indefinitely. To protect itself from an increase in interest rates, the Province has continued to extend the term of its debt. Going back to the beginning of fiscal 2010–11, Ontario has issued $59.9 billion of bonds longer than 30 years to lock in low rates. As a result, the weighted-average term to maturity of long-term provincial debt issued has been extended significantly, from 8.6 years in 2008–09 to 14.2 years in 2015–16 and 15.1 years as at October 25, 2016.

For 2016–17, the impact of a one percentage point change in interest rates on IOD is approximately $350 million for the Province.

---

Hi Anna

Pls find attached my comments, not many since the references to net debt to GDP and IOD are minimal, also cc 'ing to Alex and John in case they have additional comments.

Thanks and Alex and John, if you do have comments pls provide to Anna before eod tomorrow.

Thanks

Ken k

A Shadow Budget for Ontario, 2018-2019

*Draft not for circulation

January 24, 2018

As Ontario enters an election year, the policy debate will likely involve the difficult choices the province faces regarding the fiscal outlook and long-term sustainability of a number of government programs. The budget the provincial government puts in place for the 2018-19 fiscal year will lay out a framework for the debate in the coming months.

To aid this debate, the C.D. Howe Institute has launched its inaugural Shadow Budget for Ontario, following similar Shadow Budgets at the federal level (see last year's edition from Robson, Laurin, and Wyonch 2017). This Shadow Budget shows that the fiscal course the province is currently on is unsustainable. This Shadow Budget would act to bring the long-term cost of government in line with the revenue-raising capacity of the province. It would balance increases in spending and cuts to poorly designed taxes with new ways to generate revenues and reducing spending on ineffective programs.

Although providing specific costing of programs is outside of the scope of this Shadow Budget, it presents an overview of policy directions that balance increases in spending with generating new revenues and cost-savings measures. This Shadow Budget proposes to:

- Restate the province's books to reflect the Auditor General's concerns about incorrect treatment of pension assets and electricity-sector debt;
- Reduce future expense growth to reach a balanced budget as soon as possible;
- Adopt long-term fiscal policy – which requires surpluses, not just balanced budgets – that meets the government's debt-to-GDP target ratio of 27 percent;
- Contain healthcare costs by extending capitated payments to family doctors and revising contractual arrangements with healthcare providers;
- Slow the increase in the minimum wage and focus on improving education and to create economic opportunities for Ontarians;
- Adopt an indigenous identifier in standardized test and oversample indigenous students to permit reliable rural-urban and district-level analysis;
- Modernize funding formulas for post-secondary education by taking outcomes into consideration;
- Reform the school curriculum with an emphasis on improving math performance;
- Open retailing for alcohol and marijuana and revising the tax scheme for both products;
- Adopt personal income tax reforms that reflect the cost of raising children, while reforming personal income taxes to lower high marginal rates, which occur even at low incomes;
- Replace targeted business tax breaks with lower provincial business property taxes to create a level playing field across the province and across different types of businesses;
- Rethink the fiscal relationship between municipal government and the province by retooling grants and transit governance while modernizing municipal financial reporting to match that of the province;
- Reduce the cost that governments impose on building new housing;
- Retain the plan to price greenhouse gas emissions, but re-focus the government plans to spend money raised by such a price away from cost-inefficient programs; and
- Seek out long-term cost savings in the electricity sector, as opposed to short-term fixes that only add to the long-term cost of energy.

Commented [KK1]: Incorrect is not an appropriate term, replace with "Government's"

The Fiscal Outlook

This Shadow Budget adopts the consensus view of the independent officers of the Ontario legislature – the Auditor General and Financial Accountability Office – as the authoritative outlook of the short-, medium-, and long-term fiscal outlook. While the government may claim to have balanced the budget for 2017-18,

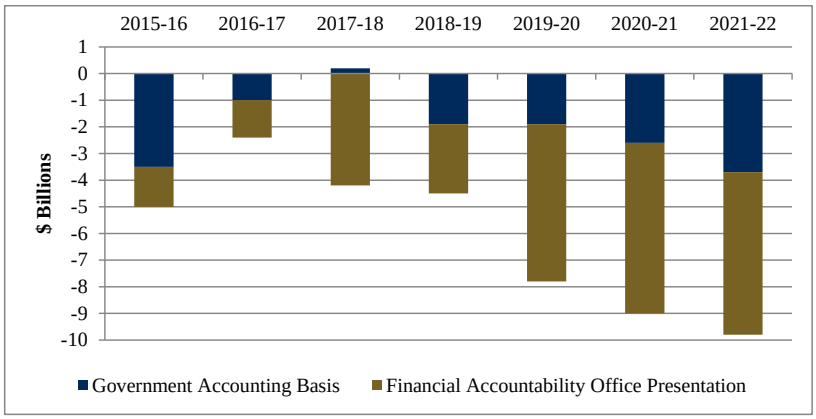
that declaration is in the eye of the beholder and the medium- and long-term fiscal outlook for Ontario is dire.

Cleaning up Ontario's Books – The Short Term Deficit Debate

The government has made the argument that it has reached a balanced budget. However, the Auditor General has two specific objections related to this claim because of the government's accounting treatment of pensions and whether the recent Fair Hydro Plan amounts to new spending.

The pension dispute centres on the government's treatment of the Ontario Teachers' Pension Plan (OTPP) and the Ontario Public Service Employees' Union Pension Plan (OPSEUPP). The province has decided to report the full asset value of the plan on the province's balance sheet, which neglects the fact that future retirees already have a claim on these assets. Doing so reduces the deficit and the Auditor General (2016) objects to this. Further, as Robson and Laurin (2016) argue, the government discounts OTPP and OPSEUPP liabilities by more than the plans do themselves. This understates the liabilities provincial taxpayers face.

However, the view of the Auditor General is not universally shared. The Ontario government appointed a Pension Asset Expert Advisory Panel to advise on the difference of opinion between the government and Auditor General. The Panel's Report (2017) argued that an asset does exist for the government, saying that the government does have sufficient access to the plan's assets, if even just through reducing contributions to the plans, to merit including it. However, given that we have taken the Financial Accountability Office's presentation of financial data, which is independent of both the government and the Auditor General, we have decided to use the presentation of provincial finances as recommended by the Auditor General.



Commented [KK2]: My understanding was that the FAO presented both the Government's accounting treatment as well as the AG on the pension assets, leaving the decision to the reader. This is however, an OPCD issue

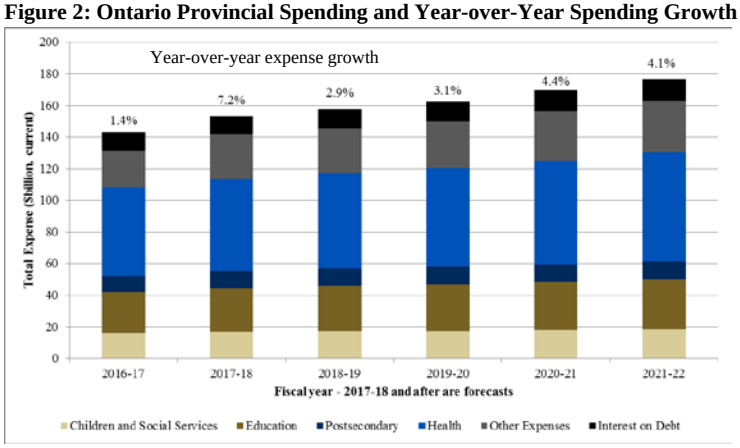
The second dispute hinges on the Fair Hydro Plan. As the Auditor General (2017a) points out, the government "is making up its own accounting rules" by creating an accounting asset for a government-controlled entity to offset the debt the province placed on another government-controlled entity. The asset the government created only exists because of legislation that gives a government entity the authority to collect higher prices in the future. The true value of this asset should be zero, or highly discounted, because of great uncertainty of the ability to collect higher prices in the future. For example, electricity markets may change because of technology, making it impossible for a central government agency to collect future revenues to pay this debt. As such, this debt should be reflected in the province's financial statements now. Incorporating the debt amount in today's books means that the proper accounting treatment would increase the deficit by $2.5 billion per year through to 2027.

Commented [KK3]: Likewise OPCD should comment since this is an accounting issue

This Shadow Budget would restate the province's books to reflect the Auditor General's concerns. It would restate the province's finances to show a deficit in the upcoming 2018-2019 fiscal year to be about $7 billion (Figure 1).

Figure 1: Ontario Budget Balance

Source: Financial Accountability Office of Ontario. Does not include reserve fund. 2017-18 and beyond are projections by the Financial Accountability Office.



Medium-term Fiscal Sustainability

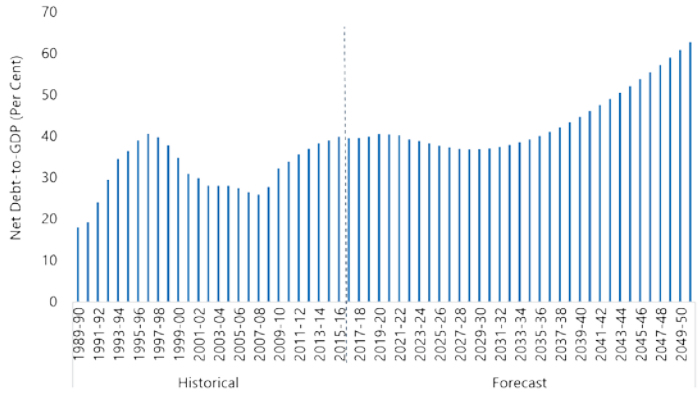
The question of whether there is a deficit for the 2017-18 fiscal year is far less important, from the point of view of the sustainability of public finances, than future trends. Under current trends, the deficit would rise to nearly $10 billion by 2021-22 (Figure 1), according to the Financial Accountability Office (2017a). These long-term deficits will return because of two main causes: the deficits the government should account for under the Fair Hydro Plan, as discussed above, and fast-rising expenses. Future revenues are not likely to grow as fast in the future as in previous years because of a number of factors, such as one-time revenues that have come in recently and economic growth that is likely to slow. Further, the Financial Accountability Office (2017a) argues that the government has made overly optimistic revenue forecasts that rely on above-trend income growth in the province and corporate income tax receipts.

The province can look to balance its budget in the near future in a number of ways. First, it can look to increase revenues. It can do so through short-term revenue gains such as sales of provincial assets – as this Shadow Budget will suggest in more detail below. Alternatively, it can raise tax rates, such as the provincial component of the HST. Or, it may seek more grants from the federal government. However, aside from hiking tax rates, none of these steps to increase revenues are directly within the control of the province or offer more than a single year's worth of solutions.

The province must address fast-growing spending to reduce future deficits. The first trend that this Shadow Budget would address is the projected pattern of total spending growth. 2017-18 spending is forecast to grow at over 7 percent over the previous year's spending. This kind of spending growth is unsustainable. Future expenses beyond 2020 of over 4 percent are also likely unsustainable. This Shadow Budget would aim to reduce future expense growth to reach a balanced budget as soon as possible.

Figure 2: Ontario Provincial Spending and Year-over-Year Spending Growth Rates

Source: Financial Accountability Office of Ontario



Long-term Fiscal Sustainability

Balanced budgets will not be enough for Ontario to be fiscally sustainable. The government has targeted a net debt-to-GDP ratio of 27 percent, a sensible target that is similar to that of the federal government of 25 percent of GDP. This Shadow Budget would continue pursuing such a target and take the necessary action to achieve it within 15 years. As the Financial Accountability Office (2017b) projects, achieving 27 per cent requires the province to run budget surpluses until 2033-34. If the province continues on the current trend, and not run first balanced budgets and then surpluses, the net debt-to-GDP ratio will reach 63 percent by 2050-51 (Figure 3).

Commented [KK4]: While this is no doubt a sensible target, the basis of the 27% is the reversion to the pre-recession net debt to GDP ratio.

Commented [KK5]: Without knowing the basis of this calculation we cannot comment

Figure 3: Net-Debt-to-GDP, Under Current Fiscal Trajectory

Source: Financial Accountability Office of Ontario

Figure 4: Interest Expense as a Share of Revenue

Source: Financial Accountability Office of Ontario

If the government doesn't tackle the long-term fiscal challenges, the cost of debt will take up an enormous share of total government revenues. Interest costs currently sit at 9 percent of revenues; at current trends, interest costs will increase to 22 percent in 2050-51 (Figure 4). If debt costs take up a large share of total revenues, that will leave less for other needs.

Commented [KK6]: This is incorrect interest is only 8.3% of revenues in 2016-17 and projected to increase to 8.4% in 2019-20

Health Policy

Given that Ontario spends roughly half of its own-source revenues (which excludes transfers from the federal government) on health, getting good value for money in healthcare will be critical for the financial and societal well-being of Ontarians. Although the province has successfully contained the annual growth of healthcare spending from 2010 to 2015 to 2.4 percent, on average, the rate of health spending is starting to tick upwards again alongside worries about emergency room overcrowding, long waits for long-term care beds as well as overburdened caregivers . Progress on addressing these issues – in addition to limiting public and private gaps in coverage for prescription drugs, dental services and mental health – while allocating reasonable increases for health spending, is a critical challenge.

Efforts to enable self-directed homecare services – such as recent moves to increase the number of hours nurses, personal support workers, and therapists will provide care in homes – should help alleviate the emergency room pressures for elderly patients, and these programs should continue to expand on their current trajectory. Relative to providers, patients with mild to modest physical disabilities are more likely to know the abilities of family and informal caregivers to offer care and their schedules, and which services they would prefer to have delivered by other health professionals. Although there are some legitimate concerns about patient's ability to choose among groups of healthcare professionals to meet their needs, there should still be enough flexibility around the use of self-directed home care budgets to ensure appropriate innovation from those delivering services. This means sufficient flexibility in how patients select and schedule professional help.

Ensuring that people without private insurance for dental, drug and mental health services get access to services is also a priority for healthcare policy. On this score, there are a number of avenues to ensure appropriate coverage and do so at minimal public cost, including the expansion of these services among the most vulnerable (Blomqvist and Busby 2016, Busby and Pedde 2014). This Shadow Budget would look at new ways to revise contractual arrangements with providers – pharmacists, dentists and dental hygienists, and phycologists – to improve the efficiency of spending in these areas.

Although government needs to spend more money to improve access to mental health services, more money alone will not ensure that all illnesses get treated in appropriate timeframes. It may be more advantageous to give a greater share of the overall budgetary spending on physiologists to hospitals and primary care doctors for outpatient needs.

The way in which the province pays for the delivery of health services matters. Paying hospitals, hospital-based doctors and necessary outpatient services for a needed intervention often results in silos of poorly coordinated care. This Shadow Budget would instead look at more bundled payments by procedure for hospital-based services (Sutherland and Hellsten 2017). And in primary care, this Shadow Budget would extend capitated payments to family doctors to include budgets for enrolled patient drugs, lab and diagnostic imaging budgets as part of the evolution in payment reforms for family doctors (Blomqvist and Busby 2011).

Labour and Education Policy

Many governments are struggling to respond to the challenges of precarious work – employment that is often more insecure and uncertain than traditional full-time employment, with greater prevalence for part-time work. Further, as wage gaps exist between temporary or part-time vis-à-vis full-time workers, policymakers have recently passed legislation intended to bridge these differences. While there are no ideal policy levers for addressing these issues, it should be recognized that, in general, increases to the minimum wage are a reasonable option available to policymakers. However, gradual and evaluated increases to the minimum wage are the best way to increase minimum wages over time. Ontario's recent, large increase in the minimum wage means that the right response for government should be to pause and evaluate. One particular concern is the impact on smaller municipalities that risk being most negatively affected.

This Shadow Budget would amend the current minimum wage in two ways, as recommended by Marchand (2017). First, it would allow for regional variation in minimum wages. This Shadow Budget would allow upper-tier and single-tier municipalities across the province the option to return to a lower minimum wage for a five-year period. New York has a similar policy, in which the minimum wage is highest in New York City than in other parts of the states. Second, this Shadow Budget would build a provision into the minimum wage legislation to reduce it in the case of a recession, as California has recently done.

As trade, technology and worker preferences continue to change the dynamic for skills desired by employers, a competitive labour force will need an abundance of core numeracy and literacy skills. For Ontario, the news on these scores is mixed. On literacy, the results are strong (EQAO 2015). In terms of numeracy, however, the results are alarming – only half of all grade 6 students in the province meet the provincial standard for numeracy and its OECD Programme for International Student Assessment (PISA) scores have plummeted over time, from 530 in 2003 to 509 in 2015, one of the largest drops among Canadian provinces, putting Ontario statistically below the average in Canada(Richards 2017). This needs

fixing. This Shadow Budget would continue the province's re-examination of the math curriculum and pedagogy, where the effectiveness of different pedagogies should be explored as potential causes (Stokke 2015). This Shadow Budget would also look at teacher preparedness and consider evaluating teacher knowledge in subject matter with the administration of student exams to teachers prior to the academic year. Insufficient results should require immediate intervention.

Furthermore, collecting, analysing, and reporting educational outcomes are essential to closing the achievement gap between more and less advantaged students. Including a question that identifies indigenous student in PISA tests is a great way to track educational achievement of indigenous students and help educators and policymakers to design more effective strategies to improve outcomes. The province should also oversample to ensure sufficiently large sample of indigenous student to produce reliable estimates at the district level and to perform urban/rural analysis (Richards and Mahboubi, forthcoming).

Many OECD countries consider Performance-Based Funding (PBF) systems for their post-secondary education, but Canadian provinces, including Ontario, lag behind in adopting this innovating way of financing. Usher (forthcoming) shows the benefits associated with PBF include less burden of funding negotiations, higher accountability of the post-secondary institutions, and greater competition between institutions, leading to a greater focus on results. A similar approach to competition in grants for research has been effective at improving the performance within universities, and should apply to universities themselves. The government needs to review its funding formula and learn from the experience of other developed countries.

Tax Policy

Commodity Taxation

Alcohol

In 2015-16, the Liquor Control Board of Ontario (LCBO) paid the provincial government a dividend of $1.9 billion. It also remitted $867 million to the federal and provincial governments in Harmonized Sales Tax, excise taxes and customs duties (LCBO 2016). In addition to the LCBO, there is a system of beer and off-winery stores, which operate as a quasi-monopoly thanks to government regulation. Masson and Sen (2014) find that freeing up alcoholic beverage retailing would result in increased government revenue, lower prices, and more convenience. They find that, other factors being equal, Western Canadian provinces with more beverage alcohol retail competition had 7 percent more per capita provincial alcohol profits than provinces with government-run monopolies. The province has begun to introduce beer sales at grocery stores. However, it has done so slowly with limits on the amount of sales by the store. This Shadow Budget would go further by auctioning licenses for other retail outlets. It would also auction licences for off-winery stores to other wineries and also to new wine retailers. The result would be increased provincial revenues and more choice for Ontario consumers.

This Shadow Budget would also revise taxation of alcoholic beverages. Currently, tax rates are fixed by type of beverage, currently ranging from 52 cents per litre to $1.06 per litre, depending on the type of manufacture, not alcohol strength. Wine is taxed as a percent of sale value and sprits are taxed at up to 38 cents per litre plus a percentage of the retail price. This Shadow Budget would graduate the tax on alcohol

to relate to alcohol content. This reform would target the health problems caused by alcohol, which is directly in line with the alcohol content of any drink (The Economist 2013).

Marijuana

The federal government has legalized marijuana for recreational consumption with legal sales scheduled to begin in July. The main policy objectives driving marijuana legalization are the improvement of public health and the minimization of the black market and its associated criminal activity. Ending the prohibition of marijuana involves coordination between all levels of government. Provinces must determine the structure, distribution, and regulation of the retail market and jointly determine taxation levels of marijuana with the federal and municipal governments.

Ontario has announced that it will restrict retailing of recreational marijuana to LCBO-run stores. Only 40 of these locations will be in place by next July 1, the federal target date for legalization, with a total of 150 locations expected by 2020. The province missed the opportunity to have a competitive market for retail marijuana. Independent businesses have an incentive to locate where market demand isn't being met and competition between businesses constrains operating costs and keeps prices low. Lower prices in the legal market make it more likely to be competitive with the existing black market.

The province's decision to enter the market also implies considerable resources will be expended in the construction and maintenance of stores, higher salary expenditures and other overhead costs. These will be met at the expense of other sectors, which will receive lower government funding.

Having few retail locations means that access to recreational marijuana will be inconvenient for a significant number of Ontarians. Recreational consumers are highly unlikely to switch their dollars to the regulated market if there isn't easy access. This means that there will be significant opportunity for the black market to continue operating in all the areas without enough legal stores to meet market demand or that are convenient to access. (By contrast, there are more than 650 LCBO outlets in the province.) Further, to levy penalties against illicit businesses will require significant justice and police resources. And since there won't be enough regulated retail outlets to meet market demand, it is likely that at least some of these businesses will still find it profitable to operate. This Shadow Budget would make retailing of marijuana competitive and allow for the licensing of privately-run retail stores. This could take the form of entirely private retail, as in Alberta. Alternately, licensed establishments could operate alongside government retail stores and deliver better market coverage faster than the crown corporation on its own.

Ontario has joined the federal government’s proposed coordinated excise tax framework for recreational marijuana. While Crown-corporation retail isn’t particularly competitive in terms of convenience, keeping taxes low will help ensure that the legal market will be price competitive with the illicit market. The tax rate on dried cannabis flowers will be $1 per gram or 10 percent, whichever is higher, with 75 percent of the revenue going to the provincial government. The revenue from this excise tax will initially be modest, bringing in $50 to $95 million in 2018 and $175 to $200 million annually by 2021.

Gasoline and Fuel

The government should be concerned about the prospect of declining revenues from fuel and gasoline taxes, which will intensify as vehicles become more fuel efficient and become increasingly electric. This Shadow Budget would begin a study of the potential to replace fuel taxes with tolls for use. Further, the best solution for traffic congestion is a road toll. Road pricing could also bring the price that drivers pay for

infrastructure they use closer to the actual cost of it. Gas taxes (which are about 75 to 80 per cent of road-related revenues), vehicle licences and other revenues from drivers have covered less than two-thirds of roadway expenses across Canada since 2008. Taxpayers should only subsidize transportation to the extent that it encourages broader access to all in society and the government should review whether a one-third subsidy is the appropriate amount of taxpayer subsidy for roads.

Personal Taxation

Income taxes affect individual and business incentives to earn income, save, invest, and take risks. Excessively high taxes at the margin can also drive tax avoidance behaviour.

At the personal level, the impact of income tax variations on work participation decisions is particularly acute for the secondary earner in families with children and lower-skilled workers. In general, lower income, less educated people have a greater tendency to adjust their paid work behaviour through workforce participation decisions, while more-educated workers and high-income earners tend to adjust through the number of hours they work (Duclos et al. 2015).

High income earners' taxable income has been shown to be particularly responsive to high marginal tax rates – through both tax planning avoidance behaviour and earnings decisions (Laurin 2015). And the sensitivity to rate changes is higher at the provincial level in response to provincial rate changes than at the federal level in response to federal changes. This is because high-income earners can take advantage of provincial tax rate differences by shifting their income tax attributes and work locations to the most tax-advantageous province (Milligan and Smart 2014).

Provinces like Ontario with one of the highest top combined federal and provincial marginal tax rates of over 53 percent on high-income earners should aim to reduce that rate to a level at or below 50 percent. The responsiveness to the change would have a beneficial impact on the tax base that would ensure a very low fiscal cost for the policy. Furthermore, the income tax system should be clear and transparent. Ontario has a surtax notionally in place for health care expenses. However, this tax is treated as general revenue. The province should replace this surtax and set income tax rates and brackets that transparently show the marginal tax rate people are paying.

Other tax changes should aim to lower the burden of taxes on secondary earners in family with children. This Shadow Budget would reform the tax recognition of child care expenses through the replacement of the child care expense deduction with the introduction of a new refundable tax credit for child care expenses. It would encourage stay-at-home parents to join the workforce, producing extra tax revenues, considerably limiting the net fiscal cost of its implementation (Laurin and Milligan 2017).

Also, typical labour arrangements are changing with technological change. Workers are becoming less attached to a single employer and move around more freely between projects and contracts. Their incomes are also more prone to be fluctuating from year to year – a period of low earnings followed by a year of higher earnings, or vice versa. But a worker with fluctuating income may end up paying more tax (and losing more income-tested government benefits) than another worker with a flat income profile but earning the same amount over a period of years. Wen and Gordon (2017) find that Canada's "fluctuation tax penalty" is most severe for individuals who earn lower incomes or are self-employed. This Shadow Budget would lessen the impact of fluctuating incomes on tax liability by allowing workers to average their

income over many years, so that any single large earning year would not lead to a disproportionate loss of fiscal benefits and higher tax payments.

Business Taxation

A properly designed business tax regime would provide for a common provincial tax rate for all businesses operating across the province, regardless of their location or sector. However, Ontario's tax regime selectively rewards a number of sectors, such as manufacturing, through the income tax system while punishing companies with overly high provincial property tax rates. The province of Ontario can simplify its tax regime, create a more level playing field across sectors and the province, and reduce the effective tax rate on new business investment all without reducing overall provincial revenues.

Eliminating Wasteful Business Tax Expenditures

The largest tax expenditure in the corporate income tax system, by far, is the Small Business Deduction, which costs Ontario over $2 billion in foregone revenue. A better alternative to the Small Business Deduction is a lower general corporate income tax rate. That is because the net impact of the Small Business Deduction is an expansion of the small business sector at the expense of large businesses. Since small firms are less productive than large firms, the Small Business Deduction lowers overall economic performance (Dachis and Lester 2015). This Shadow Budget would not proceed with any further cuts geared to small business.

Most Canadian provinces provide a tax incentive for innovation. They mimic the federal tax system which provides eligible businesses with a Scientific Research and Experimental Development (SR&ED) credit. Ontario provides a non-refundable tax-credit worth 3.5 percent of the value of eligible expenses for firms to deduct from their taxes. The total innovation tax incentive for Canadian businesses is one of the highest in the world, but Canada consistently lags behind international peers on measures of business innovation (Parsons 2011). The Ontario SR&ED credit comes at a large fiscal cost: a tax expenditure of $150 million in the 2017 calendar year (Ontario 2017). Instead of targeting up-front tax credits for innovation, a better solution to encouraging innovation is with a low overall income-tax rate (McKenzie 2006). In addition, the province provides manufacturing and processing businesses a preferential lower tax rate than those in the rest of the economy: 10 percent instead of the usual 11.5 percent. This lower rate cost taxpayers $290 million in the 2017 calendar year.

This Shadow Budget would eliminate the Ontario SR&ED credit and the lower rate for manufacturing and processing, and use that revenue to cut high provincial property tax rates that choke investment, as discussed below. It would also initiate a comprehensive review of tax expenditures to determine whether the existing tax expenditures are still appropriate or whether they should be redesigned as deductions or credits (see Robson and Laurin 2017). Tax expenditures can be removed when shown to be no longer effective, as the government has already committed to eliminating ineffective tuition and education tax credits, as recommended by Neill (2013).

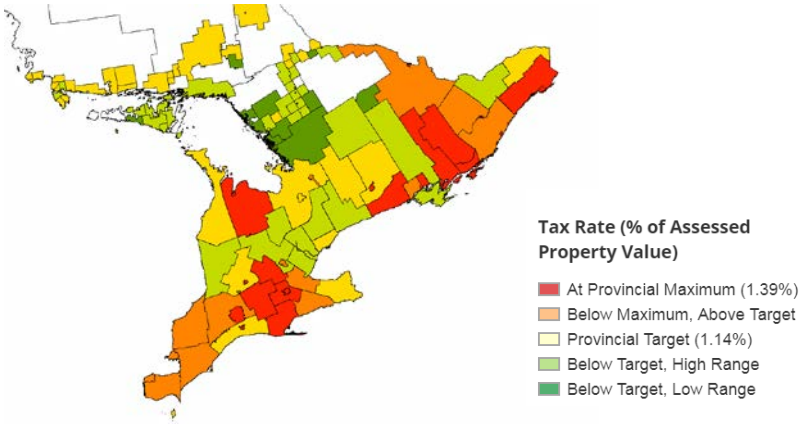
Cutting Provincial Business Property Taxes – A Revenue Neutral Cut in Investment Taxes

Ontario took over the local education property tax from local school boards in 1998. School boards had widely varying tax rates across the province and by property type when the province took over. The province immediately made its residential tax rate the same for all residents across the province. It's a different story for businesses. Each year since 2007, the province has set a maximum tax rate, called

the ceiling rate, and a lower target rate designed to be revenue-neutral for the province. The province committed in its 2007 budget to lower higher rates down to the target rate over time, but the province has stalled on tax cuts since 2013.

The provincial property tax still varies wildly across cities and for different buildings within cities (See Figure 5a and 5b, which shows provincial rates for commercial and industrial properties). Provincial commercial property tax rates in some Ontario municipalities are more than three times those in others. The provincial tax is highest on industrial property across much of Southern Ontario. As Found (2017) shows, the average provincial business property tax rate is more than 6 times its residential counterpart.

Figure 5a: Provincial Commercial Property Taxes in Southern Ontario



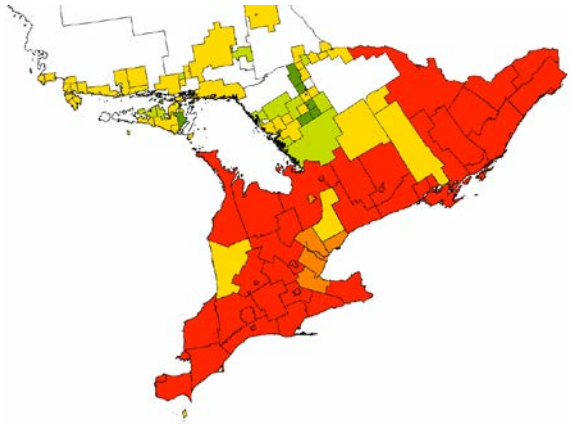


Figure 5b: Provincial Industrial Property Taxes in Southern Ontario

Source: Jacobs, Dachis and Found (2017). Results include Northern Ontario. Hollow areas not subject to provincial property tax.

Cities collect the money on behalf of the province after receiving a regulation from the province of how much to collect. In the 2017-18 fiscal year, the province will collect $6 billion in property taxes, which it reports as general revenue. Since different education tax rates by region have nothing to do with local school spending, each school board now gets a provincial top-up grant in order to level the playing field. Each school board`s total revenue is based on its enrolment and the needs of students, not the value of buildings in the area. That means the provincial property tax now has no bearing on school boards' spending. Yet, the province still uses the misleading name "education property tax" to describe it on tax bills.

These high property taxes have a large economic cost. Property taxes act like a tax on capital, specifically building capital. A tax on capital reduces the incentive to invest, resulting in lower investment which leads to lower productivity and therefore income and standards of living of Canadians. A 10 percent increase in commercial property tax rates decreases the long-run value of the business property assessment base by 8.2 percent. At the average level of business property taxation in Ontario, a $1.00 business property tax hike costs the Ontario economy $5.56 (Found 2017). Higher taxes shrink the tax base, which makes it harder for governments to raise revenues. The total business tax rates in some cities across Ontario – such as London, Windsor and Brantford – are so high that cities and the province might see revenues increase if they cut their taxes to attract more business investment.

This Shadow Budget proposes to complete the harmonization of business property tax rates. To make such a tax reform revenue-neutral, it proposes to eliminate the SR&ED credit and the lower manufacturing and processing corporate income tax rate and reduce provincial business property taxes that would reduce revenues by the same amount saved. Such a change would have a number of benefits. First, it would create a more level playing field across different types of businesses that currently face different tax rates. Secondly, it would improve fairness in the provincial property tax regime across the province. Third, a revenue-neutral property tax reduction would lower the marginal effective tax rate on new investment in most parts of the province – and almost all of Southern Ontario – by more than any increase in provincial income taxes would increase the effective rate. Property taxes have an especially large effect on tax costs on investment because they are insensitive to profit and are akin to a direct tax on capital (Found and Tomlinson 2017). Such a reduction in provincial property taxes would be largest for the same sectors that would see a removal of their special, lower income tax rate, across most of Southern Ontario.

Housing, Municipal, and Infrastructure Policy

This Shadow Budget would seek to lower the cost of housing across the province by taking steps to reduce barriers to construction and eliminating economically costly rent controls and transfer taxes. It would also fundamentally change the relationship between municipalities and the province by granting cities the ability to put their budgets on a sound financial footing and allow them more flexibility in financing infrastructure.

A Smart Housing Plan

The cost of housing in Ontario has increased dramatically in recent years. According to data from Brookfield's Real Property Solutions, home prices the Greater Toronto Area increased by more than 250 percent between January 2005 and the end of the 2017. In response, the province has taken steps such as introducing taxes on foreign buyers and rent controls. The government's policies have focused mostly on curtailing the demand of housing.

On April 20, 2017, the province introduced a 15 percent Non-Resident Speculation Tax in the Greater Toronto Area. This transfer tax is substantially higher than the existing provincial land transfer tax that has a maximum rate of 2.5 percent. Land transfer taxes such as these have a high economic cost of reducing the mobility of households (see Dachis 2012 and Dachis, Duranton, Turner 2008). In addition, land transfer taxes are highly volatile and present a large fiscal risk to the province if the housing market has a serious downturn (Ngo, Angastiniotis, and West 2017). This Shadow Budget would immediately eliminate the additional 15 percent tax and look to begin reductions in the general land transfer tax in future fiscal years.

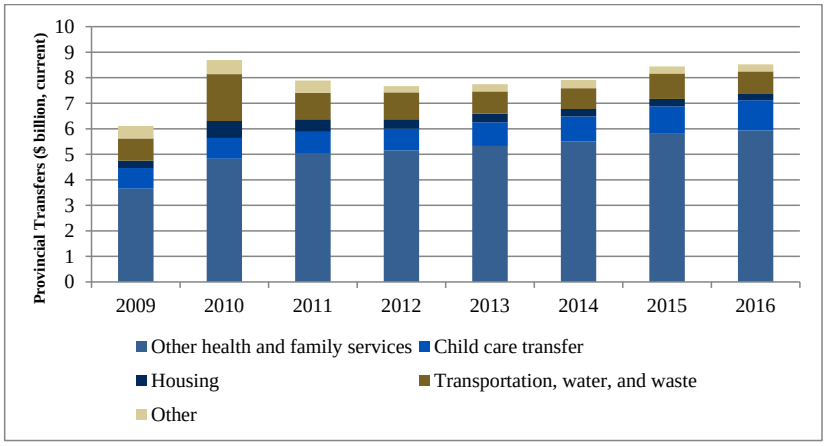
On the same day, the province expanded rent control to all rental units in the province, rather than only those built before 1991, as was the case prior. Rent control is one of the few economic policies around which there is a solid, evidence-based consensus about its long-term effect on the cost of housing: it does not lower it in the long-run (Kronick 2017). The likely result of rent control is that housing developers will not build rental housing knowing they face a cap on potential returns, while facing no commensurate cap on their investment risk. The result will be fewer units available, leading to housing shortages. This Shadow Budget would phase out rent control on all rental units. It would start by reducing the extent to which rent control binds the market by increasing the allowable increase, doing so annually until eventual repeal. Rather than rely on rent control, this Shadow Budget would embrace the recent federal decision to create a Canada Housing Benefit that provides low-income renters with the funds to seek a wide range of market-priced rental units (Canada 2017). This Shadow Budget would re-orient financial support for housing construction, which is often part of transfers to local governments, as discussed below, to match the federal contribution in creating the Canada Housing Benefit.

Reducing the Cost of Housing

There is strong evidence that restrictions and extra costs on building new housing – such as zoning regulations, delays on permit approvals, development charges, and limits on greenfield housing development – are dramatically increasing the price of housing. Dachis and Thivierge (forthcoming) find that a limited lowering of these restrictions can reduce house prices in some municipalities in the Greater Toronto Area by around $100,000.

What can the province do to reduce supply barriers? Toronto heavily uses a clause in the provincial *Planning Act* – the legislation governing municipal zoning policy – that allows it to require additional payments from developers in exchange for a site-specific variance from zoning bylaws (Moore forthcoming). These additional payments, known as section 37 payments for the relevant part of the *Act*, increase uncertainty for developers and therefore increase the cost of housing. In addition, municipalities have an incentive to keep zoning bylaws out of date because updating them would take away the future section 37 payments. This Shadow Budget would place greater restrictions on the use of section 37 of the *Planning Act*, which would result in municipalities having a greater incentive to set more appropriate zoning regulations.

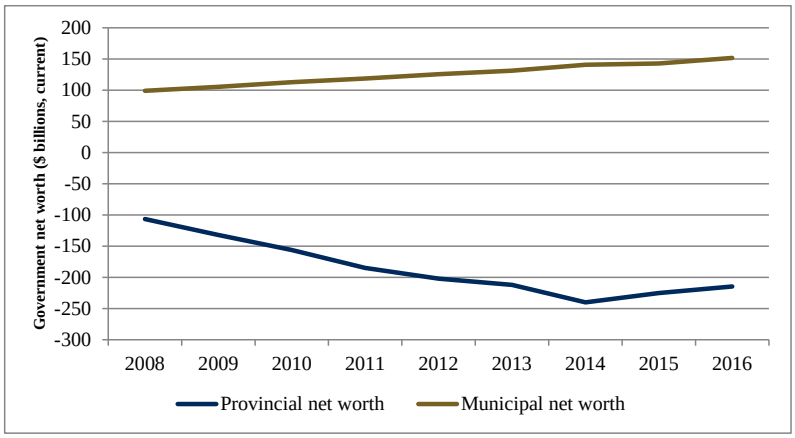
Developers pay development charges to compensate municipalities for the cost of building municipal infrastructure that services homes and commercial properties in a newly developed area. The largest single component of these charges is for water and wastewater construction (Dachis forthcoming). This Shadow Budget would require that cities replace development charges for water and wastewater infrastructure with volumetric uses fees that reflect capital costs. Such a move would reflect a change to a utility-based model and encourage conservation of water.



Finally, housing developers in GTA cities are facing a shortage of land available for new housing development (Clayton 2015). The primary cause is not because of the Greenbelt, a policy that forbids development on certain agricultural and parkland. Dachis and Thivierge (forthcoming) find that the main land-supply driven cause of higher house prices is not the Greenbelt, but the Growth Plan for the Greater Golden Horseshoe, a policy that requires cities in the GTA to approve a certain share of their homes within existing urban development boundaries and at a certain density. This Shadow Budget would relax the density and intensity targets that may not be appropriate across all cities subject to the Growth Plan while preserving the Greenbelt.

Rethinking Relative Municipal and Provincial Fiscal Health

One of the province's largest expenditures is on grants to municipalities. Transfers to municipalities have increased since 2009, including a large spike in 2010 to support infrastructure stimulus projects. Transfers to municipal governments from the province are now over $7 billion (Figure 6). Indeed, this trend is set to accelerate. In January of 2017, the province committed to double the amount of the fuel tax it transfers to municipal governments for transportation investment (Jones 2017). Ontario transferred $335 million in provincial gas tax revenue to municipal governments in 2017, and made a commitment to double the funding to bring the total transfer to $642 million by 2021-22.



The largest share of transfers is for health services – such as public health – and for childcare benefits. The latter, in particular, are dispersed to municipalities under a complex set of qualification criteria. These programs are ripe for review and evaluation, as their impact on workforce participation and the ability for single-parent and underrepresented families to engage in the labour force are critical. The child care transfer has increased by nearly 50 percent since 2008 reaching $1.2 billion in 2016, suggesting that a review of the program is in order

Figure 6: Ontario Provincial Transfers to Municipalities, 2009-2016

Source: Authors' calculations from Ontario Financial Information Return. Note: Some small cities have not yet submitted their 2016 financial information.

Figure 7: Ontario Provincial and Municipal Net Worth, 2008-2016

Source: Authors' calculations from Cansim Tables 385-0034 and 385-0037.

Does it make sense for the province to send such grants to municipal governments? Ontario's municipalities are, on average, in better fiscal shape than the provincial government. They are major investors in capital assets, but unlike the province, whose chronic deficits have resulted in financial liabilities that vastly exceeds its financial and non-financial assets, Ontario municipalities have positive net worth. They have borrowed to finance some capital assets, but the value of their assets exceeds their debt by a substantial margin. In the nine years from 2008 to 2016, Ontario municipal governments have increased their net worth by more than 50 percent, registering an increase of over $50 billion (Figure 7). In contrast, provincial net indebtedness has approximately doubled over that time, even after a slight improvement in net asset values over the last two years.

The Important Difference between Municipal and Provincial Accounting

How did such a fiscal health imbalance come about? Transfers are often the result of cities claiming they are struggling to meet their service or infrastructure demands and then calling on the province for support. However, the way that cities present their budgets, especially relative to the way the province reports its finances, makes municipal finances appear more precarious than they actually are. Ontario municipalities typically use cash accounting in their budget.[1] However, the province – as well as municipal end-of-year financial statements – uses the accrual accounting standard. Accrual-based budgets appropriately do not record the entire cost of capital items as expenses in the year of the cash outlay, but apply annual amortization over their useful live. Figure 7 presents municipal and provincial finances on the equivalent accrual financial basis.

Presenting councillors with budgets that show outlays on such assets as in-year expenses (as cash budgeting does), rather than amortizing them as they deliver their services (as accrual accounting does),

[1] A common practice is to show expected cash outlays in a "capital" budget alongside an "operating" budget for items to be consumed and expensed during the year.

likely leads municipalities to delay or reject some capital projects they would otherwise approve. It also likely leads them to finance the projects they do approve by raising revenues up front, rather than by borrowing and servicing the debt over the period the project yields its benefits. The result is that today's taxpayers – whether through property taxes, grants to cities, or development charges on houses – are paying disproportionately more than they are receiving in municipal services.

Reframing the Municipal-Provincial Financial Relationship

This Shadow Budget would cancel the proposed doubling of the amount of provincial fuel taxes that the province transfers to municipal governments. In fact, it would go further to limit transfers to cities. As above, this Shadow Budget would begin a long-term commitment to reducing property taxes levied by the province. Every dollar of provincial property tax reduction creates tax room that municipalities can decide to take up. Cities would have the freedom to choose how best to finance local services or whether to increase or reduces taxes and services.

The province's commitment to double gasoline tax transfers to municipalities emerged as a response to the City of Toronto's request for the province to enact an enabling regulation permitting it to introduce a toll on municipally owned highways. The province forbade Toronto from the move, offering all cities the gasoline tax transfer instead. This Shadow Budget would allow cities the ability to introduce road pricing without requiring a provincial regulation, as long as the intention and design of the toll is to reduce congestion, not as a purely revenue-raising option.

In addition, instead of allowing cities to have parcel-by-parcel zoning amendments, as discussed above, this Shadow Budget would expand the ability of cities to put in place a tax-increment financing plan for major infrastructure. This would allow cities to capture some of the increase in property values that result from a new transportation or other municipal investment that increases the value of nearby properties (Found 2016).

Finally, this Shadow Budget would require municipal governments to produce their beginning-of-year budgets on an accrual basis. Importantly, it would not require that cities produce a balanced budget every calendar year and would instead enact a review of the appropriate fiscal and economic benchmarks that cities should adhere to under an accrual accounting system. A revised budget process would allow cities the flexibility they need to finance long-term infrastructure without relying on provincial grants or upfront revenues.

Transit Governance

Originally created in 2007, Metrolinx started with the intent of creating a regional transit plan for the Greater Toronto and Hamilton area with a board made up of local government officials. Two years later, Metrolinx expanded to become the GO Transit operator. The province then removed the local government officials from the Metrolinx board, which is now made up of people appointed by the province.

How can the region overcome local opposition to changes while finding a way to act in the regional interest? Right now, it's easy for local politicians to pass blame around, especially to an unelected transit board. One proposal is to create a single, amalgamated transit operator for the whole Greater Toronto Area

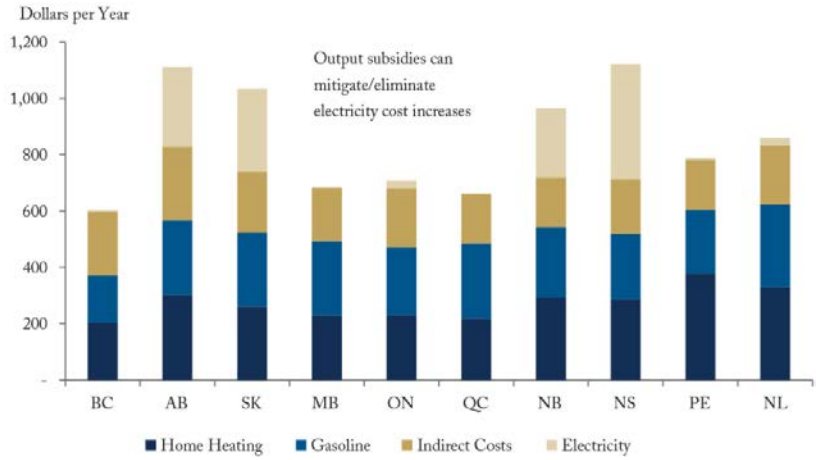
(Gill, Kelcey, Parker, 2017). But rather than amalgamation, which has shown to not result in significant savings (Bish, 2001, Found 2012), another approach is to restore the role of municipal governments on the board of Metrolinx.

Toronto should follow the Vancouver model, in which provincial legislation tasks a Mayor's Council made up of representatives from each of the region's 21 municipalities to appoint a board of Translink, the regional transit coordinating body. Translink has many subsidiary companies that operate transit services under contract (Translink 2017). The regional transit body is the regional coordinator, less than it is a regional authority and another new layer of government (Spicer and Found 2016). The reformed Metrolinx can contract with subsidiary transit operators, private contractors, or municipal governments that can supplement Metrolinx-supported routes.

Greenhouse Gas and Energy Policy

Greenhouse Gas Policy

This Shadow Budget would continue to increase the price on greenhouse gas emissions. This Shadow Budget does not take a position of the merits of a cap-and-trade program as opposed to a carbon tax. A carbon tax would be simpler to administer than a cap-and-trade program and would also generate more revenue for the province of Ontario. On the other hand, a cap-and-trade program that allows Ontario to link with the emissions permit market in California and Quebec allows for a lower cost on emissions to meet the same reduction target. Trading emissions permits across borders and between markets allows emissions reductions to occur wherever it is cheapest to do so, reducing the overall cost (Thivierge 2017).



If prices on emissions rise to $50 per tonne, which they are set to with federal government policy, the upfront cost to the average Ontario household would be around $700 per year (Figure 8). However, the final cost to consumers will depend on how governments recycle that revenue back to households. It is on how the government plans to use the revenues from a carbon price that this Shadow Budget proposes a change of direction for the province of Ontario.

Eliminate Energy Efficiency Programs and Consumer Subsidies

The current plan for the government of Ontario is to spend between $6 and $8.3 billion over five years on projects intended to further emissions reductions beyond that planned to occur using the existing cap-and-trade policy (Ontario 2016). The government plans to finance the subsidies with revenues from an auction for permits that greenhouse-gas-emitting companies must buy. Many of the proposed spending programs are exceptionally costly. For example, subsidies to retrofit apartments will cost as much as $900 million over five years. They will cost taxpayers $425 per tonne of GHG emissions reduced, much higher than any reasonable estimate of future carbon prices. Another example of a wasteful subsidy is the Electric Vehicle Incentive Program, which provides incentives of up to $14,000 per electric vehicle.[2] These kinds of subsidies are regressive and economically costly ways to further reduce emissions (Rivers and Shiell 2015). Other announced programs will not have a direct cost to taxpayers, but will be costly to drivers, homeowners and businesses. The government is planning to boost the amount of renewable content in gasoline and natural gas. Renewable-fuel mandates push the cost onto consumers and are an economically expensive way to reduce emissions (Auld 2008).

[2] See http://www.mto.gov.on.ca/english/vehicles/electric/electric-vehicle-incentive-program.shtml

Figure 8: Cost of a $50/tonne of CO_2 price on typical household

Source: Dachis and Tombe (2017) from Jennifer Winter.

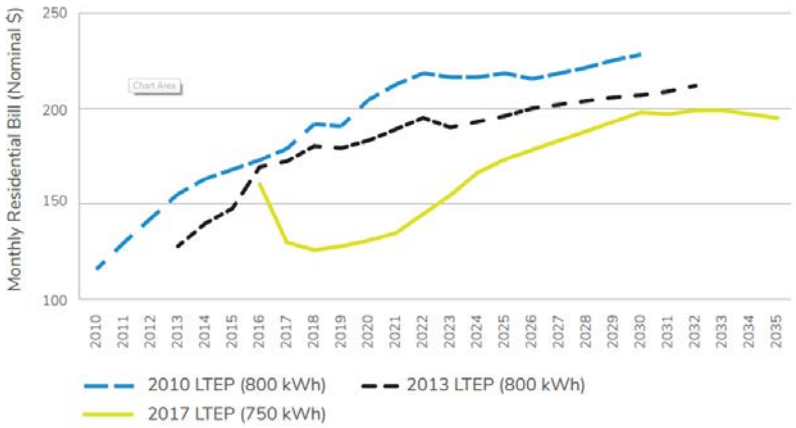
This Shadow Budget would eliminate nearly all of these existing subsidies and mandates and instead use the revenue to reduce taxation on households and businesses. The exact design of the tax cuts is outside of the scope of this Shadow Budget, but such a tax cut should promote two principles. First, it should reduce the average cost to businesses of emissions pricing while still providing a marginal incentive for them to reduce emissions. Second, households should receive tax cuts broadly in proportion to the cost of emissions pricing as a share of their income. This would mean tax cuts and enriching renewable tax credits geared to low-income families, for whom energy costs are a large share of total income.

To ensure industrial competitiveness, this Shadow Budget would adopt one of two paths. This Shadow Budget would prefer to adopt Alberta's emissions pricing policy, which is similar to the federal system. Producers in Alberta face little competitive disadvantage under this model. Although emitters pay the full cost of their own emissions, they receive a credit per unit of output, with the amount of the credit based on a provincial average emissions benchmark. Companies still have a strong incentive to reduce their emissions while having a minimal net impact on the competitiveness of industrial emitters. Indeed, companies with below-average emissions are better off in this system. This Shadow Budget would adopt a similar system if the cap-and-trade program is no longer the most effective means of putting a price on emissions. If, on balance, removing the apparatus of a cap-and-trade program for industrial emitters is too costly, it would preserve the system of allocating some permits for free to industrial producers.

Promote Long-term Energy Research

As research from Popp (2016) shows, a carbon price will drive 95 percent of the lowest-cost emissions reductions to meet reduction targets. Subsidies for energy adoption, as has been common in Ontario with electricity polices, encourages firms to use technology that is closest to market. Subsidies for adoption don't solve a market failure and don't encourage innovation. However, there is a market failure for longer-term energy research. The benefits of such research are broad, but the returns to firms of doing such research are relatively smaller, uncertain, and if they materialize at all will be far in the future. On their

own, research subsidies would achieve about 10 percent of economically efficient emissions reductions (Popp 2016). As such, this Shadow Budget would devote around 10 percent of revenues from an emissions price to long-term research.



Electricity Policy

Few topics have generated as much controversy in Ontario as electricity policy, with a number of previous policies resulting in a dramatic increase in electricity prices (Trebilcock 2017). The government has taken a series of measures that will immediately reduce electricity prices for residential customers. However, within five years, prices are forecast to increase dramatically as the current policy does not address the actual cost of generating and delivering electricity, and relies on taxpayers and future ratepayers to subsidize electricity use today (Figure 9). Further, many industrial consumers are receiving no reduction to their bills. This Shadow Budget would take actions now that will begin to reduce system cost and reduce prices for businesses and consumers in the future.

Market Design and Regulation

The Independent Electricity System Operator (IESO), which manages the electricity market for Ontario, is undertaking a major market reform. The IESO projects that the market reform will reduce the cost of purchasing electricity by billions of dollars, eventually resulting in savings for consumers. The single-largest cost savings for consumers is set to come from the IESO adopting what is called a capacity market. A capacity market provides electricity generators with a revenue stream for being available to produce electricity, in addition to their revenues from selling electricity. Such a market is a major improvement to the government's previous approach of signing 20-year contracts with generators that effectively covers both. The government's plan is a sensible one that has been shown to be effective in a number of other jurisdictions, and this Shadow Budget would continue to proceed with it (see Goulding 2013 and Wyman 2014).

Figure 9: Electricity Price Outlook – Residential Consumers

Source: Ontario (2017b).

This Shadow Budget would propose the government look to take the market reform one step further by reforming the purchasing role of the IESO. The current proposal for the capacity market is to make the IESO the only buyer of generation contracts. The downside of that plan is that it does not create competition among potential electricity buyers. This Shadow Budget would delegate the purchasing power in the capacity market to local buying groups across the province. These local buying groups, known as load-serving entities, would have the ability to purchase electricity that suits local needs. Large business, currently limited to buying electricity from the IESO and paying a share of the Global Adjustment, which pays for capacity investments, could form their own load-serving entities and contract directly with generators. Further, these local buying groups would encourage consolidation of local distribution companies, to which we will return to below.

However, as Goulding (2013) argues, to be effective, the government must pair a capacity market with changes to improve the independence of Ontario's electricity regulatory bodies. Ontario governments of all political stripes haved directed various government agencies to take specific action in the electricity sector while circumventing regulators (Vegh 2016). This Shadow Budget would end the cycle of government price interventions, specific directives, and decisions on procurement by requiring the Ontario Energy Board to review all major decisions in the energy market with a mandate to approve actions only if they increase economic efficiency (see Church 2017 for a discussion of economic efficiency in regulatory hearings).

Economic efficiency means having an electricity market that has decisions determined by prices, and not arbitrary government rules. One of the most intrusive arbitrary government electricity market rules is the Industrial Conservation Initiative. In this program, eligible industrial consumers save money if they slash electricity use during the five highest Ontario-wide demand hours of the year. It's an arbitrary and expensive way to cut electricity costs for some (Sen 2015). Small businesses and residents pay higher bills because of the policy. Instead, this Shadow Budget would eliminate this program and let large consumers pay only for what they buy in a capacity market and the hourly electricity market.

Similarly, a portion of the electricity bills of Ontario households support subsidies for residential consumers to purchase smart thermostats and other energy-efficiency devices. These programs cost ratepayers $600 million in 2016 (Auditor General 2017b). As with direct government spending on such programs these programs often do not pass a cost-benefit test for the use of government fund. Many households would make such investments if energy prices were sufficiently high and they were sufficiently informed. This Shadow Budget would remove any directives requiring such energy efficiency measures, and grant the Ontario Energy Board the authority to approve or reject energy efficiency programs, such as the Industrial Conservation Initiative, based solely on whether they improve economic efficiency.

Encouraging Private Investment in the Ontario Energy Sector

As of 2017, municipal governments in the province owned local electricity distribution companies that had a value of $11 to $15 billion (Robins 2017a). Cities could sell these companies to finance infrastructure investment. Sales would have no negative effect on ratepayers, since the Ontario Energy Board keeps a close regulatory eye on all price changes regardless of who owns the companies. Furthermore, private investors are usually best placed to make the decisions about the appropriate boundaries of companies, geographically and across distribution, transmission and even generation investment. Private investors would bear the consequences of poor choices, but reap some of the rewards of good mergers (Fyfe, Garner,

and Vegh 2013). The incentives for these private-sector companies to keep costs down are often better aligned with ratepayers than those facing publicly owned electricity companies.

However, cities have not been able to take advantage of the value of these assets because of provincial taxes on such sales.[3] The province would collect $1.8 to $2.5 billion in such taxes (Robins 2017a). These overly high taxes pose a significant barrier to any sale. This year will be the last year of a three-year partial tax holiday on provincial transfer taxes in Ontario on the sales of municipally owned local electricity distribution companies. The intent of this tax change was to encourage mergers using private investors, rather than only encouraging merger with other government-owned companies. However, there have been few sales so far, partly because the tax holiday was limited largely to sales of very small companies. Private investor showed little appetite for such assets. This Shadow Budget would exempt municipalities entirely from all taxes on sales, as long as the proceeds of a sale are reinvested in qualifying infrastructure projects.

Private investment in provincially owned electricity assets has been a controversial topic, but a wise policy move. As Robins (2017b) argues, it is not necessary for the province to continue to own its minority share in Hydro One, the transmission utility, or Ontario Power Generation (OPG), a major power generator, if its policy objective is to keep electricity prices down. As with municipal companies, a strong Ontario Energy Board can protect consumers no matter the owner. A sale of the remaining government stake in Hydro One would net the province somewhere in the order of $7 billion and a sale of OPG could also generate substantial revenue.

The upfront revenue is not necessarily the best reason for the province to sell electricity assets. The main reason to sell is reduced risks. The sale would reduce dividends in the future, such as the $250 million from Hydro One. However, using such a sale to eliminate debt could result in cost-savings and reduced fiscal risks if interest rates increase. Second, the electricity sector is undergoing fundamental change. OPG and Hydro One deliver electricity in a traditional long-distance network. However, the electricity system of the future may look very different, with the emergence of small-scale renewable electricity generation. The result could be a decline in value of, and therefore dividends flowing to the treasury from, Hydro One and OPG. The best way for the province to mitigate that risk is to continue selling stakes in Hydro One and begin to include private investors in OPG.

Conclusion

A fiscally sustainable Ontario will mean higher standards of living for Canadians through better government services and faster economic growth. The province should take action to correct a fiscal course that is unsustainable. The government must act to bring the long-term cost of government in line with the revenue-raising capacity of the province. This Shadow Budget shows that there are a number of policy directions the government can and intends to take in areas as diverse as electricity, greenhouse gas, municipal, health, social and tax policy that can balance increases in spending with generating new revenues and cost-savings measures, and generally enhancing the well-being of Ontarians.

[3] See Fyfe, Garner, and Vegh (2013) for more details on the complex system of transfer and departure taxes in the Ontario local electricity distribution sector.

Subject: Budget net debt file
Date: Monday, July 24, 2017 3:36:28 PM
Attachments: Net Debt - 2016-17 - (April 7, 2017) Budget.xlsx

2017 Document

Scenario: $1.5 B deficit in 2016-17, balanced budget afterwards.

Narrative: The government is setting an interim net debt-to-GDP ratio target of 35 per cent by 2023–24 and continues to maintain a target of reducing the net debt-to-GDP ratio to its pre-recession level of 27 per cent by 2029–30.

Assumptions

1 Pension is reversed and deficit for 2016-17 is $1,524
2 GDP - per latest information rec'd March 28, 2017
3 Net TCA BV - per info rec'd April 7, 2017
4 Net Debt not adjusted for prepaids and inventory. Such adjustment will be done for the 2016-17 Public Accounts onwards.
5 Balanced budget continues through to 2030-31
6 Net TCA BV is the same from 2026-27 to 2030-31, i.e. no change
7 GDP annual growth is 4% from 2021-22 to 2030-31

Based on the assumptions above, the net debt to GDP threshold of 27% is achieved in 2029-30
The 35% threshold will be achieved in 2023-24

Assumptions

1. Pension is reversed and deficit for 2016-17 is $ 1,524 m
2. GDP - per latest information rec'd March 28, 2017 (see GDP tab)
3. TCA - per info rec'd April 7, 2017 (see TCA tab)
4. Net Debt not adjusted for prepaids

Other Assumptions

- Balanced budget continues through to 2030-31
- TCA is the same from 2026-27 to 2030-31, i.e. no change
- GDP annual growth is 4% from 2021-22 to 2030-31

Note: 2015-16 Accumulated Deficit includes a projected ONFA unrealized loss of $250 million for 2015/16 (Budget).

Note: For 2019-20 and 2020-21, we are assuming a zero deficit.

Note: 2015-16 PA Accumulated Deficit includes the ONFA unrealized loss of $1,003 million and the pension adjustment of $9,154 million.

Comparison: 2016 Budget vs. Scenario March 23, 2017

---

Hi gai

As requested pls find attached the net debt for the two out years under the two scenarios summarized in the tab marked “Leadsheet”:

- Maintain the ratio at the 2016-17 level of 40.3%
- Allow the ratio to increase by 0.2% each year.

Pls note that the Net Flexibility line essentially provides the flexibility available in 2018-19 assuming all of the flexibility in 2017-18 is fully utilized.

Pls let us know if you have any questions or require further analysis.

Thanks

Ken k

Scenarios vs. FES 2016-17 - Summary

	Scenario 1			FES 2016-17	
	2016-17	2017-18	2018-19	2016-17	2017-18
Deficit/ (Surplus) ($m)	4,324	(18)	(12)	4,324	(18)
Net Debt/GDP %	40.3	40.3	40.3	40.3	39.8
Net Debt - Net flexibility	317,948	330,938	344,472	317,948	326,551
GDP	789,176	821,389	854,990	789,176	821,389

	Scenario 2			FES 2016-17	
	2016-17	2017-18	2018-19	2016-17	2017-18
Deficit/ (Surplus) ($m)	4,324	(18)	(12)	4,324	(18)
Net Debt/GDP %	40.3	40.5	40.7	40.3	39.8
Net Debt - Net flexibility	317,948	332,580	347,896	317,948	326,551
GDP	789,176	821,389	854,990	789,176	821,389

Scenario 1:
What is the flexibility over the out years for increasing net debt while keeping the ratio

Scenario 2:
How much can net debt increase over the out years assuming that the corresponding ir
(i.e. increases in NetDebt to GDP ratio of 0.2% per year)?

Note: Net flexibility indicates the flexibility available in 2018-19 assuming that

Variance Scenario vs. FES2016-17

2018-19	2016-17	2017-18	2018-19
(12)	-	-	-
39.3	0.0	0.5	0.9
336,419	-	4,387	8,053
		4,387	3,666
854,990	-	-	-

Variance Scenario vs. FES2016-17

2018-19	2016-17	2017-18	2018-19
(12)	-	-	-
39.3	0.0	0.7	1.3
336,419	-	6,029	11,477
		6,029	5,447
854,990	-	-	-

consistent at the 2016-17 Net Debt to GDP Ratio?

ncrease in the ratio is limited to 0.2% from the FES 2016-17 number,

all of the flexibility in 2017-18 has been utilized.

Scenario 1:

What is the flexibility over the out years for increasing net debt while keeping the ratio consistent at the 2016-17 Net Debt to GDP Ratio?

Flexibility available - highlighted in yellow above.

Scenario Assumptions:

1. Net Debt to GDP ratio for 2017-18 and 2018-19 remains at the 2016-17 level at 40.29%

Hello Everyone,

The briefing notes and Q&A's for the budget have been posted, please start reviewing and updating:

Borrowing & Debt and Credit Rating Briefing Note:
http://portal.ofina.on.ca/sites/cmd/ir/Document%202017/OFA%20DOC2017%20BN.docx

Q&A: (Currently using 2016 Budget Q&A as template, but I have also attached the FES 2016 Q&A's for reference)
http://portal.ofina.on.ca/sites/cmd/ir/Document%202017/Q%20and%20As%20DOC2017.docx

Thank you!
Serena

ONTARIO FINANCING AUTHORITY

Chapter 3C - Borrowing and Debt Management

General

Q: Why was total long-term public borrowing $23.8 billion in 2016–17 when the deficit is projected to be $4.3 billion?

A: In addition to financing the deficit, long-term public borrowing refinances debt maturities and debt redemptions, funds the Province's investments in capital assets, and loans to agencies. Total borrowing for 2016-17 is now forecast to be $3.6 billion less than the forecast in the 2016 Budget as a result of the overall changes in non-cash adjustments and the pre-borrowing in 2015-16.

Q: Why does the Net Debt-to-GDP ratio increase to 40.3 per cent at the end of fiscal 2016–17, compared to the 39.6 per cent forecast in the 2016 Budget?

A: The increase in the Net Debt-to-GDP ratio to 40.3% is mainly as a result of the change in accounting treatment for pension assets of jointly sponsored pension plans in 2015-16 which increased the accumulated deficit by $10.7 billion.

Q. The 2016 Budget forecast that the net debt to GDP ratio will decline from 2016-17 onwards, if so why does the ratio increase to 40.3 in 2016-17 from 40.0 percent in 2015-16

A. The slight increase in 2016-17 is primarily due to the forecast GDP rate of growth being less than what was forecast in the 2016 Budget. Over the two out years however, the net debt to GDP ratio is forecast to decline.

Q: The Province is projected to borrow $23.8 billion in 2016-17. That's approximately $1,703 for every person in Ontario. When will the Province eventually run into a debt wall like Greece, Portugal and Ireland and be forced to raise taxes and cut services?

A: There is strong demand for Ontario bonds in both the domestic and international markets. Last fiscal year Ontario was able to borrow $32.1 billion in long-term debt while our spread, or the margin that we have to pay over the equivalent Government of Canada bond, tightened, indicating ongoing strong demand for Ontario bonds. We expect that the liquidity of Ontario benchmark bonds and continuing confidence in the value of Ontario debt will allow us to cost-effectively complete the 2016-17

borrowing program. As at November 4th, 2016, the Province has completed $16.1 billion of its $23.8 billion borrowing requirement for 2016-17.

Q: Has it been difficult to complete the Province's borrowing program?

A: The Province continues to have steady access to both domestic and international bond markets. As at November 4th, 2016, the Province has completed $16.1 billion of its $23.8 billion borrowing requirement for 2016-17.

Q: The Government has adopted the accounting treatment recommended by the Auditor General resulting in a pension adjustment expense over the medium term outlook. How has this impacted borrowing?

A: The pension adjustment is a non-cash amount, as such both borrowings and total debt remain unchanged. There is also no impact on net debt over the medium term outlook given that the forecast defcits over the period remain unchanged from the 2016 Budget. .

Q: What does non-cash adjustments of $7.4 billion in 2016–17 represent?

A: Non-cash adjustments convert accounting accruals into cash requirements. Cash and accruals differ primarily because of $2.6 billion in Alternative Financing Procurements (AFPs) funded by third parties plus the reserve of $0.4 billion, partly offset by payments to be made in 2016–17 upon substantial completion of prior AFP projects. The total non-cash adjustment also reflects the impact of the pension adjustment. . Another significant adjustment is amortization that is currently over $5 billion but is, partly offset by general timing adjustments that always arise between the Province's inflows and outflows on a cash versus accrual basis. A notable example of the latter is the variance between the net incomes of the Government Business Enterprises and the dividends they pay to the Province.

Q: Is the Province planning to issue any more Green Bonds in the future?

A: The Green Bond program is an ongoing program of the Province of Ontario. To date, Ontario has issued two Canadian dollar Green Bonds. The Province plans to issue its third Green Bond before the end of fiscal 2016-17.

On October 2, 2014, Ontario successfully launched a Green Bond program, with an inaugural global Canadian dollar bond of $500 million. On January 22, 2016, Ontario launched a second global Canadian dollar bond of $750 million.

Interest on Debt (IOD)

Q: What is the impact on IOD of a $1.0 billion change in deficit?

A: The 2016-17 impact is forecast to be approximately $24 million.

Q: What is the impact on IOD of a one percentage point change in interest rates?

A: The 2016-17 impact is forecast to be approximately $350 million over a full year.

Q: What are your assumed interest rates in the IOD forecast for the FES in comparison to the forecast in the 2016 Budget?

A: The assumed ten-year interest rates are 2.4 per cent for 2016-17 and 2.9 per cent for 2017-18, which is 60 and 91 bps lower, respectively, than the forecast in the 2016 Budget. For 2018-19, the interest rate forecast is 3.6 per cent which is 106 bps lower than the forecast in the 2016 Budget, which was based on the average Ontario interest rates over the past 15 years.

Q: Will IOD costs crowd out other expenditures as interest rates rise and debt continues to climb? How can you address this problem?

A: Ontario has a realistic plan to balance its budget while investments are made in the priorities of Ontario families – health care, education, the environment and infrastructure.

After eliminating the deficit by 2017–18, overall spending increases will be restricted to one per cent below GDP growth until the Province's net debt-to-GDP ratio returns to the pre-recession level of 27 per cent.

Investor demand has allowed the Province to extend the term of its debt in recent years and lock in historically low interest rates for a longer period. This term extension reduces the Province's refinancing risks and helps offset the impact of expected higher interest rates on its IOD costs. The 2010 Budget forecasted that, by 2016-17, the Province would have to spend 11.7 cents of every revenue dollar received on interest. The current forecast is 27 per cent lower, at 8.6 cents of interest costs for every dollar of revenue. This ratio is lower than it was in the 14 fiscal years from 1992–93 to 2005–06, and is forecast to remain lower through the period to balance in 2017–18.

Credit Ratings

Q: What are the Province's current credit ratings?

The Province is rated:

	Long-Term	Short-Term
Moody's Investors Service:	Aa2	P-1
Standard & Poor's:	A+	A-1+
DBRS:	AA (low)	R-1 (mid)
Fitch	AA-	F1+

Q: How will the credit rating agencies respond to the 2016 Fall Statement?

A: Ontario currently maintains a double-A rating with three of its four credit rating agencies. Ontario is on track to a balanced budget by 2017–18.

We continue to update the rating agencies on a regular basis on economic and fiscal developments.

Q: What impact did Moody's upgrade have on your borrowing costs?

A: Credit ratings are one of a number of factors that contribute to borrowing costs.

Since the 2016 Ontario Budget was released, Ontario's credit spreads have narrowed modestly. This in part reflects the fact that all four credit rating agencies have affirmed Ontario's ratings reflecting their confidence in our plan to eliminate the deficit, with Moody's improving their outlook for Ontario's credit rating.

Hi Gadi,

Please find attached the debt deck and the provincial comparison deck for this afternoon's meeting.

Thanks,
Serena

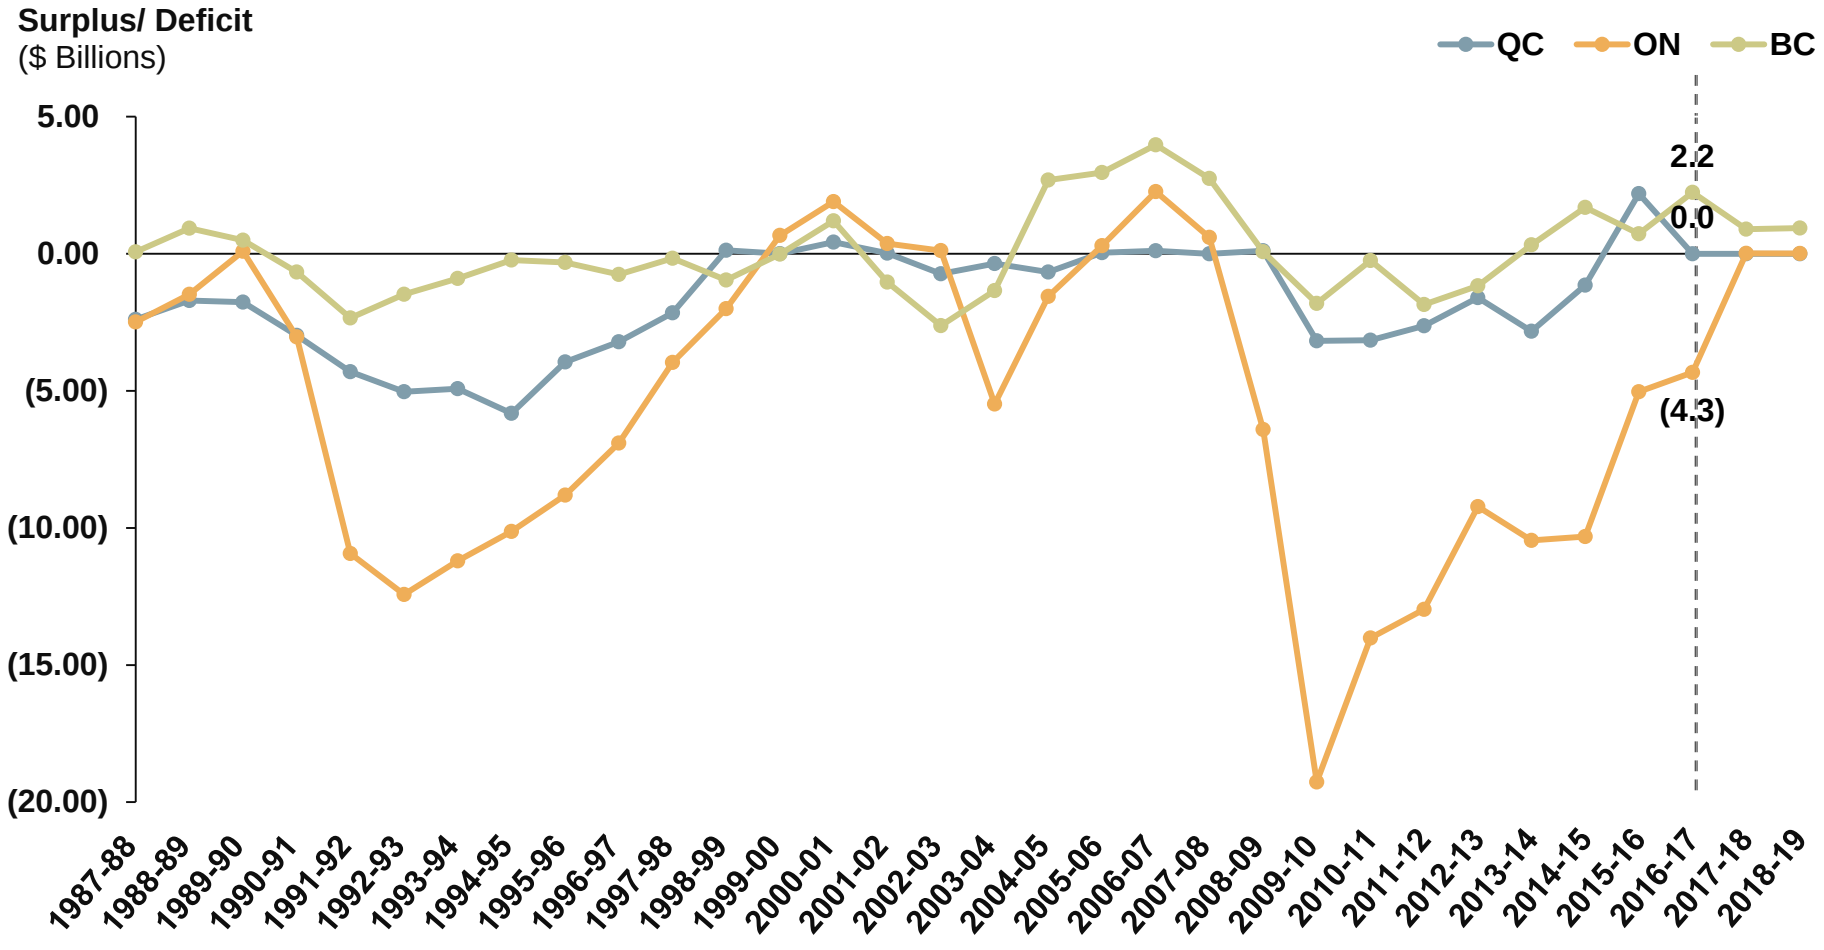
Comparison of Ontario, Quebec and British Columbia

January 2017

Overview

Comparison of Ontario, Quebec and British Columbia in:

- Budgetary Balance
- Net Debt and Net Debt-to-GDP
- Net Debt-to-Revenue



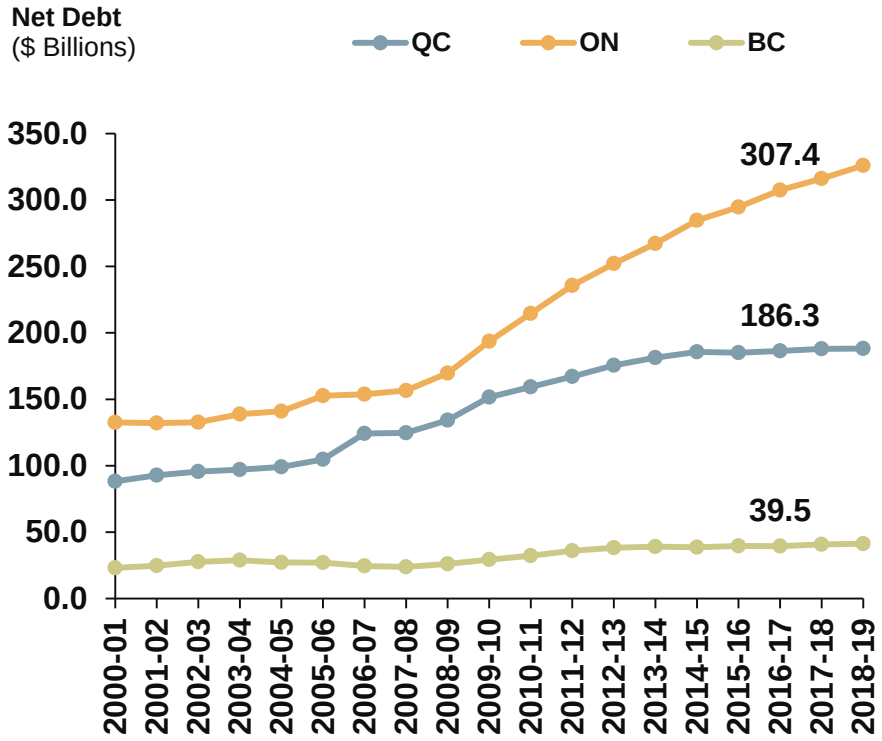
Quebec: Keys to Success

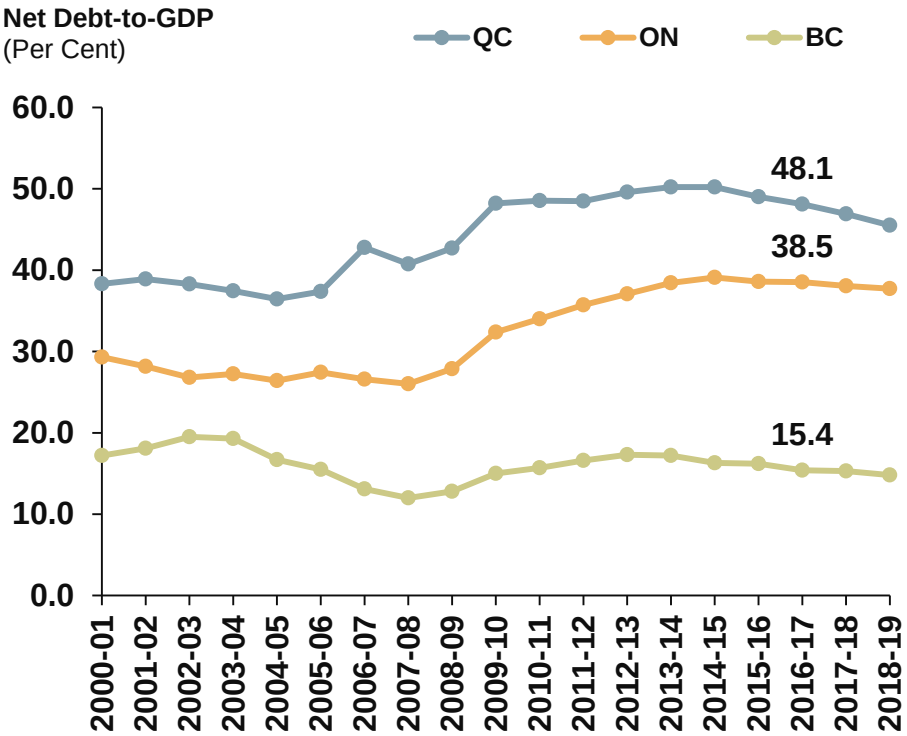
British Columbia: Keys to Success

Credit Rating Agencies

Budgetary Balance for Ontario, Quebec and British Columbia

- Quebec and BC are two of the three provinces projecting a balanced budget for fiscal 2016–17
- Ontario is projecting a deficit of $4.3 billion in 2016–17 and a return to balance in 2017–18



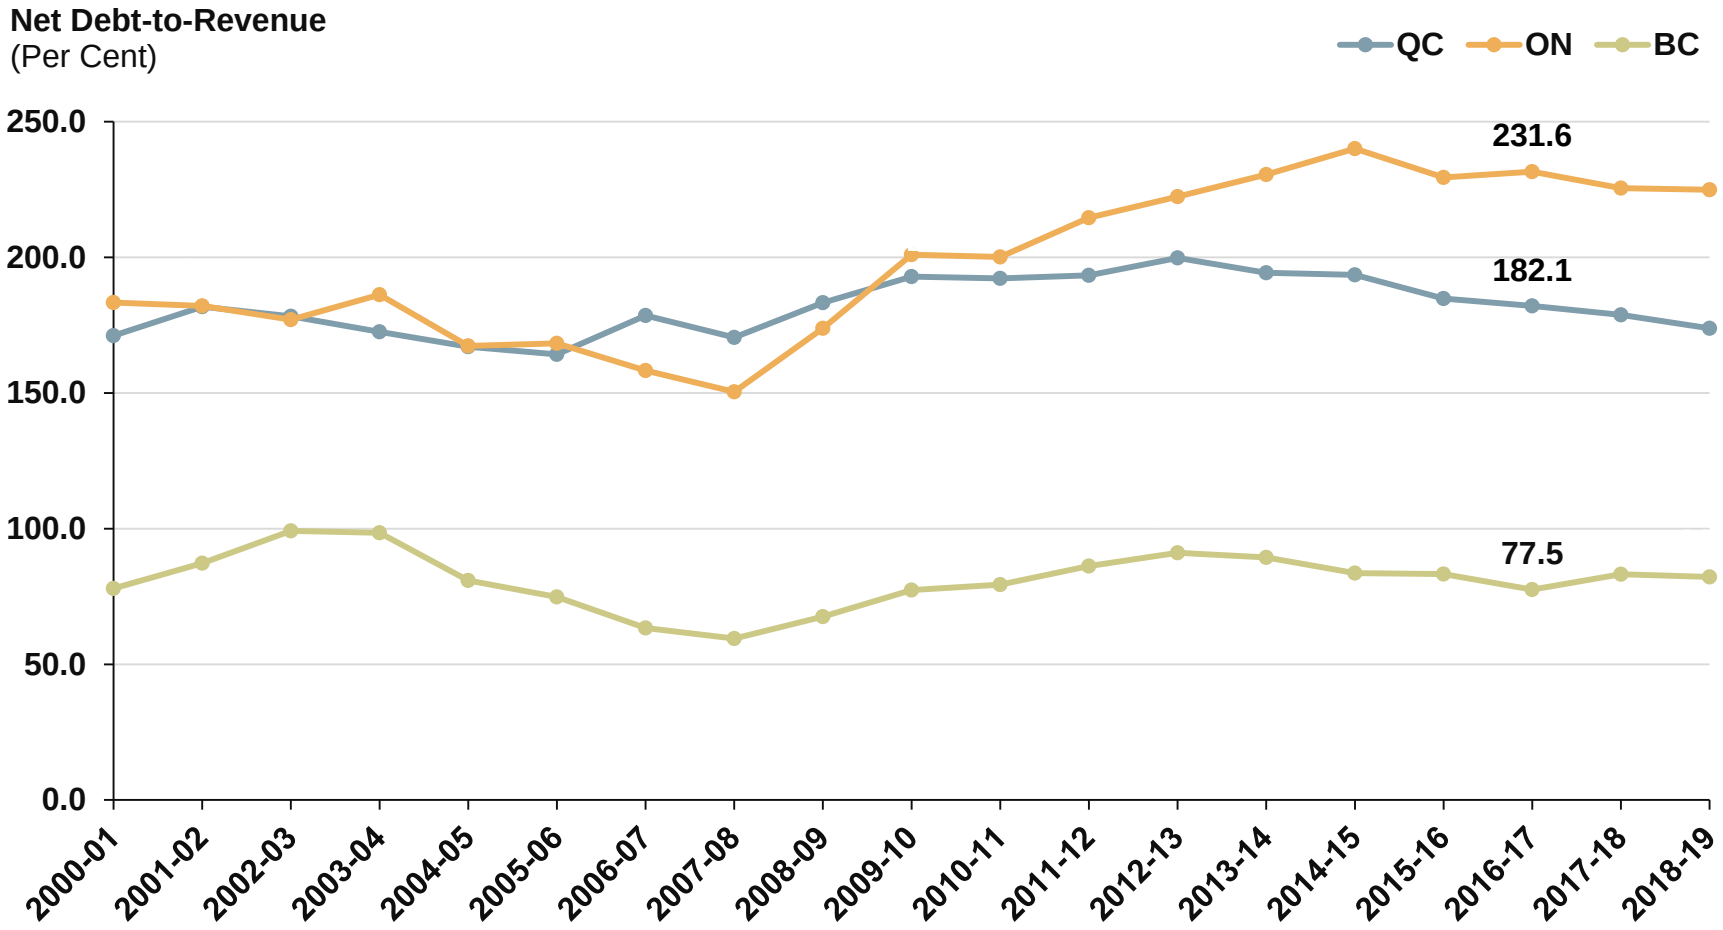


Source: RBC Economics (December 2016), Provincial Budgets, Budget updates.

Ontario

Net Debt and Net Debt-to-GDP for Ontario, Quebec and British Columbia

- Excluding the pension adjustment, Ontario's net debt would be $294.6 billion as of March 31, 2016 and is projected to be $307.4 billion in 2016–17, the highest out of all the provinces in Canada
- Excluding the pension adjustment, Ontario has the fourth highest net-debt-to-GDP ratio out of all the provinces, after New Brunswick, Newfoundland and Quebec. Ontario's net debt–to–GDP ratio would be 38.6% in 2015–16 and 38.5% in 2016–17



Source: RBC Economics (December 2016), Provincial Budgets, Budget updates.
Note: The Pension Adjustments incorporated in the Ontario 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Net Debt-to-Revenue for Ontario, Quebec and British Columbia

- Ontario has the highest net debt-to-revenue ratio out of all the provinces in Canada at approximately 232% for fiscal 2016–17, compared to Quebec's 182% and BC's 78%

Source: RBC Economics (December 2016), Provincial Budgets, Budget updates.
Note: The Pension Adjustments incorporated in the Ontario 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Quebec Overview

- Before deposits into a debt retirement fund, Quebec is forecasting a surplus of $2.0 billion in 2016–17, growing to a surplus of $2.8 billion by 2018–19
  - This would be the second year in a row that Quebec would be achieving a balanced budget
- As of March 31, 2016, Quebec's gross debt stands at $203.3 billion compared to Ontario's forecast of $327.4 billion

Sources: The Quebec Economic Plan, October 2016.

Quebec Debt

Quebec uses the following as its main debt indicators:

Gross Debt represents the amount of debt issued on financial markets and the net liabilities in respect of the retirement plans and future benefits of public and public sector employees, minus the balance of the Generations Fund. It does not take assets into account.

Net Debt is equal to the government's liabilities less its financial assets. It represents the debt that has funded capital investments and current expenditures.

Debt Representing Accumulated Deficits corresponds to the difference between the government's liabilities and its financial and non-financial assets as a whole.

As of March 31, 2016	($ billion)	% of GDP
Gross Debt	**203.3**	**53.8**
Less: Financial, assets, net of other liabilities	(18.3)	
Net Debt	**185.0**	**49.0**
Less: Non-financial assets	(67.1)	
Debt Representing Accumulated Deficits	**120.1**	**31.8**

Sources: The Quebec Economic Plan, October 2016.

Quebec: Keys to Success

- In 2006, the Quebec government established an *Act to reduce the debt and establish the Generations Fund.* The Generations Fund is a debt retirement fund that would solely be used to repay debt

- The Province had also set debt reduction objectives that were included in the Act. For fiscal 2025–2026:

  - Gross debt cannot exceed 45% of GDP

  - Debt representing accumulated deficits cannot exceed 17% GDP

- Quebec commenced a bulk of their infrastructure investments prior to 2009, allowing them to avoid major adjustments to the budgetary plan as well as large debt accumulation

- To help achieve a balanced budget, Quebec relied on tight spending controls and limited their consolidated expenditure growth in the past two years between 1.4% to 2.5%

- In 2016–17, Quebec will receive $10.0 billion in Equalization payments from the federal government, compared to Ontario's $2.3 billion. Quebec's net contribution to the Equalization program is the lowest out of all the provinces at -$6.5 billion, while Ontario's is the highest at $4.6 billion.

Sources: The Quebec Economic Plan, October 2016; S&P 2016.

Flexibility Arising from Balanced Budgets

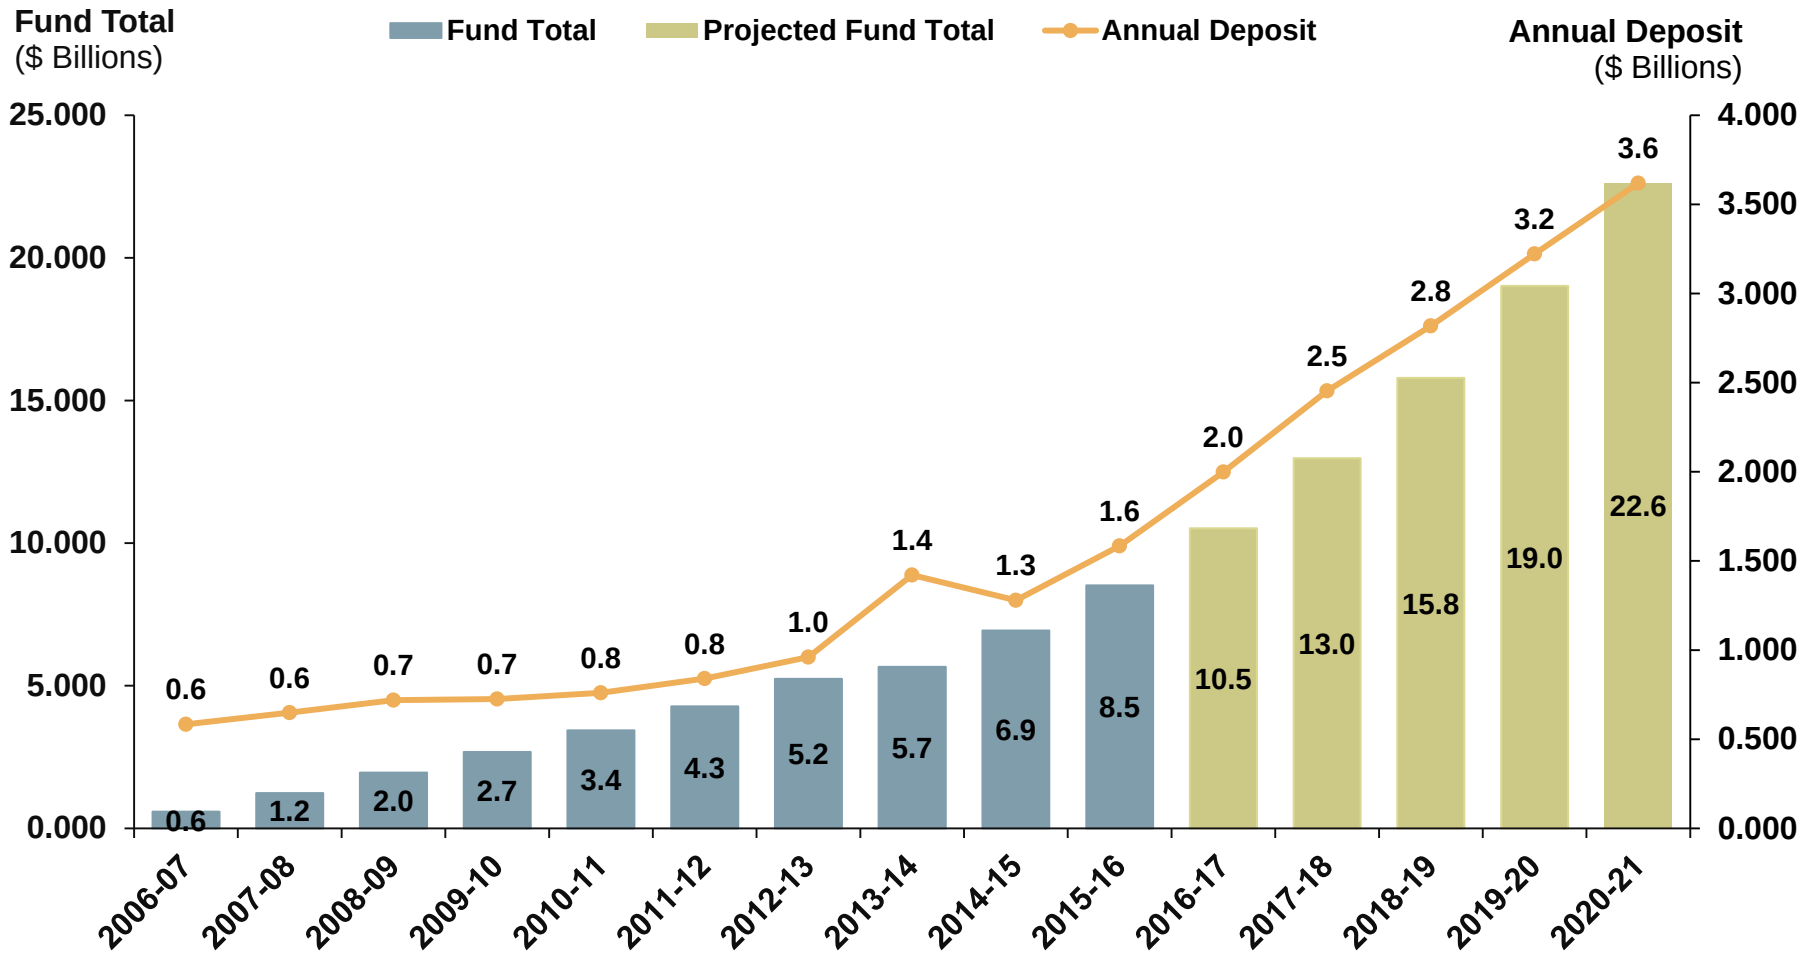
- In October 2016, Quebec tabled it's 2015–16 Public Accounts posting a $2.2 billion surplus. The last time Quebec had a balanced budget was before the crisis in 2007–08.
- The $2.2 billion surplus allowed the Quebec government to make the following announcements:
  - $300 million more per year for health
  - $110 million more per year for education and higher education
  - $100 million more per year to support regional economic development
  - Additional investments of $400 million in public infrastructure
  - The complete elimination of the health contribution as of January 1, 2017—two years ahead of schedule, benefiting 4.5 million taxpayers, and representing an annual reduction of the tax burden of almost $760 million.

Additional investments
(millions of dollars)

	2016-2017	2017-2018	Cumulative [1]
Strengthening the funding of public services			
– Health and social services	100	300	1 000
– Education and higher education	35	110	365
– Regional economic development	100	100	400
Increase in the Québec Infrastructure Plan	-	400	400
Subtotal: new services	***235***	***910***	***2 165***
Complete elimination of the health contribution as of January 1, 2017	53	179	253
TOTAL	**288**	**1 089**	**2 418**

(1) From 2016-2017 to 2019-2020.

- Additionally, Quebec's debt decreased by $610 million due to the return to balance and deposits made into the Generations Fund.



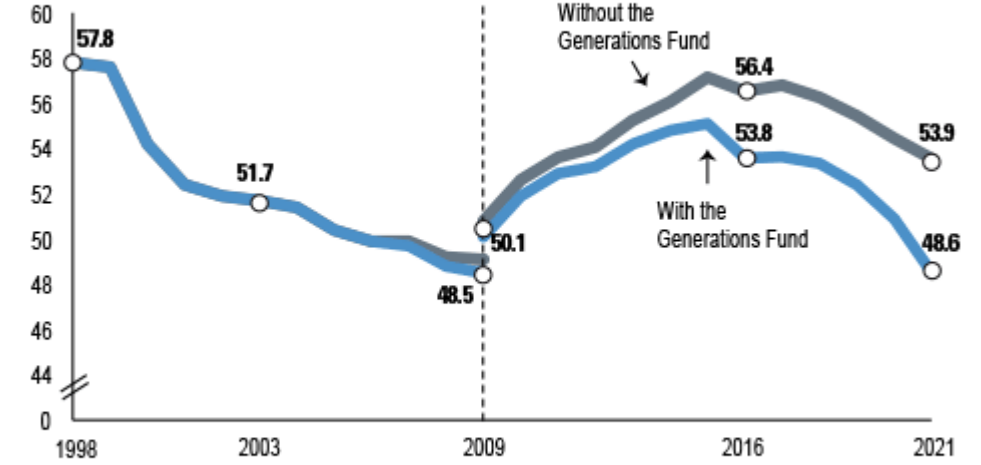
Quebec: Generations Fund

- Quebec implemented the Generations Fund in 2006 and makes annual deposits into the fund to reduce gross debt
- The fund is managed by Caisse de depot et placement du Quebec and achieved a return of 8.13 per cent in 2015
- Sources of funding include dedicated revenues from water-power royalties obtained from Hydro-Quebec and other private hydro-electricity producers, revenue generated by the indexation of the price of heritage electricity, specific taxes on alcoholic beverages, all mining revenues, and investment income
- As of March 31, 2016, the projected fund total is approximately $8.5 billion

Sources: The Quebec Economic Plan, October 2016.

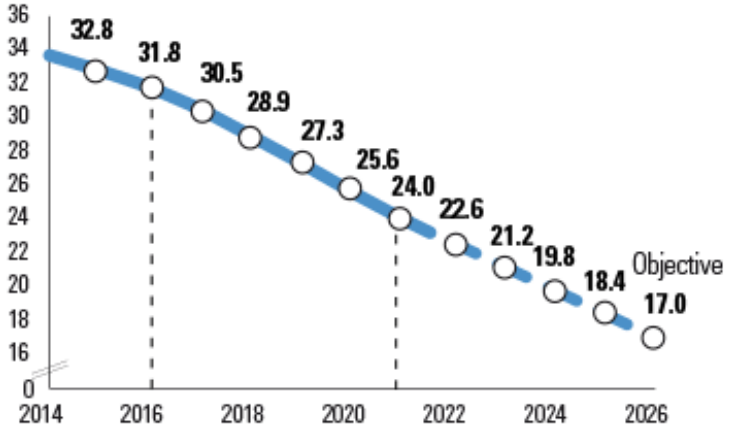
Quebec: Generations Fund

- The fund is estimated to save Quebec approximately $23.6 billion in gross debt from 2006 to 2021



Sources: The Quebec Economic Plan, October 2016.

Quebec: Impact of Generations Fund



- As at March 31, 2021, the gross debt burden should stand at 48.6%. Without deposits made in the Generations Fund, the gross-debt-to-GDP forecast would be 5.3% higher, at 53.9% of GDP
- As a proportion of GDP, the debt representing accumulated deficits began to decrease in 2013–2014 and is projected to continue falling over the coming years to reach its long term debt objective of 17% by 2025–26

Gross debt as at March 31(1)
(as a percentage of GDP)

(1) The gross debt takes into account the debt that the health and social services and education networks have issued in their own name. The data as of 2009 are not comparable with those for prior years, which do not include this debt.

Debt representing accumulated deficits
(as at March 31, as a percentage of GDP)

Source: The Quebec Economic Plan, October 2016

British Columbia Overview

- British Columbia is forecasting a balanced budget for fiscal 2016–17 with a projected surplus of $2.2 billion
  - This would be the fourth year in a row that the province would be operating on a surplus
- Since B.C. has started balancing the budget, they have reduced their direct operating debt (money borrowed in the past to fund programs and services) by over $2.2 billion
  - B.C. expects to eliminate direct operating debt by 2020
  - The province now borrows only to build capital projects
- As of March 31, 2016, British Columbia's total debt was $65.7 billion versus Ontario's $327.4 billion

Sources: Province of British Columbia, Budget Plan 2016; Budget Speech 2016.

British Columbia Debt

For debt management purposes, B.C. classifies its debt into two main categories:

Taxpayer-supported debt is debt owed by or borrowed on behalf of core government and its organizations, such as school districts and health authorities, which are dependent on government funding for some or all of their revenues.

- **Direct Operating Debt** is a portion of taxpayer-supported debt, borrowed to finance the past day to day operations of core government. Direct operating debt in any year is mainly equivalent to the accumulated past operating results of core government.

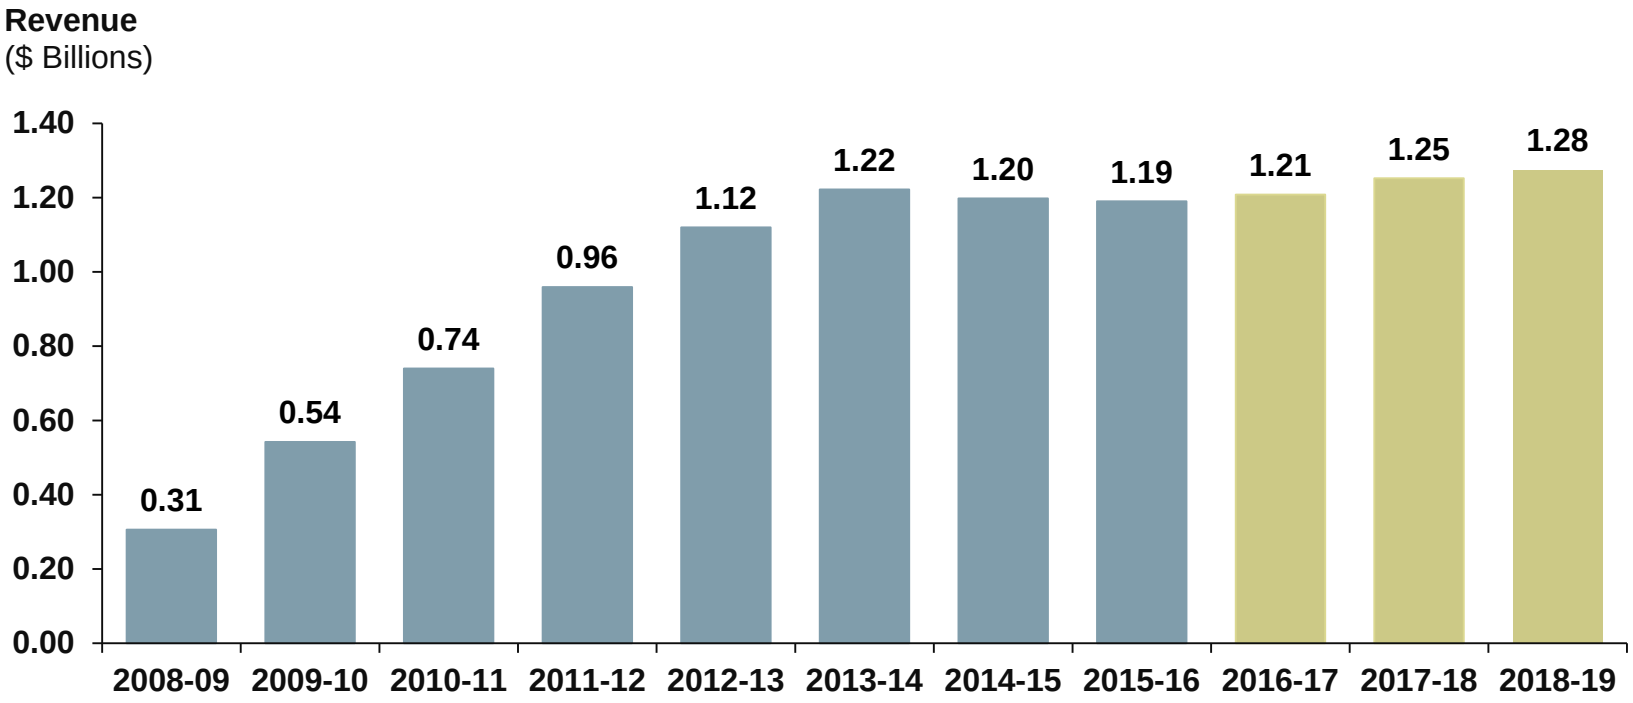
Self-supported debt is debt owed by or borrowed on behalf of government enterprises, such as B.C. Hydro, whose revenues come from their commercial operations.

As of March 31, 2016	($ billion)	% of GDP
Direct Operating debt	8.0	3.3
Total Taxpayer-supported debt	**42.7**	**17.4**
Self-supported debt	**22.6**	**9.2**
Total Debt	**65.3**	**26.7**

Sources: Province of British Columbia, Public Accounts 2015–2016.

British Columbia: Keys to Success

- In the 2016 Budget, British Columbia proposed to establish the *BC Prosperity Fund* to help eliminate the Province's debt over time and make investments in government priorities
  - British Columbia will be allocating $400 million to the fund in 2016–17
  - A minimum of 50% of each year's allocation to the fund will be dedicated to debt retirement
- The province increased its own-source revenues through taxes and fee increases by:
  - Implementing a carbon tax in 2008
  - Introducing a 15% property transfer tax on foreign real estate buyers



Sources: Province of British Columbia, Quarterly Reports 2016.

Flexibility Arising from Balanced Budgets

- British Columbia started posting surpluses in 2013–14
- When the province tabled its 2016 Budget it called for a surplus of $264 million in 2016–17, however, stronger than expected revenues has pushed that number to $2.24 billion
- Previously, British Columbia had posted surpluses of :
  - $327 million in 2013–14
  - $1.7 billion in 2014–15
  - $730 million in 2015–16
- In the Fall of 2016, the government announced that they were cancelling the 4% increase to Medical Service Plan (MSP) premiums as previously announced.
- Also, the government announced that those that are eligible for Regular Premium Assistance would see a 4% reduction of their premium, beyond what was originally announced in Budget 2016.
- Finance Minister Micheal De Jong said that these changes could be made because the government is in a better fiscal situation than what was said in Budget 2016.
- The 2016 Budget had announced investments of $1.6 billion in new and increased spending over three years on core services in addition to annual 3% increases in the health ministry budget, almost $500 million of which was funded by lower interest costs due to the retirement of operating debt.

British Columbia: Carbon Tax

- British Columbia enacted a revenue-neutral carbon tax in 2008 on the purchase or use of fuels, revenue obtained from the tax is returned to British Columbians through reductions in other taxes
- Tax rates commenced at $10 per tonne of CO2 emissions in 2008, increasing by $5 per tonne annually until 2012 at $30 per tonne

Sources: Province of British Columbia, Second Quarterly Report, November 2016.

Ontario: Rating Agency Update

Confirmed Ontario's A+ rating and maintained its Stable Outlook (June 2016)

- The stable outlook reflects expectations that the province's liquidity will continue to be average in the next two years, real GDP growth will be above 2% and operating revenue growth will lead to operating surpluses beginning in fiscal 2017.
- According to S&P, the debt burden should continue to decline, reaching below 240% of projected consolidated operating revenues by fiscal 2019.

Confirmed Ontario's AA (low) rating with a Stable Outlook (May 2016)

- The trend remains Stable, supported by the Province's continued progress towards restoring fiscal balance and a large, well-diversified economy with an improving, growth outlook.

Upgraded Ontario's rating to Aa2 with a Stable Outlook (April 2016)

- The stable outlook reflects Moody's view that the province's debt burden will continue to modestly improve as the province moves towards balanced budgets and therefore reduces its annual financing requirements.

Confirmed Ontario's AA- rating with a Stable Outlook (June 2016)

- Fitch noted that the province has demonstrated the ability to exert considerable expenditure restraint while instituting revenue changes as necessary to achieve its deficit reduction objectives.
- Fitch believes the Province remains on track to achieve its target assuming continued economic growth.

Quebec: Rating Agency Update

Confirmed Quebec's A+ rating and raised Outlook from Stable to Positive (June 2016)

- Quebec's improved fiscal picture primarily stems from strong financial management.
- S&P assumes in its base case scenario that Quebec will generate operating surpluses of 6.4% of adjusted operating revenues, and modest after capital account deficits of 1.3% of total adjusted revenues, on average, from fiscal years 2015-2019. This puts Quebec ahead of its closest peer, Ontario, in terms of fiscal recovery.

Confirmed Québec's rating at A (high) and maintained its Stable Outlook (July 2016)

- All trends are Stable, supported by the continuation of sound fiscal performance, a gradually improving albeit still modest economic growth outlook, and expectations that Québec's debt burden is now on a downward trend.

Confirmed Quebec's Aa2 rating and maintained its Stable Outlook (June 2016)

- Although Québec's stock of debt has risen in recent years, the province's debt burden has remained relatively stable due to growth in the economy and in provincial revenues.
- Québec's debt burden is aided by the annual contributions to the Generations Fund.

Confirmed Quebec's rating at 'AA-'; Outlook Revised to Stable (June 2016)

- Fitch noted that a return to consistently balanced operations provides the Province with a window of opportunity to resume debt reduction.
- The Province has been very successful in recent years in curbing spending growth as part of its consolidation program.

British Columbia: Rating Agency Update

Confirmed B.C.'s AAA rating and maintained its Stable Outlook (April 2016)

- B.C's ratings reflects its outperformance in financial management, budgetary flexibility, liquidity and contingent liabilities, compared to its peers.
- S&P assumes in its base case scenario that B.C. will generate operating surpluses of less than 5% of consolidated operating revenues and average after-capital deficits to remain between 5 to 10% of total adjusted revenues from 2015–2019.
- The stable outlook reflects the expectation that B.C.'s economy will continue expanding moderately over the next two years, contributing to relatively stable budgetary performance and slowing growth in tax-supported debt.

Confirmed B.C.'s rating at AA (high) and maintained its Stable Outlook (April 2016)

- All trends are Stable, supported by the Province's track record of strong fiscal discipline, which has helped to place the debt-to-GDP ratio firmly on a downward trend.
- However, debt burden remains above pre-recession lows, which limits near-term upward pressure on ratings.

Confirmed B.C.'s Aaa rating and maintained its Stable Outlook (April 2016)

- B.C.'s rating reflects its track record in prudent fiscal planning, strong economic growth, ability to record surpluses in periods of natural resource price weakness and its flexibility in fiscal policy
- The outlook is stable reflecting the assumption of continued surpluses across the medium-term and expected slight improvement of both the debt burden and interest expense.

Confirmed B.C's rating at 'AAA' and maintained its Stable Outlook (April 2016)

- B.C.'s rating primarily reflects conservative financial management practices resulting in stable fiscal performance and a well-managed liability profile. Key rating drivers include B.C.'s growing economy, commitment to fiscal balance and manageable debt burden.
- Fitch considers British Columbia's financial planning and controls to be strong and views them as key reasons for the timely return to fiscal balance following recession-driven operating deficits.

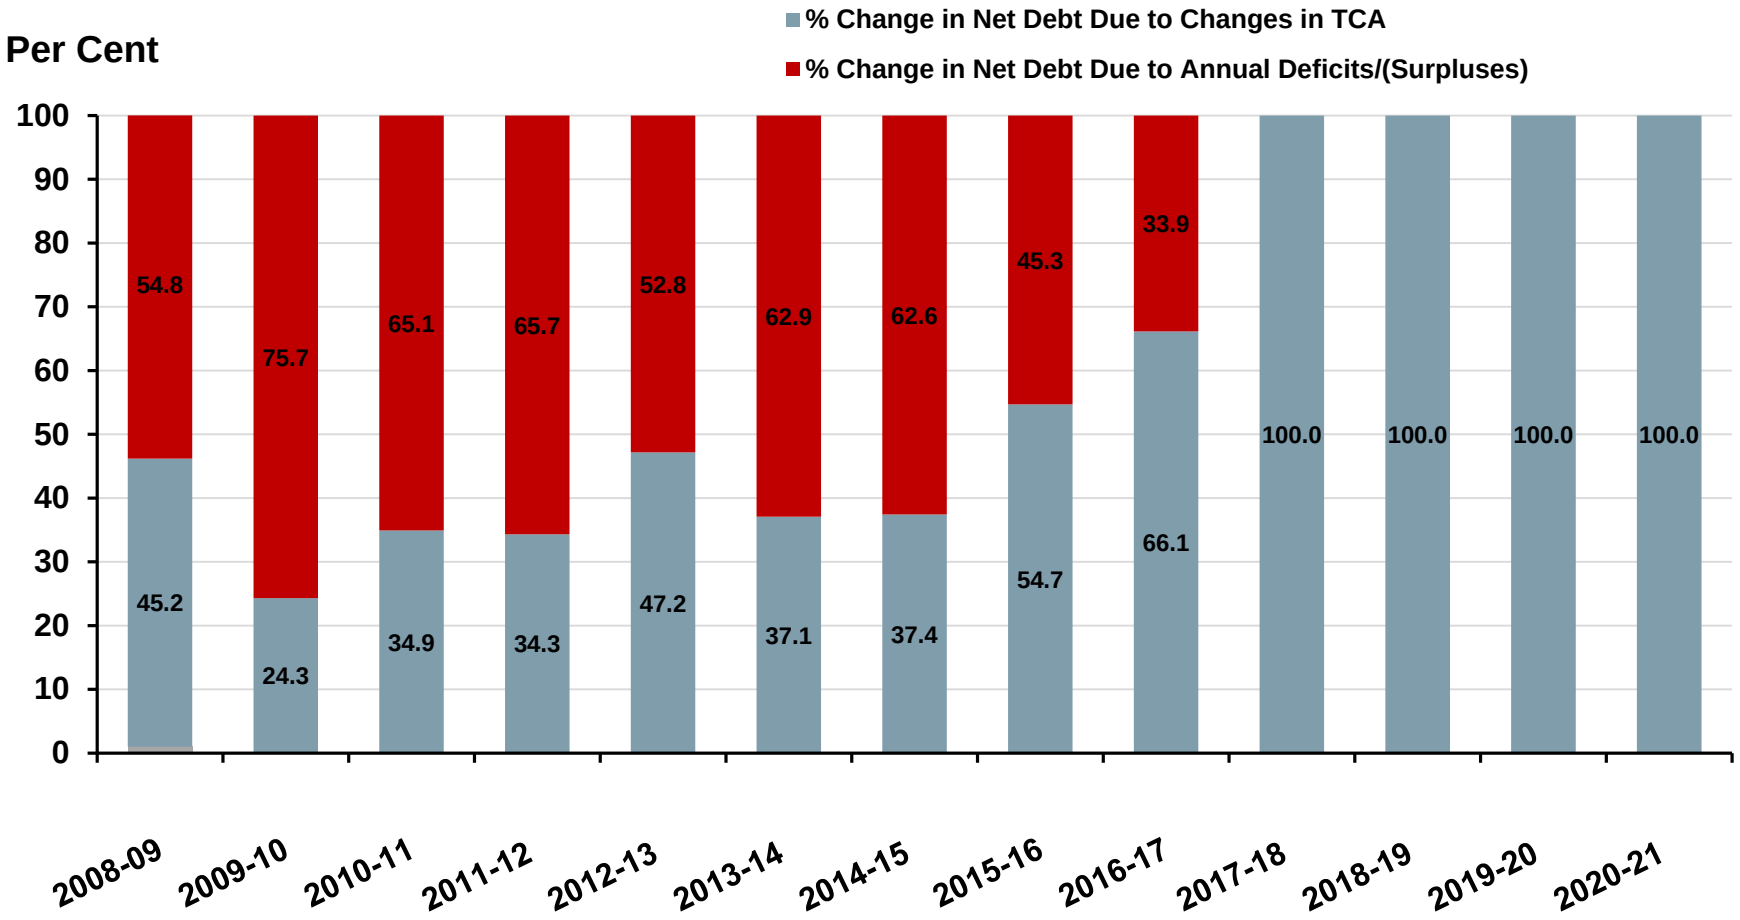
Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Net Debt-to-GDP and Accumulated Deficit-to-GDP

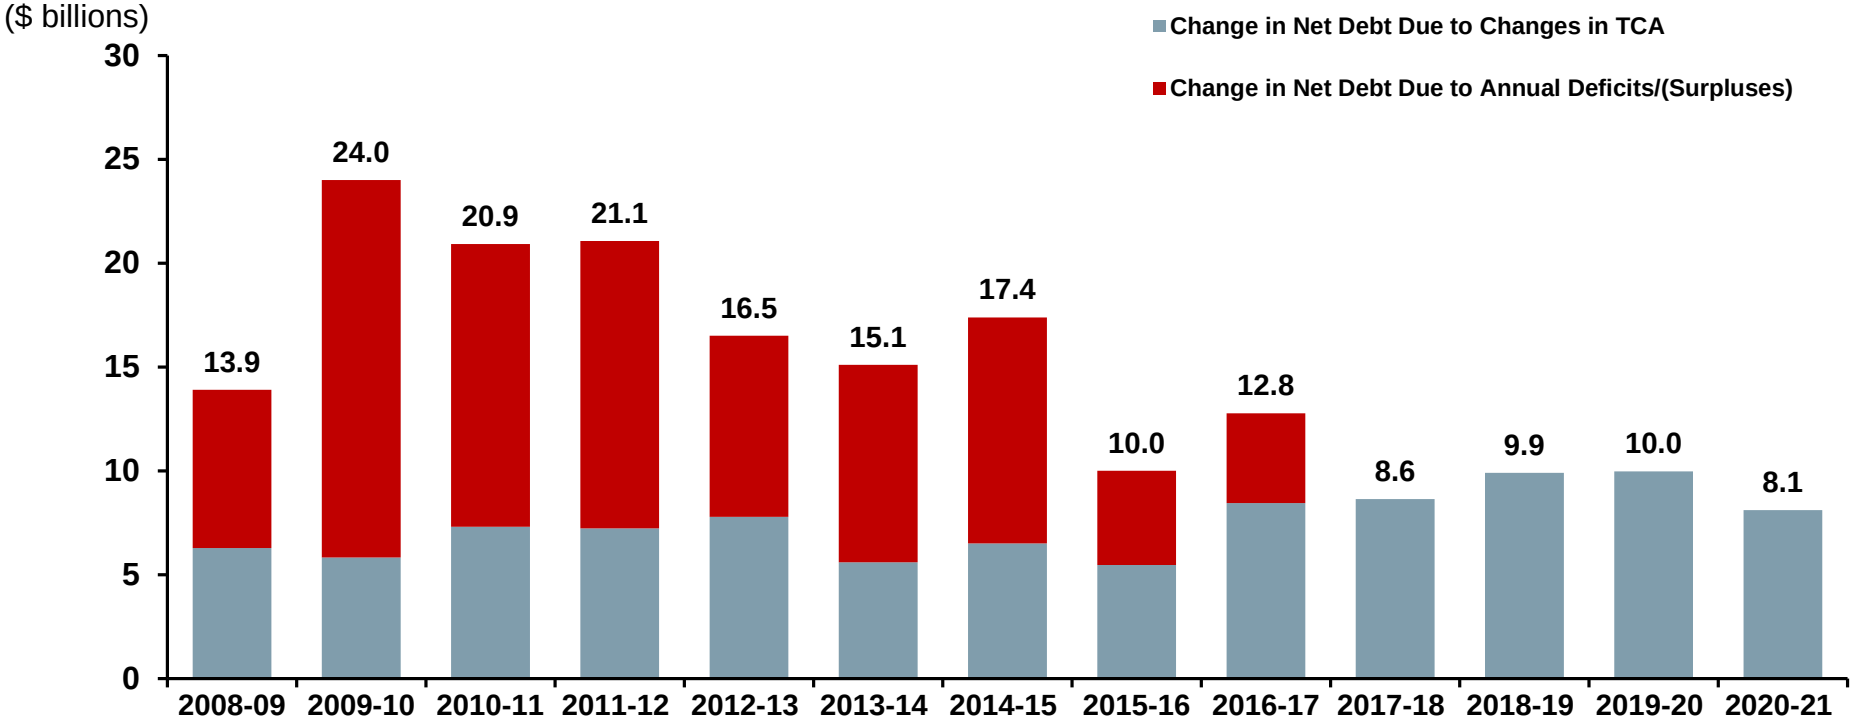


- Assuming a balanced budget from 2017–18 onwards and investments in capital as per the Province's 10 year Capital Plan, accumulated deficit-to-GDP and net debt-to-GDP would reach pre-recession levels by 2024–25 and 2028–29 respectively

Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Factors for Historical Growth in Net Debt

- Approximately 63% of the increase in net debt from 2008–09 to 2015–16 is due to the deficit, with investments in capital assets responsible for most of the balance



Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Factors for Historical Growth in Net Debt

- Approximately 63% of the increase in net debt from 2008–09 to 2015–16 is due to the deficit, with investments in capital assets responsible for most of the balance

Change in Net Debt from previous year
($ billions)

	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21
Net Debt ($ billions)	169.6	193.6	214.5	235.6	252.1	267.2	284.6	294.6	307.4	316.0	325.9	335.9	344.0

Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Factors for historical % change in Net Debt-to-GDP

- Net debt-to-GDP increases when:
  - Net debt increases due to the deficit, changes to TCA, and miscellaneous factors
  - GDP decreases (a negative number in the table below illustrates an increase in GDP as it results in a decline in the net debt-to-GDP ratio)
- To illustrate the table below, between 2008–09 and 2009–10, the net debt-to-GDP ratio was 27.9% and 32.4% respectively. The 4.5 percent point increase in 2009–10 can be attributed to the deficit by 2.91%, changes in TCA by 1.03%, and a decrease in nominal GDP which has a positive effect on the ratio of 0.56%
- Once the Budget is balanced, the ratio is only affected by TCA and changes to the GDP

	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19
Due to Annual Deficit	1.27%	2.91%	2.28%	2.19%	1.32%	1.40%	1.56%	0.62%	0.57%	–	–
Due to Changes in TCA	0.89%	1.03%	1.22%	1.15%	1.18%	0.82%	0.94%	0.75%	1.11%	1.08%	1.19%
Due to Decreases/ (Increases) in GDP	-0.31%	0.56%	-1.88%	-1.63%	-1.14%	-0.86%	-1.83%	-1.87%	-1.73%	-1.55%	-1.54%
Year over year % change in Net Debt-to-GDP	**1.84%**	**4.51%**	**1.62%**	**1.71%**	**1.36%**	**1.36%**	**0.67%**	**-0.50%**	**-0.06%**	**-0.47%**	**-0.35%**

Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Net Debt-to-GDP sensitivity analysis

- For 2016–17 the net debt-to-GDP ratio is 38.53%.
  - An increase of $769 million to net debt or a decrease of $1,990 million in nominal GDP would increase the net debt-to-GDP ratio to 38.63%.
  - A decrease of $826 million to net debt or an increase of $2,151 million in nominal GDP would decrease the net debt-to-GDP ratio to 38.43%.
- Since the 2016–17 net debt-to-GDP ratio was 38.53%, smaller changes to net debt or nominal GDP resulted in changing the net debt-to-GDP ratio to 38.63% versus the larger changes required to lower the ratio to 38.43%.

Subject:	Debt Management CIN
Date:	Monday, January 23, 2017 10:28:01 AM

Good morning,

There has been a request to update our Debt Management CIN.

I don't think there have been any changes to the debt/IOD numbers (current numbers as of FES 2016), but please review and confirm by end of day **Thursday**.

The bullet referencing the independent expert panel on Ontario's pension assets may need a refresh.

Attachments:	A Shadow Budget for Ontario 2018-2019 - external review (006).docx

Hi Ken,

I'm copying Alex and IOD_RPA because I know you're going to be held up in the ARMC meeting until 1:30pm.

You may recall that we provided comments on a draft of a C.D. Howe paper last week (our tracked comments attached). The Deputy had a question about one of our comments. Page 6 reads:

> *If the government doesn't tackle the long-term fiscal challenges, the cost of debt will take up an enormous share of total government revenues. Interest costs currently sit at 9 percent of revenues; at current trends, interest costs will increase to 22 percent in 2050-51 (Figure 4). If debt costs take up a large share of total revenues, that will leave less for other needs.*

Ken's comment was → *This is incorrect interest is only 8.3% of revenues in 2016-17 and projected to increase to 8.4% in 2019-20.*

The Deputy's question is two-fold: first, how do we know it is incorrect? And second, do we have our own projection for 2050-51?

If Ken or Alex could get back to me as soon as you are able that would be much appreciated.

Thanks, Anna

A Shadow Budget for Ontario, 2018-2019

*Draft not for circulation

January 24, 2018

As Ontario enters an election year, the policy debate will likely involve the difficult choices the province faces regarding the fiscal outlook and long-term sustainability of a number of government programs. The budget the provincial government puts in place for the 2018-19 fiscal year will lay out a framework for the debate in the coming months.

To aid this debate, the C.D. Howe Institute has launched its inaugural Shadow Budget for Ontario, following similar Shadow Budgets at the federal level (see last year's edition from Robson, Laurin, and Wyonch 2017). This Shadow Budget shows that the fiscal course the province is currently on is unsustainable. This Shadow Budget would act to bring the long-term cost of government in line with the revenue-raising capacity of the province. It would balance increases in spending and cuts to poorly designed taxes with new ways to generate revenues and reducing spending on ineffective programs.

Although providing specific costing of programs is outside of the scope of this Shadow Budget, it presents an overview of policy directions that balance increases in spending with generating new revenues and cost-savings measures. This Shadow Budget proposes to:

- Restate the province's books to reflect the Auditor General's concerns about ~~incorrect~~ the Government's treatment of pension assets and electricity-sector debt;
- Reduce future expense growth to reach a balanced budget as soon as possible;
- Adopt long-term fiscal policy – which requires surpluses, not just balanced budgets – that meets the government's debt-to-GDP target ratio of 27 percent;
- Contain healthcare costs by extending capitated payments to family doctors and revising contractual arrangements with healthcare providers;
- Slow the increase in the minimum wage and focus on improving education and to create economic opportunities for Ontarians;
- Adopt an indigenous identifier in standardized test and oversample indigenous students to permit reliable rural-urban and district-level analysis;
- Modernize funding formulas for post-secondary education by taking outcomes into consideration;
- Reform the school curriculum with an emphasis on improving math performance;
- Open retailing for alcohol and marijuana and revising the tax scheme for both products;
- Adopt personal income tax reforms that reflect the cost of raising children, while reforming personal income taxes to lower high marginal rates, which occur even at low incomes;
- Replace targeted business tax breaks with lower provincial business property taxes to create a level playing field across the province and across different types of businesses;
- Rethink the fiscal relationship between municipal government and the province by retooling grants and transit governance while modernizing municipal financial reporting to match that of the province;
- Reduce the cost that governments impose on building new housing;
- Retain the plan to price greenhouse gas emissions, but re-focus the government plans to spend money raised by such a price away from cost-inefficient programs; and
- Seek out long-term cost savings in the electricity sector, as opposed to short-term fixes that only add to the long-term cost of energy.

Commented [KK1]: Incorrect is not an appropriate term, replace with "Government's"

The Fiscal Outlook

This Shadow Budget adopts the consensus view of the independent officers of the Ontario legislature – the Auditor General and Financial Accountability Office – as the authoritative outlook of the short-, medium-, and long-term fiscal outlook. While the government may claim to have balanced the budget for 2017-18,

Commented [AK2]: What is the rationale for adopting this perspective, especially without discussing their hidden assumption that the government cannot/does not respond to fiscal pressures (e.g. last FAO review)?

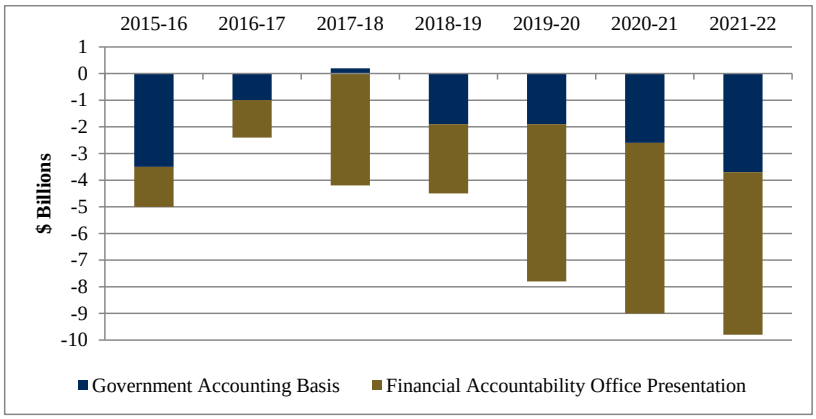
that declaration is in the eye of the beholder and the medium- and long-term fiscal outlook for Ontario is dire.

Cleaning up Ontario's Books – The Short Term Deficit Debate

The government has made the argument that it has reached a balanced budget. However, the Auditor General has two specific objections related to this claim because of the government's accounting treatment of pensions and whether the recent Fair Hydro Plan amounts to new spending.

The pension dispute centres on the government's treatment of the Ontario Teachers' Pension Plan (OTPP) and the Ontario Public Service Employees' Union Pension Plan (OPSEUPP). The province has decided to report the full asset value of the plan on the province's balance sheet, which neglects the fact that future retirees already have a claim on these assets. Doing so reduces the deficit and the Auditor General (2016) objects to this. Further, as Robson and Laurin (2016) argue, the government discounts OTPP and OPSEUPP liabilities by more than the plans do themselves. This understates the liabilities provincial taxpayers face.

However, the view of the Auditor General is not universally shared. The Ontario government appointed a Pension Asset Expert Advisory Panel to advise on the difference of opinion between the government and Auditor General. The Panel's Report (2017) argued that an asset does exist for the government, saying that the government does have sufficient access to the plan's assets, if even just through reducing contributions to the plans, to merit including it. However, given that we have taken the Financial Accountability Office's presentation of financial data, which is independent of both the government and the Auditor General, we have decided to use the presentation of provincial finances as recommended by the Auditor General.



Commented [KK3]: My understanding was that the FAO presented both the Government's accounting treatment as well as the AG on the pension assets, leaving the decision to the reader. This is however, an OPCD issue

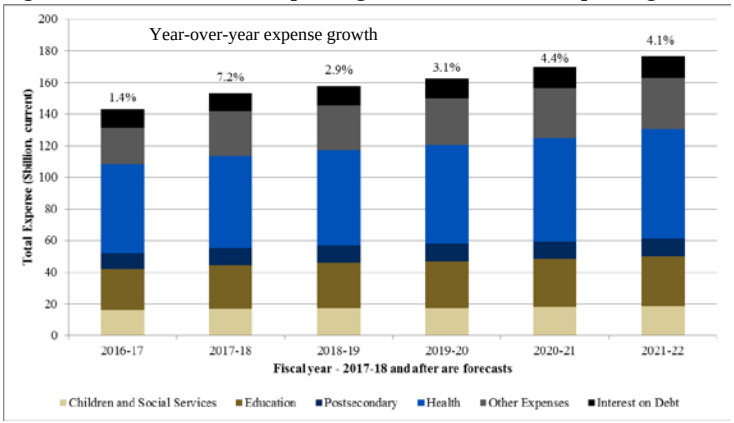
The second dispute hinges on the Fair Hydro Plan. As the Auditor General (2017a) points out, the government "is making up its own accounting rules" by creating an accounting asset for a government-controlled entity to offset the debt the province placed on another government-controlled entity. The asset the government created only exists because of legislation that gives a government entity the authority to collect higher prices in the future. The true value of this asset should be zero, or highly discounted, because of great uncertainty of the ability to collect higher prices in the future. For example, electricity markets may change because of technology, making it impossible for a central government agency to collect future revenues to pay this debt. As such, this debt should be reflected in the province's financial statements now. Incorporating the debt amount in today's books means that the proper accounting treatment would increase the deficit by $2.5 billion per year through to 2027.

Commented [KK4]: Likewise OPCD should comment since this is an accounting issue

This Shadow Budget would restate the province's books to reflect the Auditor General's concerns. It would restate the province's finances to show a deficit in the upcoming 2018-2019 fiscal year to be about $7 billion (Figure 1).

Figure 1: Ontario Budget Balance

Source: Financial Accountability Office of Ontario. Does not include reserve fund. 2017-18 and beyond are projections by the Financial Accountability Office.



Medium-term Fiscal Sustainability

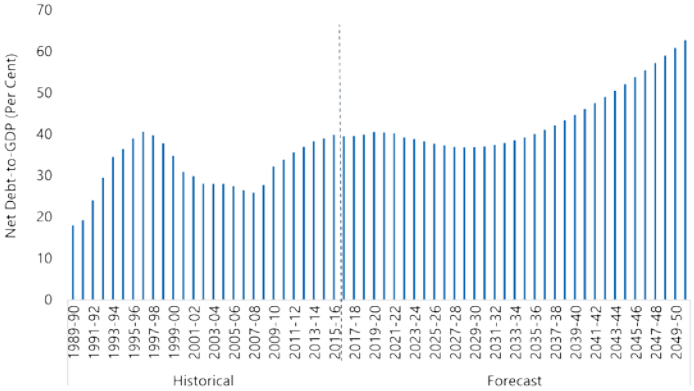
The question of whether there is a deficit for the 2017-18 fiscal year is far less important, from the point of view of the sustainability of public finances, than future trends. Under current trends, the deficit would rise to nearly $10 billion by 2021-22 (Figure 1), according to the Financial Accountability Office (2017a). These long-term deficits will return because of two main causes: the deficits the government should account for under the Fair Hydro Plan, as discussed above, and fast-rising expenses. Future revenues are not likely to grow as fast in the future as in previous years because of a number of factors, such as one-time revenues that have come in recently and economic growth that is likely to slow. Further, the Financial Accountability Office (2017a) argues that the government has made overly optimistic revenue forecasts that rely on above-trend income growth in the province and corporate income tax receipts.

The province can look to balance its budget in the near future in a number of ways. First, it can look to increase revenues. It can do so through short-term revenue gains such as sales of provincial assets – as this Shadow Budget will suggest in more detail below. Alternatively, it can raise tax rates, such as the provincial component of the HST. Or, it may seek more grants from the federal government. However, aside from hiking tax rates, none of these steps to increase revenues are directly within the control of the province or offer more than a single year's worth of solutions.

The province must address fast-growing spending to reduce future deficits. The first trend that this Shadow Budget would address is the projected pattern of total spending growth. 2017-18 spending is forecast to grow at over 7 percent over the previous year's spending. This kind of spending growth is unsustainable. Future expenses beyond 2020 of over 4 percent are also likely unsustainable. This Shadow Budget would aim to reduce future expense growth to reach a balanced budget as soon as possible.

Figure 2: Ontario Provincial Spending and Year-over-Year Spending Growth Rates

Source: Financial Accountability Office of Ontario



Long-term Fiscal Sustainability

Balanced budgets will not be enough for Ontario to be fiscally sustainable. The government has targeted a net debt-to-GDP ratio of 27 percent, a sensible target that is similar to that of the federal government of 25 percent of GDP. This Shadow Budget would continue pursuing such a target and take the necessary action to achieve it within 15 years. As the Financial Accountability Office (2017b) projects, achieving 27 per cent requires the province to run budget surpluses until 2033-34. If the province continues on the current trend, and not run first balanced budgets and then surpluses, the net debt-to-GDP ratio will reach 63 percent by 2050-51 (Figure 3).

Commented [KK5]: While this is no doubt a sensible target, the basis of the 27% is the reversion to the pre-recession net debt to GDP ratio.

Commented [KK6]: Without knowing the basis of this calculation we cannot comment

Figure 3: Net-Debt-to-GDP, Under Current Fiscal Trajectory

Source: Financial Accountability Office of Ontario

Figure 4: Interest Expense as a Share of Revenue

Source: Financial Accountability Office of Ontario

If the government doesn't tackle the long-term fiscal challenges, the cost of debt will take up an enormous share of total government revenues. Interest costs currently sit at 9 percent of revenues; at current trends, interest costs will increase to 22 percent in 2050-51 (Figure 4). If debt costs take up a large share of total revenues, that will leave less for other needs.

Commented [KK7]: This is incorrect interest is only 8.3% of revenues in 2016-17 and projected to increase to 8.4% in 2019-20

Health Policy

Given that Ontario spends roughly half of its own-source revenues (which excludes transfers from the federal government) on health, getting good value for money in healthcare will be critical for the financial and societal well-being of Ontarians. Although the province has successfully contained the annual growth of healthcare spending from 2010 to 2015 to 2.4 percent, on average, the rate of health spending is starting to tick upwards again alongside worries about emergency room overcrowding, long waits for long-term care beds as well as overburdened caregivers . Progress on addressing these issues – in addition to limiting public and private gaps in coverage for prescription drugs, dental services and mental health – while allocating reasonable increases for health spending, is a critical challenge.

Efforts to enable self-directed homecare services – such as recent moves to increase the number of hours nurses, personal support workers, and therapists will provide care in homes – should help alleviate the emergency room pressures for elderly patients, and these programs should continue to expand on their current trajectory. Relative to providers, patients with mild to modest physical disabilities are more likely to know the abilities of family and informal caregivers to offer care and their schedules, and which services they would prefer to have delivered by other health professionals. Although there are some legitimate concerns about patient's ability to choose among groups of healthcare professionals to meet their needs, there should still be enough flexibility around the use of self-directed home care budgets to ensure appropriate innovation from those delivering services. This means sufficient flexibility in how patients select and schedule professional help.

Ensuring that people without private insurance for dental, drug and mental health services get access to services is also a priority for healthcare policy. On this score, there are a number of avenues to ensure appropriate coverage and do so at minimal public cost, including the expansion of these services among the most vulnerable (Blomqvist and Busby 2016, Busby and Pedde 2014). This Shadow Budget would look at new ways to revise contractual arrangements with providers – pharmacists, dentists and dental hygienists, and phycologists – to improve the efficiency of spending in these areas.

Although government needs to spend more money to improve access to mental health services, more money alone will not ensure that all illnesses get treated in appropriate timeframes. It may be more advantageous to give a greater share of the overall budgetary spending on physiologists to hospitals and primary care doctors for outpatient needs.

The way in which the province pays for the delivery of health services matters. Paying hospitals, hospital-based doctors and necessary outpatient services for a needed intervention often results in silos of poorly coordinated care. This Shadow Budget would instead look at more bundled payments by procedure for hospital-based services (Sutherland and Hellsten 2017). And in primary care, this Shadow Budget would extend capitated payments to family doctors to include budgets for enrolled patient drugs, lab and diagnostic imaging budgets as part of the evolution in payment reforms for family doctors (Blomqvist and Busby 2011).

Labour and Education Policy

Many governments are struggling to respond to the challenges of precarious work – employment that is often more insecure and uncertain than traditional full-time employment, with greater prevalence for part-time work. Further, as wage gaps exist between temporary or part-time vis-à-vis full-time workers, policymakers have recently passed legislation intended to bridge these differences. While there are no ideal policy levers for addressing these issues, it should be recognized that, in general, increases to the minimum wage are a reasonable option available to policymakers. However, gradual and evaluated increases to the minimum wage are the best way to increase minimum wages over time. Ontario's recent, large increase in the minimum wage means that the right response for government should be to pause and evaluate. One particular concern is the impact on smaller municipalities that risk being most negatively affected.

This Shadow Budget would amend the current minimum wage in two ways, as recommended by Marchand (2017). First, it would allow for regional variation in minimum wages. This Shadow Budget would allow upper-tier and single-tier municipalities across the province the option to return to a lower minimum wage for a five-year period. New York has a similar policy, in which the minimum wage is highest in New York City than in other parts of the states. Second, this Shadow Budget would build a provision into the minimum wage legislation to reduce it in the case of a recession, as California has recently done.

As trade, technology and worker preferences continue to change the dynamic for skills desired by employers, a competitive labour force will need an abundance of core numeracy and literacy skills. For Ontario, the news on these scores is mixed. On literacy, the results are strong (EQAO 2015). In terms of numeracy, however, the results are alarming – only half of all grade 6 students in the province meet the provincial standard for numeracy and its OECD Programme for International Student Assessment (PISA) scores have plummeted over time, from 530 in 2003 to 509 in 2015, one of the largest drops among Canadian provinces, putting Ontario statistically below the average in Canada(Richards 2017). This needs

fixing. This Shadow Budget would continue the province's re-examination of the math curriculum and pedagogy, where the effectiveness of different pedagogies should be explored as potential causes (Stokke 2015). This Shadow Budget would also look at teacher preparedness and consider evaluating teacher knowledge in subject matter with the administration of student exams to teachers prior to the academic year. Insufficient results should require immediate intervention.

Furthermore, collecting, analysing, and reporting educational outcomes are essential to closing the achievement gap between more and less advantaged students. Including a question that identifies indigenous student in PISA tests is a great way to track educational achievement of indigenous students and help educators and policymakers to design more effective strategies to improve outcomes. The province should also oversample to ensure sufficiently large sample of indigenous student to produce reliable estimates at the district level and to perform urban/rural analysis (Richards and Mahboubi, forthcoming).

Many OECD countries consider Performance-Based Funding (PBF) systems for their post-secondary education, but Canadian provinces, including Ontario, lag behind in adopting this innovating way of financing. Usher (forthcoming) shows the benefits associated with PBF include less burden of funding negotiations, higher accountability of the post-secondary institutions, and greater competition between institutions, leading to a greater focus on results. A similar approach to competition in grants for research has been effective at improving the performance within universities, and should apply to universities themselves. The government needs to review its funding formula and learn from the experience of other developed countries.

Tax Policy

Commodity Taxation

Alcohol

In 2015-16, the Liquor Control Board of Ontario (LCBO) paid the provincial government a dividend of $1.9 billion. It also remitted $867 million to the federal and provincial governments in Harmonized Sales Tax, excise taxes and customs duties (LCBO 2016). In addition to the LCBO, there is a system of beer and off-winery stores, which operate as a quasi-monopoly thanks to government regulation. Masson and Sen (2014) find that freeing up alcoholic beverage retailing would result in increased government revenue, lower prices, and more convenience. They find that, other factors being equal, Western Canadian provinces with more beverage alcohol retail competition had 7 percent more per capita provincial alcohol profits than provinces with government-run monopolies. The province has begun to introduce beer sales at grocery stores. However, it has done so slowly with limits on the amount of sales by the store. This Shadow Budget would go further by auctioning licenses for other retail outlets. It would also auction licences for off-winery stores to other wineries and also to new wine retailers. The result would be increased provincial revenues and more choice for Ontario consumers.

This Shadow Budget would also revise taxation of alcoholic beverages. Currently, tax rates are fixed by type of beverage, currently ranging from 52 cents per litre to $1.06 per litre, depending on the type of manufacture, not alcohol strength. Wine is taxed as a percent of sale value and sprits are taxed at up to 38 cents per litre plus a percentage of the retail price. This Shadow Budget would graduate the tax on alcohol

to relate to alcohol content. This reform would target the health problems caused by alcohol, which is directly in line with the alcohol content of any drink (The Economist 2013).

Marijuana

The federal government has legalized marijuana for recreational consumption with legal sales scheduled to begin in July. The main policy objectives driving marijuana legalization are the improvement of public health and the minimization of the black market and its associated criminal activity. Ending the prohibition of marijuana involves coordination between all levels of government. Provinces must determine the structure, distribution, and regulation of the retail market and jointly determine taxation levels of marijuana with the federal and municipal governments.

Ontario has announced that it will restrict retailing of recreational marijuana to LCBO-run stores. Only 40 of these locations will be in place by next July 1, the federal target date for legalization, with a total of 150 locations expected by 2020. The province missed the opportunity to have a competitive market for retail marijuana. Independent businesses have an incentive to locate where market demand isn't being met and competition between businesses constrains operating costs and keeps prices low. Lower prices in the legal market make it more likely to be competitive with the existing black market.

The province's decision to enter the market also implies considerable resources will be expended in the construction and maintenance of stores, higher salary expenditures and other overhead costs. These will be met at the expense of other sectors, which will receive lower government funding.

Having few retail locations means that access to recreational marijuana will be inconvenient for a significant number of Ontarians. Recreational consumers are highly unlikely to switch their dollars to the regulated market if there isn't easy access. This means that there will be significant opportunity for the black market to continue operating in all the areas without enough legal stores to meet market demand or that are convenient to access. (By contrast, there are more than 650 LCBO outlets in the province.) Further, to levy penalties against illicit businesses will require significant justice and police resources. And since there won't be enough regulated retail outlets to meet market demand, it is likely that at least some of these businesses will still find it profitable to operate. This Shadow Budget would make retailing of marijuana competitive and allow for the licensing of privately-run retail stores. This could take the form of entirely private retail, as in Alberta. Alternately, licensed establishments could operate alongside government retail stores and deliver better market coverage faster than the crown corporation on its own.

Ontario has joined the federal government’s proposed coordinated excise tax framework for recreational marijuana. While Crown-corporation retail isn’t particularly competitive in terms of convenience, keeping taxes low will help ensure that the legal market will be price competitive with the illicit market. The tax rate on dried cannabis flowers will be $1 per gram or 10 percent, whichever is higher, with 75 percent of the revenue going to the provincial government. The revenue from this excise tax will initially be modest, bringing in $50 to $95 million in 2018 and $175 to $200 million annually by 2021.

Gasoline and Fuel

The government should be concerned about the prospect of declining revenues from fuel and gasoline taxes, which will intensify as vehicles become more fuel efficient and become increasingly electric. This Shadow Budget would begin a study of the potential to replace fuel taxes with tolls for use. Further, the best solution for traffic congestion is a road toll. Road pricing could also bring the price that drivers pay for

infrastructure they use closer to the actual cost of it. Gas taxes (which are about 75 to 80 per cent of road-related revenues), vehicle licences and other revenues from drivers have covered less than two-thirds of roadway expenses across Canada since 2008. Taxpayers should only subsidize transportation to the extent that it encourages broader access to all in society and the government should review whether a one-third subsidy is the appropriate amount of taxpayer subsidy for roads.

Personal Taxation

Income taxes affect individual and business incentives to earn income, save, invest, and take risks. Excessively high taxes at the margin can also drive tax avoidance behaviour.

At the personal level, the impact of income tax variations on work participation decisions is particularly acute for the secondary earner in families with children and lower-skilled workers. In general, lower income, less educated people have a greater tendency to adjust their paid work behaviour through workforce participation decisions, while more-educated workers and high-income earners tend to adjust through the number of hours they work (Duclos et al. 2015).

High income earners' taxable income has been shown to be particularly responsive to high marginal tax rates – through both tax planning avoidance behaviour and earnings decisions (Laurin 2015). And the sensitivity to rate changes is higher at the provincial level in response to provincial rate changes than at the federal level in response to federal changes. This is because high-income earners can take advantage of provincial tax rate differences by shifting their income tax attributes and work locations to the most tax-advantageous province (Milligan and Smart 2014).

Provinces like Ontario with one of the highest top combined federal and provincial marginal tax rates of over 53 percent on high-income earners should aim to reduce that rate to a level at or below 50 percent. The responsiveness to the change would have a beneficial impact on the tax base that would ensure a very low fiscal cost for the policy. Furthermore, the income tax system should be clear and transparent. Ontario has a surtax notionally in place for health care expenses. However, this tax is treated as general revenue. The province should replace this surtax and set income tax rates and brackets that transparently show the marginal tax rate people are paying.

Other tax changes should aim to lower the burden of taxes on secondary earners in family with children. This Shadow Budget would reform the tax recognition of child care expenses through the replacement of the child care expense deduction with the introduction of a new refundable tax credit for child care expenses. It would encourage stay-at-home parents to join the workforce, producing extra tax revenues, considerably limiting the net fiscal cost of its implementation (Laurin and Milligan 2017).

Also, typical labour arrangements are changing with technological change. Workers are becoming less attached to a single employer and move around more freely between projects and contracts. Their incomes are also more prone to be fluctuating from year to year – a period of low earnings followed by a year of higher earnings, or vice versa. But a worker with fluctuating income may end up paying more tax (and losing more income-tested government benefits) than another worker with a flat income profile but earning the same amount over a period of years. Wen and Gordon (2017) find that Canada's "fluctuation tax penalty" is most severe for individuals who earn lower incomes or are self-employed. This Shadow Budget would lessen the impact of fluctuating incomes on tax liability by allowing workers to average their

income over many years, so that any single large earning year would not lead to a disproportionate loss of fiscal benefits and higher tax payments.

Business Taxation

A properly designed business tax regime would provide for a common provincial tax rate for all businesses operating across the province, regardless of their location or sector. However, Ontario's tax regime selectively rewards a number of sectors, such as manufacturing, through the income tax system while punishing companies with overly high provincial property tax rates. The province of Ontario can simplify its tax regime, create a more level playing field across sectors and the province, and reduce the effective tax rate on new business investment all without reducing overall provincial revenues.

Eliminating Wasteful Business Tax Expenditures

The largest tax expenditure in the corporate income tax system, by far, is the Small Business Deduction, which costs Ontario over $2 billion in foregone revenue. A better alternative to the Small Business Deduction is a lower general corporate income tax rate. That is because the net impact of the Small Business Deduction is an expansion of the small business sector at the expense of large businesses. Since small firms are less productive than large firms, the Small Business Deduction lowers overall economic performance (Dachis and Lester 2015). This Shadow Budget would not proceed with any further cuts geared to small business.

Most Canadian provinces provide a tax incentive for innovation. They mimic the federal tax system which provides eligible businesses with a Scientific Research and Experimental Development (SR&ED) credit. Ontario provides a non-refundable tax-credit worth 3.5 percent of the value of eligible expenses for firms to deduct from their taxes. The total innovation tax incentive for Canadian businesses is one of the highest in the world, but Canada consistently lags behind international peers on measures of business innovation (Parsons 2011). The Ontario SR&ED credit comes at a large fiscal cost: a tax expenditure of $150 million in the 2017 calendar year (Ontario 2017). Instead of targeting up-front tax credits for innovation, a better solution to encouraging innovation is with a low overall income-tax rate (McKenzie 2006). In addition, the province provides manufacturing and processing businesses a preferential lower tax rate than those in the rest of the economy: 10 percent instead of the usual 11.5 percent. This lower rate cost taxpayers $290 million in the 2017 calendar year.

This Shadow Budget would eliminate the Ontario SR&ED credit and the lower rate for manufacturing and processing, and use that revenue to cut high provincial property tax rates that choke investment, as discussed below. It would also initiate a comprehensive review of tax expenditures to determine whether the existing tax expenditures are still appropriate or whether they should be redesigned as deductions or credits (see Robson and Laurin 2017). Tax expenditures can be removed when shown to be no longer effective, as the government has already committed to eliminating ineffective tuition and education tax credits, as recommended by Neill (2013).

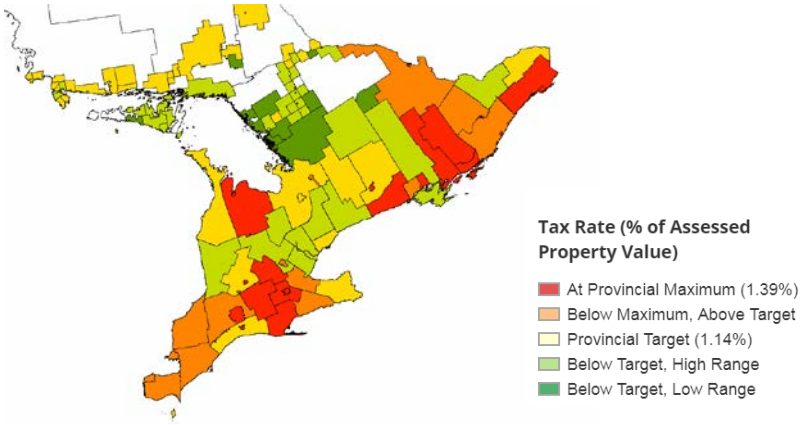
Cutting Provincial Business Property Taxes – A Revenue Neutral Cut in Investment Taxes

Ontario took over the local education property tax from local school boards in 1998. School boards had widely varying tax rates across the province and by property type when the province took over. The province immediately made its residential tax rate the same for all residents across the province. It's a different story for businesses. Each year since 2007, the province has set a maximum tax rate, called

the ceiling rate, and a lower target rate designed to be revenue-neutral for the province. The province committed in its 2007 budget to lower higher rates down to the target rate over time, but the province has stalled on tax cuts since 2013.

The provincial property tax still varies wildly across cities and for different buildings within cities (See Figure 5a and 5b, which shows provincial rates for commercial and industrial properties). Provincial commercial property tax rates in some Ontario municipalities are more than three times those in others. The provincial tax is highest on industrial property across much of Southern Ontario. As Found (2017) shows, the average provincial business property tax rate is more than 6 times its residential counterpart.

Figure 5a: Provincial Commercial Property Taxes in Southern Ontario



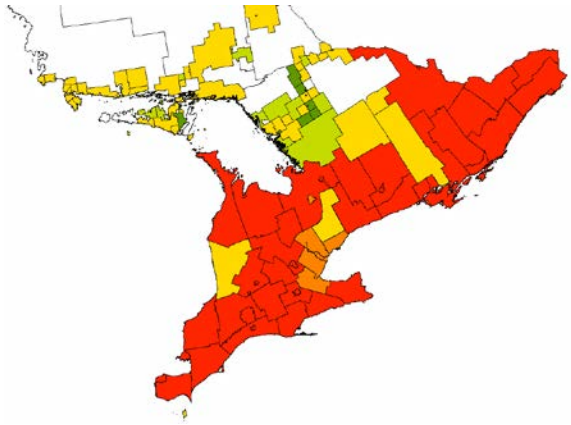


Figure 5b: Provincial Industrial Property Taxes in Southern Ontario

Source: Jacobs, Dachis and Found (2017). Results include Northern Ontario. Hollow areas not subject to provincial property tax.

Cities collect the money on behalf of the province after receiving a regulation from the province of how much to collect. In the 2017-18 fiscal year, the province will collect $6 billion in property taxes, which it reports as general revenue. Since different education tax rates by region have nothing to do with local school spending, each school board now gets a provincial top-up grant in order to level the playing field. Each school board`s total revenue is based on its enrolment and the needs of students, not the value of buildings in the area. That means the provincial property tax now has no bearing on school boards' spending. Yet, the province still uses the misleading name "education property tax" to describe it on tax bills.

These high property taxes have a large economic cost. Property taxes act like a tax on capital, specifically building capital. A tax on capital reduces the incentive to invest, resulting in lower investment which leads to lower productivity and therefore income and standards of living of Canadians. A 10 percent increase in commercial property tax rates decreases the long-run value of the business property assessment base by 8.2 percent. At the average level of business property taxation in Ontario, a $1.00 business property tax hike costs the Ontario economy $5.56 (Found 2017). Higher taxes shrink the tax base, which makes it harder for governments to raise revenues. The total business tax rates in some cities across Ontario – such as London, Windsor and Brantford – are so high that cities and the province might see revenues increase if they cut their taxes to attract more business investment.

This Shadow Budget proposes to complete the harmonization of business property tax rates. To make such a tax reform revenue-neutral, it proposes to eliminate the SR&ED credit and the lower manufacturing and processing corporate income tax rate and reduce provincial business property taxes that would reduce revenues by the same amount saved. Such a change would have a number of benefits. First, it would create a more level playing field across different types of businesses that currently face different tax rates. Secondly, it would improve fairness in the provincial property tax regime across the province. Third, a revenue-neutral property tax reduction would lower the marginal effective tax rate on new investment in most parts of the province – and almost all of Southern Ontario – by more than any increase in provincial income taxes would increase the effective rate. Property taxes have an especially large effect on tax costs on investment because they are insensitive to profit and are akin to a direct tax on capital (Found and Tomlinson 2017). Such a reduction in provincial property taxes would be largest for the same sectors that would see a removal of their special, lower income tax rate, across most of Southern Ontario.

Housing, Municipal, and Infrastructure Policy

This Shadow Budget would seek to lower the cost of housing across the province by taking steps to reduce barriers to construction and eliminating economically costly rent controls and transfer taxes. It would also fundamentally change the relationship between municipalities and the province by granting cities the ability to put their budgets on a sound financial footing and allow them more flexibility in financing infrastructure.

A Smart Housing Plan

The cost of housing in Ontario has increased dramatically in recent years. According to data from Brookfield's Real Property Solutions, home prices the Greater Toronto Area increased by more than 250 percent between January 2005 and the end of the 2017. In response, the province has taken steps such as introducing taxes on foreign buyers and rent controls. The government's policies have focused mostly on curtailing the demand of housing.

On April 20, 2017, the province introduced a 15 percent Non-Resident Speculation Tax in the Greater Toronto Area. This transfer tax is substantially higher than the existing provincial land transfer tax that has a maximum rate of 2.5 percent. Land transfer taxes such as these have a high economic cost of reducing the mobility of households (see Dachis 2012 and Dachis, Duranton, Turner 2008). In addition, land transfer taxes are highly volatile and present a large fiscal risk to the province if the housing market has a serious downturn (Ngo, Angastiniotis, and West 2017). This Shadow Budget would immediately eliminate the additional 15 percent tax and look to begin reductions in the general land transfer tax in future fiscal years.

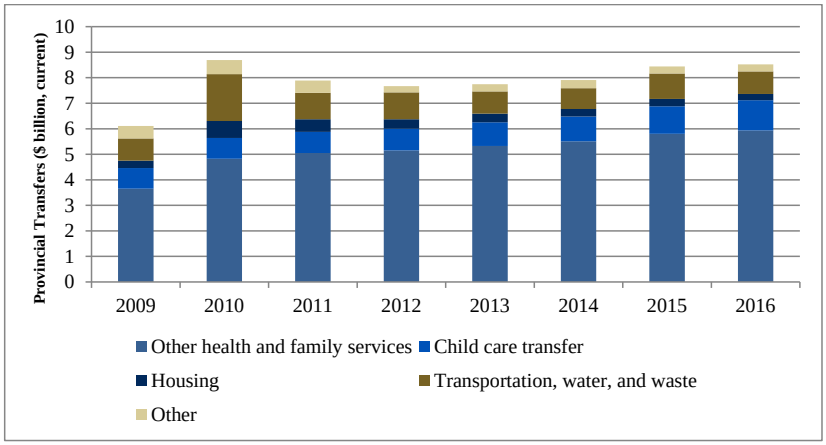
On the same day, the province expanded rent control to all rental units in the province, rather than only those built before 1991, as was the case prior. Rent control is one of the few economic policies around which there is a solid, evidence-based consensus about its long-term effect on the cost of housing: it does not lower it in the long-run (Kronick 2017). The likely result of rent control is that housing developers will not build rental housing knowing they face a cap on potential returns, while facing no commensurate cap on their investment risk. The result will be fewer units available, leading to housing shortages. This Shadow Budget would phase out rent control on all rental units. It would start by reducing the extent to which rent control binds the market by increasing the allowable increase, doing so annually until eventual repeal. Rather than rely on rent control, this Shadow Budget would embrace the recent federal decision to create a Canada Housing Benefit that provides low-income renters with the funds to seek a wide range of market-priced rental units (Canada 2017). This Shadow Budget would re-orient financial support for housing construction, which is often part of transfers to local governments, as discussed below, to match the federal contribution in creating the Canada Housing Benefit.

Reducing the Cost of Housing

There is strong evidence that restrictions and extra costs on building new housing – such as zoning regulations, delays on permit approvals, development charges, and limits on greenfield housing development – are dramatically increasing the price of housing. Dachis and Thivierge (forthcoming) find that a limited lowering of these restrictions can reduce house prices in some municipalities in the Greater Toronto Area by around $100,000.

What can the province do to reduce supply barriers? Toronto heavily uses a clause in the provincial *Planning Act* – the legislation governing municipal zoning policy – that allows it to require additional payments from developers in exchange for a site-specific variance from zoning bylaws (Moore forthcoming). These additional payments, known as section 37 payments for the relevant part of the *Act*, increase uncertainty for developers and therefore increase the cost of housing. In addition, municipalities have an incentive to keep zoning bylaws out of date because updating them would take away the future section 37 payments. This Shadow Budget would place greater restrictions on the use of section 37 of the *Planning Act*, which would result in municipalities having a greater incentive to set more appropriate zoning regulations.

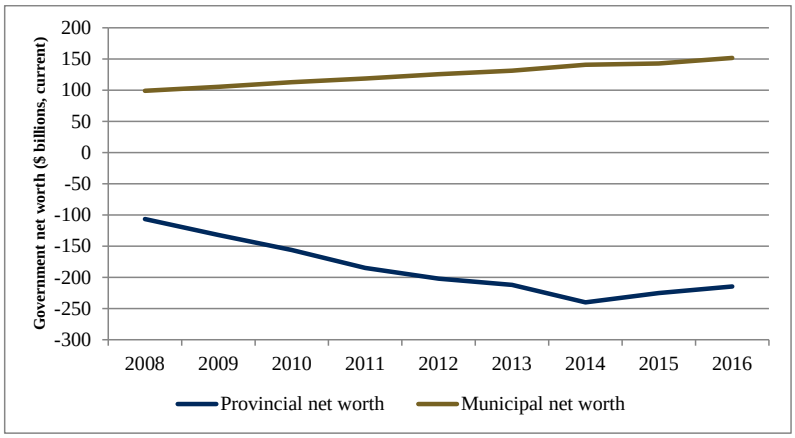
Developers pay development charges to compensate municipalities for the cost of building municipal infrastructure that services homes and commercial properties in a newly developed area. The largest single component of these charges is for water and wastewater construction (Dachis forthcoming). This Shadow Budget would require that cities replace development charges for water and wastewater infrastructure with volumetric uses fees that reflect capital costs. Such a move would reflect a change to a utility-based model and encourage conservation of water.



Finally, housing developers in GTA cities are facing a shortage of land available for new housing development (Clayton 2015). The primary cause is not because of the Greenbelt, a policy that forbids development on certain agricultural and parkland. Dachis and Thivierge (forthcoming) find that the main land-supply driven cause of higher house prices is not the Greenbelt, but the Growth Plan for the Greater Golden Horseshoe, a policy that requires cities in the GTA to approve a certain share of their homes within existing urban development boundaries and at a certain density. This Shadow Budget would relax the density and intensity targets that may not be appropriate across all cities subject to the Growth Plan while preserving the Greenbelt.

Rethinking Relative Municipal and Provincial Fiscal Health

One of the province's largest expenditures is on grants to municipalities. Transfers to municipalities have increased since 2009, including a large spike in 2010 to support infrastructure stimulus projects. Transfers to municipal governments from the province are now over $7 billion (Figure 6). Indeed, this trend is set to accelerate. In January of 2017, the province committed to double the amount of the fuel tax it transfers to municipal governments for transportation investment (Jones 2017). Ontario transferred $335 million in provincial gas tax revenue to municipal governments in 2017, and made a commitment to double the funding to bring the total transfer to $642 million by 2021-22.



The largest share of transfers is for health services – such as public health – and for childcare benefits. The latter, in particular, are dispersed to municipalities under a complex set of qualification criteria. These programs are ripe for review and evaluation, as their impact on workforce participation and the ability for single-parent and underrepresented families to engage in the labour force are critical. The child care transfer has increased by nearly 50 percent since 2008 reaching $1.2 billion in 2016, suggesting that a review of the program is in order

Figure 6: Ontario Provincial Transfers to Municipalities, 2009-2016

Source: Authors' calculations from Ontario Financial Information Return. Note: Some small cities have not yet submitted their 2016 financial information.

Figure 7: Ontario Provincial and Municipal Net Worth, 2008-2016

Source: Authors' calculations from Cansim Tables 385-0034 and 385-0037.

Does it make sense for the province to send such grants to municipal governments? Ontario's municipalities are, on average, in better fiscal shape than the provincial government. They are major investors in capital assets, but unlike the province, whose chronic deficits have resulted in financial liabilities that vastly exceeds its financial and non-financial assets, Ontario municipalities have positive net worth. They have borrowed to finance some capital assets, but the value of their assets exceeds their debt by a substantial margin. In the nine years from 2008 to 2016, Ontario municipal governments have increased their net worth by more than 50 percent, registering an increase of over $50 billion (Figure 7). In contrast, provincial net indebtedness has approximately doubled over that time, even after a slight improvement in net asset values over the last two years.

The Important Difference between Municipal and Provincial Accounting

How did such a fiscal health imbalance come about? Transfers are often the result of cities claiming they are struggling to meet their service or infrastructure demands and then calling on the province for support. However, the way that cities present their budgets, especially relative to the way the province reports its finances, makes municipal finances appear more precarious than they actually are. Ontario municipalities typically use cash accounting in their budget.[1] However, the province – as well as municipal end-of-year financial statements – uses the accrual accounting standard. Accrual-based budgets appropriately do not record the entire cost of capital items as expenses in the year of the cash outlay, but apply annual amortization over their useful live. Figure 7 presents municipal and provincial finances on the equivalent accrual financial basis.

Presenting councillors with budgets that show outlays on such assets as in-year expenses (as cash budgeting does), rather than amortizing them as they deliver their services (as accrual accounting does),

[1] A common practice is to show expected cash outlays in a "capital" budget alongside an "operating" budget for items to be consumed and expensed during the year.

likely leads municipalities to delay or reject some capital projects they would otherwise approve. It also likely leads them to finance the projects they do approve by raising revenues up front, rather than by borrowing and servicing the debt over the period the project yields its benefits. The result is that today's taxpayers – whether through property taxes, grants to cities, or development charges on houses – are paying disproportionately more than they are receiving in municipal services.

Reframing the Municipal-Provincial Financial Relationship

This Shadow Budget would cancel the proposed doubling of the amount of provincial fuel taxes that the province transfers to municipal governments. In fact, it would go further to limit transfers to cities. As above, this Shadow Budget would begin a long-term commitment to reducing property taxes levied by the province. Every dollar of provincial property tax reduction creates tax room that municipalities can decide to take up. Cities would have the freedom to choose how best to finance local services or whether to increase or reduces taxes and services.

The province's commitment to double gasoline tax transfers to municipalities emerged as a response to the City of Toronto's request for the province to enact an enabling regulation permitting it to introduce a toll on municipally owned highways. The province forbade Toronto from the move, offering all cities the gasoline tax transfer instead. This Shadow Budget would allow cities the ability to introduce road pricing without requiring a provincial regulation, as long as the intention and design of the toll is to reduce congestion, not as a purely revenue-raising option.

In addition, instead of allowing cities to have parcel-by-parcel zoning amendments, as discussed above, this Shadow Budget would expand the ability of cities to put in place a tax-increment financing plan for major infrastructure. This would allow cities to capture some of the increase in property values that result from a new transportation or other municipal investment that increases the value of nearby properties (Found 2016).

Finally, this Shadow Budget would require municipal governments to produce their beginning-of-year budgets on an accrual basis. Importantly, it would not require that cities produce a balanced budget every calendar year and would instead enact a review of the appropriate fiscal and economic benchmarks that cities should adhere to under an accrual accounting system. A revised budget process would allow cities the flexibility they need to finance long-term infrastructure without relying on provincial grants or upfront revenues.

Transit Governance

Originally created in 2007, Metrolinx started with the intent of creating a regional transit plan for the Greater Toronto and Hamilton area with a board made up of local government officials. Two years later, Metrolinx expanded to become the GO Transit operator. The province then removed the local government officials from the Metrolinx board, which is now made up of people appointed by the province.

How can the region overcome local opposition to changes while finding a way to act in the regional interest? Right now, it's easy for local politicians to pass blame around, especially to an unelected transit board. One proposal is to create a single, amalgamated transit operator for the whole Greater Toronto Area

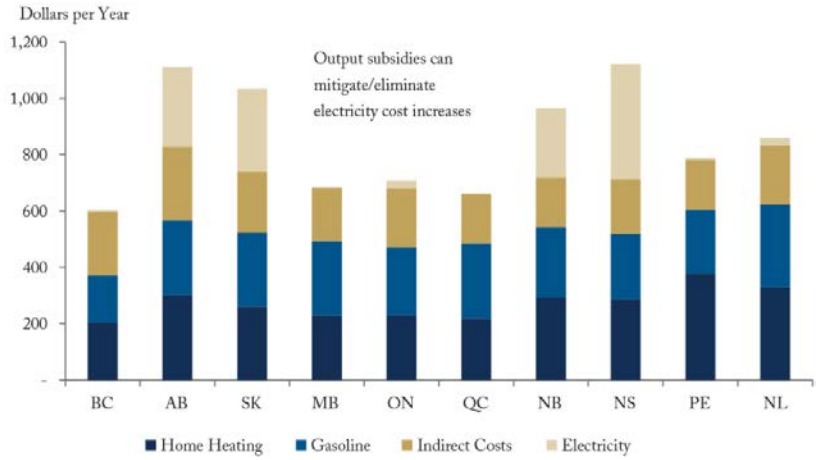
(Gill, Kelcey, Parker, 2017). But rather than amalgamation, which has shown to not result in significant savings (Bish, 2001, Found 2012), another approach is to restore the role of municipal governments on the board of Metrolinx.

Toronto should follow the Vancouver model, in which provincial legislation tasks a Mayor's Council made up of representatives from each of the region's 21 municipalities to appoint a board of Translink, the regional transit coordinating body. Translink has many subsidiary companies that operate transit services under contract (Translink 2017). The regional transit body is the regional coordinator, less than it is a regional authority and another new layer of government (Spicer and Found 2016). The reformed Metrolinx can contract with subsidiary transit operators, private contractors, or municipal governments that can supplement Metrolinx-supported routes.

Greenhouse Gas and Energy Policy

Greenhouse Gas Policy

This Shadow Budget would continue to increase the price on greenhouse gas emissions. This Shadow Budget does not take a position of the merits of a cap-and-trade program as opposed to a carbon tax. A carbon tax would be simpler to administer than a cap-and-trade program and would also generate more revenue for the province of Ontario. On the other hand, a cap-and-trade program that allows Ontario to link with the emissions permit market in California and Quebec allows for a lower cost on emissions to meet the same reduction target. Trading emissions permits across borders and between markets allows emissions reductions to occur wherever it is cheapest to do so, reducing the overall cost (Thivierge 2017).



If prices on emissions rise to $50 per tonne, which they are set to with federal government policy, the upfront cost to the average Ontario household would be around $700 per year (Figure 8). However, the final cost to consumers will depend on how governments recycle that revenue back to households. It is on how the government plans to use the revenues from a carbon price that this Shadow Budget proposes a change of direction for the province of Ontario.

Eliminate Energy Efficiency Programs and Consumer Subsidies

The current plan for the government of Ontario is to spend between $6 and $8.3 billion over five years on projects intended to further emissions reductions beyond that planned to occur using the existing cap-and-trade policy (Ontario 2016). The government plans to finance the subsidies with revenues from an auction for permits that greenhouse-gas-emitting companies must buy. Many of the proposed spending programs are exceptionally costly. For example, subsidies to retrofit apartments will cost as much as $900 million over five years. They will cost taxpayers $425 per tonne of GHG emissions reduced, much higher than any reasonable estimate of future carbon prices. Another example of a wasteful subsidy is the Electric Vehicle Incentive Program, which provides incentives of up to $14,000 per electric vehicle.[2] These kinds of subsidies are regressive and economically costly ways to further reduce emissions (Rivers and Shiell 2015). Other announced programs will not have a direct cost to taxpayers, but will be costly to drivers, homeowners and businesses. The government is planning to boost the amount of renewable content in gasoline and natural gas. Renewable-fuel mandates push the cost onto consumers and are an economically expensive way to reduce emissions (Auld 2008).

[2] See http://www.mto.gov.on.ca/english/vehicles/electric/electric-vehicle-incentive-program.shtml

Figure 8: Cost of a $50/tonne of CO_2 price on typical household

Source: Dachis and Tombe (2017) from Jennifer Winter.

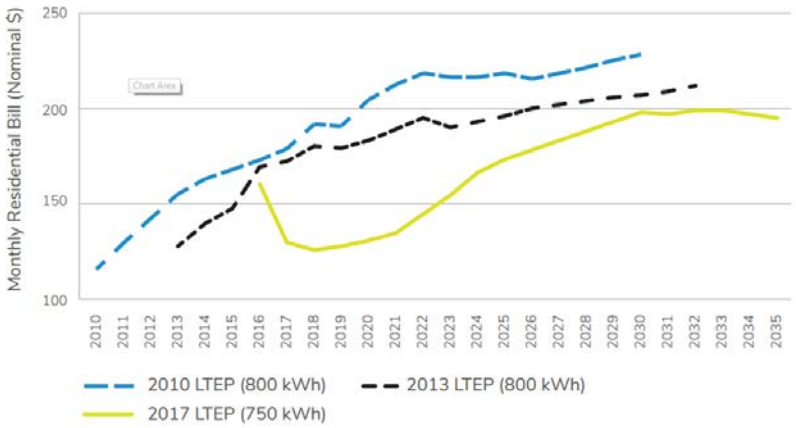
This Shadow Budget would eliminate nearly all of these existing subsidies and mandates and instead use the revenue to reduce taxation on households and businesses. The exact design of the tax cuts is outside of the scope of this Shadow Budget, but such a tax cut should promote two principles. First, it should reduce the average cost to businesses of emissions pricing while still providing a marginal incentive for them to reduce emissions. Second, households should receive tax cuts broadly in proportion to the cost of emissions pricing as a share of their income. This would mean tax cuts and enriching renewable tax credits geared to low-income families, for whom energy costs are a large share of total income.

To ensure industrial competitiveness, this Shadow Budget would adopt one of two paths. This Shadow Budget would prefer to adopt Alberta's emissions pricing policy, which is similar to the federal system. Producers in Alberta face little competitive disadvantage under this model. Although emitters pay the full cost of their own emissions, they receive a credit per unit of output, with the amount of the credit based on a provincial average emissions benchmark. Companies still have a strong incentive to reduce their emissions while having a minimal net impact on the competitiveness of industrial emitters. Indeed, companies with below-average emissions are better off in this system. This Shadow Budget would adopt a similar system if the cap-and-trade program is no longer the most effective means of putting a price on emissions. If, on balance, removing the apparatus of a cap-and-trade program for industrial emitters is too costly, it would preserve the system of allocating some permits for free to industrial producers.

Promote Long-term Energy Research

As research from Popp (2016) shows, a carbon price will drive 95 percent of the lowest-cost emissions reductions to meet reduction targets. Subsidies for energy adoption, as has been common in Ontario with electricity polices, encourages firms to use technology that is closest to market. Subsidies for adoption don't solve a market failure and don't encourage innovation. However, there is a market failure for longer-term energy research. The benefits of such research are broad, but the returns to firms of doing such research are relatively smaller, uncertain, and if they materialize at all will be far in the future. On their

own, research subsidies would achieve about 10 percent of economically efficient emissions reductions (Popp 2016). As such, this Shadow Budget would devote around 10 percent of revenues from an emissions price to long-term research.



Electricity Policy

Few topics have generated as much controversy in Ontario as electricity policy, with a number of previous policies resulting in a dramatic increase in electricity prices (Trebilcock 2017). The government has taken a series of measures that will immediately reduce electricity prices for residential customers. However, within five years, prices are forecast to increase dramatically as the current policy does not address the actual cost of generating and delivering electricity, and relies on taxpayers and future ratepayers to subsidize electricity use today (Figure 9). Further, many industrial consumers are receiving no reduction to their bills. This Shadow Budget would take actions now that will begin to reduce system cost and reduce prices for businesses and consumers in the future.

Market Design and Regulation

The Independent Electricity System Operator (IESO), which manages the electricity market for Ontario, is undertaking a major market reform. The IESO projects that the market reform will reduce the cost of purchasing electricity by billions of dollars, eventually resulting in savings for consumers. The single-largest cost savings for consumers is set to come from the IESO adopting what is called a capacity market. A capacity market provides electricity generators with a revenue stream for being available to produce electricity, in addition to their revenues from selling electricity. Such a market is a major improvement to the government's previous approach of signing 20-year contracts with generators that effectively covers both. The government's plan is a sensible one that has been shown to be effective in a number of other jurisdictions, and this Shadow Budget would continue to proceed with it (see Goulding 2013 and Wyman 2014).

Figure 9: Electricity Price Outlook – Residential Consumers

Source: Ontario (2017b).

This Shadow Budget would propose the government look to take the market reform one step further by reforming the purchasing role of the IESO. The current proposal for the capacity market is to make the IESO the only buyer of generation contracts. The downside of that plan is that it does not create competition among potential electricity buyers. This Shadow Budget would delegate the purchasing power in the capacity market to local buying groups across the province. These local buying groups, known as load-serving entities, would have the ability to purchase electricity that suits local needs. Large business, currently limited to buying electricity from the IESO and paying a share of the Global Adjustment, which pays for capacity investments, could form their own load-serving entities and contract directly with generators. Further, these local buying groups would encourage consolidation of local distribution companies, to which we will return to below.

However, as Goulding (2013) argues, to be effective, the government must pair a capacity market with changes to improve the independence of Ontario's electricity regulatory bodies. Ontario governments of all political stripes haved directed various government agencies to take specific action in the electricity sector while circumventing regulators (Vegh 2016). This Shadow Budget would end the cycle of government price interventions, specific directives, and decisions on procurement by requiring the Ontario Energy Board to review all major decisions in the energy market with a mandate to approve actions only if they increase economic efficiency (see Church 2017 for a discussion of economic efficiency in regulatory hearings).

Economic efficiency means having an electricity market that has decisions determined by prices, and not arbitrary government rules. One of the most intrusive arbitrary government electricity market rules is the Industrial Conservation Initiative. In this program, eligible industrial consumers save money if they slash electricity use during the five highest Ontario-wide demand hours of the year. It's an arbitrary and expensive way to cut electricity costs for some (Sen 2015). Small businesses and residents pay higher bills because of the policy. Instead, this Shadow Budget would eliminate this program and let large consumers pay only for what they buy in a capacity market and the hourly electricity market.

Similarly, a portion of the electricity bills of Ontario households support subsidies for residential consumers to purchase smart thermostats and other energy-efficiency devices. These programs cost ratepayers $600 million in 2016 (Auditor General 2017b). As with direct government spending on such programs these programs often do not pass a cost-benefit test for the use of government fund. Many households would make such investments if energy prices were sufficiently high and they were sufficiently informed. This Shadow Budget would remove any directives requiring such energy efficiency measures, and grant the Ontario Energy Board the authority to approve or reject energy efficiency programs, such as the Industrial Conservation Initiative, based solely on whether they improve economic efficiency.

Encouraging Private Investment in the Ontario Energy Sector

As of 2017, municipal governments in the province owned local electricity distribution companies that had a value of $11 to $15 billion (Robins 2017a). Cities could sell these companies to finance infrastructure investment. Sales would have no negative effect on ratepayers, since the Ontario Energy Board keeps a close regulatory eye on all price changes regardless of who owns the companies. Furthermore, private investors are usually best placed to make the decisions about the appropriate boundaries of companies, geographically and across distribution, transmission and even generation investment. Private investors would bear the consequences of poor choices, but reap some of the rewards of good mergers (Fyfe, Garner,

and Vegh 2013). The incentives for these private-sector companies to keep costs down are often better aligned with ratepayers than those facing publicly owned electricity companies.

However, cities have not been able to take advantage of the value of these assets because of provincial taxes on such sales.[3] The province would collect $1.8 to $2.5 billion in such taxes (Robins 2017a). These overly high taxes pose a significant barrier to any sale. This year will be the last year of a three-year partial tax holiday on provincial transfer taxes in Ontario on the sales of municipally owned local electricity distribution companies. The intent of this tax change was to encourage mergers using private investors, rather than only encouraging merger with other government-owned companies. However, there have been few sales so far, partly because the tax holiday was limited largely to sales of very small companies. Private investor showed little appetite for such assets. This Shadow Budget would exempt municipalities entirely from all taxes on sales, as long as the proceeds of a sale are reinvested in qualifying infrastructure projects.

Private investment in provincially owned electricity assets has been a controversial topic, but a wise policy move. As Robins (2017b) argues, it is not necessary for the province to continue to own its minority share in Hydro One, the transmission utility, or Ontario Power Generation (OPG), a major power generator, if its policy objective is to keep electricity prices down. As with municipal companies, a strong Ontario Energy Board can protect consumers no matter the owner. A sale of the remaining government stake in Hydro One would net the province somewhere in the order of $7 billion and a sale of OPG could also generate substantial revenue.

The upfront revenue is not necessarily the best reason for the province to sell electricity assets. The main reason to sell is reduced risks. The sale would reduce dividends in the future, such as the $250 million from Hydro One. However, using such a sale to eliminate debt could result in cost-savings and reduced fiscal risks if interest rates increase. Second, the electricity sector is undergoing fundamental change. OPG and Hydro One deliver electricity in a traditional long-distance network. However, the electricity system of the future may look very different, with the emergence of small-scale renewable electricity generation. The result could be a decline in value of, and therefore dividends flowing to the treasury from, Hydro One and OPG. The best way for the province to mitigate that risk is to continue selling stakes in Hydro One and begin to include private investors in OPG.

Conclusion

A fiscally sustainable Ontario will mean higher standards of living for Canadians through better government services and faster economic growth. The province should take action to correct a fiscal course that is unsustainable. The government must act to bring the long-term cost of government in line with the revenue-raising capacity of the province. This Shadow Budget shows that there are a number of policy directions the government can and intends to take in areas as diverse as electricity, greenhouse gas, municipal, health, social and tax policy that can balance increases in spending with generating new revenues and cost-savings measures, and generally enhancing the well-being of Ontarians.

[3] See Fyfe, Garner, and Vegh (2013) for more details on the complex system of transfer and departure taxes in the Ontario local electricity distribution sector.

Importance:	High

Hi Folks

I enclose a revised version of the Estimates Briefing Book. Communications Services Branch provided their editing expertise on the document making it less technical/more plain language, at a higher level/less detailed and tighter/less wordy.

Please let me or Leah Young know **by no later than Monday noon** if you have any concerns with the revised content, particularly with any critical messaging.

Please be advised this timeline is critical in order for us to meet the deadlines to get the book printed and delivered to the Clerk of the Standing Committee on Estimates.

Regards

Stephanie

Subject: Confidential Draft Estimates Briefing Book (EBB)

Hi Folks

The enclosed Estimates Briefing Book has all program area inputs (Part I) and financials (Part II) inserted. Please limit distribution internally and note that financials contained are based on expected PRRT approvals to date, notwithstanding the Estimates will be tabled later this month.

Please review the document and provide further comments, questions or material changes to me **by noon on Wednesday May 17th**. I can be reached at 905-433-5664 to discuss.

Executive level briefings will commence next week.

Regards

Stephanie

Ministry of Finance

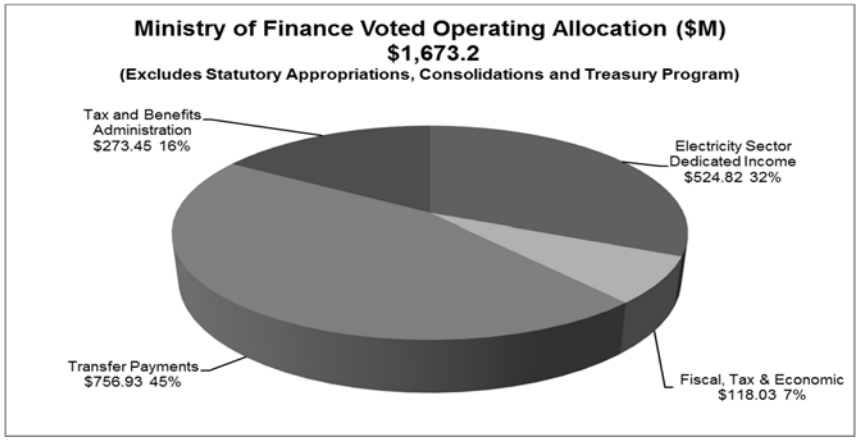
MINISTRY OF FINANCE OVERVIEW

MANDATE

The Ministry of Finance's mandate is to create an environment that fosters a dynamic, innovative and growing provincial economy and to manage the government's fiscal responsibilities as well as financial and related regulatory affairs.



MINISTRY CONTRIBUTION TO PRIORITIES AND RESULTS

Through its mandate, the ministry works to achieve the government's priorities which include investing in people's talents and skills, building retirement security, building modern infrastructure and transportation networks, and supporting a dynamic and innovative business climate.

The ministry works with the Treasury Board Secretariat to manage the Province's $141.1 billion[1] annual spending and oversees $141.7 billion[2] of revenues raised through taxation, Government of Canada transfers and provincial business enterprises. It also manages the Province's $26.4 billion[3] borrowing program.

In addition, the ministry supports government-wide initiatives and provides key fiscal, taxation, statistical and economic policy advice to the Minister of Finance, Cabinet committees and the Premier. It also regulates the financial services sector through its agencies.

The ministry provides leadership in transforming Ontario's public services — helping to develop new strategies, policies and processes designed to drive government-wide efficiencies and enable modernization initiatives — while also remaining focused on implementing measures that meet annual budget targets.

[1] 2017 Ontario Budget
[2] 2017 Ontario Budget
[3] 2017 Ontario Budget

MINISTRY OF FINANCE PLAN: LOOKING FORWARD

The ministry is leading transformational activities across government to strengthen Ontario's economy and is also reviewing its own structure, processes and resources to effectively support the implementation of government priorities.

Its responsibilities and activities are aligned to provide financial and economic stewardship, and policy and program delivery leadership.

Meeting Fiscal Targets and Effective Financing

The 2017 Budget plan delivers on the government's 2010 Budget commitment to restore fiscal balance in 2017–18. The Province is also projecting balanced budgets in both 2018–19 and 2019–20.

The balanced budgets from 2017–18 onwards will limit the increase in the provincial net debt to net investments in capital assets. These investments will contribute to the Ontario economy growing at a faster rate than the provincial net debt. This will, in turn, allow the government to set an interim net debt-to-GDP target of 35 per cent in 2023–24 and reduce the net debt-to-GDP ratio to its pre-recession level of 27 per cent (projected to be achieved by 2029–30).

Ontario's net debt-to-GDP ratio peaked in 2014–15 at 39.1 per cent and is now trending downwards. The ratio is forecast to continue to decline to 37.5 per cent in 2017–18, 37.3 per cent in 2018–19 and 37.2 per cent in 2019–20.

Interest on Ontario's debt expense is forecast to be $11.6 billion in 2017–18 and $12.0 billion in 2018–19 — $872 million and $1,072 million lower than forecast in the 2016 Budget, respectively.

These savings continue a trend apparent since 2010, driven by lower deficits and borrowing requirements, and lower-than-forecast interest rates. The savings on Ontario's interest on debt over the period to balance now total $24.0 billion, relative to the 2010 Budget forecast.

Going forward the ministry will continue to review its programs to deliver the best possible results at the lowest cost, using evidence to improve outcomes and ensure the long-term sustainability of provincial programs and services.

Strong Economy and Dynamic Business Climate

The ministry's activities include delivering economic analysis and advice to support the development and implementation of government policy that fosters economic growth and job creation on a regional, sectorial and business level.

To ensure Ontario's economy is strong and its business climate dynamic, the ministry is dedicated to administering a fair and competitive corporate tax system — one that balances the benefits of an internationally competitive tax system with the need to raise revenue to fund essential provincial programs and services.

To help ensure the best possible programs and services for Ontarians, the ministry is also supporting the Program Review, Renewal and Transformation, the government's evidenced-based decision-making process that is modernizing services, finding savings and improving outcomes.

Additionally, the ministry is supporting the Financial Accountability Office of Ontario in its work conducting independent analysis on Ontario's finances, trends in the economy and related matters important to the Legislative Assembly.

In 2017–18 the ministry will produce the Ontario Economic Accounts, quarterly reports on the status of the provincial economy that include information on its GDP, labour market, financial markets and key external factors such as U.S. economic growth and oil prices.

It will also continue to support the implementation the province's asset optimization strategy, which is helping to fund further investments in transit, transportation and other priority infrastructure through the Trillium Trust.

Maximizing Revenues

Maximizing revenues due to the province is within the mandate of Ontario's treasury. Key to that work is developing the revenue forecast found in the 2017 Budget (updated in the fall Ontario Economic Outlook and Fiscal Review), including identifying risks to each major revenue component — and working to ensure the forecast is met. The ministry's work in 2017–18 and ongoing includes:

- Creating a new tax avoidance unit to identify and close tax planning loopholes.
- Maximizing the performance of government business enterprises by implementing the Premier's Advisory Council on Government Assets' beverage alcohol retail and distribution recommendations and adapting the Liquor Control Board of Ontario to changes to the retail marketplace as well as its new roles in wholesaling and e-commerce.
- Working with the Ontario Lottery and Gaming Corporation as it continues to implement its modernization plan for slots, casinos and lottery, as well as integrating horse racing into its gaming strategy.
- Launching an underground economy communication campaign to inform the public on the risks of participating in the underground economy.
- Developing a comprehensive strategy to address the sharing economy.
- Renewing or replacing the Aggressive International Tax Planning and Underground Economy fee-for-service agreement with the Canada Revenue Agency.

- Launching a pilot project in the hospitality and retail sectors to test the feasibility of the sales integrity program.
- Leading tobacco tax policy with an aim to support public health objectives under the Smoke-Free Ontario Strategy, while also considering impacts on the untaxed tobacco market.
- Using third-party service providers to aid collecting debts owing to the Province.
- Strengthening tools to enhance collection of non-tax revenue.

Effective Regulation and Innovative Policy

The Ministry of Finance has an instrumental role to play ensuring effective regulations and innovative policies. Its actions in 2017–18 and ongoing include:

- Simplifying personal income tax credits for caregivers by creating a new consolidated Canada Caregiver Credit.
- Introducing a new Ontario Seniors' Public Transit Tax Credit for all Ontarians aged 65 or older.
- Proposing a 15 per cent Non-Resident Speculation Tax to help address unsustainable demand for housing, discourage speculative behaviour and increase housing affordability.
- Working to stop practices that may be contributing to tax avoidance and excessive speculation in the housing market, such as requiring more information about assignments of agreements and similar arrangements through the Land Transfer Tax system.
- Exploring more comprehensive reporting requirements with the Canada Revenue Agency to ensure the correct federal and provincial taxes, including income and sales taxes, are paid on purchases and sales of real estate in Ontario.
- Consulting municipalities, tenants and apartment building owners and others on the potential implications of multi-residential property taxation on rent affordability (Based on early feedback received during this review, the Ministry of Finance is ensuring property tax for new multi-residential apartment buildings is charged at a similar rate as other residential properties. This will encourage developers to build more new purpose-built rental housing).
- Providing advice on — and advancing policy initiatives focused on — capital markets, securities and derivatives such as legislative and Ontario Securities Commission rule proposals as well as regulatory changes to respond to G20 financial regulatory reform commitments.
- Representing Ontario and advancing Ontario's interests in implementing a Cooperative Capital Markets Regulatory System, such as developing uniform capital market laws and establishing the new cooperative regulator in partnership with participating jurisdictions.
- Establishing a regulatory framework for the oversight of individuals who offer financial planning services in Ontario.
- Increasing the representation of women on boards of directors and in executive positions.
- Developing an Ontario financial technology strategy.

- Developing, with the federal government and other provinces and territories, regulations to ensure the Canada Pension Plan enhancement is financially sustainable.
- Providing central-agency support to line ministries on Ontario's Basic Income Pilot.
- Developing a regulatory policy for new retirement savings models such as target benefit plans and defined contribution pension plans.
- Strengthening the regulation of registered pension plans through measures to improve disclosure and transparency for members.
- Changing the regulatory framework for pension plans — including funding frameworks for single employer and target benefit pension plans — and changing the Ontario Pension Benefits Act and regulations that govern the conversion or merger of single-employer pension plans into jointly-sponsored pension plans.
- Strengthening the protection for investors in syndicated mortgages by developing amendments to regulations and planning for the transfer of regulatory oversight of these products from the Financial Services Commission of Ontario (FSCO) to the securities regulator.
- Transferring the responsibility for incorporating co-operative corporations from FSCO to the Ministry of Government and Consumer Services, consolidating the incorporation of co-operatives with the processes in place for other types of businesses.
- Modernizing auto insurance, including enabling all insurers to provide insurance coverage for ride-sharing as well as consulting on the recommendations by Ontario's advisor on auto insurance David Marshall aimed at delivering better outcomes for accident victims while creating a more efficient and cost-effective system.
- Engaging with the initial board of the Financial Services Regulatory Authority of Ontario and making progress toward establishing this new regulatory body.
- Analyzing and tracking changes in major areas of the underground economy focusing on unregulated tobacco and construction, retail and hospitality sectors.
- Identifying other high-risk industries in the underground economy through advanced analytics and the application of innovative tools, including cognitive computing.
- Completing the automation of the tax compliance verification process to modernize the means for ensuring that vendors awarded provincial contracts valued at $25,000 or more are tax compliant.
- Addressing the unregulated tobacco market by enhancing regulatory oversight of tobacco products.

Modern Transfer Payment Programs and Effective Partnerships

The Province's vision for an effective, efficient and equitable system of fiscal federalism in Canada emphasizes strong partnerships in key areas. As the branch of government most responsible for those partnerships, the ministry maintains contact with the ministries of Finance at the federal level and in other provinces and territories as well as First Nation communities and municipalities.

The following initiatives that support these partnerships are underway:

- Supporting the Ministry of Energy in respect of an agreement-in-principle with First Nations in Ontario, as represented by the Chiefs-in-Assembly, for ownership of Hydro One shares.
- Representing Ontario's position in inter-governmental negotiations on the retirement income security system, including the CPP.
- Providing funding support to municipalities through a number of transfer payments including the Ontario Municipal Partnership Fund, the Province's main unconditional transfer payment to municipalities, which is being redesigned to better target funding to northern and rural municipalities with more challenging fiscal circumstances.
- Establishing information- and data-sharing partnerships to enhance advanced underground economy data analytics.
- To address the unregulated tobacco sector, building partnerships with federal and provincial partners, including police agencies, the Canada Revenue Agency, Canada Border Services Agency, public health units and the Alcohol and Gaming Commission of Ontario.
- Supporting the integration of the delivery of Ministry of Community and Social Services social assistance programs to achieve cost efficiencies and improve client experience.
- Working with First Nation communities toward agreements on tobacco regulation and revenue sharing.

HIGHLIGHTS OF 2016–17 ACHIEVEMENTS

The Ministry of Finance performs a variety of critical roles, focused on supporting effective economic, fiscal and financial management for a stronger Ontario. Its 2016–17 achievements include:

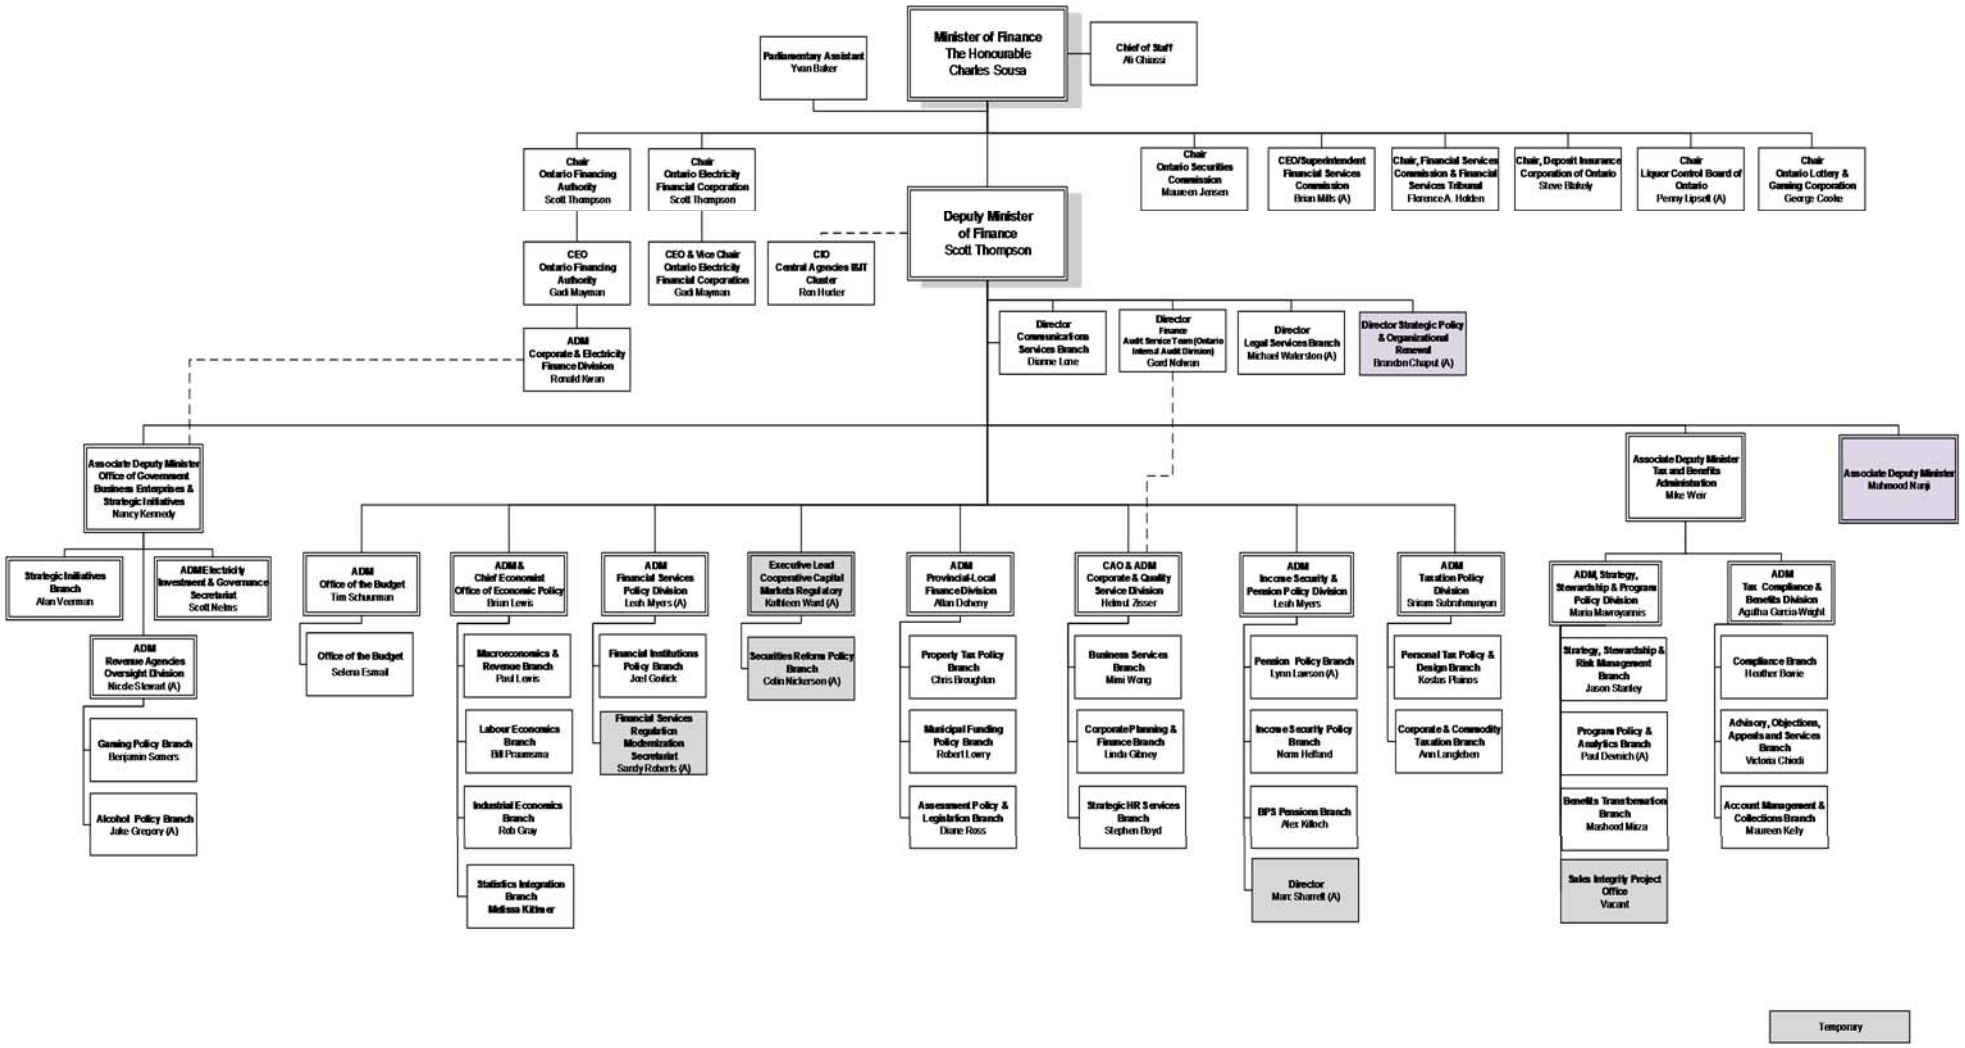
Delivering on the Balanced Budget Plan
The ministry was active in a variety of sectors that enabled the government to restore balance to the Province's finances in 2017–18. Through targeted, measured and fiscally responsible decisions, the government has restored the province's fiscal and economic strength.

Supporting a Dynamic Business Climate
To improve the province's overall business climate, the ministry supported a variety of initiatives that make Ontario an attractive environment for business investment.

Strengthening the Financial Services Sector
The ministry led a variety of initiatives focused on enhancing the province's financial services sector.

Building Retirement Security
The ministry led the implementation of a variety of pension reform measures aimed at improving the adequacy and coverage of pensions in Ontario.

Addressing the Underground Economy
The ministry led several innovative pilots and projects aimed at ensuring all citizens pay their fair share of taxes as well as enhancing the competitiveness of legitimate businesses.



Working with Indigenous Partners
The ministry continued to take the lead in government dialogue with First Nation communities and leaders on tobacco, gasoline and the energy sector for mutually beneficial outcomes for the province and First Nation communities.

Facilitating Openness and Accountability
The ministry continued to further strengthen transparency, financial management and fiscal accountability to ensure Ontarians receive the best value for their tax dollars.

Further detail of the ministry's achievements can be found in the Appendix: 2016–17 Annual Report.

MINISTRY OF FINANCE ORGANIZATIONAL STRUCTURE

As of May 8, 2017

AGENCIES, BOARDS AND COMMISSIONS

Deposit Insurance Corporation of Ontario (DICO): promotes the safety and soundness of Ontario's credit unions and caisses populaires by undertaking regulatory oversight activities, establishing standards for sound business and financial practices, and providing deposit insurance coverage within statutory limits.

Financial Services Commission of Ontario (FSCO): an integrated regulator of Ontario's insurance industry; pension plans; loan and trust companies; credit unions and caisses populaires; the mortgage brokering sector; health service providers and co-operative corporations.

Financial Services Tribunal: an independent, adjudicative body that conducts hearings arising from regulatory and proposed regulatory decisions of the Superintendent of Financial Services.

Liquor Control Board of Ontario (LCBO): responsible for the importation, distribution and sale of beverage alcohol in the province in an efficient and socially responsible manner.

Ontario Electricity Financial Corporation (OEFC): the legal continuation of the former Ontario Hydro responsible for managing that organization's legacy debt and other liabilities.

Ontario Financing Authority (OFA): conducts borrowing, investment and financial risk-management activities for the Province; manages the provincial debt; advises on financial policies and projects; provides financial and centralized banking and cash management services and advice to the Ontario Electricity Financial Corporation.

Ontario Lottery and Gaming Corporation of Ontario (OLG): responsible for the conduct, management and operation of slots and casinos, lottery operations, internet gaming and electronic games at charitable bingo halls across Ontario.

Ontario Securities Commission (OSC): the regulatory body responsible for overseeing Ontario's capital markets, which includes the equities, fixed-income and derivatives markets.

Appendix: 2016-17 Annual Report

Ministry of Finance

2016-17 ACHIEVEMENTS

In 2016–17, the Ministry of Finance engaged in a number of activities to achieve its key priorities. These highlights of the ministry's achievements include:

1. Delivering on the Balanced Budget Plan

Fiscal Framework

- Led the development, and provided strategic oversight of, the fiscal plan including tracking the government's progress in meeting fiscal targets with key partners at the Treasury Board Secretariat and Cabinet Office. Reported on the fiscal plan through the Budget, Quarterly Finances, Economic Outlook, and Fiscal Review and Public Accounts.
- Delivered the 2016 Ontario Economic Outlook and Fiscal Review, the 2017 Long-Term Report on the Economy, the 2016–17 First and Third Quarter Finances and the 2017 Budget that supports the government's plan to balance the budget and maintain balance to 2019–20.
- Advised on Ontario's fiscal relations with the federal government and maintained contact with federal, provincial and territorial finance partners to advance Ontario's fiscal priorities.

Transforming Government and Managing Costs

- In cooperation with several ministries, delivered benefit programs and continued to explore opportunities for benefits transformation to achieve better client service, streamlined administration and enhanced policy development and coordination.
- Passed new framework legislation, the *Benefits Administration Integration Act* that will allow information-sharing across benefit programs.
- Partnered with the Canada Revenue Agency to provide Automated Income Verification for applicants to a growing number of programs.
- Supported the Basic Income Pilot being implemented in early 2017–18.
- Continued working with line ministries and municipalities to expand services for benefits delivery.
- Launched the Vector Institute, a new artificial intelligence (AI) lab mandated to advance research and drive the adoption and commercialization of AI technologies across Canada.

Taxation Policy

- With other provinces, territories and the federal government, improved the Tax Collection Agreement to ensure it reflects Ontario's interests.
- As part of modernizing Ontario's Land Transfer Tax (LTT) system, doubled the refund for eligible first-time homebuyers; updated rates and brackets; restricted the refund for first-time homebuyers to Canadian citizens and permanent residents; and launched a transformational initiative collecting additional

information about Ontario's real estate market to be used for LTT enforcement and support evidence-based policy development.

Borrowing and Debt Management

- Through the Ontario Financing Authority (OFA), continued to efficiently manage the Province's borrowing program.
- Completed the government's annual borrowing program in 2016–17, borrowing $27.0 billion. (This is up from the $26.4-billion forecast in the 2016 Budget, as the OFA capitalized on low interest rates and a strong demand for Ontario bonds to prefund $3.2 billion of the 2017–18 requirement. Through prudent and cost-effective debt management, the OFA continues to keep interest on debt costs below budget projections).
- Through prudent and cost-effective debt management, continued to keep interest on debt costs below budget projections. (Interest on debt expense is projected to be $11,250 million for 2016–17 — $506 million lower than forecast in the 2016 Budget — reflecting lower-than-forecast interest rates, the lower forecast deficit for 2016–17 and cost-effective debt management).

2. Supporting a dynamic business climate

Policy/Taxation Measures

- Partnered with the Canada Revenue Agency and Airbnb on a pilot project to increase awareness of tax obligations for Ontarians sharing their homes.
- Worked with the Ministry of Economic Development and Growth to identify potential opportunities for small business, through the Small Business Innovation Challenge.
- Worked with the insurance industry to develop the legislative and regulatory changes necessary to fully integrate the sharing economy into Ontario's auto-insurance system, such as the interim fleet insurance policy for the Uber ridesharing program.
- Implemented the Trillium Trust and related asset optimization initiatives to help fund infrastructure investments, including crediting to the trust $3.7 billion from the sale of Hydro One shares.
- Continued to upload social assistance benefit programs off the property tax base to ensure that municipalities have more property tax dollars to invest in local priorities.
- Made tax supports for business and people more efficient and better focused on objectives and outcomes, such as lowering business electricity costs with the end of the debt retirement charge effective April 1, 2018, nine months earlier than previously estimated.
- Implemented changes to the Ontario Innovation Tax Credit and the Ontario Research and Development Tax Credit.
- Implemented legislative and regulatory changes to cultural media tax credits, e.g., introducing an application deadline for the Ontario Interactive Digital Media

Tax Credit and clarifying the excluded productions for Ontario's film and television tax credits.
- Provided the Auditor General and the Financial Accountability Office with information on tax credits to support their reviews of business support programs.
- Recovered over $450 million in debts owing to the province and over $2 million for employees owed money under the *Employment Standards Act*.
- Consulted with industry and raw leaf tobacco producers on amendments to the *Tobacco Tax Act* and supporting regulation.
- Completed the online Notice of Objection project, allowing taxpayers to submit their notices online, saving them time, effort and money.

Alcohol and Gaming (Ministry, LCBO and OLG)
- Continued the modernization of the alcohol and gaming sectors and increased provincial revenues within a framework of social responsibility.
- Continued to introduce the sale of beer, cider and wine into grocery stores, giving consumers more choice and convenience while creating a more dynamic and competitive business environment for producers: up to 130 grocery stores were authorized to sell beer and cider, of which 70 can also sell wine; and launched an allocation for up to 80 more beer and cider authorizations.
- The LCBO launched its e-commerce platform, which features almost 5,000 different products from across Ontario, Canada and 85 other countries for pick-up at local stores and home delivery.
- Announced the Ontario Small Cidery and Small Distillery Support Program, which will invest $4.9 million over three years to support small cider and small spirits producers to scale up into medium and large businesses.
- Closed the sale of LCBO's head office, with the net proceeds of $246 million credited to Trillium Trust.
- Awarded three of eight gaming bundles to private sector service providers (four more bundle procurements are in progress) and opened a new casino in Belleville, major strides in OLG's modernization plan.
- Continued OLG's modernization of lottery, charitable and internet gaming lines of business as well as integrating horse racing into its gaming strategy.

Economic Analysis, Reporting and Policy Advice
- Provided analytical, policy and research support to the Premier's Office, Cabinet Office and ministries on a number of priorities, including the Business Growth Initiative, the Highly Skilled Workforce Expert Panel Report, the Poverty Reduction Strategy and the Changing Workplace Review Panel.
- Renewed a three-year agreement with the Toronto Financial Services Alliance to support the organization's strategic objective to grow the Toronto region as a global financial hub and cluster.
- Reviewed investment proposals under the government's Jobs and Prosperity Fund and regional programs.

3. Strengthening the financial services sector

- Introduced and passed legislation that sets out the initial parameters for the new Financial Services Regulatory Authority of Ontario following the June 2016 final report of the expert advisory panel that recommended establishing a new regulator.
- Amended regulations under the *Credit Unions and Caisses Populaires Act, 1994* to improve the regulatory framework for credit unions.
- Continued to make auto insurance more affordable for Ontario's almost 10 million drivers, such as requiring insurers to offer a discount for the use of winter tires and creating a new dispute resolution system to help Ontario claimants get faster access to the benefits they need.
- Amended the *Insurance Act* to improve life insurance and accident and sickness insurance disclosure requirements and improve industry efficiencies.
- Continued to play a leadership role in implementing the proposed Co-operative Capital Markets Regulatory System, including the finalization and proposed introduction of the legislative framework that will be set out in a new Capital Markets Act and related legislation in 2018.
- Supported the 2016 review and 2017 report by an independent expert committee of the regulatory framework relating to financial planning and financial advisory services.
- Worked with partner ministries and stakeholders on developing a new women's economic empowerment strategy that addresses the gender wage gap and accelerates greater representation of women on boards.

4. Building retirement security

- Enhanced the Canada Pension Plan with the federal government, other provinces and territories.
- Created the Investment Management Corporation of Ontario to provide lower-cost and improved pension investment returns to Ontario's broader public sector pension plans.
- Reviewed the *Pension Benefits Act* solvency funding framework for defined benefit plans that included issuing a consultation paper on changes to the solvency funding framework.
- Extended temporary solvency funding relief measures first introduced in 2009 and 2012.
- Finalized the legislative and regulatory frameworks for Pooled Registered Pension Plans (PRPPs).
- Helped develop a multilateral agreement for PRPPs to facilitate the regulation and supervision of multi-jurisdictional PRPPs that Ontario signed in March 2017.

5. Addressing the underground economy

- Enhanced oversight of raw-leaf tobacco-growing: addressed the links between organized crime and tobacco through a partnership with the Ontario Provincial Police's Contraband Tobacco Enforcement Team, and enhanced retail inspections with public health units.
- Negotiated new fee-for-service agreements with the Canada Revenue Agency to protect Ontario revenue including enhanced compliance measures (e.g., auditing) and a service level agreement for underground economy specialist teams.
- Addressed underground economic activity through a public awareness campaign targeting multiple high-risk sectors, including home renovation, and partnered with the Ministry of Transportation on a pilot project to determine the tax compliance of construction subcontractors the ministry procured.

6. Working with Indigenous partners

- Engaged with First Nations and industry in modernizing the Ontario Gas Card Program, resulting in increasing card security for tax-exempt gasoline sales transactions in First Nation communities.
- Supported the Ministry of Energy on an agreement-in-principle with First Nations in Ontario, as represented by the Chiefs-in-Assembly, for ownership of Hydro One shares and by engaging with the Métis Nation of Ontario.
- Continued to implement the Aboriginal Loan Guarantee Program, which loan guarantees to support equity investment by Indigenous groups in renewable wind, hydro, and solar electricity generation and transmission projects.

7. Facilitating openness and accountability

- Provided advice and support to other ministries to ensure an open and productive relationship with the Financial Accountability Office.
- Developed new ways to deliver data and statistical services that are efficient, cost-effective and transparent in support of evidenced-based decision-making and advancing the government's commitments to Open Government and collaboration with external experts and academic institutions on difficult policy challenges.
- Capitalized on new methods of public and stakeholder participation in the Ontario pre-budget consultation and budget development processes.
- Implemented the recommendations of the Special Purpose Business Property Assessment Review report for the 2016 reassessment (2017 tax year) in collaboration with the Municipal Property Assessment Corporation, municipalities and other stakeholders. These are expected to increase the transparency, accuracy and predictability of property assessments, reducing the number and impact of appeals, and promoting greater revenue stability from the $27-billion shared property tax base.

- Provided additional property tax flexibility to enable municipalities to better tailor programs to reflect their local needs and circumstances, while ensuring the property tax system continues to remain fair and competitive.
- Reported on the Trillium Trust to help support public transit, transportation and other priority infrastructure projects.

Part II: 2017-18 Detailed Financials

Ministry of Finance

12 – MINISTRY OF FINANCE

The Ministry of Finance supports the economic, fiscal, financial, and taxation policies and strategies of the Government of Ontario, and oversees the Province's borrowing and debt management program. The ministry administers a number of tax statutes, tax credits and benefit programs, and produces the provincial budget. In conjunction with Treasury Board Secretariat, the ministry also manages the Consolidated Revenue Fund and fiscal and financial policies of the Government of Ontario, and reports on financial matters. The ministry also develops policies for Ontario's financial services sector and supports the regulation of financial services institutions and intermediaries carrying on business in the province. In addition, the ministry manages Ontario's fiscal relationship with the federal government, other provinces and Ontario's municipalities, reports on the Trillium Trust, and oversees agencies accountable to the Minister of Finance. The Ministry also reports on economic and demographic developments in the province and provides analytical support and policy advice on these topics as well as statistical issues and trends that affect Ontario's economic growth and job creation.

1201 – MINISTRY ADMINISTRATION

This program, which includes the Offices of the Minister and Deputy Minister delivers planning, advisory, legal, and controllership functions to ensure direction and management of operating programs consistent with Ontario Government policy and legislation. In addition, the program manages the service relationships with Treasury Board Secretariat and the Ministry of Government and Consumer Services, ensures proper levels of support to the ministry and its client groups, and strategically manages the ministry's quality service commitments.

SUB-ITEM DESCRIPTION

This sub-item includes the offices of the Minister of Finance, the Parliamentary Assistant and the Deputy Minister. The staff provide professional and technical support for the legislative policy making and administrative responsibilities of the Minister and the Deputy Minister.

FUNCTIONS

The Main Office is responsible for:

- overseeing ministry operations and adherence to corporate policies and directives;
- providing a leadership role in supporting broader government priorities including transformational policy changes that would help sustain longer term delivery of core public services;
- coordinating policies developed in the ministry for the approval of the Minister and the Deputy Minister;
- coordinating the preparation of replies to correspondence to the Minister and Deputy Minister;
- the preparation of verbal and written briefings for the Minister's presentations to Cabinet, Committees of Cabinet and other meetings such as pre-budget consultations, federal-provincial conferences and stakeholder/interest groups.

SUB-ITEM DESCRIPTION

This sub-item provides ministry strategic support for Program Review, Renewal and Transformation and Estimates, executive decision support, financial controllership, risk management, corporate accounting, emergency management and security services, accommodation management, coordination of corporate and ministry-specific modernization programs and administration of the *Freedom of Information and Protection of Privacy Act*. This sub-item represents the ministry's point of contact with central agencies.

FUNCTIONS

These offices are responsible for delivering the ministry's obligations for the following:

- leading the controllership function, including the accountability framework, strategic procurement advice, loan administration, the Trillium Trust framework, and Public Accounts;
- coordinating, preparing and providing strategic support to the Program Review, Renewal and Transformation planning process and the annual Estimates process;
- in-year risk management and planning, monitoring and reporting of financial and other resource management strategies including preparing and/or reviewing all central agency submissions, for example TB/MBC submissions;
- managing the ministry's accommodation portfolio, including development of strategic options analysis and lease management to ensure optimal space utilization;
- administering the *Freedom of Information and Protection of Privacy Act* for the ministry, its agencies, boards and commissions, including processing requests for access to records, and ensuring compliance with the privacy provisions of the Act;
- leading strategic and operational planning to promote compliance with records and information management requirements;
- developing and implementing the ministry's Emergency Management Program and Physical Security Program, including leading, coordinating, testing, updating and maintaining the ministry's Continuity of Operations Plans and Physical Security Plans and providing security services;
- coordinating the ministry's compliance with the *Ontarians with Disabilities Act, 2001* and the *Accessibility for Ontarians with Disabilities Act, 2005*; and
- coordinating corporate and ministry modernization programs including Employee Engagement and Recognition, Inclusion, Mental Health and Wellness, Workplace Violence Prevention, Service Excellence, Summer Experience Opportunities, Greening, and Open Government.

SUB-ITEM DESCRIPTION

This sub-item represents the Strategic Human Resources Services Branch which provides strategic and advisory human resources services to ministry senior executives to ensure they have the right people, in the right place, at the right time to achieve their business objectives.

FUNCTIONS

The Strategic Human Resources Services Branch is responsible for:

- providing senior executives with strategic advice and support in the areas of organization design and effectiveness, strategic labour relations and workforce planning/analysis to ensure the alignment of people strategies and build organizational capacity and engagement;
- implementing and supporting talent, performance and succession management programs and strategies;
- designing and implementing human resources change management and organizational development initiatives that support ministry business commitments;
- liaising with OPS human resources organizations to lead the implementation of corporate HR initiatives at the ministry level; and
- liaising with all operational elements of the OPS HR Service Delivery Model to ensure the delivery of integrated HR services to support the achievement of ministry business goals.

SUB-ITEM DESCRIPTION

This sub-item represents the Legal Services Branch. The branch provides legal services to the Ministry of Finance and the Ontario Financing Authority.

FUNCTIONS

The Legal Services Branch is responsible for:

- advising the ministry and other clients, as required, with regard to legal issues in respect of borrowing and investment of public money, government finance, fiscal, economic and taxation matters, loans and guarantees, insurance, pensions, alcohol and gaming policy and regulation, securities and financial services sector regulation; and procurement;
- providing advice to Office of the Budget;
- advising on agencies for which the Minister has responsibility;
- representing the ministry in tax collection activities, including bankruptcy and insolvency proceedings;
- advising the ministry in respect of the implementation of government policy in the electricity sector and programs;
- preparing legislation, regulations, Orders in Council, contracts, agreements, memoranda of understanding and other instruments;
- providing counsel for provincial tax prosecutions;
- representing the Minister on tax appeals and providing litigation support on other non-tax actions;
- preparing agreements between federal and provincial governments relating to tax collections, transfer payments and other matters; and
- providing advice to the ministry on the interpretation of statutes and regulations, preparation and review of proposed legislation, regulations, and other legal documents.

SUB-ITEM DESCRIPTION

This sub-item represents the Finance Audit Service Team (FAST) of Treasury Board Secretariat, which provides risk-management and consulting services, as well as independent assurance services to the Ministry of Finance and some of its agencies. FAST's overall objective is to ensure that the ministry's financial and risk management plans and processes meet the highest standards of integrity, accountability and transparency.

The FAST Audit Director reports functionally to the Finance Audit Committee (FAC), which is chaired by the Deputy Minister of Finance. FAC is responsible for ensuring that FAST has sufficient resources to carry out its responsibilities. FAST is primarily funded by the Ministry of Finance based on actual cost recovery basis.

FUNCTIONS

The services provided by FAST include:

- value-for-money, financial and internal control audits;
- compliance reviews;
- risk assessment and control reviews;
- forensic and fraud investigations;
- advice on governance, controllership, accountability and sound business practices, including advice and liaison to ministries related to Office of the Auditor General of Ontario audits;
- training and education on risk and control; and
- specialized audit, risk assessment and advisory services for information management and information technology projects.

GOVERNMENT BUSINESS ENTERPRISES, INCOME SECURITY AND PENSION POLICY PROGRAM

1202-6 – Income Security and Pension Policy

1202-7 – Office of Government Business Enterprises and Strategic Initiatives

Sub-Item 1 – Strategic Initiatives
Sub-Item 2 – Electricity Investment and Governance
Sub-Item 3 – Revenue Agencies Oversight

1202 – GOVERNMENT BUSINESS ENTERPRISES, INCOME SECURITY AND PENSION POLICY

This program includes pension and income security policy analysis, policy development and legislation. This program is responsible for tracking emerging trends and developments and identifying the economic and fiscal implications of pension and income security policies, and for advising and assisting the Deputy Minister of Finance, the Minister and the government in formulating major economic, fiscal and policy documents.

This program also leads the implementation and ongoing oversight of the recommendations of the Premier's Advisory Council on Government Assets. This includes oversight and implementation of the Council's recommendations related to the financial oversight of Hydro One, Ontario Power Generation, and the electricity sector, as well as the modernization of the beverage alcohol sector. In addition, the program supports the coordination of horizontal policy development on a number of transformation initiatives spanning multiple ministries, on an as required basis. This program is also responsible for facilitating the Minister's oversight and accountability of the Liquor Control Board of Ontario, the Ontario Lottery and Gaming Corporation, including the horse-racing sector, and for managing the Ontario Deposit Return Program for beverage alcohol containers.

ITEM DESCRIPTION

The Income Security and Pension Policy Division provides advice and analysis on employment pensions plans, including pension reform and federal and provincial income security programs, as well as providing research and analysis on income security and pensions policy programs.

FUNCTIONS

The Income Security and Pension Policy Division is responsible for:

- consulting with stakeholders on pension policy issues, leading development of Cabinet submissions, legislation and regulations;
- providing advice and analysis on employment pension plans and income security policy including responsibility for Ontario's co-stewardship of the Canada Pension Plan;
- developing strategic policy regarding Ontario's retirement income system, including the development of innovative retirement savings models, such as Pooled Registered Pension Plans and target benefit plans;
- supporting development of the fiscal framework and expenditure planning processes by monitoring developments in federal income security programs and estimating provincial income security program impacts on business and individuals, pension benefits standards policy and public sector pension policy;
- supporting the Budget and Public Accounts processes with estimates of the fiscal expense for pension plans of teachers, Ontario Public Service (OPS) employees and employees of other consolidated entities; supporting the estimate of non-pension, post-retirement benefits of OPS employees for the purposes of provincial expenditures; estimates of income security programs for seniors and families with children;
- coordinating the Fair Society chapter of the Ontario Budget and Fall Economic Statement; and
- conducting research and analysis to support the development of pension, income security and benefits policy.

SUB-ITEM DESCRIPTION

The Strategic Initiatives Branch fills a policy and analysis function in the Office of Government Business Enterprises and Strategic Initiatives, and the Branch specializes in business development, policy analysis, and initiatives support for files and issues that are typically complex inter-disciplinary and multi-ministry files. In issues and matters that would normally require multiple divisions and specialized resources to address, the Strategic Initiatives Branch plays both a coordination and leadership role as well as an analytical and support function for business efficiency reviews, commercial deal negotiations, and organizational structural support.

FUNCTIONS

The Strategic Initiatives Branch is responsible for:

- leading in business development, policy analysis, and initiatives support for horizontal policy development on a number of transformation initiatives spanning multiple ministries and levels of government, on an as required basis; and
- coordinating, directing, managing, and overseeing external resources and specialized expertise including business analysis, commercial negotiations, external counsel, industry-specific analysis, labour strategy, market sounding, and strategic communications, as required.

SUB-ITEM DESCRIPTION

The Revenue Agencies Oversight Division provides policy advice, analysis and oversight for the ministry's revenue agencies related to beverage alcohol and gaming.

FUNCTIONS

The Revenue Agencies Oversight Division is responsible for:

- analysing the revenue, economic, social and sectorial impacts of the business plans and activities of the Liquor Control Board of Ontario (LCBO) and, the Ontario Lottery and Gaming Corporation (OLG), and advising on the obligations of these agencies to the Minister under their constituting legislation and the government's directives;
- providing policy advice, analysis and delivery on issues affecting the beverage alcohol and gaming industries in Ontario;
- advising the Minister on gaming policy, social responsibility and the integration of provincial horse racing within Ontario's gaming strategy, including a long-term strategy for funding Ontario's horse racing industry;
- managing and evaluates the Ontario Deposit Return Program for beverage alcohol containers to ensure performance goals are met;
- advising the Minister on the policy and legislative design of beer and wine taxes and on strategic policy options related to alcohol mark-ups; and
- contributing to the development of government policy for the introduction of legalized cannabis in coordination with partner ministries.

1203 – ECONOMIC, FISCAL AND FINANCIAL POLICY

This program develops and implements sound economic, tax and inter-governmental taxation and fiscal strategies to raise revenue, stimulate economic growth and job creation; forecasts, monitors and reports on the performance of the Ontario economy; provides expertise and advice on sound economic design of and financial and implementation support for government initiatives; develops demographic forecasts for Ontario and its 49 census divisions; develops the policy and legislative framework for Ontario's taxation and benefits systems and the financial services industry; develops and provides strategic oversight of and advice related to the government's fiscal plan; assists the Minister of Finance and the government in formulating Ontario's finance policy and strategies with respect to federal-provincial fiscal arrangements; provides analysis and advice regarding Ontario's interest in, and regulation of, the provincial financial services sector and regulatory agencies, such as insurance, deposit taking and the capital markets, including the proposed Co-operative Capital Markets Regulatory System; and provides policy advice to clients, managers, and decision makers in the areas of fiscal and financial management. The program leads the Statistics Transformation Initiative to enhance how government collects, uses and disseminates data and is responsible for leading statistics policy. The program provides oversight and advice on provincial-municipal issues within the context of the Province's fiscal plan, working closely with other ministries and municipal stakeholders. The program also advises on personal and corporate tax policies affecting Ontarians and provides oversight of the property assessment system and the province's main transfer payment to municipalities. In addition, the program reflects the transfer of dedicated electricity earnings from the province to the Ontario Electricity Financial Corporation.

This program assists the Minister, Deputy Minister of Finance and the government in formulating the fiscal plan and reporting the results of the Province through the Ontario Budget, Ontario Quarterly Finances, Ontario Economic Accounts, Economic Outlook and Fiscal Review, and Ontario's Public Accounts. The program undertakes annual population projections for use in resource allocation and planning, leads preparation of the Long-term Report on the Economy and contributes to the Pre-Election Report on Ontario's Finances required by the *Fiscal Transparency and Accountability Act*.

ITEM DESCRIPTION

The Office of Economic Policy (OEP) provides the Minister with:

- forecasts and analysis of the economy and revenues;
- advice and information on economic issues and trends and the development of sound economic strategies that foster economic growth and job creation;
- economic analysis of policy proposals;
- recommendations regarding individual project proposals coming forward through economic development programs;
- leadership advice and analysis on the use of statistics and statistics policy;
- population projections and analysis of demographic issues; and
- research and quantitative analyses to support the development of tax, pension, alcohol fee, income security and benefits policy.

The OEP also represents Ontario in federal-provincial-territorial discussions regarding economic analysis and forecasting, fiscal planning as it relates to revenue forecasting, reporting and federal payments and in discussions with Statistics Canada on matters related to statistical policy.

FUNCTIONS

The Office of Economic Policy:

- develops, researches, monitors, forecasts and reports on economic, financial, demographic, labour market, social issues and risks;
- reviews ministry policy proposals within the context of the economic and fiscal framework;
- supports decisions on project proposals coming forward through economic development programs;
- assesses the economic impacts of policy proposals;
- conducts research and policy analysis on a broad range of issues related to economic performance and growth;
- advances the use and integration of data and statistics in government decision-making;
- conducts research and policy analysis on labour market issues;
- develops long-range population projections; and
- supports the development of tax, pension, income support and benefits, and alcohol policies through: partnerships, research and quantitative analysis; the identification, development and utilization of quantitative models, methodologies and data; and the management of data holdings.

ITEM DESCRIPTION

The Financial Services Policy Division (FSPD) provides advice on and advances financial services regulation and policy initiatives, including initiatives related to capital markets, securities and derivatives and initiatives related to the regulation of credit unions, mortgage brokers, co-operative corporations and insurance.

FUNCTIONS

The Financial Services Policy Division:

- represents Ontario in federal-provincial-territorial discussions regarding financial services policy;
- represents Ontario and advances Ontario's interests in the implementation of a cooperative capital markets regulatory system (CCMR) as reflected in the Memorandum of Agreement among the participating jurisdictions, including leading the development of uniform capital market laws underpinning the CCMR and related legislation;
- acts as policy lead in the ongoing work to establish a regulatory framework to oversee the activities of individuals who offer financial planning services in Ontario;
- represents the Ministry of Finance in the ongoing inter-ministerial work to improve the representation of women on boards of directors and in executive positions;
- participates as a regulatory policy lead to support the ongoing work towards developing an Ontario financial technology (FinTech) strategy;
- continues to support the government's work to keep auto insurance affordable for Ontario's over ten million drivers while ensuring that claimants get the treatment they need;
- provides support for the implementation of the recommendations stemming from the five-year review of the *Credit Unions and Caisses Populaires Act, 1994*;
- provides support for the establishment of the new Financial Services Regulatory Authority of Ontario, including the development of necessary legislation and regulations and the establishment of an appropriate oversight and governance framework;
- provides analysis and advice on the regulatory framework for financial institutions and the financial services sector;
- implements initiatives to modernize the *Insurance Act* and its regulations, including work to integrate new sharing economy business models for providing transportation services into Ontario's auto insurance system; and
- works with the Financial Services Commission of Ontario (FSCO) and the Ontario Securities Commission (OSC) on issues relating to regulation of syndicated mortgage investments.

ITEM DESCRIPTION

The Provincial-Local Finance Division provides advice to the Minister of Finance and the Government of Ontario on policies, legislation and operational initiatives that support the province's fiscal arrangements with municipalities, including the $27 billion property tax system. The Division administers the Ontario Municipal Partnership Fund (OMPF), the government's main unconditional transfer payment to municipalities.

In support of the government's priority to develop effective policies, legislation and regulation governing the property assessment and taxation system, the Division continues to examine ways to ensure the property tax and assessment system is fair, accurate, and predictable while ensuring municipalities have the financial tools they need to give Ontarians the quality of life they deserve.

FUNCTIONS

The Provincial-Local Finance Division:

- provides analysis, develops options and designs policies that support a property tax and assessment system that is fair, accurate, and predictable;
- designs assessment and property tax legislation and regulations that meet the government's policy objectives;
- maintains a productive working relationship with the Municipal Property Assessment Corporation (MPAC) that preserves access to valuation expertise and information;
- provides analysis and advice related to $7 billion in provincial Education Property Taxes, including support for the Minister of Finance's role in setting Education Property Tax rates;
- maintains an effective liaison with stakeholders to discuss possible enhancements to the property tax and assessment system and to the provincial/municipal financial arrangements;
- assists municipalities and taxpayers to better understand their responsibilities with respect to the property tax and assessment system;
- administers transfer payment programs to municipalities, including the OMPF, and recommends options and refinements to grant and/or program redesign;
- provides advice to the Minister of Finance on fiscal arrangements with municipalities, as well as oversight with respect to provincial-municipal financial strategies and policy priorities; and
- supports the Provincial Land Tax, Education Property Taxes and taxes for local roads and services boards in the Unincorporated Areas where applicable.

ITEM: **Municipal Support Programs**

TYPE: **Operating Expense**

ITEM DESCRIPTION

The Municipal Support Programs provides funding support to municipalities through the Ontario Municipal Partnership Fund (OMPF), Special Payments to Municipalities, Transitional Mitigation Payment and One-Time Municipal Assistance. The OMPF, the province's main unconditional transfer payment to municipalities, will provide $505 million to Ontario municipalities in 2017. Special Payments to Municipalities is a mitigation program related to property tax on hydro-electric generation facilities. Transitional Mitigation Payment is a mitigation program related to the property tax exemption for non-profit long-term care homes. One-Time Municipal Assistance provides one-time funding to municipalities facing special circumstances.

FUNCTIONS

The Division is responsible for OMPF policy including:

- developing options and refinements to grant or program design;
- supporting the policy announcement of annual OMPF allocations;
- issuing quarterly payments to eligible municipalities; and
- developing supporting materials and providing municipalities with assistance in understanding grant design and calculations.

Special Payments to Municipalities is a program that provides mitigation to municipalities related to the property tax revenue that each municipality received from hydro-electric generating stations (power dams) prior to 2001 when these properties became exempt from taxation.

Transitional Mitigation Payment is a program to provide transitional assistance to municipalities related to the exemption from property taxation of non-profit long-term care homes. The program targets assistance to eligible municipalities where revenue implications of this exemption represent a more significant proportion of the municipality's total revenue base.

FINANCIAL SERVICES INDUSTRY REGULATION PROGRAM

1204-1 – Financial Services Commission of Ontario

1204-2 – Motor Vehicle Accident Claims Fund

Statutory Appropriations

Bad Debt Expense, the *Financial Administration Act*

1204-5 – Operating Assets

1204-4 – Capital Expense

Statutory Appropriations

Amortization, the *Financial Administration Act*

1204-3 – Capital Assets

1204 – FINANCIAL SERVICES INDUSTRY REGULATION

The Financial Services Commission of Ontario (FSCO) regulates the province's financial services sector, including insurance companies, health service providers for auto insurance, pension plans, credit unions, caisses populaires, mortgage brokers, agents and administrators, loan and trust companies, and co-operatives. FSCO also makes recommendations to the Minister of Finance on matters affecting these sectors. In addition, FSCO is responsible for the administration of the Motor Vehicle Accident Claims Fund (MVACF) which compensates people injured in automobile accidents in Ontario where there is no other insurance available to respond to the claim. FSCO is also responsible for the administration of the Pension Benefits Guarantee Fund (PBGF). The PBGF pays a minimum level of pension benefits if a plan is wound up with insufficient assets.

FSCO works with the Ministry of Finance, consumers and industry stakeholders to protect the public interest and enhance public confidence in the regulated sectors.

ITEM DESCRIPTION

The Financial Services Commission of Ontario (FSCO) regulates the province's financial services sector, including insurance companies, health service providers for auto insurance, pension plans, credit unions, caisses populaires, mortgage brokers, agents and administrators, loan and trust companies, and co-operatives. FSCO also makes recommendations to the Minister of Finance on matters affecting these sectors. In addition, FSCO is responsible for the administration of the Motor Vehicle Accident Claims Fund (MVACF) which compensates people injured in automobile accidents in Ontario where there is no other insurance available to respond to the claim. FSCO is also responsible for the administration of the Pension Benefits Guarantee Fund (PBGF). The PBGF pays a minimum level of pension benefits if a defined benefit plan is wound up with insufficient assets.

FSCO works with the Ministry of Finance, consumers and industry stakeholders to protect the public interest and enhance public confidence in the regulated sectors.

FUNCTIONS

FSCO has established the following goals:

- be risk based, proactive, evidence based, balanced, transparent, service orientated, and collaborative in our work;
- further a coordinated national approach to regulatory issues; and
- be a recognized thought leader in regulatory policy.

To achieve its goals, FSCO is guided by its strategic and operational outcomes. These outcomes help FSCO’s to achieve its core regulatory responsibilities to administer the laws and regulations governing the activities of the regulated sectors.

FSCO is also responsible for providing the administrative resources necessary for the proper functioning of the Financial Services Tribunal. The Financial Services Tribunal is an independent, adjudicative body that conducts hearings arising from regulatory and proposed regulatory decisions of the Superintendent of Financial Services.

ITEM DESCRIPTION

The Motor Vehicle Accident Claims Fund (MVACF) provides compensation to people injured in automobile accidents in Ontario involving an uninsured or unidentified vehicle where no other automobile or liability insurance is available. MVACF is a business unit within the Automobile Insurance Division of the Financial Services Commission of Ontario.

FUNCTIONS

The Motor Vehicle Accident Claims Fund:

- satisfies judgments and claims for property damage or damages related to injury or death caused by an uninsured or unidentified motorist where the plaintiffs and claimants have no recourse to automotive insurance;
- provides statutory accident benefits to individuals injured in automobile accidents where the individuals have no recourse to automobile insurance;
- recovers from the owners and drivers of uninsured vehicles monies paid out on their behalf in satisfaction of judgments and claims, when it is legally possible; and
- administers the accident benefits claims portfolio of an insolvent insurer should a wind up order be issued.

1209 – TAX AND BENEFITS ADMINISTRATION

This program is responsible for the administration of Ontario tax statutes, a number of benefit programs, and for maintaining the integrity of Ontario's tax system. To accomplish this, it conducts tax compliance activities including audit, inspection, investigation and collections and delivers key benefit programs for low-income seniors and families. Central to this role is the provision of high quality services to clients including information and advisory services. Accountability for managing the relationship with the Canada Revenue Agency, which collects the majority of the province's taxes on its behalf, also rests with this program.

In addition to being responsible for Ontario's Tobacco Strategy and tobacco tax policy, the program leads the province's efforts to address the underground economy and supports the development of Ontario's approach to the Sharing Economy. The program is also responsible for a number of cross-government initiatives such as the centralization of collections functions and benefits transformation including the expansion of automated income verification and related administrative services for various government programs. The program also works in partnership with First Nations on a range of issues including tobacco. In limited circumstances, the program provides grants to not-for-profit organizations and selected First Nations communities related to tax administration.

ITEM DESCRIPTION

This program is responsible for the efficient and effective administration of Ontario tax statutes, tax incentive and benefits programs. It strives to support the sharing economy and ensure the integrity of the tax system through measures aimed at reducing participation in the underground economy and maintaining tax fairness. The program is also responsible for examining ways to reduce the taxation burden on participating businesses and citizens. The province encourages compliance through client services and independent objections review, while discouraging non-compliance and tax evasion through collections activities, audits, inspections and investigations. The fairness of tax incentive and benefits programs is protected through systematic eligibility verification and validation reviews.

FUNCTIONS

- encouraging voluntary compliance through client services such as registration, tax roll and account maintenance and processing tax returns, processing application based refunds, client education, and outreach;
- providing remittance, data and image capture and revenue accounting processing services;
- maintaining data integrity in sustaining an efficient tax administration system and collections function for all Ministry of Finance administered tax statutes;
- leading transformation initiatives to streamline the delivery of Ontario benefits, administering ministry benefits programs and providing benefits administration services to partner ministries;
- managing inter-jurisdictional relationships with the Canada Revenue Agency, and monitoring the related service provisions;
- strengthening efforts to address the underground economy, contraband tobacco, and other measures aimed at maintaining tax fairness;
- supporting the sharing economy through coordination and development of key policy initiatives in partnership with the Sharing Economy Advisory Committee;
- providing strategic management services including tracking, analyzing and reporting on TBA’s performance measures, service standards and revenue commitments;
- developing proactive and effective tax administration policy that supports the government’s competitive business environment; and
- directing and executing excellence in the audit, investigations including forensic accounting and forensic data recovery, regulatory inspection and collection functions using risk based techniques, modern technology and best practices.

SUB-ITEM DESCRIPTION

The Strategy, Stewardship and Program Policy Division is responsible for program policy, strategic planning, relationship and risk management, and benefits transformation initiatives.

FUNCTIONS

- providing policy advice and leadership on key government priorities related to tax and benefit administration, including addressing the underground economy, contraband tobacco, and other measures aimed at maintaining tax fairness;
- providing advice and assistance to the Minister of Finance and the government in developing policy options for tobacco taxation and the oversight of raw leaf tobacco, based on analysis of the revenue, economic, health, social impacts of various options, and input from industry and health advocates;
- developing proactive and effective tax administration policy that supports the government's competitive business environment and Open for Business priorities;
- managing relationships, service provisions and fee-for-service arrangements and develops accountability frameworks for tax and benefit administration involving partnerships with other governments (most notably the Canada Revenue Agency) and the broader public sector, and First Nations;
- identifying opportunities to improve client access to Ontario's income-based benefits programs and making their delivery more efficient through efforts such as leveraging MoF's automated income verification and other benefits administration processes;
- providing data analysis to support the transformation of tax and benefits programs;
- providing strategic planning services including tracking, analyzing and reporting on TBA's performance measures, service standards, and revenue commitments;
- evaluating and reporting on TBA's performance including our success in meeting strategic and operational objectives;
- developing TBA's strategic plan, operational business plans and related work activities, including inter-jurisdictional research and analysis, environmental assessments, planning sessions, and benchmarking;
- operationalizing a risk management framework for TBA that proactively identifies and responds to risks; and
- supporting the sharing economy through coordination and development of key policy initiatives in partnership with the Sharing Economy Advisory Committee.

SUB-ITEM DESCRIPTION

The Tax Compliance and Benefits Division plays a key role in promoting public confidence in the fairness and integrity of Ontario's tax system. The division provides a wide range of tax and non-tax enforcement functions to ensure compliance such as auditing, investigations, inspections and collections. The division is responsible for providing registration services, responding to client inquiries, managing tax client accounts and processing benefit payments, processing application refunds, and providing public education and interpretative services, reviewing and resolving objections and appeals, and providing imaging and revenue processing services.

This sub-item focuses on operational and service delivery of tax and benefits programs, revenue administration, and the implementation of current transformational projects to support the ministry’s commitment to continuous improvement and modernization.

FUNCTIONS

- directing and executing excellence in the audit function using risk based techniques, modern technology and best practices;
- conducting effective investigations including forensic accounting and forensic data recovery and regulatory inspections;
- partnering with other ministries, agencies and other jurisdictions to provide technical information, resolve issues and identify opportunities to collaborate;
- strengthening efforts to address contraband tobacco products;
- providing revenue collections functions to manage accounts receivable, collect delinquent tax and non-tax debt, and administer insolvencies;
- providing leadership and expertise in the areas of Centralized Collections;
- administering tax statutes as well as a number of tax incentive, revenue and benefit programs;
- encouraging voluntary compliance through client services such as registration, account maintenance and processing tax returns and application based refunds;
- providing remittance, data and image capture and revenue processing services;
- providing benefits administrative services to partner ministries; and
- providing an inexpensive administrative review of tax assessments and refund disallowances through the objection process.

ITEM DESCRIPTION

This program is responsible for the development, direction, operation and formulation of policies for the management of the Province's debt, investments, credit rating, investor relations, and related financial administration activities; providing centralized banking and cash management services to the Province; reporting on the financial position of the Province to investors and the public to facilitate borrowing activities; providing to the electricity sector financial analysis and support for any direct or indirect provincial liabilities and monitoring fiscal implications; advice to government and broader public sector on financing initiatives and policies; provision of guarantees and loans by the Province and assistance in investments to its Crown Corporations and agencies; and arranging custodial and fiscal agency services for the Province and certain agencies. It is also responsible for the issuance of Ontario Savings Bonds. The Ontario Financing Authority (OFA) provides a broad range of financial services to Ontario Electricity Financial Corporation (OEFC) and Ontario Infrastructure and Lands Corporation (Infrastructure Ontario).

FUNCTIONS

The program:

- conducts borrowing in the capital markets in a cost-effective and prudent manner, manages the provincial debt and investments;
- manages financial risks such as interest rates, currency, credit and liquidity to minimize interest on debt (IOD) and variations from the budget target;
- manages and supports the credit rating review of the Province;
- manages relations with the fixed-income community (domestic and foreign);
- provides centralized banking and cash management services for the government;
- provides settlement and payment services, and financial reporting services;
- supports the implementation of the government’s electricity industry policy decisions, and monitors its fiscal implications;
- effectively manages Ontario Electricity Financial Corporation’s debt and derivatives portfolios, providing timely and accurate risk, cash management and financial reporting services;
- provides a broad range of financial services to Infrastructure Ontario;
- advises ministries, crown agencies and other public bodies on financial policies and projects; and
- acts as intermediary for the Province in lending to or investing for certain public bodies.

ITEM: **Interest on Debt**
Interest on Ontario Securities for General Purposes

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

This item comprises interest on public market borrowings via such instruments as fixed-rate bonds, floating-rate and medium-term notes, Ontario Savings Bonds, short-term Treasury Bills and United States Commercial Paper (USCP).

CHANGE FROM THE 2016-17 ESTIMATES $102,522,800

The increase in interest expense is mainly attributable to new borrowing to fund the investment in capital assets.

STATUS OF ONTARIO DEBT

		$000
Outstanding as at March 31, 2016:		291,906,464
• New debt issues		26,842,948
• Retirements		(18,104,628)
Outstanding as at March 31, 2017	$	300,644,784
In 2017-18:		
• New debt issues planned	$	24,891,000
• Total retirements	$	(15,454,214)

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Canada Pension Plan Investment Board

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

The Canada Pension Plan Investment Board (CPPIB) invests funds in the Province of Ontario's non-marketable securities. Effective July 1, 2005, under a side-letter agreement signed between the CPPIB and the Province, CPPIB offered the Province upon maturity of the debentures held to the credit of the Canada Pension Plan Investment Fund (CPPIF) that were issued before January 1, 1998, an option of issuing new replacement debentures to the CPPIB with a maximum term of 30 years (minimum term of five years and with subsequent roll over options subject to the 30 years maximum from the date of issue of the first replacement debenture) at a rate based on the capital market rates at the time of roll over. These debentures are not negotiable or transferable and are assignable only to a wholly-owned subsidiary of the Canada Pension Plan Investment Board. On April 1, 2007, all debentures held to the credit of the CPPIF or purchased by the Minister of Finance of Canada in accordance with Section 110 of the Canada Pension Plan were transferred to the CPPIB.

CHANGE FROM THE 2016-17 ESTIMATES $(1,333,000)

The decrease in interest expense is mainly due to lower interest rates for the roll-over of the maturing debts.

STATUS OF ONTARIO DEBT

		$000
Outstanding as at March 31, 2016:		10,002,740
• New debt issues		91,896
• Retirements		(91,896)
Outstanding as at March 31, 2017:	$	10,002,740
In 2017-18:		
• New debt issues planned	$	-
• Total retirements	$	-

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Canada Mortgage and Housing Corporation

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

Canada Mortgage and Housing Corporation (CMHC) loans support federal-provincial environmental and employment incentive programs.

CHANGE FROM THE 2016-17 ESTIMATES $(1,472,000)

The decrease in interest expense is the result of debt retirement.

STATUS OF LOANS TO ONTARIO

	$000
Outstanding as at March 31, 2016:	51,063

• Retirements	(14,606)
Outstanding as at March 31, 2017	$ 36,457
In 2017-18:	
• New loan issues planned	$ -
• Total retirements	$ (14,509)

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Ontario Immigrant Investor Corporation

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

The Ontario Immigrant Investor Corporation (OIIC) is an operational enterprise of the Ontario Government, incorporated on April 30, 1999, under the *Development Corporation Act*. The corporation was established to act as Ontario's receiving vehicle for immigrant investor monies and was accepted as an approved fund under this program by the federal government on June 22, 1999. The OIIC has been investing funds into the Province since 2003.

CHANGE FROM THE 2016-17 ESTIMATES $3,323,800

The increase in interest expense is the result of higher interest expense than forecasted in the 2015-16 Estimates.

STATUS OF ONTARIO DEBT

		$000
Outstanding as at March 31, 2016:		131,924
• New debt issues		1,968
• Retirements		(19,823)
Outstanding as at March 31, 2017:	$	114,069
In 2017-18:		
• New debt issues planned	$	-
• Total retirements	$	(14,277)

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Other Interest, Exchange, Discount and Commission

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

These items include public debt transactions such as bank charges, foreign exchange gains and losses, debt issue costs, premiums/discounts and underwriting commissions, as well as interest on special purpose accounts.

CHANGE FROM THE 2016-17 ESTIMATES $(65,838,000)

The change is mainly due to lower forecasted expense of $65,000,000 arising from amortization of foreign exchange gains and losses and premiums/discounts related to debt issues.

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Interest Capitalization

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

This item represents the financing costs incurred to fund the construction or development of a tangible asset. The financing costs are capitalized during the period of construction given that those costs are viewed as part of the cost required to get the asset ready for use. These capitalized financing costs reduce interest on debt.

CHANGE FROM THE 2016-17 ESTIMATES $(6,016,500)

This change reflects the increase in interest capitalization in highway construction.

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Interest on Investments

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

This item represents investment income earned from the Province's investments, mainly in marketable securities issued or guaranteed by Canadian chartered banks, and provincial and federal governments. It also includes interest from loans to its Crown corporations, agencies and other public bodies.

CHANGE FROM THE 2016-17 ESTIMATES $(10,364,000)

The increase in investment income is mainly attributable to higher projected temporary investments, but partially offset by a decrease in interest income from planned new loans to agencies and other public bodies.

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Payable to the Ontario Electricity Financial Corporation

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

This item provides for interest on Provincial Purpose Debt issued as part of a debt-for-equity swap with Ontario Power Generation Inc. and Hydro One Inc. effective April 1, 1999. The Province assumed $8,885 million of the debt issued by these two government business enterprises to OEFC in exchange for $5,126 million in equity from Ontario Power Generation Inc. and $3,759 million in equity from Hydro One. In addition, OEFC owed Hydro One for a working capital adjustment in the amount of $122 million, and Hydro One agreed to settle this amount as a reduction of the equity in 2002, and the Province reduced one of its payables to OEFC by $122 million.

CHANGE FROM THE 2016-17 ESTIMATES $(30,000,000)

The decrease is mainly due to partial redemption of the debt.

STATUS OF ONTARIO DEBT

		$000
Outstanding as at March 31, 2016:		8,885,000
• New debt issues		-
• Retirements		(1,122,165)

Importance: High

Hi Folks

I enclose a revised version of the Estimates Briefing Book. Communications Services Branch provided their editing expertise on the document making it less technical/more plain language, at a higher level/less detailed and tighter/less wordy.

Please let me or Leah Young know **by no later than Monday noon** if you have any concerns with the revised content, particularly with any critical messaging.

Please be advised this timeline is critical in order for us to meet the deadlines to get the book printed and delivered to the Clerk of the Standing Committee on Estimates.

Regards

Stephanie

Ministry of Finance

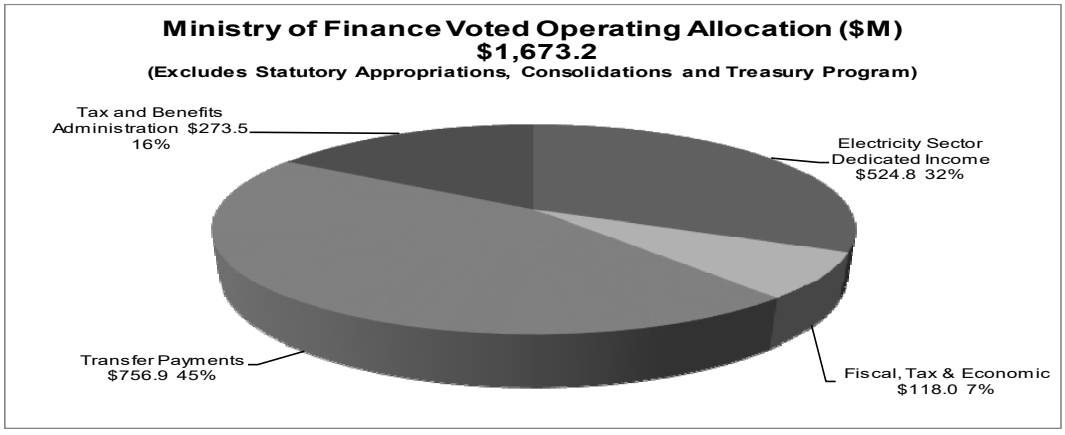
MINISTRY OF FINANCE OVERVIEW

MANDATE

The Ministry of Finance's mandate is to create an environment that fosters a dynamic, innovative and growing provincial economy and to manage the government's fiscal responsibilities as well as financial and related regulatory affairs.



MINISTRY CONTRIBUTION TO PRIORITIES AND RESULTS

Through its mandate, the ministry works to achieve the government's priorities which include investing in people's talents and skills, building retirement security, building modern infrastructure and transportation networks, and supporting a dynamic and innovative business climate.

The ministry works with the Treasury Board Secretariat to manage the Province's $141.1 billion[1] in annual expense and oversees $141.7 billion[2] in revenue raised through taxation, Government of Canada transfers, provincial business enterprises, and other non-tax revenues. It also manages the Province's $26.4 billion[3] borrowing program.

In addition, the ministry supports government-wide initiatives and provides key fiscal, taxation, statistical and economic policy advice to the Minister of Finance, Cabinet committees and the Premier. It also regulates the financial services sector through its agencies.

The ministry provides leadership in transforming Ontario's public services — helping to develop new strategies, policies and processes designed to drive government-wide efficiencies and enable modernization initiatives — while also remaining focused on implementing measures that meet annual budget targets.

[1] 2017 Ontario Budget
[2] 2017 Ontario Budget
[3] 2017 Ontario Budget

MINISTRY OF FINANCE PLAN: LOOKING FORWARD

The ministry is leading transformational activities across government to strengthen Ontario's economy and is also reviewing its own structure, processes and resources to effectively support the implementation of government priorities.

Its responsibilities and activities are aligned to provide financial and economic stewardship, and policy and program delivery leadership.

Meeting Fiscal Targets and Effective Financing

The 2017 Budget plan delivers on the government's 2010 Budget commitment to restore fiscal balance in 2017–18. The Province is also projecting balanced budgets in both 2018–19 and 2019–20.

The balanced budgets from 2017–18 onwards will limit the increase in the provincial net debt to net investments in capital assets. These investments will contribute to Ontario's economy growing at a faster rate than the provincial net debt. This will, in turn, allow the government to set an interim net debt-to-GDP target of 35 per cent in 2023–24 and reduce the net debt-to-GDP ratio to its pre-recession level of 27 per cent (projected to be achieved by 2029–30).

Ontario's net debt-to-GDP ratio peaked in 2014–15 at 39.1 per cent and is now trending downwards. The ratio is forecast to continue to decline to 37.5 per cent in 2017–18, 37.3 per cent in 2018–19 and 37.2 per cent in 2019–20.

Interest on Ontario's debt expense is forecast to be $11.6 billion in 2017–18 and $12.0 billion in 2018–19 — $872 million and $1,072 million lower than forecast in the 2016 Budget, respectively.

These savings continue a trend apparent since 2010, driven by lower deficits and borrowing requirements, and lower-than-forecast interest rates. The savings on Ontario's interest on debt over the period to balance now total $24.0 billion, relative to the 2010 Budget forecast.

Going forward the ministry will continue to review its programs to deliver the best possible results at the lowest cost, using evidence to improve outcomes and ensure the long-term sustainability of provincial programs and services.

Strong Economy and Dynamic Business Climate

The ministry's activities include delivering economic analysis and advice to support the development and implementation of government policy that fosters economic growth and job creation on a regional, sectorial and business level.

To ensure Ontario's economy is strong and its business climate dynamic, the ministry is dedicated to maintaining a fair and competitive corporate tax system — one that balances the benefits of an internationally competitive tax system with the need to raise revenue to fund essential provincial programs and services.

To help ensure the best possible programs and services for Ontarians, the ministry is also supporting Program Review, Renewal and Transformation, the government's evidenced-based decision-making process that is modernizing services, finding savings and improving outcomes.

Additionally, the ministry is supporting the Financial Accountability Office of Ontario in its work conducting independent analysis on Ontario's finances, trends in the economy and related matters important to the Legislative Assembly.

In 2017–18 the ministry will produce the Ontario Economic Accounts, quarterly reports on the status of the provincial economy that include information on its GDP, labour market, financial markets and key external factors such as U.S. economic growth and oil prices.

It will also continue to support the implementation of the province's asset optimization strategy, which is helping to fund further investments in transit, transportation and other priority infrastructure through the Trillium Trust.

Maximizing Revenues

Maximizing revenues due to the province is within the mandate of Ontario's treasury. Key to that work is developing the revenue forecast found in the 2017 Budget (updated in the fall Ontario Economic Outlook and Fiscal Review), including identifying risks to each major revenue component — and working to ensure the forecast is met. The ministry's work in 2017–18 and ongoing includes:

- Creating a new tax avoidance unit to identify and close tax planning loopholes.
- Maximizing the performance of government business enterprises by implementing the Premier's Advisory Council on Government Assets' beverage alcohol retail and distribution recommendations and adapting the Liquor Control Board of Ontario to changes to the retail marketplace as well as its new roles in wholesaling and e-commerce.
- Working with the Ontario Lottery and Gaming Corporation as it continues to implement its modernization plan for slots, casinos and lottery, as well as integrating horse racing into its gaming strategy.
- Launching an underground economy communication campaign to inform the public on the risks of participating in the underground economy.
- Developing a comprehensive strategy to address the sharing economy.
- Renewing or replacing the Aggressive International Tax Planning and Underground Economy fee-for-service agreement with the Canada Revenue Agency.

- Launching a pilot project in the hospitality and retail sectors to test the feasibility of the sales integrity program.
- Leading tobacco tax policy with an aim to support public health objectives under the Smoke-Free Ontario Strategy, while also considering impacts on the untaxed tobacco market.
- Using third-party service providers to aid collecting debts owing to the Province.
- Strengthening tools to enhance collection of non-tax revenue.

Effective Regulation and Innovative Policy

The Ministry of Finance has an instrumental role to play ensuring effective regulations and innovative policies. Its actions in 2017–18 and ongoing include:

- Simplifying personal income tax credits for caregivers by creating a new consolidated Canada Caregiver Credit.
- Introducing a new Ontario Seniors' Public Transit Tax Credit for all Ontarians aged 65 or older.
- Proposing a 15 per cent Non-Resident Speculation Tax to help address unsustainable demand for housing, discourage speculative behaviour and increase housing affordability.
- Working to stop practices that may be contributing to tax avoidance and excessive speculation in the housing market, such as requiring more information about assignments of agreements and similar arrangements through the Land Transfer Tax system.
- Exploring more comprehensive reporting requirements with the Canada Revenue Agency to ensure the correct federal and provincial taxes, including income and sales taxes, are paid on purchases and sales of real estate in Ontario.
- Consulting municipalities, tenants and apartment building owners and others on the potential implications of multi-residential property taxation on rent affordability (Based on early feedback received during this review, the Ministry of Finance is ensuring property tax for new multi-residential apartment buildings is charged at a similar rate as other residential properties. This will encourage developers to build more new purpose-built rental housing).
- Providing advice on — and advancing policy initiatives focused on — capital markets, securities and derivatives such as legislative and Ontario Securities Commission rule proposals as well as regulatory changes to respond to G20 financial regulatory reform commitments.
- Representing Ontario and advancing Ontario's interests in working towards the implementation of the proposed Cooperative Capital Markets Regulatory System, such as developing uniform capital market laws and establishing the new cooperative regulator in partnership with participating jurisdictions.
- Establishing a regulatory framework for the oversight of individuals who offer financial planning services in Ontario.
- Increasing the representation of women on boards of directors and in executive positions.
- Developing an Ontario financial technology strategy.

- Developing, with the federal government and other provinces and territories, regulations to ensure the Canada Pension Plan enhancement is financially sustainable.
- Providing central agency support to line ministries on Ontario's Basic Income Pilot.
- Developing a regulatory policy for new retirement savings models such as target benefit plans and defined contribution pension plans.
- Strengthening the regulation of registered pension plans through measures to improve disclosure and transparency for members.
- Changing the regulatory framework for pension plans — including funding frameworks for single employer and target benefit pension plans — and changing the Ontario *Pension Benefits Act* and regulations that govern the conversion or merger of single-employer pension plans into jointly-sponsored pension plans.
- Strengthening the protection for investors in syndicated mortgages by developing amendments to regulations and planning for the transfer of regulatory oversight of these products from the Financial Services Commission of Ontario (FSCO) to the securities regulator.
- Transferring the responsibility for incorporating co-operative corporations from FSCO to the Ministry of Government and Consumer Services, consolidating the incorporation of co-operatives with the processes in place for other types of businesses.
- Modernizing auto insurance, including enabling all insurers to provide insurance coverage for ride-sharing as well as consulting on the recommendations by Ontario's advisor on auto insurance David Marshall, aimed at delivering better outcomes for accident victims while creating a more efficient and cost-effective system.
- Engaging with the initial board of the Financial Services Regulatory Authority of Ontario and making progress toward establishing this new regulatory body.
- Analyzing and tracking changes in major areas of the underground economy focusing on unregulated tobacco and construction, retail and hospitality sectors.
- Identifying other high-risk industries in the underground economy through advanced analytics and the application of innovative tools, including cognitive computing.
- Completing the automation of the tax compliance verification process to modernize the means for ensuring that vendors awarded provincial contracts valued at $25,000 or more are tax compliant.
- Addressing the unregulated tobacco market by enhancing regulatory oversight of tobacco products.

Modern Transfer Payment Programs and Effective Partnerships

The Province's vision for an effective, efficient and equitable system of fiscal federalism in Canada emphasizes strong partnerships in key areas. As the branch of government most responsible for those partnerships, the ministry maintains contact with the ministries of Finance at the federal level and in other provinces and territories as well as First Nation communities and municipalities.

The following initiatives that support these partnerships are underway:

- Supporting the Ministry of Energy in respect of an agreement-in-principle with First Nations in Ontario, as represented by the Chiefs-in-Assembly, for ownership of Hydro One shares.
- Representing Ontario's position in inter-governmental negotiations on the retirement income security system, including the CPP.
- Providing funding support to municipalities through a number of transfer payments including the Ontario Municipal Partnership Fund, the Province's main unconditional transfer payment to municipalities, which is being redesigned to better target funding to northern and rural municipalities with more challenging fiscal circumstances.
- Establishing information- and data-sharing partnerships to enhance advanced underground economy data analytics.
- To address the unregulated tobacco sector, building partnerships with federal and provincial partners, including police agencies, the Canada Revenue Agency, Canada Border Services Agency, public health units and the Alcohol and Gaming Commission of Ontario.
- Supporting the integration of the delivery of Ministry of Community and Social Services social assistance programs to achieve cost efficiencies and improve client experience.
- Working with First Nation communities toward agreements on tobacco regulation and revenue sharing.

HIGHLIGHTS OF 2016–17 ACHIEVEMENTS

The Ministry of Finance performs a variety of critical roles, focused on supporting effective economic, fiscal and financial management for a stronger Ontario. Its 2016–17 achievements include:

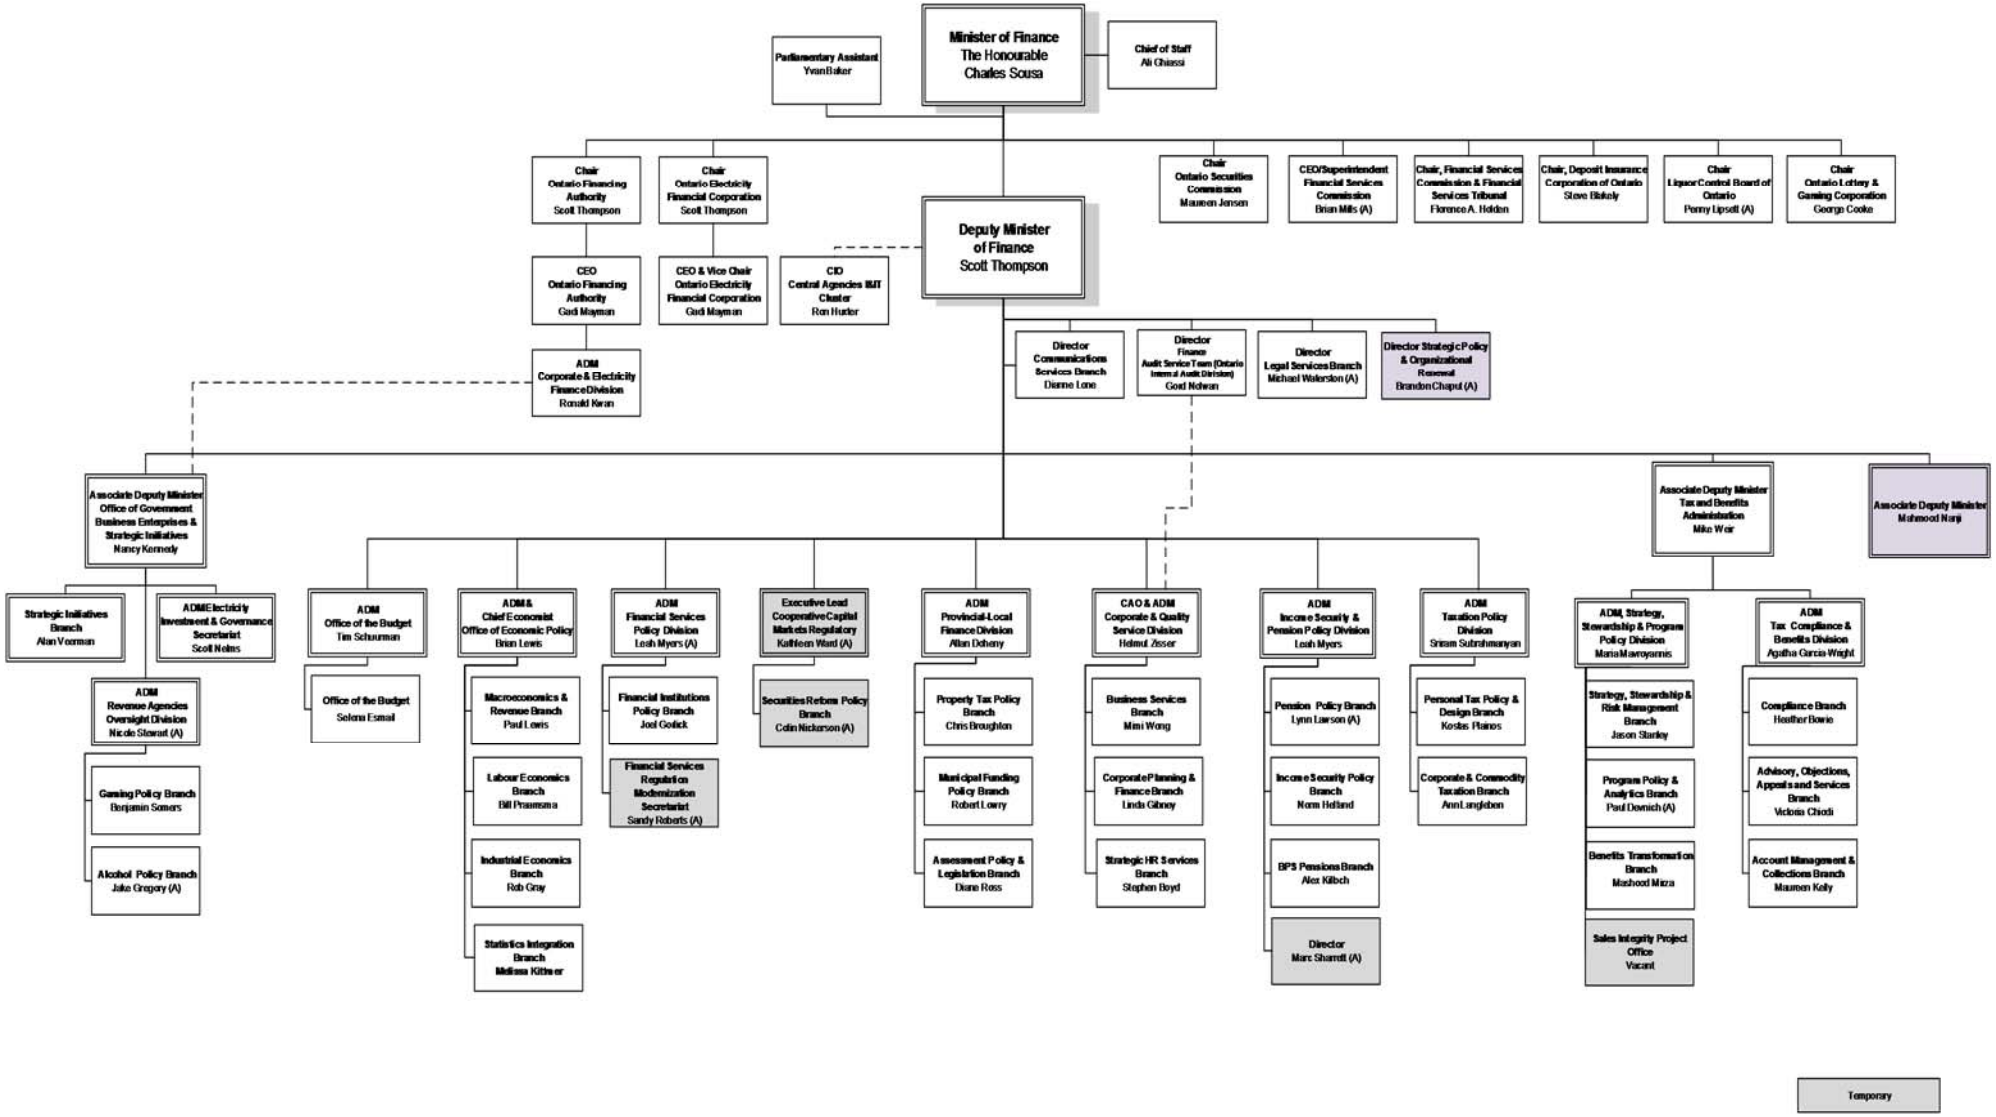
Delivering on the Balanced Budget Plan
The ministry was active in a variety of sectors that enabled the government to restore balance to the Province's finances in 2017–18. Through targeted, measured and fiscally responsible decisions, the government has restored the province's fiscal and economic strength.

Supporting a Dynamic Business Climate
To improve the province's overall business climate, the ministry supported a variety of initiatives that make Ontario an attractive environment for business investment.

Strengthening the Financial Services Sector
The ministry led a variety of initiatives focused on enhancing the province's financial services sector.

Building Retirement Security
The ministry led the implementation of a variety of pension reform measures aimed at improving the adequacy and coverage of pensions in Ontario.

Addressing the Underground Economy
The ministry led several innovative pilots and projects aimed at ensuring all citizens pay their fair share of taxes as well as enhancing the competitiveness of legitimate businesses.



Working with Indigenous Partners
The ministry continued to take the lead in government dialogue with First Nation communities and leaders on tobacco, gasoline and the energy sector for mutually beneficial outcomes for the province and First Nation communities.

Facilitating Openness and Accountability
The ministry continued to further strengthen transparency, financial management and fiscal accountability to ensure Ontarians receive the best value for their tax dollars.

Further detail of the ministry's achievements can be found in the Appendix: 2016–17 Annual Report.

MINISTRY OF FINANCE ORGANIZATIONAL STRUCTURE

As of May 8, 2017

AGENCIES, BOARDS AND COMMISSIONS

Deposit Insurance Corporation of Ontario (DICO): promotes the safety and soundness of Ontario's credit unions and caisses populaires by undertaking regulatory oversight activities, establishing standards for sound business and financial practices, and providing deposit insurance coverage within statutory limits.

Financial Services Commission of Ontario (FSCO): an integrated regulator of Ontario's insurance industry; pension plans; loan and trust companies; credit unions and caisses populaires; the mortgage brokering sector; health service providers and co-operative corporations.

Financial Services Tribunal: an independent, adjudicative body that conducts hearings arising from regulatory and proposed regulatory decisions of the Superintendent of Financial Services.

Liquor Control Board of Ontario (LCBO): responsible for the importation, distribution and sale of beverage alcohol in the province in an efficient and socially responsible manner.

Ontario Electricity Financial Corporation (OEFC): the legal continuation of the former Ontario Hydro responsible for managing that organization's legacy debt and other liabilities.

Ontario Financing Authority (OFA): conducts borrowing, investment and financial risk-management activities for the Province; manages the provincial debt; advises on financial policies and projects; provides financial and centralized banking and cash management services and advice to the Ontario Electricity Financial Corporation.

Ontario Lottery and Gaming Corporation of Ontario (OLG): responsible for the conduct, management and operation of slots and casinos, lottery operations, internet gaming and electronic games at charitable bingo halls across Ontario.

Ontario Securities Commission (OSC): the regulatory body responsible for overseeing Ontario's capital markets, which includes the equities, fixed-income and derivatives markets.

Appendix: 2016-17 Annual Report

Ministry of Finance

2016-17 ACHIEVEMENTS

In 2016–17, the Ministry of Finance engaged in a number of activities to achieve its key priorities. These highlights of the ministry's achievements include:

1. Delivering on the Balanced Budget Plan

Fiscal Framework

- Led the development, and provided strategic oversight of, the fiscal plan including tracking the government's progress in meeting fiscal targets with key partners at the Treasury Board Secretariat and Cabinet Office. Reported on the fiscal plan through the Budget, Quarterly Finances, Economic Outlook, and Fiscal Review and Public Accounts.
- Delivered the 2016 Ontario Economic Outlook and Fiscal Review, the 2017 Long-Term Report on the Economy, the 2016–17 First and Third Quarter Finances and the 2017 Budget that supports the government's plan to balance the budget and maintain balance to 2019–20.
- Advised on Ontario's fiscal relations with the federal government and maintained contact with federal, provincial and territorial finance partners to advance Ontario's fiscal priorities.

Transforming Government and Managing Costs

- In cooperation with several ministries, delivered benefit programs and continued to explore opportunities for benefits transformation to achieve better client service, streamlined administration and enhanced policy development and coordination.
- Passed new framework legislation, the *Benefits Administration Integration Act* that will allow information-sharing across benefit programs.
- Partnered with the Canada Revenue Agency to provide Automated Income Verification for applicants to a growing number of programs.
- Supported the Basic Income Pilot being implemented in early 2017–18.
- Continued working with line ministries and municipalities to expand services for benefits delivery.
- Launched the Vector Institute, a new artificial intelligence (AI) lab mandated to advance research and drive the adoption and commercialization of AI technologies across Canada.

Taxation Policy

- With other provinces, territories and the federal government, improved the Tax Collection Agreement to ensure it reflects Ontario's interests.
- As part of modernizing Ontario's Land Transfer Tax (LTT) system, doubled the refund for eligible first-time homebuyers; updated rates and brackets; restricted the refund for first-time homebuyers to Canadian citizens and permanent residents; and launched a transformational initiative collecting additional

information about Ontario's real estate market to be used for LTT enforcement and support evidence-based policy development.

Borrowing and Debt Management

- Through the Ontario Financing Authority (OFA), continued to efficiently manage the Province's borrowing program.
- Completed the government's annual borrowing program in 2016–17, borrowing $27.0 billion. (This is up from the $26.4 billion forecast in the 2016 Budget, as the OFA capitalized on low interest rates and a strong demand for Ontario bonds to prefund $3.2 billion of the 2017–18 requirement).
- Through prudent and cost-effective debt management, continued to keep interest on debt costs below budget projections. (Interest on debt expense is projected to be $11,250 million for 2016–17 — $506 million lower than forecast in the 2016 Budget — reflecting lower-than-forecast interest rates, the lower forecast deficit for 2016–17 and cost-effective debt management).

2. Supporting a dynamic business climate

Policy/Taxation Measures

- Partnered with the Canada Revenue Agency and Airbnb on a pilot project to increase awareness of tax obligations for Ontarians sharing their homes.
- Worked with the Ministry of Economic Development and Growth to identify potential opportunities for small business, through the Small Business Innovation Challenge.
- Worked with the insurance industry to develop the legislative and regulatory changes necessary to fully integrate the sharing economy into Ontario's auto-insurance system, such as the interim fleet insurance policy for the Uber ridesharing program.
- Implemented the Trillium Trust and related asset optimization initiatives to help fund infrastructure investments, including crediting to the trust $3.7 billion from the sale of Hydro One shares.
- Continued to upload social assistance benefit programs off the property tax base to ensure that municipalities have more property tax dollars to invest in local priorities.
- Planned the lowering of business electricity costs with the end of the debt retirement charge effective April 1, 2018, nine months earlier than previously estimated.
- Implemented changes to the Ontario Innovation Tax Credit and the Ontario Research and Development Tax Credit.
- Implemented legislative and regulatory changes to cultural media tax credits, e.g., introducing an application deadline for the Ontario Interactive Digital Media Tax Credit and clarifying the excluded productions for Ontario's film and television tax credits.

- Provided the Auditor General and the Financial Accountability Office with information on tax credits to support their reviews of business support programs.
- Recovered over $450 million in debts owing to the province and over $2 million for employees owed money under the *Employment Standards Act*.
- Consulted with industry and raw leaf tobacco producers on amendments to the *Tobacco Tax Act* and supporting regulation.
- Completed the online Notice of Objection project, allowing taxpayers to submit their notices online, saving them time, effort and money.

Alcohol and Gaming (Ministry, LCBO and OLG)

- Continued the modernization of the alcohol and gaming sectors and increased provincial revenues within a framework of social responsibility.
- Continued to introduce the sale of beer, cider and wine into grocery stores, giving consumers more choice and convenience while creating a more dynamic and competitive business environment for producers: up to 130 grocery stores were authorized to sell beer and cider, of which 70 can also sell wine; and launched an allocation for up to 80 more beer and cider authorizations.
- The LCBO launched its e-commerce platform, which features almost 5,000 different products from across Ontario, Canada and 85 other countries for pick-up at local stores and home delivery.
- Announced the Ontario Small Cidery and Small Distillery Support Program, which will invest $4.9 million over three years to support small cider and small spirits producers to scale up into medium and large businesses.
- Closed the sale of LCBO's head office, with the net proceeds of $246 million credited to Trillium Trust.
- Awarded three of eight gaming bundles to private sector service providers (four more bundle procurements are in progress) and opened a new casino in Belleville, major strides in OLG's modernization plan.
- Continued OLG's modernization of lottery, charitable and internet gaming lines of business as well as integrating horse racing into its gaming strategy.

Economic Analysis, Reporting and Policy Advice

- Provided analytical, policy and research support to the Premier's Office, Cabinet Office and ministries on a number of priorities, including the Business Growth Initiative, the Highly Skilled Workforce Expert Panel Report, the Poverty Reduction Strategy and the Changing Workplace Review Panel.
- Renewed a three-year agreement with the Toronto Financial Services Alliance to support the organization's strategic objective to grow the Toronto region as a global financial hub and cluster.
- Reviewed investment proposals under the government's Jobs and Prosperity Fund and regional programs.

3. Strengthening the financial services sector

- Introduced and passed legislation that sets out the initial parameters for the new Financial Services Regulatory Authority of Ontario following the June 2016 final report of the expert advisory panel that recommended establishing a new regulator.
- Amended regulations under the *Credit Unions and Caisses Populaires Act, 1994* to improve the regulatory framework for credit unions.
- Continued to make auto insurance more affordable for Ontario's almost 10 million drivers, such as requiring insurers to offer a discount for the use of winter tires and creating a new dispute resolution system to help Ontario claimants get faster access to the benefits they need.
- Amended the *Insurance Act* to improve life insurance and accident and sickness insurance disclosure requirements and improve industry efficiencies.
- Continued to play a leadership role in working towards the implementation of the proposed Co-operative Capital Markets Regulatory System, including the finalization and proposed introduction of the legislative framework that will be set out in a new Capital Markets Act and related legislation.
- Supported the 2015 and 2016 review and 2017 final report by an independent expert committee of the regulatory framework relating to financial planning and financial advisory services.
- Worked with partner ministries and stakeholders on developing a new women's economic empowerment strategy that addresses the gender wage gap and accelerates greater representation of women on boards.

4. Building retirement security

- Enhanced the Canada Pension Plan with the federal government, other provinces and territories.
- Created the Investment Management Corporation of Ontario to provide lower-cost and improved pension investment returns to Ontario's broader public sector pension plans.
- Reviewed the *Pension Benefits Act* solvency funding framework for defined benefit plans that included issuing a consultation paper on changes to the solvency funding framework.
- Extended temporary solvency funding relief measures first introduced in 2009 and 2012.
- Finalized the legislative and regulatory frameworks for Pooled Registered Pension Plans (PRPPs).
- Helped develop a multilateral agreement for PRPPs to facilitate the regulation and supervision of multi-jurisdictional PRPPs that Ontario signed in March 2017.

5. Addressing the underground economy

- Enhanced oversight of raw-leaf tobacco-growing: addressed the links between organized crime and tobacco through a partnership with the Ontario Provincial Police's Contraband Tobacco Enforcement Team, and enhanced retail inspections with public health units.
- Negotiated new fee-for-service agreements with the Canada Revenue Agency to protect Ontario revenue including enhanced compliance measures (e.g., auditing) and a service level agreement for underground economy specialist teams.
- Addressed underground economic activity through a public awareness campaign targeting multiple high-risk sectors, including home renovation, and partnered with the Ministry of Transportation on a pilot project to determine the tax compliance of construction subcontractors the ministry procured.

6. Working with Indigenous partners

- Engaged with First Nations and industry in modernizing the Ontario Gas Card Program, resulting in increasing card security for tax-exempt gasoline sales transactions in First Nation communities.
- Supported the Ministry of Energy on an agreement-in-principle with First Nations in Ontario, as represented by the Chiefs-in-Assembly, for ownership of Hydro One shares and by engaging with the Métis Nation of Ontario.
- Continued to implement the Aboriginal Loan Guarantee Program, which loan guarantees to support equity investment by Indigenous groups in renewable wind, hydro, and solar electricity generation and transmission projects.

7. Facilitating openness and accountability

- Provided advice and support to other ministries to ensure an open and productive relationship with the Financial Accountability Office.
- Initiated the development of new ways to deliver data and statistical services that are efficient, cost-effective and transparent in support of evidenced-based decision-making and advancing the government's commitments to Open Government and collaboration with external experts and academic institutions on difficult policy challenges.
- Capitalized on new methods of public and stakeholder participation in the Ontario pre-budget consultation and budget development processes.
- Implemented the recommendations of the Special Purpose Business Property Assessment Review report for the 2016 reassessment (2017 tax year) in collaboration with the Municipal Property Assessment Corporation, municipalities and other stakeholders. These are expected to increase the transparency, accuracy and predictability of property assessments, reducing the number and impact of appeals, and promoting greater revenue stability from the $27 billion shared property tax base.

- Provided additional property tax flexibility to enable municipalities to better tailor programs to reflect their local needs and circumstances, while ensuring the property tax system continues to remain fair and competitive.
- Reported on the Trillium Trust to help support public transit, transportation and other priority infrastructure projects.

Part II: 2017-18 Detailed Financials

Ministry of Finance

12 – MINISTRY OF FINANCE

The Ministry of Finance supports the economic, fiscal, financial, and taxation policies and strategies of the Government of Ontario, and oversees the Province's borrowing and debt management program. The ministry administers a number of tax statutes, tax credits and benefit programs, and produces the provincial budget. In conjunction with Treasury Board Secretariat, the ministry also manages the Consolidated Revenue Fund and fiscal and financial policies of the Government of Ontario, and reports on financial matters. The ministry also develops policies for Ontario's financial services sector and supports the regulation of financial services institutions and intermediaries carrying on business in the province. In addition, the ministry manages Ontario's fiscal relationship with the federal government, other provinces and Ontario's municipalities, reports on the Trillium Trust, and oversees agencies accountable to the Minister of Finance. The Ministry also reports on economic and demographic developments in the province and provides analytical support and policy advice on these topics as well as statistical issues and trends that affect Ontario's economic growth and job creation.

1201 – MINISTRY ADMINISTRATION

This program, which includes the Offices of the Minister and Deputy Minister delivers planning, advisory, legal, and controllership functions to ensure direction and management of operating programs consistent with Ontario Government policy and legislation. In addition, the program manages the service relationships with Treasury Board Secretariat and the Ministry of Government and Consumer Services, ensures proper levels of support to the ministry and its client groups, and strategically manages the ministry's quality service commitments.

SUB-ITEM DESCRIPTION

This sub-item includes the offices of the Minister of Finance, the Parliamentary Assistant and the Deputy Minister. The staff provide professional and technical support for the legislative policy making and administrative responsibilities of the Minister and the Deputy Minister.

FUNCTIONS

The Main Office is responsible for:

- overseeing ministry operations and adherence to corporate policies and directives;
- providing a leadership role in supporting broader government priorities including transformational policy changes that would help sustain longer term delivery of core public services;
- coordinating policies developed in the ministry for the approval of the Minister and the Deputy Minister;
- coordinating the preparation of replies to correspondence to the Minister and Deputy Minister;
- the preparation of verbal and written briefings for the Minister's presentations to Cabinet, Committees of Cabinet and other meetings such as pre-budget consultations, federal-provincial conferences and stakeholder/interest groups.

SUB-ITEM DESCRIPTION

This sub-item provides ministry strategic support for Program Review, Renewal and Transformation and Estimates, executive decision support, financial controllership, risk management, corporate accounting, emergency management and security services, accommodation management, coordination of corporate and ministry-specific modernization programs and administration of the *Freedom of Information and Protection of Privacy Act*. This sub-item represents the ministry's point of contact with central agencies.

FUNCTIONS

These offices are responsible for delivering the ministry's obligations for the following:

- leading the controllership function, including the accountability framework, strategic procurement advice, loan administration, the Trillium Trust framework, and Public Accounts;
- coordinating, preparing and providing strategic support to the Program Review, Renewal and Transformation planning process and the annual Estimates process;
- in-year risk management and planning, monitoring and reporting of financial and other resource management strategies including preparing and/or reviewing all central agency submissions, for example TB/MBC submissions;
- managing the ministry's accommodation portfolio, including development of strategic options analysis and lease management to ensure optimal space utilization;
- administering the *Freedom of Information and Protection of Privacy Act* for the ministry, its agencies, boards and commissions, including processing requests for access to records, and ensuring compliance with the privacy provisions of the Act;
- leading strategic and operational planning to promote compliance with records and information management requirements;
- developing and implementing the ministry's Emergency Management Program and Physical Security Program, including leading, coordinating, testing, updating and maintaining the ministry's Continuity of Operations Plans and Physical Security Plans and providing security services;
- coordinating the ministry's compliance with the *Ontarians with Disabilities Act, 2001* and the *Accessibility for Ontarians with Disabilities Act, 2005*; and
- coordinating corporate and ministry modernization programs including Employee Engagement and Recognition, Inclusion, Mental Health and Wellness, Workplace Violence Prevention, Service Excellence, Summer Experience Opportunities, Greening, and Open Government.

SUB-ITEM DESCRIPTION

This sub-item represents the Finance Audit Service Team (FAST) of Treasury Board Secretariat, which provides risk-management and consulting services, as well as independent assurance services to the Ministry of Finance and some of its agencies. FAST's overall objective is to ensure that the ministry's financial and risk management plans and processes meet the highest standards of integrity, accountability and transparency.

The FAST Audit Director reports functionally to the Finance Audit Committee (FAC), which is chaired by the Deputy Minister of Finance. FAC is responsible for ensuring that FAST has sufficient resources to carry out its responsibilities. FAST is primarily funded by the Ministry of Finance based on actual cost recovery basis.

FUNCTIONS

The services provided by FAST include:

- value-for-money, financial and internal control audits;
- compliance reviews;
- risk assessment and control reviews;
- forensic and fraud investigations;
- advice on governance, controllership, accountability and sound business practices, including advice and liaison to ministries related to Office of the Auditor General of Ontario audits;
- training and education on risk and control; and
- specialized audit, risk assessment and advisory services for information management and information technology projects.

GOVERNMENT BUSINESS ENTERPRISES, INCOME SECURITY AND PENSION POLICY PROGRAM

1202-6 – Income Security and Pension Policy

1202-7 – Office of Government Business Enterprises and Strategic Initiatives

Sub-Item 1 – Strategic Initiatives
Sub-Item 2 – Electricity Investment and Governance
Sub-Item 3 – Revenue Agencies Oversight

1202 – GOVERNMENT BUSINESS ENTERPRISES, INCOME SECURITY AND PENSION POLICY

This program includes pension and income security policy analysis, policy development and legislation. This program is responsible for tracking emerging trends and developments and identifying the economic and fiscal implications of pension and income security policies, and for advising and assisting the Deputy Minister of Finance, the Minister and the government in formulating major economic, fiscal and policy documents.

This program also leads the implementation and ongoing oversight of the recommendations of the Premier's Advisory Council on Government Assets. This includes oversight and implementation of the Council's recommendations related to the financial oversight of Hydro One, Ontario Power Generation, and the electricity sector, as well as the modernization of the beverage alcohol sector. In addition, the program supports the coordination of horizontal policy development on a number of transformation initiatives spanning multiple ministries, on an as required basis. This program is also responsible for facilitating the Minister's oversight and accountability of the Liquor Control Board of Ontario, the Ontario Lottery and Gaming Corporation, including the horse-racing sector, and for managing the Ontario Deposit Return Program for beverage alcohol containers.

ITEM DESCRIPTION

The Income Security and Pension Policy Division provides advice and analysis on employment pensions plans, including pension reform and federal and provincial income security programs, as well as providing research and analysis on income security and pensions policy programs.

FUNCTIONS

The Income Security and Pension Policy Division is responsible for:

- consulting with stakeholders on pension policy issues, leading development of Cabinet submissions, legislation and regulations;
- providing advice and analysis on employment pension plans and income security policy including responsibility for Ontario's co-stewardship of the Canada Pension Plan;
- developing strategic policy regarding Ontario's retirement income system, including the development of innovative retirement savings models, such as Pooled Registered Pension Plans and target benefit plans;
- supporting development of the fiscal framework and expenditure planning processes by monitoring developments in federal income security programs and estimating provincial income security program impacts on business and individuals, pension benefits standards policy and public sector pension policy;
- supporting the Budget and Public Accounts processes with estimates of the fiscal expense for pension plans of teachers, Ontario Public Service (OPS) employees and employees of other consolidated entities; supporting the estimate of non-pension, post-retirement benefits of OPS employees for the purposes of provincial expenditures; estimates of income security programs for seniors and families with children;
- coordinating the Fair Society chapter of the Ontario Budget and Fall Economic Statement; and
- conducting research and analysis to support the development of pension, income security and benefits policy.

ITEM DESCRIPTION

Office of Government Business Enterprises and Strategic Initiatives leads the implementation and ongoing oversight of the recommendations of the Premier's Advisory Council on Government Assets. This includes oversight and implementation of the Council's recommendations related to the financial oversight of Hydro One, Ontario Power Generation, and the electricity sector, as well as the modernization of the beverage alcohol sector. In addition, the program supports the coordination of horizontal policy development on a number of transformation initiatives spanning multiple ministries, on an as required basis. This program is also responsible for facilitating the Minister's oversight and accountability of the Liquor Control Board of Ontario, the Ontario Lottery and Gaming Corporation, including the horse-racing sector, and for managing the Ontario Deposit Return Program for beverage alcohol containers

FUNCTIONS

The Office of Government Business Enterprises and Strategic Initiatives is responsible for:

- supporting the coordination of horizontal policy development and analysis on transformational initiatives related to government business enterprises and strategic initiatives that span the work of multiple ministries;
- providing advice on investment and governance matters with respect to Hydro One and Ontario Power Generation (OPG) and interfacing with the Expert Investment Advisory Committee (EIAC);
- providing financial and social responsibility oversight of the Liquor Control Board of Ontario (LCBO) and the Ontario Lottery and Gaming Corporation (OLG), and advising on the obligations of these agencies to the Minister under their constituting legislation and the government's directives;
- providing policy advice, analysis and delivery to support the modernization of the beverage alcohol and gaming sectors in Ontario;
- advising the Minister on the integration of provincial horse racing within Ontario's gaming strategy, including a long-term strategy for funding Ontario's horse racing industry; and
- contributing to the development of government policy for the introduction of legalized cannabis in coordination with partner ministries.

SUB-ITEM DESCRIPTION

The Strategic Initiatives Branch fills a policy and analysis function in the Office of Government Business Enterprises and Strategic Initiatives, and the Branch specializes in business development, policy analysis, and initiatives support for files and issues that are typically complex inter-disciplinary and multi-ministry files. In issues and matters that would normally require multiple divisions and specialized resources to address, the Strategic Initiatives Branch plays both a coordination and leadership role as well as an analytical and support function for business efficiency reviews, commercial deal negotiations, and organizational structural support.

FUNCTIONS

The Strategic Initiatives Branch is responsible for:

- leading in business development, policy analysis, and initiatives support for horizontal policy development on a number of transformation initiatives spanning multiple ministries and levels of government, on an as required basis; and
- coordinating, directing, managing, and overseeing external resources and specialized expertise including business analysis, commercial negotiations, external counsel, industry-specific analysis, labour strategy, market sounding, and strategic communications, as required.

SUB-ITEM DESCRIPTION

The Revenue Agencies Oversight Division provides policy advice, analysis and oversight for the ministry's revenue agencies related to beverage alcohol and gaming.

FUNCTIONS

The Revenue Agencies Oversight Division is responsible for:

- analysing the revenue, economic, social and sectorial impacts of the business plans and activities of the Liquor Control Board of Ontario (LCBO) and, the Ontario Lottery and Gaming Corporation (OLG), and advising on the obligations of these agencies to the Minister under their constituting legislation and the government's directives;
- providing policy advice, analysis and delivery on issues affecting the beverage alcohol and gaming industries in Ontario;
- advising the Minister on gaming policy, social responsibility and the integration of provincial horse racing within Ontario's gaming strategy, including a long-term strategy for funding Ontario's horse racing industry;
- managing and evaluates the Ontario Deposit Return Program for beverage alcohol containers to ensure performance goals are met;
- advising the Minister on the policy and legislative design of beer and wine taxes and on strategic policy options related to alcohol mark-ups; and
- contributing to the development of government policy for the introduction of legalized cannabis in coordination with partner ministries.

Statutory Appropriations

Amortization, the *Financial Administration Act*

1203-13 – Capital Assets

1203 – ECONOMIC, FISCAL AND FINANCIAL POLICY

This program develops and implements sound economic, tax and inter-governmental taxation and fiscal strategies to raise revenue, stimulate economic growth and job creation; forecasts, monitors and reports on the performance of the Ontario economy; provides expertise and advice on sound economic design of and financial and implementation support for government initiatives; develops demographic forecasts for Ontario and its 49 census divisions; develops the policy and legislative framework for Ontario's taxation and benefits systems and the financial services industry; develops and provides strategic oversight of and advice related to the government's fiscal plan; assists the Minister of Finance and the government in formulating Ontario's finance policy and strategies with respect to federal-provincial fiscal arrangements; provides analysis and advice regarding Ontario's interest in, and regulation of, the provincial financial services sector and regulatory agencies, such as insurance, deposit taking and the capital markets, including the proposed Co-operative Capital Markets Regulatory System; and provides policy advice to clients, managers, and decision makers in the areas of fiscal and financial management. The program leads the Statistics Transformation Initiative to enhance how government collects, uses and disseminates data and is responsible for leading statistics policy. The program provides oversight and advice on provincial-municipal issues within the context of the Province's fiscal plan, working closely with other ministries and municipal stakeholders. The program also advises on personal and corporate tax policies affecting Ontarians and provides oversight of the property assessment system and the province's main transfer payment to municipalities. In addition, the program reflects the transfer of dedicated electricity earnings from the province to the Ontario Electricity Financial Corporation.

This program assists the Minister, Deputy Minister of Finance and the government in formulating the fiscal plan and reporting the results of the Province through the Ontario Budget, Ontario Quarterly Finances, Ontario Economic Accounts, Economic Outlook and Fiscal Review, and Ontario's Public Accounts. The program undertakes annual population projections for use in resource allocation and planning, leads preparation of the Long-term Report on the Economy and contributes to the Pre-Election Report on Ontario's Finances required by the *Fiscal Transparency and Accountability Act*.

ITEM DESCRIPTION

The Office of Economic Policy (OEP) provides the Minister with:

- forecasts and analysis of the economy and revenues;
- advice and information on economic issues and trends and the development of sound economic strategies that foster economic growth and job creation;
- economic analysis of policy proposals;
- recommendations regarding individual project proposals coming forward through economic development programs;
- leadership advice and analysis on the use of statistics and statistics policy;
- population projections and analysis of demographic issues; and
- research and quantitative analyses to support the development of tax, pension, alcohol fee, income security and benefits policy.

The OEP also represents Ontario in federal-provincial-territorial discussions regarding economic analysis and forecasting, fiscal planning as it relates to revenue forecasting, reporting and federal payments and in discussions with Statistics Canada on matters related to statistical policy.

FUNCTIONS

The Office of Economic Policy:

- develops, researches, monitors, forecasts and reports on economic, financial, demographic, labour market, social issues and risks;
- reviews ministry policy proposals within the context of the economic and fiscal framework;
- supports decisions on project proposals coming forward through economic development programs;
- assesses the economic impacts of policy proposals;
- conducts research and policy analysis on a broad range of issues related to economic performance and growth;
- advances the use and integration of data and statistics in government decision-making;
- conducts research and policy analysis on labour market issues;
- develops long-range population projections; and
- supports the development of tax, pension, income support and benefits, and alcohol policies through: partnerships, research and quantitative analysis; the identification, development and utilization of quantitative models, methodologies and data; and the management of data holdings.

ITEM DESCRIPTION

The Financial Services Policy Division (FSPD) provides advice on and advances financial services regulation and policy initiatives, including initiatives related to capital markets, securities and derivatives and initiatives related to the regulation of credit unions, mortgage brokers, co-operative corporations and insurance.

FUNCTIONS

The Financial Services Policy Division:

- represents Ontario in federal-provincial-territorial discussions regarding financial services policy;
- represents Ontario and advances Ontario's interests in the implementation of a cooperative capital markets regulatory system (CCMR) as reflected in the Memorandum of Agreement among the participating jurisdictions, including leading the development of uniform capital market laws underpinning the CCMR and related legislation;
- acts as policy lead in the ongoing work to establish a regulatory framework to oversee the activities of individuals who offer financial planning services in Ontario;
- represents the Ministry of Finance in the ongoing inter-ministerial work to improve the representation of women on boards of directors and in executive positions;
- participates as a regulatory policy lead to support the ongoing work towards developing an Ontario financial technology (FinTech) strategy;
- continues to support the government's work to keep auto insurance affordable for Ontario's over ten million drivers while ensuring that claimants get the treatment they need;
- provides support for the implementation of the recommendations stemming from the five-year review of the *Credit Unions and Caisses Populaires Act, 1994*;
- provides support for the establishment of the new Financial Services Regulatory Authority of Ontario, including the development of necessary legislation and regulations and the establishment of an appropriate oversight and governance framework;
- provides analysis and advice on the regulatory framework for financial institutions and the financial services sector;
- implements initiatives to modernize the *Insurance Act* and its regulations, including work to integrate new sharing economy business models for providing transportation services into Ontario's auto insurance system; and
- works with the Financial Services Commission of Ontario (FSCO) and the Ontario Securities Commission (OSC) on issues relating to regulation of syndicated mortgage investments.

ITEM DESCRIPTION

The Provincial-Local Finance Division provides advice to the Minister of Finance and the Government of Ontario on policies, legislation and operational initiatives that support the province's fiscal arrangements with municipalities, including the $27 billion property tax system. The Division administers the Ontario Municipal Partnership Fund (OMPF), the government's main unconditional transfer payment to municipalities.

In support of the government's priority to develop effective policies, legislation and regulation governing the property assessment and taxation system, the Division continues to examine ways to ensure the property tax and assessment system is fair, accurate, and predictable while ensuring municipalities have the financial tools they need to give Ontarians the quality of life they deserve.

FUNCTIONS

The Provincial-Local Finance Division:

- provides analysis, develops options and designs policies that support a property tax and assessment system that is fair, accurate, and predictable;
- designs assessment and property tax legislation and regulations that meet the government's policy objectives;
- maintains a productive working relationship with the Municipal Property Assessment Corporation (MPAC) that preserves access to valuation expertise and information;
- provides analysis and advice related to $7 billion in provincial Education Property Taxes, including support for the Minister of Finance's role in setting Education Property Tax rates;
- maintains an effective liaison with stakeholders to discuss possible enhancements to the property tax and assessment system and to the provincial/municipal financial arrangements;
- assists municipalities and taxpayers to better understand their responsibilities with respect to the property tax and assessment system;
- administers transfer payment programs to municipalities, including the OMPF, and recommends options and refinements to grant and/or program redesign;
- provides advice to the Minister of Finance on fiscal arrangements with municipalities, as well as oversight with respect to provincial-municipal financial strategies and policy priorities; and
- supports the Provincial Land Tax, Education Property Taxes and taxes for local roads and services boards in the Unincorporated Areas where applicable.

ITEM: **Municipal Support Programs**

TYPE: **Operating Expense**

ITEM DESCRIPTION

The Municipal Support Programs provides funding support to municipalities through the Ontario Municipal Partnership Fund (OMPF), Special Payments to Municipalities, Transitional Mitigation Payment and One-Time Municipal Assistance. The OMPF, the province's main unconditional transfer payment to municipalities, will provide $505 million to Ontario municipalities in 2017. Special Payments to Municipalities is a mitigation program related to property tax on hydro-electric generation facilities. Transitional Mitigation Payment is a mitigation program related to the property tax exemption for non-profit long-term care homes. One-Time Municipal Assistance provides one-time funding to municipalities facing special circumstances.

FUNCTIONS

The Division is responsible for OMPF policy including:

- developing options and refinements to grant or program design;
- supporting the policy announcement of annual OMPF allocations;
- issuing quarterly payments to eligible municipalities; and
- developing supporting materials and providing municipalities with assistance in understanding grant design and calculations.

Special Payments to Municipalities is a program that provides mitigation to municipalities related to the property tax revenue that each municipality received from hydro-electric generating stations (power dams) prior to 2001 when these properties became exempt from taxation.

Transitional Mitigation Payment is a program to provide transitional assistance to municipalities related to the exemption from property taxation of non-profit long-term care homes. The program targets assistance to eligible municipalities where revenue implications of this exemption represent a more significant proportion of the municipality's total revenue base.

ITEM DESCRIPTION

The Taxation Policy Division provides strategic analysis and advice on personal, corporate, mining, commodity, sales, estate administration and payroll tax policy and design.

FUNCTIONS

The Taxation Policy Division is responsible for:

- providing tax and benefit policy advice and analysis for the annual Ontario Budget, the fall Economic Outlook and Fiscal Review and other major statements;
- providing policy advice and analysis on tax issues (i.e., personal taxation, business taxation, mining, sales and commodity taxation, estate administration taxation, and payroll taxation and negotiating Canada-Ontario tax agreements);
- providing legislative design advice to implement taxation measures and support government bills relating to taxation through the legislative process;
- advising tax administrators on proper implementation of taxation measures in accordance with legislation and policy intent;
- developing and preparing the tax expenditure report, “Transparency in Taxation”; and
- leading negotiation and coordination of tax agreements and initiatives with the federal government and other provinces.

FINANCIAL SERVICES INDUSTRY REGULATION PROGRAM

1204-1 – Financial Services Commission of Ontario

1204-2 – Motor Vehicle Accident Claims Fund

Statutory Appropriations

Bad Debt Expense, the *Financial Administration Act*

1204-5 – Operating Assets

1204-4 – Capital Expense

Statutory Appropriations

Amortization, the *Financial Administration Act*

1204-3 – Capital Assets

1204 – FINANCIAL SERVICES INDUSTRY REGULATION

The Financial Services Commission of Ontario (FSCO) regulates the province's financial services sector, including insurance companies, health service providers for auto insurance, pension plans, credit unions, caisses populaires, mortgage brokers, agents and administrators, loan and trust companies, and co-operatives. FSCO also makes recommendations to the Minister of Finance on matters affecting these sectors. In addition, FSCO is responsible for the administration of the Motor Vehicle Accident Claims Fund (MVACF) which compensates people injured in automobile accidents in Ontario where there is no other insurance available to respond to the claim. FSCO is also responsible for the administration of the Pension Benefits Guarantee Fund (PBGF). The PBGF pays a minimum level of pension benefits if a plan is wound up with insufficient assets.

FSCO works with the Ministry of Finance, consumers and industry stakeholders to protect the public interest and enhance public confidence in the regulated sectors.

ITEM DESCRIPTION

The Financial Services Commission of Ontario (FSCO) regulates the province's financial services sector, including insurance companies, health service providers for auto insurance, pension plans, credit unions, caisses populaires, mortgage brokers, agents and administrators, loan and trust companies, and co-operatives. FSCO also makes recommendations to the Minister of Finance on matters affecting these sectors. In addition, FSCO is responsible for the administration of the Motor Vehicle Accident Claims Fund (MVACF) which compensates people injured in automobile accidents in Ontario where there is no other insurance available to respond to the claim. FSCO is also responsible for the administration of the Pension Benefits Guarantee Fund (PBGF). The PBGF pays a minimum level of pension benefits if a defined benefit plan is wound up with insufficient assets.

FSCO works with the Ministry of Finance, consumers and industry stakeholders to protect the public interest and enhance public confidence in the regulated sectors.

FUNCTIONS

FSCO has established the following goals:

- be risk based, proactive, evidence based, balanced, transparent, service orientated, and collaborative in our work;
- further a coordinated national approach to regulatory issues; and
- be a recognized thought leader in regulatory policy.

To achieve its goals, FSCO is guided by its strategic and operational outcomes. These outcomes help FSCO’s to achieve its core regulatory responsibilities to administer the laws and regulations governing the activities of the regulated sectors.

FSCO is also responsible for providing the administrative resources necessary for the proper functioning of the Financial Services Tribunal. The Financial Services Tribunal is an independent, adjudicative body that conducts hearings arising from regulatory and proposed regulatory decisions of the Superintendent of Financial Services.

ITEM DESCRIPTION

The Motor Vehicle Accident Claims Fund (MVACF) provides compensation to people injured in automobile accidents in Ontario involving an uninsured or unidentified vehicle where no other automobile or liability insurance is available. MVACF is a business unit within the Automobile Insurance Division of the Financial Services Commission of Ontario.

FUNCTIONS

The Motor Vehicle Accident Claims Fund:

- satisfies judgments and claims for property damage or damages related to injury or death caused by an uninsured or unidentified motorist where the plaintiffs and claimants have no recourse to automotive insurance;
- provides statutory accident benefits to individuals injured in automobile accidents where the individuals have no recourse to automobile insurance;
- recovers from the owners and drivers of uninsured vehicles monies paid out on their behalf in satisfaction of judgments and claims, when it is legally possible; and
- administers the accident benefits claims portfolio of an insolvent insurer should a wind up order be issued.

1209-4 – Capital Assets

1209 – TAX AND BENEFITS ADMINISTRATION

This program is responsible for the administration of Ontario tax statutes, a number of benefit programs, and for maintaining the integrity of Ontario's tax system. To accomplish this, it conducts tax compliance activities including audit, inspection, investigation and collections and delivers key benefit programs for low-income seniors and families. Central to this role is the provision of high quality services to clients including information and advisory services. Accountability for managing the relationship with the Canada Revenue Agency, which collects the majority of the province's taxes on its behalf, also rests with this program.

In addition to being responsible for Ontario's Tobacco Strategy and tobacco tax policy, the program leads the province's efforts to address the underground economy and supports the development of Ontario's approach to the Sharing Economy. The program is also responsible for a number of cross-government initiatives such as the centralization of collections functions and benefits transformation including the expansion of automated income verification and related administrative services for various government programs. The program also works in partnership with First Nations on a range of issues including tobacco. In limited circumstances, the program provides grants to not-for-profit organizations and selected First Nations communities related to tax administration.

ITEM: **Tax and Benefits Administration**

TYPE: **Operating Expense**

ITEM DESCRIPTION

This program is responsible for the efficient and effective administration of Ontario tax statutes, tax incentive and benefits programs. It strives to support the sharing economy and ensure the integrity of the tax system through measures aimed at reducing participation in the underground economy and maintaining tax fairness. The program is also responsible for examining ways to reduce the taxation burden on participating businesses and citizens. The province encourages compliance through client services and independent objections review, while discouraging non-compliance and tax evasion through collections activities, audits, inspections and investigations. The fairness of tax incentive and benefits programs is protected through systematic eligibility verification and validation reviews.

FUNCTIONS

- encouraging voluntary compliance through client services such as registration, tax roll and account maintenance and processing tax returns, processing application based refunds, client education, and outreach;
- providing remittance, data and image capture and revenue accounting processing services;
- maintaining data integrity in sustaining an efficient tax administration system and collections function for all Ministry of Finance administered tax statutes;
- leading transformation initiatives to streamline the delivery of Ontario benefits, administering ministry benefits programs and providing benefits administration services to partner ministries;
- managing inter-jurisdictional relationships with the Canada Revenue Agency, and monitoring the related service provisions;
- strengthening efforts to address the underground economy, contraband tobacco, and other measures aimed at maintaining tax fairness;
- supporting the sharing economy through coordination and development of key policy initiatives in partnership with the Sharing Economy Advisory Committee;
- providing strategic management services including tracking, analyzing and reporting on TBA’s performance measures, service standards and revenue commitments;
- developing proactive and effective tax administration policy that supports the government’s competitive business environment; and
- directing and executing excellence in the audit, investigations including forensic accounting and forensic data recovery, regulatory inspection and collection functions using risk based techniques, modern technology and best practices.

SUB-ITEM DESCRIPTION

The Strategy, Stewardship and Program Policy Division is responsible for program policy, strategic planning, relationship and risk management, and benefits transformation initiatives.

FUNCTIONS

- providing policy advice and leadership on key government priorities related to tax and benefit administration, including addressing the underground economy, contraband tobacco, and other measures aimed at maintaining tax fairness;
- providing advice and assistance to the Minister of Finance and the government in developing policy options for tobacco taxation and the oversight of raw leaf tobacco, based on analysis of the revenue, economic, health, social impacts of various options, and input from industry and health advocates;
- developing proactive and effective tax administration policy that supports the government's competitive business environment and Open for Business priorities;
- managing relationships, service provisions and fee-for-service arrangements and develops accountability frameworks for tax and benefit administration involving partnerships with other governments (most notably the Canada Revenue Agency) and the broader public sector, and First Nations;
- identifying opportunities to improve client access to Ontario's income-based benefits programs and making their delivery more efficient through efforts such as leveraging MoF's automated income verification and other benefits administration processes;
- providing data analysis to support the transformation of tax and benefits programs;
- providing strategic planning services including tracking, analyzing and reporting on TBA's performance measures, service standards, and revenue commitments;
- evaluating and reporting on TBA's performance including our success in meeting strategic and operational objectives;
- developing TBA's strategic plan, operational business plans and related work activities, including inter-jurisdictional research and analysis, environmental assessments, planning sessions, and benchmarking;
- operationalizing a risk management framework for TBA that proactively identifies and responds to risks; and
- supporting the sharing economy through coordination and development of key policy initiatives in partnership with the Sharing Economy Advisory Committee.

SUB-ITEM DESCRIPTION

The Tax Compliance and Benefits Division plays a key role in promoting public confidence in the fairness and integrity of Ontario's tax system. The division provides a wide range of tax and non-tax enforcement functions to ensure compliance such as auditing, investigations, inspections and collections. The division is responsible for providing registration services, responding to client inquiries, managing tax client accounts and processing benefit payments, processing application refunds, and providing public education and interpretative services, reviewing and resolving objections and appeals, and providing imaging and revenue processing services.

This sub-item focuses on operational and service delivery of tax and benefits programs, revenue administration, and the implementation of current transformational projects to support the ministry’s commitment to continuous improvement and modernization.

FUNCTIONS

- directing and executing excellence in the audit function using risk based techniques, modern technology and best practices;
- conducting effective investigations including forensic accounting and forensic data recovery and regulatory inspections;
- partnering with other ministries, agencies and other jurisdictions to provide technical information, resolve issues and identify opportunities to collaborate;
- strengthening efforts to address contraband tobacco products;
- providing revenue collections functions to manage accounts receivable, collect delinquent tax and non-tax debt, and administer insolvencies;
- providing leadership and expertise in the areas of Centralized Collections;
- administering tax statutes as well as a number of tax incentive, revenue and benefit programs;
- encouraging voluntary compliance through client services such as registration, account maintenance and processing tax returns and application based refunds;
- providing remittance, data and image capture and revenue processing services;
- providing benefits administrative services to partner ministries; and
- providing an inexpensive administrative review of tax assessments and refund disallowances through the objection process.

ITEM DESCRIPTION

This program is responsible for the development, direction, operation and formulation of policies for the management of the Province's debt, investments, credit rating, investor relations, and related financial administration activities; providing centralized banking and cash management services to the Province; reporting on the financial position of the Province to investors and the public to facilitate borrowing activities; providing to the electricity sector financial analysis and support for any direct or indirect provincial liabilities and monitoring fiscal implications; advice to government and broader public sector on financing initiatives and policies; provision of guarantees and loans by the Province and assistance in investments to its Crown Corporations and agencies; and arranging custodial and fiscal agency services for the Province and certain agencies. It is also responsible for the issuance of Ontario Savings Bonds. The Ontario Financing Authority (OFA) provides a broad range of financial services to Ontario Electricity Financial Corporation (OEFC) and Ontario Infrastructure and Lands Corporation (Infrastructure Ontario).

FUNCTIONS

The program:

- conducts borrowing in the capital markets in a cost-effective and prudent manner, manages the provincial debt and investments;
- manages financial risks such as interest rates, currency, credit and liquidity to minimize interest on debt (IOD) and variations from the budget target;
- manages and supports the credit rating review of the Province;
- manages relations with the fixed-income community (domestic and foreign);
- provides centralized banking and cash management services for the government;
- provides settlement and payment services, and financial reporting services;
- supports the implementation of the government’s electricity industry policy decisions, and monitors its fiscal implications;
- effectively manages Ontario Electricity Financial Corporation’s debt and derivatives portfolios, providing timely and accurate risk, cash management and financial reporting services;
- provides a broad range of financial services to Infrastructure Ontario;
- advises ministries, crown agencies and other public bodies on financial policies and projects; and
- acts as intermediary for the Province in lending to or investing for certain public bodies.

• Total retirements	$	(15,454,214)

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Canada Pension Plan Investment Board

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

The Canada Pension Plan Investment Board (CPPIB) invests funds in the Province of Ontario's non-marketable securities. Effective July 1, 2005, under a side-letter agreement signed between the CPPIB and the Province, CPPIB offered the Province upon maturity of the debentures held to the credit of the Canada Pension Plan Investment Fund (CPPIF) that were issued before January 1, 1998, an option of issuing new replacement debentures to the CPPIB with a maximum term of 30 years (minimum term of five years and with subsequent roll over options subject to the 30 years maximum from the date of issue of the first replacement debenture) at a rate based on the capital market rates at the time of roll over. These debentures are not negotiable or transferable and are assignable only to a wholly-owned subsidiary of the Canada Pension Plan Investment Board. On April 1, 2007, all debentures held to the credit of the CPPIF or purchased by the Minister of Finance of Canada in accordance with Section 110 of the Canada Pension Plan were transferred to the CPPIB.

CHANGE FROM THE 2016-17 ESTIMATES $(1,333,000)

The decrease in interest expense is mainly due to lower interest rates for the roll-over of the maturing debts.

STATUS OF ONTARIO DEBT

		$000
Outstanding as at March 31, 2016:		10,002,740
• New debt issues		91,896
• Retirements		(91,896)
Outstanding as at March 31, 2017:	$	10,002,740
In 2017-18:		
• New debt issues planned	$	-
• Total retirements	$	-

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Canada Mortgage and Housing Corporation

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

Canada Mortgage and Housing Corporation (CMHC) loans support federal-provincial environmental and employment incentive programs.

CHANGE FROM THE 2016-17 ESTIMATES $(1,472,000)

The decrease in interest expense is the result of debt retirement.

STATUS OF LOANS TO ONTARIO

	$000
Outstanding as at March 31, 2016:	51,063
• New loans	-
• Retirements	(14,606)
Outstanding as at March 31, 2017	$ 36,457
In 2017-18:	
• New loan issues planned	$ -
• Total retirements	$ (14,509)

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Ontario Immigrant Investor Corporation

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

The Ontario Immigrant Investor Corporation (OIIC) is an operational enterprise of the Ontario Government, incorporated on April 30, 1999, under the *Development Corporation Act*. The corporation was established to act as Ontario's receiving vehicle for immigrant investor monies and was accepted as an approved fund under this program by the federal government on June 22, 1999. The OIIC has been investing funds into the Province since 2003.

CHANGE FROM THE 2016-17 ESTIMATES $3,323,800

The increase in interest expense is the result of higher interest expense than forecasted in the 2015-16 Estimates.

STATUS OF ONTARIO DEBT

		$000
Outstanding as at March 31, 2016:		131,924
• New debt issues		1,968
• Retirements		(19,823)
Outstanding as at March 31, 2017:	$	114,069
In 2017-18:		
• New debt issues planned	$	-
• Total retirements	$	(14,277)

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Other Interest, Exchange, Discount and Commission

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

These items include public debt transactions such as bank charges, foreign exchange gains and losses, debt issue costs, premiums/discounts and underwriting commissions, as well as interest on special purpose accounts.

CHANGE FROM THE 2016-17 ESTIMATES $(65,838,000)

The change is mainly due to lower forecasted expense of $65,000,000 arising from amortization of foreign exchange gains and losses and premiums/discounts related to debt issues.

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Interest Capitalization

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

This item represents the financing costs incurred to fund the construction or development of a tangible asset. The financing costs are capitalized during the period of construction given that those costs are viewed as part of the cost required to get the asset ready for use. These capitalized financing costs reduce interest on debt.

CHANGE FROM THE 2016-17 ESTIMATES $(6,016,500)

This change reflects the increase in interest capitalization in highway construction.

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Interest on Investments

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

This item represents investment income earned from the Province's investments, mainly in marketable securities issued or guaranteed by Canadian chartered banks, and provincial and federal governments. It also includes interest from loans to its Crown corporations, agencies and other public bodies.

CHANGE FROM THE 2016-17 ESTIMATES $(10,364,000)

The increase in investment income is mainly attributable to higher projected temporary investments, but partially offset by a decrease in interest income from planned new loans to agencies and other public bodies.

VOTE/ITEM: **S**

VOTE: **Treasury**

ITEM: **Interest on Debt**
Payable to the Ontario Electricity Financial Corporation

TYPE: **Statutory**

SUB-ITEM DESCRIPTION

This item provides for interest on Provincial Purpose Debt issued as part of a debt-for-equity swap with Ontario Power Generation Inc. and Hydro One Inc. effective April 1, 1999. The Province assumed $8,885 million of the debt issued by these two government business enterprises to OEFC in exchange for $5,126 million in equity from Ontario Power Generation Inc. and $3,759 million in equity from Hydro One. In addition, OEFC owed Hydro One for a working capital adjustment in the amount of $122 million, and Hydro One agreed to settle this amount as a reduction of the equity in 2002, and the Province reduced one of its payables to OEFC by $122 million.

CHANGE FROM THE 2016-17 ESTIMATES $(30,000,000)

The decrease is mainly due to partial redemption of the debt.

STATUS OF ONTARIO DEBT

		$000
Outstanding as at March 31, 2016:		8,885,000
• New debt issues		-
• Retirements		(1,122,165)
Outstanding as at March 31, 2017	$	7,762,835
In 2017-18:		
• New debt issues planned	$	-
• Total retirements	$	-

Good afternoon –

Program areas are asked to please submit Top Facts (formerly called Q&As) and update Accomplishments no later than September 11th to Pauline Padmore and cc Nicole Yanqui. Attached for your reference is the table of contents from last years' Estimates Briefing Binder, Accomplishments and Top Facts.

Here is the Minister's Office recommended list of top facts & top issues **by order of importance**:

Tab 3: Top Facts

- Office of the Budget
- Ontario Financing Authority
- Office of Economic Policy
- Corporate Electricity Finance Division
- Taxation Policy Division
- Tax and Benefits Administration
- Provincial Local Division
- Cannabis Retail Implementation Project
- Government Business Enterprise Division
- ORPP Implementation Secretariat / Admin Corporation
- Income Security & Pension Policy Division
- Financial Services Policy Division

Tab 4: Top Issues

- Fiscal Plan (in relation to questions that might come up about balancing)
- Debt (Interest on Debt costs)
- Public Accounts (emphasis on AG Accounting)
- Fair Hydro Plan
- Housing Market
- Cannabis
- Cap & Trade
- Trillium Trust

- OLG Modernization
- LBCO
- ORPP – if needed

In addition to the corporate preparations, program areas should prepare their ADM/Program Head in the event we do appear before the Estimates Committee – for those questions that are of a technical or operational nature. This also includes preparations for your ADM/Program Head to explain any financial variances from the Estimates Briefing Book, should those questions arise at the proceedings. This work should currently be underway.

Please let me know if you have any questions about this process.

Thank you.

Income Security and Pension Policy Division

Continued to provide the government with policy advice on income security matters, from childhood through to retirement, including: the indexing of the Ontario Child Benefit; policy work for key sections of the 2016 Budget (such as announcements on the Basic Income Pilot and social assistance rate increase); and worked collaboratively and intensively with the federal government and provinces to make progress on enhancing the CPP. The Divisions also provided policy and legislative advice on pension policy issues such as the successful passage of the *Pooled Registered Pension Plans Act, 2015*, initiated a review of solvency funding rules for defined benefit pension plans, proclaimed legislation and passed regulations governing the conversion or merger of single employer defined benefit pension plans to jointly sponsored pension plans, and enacted legislation (to be proclaimed into force by the LGIC) that creates a pooled asset management entity for pension plans in the broader public service.

Revenue Agencies Oversight Division

Moving forward the large scale modernization and transformation of the gaming and alcohol sectors in Ontario that will improve consumer experience and support increased revenues for important public services.

Office of Economic Policy

Supported effective, economic, fiscal and financial management consistent with the government's priorities, and supported various initiatives which continue to make Ontario an attractive environment for business investment.

Financial Services Policy Division

Supported the growth of the financial services sector by advancing a modern and flexible approach to regulation, strengthening consumer and investor protection by implementing regulatory changes to help ensure auto insurance is affordable for Ontario drivers; exploring how Ontario's regulatory framework for auto insurance can fit new insurance products for ride-sharing services; reviewing the legislative framework for Ontario's credit unions to protect consumers and their deposits; supporting an independent review of the mandates of key financial services agencies. Additionally, the Financial Services Policy Division continues to support the independent Expert Committee to Consider Financial Advisory and Financial Planning Policy Alternatives, which released its preliminary policy recommendations in April 2016; and is working with participating jurisdictions to achieve important milestones toward the establishment of the Cooperative Capital Markets Regulatory System (CCMR).

Provincial Local Finance Division

The Ministry is delivering improvements to the property tax and municipal funding system that contributes so much to communities and public services across Ontario. During 2015-16, the government implemented changes to Ontario's property assessment and property tax systems, including implementing recommendations coming out of the Assessment Review in time for the 2016 reassessment of all Ontario properties. These measures improve the transparency, accuracy and predictability of property assessments. The Ministry also worked in close consultation with municipalities to redesign the Ontario Municipal Partnership Fund (OMPF) so that it better targets funding to municipalities with the greatest needs. While the program has been phased down, the government's commitment to the provincial uploads means that overall support to municipalities will continue to increase. Together, these measures have helped ensure that municipalities are on a financially sustainable footing and in a position to invest in local priorities like roads, transit and economic development.

Office of the Budget

Provided strategic fiscal advice and coordinating key government publications including the annual Budget, the Economic Outlook and Fiscal Review and the Quarterly Finances

Taxation Policy Division

The 2016 Student Financial Assistance Budget announcement that Ontario's tuition and education tax credits would end beginning September 2017. Additional revenue from ending the credits is proposed to be redirected to the new Ontario Student Grant or other postsecondary, education, training and youth jobs programs, which fulfills a CROPS recommendation.

Tax and Benefits Administration

Established a Contraband Tobacco Enforcement Team within the OPP to focus on the organized crime linkages

ORPP Implementation Secretariat

The government passed two pieces of ORPP legislation that outlined the framework of the plan and established an arm's length entity, the ORPP Administration Corporation, including appointing the initial Board of Directors and hiring a Chief Executive Officer.

Ontario Financing Authority

Completed the 2015-16 borrowing requirement and pre-borrowed $2 billion for 2016-17 for total borrowing of $32.1 billion, while continuing to extend term to lock in low interest rates, with an average term of borrowing for the year of 14.2 years. Since 2010, borrowed more than $54 billion in terms of 30 years or longer.

Corporate Electricity Finance Division

Provided strong support to the Province's asset optimisation initiative, including the Hydro One IPO, real estate assets and the Trillium Trust to dedicate funds to infrastructure investments; and has moved forward with a legislated, fixed end date of April 1, 2018, to the Debt Retirement Charge (DRC) for commercial, industrial and all other users of electricity. The DRC for residential users ended as of January 1, 2016.

TOP FACTS

INCOME SECURITY AND PENSION POLICY DIVISON 1

Q: When and where will the Basic Income pilot be implemented? How much will the Basic Income pilot cost? Your Estimates show $5 million in 2016-17 for the pilot. 1

Q: If there is an agreement on CPP enhancement within the year, will Ontario still implement the ORPP? 1

Q: If there is agreement on a CPP enhancement that does not meet Ontario's objectives, what is Ontario's position? 1

REVENUE AGENCIES OVERSIGHT DIVISION 2

Alcohol 2

Q: Why is this so complicated? There will be universal authorizations, existing winery stores operating inside grocery, controls on who sells what, some will be matched with beer but some won't. Why not just open it up? 2

Q: Why is the Council recommending only introducing wine into 150 grocery stores? There will be beer in 450 grocery stores. 2

Q: Why will grocery stores only be able to sell wine that costs $10.95 or more? 2

Gaming 3

Q: What is the future of the HRPFP? 3

Q: Why is OLG net profit to the province (NPP) expected to decline slightly from 2015-16 to 2016-17? 3

Q: Why is net profit to the province higher in 2015-16 compared with projections in Budget 2015?. 3

Q: Is funding to hospitals being reduced by $107M in 2016-17 as a result of OLG's projected lower net profit to the province? 3

OFFICE OF ECONOMIC POLICY 4

Q: Will the 30% Off Ontario Tuition grant still be available or has it been eliminated? 4

Q: What evidence do you have that Ontario's economy is performing better than Canada's? 4

Q: Over the last 18-months there has been a significant shift in the global economic environment. Why do you remain positive about Ontario's economic prospects? 4

FINANCIAL SERVICES POLICY DIVISON 6

Q: What is the government's reaction to the preliminary policy recommendations released by the Expert Committee to Consider Financial Advisory and Financial Planning Policy Alternatives? 6

Q: Both the City of Ottawa and City of Toronto staff reports on vehicles for hire recommend minimum insurance requirements for drivers involved in ride-sharing. What are you doing to make sure that insurance is in place? 6

PROVINCIAL LOCAL FINANCE DIVISION 8

Q: What is the government doing to support municipalities? 8

Q: Will the Ontario Municipal Partnership Fund (OMPF) be further reduced beyond 2016? 9

Q: In the 2014 Budget, the Province announced that payments to municipalities under the Power Dam Special Payment Program would be reduced. What is the status of this phase-down? 9

OFFICE OF THE BUDGET 10

Q: The Ontario budget states that new federal funding has been included in the fiscal outlook based on 'prudent assumptions' about new transfers, but the federal government has not said how much Ontario will receive. What are these prudent assumptions and how much new federal money is counted in this budget? 10

Q: Will cap-and-trade impact the Province's bottom line? 11

Q: Is the Government using Asset Optimization Revenues to balance the Budget? 12

Q: Is the government restricting the ability of the FAO to access Cabinet Confidential documents? 12

Q: What is the government's plan to hold average annual growth in program expense to 1.9% going forward? Given that this is below inflation, what programs are being cut? 12

Q: Compared to the 2015 Budget, program spending is higher in each year. How is the government going to balance when spending is up? 13

Q: The government is reporting overachievement on its annual deficit target for the 7th year in a row. How is this possible? Is the government purposely setting easy targets? 14

TAXATION POLICY DIVISION 16

Q: How many students will be affected when the tuition and education tax credits end? 16

Q: Will everyone who loses their tax credits get back the money through the new student grant? . 16

Q: Why are you cutting R&D Tax Credits (i.e. OITC and ORDTC) when you say you want to support innovation? 16

TAX AND BENEFITS ADMINISTRATION 17

Q: Why are Bad Debt Expenses increasing from approximately $46.7Million (2014-2015 Actuals) to $90Million (2015-2016 interim actuals)? 17

Q: Why is the Ministry of Finance seeking an increase of $13.2Million in its Bad Debt Expense allocation in 2016-17 (from $32Million to $45.2Million)? 17

Q: How is Ontario supporting the sharing economy? 17

Q: Why has the government introduced more red tape for estate representatives? 18

Q: Has the government seen an increase in the Estate Administration Tax collected since January 1, 2015? 18

Q: What is the government doing to address Aggressive International Tax Planning? 18

Q: What is Ontario doing to address the underground economy? 19

ORPP ADMINISTRATION CORPORATION 20

Q: Why is the government providing the ORPP AC with a loan? 20

Q: How much money is being loaned? 20

Q: In the 2016/17 estimates, it shows a loan amount of up to $240M. How is that money going to be used? 21

ORPP IMPLEMENTATION SECRETARIAT 22

Q: How much has been spent on the ORPP Implementation Secretariat (ORPPIS) to date? 22

Q: Why does the Ministry's direct spending for ORPP decrease by $12.5M in 2016-17? 22

Q: Why is the government providing the ORPP AC with a $240M loan in 2016-2017? 22

Q: In total, how much is the government loaning the ORPP AC for set-up expenses? 23

Q: In addition to the current costs and the loan to ORPP AC, how much money will it cost to implement the ORPP? Are we talking billions? 23

Q: Isn't the federal government helping to administer the ORPP? 23

Q: Who pays for the ORPP start-up costs if the CPP is enhanced and the plan is never implemented? 24

Q: How much money is being loaned? 24

Q: In the 2016/17 estimates, it shows a loan amount of up to $240M. How is that money going to be used? 25

Q: How much of the loan has been drawn down to date? What has that money been used for? 25

Q: Is this money being spent on high salaries? What is the compensation framework for the ORPP AC? 25

Q: Does the government expect to be repaid? 25

Q: What would be the cost to government if the ORPP is cancelled after it launches? 25

Q: How is the repayment schedule structured? Will it be charged interest? 26

Q: Why doesn't the ORPP AC get a traditional bank loan? 26

Q: Will there be any public reporting or accountability to how the loan is spent? 26

Q: What types of costs will the loan be used to pay? 26

Q: How much money has the ORPP AC spent on the services of consultants? 27

Q: How does the loan relate to administration costs of the ORPP? 27

Q: What is the ORPP Administration Corporation? 27

Q: What are the accountability mechanisms of the ORPP Administration Corporation? To whom does it report? 27

Q: Why is the ORPP IS still in place now that the ORPP AC has been established? 28

Q: Why did the government spend an additional $6 million than was estimated last year? Is this another example of the government overspending on consultants? 29

Q: On one hand you say you are launching the ORPP in 2017, but then indicate that the collection of contributions won't start until 2018…which is it 29

Q: Is the federal government committing to administer your plan if CPP talks fail? 30

Q: Would Ontario support a CPP enhancement that is a universal program to all employers and employees? 30

Q: If the government is going to proceed with measures such as introducing legislation on ORPP plan design, are you even serious about discussing the CPP? 31

Q: What progress has the government made on the ORPP to date? 31

Q: Why introduce legislation now? Didn't you commit to ongoing national discussions on a CPP enhancement? 31

[Legislation tracking to be introduced April 14, 2016] 32

Q: What will be included in upcoming legislation? 32

Q: What is the Ontario Retirement Pension Plan (ORPP)? 33

Q: Why is the ORPP needed? 33

Q: What are the anticipated impacts of the ORPP on Ontario's economy? 33

Q: Why is the Government advertising the Ontario Retirement Pension Plan? 34

Q: In 2015-16, how much did the ministry spend on the ORPP campaign (including advertising, marketing and market research)? 34

ONTARIO FINANCING AUTHORITY 35

Q: How does the Province plan to reduce its net debt-to-GDP ratio to its pre-recession level of 27 per cent? 35

Q: Ontario's debt has more than doubled since Premier McGuinty was first elected. When interest rates begin to rise, won't interest costs displace spending on the Government's priorities? 35

Q: How will the credit rating agencies respond to the 2016 Budget? 36

CORPORATE ELECTRICITY FINANCE DIVISION 37

Q: What's the current status of the funds in the Trillium Trust? 37

Q: Since the Hydro One IPO was completed several months ago and now the government has announced a secondary share offering, why haven't you made any regulations to dedicate the fiscal benefits of the Hydro One IPO to the Trillium Trust? When will you make these regulations and when will we see these amounts in the Trillium Trust? 37

Q: Why have no amounts been spent from the Trillium Trust yet, not even from the GM share gain amounts from 2014-15? And why are there only $1,000 in placeholder expenditure numbers for the Trillium Trust lines in Estimates? 37

Q: When will the government actually be able to start using funds from the Trillium Trust to pay for transit and infrastructure? 38

Q: How much was raised from the Hydro One IPO? 38

Q: What amount of proceeds will the Province receive from the secondary offering? 39

Q: What was the process involved in selecting the underwriters involved for the secondary offering 39

Q: Why is the interim Electricity Sector Dedicated Income (ESDI) $0 in 2015-16, and why is the forecast so low for ESDI in the 2016-17 Printed Estimates? Is this because of the Hydro One IPO reducing the Province's future revenues from Hydro One and reducing the amounts to pay for stranded debt? 40

INCOME SECURITY AND PENSION POLICY DIVISON

Q: When and where will the Basic Income pilot be implemented? How much will the Basic Income pilot cost? Your Estimates show $5 million in 2016-17 for the pilot.

A: The pilot in still in the inception stage. A start date and criteria for determining a location for the Basic Income pilot have not yet been determined. The government will be gathering expert advice on the design of the Basic Income pilot over the course of 2016. Once this work has been completed, the government will finalize the costs for the pilot.

Q: If there is an agreement on CPP enhancement within the year, will Ontario still implement the ORPP?

A: While Ontario is pleased that the federal government understands the importance of enhancing retirement security, the process to enhance the CPP is not simple and could take a very long time.

Ontario will continue to be an advocate of the need for enhanced retirement security and will work intensively with its federal, provincial and territorial counterparts to address the needs of future retirees.

To provide more time for discussion among provinces and the federal government, Ontario is phasing-in the launch of the ORPP by starting enrollment one year later than the original start date, and by starting the first phase of contributions in January, 2018.

Q: If there is agreement on a CPP enhancement that does not meet Ontario's objectives, what is Ontario's position?

A: The Province's extensive consultations in developing the ORPP have helped to inform Ontario's view that any CPP enhancement must be timely and provide a level of adequacy and targeted coverage that is consistent with the ORPP.

The government looks forward to collaboration on a CPP enhancement and other innovative approaches at the Federal-Provincial-Territorial Finance Ministers meeting in June 2016.

Ontario's main objective is to look at ways to meet the goals of the ORPP in an enhanced CPP framework, while preserving the ability to implement the ORPP, should that not be possible.

REVENUE AGENCIES OVERSIGHT DIVISION

Alcohol

Q: Why is this so complicated? There will be universal authorizations, existing winery stores operating inside grocery, controls on who sells what, some will be matched with beer but some won't. Why not just open it up?

A: The Council did not start from scratch in making its recommendations. It recognized the benefits of the existing retail channels for wine, including the LCBO and winery retail stores, and how we could build on and improve them for consumers and all producers.

There will be differences in the consumer experience. Just like beer, and just like grocery stores in general.

The bottom line is that we're getting what consumers want done — wine will be sold alongside beer in grocery stores.

Q: Why is the Council recommending only introducing wine into 150 grocery stores? There will be beer in 450 grocery stores.

A: We are expanding access responsibly. The number of new licences in the proposed new model is based on the total number of beer in grocery licences that were established under the beer framework – 450. There are currently 292 "off site" winery retail stores, so we added 150 new authorizations to bring it to about the same as beer.

The exact number of grocery stores selling wine through their own checkouts will depend on the number of WRS outlets that ultimately move inside the check-out at grocery stores. Of the 292 existing WRS outlets, the Council is recommending that up to 150 that are currently located in grocery and outside the grocery store checkout be enabled to operate inside grocery with a shared checkout.

In total, wine could be available in up to 300 grocery stores – including up to 70 locations authorized to sell by this fall.

Q: Why will grocery stores only be able to sell wine that costs $10.95 or more?

A: We believe that, where access is expanded, social responsibility standards should be strengthened. This price restriction is supported by social responsibility groups, including MADD.

This price restriction also supports the competitiveness of Ontario VQA wines in the grocery channel, and promotes the objectives of Ontario's Wine and Grape Strategy.

Gaming

Q: What is the future of the HRPFP?

A: The two year program extension will give confidence to the industry to make investments and business decisions for the coming years.

Beyond this time, the intention would be for OLG to establish a future, longer-term funding arrangement with the industry. The arrangement would be subject to government approvals, and further integrate gaming with horse racing and support industry sustainability.

Q: Why is OLG net profit to the province (NPP) expected to decline slightly from 2015-16 to 2016-17?

A: OLG continues to provide approximately $2 billion to the province, which helps to fund key public services like health care and education.

Delays in the procurement processes for private sector service providers for gaming and lottery have impacted the timelines for increased NPP from modernization.

2015-16 was an exceptional year for OLG NPP with projections of over $150M more than Budget 2015, mainly due to increased sales revenue from national lottery tickets (Lottomax, Lotto 6/49). NPP in 2016-17 is expected to decrease slightly in comparison, as lottery sales and resulting revenues return to more normal levels.

Q: Why is net profit to the province higher in 2015-16 compared with projections in Budget 2015?

A: Revenue from national lotteries (Lottomax and Lotto 6/49) is higher than was projected in Budget 2015, primarily due to a higher number of large jackpots. More large jackpots led to higher sales revenues.

Q: Is funding to hospitals being reduced by $107M in 2016-17 as a result of OLG's projected lower net profit to the province?

A: Revenue generated by OLG is paid into the province's Consolidated Revenue Fund (CRF). Allocations to the Ministry of Health and Long-Term Care (MOHLTC) are made from the CRF. OLG revenues targeted for health care only amount to 3% of MOHLTC's $52B budget.

Fluctuations in OLG's revenues do not impact health care funding levels or projections.

OFFICE OF ECONOMIC POLICY

Q: Will the 30% Off Ontario Tuition grant still be available or has it been eliminated?

A: The government will create a single major upfront grant — the Ontario Student Grant (OSG) starting in the 2017–18 school year by redirecting 100 per cent of the funding from the 30% Off Ontario Tuition grant and other grants offered by OSAP. This will make the student financial assistance system more progressive, effective and transparent for students and their families. The changes will provide students who have the greatest need for financial assistance with better access to grants upfront, when they need them.

The additional revenue from the proposed discontinuation of the tuition and education tax credits would be reinvested to support the OSG or other postsecondary, education, training and youth job programs.

Q: What evidence do you have that Ontario's economy is performing better than Canada's?

A: Ontario became one of the fastest growing provinces in 2014 and 2015, and private-sector economists expect this will continue until at least 2017.

On an annual basis, Ontario's real GDP increased by 2.7 per cent in 2014, strengthening from growth of 1.3 per cent in 2013 and outpacing the national average for the first time since 2002.

After a slow start to 2015 when the economy was affected by a number of temporary factors including unusually harsh winter weather, closure at auto plants for retooling, and a west coast port strike affecting exports, Ontario's economic growth gained pace in the second and third quarters of 2015, with real GDP advancing 0.4 per cent and 0.9 per cent, respectively. Ontario's economy outpaced the Canadian economy in all three quarters in 2015.

Q: Over the last 18-months there has been a significant shift in the global economic environment. Why do you remain positive about Ontario's economic prospects?

A: There have been significant shifts in the external economic environment over the past year and a half. Growth has slowed in emerging economies, commodity prices have fallen dramatically, and the Canadian dollar has weakened. This has shaken business confidence and left Ontario households unsure about the ultimate impact on their budgets and spending plans.

Yet, overall, Ontario is expected to benefit from the shifting global economic environment. Growth in the U.S., our largest trading partner, is expected to remain solid. As well, the more competitive Canadian dollar provides additional lift to our

exporters. Finally, Ontario is an oil-importing province which means consumers and businesses are benefitting from low oil prices. These factors provide an increasingly compelling case for increased business investment and will help support continued solid economic growth in coming years.

FINANCIAL SERVICES POLICY DIVISON

Q: What is the government's reaction to the preliminary policy recommendations released by the Expert Committee to Consider Financial Advisory and Financial Planning Policy Alternatives?

A: It would be premature for the government to comment at this time on the preliminary policy recommendations.

The independent Expert Committee to Consider Financial Advisory and Financial Planning Policy Alternatives released their preliminary policy recommendations in April 2016 as a means of facilitating further input from stakeholders and the public. The expert committee is seeking feedback through written submissions and an across-the-province public consultation process.

The Government expects the expert committee's final report in fall 2016 and will consider their recommendations at that time.

Q: Both the City of Ottawa and City of Toronto staff reports on vehicles for hire recommend minimum insurance requirements for drivers involved in ride-sharing. What are you doing to make sure that insurance is in place?

A: The sharing economy is changing the way transportation services are provided in Ontario. The government is committed to ensuring that Ontario's auto insurance system can help provide peace of mind to those offering and using these new types of transportation services.

Ontario's competitive market for auto insurance is already responding and adapting. FSCO has received filings from different companies proposing new auto insurance products tailored to the sharing economy, and in January FSCO approved one product allowing individual drivers to purchase coverage.

Other proposals are currently being reviewed by FSCO. While this work is proceeding, the reality is that there continues to be a significant insurance coverage gap.

The government is committed to protecting Ontario drivers and consumers by addressing that gap, and FSCO is aware of the importance to the government of achieving this objective as quickly as possible.

Towards that end, the government and FSCO are exploring how Ontario's flexible insurance regulatory system can quickly approve new insurance products. Using such flexible responses would allow new products to be introduced in the market while the government, working with the regulator and the insurance industry, develops the legislative and regulatory changes necessary to fully integrate the sharing economy into Ontario's auto insurance system.

Q: Some media reports have been sceptical about the public timelines for launching the Cooperative Capital Markets Regulatory System (CCMR). When is the CCMR expected to be established and operational?

A: The participating jurisdictions have agreed to target the enactment of legislation by June 30, 2016 and the Capital Markets Regulatory Authority becoming operational in the fall of 2016.

These timelines will be challenging given the need for the enactment of legislation by multiple legislatures. The participating jurisdictions are committed to moving forward with this initiative and market participants should take comfort that we will take the time necessary to ensure a successful launch of the Cooperative System. We will work to ensure a smooth transition to the new system for market participants and their businesses.

PROVINCIAL LOCAL FINANCE DIVISION

Q: What is the government doing to support municipalities?

A: Our government has a strong record of supporting and working with municipalities.

In 2016 alone, municipalities will benefit from over $3.8 billion in ongoing support through the Ontario Municipal Partnership Fund (OMPF), provincial uploads and other provincial initiatives – an increase of $2.7 billion above the support provided in 2003.

The government will continue to fulfill its commitment to upload social assistance benefit programs as well as court security and prisoner transportation costs off the property tax base. This will ensure that municipalities have more property tax dollars to invest in local priorities like roads, transit and economic development.

In partnership with communities, Ontario is making significant investments to revitalize infrastructure and grow the economy. The Province's infrastructure commitments include:

- Transit, transportation and other priority infrastructure through *Moving Ontario Forward* that is supported by $31.5 billion in dedicated funds, with about $16 billion available within the Greater Toronto and Hamilton Area (GTHA) and about $15 billion available outside the GTHA.
    - As part of *Moving Ontario Forward*, the Ontario Community Infrastructure Fund is being expanded to $300 million per year by 2018–19, which will provide ongoing support for critical local infrastructure priorities.
- Introducing a new Connecting Links program that will provide $20 million in 2016-17, up from $15 million announced in the *2015 Budget,* to help municipalities pay for construction and repair costs for municipal roads that connect two ends of a provincial highway through a community or to a border crossing. Funding for this program will increase to $30 million per year by 2018-19.

In addition to implementing the provincial uploads, the Province has worked in partnership with municipalities to introduce measures that support communities. These include:

- Sharing provincial gas tax revenues;
- Unconditional funding through the Ontario Municipal Partnership Fund;
- Long-term funding through the Ontario Community Infrastructure Fund;

- Connecting Links program;
- Developing a fair and equitable Ontario Provincial Police billing model;
- Working with municipalities to enhance the fairness, effectiveness and predictability of the Ontario's property tax and assessment system;
- Consulting with municipal partners through the Memorandum of Understanding with the Association of Municipalities of Ontario, as well as other forums;
- Undertaking an integrated review of the Municipal Act, the City of Toronto Act and the Municipal Conflict of Interest Act.

Q: Will the Ontario Municipal Partnership Fund (OMPF) be further reduced beyond 2016?

A. During our consultations, municipalities have been clear that the OMPF is an important unconditional funding program for many municipalities.

The Ontario Municipal Partnership Fund (OMPF) will continue to provide unconditional support to municipalities in 2016 and beyond. In 2016, the phase-down of the OMPF is complete, and the design of the core grants now reflects the long-term objectives of the program.

At this time, there is no plan to further reduce the OMPF.

It is also important to note that as announced in the *2015 Ontario Budget*, the OMPF has been increased by an additional $5 million in 2016, bringing the total OMPF envelope to $505 million rather than the $500 million previously planned for 2016. This additional funding is being provided through the Northern Communities Grant of the program to further recognize the challenges of northern municipalities.

Q: In the 2014 Budget, the Province announced that payments to municipalities under the Power Dam Special Payment Program would be reduced. What is the status of this phase-down?

A: The 2014 Budget announced a plan to phase down the program over three years, ensuring that more than 75% of the current funding level is maintained.

However, the phase-down reductions for 2015 and 2016 were deferred in light of consultations and analysis that were underway to consider alternative options to the phase-down, including the re-introduction of property taxation for power dams.

As announced in the 2016 Budget, following extensive review and consultations on this program, the Province has confirmed that stable funding to municipalities with respect to currently-eligible hydroelectric generating stations will remain in place for 2017 and future years.

OFFICE OF THE BUDGET

Q: The Ontario budget states that new federal funding has been included in the fiscal outlook based on 'prudent assumptions' about new transfers, but the federal government has not said how much Ontario will receive. What are these prudent assumptions and how much new federal money is counted in this budget?

A: The 2016 budget continues the government's plan to build Ontario up and deliver on its priority of growing the economy and supporting job creation. Ontario's plan includes investing in people's talents and skills, as well as making the largest investment in public infrastructure in the province's history.

Ontario and the federal government share common goals, common values and have the same priorities. The federal government has recognized that coordinated and collaborative action is needed to address the issues facing Ontarians and Canadians. And the Province is ready to work with a federal partner to build on Ontario's investments and welcomes federal support for Ontario's plans in areas that matter to Ontarians and Canadians.

The 2016 Ontario budget included some prudent assumptions about what new revenue Ontario could expect from the federal government based on what was in the federal government's election platform. Even the Financial Accountability Officer (FAO) indicated these assumptions were prudent.

For instance, the federal government has committed to $60 billion in new infrastructure funding over 10 years. The Province welcomes this new commitment to build on existing programs and provide both immediate infrastructure investments and longer-term funding to support shared infrastructure priorities, and is working with the federal government to secure its per capita share.

More information will become available in the coming months as the federal government rolls out the details of its various plans around infrastructure, climate change and skills training.

While in some cases, federal measures have already been included in Ontario's fiscal plan, the full extent of the impact of these measures must be analyzed when more details of federal proposals are released.

This is particularly true of infrastructure, where both levels of government are making significant fiscal commitments.

Q: Will cap-and-trade impact the Province's bottom line?

A: The government is committed to dedicating all proceeds from the auctioning of allowances under the cap and trade program to fund GHG-emissions reduction initiatives – which would help Ontario meet its 2020 and 2030 emissions reduction targets.

The fiscal plan included in the 2016 Budget reflects this commitment.

The medium-term revenue outlook includes projected cap-and-trade proceeds from the auctioning of carbon allowanced beginning in 2017. The current estimate for proceeds is:

$478 million in 2016-17; and

Between $1.8 billion and $1.9 billion annually starting in 2017-18.

The government has already taken an important step towards investing cap-and-trade proceeds with the investment of $325 million in 2015-16 through a new Green Investment Fund.

For spending of cap and trade proceeds in 2016-17 and beyond, the government is still working out the details which is subject to the enabling legislative framework that's currently under review by the Legislature – any changes to the legislation could impact the potential areas of investment that are eligible for funding from cap and trade proceeds.

Moving forward, Ontario's approach to the investment of cap-and-trade proceeds will be both balanced and strategic, focusing on initiatives where the opportunity for emissions reduction and sustainable economic growth is greatest.

The fiscal plan reflects the most recent information available at the time of the Budget, including the impact of new initiatives announced as part of the Budget. The government recognizes that different factors could affect the Province's outlook for revenue and expense. That is why the fiscal plan incorporates prudence – to protect the fiscal outlook against these potential adverse changes.

The fiscal plan incorporates a reserve, set at $1.0 billion in 2016-17, $1.1 billion in 2017-18 and $1.2 billion in 2018-19.

It also includes contingency funds to help mitigate expense risks that may otherwise adversely affect Ontario's fiscal performance.

Q: Is the Government using Asset Optimization Revenues to balance the Budget?

A: The government's plan to eliminate the deficit does not depend on the revenues from asset sales. Maximizing the value of these assets is part of the government's economic plan for Ontario.

In fact, the government is taking deliberate and responsible steps to achieve its goal of balancing the budget in 2017-18. Ontario's plan to eliminate the deficit is centred on transforming government and managing costs, and ensuring revenue integrity and addressing the underground economy.

Under the *Trillium Trust Act*, *2014,* all net revenue gains from the sale of designated assets are to be credited to the Trillium Trust to help fund further investments in public transit, transportation and other priority infrastructure as part of the Moving Ontario Forward initiatives.

The asset optimization target will help support the largest infrastructure investment in the province's history.

Q: Is the government restricting the ability of the FAO to access Cabinet Confidential documents?

A: No, the government is acting in accordance with the governing legislation that was approved by all three parties.

As per Section 12(2) of the *Financial Accountability Officer Act* (FAOA), a ministry or public entity is prohibited from disclosing to the Financial Accountability Officer (FAO) a record "described in subsection 12(1) of *the Freedom of Information and Protection of Privacy Act*" (FIPPA). Section 12(1) of FIPPA prohibits the release of any record that would reveal the substance of deliberations of the Executive Council or its committees.

In the end, the primary purpose of subsection 12(1) of FIPPA is to protect the deliberations or future deliberations of Cabinet. As a result, the section prohibits the disclosure of both existing records as well as any newly created records that would reveal those deliberations.

Q: What is the government's plan to hold average annual growth in program expense to 1.9% going forward? Given that this is below inflation, what programs are being cut?

A: Program expense is projected to grow at an average annual rate of 1.9 per cent between 2014-15 and 2018-19. This reflects the government's commitment to invest in priority areas to enhance public services, support economic growth and a low-carbon economy, and create jobs. [Ch. 3B, Pg. 29]

A key pillar of Ontario's plan to eliminate the deficit is transforming government and responsibly managing spending. [~Ch. 2A, Pg. 3] The government is achieving this through Program Review, Renewal and Transformation (PRRT) – a new approach to fiscal planning and expenditure management this is designed around four key principles:

- Examining how every government dollar is spent;
- Using evidence to inform better choices and improve outcomes;
- Looking across government to find the best way to deliver services; and
- Taking a multi-year approach to find opportunities to transform programs and achieve savings. [~Ch. 2B, Pg. 3]

PRRT is about more than saving money – it is a continuous planning approach focused on improving outcomes for government programs and services to ensure they are effective, efficient and sustainable. [Ch. 2B, Pg. 3]

Through cross-ministry horizontal collaboration, the government is taking focused action on major transformation and efficiency initiatives that will improve outcomes for Ontarians while helping to free up resources to invest in key priorities, such as health care and education. [Ch. 2B, Pg. 7]

The *2016 Budget* outlines progress on and expected outcomes of these major transformation and efficiency initiatives.

Q: Compared to the 2015 Budget, program spending is higher in each year. How is the government going to balance when spending is up?

A: Compared with the *2015 Budget*, program expense is projected to be $1.6 billion higher in 2016-17 and $4.2 billion higher in 2017-18. [Ch. 3B, Pg. 32]

These changes primarily reflect:

- Projected emissions reduction initiatives offset by cap-and-trade revenue;
- Small changes to Moving Ontario Forward projects;
- Adjustments for changes in demand and demographics across many programs; and
- Other investments in infrastructure. [Ch. 3B, Pg. 32]

These investments will help enhance the public services that Ontarians rely on, as well as stimulate economic growth to generate revenues on the path to balance. [~Ch. 2A, Pg. 3]

The government remains dedicated to a fiscally sound approach to managing the Province's finances, and to balancing the budget by 2017-18. The government is taking deliberate and responsible steps to achieve that goal. [~Ch. 2A, Pg. 3]

The government is projecting deficits of $5.7 billion in 2015-16 and $4.3 billion in 2016-17 – improvements of $2.8 billion and $0.5 billion compared with the 2015 Budget forecasts. [~Ch. 2A, Pg. 4, 5]

With the economy expected to continue to growth, and the Province's ongoing commitment to transform government programs and services, Ontario is projecting to return to balance in 2017-18 and remain balanced in 2018-19. Achieving balance will put net debt-to-GDP on a declining track. [~Ch. 2A, Pg. 5]

Ontario's plan to eliminate the deficit includes: [2A, Pg. 3]

- Transforming government and responsibly managing spending; and
- Ensuring revenue integrity and addressing the underground economy.

Q: The government is reporting overachievement on its annual deficit target for the 7th year in a row. How is this possible? Is the government purposely setting easy targets?

A: The government is projecting a deficit of $5.7 billion in 2015-16, an improvement of $2.8 billion compared with the *2015 Budget* forecast. It is also a $4.6 billion improvement compared with the 2014-15 deficit of $10.3 billion. This represents the Province's largest year-over-year reduction in the deficit in the last five years. [Ch. 2A, Pg. 4]

The overachievement in 2015-16 is mainly due to total revenue projected to be $2.2 billion above the *2015 Budget* plan, due to higher revenue from asset optimization in 2015-16, higher taxation revenues and stronger overall performance from Government Business Enterprises (GBEs). [~Ch. 3B, Pg. 4]

It is also the result of $0.2 billion in lower interest on debt expense, from lower-than-forecast interest rates, the lower forecast deficit and cost-effective debt management. [~Ch. 3B, Pg. 4]

Ontario's program expense is projected to be $0.4 billion higher than outlined in the *2015 Budget*, but consistent with the forecast laid out in the *2015 Ontario Economic Outlook and Fiscal Review*. This is primarily due to the $325 million down payment through the Green Investment Fund. [~Ch. 3B, Pg. 4]

The *2015 Budget* included a $1.0 billion reserve for 2015-16. In the *2016 Document*, the 2015-16 interim outlook maintains a $150 million reserve to protect the fiscal plan against any potential adverse changes that may occur before year-end. [~Ch. 3B. Pg. 5]

The government's fiscal targets are based on the best available economic and fiscal information at the time. They reflect a realistic and responsible plan to manage the Province's resources, while still protecting the vital services that Ontarians rely on. [Framework]

TAXATION POLICY DIVISION

Q: How many students will be affected when the tuition and education tax credits end?

A: About 1 million students are expected to report that they attended studies in 2015 that qualified them for tuition and education tax credits. About 800,000 attended full time studies, and about 200,000 attended part-time studies.

Q: Will everyone who loses their tax credits get back the money through the new student grant?

A: Currently, tax credits go to a larger group of students than those eligible for OSAP. The grant design has not been finalised. The government will announce details of the new program later this year.

Q: Why are you cutting R&D Tax Credits (i.e. OITC and ORDTC) when you say you want to support innovation?

A: Research and Development remains a key priority for the government. That is why the government is reinvesting savings from the proposed R&D tax credit changes into new targeted investments across key sectors of Ontario's economy.

The government is investing $35 million over five years towards establishing the Advanced Manufacturing Consortium; $20 million over three years to partner with Colleges to tackle industry challenges through innovation projects; and $50 million over five years in world-leading research at the Perimeter Institute.

Through the province's Business Growth Initiative, the government will continue to examine ways to encourage R&D investment in Ontario, increase the commercialization of research and better support export activity.

TAX AND BENEFITS ADMINISTRATION

Q: Why are Bad Debt Expenses increasing from approximately $46.7Million (2014-2015 Actuals) to $90Million (2015-2016 interim actuals)?

A: In recent years, the Ministry of Finance has uncovered several large scale tax evasion schemes while conducting tobacco tax audits. As a result of these audits, there have been a number of large tobacco assessments which have proven to be problematic from a collectability standpoint. The increase of $58M above the 2015-16 Printed Estimates was primarily a result of these large tobacco tax assessments.

Q: Why is the Ministry of Finance seeking an increase of $13.2Million in its Bad Debt Expense allocation in 2016-17 (from $32Million to $45.2Million)?

A: The Ministry of Finance has uncovered several large scale tax evasion schemes while conducting tobacco tax audits. As a result of these audits, there have been a number of large tobacco assessments which have proven to be problematic from a collectability standpoint. It is anticipated that these assessments will continue in the 2016-17 year. These assessments will be uncollectible and as a result the ministry has requested a $13.2M internal ministry re-allocation to increase the Bad Debt Expense allocation in the 2016-17 estimates.

Q: How is Ontario supporting the sharing economy?

A: The government has taken action to begin supporting the development of a robust sharing economy, including announcing the creation of the Sharing Economy Advisory Committee, with representation from key ministries, to oversee the development and coordination of Ontario's approach to the sharing economy.

Further, in the 2016 Budget, the government announced a series of new measures, including:

- Working to ensure the province's auto insurance system can help provide peace of mind to those offering and using new types of transportation services through the sharing economy;
- Commencing consultation with industry and communities in spring 2016 on options to facilitate new and innovative choices for intercity passenger travel. The government will consult on a new regulatory regime to ensure safe and sustainable intercity passenger travel services;
- Piloting a program with Airbnb, a key sharing economy platform, to inform Ontarians who engage in home sharing about their consumer rights and responsibilities, and raise awareness of tax obligations; and

- Committing to consultations led by the Sharing Economy Advisory Committee, and focussed on the sharing economy, to help determine the best approach for Ontario moving forward.

Q: Why has the government introduced more red tape for estate representatives?

A: Following a 2011 Budget commitment to enhance EAT compliance, the Ministry of Finance (MOF) is collecting information needed to perform audits and verify that correct amounts of the tax have been paid. Effective January 1, 2015, estate representatives are required to submit an Estate Information Return with MOF to substantiate the total estate value provided to the courts. This new requirement does not alter the amount of tax payable or how the tax is calculated. An Estate Information Return is only required where an Estate Certificate has been applied for and issued by the courts.

Q: Has the government seen an increase in the Estate Administration Tax collected since January 1, 2015?

A: Tackling tax avoidance remains a key strategy as part of a robust and transparent administration process. The requirement to file an Estate Information Return (EIR) came into effect on January 1, 2015, for all applications made for an Estate Certificate on or after this date. Therefore, the first EIRs did not become due until the spring of 2015. In addition to verifying and auditing selected files, MOF continues to respond to written enquiries, telephone calls, and provide outreach activities to estate representatives and the legal profession to raise their awareness and understanding in meeting their obligations with respect to the Estate Administration Tax Act.

Q: What is the government doing to address Aggressive International Tax Planning?

A: All corporations should pay their fair share of taxes. That is why Ontario, in conjunction with the federal government, has taken substantive actions to help better address aggressive corporate tax avoidance. For example, under a fee-for-service agreement with the Canada Revenue Agency, Ontario invests in audit activities targeting aggressive international tax planning and the underground economy.

With Ontario's significant investment the Canada Revenue Agency was able to increase overall audit coverage rates, further reinforcing the integrity of the tax system. The government's agreement with the federal government to address non-compliance with federally administered provincial taxes through ongoing enhanced compliance-focused measures, including those that address the underground economy and aggressive tax planning has generated over $630M since 2013-14.

Q: What is Ontario doing to address the underground economy?

A: The government has made progress in fighting underground economic activities through:

Ongoing enhanced compliance-focused measures, including those that address the underground economy and aggressive tax planning, the Province has generated over $930 million to date - a $330 million increase over what was reported in the 2015 Budget;

Consultations with high-risk sectors, with a view to partnering with industry and gaining insight into how best to tackle the underground economy;

Requiring corporations to demonstrate federal and provincial tax compliance before receiving government contracts. Since February 2014, the government has verified compliance with tax obligations for more than 2,200 contracts; and

Amending the Taxation Act, 2007, to make the sale, use or distribution of electronic sales suppression devices an offence.

Taking specific actions in response to Parliamentary Assistant Laura Albanese's consultation with the residential construction industry, including:

Extending the residential roofing pilot project for an additional two years and examining opportunities to expand its scope beyond roofing to other areas of residential construction;

Launching a public awareness campaign to educate the public on the risks and potential liabilities associated with participation in the underground economy;

Dispatching specialized audit teams to focus on sectors that are at high risk of underground economy activity, in partnership with the Canada Revenue Agency;

Proposing legislation that would enhance information sharing, enable greater enforcement, and introduce additional penalties for participation in the underground economy; and

Helping home owners hire legitimate contractors when taking advantage of government-funded rebates for enhancing the energy efficiency of their homes.

ORPP ADMINISTRATION CORPORATION

Q: Why is the government providing the ORPP AC with a loan?

A: The ORPP AC is the independent, arms-length organization that will set-up and administer the ORPP.

The government is providing the ORPP AC with a repayable loan for essential work required to develop administrative systems, recruit a skilled team and launch the employer verification and enrolment process in 2017 and begin collection of contributions on January 1, 2018.

Ongoing costs to administer the ORPP would come from the plan, not from government revenues.

The ORPP AC is expected to repay the loan, with interest, from plan assets within a 10-year period.

Q: How much money is being loaned?

A: The government is providing flexibility for the ORPP AC to draw down based on operational requirements, up to $400M over three fiscal years. Costs would cover set-up expenses, including organizational start-up, development of tools/systems required for the verification and enrolment process, and the build/launch of administrative systems.

The government will monitor spending of the ORPP AC, while giving the Corporation the independence and flexibility it requires to administer the ORPP.

Accountability is at the core of the ORPP. Through a strong accountability and transparency framework, the independent Board of Directors and ORPP executives will be fully accountable to the plan's members. This framework has been benchmarked against the best practices of other leading independent pension plans.

Accountability measures include:

- An annual report tabled in the Legislature;
- Annual meetings for members;
- A publicly available Memorandum of Understanding; and,
- External auditing and strong financial controls.

Q: In the 2016/17 estimates, it shows a loan amount of up to $240M. How is that money going to be used?

A: This year (2016) is a critical period for the ORPP AC, with the launch of the employer verification/enrolment process and the building of systems needed to begin collecting contributions on January 1, 2018.

If pressed for more information: Further questions regarding ORPP AC expenditures can be directed towards the Administration Corporation.

ORPP IMPLEMENTATION SECRETARIAT

TOP 5 QAs

Q: How much has been spent on the ORPP Implementation Secretariat (ORPPIS) to date?

A: The Ministry is currently in the process of closing its books. The final expenditures for the ORPP IS will be included in the government's Public Accounts for 2015-16. The current $20M projection addresses costs associated with staffing and other related costs for the ORPP IS.

With regards to Other Direct Operating Expenditures (ODOE), the majority of expenses incurred by ORPP IS relate to the costs of services provided by third party vendors in areas where expertise external to government were required, such as actuarial analysis, legal advice and expert technical advice for the pension administration.

Approximately $5.5 million will be recovered from the Administration Corporation for expenditures directly related to the administration of the plan.

Q: Why does the Ministry's direct spending for ORPP decrease by $12.5M in 2016-17?

A: The Ministry, through the ORPP IS, continues to lead the implementation of the ORPP. Now that the ORPP Administration Corporation has been established, operational work has transferred to the Corporation, thus decreasing funding requirements for the Secretariat.

Funding for the ORPP IS in 2016-17 will support the development of regulations for the ORPP Act, 2016, as well as legislation to create the Office of the Chief Actuary and oversight responsibilities related to the ORPP Administration Corporation.

Q: Why is the government providing the ORPP AC with a $240M loan in 2016-2017?

A: The ORPP AC is the independent, arms-length organization that will set-up and administer the ORPP.

The government is providing the ORPP AC with a repayable loan for essential work required to develop administrative systems, recruit a skilled team and launch the employer verification and enrolment process in 2017 and begin collection of contributions on January 1, 2018.

Ongoing costs to administer the ORPP would come from the plan, not from government revenues.

The ORPP AC is expected to repay the loan, with interest, from plan assets beginning in 2019. The loan will be repaid by 2027.

If pressed about the terms of the loan:

The loan to the ORPP AC has been made on commercial terms. This includes the government's cost of borrowing plus a small margin of additional interest (25 bps).

Q: In total, how much is the government loaning the ORPP AC for set-up expenses?

A: The government is providing flexibility for the ORPP AC to draw down the loan based on operational requirements, up to $400M over three fiscal years. Costs would cover set-up expenses, including organizational start-up, the development of tools/systems required for the verification and enrolment process, and the build/launch of administrative systems.

The government will monitor the ORPP AC's spending, while giving the Corporation the independence and flexibility it requires to administer the ORPP.

Future administrative costs associated with the ORPP would be funded from member contributions and investment returns.

Q: In addition to the current costs and the loan to ORPP AC, how much money will it cost to implement the ORPP? Are we talking billions?

A: From the outset the government has said that it is committed to cost-effective and efficient administration of the ORPP that leverages existing expertise in Ontario's pension and financial services sector.

The ORPP AC will benchmark its administration costs to Canada's leading pension organization.

It would be premature to estimate the cost of implementing all components of the ORPP.

Q: Isn't the federal government helping to administer the ORPP?

A: The government is continuing to have discussions with federal government departments on the possibility of cooperation in administering the plan. This is in addition to the exploring and assessing different options, including leveraging infrastructure that exists within the Government of Ontario and exploring third-party private sector delivery through a procurement that is currently underway.

Running a modern pension plan is not simple and so the government continues to explore multiple options. In fact, it may make sense to work with several partners to support effective administration of the plan.

Q: Who pays for the ORPP start-up costs if the CPP is enhanced and the plan is never implemented?

A: The government's intention is that eligible start-up costs it incurs would be recovered from the plan.

If those circumstances arise, however, it means that there is an agreement on a CPP enhancement that will address the retirement security challenges facing Ontarians. That has always been the government's objective.

By continuing with preparations for the ORPP, the government is ensuring that, if no consensus on CPP enhancement is reached, retirement security can be strengthened in Ontario through the ORPP.

Loan Agreement with the ORPP Administration Corporation

Q: How much money is being loaned?

A: The government is providing flexibility for the ORPP AC to draw down based on operational requirements, up to $400M over three fiscal years. Costs would cover set-up expenses, including organizational start-up, development of tools/systems required for the verification and enrolment process, and the build/launch of administrative systems.

The government will monitor spending of the ORPP AC, while giving the Corporation the independence and flexibility it requires to administer the ORPP.

Accountability is at the core of the ORPP. Through a strong accountability and transparency framework, the independent Board of Directors and ORPP executives will be fully accountable to the plan's members. This framework has been benchmarked against the best practices of other leading independent pension plans.

Accountability measures include:

- An annual report tabled in the Legislature;
- Annual meetings for members;
- A publicly available Memorandum of Understanding; and,
- External auditing and strong financial controls.

Q: In the 2016/17 estimates, it shows a loan amount of up to $240M. How is that money going to be used?

A: This year (2016) is a critical period for the ORPP AC, with the launch of the employer verification/enrolment process and the building of systems needed to begin collecting contributions on January 1, 2018.

Q: How much of the loan has been drawn down to date? What has that money been used for?

A: $26 million has been drawn down to date.

The money has been used to fund essential start-up requirements for the ORPP AC. This includes contracts for expert services required to administer and operationalize the ORPP (e.g. organizational start-up, legal services, technical experts) and initial recruitment of staff.

Q: Is this money being spent on high salaries? What is the compensation framework for the ORPP AC?

A: The independent initial board of directors of the ORPP AC is responsible for establishing the Corporation's compensation framework.

Salaries would be benchmarked to other leading pension plans in Ontario to ensure that the ORPP AC is able to recruit essential talent.

The compensation of the top five executives, including the CEO, will be reported on an annual basis in the ORPP AC's Annual Report. This is in line with the best practices of Ontario's leading pension plans.

If pressed for more information: The ORPP AC has hired external advisors to assist with the compensation framework.

Q: Does the government expect to be repaid?

A: Yes, the repayable loan is structured on commercial terms. This means that it includes repayment obligations, with interest, over an established period of time.

Q: What would be the cost to government if the ORPP is cancelled after it launches?

A: The government is providing flexibility for the ORPP AC to draw down the loan based on operational requirements, up to $400M over three fiscal years. Costs would cover set-up expenses, including organizational start-up, development of tools/systems required for the verification and enrolment process, and the build/launch of administrative systems. Future ORPP administration costs would be funded from member contributions and investment returns.

The government's intention is that all eligible start-up costs it incurs would be recovered from the plan. The level of contributions collected, benefits owed and investment returns at the time of cancellation will determine the net cost of the cancellation.

Q: How is the repayment schedule structured? Will it be charged interest?

A: The ORPP AC has an obligation to repay the loan, principal and interest, within ten years.

This repayment period will help ensure that payments do not negatively impact plan sustainability. It is intended that the ORPP AC repay the loan from investment returns to make sure that contributions and benefits are reserved in trust for members.

Q: Why doesn't the ORPP AC get a traditional bank loan?

A: The repayable loan is structured on commercial terms. This was the appropriate vehicle given the ORPP AC would not have assets until contributions begin in 2018.

Q: Will there be any public reporting or accountability to how the loan is spent?

A: The loan to the ORPP AC is structured on commercial terms and will be repaid with interest. Actual expenditures from the loan will be reported through public accounts.

In addition, the ORPP AC is required to develop and publicly release an annual report, which would include financial statements of the Corporation. The report will also include compensation for the top five executive positions.

Accountability is at the core of the ORPP. Through a strong accountability and transparency framework, the independent Board of Directors and ORPP executives will be fully accountable to the plan's members and to government. This framework has been benchmarked against the best practices of other leading independent pension plans.

Q: What types of costs will the loan be used to pay?

A: The repayable loan will be used to fund set-up expenses, including organizational start-up, development of tools/systems required for the verification and enrolment process (e.g. software licencing, hardware and technical writing), and the build and initial operation of administrative systems.

The loan will not be used to fund ongoing plan operations or investments.

Q: How much money has the ORPP AC spent on the services of consultants?

A: The ORPP AC has obtained expert services required to administer and operationalize the ORPP (e.g. organizational start-up, legal services, technical experts).

The government and the ORPP AC are committed to leveraging the expertise and experience of the industry and the financial sector to deliver a simple, reliable and cost-effective plan.

If pressed for more specifics: The ORPP AC procures goods and services based on a policy that was benchmarked against government and other leading pension plans.

Q: How does the loan relate to administration costs of the ORPP?

A: The ORPP will be one of the largest pension plans in the Canada. At maturity, the ORPP is expected to have over 4 million members, involve nearly 450,000 employers and collect more than $6 billion annually.

The government is committed to a simple, reliable and cost effective administration. This includes leveraging the strong, existing capabilities found in Ontario's pension and financial services sector and benchmarking ORPP administration costs against Canada's leading pension organizations.

We are continuing to have discussions with federal government departments on the possibility of cooperation in registration and administering the plan. This is in addition to the exploring and assessing different options, including leveraging infrastructure that exists within the Government of Ontario and exploring third-party private sector delivery.

Q: What is the ORPP Administration Corporation?

A: The ORPP Administration Corporation is the independent, arm's length organization that will administer the ORPP. Its responsibilities include:

- Enrolling eligible employers and employees;
- Collecting, investing and holding contributions in trust for members;
- Administering benefits; and
- Communicating with employers, members and other beneficiaries.

Q: What are the accountability mechanisms of the ORPP Administration Corporation? To whom does it report?

A: Accountability is at the core of the governance structure of the ORPP Administration Corporation. Through a strong accountability and transparency framework, the independent board of directors and ORPP executives will be fully

accountable to the plan's members. This framework mirrors the best practices of other leading independent pension plans.

Accountability measures include:

- A Memorandum of Understanding being developed between the ORPP Administration Corporation and the Minister of Finance
- An annual report;
- An annual meeting for beneficiaries;
- External auditing and strong financial controls; and
- A review of the governance framework established by legislation within 10 years.

ORPP Implementation Secretariat

Q: Why is the ORPP IS still in place now that the ORPP AC has been established?

A: The Ontario Retirement Pension Plan Implementation Secretariat leads the policy, governance and legislative functions to establish the ORPP and supports the set-up of the ORPP AC.

Specific responsibilities include:

- Finalizing the plan design for the ORPP, including conducting analysis, developing policy options, preparing the plan text, developing a funding policy, conducting actuarial analysis, and drafting legislation.
- Leading discussions between governments with respect to ORPP implementation, including registration of the plan, data sharing agreement, and exploration of options for administration cooperation.
- Establishing and supporting the ORPP AC to ensure successful launch and implementation.
- Providing strategic communications and stakeholder engagement advice and services to support ORPP development and implementation.
- Developing an oversight function related to the ORPP, including monitoring progress of deliverables and achievements.

Q: Why did the government spend an additional $6 million than was estimated last year? Is this another example of the government overspending on consultants?

A: Implementing the ORPP is one of the government's top priorities and involves very aggressive timelines. The government continues to drive forward plan implementation to ensure this priority is delivered in timely manner. Implementation activities include acquiring third party vendors to deliver expert services in the areas of actuarial analysis, legal advice and expert technical advice for the pension administration.

Timely and thoughtful procurement of these services is critical to ensure all milestones are met and registration of employers can begin in 2017. The costs associated with operational procurements will be reimbursed by the ORPP AC.

Approximately $5.5 million will be recovered from the Administration Corporation for expenditures directly related to the administration of the plan.

Federal Collaboration

Q: On one hand you say you are launching the ORPP in 2017, but then indicate that the collection of contributions won't start until 2018…which is it?

A: The ORPP implementation timeline has being modified. Employer verification will begin later in 2016 with enrollment of employers beginning in January 2017. This process will support a seamless transition to the collection of contributions starting on January 1, 2018 for large and medium size employers.

All other implementation dates remain the same. Contribution rates for employers without a registered pension plan will still be phased in as previously announced.

Many employer groups have called on the government to delay the launch of the plan to ensure a successful and smooth implementation, and allow a window to discuss a national solution. The government has modified the ORPP timelines to reflect this advice.

The government is on track to ensure that all eligible Ontario workers are enrolled in a comparable workplace plan or the ORPP by 2020.

ORPP Phase-In and Contribution Schedule (rates reflect contributions to be made by each employer and employee) Employer registration in the ORPP would begin on January 1, 2017.				
Type of Employer	Jan 1, 2018	Jan 1, 2019	Jan 1, 2020	Jan 1, 2021
Wave 1: large employers without registered workplace pension plans	**0.8%**	**1.6%**	**1.9%**	**1.9%**
Wave 2: medium employers without registered workplace pension plans	**0.8%**	**1.6%**	**1.9%**	**1.9%**
Wave 3: small employers without registered workplace pension plans	**0%**	**0.8%**	**1.6%**	**1.9%**
Wave 4: employers with registered pension plans that either do not meet the comparability test or do not cover all classes of employees	**0%**	**0%**	**1.9%**	**1.9%**

Q: Is the federal government committing to administer your plan if CPP talks fail?

A: Ontario is pleased with the cooperation and partnership it has received from the new federal government. They have agreed to facilitate ORPP plan registration and to enter into a data sharing agreement to support implementation. The federal government has also committed to working with Ontario to ensure effective plan administration.

Ontario has always stated that it is committed to a simple, reliable and cost effective administration of the ORPP. Partnering with the federal government on plan registration, data sharing, and exploring models of plan administration supports this objective.

However, running a modern pension plan is not simple and so other options for administration are being explored including within the broader public sector and in partnership with private sector vendors. In fact, it may make sense to work with several partners to support effective administration of the plan.

Q: Would Ontario support a CPP enhancement that is a universal program to all employers and employees?

A: In designing the ORPP it was clear that, even though two thirds of Ontarians are not members of a workplace pension plan, many employers do provide generous workplace pension plans.

With this in mind, the government developed the framework of a comparable plan – so that employers that provide a generous workplace pension plan would not be

required to contribute to the ORPP. This is a central part of the ORPP and reflects the objective of introducing the ORPP in a manner that doesn't adversely impact generous workplace pension plan arrangements that are already working well for employees and employers.

The Province's extensive consultations in developing the ORPP have helped to inform its view that a CPP enhancement must be timely and provide a level of adequacy and targeted coverage that is consistent with the ORPP. Ontario is bringing this insight to the national discussion.

The province is also listening to the federal government and the other provinces and territories, and reflecting on their perspective on a CPP enhancement.

Q: If the government is going to proceed with measures such as introducing legislation on ORPP plan design, are you even serious about discussing the CPP?

A: The government has always said a national solution to enhancing retirement security is the best way forward. It has also said that it is imperative to address the challenge of retirement security ***now***. It is a critical issue for the future well-being of Ontarians and the economy that cannot be delayed.

Minister Morneau has outlined an aggressive timeline to enhance the CPP, including achieving a consensus to move forward by June and a national agreement by the end of 2016. The province looks forward to these discussions.

Legislation

Q: What progress has the government made on the ORPP to date?

A: The government is on track to meet its objective that, by 2020, all eligible Ontario workers are covered by a comparable workplace plan or the ORPP.

The ORPP Administration Corporation is now established and the process to register the plan with the Canada Revenue Agency is well underway. Final elements of plan design will be enshrined in legislation this spring. 6.

Employer verification will begin later in 2016 with enrollment of employers beginning in January 2017. This process will support a seamless transition to the collection of contributions starting on January 1, 2018 for large and medium size employers. The additional time is also enabling national discussion on a CPP enhancement to proceed.

Q: Why introduce legislation now? Didn't you commit to ongoing national discussions on a CPP enhancement?

[Legislation tracking to be introduced April 14, 2016]

A: The government has been clear that about the need to enhance retirement security today. The problem cannot be left to some ambiguous future date. It is critical for the well-being of Ontarians and the economy that we take action now.

Ontario moved to create the ORPP after the previous federal government refused to discuss enhancing the CPP. Today, the circumstances have changed and Ontario is playing a leading role in discussing a national solution.

However, to successfully launch the ORPP plan preparations must continue alongside federal discussions to ensure that, no matter the outcome, Ontario will retire with enhanced security.

Moving forward with legislation will ensure that employers have the time they need to prepare for the ORPP.

Q: What will be included in upcoming legislation?

A: The government intends to introduce further legislation on the ORPP in the spring of 2016. The legislation will set out the comprehensive requirements of the ORPP, plan sustainability and the compliance and enforcement regime.

Further legislation in 2016 would establish an Office of the Chief Actuary to provide independent actuarial advice and valuations of the ORPP to government and the ORPP Administration Corporation.

Plan Sustainability

Q: What accountability mechanisms exist to ensure that plan members' benefits will be there for them when they retire?

A: Through extensive actuarial modelling, the government has designed the plan to be sustainable over the long term. To ensure continued plan sustainability, a formal funding policy would be established that provides for appropriate adjustments to be made to plan benefits and/or contributions.

Background

Q: What is the Ontario Retirement Pension Plan (ORPP)?

A: The ORPP is a mandatory provincial pension plan that is scheduled to launch on January 1, 2017, with employer and employee collections beginning in 2018.

The ORPP would:

- Include eligible employees who are employed in Ontario and not participating in a comparable workplace pension plan;
- Aim to replace 15 per cent of an individual's pre-retirement earnings up to maximum earnings threshold of $90,000 (in proposed 2017 dollars);
- Require eligible employers and employees each to contribute up to 1.9% of employee earnings
- Require benefits to be earned as contributions are made; and
- Be managed by the ORPP Administration Corporation – an independent, arm's length entity, which will be responsible and fully accountable for administration and investment in the best interest of plan members.

Q: Why is the ORPP needed?

A: Experts generally recommend that individuals aim to replace 50-70% of their pre-retirement income to maintain their standard of living in retirement. However, studies show that a significant number of Ontarians are concerned they will not have sufficient income in retirement.

Two-thirds of Ontario's workers do not participate in a workplace pension plan. Moreover, three-quarters of younger workers – aged 25 to 34 – do not participate in a workplace pension plan.

Q: What are the anticipated impacts of the ORPP on Ontario's economy?

A: The government commissioned the Conference Board of Canada to conduct a cost-benefit analysis on the economic impact of the ORPP that was tabled in the legislature in December. The report's conclusion is clear – accounting for all factors and opportunity costs, both consumers and the economy are better off under the ORPP. This is good news for Ontarians.

The report reiterates that in the long-term, the ORPP is expected to add over $39 billion to Ontario's economy by ensuring that future retirees have adequate retirement savings. It also notes the ORPP is a more cost-effective means of helping individuals save than traditional retirement savings vehicles.

The report does acknowledge a small, short-term impact to the economy. However, this impact is partially mitigated by reductions in employment insurance and WSIB premiums. As well, the government remains committed to taking measures today to strengthen the economy.

ORPP Advertising and Market Research Costs

Q: Why is the Government advertising the Ontario Retirement Pension Plan?

A: The ORPP is intended to provide a predictable source of retirement income for life, for millions of Ontarians. By 2020, every employee in Ontario will be part of either the ORPP or a comparable workplace pension plan.

The ORPP is a key pillar of the government's economic plan. It is important that Ontarians know where to get the most up-to-date information on the plan.

There is a lot of work that needs to happen between then and now. To build awareness of the ORPP ahead of its launch in January 2017, we have recently released ads about the ORPP on TV radio and digital platforms.

The government has a responsibility to raise awareness and communicate information about its programs and services.

These ads are meant to increase Ontarian's awareness of the ORPP, drive them to http://www.ontario.ca/orpp for more information and answer questions about the design and implementation of the plan.

Q: In 2015-16, how much did the ministry spend on the ORPP campaign (including advertising, marketing and market research)?

A: In total, $6,614,987 was spent on the ORPP advertising campaign. Of this figure, $1,770,067 was spent on agency fees.

Media buying costs totalled $4,689,080. This amount will be recouped through the Bulk Media Buy. In total, $155,840 was spent on market research to provide benchmarking and tracking data, as well as creative feedback and insights for advertising and marketing purposes.

ONTARIO FINANCING AUTHORITY

Q: How does the Province plan to reduce its net debt-to-GDP ratio to its pre-recession level of 27 per cent?

A: Debt is incurred primarily for two reasons: to finance deficits and invest in capital assets. Ontario is making public infrastructure investments of more than $137 billion over the next 10 years, or about $160 billion over 12 years, starting in 2014–15.

One of the objectives of investment in capital is to improve the economic growth of the Province, supplementing GDP growth. As a result, the net debt-to-GDP ratio will come down more quickly than it would have without these investments in capital assets.

The government's plan therefore hinges on first balancing the budget, and continuing to make investments in capital assets which will add to economic growth, resulting in GDP growing more quickly than debt, and lowering the net debt-to-GDP ratio to our 27 per cent target.

Q: Ontario's debt has more than doubled since Premier McGuinty was first elected. When interest rates begin to rise, won't interest costs displace spending on the Government's priorities?

A: Ontario has a realistic plan to balance its budget while investments are made in the priorities of Ontario families – health care, education, the environment and infrastructure.

Investor demand has allowed the Province to extend the term of its debt in recent years and lock in low interest rates for a longer period. This term extension reduces the Province's refinancing risks and helps offset the impact of expected higher interest rates on its IOD costs. Since 2010, the province has borrowed $53.5 billion in the 30-year term.

The 2010 Budget forecasted that, by 2016–17, the Province would have to spend 11.7 cents of every revenue dollar received on interest. The current forecast is 2.7 cents lower, at 9.0 cents of interest costs for every dollar of revenue. This ratio is lower than it was in the 1990s, and is forecast to remain lower through the outlook period in 2018–19.

Q: How will the credit rating agencies respond to the 2016 Budget?

A: Ontario currently maintains a double-A rating with three of its four credit rating agencies. Ontario continues to outperform its deficit projections and is on track to a balanced budget by 2017–18. Moreover, Ontario's net debt-to-GDP ratio is expected to peak in 2015–16 at 39.6 per cent, remain unchanged in 2016–17, decline to 38.9 per cent in 2017–18 and 38.5 per cent in the 2018–19.

We met with the rating agencies following the 2016 Budget and expect to hear back from them over the next few months.

CORPORATE ELECTRICITY FINANCE DIVISION

Trillium Trust

Q: What's the current status of the funds in the Trillium Trust?

A: The Public Accounts of Ontario 2014-2015, published in September 2015, show that $1.35 billion has been dedicated to the Trillium Trust.

These are the net proceeds from the sale of the Province's remaining General Motors common shares in early 2015, combined with net proceeds from a September 2013 GM share sale and the redemption of preferred shares in late 2014.

Under the Trillium Trust Act, Hydro One shares have been designated as assets for which the net revenue gains from a sale are dedicated to the Trillium Trust. Once the Province has received all of the final financial inputs to fully assess and account for the net revenue gains associated with the Hydro One IPO, it will introduce a regulation to designate the net gain amount from the Hydro One IPO to be dedicated to the Trust and prescribe the other net revenue benefits resulting from Hydro One's recognition of a deferred tax benefit, to be dedicated to the trust.

Q: Since the Hydro One IPO was completed several months ago and now the government has announced a secondary share offering, why haven't you made any regulations to dedicate the fiscal benefits of the Hydro One IPO to the Trillium Trust? When will you make these regulations and when will we see these amounts in the Trillium Trust?

A: Under the Trillium Trust Act, Hydro One shares have been designated as assets for which the net revenue gains from a sale are dedicated to the Trillium Trust.

The determination of the net revenue gains related to the Hydro One IPO depends in part on Hydro One's audited, year-end financial statements. Hydro One released its 2015 Annual Financial Statements on February 12, 2016. Once the Province has received the financial information to fully assess and account for the net revenue gains, including the determination of a deferred tax benefit impact on the Province's net revenues, it will introduce regulations to designate the amounts to be dedicated to the trust.

Q: Why have no amounts been spent from the Trillium Trust yet, not even from the GM share gain amounts from 2014-15? And why are there only $1,000 in placeholder expenditure numbers for the Trillium Trust lines in Estimates?

A: The Province is on track to generate $5.7 billion in net revenue benefit from asset optimization to be dedicated to the Trillium Trust to help support investments in transit, transportation and other priority infrastructure projects under the $31.5

billion Moving Ontario Forward initiative over 10 years to create jobs, boost productivity and revitalize communities.

Like most large infrastructure investments, initial spending on Moving Ontario Forward projects such as GO Regional Express Rail is focused on planning, design, property acquisition and other activities to get projects construction-ready. The government plans to begin drawing down on the balance in the Trillium Trust starting in 2016-17, as it is expected that spending will ramp up significantly once this preliminary work is completed and construction activity is underway. This will allow for identification for cash flow timing requirements from the Trillium Trust during 2016-17 and subsequent years.

Q: When will the government actually be able to start using funds from the Trillium Trust to pay for transit and infrastructure?

A: The government plans to begin drawing down on the balance in the Trillium Trust in 2016-17 to support the largest investment in public infrastructure in Ontario's history. As the Moving Ontario Forward initiative was announced prior to Budget 2014, with incremental transit, transportation and other priority infrastructure projects, the expected timeframe for expenditures for these projects and drawdowns from the Trillium Trust are expected to happen over time, starting in 2016-17.

Based on planned expenditures, in 2016-17 the Trillium Trust would support Moving Ontario Forward initiatives, such as

- Regional Express Rail (RER);
- Hurontario Light Rail Transit (LRT); and
- Ontario Community Infrastructure Fund.
- *Asset Optimization*

Q: How much was raised from the Hydro One IPO?

A: From the November 2015 IPO and related share sales, the Province raised about $1.9 billion in gross proceeds before expenses and fees.

- In the November 2015 IPO, the Province sold 89,250,000 common shares at the IPO price of $20.50 per share for total gross proceeds to the Province of approximately $1.83 billion.
- Including other related share sales at the IPO price, the gross proceeds were $1.9 billion, including approximately $116 million in gross proceeds from shares sold to separate trusts established respectively by the Power Workers' Union (PWU) and the Society of Energy Professionals (SEP).

The determination of the net revenue gains from the gross proceeds depends on the finalisation of the book value of the shares sold at the time of the IPO and expenses and fees related to the IPO. The net gain from the November 2015 share sales is currently estimated at about $0.8 billion.

There are other associated benefits, aside from the sale of shares.

- An expected revenue benefit to the Province due to the revaluation of its fixed assets as a result of the IPO, resulting in Hydro One recognizing a deferred tax benefit. Based on the Prospectus, the Province communicated that it expected to realize a benefit of about $2.2 billion, which is subject to update and finalisation in Public Accounts.

- The Province also received cash (non-revenue benefits) of $1 billion in special payments from Hydro One, including $800 million in a special dividend paid prior to the IPO, and about $200 million in additional payments in lieu of taxes to the Ontario Electricity Financial Corporation (OEFC).

Q: What amount of proceeds will the Province receive from the secondary offering?

A: In this secondary offering, the Province has offered about 72.4 million common shares, or about 12 per cent of the common shares, at $23.65 per share, for total gross proceeds of approximately $1.7 billion

The Province has granted an option to the underwriters to purchase up to an additional approximately 10.86 million common shares, or just under 2 per cent of the common shares, which if exercised in full, would result in total gross proceeds of approximately $2 billion.

If the overallotment option is exercised in full, the Province will have sold 14% of its shares outstanding in this offering.

The government is committed to dedicating the net revenue gains from the secondary offering to the Trillium Trust. The *Trillium Trust Act, 2014* ensures that all net revenue gains from the sale of Hydro One shares will be credited to the Trillium Trust for investments in priority infrastructure projects.

[Net proceeds are currently estimated at about $0.5 billion based on the about 12% of shares offered in the base amount. If the over-allotment is fully exercised, the net proceeds are estimated at about $0.6 billion.]

Q: What was the process involved in selecting the underwriters involved for the secondary offering

A: RBC and Scotiabank were chosen as the co-lead underwriters for the secondary offering. These same two firms were chosen to lead the IPO underwriting through

a competitive and transparent process, overseen by Denis Desautels, the former Auditor General of Canada.

The price discount offered by the underwriters to purchase shares from the Province through the "firm commitment offering" was also very competitive, representing an approximate 2% discount compared to the closing trading price of Hydro One shares on April 5th. Underwriting fees of 1% for institutional investors and 3% for retail investors is significantly lower than what underwriters have typically earned on firm commitment offerings and consistent with the fees earned in the Initial Public Offering.

- Impact on Electricity Sector Dedicated Income

Q: Why is the interim Electricity Sector Dedicated Income (ESDI) $0 in 2015-16, and why is the forecast so low for ESDI in the 2016-17 Printed Estimates? Is this because of the Hydro One IPO reducing the Province's future revenues from Hydro One and reducing the amounts to pay for stranded debt?

A: The Hydro One IPO resulted in a significant upfront reduction in the stranded debt of the electricity sector.

For the year ended March 31, 2016, the IPO resulted in very large upfront payments to the Ontario Electricity Financial Corporation (OEFC) towards stranded debt. This included a total of $2.8 billion in departure tax and additional payments-in-lieu of taxes (PILs) paid by Hydro One to OEFC.

As these large amounts were expenses to Hydro One, they had a dollar-for-dollar impact on reducing Hydro One's estimated net income for 2015-16, partially offset by the deferred tax benefit impact on the Province's net income from Hydro One.

Because of these large payments to OEFC, this resulted in an estimated zero Electricity Sector Dedicated Income transfer to OEFC, as the combined net income of OPG and Hydro One to the Province was estimated to fall short of the about $520 million in annual interest expense.

Under the Electricity Sector Dedicated Income, the Province has been dedicating the cumulative combined net income of OPG and Hydro One in excess of the Province's interest cost of its investment in these companies (about $520 million annually, prior to the Hydro One IPO) to OEFC.

As the ESDI commitment is calculated on a cumulative basis over time, the estimated shortfall in the combined net incomes of OPG and Hydro One in 2015-16 compared to the about $520 million in the Province's financing costs, reduces the estimated Electricity Sector Dedicated Income in 2016-17 [and potentially in future years], until the past shortfall is offset by the combined net incomes going forward from 2015-16.

The actual ESDI amounts for 2015-16 and 2016-17 is subject to finalisation, including the actual financial performances of OPG and Hydro One in 2015-16 and 2016-17, and will be reported in OEFC's annual financial statements and Public Accounts.

[Note: For the 2015-16 Printed Estimates, the ESDI was positive, as the projected ESDI did not build in the potential impact of the broadening of Hydro One ownership due to the commercial and market sensitivity of the estimated impacts on Hydro One of the expected departure tax. The potential impact of the broadening of Hydro One ownership was built into the asset optimization component of the Sales and Rental revenue line.]

Hello All,

Ahead of today's FAO pre-meeting, please find attached consolidated edits in track changes for the Fall Fiscal Outlook and Economic Outlook. Subject to this afternoon's discussion, these are the edits we plan to submit to the FAO.

Please use the same FAO password to access the documents.

Thanks,
Ryan

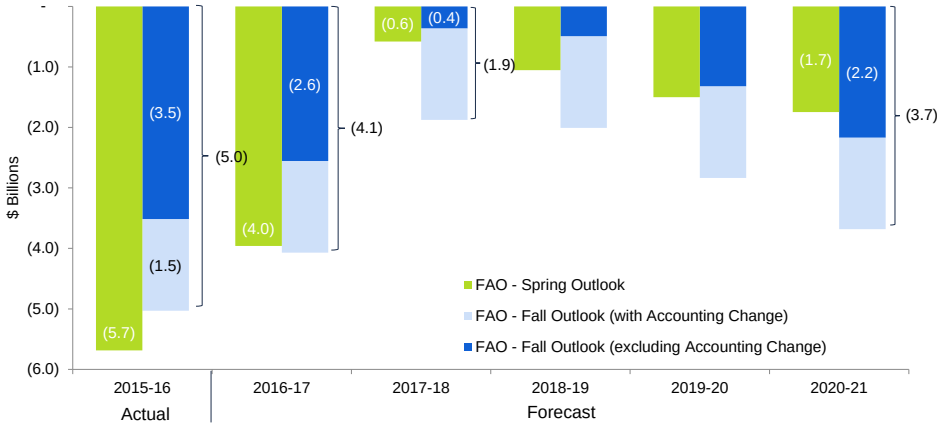
Draft Fiscal Outlook

October 7, 2016



Overview

Ontario's Budget Nears Balance

The FAO is currently projecting Ontario budget deficits of $4.1 billion in 2016-17 and $1.9 billion in 2017-18. This updated fiscal projection is based on new economic[1] and fiscal developments, and reflects the change in the accounting treatment of jointly sponsored pension plans in 2015-16, which is assumed to continue over the outlook. [2] Excluding this accounting change, the FAO projects Ontario's budget deficit would be $2.6 billion in 2016-17 and $0.4 billion in 2017-18, which represent modest improvements from the FAO's spring outlook report.

Beginning in 2018-19, the ~~deficit~~ FAO is still ~~expected~~ expecting the deficit to steadily deteriorate as growth in revenue is outpaced by increases in program spending and interest on debt payments.

Ontario's Budget Balance

Source: FAO

Commented [MoF1]: Please add note that FAO surplus/deficit analysis is presented before reserve.

Commented [MoF2]: Please add note that budget balance is before reserve.
Consider adding note that Ontario's latest fiscal outlook extends only to 2018-19.

[1] See Chapter 2, 'Economic Outlook'.

[2] In the 2015-16 Financial Statements, released October 3, 2016, the government changed the accounting treatment of jointly sponsored pension plans, based on the Auditor General's opinion. This accounting change increased net debt by $9.2 billion and the deficit by $1.5 billion in 2015-16. However, it is unclear how this accounting change will impact the Province's finances going forward. The government plans to form an independent expert panel to provide recommendations on the appropriate accounting treatment of Ontario's pension assets. For this report, the FAO provides a fiscal outlook before and after the accounting change assuming that the new treatment results in a fixed $1.5 billion impact on Ontario's fiscal balance each year. The FAO will adopt the new fiscal presentation incorporating the new accounting standard agreed upon by the Auditor General and the government.

Although the budget balance projection (excluding the accounting change) has improved only modestly since the FAO's spring outlook, a number of significant but largely offsetting factors have impacted Ontario's fiscal position. These include:

- a surprisingly strong 8.3 per cent increase in tax revenues in 2015-16, as reported in the 2015-16 Public Accounts, partially offset by slightly higher than expected program spending;
- new spending commitments, announced in the September ~~9~~12, 2016 Speech from the Throne, to expand child care spaces and provide a rebate on household electricity bills equal to the provincial portion of ~~for~~ the HST ~~paid on household electricity bills~~;
- lower than expected economic growth in 2016 and 2017 which moderately dampens the expected growth in tax revenues; and
- lower interest on debt payments, reflecting a more gradual expected increase in interest rates over the outlook.

Impact of Factors Contributing to the Change in the Budget Balance since the FAO's Spring Outlook

	2016-17	2017-18	2018-19	2019-20	2020-21

Accounting Change	-1.5	-1.5	-1.5	-1.5	-1.5
Updated Budget Balance with Accounting Change	**-4.1**	**-1.9**	**-2.0**	**-2.8**	**-3.7**

Positive values indicate improvement in budget balance (i.e. lower deficit). Numbers may not add due to rounding. The total impact includes minor changes due to methodological improvements, which total less than $100 million.
* Excludes $1.5 billion in accounting changes.
** Captures impact of lower interest rates as well as changes in borrowing.

Commented [MoF3]: Please add note that this is analysis is before the reserve.

Commented [MoF4]: These totals do not align with the table shown on page 6. Consider adding clarification about how assumptions differ, or potentially update to align estimates.

Revenue Outlook

From 2015-16 to 2020-21, the FAO projects total revenues to increase at an average annual rate of 3.2 per cent, slightly below the 3.3 per cent forecast in the FAO's spring outlook. This incorporates the proceeds

from the government's planned asset sales[3], new revenues from cap and trade, and new federal transfers as announced in the 2016 Budget.

Tax Revenue

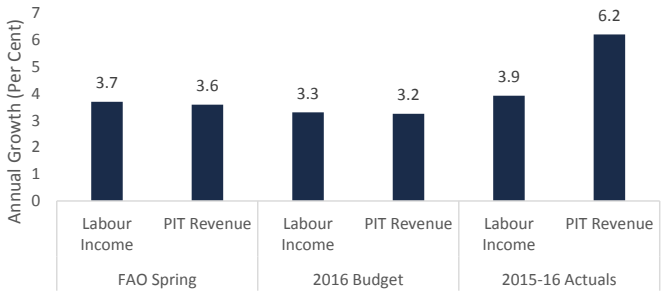
Tax revenue is expected to rise by 3.1 per cent over the outlook, slightly weaker than the 3.2 per cent forecast in the spring, consistent with the FAO's revised economic projection.

There were two significant changes to the tax revenue outlook since the spring.

- The 2015-16 Public Accounts reported higher than expected tax revenues. This raised the starting point for the projection, pushing up tax revenues over the outlook.
- At the same time, a somewhat weaker economic forecast, particularly for corporate profits, partially offset some of the positive impact of the higher 2015-16 tax revenue base over the outlook.

When higher 2015-16 revenues are combined with a slightly weaker outlook for revenue growth, tax revenues are projected to be $0.6 billion higher in 2017-18 and $1.0 billion higher in 2020-21 compared to the spring forecast.

2015-16 Public Accounts



The incorporation of the 2015-16 Public accounts resulted in a much higher starting point for the FAO's tax revenue projection, leading to higher tax revenues over the forecast, compared to the spring outlook. Specifically, the Public Accounts reported a surprisingly strong 8.3 per cent growth in 2015-16 tax revenues, much stronger than the growth in economic drivers would suggest.

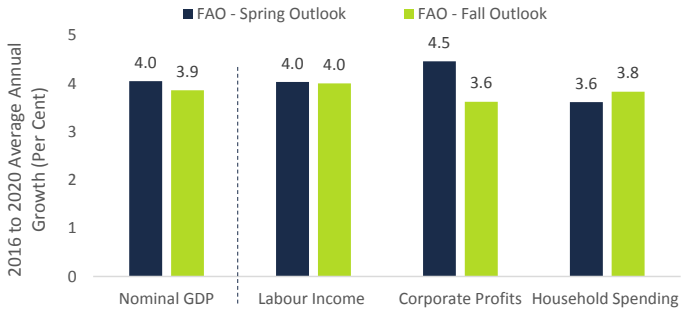
In particular, PIT revenue grew by 6.2 per cent in 2015-16, well above the 3.9 per cent growth in household income. This implies an increase of almost $900 million in PIT revenue that cannot be explained by income growth alone.[4] This unusually large increase in PIT was not anticipated in the 2016 Budget projections nor by the FAO in the spring outlook, and was mainly driven by stronger than expected personal income tax returns for 2015.

Commented [MoF5]: Suggest clarifying this last segment of the sentence to the following "and was mainly driven by stronger than expected revenues arising from assessment of PIT returns for 2015"

Ontario's 2015 Personal Income Tax and Labour Income Growth

[3] The increase in 2015-16 revenues includes the sale of the first tranche of Hydro One equity – which increased revenues by $3.2 billion.
[4] The $900 million difference is based on personal income tax revenue sensitivities from the 2015 Ontario Budget, page 273.

Source: 2016 Ontario Budget, Statistics Canada, Ontario Public Accounts and FAO



Impact of Revised Economic Outlook on Tax Revenues

A moderately weaker economic forecast dampened the tax revenue outlook, partially offsetting some of the positive impact of the 2015-16 public accounts.

While the FAO outlook for labour income and household spending remains fairly strong, the forecast for nominal GDP has declined since the spring outlook, largely as a result of weaker growth in corporate profits.

Growth in Key Tax Drivers, 2016 – 2020[5]

Commented [MoF6]: Missing a label on the last set of bars.

Source: Statistics Canada, Ontario Economic Accounts and FAO

The forecast for corporate profits has been revised lower, largely reflecting weak corporate profit growth over the first half of 2016. As a result, corporate tax revenue is currently projected to be $0.7 billion lower, on average, in each year.

Non-Tax Revenue

[5] "Labour income", "corporate profits" and "household spending" are defined by Statistics Canada as "compensation of employees", "net operating surplus: corporations", and "household consumption" respectively.

Revenues from federal transfers are expected to rise from $22.9 billion in 2015-16 to $27.0 billion by 2020-21. The current outlook for federal transfers is down modestly from the FAO's spring outlook, reflecting $0.3 billion in lower Equalization payments by 2020-21 due to a relatively weaker economic outlook for the rest of Canada.

In April 2016, non-tax revenues were boosted by the Province's sale of a further ~~15~~ 14 per cent of Hydro One, generating approximately $0.6 billion in one-time proceeds. Consequently, the Province's net income from Hydro One is reduced by a further ~~15~~ 14 per cent (roughly $100 million) beginning in 2016-17.

The recent Public Accounts reported that revenue from government business enterprises (GBEs) was $560 million higher in 2015-16 than forecast in the 2016 Budget, largely reflecting higher net income from the electricity sector. The FAO projection for GBE income is based on the published 2016 Budget forecast adjusted for the higher results reported in the public accounts.

Spending Outlook

Program Spending

Based on the Auditor General's opinion, the Province changed the accounting treatment of jointly sponsored pension plans in the 2015-16 Public Accounts. This resulted in an increase of $1.5 billion in program spending for 2015-16, which ~~is~~ the FAO assume~~sd~~ ~~to extend~~will continue over the outlook. The government plans to form an independent expert panel to provide recommendations on the appropriate accounting treatment of Ontario's pension assets.

From 2015-16 to 2018-19, the FAO projects program spending to grow at an average annual ~~pace~~ rate of 2.2 per cent. This reflects the 2016 Budget program spending projections, with adjustments to incorporate the new spending commitments announced in the September ~~19~~12, 2016 Speech from the Throne.

Specifically, the government proposes to:

- Provide a ~~Rebate~~ rebate equal to the provincial portion of the HST on the electricity bills of residential homes, farms and small businesses, beginning January 1, 2017.[6] This measure is expected to result in new government spending of $1 billion annually in 2017-18 onwards.[7]
- Create 100,000 new child care spaces over five years starting in 2017. This program is expected to result in new capital spending between $1 billion and $3 billion over five years, and between $600 million and $750 million in new annual operating costs, when fully implemented.[8]

Given the limited details, the FAO has incorporated reasonable assumptions about the total cost and roll-out of both measures into its program spending projections. These measures are assumed to be ~~new~~

[6] Government of Ontario News Release, *Ontario Introducing Measures to Reduce Electricity Costs*, September 15, 2016
[7] QP Briefing, *Throne Speech 2016: Premier Wynne pledges hydro bill relief, more child care spaces*, September 12, 2016
[8] QP Briefing, *Throne Speech 2016: 100,000 new licensed child care spaces to cost up to $3.75B*, September 12, 2016

Commented [MoF7]: Note that the Province sold 14 per cent of Hydro One common shares in the secondary offering.

Commented [MoF8]: Note that the Province raised approximately $2 billion in gross proceeds in the offering: https://news.ontario.ca/mei/en/2016/05/ontario-raises-197-billion-for-infrastructure-investments.html

However, an estimated **gain** of $0.6 billion appears to be a reasonable estimate, subject to finalisation in Public Accounts.

Commented [MoF9]: Note that the Province sold 14 per cent of Hydro One common shares in the secondary offering.

Commented [MoF10]: Suggest moving paragraph to right after the "FAO's Assumptions for Newly Announced Programs" table – i.e., update on the spending outlook incorporating new commitments, and then layer on the pension impact.

Commented [MoF11]: Based on paragraph description, assume the 2.2% excludes the impact of pension adjustment – rationale for moving the first paragraph in this section to below the "FAO's Assumptions for Newly Announced Programs" table.

~~expenditures on top of~~incremental to the program ~~spending~~ expense projections published in the 2016 Budget.

FAO's Assumptions for Newly Announced Programs

	2016-17	2017-18	2018-19	2019-20	2020-21
~~HST~~ Rebate equal to the provincial portion of the HST on Electricity Bills	250	1,000	1,000	1,000	1,000
Child Care Spaces Expansion					
Operating		375	750	750	750
Capital*		400	400	400	400
Total Operating	250	1,375	1,750	1,750	1,750
Total Capital	-	400	400	400	400

Source: FAO assumptions
Notes: Since the rebate is effective January 1, 2017, the HST rebate expense is assumed to be one quarter of the annual cost for 2016-17.
Given the need to design and implement the new program, spending on the expansion of child care spaces is assumed to be one-half the estimated total cost in 2017-18.
Capital spending for the day care expansion is assumed to be $2 billion, the mid-point of the announced range, spread evenly over ~~five years~~the 2017-18 to 2021-22 period.
As child care funding is currently dedicated to creating new child care spaces within schools, it is assumed that a portion of the new Child Care Expansion capital funding will be provided to school boards and amortized.

[Insert paragraph from beginning of section]

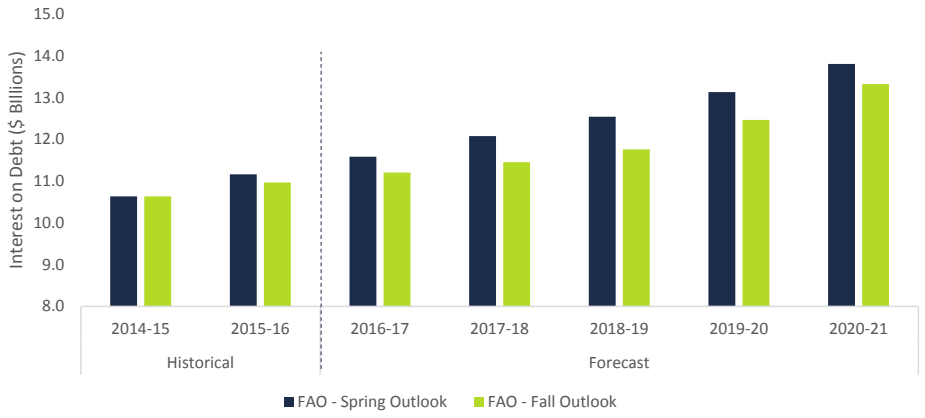
Even after the inclusion of these new measures and the change in the accounting treatment of the pension assets, Ontario's program spending is still projected to grow at an average annual rate below the 2.7 per cent growth rate necessary to keep pace with population growth and price inflation.[9]

Beyond the government's published fiscal projections to 2018-19, the FAO expects program spending ~~is expected~~ to increase by an average annual rate of 3.6 per cent ~~in~~ between ~~2019~~2018-~~20~~19 and 2020-21, in-line with population growth and price inflation.

Interest on Debt

The 2015-16 Public Accounts reported that interest on debt (IOD) payments grew 3.1 per cent in 2015-16 to $11.0 billion, $0.2 billion below the FAO's spring outlook projection.

Over the next five years, the FAO projects that IOD payments will grow at an average annual rate of 3.8 per cent, rising to $13.3 billion by 2020-21. The FAO's current outlook for IOD is $0.6 billion lower than the spring



Commented [MoF12]: The capital profile is flat-lined over the 5 years, which doesn't necessarily align with the proposed operating profile. For example, it would be difficult to incur full operating costs in 2018-19 for a capital build that is completed in 2020-21. Finally, the capital assumptions don't factor in that some of the assets would be owned by the province and amortized, which could result in a different potential fiscal impact than assumed.

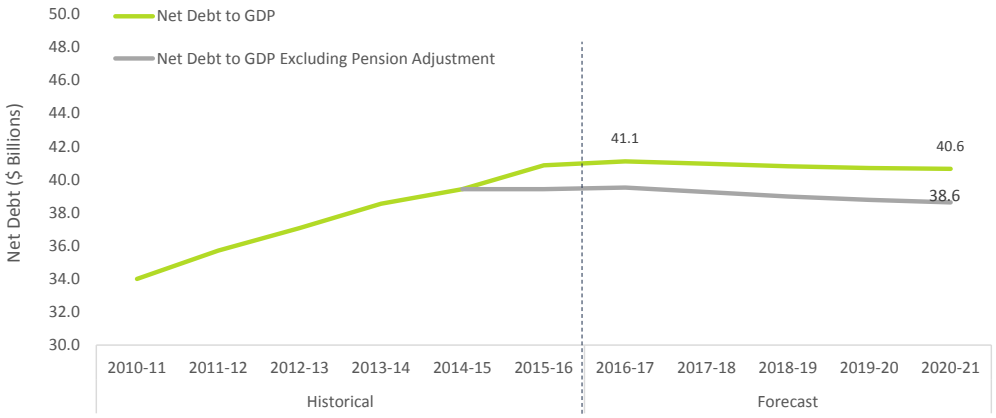
[9] Economic and demographic factors, such as population growth and inflation, affect the demand and cost of public services. These underlying factors put upward pressure on spending. In the Spring Outlook, the FAO estimated that program spending would be required to grow 2.7 per cent on average annually between 2014-15 and 2018-19 to keep pace with underlying cost factors.

outlook ~~by~~ in 2017-18 and $0.5 billion lower ~~by~~ in 2020-21. The significantly lower projection for interest on debt payments primarily reflects the FAO's revised outlook for lower interest rates over the outlook.

Commented [MoF13]: Language suggests that the $0.6 billion and the $0.5 billion are cumulative changes. Suggest clarifying that changes are for a given year.

Interest on Debt Outlook

Source: FAO



Ontario Net Debt

The 2015-16 Public Accounts reported that the Province's net debt[10] rose 7.3 per cent in 2015-16 to $305.2 billion, $8.9 billion higher than projected in the FAO's spring outlook. The increase in net debt in 2015-16 includes a one-time increase of $10.7 billion as a result of the new accounting treatment for pension assets.[11] Due to this accounting change and FAO projections of Ontario's budget balance before reserve, the FAO expects Ontario's net debt to rise by $61 billion over the next five years to $366 billion by 2020-21, about $16 billion higher than the FAO's spring outlook.

The accounting change, coupled with slightly lower growth in nominal GDP, results in a higher net debt-to-GDP ratio relative to the FAO's spring outlook. Significantly, Ontario's debt-to-GDP ratio is now expected to peak at 41.1 per cent in 2016-17, above the 39.6 per cent projected in the FAO's spring outlook. The ratio is expected to edge down by just 0.5 percentage points to 40.6 per cent by 2020-21.

[10] Net debt is defined as gross debt and other liabilities less financial assets.
[11] Page 10 in the 2015-16 Public Accounts of Ontario.

Ontario's Net Debt to GDP Now Peaks in 2016-17

Source: Ontario Public Accounts and FAO

The Province's borrowing requirement in 2015-16 was $32.1 billion. The change in the accounting treatment of pension assets does not affect the Province's borrowing requirement or gross debt.

Risks to the Fiscal Plan and Policy Options

There are a number of material risks that could impact Ontario's fiscal position.

- Actual growth in the economy could be weaker than projected, lowering tax revenues. Growth in nominal GDP over the first half of 2016 is currently tracking well below forecasts published earlier in 2016. If actual growth continues to underperform forecasts, tax revenues would be expected to be lower.
- The 2015-16 Public Accounts reported an unusually strong increase in tax revenues, given the underlying economic statistics. If this unusually strong increase turns out to be the result of one-time factors, the increase would not carry-forward over the forecast, representing a risk to the current projection.
- The FAO adopts the government's own outlook for program spending which assumes that the increase in spending can be restrained below the growth in population and inflation. If program spending grows faster than projected, the fiscal balance would deteriorate. Notably, the government has increased planned spending for 2017-18 in each of the last three budgets.

At the same time, the government has a broad range of policy options that could result in an improved fiscal position, including the sale of additional public assets beyond announced targets, or by applying new revenues (from cap and trade or new federal transfers) to existing program spending commitments.

Commented [MoF14]: Please clarify that the FAO outlook for program spending is the government's 2016 Budget outlook plus FAO assumptions about the expense impact of the Speech from the Throne and the impact of pensions.

Commented [MoF15]: Consider noting that some of the projected increases are associated with offsetting revenue increases (e.g., cap and trade, federal revenue assumptions).

FAO Fiscal Projections

The FAO forecasts provincial finances based on projections of existing and announced revenue and spending policies. The forecast represents the FAO's view of the most likely fiscal outcomes given existing policies, without anticipating any new government policy decisions. The FAO's tax revenue projections are based on an assessment of the outlook for the provincial economy and current tax policies. Given the government's discretion over spending, the FAO adopts the government's announced spending plans from fiscal documents and incorporates policy announcements as appropriate. Beyond the government's published spending projections, the FAO forecasts spending based on the outlook for underlying cost drivers including demographics and price inflation.

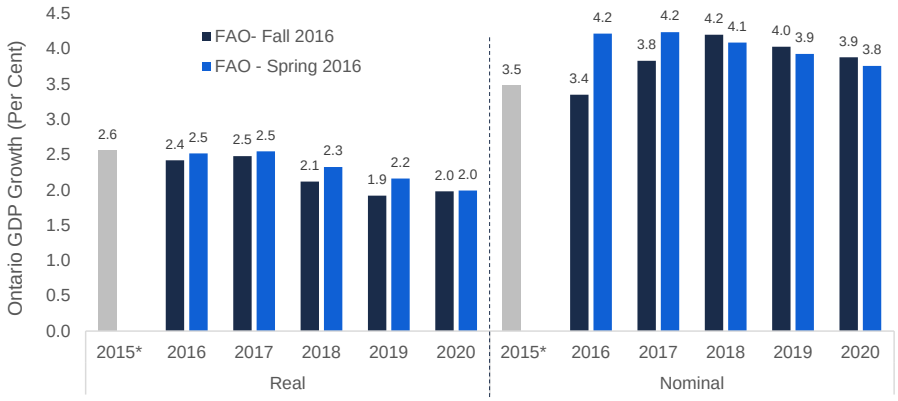
Appendix

Table 3: FAO Fiscal Outlook

Commented [MoF16]: Suggest adding an appendix that includes a version of "Table 3: FAO Fiscal Outlook" that excludes the $1.5 billion/year pension adjustment in program expense and the surplus/deficit.

Draft Economic Outlook

October, 2016



Overview

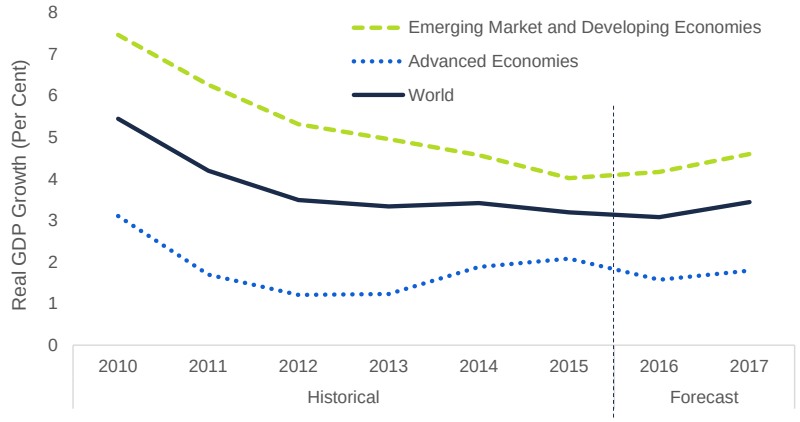
Ontario Growth Expected to be Lower in 2016 and 2017[1]

Following a solid gain in the first quarter of 2016, economic indicators suggest the pace of economic activity in Ontario moderated noticeably through the second quarter, in particular reflecting a decline in merchandise exports and slower growth in ~~household spending~~retail sales. Based on Ontario's economic performance over the first half of 2016, the FAO has revised down its projection for Ontario real and nominal GDP growth compared to the outlook presented in the FAO's spring outlook report[2]. In particular, nominal GDP – the broadest measure of the tax base - is now projected to increase by 3.4 per cent in 2016 and 3.8 per cent in 2017, below the 4.2 per cent projected in the spring.

Commented [LB(1]: Concerned that this is based on the OEA, which will not be released before the FAO report. Some rewording to make this FAO estimates would be appreciated.

Figure x: The FAO's Revised Economic Outlook

Source: FAO
* 2015 are actuals.



Global Economic Growth Revised Modestly Lower

Global economic growth remains tentative with current forecasts much weaker than expected a few years ago and well below the pace of growth before the 2008-2009 recession. According to the latest forecast

[1] See Appendix for detailed forecast tables.
[2] '*Economic and Fiscal Outlook, Assessing Ontario's Medium Term Prospects, Spring 2016*', Financial Accountability Office of Ontario.

from the International Monetary Fund (IMF)[3], the global outlook for 2016 and 2017 has weakened since the FAO's spring report, largely due to the United Kingdom's decision to withdraw from the European Union (commonly referred to as *Brexit*). The deterioration in the global outlook largely reflects greater political uncertainty across a wide range of institutional and economic arrangements which is negatively affecting business confidence and investment.

Figure x: Global Growth Remains Weak

Source: International Monetary Fund, World Economic Outlook, October 2016

The IMF is projecting global growth of 3.1 per cent in 2016 and 3.4 per cent in 2017, slightly lower than its outlook last spring. The downward revisions to the IMF's global outlook are concentrated in European economies, with minor changes to the forecasts for the United States and China. The IMF has lowered its forecast for Canadian real GDP growth to 1.2 per cent in 2016 and 1.9 per cent in 2017. Most advanced economies continue to experience weak business investment and poor labour market results, which are contributing to a muted inflation outlook. On average, advanced economies are expected to record growth of just 1.6 per cent in 2016 and 1.8 per cent in 2017.

In China, economic growth is expected to gradually moderate as the economy continues to rebalance from investment and manufacturing-led growth to a more service-intensive economy. China's real GDP growth is expected to be 6.6 per cent in 2016 and 6.2 per cent in 2017, down substantially from growth rates of over 9 per cent following the global recession. The short-term outlook for China has improved modestly compared to the spring outlook, largely as a result of stimulus from both monetary and fiscal policy.

[3] "*World Economic Outlook Database*", updated October 4, 2016, International Monetary Fund.

There were only modest changes in the IMF's outlook for the other large emerging market economies since the spring. On average, the IMF is projecting real GDP growth for emerging and developing market economies of 4.2 per cent in 2016, strengthening to 4.6 per cent in 2017.

Significant Risks Remain for the Global Outlook

Economic and political uncertainty remains elevated with a number of significant risks continuing to weigh on global growth prospects.

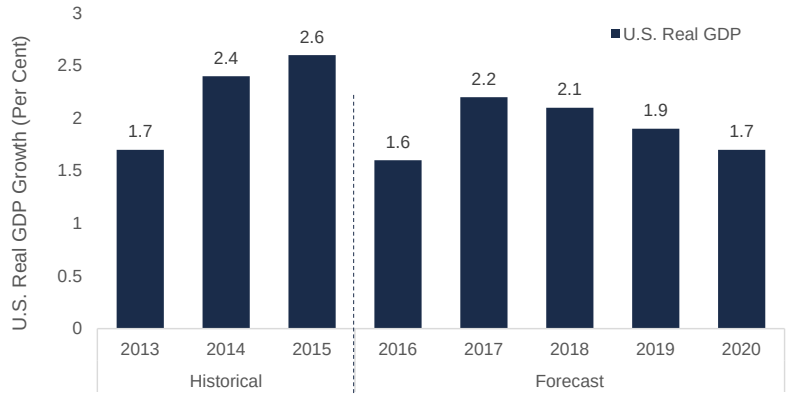
In Europe, concerns over the solvency of a number of major banks raises the risk of a renewed financial crisis which would impact the already weak pace of European growth. As well, the sharp rise in corporate and household debt in China over the past several years has been identified by the IMF as a key risk for the global economy.

Other political developments, including military conflict in the Middle East and the growing popularity of nationalism and protectionist trade policies in developed nations could also impact global economic growth.

U.S. Economic Growth Weaker than Expected in 2016

In the United States, economic growth over the first half of 2016 was weaker than expected, contributing to downward revisions of recent economic forecasts. Over the first two quarters of 2016, U.S. real GDP increased by just 1.4 per cent, on a year-over-year basis, well below projections last spring for growth of over 2 per cent.

U.S employment gains have also moderated in 2016, with average monthly increases of about 180 thousand jobs, down from average monthly gains of almost 230,000 jobs in 2015 and 250,000 in 2014. However, the moderate but steady job gains have allowed the U.S. unemployment rate to continue tracking lower, reaching 5.0 per cent in September.



Commented [MW2]: US unemployment rate is largely unchanged over the last 12 months. Story is a bit more complicated and flat unemployment rate largely due to much stronger labour force gains rather than just job gains.

Despite the weaker than projected growth for 2016, economic forecasters continue to expect the U.S. economy will strengthen over the remainder of 2016 and beyond. In particular, household spending and residential construction are expected to contribute to overall economic growth, supported by continued job creation and rising wages. Forecasters also remain confident that business investment, which has disappointed expectations over the past several years, will eventually rebound and help spur overall economic growth.

Based on the latest IMF forecast, U.S. real GDP is expected to grow by 1.6 per cent in 2016 and strengthen to over 2.0 per cent growth in 2017 and 2018. Beyond 2018, growth is expected to moderate, remaining

close to the pace of growth of potential output.[4] This moderate but steady growth in the U.S. economy should lead to a gradual rise in interest rates.

Figure x: U.S. Economic Growth Disappoints in 2016

Source: International Monetary Fund

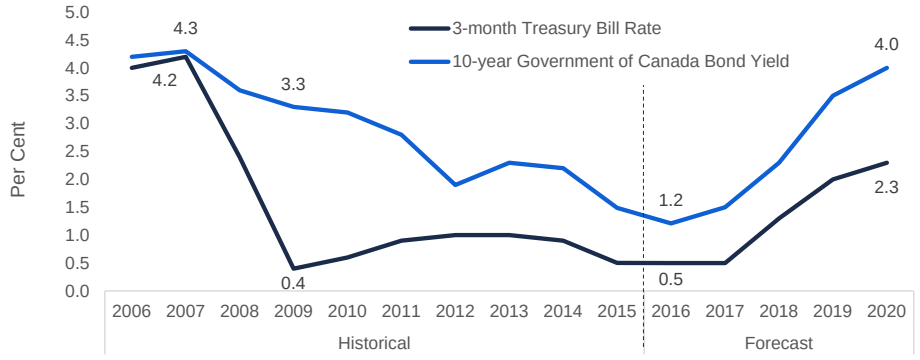
Canadian Economic Growth Revised Lower

The outlook for the Canadian economy has deteriorated over the past six months. Canadian real GDP is currently projected to grow by 1.2 per cent in 2016, down from a forecast of 1.7 per cent growth at the time of the FAO's spring outlook.[5] The downward revision to the Canadian outlook reflects the impact of the Alberta wildfires, but also weaker than expected non-energy exports and business investment.

After a promising start to 2016, with solid first quarter growth, Canadian real GDP declined at an annualized rate of 1.6 per cent in the second quarter, the weakest quarterly result since the 2008-2009 recession. While the Alberta wildfires were a major contributor to the disappointing outcome, there were also declines in household durable goods spending and business investment. Temporary disruptions in Ontario's auto sector[6] led to a drop in automotive exports, which contributed to an overall decrease in goods exports in the first half of 2016.

[4] The maximum sustainable level of output where the economy's resources such as labour are full utilized.
[5] Based on the FAO consensus forecast which includes the Centre for Spatial Economics, the University of Toronto and the Conference Board of Canada.
[6] General Motors shut four of its North American assembly plants, including the Oshawa plant for 2 weeks in April 2016. This was due to shortage of parts, caused by the earthquakes that struck Japan. '*GM's Oshawa plant halts production for two weeks*' , The Toronto Star, April 22, 2016

The resumption in oil production in Alberta and the end of production difficulties in the auto sector should contribute to a rebound in Canada's goods exports in the third quarter. This, along with an expected boost to consumer spending from the federal child benefit in the third quarter, will contribute to stronger real GDP growth in the second half of 2016. Further, the rebuilding effort in Alberta should bolster Canadian real GDP growth in 2017.



Beyond the temporary factors which buffeted the economy in 2016, the Canadian economy continues to adjust to the longer term structural impact of lower energy prices. While consolidation in the energy sector continues, growth in the rest of the Canadian economy has not significantly improved, leading to slower growth than previously expected. In 2015 and 2016, Canadian real GDP is expected to grow by just over 1.0 per cent on average, well below the 2.5 per cent average rate recorded from 2010 to 2014.

However, forecasters generally expect the Canadian economy to strengthen in 2017, recording growth of 2.4 per cent, as steady gains in non-energy exports, and a rebound in business investment help offset continued slow growth in the oil and gas sector.

Given the relatively slow growth of the Canadian economy, the Bank of Canada appears unlikely to raise its key policy interest rate before 2018. As a result, the FAO has revised down its interest rate outlook from its spring forecast. The current outlook assumes short-term rates remain near current levels until 2018. Beyond 2018, interest rates are expected to gradually normalize with the 10-year Government of Canada bond yield rising to 4.0 per cent by 2020 -- below the FAO's spring projection of 4.5 per cent in 2020.

Commented [MW3]: Long-term rate of 4.0 per cent on 10 year GoC bond is well above current private-sector average of around 3.0%. Some banks are well below 3.0%.

Figure x: Canadian Interest Rates to Rise Gradually

Source: Statistics Canada and FAO

The Canadian dollar is expected to gradually appreciate over the next five years, rising from an average of about 76 cents U.S. in 2016 to about 87 cents U.S. by 2020, supported by steady economic growth and a gradual increase in oil prices.

Commented [MW4]: Most private-sector forecasters are below this level by 2020. Current average is around 83 cents US.

Ontario Economic Outlook

Real GDP Growth Outlook Remains Solid

The Ontario economy posted strong real GDP growth over the second half of 2015 and into the first quarter of 2016. However, merchandise exports, retail trade and employment slowed noticeably in the second quarter of 2016, contributing to a slowdown in overall economic growth.

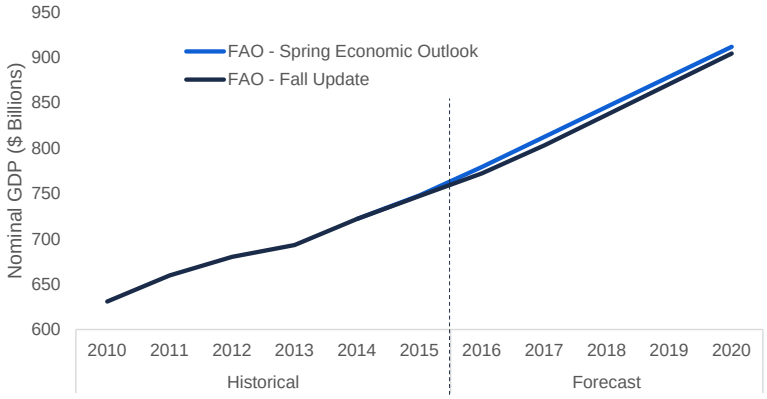
Commented [LB(5]: Suggest rewording to "However, merchandise exports, retail trade and employment slowed noticeably in the second quarter of 2016, contributing to a slowdown in overall economic growth"

The slower pace of growth in the second quarter was partly the result of the temporary shutdown of some auto production facilities in the province. However, the return to normal production levels should boost third quarter growth. In addition, the introduction of the new federal child benefit in the third quarter is expected to provide a lift to household spending over the second half of 2016. In 2017, new spending initiatives announced in the Ontario government's September throne speech should provide some additional support to household and government spending.[7]

On an annual basis, the FAO is forecasting real GDP growth of 2.4 per cent in 2016 and 2.5 per cent in 2017, slightly below the projection last spring. Beyond 2017, real GDP is expected to gradually moderate, with average annual growth of 2.0 per cent.

The FAO forecast is broadly consistent with the consensus view among economists that stronger international exports and business investment will be key drivers of Ontario's overall growth over the next several years. At the same time, household spending and residential investment are expected to grow more modestly as households begin to reduce borrowing and residential construction activity slows.

Weaker Profit Gains Contribute to Lower Nominal GDP Growth in 2016



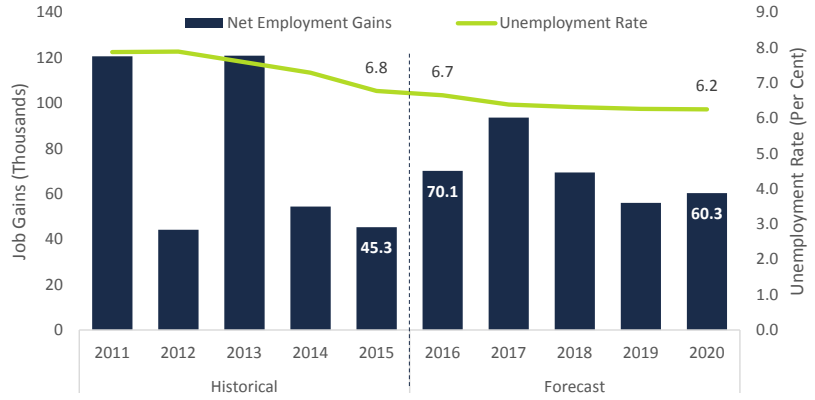
The FAO forecast for nominal GDP over the short-term is largely based on its projections for labour income and net operating surplus (corporate profits), which together account for about 66 per cent of total nominal income.

Labour income remained relatively robust over the first half of 2016, rising by 3.9 per cent compared to the same period in 2015. However, the net operating surplus of corporations declined by 0.3 per cent over the first half of 2016, on a year-over-year basis. The decline in the net operating surplus in Ontario over the first half of 2016 primarily reflected declines in corporate profitability in the manufacturing and the banking sectors[8].

[7] This includes the announced expansion of child care spaces in Ontario and the rebate of the provincial portion of the HST on electricity bills.
[8] 'Quarterly Financial Statistics for Enterprises', Second Quarter 2016, Statistics Canada, August 25, 2016.

Based on the FAO's updated outlook, Ontario nominal GDP is expected to be about 1.0 per cent lower by 2020 than originally projected in the spring forecast. The lower level of nominal GDP over the outlook is largely due to the downward revisions to growth for 2016 and 2017.

Figure x: Ontario Nominal GDP Below FAO's Spring Forecast



Source: FAO and Ontario Economic Accounts

Steady Employment Gains Result in Gradual Decline in Unemployment Rate

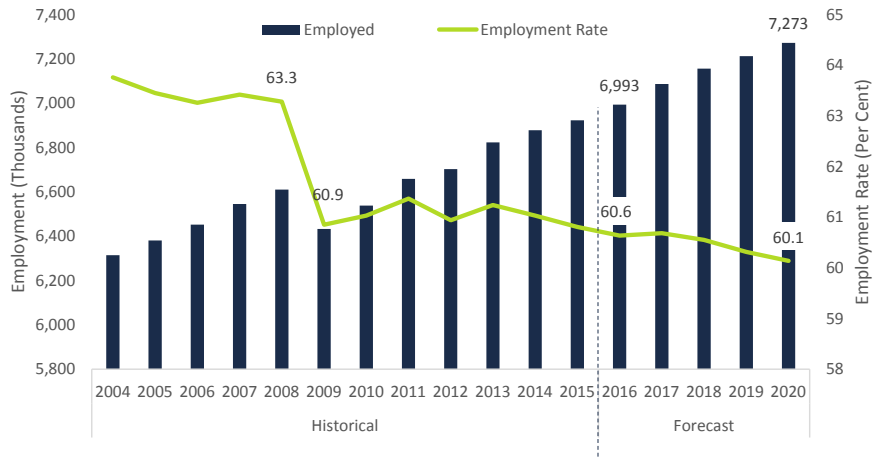
Ontario employment is expected to grow moderately over the outlook, reflecting the outlook for steady economic growth. The FAO is projecting solid job growth of 1.0 per cent (+70,000 net job gains) in 2016, following a more modest gain of 0.7 per cent (+45,000 net jobs) in 2015. The majority of net new jobs are projected to be in full-time, private sector employment. Furthermore, manufacturing sector employment is expected to post a moderate gain in 2016, the first annual increase in four years.

Over the five-year forecast, the FAO is projecting Ontario employment growth to average 1.0 per cent per year, down from an average pace of 1.2 per cent over the past five years. Even so, the steady projected gains in employment, combined with more moderate labour force growth, will result in a gradual decline in Ontario's unemployment rate from 6.8 per cent in 2015 to 6.2 per cent by 2020.

Figure x: Steady Employment Gains and Gradual Decline in Unemployment Rate

Source: Statistics Canada and FAO

Challenges Remain for Ontario's Labour Market



Despite the steady job gains and lower unemployment rate over the outlook, important challenges remain for Ontario's labour market.

Ontario's employment rate – the share of the working age population with a job – currently remains well below the pre-recession rate of over 63 per cent. The employment rate improved somewhat in the years following the recession, but has resumed its downward trend in the past three years. Over the next five years, the FAO projects a continued decline in the employment rate to about 60 per cent by 2020, as employment gains fail to keep pace with population growth.

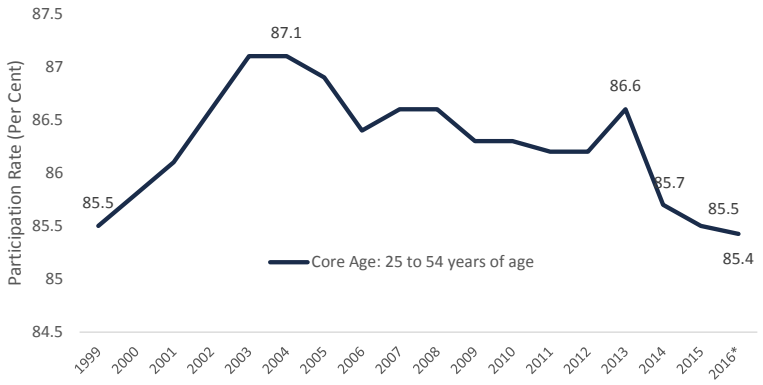
Commented [MW6]: While true, this is in large part due to population aging, which is having an impact on many advanced economies including Ontario's.

Commented [MW7]: The working-age population can be reported to control for the effects of population aging. This helps highlight the impact of economic trends, independent of demographic influences. On this basis, the employment rate of the working-age population 15 to 64 has been on a modest upward trend since the recession, increasing from 70.4% in 2009 to 71.5% in 2015. The employment rate of core-age workers 25 to 54 increased from 79.5% in 2009 to 80.7% in 2015.

Figure x: Employment Rate Tracks Lower as Job Creation Lags Population Growth

Source: Statistics Canada and FAO

The nature of unemployment in Ontario has also changed since the 2008-2009 recession. Both the long-term unemployment rate (the share of those unemployed for longer than six months) and the average duration of unemployment (the length of time it takes to find a new job) remain well below pre-recession levels.[9] The deterioration in these other measures of unemployment suggests that despite overall job growth, many workers continue to face a challenging labour market.



Another indicator pointing to a structural shift in Ontario's labour market is the decline in the proportion of adults, aged 25 to 54, who are currently employed or looking for work - the 'core age participation rate'. Since 2004, the core participation rate decreased from about 87 per cent to just over 85 per cent in 2016 (the lowest rate since the late 1990s).

Commented [MW8]: Ontario's labour market continues to improve following the recession. The number of persons who are long-term unemployed (27 weeks or more) has decreased to 100,600 in 2015, a decline of 35% since peaking at 154,900 persons in 2010. The average number of weeks unemployed has decreased to 20 weeks in 2015, a decline of 9% since peaking at 22 weeks in 2010. As the FAO report notes, these indicators are still above the pre-recession lows, so more progress can be made.

Commented [AJ(9]: Should read 'well above pre-recession levels'?

[9] The long-term unemployment rate – the percentage of those unemployed who have been without a job for longer than six months – increased from 13 per cent in 2007 to 25 per cent in 2010. Since 2010, long-term unemployment has improved moderately, decreasing to 20 per cent in 2015. As well, the average duration of unemployment increased from around 15 weeks in 2007 to almost 22 weeks in 2010. Since 2010 the average time spent unemployed has decreased to 20 weeks in 2015, but remains well above pre-recession levels.

Figure x: Core Age Participation Rate at Lowest Level Since 1999

Source: Statistics Canada
* 2016 is August year-to-date value.

As Ontario's population ages, the overall participation rate (for all workers) will decline since people work less as they move into their senior years. This will lead to slower growth in Ontario's workforce and contribute to a slower pace of economic growth. However, the declining participation rate of core, adult-aged workers is a key concern, since it will exacerbate the effects of an aging workforce on economic growth.

An increase in the core age participation rate back to 87 per cent would represent about 90 thousand additional workers for Ontario's labour force.

Key Risks for Ontario's Economic Outlook

The FAO's current economic projection represents a prudent outlook for the Ontario economy and an appropriate foundation for fiscal planning. However, a number of key risks could lead to weaker than expected economic growth for Ontario.

Commented [MW10]: In the current environment of a competitive Canadian dollar, low oil prices and very low interest rates, the FAO may want to consider mentioning an upside scenario for GDP growth.

The sharp rise in housing prices, particularly in the Greater Toronto Area, continues to represent a key risk for the overall economy. A significant correction in housing prices, exacerbated by elevated levels of household debt, would negatively affect household spending and residential construction activity and could lead to broader, economy-wide impacts on growth and employment.

Ontario's export sector is expected to be a key driver of economic growth over the next five years, as Ontario maintains and regains share in the growing U.S. market. A necessary ingredient of Ontario's export led growth will be a rebound in business investment to allow for the expansion in export volumes. However, growth in business investment has been disappointing over the past four years. If business investment

continues to underperform, export gains would be more limited than expected, holding back overall economic growth.

Attachments:	Summary of Draft FAO Spring Economic and Fiscal Outlook_v6a.docx

---

Hi Ken, Alex and John,

We're expecting the final version of the FAO spring outlook this morning (tentative release is Wednesday). We've drafted a note and some key messages in anticipation of its release (attached).

Based on their comments on the call the other week, we expect their iod outlook in the version we get today to be different from the draft report. We don't know what else may have been revised, but we'll catch the attached note up with those changes and recirculate later today for your feedback.

Just wanted to give you the heads up for now.

Happy Monday!

Best,

Liane

FAO's 2018 Spring Economic and Fiscal Outlook

ISSUE

On May 2, 2018 the Financial Accountability Office will release its '2018 Spring Economic and Fiscal Outlook' report. The report adopts the AG's accounting treatment of both the Fair Hydro Plan and Pension Assets and indicates that the government is facing persistent budget deficits over the medium-term that will continue to grow well into the government's deficit recovery phase. It also suggests that the deficit cannot be eliminate by economic growth alone, but will require fiscal policy changes to raise revenue or reduce spending.

KEY MESSAGES

- I would like to thank the Financial Accountability Officer (FAO) for releasing his spring economic and fiscal outlook for Ontario. We value the FAO's independent assessment and projections of the province's fiscal plan.
- The government is committed to a responsible fiscal plan that provides the conditions for all Ontarians to thrive.
- As outlined in the *2018 Budget*, the government is projecting a surplus of $600 million for 2017–18, beating its fiscal target for the ninth year in a row.
- While Ontario's economy has been growing steadily, the government knows that more must be done to ensure that the benefits of a solid economy are being shared equally by all Ontarians.
- The government believes that the best way to deliver prosperity to more people is by continuing to invest in the economy, and in public services that promote greater fairness and opportunity across the province.
- As a result, the province is projecting modest deficits over the medium term of $6.7 billion in 2018–19, $6.6 billion in 2019–20 and $6.5 billion in 2020–21, or 0.8 per cent of GDP in 2018–19, declining to 0.7 per cent by 2020–21.

BACKGROUND

Economic Outlook

- The FAO forecast for real GDP growth to average 2.0 percent annually between 2018 and 2021 is 0.1 percentage points faster than the *2018 Budget* forecast of 1.9 percent.
- The FAO forecast is consistent with the private sector economists' view that housing and consumer spending will slow over the next four years while exports and business investment will grow at a faster pace.
- The FAO recognizes similar economic risks identified in the *2018 Budget*. The possibility of stronger U.S. growth could boost Ontario's economy. However,

protectionist trade policies in the U.S., and associated business uncertainty, could place Ontario at a competitive disadvantage. As well, high levels of household debt have left Ontario households vulnerable to rising interest rates.

- Over the extended period 2021 to 2025, FAO's long-term economic outlook is similar to the unpublished Ontario Ministry of Finance projection. In particular, the FAO projects Ontario nominal GDP growth of 3.9 percent annually, on average, between 2021 and 2025, 0.1 percentage points lower than the *2018 Budget* recovery plan projection of 4.0 percent.

Fiscal Outlook

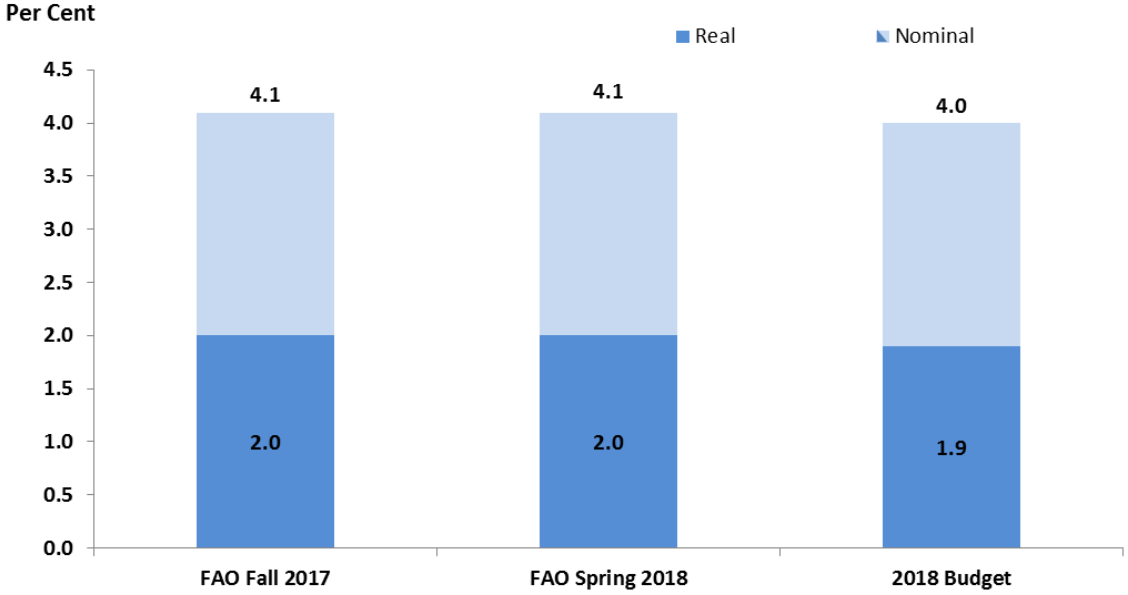
- The FAO is projecting a deficit of $3.6B in 2017-18, rising to $12.5B by 2020-21. The FAO also projects the deficit to further deteriorate over the government's recovery plan period, reaching $15.7B by 2025-26.
- Unlike its Fall report, the FAO is now only presenting projections that include the impact of the Auditor General's (AG) recommended accounting treatment for both the Fair Hydro Plan and the net pension assets of jointly sponsored pensions plans.
    - Therefore, the FAO's projected deficits are between $4B and $6B larger than the government's in each year, all else equal.

Interim and Medium-Term (2017-18 to 2020-21)

- The FAO is projecting a deficit of $3.6B in 2017-18 and deficits of between $11B and $12B over the medium term.
    - The FAO's **revenue forecast** is approximately $1B lower than the government's in each year of the medium-term outlook, mainly due to a lower outlook for personal income tax revenue.
    - Similar to past reports, the FAO adopts the *2018 Budget* **program expense outlook** (other than the accounting treatment differences).
    - Similar to past reports, the FAO also continues to project **interest on debt expense** that is slightly below the government's projection over the medium-term – by between $0.2B and $0.4B per year.

Overall, the difference between the FAO's and government's medium-term fiscal outlook is largely driven by the impact of the AG's recommended accounting treatment for both the Fair Hydro Plan and the net pension assets of jointly sponsored pensions plans.

Differences Between the FAO's Fiscal Outlook and the *2018 Budget* ($ Billions)	2017-18	2018-19	2019-20	2020-21
FAO Projected Deficits (Excl Reserve)	(3.6)	(11.7)	(12.2)	(12.5)
2018 Budget Projected Deficits (Excl Reserve)	0.6	(6.0)	(5.9)	(5.8)
Difference between FAO and 2018 Budget	*(4.2)*	*(5.7)*	*(6.3)*	*(6.7)*
Difference Due to Accounting	*(4.2)*	*(5.0)*	*(5.6)*	*(6.0)*
Difference Due to Other (Lower revenue offset by lower IOD)	-	*(0.7)*	*(0.7)*	*(0.7)*



- In addition to its assessment of the government's current fiscal plan, the FAO developed a "baseline" budget projection that excludes the new revenue and spending measures announced in the 2018 Budget. This baseline scenario projects budget deficits of $8.0B in 2018-19, $x.xB in 2019-20, and $5.9B in 2021-21.

Recovery Plan (2021-22 to 2025-26)

- The 2018 Budget projects a return to balance by 2024-25 and a small surplus in 2025-26. This is premised on:
    - Projected average annual growth in revenue of 3.3% over the recovery plan period and managing program expense to an average annual growth rate of 2.1%.
- In contrast, the FAO projects growing deficits beyond 2020-21. Compared with the 2018 Budget projections:
    - The revenue outlook is higher due to a higher outlook for taxes and other revenue (e.g. service fees, and sales and rentals).
    - Given an aging and growing population and price inflation, the FAO projects program spending would need to grow at the rate of these core cost drivers, 3.5% annually over the outlook, in order "to maintain the quality of public services".
    - The IOD outlook is higher due to the FAO's forecast of higher projected net debt leading to larger debt interest payments.
- The FAO is also projecting that net debt-to-GDP ratio will continue to increase over the medium-term and beyond 2020-21 reaching 44.3 per cent by 2023-24. The 2018 Budget projects that the net debt-to-GDP ratio to peak in 2021-22 before beginning a downward trend.

Note: All surplus/deficits exclude the reserve. Numbers may not add due to rounding.

MEDIUM-TERM REVENUE:

- The FAO projects Personal Income Tax to be significantly lower than the 2018 Budget projections ($0.4 billion in 2018-19, $0.7 billion in 2019-20, and $0.9 billion in 2020-21).
- FAO estimates that Ontario will no longer qualify for Equalization payments after 2018-19, where as the 2018 Budget assumes Equalization ends in 2020-21.
- The FAO reduces H1 net income by $0.4 billion in 2018-19 to reflect the recent decision by the OEB to allocate a portion of tax gain to rate payers.

RECOVERY PLAN REVENUE:

- Over the recovery plan, the FAO projects significantly stronger growth (3.6%) in other non-tax revenues, compared to the 2018 Budget (2.0%).

RECOVERY PLAN PROGRAM EXPENSE:

The FAO assumes program expense to grow at 3.5% over the recovery plan (closer to population and inflation), versus the 2018 Budget projection of 2.0%.

INTEREST ON DEBT EXPENSE:

- Despite projecting larger deficits and potentially larger borrowings, the FAO's IOD grows on average by 4.0% over the medium-term, in contrast to 5.0% in the 2018 Budget. Based on discussions with MOF, it is expected that the FAO may revise its IOD projections upwards.

Subject: 2016-17 FSD&A (OFA's section)

Good day John,

Attached you will find an e-copy of OFA's section, from 2016-17 FSD&A that was distributed yesterday. (password protected).

Additionally, School Boards (SB) discovered an error in their 2016 Budget (Interest and Investment Income Line). Attached you will find the updated "BPS Debt to OFA" spreadsheet.

As a result of this change, SB revised their Q&A to reflect the changes in the Interest and Investment Income (please see below).

Please let us know if there is any additional information that you require.

Best regards,

Ruslan

Q1. Why is net interest expense (net of interest and investment income) in 2016-17 $17 million (or 4.4%) lower than projected in the 2016 Budget?

A10. The decrease is mainly due to:

- $15 million higher investment income than expected;
- $2 million lower interest expense than expected.

Ruslan,

Some of the text is general and still valid, so we'd like to keep it as it is. For other updates, we'd rather wait for the final net debt and revenue numbers before making the update.

We do have small edits in the attached though.

Thanks.

John

Good day John,

Hope that you are doing well.

Attached you will find Cindy Veinot's comments on the Key Financial Ratio section (FSD&A). Internal password is used.

Can you please share the updated document by noon tomorrow? We would like to incorporate your latest version in our next distribution (July 25th).

Thank you, and have a good day.

Ruslan

Notes:

[1] Presentation of amounts reported as "Plan" in the 2016 approved Budget have been reclassified to reflect a presentation change for hospitals, school boards and colleges. These BPS organizations are now consolidated on a line-by-line basis, as described in "Accounting Changes."

[2] Actual results for 2015–16 have been restated to reflect both the presentation change as described in footnote 1 as well as the impact of reversing regulated accounting for net pension assets of jointly sponsored pension plans, as described in "Accounting Changes."

Numbers may not add due to rounding.

Comparison to the 2016 Budget plan

Total spending for 2016–17 came in at $141.7 billion, which was $0.1 billion lower than the forecast in the 2016 Budget plan. Program spending was $130.0 billion, up $0.6 billion from the budget of $129.4 billion. Spending in the health, justice, children's and social services and other programs was higher than planned, offset by lower spending in postsecondary and training. Interest on debt expense was $0.7 billion below plan in 2016–17, due mainly to lower-than-forecast interest rates, and cost-effective borrowing and debt management. [OFA to update, including reference to deficit]

Comparison to the 2015–16 fiscal year

Year-over-year, total spending rose by $2.0 billion, or 1.5 per cent, going from $139.7 billion to $141.7 billion. Increases in the health care, education, postsecondary and education, and children's and social services sectors accounted for most of the increase. Interest on debt rose by 1.0 per cent, from $11.6 billion to $11.7 billion, reflecting the increase in total debt from 2015–16 to 2016–17. [OFA]

Comparison to prior year and earlier years [OFA/OEP-To be updated]

Total revenues were up/down $XX billion, or XX per cent, from the previous year.

- Taxation revenues grew/fell by $XX billion, or XX per cent, reflecting […].
- Net income from GBEs [higher/lower] in 2016–17 by $XX billion, mainly due to […].

[Higher/lower] transfers under the […] transfer programs accounted for most of the $XX billion year-over-year increase in Government of Canada transfers. [explanation to be updated]

Change in ownership of energy sector government business enterprises [OFA]

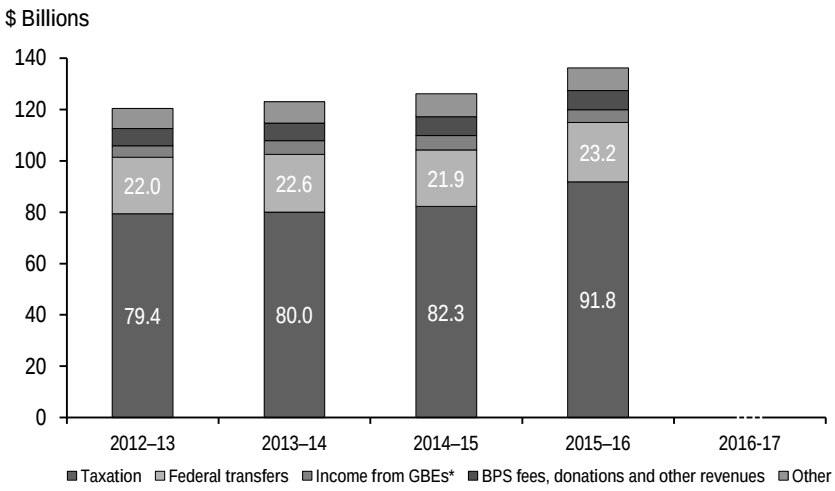
Hydro One secondary offering

In April 2016, the Province completed a secondary offering of Hydro One common shares. The Province sold 14.0 per cent of Hydro One's common shares at a price of $23.65 per share, generating gross proceeds of $2.0 billion. The Province reported a gain of $0.5 billion from the offering and, in March 2017, the government credited the Trillium Trust with $0.5 billion. As of March 31, 2017, the Province owned approximately 70 per cent of Hydro One's common shares.

An additional gain of $70 million was deferred in connection with the purchase by Ontario Power Generation (OPG) of nine million Hydro One common shares through the secondary offering. OPG purchased these shares to distribute to eligible employees as part of future share delivery obligations under collective agreements.

Hydro One Brampton sale

In February 2017, the Province sold its interest in Hydro One Brampton through a sale of shares to Alectra Utilities. As a result of sale, the Province reported a gain of $XX million. The government has committed to crediting the net proceeds from the sale to the Trillium Trust.



The sale of Hydro One Brampton also triggered a one-time payment-in-lieu of taxes (PILs) from Alectra Utilities to the Ontario Electricity Financial Corporation (OEFC), in connection to a step-up in the basis of Hydro One Brampton's assets.

Revenue trend [Chart to be updated]

Chart 2 shows the recent trends in revenue for the Province's major revenue sources.

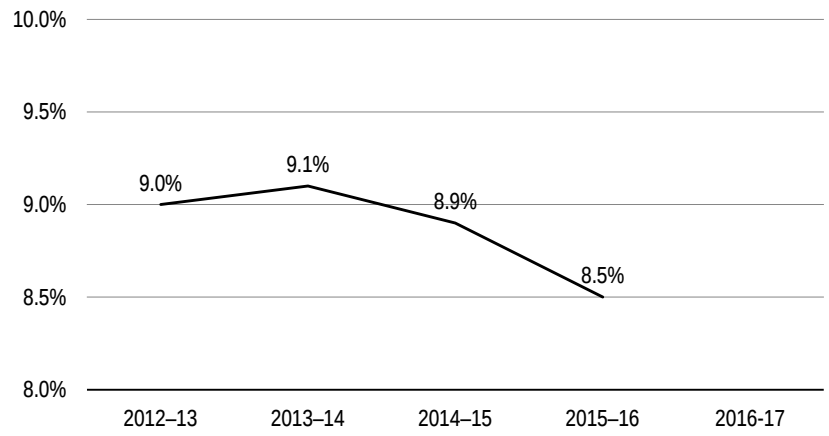
Revenue by source — 5-year comparison

Chart 2

* Government business enterprises (Liquor Control Board of Ontario, Ontario Lottery and Gaming Corporation, Ontario Power Generation Inc., Hydro One Limited and Brampton Distribution Holdco Inc.).

Interest costs [OFA]

Under line-by-line consolidation of BPS organizations, net interest expense on the debt of hospitals, school boards and colleges previously reported as an expense in their respective sector is now included in the interest on debt expense.



Interest on debt expense was $0.7billion below plan in 2016–17, mainly as a result of lower-than-forecast interest rates, the lower-than-planned deficit and cost-effective borrowing and debt management.

Interest expense grew from $11.6 billion in 2015–16 to $11.7 billion in 2016–17 (see Table 2).

Between 2012–13 and 2016–17, interest expense has trended upwards, reflecting higher borrowings required to fund the deficit and investments in infrastructure. Chart 6 shows that although interest costs have grown in absolute terms, they have steadily fallen as a percentage of the Province's revenues. The interest on debt-to-revenue ratio is now at its lowest level since 1990–91 [OFA to confirm]. This is mainly due to historically low interest rates, coupled with cost-effective debt management.

Debt servicing costs to total revenue — 5-year trend

Chart 6

[Chart to be updated]

Liabilities

Debt [OFA]

Debt and other long-term financing make up the largest share of liabilities. Debt increased by $XX billion in 2016–17 to $XX billion by year-end, primarily to finance the operating deficit and investments in infrastructure.

Net debt as at March 31, 2017, was $XX billion, $XX billion lower/higher than forecast in the 2016 Budget. Table 6 summarizes how the Province used its net new financing in 2016–17.

Use of new financing by the Province, 2016–17 ($ Billions)	Table 6
Operating deficit and other transactions[1]	XX
Cash invested in capital assets owned by the Province and its consolidated organizations, including hospitals, school boards and colleges[2]	XX
Increase in the Province's cash and investments	XX
	XX
Increase in other long-term financing[3]	XX
Net new financing	XX

Notes:

1 The Province's operating deficit of $XX billion was offset by a net $XX billion in changes to assets and liabilities that provided cash for operating purposes. See the Consolidated Statement of Cash Flow.

2 New investments of $XX billion less proceeds of $XX billion from the sale of tangible capital assets.

3 Including net increase in financing of capital projects through AFP. See Note 4 to the Consolidated Financial Statements.

The government completed an annual borrowing program of $27.0 billion in 2016–17. This yielded net new financing of $12.4 billion after adjustments and repayment of $21.9 billion in existing debt that matured. [To be updated]

Key Financial Ratios [OFA]

The use of key measures of financial position helps readers of the Annual Report assess the financial position of the Province. Through the levels and trends of these measures, readers are able to gauge the impacts of economic and other events on the Province's finances, as well as how the government has responded. The ratio, and the level of each, over the past five years are outlined in Table 7.

Key Financial Ratios — Table 7

as at the end of the fiscal period

		Restated 2012–13	Restated 2013–14	Restated 2014–15	Restated 2015–16	2016–17
Sustainability	Net Debt to GDP (%)	37.2%	38.6%	39.5%	XX%	XX
	Net Debt to Total Revenue (%)	210.1%	217.9%	226.1%	XX%	XX
	Net Debt per Capita ($)	$ 18,718	$ 19,644	$ 20,746	$ XX	$ XX
Flexibility	Debt Charges to Total Revenue (%)	9.0%	9.1%	8.9%	XX%	XX
	Own-Source Revenue to GDP (%)	14.5%	14.5%	14.4%	XX%	XX
Vulnerability	Federal Transfers to Total Revenue (%)	18.3%	18.4%	17.4%	XX%	XX
	Foreign Currency Debt to Total Debt (%)	24.3%	22.9%	20.9%	18.8%	XX
	Unhedged Foreign Currency Debt (%)	0.7%	0.5%	0.3%	0.3%	XX

Notes:

Actual results for 2012–13 to 2015–16 have been restated to reflect 1) the presentation change for hospitals, school boards and colleges. These BPS organizations are now consolidated on a line-by-line basis, as described in "Accounting Changes"; 2) the impact of reversing regulated accounting for net pension assets of jointly sponsored pension plans, as described in "Accounting Changes".

Measures of sustainability

Net debt provides a measure of the future government revenues that will be required to pay for the government's past transactions. Net debt as a percentage of the Province's GDP shows the financial demands on the economy resulting from the government's spending and taxation policies. A lower ratio of net debt-to-GDP indicates higher sustainability.

The Province's net debt-to-GDP ratio was XX per cent at the end of fiscal year 2016–17. Between 2012–13 and 2016–17, because net debt grew more quickly than GDP, the ratio increased from 37.2 per cent to XX per cent.

The government continues to maintain a target of returning net debt to GDP to the pre-recession level of 27 per cent. An important component in achieving this is to balance the budget. Debt is incurred for two main reasons: to finance deficits and to invest in capital assets. The government plans to invest $156 billion in capital over 10 years. These capital investments will be amortized over a period of time that corresponds to the useful life of the assets. After balancing the budget, increases in debt will be limited to the difference between the cash investment to build the assets and the amortization, which is a non-cash expense. [OFA – to update]

The government's plan to reduce the ratio of net debt to GDP therefore hinges on both balancing the budget and investing in capital assets to help the economy grow, both of which will help achieve the 27 per cent target.

The ratio of net debt to total revenue is another measure of sustainability, since it shows the future revenue that is required to pay for past transactions and events. A lower net debt-to-revenue ratio indicates higher sustainability. In 2012–13, the ratio was 210.1 per cent. It rose to 226.1 per cent in 2014–15, as net debt grew more quickly than revenue. Even with the change in the accounting treatment for pension assets, the ratio fell to XX per cent in 2016–17, indicating that total revenues increased at a greater rate than did net debt.

Measures of flexibility

The ratio of interest on debt to total revenue shows the share of provincial revenue that is being used to pay borrowing costs and is thus not available for programs. A lower ratio indicates that a government has more flexibility to direct its revenues to programs. The ratio has steadily fallen for Ontario over the past five years, from a high of 9.0 per cent in 2012–13 to the current level of XX per cent. Lower interest rates, as well as the Province's strategy of extending the term of its borrowing program and locking in low interest rates for a longer period has also contributed to lower interest costs. This strategy has extended the weighted average term to maturity of provincially issued debt from approximately 9 years in 2009–10 to 14 years in 2016–17. [OFA]

Own-source revenue as a share of the provincial GDP shows the extent to which the government is using funds from the provincial economy collected through taxation, user fees and other revenue sources it controls. Too high a taxation burden makes a jurisdiction uncompetitive, so increases in the ratio can reduce future revenue flexibility. Ontario's ratio was stable between 2011–12 and 2014–15. The increase from 15.1 per cent in 2015–16 to XX per cent in 2016–17 was largely due to the strong growth in tax and other revenues. This caused own-source revenues to increase more sharply than GDP.

Measures of vulnerability

Transfers from the federal government as a percentage of total revenue are an indicator of the degree to which the Province relies on the federal government for revenue. A very high ratio shows that a provincial government is very reliant on federal transfers, a source of revenue over which it has limited or no control, and is therefore vulnerable to shifts in federal policy on transfers. Ontario's highest share of revenue from federal transfers in the past five years was XX per cent, in 201X–1X. The lowest was XX per cent, in 201X–1X. The gradual decline largely represents the expiration of time-limited federal transfers, including the HST transition payment, and the maturing of federal stimulus programs put in place following the global economic crisis in 2008. [to be updated]

Foreign currency debt to total debt is a measure of vulnerability to changes in foreign currency exchange rates. Accessing borrowing opportunities in foreign currencies allows Ontario to diversify its investor base and take advantage of lower borrowing costs. It also ensures that the Province will continue to have access to capital in the event that domestic market conditions become more challenging. Ontario manages foreign currency risk by hedging its exposure to Canadian dollars through the use of financial instruments, which is called hedging. Effective hedging has allowed the Province to consistently limit its exposure to foreign currency fluctuations to 0.6 per cent of debt issued for provincial purposes in 2013–14, declining to 0.2 per cent in 2016–17. [to be updated]

Managing interest on debt

In addition, the interest on debt expense of $11.7 billion reported for 2016–17 was an improvement of $0.7 billion over the forecast of the 2016 Budget. Through a combination of lower-than-forecast deficits and borrowing requirements, lower-than-forecast interest rates and cost-effective debt management, interest on debt has consistently come in below forecast in each year since the 2010 Budget. Ministry of Finance

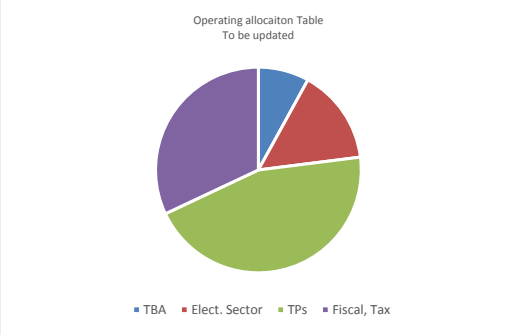
MINISTRY OVERVIEW

MANDATE

The Ministry of Finance's mandate is to help foster a dynamic, innovative and growing provincial economy and to manage the government's fiscal responsibilities as well as financial and related regulatory affairs of the province.

MINISTRY CONTRIBUTION TO PRIORITIES AND RESULTS



Through its mandate, the ministry works to support government's priorities which include fairness for Ontario families, creating a dynamic and competitive business environment and investing in people's talents and skills.

Commented [MB(1]: FES pgs. Vi, xi.

The ministry works with the Treasury Board Secretariat to manage the Province's $XXX.X billion[1] in annual expense and oversees $XXX.X billion[2] in revenue raised through taxation, Government of Canada transfers, provincial business enterprises, and other non-tax revenues. It also manages the Province's $XX.X billion[3] borrowing program.

In addition, the ministry supports government-wide initiatives and provides key fiscal, taxation, statistical and economic policy advice to the Minister of Finance, Cabinet committees and the Premier. It also regulates the financial services sector through its agencies.

The ministry provides leadership in transforming Ontario's public services, helping to develop new strategies, policies and processes designed to drive government-wide efficiencies and enable modernization initiatives, while also remaining focused on implementing measures that meet annual budget targets.

PROGRAM OUTCOMES SUPPORTING THE MINISTRY'S PLAN

Financial/Economic Stewardship

Office of the Budget

- Works with other program areas and central agency partners to provide analysis and advice to the Deputy Minister, Minister, and government on the development of the fiscal plan, federal-provincial fiscal arrangements, and policy initiatives.
- Supports the development of fiscal assumptions, narratives and underlying initiatives that effectively articulate / balance the government's policy and fiscal priorities in the context of the annual Budget, the Economic Outlook and Fiscal Review, the Quarterly Finances and other key publications.

Office of Economic Policy

- Provides timely advice to government on emerging economic trends and issues.
- Ensures increased access to relevant information, evidence-based analysis, research and advice on matters that impact Ontario's economic and fiscal agenda. This includes providing better economic information available for long-term planning purposes.
- Develops new Ontario level data and datasets to support research. This ensures more effective research, analysis and policy advice on Ontario's economy.
- Works to ensure a sustained "top ten" ranking for the Toronto region's financial services sector among international financial centres.

Ontario Financing Authority

- Initiates the successful execution of the Province's borrowing requirement. This includes managing the Interest on Debt (IOD) expense and in the process consistently generating savings in relation to the budget.
- Issues Green Bonds of approximately $1 billion per annum to fund capital initiatives that are aimed at reducing greenhouse gases.
- Supports the servicing and paydown of OEFC's legacy debt and liabilities related to the former Ontario Hydro, including the reduction of OEFC's unfunded liability ("stranded debt") as reported in OEFC's annual financial statements.
- Dedicates and tracks net revenue gains raised through asset optimization and to track the drawdown of those amounts for allocation to the government's infrastructure investment program.

Policy/Program Delivery Leadership

Office of Tax, Benefits and Local Finance

- Increases the effectiveness of compliance by using a risk-based approach to focus appropriate resources on the right taxpayers.
- Integrates benefits delivery to improve client access and drive administrative efficiencies.
- Increases the overall effectiveness of the collections process at recovering outstanding accounts receivable.
- Ensures the CRA is accountable for administration of Ontario's taxes and benefits including costs recovered for enhanced services.
- Optimizes revenue integrity largely through fee-for-service investments for enhanced compliance activities.
- Ensures broad compliance and compatibility with the Tobacco Tax Act (TTA) while supporting First Nations economic development and diversification.
- Ensures only tax compliant businesses will be able to enter into agreements or receive financial assistance from the provincial government, resulting in greater confidence that public funds are rewarding legitimate operators, and not contributing to underground economic activities.
- Ensures the reduction in underground economy activity, through new avenues of investigation into noncompliance, particularly in high-risk sectors, through partnering with other regulatory / compliance organizations (such as the Ministry of Labour).
- Achieves education property tax gross revenue growth of at least 0.50% annually.
- Provides advice to the Minister of Finance on fiscal arrangements with municipalities, as well as oversight with respect to provincial-municipal financial strategies and policy priorities.
- Ensures that the OMPF grant is responsive to changes in municipal circumstances and continues to target funding in a fair and transparent manner. Targeted funding is provided to support Ontario municipalities facing the most challenging fiscal circumstances.
- Provides informed, evidence-based advice and options on matters that impact Ontario's corporate, commodity and personal tax system.
- Ensures the strengthening of Ontario's tax competitiveness for business investment, while enhancing and modernizing supports for individuals and families.

Office of Regulatory Policy and Agency Relations

- Advise the government on matters related to income security and pension policy so that they can make informed policy decisions.

- Ensures the Province satisfies its investment and governance obligations with respect to Hydro One.
- Provides recommendations and policy and financial analysis with respect to multiple sectors including Steel sector negotiations, affordable housing and artificial intelligence.
- Continues to generate significant revenue through OLG while supporting the government's commitment to create a dynamic business environment and stronger economy while delivering gaming in a socially responsible manner.
- Ensures the selling of beverage alcohol in a socially responsible manner, while providing funds that have been used to support key government priorities such as health care, education and skills training, and infrastructure and transit investments.
- Implements Ontario's cannabis retail and distribution model, ensuring safe and controlled sales that keep cannabis products away from youth, reduce the illegal cannabis economy and control cannabis price in order to advance policy goals.

Other key transformational activities include:

- Providing program areas, line ministries and central agency partners with additional support in priority-setting, policy development and longer-term planning.
- The creation of a new Ontario Statistics Office which provides leadership on data management, modelling and analytics, and statistical policy.
- Innovatively mitigating the risk of debt issued in foreign currencies.
- Initiating administrative improvements to support the ongoing integrity of the $7B in provincial Education Property Taxes (EPT) by further enhancing the tracking and analysis of these revenues.
- Reengineering revenue processing, image capture and data entry business processes that enables e-services and procuring a new system solution to support transformation.
- Establishing the Financial Services Regulatory Authority — a new, flexible and innovative financial services and pension regulator that will strengthen consumer, investor and pension plan beneficiary protection.

HIGHLIGHTS OF 2017-18 ACHIEVEMENTS

The Ministry of Finance performs a variety of critical roles, focused on supporting effective economic, fiscal and financial management for a stronger Ontario. Its 2017–18 achievements include:

Delivering on the Balanced Budget Plan

The ministry was active in a variety of sectors that enabled the government to restore balance to the Province's finances in 2017–18. Through targeted, measured and fiscally responsible decisions, the province's fiscal and economic strength has been restored.

Supporting a Dynamic Business Climate

To improve the province's overall business climate, the ministry supported a variety of initiatives that make Ontario an attractive environment for business investment.

Strengthening the Financial Services Sector

The ministry led a variety of initiatives focused on enhancing the province's financial services sector.

Building Retirement Security

The ministry led the implementation of a variety of pension reform measures aimed at improving the adequacy and coverage of pensions in Ontario.

Addressing the Underground Economy

The ministry led several innovative pilots and projects aimed at ensuring all citizens pay their fair share of taxes as well as enhancing the competitiveness of legitimate businesses.

Working with Indigenous Partners

The ministry continued to take the lead in government dialogue with First Nation communities and leaders on tobacco, gasoline and the energy sector for mutually beneficial outcomes for the province and First Nation communities.

Facilitating Openness and Accountability

The ministry continued to further strengthen transparency, financial management and fiscal accountability to ensure Ontarians receive the best value for their tax dollars.

Further detail of the ministry's achievements can be found in the Appendix: 2017-18 Annual Report.

MINISTRY OF FINANCE ORGANIZATIONAL STRUCTURE

Commented [MB(2]: To be updated by HR.

Reporting to the Minister of Finance

- Parliamentary Assistant – Yvan Baker
- Chief of Staff - Ali Ghiassi
- Chair, Ontario Financing Authority – Scott Thompson
- Chair, Ontario Electricity Financial Corporation - Scott Thompson
- Chair, Ontario Securities Commission – Maureen Jensen
- Chief Executive Officer/Superintendent, Financial Services Commission – Brian Mills (Acting)
- Chair, Financial Services Commission & Financial Services Tribunal – Ian McSweeney
- Chair, Deposit Insurance Corporation of Ontario – Steve Blakely
- Chair, Liquor Control Board of Ontario – Penny Lipsett (Acting)
- Chair, Ontario Lottery & Gaming Corporation – George Cook
- Chair, Financial Services Regulatory Authority of Ontario – Bryan Davies
- Deputy Minister of Finance – Scott Thompson

Reporting to the Chair, Ontario Financing Authority:

- Chief Executive Officer, Ontario Financing Authority – Gadi Mayman
- Assistant Deputy Minister, Corporate & Electricity Finance Division - Ronald Kwan
  (also reports to the Associate Deputy Minister, Office of Government Business Enterprises & Strategic Initiatives)

Reporting to the Chair, Ontario Electricity Financial Corporation:

- Chief Executive Officer & Vice Chair, Ontario Electricity Financial Corporation – Gadi Mayman

Reporting to the Deputy Minister of Finance:

- Chief Information Officer, Central Agencies Information & Information Technology Cluster – Ron Huxter
  (also reports to the Ministry of Government Services)
- Director, Communications Services Branch - Jenna LeBlanc
- Director, Finance Audit Services Team, Ontario Internal Audit Division – Gord Nowlan
  (also reports to Treasury Board Secretariat and to the Chief Administrative Officer & Assistant Deputy Minister, Corporate & Quality Services Division)
- Director, Legal Services Branch – Michael Waterston (Acting)
  (also reports to the Ministry of the Attorney General)
- Associate Deputy Minister, Office of Regulatory Policy & Agency Relations – Nancy Kennedy
- Assistant Deputy Minister, Office of the Budget – Tim Schuurman

- Assistant Deputy Minister & Chief Economist, Office of Economic Policy - Brian Lewis
- Chief Administrative Officer & Assistant Deputy Minister, Corporate & Quality Service Division – Helmut Zisser
- Associate Deputy Minister, Office of Tax, Benefits & Local Finance – Mike Weir

Reporting to the Associate Deputy Minister, Office of Regulatory Policy & Agency Relations:

- Assistant Deputy Minister, Government Business Enterprise Division – Scott Nelms
- Executive Lead, Cannabis Retail Implementation Project – Nicole Stewart (Acting)
- Assistant Deputy Minister, Financial Services Policy Division –David Wai
- Executive Lead, Cooperative Capital Markets Regulatory (Temporary) – Kathleen Ward (Acting)
- Assistant Deputy Minister, Income Security & Pension Policy Division – Elizabeth Doherty

Reporting to the Assistant Deputy Minister, Government Business Enterprise Division:

- Gaming Policy Branch – Tanya Watkins (Acting)
- Alcohol & Cannabis Policy Branch - Jake Gregory (Acting)
- Investment & Governance Branch – Keley Katona (Acting)

Reporting to the Assistant Deputy Minister, Financial Services Policy Division:

- Financial Institutions Policy Branch – Joel Gorlick
- Financial Services Regulation Modernization Secretariat (Temporary) - Sunita Chander

Reporting to the Executive Lead, Cooperative Capital Markets Regulatory:

- Securities Reform Policy Branch (Temporary) - Colin Nickerson (Acting)

Reporting to the Assistant Deputy Minister, Income Security & Pension Policy Division:

- Pension Policy Branch – Lynn Lawson (Acting)
- Income Security Policy Branch – Norm Helfand
- BPS Pensions Branch – Alex Killoch
- Director (Temporary) - Marc Sharrett (Acting)

Reporting to the Assistant Deputy Minister, Office of the Budget:

- Fiscal Policy Branch - Selena Esmail
- Strategic Policy Branch – Brandon Chaput

Reporting to the Assistant Deputy Minister & Chief Economist, Office of Economic Policy:

- Macroeconomics & Revenue Branch – Paul Lewis
- Labour Economics Branch – Bill Praamsma
- Industrial Economics Branch – Rob Gray
- Statistics Integration Branch - Melissa Kitmer

Reporting to the Chief Administrative Officer & Assistant Deputy Minister, Corporate & Quality Services Division:

- Business Services Branch - Mimi Wong
- Corporate Planning & Finance Branch – Linda Gibney
- Strategic Human Resources Services Branch – Stephen Boyd

Reporting to the Associate Deputy Minister, Tax, Benefits & Local Finance:

- Assistant Deputy Minister, Taxation Policy Division - Sriram Subrahmanyan
- Assistant Deputy Minister, Provincial-Local Finance Division – Allan Doheny
- Assistant Deputy Minister, Strategy, Stewardship & Program Policy Division – Alison Drummond (Acting)
- Assistant Deputy Minister, Tax Compliance & Benefits Division - Agatha Garcia-Wright

Reporting to the Assistant Deputy Minister, Taxation Policy Division:

- Personal Tax Policy & Design Branch - Kostas Plainos
- Corporate & Commodity Taxation Branch – Ann Langleben

Reporting to the Assistant Deputy Minister, Provincial-Local Finance Division:

- Property Tax Policy Branch – Chris Broughton
- Municipal Funding Policy Branch – Robert Lowry
- Assessment Policy & Legislation Branch – Diane Ross

Reporting to the Assistant Deputy Minister, Strategy, Stewardship & Program Policy Division:

- Strategy, Stewardship & Risk Management Branch - Jason Stanley
- Program Policy & Analytics Branch - Paul Devnich (Acting)
- Benefits Transformation Branch – Mashood Mirza
- Sales Integrity Project Office (Temporary) - Ben Sopel (A)

Reporting to the Assistant Deputy Minister, Tax Compliance & Benefits Division:

- Compliance Branch – Heather Bowie
- Advisory, Objections, Appeals and Services Branch - Victoria Chiodi
- Account Management & Collections Branch – Maureen Kelly

AGENCIES, BOARDS AND COMMISSIONS

Deposit Insurance Corporation of Ontario (DICO): promotes the safety and soundness of Ontario's credit unions and caisses populaires by undertaking regulatory oversight activities, establishing standards for sound business and financial practices, and providing deposit insurance coverage within statutory limits.

Financial Services Commission of Ontario (FSCO): an integrated regulator of Ontario's insurance industry; pension plans; loan and trust companies; credit unions and caisses populaires; the mortgage brokering sector; health service providers and co-operative corporations.

Financial Services Tribunal: an independent, adjudicative body that conducts hearings arising from regulatory and proposed regulatory decisions of the Superintendent of Financial Services.

Liquor Control Board of Ontario (LCBO): responsible for the importation, distribution and sale of beverage alcohol in the province in an efficient and socially responsible manner.

Ontario Electricity Financial Corporation (OEFC): the legal continuation of the former Ontario Hydro responsible for managing that organization's legacy debt and other liabilities.

Appendix: 2017-18 Annual Report

Ministry of Finance

2017-18 ACHIEVEMENTS

In 2017-18, the Ministry of Finance engaged in a number of activities to achieve its key priorities. These highlights of the ministry's achievements include:

1. Delivering on the balanced budget plan

Fiscal Framework

- Led the development, and provided strategic oversight of the fiscal plan including tracking the government's progress in meeting fiscal targets with key partners at the Treasury Board Secretariat and Cabinet Office. Reported on the fiscal plan through the Budget, Quarterly Finances, Economic Outlook, and Fiscal Review and Public Accounts.
- Delivered the 2017 Ontario Economic Outlook and Fiscal Review, the 2017-18 First and Third Quarter Finances and the 2018 Budget that supports the government's commitment to a balanced budget.
- Advised on Ontario's fiscal relations with the federal government and maintained contact with federal, provincial and territorial finance partners to advance Ontario's fiscal priorities.
- Completed the final share offering of Hydro One which exceeded its objective to raise $9 billion in gross proceeds and other revenue benefits. This includes $4B in net revenue gains that will be invested in infrastructure and $5B to reduce debt.

Transforming Government and Managing Costs

- Implementation and administration of the Ministry of Community and Social Services Basic Income Pilot program which will assess whether a basic income can better support vulnerable workers, improve health and education outcomes for people on low incomes, and help ensure that everyone shares in Ontario's economic growth.
- Development of a Benefits Finder online tool which is intended to provide streamlined online access to user-specific program and eligibility information for many provincial income-based benefit programs. Client research was initiated Spring 2016, and the results are being used to inform the next steps of the Benefits Finder. Launch is anticipated for Winter 2017-18.

Taxation Policy

- With other provinces, territories and the federal government, improved the Tax Collection Agreement to ensure it reflects Ontario's interests.
- Implemented a Senior's Public Transit Credit to help Ontario's seniors participate in community life, making public transportation more affordable for them.

- To support the ongoing integrity of education property tax revenues, MOF maintained the adjustment to education property tax rates, as announced in the 2016 Budget.
- Provincial Land Tax reform has significantly increased tax fairness and reduced inequities in how services are paid for in the North, and changes to rates have generated a revenue increase of about $15 million by 2017.
- Implemented measures to address unsustainable demand, support housing affordability and modernize the Land Transfer Tax (LTT) including:
  - introduced a 15 per cent Non-Resident Speculation Tax as part of Ontario's Fair Housing Plan.
  - doubled the maximum LTT refund to $4,000 for eligible first-time homebuyers
  - restricted eligibility criteria for the LTT refund for first-time homebuyers to Canadian citizens and permanent residents to better target the refund, and
  - increased certain LTT rates and adjusted parameters to better reflect the real estate market.
- The province has provided Transition Mitigation Payment assistance to eligible municipalities where revenue implications of the tax exemption of all charitable and non-profit long-term care homes represents a more significant proportion of the municipality's total revenue base.

Borrowing and Debt Management

- Through the Ontario Financing Authority (OFA), continued to efficiently manage the Province's borrowing program.
- Completed the government's annual borrowing program, capitalizing on low interest rates and a strong demand for Ontario's bonds in 2017-18, borrowing $33.9 billion, an increase from the $26.4 billion forecast in the 2017 Budget. As of March 5, 2018, the Province had pre-borrowed $8.1 billion for 2018–19.
- ~~Completed the government's annual borrowing program, capitalizing on low interest rates and a strong demand for Ontario bonds in 2017-18, borrowing $XX.X billion, and increase/decrease from the $XX.X billion forecast in the 2017 Budget.~~
- Issues Green Bonds of approximately $1 billion per annum to fund capital initiatives that are aimed at reducing greenhouse gases. To date, total Green Bond issued amounts to $~~1.77~~2.27 billion, of which $~~1.2~~1.6 billion allocated to Metrolinx for clean transportation projects, including ~~$1.77~~2.27 billion allocated to the Eglinton Crosstown LRT project.
- ~~Through prudent and cost-effective debt management and lower than forecast deficits, interest on debt expense savings of $0.X billion was achieved in 2017-18.~~

2. Supporting a dynamic business climate

Policy/Taxation Measures

- The Renewed Advisory Outreach Strategy was developed to help educate the public and to make it easier to understand Ontario's tax laws and benefits programs.
- The current agreement with the CRA for enhanced audit activities to address aggressive tax planning and the underground economy has generated over $1B to date as of Q1 2017-2018 since 2013, a 5.3:1 return on investment.
- Ran a successful, large scale, open competitive procurement to establish new contracts with four private collection agencies which allows MOF to focus on newly delinquent accounts. In fiscal 2017-18 PCAs collected over $XX.XM for the province.
- As a result of collections efforts, $XXX.XM in outstanding tax receivables and $XXX.XM in outstanding non-tax receivables were collected in fiscal 2017-18 on approximately $X.X billion in outstanding receivables and overpayments across the OPS.
- Led implementation of the new Student Loan Rehabilitation Program on behalf of the Ministry of Advanced Education and Skills Development (MAESD) to help student loan debtors bring their loans back into good standing. A total of 2,348 student loan debtors enrolled in the program as of September 2017.
- Operationalized the expansion of the Refund Set-Off (RSO) program to include tax statutes for individuals (e.g. RST, Gas Tax, Tobacco Tax, Land Transfer Tax, etc.) In 2017-18 Ontario recovered $XXM through RSO and has 18 active programs registered including Ontario Student Loans and Ontario Disability Support Program.
- As part of Ontario's Fair Housing Plan, the Province is introducing legislation to empower the City of Toronto, and potentially other interested municipalities, to introduce a vacant homes property tax to encourage property owners to sell unoccupied units or rent them out.
- Initiated a review of the property taxation of multi-residential apartment buildings to improve housing affordability in the rental market. While the review is under way, the Province has frozen the municipal property tax burden for existing multi-residential properties in communities where these taxes are high.
- Conducted a review and consultations on the property tax treatment of small-scale value-added and commercial activities on farm properties.
- Engaged former Cabinet Minister John Wilkinson to lead consultations and develop recommendations on the valuation and tax classification of landfills. The ministry developed complex new regulations and worked with MPAC and municipalities to support the successful implementation of this new approach in time for the 2017 tax year.
- The Ontario Municipal Partnership Fund (OMPF) has been redesigned to target funding to municipalities with the most challenging fiscal circumstances.
- Implementation of the 15% Non-Resident Speculation Tax (NRST) on the purchase or acquisition of an interest in residential property in the Greater

Golden Horseshoe (GGH) by individuals who are not citizens or permanent residents of Canada or by foreign corporations and taxable trustees.
- Partnered with the CRA and Airbnb to educate Ontarians who engage in home-sharing about their rights and responsibilities and raise awareness of tax obligations.
- Support the restructuring of Stelco through 3 loans, providing funding assistance to OPEB, Stelco and Landco.

Alcohol and Gaming (Ministry, LCBO and OLG)

- Continued the modernization of the alcohol and gaming sectors and increased provincial revenues within a framework of social responsibility.
- Continued to introduce the sale of beer, cider and wine into grocery stores, giving consumers more choice and convenience. There are now up to 275 grocery stores authorized to sell beer and cider.
- Announced the Ontario Small Cidery and Small Distillery Support Program, which will invest $7.2 million over three years to support small cider and small spirits producers.
- To balance opportunities for Ontario's domestic wine suppliers, the bag-in-box assortment is being expanded at the LCBO.
- Continue work on legislative amendments to permit the sale of International-Canadian Blends (ICB) wine at all on-site stores.
- Implemented the Spirits Tax which replaces the LCBO's mark-up commission structure for spirits and spirits coolers sales at on-site distillery retail stores.
- The Ministry of Finance is proposing a safe and sensible approach to the retail and distribution of recreational cannabis, overseen by the LCBO through a subsidiary corporation. Ontario`s approach would meet high standards of control and social responsibility, while responding to consumer demand and eliminating the illegal market.
- The modernization of OLG's land-based gaming sector will expect to have assumed control of six (6) bundles, with procurement for other regions in progress.
- Continuing with the integration of horse racing with OLG's gaming strategy by providing policy support and oversight over the Horse Racing Partnership Plan (HRPP), and sectoral consultations regarding a future long-term funding model that will help drive sustainability within the industry.

Economic Analysis, Reporting and Policy Advice

- Provided analytical, policy and research support to the Premier's Office, Cabinet Office and ministries on a number of priorities, including the Business Growth Initiative, the Highly Skilled Workforce Expert Panel Report, the Poverty Reduction Strategy and the Changing Workplace Review Panel.

- Renewed a three-year agreement with the Toronto Financial Services Alliance to support the organization's strategic objective to grow the Toronto region as a global financial hub and cluster.
- Reviewed investment proposals under the government's Jobs and Prosperity Fund and regional programs.

3. Strengthening the financial services sector

- Led support of the multi-phased transition to the Financial Services Regulatory Authority of Ontario (FSRA).
- Led the development of legislative amendments regarding the structure and powers of the Financial Services Tribunal (FST) based on government's commitment in the *2017 Ontario Budget*.
- As part of implementing the recommendations from the review of the Credit Unions and Caisses Populaires Act, 1994 (CUCPA), released a consultation paper on a proposed capital adequacy framework for adopting internationally accepted (Basel III) capital standards for Ontario credit unions.
- Work to implement recommendations to reform the auto insurance system to improve health outcomes and lower costs to achieve more affordable auto insurance for Ontarians.
- Advanced work towards finalizing the Cooperative System legislation and initial regulations, governance structure and accountability framework.
- Consulted with stakeholders and the public on a report by Ontario's advisor on auto insurance, David Marshall, that recommends transformative steps to reduce auto insurance costs and improve health outcomes for those injured in collisions.
- Worked with partner ministries and stakeholders on developing a new women's economic empowerment strategy that addresses the gender wage gap and accelerates greater representation of women on boards.

4. Building retirement security

- Provided analysis and advice on the government's review of federal and provincial income security programs.
- Worked closely with the Ministry of Community and Social Services to support the development and launch of a Basic Income Pilot.
- Developed, managed and phased-out the Transition Fund that provided health benefits to retirees of United States Steel Canada as part of the Stelco Companies' Creditors Arrangement Act process.
- Introduced legislative and regulatory amendments to the rules governing the merger of single employer defined benefit pension plans that provide additional flexibility to plan administrators structuring mergers.

- Announced a comprehensive package of pension reforms to help make workplace pension plans more sustainable, including the Solvency Funding Framework and the Target Benefit Multi-Employer Pension Plan Funding Framework.
- Strengthened the powers of the Superintendent of Financial Services, including making regulatory changes to set out a regime for administrative monetary penalties in the pension sector.
- Brought forward regulatory changes necessary to support the Superintendent in managing the cash flows in the Pension Benefits Guarantee Fund.

5. Addressing the underground economy

- A project office was established to implement a sales integrity pilot project to combat electronic sales suppression.
- Currently working with the Ministry of Health and Long Term Care and Public Health partners on a cross–designation pilot project to take enforcement action under the Tobacco Tax Act and/or the Smoke Free Ontario Act.
- Provincial oversight of Raw Leaf Tobacco (RLT) has also been enhanced to more effectively monitor its movement through the supply chain by implementing raw leaf tobacco baling or packaging and labelling requirements to impede its flow to unlicensed manufacturers. In July 2016, regulations regarding the tagging of RLT bales came into effect.
- Negotiated new fee-for-service agreements with the Canada Revenue Agency to protect Ontario revenue including enhanced compliance measures (e.g., auditing) and a service level agreement for underground economy specialist teams.
- New risk models were developed and implemented in the Flexible and Integrated Risk System (FAIRS) that enhance the risk analysis methodologies used to conduct evidence based decision making for the effective allocation of resources to high risk areas in audit and inspections.
- Addressed underground economic activity through a public awareness campaign targeting multiple high-risk sectors, including home renovation, and partnered with the Ministry of Transportation on a pilot project to determine the tax compliance of construction subcontractors the ministry procured.

6. Working with Indigenous partners

- Continued engagement with First Nations to identify mutually-beneficial solutions to tobacco on-reserve. This includes discussions on self-regulation and revenue-sharing.

- The Ministry continues to work closely with various law enforcement agencies such as the RCMP and the OPP to reduce the presence of unregulated tobacco in Ontario.
- Signed definitive agreements with First Nations in Ontario to sell to First Nations for their collective benefit, shares of Hydro One Limited.

7. Facilitating openness and accountability

- Provided advice and support to other ministries to ensure an open and productive relationship with the Financial Accountability Office.
- Initiated the development of new ways to deliver data and statistical services that are efficient, cost-effective and transparent in support of evidenced-based decision-making and advancing the government's commitments to Open Government and collaboration with external experts and academic institutions on difficult policy challenges.
- Capitalized on new methods of public and stakeholder participation in the Ontario pre-budget consultation and budget development processes.
- Implemented the recommendations of the Special Purpose Business Property Assessment Review report for the 2016 reassessment (2017 tax year) in collaboration with the Municipal Property Assessment Corporation, municipalities and other stakeholders. These are expected to increase the transparency, accuracy and predictability of property assessments, reducing the number and impact of appeals, and promoting greater revenue stability from the $27 billion shared property tax base.
- Provided additional property tax flexibility to enable municipalities to better tailor programs to reflect their local needs and circumstances, while ensuring the property tax system continues to remain fair and competitive.
- Reported on the Trillium Trust to help support public transit, transportation and other priority infrastructure projects.

Part II: 2018-19 Detailed Financials

Ministry of Finance

12 – MINISTRY OF FINANCE

The Ministry of Finance supports the economic, fiscal, financial, and taxation policies and strategies of the Government of Ontario, and oversees the Province's borrowing and debt management program. The ministry administers a number of tax statutes, tax credits and benefit programs, and produces the provincial budget. In conjunction with Treasury Board Secretariat, the ministry also manages the Consolidated Revenue Fund and fiscal and financial policies of the Government of Ontario, and reports on financial matters. The ministry also develops policies for Ontario's financial services sector and supports the regulation of financial services institutions and intermediaries carrying on business in the province. In addition, the ministry manages Ontario's fiscal relationship with the federal government, other provinces and Ontario's municipalities, reports on the Trillium Trust, and oversees agencies accountable to the Minister of Finance. The Ministry also reports on economic and demographic developments in the province and provides analytical support and policy advice on these topics as well as statistical issues and trends that affect Ontario's economic growth and job creation.

MINISTRY ADMINISTRATION PROGRAM

1201-1 – Ministry Administration

Sub-Item 1 – Main Office
Sub-Item 2 – Financial and Administrative Services
Sub-Item 3 – Human Resources
Sub-Item 4 – Communications Services
Sub-Item 5 – Legal Services
Sub-Item 6 – Audit Services

Statutory Appropriations

Minister's Salary, Parliamentary Assistant's Salary, the *Executive Council Act*; Bad Debt Expense, the *Financial Administration Act*

Statutory Appropriations

Amortization, the *Financial Administration Act*

1201 – MINISTRY ADMINISTRATION

This program, which includes the Offices of the Minister and Deputy Minister delivers planning, advisory, legal, and controllership functions to ensure direction and management of operating programs consistent with Ontario Government policy and legislation. In addition, the program manages the service relationships with Treasury Board Secretariat and the Ministry of Government and Consumer Services, ensures proper levels of support to the ministry and its client groups, and strategically manages the ministry's quality service commitments.

OPERATING BY SUB-ITEM

[Table to be inserted by CPFB]

VOTE/ITEM: **1201-1 Sub-Item 1**

VOTE: **Ministry Administration**

ITEM: **Main Office**

TYPE: **Operating Expense**

SUB-ITEM DESCRIPTION

This sub-item includes the offices of the Minister of Finance, the Parliamentary Assistant and the Deputy Minister. The staff provide professional and technical support for the legislative policy making and administrative responsibilities of the Minister and the Deputy Minister.

FUNCTIONS

The Main Office is responsible for:

- overseeing ministry operations and adherence to corporate policies and directives;
- providing a leadership role in supporting broader government priorities including transformational policy changes that would help sustain longer term delivery of core public services;
- coordinating policies developed in the ministry for the approval of the Minister and the Deputy Minister;
- coordinating the preparation of replies to correspondence to the Minister and Deputy Minister;
- the preparation of verbal and written briefings for the Minister's presentations to Cabinet, Committees of Cabinet and other meetings such as pre-budget consultations, federal-provincial conferences and stakeholder/interest groups.

SUB-ITEM DESCRIPTION

This sub-item provides ministry strategic support for Program Review, Renewal and Transformation and Estimates, executive decision support, financial controllership, risk management, corporate accounting, emergency management and security services, accommodation management, coordination of corporate and ministry-specific modernization programs and administration of the *Freedom of Information and Protection of Privacy Act*. This sub-item represents the ministry's point of contact with central agencies.

FUNCTIONS

These offices are responsible for delivering the ministry's obligations for the following:

- leading the controllership function, including the accountability framework, strategic procurement advice, loan administration, the Trillium Trust framework, and Public Accounts;
- coordinating, preparing and providing strategic support to the Program Review, Renewal and Transformation planning process and the annual Estimates process;
- in-year risk management and planning, monitoring and reporting of financial and other resource management strategies including preparing and/or reviewing all central agency submissions, for example TB/MBC submissions;
- managing the ministry's accommodation portfolio, including development of strategic options analysis and lease management to ensure optimal space utilization;
- administering the Freedom of Information and Protection of Privacy Act for the ministry, its agencies, boards and commissions, including processing requests for access to records, and ensuring compliance with the privacy provisions of the Act;
- leading strategic and operational planning to promote compliance with records and information management requirements;
- developing and implementing the ministry's Emergency Management Program and Physical Security Program, including leading, coordinating, testing, updating and maintaining the ministry's Continuity of Operations Plans and Physical Security Plans and providing security services;
- coordinating the ministry's compliance with the Ontarians with Disabilities Act, 2001 and the Accessibility for Ontarians with Disabilities Act, 2005; and
- coordinating corporate and ministry modernization programs including Employee Engagement and Recognition, Inclusion, Mental Health and Wellness, Workplace Violence Prevention, Service Excellence, Summer Experience Opportunities, Greening, and Open Government.

SUB-ITEM DESCRIPTION

This sub-item represents the Finance Audit Service Team (FAST) of Treasury Board Secretariat, which provides risk-management and consulting services, as well as independent assurance services to the Ministry of Finance and some of its agencies. FAST's overall objective is to ensure that the ministry's financial and risk management plans and processes meet the highest standards of integrity, accountability and transparency.

The FAST Audit Director reports functionally to the Finance Audit Committee (FAC), which is chaired by the Deputy Minister of Finance. FAC is responsible for ensuring that FAST has sufficient resources to carry out its responsibilities. FAST is primarily funded by the Ministry of Finance based on actual cost recovery basis.

FUNCTIONS

The services provided by FAST include:

- value-for-money, financial and internal control audits;
- compliance reviews;
- risk assessment and control reviews;
- forensic and fraud investigations;
- advice on governance, controllership, accountability and sound business practices, including advice and liaison to ministries related to Office of the Auditor General of Ontario audits;
- training and education on risk and control; and
- specialized audit, risk assessment and advisory services for information management and information technology projects.

ITEM DESCRIPTION

The Income Security and Pension Policy Division provides advice and analysis on employment pensions plans, including pension reform and federal and provincial income security programs, as well as providing research and analysis on income security and pensions policy programs.

FUNCTIONS

The Income Security and Pension Policy Division is responsible for:

- consulting with stakeholders on pension policy issues, leading development of Cabinet submissions, legislation and regulations;
- providing advice and analysis on employment pension plans and income security policy including responsibility for Ontario's co-stewardship of the Canada Pension Plan;
- developing strategic policy regarding Ontario's retirement income system, including the development of innovative retirement savings models, such as Pooled Registered Pension Plans and target benefit plans;
- supporting development of the fiscal framework and expenditure planning processes by monitoring developments in federal income security programs and estimating provincial income security program impacts on business and individuals, pension benefits standards policy and public sector pension policy;
- supporting the Budget and Public Accounts processes with estimates of the fiscal expense for pension plans of teachers, Ontario Public Service (OPS) employees and employees of other consolidated entities; supporting the estimate of non-pension, post-retirement benefits of OPS employees for the purposes of provincial expenditures; estimates of income security programs for seniors and families with children;
- coordinating the Fair Society chapter of the Ontario Budget and Fall Economic Statement; and
- conducting research and analysis to support the development of pension, income security and benefits policy.

The Financial Services Policy Division (FSPD) provides advice on and advances financial services regulation and policy initiatives, including initiatives related to capital markets, securities and derivatives and initiatives related to the regulation of credit unions, mortgage brokers, co-operative corporations and insurance.

FUNCTIONS

The Financial Services Policy Division:

- represents Ontario in federal-provincial-territorial discussions regarding financial services policy;
- represents Ontario and advances Ontario's interests in the implementation of a cooperative capital markets regulatory system (CCMR), including leading the development of uniform capital market laws underpinning the CCMR and related legislation;
- acts as policy lead in the ongoing work to establish a regulatory framework to oversee the activities of individuals who offer financial planning services in Ontario;
- represents the Ministry of Finance in the ongoing inter-ministerial work to improve the representation of women on boards of directors and in executive positions;
- participates as a regulatory policy lead to support the ongoing work towards developing an Ontario financial technology (FinTech) strategy;
- continues to support the government's work to keep auto insurance affordable for Ontario's over ten million drivers while ensuring that claimants get the treatment they need;
- provides support for the implementation of the recommendations stemming from the five-year review of the Credit Unions and Caisses Populaires Act, 1994;
- provides support for the establishment of the new Financial Services Regulatory Authority of Ontario, including the development of necessary legislation and regulations and the establishment of an appropriate oversight and governance framework;
- provides analysis and advice on the regulatory framework for financial institutions and the financial services sector;
- implements initiatives to modernize the Insurance Act and its regulations, including work to integrate new sharing economy business models for providing transportation services into Ontario's auto insurance system; and

- works with the Financial Services Commission of Ontario (FSCO) and the Ontario Securities Commission (OSC) on issues relating to regulation of syndicated mortgage investments.

ECONOMIC, FISCAL AND FINANCIAL POLICY PROGRAM

1203-1 – Economic Policy

1203-8 – Office of the Budget

1203-12 – Ontario Electricity Financial Corporation Dedicated Electricity Earnings

Statutory Appropriations

Bad Debt Expense, the Financial Administration Act
Guarantees and Indemnities, the *Financial Administration Act*
Ontario Electricity Financial Corporation, the *Electricity Act, 1998*

1203-24 – Strategic Assets – Loans and Investments

1203-14 – Capital Expense

Statutory Appropriations

Amortization, the Financial Administration Act

1203-13 – Capital Assets

1203 – ECONOMIC, FISCAL AND FINANCIAL POLICY

This program develops and implements sound economic and fiscal strategies to raise revenue and stimulate economic growth and job creation; forecasts, monitors and reports on the performance of the Ontario economy; provides expertise and advice on sound economic design of and financial and implementation support for government initiatives; develops demographic forecasts for Ontario and its 49 census divisions; develops and provides strategic oversight of and advice related to the government's fiscal plan; assists the Minister of Finance and the government in formulating Ontario's finance policy and strategies with respect to federal-provincial fiscal arrangements; and provides policy advice to clients, managers, and decision makers in the areas of fiscal and financial management. The program is also responsible for facilitating engagement with central agency and line ministry partners to provide fiscal and budgetary policy advice and support policy development and prioritization. The program leads the Statistics Transformation Initiative to enhance how government collects, uses, and disseminates data and is responsible for leading statistics policy. In addition, the program reflects the transfer of dedicated electricity earnings from the province to the Ontario Electricity Financial Corporation.

This program assists the Minister, Deputy Minister of Finance and the government in formulating the fiscal plan and reporting the results of the Province through the Ontario Budget, Ontario Quarterly Finances, Ontario Economic Accounts, Economic Outlook and Fiscal Review, and Ontario's Public Accounts. The program undertakes annual population projections for use in resource allocation and planning, leads preparation of the Long-term Report on the Economy and contributes to the Pre-Election Report on Ontario's Finances required by the Fiscal Transparency and Accountability Act.

ITEM DESCRIPTION

The Office of Economic Policy (OEP) provides the Minister with:

- forecasts and analysis of the economy and revenues;
- advice and information on economic issues and trends and the development of sound economic strategies that foster economic growth and job creation;
- economic analysis of policy proposals;
- recommendations regarding individual project proposals coming forward through economic development programs;
- leadership advice and analysis on the use of statistics and statistics policy;
- population projections and analysis of demographic issues; and
- research and quantitative analyses to support the development of tax, pension, alcohol fee, income security and benefits policy.

The OEP also represents Ontario in federal-provincial-territorial discussions regarding economic analysis and forecasting, fiscal planning as it relates to revenue forecasting, reporting and federal payments and in discussions with Statistics Canada on matters related to statistical policy.

FUNCTIONS

The Office of Economic Policy:

- develops, researches, monitors, forecasts and reports on economic, financial, demographic, labour market, social issues and risks;
- reviews and assesses the economic impacts ministry policy proposals within the context of the economic and fiscal framework;
- supports decisions on project proposals coming forward through economic development programs;
- conducts research and policy analysis on a broad range of issues related to economic performance and growth;
- advances the use and integration of data and statistics in government decision-making;
- conducts research and policy analysis on labour market issues;
- develops long-range population projections; and
- supports the development of tax, pension, income support and benefits, and alcohol policies through: partnerships, research and quantitative analysis; the identification, development and utilization of quantitative models, methodologies and data; and the management of data holdings.

1204 – FINANCIAL SERVICES INDUSTRY REGULATION

The Financial Services Commission of Ontario (FSCO) regulates the province's financial services sector, including insurance companies, health service providers for auto insurance, pension plans, credit unions, caisses populaires, mortgage brokers, agents and administrators, loan and trust companies, and co-operatives. FSCO makes recommendations to the Minister of Finance on matters affecting these sectors. In addition, FSCO is responsible for the administration of the Motor Vehicle Accident Claims Fund (MVACF) which compensates people injured in automobile accidents in Ontario where there is no other insurance available to respond to the claim. FSCO is also responsible for the administration of the Pension Benefits Guarantee Fund (PBGF). The PBGF pays a minimum level of pension benefits if a plan is wound up with insufficient assets.

FSCO works with the Ministry of Finance, consumers and industry stakeholders to protect the public interest and enhance public confidence in the regulated sectors.

ITEM DESCRIPTION

The Financial Services Commission of Ontario (FSCO) regulates the province's financial services sector, including insurance companies, health service providers for auto insurance, pension plans, credit unions, caisses populaires, mortgage brokers, agents and administrators, loan and trust companies, and co-operatives. FSCO makes recommendations to the Minister of Finance on matters affecting these sectors. In addition, FSCO is responsible for the administration of the Motor Vehicle Accident Claims Fund (MVACF) which compensates people injured in automobile accidents in Ontario where there is no other insurance available to respond to the claim. FSCO is also responsible for the administration of the Pension Benefits Guarantee Fund (PBGF). The PBGF pays a minimum level of pension benefits if a defined benefit plan is wound up with insufficient assets.

FSCO works with the Ministry of Finance, consumers and industry stakeholders to protect the public interest and enhance public confidence in the regulated sectors.

FUNCTIONS

FSCO has established the following goals:

- be risk based, proactive, evidence based, balanced, transparent, service orientated, and collaborative in our work;
- further a coordinated national approach to regulatory issues; and
- be a recognized thought leader in regulatory policy.

To achieve its goals, FSCO is guided by its strategic and operational outcomes. These outcomes help FSCO's to achieve its core regulatory responsibilities to administer the laws and regulations governing the activities of the regulated sectors.

FSCO is also responsible for providing the administrative resources necessary for the proper functioning of the Financial Services Tribunal. The Financial Services Tribunal is an independent, adjudicative body that conducts hearings arising from regulatory and proposed regulatory decisions of the Superintendent of Financial Services.

The Motor Vehicle Accident Claims Fund (MVACF) provides compensation to people injured in automobile accidents in Ontario involving an uninsured or unidentified vehicle where no other automobile or liability insurance is available. MVACF is a business unit within the Automobile Insurance Division of the Financial Services Commission of Ontario.

FUNCTIONS

The Motor Vehicle Accident Claims Fund:

- satisfies judgments and claims for property damage or damages related to injury or death caused by an uninsured or unidentified motorist where the plaintiffs and claimants have no recourse to automotive insurance;
- provides statutory accident benefits to individuals injured in automobile accidents where the individuals have no recourse to automobile insurance;
- recovers from the owners and drivers of uninsured vehicles monies paid out on their behalf in satisfaction of judgments and claims, when it is legally possible; and
- administers the accident benefits claims portfolio of an insolvent insurer should a wind up order be issued.

1209 – TAX, BENEFITS AND LOCAL FINANCE

This program develops the policy and legislative framework for Ontario's taxation and benefits systems; administers Ontario tax statutes and a number of benefit programs; maintains the integrity of Ontario's tax system; and manages the province's fiscal relationship with municipalities. The program objective is to maintain a tax system that is competitive and transparent for business to support economic growth, while ensuring tax supports and structure are fair and effective for individuals and families in Ontario. As part of this work, it conducts tax compliance activities including audit, inspection, investigation and collection, and delivers key benefit programs for low-income seniors and families, as well as income verification services to other benefit programs. Accountability for managing the relationship with the Canada Revenue Agency, which collects the majority of the province's taxes on its behalf, also rests with this program. The program provides advice on the development of policies and regulations governing municipal property taxation in Ontario, manages education property taxes and provincial land tax, establishes the policy and legislative framework for Ontario's property assessment system, and provides oversight of the Municipal Property Assessment Corporation. It also provides oversight of the Ontario Municipal Partnership Fund, the province's main transfer payment to municipalities. The program provides strategic analysis and advice on personal, corporate, mining, commodity, sales, estate administration and payroll tax policy and design. It also supports a fair and efficient tax system by leading the province's efforts to address the underground economy.

OPERATING AND CAPITAL BY ITEM

[Table to be inserted by CPFB]

VOTE/ITEM: **1209-1**

VOTE: **Tax, Benefits and Local Finance**

ITEM: **Tax and Benefits Administration**

TYPE: **Operating Expense**

ITEM DESCRIPTION

This program is responsible for the efficient and effective administration of Ontario tax statutes, tax incentive and benefits programs. It strives to support the sharing economy and ensure the integrity of the tax system through measures aimed at reducing participation in the underground economy and maintaining tax fairness. The program is also responsible for examining ways to reduce the taxation burden on participating businesses and citizens. The province encourages compliance through client services and independent objections review, while discouraging non-compliance and tax evasion through collections activities, audits, inspections and investigations. The fairness of tax incentive and benefits programs is protected through systematic eligibility verification and validation reviews.

FUNCTIONS

- encouraging voluntary compliance through client services such as registration, tax roll and account maintenance and processing tax returns, processing application based refunds, client education, and outreach;
- providing remittance, data and image capture and revenue accounting processing services;
- maintaining data integrity in sustaining an efficient tax administration system and collections function for all Ministry of Finance administered tax statutes;
- leading transformation initiatives to streamline the delivery of Ontario benefits, administering ministry benefits programs and providing benefits administration services to partner ministries;
- managing inter-jurisdictional relationships with the Canada Revenue Agency, and monitoring the related service provisions;
- strengthening efforts to address the underground economy, contraband tobacco, and other measures aimed at maintaining tax fairness;
- supporting the sharing economy through coordination and development of key policy initiatives in partnership with the Sharing Economy Advisory Committee;
- providing strategic management services including tracking, analyzing and reporting on TBA's performance measures, service standards and revenue commitments;
- developing proactive and effective tax administration policy that supports the government's competitive business environment; and
- directing and executing excellence in the audit, investigations including forensic accounting and forensic data recovery, regulatory inspection and collection functions using risk based techniques, modern technology and best practices.

SUB-ITEM DESCRIPTION

The Strategy, Stewardship and Program Policy Division is responsible for program policy, strategic planning, relationship and risk management, and benefits transformation initiatives.

FUNCTIONS

- providing policy advice and leadership on key government priorities related to tax and benefit administration, including addressing the underground economy, contraband tobacco, and other measures aimed at maintaining tax fairness;
- providing advice and assistance to the Minister of Finance and the government in developing policy options for tobacco taxation and the oversight of raw leaf tobacco, based on analysis of the revenue, economic, health, social impacts of various options, and input from industry and health advocates;
- developing proactive and effective tax administration policy that supports the government's competitive business environment and Open for Business priorities;
- managing relationships, service provisions and fee-for-service arrangements and develops accountability frameworks for tax and benefit administration involving partnerships with other governments (most notably the Canada Revenue Agency) and the broader public sector, and First Nations;
- identifying opportunities to improve client access to Ontario's income-based benefits programs and making their delivery more efficient through efforts such as leveraging MoF's automated income verification and other benefits administration processes;
- providing data analysis to support the transformation of tax and benefits programs;
- providing strategic planning services including tracking, analyzing and reporting on TBA's performance measures, service standards, and revenue commitments;
- evaluating and reporting on TBA's performance including our success in meeting strategic and operational objectives;
- developing TBA's strategic plan, operational business plans and related work activities, including inter-jurisdictional research and analysis, environmental assessments, planning sessions, and benchmarking;
- operationalizing a risk management framework for TBA that proactively identifies and responds to risks; and
- supporting the sharing economy through coordination and development of key policy initiatives in partnership with the Sharing Economy Advisory Committee.

SUB-ITEM DESCRIPTION

The Tax Compliance and Benefits Division plays a key role in promoting public confidence in the fairness and integrity of Ontario's tax system. The division provides a wide range of tax and non-tax enforcement functions to ensure compliance such as auditing, investigations, inspections and collections. The division is responsible for providing registration services, responding to client inquiries, managing tax client accounts and processing benefit payments, processing application refunds, and providing public education and interpretative services, reviewing and resolving objections and appeals, and providing imaging and revenue processing services.

This sub-item focuses on operational and service delivery of tax and benefits programs, revenue administration, and the implementation of current transformational projects to support the ministry's commitment to continuous improvement and modernization.

FUNCTIONS

- directing and executing excellence in the audit function using risk based techniques, modern technology and best practices;
- conducting effective investigations including forensic accounting and forensic data recovery and regulatory inspections;
- partnering with other ministries, agencies and other jurisdictions to provide technical information, resolve issues and identify opportunities to collaborate;
- strengthening efforts to address contraband tobacco products;
- providing revenue collections functions to manage accounts receivable, collect delinquent tax and non-tax debt, and administer insolvencies;
- providing leadership and expertise in the areas of Centralized Collections;
- administering tax statutes as well as a number of tax incentive, revenue and benefit programs;
- encouraging voluntary compliance through client services such as registration, account maintenance and processing tax returns and application based refunds;
- providing remittance, data and image capture and revenue processing services;
- providing benefits administrative services to partner ministries; and
- providing an inexpensive administrative review of tax assessments and refund disallowances through the objection process.

ITEM DESCRIPTION

The Provincial-Local Finance Division provides advice to the Minister of Finance and the Government of Ontario on policies, legislation and operational initiatives that support the province's fiscal arrangements with municipalities, including the $27 billion property tax system. The Division administers the Ontario Municipal Partnership Fund (OMPF), the government's main unconditional transfer payment to municipalities.

In support of the government's priority to develop effective policies, legislation and regulation governing the property assessment and taxation system, the Division continues to examine ways to ensure the property tax and assessment system is fair, accurate, and predictable while ensuring municipalities have the financial tools they need to give Ontarians the quality of life they deserve.

FUNCTIONS

The Provincial-Local Finance Division:

- provides analysis, develops options and designs policies that support a property tax and assessment system that is fair, accurate, and predictable;
- designs assessment and property tax legislation and regulations that meet the government's policy objectives;
- maintains a productive working relationship with the Municipal Property Assessment Corporation (MPAC) that preserves access to valuation expertise and information;
- provides analysis and advice related to $7 billion in provincial Education Property Taxes, including support for the Minister of Finance's role in setting Education Property Tax rates;
- maintains an effective liaison with stakeholders to discuss possible enhancements to the property tax and assessment system and to the provincial/municipal financial arrangements;
- assists municipalities and taxpayers to better understand their responsibilities with respect to the property tax and assessment system;
- administers transfer payment programs to municipalities, including the OMPF, and recommends options and refinements to grant and/or program redesign;
- provides advice to the Minister of Finance on fiscal arrangements with municipalities, as well as oversight with respect to provincial-municipal financial strategies and policy priorities; and
- supports the Provincial Land Tax, Education Property Taxes and taxes for local roads and services boards in the Unincorporated Areas where applicable.

ITEM: **Municipal Support Programs**

TYPE: **Operating Expense**

ITEM DESCRIPTION

The Municipal Support Programs provides funding support to municipalities through the Ontario Municipal Partnership Fund (OMPF), Special Payments to Municipalities, Transitional Mitigation Payment and One-Time Municipal Assistance. The OMPF, the province's main unconditional transfer payment to municipalities, will provide $505 million to Ontario municipalities in 2017. Special Payments to Municipalities is a mitigation program related to property tax on hydro-electric generation facilities. Transitional Mitigation Payment is a mitigation program related to the property tax exemption for non-profit long-term care homes. One-Time Municipal Assistance provides one-time funding to municipalities facing special circumstances.

FUNCTIONS

The Division is responsible for OMPF policy including:

- developing options and refinements to grant or program design;
- supporting the policy announcement of annual OMPF allocations;
- issuing quarterly payments to eligible municipalities; and
- developing supporting materials and providing municipalities with assistance in understanding grant design and calculations.

Special Payments to Municipalities is a program that provides mitigation to municipalities related to the property tax revenue that each municipality received from hydro-electric generating stations (power dams) prior to 2001 when these properties became exempt from taxation.

Transitional Mitigation Payment is a program to provide transitional assistance to municipalities related to the exemption from property taxation of non-profit long-term care homes. The program targets assistance to eligible municipalities where revenue implications of this exemption represent a more significant proportion of the municipality's total revenue base.

ITEM DESCRIPTION

This program is responsible for the development, direction, operation, execution and formulation of policies for the management of the Province's debt, investments, credit ratings, investor relations, and related financial administration activities. This is accomplished by issuing and managing debt, including Green Bonds and Ontario Savings Bonds, to complete the Province's annual borrowing program; liaising with rating agencies on their determination of the Province's credit rating; providing centralized banking and cash management services to the Province; reporting on the financial position of the Province to investors and the public to facilitate borrowing activities; providing electricity sector financial analysis and support for any direct or indirect provincial liabilities and monitoring the fiscal implications; co-managing, with Ontario Power Generation, the investment activities of the Ontario Nuclear Funds; providing advice to government and broader public sector on financing initiatives and policies; provision of guarantees and loans by the Province and assistance in investments to its Crown Corporations and agencies; assisting Crown agencies and other public bodies on financial policies and projects and investing on behalf of some public bodies; and arranging custodial and fiscal agency services for the Province and certain agencies. The Ontario Financing Authority (OFA) provides a broad range of financial services to Ontario Electricity Financial Corporation (OEFC) and Ontario Infrastructure and Lands Corporation (Infrastructure Ontario).

~~This program is responsible for the development, direction, operation and formulation of policies for the management of the Province's debt, investments, credit rating, investor relations, and related financial administration activities; providing centralized banking and cash management services to the Province; reporting on the financial position of the Province to investors and the public to facilitate borrowing activities; providing to the electricity sector financial analysis and support for any direct or indirect provincial liabilities and monitoring fiscal implications; advice to government and broader public sector on financing initiatives and policies; provision of guarantees and loans by the Province and assistance in investments to its Crown Corporations and agencies; and arranging custodial and fiscal agency services for the Province and certain agencies. It is also responsible for the issuance of Ontario Savings Bonds. The Ontario Financing Authority (OFA) provides a broad range of financial services to Ontario Electricity Financial Corporation (OEFC) and Ontario Infrastructure and Lands Corporation (Infrastructure Ontario).~~

FUNCTIONS

The program:

- conducts borrowing in the capital markets in a cost-effective and prudent manner, including the issuance of Ontario Savings and Green Bonds;
- manages the provincial debt and investments;
- manages financial risks such as interest rates, currency, credit and liquidity to minimize interest on debt (IOD) and variations from the budget target;
- manages and supports the credit rating review of the Province;
- manages relations with the fixed-income community (domestic and foreign);
- provides centralized banking and cash management services for the government;
- provides settlement and payment services, and financial reporting services;
- supports the implementation of the government's electricity industry policy decisions, and monitors its fiscal implications;
- effectively manages Ontario Electricity Financial Corporation's debt and derivatives portfolios, providing timely and accurate risk, cash management and financial reporting services;
- provides a broad range of financial services to Infrastructure Ontario;
- advises ministries, crown agencies and other public bodies on financial policies and projects; and
- acts as intermediary for the Province in lending to or investing for certain public bodies.

SUB-ITEM DESCRIPTION

The Canada Pension Plan Investment Board (CPPIB) invests funds in the Province of Ontario's non-marketable securities. Effective July 1, 2005, under a side-letter agreement signed between the CPPIB and the Province, CPPIB offered the Province upon maturity of the debentures held to the credit of the Canada Pension Plan Investment Fund (CPPIF) that were issued before January 1, 1998, an option of issuing new replacement debentures to the CPPIB with a maximum term of 30 years (minimum term of five years and with subsequent roll over options subject to the 30 years maximum from the date of issue of the first replacement debenture) at a rate based on the capital market rates at the time of roll over. These debentures are not negotiable or transferable and are assignable only to a wholly-owned subsidiary of the Canada Pension Plan Investment Board. On April 1, 2007, all debentures held to the credit of the CPPIF or purchased by the Minister of Finance of Canada in accordance with Section 110 of the Canada Pension Plan were transferred to the CPPIB.

SUB-ITEM DESCRIPTION

This item provides for interest on Provincial Purpose Debt issued as part of a debt-for-equity swap with Ontario Power Generation Inc. and Hydro One Inc. effective April 1, 1999. The Province assumed $8,885 million of the debt issued by these two government business enterprises to OEFC in exchange for $5,126 million in equity from Ontario Power Generation Inc. and $3,759 million in equity from Hydro One. In addition, OEFC owed Hydro One for a working capital adjustment in the amount of $122 million, and Hydro One agreed to settle this amount as a reduction of the equity in 2002, and the Province reduced one of its payables to OEFC by $122 million.

Hi Ken, I've attached much of the debt content contained in our chapter if you'd like to have a look in advance of tomorrow's sign-off (particularly the material covering the legislated pension adjustment as it is new this year).

The order is not quite the same as seen in the actual document

Thanks,
Daniel

Intro

The Province, adopting a prudent and risk averse approach, has included the pension adjustment in its expense projections in accordance with the legislated basis of accounting adopted for the 2015-16 Public Accounts. The projected pension adjustment of $2.2 billion for 2016-17 is entirely non-cash and does not impact the Province's projected borrowings as well as its total debt.

The pension adjustment increases non-cash adjustments, allowing the Province to reduce both short – term and long- term borrowings from what was projected in the 2016 Budget

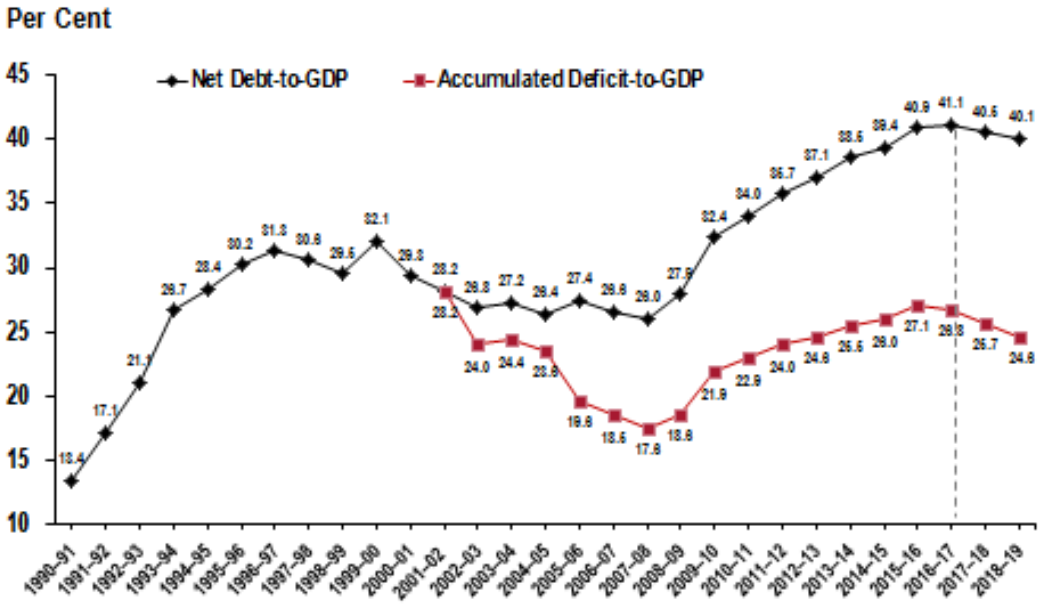
Net Debt-to-GDP

Total debt, which represents all borrowing without offsetting financial assets, is projected to be $328.6 billion for March 31, 2017 (March 31, 2016, $327.4 billion).

Ontario's net debt is the difference between total liabilities and total financial assets. It is projected to be $317.9 billion for March 31, 2017 (March 31, 2016, $305.2 billion). The net debt projection for March 31, 2017, was forecasted to be $308.3 billion in the *2016 Budget,* $311.5 billion in the *2015 Budget* and $317.2 billion in the *2014 Budget.*

The legislated pension adjustment for the 2015-16 Public Accounts resulted in the net debt-to-GDP ratio increasing to 40.9 per cent as of March 31, 2016 and is projected to be 41.1 percent as at March 31, 2017. If not for this adjustment, the ratio at the end of the 2015-16 fiscal year would have remained level with the 2014-15 ratio at 39.4 percent. Likewise, the ratio for March 31, 2017 would have increased slightly to 39.8 per cent and begin to decline from 2017-18 onwards.

The legislated pension adjustment that increased net debt by $10.7 billion in 2015–16 has no impact on the Province's total debt or current and future borrowings.



The Province is forming an independent expert panel to deliver advice and recommendations to the government as to the application of public sector accounting standards to Ontario's pension assets. The report is expected later this year.

Including the legislated pension adjustment of $10.7 billion, accumulated deficit is projected to be $207.0 billion as at March 31, 2017. The projected difference of $110.9 billion between net debt and accumulated deficit is due to the Province's consistent level of investment in infrastructure, as shown by the increase in tangible capital assets.

About 64 per cent of the increase in net debt from 2008–09 to 2015–16 is due to the deficit, with investments in capital assets responsible for most of the balance. Once a balanced budget is reached, the increase in net debt will be limited to the difference between cash investments in capital assets and amortization.

These investments will work to increase economic growth and will result in GDP growing more quickly than debt, thereby helping to lower the net debt-to-GDP ratio to its pre-recession level.

CHART 3.XX **Net Debt-to-GDP and Accumulated Deficit-to-GDP**

Notes: Historical net Debt-to-GDP was revised to reflect historical GDP released by Statistics Canada in November 2015. Net Debt has been restated to include Broader Public Sector Net Debt, starting in 2005–06.
Source: Ontario Ministry of Finance.

Cost of Debt

The interest rate that Ontario pays on its debt has been steadily declining since 1990–91, when the effective interest rate (on a weighted-average basis) on total debt was 10.9 per cent. It was 3.6 per cent as at March 31, 2016 and 3.7 per cent as at March 31, 2015.

The global decline in interest rates over the last 25 years cannot continue indefinitely. To protect itself from an increase in interest rates, the Province has continued to extend the term of its debt. Going back to the beginning of fiscal 2010–11, Ontario has issued $59.9 billion of bonds longer than 30 years to lock in low rates. As a result, the weighted-average term to maturity of long-term provincial debt issued has been extended significantly, from 8.6 years in 2008–09 to 14.2 years in 2015–16 and 15.1 years as at October 25, 2016.

For 2016–17, the impact of a one percentage point change in interest rates on IOD is approximately $350 million for the Province.

Hello Anna;

In my brief review, I focussed on the introduction/summary and the fiscal outlook. Here are my comments:

- I wonder whether all items they flag would be legitimate budget items (e.g. minimum wage); and
- WRT the fiscal outlook, the authors adopt the views of the AG & FAO w/o discussing their hidden assumptions (e.g. the government does not respond to fiscal pressures to stay within the fiscal plan).

Please find attached my comments. You are welcome to let me know in case you have any questions.

Best regards

Alex

A Shadow Budget for Ontario, 2018-2019

*Draft not for circulation

January 24, 2018

As Ontario enters an election year, the policy debate will likely involve the difficult choices the province faces regarding the fiscal outlook and long-term sustainability of a number of government programs. The budget the provincial government puts in place for the 2018-19 fiscal year will lay out a framework for the debate in the coming months.

To aid this debate, the C.D. Howe Institute has launched its inaugural Shadow Budget for Ontario, following similar Shadow Budgets at the federal level (see last year's edition from Robson, Laurin, and Wyonch 2017). This Shadow Budget shows that the fiscal course the province is currently on is unsustainable. This Shadow Budget would act to bring the long-term cost of government in line with the revenue-raising capacity of the province. It would balance increases in spending and cuts to poorly designed taxes with new ways to generate revenues and reducing spending on ineffective programs.

Although providing specific costing of programs is outside of the scope of this Shadow Budget, it presents an overview of policy directions that balance increases in spending with generating new revenues and cost-savings measures. This Shadow Budget proposes to:

- Restate the province's books to reflect the Auditor General's concerns about incorrect treatment of pension assets and electricity-sector debt;
- Reduce future expense growth to reach a balanced budget as soon as possible;
- Adopt long-term fiscal policy – which requires surpluses, not just balanced budgets – that meets the government's debt-to-GDP target ratio of 27 percent;
- Contain healthcare costs by extending capitated payments to family doctors and revising contractual arrangements with healthcare providers;
- Slow the increase in the minimum wage and focus on improving education and to create economic opportunities for Ontarians;
- Adopt an indigenous identifier in standardized test and oversample indigenous students to permit reliable rural-urban and district-level analysis;
- Modernize funding formulas for post-secondary education by taking outcomes into consideration;
- Reform the school curriculum with an emphasis on improving math performance;
- Open retailing for alcohol and marijuana and revising the tax scheme for both products;
- Adopt personal income tax reforms that reflect the cost of raising children, while reforming personal income taxes to lower high marginal rates, which occur even at low incomes;
- Replace targeted business tax breaks with lower provincial business property taxes to create a level playing field across the province and across different types of businesses;
- Rethink the fiscal relationship between municipal government and the province by retooling grants and transit governance while modernizing municipal financial reporting to match that of the province;
- Reduce the cost that governments impose on building new housing;
- Retain the plan to price greenhouse gas emissions, but re-focus the government plans to spend money raised by such a price away from cost-inefficient programs; and
- Seek out long-term cost savings in the electricity sector, as opposed to short-term fixes that only add to the long-term cost of energy.

Commented [KK1]: Incorrect is not an appropriate term, replace with "Government's"

The Fiscal Outlook

This Shadow Budget adopts the consensus view of the independent officers of the Ontario legislature – the Auditor General and Financial Accountability Office – as the authoritative outlook of the short-, medium-, and long-term fiscal outlook. While the government may claim to have balanced the budget for 2017-18,

Commented [AK5]: What is the rationale for adopting this perspective, especially without discussing their hidden assumption that the government cannot/does not respond to fiscal pressures (e.g. last FAO review)?

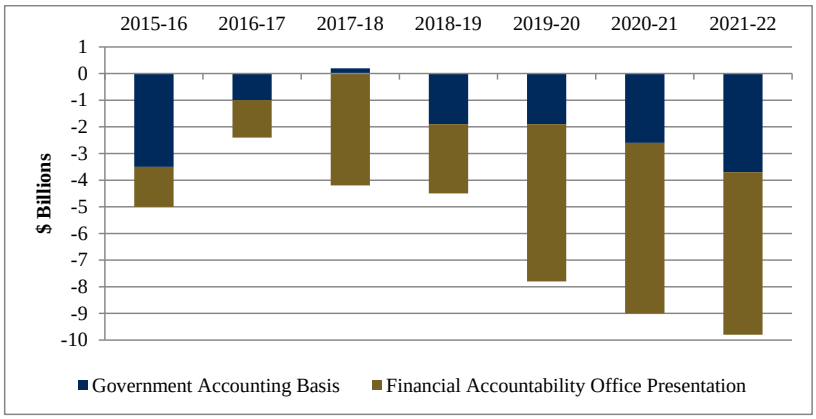
that declaration is in the eye of the beholder and the medium- and long-term fiscal outlook for Ontario is dire.

Cleaning up Ontario's Books – The Short Term Deficit Debate

The government has made the argument that it has reached a balanced budget. However, the Auditor General has two specific objections related to this claim because of the government's accounting treatment of pensions and whether the recent Fair Hydro Plan amounts to new spending.

The pension dispute centres on the government's treatment of the Ontario Teachers' Pension Plan (OTPP) and the Ontario Public Service Employees' Union Pension Plan (OPSEUPP). The province has decided to report the full asset value of the plan on the province's balance sheet, which neglects the fact that future retirees already have a claim on these assets. Doing so reduces the deficit and the Auditor General (2016) objects to this. Further, as Robson and Laurin (2016) argue, the government discounts OTPP and OPSEUPP liabilities by more than the plans do themselves. This understates the liabilities provincial taxpayers face.

However, the view of the Auditor General is not universally shared. The Ontario government appointed a Pension Asset Expert Advisory Panel to advise on the difference of opinion between the government and Auditor General. The Panel's Report (2017) argued that an asset does exist for the government, saying that the government does have sufficient access to the plan's assets, if even just through reducing contributions to the plans, to merit including it. However, given that we have taken the Financial Accountability Office's presentation of financial data, which is independent of both the government and the Auditor General, we have decided to use the presentation of provincial finances as recommended by the Auditor General.



Commented [KK6]: My understanding was that the FAO presented both the Government's accounting treatment as well as the AG on the pension assets, leaving the decision to the reader. This is however, an OPCD issue

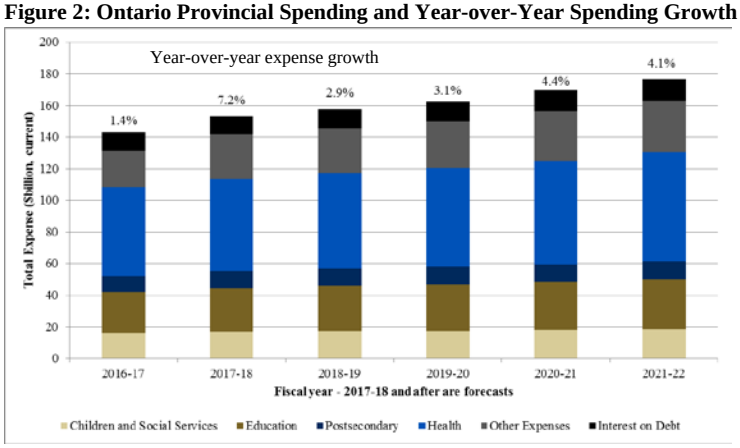
The second dispute hinges on the Fair Hydro Plan. As the Auditor General (2017a) points out, the government "is making up its own accounting rules" by creating an accounting asset for a government-controlled entity to offset the debt the province placed on another government-controlled entity. The asset the government created only exists because of legislation that gives a government entity the authority to collect higher prices in the future. The true value of this asset should be zero, or highly discounted, because of great uncertainty of the ability to collect higher prices in the future. For example, electricity markets may change because of technology, making it impossible for a central government agency to collect future revenues to pay this debt. As such, this debt should be reflected in the province's financial statements now. Incorporating the debt amount in today's books means that the proper accounting treatment would increase the deficit by $2.5 billion per year through to 2027.

Commented [KK7]: Likewise OPCD should comment since this is an accounting issue

This Shadow Budget would restate the province's books to reflect the Auditor General's concerns. It would restate the province's finances to show a deficit in the upcoming 2018-2019 fiscal year to be about $7 billion (Figure 1).

Figure 1: Ontario Budget Balance

Source: Financial Accountability Office of Ontario. Does not include reserve fund. 2017-18 and beyond are projections by the Financial Accountability Office.



Medium-term Fiscal Sustainability

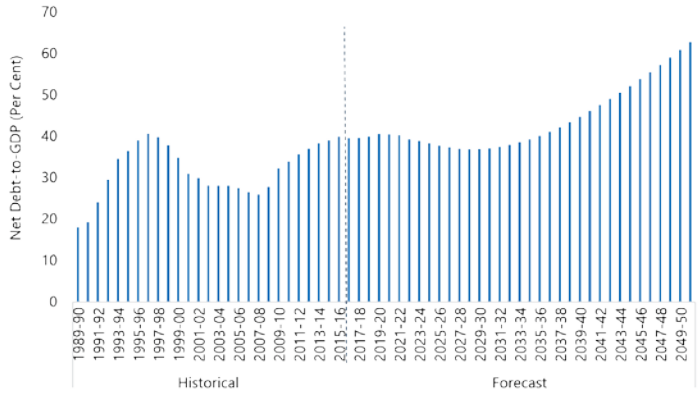
The question of whether there is a deficit for the 2017-18 fiscal year is far less important, from the point of view of the sustainability of public finances, than future trends. Under current trends, the deficit would rise to nearly $10 billion by 2021-22 (Figure 1), according to the Financial Accountability Office (2017a). These long-term deficits will return because of two main causes: the deficits the government should account for under the Fair Hydro Plan, as discussed above, and fast-rising expenses. Future revenues are not likely to grow as fast in the future as in previous years because of a number of factors, such as one-time revenues that have come in recently and economic growth that is likely to slow. Further, the Financial Accountability Office (2017a) argues that the government has made overly optimistic revenue forecasts that rely on above-trend income growth in the province and corporate income tax receipts.

The province can look to balance its budget in the near future in a number of ways. First, it can look to increase revenues. It can do so through short-term revenue gains such as sales of provincial assets – as this Shadow Budget will suggest in more detail below. Alternatively, it can raise tax rates, such as the provincial component of the HST. Or, it may seek more grants from the federal government. However, aside from hiking tax rates, none of these steps to increase revenues are directly within the control of the province or offer more than a single year's worth of solutions.

The province must address fast-growing spending to reduce future deficits. The first trend that this Shadow Budget would address is the projected pattern of total spending growth. 2017-18 spending is forecast to grow at over 7 percent over the previous year's spending. This kind of spending growth is unsustainable. Future expenses beyond 2020 of over 4 percent are also likely unsustainable. This Shadow Budget would aim to reduce future expense growth to reach a balanced budget as soon as possible.

Figure 2: Ontario Provincial Spending and Year-over-Year Spending Growth Rates

Source: Financial Accountability Office of Ontario



Long-term Fiscal Sustainability

Balanced budgets will not be enough for Ontario to be fiscally sustainable. The government has targeted a net debt-to-GDP ratio of 27 percent, a sensible target that is similar to that of the federal government of 25 percent of GDP. This Shadow Budget would continue pursuing such a target and take the necessary action to achieve it within 15 years. As the Financial Accountability Office (2017b) projects, achieving 27 per cent requires the province to run budget surpluses until 2033-34. If the province continues on the current trend, and not run first balanced budgets and then surpluses, the net debt-to-GDP ratio will reach 63 percent by 2050-51 (Figure 3).

Commented [KK8]: While this is no doubt a sensible target, the basis of the 27% is the reversion to the pre-recession net debt to GDP ratio.

Commented [KK9]: Without knowing the basis of this calculation we cannot comment

Figure 3: Net-Debt-to-GDP, Under Current Fiscal Trajectory

Source: Financial Accountability Office of Ontario

Figure 4: Interest Expense as a Share of Revenue

Source: Financial Accountability Office of Ontario

If the government doesn't tackle the long-term fiscal challenges, the cost of debt will take up an enormous share of total government revenues. Interest costs currently sit at 9 percent of revenues; at current trends, interest costs will increase to 22 percent in 2050-51 (Figure 4). If debt costs take up a large share of total revenues, that will leave less for other needs.

Commented [KK10]: This is incorrect interest is only 8.3% of revenues in 2016-17 and projected to increase to 8.4% in 2019-20

Health Policy

Given that Ontario spends roughly half of its own-source revenues (which excludes transfers from the federal government) on health, getting good value for money in healthcare will be critical for the financial and societal well-being of Ontarians. Although the province has successfully contained the annual growth of healthcare spending from 2010 to 2015 to 2.4 percent, on average, the rate of health spending is starting to tick upwards again alongside worries about emergency room overcrowding, long waits for long-term care beds as well as overburdened caregivers . Progress on addressing these issues – in addition to limiting public and private gaps in coverage for prescription drugs, dental services and mental health – while allocating reasonable increases for health spending, is a critical challenge.

Efforts to enable self-directed homecare services – such as recent moves to increase the number of hours nurses, personal support workers, and therapists will provide care in homes – should help alleviate the emergency room pressures for elderly patients, and these programs should continue to expand on their current trajectory. Relative to providers, patients with mild to modest physical disabilities are more likely to know the abilities of family and informal caregivers to offer care and their schedules, and which services they would prefer to have delivered by other health professionals. Although there are some legitimate concerns about patient's ability to choose among groups of healthcare professionals to meet their needs, there should still be enough flexibility around the use of self-directed home care budgets to ensure appropriate innovation from those delivering services. This means sufficient flexibility in how patients select and schedule professional help.

Ensuring that people without private insurance for dental, drug and mental health services get access to services is also a priority for healthcare policy. On this score, there are a number of avenues to ensure appropriate coverage and do so at minimal public cost, including the expansion of these services among the most vulnerable (Blomqvist and Busby 2016, Busby and Pedde 2014). This Shadow Budget would look at new ways to revise contractual arrangements with providers – pharmacists, dentists and dental hygienists, and phycologists – to improve the efficiency of spending in these areas.

Although government needs to spend more money to improve access to mental health services, more money alone will not ensure that all illnesses get treated in appropriate timeframes. It may be more advantageous to give a greater share of the overall budgetary spending on physiologists to hospitals and primary care doctors for outpatient needs.

The way in which the province pays for the delivery of health services matters. Paying hospitals, hospital-based doctors and necessary outpatient services for a needed intervention often results in silos of poorly coordinated care. This Shadow Budget would instead look at more bundled payments by procedure for hospital-based services (Sutherland and Hellsten 2017). And in primary care, this Shadow Budget would extend capitated payments to family doctors to include budgets for enrolled patient drugs, lab and diagnostic imaging budgets as part of the evolution in payment reforms for family doctors (Blomqvist and Busby 2011).

Labour and Education Policy

Many governments are struggling to respond to the challenges of precarious work – employment that is often more insecure and uncertain than traditional full-time employment, with greater prevalence for part-time work. Further, as wage gaps exist between temporary or part-time vis-à-vis full-time workers, policymakers have recently passed legislation intended to bridge these differences. While there are no ideal policy levers for addressing these issues, it should be recognized that, in general, increases to the minimum wage are a reasonable option available to policymakers. However, gradual and evaluated increases to the minimum wage are the best way to increase minimum wages over time. Ontario's recent, large increase in the minimum wage means that the right response for government should be to pause and evaluate. One particular concern is the impact on smaller municipalities that risk being most negatively affected.

This Shadow Budget would amend the current minimum wage in two ways, as recommended by Marchand (2017). First, it would allow for regional variation in minimum wages. This Shadow Budget would allow upper-tier and single-tier municipalities across the province the option to return to a lower minimum wage for a five-year period. New York has a similar policy, in which the minimum wage is highest in New York City than in other parts of the states. Second, this Shadow Budget would build a provision into the minimum wage legislation to reduce it in the case of a recession, as California has recently done.

As trade, technology and worker preferences continue to change the dynamic for skills desired by employers, a competitive labour force will need an abundance of core numeracy and literacy skills. For Ontario, the news on these scores is mixed. On literacy, the results are strong (EQAO 2015). In terms of numeracy, however, the results are alarming – only half of all grade 6 students in the province meet the provincial standard for numeracy and its OECD Programme for International Student Assessment (PISA) scores have plummeted over time, from 530 in 2003 to 509 in 2015, one of the largest drops among Canadian provinces, putting Ontario statistically below the average in Canada(Richards 2017). This needs

fixing. This Shadow Budget would continue the province's re-examination of the math curriculum and pedagogy, where the effectiveness of different pedagogies should be explored as potential causes (Stokke 2015). This Shadow Budget would also look at teacher preparedness and consider evaluating teacher knowledge in subject matter with the administration of student exams to teachers prior to the academic year. Insufficient results should require immediate intervention.

Furthermore, collecting, analysing, and reporting educational outcomes are essential to closing the achievement gap between more and less advantaged students. Including a question that identifies indigenous student in PISA tests is a great way to track educational achievement of indigenous students and help educators and policymakers to design more effective strategies to improve outcomes. The province should also oversample to ensure sufficiently large sample of indigenous student to produce reliable estimates at the district level and to perform urban/rural analysis (Richards and Mahboubi, forthcoming).

Many OECD countries consider Performance-Based Funding (PBF) systems for their post-secondary education, but Canadian provinces, including Ontario, lag behind in adopting this innovating way of financing. Usher (forthcoming) shows the benefits associated with PBF include less burden of funding negotiations, higher accountability of the post-secondary institutions, and greater competition between institutions, leading to a greater focus on results. A similar approach to competition in grants for research has been effective at improving the performance within universities, and should apply to universities themselves. The government needs to review its funding formula and learn from the experience of other developed countries.

Tax Policy

Commodity Taxation

Alcohol

In 2015-16, the Liquor Control Board of Ontario (LCBO) paid the provincial government a dividend of $1.9 billion. It also remitted $867 million to the federal and provincial governments in Harmonized Sales Tax, excise taxes and customs duties (LCBO 2016). In addition to the LCBO, there is a system of beer and off-winery stores, which operate as a quasi-monopoly thanks to government regulation. Masson and Sen (2014) find that freeing up alcoholic beverage retailing would result in increased government revenue, lower prices, and more convenience. They find that, other factors being equal, Western Canadian provinces with more beverage alcohol retail competition had 7 percent more per capita provincial alcohol profits than provinces with government-run monopolies. The province has begun to introduce beer sales at grocery stores. However, it has done so slowly with limits on the amount of sales by the store. This Shadow Budget would go further by auctioning licenses for other retail outlets. It would also auction licences for off-winery stores to other wineries and also to new wine retailers. The result would be increased provincial revenues and more choice for Ontario consumers.

This Shadow Budget would also revise taxation of alcoholic beverages. Currently, tax rates are fixed by type of beverage, currently ranging from 52 cents per litre to $1.06 per litre, depending on the type of manufacture, not alcohol strength. Wine is taxed as a percent of sale value and sprits are taxed at up to 38 cents per litre plus a percentage of the retail price. This Shadow Budget would graduate the tax on alcohol

to relate to alcohol content. This reform would target the health problems caused by alcohol, which is directly in line with the alcohol content of any drink (The Economist 2013).

Marijuana

The federal government has legalized marijuana for recreational consumption with legal sales scheduled to begin in July. The main policy objectives driving marijuana legalization are the improvement of public health and the minimization of the black market and its associated criminal activity. Ending the prohibition of marijuana involves coordination between all levels of government. Provinces must determine the structure, distribution, and regulation of the retail market and jointly determine taxation levels of marijuana with the federal and municipal governments.

Ontario has announced that it will restrict retailing of recreational marijuana to LCBO-run stores. Only 40 of these locations will be in place by next July 1, the federal target date for legalization, with a total of 150 locations expected by 2020. The province missed the opportunity to have a competitive market for retail marijuana. Independent businesses have an incentive to locate where market demand isn't being met and competition between businesses constrains operating costs and keeps prices low. Lower prices in the legal market make it more likely to be competitive with the existing black market.

The province's decision to enter the market also implies considerable resources will be expended in the construction and maintenance of stores, higher salary expenditures and other overhead costs. These will be met at the expense of other sectors, which will receive lower government funding.

Having few retail locations means that access to recreational marijuana will be inconvenient for a significant number of Ontarians. Recreational consumers are highly unlikely to switch their dollars to the regulated market if there isn't easy access. This means that there will be significant opportunity for the black market to continue operating in all the areas without enough legal stores to meet market demand or that are convenient to access. (By contrast, there are more than 650 LCBO outlets in the province.) Further, to levy penalties against illicit businesses will require significant justice and police resources. And since there won't be enough regulated retail outlets to meet market demand, it is likely that at least some of these businesses will still find it profitable to operate. This Shadow Budget would make retailing of marijuana competitive and allow for the licensing of privately-run retail stores. This could take the form of entirely private retail, as in Alberta. Alternately, licensed establishments could operate alongside government retail stores and deliver better market coverage faster than the crown corporation on its own.

Ontario has joined the federal government’s proposed coordinated excise tax framework for recreational marijuana. While Crown-corporation retail isn’t particularly competitive in terms of convenience, keeping taxes low will help ensure that the legal market will be price competitive with the illicit market. The tax rate on dried cannabis flowers will be $1 per gram or 10 percent, whichever is higher, with 75 percent of the revenue going to the provincial government. The revenue from this excise tax will initially be modest, bringing in $50 to $95 million in 2018 and $175 to $200 million annually by 2021.

Gasoline and Fuel

The government should be concerned about the prospect of declining revenues from fuel and gasoline taxes, which will intensify as vehicles become more fuel efficient and become increasingly electric. This Shadow Budget would begin a study of the potential to replace fuel taxes with tolls for use. Further, the best solution for traffic congestion is a road toll. Road pricing could also bring the price that drivers pay for

infrastructure they use closer to the actual cost of it. Gas taxes (which are about 75 to 80 per cent of road-related revenues), vehicle licences and other revenues from drivers have covered less than two-thirds of roadway expenses across Canada since 2008. Taxpayers should only subsidize transportation to the extent that it encourages broader access to all in society and the government should review whether a one-third subsidy is the appropriate amount of taxpayer subsidy for roads.

Personal Taxation

Income taxes affect individual and business incentives to earn income, save, invest, and take risks. Excessively high taxes at the margin can also drive tax avoidance behaviour.

At the personal level, the impact of income tax variations on work participation decisions is particularly acute for the secondary earner in families with children and lower-skilled workers. In general, lower income, less educated people have a greater tendency to adjust their paid work behaviour through workforce participation decisions, while more-educated workers and high-income earners tend to adjust through the number of hours they work (Duclos et al. 2015).

High income earners' taxable income has been shown to be particularly responsive to high marginal tax rates – through both tax planning avoidance behaviour and earnings decisions (Laurin 2015). And the sensitivity to rate changes is higher at the provincial level in response to provincial rate changes than at the federal level in response to federal changes. This is because high-income earners can take advantage of provincial tax rate differences by shifting their income tax attributes and work locations to the most tax-advantageous province (Milligan and Smart 2014).

Provinces like Ontario with one of the highest top combined federal and provincial marginal tax rates of over 53 percent on high-income earners should aim to reduce that rate to a level at or below 50 percent. The responsiveness to the change would have a beneficial impact on the tax base that would ensure a very low fiscal cost for the policy. Furthermore, the income tax system should be clear and transparent. Ontario has a surtax notionally in place for health care expenses. However, this tax is treated as general revenue. The province should replace this surtax and set income tax rates and brackets that transparently show the marginal tax rate people are paying.

Other tax changes should aim to lower the burden of taxes on secondary earners in family with children. This Shadow Budget would reform the tax recognition of child care expenses through the replacement of the child care expense deduction with the introduction of a new refundable tax credit for child care expenses. It would encourage stay-at-home parents to join the workforce, producing extra tax revenues, considerably limiting the net fiscal cost of its implementation (Laurin and Milligan 2017).

Also, typical labour arrangements are changing with technological change. Workers are becoming less attached to a single employer and move around more freely between projects and contracts. Their incomes are also more prone to be fluctuating from year to year – a period of low earnings followed by a year of higher earnings, or vice versa. But a worker with fluctuating income may end up paying more tax (and losing more income-tested government benefits) than another worker with a flat income profile but earning the same amount over a period of years. Wen and Gordon (2017) find that Canada's "fluctuation tax penalty" is most severe for individuals who earn lower incomes or are self-employed. This Shadow Budget would lessen the impact of fluctuating incomes on tax liability by allowing workers to average their

income over many years, so that any single large earning year would not lead to a disproportionate loss of fiscal benefits and higher tax payments.

Business Taxation

A properly designed business tax regime would provide for a common provincial tax rate for all businesses operating across the province, regardless of their location or sector. However, Ontario's tax regime selectively rewards a number of sectors, such as manufacturing, through the income tax system while punishing companies with overly high provincial property tax rates. The province of Ontario can simplify its tax regime, create a more level playing field across sectors and the province, and reduce the effective tax rate on new business investment all without reducing overall provincial revenues.

Eliminating Wasteful Business Tax Expenditures

The largest tax expenditure in the corporate income tax system, by far, is the Small Business Deduction, which costs Ontario over $2 billion in foregone revenue. A better alternative to the Small Business Deduction is a lower general corporate income tax rate. That is because the net impact of the Small Business Deduction is an expansion of the small business sector at the expense of large businesses. Since small firms are less productive than large firms, the Small Business Deduction lowers overall economic performance (Dachis and Lester 2015). This Shadow Budget would not proceed with any further cuts geared to small business.

Most Canadian provinces provide a tax incentive for innovation. They mimic the federal tax system which provides eligible businesses with a Scientific Research and Experimental Development (SR&ED) credit. Ontario provides a non-refundable tax-credit worth 3.5 percent of the value of eligible expenses for firms to deduct from their taxes. The total innovation tax incentive for Canadian businesses is one of the highest in the world, but Canada consistently lags behind international peers on measures of business innovation (Parsons 2011). The Ontario SR&ED credit comes at a large fiscal cost: a tax expenditure of $150 million in the 2017 calendar year (Ontario 2017). Instead of targeting up-front tax credits for innovation, a better solution to encouraging innovation is with a low overall income-tax rate (McKenzie 2006). In addition, the province provides manufacturing and processing businesses a preferential lower tax rate than those in the rest of the economy: 10 percent instead of the usual 11.5 percent. This lower rate cost taxpayers $290 million in the 2017 calendar year.

This Shadow Budget would eliminate the Ontario SR&ED credit and the lower rate for manufacturing and processing, and use that revenue to cut high provincial property tax rates that choke investment, as discussed below. It would also initiate a comprehensive review of tax expenditures to determine whether the existing tax expenditures are still appropriate or whether they should be redesigned as deductions or credits (see Robson and Laurin 2017). Tax expenditures can be removed when shown to be no longer effective, as the government has already committed to eliminating ineffective tuition and education tax credits, as recommended by Neill (2013).

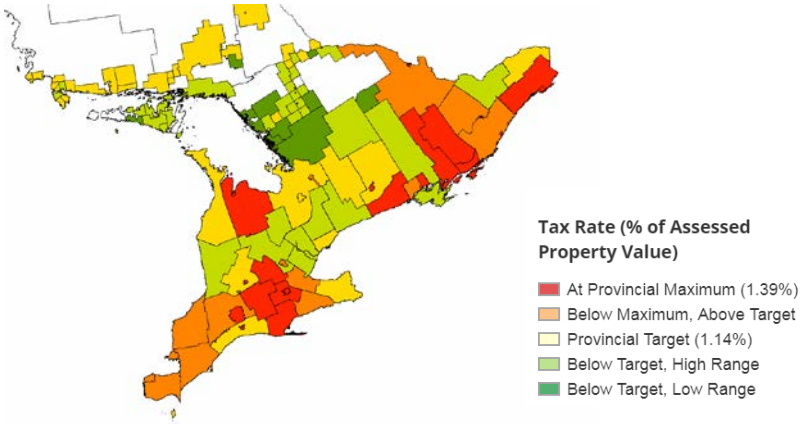
Cutting Provincial Business Property Taxes – A Revenue Neutral Cut in Investment Taxes

Ontario took over the local education property tax from local school boards in 1998. School boards had widely varying tax rates across the province and by property type when the province took over. The province immediately made its residential tax rate the same for all residents across the province. It's a different story for businesses. Each year since 2007, the province has set a maximum tax rate, called

the ceiling rate, and a lower target rate designed to be revenue-neutral for the province. The province committed in its 2007 budget to lower higher rates down to the target rate over time, but the province has stalled on tax cuts since 2013.

The provincial property tax still varies wildly across cities and for different buildings within cities (See Figure 5a and 5b, which shows provincial rates for commercial and industrial properties). Provincial commercial property tax rates in some Ontario municipalities are more than three times those in others. The provincial tax is highest on industrial property across much of Southern Ontario. As Found (2017) shows, the average provincial business property tax rate is more than 6 times its residential counterpart.

Figure 5a: Provincial Commercial Property Taxes in Southern Ontario



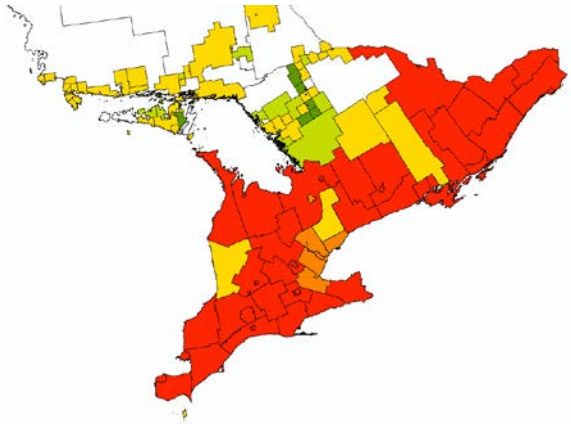


Figure 5b: Provincial Industrial Property Taxes in Southern Ontario

Source: Jacobs, Dachis and Found (2017). Results include Northern Ontario. Hollow areas not subject to provincial property tax.

Cities collect the money on behalf of the province after receiving a regulation from the province of how much to collect. In the 2017-18 fiscal year, the province will collect $6 billion in property taxes, which it reports as general revenue. Since different education tax rates by region have nothing to do with local school spending, each school board now gets a provincial top-up grant in order to level the playing field. Each school board`s total revenue is based on its enrolment and the needs of students, not the value of buildings in the area. That means the provincial property tax now has no bearing on school boards' spending. Yet, the province still uses the misleading name "education property tax" to describe it on tax bills.

These high property taxes have a large economic cost. Property taxes act like a tax on capital, specifically building capital. A tax on capital reduces the incentive to invest, resulting in lower investment which leads to lower productivity and therefore income and standards of living of Canadians. A 10 percent increase in commercial property tax rates decreases the long-run value of the business property assessment base by 8.2 percent. At the average level of business property taxation in Ontario, a $1.00 business property tax hike costs the Ontario economy $5.56 (Found 2017). Higher taxes shrink the tax base, which makes it harder for governments to raise revenues. The total business tax rates in some cities across Ontario – such as London, Windsor and Brantford – are so high that cities and the province might see revenues increase if they cut their taxes to attract more business investment.

This Shadow Budget proposes to complete the harmonization of business property tax rates. To make such a tax reform revenue-neutral, it proposes to eliminate the SR&ED credit and the lower manufacturing and processing corporate income tax rate and reduce provincial business property taxes that would reduce revenues by the same amount saved. Such a change would have a number of benefits. First, it would create a more level playing field across different types of businesses that currently face different tax rates. Secondly, it would improve fairness in the provincial property tax regime across the province. Third, a revenue-neutral property tax reduction would lower the marginal effective tax rate on new investment in most parts of the province – and almost all of Southern Ontario – by more than any increase in provincial income taxes would increase the effective rate. Property taxes have an especially large effect on tax costs on investment because they are insensitive to profit and are akin to a direct tax on capital (Found and Tomlinson 2017). Such a reduction in provincial property taxes would be largest for the same sectors that would see a removal of their special, lower income tax rate, across most of Southern Ontario.

Housing, Municipal, and Infrastructure Policy

This Shadow Budget would seek to lower the cost of housing across the province by taking steps to reduce barriers to construction and eliminating economically costly rent controls and transfer taxes. It would also fundamentally change the relationship between municipalities and the province by granting cities the ability to put their budgets on a sound financial footing and allow them more flexibility in financing infrastructure.

A Smart Housing Plan

The cost of housing in Ontario has increased dramatically in recent years. According to data from Brookfield's Real Property Solutions, home prices the Greater Toronto Area increased by more than 250 percent between January 2005 and the end of the 2017. In response, the province has taken steps such as introducing taxes on foreign buyers and rent controls. The government's policies have focused mostly on curtailing the demand of housing.

On April 20, 2017, the province introduced a 15 percent Non-Resident Speculation Tax in the Greater Toronto Area. This transfer tax is substantially higher than the existing provincial land transfer tax that has a maximum rate of 2.5 percent. Land transfer taxes such as these have a high economic cost of reducing the mobility of households (see Dachis 2012 and Dachis, Duranton, Turner 2008). In addition, land transfer taxes are highly volatile and present a large fiscal risk to the province if the housing market has a serious downturn (Ngo, Angastiniotis, and West 2017). This Shadow Budget would immediately eliminate the additional 15 percent tax and look to begin reductions in the general land transfer tax in future fiscal years.

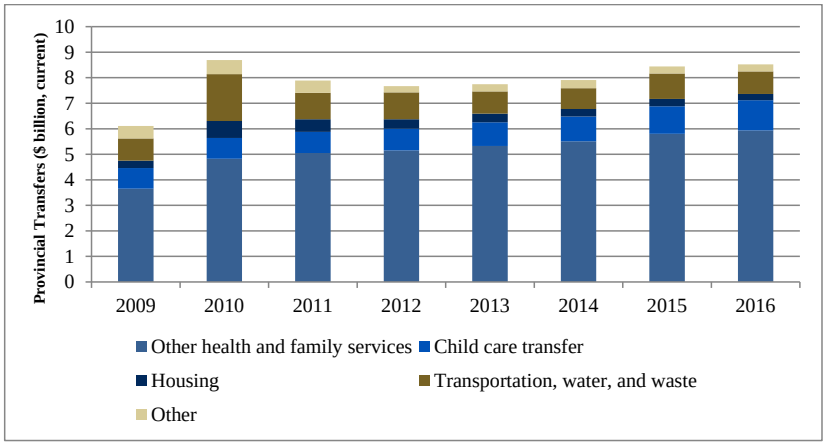
On the same day, the province expanded rent control to all rental units in the province, rather than only those built before 1991, as was the case prior. Rent control is one of the few economic policies around which there is a solid, evidence-based consensus about its long-term effect on the cost of housing: it does not lower it in the long-run (Kronick 2017). The likely result of rent control is that housing developers will not build rental housing knowing they face a cap on potential returns, while facing no commensurate cap on their investment risk. The result will be fewer units available, leading to housing shortages. This Shadow Budget would phase out rent control on all rental units. It would start by reducing the extent to which rent control binds the market by increasing the allowable increase, doing so annually until eventual repeal. Rather than rely on rent control, this Shadow Budget would embrace the recent federal decision to create a Canada Housing Benefit that provides low-income renters with the funds to seek a wide range of market-priced rental units (Canada 2017). This Shadow Budget would re-orient financial support for housing construction, which is often part of transfers to local governments, as discussed below, to match the federal contribution in creating the Canada Housing Benefit.

Reducing the Cost of Housing

There is strong evidence that restrictions and extra costs on building new housing – such as zoning regulations, delays on permit approvals, development charges, and limits on greenfield housing development – are dramatically increasing the price of housing. Dachis and Thivierge (forthcoming) find that a limited lowering of these restrictions can reduce house prices in some municipalities in the Greater Toronto Area by around $100,000.

What can the province do to reduce supply barriers? Toronto heavily uses a clause in the provincial *Planning Act* – the legislation governing municipal zoning policy – that allows it to require additional payments from developers in exchange for a site-specific variance from zoning bylaws (Moore forthcoming). These additional payments, known as section 37 payments for the relevant part of the *Act*, increase uncertainty for developers and therefore increase the cost of housing. In addition, municipalities have an incentive to keep zoning bylaws out of date because updating them would take away the future section 37 payments. This Shadow Budget would place greater restrictions on the use of section 37 of the *Planning Act*, which would result in municipalities having a greater incentive to set more appropriate zoning regulations.

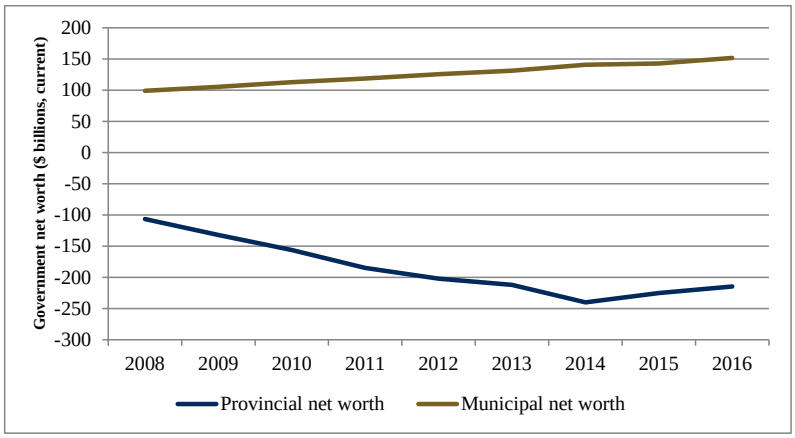
Developers pay development charges to compensate municipalities for the cost of building municipal infrastructure that services homes and commercial properties in a newly developed area. The largest single component of these charges is for water and wastewater construction (Dachis forthcoming). This Shadow Budget would require that cities replace development charges for water and wastewater infrastructure with volumetric uses fees that reflect capital costs. Such a move would reflect a change to a utility-based model and encourage conservation of water.



Finally, housing developers in GTA cities are facing a shortage of land available for new housing development (Clayton 2015). The primary cause is not because of the Greenbelt, a policy that forbids development on certain agricultural and parkland. Dachis and Thivierge (forthcoming) find that the main land-supply driven cause of higher house prices is not the Greenbelt, but the Growth Plan for the Greater Golden Horseshoe, a policy that requires cities in the GTA to approve a certain share of their homes within existing urban development boundaries and at a certain density. This Shadow Budget would relax the density and intensity targets that may not be appropriate across all cities subject to the Growth Plan while preserving the Greenbelt.

Rethinking Relative Municipal and Provincial Fiscal Health

One of the province's largest expenditures is on grants to municipalities. Transfers to municipalities have increased since 2009, including a large spike in 2010 to support infrastructure stimulus projects. Transfers to municipal governments from the province are now over $7 billion (Figure 6). Indeed, this trend is set to accelerate. In January of 2017, the province committed to double the amount of the fuel tax it transfers to municipal governments for transportation investment (Jones 2017). Ontario transferred $335 million in provincial gas tax revenue to municipal governments in 2017, and made a commitment to double the funding to bring the total transfer to $642 million by 2021-22.



The largest share of transfers is for health services – such as public health – and for childcare benefits. The latter, in particular, are dispersed to municipalities under a complex set of qualification criteria. These programs are ripe for review and evaluation, as their impact on workforce participation and the ability for single-parent and underrepresented families to engage in the labour force are critical. The child care transfer has increased by nearly 50 percent since 2008 reaching $1.2 billion in 2016, suggesting that a review of the program is in order

Figure 6: Ontario Provincial Transfers to Municipalities, 2009-2016

Figure 7: Ontario Provincial and Municipal Net Worth, 2008-2016

Source: Authors' calculations from Cansim Tables 385-0034 and 385-0037.

Does it make sense for the province to send such grants to municipal governments? Ontario's municipalities are, on average, in better fiscal shape than the provincial government. They are major investors in capital assets, but unlike the province, whose chronic deficits have resulted in financial liabilities that vastly exceeds its financial and non-financial assets, Ontario municipalities have positive net worth. They have borrowed to finance some capital assets, but the value of their assets exceeds their debt by a substantial margin. In the nine years from 2008 to 2016, Ontario municipal governments have increased their net worth by more than 50 percent, registering an increase of over $50 billion (Figure 7). In contrast, provincial net indebtedness has approximately doubled over that time, even after a slight improvement in net asset values over the last two years.

The Important Difference between Municipal and Provincial Accounting

How did such a fiscal health imbalance come about? Transfers are often the result of cities claiming they are struggling to meet their service or infrastructure demands and then calling on the province for support. However, the way that cities present their budgets, especially relative to the way the province reports its finances, makes municipal finances appear more precarious than they actually are. Ontario municipalities typically use cash accounting in their budget.[1] However, the province – as well as municipal end-of-year financial statements – uses the accrual accounting standard. Accrual-based budgets appropriately do not record the entire cost of capital items as expenses in the year of the cash outlay, but apply annual amortization over their useful live. Figure 7 presents municipal and provincial finances on the equivalent accrual financial basis.

Presenting councillors with budgets that show outlays on such assets as in-year expenses (as cash budgeting does), rather than amortizing them as they deliver their services (as accrual accounting does),

[1] A common practice is to show expected cash outlays in a "capital" budget alongside an "operating" budget for items to be consumed and expensed during the year.

likely leads municipalities to delay or reject some capital projects they would otherwise approve. It also likely leads them to finance the projects they do approve by raising revenues up front, rather than by borrowing and servicing the debt over the period the project yields its benefits. The result is that today's taxpayers – whether through property taxes, grants to cities, or development charges on houses – are paying disproportionately more than they are receiving in municipal services.

Reframing the Municipal-Provincial Financial Relationship

This Shadow Budget would cancel the proposed doubling of the amount of provincial fuel taxes that the province transfers to municipal governments. In fact, it would go further to limit transfers to cities. As above, this Shadow Budget would begin a long-term commitment to reducing property taxes levied by the province. Every dollar of provincial property tax reduction creates tax room that municipalities can decide to take up. Cities would have the freedom to choose how best to finance local services or whether to increase or reduces taxes and services.

The province's commitment to double gasoline tax transfers to municipalities emerged as a response to the City of Toronto's request for the province to enact an enabling regulation permitting it to introduce a toll on municipally owned highways. The province forbade Toronto from the move, offering all cities the gasoline tax transfer instead. This Shadow Budget would allow cities the ability to introduce road pricing without requiring a provincial regulation, as long as the intention and design of the toll is to reduce congestion, not as a purely revenue-raising option.

In addition, instead of allowing cities to have parcel-by-parcel zoning amendments, as discussed above, this Shadow Budget would expand the ability of cities to put in place a tax-increment financing plan for major infrastructure. This would allow cities to capture some of the increase in property values that result from a new transportation or other municipal investment that increases the value of nearby properties (Found 2016).

Finally, this Shadow Budget would require municipal governments to produce their beginning-of-year budgets on an accrual basis. Importantly, it would not require that cities produce a balanced budget every calendar year and would instead enact a review of the appropriate fiscal and economic benchmarks that cities should adhere to under an accrual accounting system. A revised budget process would allow cities the flexibility they need to finance long-term infrastructure without relying on provincial grants or upfront revenues.

Transit Governance

Originally created in 2007, Metrolinx started with the intent of creating a regional transit plan for the Greater Toronto and Hamilton area with a board made up of local government officials. Two years later, Metrolinx expanded to become the GO Transit operator. The province then removed the local government officials from the Metrolinx board, which is now made up of people appointed by the province.

How can the region overcome local opposition to changes while finding a way to act in the regional interest? Right now, it's easy for local politicians to pass blame around, especially to an unelected transit board. One proposal is to create a single, amalgamated transit operator for the whole Greater Toronto Area

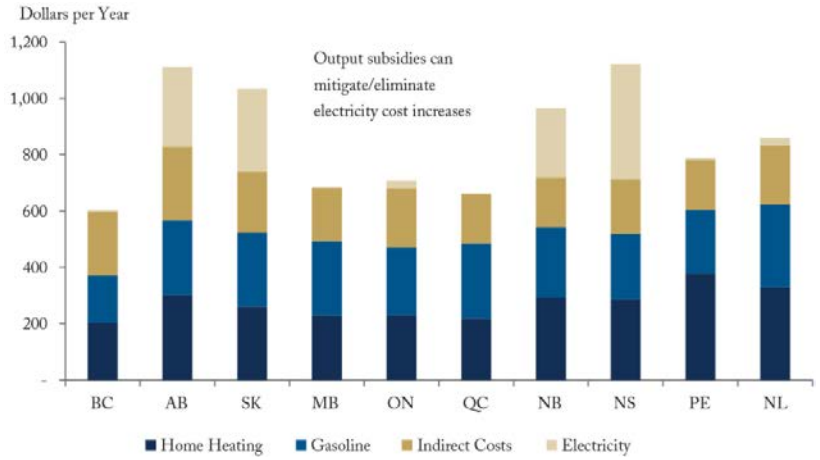
(Gill, Kelcey, Parker, 2017). But rather than amalgamation, which has shown to not result in significant savings (Bish, 2001, Found 2012), another approach is to restore the role of municipal governments on the board of Metrolinx.

Toronto should follow the Vancouver model, in which provincial legislation tasks a Mayor's Council made up of representatives from each of the region's 21 municipalities to appoint a board of Translink, the regional transit coordinating body. Translink has many subsidiary companies that operate transit services under contract (Translink 2017). The regional transit body is the regional coordinator, less than it is a regional authority and another new layer of government (Spicer and Found 2016). The reformed Metrolinx can contract with subsidiary transit operators, private contractors, or municipal governments that can supplement Metrolinx-supported routes.

Greenhouse Gas and Energy Policy

Greenhouse Gas Policy

This Shadow Budget would continue to increase the price on greenhouse gas emissions. This Shadow Budget does not take a position of the merits of a cap-and-trade program as opposed to a carbon tax. A carbon tax would be simpler to administer than a cap-and-trade program and would also generate more revenue for the province of Ontario. On the other hand, a cap-and-trade program that allows Ontario to link with the emissions permit market in California and Quebec allows for a lower cost on emissions to meet the same reduction target. Trading emissions permits across borders and between markets allows emissions reductions to occur wherever it is cheapest to do so, reducing the overall cost (Thivierge 2017).



If prices on emissions rise to $50 per tonne, which they are set to with federal government policy, the upfront cost to the average Ontario household would be around $700 per year (Figure 8). However, the final cost to consumers will depend on how governments recycle that revenue back to households. It is on how the government plans to use the revenues from a carbon price that this Shadow Budget proposes a change of direction for the province of Ontario.

Eliminate Energy Efficiency Programs and Consumer Subsidies

The current plan for the government of Ontario is to spend between $6 and $8.3 billion over five years on projects intended to further emissions reductions beyond that planned to occur using the existing cap-and-trade policy (Ontario 2016). The government plans to finance the subsidies with revenues from an auction for permits that greenhouse-gas-emitting companies must buy. Many of the proposed spending programs are exceptionally costly. For example, subsidies to retrofit apartments will cost as much as $900 million over five years. They will cost taxpayers $425 per tonne of GHG emissions reduced, much higher than any reasonable estimate of future carbon prices. Another example of a wasteful subsidy is the Electric Vehicle Incentive Program, which provides incentives of up to $14,000 per electric vehicle.[2] These kinds of subsidies are regressive and economically costly ways to further reduce emissions (Rivers and Shiell 2015). Other announced programs will not have a direct cost to taxpayers, but will be costly to drivers, homeowners and businesses. The government is planning to boost the amount of renewable content in gasoline and natural gas. Renewable-fuel mandates push the cost onto consumers and are an economically expensive way to reduce emissions (Auld 2008).

[2] See http://www.mto.gov.on.ca/english/vehicles/electric/electric-vehicle-incentive-program.shtml

Figure 8: Cost of a $50/tonne of CO_2 price on typical household

Source: Dachis and Tombe (2017) from Jennifer Winter.

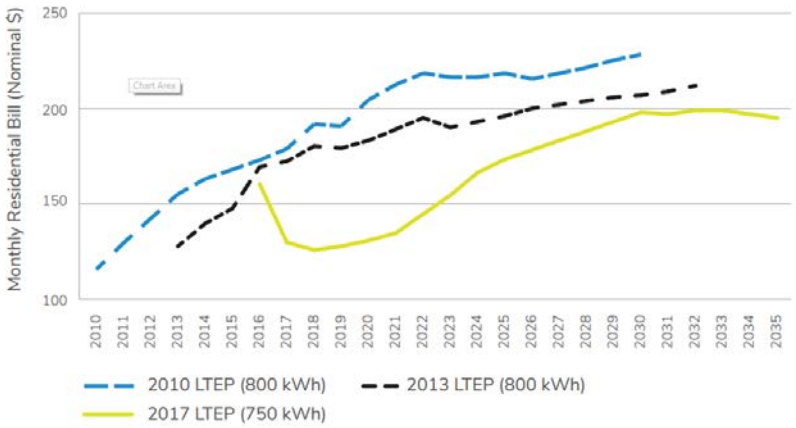
This Shadow Budget would eliminate nearly all of these existing subsidies and mandates and instead use the revenue to reduce taxation on households and businesses. The exact design of the tax cuts is outside of the scope of this Shadow Budget, but such a tax cut should promote two principles. First, it should reduce the average cost to businesses of emissions pricing while still providing a marginal incentive for them to reduce emissions. Second, households should receive tax cuts broadly in proportion to the cost of emissions pricing as a share of their income. This would mean tax cuts and enriching renewable tax credits geared to low-income families, for whom energy costs are a large share of total income.

To ensure industrial competitiveness, this Shadow Budget would adopt one of two paths. This Shadow Budget would prefer to adopt Alberta's emissions pricing policy, which is similar to the federal system. Producers in Alberta face little competitive disadvantage under this model. Although emitters pay the full cost of their own emissions, they receive a credit per unit of output, with the amount of the credit based on a provincial average emissions benchmark. Companies still have a strong incentive to reduce their emissions while having a minimal net impact on the competitiveness of industrial emitters. Indeed, companies with below-average emissions are better off in this system. This Shadow Budget would adopt a similar system if the cap-and-trade program is no longer the most effective means of putting a price on emissions. If, on balance, removing the apparatus of a cap-and-trade program for industrial emitters is too costly, it would preserve the system of allocating some permits for free to industrial producers.

Promote Long-term Energy Research

As research from Popp (2016) shows, a carbon price will drive 95 percent of the lowest-cost emissions reductions to meet reduction targets. Subsidies for energy adoption, as has been common in Ontario with electricity polices, encourages firms to use technology that is closest to market. Subsidies for adoption don't solve a market failure and don't encourage innovation. However, there is a market failure for longer-term energy research. The benefits of such research are broad, but the returns to firms of doing such research are relatively smaller, uncertain, and if they materialize at all will be far in the future. On their

own, research subsidies would achieve about 10 percent of economically efficient emissions reductions (Popp 2016). As such, this Shadow Budget would devote around 10 percent of revenues from an emissions price to long-term research.



Electricity Policy

Few topics have generated as much controversy in Ontario as electricity policy, with a number of previous policies resulting in a dramatic increase in electricity prices (Trebilcock 2017). The government has taken a series of measures that will immediately reduce electricity prices for residential customers. However, within five years, prices are forecast to increase dramatically as the current policy does not address the actual cost of generating and delivering electricity, and relies on taxpayers and future ratepayers to subsidize electricity use today (Figure 9). Further, many industrial consumers are receiving no reduction to their bills. This Shadow Budget would take actions now that will begin to reduce system cost and reduce prices for businesses and consumers in the future.

Market Design and Regulation

The Independent Electricity System Operator (IESO), which manages the electricity market for Ontario, is undertaking a major market reform. The IESO projects that the market reform will reduce the cost of purchasing electricity by billions of dollars, eventually resulting in savings for consumers. The single-largest cost savings for consumers is set to come from the IESO adopting what is called a capacity market. A capacity market provides electricity generators with a revenue stream for being available to produce electricity, in addition to their revenues from selling electricity. Such a market is a major improvement to the government's previous approach of signing 20-year contracts with generators that effectively covers both. The government's plan is a sensible one that has been shown to be effective in a number of other jurisdictions, and this Shadow Budget would continue to proceed with it (see Goulding 2013 and Wyman 2014).

Figure 9: Electricity Price Outlook – Residential Consumers

Source: Ontario (2017b).

This Shadow Budget would propose the government look to take the market reform one step further by reforming the purchasing role of the IESO. The current proposal for the capacity market is to make the IESO the only buyer of generation contracts. The downside of that plan is that it does not create competition among potential electricity buyers. This Shadow Budget would delegate the purchasing power in the capacity market to local buying groups across the province. These local buying groups, known as load-serving entities, would have the ability to purchase electricity that suits local needs. Large business, currently limited to buying electricity from the IESO and paying a share of the Global Adjustment, which pays for capacity investments, could form their own load-serving entities and contract directly with generators. Further, these local buying groups would encourage consolidation of local distribution companies, to which we will return to below.

However, as Goulding (2013) argues, to be effective, the government must pair a capacity market with changes to improve the independence of Ontario's electricity regulatory bodies. Ontario governments of all political stripes haved directed various government agencies to take specific action in the electricity sector while circumventing regulators (Vegh 2016). This Shadow Budget would end the cycle of government price interventions, specific directives, and decisions on procurement by requiring the Ontario Energy Board to review all major decisions in the energy market with a mandate to approve actions only if they increase economic efficiency (see Church 2017 for a discussion of economic efficiency in regulatory hearings).

Economic efficiency means having an electricity market that has decisions determined by prices, and not arbitrary government rules. One of the most intrusive arbitrary government electricity market rules is the Industrial Conservation Initiative. In this program, eligible industrial consumers save money if they slash electricity use during the five highest Ontario-wide demand hours of the year. It's an arbitrary and expensive way to cut electricity costs for some (Sen 2015). Small businesses and residents pay higher bills because of the policy. Instead, this Shadow Budget would eliminate this program and let large consumers pay only for what they buy in a capacity market and the hourly electricity market.

Similarly, a portion of the electricity bills of Ontario households support subsidies for residential consumers to purchase smart thermostats and other energy-efficiency devices. These programs cost ratepayers $600 million in 2016 (Auditor General 2017b). As with direct government spending on such programs these programs often do not pass a cost-benefit test for the use of government fund. Many households would make such investments if energy prices were sufficiently high and they were sufficiently informed. This Shadow Budget would remove any directives requiring such energy efficiency measures, and grant the Ontario Energy Board the authority to approve or reject energy efficiency programs, such as the Industrial Conservation Initiative, based solely on whether they improve economic efficiency.

Encouraging Private Investment in the Ontario Energy Sector

As of 2017, municipal governments in the province owned local electricity distribution companies that had a value of $11 to $15 billion (Robins 2017a). Cities could sell these companies to finance infrastructure investment. Sales would have no negative effect on ratepayers, since the Ontario Energy Board keeps a close regulatory eye on all price changes regardless of who owns the companies. Furthermore, private investors are usually best placed to make the decisions about the appropriate boundaries of companies, geographically and across distribution, transmission and even generation investment. Private investors would bear the consequences of poor choices, but reap some of the rewards of good mergers (Fyfe, Garner,

and Vegh 2013). The incentives for these private-sector companies to keep costs down are often better aligned with ratepayers than those facing publicly owned electricity companies.

However, cities have not been able to take advantage of the value of these assets because of provincial taxes on such sales.[3] The province would collect $1.8 to $2.5 billion in such taxes (Robins 2017a). These overly high taxes pose a significant barrier to any sale. This year will be the last year of a three-year partial tax holiday on provincial transfer taxes in Ontario on the sales of municipally owned local electricity distribution companies. The intent of this tax change was to encourage mergers using private investors, rather than only encouraging merger with other government-owned companies. However, there have been few sales so far, partly because the tax holiday was limited largely to sales of very small companies. Private investor showed little appetite for such assets. This Shadow Budget would exempt municipalities entirely from all taxes on sales, as long as the proceeds of a sale are reinvested in qualifying infrastructure projects.

Private investment in provincially owned electricity assets has been a controversial topic, but a wise policy move. As Robins (2017b) argues, it is not necessary for the province to continue to own its minority share in Hydro One, the transmission utility, or Ontario Power Generation (OPG), a major power generator, if its policy objective is to keep electricity prices down. As with municipal companies, a strong Ontario Energy Board can protect consumers no matter the owner. A sale of the remaining government stake in Hydro One would net the province somewhere in the order of $7 billion and a sale of OPG could also generate substantial revenue.

The upfront revenue is not necessarily the best reason for the province to sell electricity assets. The main reason to sell is reduced risks. The sale would reduce dividends in the future, such as the $250 million from Hydro One. However, using such a sale to eliminate debt could result in cost-savings and reduced fiscal risks if interest rates increase. Second, the electricity sector is undergoing fundamental change. OPG and Hydro One deliver electricity in a traditional long-distance network. However, the electricity system of the future may look very different, with the emergence of small-scale renewable electricity generation. The result could be a decline in value of, and therefore dividends flowing to the treasury from, Hydro One and OPG. The best way for the province to mitigate that risk is to continue selling stakes in Hydro One and begin to include private investors in OPG.

Conclusion

A fiscally sustainable Ontario will mean higher standards of living for Canadians through better government services and faster economic growth. The province should take action to correct a fiscal course that is unsustainable. The government must act to bring the long-term cost of government in line with the revenue-raising capacity of the province. This Shadow Budget shows that there are a number of policy directions the government can and intends to take in areas as diverse as electricity, greenhouse gas, municipal, health, social and tax policy that can balance increases in spending with generating new revenues and cost-savings measures, and generally enhancing the well-being of Ontarians.

[3] See Fyfe, Garner, and Vegh (2013) for more details on the complex system of transfer and departure taxes in the Ontario local electricity distribution sector.

Hi Ken, attached are the consolidated answers to the FAO questions. Could you please take a look at the chart that CPD added to A9 on p. 6. Do tangible capital assets appear in that chart? And if so, how does that relate to our point number 6 re no change in TCA?

Are you in trillium or have you gone back to 1 Dundas? Gadi is on the 7th floor now. Feel free to come out and chat with him here when you're done in the audit committee or call him when you have a moment.

Subject: ADMs Pre-Meeting Ahead of FAO Discussion (11am-11:30am)

Hi All,

In order to go over the sequence of events for the FAO discussion, there will be an ADMs pre-meeting between **11:00am-11:30am** tomorrow in the Aquarium Boardroom. There will be a dial in option provided.

Please hold this time in your ADMs/appropriate representative's calendar.

Thanks,
Ryan

Subject: RE: Follow-Up on the 2017 Budget / Meeting on Tuesday

Hi All,

FYI, attached are additional Qs for discussion from the FAO. I'll be sending out a meeting invite for between **1pm-2pm on Tuesday** shortly.

Thanks,
Ryan

That`s correct. If another slot can be arrange it would be preferred – our DM is slated for the recognition event too so would prefer not to move.

Hi Ryan,

Artur has a hold in his calendar on May 2 from 2-3pm for a Standing Ovation Ceremony. I believe Maria and Karen are also participating in the

event.

David (for Rex)

Subject: FW: Follow-Up on the 2017 Budget / Meeting on Tuesday

Hi All,

As a follow up to these questions on the 2017 Budget, I wanted to hold an hour block of time on Tuesday (May 2) to meet with the FAO.

Would **1:30pm-2:30pm** in the Aquarium on **Tuesday** work for your ADMs? If you could confirm before EOD, it would be appreciated.

Thanks!
Ryan

Subject: Fw: Follow-Up on the 2017 Budget

Hey everyone - we'll coordinate the response for this, working with your directors and staff. We'll also work with your EA's to find the right time for everyone to meet next tuesday.

Tim

Subject: Follow-Up on the 2017 Budget

Good Morning!

Congratulations on delivering yesterday's big, black budget!

I wanted to follow-up on the FAO's requests for some additional information.

First, as we have discussed, we have three requests for specific data/tables:

1. We would like to obtain the detailed revenue and expense tables (Tables 6.14 and 6.15) extended to 2019-20.
   - Are these detailed tables available to 2020-21? If so, then please include (☺)

2. As staff have been discussing, we would like to obtain more detailed information on the one-time adjustments to taxation revenues beginning in 2015-16 and extending over the forecast. This is basically additional information to that provided in tables 6.7, 6.8 and 6.9.

3. As detailed in the letter and background documents sent to Deputies Thompson and Angus on April 3, we are requesting pension expense and employer contribution details for the OTPP and OPSEUPP.

We would also appreciate a meeting early next week (preferably Tuesday afternoon) to allow you to respond to a number of questions that we have with regard to the 2017 Budget.

We'll provide a list of specific questions later this afternoon, but these questions will cover a number of areas, including:

- Clarification on where the Fair Hydro Plan appears in the expenses
- Additional details/clarification on new health spending, including the new pharmacare plan
- Clarification on future assumptions for asset sales and any details behind the 'Sales and Rentals' line in the detailed Revenue table.
- Clarification on the assumptions behind new federal funding announced in the 2017 federal budget (e.g. affordable housing, child care, home care)
- Some background on the decision to reduce the estimate of 'Carbon Allowance Proceeds' and assumptions on associated expense
- Additional details/clarification on new infrastructure spending
- Assumptions behind the plan to reduce net debt-to-GDP to 35% and eventually to 27%.

We'll provide a list later this afternoon that expands somewhat on these question topics.

Happy to discuss any of these requests.

Thanks again for your support,
David

FAO Questions for MOF

April 28, 2017

Economics

Q1. Why is the growth rate for labour compensation running significantly above the growth for primary household income, particularly in 2018 and 2019? **OEP-MOF**

A1. When the labour market is tighter in Ontario and conditions are improving elsewhere in Canada, there is evidence that labour compensation growth outpaces growth in primary household income.

- Over the 1997-00 and 2003-07 periods, labour compensation growth in Ontario outpaced primary household income growth by 0.6 and 0.2 percentage points annually, respectively.
- Over the 2010-16 period, labour compensation in Ontario grew at the same rate as primary household income, on average.

All forecasters who project both labour compensation and primary household income expect labour compensation to outpace primary household income over the 2018-2020 period.

- There is divergence in views across forecasters. The Ministry's projection is within the range of forecasters.

Q2. Do you use Compensation of Employees on a 'National Basis' (from Table 11 of the OEA) as the principal PIT driver? In 2016, Labour Compensation on a national basis grew at 4.4% while on a domestic basis it grew 4.2%, which is an unusually large gap. **OEP-MOF**

A2. Yes, Compensation of Employees on a "National Basis is the principal PIT driver.

Revenue

Q3. In Table 3.14, sales and rental revenues are projected to increase by $1 billion in 2017-18. Can we get details about the assumptions behind this increase? **OEP-MOF & CEFD-MOF**

A3. The change in Sales and Rentals revenue reflects a number of items, which include higher revenues from some consolidated government agencies and the impacts of the government's multi-year asset optimization strategy.

Please note that the interim 2016-17 sales and rentals total is revised down vs. the 2016-17 sales and rentals forecast in the 2016 Budget, which mainly reflects the re-categorization of revenues related to the Province's asset optimization strategy. This includes the re-categorization from sales and rentals of the impact of the sale of the LCBO head office lands.

The term "re-categorization" is used to refer to fiscal impacts related to the Province's asset optimization strategy that were previously consolidated in the sales and rentals line item that are now being unpacked to other revenue lines with no impact to the Province's fiscal plan. In the previous Budgets, as you may recall, the government included future projected net revenues related to asset optimization in the sales and rentals line item to ensure confidentiality on the specific estimated amounts and timing of certain elements of the Province's asset optimization initiative to protect the commercial interests of the Province. As the sale of assets occurs, the government re-categorizes the impacts of the asset sales into their respective line items. This allows for the Province to transparently report the fiscal impacts of the transaction in the relevant revenue lines once the sale of an asset has occurred.

Similarly, projected net revenue impacts related to future transactions under the Province's asset optimization strategy remain reported as a net number under Sales and Rentals in consideration of the commercial and securities sensitivity of such transactions.

The change in Sales and Rentals revenue reflects a number of items, which include higher revenues from some consolidated government agencies and revisions to the government's multi-year asset optimization target to reflect the progress made so far. For example, the 2016-17 sales and rentals is revised down to reflect this progress as revenues from the Hydro One IPO and 2016 Secondary Offering are reflected in the revenue lines affected by these transactions – Hydro One net income under Government Business Enterprises, electricity payments in lieu of taxes and Sales and Rentals.

In the previous Budgets, as you recall, the government included all future projected net revenues related to asset optimization in the Sales and Rentals line item to ensure confidentiality on the specific estimated amounts and timing of certain elements of the Province's asset optimization initiative to protect the commercial interests of the Province. As the sale of assets occurs, the government re-categorizes the impacts of the asset sales into their respective line items.

Similarly, projected net revenue impacts related to future transactions under the Province's asset optimization strategy are captured as a net number under Sales and Rentals in consideration of the commercial and securities sensitivity of such transactions.

Q4. The 2017 federal budget announced new funding for affordable housing, child care, infrastructure, home care and labour-market training. To what extent are these new revenues (and the associated expense) built into the fiscal plan? **OEP-MOF & PEMD/CPD-TBS & OB-MOF**

A4. Budget 2017 projections of Government of Canada transfers include new funding under Strategic Investment Fund for affordable housing, post-secondary education and clean water and wastewater projects. It also includes Public Transit Investment Fund, and funding anticipated for home care & mental health, and jobs and training.

Expenses associated with these findings are built into the fiscal plan except transfers for Home Care & Mental Health and transfers for Jobs and Training, as funding for these items is yet to be finalized. The Home Care & Mental Health line also includes additional federal funding in 2017-18 to support Ontario's housing priorities; linked-expenditure has not yet been identified as funding is yet to be finalized.

New Federal Funding Since Budget 2016 (For MOF ONLY NOT TO BE SHARED)

$ Million	2016-17	2017-18	2018-19	2019-20	2020-21
Investment in Affordable Housing	321	115			
Post-Secondary Education	197	267	77	15	15
Clean Water and Wastewater Fund	85	338	141		
GC - Infrastructure Other (PTIF)		1,114	372		
Home care and Mental Health		146	328	424	482
Jobs and Training		77	77		
Total	**602**	**2,056**	**994**	**439**	**497**

Childcare

No specific provisions were made for 2017 federal Budget commitments related to child care and labour market/skills training. [Note: this information has not been released to the public].

Affordable Housing

The 2017 Federal Budget proposes to invest more than $11.2B over 11 years (2017-18 to 2027-28) to build, renew and repair Canada's stock of affordable housing.

Additional cost-matching risk to Ontario may arise from the new housing strategy associated with the National Housing and affordable housing initiative. However, the Federal Budget did not disclose the cost-sharing splits between various levels of government.

The Federal government may provide further details later this year as part of a National Housing Strategy announcement.

As the program design is still being finalized, the revenue and expense relate to the new federal housing strategy is not built into the current fiscal plan. The 2017 Budget only includes agreements that have been previously ratified (i.e., Investment in Affordable Housing Programs for Ontario).

Infrastructure Funding

The 2017 Federal Budget confirmed that the $81 billion Phase 2 funding will be allocated in the following ways:

- $33 billion through bi-lateral agreements.
- $15 billion through the Canada Infrastructure Bank split evenly between public transit, green, and trade and transportation infrastructure.
- $10.8 billion through competitive national funds for housing, trade corridors, cultural spaces and various green initiatives.
- $10.2 billion through multi-lateral frameworks for housing and early childhood education.

In addition $12 billion has been allocated to a variety of infrastructure related initiatives under federal responsibility including investments in Indigenous Communities.

Ontario's share of the Phase 2 Federal Infrastructure funding and funding requirements (e.g. incrementality conditions) will be determined as part of upcoming bi-lateral negotiations with the federal government.

Q5. Expected revenues from Carbon Allowance Proceeds have been reduced by $0.5 billion beginning 2018-19 (Table 6.10). Any explanation of the lower revenue projection?

a) Is the annual forecast for Carbon Allowance Proceeds $1.4 billion? If so, does the higher amount in 2017-18 of $1.8 billion just reflect the shifting of proceeds from the first auction in 2016-17 (that is there is an extra auction in 2017-18 than in future years)? **OEP-MOF**

A5a) Yes, the annual forecast for Carbon Allowance Proceeds is $1.4 Billion except in 2017-18. The higher amount in 2017-18 reflects the shifting of proceeds from the first auction in 2016-17, as the proceeds from the first auction are being

certified, settled and recorded in the 2017-18 fiscal year. In other words, there will be revenues from five auctions recognized in 2017-18, while going forward there will be four in each fiscal year.

b) Are the associated expenses from the Green Investment Fund being reduced as well, to reflect the lower revenue forecast? **PEMD-TBS**

A5b) No, expenses associated with the Green Investment Fund will not be reduced to reflect the lower revenue forecast and will remain at the level publically announced.

Q6. Base revenue growth for Corporations Tax and Sales Tax are noticeably stronger than the growth of their underlying drivers. What are your elasticity assumptions for Personal Income Tax, Corporations Tax and Sales Tax with respect to their drivers? **OEP-MOF**

A6.

Corporations Tax: Corporations tax base revenue is projected to grow at an average annual rate of 6.3 per cent over the 2016-17 to 2019-20 period. This is in line with the 6.5 per cent average annual growth in the net operating surplus, an implied elasticity of 1.0.

Personal Income Tax: The primary economic driver of the forecast for Personal Income Tax (PIT) revenue is the outlook for growth in the compensation of employees. PIT revenue tends to grow at a faster rate than incomes due to the progressive structure of the PIT system. Budget 2017 assumes an elasticity of 1.3 for PIT.

Sales Tax: With regards to Sales Tax revenue, note that about 60 per cent of the HST taxable base is attributable to consumption expenditures and 18 per cent to the housing sector. Housing is driven by new home construction (subject to significant lags especially in the huge GTA condo sector), renovations and real estate transaction fees (not including resale activities).

Over the forecast period of 2017-18 to 2019-20, the HST is projected to grow at 4.9 per cent, slightly faster than nominal consumption of 4.2 per cent, or an elasticity of 1.1. This is justifiable because of Ontario's strong housing sector and as Ontario's share of the overall GST/ HST pool continues to rise as its economy is expected to outperform the rest of Canada.

a) For HST, could you break out the revenues expected from housing and nominal consumption over the forecast? **OEP-MOF**

A6a) There is no breakdown of HST revenues attributable to its different economic drivers. An approximation of the breakdown may be derived by applying the Ontario HST rate to the taxable base although it is not possible to verify its accuracy.

Q7. The federal government's 2015-16 Annual Financial Report indicated that stronger 2015 federal PIT returns partly reflect "…tax planning by high-income individuals to recognize income in the 2015 tax year before the new 33 per cent tax rate came into effect in 2016". What assumptions were made on the impact of income shifting on Ontario's PIT revenue? **OEP-MOF**

A7. Although at this point, there is no conclusive evidence to suggest that higher 2015 revenue from tax returns processed during 2016 was a result of tax planning, the PIT revenue forecast for 2016-17 includes a one-time downward adjustment of $0.5B to exercise prudence in the forecast. We will have more definitive information as results of the tax returns processed for 2016 arrive.

Expense

Q8. The anticipated fiscal impact of the Fair Hydro Plan is approximately $1.8 billion based on information provided to the FAO (roughly $1 billion for HST rebate and $800 million for the electricity social programs). However, the 2017 Budget indicates that the total cost would be around $1.4 billion in 2017-18 (Table 6.15). Can you explain the discrepancy? **PEMD-TBS & CEFD-MOF**

A8. Energy's forecasts for the various programs were refined.

a) OREC – Forecast adjusted for bill impacts of new initiatives under the FHP announced March 2, 2017.

b) Social programs moving to government funded – Preliminary Estimates based on full year 2017-18 versus partial year for 2017-18 reflecting roll-out timing.

	2017-18	
	Preliminary Estimate	2017 Budget
OREC	1119	939
OESP	186	140
RRRP	459	344
ONFNDC	20	15
Total	1784	1438

Q9. A number of new programs were announced in the budget. Can you provide the fiscal impact for these new initiatives (e.g. children and youth pharma-care, child care spaces expansion) by completing the following table? Are these fiscal impacts in the plan? **PEMD/CPD-TBS & TPD-MOF**

Cost of Announced Programs

$ Millions	2017-18	2018-19	2019-20	2020-21
Children and Youth Pharmacare	115	465*	465*	465*
100,000 Child Care Spaces Expansion	170	282	295	235
Fair Hydro Plan	1438	1635	1711	1787
Caregiver Tax Credit				
Other major programs?				

* Beginning in 2018-19, Children and Youth Pharmacare will be partly offset with annual savings of $100M from drug programs.

a) The September Throne Speech announced the expansion of 100,000 new child care spaces. The budget announced 24,000 additional spaces. What is the progress in the rollout plan for the remaining spaces? Is there additional fiscal impact from the Throne Speech that have not been incorporated? **PEMD-TBS**

A9a) The government has committed to creating 24,000 new child care spaces in 2017-18. This commitment is part of the Province's plan to help 100,000 more children access child care, as announced in the 2016 Ontario Speech from the Throne. This commitment builds on the progress of recent child care expansion, including helping create 56,000 new licensed child care spaces over the past three years. The fiscal impact of child care expansion initiatives will be impacted by timing and allocation of funding to service managers (e.g., municipalities), and will continue to evolve as this commitment is implemented.

Debt

Q9. The budget indicated that the government aims to reduce the net debt to GDP target to 35 per cent by 2023-24 and 27 per cent by 2028-29. What assumptions are built into this projection for nominal GDP, the budget balance, and capital expenditure? **OFA-MOF & CPD-TBS**

A9. Our Net Debt assumptions have many moving parts and are from several sources, namely OEP and CPD. They were factored into our net debt calculations as follows:

1) Pension is reversed and deficit for 2016-17 is $1,524 million
2) The denominator annual nominal GDP that goes into the net debt calculation % is per latest information received from OEP used for the 2017 Budget
3) A major component of the net debt calculation in the numerator, the book value of tangible capital assets, is per the latest information received from CPD used for the 2017 Budget

Details from CPD-TBS:

Capital's impact on net debt is estimated as the increase in the net book value (NBV) of capital assets each year (annual acquisitions less amortization). The NBV of tangible capital assets represents the cost of the province's owned and consolidated tangible capital assets, less accumulated amortization and the amount of any write-downs.

The below table outlines forecasted growth in the NBV of capital assets based on planned acquisitions and amortization expense. Note that acquisitions include those funded through third party contributions and that amortization includes deferred capital contributions.

PROVINCIAL TCA Net Book Value ($ Billions)	2016-17 Interim	2017-18	2018-19	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25	2025-26	2026-27
Opening Net Book Value	**102536**	**108,372**	**118,377**	**129,727**	**142,313**	**153,001**	**160,985**	**165,948**	**165,888**	**167,105**	**165,376**
Annual Acquisitions	11,092	15,566	17,274	18,851	17,433	15,352	12,919	8,314	9,932	7,194	8,612
Gross Amortization Expense	(5,256)	(5,562)	(5,924)	(6,265)	(6,745)	(7,369)	(7,956)	(8,374)	(8,715)	(8,923)	(9,008)
Closing Net Book Value	**108,372**	**118,377**	**129,727**	**142,313**	**153,001**	**160,985**	**165,948**	**165,888**	**167,105**	**165,376**	**164,981**

Notes:
Opening NBV for 2016-17 from public accounts
Annual Acquisitions include other partner funding and federal flowthroughs

4) Our Net Debt amount is not adjusted for prepaid expenses and inventory. Such an adjustment will be done for the 2016-17 Public Accounts onwards going forward (new this year per OPCD request)
5) The balanced budget continues through to 2030-31
6) The Tangible Capital Asset book value is the same from 2026-27 to 2030-31, i.e. no change
7) GDP annual growth is 4% from 2021-22 to 2030-31 per direction from OEP.

Q10. What's the explanation for the increase in cash reserves? Is it related to recent changes in rating criteria requiring more liquid reserves covering the issuance of commercial paper debt? **OFA-MOF**

A10. Ontario actively manages its financial obligations through the maintenance of a liquid reserve portfolio and the use of short-term borrowing. The Province increased its level of unrestricted liquid reserves following the financial crisis in 2008–09.

Coming out of the financial crisis, the Province began a strategy of creating large, liquid 10- and 30-year benchmark domestic bond issues in 2009–10 in response to investor demand. This strategy has been very successful and continues to lower Ontario's borrowing costs and enhance the Province's access to capital.

However, as a result of these large bond issues, the Province will have large cash outflows on single days commencing in 2019–20, rather than having maturities spread more evenly through the year. In anticipation of the need for cash reserves to meet these requirements for large outflows on a single day, the Province began, as noted in Table 6.24, building cash reserves in 2016–17, and will continue to increase these reserves in 2017–18.

This will ensure that Ontario's cash reserves remain at relatively healthy levels, a key requirement from the perspective of the Rating Agencies.

Q11. What is a Designated Purpose Account? **OPCD-TBS**

A11. A Designated Purpose Account (DPA) is an account, or system of accounts, in the financial records, authorized through legislation, that tracks the recognition of specified revenue and expenditures for the purposes outlined in the enabling legislation.

The government established DPAs to demonstrate to the public, progress on the government's commitment to spend over time at least as much as it has accumulated through identified funding sources to achieve the legislated objectives.

In addition, these DPAs support effective reporting and recording of financial activities as they relate to designated government programs and initiatives in accordance with the requirements of its governing legislation.

Questions from David West – email:

Q12. We would like to obtain the detailed revenue and expense tables (Tables 6.14 and 6.15) extended to 2019-20. Are these detailed tables available to 2020-21? If so, then please include (☺) **OEP-MOF Table 6.14 and OB-MOF & PEMD/CPD-TBS 6.15**

A12. OEP-MOF provided detailed revenue table out to 2019-20 to the FAO through email.

OB-MOF & PEMD-TBS to provide detailed expense tables before the meeting (if possible).

Q13. As staff have been discussing, we would like to obtain more detailed information on the one-time adjustments to taxation revenues beginning in 2015-16 and extending over the forecast. This is basically additional information to that provided in tables 6.7, 6.8 and 6.9. **OEP-MOF**

A13. Response provided to the FAO as part of email response for Q12.

Q14. As detailed in the letter and background documents sent to Deputies Thompson and Angus on April 3, we are requesting pension expense and employer contribution details for the OTPP and OPSEUPP. **OPCD-TBS**

A14. TBS provided email response to FAO on May 1.

Follow-up question from David West:

My one initial question would be that the pension cost (expense less contributions) is now about $1.2b lower than estimated in the 2016 FES for 2018-19.

I assume this is just a reflection of the updated accounting calculations, but we'd be interested to understand the main factor(s) behind this change.

Q15. Additional details/clarification on new health spending, including the new pharmacare plan **TBS PEMD**

A15. See additional back pocket pieces.

Q16. Additional details/clarification on new infrastructure spending **CPD-TBS**

A16. CPD to provide if required

Question from Luan Ngo – email:

Q17. One more question that I'd like to tack on relates to the assumed year-end savings. I noticed that the year-end savings target was increased to $1.2 billion for 2017-18.

a) Was there a section in the budget that discussed the policy reasons or assumptions behind this higher target for this year? If so, can you point it out to me?

b) Is this higher target maintained for the out-years as well?

c) Finally, in previous budgets, there were sections that indicated how much year-end savings were achieved by the government.

d) Is there data anywhere that points to the government's record in achieving its target for 2016-17? **PEMD-TBS**

A17.

BACKPOCKET – NEW HEALTH SPENDING BREAKDOWN

Backgrounder: MOHLTC PRRT Funding Breakdown

Overview

The 2017 Budget and supporting communications products include several references to overarching health sector investments:

A. **$7 billion -** *The government is investing an additional $7 billion in health care over the next three years, compared to the 2016 Budget plan, to reduce wait times, provide access to care and to enhance the patient experience. With these new investments, growth in health spending will now average 3.3 per cent over the medium term.* [Chapter 4A]

B. **$11.5 billion** – *Ontario is increasing health care investments by $11.5 billion over the next three years. The 2017 balanced budget includes a new $7 billion booster shot to health care, building on the commitment made in the 2016 Budget.* [News Release]

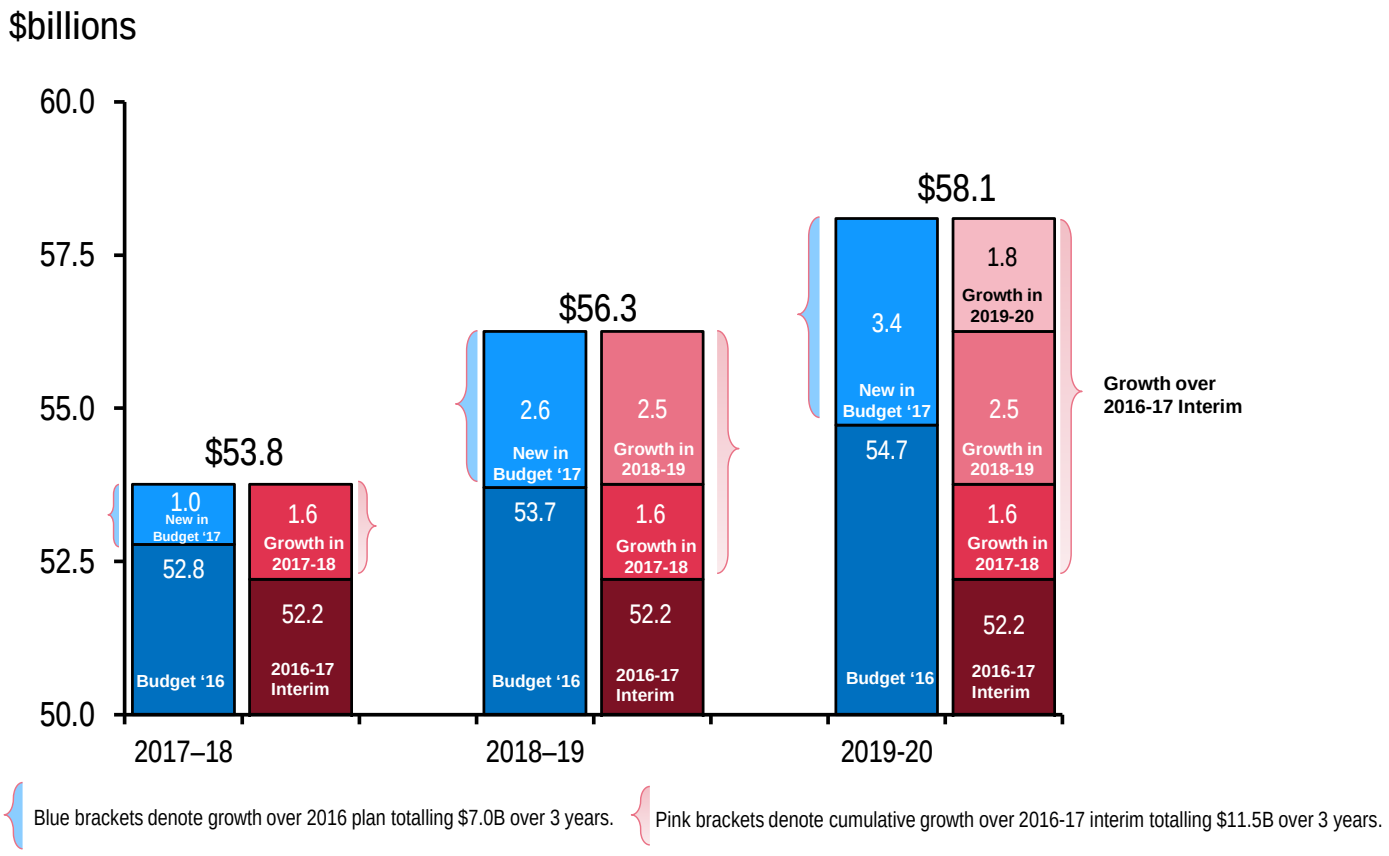
C. **$1.3 billion –** *Over the next 3 years, the Province will invest $1.3 billion in additional funding to reduce wait times, including $890 million for key surgical and other priority procedures; $245 million to improve specialist access, including new digital solutions to streamline consults and eReferrals; $85 million in new home and community care services; and $74 million to provide more timely mental health services.* [Chapter 4A]

Methodology

Below is a description of each calculation. The different funding references are not incremental the $7 and $11.5 billion are different methodologies for showing in-plan health sector expense growth (see tables on page 2).

A. **$7 billion -** is the cumulative 3 year growth between the 2016 Budget and 2017 Budget. This amount includes all in-year 2016-17 funding decisions. [1]

B. **$11.5 billion** – is the 3 year cumulative total of all investments in the 2017 Budget and 2016 Budget above 2016-17 Interim. These investments include previously approved growth through the 2016 Budget.



C. **$1.3 billion –** is the incremental new investment that MOHLTC has attributed to supporting wait times. These investments are a subset of the $7 billion and $11.5 billion references. This amount also includes funding referenced in other areas of the document e.g.:

- $518 million for hospitals
- $140 million for mental health and addictions services

[1] 2016-17 in-year decisions include: $140M for hospitals, $106M for the drug program, $95M for stem cell transplants, $30M First Nations Health Action Plan as well as other adjustments

Investments in Health Care in the Next Three Years – $7B and $11.5B methodologies

Investments in Health Care in the Next Three Years ($ billions)	2016-17	2017-18	2018-19	2019-20	3-year total
2016-17 Budget (published, except 2019-20)	51.8	52.8	53.7	54.7	
2017 Budget (2016-17 = interim 2016-17)	**52.2**	**53.8**	**56.3**	**58.1**	
Budget 2017 (multi-year plan) vs Budget 2016 (respective multi-year plans)		**1.0**	**2.6**	**3.4**	**7.0**
Budget 2017 (all out-years) vs Interim 2016-17 (constant)					
Year 1 investment (based on 2016-17 interim)		1.6	1.6	1.6	
Year 2 investment (based on 2016-17 interim)			2.5	2.5	
Year 3 investment (based on 2016-17 interim)				1.8	
Budget 2017 (multi-year plan) vs Interim 2016-17 (constant)		**1.6**	**4.0**	**5.9**	**11.5**

Blue brackets denote growth over 2016 plan totalling $7.0B over 3 years.

Pink brackets denote cumulative growth over 2016-17 interim totalling $11.5B over 3 years.

Attachments: Final Audit report signed letterhead.pdf
Importance: High

Ken,

Please see below my suggested wording for CEO's Corner. I have attached the AG's opinon.

This year marks the second time the Auditor General qualified her audit opinion of the Public Accounts over how the net pension assets of the Teacher's Pension Plan and OPSEU are classified and reported. This year also marks a further qualification for the reporting of certain rate regulated assets of the Independent Electricity System Operator agency being consolidated in Public Accounts.

Despite these qualifications, I do not anticipate any discernable impacts to the Province's credit rating. It should be noted that both Quebec and BC had qualified opinion in 2016, with no noticeable impacts as well.

Thanks.

John

Office of the Auditor General of Ontario
Bureau de la vérificatrice générale de l'Ontario

INDEPENDENT AUDITOR'S REPORT

To the Legislative Assembly of the Province of Ontario

I have audited the accompanying consolidated financial statements of the Province of Ontario, which comprise the consolidated statement of financial position as at March 31, 2017, and the consolidated statements of operations, change in net debt, change in accumulated deficit and cash flow for the year then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

The Government of Ontario (Government) is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Canadian public sector accounting standards, and for such internal control as the Government determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

My responsibility is to express an opinion on these consolidated financial statements based on my audit. I conducted my audit in accordance with Canadian generally accepted auditing standards. Those standards require that I comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the Government, as well as evaluating the overall presentation of the consolidated financial statements.

I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my qualified audit opinion.

Basis for Qualified Opinion

Net Pension Asset Overstated, Annual Deficit Understated, Net Debt Understated and Accumulated Deficit Understated

As described in Note 16a to these consolidated financial statements, a net pension asset is recorded on the Consolidated Statement of Financial Position relating to the Ontario Teachers' Pension Plan and the Ontario Public Service Employees' Union Pension Plan. However, the Government does not have the unilateral legal right to use this asset because its ability to reduce future minimum contributions or withdraw any pension plan surplus is subject to agreement with the respective pension plans' joint sponsors. Canadian public sector accounting standards require the Government to record a valuation allowance against this asset.

The Government did not record a valuation allowance for this net pension asset at March 31, 2017. The Government also retroactively restated the March 31, 2016 comparative figures to exclude the valuation allowance previously included in the prior year's consolidated financial statements. This departure from Canadian public sector accounting standards has led me to express a qualified opinion on the consolidated financial statements for the year ended March 31, 2017 and on the March 31, 2016 comparative figures.

The recommendations of the Government's appointed Pension Asset Advisory Panel are not an authoritative source on the application of Canadian public sector accounting standards as implied in Note 16a to these consolidated financial statements.

Effect on Consolidated Statement of Operations

If the Government had correctly recorded the valuation allowance against the net pension asset for the Ontario Teachers' Pension Plan and the Ontario Public Service Employees' Union Pension Plan, the effect on the consolidated statement of operations for the years ended March 31, 2017 and 2016 would have been as follows:

	2017 ($ million)	2016 ($ million)
Annual deficit as presented	(991)	(3,515)
Effect of valuation allowance on:		
• Education expense	(1,364)	(1,480)
• General Government and Other expense	(80)	(351)
Annual deficit in accordance with Canadian public sector accounting standards	**(2,435)**	**(5,346)**

Effect on Consolidated Statement of Financial Position

If the Government had correctly recorded the valuation allowance against the net pension asset for the Ontario Teachers' Pension Plan and the Ontario Pubic Service Employees' Union Pension Plan, the effect on the consolidated statement of financial position as at March 31, 2017 and 2016 would have been as follows:

	2017 ($ million)	2016 ($ million)
Net pension asset as presented	11,033	9,312
Effect of valuation allowance	(12,429)	(10,985)
Net pension liability in accordance with Canadian public sector accounting standards	**(1,396)**	**(1,673)**

	2017 ($ million)	2016 ($ million)
Net debt as presented	(301,648)	(295,372)
Effect of valuation allowance	(12,429)	(10,985)
Net debt in accordance with Canadian public sector accounting standards	**(314,077)**	**(306,357)**

	2017 ($ million)	2016 ($ million)
Accumulated deficit as presented	(193,510)	(192,029)
Effect of valuation allowance	(12,429)	(10,985)
Accumulated deficit in accordance with Canadian public sector accounting standards	**(205,939)**	**(203,014)**

Inappropriate Consolidation of Independent Electricity System Operator (IESO) Market Accounts

As described in Note 16c to these consolidated financial statements, the IESO changed its accounting policy and applied it retroactively to recognize market account assets and liabilities. The market accounts track mainly buy and sell transactions between market participants (electricity power generators and power distributors). These market accounts, as recorded on the Province of Ontario's consolidated financial statements are not assets and liabilities of the Province of Ontario. The Government has no access or discretion to use the market account assets for their own benefit, nor does the Government have an obligation to settle the market account liabilities in the event of default by market participants. As a result, Other Assets and Other Liabilities are both overstated by $1.652 billion (2016 – $1.443 billion). There is no effect on the Consolidated Statement of Operations.

Qualified Opinion

In my opinion, except for the effects of the matters described in the Basis for Qualified Opinion paragraphs, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Province of Ontario as at March 31, 2017, and the consolidated results of its operations, change in its net debt, change in its accumulated deficit and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Other Matters

Use of Rate-regulated Accounting May Cause a Material Misstatement on the Consolidated Financial Statements of the Province of Ontario

I draw attention to Note 16c to these consolidated financial statements, which describes the Independent Electricity System Operator's retroactive adoption of rate-regulated accounting during the year. The recognition of rate regulated assets on the consolidated financial statements of the Province of Ontario is not permitted when applying Canadian public sector accounting standards. This departure does not have a material impact on the Province of Ontario's consolidated financial statements for the year ended March 31, 2017 and my opinion is not modified in respect of this matter. However, the consolidated financial statements may become materially misstated in future periods, as a result of the legislated accounting prescribed under the *Ontario Fair Hydro Plan Act, 2017* (Fair Hydro Plan) and its related regulations as it is not in accordance with Canadian public sector accounting standards.

Financial Statement Discussion and Analysis

I draw attention to the Province of Ontario's Financial Statement Discussion and Analysis that discusses the Province of Ontario's financial results without properly reflecting the valuation allowance required in respect of the net pension asset and the recognition of market accounts, as discussed in the Basis for Qualified Opinion paragraphs above.

Hi George and Kevin

As you may be aware consolidation on a true line by line is a distinct possibility and if so the IOD will increase by over $300M per annum. Plus it also puts in the position of having to explain variances where we have little or no knowledge of the underlying debt.

My suggestion is that we persuade ministries to impose a requirement of Hospitals, School Boards and colleges that they only borrow from the Province. Whether the loan is made by IO or the OFA can be determined later. In terms of building case for this fairly significant shift we need to provide evidence of savings, which will primarily be the difference in the interest rate on these loans if they had been issued by the Province.

We can wait until John returns to start this project at which point we can all meet and have brainstorming session. I am only sending this now otherwise, as usual I will forget.

Thanks

Ken k

Hi Ken,

As per your request, please find attached the debt information by BPS entity. Since we collect debt continuity in our system, so we can directly retrieve the opening balance information. Therefore, the information provided in the attached is essentially the ending balance of fiscal 2014-15. If you need ending balance of 2015-16 for your purpose, please let me know and we can create a special report based on trial balance.

If you have any further questions, please let me know.

Thanks,
Alicia

Subject: BPS Debt

Hi Cindy

As discussed it would be useful to obtain more detailed information on the BPS debt.

The majority of the School Board debt is with the OFA but I understand they do have short term loans with their friendly neighbourhood FI's to fund construction. In the past, as I understand it these short term loans were paid off upon receipt of the loan from the OFA. From 2017-18 the OFA loan program to school boards will be discontinued and replaced with capital grants from the Ministry.

With regard to hospitals and colleges, the Province has not issued any loans to the former, so all debt is either directly sourced from the capital markets (large Toronto hospitals) or from financial institutions. The college debt is pretty minimal so we can ignore same for now.

Once we have these details it may be useful to alert the respective ministries so that these BPS entities can source their future borrowings from the Province. That should yield interest savings on a consolidated basis.

Thanks

The Federal and Ontario AGs spoke at a CD Howe lunch yesterday – attached are notes taken from that event.

Cindy

Notes from Presentation at CD Howe (April 25, 2017)
Topic: Release of CD Howe Research Report: *Numbers You Can Trust, the Fiscal Accountability of Canada's Senior Governments, 2017*

Moderator's note: Session 12:30 – 1:30 is 'off the record'.
Introductory Remarks by Bill Robson – nothing significant to note
Remarks by Mike Ferguson (Federal Auditor General)

- Suggested that qualified audit opinions should result in much lower marks (specific references made to BC which received an A rating, and ON which received a B+)
- Said that anyone not receiving an A or A+ is 'not trying'
- Suggested that CD Howe Institute has to be harder hitting on its ratings system and not just hold the governments to a low 'elementary school' ranking system, but to graduate to a high school rating system
- Said that Federal gov't got an A despite the fact that they still don't align their estimates with the Budget and that the reason given for not adopting is that an aligned (accrual based) Estimates process wouldn't be understood. Mike commented that in NB they were able to implement it fine, and that the Feds should have done it by now.

Remarks by Ontario's AG:

- Reminded that the session was 'off the record'
- Devoted most of her time (majority of the Panel's time) discussing the qualified audit opinion in Ontario and presenting only 'her version of the facts'
- Said that the independence of her staff had been challenged (didn't say by who)
- Said that if a private sector firm had been subject to what they had, it would have likely resigned, but that she can't (made reference to the release of the unaudited f/s and all of the hard work that her team had been subject to).
- Said that only when the unaudited f/s were released did she finally known what the government's position was and so was able to finalize her opinion.
- Noted that on the morning of the release she had met with the Ministers, Chiefs of Staff and both DMs and that they hadn't disclosed their plans to release the unaudited f/s. She was very surprised and taken aback.
- Made reference to the 'experts' that she uses, including National firm partners, and Canadian Standard Setters. She 'knows that she is right' and her accounting treatment is supported by the same accounting by BC and NB, as well as the TTC.
- Said that the assets reported by the Province do not meet the definition of an asset, and that the Panel's reference to IFRS was inappropriate and not relevant.
- Said that an accounting firm was not able to support the pension asset valuation
- Said that ON finally reached the proper accounting treatment but by legislation, and that she qualified on the basis that the historical f/s not being restated.
- She challenged the 'independence' of the panel, observing that her own experts <u>are</u> independent.
- Commented on the province's lack of a debt retirement plan and referenced the important Debt/GDP indicator.

- Slides included a specific reference to the Fair Hydro Plan as well – with reference to the Debt/GDP ratio, said that some are finding ways under existing accounting standards to offset debt with assets to manage the Debt/GDP ratio, and that they are committing future governments (by including poison pills).
- Suggested that accounting standards will eventually 'catch up' to ensure fair reporting.
- Directed a question towards CPA Canada staff, asking them to contemplate how the standard setting process is impacted by government decision making processes and influence. Observed that PSAB has 'vested stakeholders at the table with PSAB and that their presence and influence reduces the Board's impartiality'. Said that in ON in particular has a strong stakeholder influence on the standard setters.
- Further comments on the pension issue included reference to teachers who receive statements from the OTPP that do not reflect a surplus, but rather a deficit. Said that the OTPP uses a rate of 3.5% under IFRS, but that under PSAB the government is able to and has chosen to use a rate of 6.5% which creates a surplus. Said that the government's portion of the surplus is only ½ of $11B.
- Referenced accounting by NB which doesn't record the asset but just note discloses it.
- Recapped annual impacts over a 5 year period ($1.5, $2.2,etc.), commenting that that the government will have to try to find $11B over next 5 years to make up for the shortfall caused by pension accounting in order to achieve balanced budget.
- In response to a question by Ian MacDonald (former DM of Finance for ON) as to what has changed in the relationship between the government and the AG, she said that likely motivation for the behavior is to try to achieve a balanced budget.

DBRS Comments on New Brunswick's 2015-16 Results and Impact of Accounting Changes on Debt

DBRS Limited (DBRS) has today commented on the Province of New Brunswick's (the Province or New Brunswick) recently released 2015-16 Public Accounts, which show a modest improvement in fiscal performance; however, accounting changes related to the recognition of pension plan obligations and the consolidation of not-for-profit nursing homes have led to a higher debt burden. DBRS currently rates the Province at A (high) and R-1 (middle) with Stable trends and notes that these accounting changes do not alter the medium-term outlook for New Brunswick's credit profile.

For the year ended March 31, 2016, final results, including accounting changes noted below, point to a DBRS-adjusted debt burden of 43.9% of gross domestic product (GDP) compared with 41.8% of GDP anticipated at the time of the last review. Despite the step-up in debt, DBRS's medium-term expectations have not changed. DBRS continues to expect a gradual improvement in fiscal results and a stabilization of the debt-to-GDP ratio just above 44% in 2017-18; however, should the economy underperform expectations or fiscal targets prove challenging to achieve, this would present downside risks to the ratings.

The 2015-16 Public Accounts, released on September 30, 2016, show that fiscal performance exceeded expectations. For the year ended March 31, 2016, the Province reported a deficit of $260.5 million compared with an estimated shortfall of $466.4 million at the time of DBRS's last review in April 2016. The bulk of this improvement is the result of a $100 million contingency reserve that was not required. In addition, after accounting for the impact of consolidation changes, revenues were largely on track with plan while spending was lower. After making adjustments to recognize capital spending as incurred rather than as amortized, this equates to a DBRS-adjusted shortfall of approximately $405 million, or 1.2% of GDP.

In recent years, the Province has made substantive changes to its primary public-sector pension plans to address concerns around longer-term sustainability. Most significantly, the Province

converted them to a shared-risk, or target-benefit, model from the traditional defined-benefit model. The effect of these changes has been to provide greater certainty and predictability to annual pension expenses and to reduce the pension-related risks borne by taxpayers. Notwithstanding that the plan structures did not change in 2015-16, the Province has revised its accounting treatment for the plans after receiving a qualified audit opinion in 2014-15. New Brunswick is now using defined-benefit accounting instead of defined-contribution accounting as used in the previous year, resulting in a $220 million increase in pension liabilities and a corresponding increase in DBRS-adjusted debt. As noted in DBRS's April 11, 2016, rating report on the Province, the Public Sector Accounting Board is undertaking a review of pension accounting standards with an emphasis on seeking agreement about how to account for hybrid pension plans. A resolution is not expected for several years.

In addition to the pension plan accouning change, the Province now includes not-for-profit nursing homes in the government reporting entity. The effect of this change has been an increase to both revenues and expenditures as well as the recognition of $448 million in third-party mortgages, which has resulted in a corresponding increase in the DBRS-adjusted debt burden. In practice, third-party nursing home debt was already being serviced through the Province's nursing home funding model. To DBRS's knowledge, other provinces do not consolidate not-for-profit nursing homes, although it does appear that the Province exercises somewhat greater control over this sector relative to peers.

Hello Everyone,

The briefing notes and Q&A's for the budget have been posted, please start reviewing and updating:

Borrowing & Debt and Credit Rating Briefing Note:
http://portal.ofina.on.ca/sites/cmd/ir/Document%202017/OFA%20DOC2017%20BN.docx

Q&A: (Currently using 2016 Budget Q&A as template, but I have also attached the FES 2016 Q&A's for reference)
http://portal.ofina.on.ca/sites/cmd/ir/Document%202017/Q%20and%20As%20DOC2017.docx

Thank you!
Serena

ONTARIO FINANCING AUTHORITY

Chapter 3C - Borrowing and Debt Management

General

Q: Why was total long-term public borrowing $23.8 billion in 2016–17 when the deficit is projected to be $4.3 billion?

A: In addition to financing the deficit, long-term public borrowing refinances debt maturities and debt redemptions, funds the Province's investments in capital assets, and loans to agencies. Total borrowing for 2016-17 is now forecast to be $3.6 billion less than the forecast in the 2016 Budget as a result of the overall changes in non-cash adjustments and the pre-borrowing in 2015-16.

Q: Why does the Net Debt-to-GDP ratio increase to 40.3 per cent at the end of fiscal 2016–17, compared to the 39.6 per cent forecast in the 2016 Budget?

A: The increase in the Net Debt-to-GDP ratio to 40.3% is mainly as a result of the change in accounting treatment for pension assets of jointly sponsored pension plans in 2015-16 which increased the accumulated deficit by $10.7 billion.

Q. The 2016 Budget forecast that the net debt to GDP ratio will decline from 2016-17 onwards, if so why does the ratio increase to 40.3 in 2016-17 from 40.0 percent in 2015-16

A. The slight increase in 2016-17 is primarily due to the forecast GDP rate of growth being less than what was forecast in the 2016 Budget. Over the two out years however, the net debt to GDP ratio is forecast to decline.

Q: The Province is projected to borrow $23.8 billion in 2016-17. That's approximately $1,703 for every person in Ontario. When will the Province eventually run into a debt wall like Greece, Portugal and Ireland and be forced to raise taxes and cut services?

A: There is strong demand for Ontario bonds in both the domestic and international markets. Last fiscal year Ontario was able to borrow $32.1 billion in long-term debt while our spread, or the margin that we have to pay over the equivalent Government of Canada bond, tightened, indicating ongoing strong demand for Ontario bonds. We expect that the liquidity of Ontario benchmark bonds and continuing confidence in the value of Ontario debt will allow us to cost-effectively complete the 2016-17

borrowing program. As at November 4th, 2016, the Province has completed $16.1 billion of its $23.8 billion borrowing requirement for 2016-17.

Q: Has it been difficult to complete the Province's borrowing program?

A: The Province continues to have steady access to both domestic and international bond markets. As at November 4th, 2016, the Province has completed $16.1 billion of its $23.8 billion borrowing requirement for 2016-17.

Q: The Government has adopted the accounting treatment recommended by the Auditor General resulting in a pension adjustment expense over the medium term outlook. How has this impacted borrowing?

A: The pension adjustment is a non-cash amount, as such both borrowings and total debt remain unchanged. There is also no impact on net debt over the medium term outlook given that the forecast defcits over the period remain unchanged from the 2016 Budget. .

Q: What does non-cash adjustments of $7.4 billion in 2016–17 represent?

A: Non-cash adjustments convert accounting accruals into cash requirements. Cash and accruals differ primarily because of $2.6 billion in Alternative Financing Procurements (AFPs) funded by third parties plus the reserve of $0.4 billion, partly offset by payments to be made in 2016–17 upon substantial completion of prior AFP projects. The total non-cash adjustment also reflects the impact of the pension adjustment. . Another significant adjustment is amortization that is currently over $5 billion but is, partly offset by general timing adjustments that always arise between the Province's inflows and outflows on a cash versus accrual basis. A notable example of the latter is the variance between the net incomes of the Government Business Enterprises and the dividends they pay to the Province.

Q: Is the Province planning to issue any more Green Bonds in the future?

A: The Green Bond program is an ongoing program of the Province of Ontario. To date, Ontario has issued two Canadian dollar Green Bonds. The Province plans to issue its third Green Bond before the end of fiscal 2016-17.

On October 2, 2014, Ontario successfully launched a Green Bond program, with an inaugural global Canadian dollar bond of $500 million. On January 22, 2016, Ontario launched a second global Canadian dollar bond of $750 million.

Interest on Debt (IOD)

Q: What is the impact on IOD of a $1.0 billion change in deficit?

A: The 2016-17 impact is forecast to be approximately $24 million.

Q: What is the impact on IOD of a one percentage point change in interest rates?

A: The 2016-17 impact is forecast to be approximately $350 million over a full year.

Q: What are your assumed interest rates in the IOD forecast for the FES in comparison to the forecast in the 2016 Budget?

A: The assumed ten-year interest rates are 2.4 per cent for 2016-17 and 2.9 per cent for 2017-18, which is 60 and 91 bps lower, respectively, than the forecast in the 2016 Budget. For 2018-19, the interest rate forecast is 3.6 per cent which is 106 bps lower than the forecast in the 2016 Budget, which was based on the average Ontario interest rates over the past 15 years.

Q: Will IOD costs crowd out other expenditures as interest rates rise and debt continues to climb? How can you address this problem?

A: Ontario has a realistic plan to balance its budget while investments are made in the priorities of Ontario families – health care, education, the environment and infrastructure.

After eliminating the deficit by 2017–18, overall spending increases will be restricted to one per cent below GDP growth until the Province's net debt-to-GDP ratio returns to the pre-recession level of 27 per cent.

Investor demand has allowed the Province to extend the term of its debt in recent years and lock in historically low interest rates for a longer period. This term extension reduces the Province's refinancing risks and helps offset the impact of expected higher interest rates on its IOD costs. The 2010 Budget forecasted that, by 2016-17, the Province would have to spend 11.7 cents of every revenue dollar received on interest. The current forecast is 27 per cent lower, at 8.6 cents of interest costs for every dollar of revenue. This ratio is lower than it was in the 14 fiscal years from 1992–93 to 2005–06, and is forecast to remain lower through the period to balance in 2017–18.

Credit Ratings

Q: What are the Province's current credit ratings?

The Province is rated:

	Long-Term	Short-Term
Moody's Investors Service:	Aa2	P-1
Standard & Poor's:	A+	A-1+
DBRS:	AA (low)	R-1 (mid)
Fitch	AA-	F1+

Q: How will the credit rating agencies respond to the 2016 Fall Statement?

A: Ontario currently maintains a double-A rating with three of its four credit rating agencies. Ontario is on track to a balanced budget by 2017–18.

We continue to update the rating agencies on a regular basis on economic and fiscal developments.

Q: What impact did Moody's upgrade have on your borrowing costs?

A: Credit ratings are one of a number of factors that contribute to borrowing costs.

Since the 2016 Ontario Budget was released, Ontario's credit spreads have narrowed modestly. This in part reflects the fact that all four credit rating agencies have affirmed Ontario's ratings reflecting their confidence in our plan to eliminate the deficit, with Moody's improving their outlook for Ontario's credit rating.

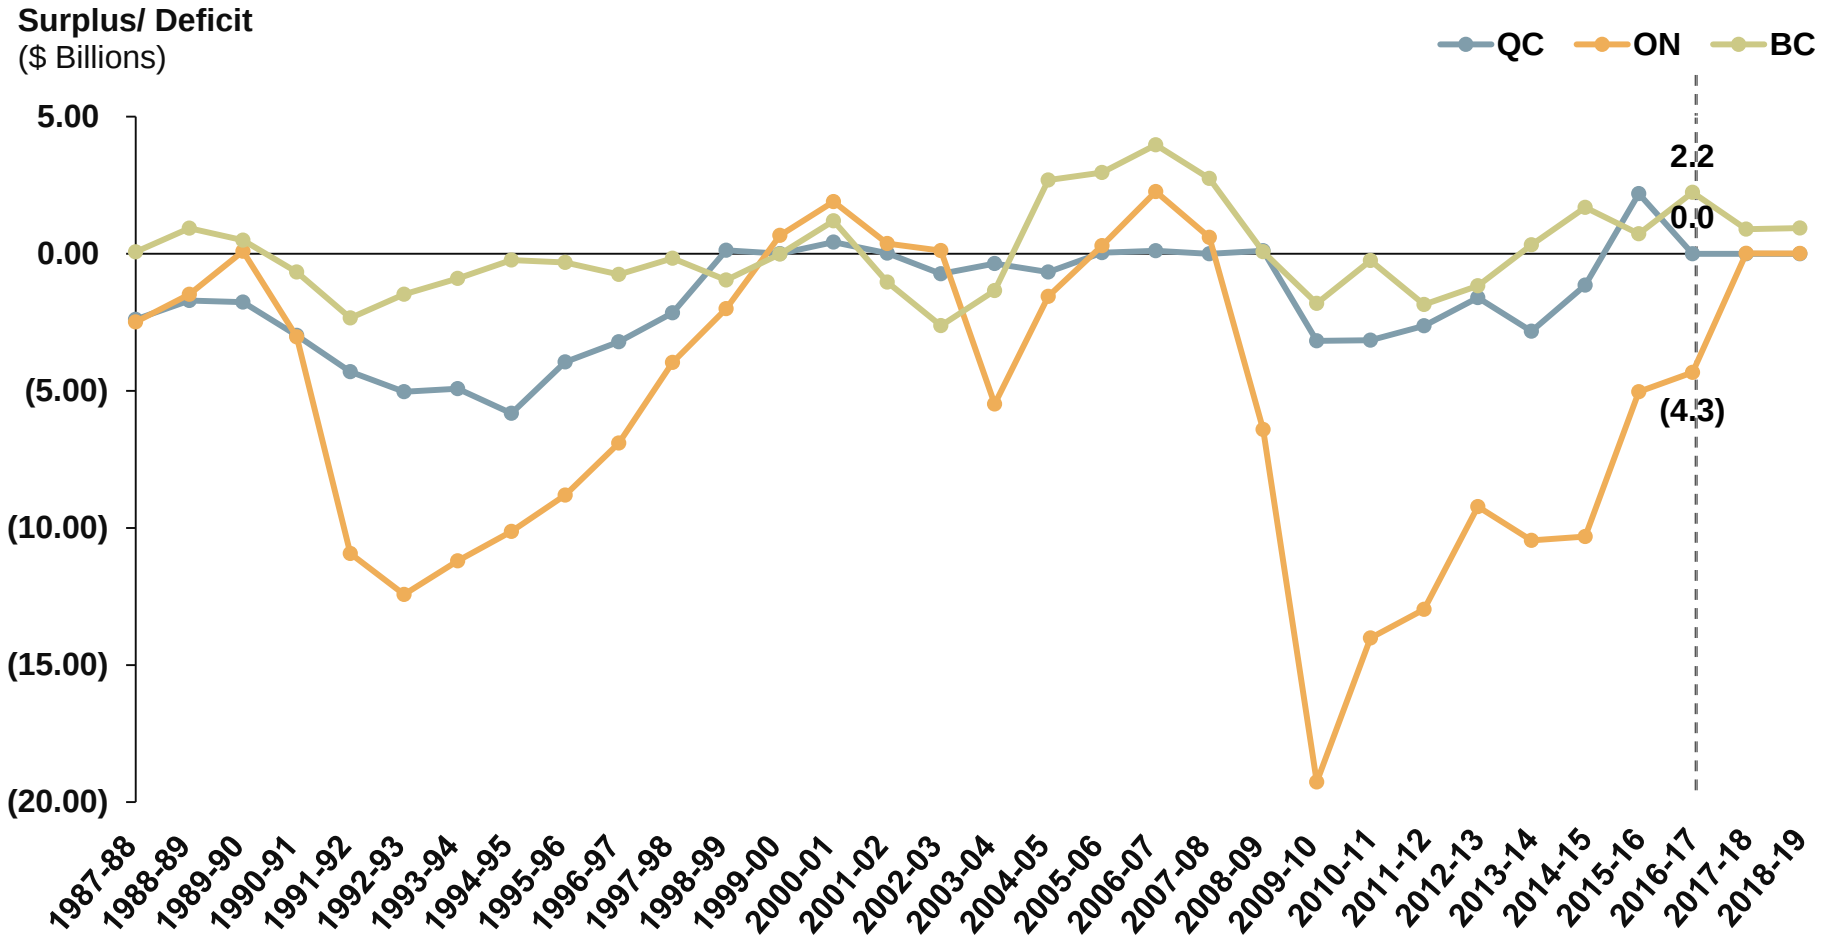
Comparison of Ontario, Quebec and British Columbia

January 2017

Overview

Comparison of Ontario, Quebec and British Columbia in:

- Budgetary Balance
- Net Debt and Net Debt-to-GDP
- Net Debt-to-Revenue



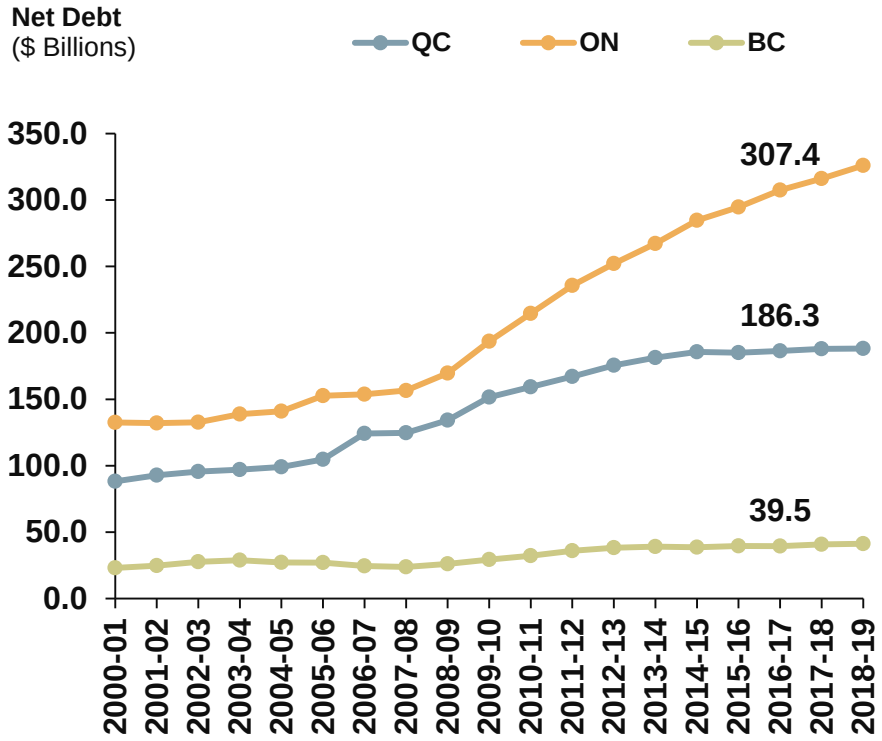
Quebec: Keys to Success

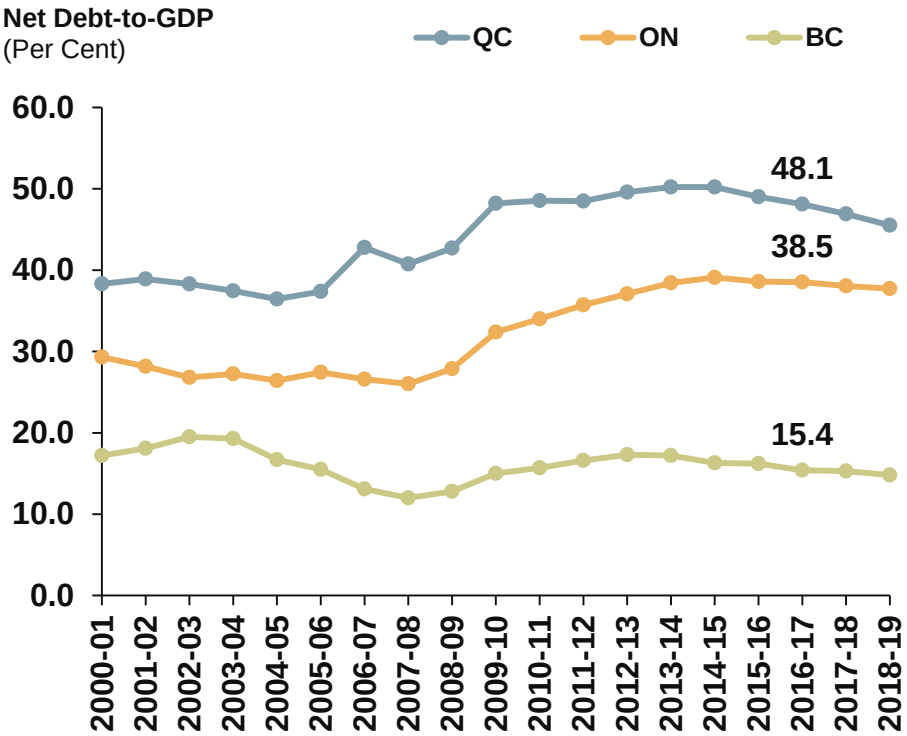
British Columbia: Keys to Success

Credit Rating Agencies

Budgetary Balance for Ontario, Quebec and British Columbia

- Quebec and BC are two of the three provinces projecting a balanced budget for fiscal 2016–17
- Ontario is projecting a deficit of $4.3 billion in 2016–17 and a return to balance in 2017–18



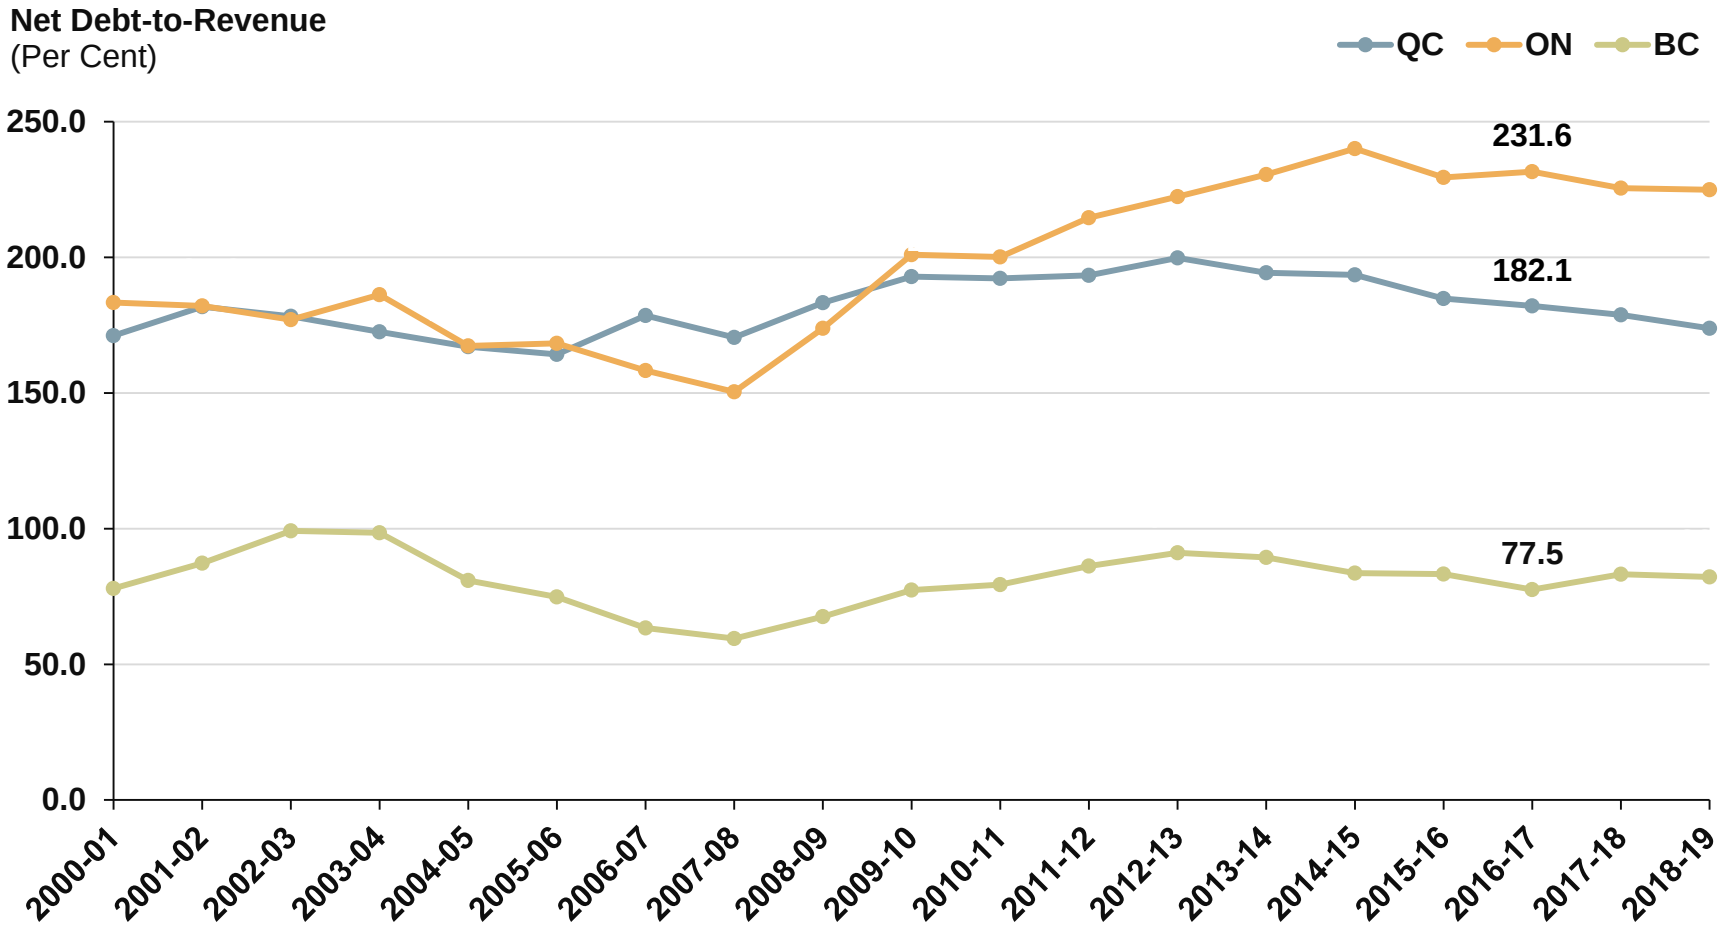


Source: RBC Economics (December 2016), Provincial Budgets, Budget updates.

Ontario

Net Debt and Net Debt-to-GDP for Ontario, Quebec and British Columbia

- Excluding the pension adjustment, Ontario's net debt would be $294.6 billion as of March 31, 2016 and is projected to be $307.4 billion in 2016–17, the highest out of all the provinces in Canada
- Excluding the pension adjustment, Ontario has the fourth highest net-debt-to-GDP ratio out of all the provinces, after New Brunswick, Newfoundland and Quebec. Ontario's net debt–to–GDP ratio would be 38.6% in 2015–16 and 38.5% in 2016–17



Source: RBC Economics (December 2016), Provincial Budgets, Budget updates.
Note: The Pension Adjustments incorporated in the Ontario 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Net Debt-to-Revenue for Ontario, Quebec and British Columbia

- Ontario has the highest net debt-to-revenue ratio out of all the provinces in Canada at approximately 232% for fiscal 2016–17, compared to Quebec's 182% and BC's 78%

Source: RBC Economics (December 2016), Provincial Budgets, Budget updates.
Note: The Pension Adjustments incorporated in the Ontario 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Quebec Overview

- Before deposits into a debt retirement fund, Quebec is forecasting a surplus of $2.0 billion in 2016–17, growing to a surplus of $2.8 billion by 2018–19
  - This would be the second year in a row that Quebec would be achieving a balanced budget
- As of March 31, 2016, Quebec's gross debt stands at $203.3 billion compared to Ontario's forecast of $327.4 billion

Sources: The Quebec Economic Plan, October 2016.

Quebec Debt

Quebec uses the following as its main debt indicators:

Gross Debt represents the amount of debt issued on financial markets and the net liabilities in respect of the retirement plans and future benefits of public and public sector employees, minus the balance of the Generations Fund. It does not take assets into account.

Net Debt is equal to the government's liabilities less its financial assets. It represents the debt that has funded capital investments and current expenditures.

Debt Representing Accumulated Deficits corresponds to the difference between the government's liabilities and its financial and non-financial assets as a whole.

As of March 31, 2016	($ billion)	% of GDP
Gross Debt	**203.3**	**53.8**
Less: Financial, assets, net of other liabilities	(18.3)	
Net Debt	**185.0**	**49.0**
Less: Non-financial assets	(67.1)	
Debt Representing Accumulated Deficits	**120.1**	**31.8**

Sources: The Quebec Economic Plan, October 2016.

Quebec: Keys to Success

- In 2006, the Quebec government established an *Act to reduce the debt and establish the Generations Fund.* The Generations Fund is a debt retirement fund that would solely be used to repay debt

- The Province had also set debt reduction objectives that were included in the Act. For fiscal 2025–2026:

  - Gross debt cannot exceed 45% of GDP

  - Debt representing accumulated deficits cannot exceed 17% GDP

- Quebec commenced a bulk of their infrastructure investments prior to 2009, allowing them to avoid major adjustments to the budgetary plan as well as large debt accumulation

- To help achieve a balanced budget, Quebec relied on tight spending controls and limited their consolidated expenditure growth in the past two years between 1.4% to 2.5%

- In 2016–17, Quebec will receive $10.0 billion in Equalization payments from the federal government, compared to Ontario's $2.3 billion. Quebec's net contribution to the Equalization program is the lowest out of all the provinces at -$6.5 billion, while Ontario's is the highest at $4.6 billion.

Sources: The Quebec Economic Plan, October 2016; S&P 2016.

Flexibility Arising from Balanced Budgets

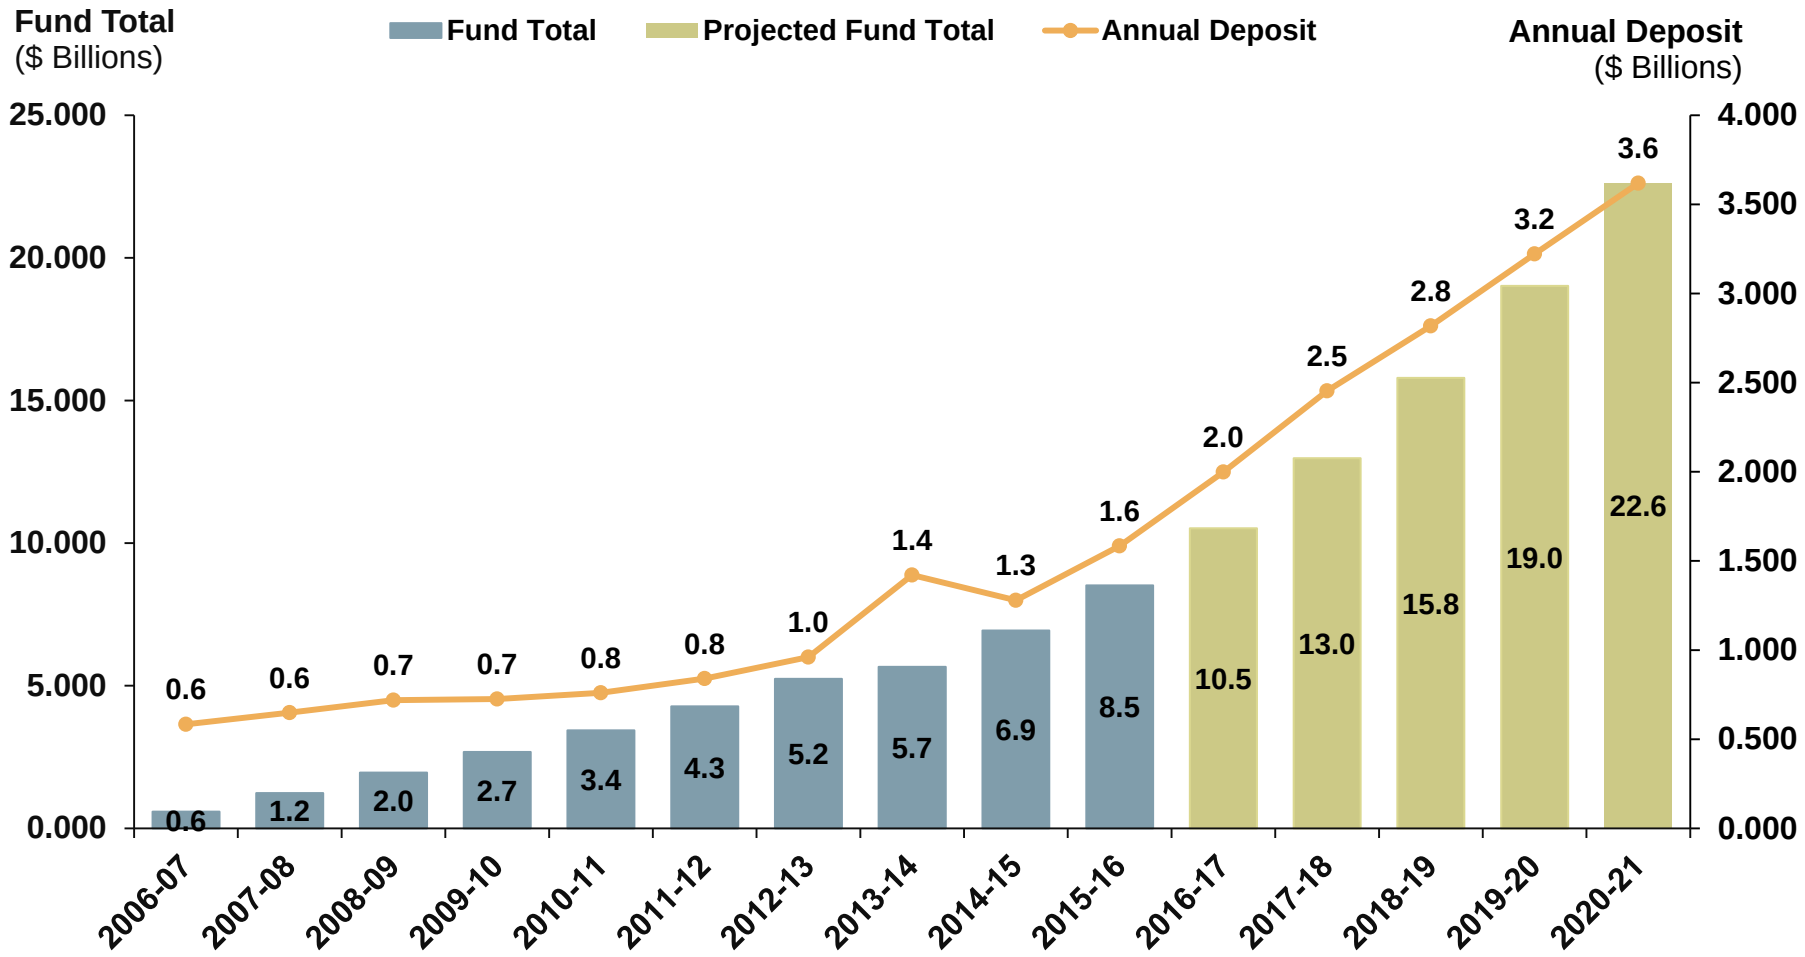
- In October 2016, Quebec tabled it's 2015–16 Public Accounts posting a $2.2 billion surplus. The last time Quebec had a balanced budget was before the crisis in 2007–08.
- The $2.2 billion surplus allowed the Quebec government to make the following announcements:
  - $300 million more per year for health
  - $110 million more per year for education and higher education
  - $100 million more per year to support regional economic development
  - Additional investments of $400 million in public infrastructure
  - The complete elimination of the health contribution as of January 1, 2017—two years ahead of schedule, benefiting 4.5 million taxpayers, and representing an annual reduction of the tax burden of almost $760 million.

Additional investments
(millions of dollars)

	2016-2017	2017-2018	Cumulative [1]
Strengthening the funding of public services			
– Health and social services	100	300	1 000
– Education and higher education	35	110	365
– Regional economic development	100	100	400
Increase in the Québec Infrastructure Plan	-	400	400
Subtotal: new services	***235***	***910***	***2 165***
Complete elimination of the health contribution as of January 1, 2017	53	179	253
TOTAL	**288**	**1 089**	**2 418**

(1) From 2016-2017 to 2019-2020.

- Additionally, Quebec's debt decreased by $610 million due to the return to balance and deposits made into the Generations Fund.



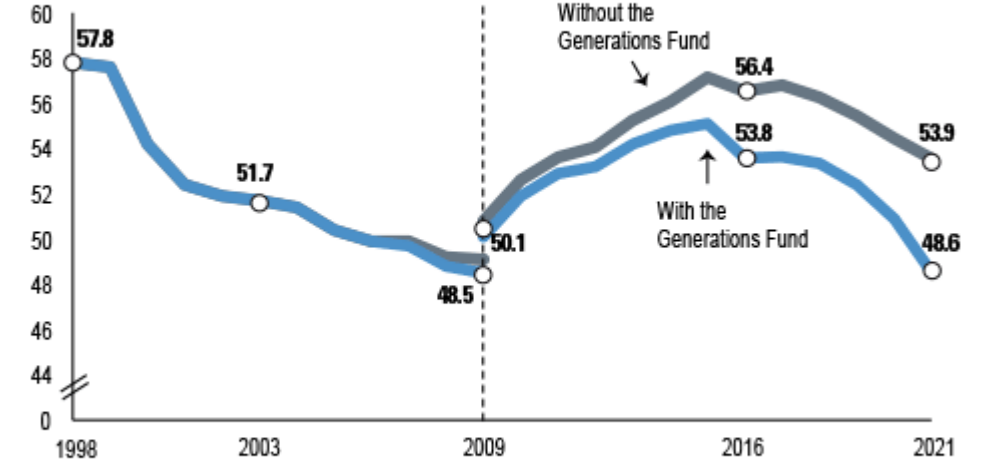
Quebec: Generations Fund

- Quebec implemented the Generations Fund in 2006 and makes annual deposits into the fund to reduce gross debt
- The fund is managed by Caisse de depot et placement du Quebec and achieved a return of 8.13 per cent in 2015
- Sources of funding include dedicated revenues from water-power royalties obtained from Hydro-Quebec and other private hydro-electricity producers, revenue generated by the indexation of the price of heritage electricity, specific taxes on alcoholic beverages, all mining revenues, and investment income
- As of March 31, 2016, the projected fund total is approximately $8.5 billion

Sources: The Quebec Economic Plan, October 2016.

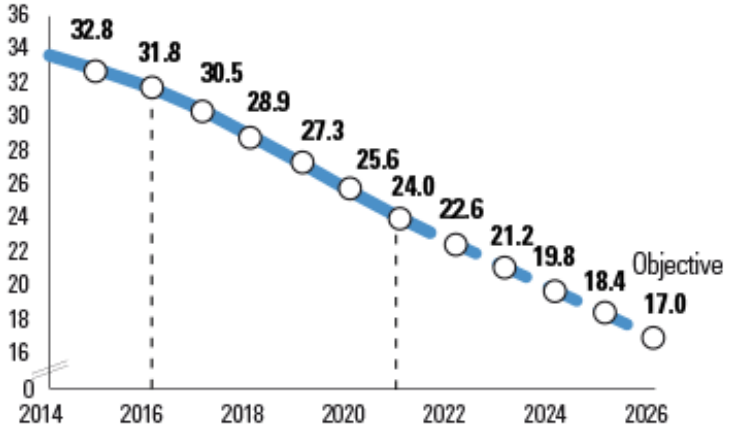
Quebec: Generations Fund

- The fund is estimated to save Quebec approximately $23.6 billion in gross debt from 2006 to 2021



Sources: The Quebec Economic Plan, October 2016.

Quebec: Impact of Generations Fund



- As at March 31, 2021, the gross debt burden should stand at 48.6%. Without deposits made in the Generations Fund, the gross-debt-to-GDP forecast would be 5.3% higher, at 53.9% of GDP
- As a proportion of GDP, the debt representing accumulated deficits began to decrease in 2013–2014 and is projected to continue falling over the coming years to reach its long term debt objective of 17% by 2025–26

Gross debt as at March 31(1)
(as a percentage of GDP)

(1) The gross debt takes into account the debt that the health and social services and education networks have issued in their own name. The data as of 2009 are not comparable with those for prior years, which do not include this debt.

Debt representing accumulated deficits
(as at March 31, as a percentage of GDP)

Source: The Quebec Economic Plan, October 2016

British Columbia Overview

- British Columbia is forecasting a balanced budget for fiscal 2016–17 with a projected surplus of $2.2 billion
  - This would be the fourth year in a row that the province would be operating on a surplus
- Since B.C. has started balancing the budget, they have reduced their direct operating debt (money borrowed in the past to fund programs and services) by over $2.2 billion
  - B.C. expects to eliminate direct operating debt by 2020
  - The province now borrows only to build capital projects
- As of March 31, 2016, British Columbia's total debt was $65.7 billion versus Ontario's $327.4 billion

Sources: Province of British Columbia, Budget Plan 2016; Budget Speech 2016.

British Columbia Debt

For debt management purposes, B.C. classifies its debt into two main categories:

Taxpayer-supported debt is debt owed by or borrowed on behalf of core government and its organizations, such as school districts and health authorities, which are dependent on government funding for some or all of their revenues.

- **Direct Operating Debt** is a portion of taxpayer-supported debt, borrowed to finance the past day to day operations of core government. Direct operating debt in any year is mainly equivalent to the accumulated past operating results of core government.

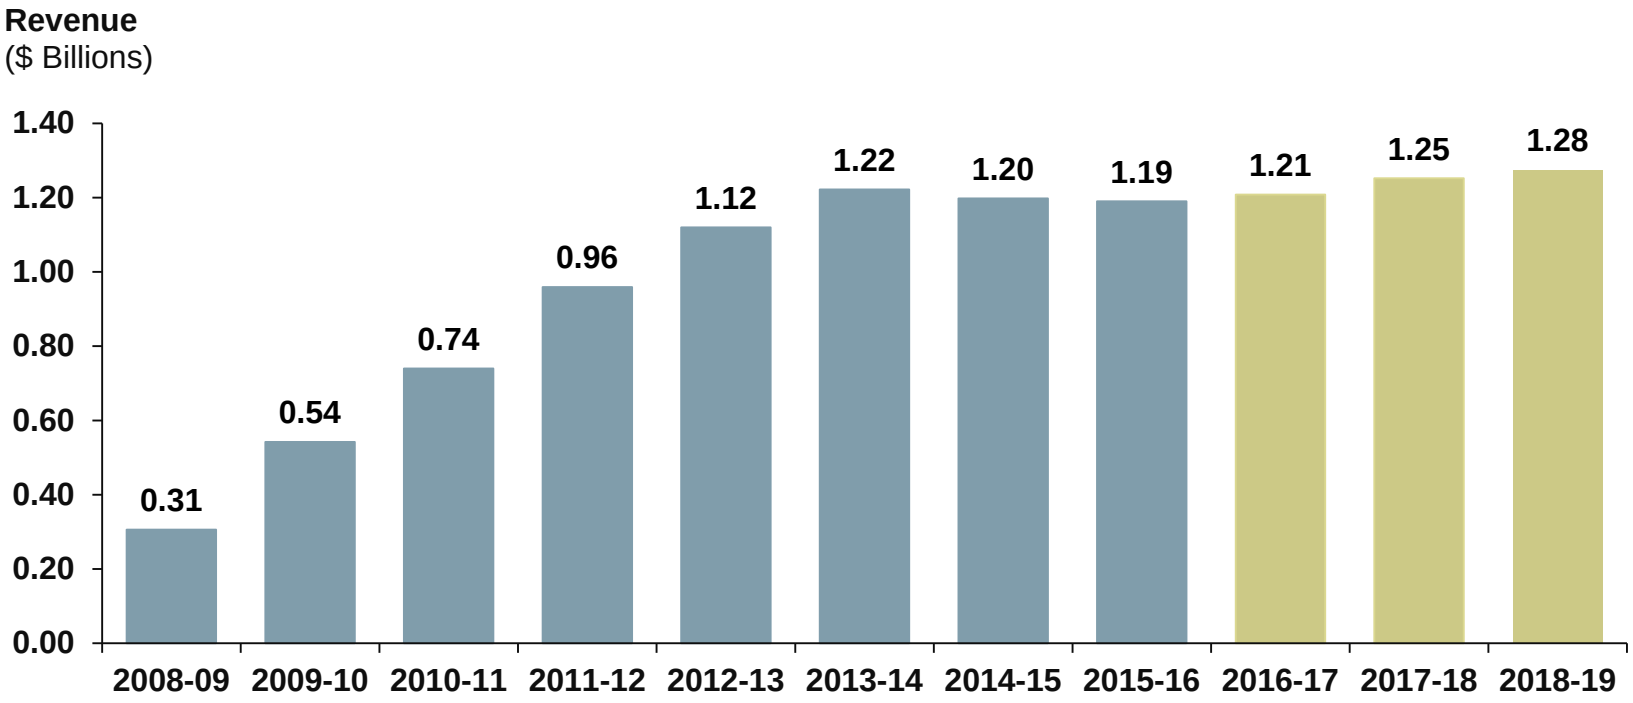
Self-supported debt is debt owed by or borrowed on behalf of government enterprises, such as B.C. Hydro, whose revenues come from their commercial operations.

As of March 31, 2016	($ billion)	% of GDP
Direct Operating debt	8.0	3.3
Total Taxpayer-supported debt	**42.7**	**17.4**
Self-supported debt	**22.6**	**9.2**
Total Debt	**65.3**	**26.7**

Sources: Province of British Columbia, Public Accounts 2015–2016.

British Columbia: Keys to Success

- In the 2016 Budget, British Columbia proposed to establish the *BC Prosperity Fund* to help eliminate the Province's debt over time and make investments in government priorities
  - British Columbia will be allocating $400 million to the fund in 2016–17
  - A minimum of 50% of each year's allocation to the fund will be dedicated to debt retirement
- The province increased its own-source revenues through taxes and fee increases by:
  - Implementing a carbon tax in 2008
  - Introducing a 15% property transfer tax on foreign real estate buyers



Sources: Province of British Columbia, Quarterly Reports 2016.

Flexibility Arising from Balanced Budgets

- British Columbia started posting surpluses in 2013–14
- When the province tabled its 2016 Budget it called for a surplus of $264 million in 2016–17, however, stronger than expected revenues has pushed that number to $2.24 billion
- Previously, British Columbia had posted surpluses of :
  - $327 million in 2013–14
  - $1.7 billion in 2014–15
  - $730 million in 2015–16
- In the Fall of 2016, the government announced that they were cancelling the 4% increase to Medical Service Plan (MSP) premiums as previously announced.
- Also, the government announced that those that are eligible for Regular Premium Assistance would see a 4% reduction of their premium, beyond what was originally announced in Budget 2016.
- Finance Minister Micheal De Jong said that these changes could be made because the government is in a better fiscal situation than what was said in Budget 2016.
- The 2016 Budget had announced investments of $1.6 billion in new and increased spending over three years on core services in addition to annual 3% increases in the health ministry budget, almost $500 million of which was funded by lower interest costs due to the retirement of operating debt.

British Columbia: Carbon Tax

- British Columbia enacted a revenue-neutral carbon tax in 2008 on the purchase or use of fuels, revenue obtained from the tax is returned to British Columbians through reductions in other taxes
- Tax rates commenced at $10 per tonne of CO2 emissions in 2008, increasing by $5 per tonne annually until 2012 at $30 per tonne

Sources: Province of British Columbia, Second Quarterly Report, November 2016.

Ontario: Rating Agency Update

Confirmed Ontario's A+ rating and maintained its Stable Outlook (June 2016)

- The stable outlook reflects expectations that the province's liquidity will continue to be average in the next two years, real GDP growth will be above 2% and operating revenue growth will lead to operating surpluses beginning in fiscal 2017.
- According to S&P, the debt burden should continue to decline, reaching below 240% of projected consolidated operating revenues by fiscal 2019.

Confirmed Ontario's AA (low) rating with a Stable Outlook (May 2016)

- The trend remains Stable, supported by the Province's continued progress towards restoring fiscal balance and a large, well-diversified economy with an improving, growth outlook.

Upgraded Ontario's rating to Aa2 with a Stable Outlook (April 2016)

- The stable outlook reflects Moody's view that the province's debt burden will continue to modestly improve as the province moves towards balanced budgets and therefore reduces its annual financing requirements.

Confirmed Ontario's AA- rating with a Stable Outlook (June 2016)

- Fitch noted that the province has demonstrated the ability to exert considerable expenditure restraint while instituting revenue changes as necessary to achieve its deficit reduction objectives.
- Fitch believes the Province remains on track to achieve its target assuming continued economic growth.

Quebec: Rating Agency Update

Confirmed Quebec's A+ rating and raised Outlook from Stable to Positive (June 2016)

- Quebec's improved fiscal picture primarily stems from strong financial management.
- S&P assumes in its base case scenario that Quebec will generate operating surpluses of 6.4% of adjusted operating revenues, and modest after capital account deficits of 1.3% of total adjusted revenues, on average, from fiscal years 2015-2019. This puts Quebec ahead of its closest peer, Ontario, in terms of fiscal recovery.

Confirmed Québec's rating at A (high) and maintained its Stable Outlook (July 2016)

- All trends are Stable, supported by the continuation of sound fiscal performance, a gradually improving albeit still modest economic growth outlook, and expectations that Québec's debt burden is now on a downward trend.

Confirmed Quebec's Aa2 rating and maintained its Stable Outlook (June 2016)

- Although Québec's stock of debt has risen in recent years, the province's debt burden has remained relatively stable due to growth in the economy and in provincial revenues.
- Québec's debt burden is aided by the annual contributions to the Generations Fund.

Confirmed Quebec's rating at 'AA-'; Outlook Revised to Stable (June 2016)

- Fitch noted that a return to consistently balanced operations provides the Province with a window of opportunity to resume debt reduction.
- The Province has been very successful in recent years in curbing spending growth as part of its consolidation program.

British Columbia: Rating Agency Update

Confirmed B.C.'s AAA rating and maintained its Stable Outlook (April 2016)

- B.C's ratings reflects its outperformance in financial management, budgetary flexibility, liquidity and contingent liabilities, compared to its peers.
- S&P assumes in its base case scenario that B.C. will generate operating surpluses of less than 5% of consolidated operating revenues and average after-capital deficits to remain between 5 to 10% of total adjusted revenues from 2015–2019.
- The stable outlook reflects the expectation that B.C.'s economy will continue expanding moderately over the next two years, contributing to relatively stable budgetary performance and slowing growth in tax-supported debt.

Confirmed B.C.'s rating at AA (high) and maintained its Stable Outlook (April 2016)

- All trends are Stable, supported by the Province's track record of strong fiscal discipline, which has helped to place the debt-to-GDP ratio firmly on a downward trend.
- However, debt burden remains above pre-recession lows, which limits near-term upward pressure on ratings.

Confirmed B.C.'s Aaa rating and maintained its Stable Outlook (April 2016)

- B.C.'s rating reflects its track record in prudent fiscal planning, strong economic growth, ability to record surpluses in periods of natural resource price weakness and its flexibility in fiscal policy
- The outlook is stable reflecting the assumption of continued surpluses across the medium-term and expected slight improvement of both the debt burden and interest expense.

Confirmed B.C's rating at 'AAA' and maintained its Stable Outlook (April 2016)

- B.C.'s rating primarily reflects conservative financial management practices resulting in stable fiscal performance and a well-managed liability profile. Key rating drivers include B.C.'s growing economy, commitment to fiscal balance and manageable debt burden.
- Fitch considers British Columbia's financial planning and controls to be strong and views them as key reasons for the timely return to fiscal balance following recession-driven operating deficits.

Long-Term Borrowing Maturity Profile

- The Province has less refinancing risk and less interest rate risk than it had in 2009–10

Note: Numbers may not add due to rounding. As of January 12, 2016. Actual average term for 2016–17 is expected to be much lower, with the most recent forecast being 14.2 years.

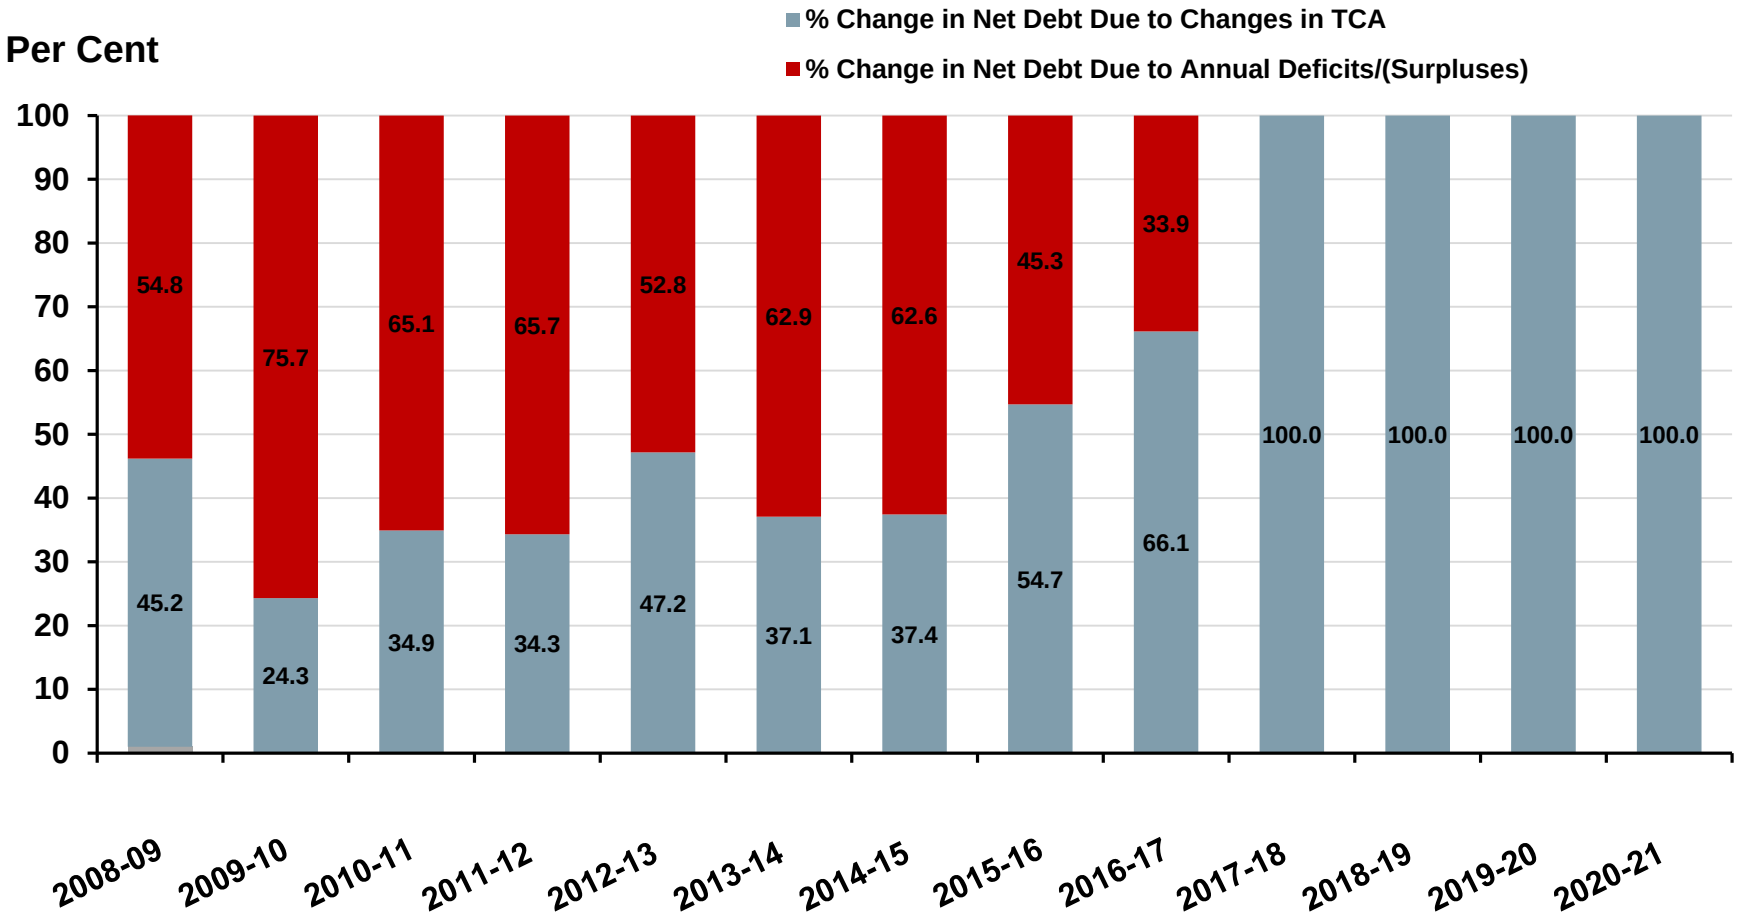
Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Net Debt-to-GDP and Accumulated Deficit-to-GDP

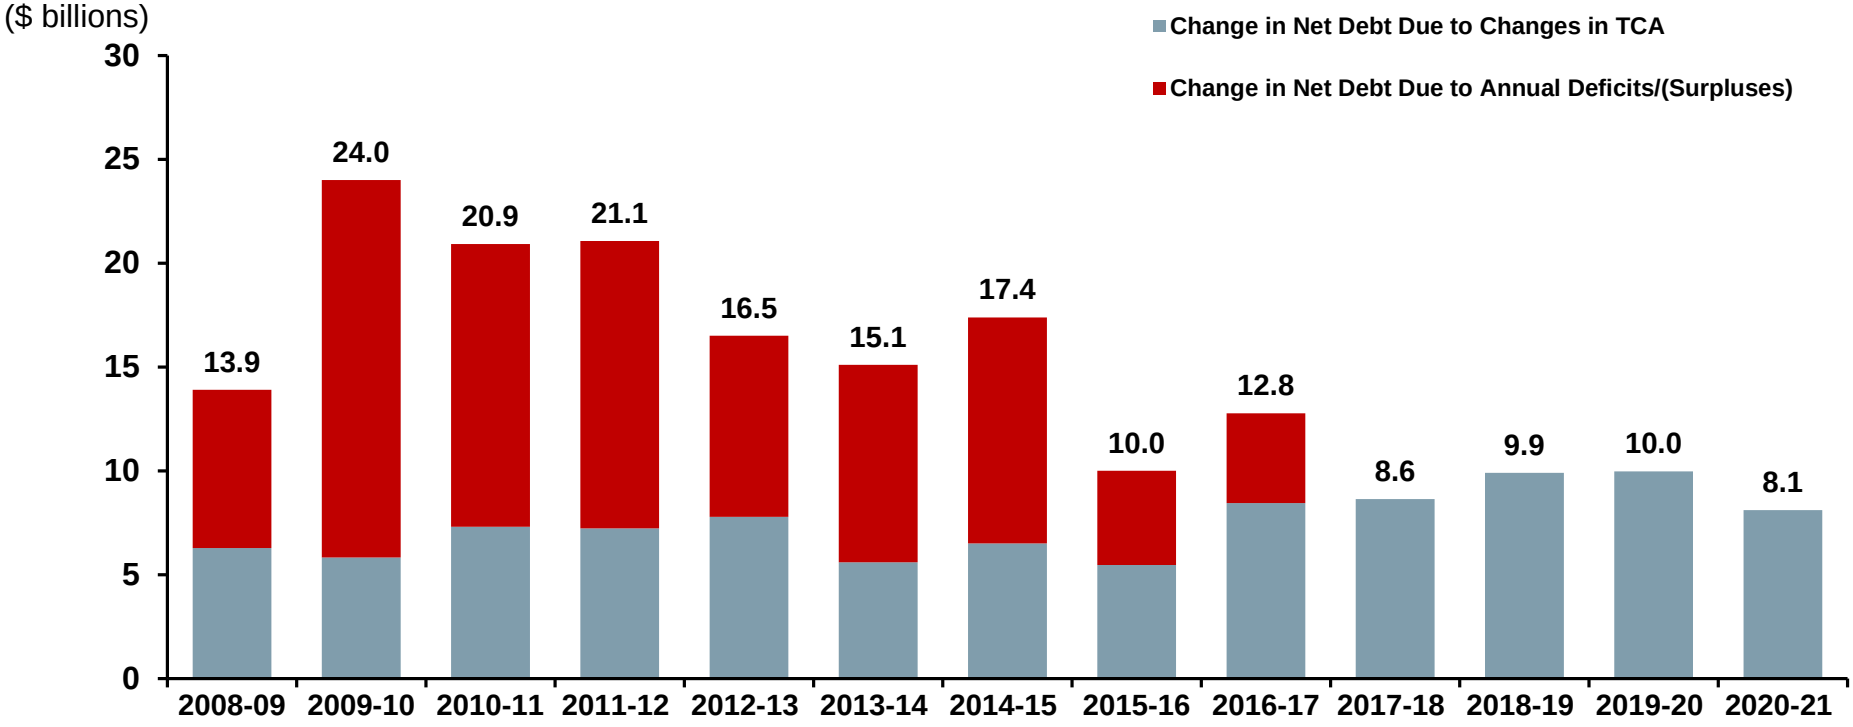


- Assuming a balanced budget from 2017–18 onwards and investments in capital as per the Province's 10 year Capital Plan, accumulated deficit-to-GDP and net debt-to-GDP would reach pre-recession levels by 2024–25 and 2028–29 respectively

Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Factors for Historical Growth in Net Debt

- Approximately 63% of the increase in net debt from 2008–09 to 2015–16 is due to the deficit, with investments in capital assets responsible for most of the balance



Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Factors for Historical Growth in Net Debt

- Approximately 63% of the increase in net debt from 2008–09 to 2015–16 is due to the deficit, with investments in capital assets responsible for most of the balance

Change in Net Debt from previous year
($ billions)

	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21
Net Debt ($ billions)	169.6	193.6	214.5	235.6	252.1	267.2	284.6	294.6	307.4	316.0	325.9	335.9	344.0
% Change due to Deficit	54.8	75.7	65.1	65.7	52.8	62.9	62.6	45.3	33.9	–	–	–	–
% Change due to TCA	45.2	24.3	34.9	34.3	47.2	37.1	37.4	54.7	66.1	100.0	100.0	100.0	100.0

Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Factors for historical % change in Net Debt-to-GDP

- Net debt-to-GDP increases when:
  - Net debt increases due to the deficit, changes to TCA, and miscellaneous factors
  - GDP decreases (a negative number in the table below illustrates an increase in GDP as it results in a decline in the net debt-to-GDP ratio)
- To illustrate the table below, between 2008–09 and 2009–10, the net debt-to-GDP ratio was 27.9% and 32.4% respectively. The 4.5 percent point increase in 2009–10 can be attributed to the deficit by 2.91%, changes in TCA by 1.03%, and a decrease in nominal GDP which has a positive effect on the ratio of 0.56%
- Once the Budget is balanced, the ratio is only affected by TCA and changes to the GDP

	2008-09	2009-10	2010-11	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19
Due to Annual Deficit	1.27%	2.91%	2.28%	2.19%	1.32%	1.40%	1.56%	0.62%	0.57%	–	–
Due to Changes in TCA	0.89%	1.03%	1.22%	1.15%	1.18%	0.82%	0.94%	0.75%	1.11%	1.08%	1.19%
Due to Decreases/ (Increases) in GDP	-0.31%	0.56%	-1.88%	-1.63%	-1.14%	-0.86%	-1.83%	-1.87%	-1.73%	-1.55%	-1.54%
Year over year % change in Net Debt-to-GDP	**1.84%**	**4.51%**	**1.62%**	**1.71%**	**1.36%**	**1.36%**	**0.67%**	**-0.50%**	**-0.06%**	**-0.47%**	**-0.35%**

Note: The Pension Adjustments incorporated in the 2015–16 Public Accounts and extended in the 2016 FES have been reversed.

Net Debt-to-GDP sensitivity analysis

- For 2016–17 the net debt-to-GDP ratio is 38.53%.
  - An increase of $769 million to net debt or a decrease of $1,990 million in nominal GDP would increase the net debt-to-GDP ratio to 38.63%.
  - A decrease of $826 million to net debt or an increase of $2,151 million in nominal GDP would decrease the net debt-to-GDP ratio to 38.43%.
- Since the 2016–17 net debt-to-GDP ratio was 38.53%, smaller changes to net debt or nominal GDP resulted in changing the net debt-to-GDP ratio to 38.63% versus the larger changes required to lower the ratio to 38.43%.

Do you have any edits. I sent Maria the article by Martin Regg Cohn on the auditor's response. I'm not sure she should mention that the AG is expected to comment.

BTW- I only received edits from you and Nadine yesterday. John and George checked the numbers.

Expert advisory panel agrees with Ontario in pension accounting issue (February 14, 2017)

Credit Implications: Potentially positive

Credit Ratings: DBRS AA(Low), Moody's Aa2, S&P A+, Fitch AA-, All outlooks stable

Yesterday, an expert accounting advisory panel engaged by the Province of Ontario to review the province's accounting practices for pension assets released its report. The report sided with the province in concluding that the province's share of the net pension assets of both the Ontario Teachers' Pension Plan (OTPP) and the Ontario Public Sector Employees' Union Pension Plan (OPSEUPP) should be recognized as an asset in Ontario's financial statements. The panel concluded that it should be reported for the following reasons:

- Recognizing the asset will provide a faithful representation of the province's financial position
- The accounting surplus in the plan has a future economic benefit
- The government controls access to that accounting surplus
- The accounting surplus exists as the result of past transactions and events
- It would be misleading not to recognize the province's share of the assets in Public Accounts.

For the full report Click Here

The implications of this conclusion is that the province will have more financial flexibility to achieve its financial targets if it chooses to return to the pension accounting treatment it had used in the past. Adopting the Auditor General's treatment has resulted in an upward adjustment to the accumulated deficit as well as higher pension expense in fiscal 2015-16 and in future years. More information about these adjustments is provided below in the "Background" section.

The Auditor General is reviewing the report and is expected to comment in the near future. For the Province of Ontario's fiscal 2015-16 results, the Auditor General issued a qualified opinion because, although the statements adopted the Auditor General's pension accounting treatment for fiscal 2015-16, it did not retroactively restate the comparative 2014-15 public accounts and, therefore, by not correcting the error in accounting treatment, it constituted a departure from Public Sector Accounting Standards (PSAS).

At the same time, the preparer of the financial statements (Treasury Board Secretariat) who felt that they were and have always been in compliance with PSAS, signed off on fiscal 2015-16 results, but only following the adoption by the Province of Ontario of the Auditor General's accounting interpretation for the treatment of net pension assets for 2015–16 through a time-limited regulatory amendment (the "Pension Adjustment").

Background

In our Ontario Talking Points (January 27, 2017) research note we provided the following background information on this issue.

Could you clarify Ontario's course of action given the Auditor General of Ontario's qualified opinion on Pension Accounting?

- Although the pension expense is a non-cash charge, it is still very important to achieving the balanced budget target in Fiscal 2017-18, since Ontario's results are reported based on accrual accounting and not cash.

- The Province has engaged an expert panel of accountants to assess the issue.
- The issue being assessed is whether the Province can record an asset for the jointly sponsored plans under the accounting standards. The Province believes that an asset should be reported.
- The panel will focus on the accounting question, but will also provide advice on how to measure an asset, assuming it concludes that it should be reported. The calculation is sensitive to management's assumptions, including the discount rate which reflects management's best estimate of long-term returns on the assets which is currently at 6.25% and consistent with rates used by most other senior Canadian governments.
- Background – Ontario Public Accounts 2015-16: In Ontario's fall fiscal and economic update, the government adopted the Auditor General's accounting interpretation for the treatment of net pension assets for 2015–16 through a time-limited regulatory amendment (the "Pension Adjustment"). The impact of the change resulted in an additional $10.7bln being added to the net debt and accumulated deficit and an increase of $1.5bln to the annual deficit for 2015–16. Consistent with the accounting treatment adopted in the Public Accounts of Ontario 2015–2016, the medium-term fiscal outlook provided reflects a cautious approach to forecasting the projected annual Pension Adjustment. This cautious approach results in an estimated potential impact of $2.2bln in 2016–17, $2.8bln in 2017–18, and $3.7bln in 2018–19 to the annual Pension Adjustment.

Expert advisory panel agrees with Ontario in pension accounting issue (February 14, 2017)

Credit Implications: Potentially positive

Credit Ratings: DBRS AA(Low), Moody's Aa2, S&P A+, Fitch AA-, All outlooks stable

Yesterday, an expert accounting advisory panel engaged by the Province of Ontario to review the province's accounting practices for pension assets released its report. The report sided with the province in concluding that the province's share of the net pension assets of both the Ontario Teachers' Pension Plan (OTPP) and the Ontario Public Sector Employees' Union Pension Plan (OPSEUPP) should be recognized as an asset in Ontario's financial statements. The panel concluded that it should be reported for the following reasons:

- Recognizing the asset will provide a faithful representation of the province's financial position
- The accounting surplus in the plan has a future economic benefit
- The government controls access to that accounting surplus
- The accounting surplus exists as the result of past transactions and events
- It would be misleading not to recognize the province's share of the assets in Public Accounts.

For the full report Click Here

The implications of this conclusion is that the province will have more financial flexibility to achieve its financial targets if it chooses to return to the pension accounting treatment it had used in the past. Adopting the Auditor General's treatment has resulted in an upward adjustment to the accumulated deficit as well as higher pension expense in fiscal 2015-16 and in future years. More information about these adjustments is provided below in the "Background" section.

The Auditor General is reviewing the report and is expected to comment in the near future. For the Province of Ontario's fiscal 2015-16 results, the Auditor General issued a qualified opinion because, although the statements adopted the Auditor General's pension accounting treatment for fiscal 2015-16, it did not retroactively restate the comparative 2014-15 public accounts and, therefore, by not correcting the error in accounting treatment, it constituted a departure from Public Sector Accounting Standards (PSAS).

At the same time, the preparer of the financial statements (Treasury Board Secretariat) who felt that they were and have always been in compliance with PSAS, signed off on fiscal 2015-16 results, but only following the adoption by the Province of Ontario of the Auditor General's accounting interpretation for the treatment of net pension assets for 2015–16 through a time-limited regulatory amendment (the "Pension Adjustment").

Background

In our Ontario Talking Points (January 27, 2017) research note we provided the following background information on this issue.

Could you clarify Ontario's course of action given the Auditor General of Ontario's qualified opinion on Pension Accounting?

- Although the pension expense is a non-cash charge, it is still very important to achieving the balanced budget target in Fiscal 2017-18, since Ontario's results are reported based on accrual accounting and not cash.

- The Province has engaged an expert panel of accountants to assess the issue.
- The issue being assessed is whether the Province can record an asset for the jointly sponsored plans under the accounting standards. The Province believes that an asset should be reported.
- The panel will focus on the accounting question, but will also provide advice on how to measure an asset, assuming it concludes that it should be reported. The calculation is sensitive to management's assumptions, including the discount rate which reflects management's best estimate of long-term returns on the assets which is currently at 6.25% and consistent with rates used by most other senior Canadian governments.
- Background – Ontario Public Accounts 2015-16: In Ontario's fall fiscal and economic update, the government adopted the Auditor General's accounting interpretation for the treatment of net pension assets for 2015–16 through a time-limited regulatory amendment (the "Pension Adjustment"). The impact of the change resulted in an additional $10.7bln being added to the net debt and accumulated deficit and an increase of $1.5bln to the annual deficit for 2015–16. Consistent with the accounting treatment adopted in the Public Accounts of Ontario 2015–2016, the medium-term fiscal outlook provided reflects a cautious approach to forecasting the projected annual Pension Adjustment. This cautious approach results in an estimated potential impact of $2.2bln in 2016–17, $2.8bln in 2017–18, and $3.7bln in 2018–19 to the annual Pension Adjustment.

Expert advisory panel agrees with Ontario in pension accounting issue (February 14, 2017)

Credit Implications: Potentially positive

Credit Ratings: DBRS AA(Low), Moody's Aa2, S&P A+, Fitch AA-, All outlooks stable

Yesterday, an expert accounting advisory panel engaged by the Province of Ontario to review the province's accounting practices for pension assets released its report. The report sided with the province in concluding that the province's share of the net pension assets of both the Ontario Teachers' Pension Plan (OTPP) and the Ontario Public Sector Employees' Union Pension Plan (OPSEUPP) should be recognized as an asset in Ontario's financial statements. The panel concluded that it should be reported for the following reasons:

- Recognizing the asset will provide a faithful representation of the province's financial position
- The accounting surplus in the plan has a future economic benefit
- The government controls access to that accounting surplus
- The accounting surplus exists as the result of past transactions and events
- It would be misleading not to recognize the province's share of the assets in Public Accounts.

For the full report Click Here

The implications of this conclusion is that the province will have more financial flexibility to achieve its financial targets if it chooses to return to the pension accounting treatment it had used in the past. Adopting the Auditor General's treatment has resulted in an upward adjustment to the accumulated deficit as well as higher pension expense in fiscal 2015-16 and in future years. More information about these adjustments is provided below in the "Background" section.

The Auditor General is reviewing the report and is expected to comment in the near future. For the Province of Ontario's fiscal 2015-16 results, the Auditor General issued a qualified opinion because, although the statements adopted the Auditor General's pension accounting treatment for fiscal 2015-16, it did not retroactively restate the comparative 2014-15 public accounts and, therefore, by not correcting the error in accounting treatment, it constituted a departure from Public Sector Accounting Standards (PSAS).

At the same time, the preparer of the financial statements (Treasury Board Secretariat) who felt that they were and have always been in compliance with PSAS, signed off on fiscal 2015-16 results, but only following the adoption by the Province of Ontario of the Auditor General's accounting interpretation for the treatment of net pension assets for 2015–16 through a time-limited regulatory amendment (the "Pension Adjustment").

Background

In our Ontario Talking Points (January 27, 2017) research note we provided the following background information on this issue.

Could you clarify Ontario's course of action given the Auditor General of Ontario's qualified opinion on Pension Accounting?

- Although the pension expense is a non-cash charge, it is still very important to achieving the balanced budget target in Fiscal 2017-18, since Ontario's results are reported based on accrual accounting and not cash.

- The Province has engaged an expert panel of accountants to assess the issue.
- The issue being assessed is whether the Province can record an asset for the jointly sponsored plans under the accounting standards. The Province believes that an asset should be reported.
- The panel will focus on the accounting question, but will also provide advice on how to measure an asset, assuming it concludes that it should be reported. The calculation is sensitive to management's assumptions, including the discount rate which reflects management's best estimate of long-term returns on the assets which is currently at 6.25% and consistent with rates used by most other senior Canadian governments.
- Background – Ontario Public Accounts 2015-16: In Ontario's fall fiscal and economic update, the government adopted the Auditor General's accounting interpretation for the treatment of net pension assets for 2015–16 through a time-limited regulatory amendment (the "Pension Adjustment"). The impact of the change resulted in an additional $10.7bln being added to the net debt and accumulated deficit and an increase of $1.5bln to the annual deficit for 2015–16. Consistent with the accounting treatment adopted in the Public Accounts of Ontario 2015–2016, the medium-term fiscal outlook provided reflects a cautious approach to forecasting the projected annual Pension Adjustment. This cautious approach results in an estimated potential impact of $2.2bln in 2016–17, $2.8bln in 2017–18, and $3.7bln in 2018–19 to the annual Pension Adjustment.

Do you have any edits. I sent Maria the article by Martin Regg Cohn on the auditor's response. I'm not sure she should mention that the AG is expected to comment.

BTW- I only received edits from you and Nadine yesterday. John and George checked the numbers.

Expert advisory panel agrees with Ontario in pension accounting issue (February 14, 2017)

Credit Implications: Potentially positive

Credit Ratings: DBRS AA(Low), Moody's Aa2, S&P A+, Fitch AA-, All outlooks stable

Yesterday, an expert accounting advisory panel engaged by the Province of Ontario to review the province's accounting practices for pension assets released its report. The report sided with the province in concluding that the province's share of the net pension assets of both the Ontario Teachers' Pension Plan (OTPP) and the Ontario Public Sector Employees' Union Pension Plan (OPSEUPP) should be recognized as an asset in Ontario's financial statements. The panel concluded that it should be reported for the following reasons:

- Recognizing the asset will provide a faithful representation of the province's financial position
- The accounting surplus in the plan has a future economic benefit
- The government controls access to that accounting surplus
- The accounting surplus exists as the result of past transactions and events
- It would be misleading not to recognize the province's share of the assets in Public Accounts.

For the full report Click Here

The implications of this conclusion is that the province will have more financial flexibility to achieve its financial targets if it chooses to return to the pension accounting treatment it had used in the past. Adopting the Auditor General's treatment has resulted in an upward adjustment to the accumulated deficit as well as higher pension expense in fiscal 2015-16 and in future years. More information about these adjustments is provided below in the "Background" section.

The Auditor General is reviewing the report and is expected to comment in the near future. For the Province of Ontario's fiscal 2015-16 results, the Auditor General issued a qualified opinion because, although the statements adopted the Auditor General's pension accounting treatment for fiscal 2015-16, it did not retroactively restate the comparative 2014-15 public accounts and, therefore, by not correcting the error in accounting treatment, it constituted a departure from Public Sector Accounting Standards (PSAS).

At the same time, the preparer of the financial statements (Treasury Board Secretariat) who felt that they were and have always been in compliance with PSAS, signed off on fiscal 2015-16 results, but only following the adoption by the Province of Ontario of the Auditor General's accounting interpretation for the treatment of net pension assets for 2015–16 through a time-limited regulatory amendment (the "Pension Adjustment").

Background

In our Ontario Talking Points (January 27, 2017) research note we provided the following background information on this issue.

Could you clarify Ontario's course of action given the Auditor General of Ontario's qualified opinion on Pension Accounting?

- Although the pension expense is a non-cash charge, it is still very important to achieving the balanced budget target in Fiscal 2017-18, since Ontario's results are reported based on accrual accounting and not cash.

- The Province has engaged an expert panel of accountants to assess the issue.
- The issue being assessed is whether the Province can record an asset for the jointly sponsored plans under the accounting standards. The Province believes that an asset should be reported.
- The panel will focus on the accounting question, but will also provide advice on how to measure an asset, assuming it concludes that it should be reported. The calculation is sensitive to management's assumptions, including the discount rate which reflects management's best estimate of long-term returns on the assets which is currently at 6.25% and consistent with rates used by most other senior Canadian governments.
- Background – Ontario Public Accounts 2015-16: In Ontario's fall fiscal and economic update, the government adopted the Auditor General's accounting interpretation for the treatment of net pension assets for 2015–16 through a time-limited regulatory amendment (the "Pension Adjustment"). The impact of the change resulted in an additional $10.7bln being added to the net debt and accumulated deficit and an increase of $1.5bln to the annual deficit for 2015–16. Consistent with the accounting treatment adopted in the Public Accounts of Ontario 2015–2016, the medium-term fiscal outlook provided reflects a cautious approach to forecasting the projected annual Pension Adjustment. This cautious approach results in an estimated potential impact of $2.2bln in 2016–17, $2.8bln in 2017–18, and $3.7bln in 2018–19 to the annual Pension Adjustment.

---

Alex,

Can you assist in crafting a response, especially to the last paragraph in this Q&A. I think these are last year's answers, so the dates will have to be roll forward:

Q: Ontario's debt has more than doubled since Premier McGuinty was first elected. When interest rates begin to rise, won't interest costs displace spending on the Government's priorities?

A: Ontario has a realistic plan to balance its budget while investments are made in the priorities of Ontario families – health care, education, the environment and infrastructure.

Investor demand has allowed the Province to extend the term of its debt in recent years and lock in low interest rates for a longer period. This term extension reduces the Province's refinancing risks and helps offset the impact of expected higher interest rates on its IOD costs. Since 2010, the province has borrowed $53.5 billion in the 30-year term.

The 2010 Budget forecasted that, by 2016–17, the Province would have to spend 11.7 cents of every revenue dollar received on interest. The current forecast is 2.7 cents lower, at 9.0 cents of interest costs for every dollar of revenue. This ratio is lower than it was in the 1990s, and is forecast to remain lower through the outlook period in 2018–19.

Bonnie, I reworded the net debt part, but can you assist with the wording in red.

Q: How will the credit rating agencies respond to the 2016 Budget?

A: Ontario currently maintains a double-A rating with three of its four credit rating agencies. Ontario continues to outperform its deficit projections and is on track to a balanced budget by 2017–18. Moreover, Ontario's net debt-to-GDP ratio is expected to continue its downward trend from its peak in 2014-15 at 39.2 per cent and is forecasted to be 37.2 per cent in 2019–20.

We met with the rating agencies following the 2016 Budget and expect to hear back from them over the next few months.

Subject: Estimates Defence Document Submissions

Good afternoon –

Program areas are asked to please submit Top Facts (formerly called Q&As) and update Accomplishments no later than September 11th to Pauline Padmore and cc Nicole Yanqui. Attached for your reference is the table of contents from last years' Estimates Briefing Binder, Accomplishments and Top Facts.

Here is the Minister's Office recommended list of top facts & top issues **by order of importance**:

Tab 3: Top Facts
- Office of the Budget
- Ontario Financing Authority
- Office of Economic Policy
- Corporate Electricity Finance Division
- Taxation Policy Division
- Tax and Benefits Administration
- Provincial Local Division
- Cannabis Retail Implementation Project
- Government Business Enterprise Division
- ORPP Implementation Secretariat / Admin Corporation
- Income Security & Pension Policy Division
- Financial Services Policy Division

Tab 4: Top Issues
- Fiscal Plan (in relation to questions that might come up about balancing)
- Debt (Interest on Debt costs)
- Public Accounts (emphasis on AG Accounting)
- Fair Hydro Plan
- Housing Market
- Cannabis
- Cap & Trade
- Trillium Trust
- OLG Modernization
- LBCO
- ORPP – if needed

In addition to the corporate preparations, program areas should prepare their ADM/Program Head in the event we do appear before the Estimates Committee – for those questions that are of a technical or operational nature. This also includes preparations for your ADM/Program Head to explain any financial variances from the Estimates Briefing Book, should those questions arise at the proceedings. This work should currently be underway.

Please let me know if you have any questions about this process.

Thank you.

Pauline Padmore
Corporate Initiatives and Stakeholder Coordinator (A)

Revenue Agencies Oversight Division 1
Office of Economic Policy 1
Financial Services Policy Division 1
Provincial Local Finance Division 1
Office of the Budget 2
Taxation Policy Division 2
Tax and Benefits Administration 2
ORPP Implementation Secretariat 2
Ontario Financing Authority 3
Corporate Electricity Finance Division 3

Income Security and Pension Policy Division

Continued to provide the government with policy advice on income security matters, from childhood through to retirement, including: the indexing of the Ontario Child Benefit; policy work for key sections of the 2016 Budget (such as announcements on the Basic Income Pilot and social assistance rate increase); and worked collaboratively and intensively with the federal government and provinces to make progress on enhancing the CPP. The Divisions also provided policy and legislative advice on pension policy issues such as the successful passage of the *Pooled Registered Pension Plans Act, 2015*, initiated a review of solvency funding rules for defined benefit pension plans, proclaimed legislation and passed regulations governing the conversion or merger of single employer defined benefit pension plans to jointly sponsored pension plans, and enacted legislation (to be proclaimed into force by the LGIC) that creates a pooled asset management entity for pension plans in the broader public service.

Revenue Agencies Oversight Division

Moving forward the large scale modernization and transformation of the gaming and alcohol sectors in Ontario that will improve consumer experience and support increased revenues for important public services.

Office of Economic Policy

Supported effective, economic, fiscal and financial management consistent with the government's priorities, and supported various initiatives which continue to make Ontario an attractive environment for business investment.

Financial Services Policy Division

Supported the growth of the financial services sector by advancing a modern and flexible approach to regulation, strengthening consumer and investor protection by implementing regulatory changes to help ensure auto insurance is affordable for Ontario drivers; exploring how Ontario's regulatory framework for auto insurance can fit new insurance products for ride-sharing services; reviewing the legislative framework for Ontario's credit unions to protect consumers and their deposits; supporting an independent review of the mandates of key financial services agencies. Additionally, the Financial Services Policy Division continues to support the independent Expert Committee to Consider Financial Advisory and Financial Planning Policy Alternatives, which released its preliminary policy recommendations in April 2016; and is working with participating jurisdictions to achieve important milestones toward the establishment of the Cooperative Capital Markets Regulatory System (CCMR).

Provincial Local Finance Division

The Ministry is delivering improvements to the property tax and municipal funding system that contributes so much to communities and public services across Ontario. During 2015-16, the government implemented changes to Ontario's property assessment and property tax systems, including implementing recommendations coming out of the Assessment Review in time for the 2016 reassessment of all Ontario properties. These measures improve the transparency, accuracy and predictability of property assessments. The Ministry also worked in close consultation with municipalities to redesign the Ontario Municipal Partnership Fund (OMPF) so that it better targets funding to municipalities with the greatest needs. While the program has been phased down, the government's commitment to the provincial uploads means that overall support to municipalities will continue to increase. Together, these measures have helped ensure that municipalities are on a financially sustainable footing and in a position to invest in local priorities like roads, transit and economic development.

Office of the Budget

Provided strategic fiscal advice and coordinating key government publications including the annual Budget, the Economic Outlook and Fiscal Review and the Quarterly Finances

Taxation Policy Division

The 2016 Student Financial Assistance Budget announcement that Ontario's tuition and education tax credits would end beginning September 2017. Additional revenue from ending the credits is proposed to be redirected to the new Ontario Student Grant or other postsecondary, education, training and youth jobs programs, which fulfills a CROPS recommendation.

Tax and Benefits Administration

Established a Contraband Tobacco Enforcement Team within the OPP to focus on the organized crime linkages

ORPP Implementation Secretariat

The government passed two pieces of ORPP legislation that outlined the framework of the plan and established an arm's length entity, the ORPP Administration Corporation, including appointing the initial Board of Directors and hiring a Chief Executive Officer.

Ontario Financing Authority

Completed the 2015-16 borrowing requirement and pre-borrowed $2 billion for 2016-17 for total borrowing of $32.1 billion, while continuing to extend term to lock in low interest rates, with an average term of borrowing for the year of 14.2 years. Since 2010, borrowed more than $54 billion in terms of 30 years or longer.

Corporate Electricity Finance Division

Provided strong support to the Province's asset optimisation initiative, including the Hydro One IPO, real estate assets and the Trillium Trust to dedicate funds to infrastructure investments; and has moved forward with a legislated, fixed end date of April 1, 2018, to the Debt Retirement Charge (DRC) for commercial, industrial and all other users of electricity. The DRC for residential users ended as of January 1, 2016.

TOP FACTS

INCOME SECURITY AND PENSION POLICY DIVISON 1

Q: When and where will the Basic Income pilot be implemented? How much will the Basic Income pilot cost? Your Estimates show $5 million in 2016-17 for the pilot. 1

Q: If there is an agreement on CPP enhancement within the year, will Ontario still implement the ORPP? 1

Q: If there is agreement on a CPP enhancement that does not meet Ontario's objectives, what is Ontario's position? 1

REVENUE AGENCIES OVERSIGHT DIVISION 2

Alcohol 2

Q: Why is this so complicated? There will be universal authorizations, existing winery stores operating inside grocery, controls on who sells what, some will be matched with beer but some won't. Why not just open it up? 2

Q: Why is the Council recommending only introducing wine into 150 grocery stores? There will be beer in 450 grocery stores. 2

Q: Why will grocery stores only be able to sell wine that costs $10.95 or more? 2

Gaming 3

Q: What is the future of the HRPFP? 3

Q: Why is OLG net profit to the province (NPP) expected to decline slightly from 2015-16 to 2016-17? 3

Q: Why is net profit to the province higher in 2015-16 compared with projections in Budget 2015?. 3

Q: Is funding to hospitals being reduced by $107M in 2016-17 as a result of OLG's projected lower net profit to the province? 3

OFFICE OF ECONOMIC POLICY 4

Q: Will the 30% Off Ontario Tuition grant still be available or has it been eliminated? 4

Q: What evidence do you have that Ontario's economy is performing better than Canada's? 4

Q: Over the last 18-months there has been a significant shift in the global economic environment. Why do you remain positive about Ontario's economic prospects? 4

FINANCIAL SERVICES POLICY DIVISON 6

Q: What is the government's reaction to the preliminary policy recommendations released by the Expert Committee to Consider Financial Advisory and Financial Planning Policy Alternatives? 6

Q: Both the City of Ottawa and City of Toronto staff reports on vehicles for hire recommend minimum insurance requirements for drivers involved in ride-sharing. What are you doing to make sure that insurance is in place? 6

PROVINCIAL LOCAL FINANCE DIVISION 8

Q: What is the government doing to support municipalities? 8

Q: Will the Ontario Municipal Partnership Fund (OMPF) be further reduced beyond 2016? 9

Q: In the 2014 Budget, the Province announced that payments to municipalities under the Power Dam Special Payment Program would be reduced. What is the status of this phase-down? 9

OFFICE OF THE BUDGET 10

Q: The Ontario budget states that new federal funding has been included in the fiscal outlook based on 'prudent assumptions' about new transfers, but the federal government has not said how much Ontario will receive. What are these prudent assumptions and how much new federal money is counted in this budget? 10

Q: Will cap-and-trade impact the Province's bottom line? 11

Q: Is the Government using Asset Optimization Revenues to balance the Budget? 12

Q: Is the government restricting the ability of the FAO to access Cabinet Confidential documents? 12

Q: What is the government's plan to hold average annual growth in program expense to 1.9% going forward? Given that this is below inflation, what programs are being cut? 12

Q: Compared to the 2015 Budget, program spending is higher in each year. How is the government going to balance when spending is up? 13

Q: The government is reporting overachievement on its annual deficit target for the 7th year in a row. How is this possible? Is the government purposely setting easy targets? 14

TAXATION POLICY DIVISION 16

Q: How many students will be affected when the tuition and education tax credits end? 16

Q: Will everyone who loses their tax credits get back the money through the new student grant? . 16

Q: Why are you cutting R&D Tax Credits (i.e. OITC and ORDTC) when you say you want to support innovation? 16

TAX AND BENEFITS ADMINISTRATION 17

Q: Why are Bad Debt Expenses increasing from approximately $46.7Million (2014-2015 Actuals) to $90Million (2015-2016 interim actuals)? 17

Q: Why is the Ministry of Finance seeking an increase of $13.2Million in its Bad Debt Expense allocation in 2016-17 (from $32Million to $45.2Million)? 17

Q: How is Ontario supporting the sharing economy? 17

Q: Why has the government introduced more red tape for estate representatives? 18

Q: Has the government seen an increase in the Estate Administration Tax collected since January 1, 2015? 18

Q: What is the government doing to address Aggressive International Tax Planning? 18

Q: What is Ontario doing to address the underground economy? 19

ORPP ADMINISTRATION CORPORATION 20

Q: Why is the government providing the ORPP AC with a loan? 20

Q: How much money is being loaned? 20

Q: In the 2016/17 estimates, it shows a loan amount of up to $240M. How is that money going to be used? 21

ORPP IMPLEMENTATION SECRETARIAT 22

Q: How much has been spent on the ORPP Implementation Secretariat (ORPPIS) to date? 22

Q: Why does the Ministry's direct spending for ORPP decrease by $12.5M in 2016-17? 22

Q: Why is the government providing the ORPP AC with a $240M loan in 2016-2017? 22

Q: In total, how much is the government loaning the ORPP AC for set-up expenses? 23

Q: In addition to the current costs and the loan to ORPP AC, how much money will it cost to implement the ORPP? Are we talking billions? 23

Q: Isn't the federal government helping to administer the ORPP? 23

Q: Who pays for the ORPP start-up costs if the CPP is enhanced and the plan is never implemented? 24

Q: How much money is being loaned? 24

Q: In the 2016/17 estimates, it shows a loan amount of up to $240M. How is that money going to be used? 25

Q: How much of the loan has been drawn down to date? What has that money been used for? 25

Q: Is this money being spent on high salaries? What is the compensation framework for the ORPP AC? 25

Q: Does the government expect to be repaid? 25

Q: What would be the cost to government if the ORPP is cancelled after it launches? 25

Q: How is the repayment schedule structured? Will it be charged interest? 26

Q: Why doesn't the ORPP AC get a traditional bank loan? 26

Q: Will there be any public reporting or accountability to how the loan is spent? 26

Q: What types of costs will the loan be used to pay? 26

Q: How much money has the ORPP AC spent on the services of consultants? 27

Q: How does the loan relate to administration costs of the ORPP? 27

Q: What is the ORPP Administration Corporation? 27

Q: What are the accountability mechanisms of the ORPP Administration Corporation? To whom does it report? 27

Q: Why is the ORPP IS still in place now that the ORPP AC has been established? 28

Q: Why did the government spend an additional $6 million than was estimated last year? Is this another example of the government overspending on consultants? 29

Q: On one hand you say you are launching the ORPP in 2017, but then indicate that the collection of contributions won't start until 2018…which is it 29

Q: Is the federal government committing to administer your plan if CPP talks fail? 30

Q: Would Ontario support a CPP enhancement that is a universal program to all employers and employees? 30

Q: If the government is going to proceed with measures such as introducing legislation on ORPP plan design, are you even serious about discussing the CPP? 31

Q: What progress has the government made on the ORPP to date? 31

Q: Why introduce legislation now? Didn't you commit to ongoing national discussions on a CPP enhancement? 31

[Legislation tracking to be introduced April 14, 2016] 32

Q: What will be included in upcoming legislation? 32

Q: What is the Ontario Retirement Pension Plan (ORPP)? 33

Q: Why is the ORPP needed? 33

Q: What are the anticipated impacts of the ORPP on Ontario's economy? 33

Q: Why is the Government advertising the Ontario Retirement Pension Plan? 34

Q: In 2015-16, how much did the ministry spend on the ORPP campaign (including advertising, marketing and market research)? 34

ONTARIO FINANCING AUTHORITY 35

Q: How does the Province plan to reduce its net debt-to-GDP ratio to its pre-recession level of 27 per cent? 35

Q: Ontario's debt has more than doubled since Premier McGuinty was first elected. When interest rates begin to rise, won't interest costs displace spending on the Government's priorities? 35

Q: How will the credit rating agencies respond to the 2016 Budget? 36

CORPORATE ELECTRICITY FINANCE DIVISION 37

Q: What's the current status of the funds in the Trillium Trust? 37

Q: Since the Hydro One IPO was completed several months ago and now the government has announced a secondary share offering, why haven't you made any regulations to dedicate the fiscal benefits of the Hydro One IPO to the Trillium Trust? When will you make these regulations and when will we see these amounts in the Trillium Trust? 37

Q: Why have no amounts been spent from the Trillium Trust yet, not even from the GM share gain amounts from 2014-15? And why are there only $1,000 in placeholder expenditure numbers for the Trillium Trust lines in Estimates? 37

Q: When will the government actually be able to start using funds from the Trillium Trust to pay for transit and infrastructure? 38

Q: How much was raised from the Hydro One IPO? 38

Q: What amount of proceeds will the Province receive from the secondary offering? 39

Q: What was the process involved in selecting the underwriters involved for the secondary offering 39

Q: Why is the interim Electricity Sector Dedicated Income (ESDI) $0 in 2015-16, and why is the forecast so low for ESDI in the 2016-17 Printed Estimates? Is this because of the Hydro One IPO reducing the Province's future revenues from Hydro One and reducing the amounts to pay for stranded debt? 40

INCOME SECURITY AND PENSION POLICY DIVISON

Q: When and where will the Basic Income pilot be implemented? How much will the Basic Income pilot cost? Your Estimates show $5 million in 2016-17 for the pilot.

A: The pilot in still in the inception stage. A start date and criteria for determining a location for the Basic Income pilot have not yet been determined. The government will be gathering expert advice on the design of the Basic Income pilot over the course of 2016. Once this work has been completed, the government will finalize the costs for the pilot.

Q: If there is an agreement on CPP enhancement within the year, will Ontario still implement the ORPP?

A: While Ontario is pleased that the federal government understands the importance of enhancing retirement security, the process to enhance the CPP is not simple and could take a very long time.

Ontario will continue to be an advocate of the need for enhanced retirement security and will work intensively with its federal, provincial and territorial counterparts to address the needs of future retirees.

To provide more time for discussion among provinces and the federal government, Ontario is phasing-in the launch of the ORPP by starting enrollment one year later than the original start date, and by starting the first phase of contributions in January, 2018.

Q: If there is agreement on a CPP enhancement that does not meet Ontario's objectives, what is Ontario's position?

A: The Province's extensive consultations in developing the ORPP have helped to inform Ontario's view that any CPP enhancement must be timely and provide a level of adequacy and targeted coverage that is consistent with the ORPP.

The government looks forward to collaboration on a CPP enhancement and other innovative approaches at the Federal-Provincial-Territorial Finance Ministers meeting in June 2016.

Ontario's main objective is to look at ways to meet the goals of the ORPP in an enhanced CPP framework, while preserving the ability to implement the ORPP, should that not be possible.

REVENUE AGENCIES OVERSIGHT DIVISION

Alcohol

Q: Why is this so complicated? There will be universal authorizations, existing winery stores operating inside grocery, controls on who sells what, some will be matched with beer but some won't. Why not just open it up?

A: The Council did not start from scratch in making its recommendations. It recognized the benefits of the existing retail channels for wine, including the LCBO and winery retail stores, and how we could build on and improve them for consumers and all producers.

There will be differences in the consumer experience. Just like beer, and just like grocery stores in general.

The bottom line is that we're getting what consumers want done — wine will be sold alongside beer in grocery stores.

Q: Why is the Council recommending only introducing wine into 150 grocery stores? There will be beer in 450 grocery stores.

A: We are expanding access responsibly. The number of new licences in the proposed new model is based on the total number of beer in grocery licences that were established under the beer framework – 450. There are currently 292 "off site" winery retail stores, so we added 150 new authorizations to bring it to about the same as beer.

The exact number of grocery stores selling wine through their own checkouts will depend on the number of WRS outlets that ultimately move inside the check-out at grocery stores. Of the 292 existing WRS outlets, the Council is recommending that up to 150 that are currently located in grocery and outside the grocery store checkout be enabled to operate inside grocery with a shared checkout.

In total, wine could be available in up to 300 grocery stores – including up to 70 locations authorized to sell by this fall.

Q: Why will grocery stores only be able to sell wine that costs $10.95 or more?

A: We believe that, where access is expanded, social responsibility standards should be strengthened. This price restriction is supported by social responsibility groups, including MADD.

This price restriction also supports the competitiveness of Ontario VQA wines in the grocery channel, and promotes the objectives of Ontario's Wine and Grape Strategy.

Gaming

Q: What is the future of the HRPFP?

A: The two year program extension will give confidence to the industry to make investments and business decisions for the coming years.

Beyond this time, the intention would be for OLG to establish a future, longer-term funding arrangement with the industry. The arrangement would be subject to government approvals, and further integrate gaming with horse racing and support industry sustainability.

Q: Why is OLG net profit to the province (NPP) expected to decline slightly from 2015-16 to 2016-17?

A: OLG continues to provide approximately $2 billion to the province, which helps to fund key public services like health care and education.

Delays in the procurement processes for private sector service providers for gaming and lottery have impacted the timelines for increased NPP from modernization.

2015-16 was an exceptional year for OLG NPP with projections of over $150M more than Budget 2015, mainly due to increased sales revenue from national lottery tickets (Lottomax, Lotto 6/49). NPP in 2016-17 is expected to decrease slightly in comparison, as lottery sales and resulting revenues return to more normal levels.

Q: Why is net profit to the province higher in 2015-16 compared with projections in Budget 2015?

A: Revenue from national lotteries (Lottomax and Lotto 6/49) is higher than was projected in Budget 2015, primarily due to a higher number of large jackpots. More large jackpots led to higher sales revenues.

Q: Is funding to hospitals being reduced by $107M in 2016-17 as a result of OLG's projected lower net profit to the province?

A: Revenue generated by OLG is paid into the province's Consolidated Revenue Fund (CRF). Allocations to the Ministry of Health and Long-Term Care (MOHLTC) are made from the CRF. OLG revenues targeted for health care only amount to 3% of MOHLTC's $52B budget.

Fluctuations in OLG's revenues do not impact health care funding levels or projections.

OFFICE OF ECONOMIC POLICY

Q: Will the 30% Off Ontario Tuition grant still be available or has it been eliminated?

A: The government will create a single major upfront grant — the Ontario Student Grant (OSG) starting in the 2017–18 school year by redirecting 100 per cent of the funding from the 30% Off Ontario Tuition grant and other grants offered by OSAP. This will make the student financial assistance system more progressive, effective and transparent for students and their families. The changes will provide students who have the greatest need for financial assistance with better access to grants upfront, when they need them.

The additional revenue from the proposed discontinuation of the tuition and education tax credits would be reinvested to support the OSG or other postsecondary, education, training and youth job programs.

Q: What evidence do you have that Ontario's economy is performing better than Canada's?

A: Ontario became one of the fastest growing provinces in 2014 and 2015, and private-sector economists expect this will continue until at least 2017.

On an annual basis, Ontario's real GDP increased by 2.7 per cent in 2014, strengthening from growth of 1.3 per cent in 2013 and outpacing the national average for the first time since 2002.

After a slow start to 2015 when the economy was affected by a number of temporary factors including unusually harsh winter weather, closure at auto plants for retooling, and a west coast port strike affecting exports, Ontario's economic growth gained pace in the second and third quarters of 2015, with real GDP advancing 0.4 per cent and 0.9 per cent, respectively. Ontario's economy outpaced the Canadian economy in all three quarters in 2015.

Q: Over the last 18-months there has been a significant shift in the global economic environment. Why do you remain positive about Ontario's economic prospects?

A: There have been significant shifts in the external economic environment over the past year and a half. Growth has slowed in emerging economies, commodity prices have fallen dramatically, and the Canadian dollar has weakened. This has shaken business confidence and left Ontario households unsure about the ultimate impact on their budgets and spending plans.

Yet, overall, Ontario is expected to benefit from the shifting global economic environment. Growth in the U.S., our largest trading partner, is expected to remain solid. As well, the more competitive Canadian dollar provides additional lift to our

exporters. Finally, Ontario is an oil-importing province which means consumers and businesses are benefitting from low oil prices. These factors provide an increasingly compelling case for increased business investment and will help support continued solid economic growth in coming years.

FINANCIAL SERVICES POLICY DIVISON

Q: What is the government's reaction to the preliminary policy recommendations released by the Expert Committee to Consider Financial Advisory and Financial Planning Policy Alternatives?

A: It would be premature for the government to comment at this time on the preliminary policy recommendations.

The independent Expert Committee to Consider Financial Advisory and Financial Planning Policy Alternatives released their preliminary policy recommendations in April 2016 as a means of facilitating further input from stakeholders and the public. The expert committee is seeking feedback through written submissions and an across-the-province public consultation process.

The Government expects the expert committee's final report in fall 2016 and will consider their recommendations at that time.

Q: Both the City of Ottawa and City of Toronto staff reports on vehicles for hire recommend minimum insurance requirements for drivers involved in ride-sharing. What are you doing to make sure that insurance is in place?

A: The sharing economy is changing the way transportation services are provided in Ontario. The government is committed to ensuring that Ontario's auto insurance system can help provide peace of mind to those offering and using these new types of transportation services.

Ontario's competitive market for auto insurance is already responding and adapting. FSCO has received filings from different companies proposing new auto insurance products tailored to the sharing economy, and in January FSCO approved one product allowing individual drivers to purchase coverage.

Other proposals are currently being reviewed by FSCO. While this work is proceeding, the reality is that there continues to be a significant insurance coverage gap.

The government is committed to protecting Ontario drivers and consumers by addressing that gap, and FSCO is aware of the importance to the government of achieving this objective as quickly as possible.

Towards that end, the government and FSCO are exploring how Ontario's flexible insurance regulatory system can quickly approve new insurance products. Using such flexible responses would allow new products to be introduced in the market while the government, working with the regulator and the insurance industry, develops the legislative and regulatory changes necessary to fully integrate the sharing economy into Ontario's auto insurance system.

Q: Some media reports have been sceptical about the public timelines for launching the Cooperative Capital Markets Regulatory System (CCMR). When is the CCMR expected to be established and operational?

A: The participating jurisdictions have agreed to target the enactment of legislation by June 30, 2016 and the Capital Markets Regulatory Authority becoming operational in the fall of 2016.

These timelines will be challenging given the need for the enactment of legislation by multiple legislatures. The participating jurisdictions are committed to moving forward with this initiative and market participants should take comfort that we will take the time necessary to ensure a successful launch of the Cooperative System. We will work to ensure a smooth transition to the new system for market participants and their businesses.

PROVINCIAL LOCAL FINANCE DIVISION

Q: What is the government doing to support municipalities?

A: Our government has a strong record of supporting and working with municipalities.

In 2016 alone, municipalities will benefit from over $3.8 billion in ongoing support through the Ontario Municipal Partnership Fund (OMPF), provincial uploads and other provincial initiatives – an increase of $2.7 billion above the support provided in 2003.

The government will continue to fulfill its commitment to upload social assistance benefit programs as well as court security and prisoner transportation costs off the property tax base. This will ensure that municipalities have more property tax dollars to invest in local priorities like roads, transit and economic development.

In partnership with communities, Ontario is making significant investments to revitalize infrastructure and grow the economy. The Province's infrastructure commitments include:

- Transit, transportation and other priority infrastructure through *Moving Ontario Forward* that is supported by $31.5 billion in dedicated funds, with about $16 billion available within the Greater Toronto and Hamilton Area (GTHA) and about $15 billion available outside the GTHA.
    - As part of *Moving Ontario Forward*, the Ontario Community Infrastructure Fund is being expanded to $300 million per year by 2018–19, which will provide ongoing support for critical local infrastructure priorities.
- Introducing a new Connecting Links program that will provide $20 million in 2016-17, up from $15 million announced in the *2015 Budget,* to help municipalities pay for construction and repair costs for municipal roads that connect two ends of a provincial highway through a community or to a border crossing. Funding for this program will increase to $30 million per year by 2018-19.

In addition to implementing the provincial uploads, the Province has worked in partnership with municipalities to introduce measures that support communities. These include:

- Sharing provincial gas tax revenues;
- Unconditional funding through the Ontario Municipal Partnership Fund;
- Long-term funding through the Ontario Community Infrastructure Fund;

- Connecting Links program;
- Developing a fair and equitable Ontario Provincial Police billing model;
- Working with municipalities to enhance the fairness, effectiveness and predictability of the Ontario's property tax and assessment system;
- Consulting with municipal partners through the Memorandum of Understanding with the Association of Municipalities of Ontario, as well as other forums;
- Undertaking an integrated review of the Municipal Act, the City of Toronto Act and the Municipal Conflict of Interest Act.

Q: Will the Ontario Municipal Partnership Fund (OMPF) be further reduced beyond 2016?

A. During our consultations, municipalities have been clear that the OMPF is an important unconditional funding program for many municipalities.

The Ontario Municipal Partnership Fund (OMPF) will continue to provide unconditional support to municipalities in 2016 and beyond. In 2016, the phase-down of the OMPF is complete, and the design of the core grants now reflects the long-term objectives of the program.

At this time, there is no plan to further reduce the OMPF.

It is also important to note that as announced in the *2015 Ontario Budget*, the OMPF has been increased by an additional $5 million in 2016, bringing the total OMPF envelope to $505 million rather than the $500 million previously planned for 2016. This additional funding is being provided through the Northern Communities Grant of the program to further recognize the challenges of northern municipalities.

Q: In the 2014 Budget, the Province announced that payments to municipalities under the Power Dam Special Payment Program would be reduced. What is the status of this phase-down?

A: The 2014 Budget announced a plan to phase down the program over three years, ensuring that more than 75% of the current funding level is maintained.

However, the phase-down reductions for 2015 and 2016 were deferred in light of consultations and analysis that were underway to consider alternative options to the phase-down, including the re-introduction of property taxation for power dams.

As announced in the 2016 Budget, following extensive review and consultations on this program, the Province has confirmed that stable funding to municipalities with respect to currently-eligible hydroelectric generating stations will remain in place for 2017 and future years.

OFFICE OF THE BUDGET

Q: The Ontario budget states that new federal funding has been included in the fiscal outlook based on 'prudent assumptions' about new transfers, but the federal government has not said how much Ontario will receive. What are these prudent assumptions and how much new federal money is counted in this budget?

A: The 2016 budget continues the government's plan to build Ontario up and deliver on its priority of growing the economy and supporting job creation. Ontario's plan includes investing in people's talents and skills, as well as making the largest investment in public infrastructure in the province's history.

Ontario and the federal government share common goals, common values and have the same priorities. The federal government has recognized that coordinated and collaborative action is needed to address the issues facing Ontarians and Canadians. And the Province is ready to work with a federal partner to build on Ontario's investments and welcomes federal support for Ontario's plans in areas that matter to Ontarians and Canadians.

The 2016 Ontario budget included some prudent assumptions about what new revenue Ontario could expect from the federal government based on what was in the federal government's election platform. Even the Financial Accountability Officer (FAO) indicated these assumptions were prudent.

For instance, the federal government has committed to $60 billion in new infrastructure funding over 10 years. The Province welcomes this new commitment to build on existing programs and provide both immediate infrastructure investments and longer-term funding to support shared infrastructure priorities, and is working with the federal government to secure its per capita share.

More information will become available in the coming months as the federal government rolls out the details of its various plans around infrastructure, climate change and skills training.

While in some cases, federal measures have already been included in Ontario's fiscal plan, the full extent of the impact of these measures must be analyzed when more details of federal proposals are released.

This is particularly true of infrastructure, where both levels of government are making significant fiscal commitments.

Q: Will cap-and-trade impact the Province's bottom line?

A: The government is committed to dedicating all proceeds from the auctioning of allowances under the cap and trade program to fund GHG-emissions reduction initiatives – which would help Ontario meet its 2020 and 2030 emissions reduction targets.

The fiscal plan included in the 2016 Budget reflects this commitment.

The medium-term revenue outlook includes projected cap-and-trade proceeds from the auctioning of carbon allowanced beginning in 2017. The current estimate for proceeds is:

$478 million in 2016-17; and

Between $1.8 billion and $1.9 billion annually starting in 2017-18.

The government has already taken an important step towards investing cap-and-trade proceeds with the investment of $325 million in 2015-16 through a new Green Investment Fund.

For spending of cap and trade proceeds in 2016-17 and beyond, the government is still working out the details which is subject to the enabling legislative framework that's currently under review by the Legislature – any changes to the legislation could impact the potential areas of investment that are eligible for funding from cap and trade proceeds.

Moving forward, Ontario's approach to the investment of cap-and-trade proceeds will be both balanced and strategic, focusing on initiatives where the opportunity for emissions reduction and sustainable economic growth is greatest.

The fiscal plan reflects the most recent information available at the time of the Budget, including the impact of new initiatives announced as part of the Budget. The government recognizes that different factors could affect the Province's outlook for revenue and expense. That is why the fiscal plan incorporates prudence – to protect the fiscal outlook against these potential adverse changes.

The fiscal plan incorporates a reserve, set at $1.0 billion in 2016-17, $1.1 billion in 2017-18 and $1.2 billion in 2018-19.

It also includes contingency funds to help mitigate expense risks that may otherwise adversely affect Ontario's fiscal performance.

Q: Is the Government using Asset Optimization Revenues to balance the Budget?

A: The government's plan to eliminate the deficit does not depend on the revenues from asset sales. Maximizing the value of these assets is part of the government's economic plan for Ontario.

In fact, the government is taking deliberate and responsible steps to achieve its goal of balancing the budget in 2017-18. Ontario's plan to eliminate the deficit is centred on transforming government and managing costs, and ensuring revenue integrity and addressing the underground economy.

Under the *Trillium Trust Act*, *2014,* all net revenue gains from the sale of designated assets are to be credited to the Trillium Trust to help fund further investments in public transit, transportation and other priority infrastructure as part of the Moving Ontario Forward initiatives.

The asset optimization target will help support the largest infrastructure investment in the province's history.

Q: Is the government restricting the ability of the FAO to access Cabinet Confidential documents?

A: No, the government is acting in accordance with the governing legislation that was approved by all three parties.

As per Section 12(2) of the *Financial Accountability Officer Act* (FAOA), a ministry or public entity is prohibited from disclosing to the Financial Accountability Officer (FAO) a record "described in subsection 12(1) of *the Freedom of Information and Protection of Privacy Act*" (FIPPA). Section 12(1) of FIPPA prohibits the release of any record that would reveal the substance of deliberations of the Executive Council or its committees.

In the end, the primary purpose of subsection 12(1) of FIPPA is to protect the deliberations or future deliberations of Cabinet. As a result, the section prohibits the disclosure of both existing records as well as any newly created records that would reveal those deliberations.

Q: What is the government's plan to hold average annual growth in program expense to 1.9% going forward? Given that this is below inflation, what programs are being cut?

A: Program expense is projected to grow at an average annual rate of 1.9 per cent between 2014-15 and 2018-19. This reflects the government's commitment to invest in priority areas to enhance public services, support economic growth and a low-carbon economy, and create jobs. [Ch. 3B, Pg. 29]

A key pillar of Ontario's plan to eliminate the deficit is transforming government and responsibly managing spending. [~Ch. 2A, Pg. 3] The government is achieving this through Program Review, Renewal and Transformation (PRRT) – a new approach to fiscal planning and expenditure management this is designed around four key principles:

- Examining how every government dollar is spent;
- Using evidence to inform better choices and improve outcomes;
- Looking across government to find the best way to deliver services; and
- Taking a multi-year approach to find opportunities to transform programs and achieve savings. [~Ch. 2B, Pg. 3]

PRRT is about more than saving money – it is a continuous planning approach focused on improving outcomes for government programs and services to ensure they are effective, efficient and sustainable. [Ch. 2B, Pg. 3]

Through cross-ministry horizontal collaboration, the government is taking focused action on major transformation and efficiency initiatives that will improve outcomes for Ontarians while helping to free up resources to invest in key priorities, such as health care and education. [Ch. 2B, Pg. 7]

The *2016 Budget* outlines progress on and expected outcomes of these major transformation and efficiency initiatives.

Q: Compared to the 2015 Budget, program spending is higher in each year. How is the government going to balance when spending is up?

A: Compared with the *2015 Budget*, program expense is projected to be $1.6 billion higher in 2016-17 and $4.2 billion higher in 2017-18. [Ch. 3B, Pg. 32]

These changes primarily reflect:

- Projected emissions reduction initiatives offset by cap-and-trade revenue;
- Small changes to Moving Ontario Forward projects;
- Adjustments for changes in demand and demographics across many programs; and
- Other investments in infrastructure. [Ch. 3B, Pg. 32]

These investments will help enhance the public services that Ontarians rely on, as well as stimulate economic growth to generate revenues on the path to balance. [~Ch. 2A, Pg. 3]

The government remains dedicated to a fiscally sound approach to managing the Province's finances, and to balancing the budget by 2017-18. The government is taking deliberate and responsible steps to achieve that goal. [~Ch. 2A, Pg. 3]

The government is projecting deficits of $5.7 billion in 2015-16 and $4.3 billion in 2016-17 – improvements of $2.8 billion and $0.5 billion compared with the 2015 Budget forecasts. [~Ch. 2A, Pg. 4, 5]

With the economy expected to continue to growth, and the Province's ongoing commitment to transform government programs and services, Ontario is projecting to return to balance in 2017-18 and remain balanced in 2018-19. Achieving balance will put net debt-to-GDP on a declining track. [~Ch. 2A, Pg. 5]

Ontario's plan to eliminate the deficit includes: [2A, Pg. 3]

- Transforming government and responsibly managing spending; and
- Ensuring revenue integrity and addressing the underground economy.

Q: The government is reporting overachievement on its annual deficit target for the 7th year in a row. How is this possible? Is the government purposely setting easy targets?

A: The government is projecting a deficit of $5.7 billion in 2015-16, an improvement of $2.8 billion compared with the *2015 Budget* forecast. It is also a $4.6 billion improvement compared with the 2014-15 deficit of $10.3 billion. This represents the Province's largest year-over-year reduction in the deficit in the last five years. [Ch. 2A, Pg. 4]

The overachievement in 2015-16 is mainly due to total revenue projected to be $2.2 billion above the *2015 Budget* plan, due to higher revenue from asset optimization in 2015-16, higher taxation revenues and stronger overall performance from Government Business Enterprises (GBEs). [~Ch. 3B, Pg. 4]

It is also the result of $0.2 billion in lower interest on debt expense, from lower-than-forecast interest rates, the lower forecast deficit and cost-effective debt management. [~Ch. 3B, Pg. 4]

Ontario's program expense is projected to be $0.4 billion higher than outlined in the *2015 Budget*, but consistent with the forecast laid out in the *2015 Ontario Economic Outlook and Fiscal Review*. This is primarily due to the $325 million down payment through the Green Investment Fund. [~Ch. 3B, Pg. 4]

The *2015 Budget* included a $1.0 billion reserve for 2015-16. In the *2016 Document*, the 2015-16 interim outlook maintains a $150 million reserve to protect the fiscal plan against any potential adverse changes that may occur before year-end. [~Ch. 3B. Pg. 5]

The government's fiscal targets are based on the best available economic and fiscal information at the time. They reflect a realistic and responsible plan to manage the Province's resources, while still protecting the vital services that Ontarians rely on. [Framework]

TAXATION POLICY DIVISION

Q: How many students will be affected when the tuition and education tax credits end?

A: About 1 million students are expected to report that they attended studies in 2015 that qualified them for tuition and education tax credits. About 800,000 attended full time studies, and about 200,000 attended part-time studies.

Q: Will everyone who loses their tax credits get back the money through the new student grant?

A: Currently, tax credits go to a larger group of students than those eligible for OSAP. The grant design has not been finalised. The government will announce details of the new program later this year.

Q: Why are you cutting R&D Tax Credits (i.e. OITC and ORDTC) when you say you want to support innovation?

A: Research and Development remains a key priority for the government. That is why the government is reinvesting savings from the proposed R&D tax credit changes into new targeted investments across key sectors of Ontario's economy.

The government is investing $35 million over five years towards establishing the Advanced Manufacturing Consortium; $20 million over three years to partner with Colleges to tackle industry challenges through innovation projects; and $50 million over five years in world-leading research at the Perimeter Institute.

Through the province's Business Growth Initiative, the government will continue to examine ways to encourage R&D investment in Ontario, increase the commercialization of research and better support export activity.

TAX AND BENEFITS ADMINISTRATION

Q: Why are Bad Debt Expenses increasing from approximately $46.7Million (2014-2015 Actuals) to $90Million (2015-2016 interim actuals)?

A: In recent years, the Ministry of Finance has uncovered several large scale tax evasion schemes while conducting tobacco tax audits. As a result of these audits, there have been a number of large tobacco assessments which have proven to be problematic from a collectability standpoint. The increase of $58M above the 2015-16 Printed Estimates was primarily a result of these large tobacco tax assessments.

Q: Why is the Ministry of Finance seeking an increase of $13.2Million in its Bad Debt Expense allocation in 2016-17 (from $32Million to $45.2Million)?

A: The Ministry of Finance has uncovered several large scale tax evasion schemes while conducting tobacco tax audits. As a result of these audits, there have been a number of large tobacco assessments which have proven to be problematic from a collectability standpoint. It is anticipated that these assessments will continue in the 2016-17 year. These assessments will be uncollectible and as a result the ministry has requested a $13.2M internal ministry re-allocation to increase the Bad Debt Expense allocation in the 2016-17 estimates.

Q: How is Ontario supporting the sharing economy?

A: The government has taken action to begin supporting the development of a robust sharing economy, including announcing the creation of the Sharing Economy Advisory Committee, with representation from key ministries, to oversee the development and coordination of Ontario's approach to the sharing economy.

Further, in the 2016 Budget, the government announced a series of new measures, including:

- Working to ensure the province's auto insurance system can help provide peace of mind to those offering and using new types of transportation services through the sharing economy;
- Commencing consultation with industry and communities in spring 2016 on options to facilitate new and innovative choices for intercity passenger travel. The government will consult on a new regulatory regime to ensure safe and sustainable intercity passenger travel services;
- Piloting a program with Airbnb, a key sharing economy platform, to inform Ontarians who engage in home sharing about their consumer rights and responsibilities, and raise awareness of tax obligations; and

- Committing to consultations led by the Sharing Economy Advisory Committee, and focussed on the sharing economy, to help determine the best approach for Ontario moving forward.

Q: Why has the government introduced more red tape for estate representatives?

A: Following a 2011 Budget commitment to enhance EAT compliance, the Ministry of Finance (MOF) is collecting information needed to perform audits and verify that correct amounts of the tax have been paid. Effective January 1, 2015, estate representatives are required to submit an Estate Information Return with MOF to substantiate the total estate value provided to the courts. This new requirement does not alter the amount of tax payable or how the tax is calculated. An Estate Information Return is only required where an Estate Certificate has been applied for and issued by the courts.

Q: Has the government seen an increase in the Estate Administration Tax collected since January 1, 2015?

A: Tackling tax avoidance remains a key strategy as part of a robust and transparent administration process. The requirement to file an Estate Information Return (EIR) came into effect on January 1, 2015, for all applications made for an Estate Certificate on or after this date. Therefore, the first EIRs did not become due until the spring of 2015. In addition to verifying and auditing selected files, MOF continues to respond to written enquiries, telephone calls, and provide outreach activities to estate representatives and the legal profession to raise their awareness and understanding in meeting their obligations with respect to the Estate Administration Tax Act.

Q: What is the government doing to address Aggressive International Tax Planning?

A: All corporations should pay their fair share of taxes. That is why Ontario, in conjunction with the federal government, has taken substantive actions to help better address aggressive corporate tax avoidance. For example, under a fee-for-service agreement with the Canada Revenue Agency, Ontario invests in audit activities targeting aggressive international tax planning and the underground economy.

With Ontario's significant investment the Canada Revenue Agency was able to increase overall audit coverage rates, further reinforcing the integrity of the tax system. The government's agreement with the federal government to address non-compliance with federally administered provincial taxes through ongoing enhanced compliance-focused measures, including those that address the underground economy and aggressive tax planning has generated over $630M since 2013-14.

Q: What is Ontario doing to address the underground economy?

A: The government has made progress in fighting underground economic activities through:

Ongoing enhanced compliance-focused measures, including those that address the underground economy and aggressive tax planning, the Province has generated over $930 million to date - a $330 million increase over what was reported in the 2015 Budget;

Consultations with high-risk sectors, with a view to partnering with industry and gaining insight into how best to tackle the underground economy;

Requiring corporations to demonstrate federal and provincial tax compliance before receiving government contracts. Since February 2014, the government has verified compliance with tax obligations for more than 2,200 contracts; and

Amending the Taxation Act, 2007, to make the sale, use or distribution of electronic sales suppression devices an offence.

Taking specific actions in response to Parliamentary Assistant Laura Albanese's consultation with the residential construction industry, including:

Extending the residential roofing pilot project for an additional two years and examining opportunities to expand its scope beyond roofing to other areas of residential construction;

Launching a public awareness campaign to educate the public on the risks and potential liabilities associated with participation in the underground economy;

Dispatching specialized audit teams to focus on sectors that are at high risk of underground economy activity, in partnership with the Canada Revenue Agency;

Proposing legislation that would enhance information sharing, enable greater enforcement, and introduce additional penalties for participation in the underground economy; and

Helping home owners hire legitimate contractors when taking advantage of government-funded rebates for enhancing the energy efficiency of their homes.

ORPP ADMINISTRATION CORPORATION

Q: Why is the government providing the ORPP AC with a loan?

A: The ORPP AC is the independent, arms-length organization that will set-up and administer the ORPP.

The government is providing the ORPP AC with a repayable loan for essential work required to develop administrative systems, recruit a skilled team and launch the employer verification and enrolment process in 2017 and begin collection of contributions on January 1, 2018.

Ongoing costs to administer the ORPP would come from the plan, not from government revenues.

The ORPP AC is expected to repay the loan, with interest, from plan assets within a 10-year period.

Q: How much money is being loaned?

A: The government is providing flexibility for the ORPP AC to draw down based on operational requirements, up to $400M over three fiscal years. Costs would cover set-up expenses, including organizational start-up, development of tools/systems required for the verification and enrolment process, and the build/launch of administrative systems.

The government will monitor spending of the ORPP AC, while giving the Corporation the independence and flexibility it requires to administer the ORPP.

Accountability is at the core of the ORPP. Through a strong accountability and transparency framework, the independent Board of Directors and ORPP executives will be fully accountable to the plan's members. This framework has been benchmarked against the best practices of other leading independent pension plans.

Accountability measures include:

- An annual report tabled in the Legislature;
- Annual meetings for members;
- A publicly available Memorandum of Understanding; and,
- External auditing and strong financial controls.

Q: In the 2016/17 estimates, it shows a loan amount of up to $240M. How is that money going to be used?

A: This year (2016) is a critical period for the ORPP AC, with the launch of the employer verification/enrolment process and the building of systems needed to begin collecting contributions on January 1, 2018.

If pressed for more information: Further questions regarding ORPP AC expenditures can be directed towards the Administration Corporation.

ORPP IMPLEMENTATION SECRETARIAT

TOP 5 QAs

Q: How much has been spent on the ORPP Implementation Secretariat (ORPPIS) to date?

A: The Ministry is currently in the process of closing its books. The final expenditures for the ORPP IS will be included in the government's Public Accounts for 2015-16. The current $20M projection addresses costs associated with staffing and other related costs for the ORPP IS.

With regards to Other Direct Operating Expenditures (ODOE), the majority of expenses incurred by ORPP IS relate to the costs of services provided by third party vendors in areas where expertise external to government were required, such as actuarial analysis, legal advice and expert technical advice for the pension administration.

Approximately $5.5 million will be recovered from the Administration Corporation for expenditures directly related to the administration of the plan.

Q: Why does the Ministry's direct spending for ORPP decrease by $12.5M in 2016-17?

A: The Ministry, through the ORPP IS, continues to lead the implementation of the ORPP. Now that the ORPP Administration Corporation has been established, operational work has transferred to the Corporation, thus decreasing funding requirements for the Secretariat.

Funding for the ORPP IS in 2016-17 will support the development of regulations for the ORPP Act, 2016, as well as legislation to create the Office of the Chief Actuary and oversight responsibilities related to the ORPP Administration Corporation.

Q: Why is the government providing the ORPP AC with a $240M loan in 2016-2017?

A: The ORPP AC is the independent, arms-length organization that will set-up and administer the ORPP.

The government is providing the ORPP AC with a repayable loan for essential work required to develop administrative systems, recruit a skilled team and launch the employer verification and enrolment process in 2017 and begin collection of contributions on January 1, 2018.

Ongoing costs to administer the ORPP would come from the plan, not from government revenues.

The ORPP AC is expected to repay the loan, with interest, from plan assets beginning in 2019. The loan will be repaid by 2027.

If pressed about the terms of the loan:

The loan to the ORPP AC has been made on commercial terms. This includes the government's cost of borrowing plus a small margin of additional interest (25 bps).

Q: In total, how much is the government loaning the ORPP AC for set-up expenses?

A: The government is providing flexibility for the ORPP AC to draw down the loan based on operational requirements, up to $400M over three fiscal years. Costs would cover set-up expenses, including organizational start-up, the development of tools/systems required for the verification and enrolment process, and the build/launch of administrative systems.

The government will monitor the ORPP AC's spending, while giving the Corporation the independence and flexibility it requires to administer the ORPP.

Future administrative costs associated with the ORPP would be funded from member contributions and investment returns.

Q: In addition to the current costs and the loan to ORPP AC, how much money will it cost to implement the ORPP? Are we talking billions?

A: From the outset the government has said that it is committed to cost-effective and efficient administration of the ORPP that leverages existing expertise in Ontario's pension and financial services sector.

The ORPP AC will benchmark its administration costs to Canada's leading pension organization.

It would be premature to estimate the cost of implementing all components of the ORPP.

Q: Isn't the federal government helping to administer the ORPP?

A: The government is continuing to have discussions with federal government departments on the possibility of cooperation in administering the plan. This is in addition to the exploring and assessing different options, including leveraging infrastructure that exists within the Government of Ontario and exploring third-party private sector delivery through a procurement that is currently underway.

Running a modern pension plan is not simple and so the government continues to explore multiple options. In fact, it may make sense to work with several partners to support effective administration of the plan.

Q: Who pays for the ORPP start-up costs if the CPP is enhanced and the plan is never implemented?

A: The government's intention is that eligible start-up costs it incurs would be recovered from the plan.

If those circumstances arise, however, it means that there is an agreement on a CPP enhancement that will address the retirement security challenges facing Ontarians. That has always been the government's objective.

By continuing with preparations for the ORPP, the government is ensuring that, if no consensus on CPP enhancement is reached, retirement security can be strengthened in Ontario through the ORPP.

Loan Agreement with the ORPP Administration Corporation

Q: How much money is being loaned?

A: The government is providing flexibility for the ORPP AC to draw down based on operational requirements, up to $400M over three fiscal years. Costs would cover set-up expenses, including organizational start-up, development of tools/systems required for the verification and enrolment process, and the build/launch of administrative systems.

The government will monitor spending of the ORPP AC, while giving the Corporation the independence and flexibility it requires to administer the ORPP.

Accountability is at the core of the ORPP. Through a strong accountability and transparency framework, the independent Board of Directors and ORPP executives will be fully accountable to the plan's members. This framework has been benchmarked against the best practices of other leading independent pension plans.

Accountability measures include:

- An annual report tabled in the Legislature;
- Annual meetings for members;
- A publicly available Memorandum of Understanding; and,
- External auditing and strong financial controls.

Q: In the 2016/17 estimates, it shows a loan amount of up to $240M. How is that money going to be used?

A: This year (2016) is a critical period for the ORPP AC, with the launch of the employer verification/enrolment process and the building of systems needed to begin collecting contributions on January 1, 2018.

Q: How much of the loan has been drawn down to date? What has that money been used for?

A: $26 million has been drawn down to date.

The money has been used to fund essential start-up requirements for the ORPP AC. This includes contracts for expert services required to administer and operationalize the ORPP (e.g. organizational start-up, legal services, technical experts) and initial recruitment of staff.

Q: Is this money being spent on high salaries? What is the compensation framework for the ORPP AC?

A: The independent initial board of directors of the ORPP AC is responsible for establishing the Corporation's compensation framework.

Salaries would be benchmarked to other leading pension plans in Ontario to ensure that the ORPP AC is able to recruit essential talent.

The compensation of the top five executives, including the CEO, will be reported on an annual basis in the ORPP AC's Annual Report. This is in line with the best practices of Ontario's leading pension plans.

If pressed for more information: The ORPP AC has hired external advisors to assist with the compensation framework.

Q: Does the government expect to be repaid?

A: Yes, the repayable loan is structured on commercial terms. This means that it includes repayment obligations, with interest, over an established period of time.

Q: What would be the cost to government if the ORPP is cancelled after it launches?

A: The government is providing flexibility for the ORPP AC to draw down the loan based on operational requirements, up to $400M over three fiscal years. Costs would cover set-up expenses, including organizational start-up, development of tools/systems required for the verification and enrolment process, and the build/launch of administrative systems. Future ORPP administration costs would be funded from member contributions and investment returns.

The government's intention is that all eligible start-up costs it incurs would be recovered from the plan. The level of contributions collected, benefits owed and investment returns at the time of cancellation will determine the net cost of the cancellation.

Q: How is the repayment schedule structured? Will it be charged interest?

A: The ORPP AC has an obligation to repay the loan, principal and interest, within ten years.

This repayment period will help ensure that payments do not negatively impact plan sustainability. It is intended that the ORPP AC repay the loan from investment returns to make sure that contributions and benefits are reserved in trust for members.

Q: Why doesn't the ORPP AC get a traditional bank loan?

A: The repayable loan is structured on commercial terms. This was the appropriate vehicle given the ORPP AC would not have assets until contributions begin in 2018.

Q: Will there be any public reporting or accountability to how the loan is spent?

A: The loan to the ORPP AC is structured on commercial terms and will be repaid with interest. Actual expenditures from the loan will be reported through public accounts.

In addition, the ORPP AC is required to develop and publicly release an annual report, which would include financial statements of the Corporation. The report will also include compensation for the top five executive positions.

Accountability is at the core of the ORPP. Through a strong accountability and transparency framework, the independent Board of Directors and ORPP executives will be fully accountable to the plan's members and to government. This framework has been benchmarked against the best practices of other leading independent pension plans.

Q: What types of costs will the loan be used to pay?

A: The repayable loan will be used to fund set-up expenses, including organizational start-up, development of tools/systems required for the verification and enrolment process (e.g. software licencing, hardware and technical writing), and the build and initial operation of administrative systems.

The loan will not be used to fund ongoing plan operations or investments.

Q: How much money has the ORPP AC spent on the services of consultants?

A: The ORPP AC has obtained expert services required to administer and operationalize the ORPP (e.g. organizational start-up, legal services, technical experts).

The government and the ORPP AC are committed to leveraging the expertise and experience of the industry and the financial sector to deliver a simple, reliable and cost-effective plan.

If pressed for more specifics: The ORPP AC procures goods and services based on a policy that was benchmarked against government and other leading pension plans.

Q: How does the loan relate to administration costs of the ORPP?

A: The ORPP will be one of the largest pension plans in the Canada. At maturity, the ORPP is expected to have over 4 million members, involve nearly 450,000 employers and collect more than $6 billion annually.

The government is committed to a simple, reliable and cost effective administration. This includes leveraging the strong, existing capabilities found in Ontario's pension and financial services sector and benchmarking ORPP administration costs against Canada's leading pension organizations.

We are continuing to have discussions with federal government departments on the possibility of cooperation in registration and administering the plan. This is in addition to the exploring and assessing different options, including leveraging infrastructure that exists within the Government of Ontario and exploring third-party private sector delivery.

Q: What is the ORPP Administration Corporation?

A: The ORPP Administration Corporation is the independent, arm's length organization that will administer the ORPP. Its responsibilities include:

- Enrolling eligible employers and employees;
- Collecting, investing and holding contributions in trust for members;
- Administering benefits; and
- Communicating with employers, members and other beneficiaries.

Q: What are the accountability mechanisms of the ORPP Administration Corporation? To whom does it report?

A: Accountability is at the core of the governance structure of the ORPP Administration Corporation. Through a strong accountability and transparency framework, the independent board of directors and ORPP executives will be fully

accountable to the plan's members. This framework mirrors the best practices of other leading independent pension plans.

Accountability measures include:

- A Memorandum of Understanding being developed between the ORPP Administration Corporation and the Minister of Finance
- An annual report;
- An annual meeting for beneficiaries;
- External auditing and strong financial controls; and
- A review of the governance framework established by legislation within 10 years.

ORPP Implementation Secretariat

Q: Why is the ORPP IS still in place now that the ORPP AC has been established?

A: The Ontario Retirement Pension Plan Implementation Secretariat leads the policy, governance and legislative functions to establish the ORPP and supports the set-up of the ORPP AC.

Specific responsibilities include:

- Finalizing the plan design for the ORPP, including conducting analysis, developing policy options, preparing the plan text, developing a funding policy, conducting actuarial analysis, and drafting legislation.
- Leading discussions between governments with respect to ORPP implementation, including registration of the plan, data sharing agreement, and exploration of options for administration cooperation.
- Establishing and supporting the ORPP AC to ensure successful launch and implementation.
- Providing strategic communications and stakeholder engagement advice and services to support ORPP development and implementation.
- Developing an oversight function related to the ORPP, including monitoring progress of deliverables and achievements.

Q: Why did the government spend an additional $6 million than was estimated last year? Is this another example of the government overspending on consultants?

A: Implementing the ORPP is one of the government's top priorities and involves very aggressive timelines. The government continues to drive forward plan implementation to ensure this priority is delivered in timely manner. Implementation activities include acquiring third party vendors to deliver expert services in the areas of actuarial analysis, legal advice and expert technical advice for the pension administration.

Timely and thoughtful procurement of these services is critical to ensure all milestones are met and registration of employers can begin in 2017. The costs associated with operational procurements will be reimbursed by the ORPP AC.

Approximately $5.5 million will be recovered from the Administration Corporation for expenditures directly related to the administration of the plan.

Federal Collaboration

Q: On one hand you say you are launching the ORPP in 2017, but then indicate that the collection of contributions won't start until 2018…which is it?

A: The ORPP implementation timeline has being modified. Employer verification will begin later in 2016 with enrollment of employers beginning in January 2017. This process will support a seamless transition to the collection of contributions starting on January 1, 2018 for large and medium size employers.

All other implementation dates remain the same. Contribution rates for employers without a registered pension plan will still be phased in as previously announced.

Many employer groups have called on the government to delay the launch of the plan to ensure a successful and smooth implementation, and allow a window to discuss a national solution. The government has modified the ORPP timelines to reflect this advice.

The government is on track to ensure that all eligible Ontario workers are enrolled in a comparable workplace plan or the ORPP by 2020.

ORPP Phase-In and Contribution Schedule (rates reflect contributions to be made by each employer and employee) Employer registration in the ORPP would begin on January 1, 2017.				
Type of Employer	Jan 1, 2018	Jan 1, 2019	Jan 1, 2020	Jan 1, 2021
Wave 1: large employers without registered workplace pension plans	**0.8%**	**1.6%**	**1.9%**	**1.9%**
Wave 2: medium employers without registered workplace pension plans	**0.8%**	**1.6%**	**1.9%**	**1.9%**
Wave 3: small employers without registered workplace pension plans	**0%**	**0.8%**	**1.6%**	**1.9%**
Wave 4: employers with registered pension plans that either do not meet the comparability test or do not cover all classes of employees	**0%**	**0%**	**1.9%**	**1.9%**

Q: Is the federal government committing to administer your plan if CPP talks fail?

A: Ontario is pleased with the cooperation and partnership it has received from the new federal government. They have agreed to facilitate ORPP plan registration and to enter into a data sharing agreement to support implementation. The federal government has also committed to working with Ontario to ensure effective plan administration.

Ontario has always stated that it is committed to a simple, reliable and cost effective administration of the ORPP. Partnering with the federal government on plan registration, data sharing, and exploring models of plan administration supports this objective.

However, running a modern pension plan is not simple and so other options for administration are being explored including within the broader public sector and in partnership with private sector vendors. In fact, it may make sense to work with several partners to support effective administration of the plan.

Q: Would Ontario support a CPP enhancement that is a universal program to all employers and employees?

A: In designing the ORPP it was clear that, even though two thirds of Ontarians are not members of a workplace pension plan, many employers do provide generous workplace pension plans.

With this in mind, the government developed the framework of a comparable plan – so that employers that provide a generous workplace pension plan would not be

required to contribute to the ORPP. This is a central part of the ORPP and reflects the objective of introducing the ORPP in a manner that doesn't adversely impact generous workplace pension plan arrangements that are already working well for employees and employers.

The Province's extensive consultations in developing the ORPP have helped to inform its view that a CPP enhancement must be timely and provide a level of adequacy and targeted coverage that is consistent with the ORPP. Ontario is bringing this insight to the national discussion.

The province is also listening to the federal government and the other provinces and territories, and reflecting on their perspective on a CPP enhancement.

Q: If the government is going to proceed with measures such as introducing legislation on ORPP plan design, are you even serious about discussing the CPP?

A: The government has always said a national solution to enhancing retirement security is the best way forward. It has also said that it is imperative to address the challenge of retirement security ***now***. It is a critical issue for the future well-being of Ontarians and the economy that cannot be delayed.

Minister Morneau has outlined an aggressive timeline to enhance the CPP, including achieving a consensus to move forward by June and a national agreement by the end of 2016. The province looks forward to these discussions.

Legislation

Q: What progress has the government made on the ORPP to date?

A: The government is on track to meet its objective that, by 2020, all eligible Ontario workers are covered by a comparable workplace plan or the ORPP.

The ORPP Administration Corporation is now established and the process to register the plan with the Canada Revenue Agency is well underway. Final elements of plan design will be enshrined in legislation this spring. 6.

Employer verification will begin later in 2016 with enrollment of employers beginning in January 2017. This process will support a seamless transition to the collection of contributions starting on January 1, 2018 for large and medium size employers. The additional time is also enabling national discussion on a CPP enhancement to proceed.

Q: Why introduce legislation now? Didn't you commit to ongoing national discussions on a CPP enhancement?

[Legislation tracking to be introduced April 14, 2016]

A: The government has been clear that about the need to enhance retirement security today. The problem cannot be left to some ambiguous future date. It is critical for the well-being of Ontarians and the economy that we take action now.

Ontario moved to create the ORPP after the previous federal government refused to discuss enhancing the CPP. Today, the circumstances have changed and Ontario is playing a leading role in discussing a national solution.

However, to successfully launch the ORPP plan preparations must continue alongside federal discussions to ensure that, no matter the outcome, Ontario will retire with enhanced security.

Moving forward with legislation will ensure that employers have the time they need to prepare for the ORPP.

Q: What will be included in upcoming legislation?

A: The government intends to introduce further legislation on the ORPP in the spring of 2016. The legislation will set out the comprehensive requirements of the ORPP, plan sustainability and the compliance and enforcement regime.

Further legislation in 2016 would establish an Office of the Chief Actuary to provide independent actuarial advice and valuations of the ORPP to government and the ORPP Administration Corporation.

Plan Sustainability

Q: What accountability mechanisms exist to ensure that plan members' benefits will be there for them when they retire?

A: Through extensive actuarial modelling, the government has designed the plan to be sustainable over the long term. To ensure continued plan sustainability, a formal funding policy would be established that provides for appropriate adjustments to be made to plan benefits and/or contributions.

Background

Q: What is the Ontario Retirement Pension Plan (ORPP)?

A: The ORPP is a mandatory provincial pension plan that is scheduled to launch on January 1, 2017, with employer and employee collections beginning in 2018.

The ORPP would:

- Include eligible employees who are employed in Ontario and not participating in a comparable workplace pension plan;
- Aim to replace 15 per cent of an individual's pre-retirement earnings up to maximum earnings threshold of $90,000 (in proposed 2017 dollars);
- Require eligible employers and employees each to contribute up to 1.9% of employee earnings
- Require benefits to be earned as contributions are made; and
- Be managed by the ORPP Administration Corporation – an independent, arm's length entity, which will be responsible and fully accountable for administration and investment in the best interest of plan members.

Q: Why is the ORPP needed?

A: Experts generally recommend that individuals aim to replace 50-70% of their pre-retirement income to maintain their standard of living in retirement. However, studies show that a significant number of Ontarians are concerned they will not have sufficient income in retirement.

Two-thirds of Ontario's workers do not participate in a workplace pension plan. Moreover, three-quarters of younger workers – aged 25 to 34 – do not participate in a workplace pension plan.

Q: What are the anticipated impacts of the ORPP on Ontario's economy?

A: The government commissioned the Conference Board of Canada to conduct a cost-benefit analysis on the economic impact of the ORPP that was tabled in the legislature in December. The report's conclusion is clear – accounting for all factors and opportunity costs, both consumers and the economy are better off under the ORPP. This is good news for Ontarians.

The report reiterates that in the long-term, the ORPP is expected to add over $39 billion to Ontario's economy by ensuring that future retirees have adequate retirement savings. It also notes the ORPP is a more cost-effective means of helping individuals save than traditional retirement savings vehicles.

The report does acknowledge a small, short-term impact to the economy. However, this impact is partially mitigated by reductions in employment insurance and WSIB premiums. As well, the government remains committed to taking measures today to strengthen the economy.

ORPP Advertising and Market Research Costs

Q: Why is the Government advertising the Ontario Retirement Pension Plan?

A: The ORPP is intended to provide a predictable source of retirement income for life, for millions of Ontarians. By 2020, every employee in Ontario will be part of either the ORPP or a comparable workplace pension plan.

The ORPP is a key pillar of the government's economic plan. It is important that Ontarians know where to get the most up-to-date information on the plan.

There is a lot of work that needs to happen between then and now. To build awareness of the ORPP ahead of its launch in January 2017, we have recently released ads about the ORPP on TV radio and digital platforms.

The government has a responsibility to raise awareness and communicate information about its programs and services.

These ads are meant to increase Ontarian's awareness of the ORPP, drive them to http://www.ontario.ca/orpp for more information and answer questions about the design and implementation of the plan.

Q: In 2015-16, how much did the ministry spend on the ORPP campaign (including advertising, marketing and market research)?

A: In total, $6,614,987 was spent on the ORPP advertising campaign. Of this figure, $1,770,067 was spent on agency fees.

Media buying costs totalled $4,689,080. This amount will be recouped through the Bulk Media Buy. In total, $155,840 was spent on market research to provide benchmarking and tracking data, as well as creative feedback and insights for advertising and marketing purposes.

ONTARIO FINANCING AUTHORITY

Q: How does the Province plan to reduce its net debt-to-GDP ratio to its pre-recession level of 27 per cent?

A: Debt is incurred primarily for two reasons: to finance deficits and invest in capital assets. Ontario is making public infrastructure investments of more than $137 billion over the next 10 years, or about $160 billion over 12 years, starting in 2014–15.

One of the objectives of investment in capital is to improve the economic growth of the Province, supplementing GDP growth. As a result, the net debt-to-GDP ratio will come down more quickly than it would have without these investments in capital assets.

The government's plan therefore hinges on first balancing the budget, and continuing to make investments in capital assets which will add to economic growth, resulting in GDP growing more quickly than debt, and lowering the net debt-to-GDP ratio to our 27 per cent target.

Q: Ontario's debt has more than doubled since Premier McGuinty was first elected. When interest rates begin to rise, won't interest costs displace spending on the Government's priorities?

A: Ontario has a realistic plan to balance its budget while investments are made in the priorities of Ontario families – health care, education, the environment and infrastructure.

Investor demand has allowed the Province to extend the term of its debt in recent years and lock in low interest rates for a longer period. This term extension reduces the Province's refinancing risks and helps offset the impact of expected higher interest rates on its IOD costs. Since 2010, the province has borrowed $53.5 billion in the 30-year term.

The 2010 Budget forecasted that, by 2016–17, the Province would have to spend 11.7 cents of every revenue dollar received on interest. The current forecast is 2.7 cents lower, at 9.0 cents of interest costs for every dollar of revenue. This ratio is lower than it was in the 1990s, and is forecast to remain lower through the outlook period in 2018–19.

Q: How will the credit rating agencies respond to the 2016 Budget?

A: Ontario currently maintains a double-A rating with three of its four credit rating agencies. Ontario continues to outperform its deficit projections and is on track to a balanced budget by 2017–18. Moreover, Ontario's net debt-to-GDP ratio is expected to peak in 2015–16 at 39.6 per cent, remain unchanged in 2016–17, decline to 38.9 per cent in 2017–18 and 38.5 per cent in the 2018–19.

We met with the rating agencies following the 2016 Budget and expect to hear back from them over the next few months.

CORPORATE ELECTRICITY FINANCE DIVISION

Trillium Trust

Q: What's the current status of the funds in the Trillium Trust?

A: The Public Accounts of Ontario 2014-2015, published in September 2015, show that $1.35 billion has been dedicated to the Trillium Trust.

These are the net proceeds from the sale of the Province's remaining General Motors common shares in early 2015, combined with net proceeds from a September 2013 GM share sale and the redemption of preferred shares in late 2014.

Under the Trillium Trust Act, Hydro One shares have been designated as assets for which the net revenue gains from a sale are dedicated to the Trillium Trust. Once the Province has received all of the final financial inputs to fully assess and account for the net revenue gains associated with the Hydro One IPO, it will introduce a regulation to designate the net gain amount from the Hydro One IPO to be dedicated to the Trust and prescribe the other net revenue benefits resulting from Hydro One's recognition of a deferred tax benefit, to be dedicated to the trust.

Q: Since the Hydro One IPO was completed several months ago and now the government has announced a secondary share offering, why haven't you made any regulations to dedicate the fiscal benefits of the Hydro One IPO to the Trillium Trust? When will you make these regulations and when will we see these amounts in the Trillium Trust?

A: Under the Trillium Trust Act, Hydro One shares have been designated as assets for which the net revenue gains from a sale are dedicated to the Trillium Trust.

The determination of the net revenue gains related to the Hydro One IPO depends in part on Hydro One's audited, year-end financial statements. Hydro One released its 2015 Annual Financial Statements on February 12, 2016. Once the Province has received the financial information to fully assess and account for the net revenue gains, including the determination of a deferred tax benefit impact on the Province's net revenues, it will introduce regulations to designate the amounts to be dedicated to the trust.

Q: Why have no amounts been spent from the Trillium Trust yet, not even from the GM share gain amounts from 2014-15? And why are there only $1,000 in placeholder expenditure numbers for the Trillium Trust lines in Estimates?

A: The Province is on track to generate $5.7 billion in net revenue benefit from asset optimization to be dedicated to the Trillium Trust to help support investments in transit, transportation and other priority infrastructure projects under the $31.5

billion Moving Ontario Forward initiative over 10 years to create jobs, boost productivity and revitalize communities.

Like most large infrastructure investments, initial spending on Moving Ontario Forward projects such as GO Regional Express Rail is focused on planning, design, property acquisition and other activities to get projects construction-ready. The government plans to begin drawing down on the balance in the Trillium Trust starting in 2016-17, as it is expected that spending will ramp up significantly once this preliminary work is completed and construction activity is underway. This will allow for identification for cash flow timing requirements from the Trillium Trust during 2016-17 and subsequent years.

Q: When will the government actually be able to start using funds from the Trillium Trust to pay for transit and infrastructure?

A: The government plans to begin drawing down on the balance in the Trillium Trust in 2016-17 to support the largest investment in public infrastructure in Ontario's history. As the Moving Ontario Forward initiative was announced prior to Budget 2014, with incremental transit, transportation and other priority infrastructure projects, the expected timeframe for expenditures for these projects and drawdowns from the Trillium Trust are expected to happen over time, starting in 2016-17.

Based on planned expenditures, in 2016-17 the Trillium Trust would support Moving Ontario Forward initiatives, such as

- Regional Express Rail (RER);
- Hurontario Light Rail Transit (LRT); and
- Ontario Community Infrastructure Fund.
- *Asset Optimization*

Q: How much was raised from the Hydro One IPO?

A: From the November 2015 IPO and related share sales, the Province raised about $1.9 billion in gross proceeds before expenses and fees.

- In the November 2015 IPO, the Province sold 89,250,000 common shares at the IPO price of $20.50 per share for total gross proceeds to the Province of approximately $1.83 billion.
- Including other related share sales at the IPO price, the gross proceeds were $1.9 billion, including approximately $116 million in gross proceeds from shares sold to separate trusts established respectively by the Power Workers' Union (PWU) and the Society of Energy Professionals (SEP).

The determination of the net revenue gains from the gross proceeds depends on the finalisation of the book value of the shares sold at the time of the IPO and expenses and fees related to the IPO. The net gain from the November 2015 share sales is currently estimated at about $0.8 billion.

There are other associated benefits, aside from the sale of shares.

- An expected revenue benefit to the Province due to the revaluation of its fixed assets as a result of the IPO, resulting in Hydro One recognizing a deferred tax benefit. Based on the Prospectus, the Province communicated that it expected to realize a benefit of about $2.2 billion, which is subject to update and finalisation in Public Accounts.

- The Province also received cash (non-revenue benefits) of $1 billion in special payments from Hydro One, including $800 million in a special dividend paid prior to the IPO, and about $200 million in additional payments in lieu of taxes to the Ontario Electricity Financial Corporation (OEFC).

Q: What amount of proceeds will the Province receive from the secondary offering?

A: In this secondary offering, the Province has offered about 72.4 million common shares, or about 12 per cent of the common shares, at $23.65 per share, for total gross proceeds of approximately $1.7 billion

The Province has granted an option to the underwriters to purchase up to an additional approximately 10.86 million common shares, or just under 2 per cent of the common shares, which if exercised in full, would result in total gross proceeds of approximately $2 billion.

If the overallotment option is exercised in full, the Province will have sold 14% of its shares outstanding in this offering.

The government is committed to dedicating the net revenue gains from the secondary offering to the Trillium Trust. The *Trillium Trust Act, 2014* ensures that all net revenue gains from the sale of Hydro One shares will be credited to the Trillium Trust for investments in priority infrastructure projects.

[Net proceeds are currently estimated at about $0.5 billion based on the about 12% of shares offered in the base amount. If the over-allotment is fully exercised, the net proceeds are estimated at about $0.6 billion.]

Q: What was the process involved in selecting the underwriters involved for the secondary offering

A: RBC and Scotiabank were chosen as the co-lead underwriters for the secondary offering. These same two firms were chosen to lead the IPO underwriting through

a competitive and transparent process, overseen by Denis Desautels, the former Auditor General of Canada.

The price discount offered by the underwriters to purchase shares from the Province through the "firm commitment offering" was also very competitive, representing an approximate 2% discount compared to the closing trading price of Hydro One shares on April 5th. Underwriting fees of 1% for institutional investors and 3% for retail investors is significantly lower than what underwriters have typically earned on firm commitment offerings and consistent with the fees earned in the Initial Public Offering.

- Impact on Electricity Sector Dedicated Income

Q: Why is the interim Electricity Sector Dedicated Income (ESDI) $0 in 2015-16, and why is the forecast so low for ESDI in the 2016-17 Printed Estimates? Is this because of the Hydro One IPO reducing the Province's future revenues from Hydro One and reducing the amounts to pay for stranded debt?

A: The Hydro One IPO resulted in a significant upfront reduction in the stranded debt of the electricity sector.

For the year ended March 31, 2016, the IPO resulted in very large upfront payments to the Ontario Electricity Financial Corporation (OEFC) towards stranded debt. This included a total of $2.8 billion in departure tax and additional payments-in-lieu of taxes (PILs) paid by Hydro One to OEFC.

As these large amounts were expenses to Hydro One, they had a dollar-for-dollar impact on reducing Hydro One's estimated net income for 2015-16, partially offset by the deferred tax benefit impact on the Province's net income from Hydro One.

Because of these large payments to OEFC, this resulted in an estimated zero Electricity Sector Dedicated Income transfer to OEFC, as the combined net income of OPG and Hydro One to the Province was estimated to fall short of the about $520 million in annual interest expense.

Under the Electricity Sector Dedicated Income, the Province has been dedicating the cumulative combined net income of OPG and Hydro One in excess of the Province's interest cost of its investment in these companies (about $520 million annually, prior to the Hydro One IPO) to OEFC.

As the ESDI commitment is calculated on a cumulative basis over time, the estimated shortfall in the combined net incomes of OPG and Hydro One in 2015-16 compared to the about $520 million in the Province's financing costs, reduces the estimated Electricity Sector Dedicated Income in 2016-17 [and potentially in future years], until the past shortfall is offset by the combined net incomes going forward from 2015-16.

The actual ESDI amounts for 2015-16 and 2016-17 is subject to finalisation, including the actual financial performances of OPG and Hydro One in 2015-16 and 2016-17, and will be reported in OEFC's annual financial statements and Public Accounts.

[Note: For the 2015-16 Printed Estimates, the ESDI was positive, as the projected ESDI did not build in the potential impact of the broadening of Hydro One ownership due to the commercial and market sensitivity of the estimated impacts on Hydro One of the expected departure tax. The potential impact of the broadening of Hydro One ownership was built into the asset optimization component of the Sales and Rental revenue line.]

RE: FAO Information Request FA1715-02: Follow-up analysis of the Financial Impact of the Partial Sale of Hydro One

Dear Deputies Thompson and Angus, and Mr. Mayman:

Thank you for your response to our initial request for information to support the analysis on the financial impact of the partial sale of Hydro One (please see Attachment 3 for more information on the project). Further to that request, I have identified the Ontario Electricity Financial Corporation (OEFC) and the Trillium Trust for further analysis.

Specifically, I am seeking more information about the impact of certain transactions on OEFC's financial statements. I am also requesting information about future balances of the Trillium Trust.

I request that your ministries and agency provide me with the following information, which I consider necessary to perform my duties under the FAO Act, as required by subsection 12(1) of the FAO Act:

- Please complete the enclosed Excel spreadsheet "Cover spreadsheet" in Attachment 1. Please provide the information specified in the enclosed Word document "Information

request" in Attachment 4.

- If you believe that some or all of the requested information falls under the Cabinet records exception under subsection 12(2) of the FAO Act and that Cabinet has not consented to provide that information to the FAO in the Cabinet records order-in-council (OC 1412/2016, Attachment 2), please describe the information in the Cover spreadsheet (Attachment 1) and explain why you believe the exception prevents you from providing me with the information.

- If you believe that some or all of the information that you are providing in response to this request is subject to the disclosure restrictions under the Cabinet records order-in-council (OC 1412/2016, Attachment 2), please clearly identify the information in question.

- If you believe that some or all of the requested information is personal information and/or personal health information exceptions under subsection 12(3) of the FAO Act, please describe the information in the Cover spreadsheet (Attachment 1), and explain why you believe that exception applies and why you have been unable to redact the information in accordance with subsection 12(4) of the FAO Act.

- If you believe that some or all of the information that you are providing in response to this request is subject to the disclosure restrictions in paragraphs 2, 3 and/or 4 of section 13 of the FAO Act, please clearly identify the information in question and in the Cover spreadsheet (Attachment 1), identify which condition applies, citing the specific provision of the *Freedom of Information and Protection of Privacy Act*.

  If the restriction is intended to protect the interests of other public institutions, governments, third parties and/or legal privilege holders, please specifically identify any institutions, governments, third parties and/or legal privilege holders whose interests would be affected by the disclosure of the information.

I would appreciate if you could provide me access to this information on or before November 1, 2017.

I have enclosed the *Guide to Responding to Information Requests from the FAO,* including the Cabinet records order-in-council, (Attachment 2) to assist you with responding to this information request.

If you fail to comply with this information request, whether by failing to respond in a timely manner or by refusing to provide information without explaining which exception applies or by citing disclosure

restrictions without explaining which restriction applies, I will inform the minister responsible for your ministry or agency.

If the minister is unable to resolve the matter, I may exercise my power under subsection 12(5) of the FAO Act to notify the Speaker of the Legislative Assembly and the chair of the Standing Committee on Finance and Economic Affairs of your failure to comply with this information request.

Please note that the cover letter accompanying your response to this request will be posted on the FAO website, but any attachments will not.

Should you or your staff have any questions about this information request, I would ask that you contact Matthew Stephenson, who can be reached directly at mstephenson@fao-on.org or by phone at 416-550-9430.

I would like to thank you for your assistance in this matter. My primary objective is to provide timely and relevant economic and financial analysis to the Legislative Assembly. My ability to do so depends on your providing me free and timely access to the information held by your ministry that is necessary for me to perform my duties. By providing me with this information, you are assisting me in better serving the needs of all MPPs.

Sincerely,

The Honourable J. David Wake
Temporary Financial Accountability Officer

If not provided, indicate reason (three options are available) and provide explanation in column H -cabinet record not authorized to be released by OC 1412/2016 -personal information (which could not be redacted) -personal health information (which could not be redacted)	If provided, is the information a Cabinet Record (Y/N)?	If provided, is the record public (Y/N)?	If provided and record is not public, does any condition listed in s. 13 (items 2 to 4) of the FAO Act prevent the public disclosure of the information (Y/N)? (see Info Request Guide fo assistance*)	Explanation

Guide to Responding to Information Requests from the Financial Accountability Officer of Ontario

Purpose of this Document

This guide has been developed to aid ministries and public entities in preparing responses to information requests from the Financial Accountability Officer of Ontario (FAO). This guide is not a substitute for the *Financial Accountability Officer Act, 2013* (FAO Act) and the Cabinet records order-in-council (OC 1412/2016 –attached for reference). The FAO Act and the order-in-council should be reviewed before responding to requests from the FAO.

Questions and Answers

1. Under what authority is the FAO making this information request?

Under subsection 12(1) of the FAO Act, ministries and public entities have the duty to provide the FAO with information in their custody or under their control that the FAO believes to be necessary to perform his duties.

2. What information needs to be provided?

You must provide all financial, economic or other information that is in your ministry's or public entity's custody or control that the FAO believes to be necessary to perform his duties. Please review the information request carefully in determining which records are responsive. In responding to the information request please complete the cover spreadsheet provided, listing all the responsive records with a description of each record.

3. What is the deadline?

All information requests have a deadline included in the cover letter and on the attached information request itself.

4. What if our ministry or public entity cannot meet the deadline?

If your ministry or public entity cannot meet the deadline set out in the request, please notify the FAO contact identified in the information request and request an extension. The FAO will not unreasonably withhold extensions.

5. How should the information be transmitted to the FAO?

Non-confidential information may be transmitted to the FAO by e-mail. The FAO contact identified in the information request should be copied.

Confidential information should be transmitted securely. Please speak to the FAO contact to arrange for secure delivery.

6. In what format should I provide information to the FAO?

To the extent possible, information should be provided in machine-readable format such as Microsoft Word or Excel or files readable with this software. PDF is acceptable when machine readable formats are not available.

7. What if I don't understand what is being requested?

If you do not understand what information is being requested or require any clarification, please speak to the FAO contact identified in the information request. The FAO contact would be happy to provide clarification and explanation.

8. What if the information being requested does not exist within my ministry or public entity?

Please indicate in your response that no records exist that would respond to the request. If possible, please provide information on which ministry or public entity has custody or control of, or might have custody or control of, a particular record.

9. What if the information requested requires my ministry or public entity to incur costs?

Under subsection 12(1) of the FAO Act, all information must be provided free of charge.

10. When can/must information be withheld from the FAO?

There are only three limited circumstances in which a ministry or public entity cannot provide information to the FAO:

- the information is contained in a Cabinet record which Cabinet has not consented to provide to the FAO (subsection 12(2) of the FAO Act, section 12 of the *Freedom of Information and Protection of Privacy Act* and OC 1412/2016);

- it is personal information within the meaning of the *Freedom of Information and Protection of Privacy Act* (see subsection 12(3) of the FAO Act); or

- it is personal health information within the meaning of the *Personal Health Information Protection Act, 2004* (see subsection 12(3) of the FAO Act).

Subsection 12(4) of the FAO Act requires that ministries and public entities take reasonable steps to redact personal information and personal health information from their responses to FAO requests in order to maximize the information they can provide.

Cabinet has consented for ministries and public entities to provide the FAO with certain information contained in Cabinet records (OC 1412/2016). The order-in-council has the effect of narrowing the application of the Cabinet records exception in subsection 12(2) of the FAO Act. As a result, you must provide information contained in Cabinet records that is necessary for the performance of the FAO's duties provided that:

- The information is not available from other sources (please indicate the other source where possible);

- The decision to which the information relates has been made by Cabinet or one of its committees and publicly announced, even if Cabinet or one of its committees could engage in further deliberation about the decision;

- The information is not:

    - An agenda of Cabinet or one of its committees;

    - A minute of Cabinet or one of its committees, unless the minute is the only source of the information;

    - Policy or costing options or recommendations, unless the option or recommendation was selected by Cabinet or one of its committees;

    - The substance of deliberations of Cabinet or one of its committees concerning those options and recommendations, other than deliberations related to the option or recommendation selected that would be apparent from its disclosure;

    - Information concerning the individual opinions of Cabinet ministers;

    - A communications plan, stakeholder management plan, key messages or other communications materials;

    - Draft legislation or regulations, unless approved by Cabinet or one of its committees.

Should one of these three circumstances affect a record that is responsive to an FAO information request, please identify which of the three circumstances applies and explain why you believe it applies in the cover spreadsheet provided, listing all the responsive records with a description of each record. In the case of the personal information or personal health information exceptions, please explain why you believe that exception applies and why you have been unable to redact the information in accordance with subsection 12(4) of the FAO Act.

11. Can I withhold from the FAO commercially sensitive information?

No. Commercial sensitivity is not a valid justification for withholding information from the FAO. The only valid justifications for refusing to provide information to the FAO are the Cabinet records, personal information and personal health information exceptions set out in subsections 12(2) and (3) of the FAO Act (see Question 10 for more details).

12. Do I have to provide to the FAO information that has not been publicly released?

Yes. Not having been released publicly is not a valid justification for withholding information from the FAO. The only valid justifications for refusing to provide information to the FAO are the Cabinet records, personal information and personal health information exceptions set out in subsections 12(2) and (3) of the FAO Act (see Question 10 for more details).

13. Do I have to provide information subject to solicitor-client privilege, litigation privilege and/or settlement privilege to the FAO?

Yes. The only valid justifications for refusing to provide information to the FAO are the Cabinet records, personal information and personal health information exceptions set out in subsections 12(2) and (3) of the FAO Act (see Question 10 for more details).

However, please note that the disclosure of information subject to solicitor-client privilege, litigation privilege and/or settlement privilege does not constitute a waiver of those privileges by virtue of subsection 12(6) of the FAO Act.

14. What happens if our ministry/public entity fails to comply with a request?

If the FAO is of the opinion that a ministry or public entity has failed to comply with an information request, the FAO will notify the deputy minister or head of the public entity in writing providing details of the non-compliance. The ministry or public entity will have a second opportunity to comply with the request.

Should the ministry or public entity fail to do so, the FAO may notify the minister responsible and the head of the public entity (if applicable). If the matter is not resolved in a timely manner, the FAO may then notify the Speaker of the Legislative Assembly and the Chair of the Standing Committee on Finance and Economic Affairs under subsection 12(5) of the FAO Act.

15. What happens if our ministry/public entity is not able to provide requested information because some or all of this information falls under the Cabinet records, personal information or personal health information exceptions?

If a ministry or public entity has not provided the requested information because some or all this information falls under one of the exceptions to the ministry or public entity's duty to provide information under subsection 12(1) of the FAO Act, the FAO will evaluate the justification provided by the ministry or public entity.

If the FAO is of the opinion that the ministry or public entity has failed to provide adequate justification, the FAO may notify the minister responsible and the head of the public entity (if applicable). If the matter is not resolved in a timely manner, the FAO may then notify the Speaker of the Legislative Assembly and the Chair of the Standing Committee on Finance and Economic Affairs that he is of the opinion that the ministry or public entity has failed to comply with the request for the purposes of subsection 12(5) of the FAO Act.

16. Will the FAO disclose the information that our ministry/public entity provides?

The FAO does not generally disclose information in raw form. Instead, the FAO provides the Legislative Assembly of Ontario with economic and financial analysis based on that information.

Furthermore, the FAO cannot disclose information unless the disclosure is essential for the performance of the FAO's mandate and four conditions under section 13 of the FAO Act are fulfilled:

- The information is not third party information (section 17 of the *Freedom of Information and Protection of Privacy Act*);
- The information does not involve relations with other governments (section 15 of the *Freedom of Information and Protection of Privacy Act*);
- The information would not affect the economic and other interests of Ontario (subsection 18(1) of the *Freedom of Information and Protection of Privacy Act*); and
- The information is not subject to solicitor-client privilege, litigation privilege or settlement privilege.

Moreover, the FAO cannot disclose information obtained solely from a Cabinet record (OC 1412/2016).

Should one of these five circumstances affect a record that is responsive to an information request, please clearly identify the record in the cover spreadsheet provided and identify which restriction applies, citing the specific provision in the *Freedom of Information and Protection of Privacy Act*.

If the restriction is intended to protect the interests of other public institutions, governments, third parties and/or legal privilege holders, please specifically identify any institutions, governments, third parties and/or legal privilege holders whose interests would be affected by the disclosure of the information.

For greater certainty, ministries and public entities must provide the FAO with requested information even if it is subject to one or more of these categories. The only valid justifications for refusing to provide information to the FAO are the Cabinet records, personal information and personal health information exceptions set out in subsections 12(2) and (3) of the FAO Act (see Question 10 for more details).

Additional Questions

If you have any additional questions or require clarification, please contact the FAO contact identified in the information request.

Executive Council of Ontario/Conseil exécutif de l'Ontario **[Bilingual]**

Ontario

Order in Council
Décret

On the recommendation of the undersigned, the Lieutenant Governor of Ontario, by and with the advice and concurrence of the Executive Council of Ontario, orders that:

Sur la recommandation de la personne soussignée, la lieutenante-gouverneure de l'Ontario, sur l'avis et avec le consentement du Conseil exécutif de l'Ontario, décrète ce qui suit :

WHEREAS the Financial Accountability Officer, an Officer of the Legislative Assembly, was appointed to provide independent analysis to the Assembly about the state of the Province's finances, including the budget, and trends in the provincial and national economies;

AND WHEREAS the Financial Accountability Officer requires access to information in the custody and control of Ministries and public entities in order to fulfill his statutory mandate;

AND WHEREAS certain information in the custody and control of Ministries and public entities is protected by the mandatory Cabinet Records exemption of section 12 of the *Freedom of Information and Protection of Privacy Act*;

AND WHEREAS the Lieutenant Governor in Council considers it advisable to provide the Financial Accountability Officer access to this information;

NOW THEREFORE Pursuant to subsection 12(2) of the *Financial Accountability Officer Act* (the "Act") and subsection12(2) paragraph (b) of the *Freedom of Information and Protection of Privacy Act*:

1. Every Ministry of the Government of Ontario and every public entity is authorized to provide to the Financial Accountability Officer any financial, economic or other information protected by section 12(1) of the *Freedom of Information and Protection of Privacy Act* that relates to:
    - The Province's finances, including the budget, and trends in the provincial and national economies
    - The estimates and supplementary estimates submitted to the Legislature
    - The financial costs or financial benefits to the Province of any public bill before the Assembly, or
    - The financial costs or financial benefits to the Province of any proposal that relates to a matter over which the Legislature has jurisdiction, including any proposal made by the Government or by any member of the Assembly

subject to paragraphs 2 and 3 below.

2. Information outlined in paragraph 1 above shall be provided to the Financial Accountability Officer in accordance with subsection 12(1) of the Act provided that:
    - The information has been requested by the Financial Accountability Officer
    - The information is not available through other sources
    - The policy or financial decision to which the requested information relates has been made by the Executive Council and announced to the public or tabled with or disclosed to the Legislative Assembly, even if the Executive Council or one of its Committees will or could engage in future deliberations with respect to the decision
    - The requested information is provided in a format that does not reveal other information protected by subsection 12(1) of the *Freedom of Information and Protection of Privacy Act,* including
        - an agenda
        - a Minute, unless the Minute is the only source of the requested information
        - policy or costing options or recommendations prepared for or submitted to the Executive Council or its committees other than the policy or costing option selected for implementation
        - the substance of the deliberations of the Executive Council or its committees regarding options or recommendations prepared for or submitted to the Executive Council or its committees, other than deliberations related to the policy option selected for implementation that would be apparent through the disclosure of the requested information
        - information reflecting the individual opinions of members of the Executive Council
        - a communications plan, stakeholder management plan, key messages, or other communications materials
        - draft legislation or regulations other than the particular draft approved by the Executive Council
    - The information would not reveal personal information or personal health information protected from disclosure by subsection 12(3) of the *Financial Accountability Officer Act*
    - The Financial Accountability Officer agrees not to disclose the information without the consent of the Executive Council

3. The provision of the information to the Financial Accountability Officer does not waive or limit the authority of the Head of an institution to apply the mandatory exemption of section 12(1) of the *Freedom of Information and Protection of Privacy Act* should the information be requested by any parties other than the Financial Accountability Officer.

- - - - - - -

ÉTANT DONNÉ que le directeur de la responsabilité financière, qui est un fonctionnaire de l'Assemblée, a reçu pour mission de fournir à l'Assemblée une analyse indépendante de la situation financière de la province, notamment du budget, et des tendances de l'économie provinciale et nationale;

ÉTANT DONNÉ que le directeur de la responsabilité financière a besoin de consulter des renseignements dont les ministères et les organismes publics ont la garde ou le contrôle afin de s'acquitter de la mission que lui confère la loi;

ÉTANT DONNÉ que certains renseignements dont les ministères et organismes publics ont la garde et le contrôle sont protégés par l'exception obligatoire relative aux documents du Conseil exécutif prévue à l'article 12 de la *Loi sur l'accès à l'information et la protection de la vie privée*;

ÉTANT DONNÉ EN OUTRE que le lieutenant-gouverneur en conseil considère qu'il est judicieux de permettre au directeur de la responsabilité financière de consulter ces renseignements;

EN CONSÉQUENCE, en vertu du paragraphe 12(2) de la *Loi sur le directeur de la responsabilité financière* (la « Loi ») et de l'alinéa 12(2)b) de la *Loi sur l'accès à l'information et la protection de la vie privée* :

1. Chaque ministère du gouvernement de l'Ontario et chaque organisme public est autorisé à transmettre au directeur de la responsabilité financière tout renseignement de nature financière, économique ou autre protégé par le paragraphe 12(1) de la *Loi sur l'accès à l'information et la protection de la vie privée* qui porte sur :
    - la situation financière de la province, notamment le budget, et les tendances de l'économie provinciale et nationale,
    - le budget des dépenses et le budget supplémentaire des dépenses présentés à la Législature,
    - les coûts ou avantages financiers pour la province de tout projet de loi d'intérêt public déposé à l'Assemblée,
    - les coûts ou avantages financiers pour la province de toute proposition qui se rapporte à une question relevant de la Législature, y compris une proposition du gouvernement ou d'un député,

    sous réserve des paragraphes 2 et 3 ci-dessous.

2. Les renseignements visés au paragraphe 1 ci-dessus seront transmis au directeur de la responsabilité financière conformément au paragraphe 12(1) de la Loi, pourvu que :
    - ces renseignements aient été demandés par le directeur de la responsabilité financière;
    - ces renseignements ne puissent pas être obtenus d'autres sources;
    - la décision relative aux politiques ou aux finances sur laquelle portent les renseignements ait été prise par le Conseil exécutif et annoncée au public ou présentée ou divulguée à l'Assemblée législative, même si le Conseil exécutif ou un de ses comités tiendra ou peut tenir des délibérations sur cette décision;
    - les renseignements demandés soient transmis sous une forme ne révélant pas d'autres renseignements protégés par le paragraphe 12(1) de la *Loi sur l'accès à l'information et la protection de la vie privée* comme :

- un ordre du jour,
- un procès-verbal, sauf s'il s'agit de la seule source des renseignements demandés,
- des choix ou des recommandations de politiques ou de calcul des coûts présentés au Conseil exécutif ou à ses comités ou formulés à leur intention, autres que le choix retenu aux fins de mise en œuvre,
- l'objet des délibérations du Conseil exécutif ou de ses comités relatives aux choix ou recommandations présentés à eux ou formulés à leur intention, autres que les délibérations relatives au choix retenu aux fins de mise en œuvre, qui ressortiraient de la divulgation des renseignements demandés,
- des renseignements révélant les opinions personnelles des membres du Conseil exécutif,
- un plan de communication, un plan de gestion relatif aux intervenants, des messages clés ou d'autres documents de communication,
- des projets de loi ou de règlement autres que le projet de loi ou de règlement approuvé par le Conseil exécutif;

- ces renseignements ne révèlent pas de renseignements personnels, notamment sur la santé, protégés par le paragraphe 12(3) de la *Loi sur le directeur de la responsabilité financière*;
- le directeur de la responsabilité financière accepte de ne pas divulguer les renseignements sans le consentement du Conseil exécutif.

3. La transmission de ces renseignements au directeur de la responsabilité financière ne supprime ni ne limite le pouvoir du haut responsable d'une institution d'appliquer l'exception obligatoire prévue au paragraphe 12(1) de la *Loi sur l'accès à l'information et la protection de la vie privée* si la demande est présentée par toute partie autre que le directeur de la responsabilité financière.

Follow-up analysis of the Financial Impact of the Partial Sale of Hydro One

Objective

The objective of this project is to provide Members of Provincial Parliament with a follow-up analysis to the FAO's report, *An Assessment of the Financial Impact of the Partial Sale of Hydro One*.[1] Specifically, the report would focus on tracking how the sale proceeds were allocated to reduce debt and finance infrastructure. In addition, the report would assess the fiscal impact of Hydro One's acquisition of Avista Corporation, and review key considerations around the potential impact on electricity rates in Ontario.

Key Questions

The report would answer the following key questions:

- **What is the fiscal impact to the Province of the partial sale of Hydro One?**
  - What were the final proceeds generated by the Province?
  - Of the final proceeds, what amount was cash vs. non-cash, and what are the implications for the financial position of the Province?
  - How did the sale impact the Province's surplus/deficit and net debt?
  - How much has OEFC electricity sector debt been reduced as a result of the sale?
  - How did the transactions related to the sale, including the $2.6 billion departure tax and $800 million special dividend, impact the Province's fiscal position?
  - What is the projected long-term effect of the sale compared to what would have happened if the Province generated equivalent funds using traditional borrowing?

- **How will the proceeds from the sale of Hydro One be used to finance infrastructure projects?**
  - What portion of the proceeds (cash and non-cash) was allocated to the Trillium Trust, and what are the implications, if any, of funding infrastructure projects with non-cash proceeds?
  - What infrastructure projects are being financed by the sale proceeds?
  - Are the infrastructure projects being financed by the sale of Hydro One new projects, or existing projects already included in the Province's fiscal plan?

[1] http://www.fao-on.org/en/Blog/Publications/Hydro%20One%20Report

- **How will the sale of Hydro One affect Ontario ratepayers?**
  - How will payment of OEFC debt using the proceeds generated by the sale affect Ontario ratepayers?
  - How could changes in Hydro One's capital structure (debt/equity) resulting from the sale and related transactions affect Ontario ratepayers?

- **What is the expected impact to the Province and Ontario ratepayers from Hydro One's proposed acquisition of Avista Corp.?**
  - How would the acquisition affect the Province's investment in Hydro One?
  - How would changes to Hydro One's business that is not regulated in the Ontario market affect Ontario ratepayers?

Financial Accountability Office of Ontario

Information Request

Project Name	Follow-up analysis of the Financial Impact of the Partial Sale of Hydro One
Information Request No.	FA1715-02
Deadline	November 1, 2017

Please provide the following information by the above deadline:

Ontario Electricity Financial Corporation (OEFC):

1. What is the impact on OEFC's unfunded liability for each of the following transactions?
    a. Departure tax payment
    b. Deferred tax benefit
    c. $800 million special dividend
    d. Allocations as per section 50.3 of the Electricity Act
    e. Allocations in the amount of book value of Hydro One shares sold
2. How would the financial statements of the OEFC be impacted should Hydro One report a net loss for a given fiscal year?
    a. Is there a reduction in the Due from Province receivable asset?
    b. Is there an increase to a liability?
    c. Is future positive ESDI reduced until the negative income, or loss, is recovered?
3. What is the total amount to be allocated to the OEFC, as a result of the sale of Hydro One, as prescribed by section 50.3 of the Electricity Act?
    a. When is this amount to be allocated?

4. Can you please provide the calculations used to determine the amounts that have already been allocated to the OEFC as a result of section 50.3 of the Electricity Act? For example,

    a. The $172 million allocated in 2015-16

    b. The $411 million allocated in 2016-17

5. When will the Province allocate the proceeds related to the book value of Hydro One shares sold in 2017 to the OEFC?

6. In the absence of the sale of Hydro One, how did the Province intend to settle its Due from Province obligation to the OEFC in cash?

    a. How does the Province intend to settle the obligation that will remain after the allocations as a result of the Hydro One sale have been applied?

7. For the fiscal years 2012-13 to 2014-15, can you please provide the following assumptions that were used to estimate the NPV of Hydro One's future ESDI?

    b. Number of future years of ESDI.

    a. Discount rate used to discount Hydro One's future ESDI.

8. Why was O. Reg. 89/12 revoked?

Trillium Trust & Infrastructure Investment:

9. What is the criteria for determining whether a project is funded by the Trillium Trust?

10. When will the net revenue gains from the sale of Hydro One shares in 2017 be allocated to the Trillium Trust?

11. Why have only a portion of the Trillium Trust allocations been spent so far?

12. What are the estimated annual withdrawals from the Trillium Trust, as related to the partial sale of Hydro One, for each fiscal year, beginning in 2016-17, and ending when the balance of the Trillium Trust is zero?

    a. For each fiscal year, which Provincial entities are to receive funding from the Trillium Trust, and for each entity, how much funding is to be allocated?

b. For each fiscal year, what portion of Trillium Trust funding is to be expensed, and what portion is to be capitalized?

RE FAO"s Fall 2017 EFO.msg

Hi Ken,

Office has prepared the attached summary note of the forthcoming FAO report on the fiscal and economic outlook. Just a few net debt-to-GDP numbers for us to check.

Could you please send any **edits to me by noon tomorrow for Gadi's review**? Note, Office of the Budget is expecting an embargoed copy of the report to be sent over tomorrow which could result in updates to the attached note.

Thanks, Anna

Subject: FAO EFO Report Summary Note / Request for Input

Hi All,

Attached is a draft FAO EFO report summary note for review with a few caveats. An embargoed copy of the FAO's final EFO report will be released tomorrow and might result in updates. In addition, OEP will be adding a summary on the economic outlook and related key messages in order to have one consolidated product. For your general reference, I'm re-attaching the final comments that were submitted to the FAO.

Could your areas please review the attached summary note and aim to provide ADM approved edits in tracked changes by **EOD tomorrow**? These edits should align with the final EFO report being released tomorrow.

Please let me know if you have any questions.

Thanks,
Ryan

FAO's 2017 Fall Fiscal Outlook – OB Summary

ISSUE

The Financial Accountability Office is set to release its 'Fall Economic and Fiscal Outlook' report. This note summarizes the fiscal chapter of the report.

TOP MESSAGES

- I would like to thank the Financial Accountability Officer (FAO) for releasing his fall economic and fiscal outlook for Ontario. We value the FAO's independent assessment and projections of the province's fiscal plan.
- As outlined in the 2017 Ontario Economic Outlook and Fiscal Review, the government is projecting a balanced budget for 2017–18 and to remain balanced in 2018–19 and 2019–20.
- The FAO report also projects a balanced budget for Ontario this year.
- The government has a strong track record of beating its fiscal targets. In fact, the Public Accounts of Ontario reported that the 2016–17 deficit was $1.0 billion, beating our annual deficit target again, for the eighth year in a row.
- The 2017 Ontario Economic Outlook and Fiscal Review builds on the government's track record of fiscal management that has resulted in $29 billion in accumulated deficits being avoided over the past seven years, relative to the 2010 Budget forecast.
- We are also targeting a net debt-to-GDP ratio of 35 per cent by 2023–24 and reducing Ontario's net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029–30.
- Since 2014, Ontario's real GDP growth has strengthened, positioning Ontario as a growth leader, not only in Canada, but among G7 countries. In fact, over the 2014-17 period, Ontario's real GDP growth is on pace to exceed that of all G7 countries.
- Private-sector economists are projecting continued growth for Ontario over the forecast horizon; the FAO's real GDP projections are aligned with the 2017 Fall Economic Statement over the 2017 to 2020 period.
- This shows that our plan to make strategic investments in Ontario to grow the economy is working.
- A balanced budget is providing the Province the fiscal flexibility to invest more in health care, education, support for seniors and small businesses and other public services that matter most to Ontario families. It also adds stability to Ontario's finances and positions the government to better respond to demographic challenges and unexpected global economic shocks that the province will face over the next decade.

KEY POINTS

Fiscal Outlook

- The FAO is projecting a budget deficit of $3.9 billion in 2017–18 using the **Auditor General's recommended accounting treatment for both the Fair Hydro Plan and the net pension assets of jointly sponsored pension plans.** In the absence of any fiscal policy changes this grows steadily to $9.6 billion in 2021-22.
- Under the **government's accounting presentation (excluding the AG's recommendations)**, the FAO projects a small surplus for 2017–18 of $0.3 billion (excluding the reserve) and a return to deficits beyond 2017–18 driven by revenue factors - loss of temporary revenues combined with more moderate tax revenue growth.
- The FAO suggests that by not adopting the AG's recommended accounting presentation, the 2017 Budget and the 2017 FES reduced transparency and clarity of Ontario's fiscal position and as a result Ontario will continue to receive qualified options from the AG.

Budget Balance - FAO's Fiscal Outlook ($ Billions)	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
AG Presentation	-5.0	-2.5	-3.9	-7.2	-7.9	-8.9	-9.6
Government Presentation	-3.5	-1.0	0.3	-1.9	-2.0	-2.6	-3.5
2017 FES -- Excluding Reserve	-3.5	-1.0	0.5	0.5	0.8	N/A	N/A

Revenue Outlook

- Using the AG presentation, the FAO is projecting average annual revenue growth of 2.6 per cent from 2016-17 to 2019-20 as compared with the government's projections of 4.0 per cent. The main drivers are:
    - The FAO projections for taxation revenues are $2.9 billion lower by 2019-20 than the projections in the 2017 FES due to lower projected growth in household spending, labour income and corporate profits.
    - The FAO projects that, based on the AG presentation, the Fair Hydro Plan will lower net income from OPG by $3.4 billion lower by 2019-20.
    - In addition, the FAO continues to highlight a number of one-time 2017-18 revenues, including: increase to sales and rentals from sale of final tranche of H1, higher federal transfers for infrastructure (PTIF), one-time boost from extra Cap and Trade auction. Taken together the FAO estimates that these amount to $4.5 billion in additional one-time revenues in 2017-18.

Expense Outlook

- From 2017–18 to 2019–20 the FAO's outlook adopts the government's 2017 FES projections for program spending, **adjusted to reflect the AG's recommended accounting presentation.** Beyond 2019–20 the FAO projects program spending will grow faster -- at an average annual rate of 4.1 per cent – due to population pressures.

Borrowing and Net Debt

- Using the **government's accounting presentation** net debt-to-GDP is expected to reach 38.4 per cent by 2019–20 and 38.6 per cent by 2021–22. This increases to 41.3 per cent by 2021–22 **under the AG's accounting presentation**.
    - The 2017 FES projected a net debt-to-GDP ratio of 37.0 per cent by 2019–20.

Comparison: 2017 Fall Economic Statement and the 2017 Fall FAO Fiscal Outlook

David;

Thanks again for the opportunity to review and provide feedback/fact-checks and comments on the draft report. Please find attached a consolidated set of comments from MOF and TBS on the Economic and Fiscal Chapters.

We think there may be some value in having a follow-up call next week to discuss some of these pieces – but let us know what you think once you've reviewed. We're happy to arrange something.

Some of these more significant edits may require a conversations to clarify, including:

· The language and representation of the differences in accounting interpretations. We may have discussed this at the time of the Budget outlook document, but we think its important to get the language right in terms of how this is articulated so that it's a more objective and fact-based representation.

· In addition, it appears that the way the FAO has built in the AG's interpretation of the Fair Hydro Plan accounting treatment is incorrect – as the current presentation in this draft EFO shows it appearing on the revenue side (on OPG's net income) – instead, the AG's recommendation was that is an expense impact on consolidation from IESO and further that the IESO is not a GBE – so it impacts the way the section (and charts under that section) are currently presented. This will require a significant change to your numbers and presentation. This may require additional explanation, so let us know.

· There are also some comments related to FAO projections for the amount of borrowing, as well as references about above trend growth in key tax drivers – these were essentially that the forecast is consistent with historical growth/trends and private sector forecasts, and the importance to note where “one-time” revenues identified as such by the FAO are actually also fiscally neutral – so should not be linked to a fiscal gap contribution by these shorter-term revenues.

Tim, Brian Karen

Please find attached drafts of Economic Outlook and Fiscal Outlook chapters from the FAO's upcoming 'Economic and Fiscal Outlook' report.

The chapters are password protected using the same password as in the past.

As in the past, we are on a very tight schedule to enable us to release this report in early December, before the Legislature rises for the holiday break.

However, please note that we are still waiting for the detailed program spending projection consistent with FES (see attached email request from last week). This information is essential to calibrate our models and ensure consistency with the government's projections. If we do not receive that information shortly, we will be forced to proceed with our own estimates which could impact the results and conclusions presented in the report. Please be aware that we will need to be clear with MPPs, during our technical briefing, that we did not receive all the additional background information that we requested. (We did, however, receive the detailed revenue information from FES last week. Thanks)

We are asking for your comments/concerns by end of day Friday (November 24).

Happy to set up a phone call to discuss.

Thanks again for your support and assistance.

Hello Tim, Brian,

As you are aware, we are preparing our Fall EFO for release in early December.

As in the past, we are planning to send you drafts of the 2 core chapters of the report (economic outlook and fiscal outlook) on Wednesday morning, for your comments. We will also provide the supporting data tables, providing additional details on the projection. The current report follows the basic template of our earlier EFOs, and may be a little shorter.

We would greatly appreciate receiving the Ministry's comments by Friday (November 24) end of day.

Thanks, as always, for your assistance.

David

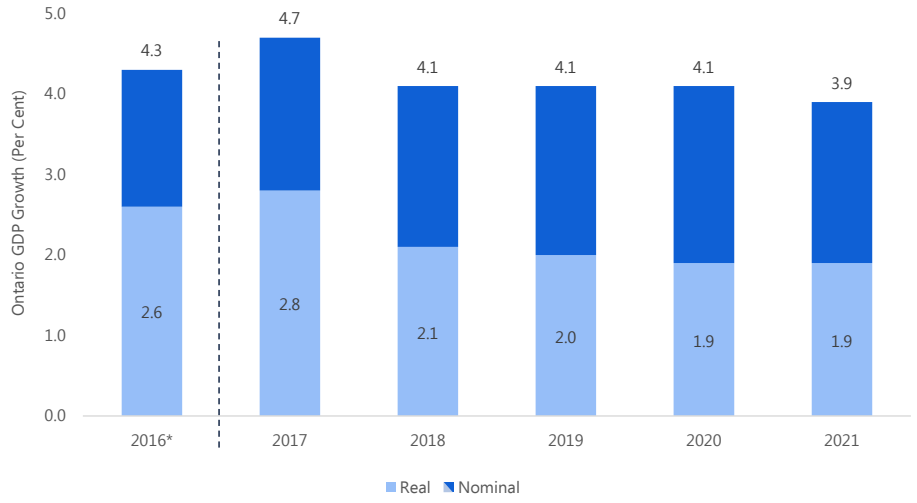
1. Economic Outlook

Overview

Ontario Economy Exceeding Expectations in 2017

Following a strong performance over the first half of 2017, the Ontario economy is expected to continue on a path of solid growth into 2018.



Led by a continued surge in household spending and residential investment, the FAO projects Ontario real GDP growth of 2.8 per cent in 2017, an upward revision from the FAO's spring outlook report.[1] Nominal GDP – the broadest measure of the tax base - is projected to increase by 4.7 per cent in 2017, well above the FAO's spring forecast. The strong growth in nominal GDP in 2017 is supported by significant gains in corporate profits.

Beginning in 2018, most forecasters, including the FAO, expect the Ontario economy to grow at a more measured pace, as growth in the US and Canadian economies is also expected to moderate. At the same time, higher interest rates are expected to contribute to slower growth of household spending and residential investment over the outlook.

Commented [AJ(1]: NGDP growth of 4.7% is the lowest estimate of the 13 forecasters that we track and also below the average of the three forecasters tracked by the FAO.

The FAO may be using a vintage version of the C4SE forecast, which contained an error. If fixed, it could change the average forecast of the three modellers for NGDP growth found in the FAO report.

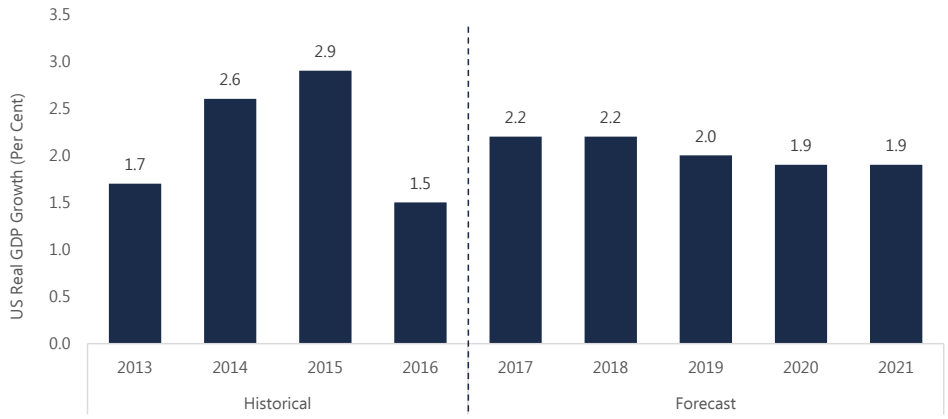
Solid Economic Performance Expected Over Outlook

* 2016 are actuals.

Source: Ontario Economic Accounts, Statistics Canada and FAO.

1 'Economic and Fiscal Outlook, Assessing Ontario's Medium-term Prospects, Spring 2017', Financial Accountability Office of Ontario.

Global Economic Growth Gaining Traction



In its latest World Economic Outlook, the International Monetary Fund (IMF) revised up its forecast for global economic growth to 3.6 per cent in 2017 and 3.7 per cent in 2018.[2] A number of key economies reported stronger than expected growth over the first half of 2017, including the euro area and Japan. These upward revisions more than offset weaker than expected growth in the United Kingdom and the United States.

United States

In the US, real GDP is expected to grow by 2.2 per cent in 2017. Following a modest first quarter gain, US consumer spending has shown signs of strengthening while business investment remains strong, particularly in the energy sector. Going forward, the FAO projects US growth to ease slightly to 1.9 per cent by 2021.

Commented [AJ(2]: The Consensus Economics and Blue Chip forecasts currently have 2018 real U.S. GDP growth at 2.5%. These forecasts are likely fresher that the CBO forecast of 2.2% used by the FAO.

US Economic Growth to Moderate

Source: US Bureau of Economic Analysis, Congressional Budget Office and FAO Consensus.

However, the outlook for the US economy depends critically on the uncertain policy direction of the current US administration. Significant tax reform, including sizable tax cuts, have been proposed, although it is unclear if an agreement in Congress will be reached. Likewise, the renegotiation of the North American Free Trade Agreement (NAFTA) is ongoing, and the potential impact of a new trade agreement on North American economies remains highly uncertain (see 'Key Risks' for more details).

Other World Economies

The IMF reports that the euro area economy continues to gain strength, supported by a pick-up in exports and continued strength in domestic demand. In China, the IMF expects economic growth to ease from 6.8 per cent in 2017 to 6.5 per cent in 2018. While the Chinese economy is continuing to rebalance towards

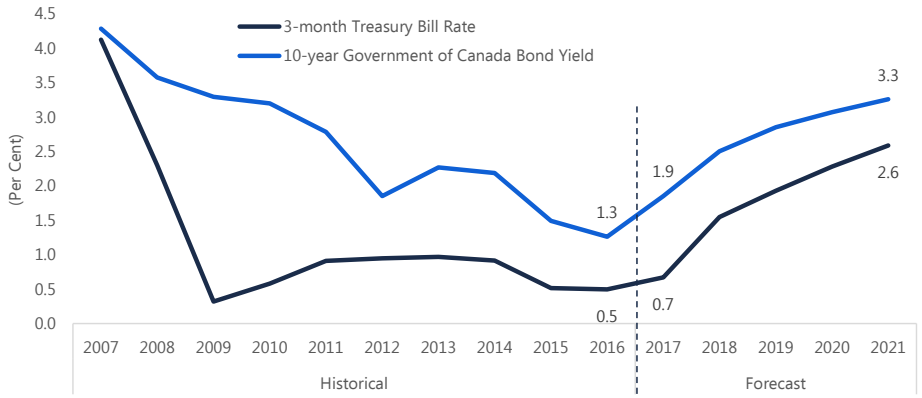
2 International Monetary Fund, World Economic Outlook, October 2017.

more consumption-led growth, debt continues to build among households, government and businesses, which could pose risks to medium-term growth.[3]

While the global economy is expected to perform solidly through 2018, over the medium term, global growth is expected to be limited by modest productivity gains, aging workforces in advanced economies, and tightening financial conditions.

Canadian Economy

The Canadian economy is on track to post the strongest annual growth since 2011. Robust consumer spending, and a pickup in exports and business investment supported solid overall Canadian growth during the first half of 2017. While consumer spending and exports are expected to moderate over the second half of the year, the Canadian economy is on pace for a 3.1 per cent annual gain in 2017. The FAO expects Canadian real GDP to grow by 2.1 per cent in 2018 and by an average of 2.0 per cent through 2021, as higher interest rates contribute to slower growth in consumer spending and residential investment.



The brisk pace of economic growth over the first half of the year led the Bank of Canada to increase its policy interest rate to 0.75 per cent in July and 1.0 per cent in September. Importantly, the Bank indicated that with the Canadian economy operating near full capacity, it will take a cautious, data-driven approach in determining future rate increases. Given the Bank's measured approach and the subdued rate of consumer price inflation, the FAO expects a gradual but steady rise in interest rates over the medium-term, consistent with the FAO's spring outlook.

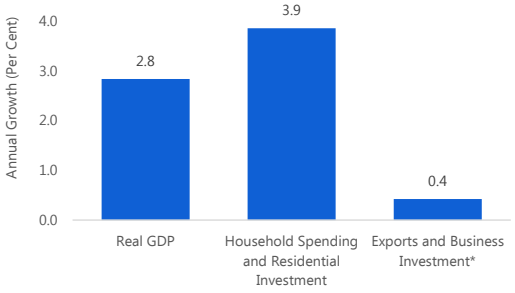
Commented [AJ(3]: Worth noting that the BoC held rates steady at its October meeting.

The recent increases in Canadian interest rates contributed to an eight-cent appreciation in the Canadian dollar relative to the US dollar through the summer, before retracing some of this gain more recently. With this appreciation, the FAO projects that the dollar will average 78 cents in 2017, slightly higher than the FAO's spring outlook. Going forward, the FAO expects a gradual appreciation of the dollar to about 81 cents by 2021, supported by a steady rise in Canadian interest rates and a moderate increase in oil prices.

Canadian Interest Rates to Rise over the Outlook

3 International Monetary Fund, China's Economic Outlook in Six Charts, August 2017.

Source: Statistics Canada and FAO.

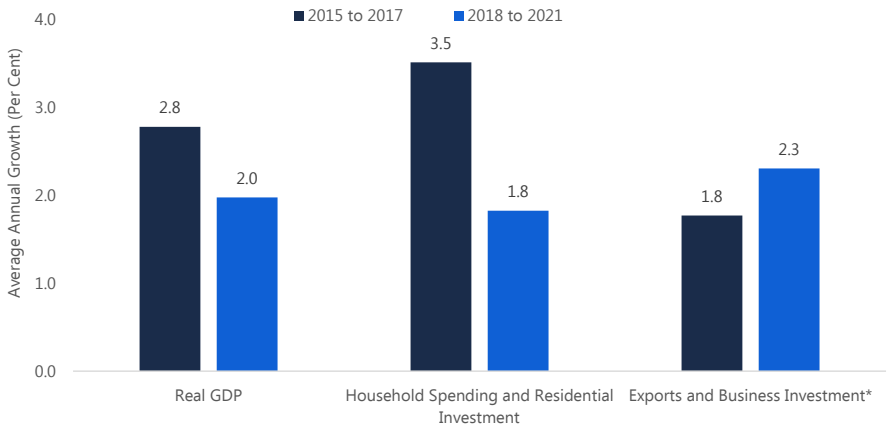


Ontario Economic Outlook

Solid 2017 Growth Expected to Moderate over the Outlook

Ontario posted solid real GDP growth of 2.6 per cent in 2016, the third consecutive year of strong growth for the economy. The FAO expects that the economy's momentum will continue into 2017, with real GDP advancing by 2.8 per cent.

However, despite the projection for relatively strong economic growth in 2017, the drivers of that growth are unbalanced. Household spending and residential construction are providing the main support for the economy's growth in 2017, while exports and business investment have underperformed.



Household Spending Primary Driver of Growth in 2017

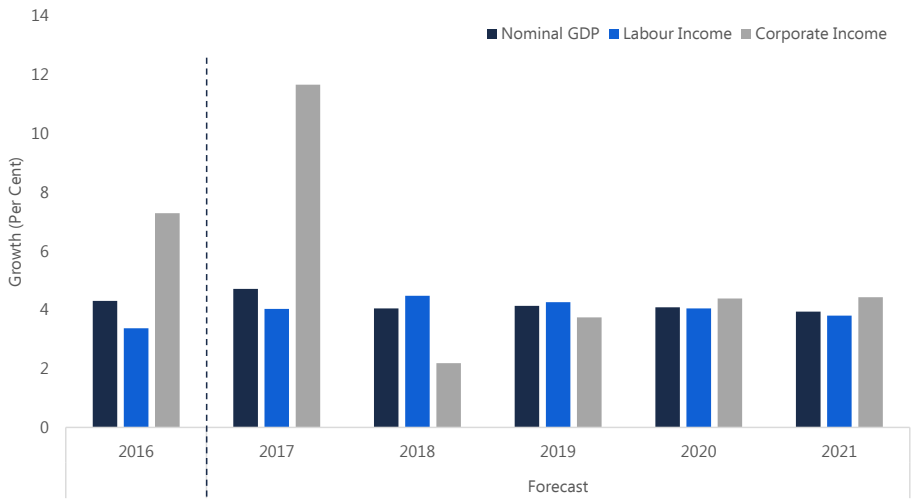
* Business Investment includes both Non-Residential Investment and Machinery & Equipment Investment.
Source: Statistics Canada, Ontario Economic Accounts and FAO.

Going forward, the FAO expects that elevated levels of household debt combined with rising interest rates will hamper household spending and residential investment. At the same time, exports and business investment are expected to contribute more to economic growth, as sustained foreign demand encourages businesses to increase production capacity (discussed further in 'Key Risks' below). Over the outlook, the FAO projects real GDP growth will ease to 2.1 per cent in 2018 and average 1.9 per cent per year from 2019 to 2021.

Exports and Business Investment Expected to Drive Growth over the Outlook

* Business Investment includes both Non-Residential Investment and Machinery & Equipment Investment.
Source: Statistics Canada, Ontario Economic Accounts and FAO.

Strong Gain in Corporate Profits Projected for 2017



The FAO is forecasting nominal GDP growth of 4.7 per cent in 2017, driven by an 11.7 per cent increase in corporate profits, and a more moderate gain of 4.0 per cent in labour income.

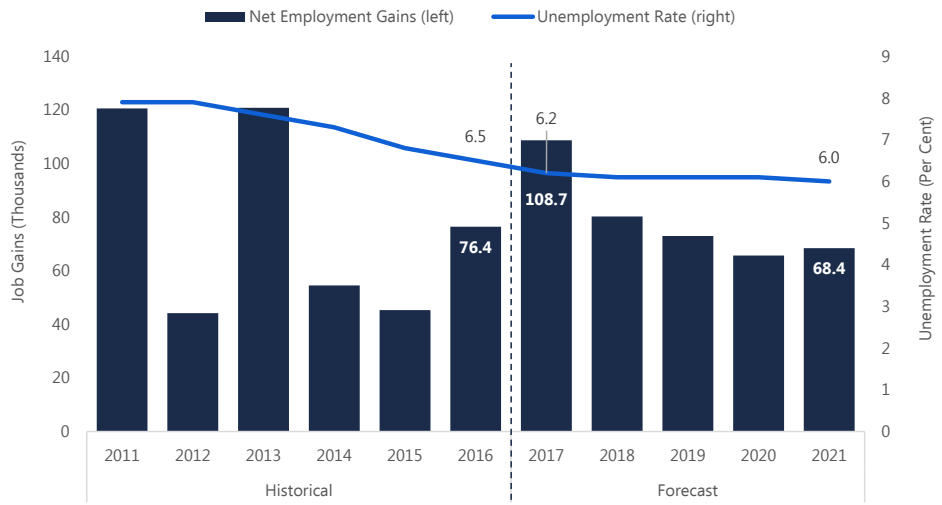
The planned increases to Ontario's minimum wage are expected to raise labour income growth in 2018 and 2019.[4] Beyond 2019, labour income growth is expected to moderate to 3.8 per cent by 2021.

Slower labour income gains will contribute to slightly more moderate nominal GDP growth of 3.9 per cent by 2021.

Corporate Income Leads Nominal GDP Growth in 2017

4 The FAO's forecast incorporates explicit assumptions of higher labour income growth, a small reduction in employment gains and a slight increase in CPI inflation due to the planned increases in Ontario's minimum wage. See the FAO's commentary *Assessing the Economic Impact of Ontario's Proposed Minimum Wage Increase* for details.

Note: Labour and corporate income comprise roughly 70 per cent of nominal GDP. The other categories include mixed income (from proprietorships) and net taxes.



Source: Statistics Canada, Ontario Economic Accounts and FAO.

Steady Job Gains Expected to Continue

The FAO is projecting strong job growth of 1.6 per cent (+109 thousand net new jobs) in 2017, following a gain of 1.1 per cent (+76 thousand net new jobs) in 2016.

Over the outlook, sustained economic growth is expected to support average annual employment growth of 1.1 per cent, just slightly faster than the growth in the labour force. As a result, the unemployment rate is expected to trend lower, falling from 6.2 per cent in 2017 to 6.0 per cent by 2021.

Steady Employment Gains as Unemployment Rate Trends Lower

Source: Statistics Canada and FAO.

Key Risks for Ontario's Economic Outlook

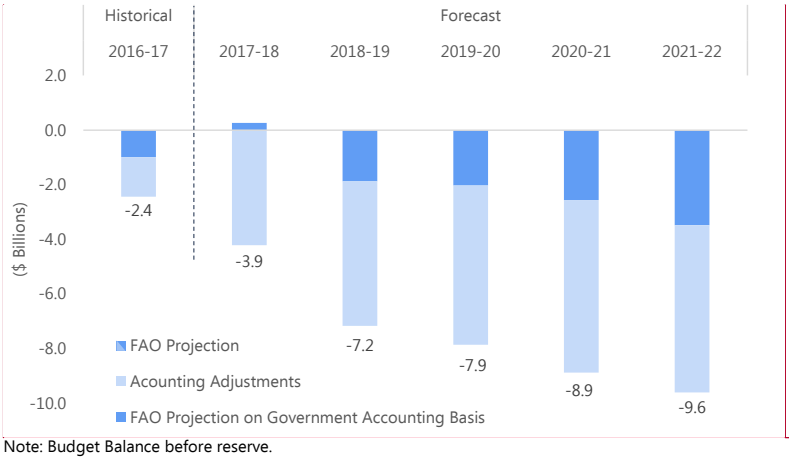
While the FAO expects solid economic growth over the medium-term, there are a number of risks that could negatively affect Ontario's economic performance.

Most economic forecasters, including the FAO, continue to assume that NAFTA will largely be maintained in its current form. However, the US administration is demanding significant concessions from Canada and Mexico, and has threatened to leave NAFTA altogether. Some businesses may already be postponing investment decisions outside of the United States due to the uncertainty surrounding NAFTA. If the renegotiation of NAFTA leads to a deterioration in Ontario's terms of trade or restricts access to the US market, there would be significant negative implications for the province's growth prospects.

In recent years, strong growth in household spending has not been matched by similar gains in household incomes, leading to higher levels of household debt. In 2016, household debt reached 167 per cent of disposable income in Ontario, a significant rise from 149 per cent in 2010.[5] Higher debt burdens expose households to financial risk. With a steady rise in interest rates expected over the next few years, many households will scale back discretionary spending in order to make higher debt interest payments, which in turn could have implications for the pace of overall economic growth.[6]

Commented [AJ(4]: There are also some upside risks to the Ontario economic outlook. For instance, the risk section would benefit from a discussion of potentially stronger Ontario real GDP growth in 2018 because of stronger global growth.

5 Statistics Canada Annual Household Wealth Distribution Tables (Provisional Data).
6 The Bank of Canada describes this risk as elevated, with a low probability of occurrence but a severe impact if it were to materialize. Bank of Canada, Financial System Review, June 2017.



1. Fiscal Outlook

FAO Projects a Return to Significant Budget Deficits

Despite a strong increase in revenues, the FAO is projecting an Ontario budget deficit of $3.9 billion in 2017-18, entirely the result of the Auditor General of Ontario's (AG) recommended accounting treatment for both the government's Fair Hydro Plan and the net pension assets of jointly-sponsored pension plans.[1]

Beyond 2017-18, the FAO is projecting a significant deterioration in the budget deficit due to the loss of time-limited revenues, a more moderate pace of tax revenue growth, and the growing fiscal impact of the AG's recommended interpretation of public sector [OPCD edit] accounting ~~framework~~standards (PSAS) [OPCD edit]. By 2021-22, the FAO is projecting an Ontario budget deficit of $9.6 billion in the absence of any fiscal policy changes.

Ontario Budget Balance

Note: Budget Balance before reserve.
Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review, and FAO.

Commented [GNR1]: OPCD: Legend description: FAO Projection using government interpretation of PSAS

In the *2017 Ontario Economic Outlook and Fiscal Review* (also referred to as the Fall Economic Statement or FES), the government projected balanced budgets for 2017-18 through to 2019-20. However, the government's fiscal projection relies on an overly optimistic revenue forecast and does not adopt the AG's recommended accounting interpretations on two issues: 1) accounting for net pension assets of jointly sponsored pension plans, and 2) the global adjustment refinancing component of the Ontario Fair Hydro Plan~~framework~~. [OPCD edit]

For comparison, under the government's accounting presentation, the FAO projects a small budget surplus for 2017-18 – approximately equal to the government's own budget projection. However, there are a

[1] See *The Fair Hydro Plan: Concerns About Fiscal Transparency, Accountability and Value For Money; Auditor General of Ontario, October 2017* and *Independent Auditor's Report, 2016-17 Consolidated Financial Statements, Auditor General of Ontario, 2017.*

number of time-limited and one-time revenues in 2017-18. Going forward, the loss of these temporary revenues combined with more moderate tax revenue growth results in a return to deficit in 2018-19 and a steady deterioration in the budget deficit over the outlook.

The Accounting Presentation of Ontario's Financial Statements

The government's fiscal plan, as presented in both the 2017 Ontario Budget and Fall Economic Statement, does not adopt the Auditor General's recommended accounting ~~presentation, reducing the transparency and clarity of Ontario's fiscal position.~~ treatment for which the government received a qualified opinion from the AG in the 2016-17 Public Accounts of Ontario [OPCD edit]

In addition to the existing disagreement over the appropriate accounting treatment for the government's jointly sponsored pension plans, the AG recently reported that the government is not correctly accounting for the full cost of the Fair Hydro Plan in its financial statements.[2] As a result, the government's fiscal presentation is expected to continue to receive qualified opinions from the AG.

Revenue Outlook

The FAO is projecting average annual revenue growth of 3.1 per cent over the forecast. In 2017-18, revenues are supported by strong growth in taxes, as well as a number of time-limited or one-time revenues. Beginning in 2018-19, the FAO is projecting more moderate revenue growth as:

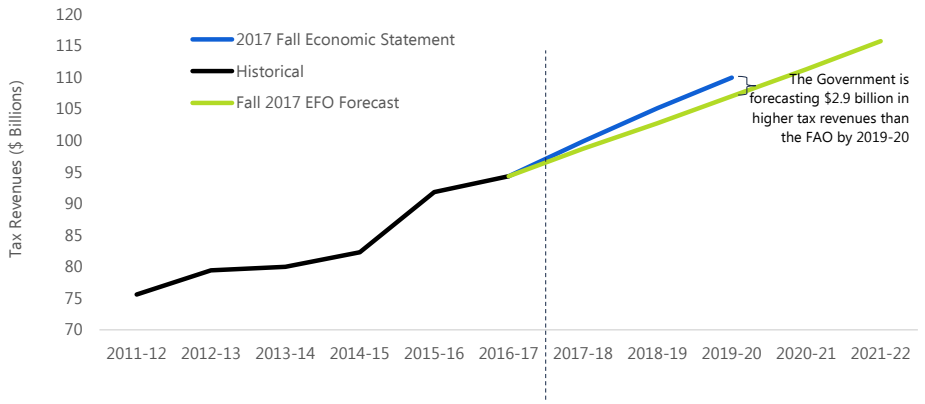
- time-limited revenues end (including the debt retirement charge and federal equalization payments);
- economic growth moderates, following several years of stronger than average growth; and
- the fiscal impact of the Fair Hydro Plan increases, reducing electricity-sector revenues.

Tax Revenue Growth Expected to Moderate

Nominal GDP, the broadest measure of the tax base, is projected to grow by a strong 4.7 per cent in 2017, supporting a 4.6 per cent increase in tax revenues in 2017-18. From 2018 to 2021, annual GDP growth is expected to moderate to 4.1 per cent, leading to similar slowing in tax revenue growth to 4.1 per cent on average over this period.

In the government's Fall Economic Statement, tax revenue is projected to grow by 5.2 per cent on average from 2017-18 to 2019-20, much higher than the FAO's projection of 4.3 per cent over the same period. The government's expectation of higher growth results in an additional $2.9 billion in tax revenues by 2019-20, relative to the FAO projection.

Commented [ES2]: OFA comment: There is no mention of the findings of the independent Pension Asset Expert Advisory Panel. Even if the FAO disagrees with the findings there should be a reference that the Government has followed the Panel's recommendation in accounting for pension assets.

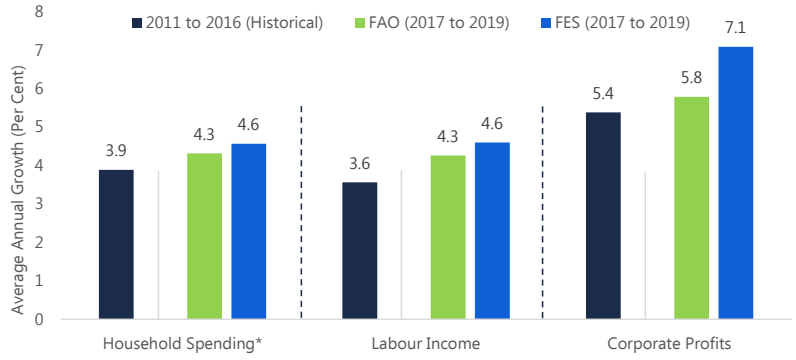


Commented [ES3]: OB: On page 4 states FAO estimates this will end in 2019-20

Commented [GNR4]: OFA: The FHP does not have a net negative revenue impact. See page 4 comments.

Commented [GNR5]: OB: Average annual growth in tax revenue is 5.2 per cent from 2016–17 to 2019–20.

[2] 2016-17 Consolidated Financial Statements, Auditor General of Ontario, 2017



FAO's Taxation Revenue Outlook

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

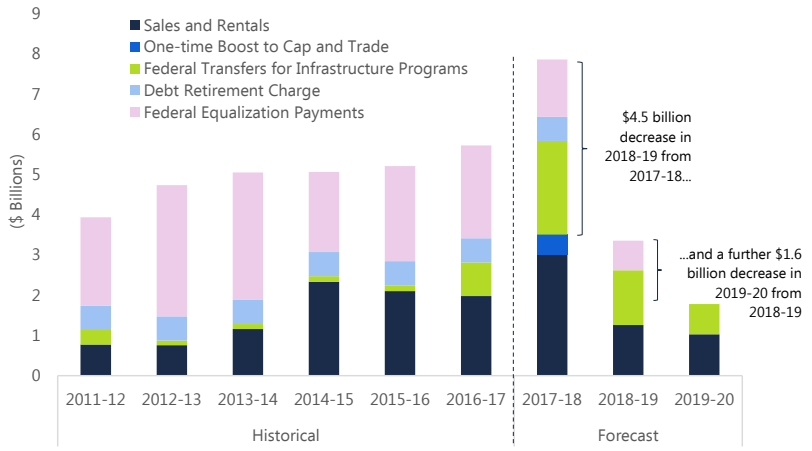
The government's revenue forecast relies on more optimistic projections for many of the key economic drivers of tax revenue, including labour income; corporate profits; and household spending.

Growth in Key Tax Drivers

* The FES forecast for Household Spending is Real Household Spending plus CPI.

Source: Statistics Canada, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

While the FAO expects incomes and household spending to grow somewhat faster than recent historical trends,[3] the government's tax revenue forecast is based on significant and sustained above-trend growth for each of the three key tax drivers.



The Loss of Time-limited Revenues

The Province's 2017-18 revenues incorporate a number of one-time or time-limited revenues that are set to expire. These include:

- a temporary increase to sales and rentals revenue, reflecting additional asset sales[4];
- higher federal transfers for infrastructure;
- the final year of the debt retirement charge[5];
- federal Equalization payments, which the FAO estimates will end in 2019-20; and
- revenue from an additional cap-and-trade auction that occurred in March 2017, which will be recognized in the 2017-18 fiscal year.[6]

Taken together, these time-limited revenues will decrease by $4.5 billion in 2018-19, and by an additional $1.6 billion in 2019-20.

Many Time-limited Revenues are Set to Expire Beyond 2017-18

3 Labour income is expected to grow above trend in part due to the increased minimum wage over the outlook (which is also expected to boost household spending). Estimates of Ontario corporate profits over the first half of 2017 imply very strong growth.

4 Asset sales include the Province's ~~22~~ 20 per cent sale of Hydro One equity in a secondary offering in 2017-18, which the FAO estimates ~~would~~ to generate about $0.8 billion in revenue. [OFA edits]

5 The debt retirement charge (DRC) is a charge payable on electricity consumed in Ontario and replaces a portion of debt servicing costs previously included as part of electricity bills before the restructuring of the former Ontario Hydro. The government ended the DRC on residential bills as of January 1, 2016. The DRC will remain on other electricity users' bills for electricity consumed before April 1, 2018. [OFA edits]

6 In fiscal year 2017-18, there were five cap and trade auctions. Going forward the Provinces expects to have four auctions per year.

Commented [GNR6]: OEP: This point and the chart above may not accurately portray the FES forecast for key revenue drivers.

It should be noted that beyond 2017, the FES forecast for revenue drivers are broadly consistent with economic trends and long-term historical growth.

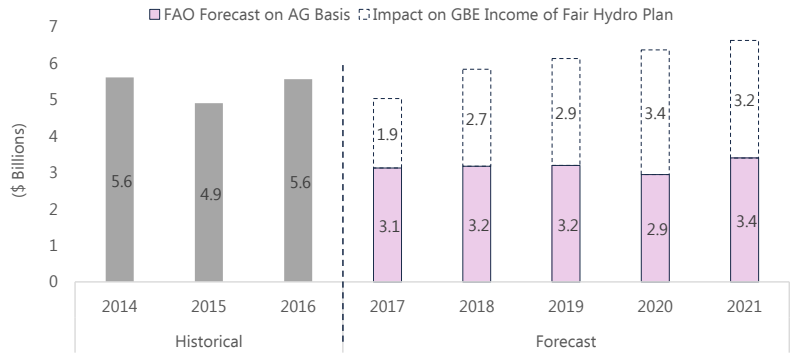
The FES forecast for revenue drivers is tied to private sector forecasts. These have been heavily influenced by strong readings in 2017. For instance, profit growth was very strong in 2017, but is only expected to grow by 3.3% on average between 2018 and 2020 in the FES forecast. Labour income is expected to grow more strongly and average 4.6% over the same period as a tight labour market supports a shift in income growth from profits to wages.

Commented [GNR7]: OFA: Please see changes to footnote below. ~20% of Hydro One shares were sold in May 2017, so we have revised the percentage. However, it may also be noted that the Province has an agreement in principle with First Nations to sell up to 2.5% of Hydro One common shares. News release on both items here.

Commented [GNR8]: OB: This is fiscally neutral as there is a corresponding expense associated with it.

Commented [GNR9]: OPCD: non-capitalized amounts (e.g. supporting municipal (housing) / university infrastructure); capitalized amounts would be amortized

Commented [GNR10]: OPCD: non-residential users.



Commented [GNR11]: OB: This is fiscally neutral as there is a corresponding expense associated with it.

Source: Ontario Budgets, Ministry of Finance and FAO.

Government Business Enterprises and the Impact of the Fair Hydro Plan

The government introduced the "Fair Hydro Plan" to reduce electricity bills for residential customers by an average of 25 per cent. The government's plan includes ~~subsidizing~~ refinancing a portion of electricity ~~prices~~ costs for ratepayers through provincial and Ontario Power Generation (OPG) and OPG Trust borrowing. Consistent with the AG's recommendation on the consolidated bottom-line fiscal impact on the Province, the FAO is ~~captured~~ capturing ~~the~~ this fiscal impact of this borrowing by reducing the net income of OPG by $1.9 billion in 2017-18, and by $3.2 billion by 2021-22. [OFA track change edits in this paragraph]

Impact of the Fair Hydro Plan on Ontario's Revenue from Government Business Enterprises

Source: Public Accounts, 2017 Ontario FES and FAO.

FAO Revenue Assumptions and Forecast

Revenue Source	Assumption	Forecast
Taxation Revenue	Grows with key economic drivers including labour income, corporate profits and household spending	Averages 4.2 per cent growth per year from 2017-18 to 2021-22[7]
Federal Transfers	Based on legislated growth rates and economic forecasts for Ontario and Canada	Federal transfers are expected to grow by 1.6 per cent per year from 2017-18 to 2021-22
Government Business Enterprises (GBE)	Based on government projections, and adjusted for the impact of the Fair Hydro Plan as recommended by the Auditor General	Income from GBEs are projected to fall from $5.6 billion in 2016-17 to $3.1 billion in 2017-18 and remain roughly stable at that level to 2021-22

7 The reduction in the Small Business Corporate Income Tax rate is reflected in the FAO's tax revenue projections.

Commented [GNR12]: OFA: The costs are still to be paid by the specified consumers, so not a subsidy.

Commented [GNR13]: OFA: Perhaps a suggested rewording?

Or, would it be more consistent for FAO to show it as an Energy expense line increase, through IESO consolidation? (Noting that the government's position is that there is not an expected net impact from the refinancing.)

Commented [GNR14]: OFA: This may be misleading to show an impact on the revenue side, in that the AG's recommendation was that all interest expense, and annual financing shortfall expense would be an expense to the Province (p. 16).

Commented [GNR15]: OPCD: The IESO incurs the shortfall, not OPG; reported as expense on full consolidation basis (no impact to revenue).

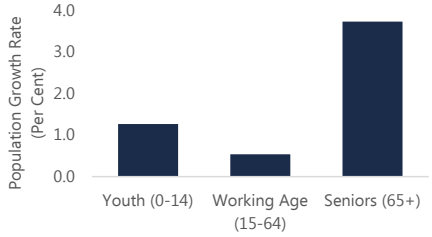
Commented [GNR16]: OB: Should the years presented in the graph be fiscal years? E.g. 2019-20 etc.

Commented [GNR17]: OPCD: IESO is not a GBE.

Commented [GNR18]: OPCD: See note above (IESO would be affected under the AG recommended accounting; not a GBE)

Other Revenue	Based on government projections, and includes asset sales, and proceeds from the sale of cap and trade allowances	These revenues are projected to increase from $16.3 billion in 2016-17 to $19.4 billion in 2017-18, before declining to $18.0 billion by 2021-22

Expense Outlook



Program Spending

The FAO projects program spending to grow by 3.9 per cent from 2017-18 to 2021-22.[8]

Over the 2017-18 to 2019-20 period, the FAO's outlook adopts the government's 2017 Fall Economic Statement's projections for program spending, adjusted to reflect the Auditor General's recommended accounting presentation.[9] The projection for program spending is largely unchanged from the 2017 Ontario Budget, aside from $200 million of new spending in 2017-18, declining to $100 million by 2019-20.[10]

Beyond 2019-20, the FAO projects program spending will grow at an annual average rate of 4.1 per cent. This stronger pace of growth reflects additional spending to meet two demographic pressures: the aging baby boomer cohort and the growing youth population. The growth in these two population groups will place added spending pressures on Ontario's health care and education systems.

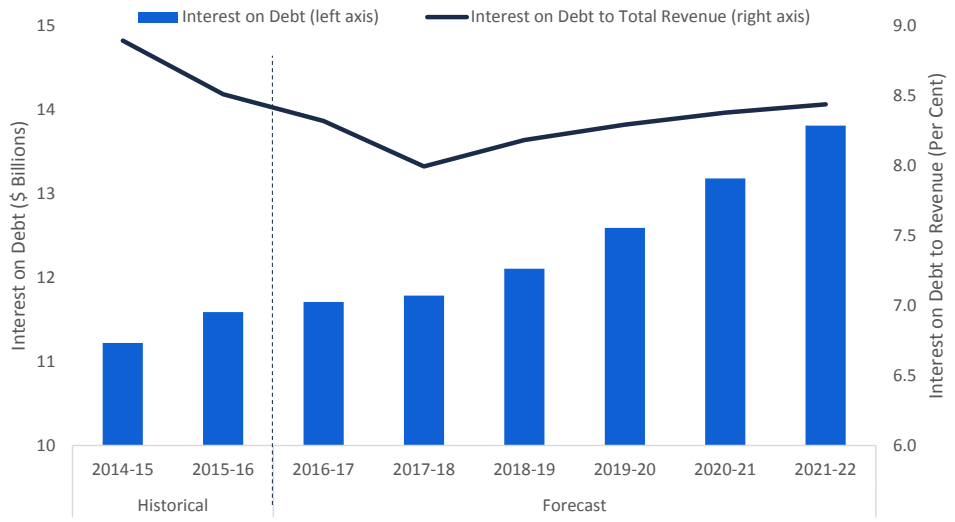
Population Growth by Age (2016-2021)

Source: Statistics Canada and FAO

Interest on Debt

Interest on debt (IOD) payments are expected to increase at an average rate of 3.4 per cent per year over the outlook due to elevated borrowing levels and rising interest rates.

The decline in IOD as a share of revenues over the past three years was due to stronger revenue growth, lower borrowing and maturing debt being refinanced at much lower rates of interest. However, this trend is expected to reverse over the outlook as revenue growth moderates while IOD payments accelerate. By 2021-22, Ontario's debt interest payments will account for 8.4 per cent of total revenue, slightly higher than the 8.1 2 per cent share in 2017-18.



Commented [ES19]: OFA: 2017 FES; it appears that the FAO does not use BPS-consolidated IOD; this choice also affects the IOD chart on page 9.

8 Excluding the pension adjustment, the FAO projects program spending to grow by 3.5 per cent on average from 2017-18 to 2019-20, largely unchanged from the FAO's Spring EFO.

9 Based on information provided by the Ministry of Finance, the FAO's projection for 'Other Spending' includes $2.3 billion in 2017-18 for the valuation allowance on jointly-sponsored pension assets, growing to $2.9 billion by 2021-22.

10 In the 2017 FES, the government announced new funding for additional spending for small businesses, seniors and child care. However, the additional expenses for child care is fiscally neutral since it is funded by a corresponding increase in federal transfer revenue.

Interest on Debt

Source: Ontario Public Accounts and FAO.

Borrowing and Net Debt

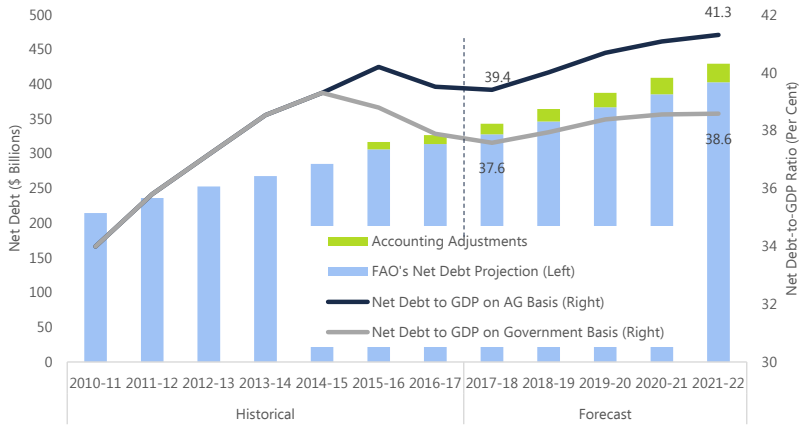
Despite higher funding requirements for capital expenditures and the Fair Hydro Plan, Ontario's borrowing is expected to decline to $~~23~~25.8 [OFA]billion in 2017-18, the lowest level of borrowing since ~~2007~~2008-09 [OFA]. The relatively low level of borrowing in 2017-18 is largely the result of debt maturities falling by $~~4.1~~3.5 billion to $17.4 billion.[11]

Beginning 2018-19, borrowing requirements are expected to increase significantly due to higher annual debt maturities, ~~additional funding requirements for the Fair Hydro Plan~~ [OFA]and rising capital expenditures. By 2021-22, the FAO expects borrowing to increase to $42 billion – nearly double the borrowing requirement in 2017-18.

In 2017-18, the FAO projects that Ontario's net debt-to-GDP ratio will edge down, reflecting lower borrowing and strong economic growth. However, over the next five years, the FAO projects that nearly $90 billion will be added to net debt – increasing the net debt-to-GDP ratio to 41 per cent by 2021-22.[12]

11 When debt matures the government must roll over the maturing debt with new borrowing. Declines in maturities result in lower borrowing and vice versa.
12 The FAO's estimate of net debt incorporates the AG's recommended accounting framework.

Commented [GNR20]: In the graph, the bar for 2016–17 can be moved into the historical section.



Commented [ES21]: OFA 2016-17 maturities of 20.9 (from Q1 Finances) minus 2017-18 maturities of 17.4 (from FES FT)

Commented [ES22]: OFA: The Province has already factored in all borrowing requirements, including the debt burden projections for the Fair Hydro plan for that year, in consultation with OPG and retained consultants. The $42 billion therefore is in excess of Ontario's projection by a significant amount.

Commented [ES23]: OFA: The change in net debt reflects the change in the deficit and the change in Net Investment in Tangible Capital Assets – it should not be attributed to lower borrowing which is really the outcome

Commented [ES24]: OFA: With regard to the 41% by the FAO in 2021-22, the Province projects it to be 36.1% for that year as published in the Fall Economic Statement. In the Province's opinion, the FAO is likely factoring in a budget deficit that the government does not project for that year given the balanced budget commitment The FAO's projections include the addition of the 2015-16 Pension adjustment despite the pronouncements of the Expert Panel that confirmed the correctness of the Government's accounting treatment of this asset The reversal of the pension adjustment is correct and in line with the recommendations of the Independent Pension Asset Expert Advisory Panel. The FAO also includes additional Fair Hydro Plan debt that is not in line with provincial projections already incorporated in the Province's Borrowing Program for 2017-18 and the two out years. The incremental borrowings for funding the Province's equity injection to OPG over the FES outlook period is a small fraction of the Province's borrowings and have no impact on the Province's net debt.

Net Debt Outlook

Source: FAO and 2017 Ontario Economic Outlook and Fiscal Review, Ontario Public Accounts

The government continues to maintain a net debt-to-GDP target of 35 per cent by 2023-24 and 27 per cent by 2029-30. However, the FAO's net debt-to-GDP projections under both accounting presentations suggest that additional fiscal measures would be required for the government to achieve its net debt-to-GDP targets.

Anna,

With regard to the FAO Summary page, most of the document checks out, but as we stated in the comments, we are not sure how the FAO calculated $29 billion in accumulated deficit impacts. We also made a minor edit, replacing the word "option" with "opinion" in the Key Points section.

The FAO Fiscal Outlook document appears to have the comments we sent to Selena a month or so ago.

Thanks.

John

Hi Ken,

Office has prepared the attached summary note of the forthcoming FAO report on the fiscal and economic outlook. Just a few net debt-to-GDP numbers for us to check.

Could you please send any **edits to me by noon tomorrow for Gadi's review**? Note, Office of the Budget is expecting an embargoed copy of the report to be sent over tomorrow which could result in updates to the attached note.

Thanks, Anna

Subject: FAO EFO Report Summary Note / Request for Input

Hi All,

Attached is a draft FAO EFO report summary note for review with a few caveats. An embargoed copy of the FAO's final EFO report will be released tomorrow and might result in updates. In addition, OEP will be adding a summary on the economic outlook and related key messages in order to have one consolidated product. For your general reference, I'm re-attaching the final comments that were submitted to the FAO.

Could your areas please review the attached summary note and aim to provide ADM approved edits in tracked changes by **EOD tomorrow**? These edits should align with the final EFO report being released tomorrow.

Please let me know if you have any questions.

Thanks,
Ryan

FAO's 2017 Fall Fiscal Outlook – OB Summary

ISSUE

The Financial Accountability Office is set to release its 'Fall Economic and Fiscal Outlook' report. This note summarizes the fiscal chapter of the report.

TOP MESSAGES

- I would like to thank the Financial Accountability Officer (FAO) for releasing his fall economic and fiscal outlook for Ontario. We value the FAO's independent assessment and projections of the province's fiscal plan.
- As outlined in the 2017 Ontario Economic Outlook and Fiscal Review, the government is projecting a balanced budget for 2017–18 and to remain balanced in 2018–19 and 2019–20.
- The FAO report also projects a balanced budget for Ontario this year.
- The government has a strong track record of beating its fiscal targets. In fact, the Public Accounts of Ontario reported that the 2016–17 deficit was $1.0 billion, beating our annual deficit target again, for the eighth year in a row.
- The 2017 Ontario Economic Outlook and Fiscal Review builds on the government's track record of fiscal management that has resulted in $29 billion in accumulated deficits being avoided over the past seven years, relative to the 2010 Budget forecast.
- We are also targeting a net debt-to-GDP ratio of 35 per cent by 2023–24 and reducing Ontario's net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029–30.
- Since 2014, Ontario's real GDP growth has strengthened, positioning Ontario as a growth leader, not only in Canada, but among G7 countries. In fact, over the 2014-17 period, Ontario's real GDP growth is on pace to exceed that of all G7 countries.
- Private-sector economists are projecting continued growth for Ontario over the forecast horizon; the FAO's real GDP projections are aligned with the 2017 Fall Economic Statement over the 2017 to 2020 period.
- This shows that our plan to make strategic investments in Ontario to grow the economy is working.
- A balanced budget is providing the Province the fiscal flexibility to invest more in health care, education, support for seniors and small businesses and other public services that matter most to Ontario families. It also adds stability to Ontario's finances and positions the government to better respond to demographic challenges and unexpected global economic shocks that the province will face over the next decade.

Commented [SM1]: Unable to verify how the $29 billion is calculated. The 2010 Budget only goes up to 2012-13.

KEY POINTS

Fiscal Outlook

- The FAO is projecting a budget deficit of $3.9 billion in 2017–18 using the **Auditor General's recommended accounting treatment for both the Fair Hydro Plan and the net pension assets of jointly sponsored pension plans.** In the absence of any fiscal policy changes this grows steadily to $9.6 billion in 2021-22.
- Under the **government's accounting presentation (excluding the AG's recommendations)**, the FAO projects a small surplus for 2017–18 of $0.3 billion (excluding the reserve) and a return to deficits beyond 2017–18 driven by revenue factors - loss of temporary revenues combined with more moderate tax revenue growth.
- The FAO suggests that by not adopting the AG's recommended accounting presentation, the 2017 Budget and the 2017 FES reduced transparency and clarity of Ontario's fiscal position and as a result Ontario will continue to receive qualified ~~options~~ opinions from the AG.

Budget Balance - FAO's Fiscal Outlook ($ Billions)	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
AG Presentation	-5.0	-2.5	-3.9	-7.2	-7.9	-8.9	-9.6
Government Presentation	-3.5	-1.0	0.3	-1.9	-2.0	-2.6	-3.5
2017 FES -- Excluding Reserve	-3.5	-1.0	0.5	0.5	0.8	N/A	N/A

Revenue Outlook

- Using the AG presentation, the FAO is projecting average annual revenue growth of 2.6 per cent from 2016-17 to 2019-20 as compared with the government's projections of 4.0 per cent. The main drivers are:
    - The FAO projections for taxation revenues are $2.9 billion lower by 2019-20 than the projections in the 2017 FES due to lower projected growth in household spending, labour income and corporate profits.
    - The FAO projects that, based on the AG presentation, the Fair Hydro Plan will lower net income from OPG by $3.4 billion lower by 2019-20.
    - In addition, the FAO continues to highlight a number of one-time 2017-18 revenues, including: increase to sales and rentals from sale of final tranche of H1, higher federal transfers for infrastructure (PTIF), one-time boost from extra Cap and Trade auction. Taken together the FAO estimates that these amount to $4.5 billion in additional one-time revenues in 2017-18.

Expense Outlook

- From 2017–18 to 2019–20 the FAO's outlook adopts the government's 2017 FES projections for program spending, **adjusted to reflect the AG's recommended accounting presentation.** Beyond 2019–20 the FAO projects program spending will grow faster -- at an average annual rate of 4.1 per cent – due to population pressures.

Borrowing and Net Debt

- Using the **government's accounting presentation** net debt-to-GDP is expected to reach 38.4 per cent by 2019–20 and 38.6 per cent by 2021–22. This increases to 41.3 per cent by 2021–22 **under the AG's accounting presentation**.
    - The 2017 FES projected a net debt-to-GDP ratio of 37.0 per cent by 2019–20.

FAO's 2017 Fall Economic and Fiscal Outlook

ISSUE

On Monday Dec 11th, 2017 the Financial Accountability Office will release its 'Fall Economic and Fiscal Outlook' report. This note is a summary.

TOP MESSAGES

- I would like to thank the Financial Accountability Officer (FAO) for releasing his fall economic and fiscal outlook for Ontario. We value the FAO's independent assessment and projections of the province's fiscal plan.
- The government is committed to a responsible fiscal plan that provides the conditions for all Ontarians to thrive.
- As outlined in the 2017 Ontario Economic Outlook and Fiscal Review, the government is projecting a balanced budget for 2017–18 and continued balance in 2018–19 and 2019–20.
- The FAO report also projects a balanced budget for Ontario this year.
- The government has a strong track record of beating its fiscal targets. In fact, the Public Accounts of Ontario reported that the 2016–17 deficit was $1.0 billion, beating our annual deficit target again, for the eighth year in a row.
- The 2017 Ontario Economic Outlook and Fiscal Review builds on the government's track record of fiscal management that has resulted in $29 billion in accumulated deficits being avoided over the past seven years, relative to the 2010 Budget forecast.
- We are also targeting a net debt-to-GDP ratio of 35 per cent by 2023–24 and reducing Ontario's net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029–30.
- Since 2014, Ontario's real GDP growth has strengthened, positioning Ontario as a growth leader, not only in Canada, but among G7 countries. In fact, over the 2014-17 period, Ontario's real GDP growth is on pace to exceed that of all G7 countries.
- Private-sector economists are projecting continued growth for Ontario over the forecast horizon; the FAO's real GDP projections are aligned with the 2017 Fall Economic Statement over the 2017 to 2020 period.
- This shows that our plan to make strategic investments in Ontario to grow the economy is working.
- A balanced budget is providing the Province the fiscal flexibility to invest more in health care, education, support for seniors and small businesses and other public services that matter most to Ontario families. A balanced budget also adds stability to Ontario's finances and positions the government to better respond to demographic challenges and unexpected global economic shocks that the province will face over the next decade.
- We will continue moving forward on our fiscally responsible plan that creates fairness and opportunity for all Ontarians.

KEY POINTS

Economic Outlook

- The FAO has raised its forecast for Ontario economic growth in 2017 from its spring outlook report. However, despite this upward revision, the FAO forecast is at the bottom of the current range of the MOF survey of private sector forecasts for both real and nominal GDP growth in 2017.
- Beyond 2017, the FAO forecast anticipates growth to moderate as the housing market and consumer spending cool alongside gradually rising interest rates, in line with the FES forecast.
- Over the 2017 to 2020 period, the FAO's forecast for average annual real GDP growth of 2.2 per cent is the same as the 2017 FES outlook.
- However, for nominal GDP growth, the FAO's average annual forecast of 4.2 per cent over the 2017 to 2020 period is slower than the FES projection of 4.4 per cent growth. This difference is explained by a much lower FAO nominal GDP forecast in 2017 compared to the FES (4.7 per cent vs 5.3 per cent).
- The FAO forecast takes into account its estimate of the impact of the new minimum wage legislation, which is expected to boost wage growth over the forecast, but temper employment gains. Even with these employment impacts, the FAO predicts a modest decline in the unemployment rate.

Fiscal Outlook

- The FAO is projecting a budget deficit of $4.0 billion in 2017–18 using the **Auditor General's recommended accounting treatment for both the Fair Hydro Plan and the net pension assets of jointly sponsored pension plans.** In the absence of any fiscal policy changes the deficit grows steadily to $9.8 billion in 2021-22.
- Under the **government's accounting presentation (excluding the AG's recommendations)**, the FAO projects a small surplus for 2017–18 of $0.2 billion (excluding the reserve) and a return to deficits beyond 2017–18 driven by revenue factors - loss of temporary revenues combined with more moderate tax revenue growth.
- The FAO suggests that by not adopting the AG's recommended accounting presentation, the 2017 Budget and the 2017 FES have reduced transparency and clarity of Ontario's fiscal position and Ontario will continue to receive qualified opinions from the AG on its Pubic Accounts.

Budget Balance - FAO's Fiscal Outlook ($ Billions)	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
AG Presentation	-5.0	-2.4	-4.0	-7.1	-7.8	-9.0	-9.8
Government Presentation	-3.5	-1.0	0.2	-1.9	-1.9	-2.6	-3.7
2017 FES -- Excluding Reserve	-3.5	-1.0	0.5	0.5	0.8	N/A	N/A

Revenue Outlook

- The FAO is projecting average annual revenue growth of 3.2 per cent from 2016-17 to 2019-20 as compared with the government's projections of 4.0 per cent. The main drivers are:
    - The FAO projections for taxation revenues are $2.9 billion lower by 2019-20 than the projections in the 2017 FES due to lower projected growth in household spending, labour income and corporate profits.
    - In addition, the FAO continues to highlight a number of one-time 2017-18 revenues, including: increase to sales and rentals from sale of final tranche of H1, higher federal transfers for infrastructure (PTIF), a one-time boost from extra Cap and Trade auction. Taken together the FAO estimates that these amount to $4.5 billion in additional one-time revenues in 2017-18.

Expense Outlook

- From 2017–18 to 2019–20 the FAO's outlook adopts the government's 2017 FES projections for program spending, **adjusted to reflect the AG's recommended accounting presentation.**
    - Both the Fair Hydro Plan and net pension asset adjustment impact the expense side with a combined impact of approximately $4.2 billion in 2017-18.
- The FAO notes that in 2018-19 and 2019-20, increases in program spending will be restrained to an average of 2.4 percent, below the growth in underlying spending pressures. Beyond 2019–20 the FAO projects program spending will grow faster -- at an average annual rate of 4.2 per cent – due to population pressures.

Borrowing and Net Debt

- Using the **government's accounting presentation** net debt-to-GDP is expected to reach 38.5 per cent by 2019–20 and 38.7 per cent by 2021–22. This increases to 41.4 per cent by 2021–22 **under the AG's accounting presentation for jointly sponsored pension plans and the Fair Hydro Plan**.
    - The 2017 FES projected a net debt-to-GDP ratio of 37.0 per cent by 2019–20.

Comparison: 2017 Fall Economic Statement and the 2017 Fall FAO Fiscal Outlook

Importance:	High

Hi Ken,

I don't see anything here for the OFA to respond to, so just an FYI. The FAO has sent its formal request for information for its Spring Economic and Fiscal Outlook. The information request is broken up into two categories – background information by March 16, and then details immediately following the release of the Budget. I've copied the request below for ease of reference.

March 16

1. The latest estimates from the data tables of the Fourth Quarter 2017 Ontario Economic Accounts, as of March 16, 2018;
2. An updated projection of the annual cost of the refinancing portion of the Fair Hydro Plan to 2048;
3. A projection of annual OHIP+ expense to 2022-23*;
4. Data on tangible capital assets, amortization expense and gross infrastructure expenditure by sector from 2010-11 to 2016-17; and
5. Detailed information on one-time and other adjustments to revenue for 2016-17 and 2017-18.

Post Budget

6. Updated information related to the impact of the Auditor General's recommended accounting treatment for assets in jointly-sponsored pension plans to 2022-23*;
7. Data on tangible capital assets, amortization expense and gross infrastructure expenditure by sector from 2017-18 to 2027-28;
8. Detailed revenue outlook to 2022-23* from the 2018 Budget;
9. Detailed expense outlook to 2022-23* from the 2018 Budget;
10. 10.Details of changes by year to the revenue projection in the 2018 Budget to 2022-23*, since the 2017 Fall Economic Statement, including individual budget measures; and
11. 11.Details of changes by year to the program spending projection in the 2018 Budget to 2022-23*, since the 2017 Fall Economic Statement, including individual budget measures.

** The FAO requests the forecast to 2022-23 or the latest year available.*

If you see anything here that may require input from the OFA, please let me know.

Anna

Importance: High

Hi All,

Thanks for your input on the initial scoping of the FAO's spring EFO request. As a follow up to their initial outreach, please find attached the FAO's formal information request. I'm including a breakdown by program area for the pre-budget information below. The FAO will be following up to request items 6-11 immediately following the release of the budget.

1. The latest estimates from the data tables of the Fourth Quarter 2017 Ontario Economic Accounts, as of March 16, 2018; (OEP)
2. An updated projection of the annual cost of the refinancing portion of the Fair Hydro Plan to 2048; (ENE)
3. A projection of annual OHIP+ expense to 2022-23*; (OEMD)
4. Data on tangible capital assets, amortization expense and gross infrastructure expenditure by sector from 2010-11 to 2016-17; (PPD and CEMD) and
5. Detailed information on one-time and other adjustments to revenue for 2016-17 and 2017-18. (OEP)

** The FAO requests the forecast to 2022-23 or the latest year available.*

Could you please send your ADM approved pre-budget information/submissions to myself (with a copy to Daniel Tiburcio and Paul Ternamian) **by noon on Tuesday, March 13**? A consolidated package of information will then need to be shared with the DMOs.

Please let me know if you have any questions.

Thanks,
Ryan

Dear Deputy Angus and Deputy Thompson,

Please find attached the request for information to support our analysis for the upcoming 2018 Spring Economic and Fiscal Outlook.

As indicated in the letter, we are seeking five pieces of information by March 16, 2018, and six pieces of information on Budget day. In addition, we may make an additional request for background information on budget measures following the release of the budget.

Should you or your staff have any questions about this request, I would ask that you contact Luan Ngo at lngo@fao-on.org or by phone at 416-277-1856.

I thank you and your staff for your assistance in this request.

Thank you,

RE: FAO Information Request (EFO-Spring 2018)

Dear Deputies Angus and Thompson:

My mandate as Temporary Financial Accountability Officer is to provide the Legislative Assembly of Ontario with the economic and financial analysis it needs to perform its constitutional functions.

My staff are currently preparing analysis to support the FAO's bi-annual Economic and Fiscal Outlook (EFO) report. This work is undertaken under paragraph 10(1)(a) of the *Financial Accountability Officer Act, 2013* (the Act), which allows the Officer to "provide, on his or her own initiative, an independent analysis to the Assembly about the state of the Province's finances, including the budget, and trends in the provincial and national economies."

As per subsection 12(1) of the Act, I request that your ministries provide me with information outlined in this letter by completing Attachment 3. Specifically, I am requesting that you direct your staff to provide me with the following background information by March 16, 2018:

1. The latest estimates from the data tables of the Fourth Quarter 2017 Ontario Economic Accounts, as of March 16, 2018;

2. An updated projection of the annual cost of the refinancing portion of the Fair Hydro Plan to 2048;

3. A projection of annual OHIP+ expense to 2022-23*;

4. Data on tangible capital assets, amortization expense and gross infrastructure expenditure by sector from 2010-11 to 2016-17; and

5. Detailed information on one-time and other adjustments to revenue for 2016-17 and 2017-18.

* The FAO requests the forecast to 2022-23 or the latest year available.

2 Rue Bloor Ouest, Bureau 900, Toronto, Ontario M4W 3E2 | 416.644.0702 | fao-on.org | info@fao-on.org
Bureau de la Responsabilité Financière de l'Ontario

In addition, immediately following the release of the 2018 Budget, I request that you provide us with the following Budget-related information:

6. Updated information related to the impact of the Auditor General's recommended accounting treatment for assets in jointly-sponsored pension plans to 2022-23*;

7. Data on tangible capital assets, amortization expense and gross infrastructure expenditure by sector from 2017-18 to 2027-28;

8. Detailed revenue outlook to 2022-23* from the 2018 Budget;

9. Detailed expense outlook to 2022-23* from the 2018 Budget;

10. Details of changes by year to the revenue projection in the 2018 Budget to 2022-23*, since the 2017 Fall Economic Statement, including individual budget measures; and

11. Details of changes by year to the program spending projection in the 2018 Budget to 2022-23*, since the 2017 Fall Economic Statement, including individual budget measures.

* The FAO requests the forecasts for these data to 2022-23 or the latest year available.

Following the release of the Budget, I will be requesting additional background information on specific tax and spending measures announced in the 2018 Budget. My staff will provide you with details on this request for additional background information within 48 hours of the release of the Budget. If possible, I ask that this information be provided within two business days of the request.

In addition, I request that your ministries complete Attachment 1 by outlining any disclosure restrictions related to the information request.

- If you believe that some or all of the requested information falls under the Cabinet records exception under subsection 12(2) of the FAO Act and that Cabinet has not consented to provide that information to the FAO in the Cabinet records order-in-council (see OC 1412/2016, Attachment 2), please describe the information in the Cover spreadsheet (Attachment 1) and explain why you believe the exception prevents you from providing me with the information.

- If you believe that some or all of the information that you are providing in response to this request is subject to the disclosure restrictions under the Cabinet records order-in-council, please clearly identify the information in question.

- If you believe that some or all of the requested information is personal information and/or personal health information exceptions under subsection 12(3) of the FAO Act, please

describe the information in the Cover spreadsheet (Attachment 1), and explain why you believe that exception applies and why you have been unable to redact the information in accordance with subsection 12(4) of the FAO Act.

- If you believe that some or all of the information that you are providing in response to this request is subject to the disclosure restrictions in paragraphs 2, 3 and/or 4 of section 13 of the FAO Act, please identify the information in question and in the Cover spreadsheet (Attachment 1), identify which condition applies, citing the specific provision of the *Freedom of Information and Protection of Privacy Act*.

  If the restriction is intended to protect the interests of other public institutions, governments, third parties and/or legal privilege holders, please specifically identify any institutions, governments, third parties and/or legal privilege holders whose interests would be affected by the disclosure of the information.

I have enclosed the *Guide to Responding to Information Requests from the FAO,* including the Cabinet records order-in-council (Attachment 2) to assist you with this information request.

Please note that any cover letter accompanying your response to this request will be posted publicly on the FAO website, but attachments will not.

Should you or your staff have any questions about this request, I would ask that you contact Luan Ngo at lngo@fao-on.org or by phone at 416-277-1856.

I would like to thank you for your assistance in this matter. My primary objective is to provide timely and relevant analysis to the Legislative Assembly. My ability to do so depends on the timely provision of information held by your ministries, which I believe is necessary for the work of the FAO. By providing me with this information, you are assisting me in better serving all Members of Provincial Parliament.

Sincerely,

The Honourable J. David Wake
Temporary Financial Accountability Officer

Guide to Responding to Information Requests from the Financial Accountability Officer of Ontario

Purpose of this Document

This guide has been developed to aid ministries and public entities in preparing responses to information requests from the Financial Accountability Officer of Ontario (FAO). This guide is not a substitute for the *Financial Accountability Officer Act, 2013* (FAO Act) and the Cabinet records order-in-council (OC 1412/2016 –attached for reference). The FAO Act and the order-in-council should be reviewed before responding to requests from the FAO.

Questions and Answers

1. Under what authority is the FAO making this information request?

Under subsection 12(1) of the FAO Act, ministries and public entities have the duty to provide the FAO with information in their custody or under their control that the FAO believes to be necessary to perform his duties.

2. What information needs to be provided?

You must provide all financial, economic or other information that is in your ministry's or public entity's custody or control that the FAO believes to be necessary to perform his duties. Please review the information request carefully in determining which records are responsive. In responding to the information request please complete the cover spreadsheet provided, listing all the responsive records with a description of each record.

3. What is the deadline?

All information requests have a deadline included in the cover letter and on the attached information request itself.

4. What if our ministry or public entity cannot meet the deadline?

If your ministry or public entity cannot meet the deadline set out in the request, please notify the FAO contact identified in the information request and request an extension. The FAO will not unreasonably withhold extensions.

5. How should the information be transmitted to the FAO?

Non-confidential information may be transmitted to the FAO by e-mail. The FAO contact identified in the information request should be copied.

Confidential information should be transmitted securely. Please speak to the FAO contact to arrange for secure delivery.

6. In what format should I provide information to the FAO?

To the extent possible, information should be provided in machine-readable format such as Microsoft Word or Excel or files readable with this software. PDF is acceptable when machine readable formats are not available.

7. What if I don't understand what is being requested?

If you do not understand what information is being requested or require any clarification, please speak to the FAO contact identified in the information request. The FAO contact would be happy to provide clarification and explanation.

8. What if the information being requested does not exist within my ministry or public entity?

Please indicate in your response that no records exist that would respond to the request. If possible, please provide information on which ministry or public entity has custody or control of, or might have custody or control of, a particular record.

9. What if the information requested requires my ministry or public entity to incur costs?

Under subsection 12(1) of the FAO Act, all information must be provided free of charge.

10. When can/must information be withheld from the FAO?

There are only three limited circumstances in which a ministry or public entity cannot provide information to the FAO:

- the information is contained in a Cabinet record which Cabinet has not consented to provide to the FAO (subsection 12(2) of the FAO Act, section 12 of the *Freedom of Information and Protection of Privacy Act* and OC 1412/2016);

- it is personal information within the meaning of the *Freedom of Information and Protection of Privacy Act* (see subsection 12(3) of the FAO Act); or

- it is personal health information within the meaning of the *Personal Health Information Protection Act, 2004* (see subsection 12(3) of the FAO Act).

Subsection 12(4) of the FAO Act requires that ministries and public entities take reasonable steps to redact personal information and personal health information from their responses to FAO requests in order to maximize the information they can provide.

Cabinet has consented for ministries and public entities to provide the FAO with certain information contained in Cabinet records (OC 1412/2016). The order-in-council has the effect of narrowing the application of the Cabinet records exception in subsection 12(2) of the FAO Act. As a result, you must provide information contained in Cabinet records that is necessary for the performance of the FAO's duties provided that:

- The information is not available from other sources (please indicate the other source where possible);

- The decision to which the information relates has been made by Cabinet or one of its committees and publicly announced, even if Cabinet or one of its committees could engage in further deliberation about the decision;

- The information is not:

    - An agenda of Cabinet or one of its committees;

    - A minute of Cabinet or one of its committees, unless the minute is the only source of the information;

    - Policy or costing options or recommendations, unless the option or recommendation was selected by Cabinet or one of its committees;

    - The substance of deliberations of Cabinet or one of its committees concerning those options and recommendations, other than deliberations related to the option or recommendation selected that would be apparent from its disclosure;

    - Information concerning the individual opinions of Cabinet ministers;

    - A communications plan, stakeholder management plan, key messages or other communications materials;

    - Draft legislation or regulations, unless approved by Cabinet or one of its committees.

Should one of these three circumstances affect a record that is responsive to an FAO information request, please identify which of the three circumstances applies and explain why you believe it applies in the cover spreadsheet provided, listing all the responsive records with a description of each record. In the case of the personal information or personal health information exceptions, please explain why you believe that exception applies and why you have been unable to redact the information in accordance with subsection 12(4) of the FAO Act.

11. Can I withhold from the FAO commercially sensitive information?

No. Commercial sensitivity is not a valid justification for withholding information from the FAO. The only valid justifications for refusing to provide information to the FAO are the Cabinet records, personal information and personal health information exceptions set out in subsections 12(2) and (3) of the FAO Act (see Question 10 for more details).

12. Do I have to provide to the FAO information that has not been publicly released?

Yes. Not having been released publicly is not a valid justification for withholding information from the FAO. The only valid justifications for refusing to provide information to the FAO are the Cabinet records, personal information and personal health information exceptions set out in subsections 12(2) and (3) of the FAO Act (see Question 10 for more details).

13. Do I have to provide information subject to solicitor-client privilege, litigation privilege and/or settlement privilege to the FAO?

Yes. The only valid justifications for refusing to provide information to the FAO are the Cabinet records, personal information and personal health information exceptions set out in subsections 12(2) and (3) of the FAO Act (see Question 10 for more details).

However, please note that the disclosure of information subject to solicitor-client privilege, litigation privilege and/or settlement privilege does not constitute a waiver of those privileges by virtue of subsection 12(6) of the FAO Act.

14. What happens if our ministry/public entity fails to comply with a request?

If the FAO is of the opinion that a ministry or public entity has failed to comply with an information request, the FAO will notify the deputy minister or head of the public entity in writing providing details of the non-compliance. The ministry or public entity will have a second opportunity to comply with the request.

Should the ministry or public entity fail to do so, the FAO may notify the minister responsible and the head of the public entity (if applicable). If the matter is not resolved in a timely manner, the FAO may then notify the Speaker of the Legislative Assembly and the Chair of the Standing Committee on Finance and Economic Affairs under subsection 12(5) of the FAO Act.

15. What happens if our ministry/public entity is not able to provide requested information because some or all of this information falls under the Cabinet records, personal information or personal health information exceptions?

If a ministry or public entity has not provided the requested information because some or all this information falls under one of the exceptions to the ministry or public entity's duty to provide information under subsection 12(1) of the FAO Act, the FAO will evaluate the justification provided by the ministry or public entity.

If the FAO is of the opinion that the ministry or public entity has failed to provide adequate justification, the FAO may notify the minister responsible and the head of the public entity (if applicable). If the matter is not resolved in a timely manner, the FAO may then notify the Speaker of the Legislative Assembly and the Chair of the Standing Committee on Finance and Economic Affairs that he is of the opinion that the ministry or public entity has failed to comply with the request for the purposes of subsection 12(5) of the FAO Act.

16. Will the FAO disclose the information that our ministry/public entity provides?

The FAO does not generally disclose information in raw form. Instead, the FAO provides the Legislative Assembly of Ontario with economic and financial analysis based on that information.

Furthermore, the FAO cannot disclose information unless the disclosure is essential for the performance of the FAO's mandate and four conditions under section 13 of the FAO Act are fulfilled:

- The information is not third party information (section 17 of the *Freedom of Information and Protection of Privacy Act*);
- The information does not involve relations with other governments (section 15 of the *Freedom of Information and Protection of Privacy Act*);
- The information would not affect the economic and other interests of Ontario (subsection 18(1) of the *Freedom of Information and Protection of Privacy Act*); and
- The information is not subject to solicitor-client privilege, litigation privilege or settlement privilege.

Moreover, the FAO cannot disclose information obtained solely from a Cabinet record (OC 1412/2016).

Should one of these five circumstances affect a record that is responsive to an information request, please clearly identify the record in the cover spreadsheet provided and identify which restriction applies, citing the specific provision in the *Freedom of Information and Protection of Privacy Act*.

If the restriction is intended to protect the interests of other public institutions, governments, third parties and/or legal privilege holders, please specifically identify any institutions, governments, third parties and/or legal privilege holders whose interests would be affected by the disclosure of the information.

For greater certainty, ministries and public entities must provide the FAO with requested information even if it is subject to one or more of these categories. The only valid justifications for refusing to provide information to the FAO are the Cabinet records, personal information and personal health information exceptions set out in subsections 12(2) and (3) of the FAO Act (see Question 10 for more details).

Additional Questions

If you have any additional questions or require clarification, please contact the FAO contact identified in the information request.

Executive Council of Ontario/Conseil exécutif de l'Ontario **[Bilingual]**

Ontario

Order in Council
Décret

On the recommendation of the undersigned, the Lieutenant Governor of Ontario, by and with the advice and concurrence of the Executive Council of Ontario, orders that:

Sur la recommandation de la personne soussignée, la lieutenante-gouverneure de l'Ontario, sur l'avis et avec le consentement du Conseil exécutif de l'Ontario, décrète ce qui suit :

WHEREAS the Financial Accountability Officer, an Officer of the Legislative Assembly, was appointed to provide independent analysis to the Assembly about the state of the Province's finances, including the budget, and trends in the provincial and national economies;

AND WHEREAS the Financial Accountability Officer requires access to information in the custody and control of Ministries and public entities in order to fulfill his statutory mandate;

AND WHEREAS certain information in the custody and control of Ministries and public entities is protected by the mandatory Cabinet Records exemption of section 12 of the *Freedom of Information and Protection of Privacy Act*;

AND WHEREAS the Lieutenant Governor in Council considers it advisable to provide the Financial Accountability Officer access to this information;

NOW THEREFORE Pursuant to subsection 12(2) of the *Financial Accountability Officer Act* (the "Act") and subsection12(2) paragraph (b) of the *Freedom of Information and Protection of Privacy Act*:

1. Every Ministry of the Government of Ontario and every public entity is authorized to provide to the Financial Accountability Officer any financial, economic or other information protected by section 12(1) of the *Freedom of Information and Protection of Privacy Act* that relates to:
    - The Province's finances, including the budget, and trends in the provincial and national economies
    - The estimates and supplementary estimates submitted to the Legislature
    - The financial costs or financial benefits to the Province of any public bill before the Assembly, or
    - The financial costs or financial benefits to the Province of any proposal that relates to a matter over which the Legislature has jurisdiction, including any proposal made by the Government or by any member of the Assembly

subject to paragraphs 2 and 3 below.

2. Information outlined in paragraph 1 above shall be provided to the Financial Accountability Officer in accordance with subsection 12(1) of the Act provided that:
    - The information has been requested by the Financial Accountability Officer
    - The information is not available through other sources
    - The policy or financial decision to which the requested information relates has been made by the Executive Council and announced to the public or tabled with or disclosed to the Legislative Assembly, even if the Executive Council or one of its Committees will or could engage in future deliberations with respect to the decision
    - The requested information is provided in a format that does not reveal other information protected by subsection 12(1) of the *Freedom of Information and Protection of Privacy Act,* including
        - an agenda
        - a Minute, unless the Minute is the only source of the requested information
        - policy or costing options or recommendations prepared for or submitted to the Executive Council or its committees other than the policy or costing option selected for implementation
        - the substance of the deliberations of the Executive Council or its committees regarding options or recommendations prepared for or submitted to the Executive Council or its committees, other than deliberations related to the policy option selected for implementation that would be apparent through the disclosure of the requested information
        - information reflecting the individual opinions of members of the Executive Council
        - a communications plan, stakeholder management plan, key messages, or other communications materials
        - draft legislation or regulations other than the particular draft approved by the Executive Council
    - The information would not reveal personal information or personal health information protected from disclosure by subsection 12(3) of the *Financial Accountability Officer Act*
    - The Financial Accountability Officer agrees not to disclose the information without the consent of the Executive Council

3. The provision of the information to the Financial Accountability Officer does not waive or limit the authority of the Head of an institution to apply the mandatory exemption of section 12(1) of the *Freedom of Information and Protection of Privacy Act* should the information be requested by any parties other than the Financial Accountability Officer.

- - - - - - -

ÉTANT DONNÉ que le directeur de la responsabilité financière, qui est un fonctionnaire de l'Assemblée, a reçu pour mission de fournir à l'Assemblée une analyse indépendante de la situation financière de la province, notamment du budget, et des tendances de l'économie provinciale et nationale;

ÉTANT DONNÉ que le directeur de la responsabilité financière a besoin de consulter des renseignements dont les ministères et les organismes publics ont la garde ou le contrôle afin de s'acquitter de la mission que lui confère la loi;

ÉTANT DONNÉ que certains renseignements dont les ministères et organismes publics ont la garde et le contrôle sont protégés par l'exception obligatoire relative aux documents du Conseil exécutif prévue à l'article 12 de la *Loi sur l'accès à l'information et la protection de la vie privée*;

ÉTANT DONNÉ EN OUTRE que le lieutenant-gouverneur en conseil considère qu'il est judicieux de permettre au directeur de la responsabilité financière de consulter ces renseignements;

EN CONSÉQUENCE, en vertu du paragraphe 12(2) de la *Loi sur le directeur de la responsabilité financière* (la « Loi ») et de l'alinéa 12(2)b) de la *Loi sur l'accès à l'information et la protection de la vie privée* :

1. Chaque ministère du gouvernement de l'Ontario et chaque organisme public est autorisé à transmettre au directeur de la responsabilité financière tout renseignement de nature financière, économique ou autre protégé par le paragraphe 12(1) de la *Loi sur l'accès à l'information et la protection de la vie privée* qui porte sur :
    - la situation financière de la province, notamment le budget, et les tendances de l'économie provinciale et nationale,
    - le budget des dépenses et le budget supplémentaire des dépenses présentés à la Législature,
    - les coûts ou avantages financiers pour la province de tout projet de loi d'intérêt public déposé à l'Assemblée,
    - les coûts ou avantages financiers pour la province de toute proposition qui se rapporte à une question relevant de la Législature, y compris une proposition du gouvernement ou d'un député,

    sous réserve des paragraphes 2 et 3 ci-dessous.

2. Les renseignements visés au paragraphe 1 ci-dessus seront transmis au directeur de la responsabilité financière conformément au paragraphe 12(1) de la Loi, pourvu que :
    - ces renseignements aient été demandés par le directeur de la responsabilité financière;
    - ces renseignements ne puissent pas être obtenus d'autres sources;
    - la décision relative aux politiques ou aux finances sur laquelle portent les renseignements ait été prise par le Conseil exécutif et annoncée au public ou présentée ou divulguée à l'Assemblée législative, même si le Conseil exécutif ou un de ses comités tiendra ou peut tenir des délibérations sur cette décision;
    - les renseignements demandés soient transmis sous une forme ne révélant pas d'autres renseignements protégés par le paragraphe 12(1) de la *Loi sur l'accès à l'information et la protection de la vie privée* comme :

- un ordre du jour,
- un procès-verbal, sauf s'il s'agit de la seule source des renseignements demandés,
- des choix ou des recommandations de politiques ou de calcul des coûts présentés au Conseil exécutif ou à ses comités ou formulés à leur intention, autres que le choix retenu aux fins de mise en œuvre,
- l'objet des délibérations du Conseil exécutif ou de ses comités relatives aux choix ou recommandations présentés à eux ou formulés à leur intention, autres que les délibérations relatives au choix retenu aux fins de mise en œuvre, qui ressortiraient de la divulgation des renseignements demandés,
- des renseignements révélant les opinions personnelles des membres du Conseil exécutif,
- un plan de communication, un plan de gestion relatif aux intervenants, des messages clés ou d'autres documents de communication,
- des projets de loi ou de règlement autres que le projet de loi ou de règlement approuvé par le Conseil exécutif;

- ces renseignements ne révèlent pas de renseignements personnels, notamment sur la santé, protégés par le paragraphe 12(3) de la *Loi sur le directeur de la responsabilité financière*;
- le directeur de la responsabilité financière accepte de ne pas divulguer les renseignements sans le consentement du Conseil exécutif.

3. La transmission de ces renseignements au directeur de la responsabilité financière ne supprime ni ne limite le pouvoir du haut responsable d'une institution d'appliquer l'exception obligatoire prévue au paragraphe 12(1) de la *Loi sur l'accès à l'information et la protection de la vie privée* si la demande est présentée par toute partie autre que le directeur de la responsabilité financière.

Subject: FW: FAO Releasing a Commentary on Wednesday, September 6 - 'Ontario's Debt Reduction Commitment Based on Unlikely Assumptions'

Please find attached an advanced embargoed copy of the FAO commentary to be released tomorrow morning on the government's plan to reduce net debt to GDP.

Note the FAO has provided this on a confidential basis ahead of tomorrow's release.

We'll work with Gadi's folks to update the CIU Note on debt management to reflect this update. It should also be reflected in upcoming Public Accounts comms materials.

Subject: FAO Releasing a Commentary on Wednesday, September 6 - 'Ontario's Debt Reduction Commitment Based on Unlikely Assumptions'

Good Morning,

Please be aware that the FAO will be releasing a commentary on our website tomorrow morning, assessing the assumptions behind the government's commitment to reduce the net debt-to-GDP ratio to 27% by 2029-30.

I've attached an embargoed copy for your reference. As always, please treat this as confidential until its release tomorrow morning.

Regards,

David West
Chief Economist

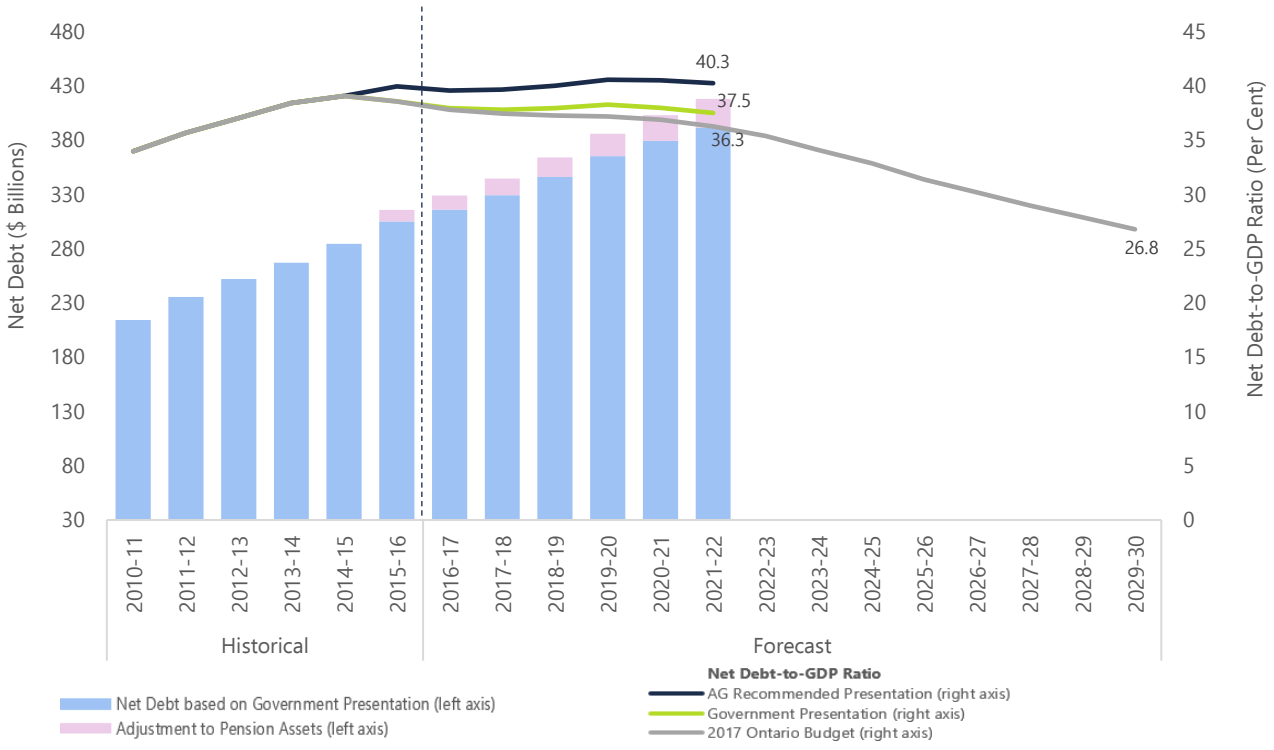
Ontario's Debt Reduction Commitment Based on Unlikely Assumptions



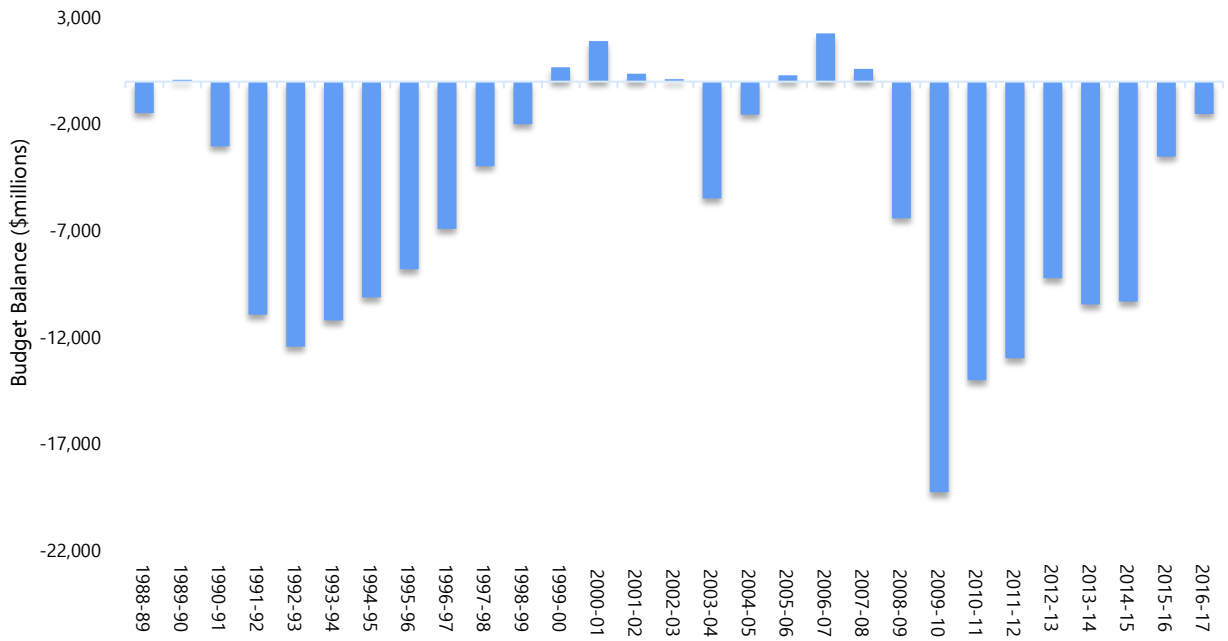
The FAO projects that Ontario's net debt will increase by $76 billion over the next five years to approximately $392 billion in 2021-22, resulting in the net debt-to-GDP ratio rising to 40.3 per cent.[1] In contrast, in the 2017 Budget, the Province projects a small decline in the net debt-GDP ratio to 36.3 per cent by 2021-22.

In the 2017 Budget, the government also restated its commitment to reduce the net debt-to-GDP ratio to its pre-recession level of 27 per cent. The Province projects that this 27 per cent target will be achieved by 2029-30, based on three key assumptions:

- on-going balanced budgets, on average, over the next 12 years[2];
- future capital spending as laid out in the long-term infrastructure plan; and
- a continuation of strong economic growth.

However, if any of these relatively optimistic assumptions fall short of expectations, the government's 27 per cent debt-to-GDP target would not be achieved.

Achievement of 27 Per Cent Debt-To-GDP Target Based on Unlikely Assumptions



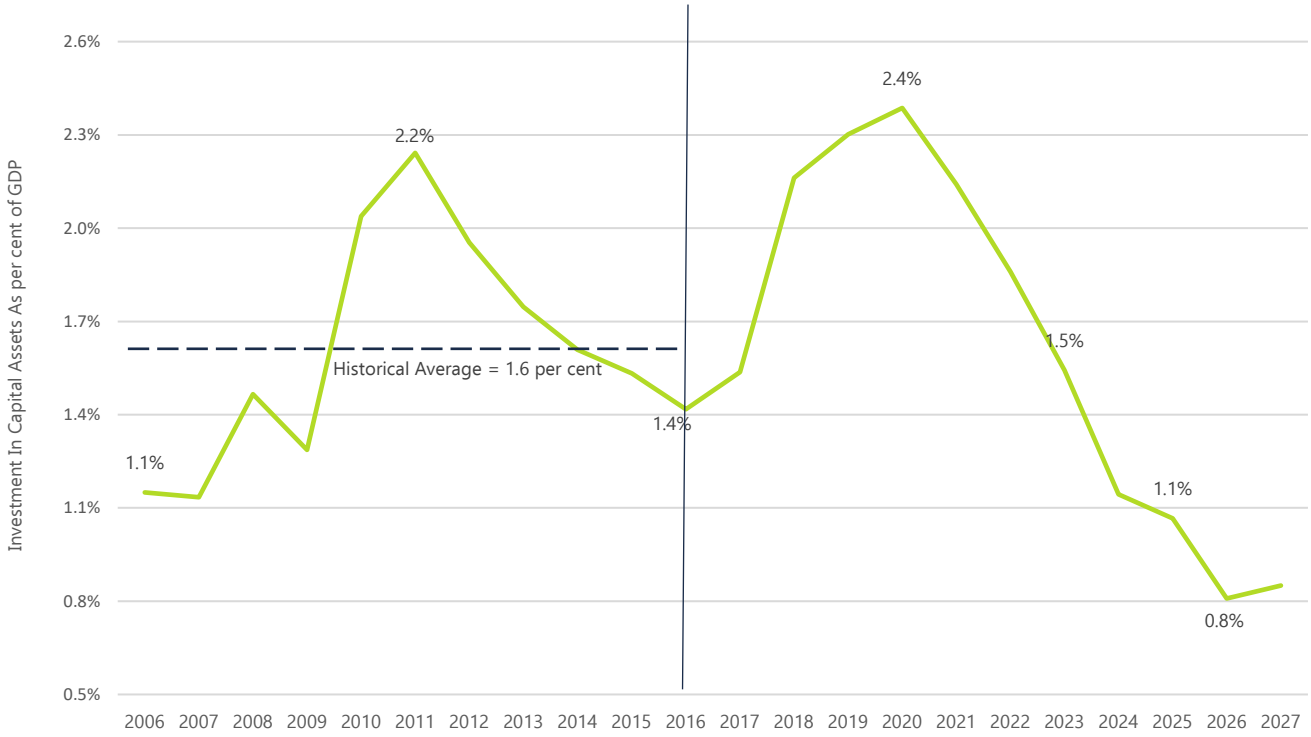
Note: AG recommended presentation based on FAO estimates of the pension adjustment.
Source: Ontario 2017 Budget and FAO

[1] Based on the FAO's application of the Auditor General's recommended accounting treatment for pension assets - see the FAO's 'Economic and Fiscal Outlook, Spring 2017'. By comparison, based on the government's accounting presentation, the FAO projects Ontario's net debt will rise by $62 billion to roughly $365 billion by 2021-22 and that the net debt-to-GDP ratio will fall modestly to 37.5 per cent.

[2] This does not imply that the province necessarily has to achieve balanced budgets in each year. Alternatively, it could post balanced budgets on average, with some years in surplus and some in deficit.

The government's forecast for a gradual decline in the net debt-to-GDP ratio depends critically on achieving a string of balanced budgets on average over the next 12 years. Over the past thirty years, Ontario has rarely achieved successive surpluses or balanced budgets. In contrast to the 2017 Budget, the FAO continues to project a steady deterioration in the budget deficit over the next five years, due to moderating revenue growth combined with higher expenses.

Ontario has Rarely Achieved Balanced Budgets in Consecutive Years



Source: Ontario Budgets 1988-89 to 2017-18

The government's debt reduction commitment is also linked to the Province's 13-year, $190 billion infrastructure plan which includes significant reductions in capital investment in the 2020s. After peaking in 2019-20 at 2.4 per cent of nominal GDP, the Province is projecting capital spending to fall to just 0.8 per cent of GDP by 2027-28 – half of the historical average of 1.6 per cent.

Since the Province has made substantial investments in public sector assets (such as hospitals) over the last 10 years, some pullback is to be expected.[3] However, given the government's focus on new and large transit and highway projects, it is likely that the Province will need to augment its capital plan and increase spending in the latter part of the next decade. Higher than planned capital spending in the future would add to the Province's net debt, increasing the net debt-to-GDP ratio.[4]

[3] See Infrastructure Ontario's list of major projects, http://www.infrastructureontario.ca/Major-Projects/, August 16, 2017.
[4] The government's capital spending projection may also prove to be too conservative given a number of announced but unfunded initiatives including high-speed rail and subway expansion in Toronto.

Investment in Capital Assets as a Share of GDP to Decline Sharply in the 2020s

Source: Investment in Capital Assets, 2017 Infrastructure Update, Ministry of Infrastructure, FAO

Finally, the government's debt-to-GDP projection relies on nominal GDP growing at an average pace of 4 per cent per year over the long-term.[5] However, nominal GDP growth has averaged just 3.6 per cent per year over the past 15 years, and given Ontario's aging population and slower expected growth in its labour force, 4 per cent annual growth may prove to be too optimistic for the next decade.

Given the risks associated with the government's assumptions, a fiscal plan that focuses only on achieving balanced budgets may not be enough to lower Ontario's net debt-to-GDP ratio to 27 per cent by 2029-30.

Financial Accountability Officer Report: Spring Economic and Fiscal Outlook

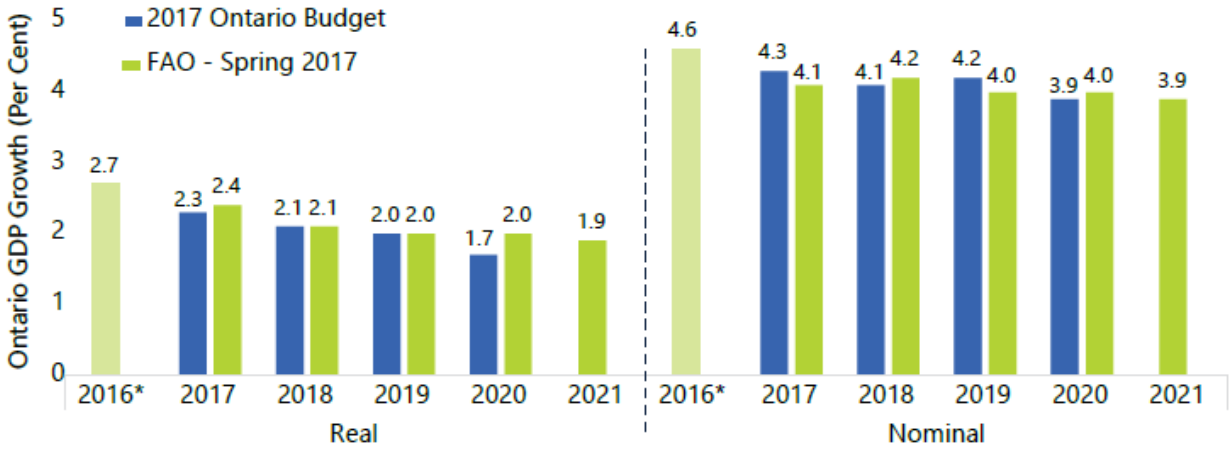
Draft – May 30, 2017 6:00 PM

ISSUE

- The Financial Accountability Officer (FAO) will be releasing a report on May 31, which assesses Ontario's medium-term economic and fiscal outlook.
- This represents the spring update to the FAO's planned release of semi-annual medium-term outlook reports.
- The spring report incorporates economic and fiscal information released since the FAO's fall 2016 report (released November 3, 2016). This includes:
    - New economic data that impacts their revenue and interest on debt outlooks; and
    - New spending commitments from the 2017 Budget.
- The FAO has presented two fiscal projections in its spring report:
    1. A projection that includes the impact of the net pension assets of jointly sponsored pension plans, based on the Auditor General's recommended accounting treatment, and
    2. A projection that excludes this impact based on the government's fiscal presentation in the 2017 Budget, as recommended by the Pension Asset Expert Advisory Panel.
- Both presentations used by the FAO project deficits in each year over the outlook period (2016–17 to 2021–22).
    - Using the government's fiscal presentation of net pension assets, the FAO has stated that balance is within reach in 2017–18 and that beyond this, staying in balance will likely require additional fiscal policy measures.
    - Similarly, using this presentation, the FAO projects that net debt-to-GDP will decline over the outlook but additional fiscal measures would be required for the government to achieve its interim net debt-to-GDP target of 35 per cent by 2023–24 and 27 per cent by 2029–30.
    - The FAO excludes the reserve from its fiscal outlook.

TOP MESSAGES

- I would like to thank the Financial Accountability Officer (FAO) for releasing his spring economic and fiscal outlook for Ontario. We value the FAO's independent assessment and projections of the province's fiscal plan.
- As outlined in the 2017 Budget, the government is projecting a balanced budget for 2017–18 and to remain balanced in 2018–19 and 2019–20.
- The government has a strong track record of beating its fiscal targets. In fact, for the 2016–17 fiscal year, the government is forecasting a deficit of $1.5 billion, beating our annual deficit target again, for the eighth year in a row.
- This Budget builds on the government's track record of fiscal management that has resulted in $29 billion in accumulated deficits being avoided over the past seven years, relative to the 2010 Budget forecast.
- We are also targeting a net debt-to-GDP ratio of 35 per cent by 2023–24 and reducing Ontario's net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029–30.
- Ontario has recorded stronger economic growth than Canada and all other G7 countries over the 2014 to 2016 period, with real GDP rising 2.6 per cent a year.
- Private-sector forecasters expect Ontario will remain one of the fastest growing provinces over the next two years. It should be noted that the FAO's real GDP projections are modestly stronger than the 2017 Budget outlook over the 2017 to 2020 period.
- For prudent fiscal planning, the Province's real GDP growth projections are slightly below the average of private-sector forecasts. In fact, three economic experts also reviewed these economic assumptions and found them to be reasonable.
- This shows that our plan to make strategic investments in Ontario to grow the economy is working.
- It is also important to note that the FAO affirmed key aspects of the Budget plan, including projecting that a balanced budget is within reach for Ontario in 2017–18 and that the net debt-to-GDP ratio is on a downward trend.
- A balanced budget is providing the Province the fiscal flexibility to invest more in health care, education and other public services that matter most to Ontario families. It also adds stability to Ontario's finances and positions the government to better respond to demographic challenges and unexpected global economic shocks that the province will face over the next decade.



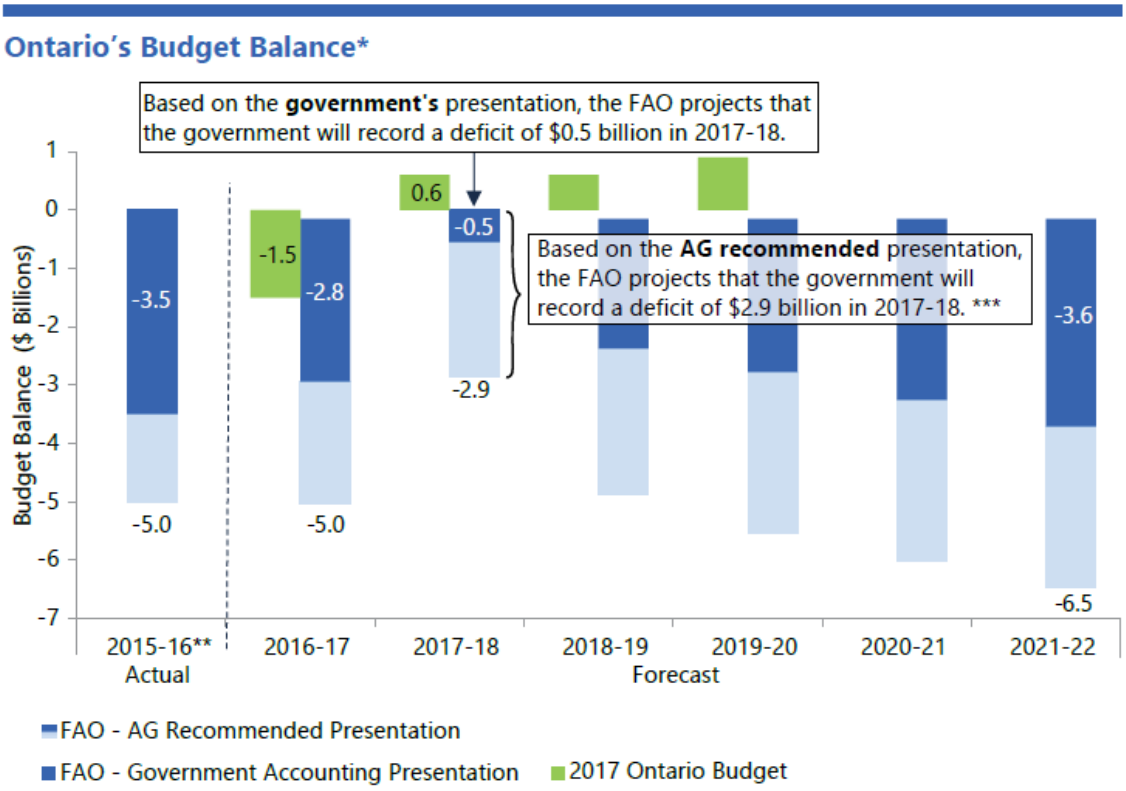
KEY FINDINGS

- The report is divided into two main chapters:
    1) The **Economic Outlook** chapter presents the FAO forecast for Ontario's economy out to 2021, and includes a discussion of potential risks.
    2) The **Fiscal Outlook** chapter presents the FAO forecast for revenue, expense and the surplus/deficit between 2016-17 and 2021-22.

<u>Economic Outlook</u>

- The FAO has left its forecast for Ontario real GDP growth little changed, on average, over the 2017 to 2020 period relative to its fall forecast, though it included a modest downward revision in 2017 and upward revision in 2019.
- The FAO forecast is broadly consistent with the private sector economists' view that stronger international exports and business investment will be key drivers of Ontario's overall economic growth over the next several years.
- The FAO forecast for real GDP growth is 0.1 percentage points stronger annually, on average, than the 2017 Budget forecast between 2017 and 2020.
- The FAO believes the balance of the risks to the economic outlook is tilted to the downside, particularly risks associated with a correction in Ontario's housing market. (p. 13).

Solid Economic Performance Expected Over Outlook



* 2016 are actuals.

Source: Ontario Economic Accounts, 2017 Ontario Budget and FAO.

Fiscal Outlook

- The FAO's current projection of the outlook for budget balance has generally deteriorated relative to the FAO's fall 2016 projection and continues to present a gap against the government's balanced budget projections.
- **Using the government's accounting treatment of net pension assets** the FAO is projecting budget deficits of $2.8 billion in 2016–17, $0.5 billion in 2017–18, $2.2 billion in 2018–19, and $2.6 billion by 2019–20 (excluding the reserve). This represents an improvement in the deficit for 2016–17 and 2017–18, but deterioration over the outlook compared to the FAO's fall report.
    - By comparison, the 2017 Budget projects a $1.5 billion deficit in 2016–17 and surpluses of $0.6 billion in 2017–18 and 2018–19, and a $0.9 billion surplus in 2019–20, excluding the reserve. The FAO also makes projections out to 2021–22 with increasing deficits forecast for those years as well.
    - The FAO suggests that a balanced budget is "within the government's reach in 2017–18" when using the government's accounting method, however "staying in balance after 2017-18 will likely require additional fiscal policy measures"(p.1).
    - The FAO notes that under this accounting presentation, Ontario's Public Accounts would be expected to receive a qualified opinion from the Auditor General.
- The FAO's forecast, **based on the Auditor General's recommended accounting treatment of jointly-sponsored pension plans**, projects deficits of $5.0 billion in 2016–17, $2.9 billion in 2017–18, $4.9 billion in 2018–19, and $5.5 billion by 2019–20 (excluding the reserve). Compared to the FAO's fall report, this represents a slight improvement in the deficit for 2016–17 but deterioration in 2017–18 and over the outlook.
    - The FAO notes that "on this basis, it is unlikely that the government will balance the budget without significant fiscal policy adjustments to raise revenue or lower expense" (p. 1).
- For 2016–17 the FAO is forecasting a deficit of $2.8 billion (or $5.0 billion with the pension adjustment) compared with the government's $1.5 billion interim projection.
- The FAO's asserts that its projection for an improved deficit in 2017–18 is due to robust economic performance and strong tax revenue growth in 2016 and 2017, compared to the FAO's fall estimates, and a one-time revenue increase in 2017–18 from increased federal transfers for infrastructure, additional revenue from asset sales and cap and trade proceeds. (p. 1 &19).

- Beginning in 2018-19, the FAO projects that the deficit will gradually deteriorate due to moderate revenue growth, the absence of one-time non-tax measures, and higher program expenses. (p. 16).

* Budget balance before reserve.

** Ontario's 2015-16 Public Accounts reported a deficit of $5.0 billion. Without the pension adjustment, the deficit would have been $3.5 billion.

*** This includes the FAO's estimate of the pension adjustment.

Source: 2015-16 Public Accounts, 2017 Ontario Budget and FAO.

Revenue Assumptions

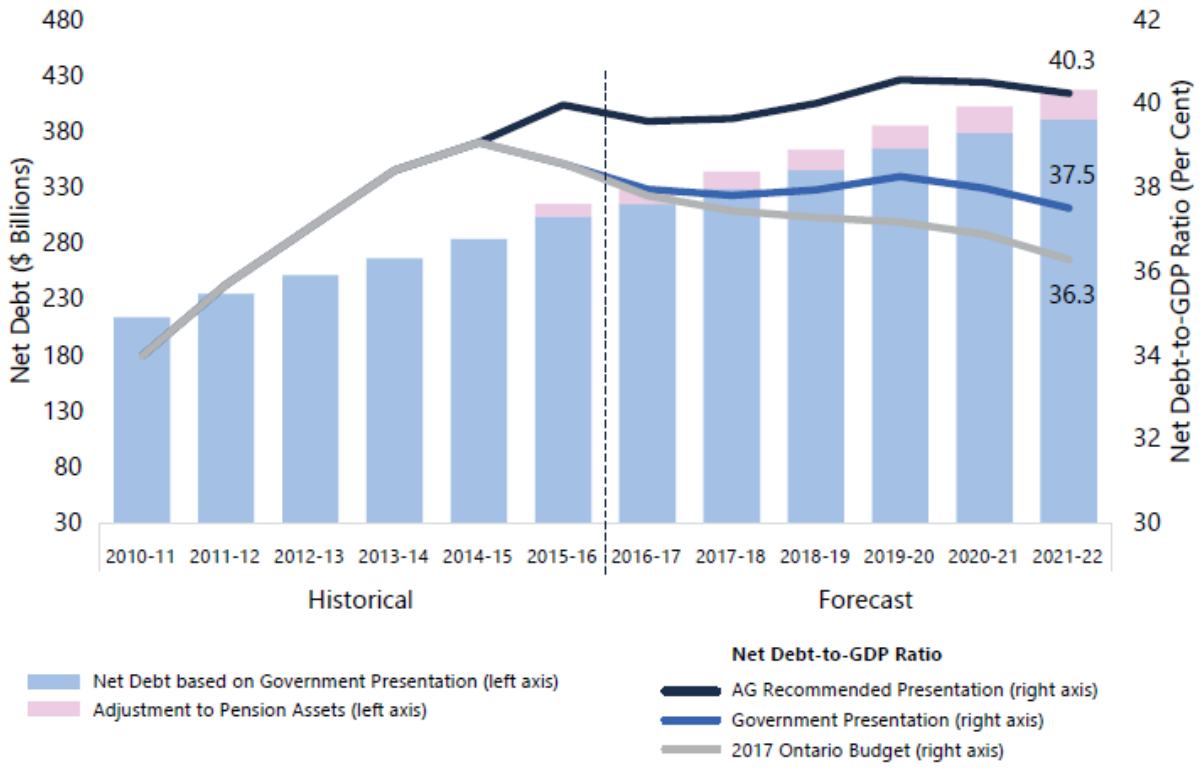
- Compared to the 2017 Budget, the FAO's projected total revenue is lower mostly because of taxation revenue and, to a lesser extent, Federal Transfers.

FAO less Ontario 2017 Budget Outlook ($ Billions)

	2016-17	2017-18	2018-19	2019-20	Average
Taxation Revenue	-1.2	-1.4	-2.3	-3.0	-2.0
Government of Canada Transfers	-0.1	0.0	-0.8	-0.8	-0.4
Government Business Enterprises	0.0	0.0	0.0	0.0	0.0
Other Non-Tax Revenue	0.0	0.0	0.0	0.0	0.0
Total Revenue	**-1.2**	**-1.4**	**-3.1**	**-3.7**	**-2.4**

    - FAO's projection for the composition of nominal GDP such as compensation of employees, net operating surplus and household consumption, are all lower than the 2017 Budget projection.
    - The 2017 Budget assumed higher yields from CIT and HST compared to recent projections, reflecting recent tax revenue performance. These yields also exceed those assumed by the FAO.
    - The FAO projection for PIT is consistently lower than the 2017 Budget, partly due to their assumptions regarding tax planning that may have occurred in 2015 by high-income earners. Whereas the 2017 Budget only included an allowance for PIT planning in 2016-17, the FAO estimates that roughly $600 million of Ontario's 2015 PIT revenue was due to income shifting, which lowers taxable income in 2016-17 and 2017-18.
- The FAO's federal transfer outlook is lower than assumed in the 2017 Ontario Budget, probably due to FAO's assumption that Ontario will no longer receive Equalization payments starting in 2019-20 as Ontario's fiscal capacity improves relative to other provinces.
- The FAO's government business enterprise net income outlook and other non-tax revenue is the same as reported in the 2017 Budget.

Expense Assumptions



- The FAO assumes the same program expense outlook as the 2017 Budget up to 2019–20, adjusted to reflect the Auditor General's recommended accounting treatment for jointly sponsored pension plans.(p. 20).
- The FAO's expense outlook includes new spending commitments announced in the 2017 Budget including the new children and youth Pharmacare program, increased funding for hospitals, new child care spaces, and electricity cost relief under the Fair Hydro Plan. This results in average annual growth in program expense of 3.3 per cent between 2016–17 and 2021–22 – slightly below the growth in underlying cost and demographic pressure, which is estimated to be 3.6 per cent on average.
- The FAO projects that Ontario's interest on debt (IOD) payments will grow at an average annual rate of 4.0 per cent from $11.0 billion in 2015–16 to $13.9 billion by 2021–22, reflecting higher debt and rising interest rates over the outlook. The FAO forecasts that IOD will outpace the growth in program expense over the outlook. (p. 21).
- The FAO's projection for IOD expense is lower than the 2017 Budget projections.
- According to the FAO, interest on debt is expected to increase from 8.1per cent of revenues in 2017–18 to 8.9 per cent by 2021–22. Over the past five years IOD as a share of revenues declined steadily, benefitting from declining interest rates. The

FAO argues that this ratio is expected to rise sharply due to projected interest rate increases. (p. 21 – Fiscal Chapter).

Debt Outlook

- Using the government's accounting method, the FAO expects net debt to increase by $62 billion over the next five years to $365 billion by 2021–22 or 37.5 per cent of GDP, above the 2017 Budget projection of 36.3 per cent.
- Under the Auditor General's recommended accounting treatment of jointly-sponsored pension plans, the FAO expects Ontario's net debt to rise by $76 billion to $392 billion by 2021–22 or 40.3 per cent of GDP, this represents a slightly lower net debt-to-GDP ratio over the plan and outlook period when compared to the FAO's fall forecast.
- The FAO's net debt-to-GDP projections under both accounting presentations, suggests that additional fiscal measures would be required for the government to achieve its interim target of 35 per cent by 2023-24. (p. 22).

Ontario's Net Debt-to-GDP Ratio

Source: FAO, Ontario Economic Accounts, and 2017 Ontario Budget.
Note: AG recommended presentation is based on FAO estimates of the pension adjustment.

Accounting Treatment

- The FAO's spring outlook includes a detailed section on the different accounting interpretations for net pension assets of jointly sponsored pension plans (Ontario Teachers' Pension Plan and the Ontario Public Service Employees Union Pension Plan) used by the government and the Auditor General.
- While the FAO presents analysis based on both interpretations of the accounting treatment, the report states that "the Officer looks to the Auditor General as the provincial authority on the appropriate interpretation and application of accounting standards for the Province" (p.27).
- Furthermore, the FAO states that in the absence of a written agreement between the co-sponsors of the pension plans, the Auditor General would be expected to provide a qualified opinion on Ontario's 2016-17 Public Accounts.

Risks and Policy Options

- The FAO notes the following risks to Ontario's fiscal plan (p. 23):
    - A housing market correction could pose a significant risk for both the broader economy and the fiscal plan through lower taxation revenues
    - Reduced prudence built into program spending in the 2017 Budget compared to the previous budget – reducing flexibility for the government to respond to unexpected events
    - Interest on debt payments are expected to increase, exposing the government to fiscal risk should interest rates rise faster than expected
- Although the FAO projects deficits, the report notes that the government has a broad range of policy options that could improve the Province's fiscal position, including selling additional public assets beyond announced targets.

APPENDIX A – Detailed Comparison of Outlooks

Key factors driving change since the 2016 FAO fall report:

- Increases in Provincial tax revenue of $2.8 billion in 2016–17 and $4.2 billion in 2017–18 (stronger than expected PIT revenue) due to improving economic growth in 2017
- Declines in Ontario's equalization entitlement. Beyond 2018–19, the FAO is projecting that Ontario will no longer be entitled to Equalization payments – a reflection of the continued strength of the Ontario economy
- Significant new spending across all sectors, including a new children and youth Pharmacare program, increased funding for hospitals, new child care spaces, and electricity cost relief under the Fair Hydro Plan
- Revised estimates for net pension asset expense of jointly sponsored pension plans

Developments since Fall 2016 EFO (AG Recommended Presentation)

	2016-17	2017-18	2018-19	2019-20	2020-21
FAO's Fall 2016 Budget Balance Forecast	**-5.2**	**-2.6**	**-2.8**	**-3.3**	**-3.7**
Developments Since Fall 2016					
Revenue					
Stronger Economic Outlook	2.3	4.1	3.9	4.4	4.7
Lower Federal Transfers[1]	-0.3	0.2	-1.3	-2.4	-2.2
Other Revenue Changes[2]	0.1	0.1	-0.5	-0.6	-0.6
Total	2.1	4.4	2.1	1.3	1.8
Expense					
Higher Spending, including Children and Youth Pharmacare, and Fair Hydro Plan	1.2	3.8	3.0	2.2	2.7
Revised Adjustment for Pension Asset[3]	0.7	0.8	1.1	1.4	1.4
Total	2.0	4.6	4.1	3.6	4.1
Total Developments	**0.2**	**-0.3**	**-2.1**	**-2.3**	**-2.3**
FAO's Spring 2017 Budget Balance Forecast	**-5.0**	**-2.9**	**-4.9**	**-5.5**	**-6.0**

Notes:

1. Change in federal transfers forecast mainly due the reduction in Ontario's Equalization payment.
2. Other revenue changes include the $0.5 billion re-profiling of cap-and-trade proceeds from 2016-17 to 2017-18, and an increase in sales and rentals for 2017-18.
3. In the Fall 2016 EFO, the FAO assumed an annual adjustment of $1.5 billion for the net pension assets of jointly sponsored pension plans. The current projection incorporates the FAO's updated estimates for the pension adjustment of $2.2 billion in 2016-17, increasing to $2.9 billion by 2020-21.

Source: FAO.

Revenue Assumptions:

- Compared to the FAO's fall forecast, from 2016-17 to 2019-20, on average, total revenue is projected to be $2.5 billion higher annually mostly because of higher taxation revenue, partially offset by lower Federal Transfers and other Non-Tax revenues.

FAO Revenue Difference (Spring 2017 less Fall 2016)

$ Billions	2016-17	2017-18f	2018-19f	2019-20f	Annual Average
Taxation Revenue	**2.8**	**4.2**	**4.4**	**4.9**	**4.1**
Government of Canada Transfers	-0.4	0.2	-1.3	-2.4	-1.0
Government Business Enterprises	0.3	-0.4	0.0	0.1	0.0
Other Non-Tax Revenue	-0.6	0.4	-1.1	-1.3	-0.7
Total Non-Tax Revenue	**-0.7**	**0.2**	**-2.4**	**-3.6**	**-1.6**
Total Revenue	**2.1**	**4.4**	**2.1**	**1.4**	**2.5**

  - Taxation revenues are projected to be, on average, $4.1 billion higher annually due to stronger economic growth as nominal GDP growth is, on average, projected to be 0.4 percentage points higher annually.
  - More specifically, corporate profits are projected to be 3.3 percentage points higher annually, boosting Corporations Tax revenue. Higher labour income is expected to raise Personal Income Tax revenue while Ontario's strong housing market boosts Sales Tax and Land Transfer Tax revenues.
  - Lower Federal Transfers reflects mostly the FAO's projection that Ontario will no longer be entitled to Equalization payments beyond 2018-19.
  - Non-Tax revenues are lower, mainly because of the revisions to the multi-year asset optimization target to reflect the progress made so far and revised projections for Carbon allowance proceeds.

Subject: FAO Summary Note (including key messages)

Please find attached an updated version of the FAO Summary note which we took the Minister through earlier this afternoon. Note this includes key messages the minister can use tomorrow as well.

Happy to address any issues as they arise over the coming day with the release of the report.

Financial Accountability Officer Report: Spring Economic and Fiscal Outlook

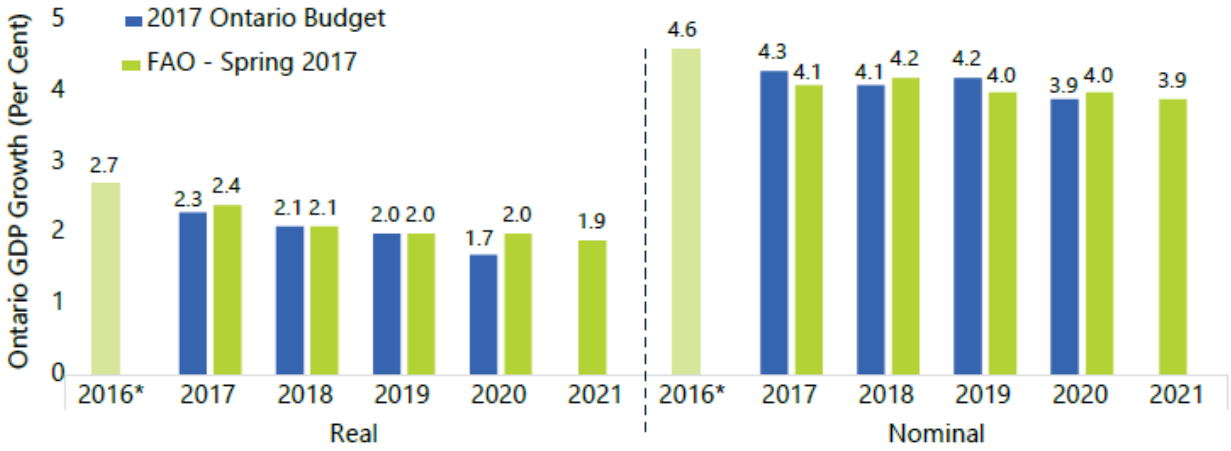
Draft – May 30, 2017 6:00 PM

ISSUE

- The Financial Accountability Officer (FAO) will be releasing a report on May 31, which assesses Ontario's medium-term economic and fiscal outlook.
- This represents the spring update to the FAO's planned release of semi-annual medium-term outlook reports.
- The spring report incorporates economic and fiscal information released since the FAO's fall 2016 report (released November 3, 2016). This includes:
    - New economic data that impacts their revenue and interest on debt outlooks; and
    - New spending commitments from the 2017 Budget.
- The FAO has presented two fiscal projections in its spring report:
    1. A projection that includes the impact of the net pension assets of jointly sponsored pension plans, based on the Auditor General's recommended accounting treatment, and
    2. A projection that excludes this impact based on the government's fiscal presentation in the 2017 Budget, as recommended by the Pension Asset Expert Advisory Panel.
- Both presentations used by the FAO project deficits in each year over the outlook period (2016–17 to 2021–22).
    - Using the government's fiscal presentation of net pension assets, the FAO has stated that balance is within reach in 2017–18 and that beyond this, staying in balance will likely require additional fiscal policy measures.
    - Similarly, using this presentation, the FAO projects that net debt-to-GDP will decline over the outlook but additional fiscal measures would be required for the government to achieve its interim net debt-to-GDP target of 35 per cent by 2023–24 and 27 per cent by 2029–30.
    - The FAO excludes the reserve from its fiscal outlook.

TOP MESSAGES

- I would like to thank the Financial Accountability Officer (FAO) for releasing his spring economic and fiscal outlook for Ontario. We value the FAO's independent assessment and projections of the province's fiscal plan.
- As outlined in the 2017 Budget, the government is projecting a balanced budget for 2017–18 and to remain balanced in 2018–19 and 2019–20.
- The government has a strong track record of beating its fiscal targets. In fact, for the 2016–17 fiscal year, the government is forecasting a deficit of $1.5 billion, beating our annual deficit target again, for the eighth year in a row.
- This Budget builds on the government's track record of fiscal management that has resulted in $29 billion in accumulated deficits being avoided over the past seven years, relative to the 2010 Budget forecast.
- We are also targeting a net debt-to-GDP ratio of 35 per cent by 2023–24 and reducing Ontario's net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029–30.
- Ontario has recorded stronger economic growth than Canada and all other G7 countries over the 2014 to 2016 period, with real GDP rising 2.6 per cent a year.
- Private-sector forecasters expect Ontario will remain one of the fastest growing provinces over the next two years. It should be noted that the FAO's real GDP projections are modestly stronger than the 2017 Budget outlook over the 2017 to 2020 period.
- For prudent fiscal planning, the Province's real GDP growth projections are slightly below the average of private-sector forecasts. In fact, three economic experts also reviewed these economic assumptions and found them to be reasonable.
- This shows that our plan to make strategic investments in Ontario to grow the economy is working.
- It is also important to note that the FAO affirmed key aspects of the Budget plan, including projecting that a balanced budget is within reach for Ontario in 2017–18 and that the net debt-to-GDP ratio is on a downward trend.
- A balanced budget is providing the Province the fiscal flexibility to invest more in health care, education and other public services that matter most to Ontario families. It also adds stability to Ontario's finances and positions the government to better respond to demographic challenges and unexpected global economic shocks that the province will face over the next decade.



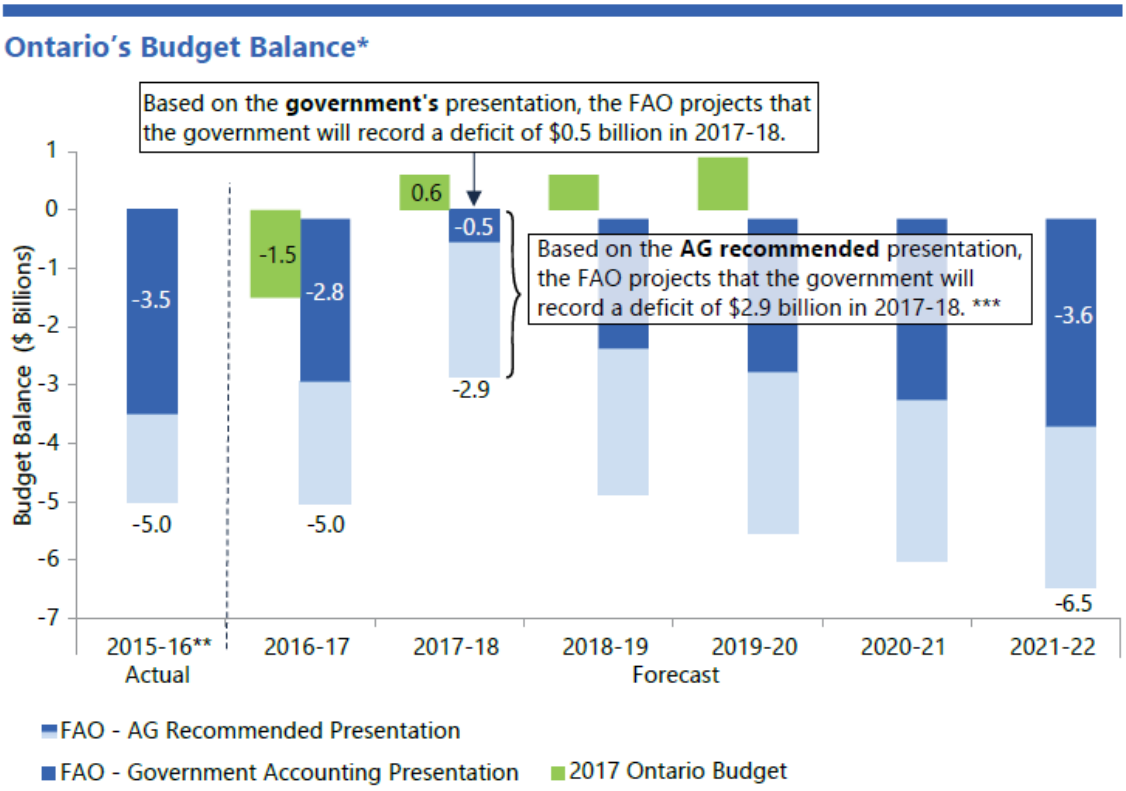
KEY FINDINGS

- The report is divided into two main chapters:
    1) The **Economic Outlook** chapter presents the FAO forecast for Ontario's economy out to 2021, and includes a discussion of potential risks.
    2) The **Fiscal Outlook** chapter presents the FAO forecast for revenue, expense and the surplus/deficit between 2016-17 and 2021-22.

<u>Economic Outlook</u>

- The FAO has left its forecast for Ontario real GDP growth little changed, on average, over the 2017 to 2020 period relative to its fall forecast, though it included a modest downward revision in 2017 and upward revision in 2019.
- The FAO forecast is broadly consistent with the private sector economists' view that stronger international exports and business investment will be key drivers of Ontario's overall economic growth over the next several years.
- The FAO forecast for real GDP growth is 0.1 percentage points stronger annually, on average, than the 2017 Budget forecast between 2017 and 2020.
- The FAO believes the balance of the risks to the economic outlook is tilted to the downside, particularly risks associated with a correction in Ontario's housing market. (p. 13).

Solid Economic Performance Expected Over Outlook



* 2016 are actuals.

Source: Ontario Economic Accounts, 2017 Ontario Budget and FAO.

Fiscal Outlook

- The FAO's current projection of the outlook for budget balance has generally deteriorated relative to the FAO's fall 2016 projection and continues to present a gap against the government's balanced budget projections.
- **Using the government's accounting treatment of net pension assets** the FAO is projecting budget deficits of $2.8 billion in 2016–17, $0.5 billion in 2017–18, $2.2 billion in 2018–19, and $2.6 billion by 2019–20 (excluding the reserve). This represents an improvement in the deficit for 2016–17 and 2017–18, but deterioration over the outlook compared to the FAO's fall report.
    - By comparison, the 2017 Budget projects a $1.5 billion deficit in 2016–17 and surpluses of $0.6 billion in 2017–18 and 2018–19, and a $0.9 billion surplus in 2019–20, excluding the reserve. The FAO also makes projections out to 2021–22 with increasing deficits forecast for those years as well.
    - The FAO suggests that a balanced budget is "within the government's reach in 2017–18" when using the government's accounting method, however "staying in balance after 2017-18 will likely require additional fiscal policy measures"(p.1).
    - The FAO notes that under this accounting presentation, Ontario's Public Accounts would be expected to receive a qualified opinion from the Auditor General.
- The FAO's forecast, **based on the Auditor General's recommended accounting treatment of jointly-sponsored pension plans**, projects deficits of $5.0 billion in 2016–17, $2.9 billion in 2017–18, $4.9 billion in 2018–19, and $5.5 billion by 2019–20 (excluding the reserve). Compared to the FAO's fall report, this represents a slight improvement in the deficit for 2016–17 but deterioration in 2017–18 and over the outlook.
    - The FAO notes that "on this basis, it is unlikely that the government will balance the budget without significant fiscal policy adjustments to raise revenue or lower expense" (p. 1).
- For 2016–17 the FAO is forecasting a deficit of $2.8 billion (or $5.0 billion with the pension adjustment) compared with the government's $1.5 billion interim projection.
- The FAO's asserts that its projection for an improved deficit in 2017–18 is due to robust economic performance and strong tax revenue growth in 2016 and 2017, compared to the FAO's fall estimates, and a one-time revenue increase in 2017–18 from increased federal transfers for infrastructure, additional revenue from asset sales and cap and trade proceeds. (p. 1 &19).

- Beginning in 2018-19, the FAO projects that the deficit will gradually deteriorate due to moderate revenue growth, the absence of one-time non-tax measures, and higher program expenses. (p. 16).

* Budget balance before reserve.

** Ontario's 2015-16 Public Accounts reported a deficit of $5.0 billion. Without the pension adjustment, the deficit would have been $3.5 billion.

*** This includes the FAO's estimate of the pension adjustment.

Source: 2015-16 Public Accounts, 2017 Ontario Budget and FAO.

Revenue Assumptions

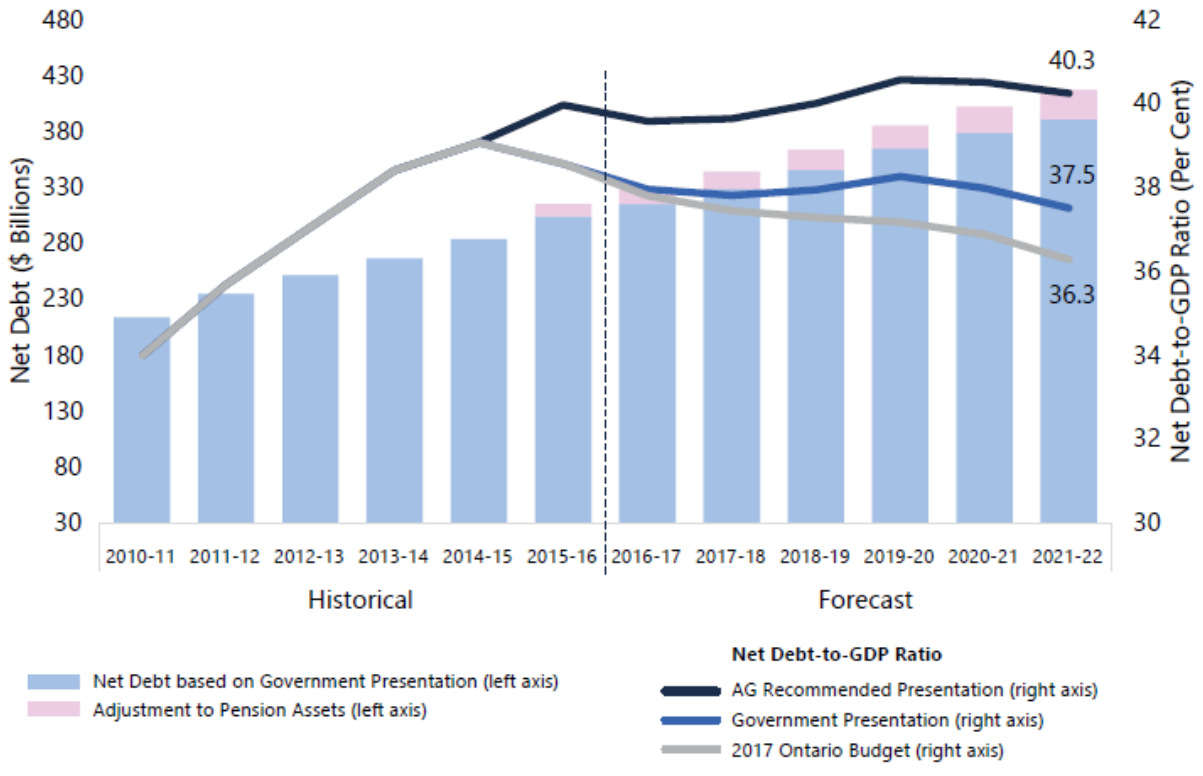
- Compared to the 2017 Budget, the FAO's projected total revenue is lower mostly because of taxation revenue and, to a lesser extent, Federal Transfers.

FAO less Ontario 2017 Budget Outlook ($ Billions)

	2016-17	2017-18	2018-19	2019-20	Average
Taxation Revenue	-1.2	-1.4	-2.3	-3.0	-2.0
Government of Canada Transfers	-0.1	0.0	-0.8	-0.8	-0.4
Government Business Enterprises	0.0	0.0	0.0	0.0	0.0
Other Non-Tax Revenue	0.0	0.0	0.0	0.0	0.0
Total Revenue	**-1.2**	**-1.4**	**-3.1**	**-3.7**	**-2.4**

    - FAO's projection for the composition of nominal GDP such as compensation of employees, net operating surplus and household consumption, are all lower than the 2017 Budget projection.
    - The 2017 Budget assumed higher yields from CIT and HST compared to recent projections, reflecting recent tax revenue performance. These yields also exceed those assumed by the FAO.
    - The FAO projection for PIT is consistently lower than the 2017 Budget, partly due to their assumptions regarding tax planning that may have occurred in 2015 by high-income earners. Whereas the 2017 Budget only included an allowance for PIT planning in 2016-17, the FAO estimates that roughly $600 million of Ontario's 2015 PIT revenue was due to income shifting, which lowers taxable income in 2016-17 and 2017-18.
- The FAO's federal transfer outlook is lower than assumed in the 2017 Ontario Budget, probably due to FAO's assumption that Ontario will no longer receive Equalization payments starting in 2019-20 as Ontario's fiscal capacity improves relative to other provinces.
- The FAO's government business enterprise net income outlook and other non-tax revenue is the same as reported in the 2017 Budget.

Expense Assumptions



- The FAO assumes the same program expense outlook as the 2017 Budget up to 2019–20, adjusted to reflect the Auditor General's recommended accounting treatment for jointly sponsored pension plans.(p. 20).
- The FAO's expense outlook includes new spending commitments announced in the 2017 Budget including the new children and youth Pharmacare program, increased funding for hospitals, new child care spaces, and electricity cost relief under the Fair Hydro Plan. This results in average annual growth in program expense of 3.3 per cent between 2016–17 and 2021–22 – slightly below the growth in underlying cost and demographic pressure, which is estimated to be 3.6 per cent on average.
- The FAO projects that Ontario's interest on debt (IOD) payments will grow at an average annual rate of 4.0 per cent from $11.0 billion in 2015–16 to $13.9 billion by 2021–22, reflecting higher debt and rising interest rates over the outlook. The FAO forecasts that IOD will outpace the growth in program expense over the outlook. (p. 21).
- The FAO's projection for IOD expense is lower than the 2017 Budget projections.
- According to the FAO, interest on debt is expected to increase from 8.1per cent of revenues in 2017–18 to 8.9 per cent by 2021–22. Over the past five years IOD as a share of revenues declined steadily, benefitting from declining interest rates. The

FAO argues that this ratio is expected to rise sharply due to projected interest rate increases. (p. 21 – Fiscal Chapter).

Debt Outlook

- Using the government's accounting method, the FAO expects net debt to increase by $62 billion over the next five years to $365 billion by 2021–22 or 37.5 per cent of GDP, above the 2017 Budget projection of 36.3 per cent.
- Under the Auditor General's recommended accounting treatment of jointly-sponsored pension plans, the FAO expects Ontario's net debt to rise by $76 billion to $392 billion by 2021–22 or 40.3 per cent of GDP, this represents a slightly lower net debt-to-GDP ratio over the plan and outlook period when compared to the FAO's fall forecast.
- The FAO's net debt-to-GDP projections under both accounting presentations, suggests that additional fiscal measures would be required for the government to achieve its interim target of 35 per cent by 2023-24. (p. 22).

Ontario's Net Debt-to-GDP Ratio

Source: FAO, Ontario Economic Accounts, and 2017 Ontario Budget.
Note: AG recommended presentation is based on FAO estimates of the pension adjustment.

Accounting Treatment

- The FAO's spring outlook includes a detailed section on the different accounting interpretations for net pension assets of jointly sponsored pension plans (Ontario Teachers' Pension Plan and the Ontario Public Service Employees Union Pension Plan) used by the government and the Auditor General.
- While the FAO presents analysis based on both interpretations of the accounting treatment, the report states that "the Officer looks to the Auditor General as the provincial authority on the appropriate interpretation and application of accounting standards for the Province" (p.27).
- Furthermore, the FAO states that in the absence of a written agreement between the co-sponsors of the pension plans, the Auditor General would be expected to provide a qualified opinion on Ontario's 2016-17 Public Accounts.

Risks and Policy Options

- The FAO notes the following risks to Ontario's fiscal plan (p. 23):
    - A housing market correction could pose a significant risk for both the broader economy and the fiscal plan through lower taxation revenues
    - Reduced prudence built into program spending in the 2017 Budget compared to the previous budget – reducing flexibility for the government to respond to unexpected events
    - Interest on debt payments are expected to increase, exposing the government to fiscal risk should interest rates rise faster than expected
- Although the FAO projects deficits, the report notes that the government has a broad range of policy options that could improve the Province's fiscal position, including selling additional public assets beyond announced targets.

APPENDIX A – Detailed Comparison of Outlooks

Key factors driving change since the 2016 FAO fall report:

- Increases in Provincial tax revenue of $2.8 billion in 2016–17 and $4.2 billion in 2017–18 (stronger than expected PIT revenue) due to improving economic growth in 2017
- Declines in Ontario's equalization entitlement. Beyond 2018–19, the FAO is projecting that Ontario will no longer be entitled to Equalization payments – a reflection of the continued strength of the Ontario economy
- Significant new spending across all sectors, including a new children and youth Pharmacare program, increased funding for hospitals, new child care spaces, and electricity cost relief under the Fair Hydro Plan
- Revised estimates for net pension asset expense of jointly sponsored pension plans

Developments since Fall 2016 EFO (AG Recommended Presentation)

	2016-17	2017-18	2018-19	2019-20	2020-21
FAO's Fall 2016 Budget Balance Forecast	**-5.2**	**-2.6**	**-2.8**	**-3.3**	**-3.7**
Developments Since Fall 2016					
Revenue					
Stronger Economic Outlook	2.3	4.1	3.9	4.4	4.7
Lower Federal Transfers[1]	-0.3	0.2	-1.3	-2.4	-2.2
Other Revenue Changes[2]	0.1	0.1	-0.5	-0.6	-0.6
Total	2.1	4.4	2.1	1.3	1.8
Expense					
Higher Spending, including Children and Youth Pharmacare, and Fair Hydro Plan	1.2	3.8	3.0	2.2	2.7
Revised Adjustment for Pension Asset[3]	0.7	0.8	1.1	1.4	1.4
Total	2.0	4.6	4.1	3.6	4.1
Total Developments	**0.2**	**-0.3**	**-2.1**	**-2.3**	**-2.3**
FAO's Spring 2017 Budget Balance Forecast	**-5.0**	**-2.9**	**-4.9**	**-5.5**	**-6.0**

Notes:

1. Change in federal transfers forecast mainly due the reduction in Ontario's Equalization payment.
2. Other revenue changes include the $0.5 billion re-profiling of cap-and-trade proceeds from 2016-17 to 2017-18, and an increase in sales and rentals for 2017-18.
3. In the Fall 2016 EFO, the FAO assumed an annual adjustment of $1.5 billion for the net pension assets of jointly sponsored pension plans. The current projection incorporates the FAO's updated estimates for the pension adjustment of $2.2 billion in 2016-17, increasing to $2.9 billion by 2020-21.

Source: FAO.

Revenue Assumptions:

- Compared to the FAO's fall forecast, from 2016-17 to 2019-20, on average, total revenue is projected to be $2.5 billion higher annually mostly because of higher taxation revenue, partially offset by lower Federal Transfers and other Non-Tax revenues.

FAO Revenue Difference (Spring 2017 less Fall 2016)

$ Billions	2016-17	2017-18f	2018-19f	2019-20f	Annual Average
Taxation Revenue	**2.8**	**4.2**	**4.4**	**4.9**	**4.1**
Government of Canada Transfers	-0.4	0.2	-1.3	-2.4	-1.0
Government Business Enterprises	0.3	-0.4	0.0	0.1	0.0
Other Non-Tax Revenue	-0.6	0.4	-1.1	-1.3	-0.7
Total Non-Tax Revenue	**-0.7**	**0.2**	**-2.4**	**-3.6**	**-1.6**
Total Revenue	**2.1**	**4.4**	**2.1**	**1.4**	**2.5**

  - Taxation revenues are projected to be, on average, $4.1 billion higher annually due to stronger economic growth as nominal GDP growth is, on average, projected to be 0.4 percentage points higher annually.
  - More specifically, corporate profits are projected to be 3.3 percentage points higher annually, boosting Corporations Tax revenue. Higher labour income is expected to raise Personal Income Tax revenue while Ontario's strong housing market boosts Sales Tax and Land Transfer Tax revenues.
  - Lower Federal Transfers reflects mostly the FAO's projection that Ontario will no longer be entitled to Equalization payments beyond 2018-19.
  - Non-Tax revenues are lower, mainly because of the revisions to the multi-year asset optimization target to reflect the progress made so far and revised projections for Carbon allowance proceeds.

Comparison: 2017 Budget Fiscal Outlook and the 2017 Spring FAO Outlook

Hi Bonnie

The FAO's IOD forecast is considerably lower than ours, is there any way that they can share their underlying interest rate assumptions.

Thanks

Ken k

>
> As you all know, the FAO will be reviewing the FES and developing questions for us to review and answer when we meet with them on Wednesday.
>
> To help us all prepare for this, we've done a cross-walk from the FAO fiscal plan to the fiscal plan outlined in the FES today. The table is attached for your reference.

In summary, the FAO Outlook shows higher deficits than outlined in the Fall Statement. Key factors include:

- The FAO's revenue forecast is significantly lower than what is outlined in the Fall Statement (more than $5B in 18-19).
- The FAO's estimate of new government initiatives (child care, HST rebate, etc) are higher than what are built into the Fall Statement, particularly in 17-18 and 18-19.
- Combined, these two elements, which result in a deterioration in the fiscal outlook, are partially offset by higher IOD savings assumed by the FAO.

As we already know, the FAO underestimated the Pension Adjustment in each year, which reduced the variance between the FAO's deficit projection and the FES. Presumably their updated forecast in their commentary (to be released next week) will increase the Pension Adjustment, and also, the resulting deficit projection.

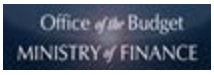
David;

Thanks again for the opportunity to review and provide feedback/fact-checks and comments on the draft report. Please find attached a consolidated set of comments from MOF and TBS on the

Economic and Fiscal Chapters.

We think there may be some value in having a follow-up call next week to discuss some of these pieces – but let us know what you think once you've reviewed. We're happy to arrange something.



Some of these more significant edits may require a conversations to clarify, including:

- The language and representation of the differences in accounting interpretations. We may have discussed this at the time of the Budget outlook document, but we think its important to get the language right in terms of how this is articulated so that it's a more objective and fact-based representation.

- In addition, it appears that the way the FAO has built in the AG's interpretation of the Fair Hydro Plan accounting treatment is incorrect – as the current presentation in this draft EFO shows it appearing on the revenue side (on OPG's net income) – instead, the AG's recommendation was that is an expense impact on consolidation from IESO and further that the IESO is not a GBE – so it impacts the way the section (and charts under that section) are currently presented. This will require a significant change to your numbers and presentation. This may require additional explanation, so let us know.

- There are also some comments related to FAO projections for the amount of borrowing, as well as references about above trend growth in key tax drivers – these were essentially that the forecast is consistent with historical growth/trends and private sector forecasts, and the importance to note where "one-time" revenues identified as such by the FAO are actually also fiscally neutral – so should not be linked to a fiscal gap contribution by these shorter-term revenues.

Please find attached drafts of Economic Outlook and Fiscal Outlook chapters from the FAO's upcoming 'Economic and Fiscal Outlook' report.

The chapters are password protected using the same password as in the past.

As in the past, we are on a very tight schedule to enable us to release this report in early December, before the Legislature rises for the holiday break.

However, please note that we are still waiting for the detailed program spending projection consistent with FES (see attached email request from last week). This information is essential to calibrate our models and ensure consistency with the government's projections. If we do not receive that information shortly, we will be forced to proceed with our own estimates which could impact the results and conclusions presented in the report. Please be aware that we will need to be clear with MPPs, during our technical briefing, that we did not receive all the additional background information that we requested. (We did, however, receive the detailed revenue information from FES last week. Thanks)

We are asking for your comments/concerns by end of day Friday (November 24).

Happy to set up a phone call to discuss.

Thanks again for your support and assistance.

Hello Tim, Brian,

As you are aware, we are preparing our Fall EFO for release in early December.

As in the past, we are planning to send you drafts of the 2 core chapters of the report (economic outlook and fiscal outlook) on Wednesday morning, for your comments. We will also provide the supporting data tables, providing additional details on the projection. The current report follows the basic template of our earlier EFOs, and may be a little shorter.

We would greatly appreciate receiving the Ministry's comments by Friday (November 24) end of day.

Thanks, as always, for your assistance.

David

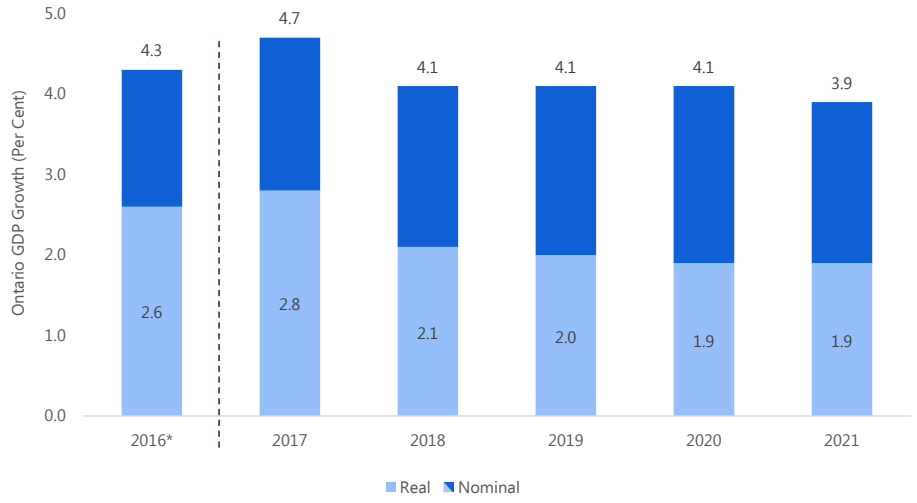
1. Economic Outlook

Overview

Ontario Economy Exceeding Expectations in 2017

Following a strong performance over the first half of 2017, the Ontario economy is expected to continue on a path of solid growth into 2018.



Led by a continued surge in household spending and residential investment, the FAO projects Ontario real GDP growth of 2.8 per cent in 2017, an upward revision from the FAO's spring outlook report.[1] Nominal GDP – the broadest measure of the tax base - is projected to increase by 4.7 per cent in 2017, well above the FAO's spring forecast. The strong growth in nominal GDP in 2017 is supported by significant gains in corporate profits.

Beginning in 2018, most forecasters, including the FAO, expect the Ontario economy to grow at a more measured pace, as growth in the US and Canadian economies is also expected to moderate. At the same time, higher interest rates are expected to contribute to slower growth of household spending and residential investment over the outlook.

Commented [AJ(1]: NGDP growth of 4.7% is the lowest estimate of the 13 forecasters that we track and also below the average of the three forecasters tracked by the FAO.

The FAO may be using a vintage version of the C4SE forecast, which contained an error. If fixed, it could change the average forecast of the three modellers for NGDP growth found in the FAO report.

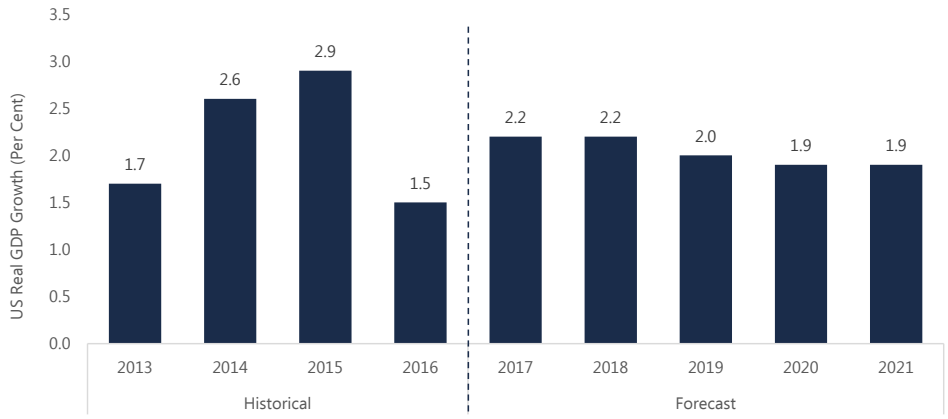
Solid Economic Performance Expected Over Outlook

* 2016 are actuals.

Source: Ontario Economic Accounts, Statistics Canada and FAO.

1 'Economic and Fiscal Outlook, Assessing Ontario's Medium-term Prospects, Spring 2017', Financial Accountability Office of Ontario.

Global Economic Growth Gaining Traction



In its latest World Economic Outlook, the International Monetary Fund (IMF) revised up its forecast for global economic growth to 3.6 per cent in 2017 and 3.7 per cent in 2018.[2] A number of key economies reported stronger than expected growth over the first half of 2017, including the euro area and Japan. These upward revisions more than offset weaker than expected growth in the United Kingdom and the United States.

United States

In the US, real GDP is expected to grow by 2.2 per cent in 2017. Following a modest first quarter gain, US consumer spending has shown signs of strengthening while business investment remains strong, particularly in the energy sector. Going forward, the FAO projects US growth to ease slightly to 1.9 per cent by 2021.

Commented [AJ(2]: The Consensus Economics and Blue Chip forecasts currently have 2018 real U.S. GDP growth at 2.5%. These forecasts are likely fresher that the CBO forecast of 2.2% used by the FAO.

US Economic Growth to Moderate

Source: US Bureau of Economic Analysis, Congressional Budget Office and FAO Consensus.

However, the outlook for the US economy depends critically on the uncertain policy direction of the current US administration. Significant tax reform, including sizable tax cuts, have been proposed, although it is unclear if an agreement in Congress will be reached. Likewise, the renegotiation of the North American Free Trade Agreement (NAFTA) is ongoing, and the potential impact of a new trade agreement on North American economies remains highly uncertain (see 'Key Risks' for more details).

Other World Economies

The IMF reports that the euro area economy continues to gain strength, supported by a pick-up in exports and continued strength in domestic demand. In China, the IMF expects economic growth to ease from 6.8 per cent in 2017 to 6.5 per cent in 2018. While the Chinese economy is continuing to rebalance towards

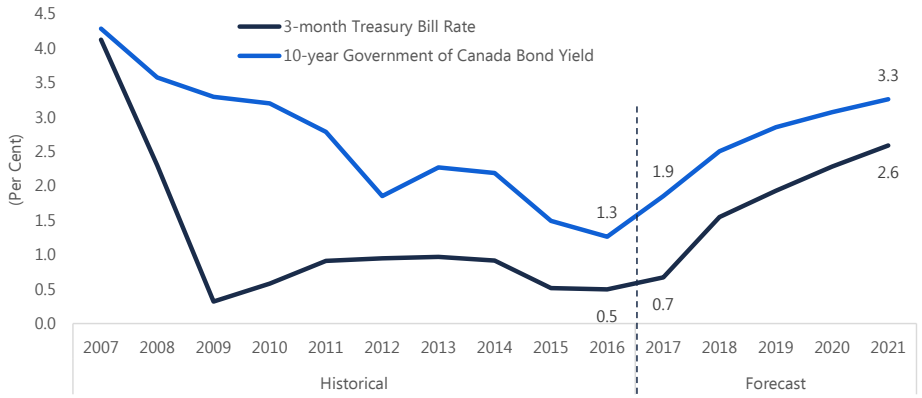
2 International Monetary Fund, World Economic Outlook, October 2017.

more consumption-led growth, debt continues to build among households, government and businesses, which could pose risks to medium-term growth.[3]

While the global economy is expected to perform solidly through 2018, over the medium term, global growth is expected to be limited by modest productivity gains, aging workforces in advanced economies, and tightening financial conditions.

Canadian Economy

The Canadian economy is on track to post the strongest annual growth since 2011. Robust consumer spending, and a pickup in exports and business investment supported solid overall Canadian growth during the first half of 2017. While consumer spending and exports are expected to moderate over the second half of the year, the Canadian economy is on pace for a 3.1 per cent annual gain in 2017. The FAO expects Canadian real GDP to grow by 2.1 per cent in 2018 and by an average of 2.0 per cent through 2021, as higher interest rates contribute to slower growth in consumer spending and residential investment.



The brisk pace of economic growth over the first half of the year led the Bank of Canada to increase its policy interest rate to 0.75 per cent in July and 1.0 per cent in September. Importantly, the Bank indicated that with the Canadian economy operating near full capacity, it will take a cautious, data-driven approach in determining future rate increases. Given the Bank's measured approach and the subdued rate of consumer price inflation, the FAO expects a gradual but steady rise in interest rates over the medium-term, consistent with the FAO's spring outlook.

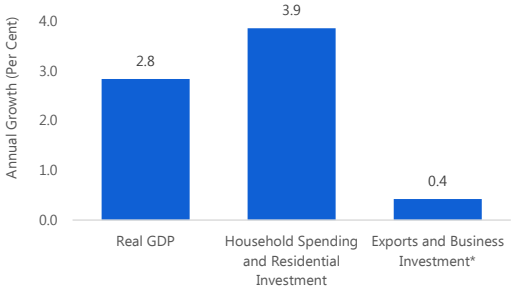
Commented [AJ(3]: Worth noting that the BoC held rates steady at its October meeting.

The recent increases in Canadian interest rates contributed to an eight-cent appreciation in the Canadian dollar relative to the US dollar through the summer, before retracing some of this gain more recently. With this appreciation, the FAO projects that the dollar will average 78 cents in 2017, slightly higher than the FAO's spring outlook. Going forward, the FAO expects a gradual appreciation of the dollar to about 81 cents by 2021, supported by a steady rise in Canadian interest rates and a moderate increase in oil prices.

Canadian Interest Rates to Rise over the Outlook

3 International Monetary Fund, China's Economic Outlook in Six Charts, August 2017.

Source: Statistics Canada and FAO.

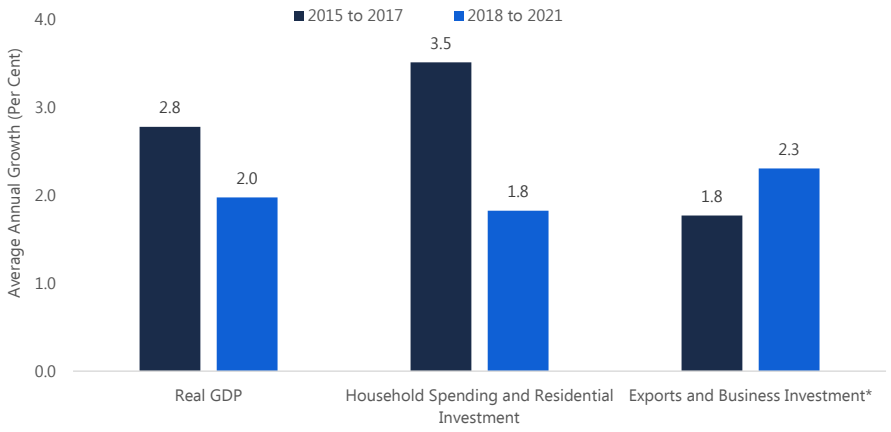


Ontario Economic Outlook

Solid 2017 Growth Expected to Moderate over the Outlook

Ontario posted solid real GDP growth of 2.6 per cent in 2016, the third consecutive year of strong growth for the economy. The FAO expects that the economy's momentum will continue into 2017, with real GDP advancing by 2.8 per cent.

However, despite the projection for relatively strong economic growth in 2017, the drivers of that growth are unbalanced. Household spending and residential construction are providing the main support for the economy's growth in 2017, while exports and business investment have underperformed.



Household Spending Primary Driver of Growth in 2017

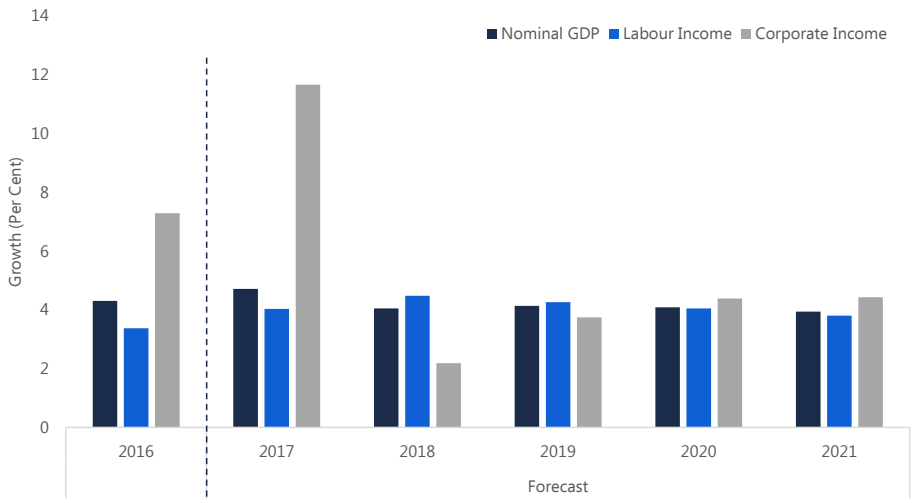
* Business Investment includes both Non-Residential Investment and Machinery & Equipment Investment.
Source: Statistics Canada, Ontario Economic Accounts and FAO.

Going forward, the FAO expects that elevated levels of household debt combined with rising interest rates will hamper household spending and residential investment. At the same time, exports and business investment are expected to contribute more to economic growth, as sustained foreign demand encourages businesses to increase production capacity (discussed further in 'Key Risks' below). Over the outlook, the FAO projects real GDP growth will ease to 2.1 per cent in 2018 and average 1.9 per cent per year from 2019 to 2021.

Exports and Business Investment Expected to Drive Growth over the Outlook

* Business Investment includes both Non-Residential Investment and Machinery & Equipment Investment.
Source: Statistics Canada, Ontario Economic Accounts and FAO.

Strong Gain in Corporate Profits Projected for 2017



The FAO is forecasting nominal GDP growth of 4.7 per cent in 2017, driven by an 11.7 per cent increase in corporate profits, and a more moderate gain of 4.0 per cent in labour income.

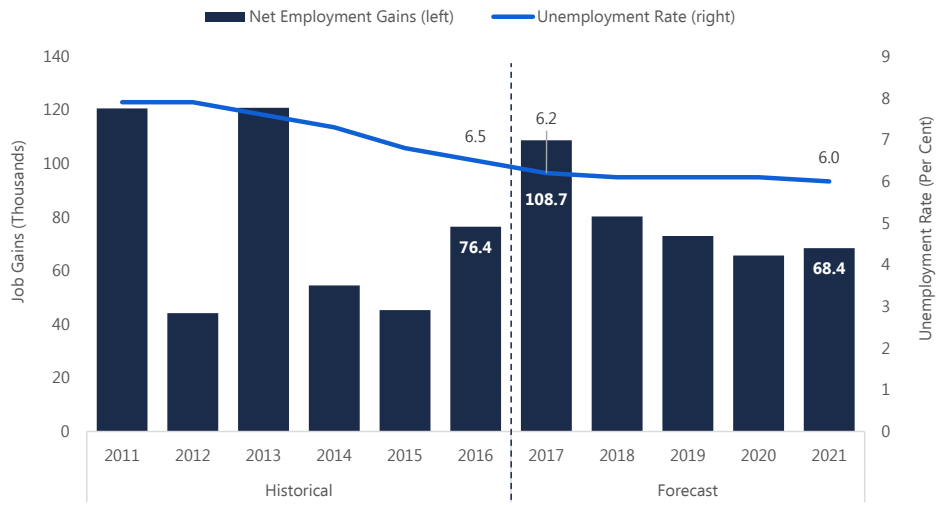
The planned increases to Ontario's minimum wage are expected to raise labour income growth in 2018 and 2019.[4] Beyond 2019, labour income growth is expected to moderate to 3.8 per cent by 2021.

Slower labour income gains will contribute to slightly more moderate nominal GDP growth of 3.9 per cent by 2021.

Corporate Income Leads Nominal GDP Growth in 2017

4 The FAO's forecast incorporates explicit assumptions of higher labour income growth, a small reduction in employment gains and a slight increase in CPI inflation due to the planned increases in Ontario's minimum wage. See the FAO's commentary *Assessing the Economic Impact of Ontario's Proposed Minimum Wage Increase* for details.

Note: Labour and corporate income comprise roughly 70 per cent of nominal GDP. The other categories include mixed income (from proprietorships) and net taxes.



Source: Statistics Canada, Ontario Economic Accounts and FAO.

Steady Job Gains Expected to Continue

The FAO is projecting strong job growth of 1.6 per cent (+109 thousand net new jobs) in 2017, following a gain of 1.1 per cent (+76 thousand net new jobs) in 2016.

Over the outlook, sustained economic growth is expected to support average annual employment growth of 1.1 per cent, just slightly faster than the growth in the labour force. As a result, the unemployment rate is expected to trend lower, falling from 6.2 per cent in 2017 to 6.0 per cent by 2021.

Steady Employment Gains as Unemployment Rate Trends Lower

Source: Statistics Canada and FAO.

Key Risks for Ontario's Economic Outlook

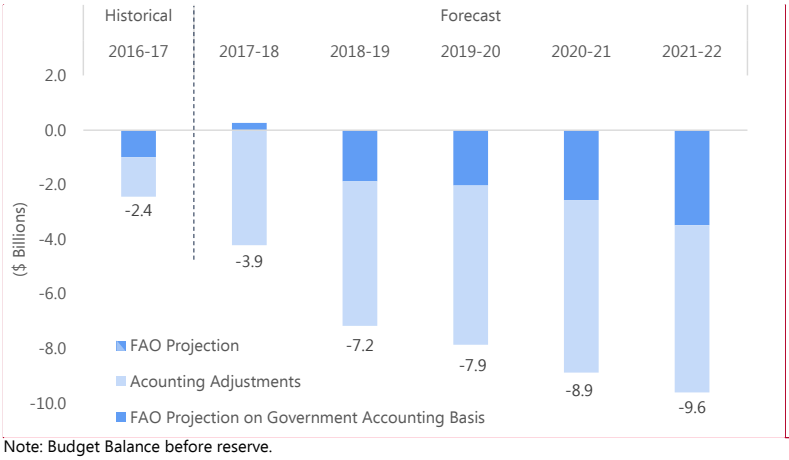
While the FAO expects solid economic growth over the medium-term, there are a number of risks that could negatively affect Ontario's economic performance.

Most economic forecasters, including the FAO, continue to assume that NAFTA will largely be maintained in its current form. However, the US administration is demanding significant concessions from Canada and Mexico, and has threatened to leave NAFTA altogether. Some businesses may already be postponing investment decisions outside of the United States due to the uncertainty surrounding NAFTA. If the renegotiation of NAFTA leads to a deterioration in Ontario's terms of trade or restricts access to the US market, there would be significant negative implications for the province's growth prospects.

In recent years, strong growth in household spending has not been matched by similar gains in household incomes, leading to higher levels of household debt. In 2016, household debt reached 167 per cent of disposable income in Ontario, a significant rise from 149 per cent in 2010.[5] Higher debt burdens expose households to financial risk. With a steady rise in interest rates expected over the next few years, many households will scale back discretionary spending in order to make higher debt interest payments, which in turn could have implications for the pace of overall economic growth.[6]

Commented [AJ(4]: There are also some upside risks to the Ontario economic outlook. For instance, the risk section would benefit from a discussion of potentially stronger Ontario real GDP growth in 2018 because of stronger global growth.

5 Statistics Canada Annual Household Wealth Distribution Tables (Provisional Data).
6 The Bank of Canada describes this risk as elevated, with a low probability of occurrence but a severe impact if it were to materialize. Bank of Canada, Financial System Review, June 2017.



1. Fiscal Outlook

FAO Projects a Return to Significant Budget Deficits

Despite a strong increase in revenues, the FAO is projecting an Ontario budget deficit of $3.9 billion in 2017-18, entirely the result of the Auditor General of Ontario's (AG) recommended accounting treatment for both the government's Fair Hydro Plan and the net pension assets of jointly-sponsored pension plans.[1]

Beyond 2017-18, the FAO is projecting a significant deterioration in the budget deficit due to the loss of time-limited revenues, a more moderate pace of tax revenue growth, and the growing fiscal impact of the AG's recommended interpretation of public sector [OPCD edit] accounting ~~framework~~standards (PSAS) [OPCD edit]. By 2021-22, the FAO is projecting an Ontario budget deficit of $9.6 billion in the absence of any fiscal policy changes.

Ontario Budget Balance

Note: Budget Balance before reserve.
Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review, and FAO.

Commented [GNR1]: OPCD: Legend description: FAO Projection using government interpretation of PSAS

In the *2017 Ontario Economic Outlook and Fiscal Review* (also referred to as the Fall Economic Statement or FES), the government projected balanced budgets for 2017-18 through to 2019-20. However, the government's fiscal projection relies on an overly optimistic revenue forecast and does not adopt the AG's recommended accounting interpretations on two issues: 1) accounting for net pension assets of jointly sponsored pension plans, and 2) the global adjustment refinancing component of the Ontario Fair Hydro Plan~~framework~~. [OPCD edit]

For comparison, under the government's accounting presentation, the FAO projects a small budget surplus for 2017-18 – approximately equal to the government's own budget projection. However, there are a

[1] See *The Fair Hydro Plan: Concerns About Fiscal Transparency, Accountability and Value For Money; Auditor General of Ontario, October 2017* and *Independent Auditor's Report, 2016-17 Consolidated Financial Statements, Auditor General of Ontario, 2017.*

number of time-limited and one-time revenues in 2017-18. Going forward, the loss of these temporary revenues combined with more moderate tax revenue growth results in a return to deficit in 2018-19 and a steady deterioration in the budget deficit over the outlook.

The Accounting Presentation of Ontario's Financial Statements

The government's fiscal plan, as presented in both the 2017 Ontario Budget and Fall Economic Statement, does not adopt the Auditor General's recommended accounting ~~presentation, reducing the transparency and clarity of Ontario's fiscal position.~~ treatment for which the government received a qualified opinion from the AG in the 2016-17 Public Accounts of Ontario [OPCD edit]

In addition to the existing disagreement over the appropriate accounting treatment for the government's jointly sponsored pension plans, the AG recently reported that the government is not correctly accounting for the full cost of the Fair Hydro Plan in its financial statements.[2] As a result, the government's fiscal presentation is expected to continue to receive qualified opinions from the AG.

Revenue Outlook

The FAO is projecting average annual revenue growth of 3.1 per cent over the forecast. In 2017-18, revenues are supported by strong growth in taxes, as well as a number of time-limited or one-time revenues. Beginning in 2018-19, the FAO is projecting more moderate revenue growth as:

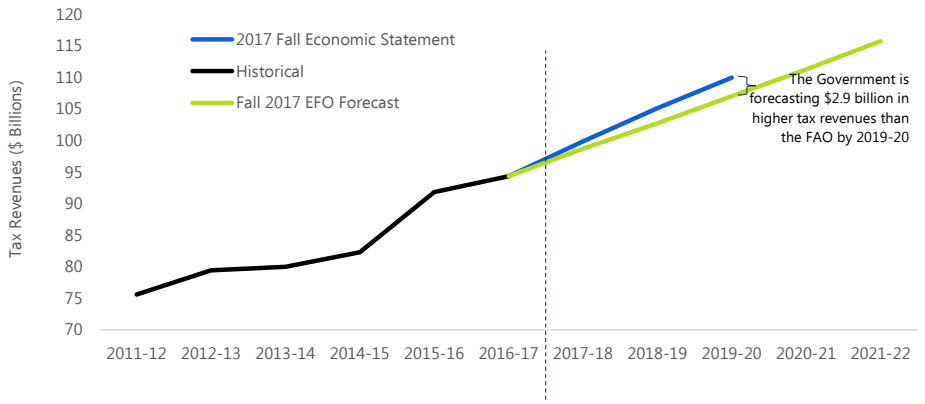
- time-limited revenues end (including the debt retirement charge and federal equalization payments);
- economic growth moderates, following several years of stronger than average growth; and
- the fiscal impact of the Fair Hydro Plan increases, reducing electricity-sector revenues.

Tax Revenue Growth Expected to Moderate

Nominal GDP, the broadest measure of the tax base, is projected to grow by a strong 4.7 per cent in 2017, supporting a 4.6 per cent increase in tax revenues in 2017-18. From 2018 to 2021, annual GDP growth is expected to moderate to 4.1 per cent, leading to similar slowing in tax revenue growth to 4.1 per cent on average over this period.

In the government's Fall Economic Statement, tax revenue is projected to grow by 5.2 per cent on average from 2017-18 to 2019-20, much higher than the FAO's projection of 4.3 per cent over the same period. The government's expectation of higher growth results in an additional $2.9 billion in tax revenues by 2019-20, relative to the FAO projection.

Commented [ES2]: OFA comment: There is no mention of the findings of the independent Pension Asset Expert Advisory Panel. Even if the FAO disagrees with the findings there should be a reference that the Government has followed the Panel's recommendation in accounting for pension assets.

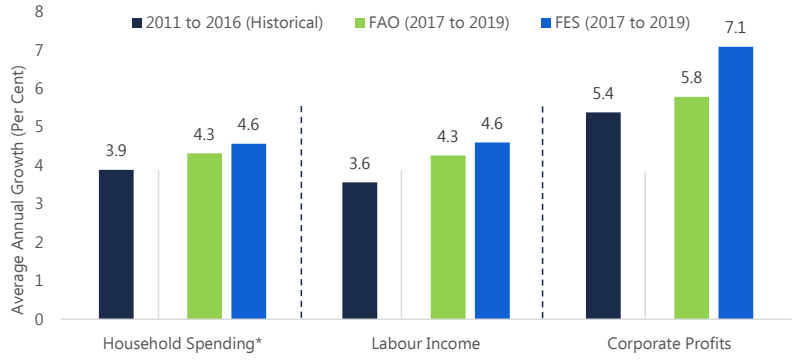


Commented [ES3]: OB: On page 4 states FAO estimates this will end in 2019-20

Commented [GNR4]: OFA: The FHP does not have a net negative revenue impact. See page 4 comments.

Commented [GNR5]: OB: Average annual growth in tax revenue is 5.2 per cent from 2016–17 to 2019–20.

[2] 2016-17 Consolidated Financial Statements, Auditor General of Ontario, 2017



FAO's Taxation Revenue Outlook

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

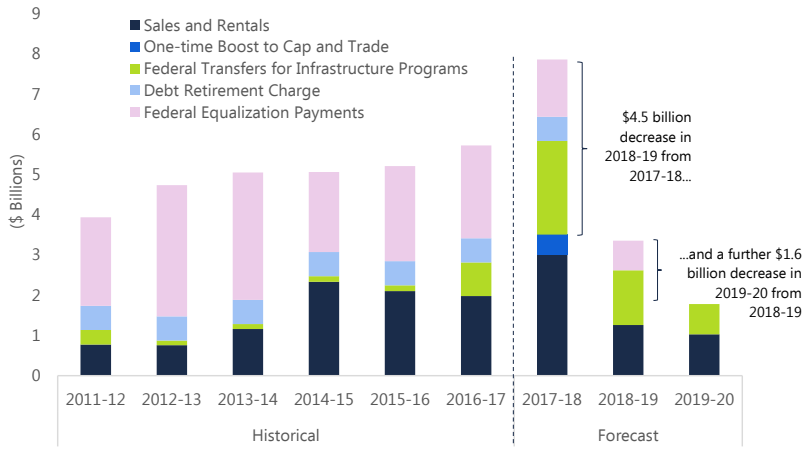
The government's revenue forecast relies on more optimistic projections for many of the key economic drivers of tax revenue, including labour income; corporate profits; and household spending.

Growth in Key Tax Drivers

* The FES forecast for Household Spending is Real Household Spending plus CPI.

Source: Statistics Canada, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

While the FAO expects incomes and household spending to grow somewhat faster than recent historical trends,[3] the government's tax revenue forecast is based on significant and sustained above-trend growth for each of the three key tax drivers.



The Loss of Time-limited Revenues

The Province's 2017-18 revenues incorporate a number of one-time or time-limited revenues that are set to expire. These include:

- a temporary increase to sales and rentals revenue, reflecting additional asset sales[4];
- higher federal transfers for infrastructure;
- the final year of the debt retirement charge[5];
- federal Equalization payments, which the FAO estimates will end in 2019-20; and
- revenue from an additional cap-and-trade auction that occurred in March 2017, which will be recognized in the 2017-18 fiscal year.[6]

Taken together, these time-limited revenues will decrease by $4.5 billion in 2018-19, and by an additional $1.6 billion in 2019-20.

Many Time-limited Revenues are Set to Expire Beyond 2017-18

3 Labour income is expected to grow above trend in part due to the increased minimum wage over the outlook (which is also expected to boost household spending). Estimates of Ontario corporate profits over the first half of 2017 imply very strong growth.

4 Asset sales include the Province's ~~22~~ 20 per cent sale of Hydro One equity in a secondary offering in 2017-18, which the FAO estimates ~~would~~ to generate about $0.8 billion in revenue. [OFA edits]

5 The debt retirement charge (DRC) is a charge payable on electricity consumed in Ontario and replaces a portion of debt servicing costs previously included as part of electricity bills before the restructuring of the former Ontario Hydro. The government ended the DRC on residential bills as of January 1, 2016. The DRC will remain on other electricity users' bills for electricity consumed before April 1, 2018. [OFA edits]

6 In fiscal year 2017-18, there were five cap and trade auctions. Going forward the Provinces expects to have four auctions per year.

Commented [GNR6]: OEP: This point and the chart above may not accurately portray the FES forecast for key revenue drivers.

It should be noted that beyond 2017, the FES forecast for revenue drivers are broadly consistent with economic trends and long-term historical growth.

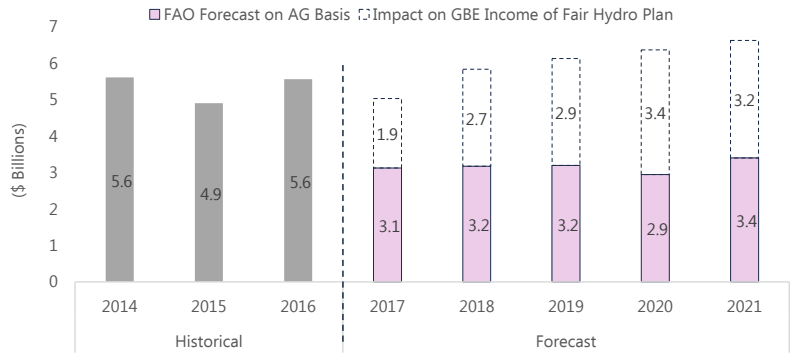
The FES forecast for revenue drivers is tied to private sector forecasts. These have been heavily influenced by strong readings in 2017. For instance, profit growth was very strong in 2017, but is only expected to grow by 3.3% on average between 2018 and 2020 in the FES forecast. Labour income is expected to grow more strongly and average 4.6% over the same period as a tight labour market supports a shift in income growth from profits to wages.

Commented [GNR7]: OFA: Please see changes to footnote below. ~20% of Hydro One shares were sold in May 2017, so we have revised the percentage. However, it may also be noted that the Province has an agreement in principle with First Nations to sell up to 2.5% of Hydro One common shares. News release on both items here.

Commented [GNR8]: OB: This is fiscally neutral as there is a corresponding expense associated with it.

Commented [GNR9]: OPCD: non-capitalized amounts (e.g. supporting municipal (housing) / university infrastructure); capitalized amounts would be amortized

Commented [GNR10]: OPCD: non-residential users.



Commented [GNR11]: OB: This is fiscally neutral as there is a corresponding expense associated with it.

Source: Ontario Budgets, Ministry of Finance and FAO.

Government Business Enterprises and the Impact of the Fair Hydro Plan

The government introduced the "Fair Hydro Plan" to reduce electricity bills for residential customers by an average of 25 per cent. The government's plan includes ~~subsidizing~~ refinancing a portion of electricity ~~prices~~ costs for ratepayers through provincial and Ontario Power Generation (OPG) and OPG Trust borrowing. Consistent with the AG's recommendation on the consolidated bottom-line fiscal impact on the Province, the FAO is ~~captured~~ capturing ~~the~~ this fiscal impact of this borrowing by reducing the net income of OPG by $1.9 billion in 2017-18, and by $3.2 billion by 2021-22. [OFA track change edits in this paragraph]

Impact of the Fair Hydro Plan on Ontario's Revenue from Government Business Enterprises

Source: Public Accounts, 2017 Ontario FES and FAO.

FAO Revenue Assumptions and Forecast

Revenue Source	Assumption	Forecast
Taxation Revenue	Grows with key economic drivers including labour income, corporate profits and household spending	Averages 4.2 per cent growth per year from 2017-18 to 2021-22[7]
Federal Transfers	Based on legislated growth rates and economic forecasts for Ontario and Canada	Federal transfers are expected to grow by 1.6 per cent per year from 2017-18 to 2021-22
Government Business Enterprises (GBE)	Based on government projections, and adjusted for the impact of the Fair Hydro Plan as recommended by the Auditor General	Income from GBEs are projected to fall from $5.6 billion in 2016-17 to $3.1 billion in 2017-18 and remain roughly stable at that level to 2021-22

7 The reduction in the Small Business Corporate Income Tax rate is reflected in the FAO's tax revenue projections.

Commented [GNR12]: OFA: The costs are still to be paid by the specified consumers, so not a subsidy.

Commented [GNR13]: OFA: Perhaps a suggested rewording?

Or, would it be more consistent for FAO to show it as an Energy expense line increase, through IESO consolidation? (Noting that the government's position is that there is not an expected net impact from the refinancing.)

Commented [GNR14]: OFA: This may be misleading to show an impact on the revenue side, in that the AG's recommendation was that all interest expense, and annual financing shortfall expense would be an expense to the Province (p. 16).

Commented [GNR15]: OPCD: The IESO incurs the shortfall, not OPG; reported as expense on full consolidation basis (no impact to revenue).

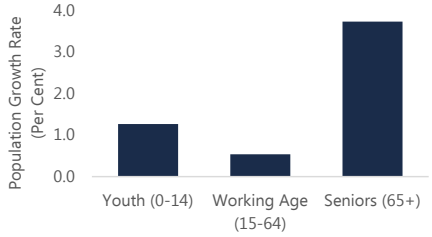
Commented [GNR16]: OB: Should the years presented in the graph be fiscal years? E.g. 2019-20 etc.

Commented [GNR17]: OPCD: IESO is not a GBE.

Commented [GNR18]: OPCD: See note above (IESO would be affected under the AG recommended accounting; not a GBE)

Other Revenue	Based on government projections, and includes asset sales, and proceeds from the sale of cap and trade allowances	These revenues are projected to increase from $16.3 billion in 2016-17 to $19.4 billion in 2017-18, before declining to $18.0 billion by 2021-22

Expense Outlook



Program Spending

The FAO projects program spending to grow by 3.9 per cent from 2017-18 to 2021-22.[8]

Over the 2017-18 to 2019-20 period, the FAO's outlook adopts the government's 2017 Fall Economic Statement's projections for program spending, adjusted to reflect the Auditor General's recommended accounting presentation.[9] The projection for program spending is largely unchanged from the 2017 Ontario Budget, aside from $200 million of new spending in 2017-18, declining to $100 million by 2019-20.[10]

Beyond 2019-20, the FAO projects program spending will grow at an annual average rate of 4.1 per cent. This stronger pace of growth reflects additional spending to meet two demographic pressures: the aging baby boomer cohort and the growing youth population. The growth in these two population groups will place added spending pressures on Ontario's health care and education systems.

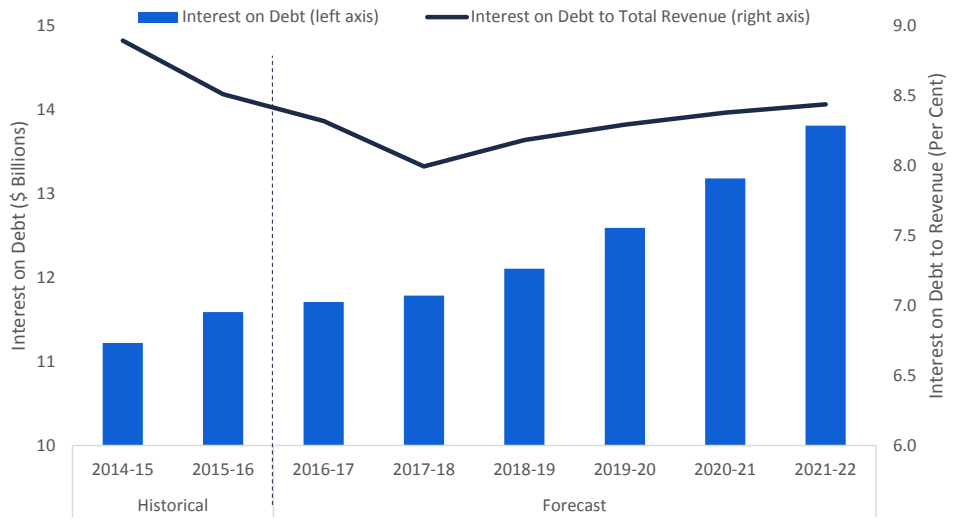
Population Growth by Age (2016-2021)

Source: Statistics Canada and FAO

Interest on Debt

Interest on debt (IOD) payments are expected to increase at an average rate of 3.4 per cent per year over the outlook due to elevated borrowing levels and rising interest rates.

The decline in IOD as a share of revenues over the past three years was due to stronger revenue growth, lower borrowing and maturing debt being refinanced at much lower rates of interest. However, this trend is expected to reverse over the outlook as revenue growth moderates while IOD payments accelerate. By 2021-22, Ontario's debt interest payments will account for 8.4 per cent of total revenue, slightly higher than the 8.1 2 per cent share in 2017-18.



Commented [ES19]: OFA: 2017 FES; it appears that the FAO does not use BPS-consolidated IOD; this choice also affects the IOD chart on page 9.

8 Excluding the pension adjustment, the FAO projects program spending to grow by 3.5 per cent on average from 2017-18 to 2019-20, largely unchanged from the FAO's Spring EFO.

9 Based on information provided by the Ministry of Finance, the FAO's projection for 'Other Spending' includes $2.3 billion in 2017-18 for the valuation allowance on jointly-sponsored pension assets, growing to $2.9 billion by 2021-22.

10 In the 2017 FES, the government announced new funding for additional spending for small businesses, seniors and child care. However, the additional expenses for child care is fiscally neutral since it is funded by a corresponding increase in federal transfer revenue.

Interest on Debt

Source: Ontario Public Accounts and FAO.

Borrowing and Net Debt

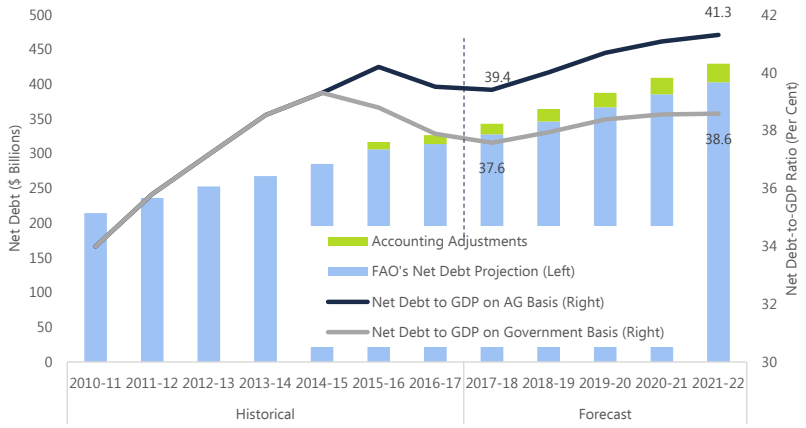
Despite higher funding requirements for capital expenditures and the Fair Hydro Plan, Ontario's borrowing is expected to decline to $~~23~~25.8 [OFA]billion in 2017-18, the lowest level of borrowing since ~~2007~~2008-09 [OFA]. The relatively low level of borrowing in 2017-18 is largely the result of debt maturities falling by $~~4.1~~3.5 billion to $17.4 billion.[11]

Beginning 2018-19, borrowing requirements are expected to increase significantly due to higher annual debt maturities, ~~additional funding requirements for the Fair Hydro Plan~~ [OFA]and rising capital expenditures. By 2021-22, the FAO expects borrowing to increase to $42 billion – nearly double the borrowing requirement in 2017-18.

In 2017-18, the FAO projects that Ontario's net debt-to-GDP ratio will edge down, reflecting lower borrowing and strong economic growth. However, over the next five years, the FAO projects that nearly $90 billion will be added to net debt – increasing the net debt-to-GDP ratio to 41 per cent by 2021-22.[12]

11 When debt matures the government must roll over the maturing debt with new borrowing. Declines in maturities result in lower borrowing and vice versa.
12 The FAO's estimate of net debt incorporates the AG's recommended accounting framework.

Commented [GNR20]: In the graph, the bar for 2016–17 can be moved into the historical section.



Commented [ES21]: OFA 2016-17 maturities of 20.9 (from Q1 Finances) minus 2017-18 maturities of 17.4 (from FES FT)

Commented [ES22]: OFA: The Province has already factored in all borrowing requirements, including the debt burden projections for the Fair Hydro plan for that year, in consultation with OPG and retained consultants. The $42 billion therefore is in excess of Ontario's projection by a significant amount.

Commented [ES23]: OFA: The change in net debt reflects the change in the deficit and the change in Net Investment in Tangible Capital Assets – it should not be attributed to lower borrowing which is really the outcome

Commented [ES24]: OFA: With regard to the 41% by the FAO in 2021-22, the Province projects it to be 36.1% for that year as published in the Fall Economic Statement. In the Province's opinion, the FAO is likely factoring in a budget deficit that the government does not project for that year given the balanced budget commitment The FAO's projections include the addition of the 2015-16 Pension adjustment despite the pronouncements of the Expert Panel that confirmed the correctness of the Government's accounting treatment of this asset The reversal of the pension adjustment is correct and in line with the recommendations of the Independent Pension Asset Expert Advisory Panel. The FAO also includes additional Fair Hydro Plan debt that is not in line with provincial projections already incorporated in the Province's Borrowing Program for 2017-18 and the two out years. The incremental borrowings for funding the Province's equity injection to OPG over the FES outlook period is a small fraction of the Province's borrowings and have no impact on the Province's net debt.

Net Debt Outlook

Source: FAO and 2017 Ontario Economic Outlook and Fiscal Review, Ontario Public Accounts

The government continues to maintain a net debt-to-GDP target of 35 per cent by 2023-24 and 27 per cent by 2029-30. However, the FAO's net debt-to-GDP projections under both accounting presentations suggest that additional fiscal measures would be required for the government to achieve its net debt-to-GDP targets.

Hi All,

As a follow up to my message yesterday, I'm attaching an embargoed copy of the FAO's final EFO report. Please **limit circulation of the report** as it's not being released officially until Monday.

Can you please ensure that your ADM approved input/edits to the summary note reflect this latest version of the report **by EOD today**?

Please let me know if you have any questions.

Thanks,
Ryan

Subject: The FAO's Fall 2017 Economic and Fiscal Outlook

Good morning,

The FAO will be releasing a 'Fall 2017 Economic and Fiscal Outlook' report on Monday, December 11, 2017 at 10:00 am.

We have scheduled technical briefings of the embargoed report for MPPs at 9:00 am on Monday. The Temporary FAO, the Honourable David Wake and I will provide a media statement at 10:00 am.

A pre-release copy of the report is being delivered to Ministers Sousa and Sandals this morning, as required by the FAO Act.

Please find attached a copy of the final report for your reference.

Please treat this document as embargoed until its release on Monday at 10:00 am.

As always, we greatly appreciate your assistance and support for the work of the FAO.

Best regards,
David

Economic and Fiscal Outlook

Assessing Ontario's Medium-term Prospects

Fall 2017 Update

About this Document

Established by the *Financial Accountability Officer Act, 2013*, the Financial Accountability Office (FAO) provides independent analysis on the state of the Province's finances, trends in the provincial economy and related matters important to the Legislative Assembly of Ontario. The FAO's Economic and Fiscal Outlook is released each spring and fall, providing an assessment of the province's medium-term economic performance and fiscal position.

This report was prepared by Nicolas Rhodes, Luan Ngo and Edward Crummey under the direction of David West. External reviewers were provided with earlier drafts of this report for their comments. However, the input of external reviewers implies no responsibility for this final report, which rests solely with the FAO.

This report is based on information available to November 15, 2017. Background data used in this report are available upon request.

FAO's Fiscal Projections

The FAO forecasts provincial finances based on projections of existing and announced revenue and spending policies. The forecast represents the FAO's view of the most likely fiscal outcomes given existing policies, without anticipating any new government policy decisions. The FAO's tax revenue projections are based on an assessment of the outlook for the provincial economy and current tax policies. Given the government's discretion over spending, the FAO adopts the government's announced spending plans from fiscal documents and incorporates policy announcements as appropriate. Beyond the government's published spending projections, the FAO forecasts spending based on the outlook for underlying cost drivers including demographics and price inflation.

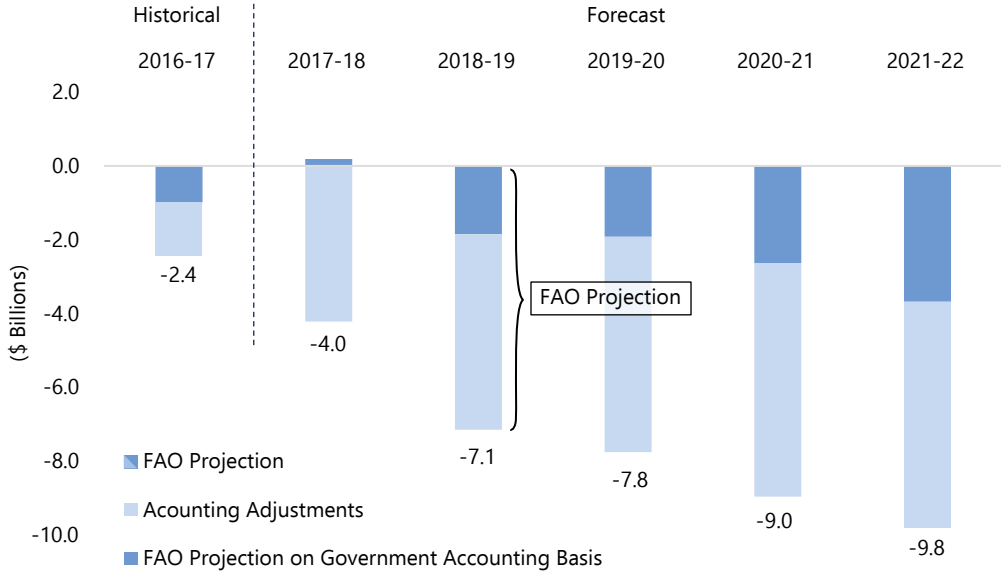
1 EXECUTIVE SUMMARY

FAO Projects a Return to Significant Budget Deficits

Despite a strong boost to revenues this year, the FAO is projecting an Ontario budget deficit of $4.0 billion in 2017-18, the result of the Auditor General of Ontario's recommended accounting treatment for both the government's Fair Hydro Plan and the net pension assets of jointly-sponsored pension plans.[1]

Beyond 2017-18, the FAO is projecting a significant increase in the budget deficit due to the loss of time-limited revenues, a more moderate pace of tax revenue growth, and the growing fiscal impact from the Fair Hydro Plan. By 2021-22, the FAO is projecting a budget deficit of $9.8 billion, in the absence of any fiscal policy changes. This is a significant deterioration since the FAO's spring outlook[2] and is primarily the result of the introduction of the Fair Hydro Plan, which will add $3.2 billion to the budget deficit by 2021-22, under the Auditor General's recommended accounting treatment.

In contrast, under the government's accounting framework, the FAO projects a small budget surplus in 2017-18, and a return to budget deficits beginning in 2018-19 due to the loss of temporary revenues and moderate growth in tax revenues.



Since the government has not adopted the Auditor General's recommended accounting for both the Fair Hydro Plan and net pension assets, it is becoming more

1 See 'The Fair Hydro Plan: Concerns About Fiscal Transparency, Accountability and Value For Money,' Auditor General of Ontario, October 2017; 'Independent Auditor's Report, 2016-17 Consolidated Financial Statements', Auditor General of Ontario, 2017; and 'An Assessment of the Fiscal Impact of the Province's Fair Hydro Plan,' Financial Accountability Office, 2017.

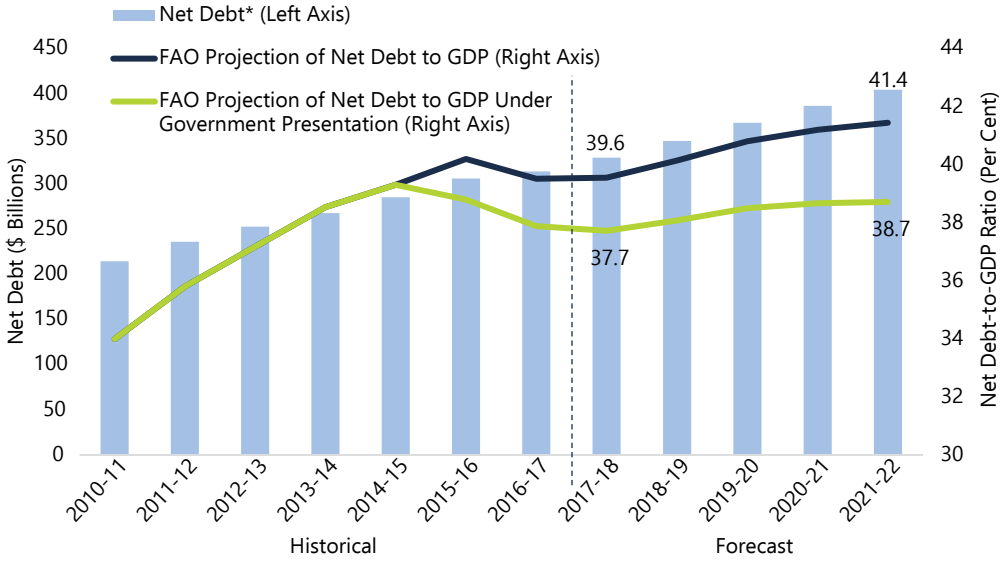
difficult for legislators and the public to assess the government's fiscal projections. This has reduced the transparency and reliability of Ontario's fiscal plan.

Ontario Budget Balance

Note: Budget Balance before reserve.

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.



The FAO is projecting very strong growth for the Ontario economy in 2017. Consistent with the outlook of most economic forecasters, the FAO expects the economy will grow at a more measured pace beginning in 2018. However, Ontario's economic performance could worsen if the renegotiation of NAFTA impairs Ontario's access to the US market, or if households reduce discretionary spending due to high debt levels and rising interest rates.

Total revenues are forecast to increase by 3.5 per cent per year on average over the outlook, somewhat slower than the rate of GDP growth. This reflects the loss of time-limited revenues in 2018-19, as well as moderating tax revenue growth over the outlook. By comparison, the FAO projects program spending will grow by 4.4 per cent on average from 2017-18 to 2021-22, when all spending related to the Fair Hydro Plan is included.

The FAO projects Ontario's net debt-to-GDP ratio will remain essentially unchanged in 2017-18 at just under 40 per cent. However, over the next four years, the FAO expects that without any change to current fiscal policies, approximately $75 billion will be added to Ontario's net debt, increasing the net debt-to-GDP ratio to over 41

per cent by 2021-22.[3] In contrast, the government continues to maintain a net debt-to-GDP target of 35 per cent by 2023-24 and 27 per cent by 2029-30.

Net Debt Outlook

* Net debt is presented on the AG's recommended accounting basis, which includes the impact of the Fair Hydro Plan and the pension adjustment.

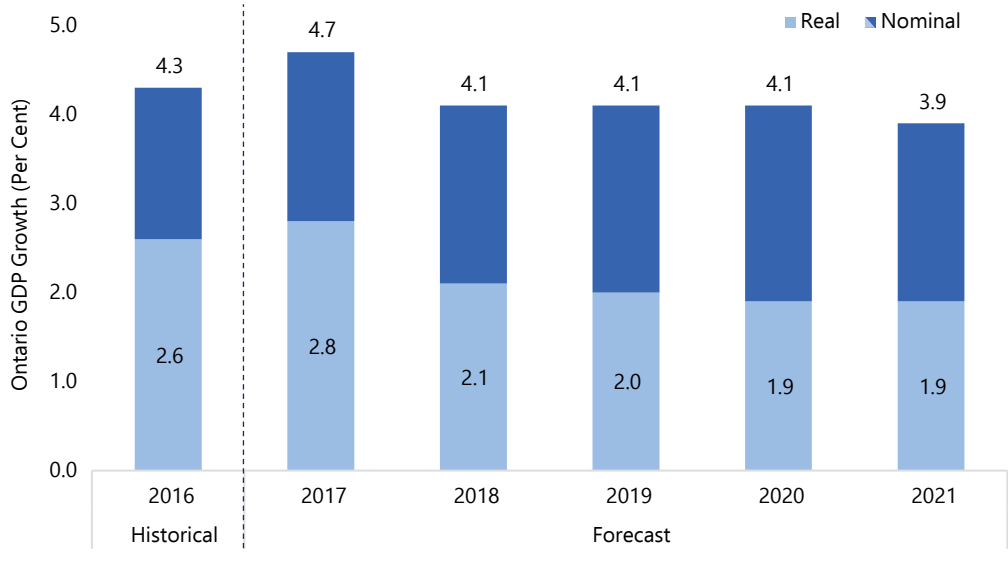
Source: 2017 Ontario Economic Outlook and Fiscal Review, Ontario Public Accounts and FAO.

Current and future Ontario governments are facing difficult policy choices. Based on the FAO's fiscal projection, additional measures to raise revenue or lower spending will be required if the Province intends to achieve and maintain a balanced budget, and lower Ontario's debt burden.

3 The FAO's estimate of net debt incorporates the AG's recommended accounting framework.

2 ECONOMIC OUTLOOK

Overview



Ontario Economy Exceeding Expectations in 2017

Following a strong performance over the first half of 2017, the Ontario economy is expected to continue on a path of solid growth into 2018.

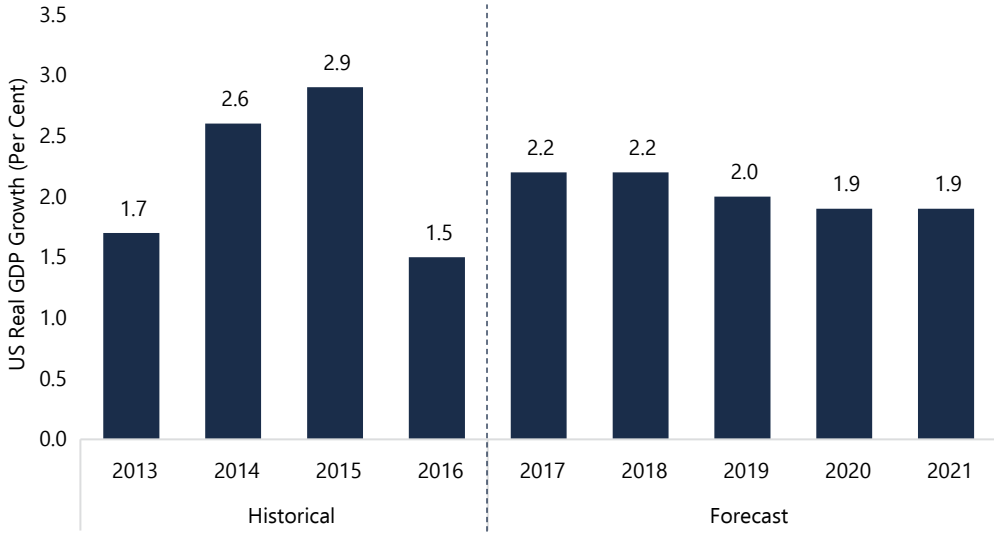
Led by a continued surge in household spending and residential investment, the FAO projects Ontario real GDP growth of 2.8 per cent in 2017, an upward revision from the FAO's spring outlook report. Nominal GDP – the broadest measure of the tax base - is projected to increase by 4.7 per cent in 2017, well above the FAO's spring forecast. The strong growth in nominal GDP in 2017 is supported by significant gains in corporate profits.

Beginning in 2018, most forecasters, including the FAO, expect the Ontario economy to grow at a more measured pace, as growth in the US and Canadian economies is also expected to moderate. At the same time, higher interest rates are expected to contribute to slower growth of household spending and residential investment over the outlook.

Solid Economic Performance Expected Over Outlook

Source: Ontario Economic Accounts, Statistics Canada and FAO.

Global Economic Growth Gaining Traction



In its latest World Economic Outlook, the International Monetary Fund (IMF) revised up its forecast for global economic growth to 3.6 per cent in 2017 and 3.7 per cent in 2018.[4] A number of key economies reported stronger than expected growth over the first half of 2017, including the euro area and Japan. These upward revisions more than offset weaker than expected growth in the United Kingdom and the United States.

United States

In the US, real GDP is expected to grow by 2.2 per cent in 2017. Following a modest first-quarter gain, US consumer spending has shown signs of strengthening while business investment remains strong, particularly in the energy sector. Going forward, the FAO projects US growth to ease slightly to 1.9 per cent by 2021.

4 International Monetary Fund, World Economic Outlook, October 2017.

US Economic Growth to Moderate

Source: US Bureau of Economic Analysis, Congressional Budget Office and FAO Consensus.

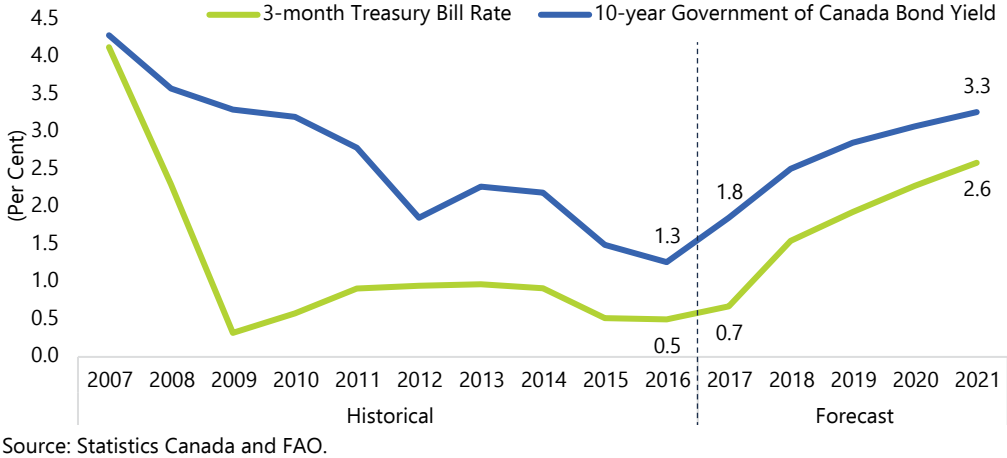
However, the outlook for the US economy depends critically on the uncertain policy direction of the current US administration. Significant tax reform, including sizable tax cuts, have been proposed, although it is unclear if an agreement in Congress will be reached. Likewise, the renegotiation of the North American Free Trade Agreement (NAFTA) is ongoing, and the potential impact of a new trade agreement on North American economies remains highly uncertain (see 'Key Risks' for more details).

Other World Economies

The IMF reports that the euro area economy continues to gain strength, supported by a pick-up in exports and continued strength in domestic demand. In China, the IMF expects economic growth to ease from 6.8 per cent in 2017 to 6.5 per cent in 2018. While the Chinese economy is continuing to rebalance towards more consumption-led growth, debt continues to build among households, government and businesses, which could pose risks to medium-term growth.[5]

While the global economy is expected to perform solidly through 2018, over the medium term, global growth is expected to be limited by modest productivity gains, aging workforces in advanced economies, and tightening financial conditions.

5 International Monetary Fund, China's Economic Outlook in Six Charts, August 2017.



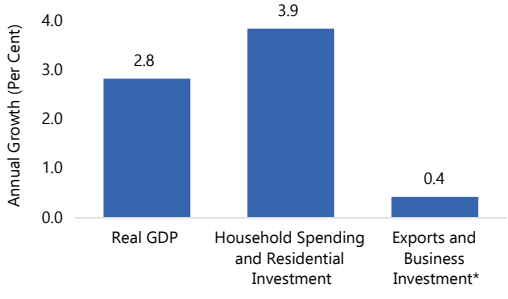
Canadian Economy

The Canadian economy is on track to post the strongest annual growth since 2011. Robust consumer spending, and a pick-up in exports and business investment supported solid overall Canadian growth during the first half of 2017. While consumer spending and exports are expected to moderate over the second half of the year, the Canadian economy is on pace for a 3.1 per cent annual gain in 2017. The FAO expects Canadian real GDP to grow by 2.1 per cent in 2018 and by an average of 2.0 per cent through 2021, as higher interest rates contribute to slower growth in consumer spending and residential investment.

The brisk pace of economic growth over the first half of the year led the Bank of Canada to increase its policy interest rate to 0.75 per cent in July and 1.0 per cent in September. Importantly, the Bank indicated that with the Canadian economy operating near full capacity, it will take a cautious, data-driven approach in determining future rate increases. Given the Bank's measured approach and the subdued rate of consumer price inflation, the FAO expects a gradual but steady rise in interest rates over the medium-term, consistent with the FAO's spring outlook.

The recent increases in Canadian interest rates contributed to an eight-cent appreciation in the Canadian dollar relative to the US dollar through the summer, before reversing some of this gain more recently. With this appreciation, the FAO projects that the dollar will average 78 cents in 2017, slightly higher than the FAO's spring outlook. Going forward, the FAO expects a gradual appreciation of the dollar to about 81 cents by 2021, supported by a steady rise in Canadian interest rates and a moderate increase in oil prices.

Canadian Interest Rates to Rise over the Outlook



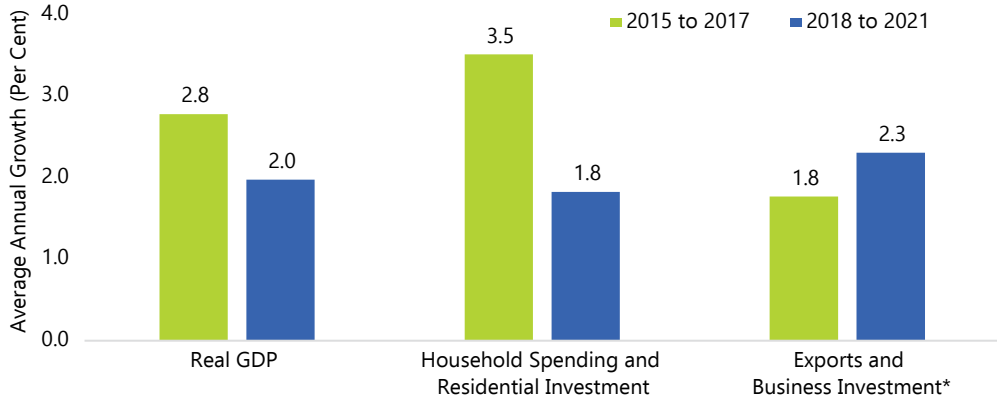
Source: Statistics Canada and FAO.

Ontario Economic Outlook

Solid 2017 Growth Expected to Moderate over the Outlook

Ontario posted solid real GDP growth of 2.6 per cent in 2016, the third consecutive year of strong growth for the economy. The FAO expects that the economy's momentum will continue into 2017, with real GDP advancing by 2.8 per cent.

Household Spending Primary Driver of Growth in 2017



* Business Investment includes both Non-Residential Investment and Machinery & Equipment Investment.

Source: Statistics Canada, Ontario Economic Accounts and FAO.

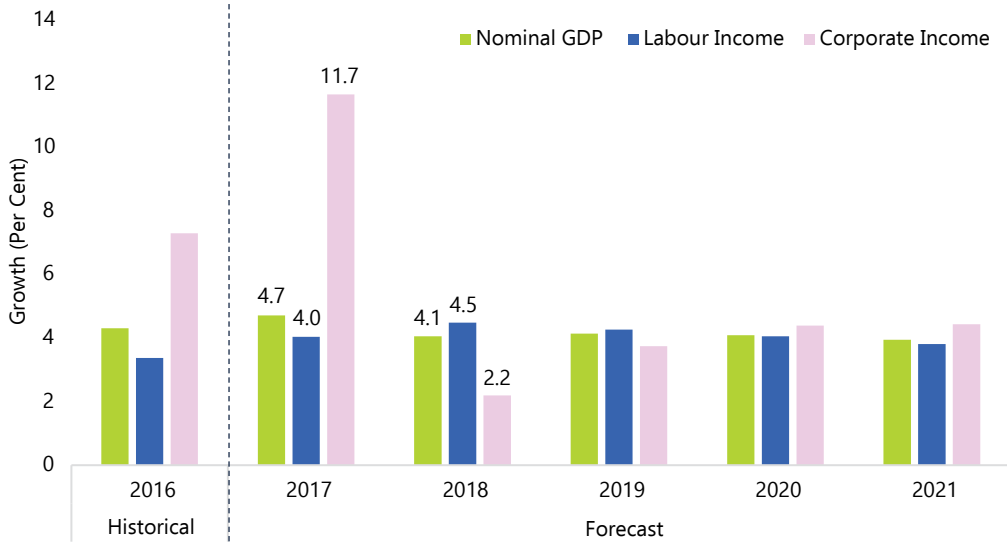
However, despite the projection for relatively strong economic growth in 2017, the drivers of that growth are unbalanced. Household spending and residential construction are providing the main support for the economy's growth in 2017, while exports and business investment have underperformed.

Going forward, the FAO expects that elevated levels of household debt combined with rising interest rates will hamper household spending and residential investment. At the same time, exports and business investment are expected to contribute more to economic growth, as sustained foreign demand encourages businesses to increase production capacity (discussed further in 'Key Risks' below). Over the outlook, the FAO projects real GDP growth will ease to 2.1 per cent in 2018 and average 1.9 per cent per year from 2019 to 2021.

Exports and Business Investment Expected to Drive Growth over the Outlook

* Business Investment includes both Non-Residential Investment and Machinery & Equipment Investment.

Source: Statistics Canada, Ontario Economic Accounts and FAO.



Strong Gain in Corporate Profits Projected for 2017

The FAO is forecasting nominal GDP growth of 4.7 per cent in 2017, driven by an 11.7 per cent increase in corporate profits, and a more moderate gain of 4.0 per cent in labour income.

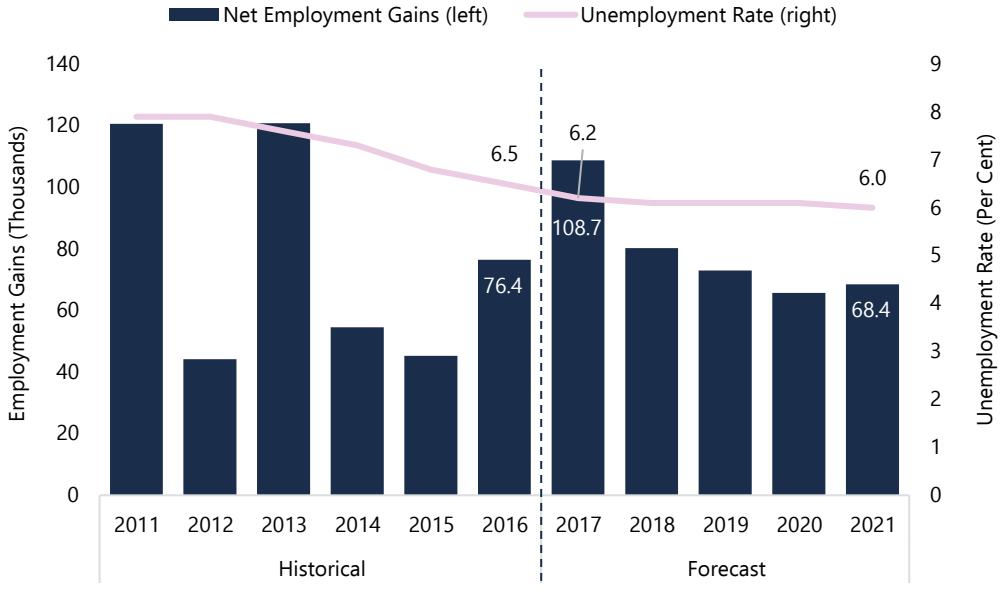
The planned increases to Ontario's minimum wage are expected to raise labour income growth in 2018 and 2019.[6] Beyond 2019, labour income growth is expected to moderate to 3.8 per cent by 2021.

Slower labour income gains will contribute to slightly more moderate nominal GDP growth of 3.9 per cent by 2021.

Corporate Income Leads Nominal GDP Growth in 2017

Note: Labour and corporate income comprise roughly 70 per cent of nominal GDP. The other categories include mixed income (from proprietorships) and net taxes.

Source: Statistics Canada, Ontario Economic Accounts and FAO.



6 The FAO's forecast incorporates explicit assumptions of higher labour income growth, a small reduction in employment gains and a slight increase in CPI inflation due to the planned increases in Ontario's minimum wage. See the FAO's commentary 'Assessing the Economic Impact of Ontario's Proposed Minimum Wage Increase' for details.

Steady Job Gains Expected to Continue

The FAO is projecting strong job growth of 1.6 per cent (+109 thousand net new jobs) in 2017, following a gain of 1.1 per cent (+76 thousand net new jobs) in 2016.

Over the outlook, sustained economic growth is expected to support average annual employment growth of 1.1 per cent, just slightly faster than the growth in the labour force. As a result, the unemployment rate is expected to trend lower, falling from 6.2 per cent in 2017 to 6.0 per cent by 2021.

Steady Employment Gains as Unemployment Rate Trends Lower

Source: Statistics Canada and FAO.

Key Risks for Ontario's Economic Outlook

While the FAO expects solid economic growth over the medium-term, there are a number of risks that could negatively affect Ontario's economic performance.

Most economic forecasters, including the FAO, continue to assume that NAFTA will largely be maintained in its current form. However, the US administration is demanding significant concessions from Canada and Mexico, and has threatened to leave NAFTA altogether. Some businesses may already be postponing investment decisions outside of the United States due to the uncertainty surrounding NAFTA. If the renegotiation of NAFTA leads to a deterioration in Ontario's terms of trade or restricts access to the US market, there would be significant negative implications for the province's growth prospects.

In recent years, strong growth in household spending has not been matched by similar gains in household incomes, leading to higher levels of household debt. In 2016, household debt reached 167 per cent of disposable income in Ontario, a significant rise from 149 per cent in 2010.[7] Higher debt burdens expose households to financial risk. With a steady rise in interest rates expected over the next few years, many households will scale back discretionary spending in order to make higher debt interest payments, which in turn could have implications for the pace of overall economic growth.[8]

There are also upside risks that could lead to a stronger economic performance for Ontario. In particular, some forecasters expect the US economy will grow faster over the medium-term than the FAO projects.[9] Stronger than projected US growth would lift demand for Ontario's exports, raising employment and leading to stronger wage and profit growth for the province.

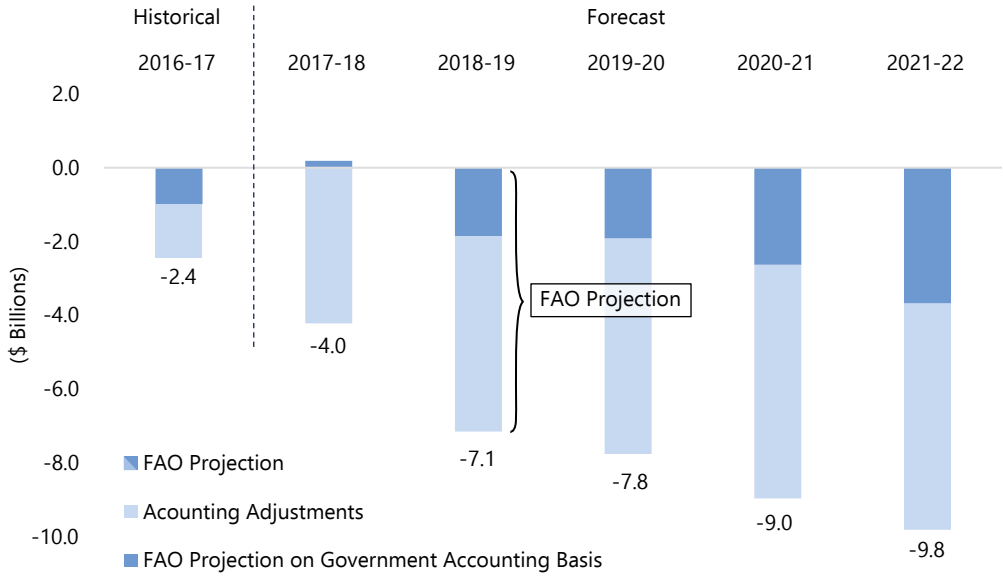
8 The Bank of Canada describes this risk as elevated. Bank of Canada, Financial System Review, June 2017.
9 Including the Conference Board of Canada, the Centre for Spatial Economics and the Policy and Economic Analysis Program at the University of Toronto.

3 FISCAL OUTLOOK

FAO Projects a Return to Significant Budget Deficits

Despite a strong increase in revenues, the FAO is projecting an Ontario budget deficit of $4.0 billion in 2017-18, entirely the result of the Auditor General of Ontario's recommended accounting treatment for both the government's Fair Hydro Plan (FHP)[10] and the net pension assets of jointly-sponsored pension plans.[11]

Beyond 2017-18, the FAO is projecting substantial increases in the budget deficit due to the loss of time-limited revenues, a more moderate pace of tax revenue growth, and the growing fiscal impact of the FHP and the pension adjustment. By 2021-22, the FAO is projecting an Ontario budget deficit of $9.8 billion in the absence of any fiscal policy changes.



This is a significant deterioration since the FAO's spring outlook, primarily due to the government's introduction of the FHP,[12] which will add $3.2 billion to the budget deficit by 2021-22.

10 See 'The Fair Hydro Plan: Concerns About Fiscal Transparency, Accountability and Value For Money,' Auditor General of Ontario, October 2017; 'Independent Auditor's Report, 2016-17 Consolidated Financial Statements', Auditor General of Ontario, 2017; and 'An Assessment of the Fiscal Impact of the Province's Fair Hydro Plan,' Financial Accountability Office, 2017

11 For details, refer to 'The Accounting Treatment of Jointly Sponsored Pension Plans' in the FAO's 'Spring 2017 Economic and Fiscal Outlook.'

12 See 'Developments since the FAO's Spring 2017 Economic and Fiscal Outlook' in this report's Appendix.

Ontario Budget Balance

Note: Budget Balance before reserve.

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

In the *2017 Ontario Economic Outlook and Fiscal Review* (also referred to as the Fall Economic Statement or FES), the government projected balanced budgets for 2017-18 through to 2019-20. However, the government's fiscal projection relies on an overly optimistic revenue forecast and does not adopt the Auditor General's recommended accounting for FHP or net pension assets.[13]

For comparison, under the government's accounting presentation, the FAO projects a small budget surplus for 2017-18, approximately equal to the government's projection in the Fall Economic Statement. However, there are a number of time-limited and one-time revenues which contribute to the budget balance in 2017-18. Going forward, the loss of these temporary revenues combined with more moderate tax revenue growth results in a return to deficit in 2018-19 and a steady deterioration in the budget deficit over the outlook.

13 However, the government's accounting treatment of net pension assets is consistent with the recommendations from the government's 'Independent Pension Asset Expert Advisory Panel.' Contrary to the opinion of the Auditor General, the panel's report concluded that the surpluses in the jointly sponsored pension plans should be fully recognized in the Province's financial statements.

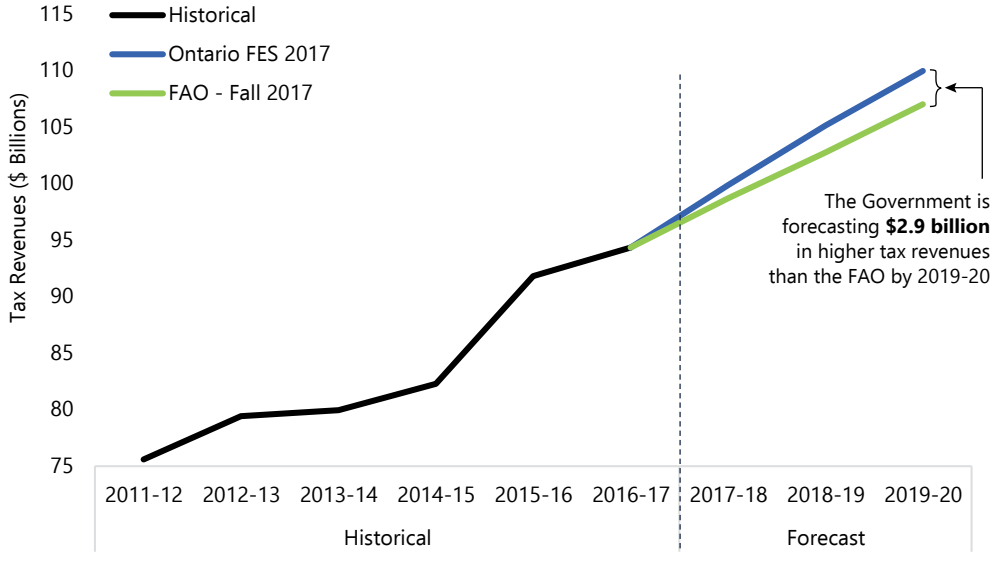
The Accounting Presentation of Ontario's Financial Statements

In both the 2017 Ontario Budget and Fall Economic Statement, the government has not adopted the Auditor General's recommended accounting framework, reducing the transparency and reliability of Ontario's fiscal projections.

In addition to the existing disagreement over the appropriate accounting treatment for the government's jointly sponsored pension plans, the Auditor General recently reported that the government is not correctly accounting for the full cost of the Fair Hydro Plan in its fiscal plan. As a result, the government's financial statements are expected to continue to receive qualified opinions from the Auditor General.

Revenue Outlook

The FAO is projecting average annual revenue growth of 3.5 per cent over the forecast. In 2017-18, revenues are supported by strong growth in taxes, as well as a number of time-limited or one-time revenues. Beginning in 2018-19, the FAO is projecting more moderate revenue growth as:



- time-limited revenues end (including asset sales and federal Equalization payments); and
- economic growth moderates, following several years of stronger than average growth.

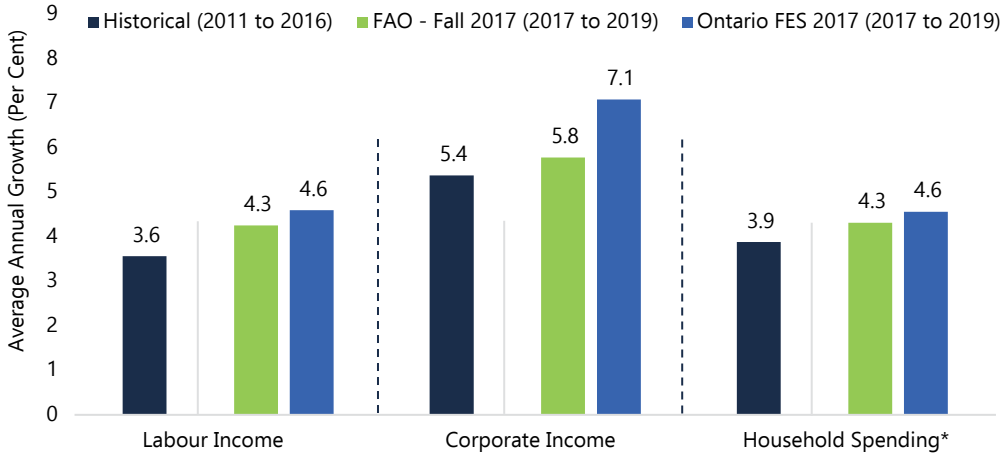
Tax Revenue Growth Expected to Moderate

Nominal GDP, the broadest measure of the tax base, is projected to grow by a strong 4.7 per cent in 2017, supporting a 4.6 per cent increase in tax revenues in 2017-18. From 2018 to 2021, annual GDP growth is expected to moderate to 4.1 per cent, leading to similar slowing in tax revenue growth to 4.1 per cent on average over this period.

In the government's Fall Economic Statement, tax revenue is projected to grow by 5.2 per cent on average from 2017-18 to 2019-20, much higher than the FAO's projection of 4.3 per cent over the same period. The government's expectation of higher growth results in an additional $2.9 billion in tax revenues by 2019-20, relative to the FAO projection.

FAO's Taxation Revenue Outlook

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.



The government's revenue forecast relies on optimistic projections for many of the key economic drivers of tax revenue, including labour income, corporate income, and household spending. In particular, the government is forecasting:

- significant and sustained above-trend growth in labour income;
- a surge in 2017 corporate income growth; and
- continued strength in household spending, despite higher interest rates and elevated levels of household debt.

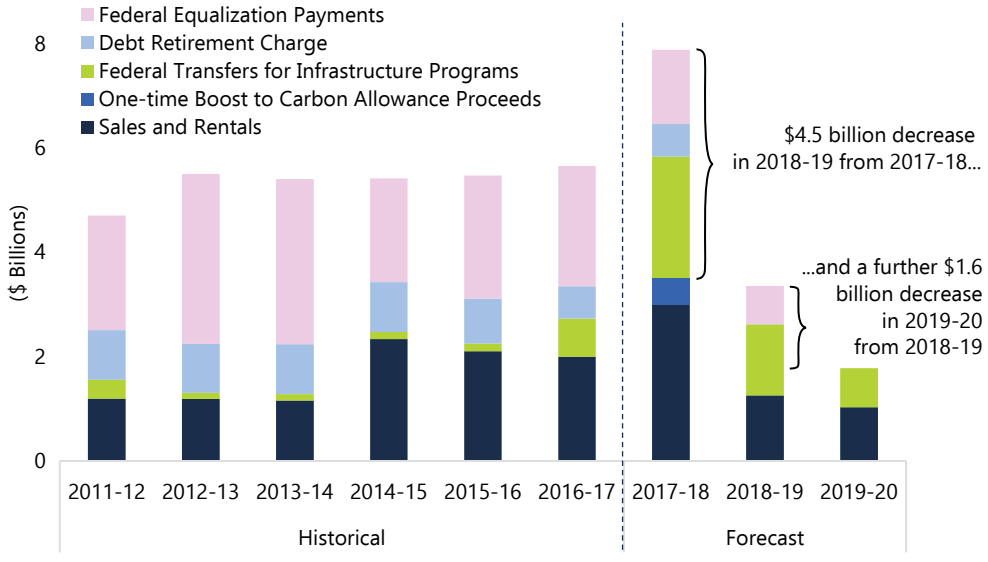
Taken together, the government's revenue forecast appears to be based on overly optimistic projections for the three main revenue drivers.[14]

14 See Appendix for a detailed comparison of the FAO and the government forecasts.

Growth in Key Tax Drivers

* The FES forecast for Household Spending is calculated as Real Household Spending plus CPI inflation.
Source: Statistics Canada, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

The Loss of Time-limited Revenues



The revenue projection for 2017-18 includes a number of one-time or time-limited revenues that are set to expire.[15] These include:

- a temporary increase to sales and rentals revenue, reflecting additional asset sales[16];
- higher federal transfers for infrastructure;
- the final year of the debt retirement charge[17];
- federal Equalization payments, which the FAO estimates will end in 2019-20; and
- additional, one-time proceeds from Ontario's cap and trade program in 2017-18.[18]

Taken together, these time-limited revenues will decrease by $4.5 billion in 2018-19, and by an additional $1.6 billion in 2019-20.

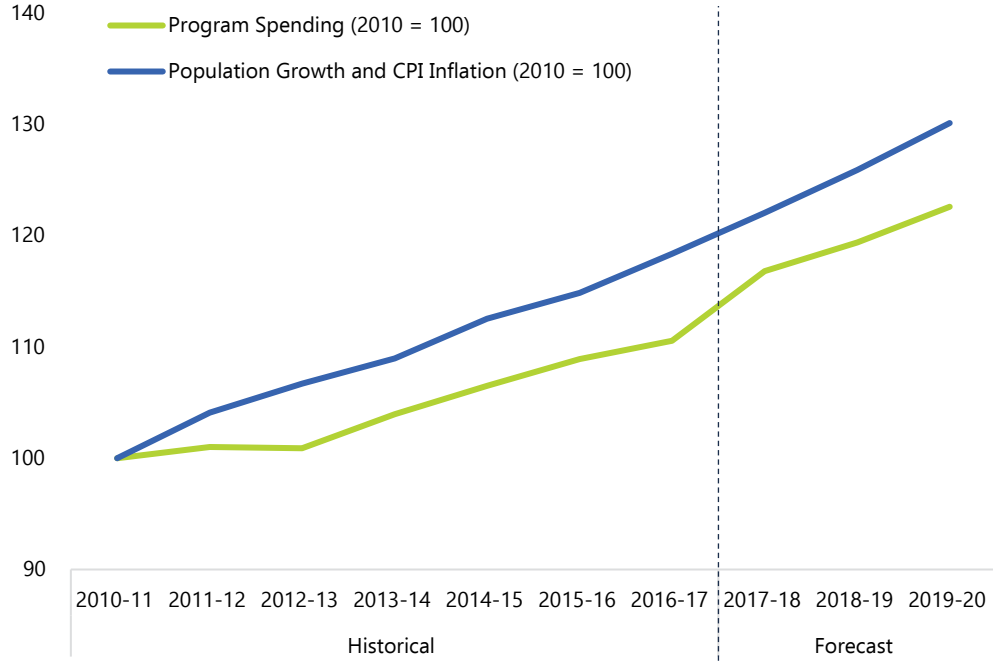
15 Some of these temporary revenues - notably proceeds from the sale of carbon allowances or federal transfers for infrastructure - are tied to corresponding spending commitments, which would partially offset the reductions in these revenue sources.
16 Asset sales include the Province's 20 per cent sale of Hydro One equity in a secondary offering in 2017-18, which the FAO estimates generated about $0.7 billion in revenue.
17 The debt retirement charge (DRC) is a charge payable on electricity consumed in Ontario and replaces a portion of debt servicing costs previously included as part of electricity bills before the restructuring of the former Ontario Hydro. The government ended the DRC on residential bills as of January 1, 2016. The DRC will remain on non-residential electricity users' bills until March 31, 2018.
18 In the 2017-18 fiscal year, Ontario will hold five carbon market auctions. Going forward, the Province expects to generally hold four auctions each year.

Many Time-limited Revenues are Set to Expire Beyond 2017-18

Source: Ontario Budgets, Ministry of Finance and FAO.

FAO Revenue Assumptions and Forecast

Revenue Source	Assumption	Forecast
Taxation Revenue	Grows with key economic drivers including labour income, corporate income and household spending.	Averages 4.2 per cent growth per year from 2017-18 to 2021-22.*
Federal Transfers	Based on legislated growth rates and economic forecasts for Ontario and Canada.	Federal transfers are expected to grow by 1.6 per cent per year from 2017-18 to 2021-22.
Government Business Enterprises (GBE)	Based on government projections.	Income from GBEs are projected to rise moderately from $5.6 billion in 2016-17 to $6.7 billion in 2021-22.
Other Revenue	Based on government projections, and includes asset sales, and proceeds from the sale of cap and trade allowances.	These revenues are projected to increase from $16.3 billion in 2016-17 to $19.4 billion in 2017-18, before declining to $18.0 billion by 2021-22.



* The reduction in the small business Corporate Income Tax rate is reflected in the FAO's tax revenue projections.

Expense Outlook

Program Spending

In the 2010 Budget, the government introduced a plan to return to balanced budgets by 2017-18. Since then, the government has restrained the average growth of program spending to below the rate of inflation and population growth.

Program Spending and Spending Pressures

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

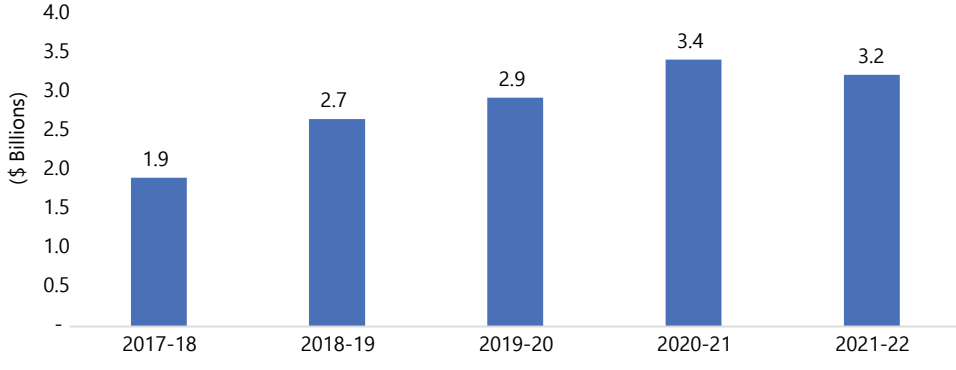
Over the 2017-18 to 2019-20 period, the FAO's outlook adopts the government's 2017 Fall Economic Statement projections for program spending but makes adjustments to reflect the Auditor General's recommended accounting presentation.[19] Excluding these adjustments, the projection for program spending is largely unchanged from the 2017 Ontario Budget, aside from $200 million of new spending beginning in 2017-18.[20]

19 Based on information provided by the Ministry of Finance, the FAO's projection for 'Other Spending' includes $2.3 billion in 2017-18 for a valuation allowance on jointly-sponsored pension assets, growing to $2.9 billion by 2021-22. In addition, the FAO includes expenses related to the electricity cost refinancing portion of the FHP, which average $2.8 billion per year over the outlook.

20 In the 2017 FES, the government announced new funding for additional spending for small businesses, seniors and child care. However, the additional expenses for child care is fiscally neutral since it is funded by a corresponding increase in federal transfer revenue.

In 2017-18, program spending is expected to grow by 5.7 per cent.[21] This spending includes additional funding for health care, education and elements of the Fair Hydro Plan. However, in 2018-19 and 2019-20, the government plans to restrain increases in program spending to an average of 2.4 per cent, below the growth in underlying spending pressures.

Beyond 2019-20, the FAO projects that program spending will grow by an annual average rate of 4.2 per cent. This stronger pace of growth reflects additional spending to meet underlying pressures. In particular, the aging baby boomer cohort and the growing youth population will place added spending pressures on Ontario's health care and education systems in the near future.



Impact of the Fair Hydro Plan

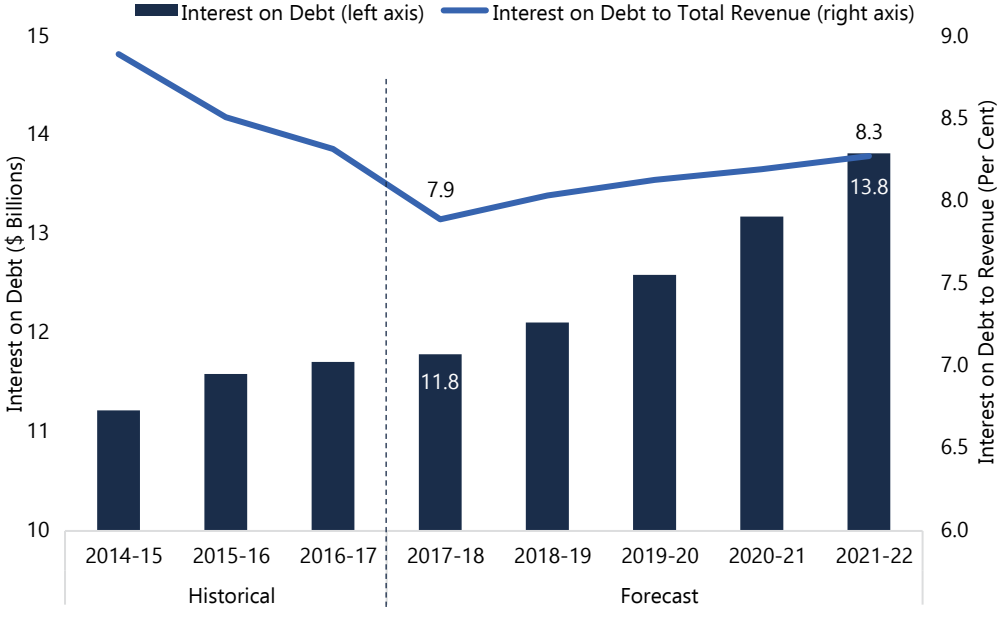
The government introduced the "Fair Hydro Plan" to reduce electricity bills for residential customers by an average of 25 per cent. The FHP includes refinancing a portion of the reduced electricity costs for ratepayers through borrowing by the Province and Ontario Power Generation (OPG).

The Auditor General has recommended that the cost of this refinancing be fully captured as an expense. However, the government has not included this cost in its fiscal plan.

Consistent with the Auditor General's recommendation, the FAO has included the full fiscal impact of the FHP in its projection by increasing program spending by an average of $2.8 billion per year over the outlook (see the FAO's 'An Assessment of the Fiscal Impact of the Province's Fair Hydro Plan' for further details).

Impact of the Fair Hydro Plan on Ontario's Program Spending

Source: FAO.



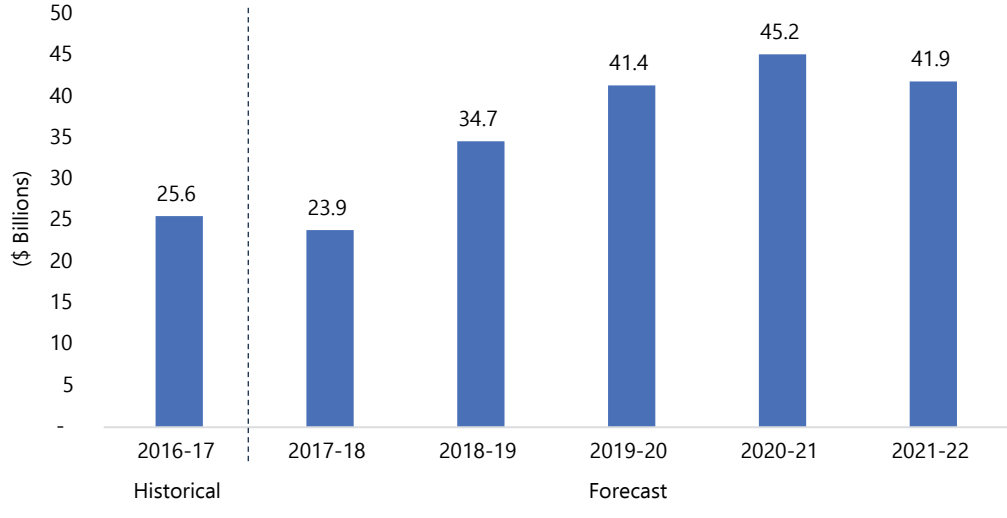
21 On the government's accounting basis, which excludes the impact of the pension adjustment and the electricity cost refinancing portion of the FHP.

Interest on Debt

Interest on debt (IOD) payments are expected to increase at an average rate of 3.4 per cent per year over the outlook due to elevated borrowing levels and rising interest rates.

Over the past three years, IOD as a share of revenues has declined, a reflection of strong revenue growth, lower new borrowing and maturing debt being refinanced at much lower rates of interest. However, this trend is expected to reverse over the outlook as revenue growth moderates while IOD payments accelerate. By 2021-22, Ontario's debt interest payments will account for 8.3 per cent of total revenue, above the 7.9 per cent share in 2017-18.

Interest on Debt



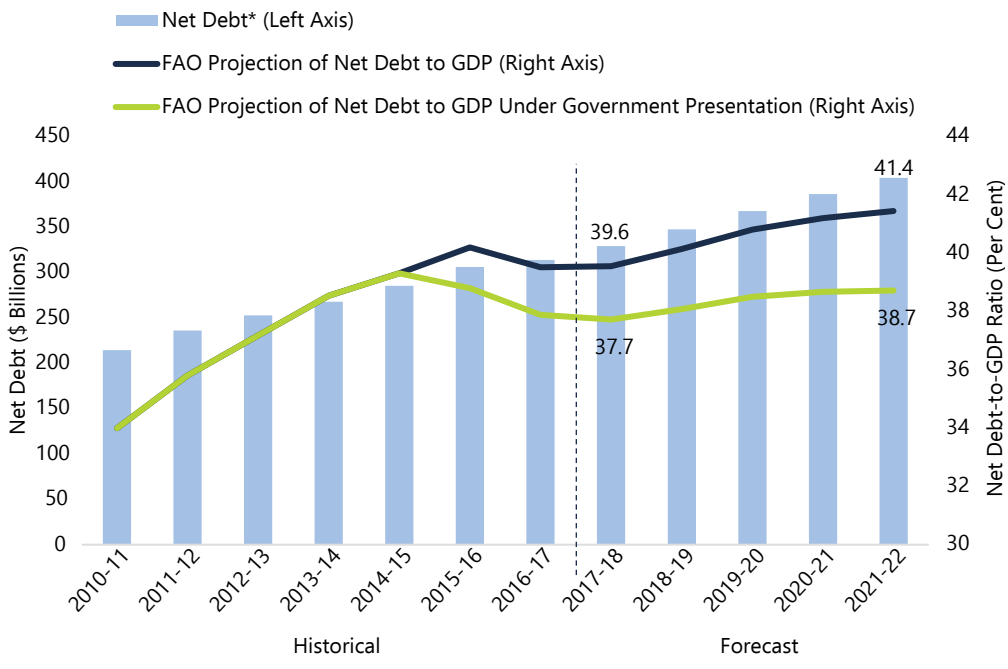
Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

Borrowing and Net Debt

Despite higher funding requirements for capital expenditures and the Fair Hydro Plan, Ontario's borrowing is expected to decline to $23.9 billion in 2017-18, the lowest level of borrowing since 2007.

However, beginning 2018-19, borrowing requirements are expected to increase significantly due to higher annual debt maturities, additional funding requirements for the Fair Hydro Plan and rising capital expenditures. By 2020-21, the FAO projects borrowing to increase to over $45 billion – nearly double the borrowing requirement in 2017-18.

Borrowing Outlook



Source: 2017 Ontario Economic Outlook and Fiscal Review and FAO.

The FAO projects Ontario's net debt-to-GDP ratio will remain essentially unchanged in 2017-18 at 39.6 per cent. However, over the next four years, the FAO projects that Ontario's net debt will increase by approximately $75 billion to over $400 billion, increasing the net debt-to-GDP ratio to 41.4 per cent by 2021-22.[22]

22 The FAO's estimate of net debt reflects the Auditor General's recommended accounting framework.

Net Debt Outlook

Note: Net debt is presented on the Auditor General's basis, which includes the fiscal impact of the Fair Hydro Plan and pension adjustment.

Source: 2017 Ontario Economic Outlook and Fiscal Review, Ontario Public Accounts and FAO.

The government continues to maintain a net debt-to-GDP target of 35 per cent by 2023-24 and 27 per cent by 2029-30. However, the FAO's net debt-to-GDP projections under both accounting presentations suggest that additional fiscal measures would be required for the government to achieve its net debt-to-GDP targets.

4 APPENDIX

Developments since the FAO's Spring 2017 Economic and Fiscal Outlook

The FAO's current projection of Ontario's budget balance has deteriorated compared to the spring outlook.

- The Fair Hydro Plan, which boosts expenses by an average of $2.8 billion over the outlook, accounts for the majority of the higher deficit.

- In addition, compared to the spring, the FAO forecasts more moderate growth in revenues from personal income tax and the Land Transfer Tax over the outlook. This is offset by stronger expected growth in federal transfers and GBE income.

Subject: FAO EFO Report Summary Note / Request for Input
Date: Wednesday, December 06, 2017 13:29:52
Attachment 1: Summary of Draft FAO Fall Fiscal Outlook_v2a.docx
Attachment 2: RE: FAO's Fall 2017 EFO

Hi All,

Attached is a draft FAO EFO report summary note for review with a few caveats. An embargoed copy of the FAO's final EFO report will be released tomorrow and might result in updates. In addition, OEP will be adding a summary on the economic outlook and related key messages in order to have one consolidated product. For your general reference, I'm re-attaching the final comments that were submitted to the FAO.

Could your areas please review the attached summary note and aim to provide ADM approved edits in tracked changes by **EOD tomorrow**? These edits should align with the final EFO report being released tomorrow.

Please let me know if you have any questions.

Thanks,

Ryan

Ryan Birks

FAO's 2017 Fall Fiscal Outlook – OB Summary

ISSUE

The Financial Accountability Office is set to release its 'Fall Economic and Fiscal Outlook' report. This note summarizes the fiscal chapter of the report.

TOP MESSAGES

- I would like to thank the Financial Accountability Officer (FAO) for releasing his fall economic and fiscal outlook for Ontario. We value the FAO's independent assessment and projections of the province's fiscal plan.
- As outlined in the 2017 Ontario Economic Outlook and Fiscal Review, the government is projecting a balanced budget for 2017–18 and to remain balanced in 2018–19 and 2019–20.
- The FAO report also projects a balanced budget for Ontario this year.
- The government has a strong track record of beating its fiscal targets. In fact, the Public Accounts of Ontario reported that the 2016–17 deficit was $1.0 billion, beating our annual deficit target again, for the eighth year in a row.
- The 2017 Ontario Economic Outlook and Fiscal Review builds on the government's track record of fiscal management that has resulted in $29 billion in accumulated deficits being avoided over the past seven years, relative to the 2010 Budget forecast.
- We are also targeting a net debt-to-GDP ratio of 35 per cent by 2023–24 and reducing Ontario's net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029–30.
- Since 2014, Ontario's real GDP growth has strengthened, positioning Ontario as a growth leader, not only in Canada, but among G7 countries. In fact, over the 2014-17 period, Ontario's real GDP growth is on pace to exceed that of all G7 countries.
- Private-sector economists are projecting continued growth for Ontario over the forecast horizon; the FAO's real GDP projections are aligned with the 2017 Fall Economic Statement over the 2017 to 2020 period.
- This shows that our plan to make strategic investments in Ontario to grow the economy is working.
- A balanced budget is providing the Province the fiscal flexibility to invest more in health care, education, support for seniors and small businesses and other public services that matter most to Ontario families. It also adds stability to Ontario's finances and positions the government to better respond to demographic challenges and unexpected global economic shocks that the province will face over the next decade.

KEY POINTS

Fiscal Outlook

- The FAO is projecting a budget deficit of $3.9 billion in 2017–18 using the **Auditor General's recommended accounting treatment for both the Fair Hydro Plan and the net pension assets of jointly sponsored pension plans.** In the absence of any fiscal policy changes this grows steadily to $9.6 billion in 2021-22.
- Under the **government's accounting presentation (excluding the AG's recommendations)**, the FAO projects a small surplus for 2017–18 of $0.3 billion (excluding the reserve) and a return to deficits beyond 2017–18 driven by revenue factors - loss of temporary revenues combined with more moderate tax revenue growth.
- The FAO suggests that by not adopting the AG's recommended accounting presentation, the 2017 Budget and the 2017 FES reduced transparency and clarity of Ontario's fiscal position and as a result Ontario will continue to receive qualified options from the AG.

Budget Balance - FAO's Fiscal Outlook ($ Billions)	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
AG Presentation	-5.0	-2.5	-3.9	-7.2	-7.9	-8.9	-9.6
Government Presentation	-3.5	-1.0	0.3	-1.9	-2.0	-2.6	-3.5
2017 FES -- Excluding Reserve	-3.5	-1.0	0.5	0.5	0.8	N/A	N/A

Revenue Outlook

- Using the AG presentation, the FAO is projecting average annual revenue growth of 2.6 per cent from 2016-17 to 2019-20 as compared with the government's projections of 4.0 per cent. The main drivers are:
    - The FAO projections for taxation revenues are $2.9 billion lower by 2019-20 than the projections in the 2017 FES due to lower projected growth in household spending, labour income and corporate profits.
    - The FAO projects that, based on the AG presentation, the Fair Hydro Plan will lower net income from OPG by $3.4 billion lower by 2019-20.
    - In addition, the FAO continues to highlight a number of one-time 2017-18 revenues, including: increase to sales and rentals from sale of final tranche of H1, higher federal transfers for infrastructure (PTIF), one-time boost from extra Cap and Trade auction. Taken together the FAO estimates that these amount to $4.5 billion in additional one-time revenues in 2017-18.

Expense Outlook

- From 2017–18 to 2019–20 the FAO's outlook adopts the government's 2017 FES projections for program spending, **adjusted to reflect the AG's recommended accounting presentation.** Beyond 2019–20 the FAO projects program spending will grow faster -- at an average annual rate of 4.1 per cent – due to population pressures.

Borrowing and Net Debt

- Using the **government's accounting presentation** net debt-to-GDP is expected to reach 38.4 per cent by 2019–20 and 38.6 per cent by 2021–22. This increases to 41.3 per cent by 2021–22 **under the AG's accounting presentation**.
    - The 2017 FES projected a net debt-to-GDP ratio of 37.0 per cent by 2019–20.

Comparison: 2017 Fall Economic Statement and the 2017 Fall FAO Fiscal Outlook

David;

Thanks again for the opportunity to review and provide feedback/fact-checks and comments on the draft report. Please find attached a consolidated set of comments from MOF and TBS on the Economic and Fiscal Chapters.

We think there may be some value in having a follow-up call next week to discuss some of these pieces – but let us know what you think once you've reviewed. We're happy to arrange something.

Some of these more significant edits may require a conversations to clarify, including:

· The language and representation of the differences in accounting interpretations. We may have discussed this at the time of the Budget outlook document, but we think its important to get the language right in terms of how this is articulated so that it's a more objective and fact-based representation.

· In addition, it appears that the way the FAO has built in the AG's interpretation of the Fair Hydro Plan accounting treatment is incorrect – as the current presentation in this draft EFO shows it appearing on the revenue side (on OPG's net income) – instead, the AG's recommendation was that is an expense impact on consolidation from IESO and further that the IESO is not a GBE – so it impacts the way the section (and charts under that section) are currently presented. This will require a significant change to your numbers and presentation. This may require additional explanation, so let us know.

· There are also some comments related to FAO projections for the amount of borrowing, as well as references about above trend growth in key tax drivers – these were essentially that the forecast is consistent with historical growth/trends and private sector forecasts, and the importance to note where “one-time” revenues identified as such by the FAO are actually also fiscally neutral – so should not be linked to a fiscal gap contribution by these shorter-term revenues.

Please find attached drafts of Economic Outlook and Fiscal Outlook chapters from the FAO's upcoming 'Economic and Fiscal Outlook' report.

The chapters are password protected using the same password as in the past.

As in the past, we are on a very tight schedule to enable us to release this report in early December, before the Legislature rises for the holiday break.

However, please note that we are still waiting for the detailed program spending projection consistent with FES (see attached email request from last week). This information is essential to calibrate our models and ensure consistency with the government's projections. If we do not receive that information shortly, we will be forced to proceed with our own estimates which could impact the results and conclusions presented in the report. Please be aware that we will need to be clear with MPPs, during our technical briefing, that we did not receive all the additional background information that we requested. (We did, however, receive the detailed revenue information from FES last week. Thanks)

We are asking for your comments/concerns by end of day Friday (November 24).

Happy to set up a phone call to discuss.

Thanks again for your support and assistance.

Hello Tim, Brian,

As you are aware, we are preparing our Fall EFO for release in early December.

As in the past, we are planning to send you drafts of the 2 core chapters of the report (economic outlook and fiscal outlook) on Wednesday morning, for your comments. We will also provide the supporting data tables, providing additional details on the projection. The current report follows the basic template of our earlier EFOs, and may be a little shorter.

We would greatly appreciate receiving the Ministry's comments by Friday (November 24) end of day.

Thanks, as always, for your assistance.

David

Hi All,

As a follow up to my message yesterday, I'm attaching an embargoed copy of the FAO's final EFO report. Please **limit circulation of the report** as it's not being released officially until Monday.

Can you please ensure that your ADM approved input/edits to the summary note reflect this latest version of the report **by EOD today**?

Please let me know if you have any questions.

Thanks,
Ryan

Subject: The FAO's Fall 2017 Economic and Fiscal Outlook

Good morning,

The FAO will be releasing a 'Fall 2017 Economic and Fiscal Outlook' report on Monday, December 11, 2017 at 10:00 am.

We have scheduled technical briefings of the embargoed report for MPPs at 9:00 am on Monday. The Temporary FAO, the Honourable David Wake and I will provide a media statement at 10:00 am.

A pre-release copy of the report is being delivered to Ministers Sousa and Sandals this morning, as required by the FAO Act.

Please find attached a copy of the final report for your reference.

Please treat this document as embargoed until its release on Monday at 10:00 am.

As always, we greatly appreciate your assistance and support for the work of the FAO.

Best regards,
David

Economic and Fiscal Outlook

Assessing Ontario's Medium-term Prospects

Fall 2017 Update

About this Document

Established by the *Financial Accountability Officer Act, 2013*, the Financial Accountability Office (FAO) provides independent analysis on the state of the Province's finances, trends in the provincial economy and related matters important to the Legislative Assembly of Ontario. The FAO's Economic and Fiscal Outlook is released each spring and fall, providing an assessment of the province's medium-term economic performance and fiscal position.

This report was prepared by Nicolas Rhodes, Luan Ngo and Edward Crummey under the direction of David West. External reviewers were provided with earlier drafts of this report for their comments. However, the input of external reviewers implies no responsibility for this final report, which rests solely with the FAO.

This report is based on information available to November 15, 2017. Background data used in this report are available upon request.

FAO's Fiscal Projections

The FAO forecasts provincial finances based on projections of existing and announced revenue and spending policies. The forecast represents the FAO's view of the most likely fiscal outcomes given existing policies, without anticipating any new government policy decisions. The FAO's tax revenue projections are based on an assessment of the outlook for the provincial economy and current tax policies. Given the government's discretion over spending, the FAO adopts the government's announced spending plans from fiscal documents and incorporates policy announcements as appropriate. Beyond the government's published spending projections, the FAO forecasts spending based on the outlook for underlying cost drivers including demographics and price inflation.

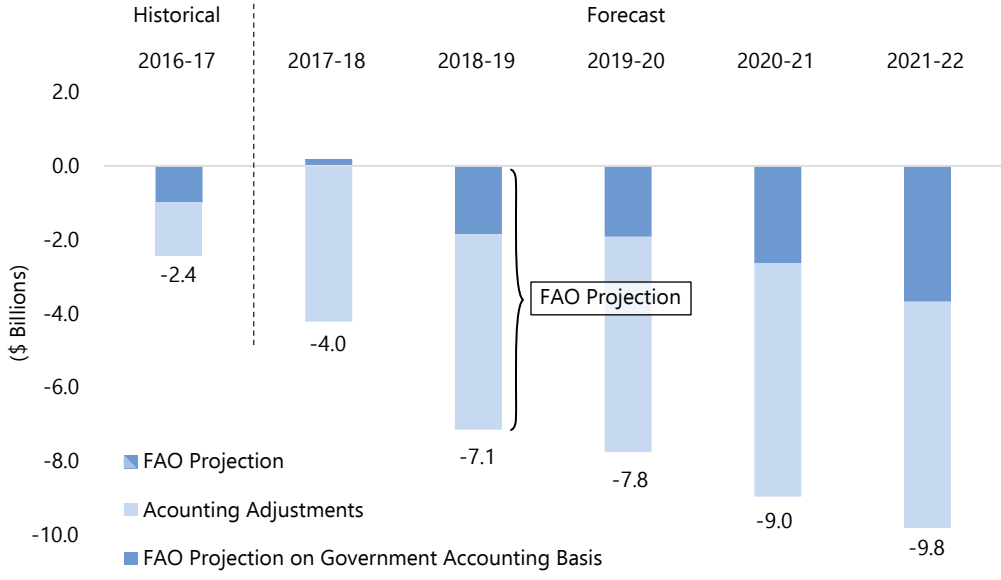
1 EXECUTIVE SUMMARY

FAO Projects a Return to Significant Budget Deficits

Despite a strong boost to revenues this year, the FAO is projecting an Ontario budget deficit of $4.0 billion in 2017-18, the result of the Auditor General of Ontario's recommended accounting treatment for both the government's Fair Hydro Plan and the net pension assets of jointly-sponsored pension plans.[1]

Beyond 2017-18, the FAO is projecting a significant increase in the budget deficit due to the loss of time-limited revenues, a more moderate pace of tax revenue growth, and the growing fiscal impact from the Fair Hydro Plan. By 2021-22, the FAO is projecting a budget deficit of $9.8 billion, in the absence of any fiscal policy changes. This is a significant deterioration since the FAO's spring outlook[2] and is primarily the result of the introduction of the Fair Hydro Plan, which will add $3.2 billion to the budget deficit by 2021-22, under the Auditor General's recommended accounting treatment.

In contrast, under the government's accounting framework, the FAO projects a small budget surplus in 2017-18, and a return to budget deficits beginning in 2018-19 due to the loss of temporary revenues and moderate growth in tax revenues.



Since the government has not adopted the Auditor General's recommended accounting for both the Fair Hydro Plan and net pension assets, it is becoming more

1 See 'The Fair Hydro Plan: Concerns About Fiscal Transparency, Accountability and Value For Money,' Auditor General of Ontario, October 2017; 'Independent Auditor's Report, 2016-17 Consolidated Financial Statements', Auditor General of Ontario, 2017; and 'An Assessment of the Fiscal Impact of the Province's Fair Hydro Plan,' Financial Accountability Office, 2017.

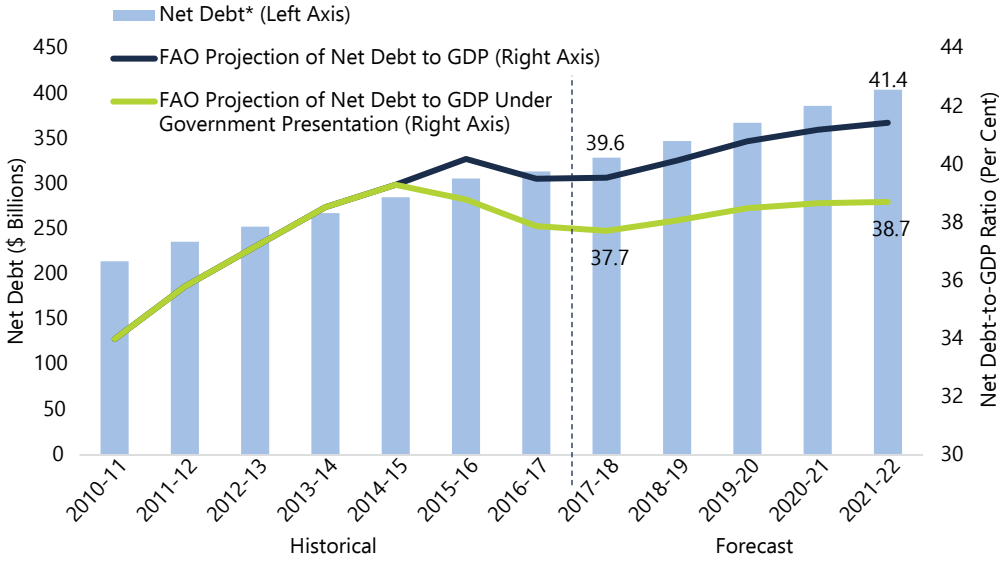
difficult for legislators and the public to assess the government's fiscal projections. This has reduced the transparency and reliability of Ontario's fiscal plan.

Ontario Budget Balance

Note: Budget Balance before reserve.

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.



The FAO is projecting very strong growth for the Ontario economy in 2017. Consistent with the outlook of most economic forecasters, the FAO expects the economy will grow at a more measured pace beginning in 2018. However, Ontario's economic performance could worsen if the renegotiation of NAFTA impairs Ontario's access to the US market, or if households reduce discretionary spending due to high debt levels and rising interest rates.

Total revenues are forecast to increase by 3.5 per cent per year on average over the outlook, somewhat slower than the rate of GDP growth. This reflects the loss of time-limited revenues in 2018-19, as well as moderating tax revenue growth over the outlook. By comparison, the FAO projects program spending will grow by 4.4 per cent on average from 2017-18 to 2021-22, when all spending related to the Fair Hydro Plan is included.

The FAO projects Ontario's net debt-to-GDP ratio will remain essentially unchanged in 2017-18 at just under 40 per cent. However, over the next four years, the FAO expects that without any change to current fiscal policies, approximately $75 billion will be added to Ontario's net debt, increasing the net debt-to-GDP ratio to over 41

per cent by 2021-22.[3] In contrast, the government continues to maintain a net debt-to-GDP target of 35 per cent by 2023-24 and 27 per cent by 2029-30.

Net Debt Outlook

* Net debt is presented on the AG's recommended accounting basis, which includes the impact of the Fair Hydro Plan and the pension adjustment.

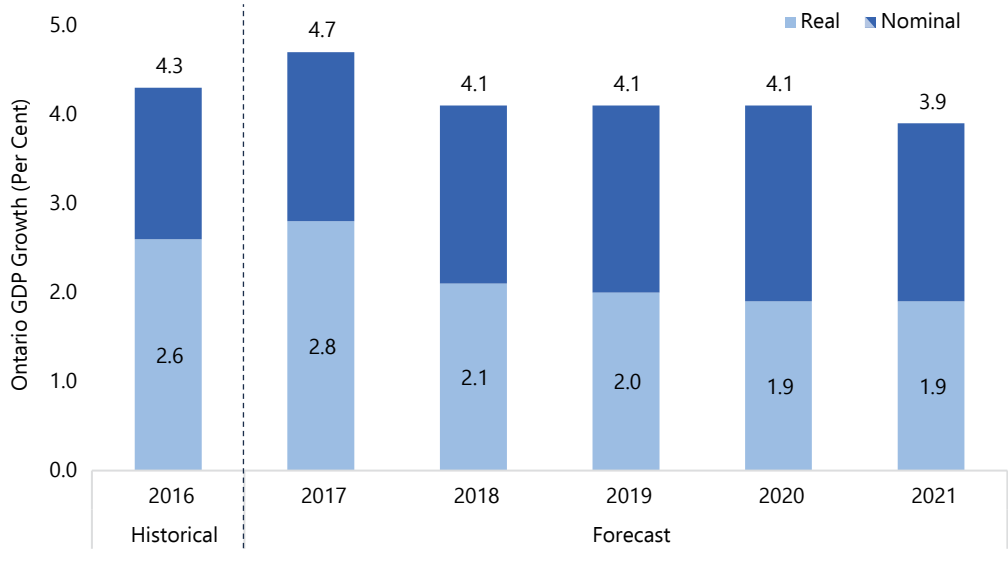
Source: 2017 Ontario Economic Outlook and Fiscal Review, Ontario Public Accounts and FAO.

Current and future Ontario governments are facing difficult policy choices. Based on the FAO's fiscal projection, additional measures to raise revenue or lower spending will be required if the Province intends to achieve and maintain a balanced budget, and lower Ontario's debt burden.

3 The FAO's estimate of net debt incorporates the AG's recommended accounting framework.

2 ECONOMIC OUTLOOK

Overview



Ontario Economy Exceeding Expectations in 2017

Following a strong performance over the first half of 2017, the Ontario economy is expected to continue on a path of solid growth into 2018.

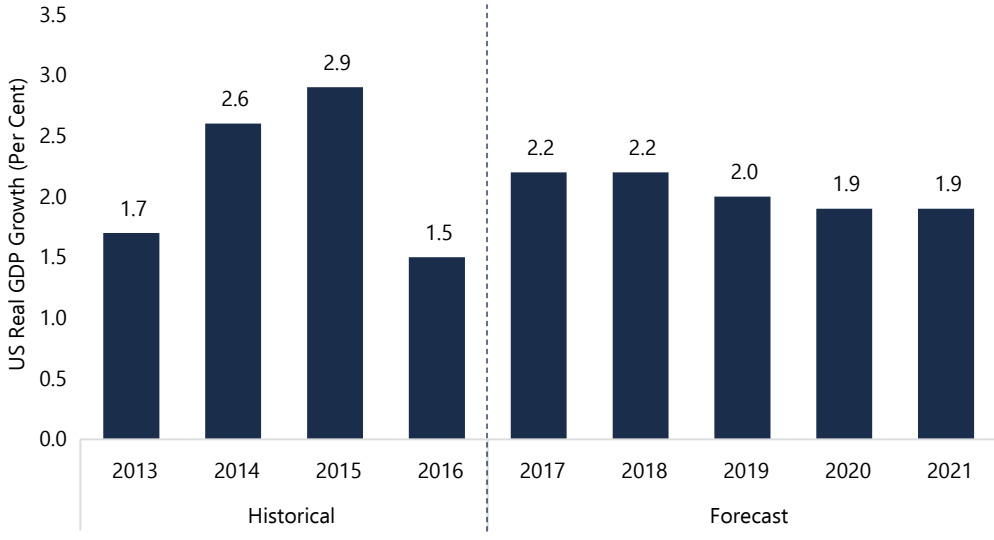
Led by a continued surge in household spending and residential investment, the FAO projects Ontario real GDP growth of 2.8 per cent in 2017, an upward revision from the FAO's spring outlook report. Nominal GDP – the broadest measure of the tax base - is projected to increase by 4.7 per cent in 2017, well above the FAO's spring forecast. The strong growth in nominal GDP in 2017 is supported by significant gains in corporate profits.

Beginning in 2018, most forecasters, including the FAO, expect the Ontario economy to grow at a more measured pace, as growth in the US and Canadian economies is also expected to moderate. At the same time, higher interest rates are expected to contribute to slower growth of household spending and residential investment over the outlook.

Solid Economic Performance Expected Over Outlook

Source: Ontario Economic Accounts, Statistics Canada and FAO.

Global Economic Growth Gaining Traction



In its latest World Economic Outlook, the International Monetary Fund (IMF) revised up its forecast for global economic growth to 3.6 per cent in 2017 and 3.7 per cent in 2018.[4] A number of key economies reported stronger than expected growth over the first half of 2017, including the euro area and Japan. These upward revisions more than offset weaker than expected growth in the United Kingdom and the United States.

United States

In the US, real GDP is expected to grow by 2.2 per cent in 2017. Following a modest first-quarter gain, US consumer spending has shown signs of strengthening while business investment remains strong, particularly in the energy sector. Going forward, the FAO projects US growth to ease slightly to 1.9 per cent by 2021.

4 International Monetary Fund, World Economic Outlook, October 2017.

US Economic Growth to Moderate

Source: US Bureau of Economic Analysis, Congressional Budget Office and FAO Consensus.

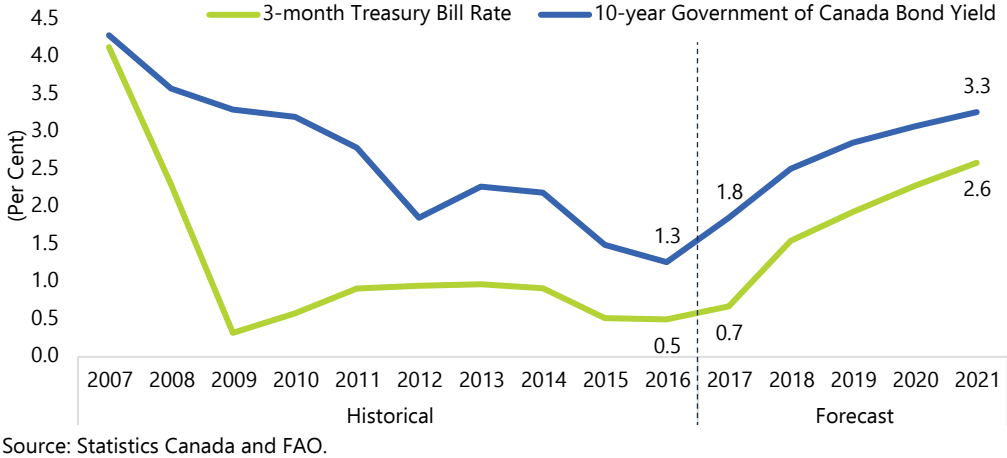
However, the outlook for the US economy depends critically on the uncertain policy direction of the current US administration. Significant tax reform, including sizable tax cuts, have been proposed, although it is unclear if an agreement in Congress will be reached. Likewise, the renegotiation of the North American Free Trade Agreement (NAFTA) is ongoing, and the potential impact of a new trade agreement on North American economies remains highly uncertain (see 'Key Risks' for more details).

Other World Economies

The IMF reports that the euro area economy continues to gain strength, supported by a pick-up in exports and continued strength in domestic demand. In China, the IMF expects economic growth to ease from 6.8 per cent in 2017 to 6.5 per cent in 2018. While the Chinese economy is continuing to rebalance towards more consumption-led growth, debt continues to build among households, government and businesses, which could pose risks to medium-term growth.[5]

While the global economy is expected to perform solidly through 2018, over the medium term, global growth is expected to be limited by modest productivity gains, aging workforces in advanced economies, and tightening financial conditions.

5 International Monetary Fund, China's Economic Outlook in Six Charts, August 2017.



Canadian Economy

The Canadian economy is on track to post the strongest annual growth since 2011. Robust consumer spending, and a pick-up in exports and business investment supported solid overall Canadian growth during the first half of 2017. While consumer spending and exports are expected to moderate over the second half of the year, the Canadian economy is on pace for a 3.1 per cent annual gain in 2017. The FAO expects Canadian real GDP to grow by 2.1 per cent in 2018 and by an average of 2.0 per cent through 2021, as higher interest rates contribute to slower growth in consumer spending and residential investment.

The brisk pace of economic growth over the first half of the year led the Bank of Canada to increase its policy interest rate to 0.75 per cent in July and 1.0 per cent in September. Importantly, the Bank indicated that with the Canadian economy operating near full capacity, it will take a cautious, data-driven approach in determining future rate increases. Given the Bank's measured approach and the subdued rate of consumer price inflation, the FAO expects a gradual but steady rise in interest rates over the medium-term, consistent with the FAO's spring outlook.

The recent increases in Canadian interest rates contributed to an eight-cent appreciation in the Canadian dollar relative to the US dollar through the summer, before reversing some of this gain more recently. With this appreciation, the FAO projects that the dollar will average 78 cents in 2017, slightly higher than the FAO's spring outlook. Going forward, the FAO expects a gradual appreciation of the dollar to about 81 cents by 2021, supported by a steady rise in Canadian interest rates and a moderate increase in oil prices.

Canadian Interest Rates to Rise over the Outlook

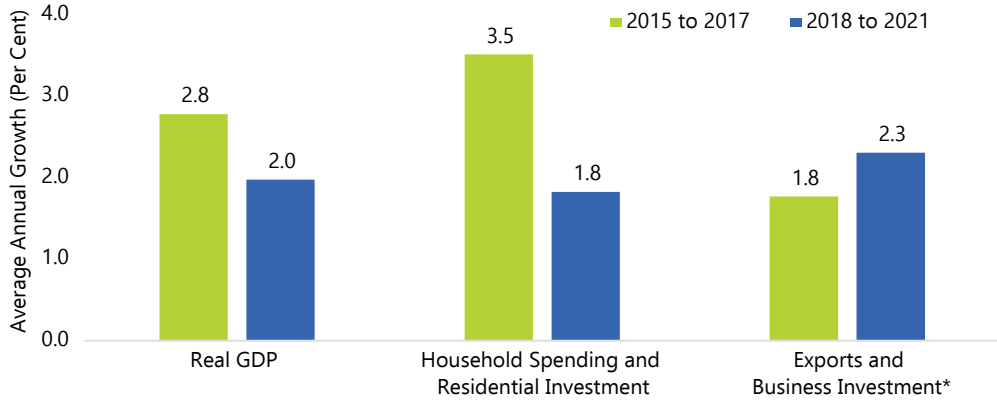
Ontario Economic Outlook

Solid 2017 Growth Expected to Moderate over the Outlook

Ontario posted solid real GDP growth of 2.6 per cent in 2016, the third consecutive year of strong growth for the economy. The FAO expects that the economy's momentum will continue into 2017, with real GDP advancing by 2.8 per cent.

Household Spending Primary Driver of Growth in 2017



* Business Investment includes both Non-Residential Investment and Machinery & Equipment Investment.

Source: Statistics Canada, Ontario Economic Accounts and FAO.

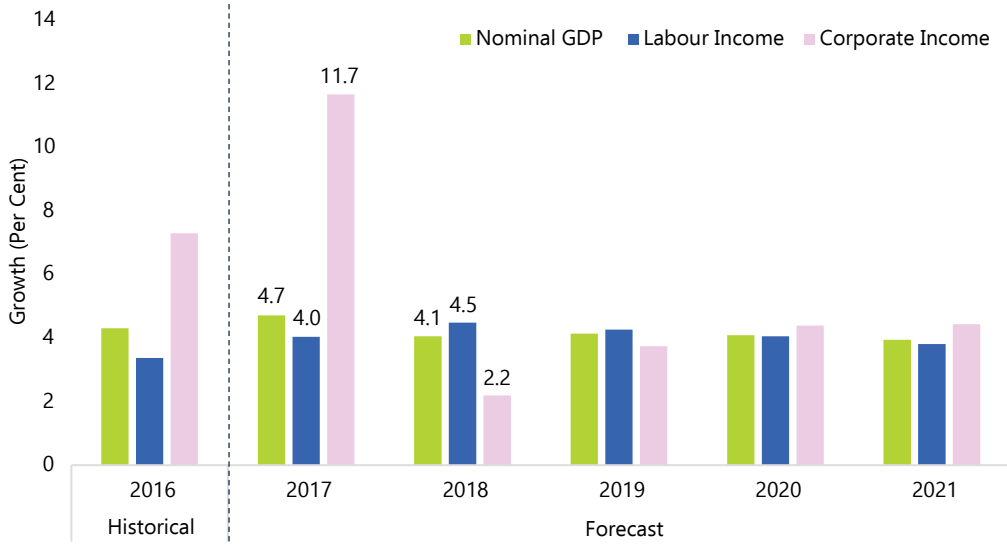
However, despite the projection for relatively strong economic growth in 2017, the drivers of that growth are unbalanced. Household spending and residential construction are providing the main support for the economy's growth in 2017, while exports and business investment have underperformed.

Going forward, the FAO expects that elevated levels of household debt combined with rising interest rates will hamper household spending and residential investment. At the same time, exports and business investment are expected to contribute more to economic growth, as sustained foreign demand encourages businesses to increase production capacity (discussed further in 'Key Risks' below). Over the outlook, the FAO projects real GDP growth will ease to 2.1 per cent in 2018 and average 1.9 per cent per year from 2019 to 2021.

Exports and Business Investment Expected to Drive Growth over the Outlook

* Business Investment includes both Non-Residential Investment and Machinery & Equipment Investment.

Source: Statistics Canada, Ontario Economic Accounts and FAO.



Strong Gain in Corporate Profits Projected for 2017

The FAO is forecasting nominal GDP growth of 4.7 per cent in 2017, driven by an 11.7 per cent increase in corporate profits, and a more moderate gain of 4.0 per cent in labour income.

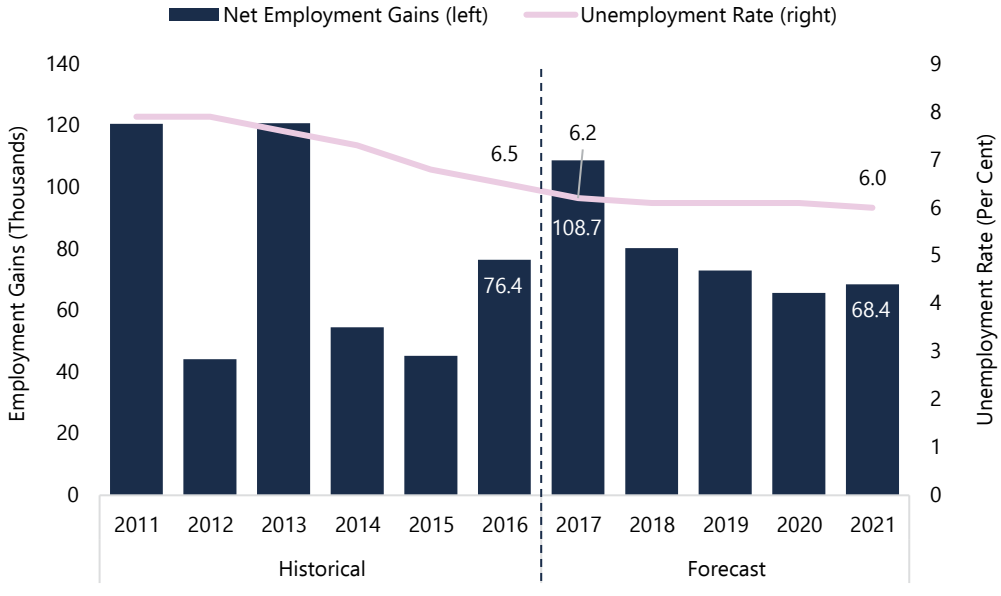
The planned increases to Ontario's minimum wage are expected to raise labour income growth in 2018 and 2019.[6] Beyond 2019, labour income growth is expected to moderate to 3.8 per cent by 2021.

Slower labour income gains will contribute to slightly more moderate nominal GDP growth of 3.9 per cent by 2021.

Corporate Income Leads Nominal GDP Growth in 2017

Note: Labour and corporate income comprise roughly 70 per cent of nominal GDP. The other categories include mixed income (from proprietorships) and net taxes.

Source: Statistics Canada, Ontario Economic Accounts and FAO.



6 The FAO's forecast incorporates explicit assumptions of higher labour income growth, a small reduction in employment gains and a slight increase in CPI inflation due to the planned increases in Ontario's minimum wage. See the FAO's commentary 'Assessing the Economic Impact of Ontario's Proposed Minimum Wage Increase' for details.

Steady Job Gains Expected to Continue

The FAO is projecting strong job growth of 1.6 per cent (+109 thousand net new jobs) in 2017, following a gain of 1.1 per cent (+76 thousand net new jobs) in 2016.

Over the outlook, sustained economic growth is expected to support average annual employment growth of 1.1 per cent, just slightly faster than the growth in the labour force. As a result, the unemployment rate is expected to trend lower, falling from 6.2 per cent in 2017 to 6.0 per cent by 2021.

Steady Employment Gains as Unemployment Rate Trends Lower

Source: Statistics Canada and FAO.

Key Risks for Ontario's Economic Outlook

While the FAO expects solid economic growth over the medium-term, there are a number of risks that could negatively affect Ontario's economic performance.

Most economic forecasters, including the FAO, continue to assume that NAFTA will largely be maintained in its current form. However, the US administration is demanding significant concessions from Canada and Mexico, and has threatened to leave NAFTA altogether. Some businesses may already be postponing investment decisions outside of the United States due to the uncertainty surrounding NAFTA. If the renegotiation of NAFTA leads to a deterioration in Ontario's terms of trade or restricts access to the US market, there would be significant negative implications for the province's growth prospects.

In recent years, strong growth in household spending has not been matched by similar gains in household incomes, leading to higher levels of household debt. In 2016, household debt reached 167 per cent of disposable income in Ontario, a significant rise from 149 per cent in 2010.[7] Higher debt burdens expose households to financial risk. With a steady rise in interest rates expected over the next few years, many households will scale back discretionary spending in order to make higher debt interest payments, which in turn could have implications for the pace of overall economic growth.[8]

There are also upside risks that could lead to a stronger economic performance for Ontario. In particular, some forecasters expect the US economy will grow faster over the medium-term than the FAO projects.[9] Stronger than projected US growth would lift demand for Ontario's exports, raising employment and leading to stronger wage and profit growth for the province.

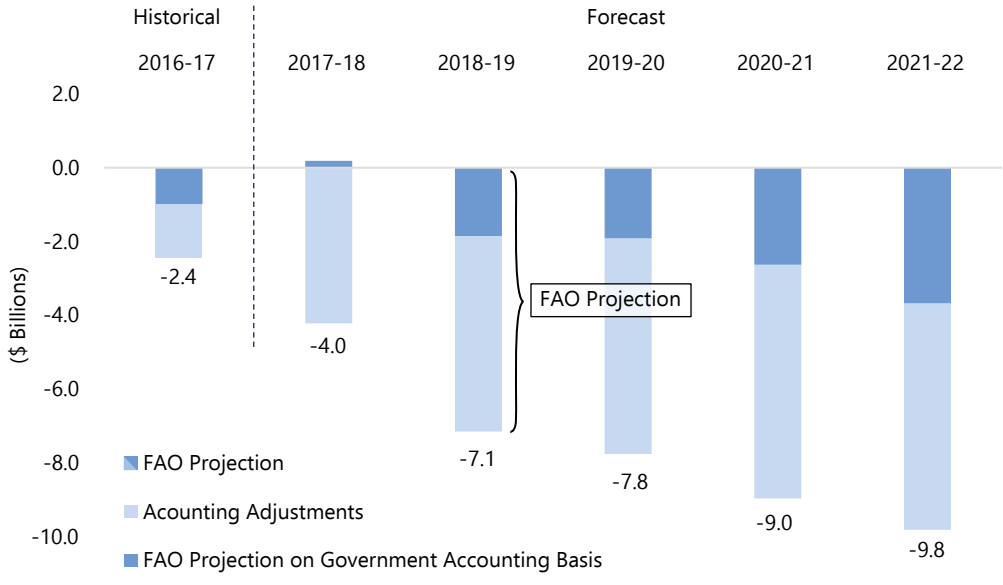
3 FISCAL OUTLOOK

FAO Projects a Return to Significant Budget Deficits

Despite a strong increase in revenues, the FAO is projecting an Ontario budget deficit of $4.0 billion in 2017-18, entirely the result of the Auditor General of Ontario's recommended accounting treatment for both the government's Fair Hydro Plan (FHP)[10] and the net pension assets of jointly-sponsored pension plans.[11]

Beyond 2017-18, the FAO is projecting substantial increases in the budget deficit due to the loss of time-limited revenues, a more moderate pace of tax revenue growth, and the growing fiscal impact of the FHP and the pension adjustment. By 2021-22, the FAO is projecting an Ontario budget deficit of $9.8 billion in the absence of any fiscal policy changes.



This is a significant deterioration since the FAO's spring outlook, primarily due to the government's introduction of the FHP,[12] which will add $3.2 billion to the budget deficit by 2021-22.

10 See 'The Fair Hydro Plan: Concerns About Fiscal Transparency, Accountability and Value For Money,' Auditor General of Ontario, October 2017; 'Independent Auditor's Report, 2016-17 Consolidated Financial Statements', Auditor General of Ontario, 2017; and 'An Assessment of the Fiscal Impact of the Province's Fair Hydro Plan,' Financial Accountability Office, 2017

11 For details, refer to 'The Accounting Treatment of Jointly Sponsored Pension Plans' in the FAO's 'Spring 2017 Economic and Fiscal Outlook.'

12 See 'Developments since the FAO's Spring 2017 Economic and Fiscal Outlook' in this report's Appendix.

Ontario Budget Balance

Note: Budget Balance before reserve.

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

In the *2017 Ontario Economic Outlook and Fiscal Review* (also referred to as the Fall Economic Statement or FES), the government projected balanced budgets for 2017-18 through to 2019-20. However, the government's fiscal projection relies on an overly optimistic revenue forecast and does not adopt the Auditor General's recommended accounting for FHP or net pension assets.[13]

For comparison, under the government's accounting presentation, the FAO projects a small budget surplus for 2017-18, approximately equal to the government's projection in the Fall Economic Statement. However, there are a number of time-limited and one-time revenues which contribute to the budget balance in 2017-18. Going forward, the loss of these temporary revenues combined with more moderate tax revenue growth results in a return to deficit in 2018-19 and a steady deterioration in the budget deficit over the outlook.

13 However, the government's accounting treatment of net pension assets is consistent with the recommendations from the government's 'Independent Pension Asset Expert Advisory Panel.' Contrary to the opinion of the Auditor General, the panel's report concluded that the surpluses in the jointly sponsored pension plans should be fully recognized in the Province's financial statements.

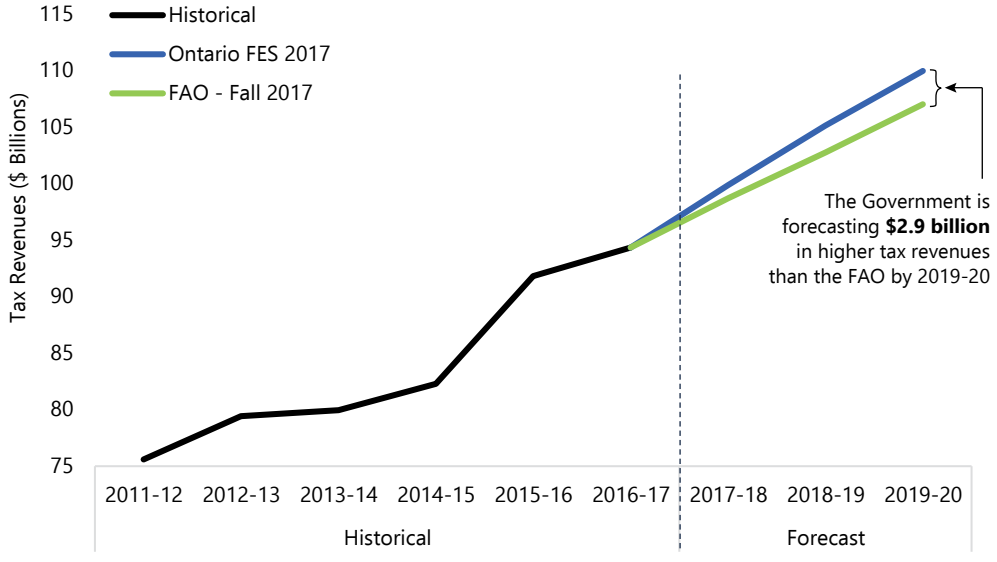
The Accounting Presentation of Ontario's Financial Statements

In both the 2017 Ontario Budget and Fall Economic Statement, the government has not adopted the Auditor General's recommended accounting framework, reducing the transparency and reliability of Ontario's fiscal projections.

In addition to the existing disagreement over the appropriate accounting treatment for the government's jointly sponsored pension plans, the Auditor General recently reported that the government is not correctly accounting for the full cost of the Fair Hydro Plan in its fiscal plan. As a result, the government's financial statements are expected to continue to receive qualified opinions from the Auditor General.

Revenue Outlook

The FAO is projecting average annual revenue growth of 3.5 per cent over the forecast. In 2017-18, revenues are supported by strong growth in taxes, as well as a number of time-limited or one-time revenues. Beginning in 2018-19, the FAO is projecting more moderate revenue growth as:



- time-limited revenues end (including asset sales and federal Equalization payments); and
- economic growth moderates, following several years of stronger than average growth.

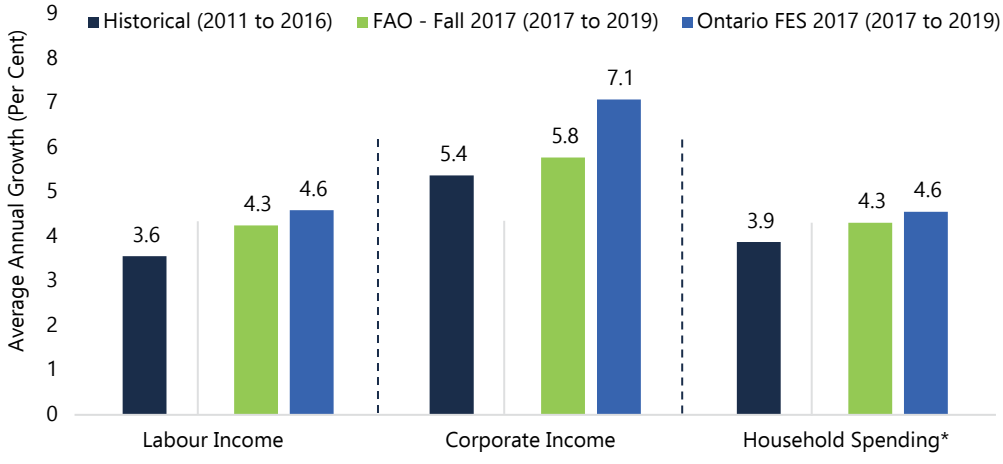
Tax Revenue Growth Expected to Moderate

Nominal GDP, the broadest measure of the tax base, is projected to grow by a strong 4.7 per cent in 2017, supporting a 4.6 per cent increase in tax revenues in 2017-18. From 2018 to 2021, annual GDP growth is expected to moderate to 4.1 per cent, leading to similar slowing in tax revenue growth to 4.1 per cent on average over this period.

In the government's Fall Economic Statement, tax revenue is projected to grow by 5.2 per cent on average from 2017-18 to 2019-20, much higher than the FAO's projection of 4.3 per cent over the same period. The government's expectation of higher growth results in an additional $2.9 billion in tax revenues by 2019-20, relative to the FAO projection.

FAO's Taxation Revenue Outlook

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.



The government's revenue forecast relies on optimistic projections for many of the key economic drivers of tax revenue, including labour income, corporate income, and household spending. In particular, the government is forecasting:

- significant and sustained above-trend growth in labour income;
- a surge in 2017 corporate income growth; and
- continued strength in household spending, despite higher interest rates and elevated levels of household debt.

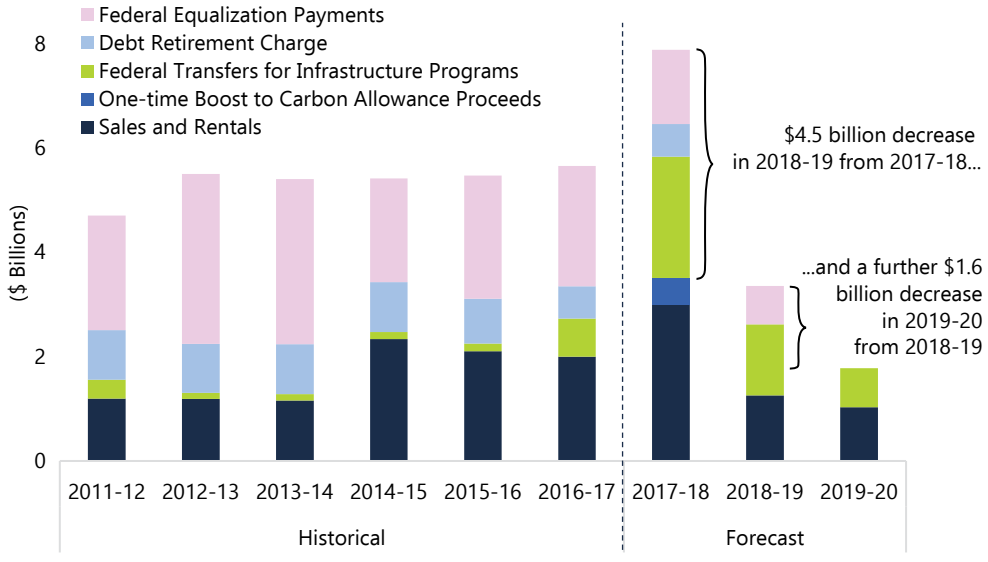
Taken together, the government's revenue forecast appears to be based on overly optimistic projections for the three main revenue drivers.[14]

14 See Appendix for a detailed comparison of the FAO and the government forecasts.

Growth in Key Tax Drivers

* The FES forecast for Household Spending is calculated as Real Household Spending plus CPI inflation.
Source: Statistics Canada, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

The Loss of Time-limited Revenues



The revenue projection for 2017-18 includes a number of one-time or time-limited revenues that are set to expire.[15] These include:

- a temporary increase to sales and rentals revenue, reflecting additional asset sales[16];
- higher federal transfers for infrastructure;
- the final year of the debt retirement charge[17];
- federal Equalization payments, which the FAO estimates will end in 2019-20; and
- additional, one-time proceeds from Ontario's cap and trade program in 2017-18.[18]

Taken together, these time-limited revenues will decrease by $4.5 billion in 2018-19, and by an additional $1.6 billion in 2019-20.

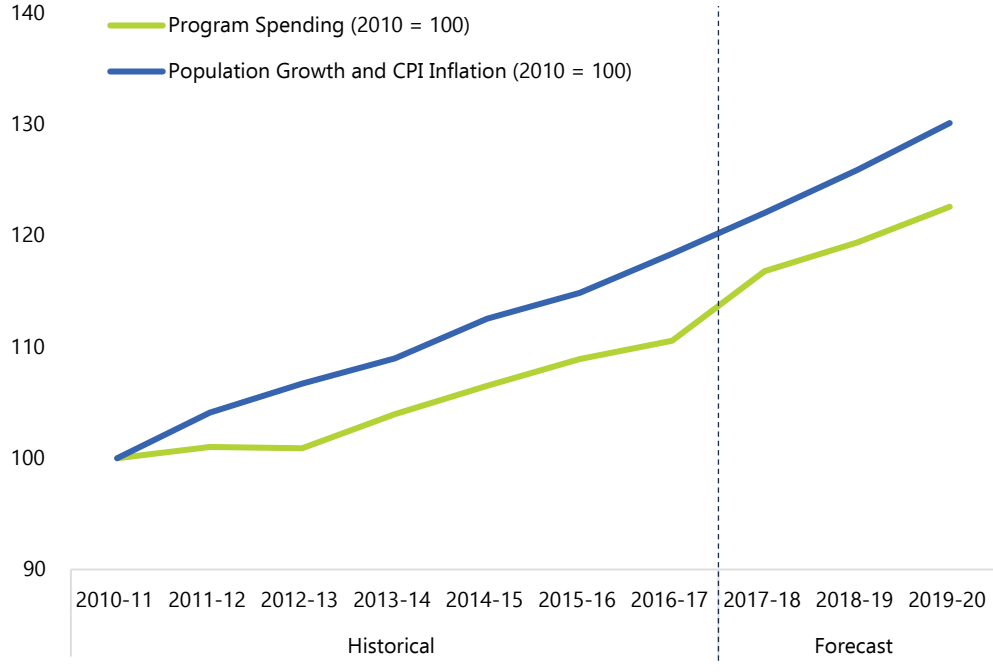
15 Some of these temporary revenues - notably proceeds from the sale of carbon allowances or federal transfers for infrastructure - are tied to corresponding spending commitments, which would partially offset the reductions in these revenue sources.
16 Asset sales include the Province's 20 per cent sale of Hydro One equity in a secondary offering in 2017-18, which the FAO estimates generated about $0.7 billion in revenue.
17 The debt retirement charge (DRC) is a charge payable on electricity consumed in Ontario and replaces a portion of debt servicing costs previously included as part of electricity bills before the restructuring of the former Ontario Hydro. The government ended the DRC on residential bills as of January 1, 2016. The DRC will remain on non-residential electricity users' bills until March 31, 2018.
18 In the 2017-18 fiscal year, Ontario will hold five carbon market auctions. Going forward, the Province expects to generally hold four auctions each year.

Many Time-limited Revenues are Set to Expire Beyond 2017-18

Source: Ontario Budgets, Ministry of Finance and FAO.

FAO Revenue Assumptions and Forecast

Revenue Source	Assumption	Forecast
Taxation Revenue	Grows with key economic drivers including labour income, corporate income and household spending.	Averages 4.2 per cent growth per year from 2017-18 to 2021-22.*
Federal Transfers	Based on legislated growth rates and economic forecasts for Ontario and Canada.	Federal transfers are expected to grow by 1.6 per cent per year from 2017-18 to 2021-22.
Government Business Enterprises (GBE)	Based on government projections.	Income from GBEs are projected to rise moderately from $5.6 billion in 2016-17 to $6.7 billion in 2021-22.
Other Revenue	Based on government projections, and includes asset sales, and proceeds from the sale of cap and trade allowances.	These revenues are projected to increase from $16.3 billion in 2016-17 to $19.4 billion in 2017-18, before declining to $18.0 billion by 2021-22.



* The reduction in the small business Corporate Income Tax rate is reflected in the FAO's tax revenue projections.

Expense Outlook

Program Spending

In the 2010 Budget, the government introduced a plan to return to balanced budgets by 2017-18. Since then, the government has restrained the average growth of program spending to below the rate of inflation and population growth.

Program Spending and Spending Pressures

Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

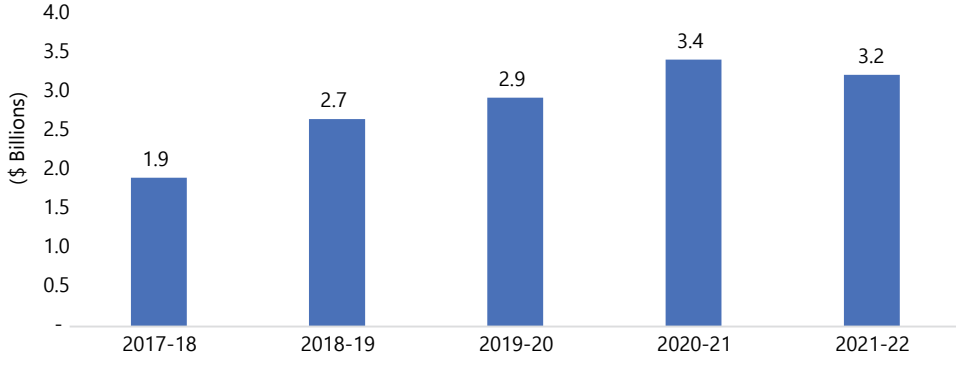
Over the 2017-18 to 2019-20 period, the FAO's outlook adopts the government's 2017 Fall Economic Statement projections for program spending but makes adjustments to reflect the Auditor General's recommended accounting presentation.[19] Excluding these adjustments, the projection for program spending is largely unchanged from the 2017 Ontario Budget, aside from $200 million of new spending beginning in 2017-18.[20]

19 Based on information provided by the Ministry of Finance, the FAO's projection for 'Other Spending' includes $2.3 billion in 2017-18 for a valuation allowance on jointly-sponsored pension assets, growing to $2.9 billion by 2021-22. In addition, the FAO includes expenses related to the electricity cost refinancing portion of the FHP, which average $2.8 billion per year over the outlook.

20 In the 2017 FES, the government announced new funding for additional spending for small businesses, seniors and child care. However, the additional expenses for child care is fiscally neutral since it is funded by a corresponding increase in federal transfer revenue.

In 2017-18, program spending is expected to grow by 5.7 per cent.[21] This spending includes additional funding for health care, education and elements of the Fair Hydro Plan. However, in 2018-19 and 2019-20, the government plans to restrain increases in program spending to an average of 2.4 per cent, below the growth in underlying spending pressures.

Beyond 2019-20, the FAO projects that program spending will grow by an annual average rate of 4.2 per cent. This stronger pace of growth reflects additional spending to meet underlying pressures. In particular, the aging baby boomer cohort and the growing youth population will place added spending pressures on Ontario's health care and education systems in the near future.



Impact of the Fair Hydro Plan

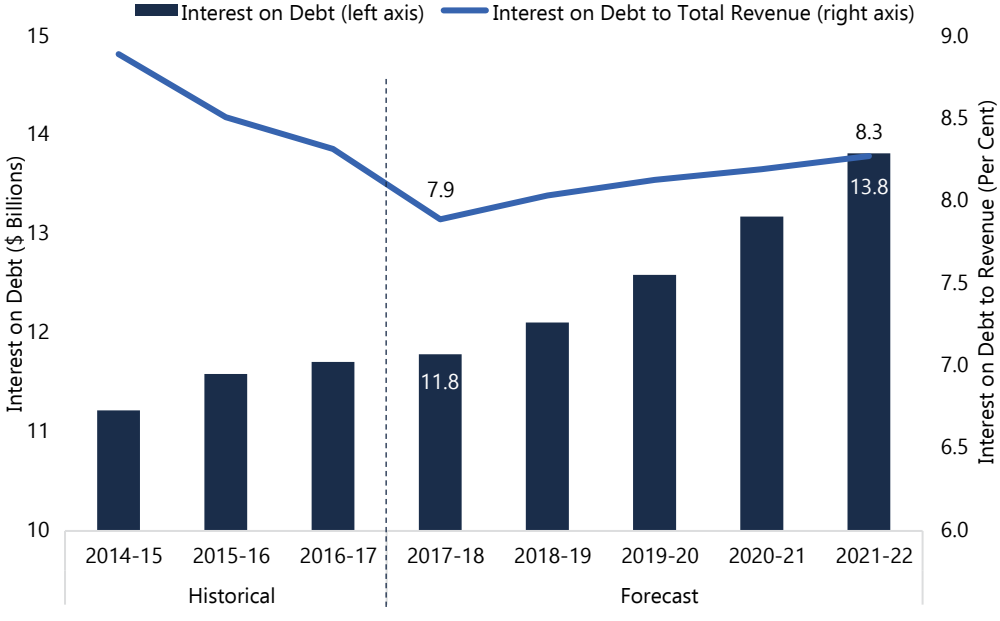
The government introduced the "Fair Hydro Plan" to reduce electricity bills for residential customers by an average of 25 per cent. The FHP includes refinancing a portion of the reduced electricity costs for ratepayers through borrowing by the Province and Ontario Power Generation (OPG).

The Auditor General has recommended that the cost of this refinancing be fully captured as an expense. However, the government has not included this cost in its fiscal plan.

Consistent with the Auditor General's recommendation, the FAO has included the full fiscal impact of the FHP in its projection by increasing program spending by an average of $2.8 billion per year over the outlook (see the FAO's 'An Assessment of the Fiscal Impact of the Province's Fair Hydro Plan' for further details).

Impact of the Fair Hydro Plan on Ontario's Program Spending

Source: FAO.



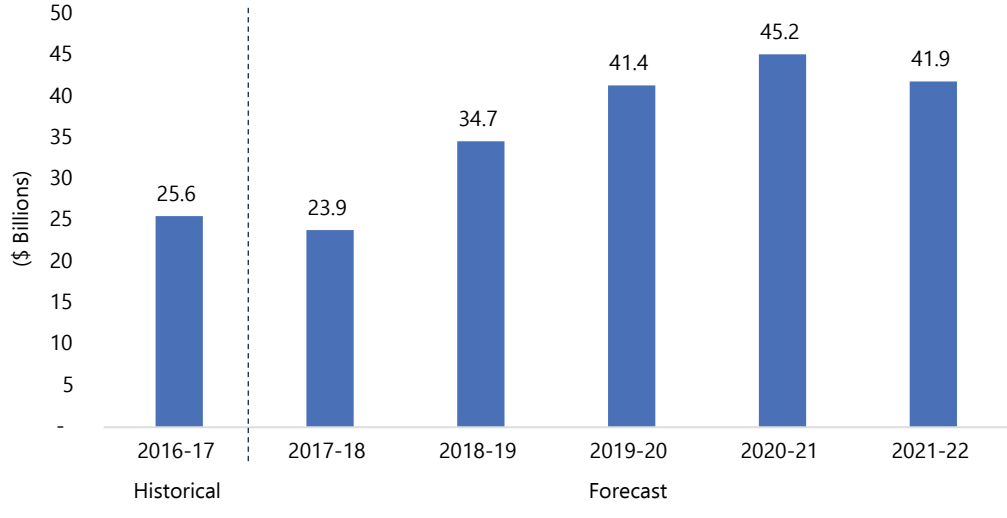
21 On the government's accounting basis, which excludes the impact of the pension adjustment and the electricity cost refinancing portion of the FHP.

Interest on Debt

Interest on debt (IOD) payments are expected to increase at an average rate of 3.4 per cent per year over the outlook due to elevated borrowing levels and rising interest rates.

Over the past three years, IOD as a share of revenues has declined, a reflection of strong revenue growth, lower new borrowing and maturing debt being refinanced at much lower rates of interest. However, this trend is expected to reverse over the outlook as revenue growth moderates while IOD payments accelerate. By 2021-22, Ontario's debt interest payments will account for 8.3 per cent of total revenue, above the 7.9 per cent share in 2017-18.

Interest on Debt



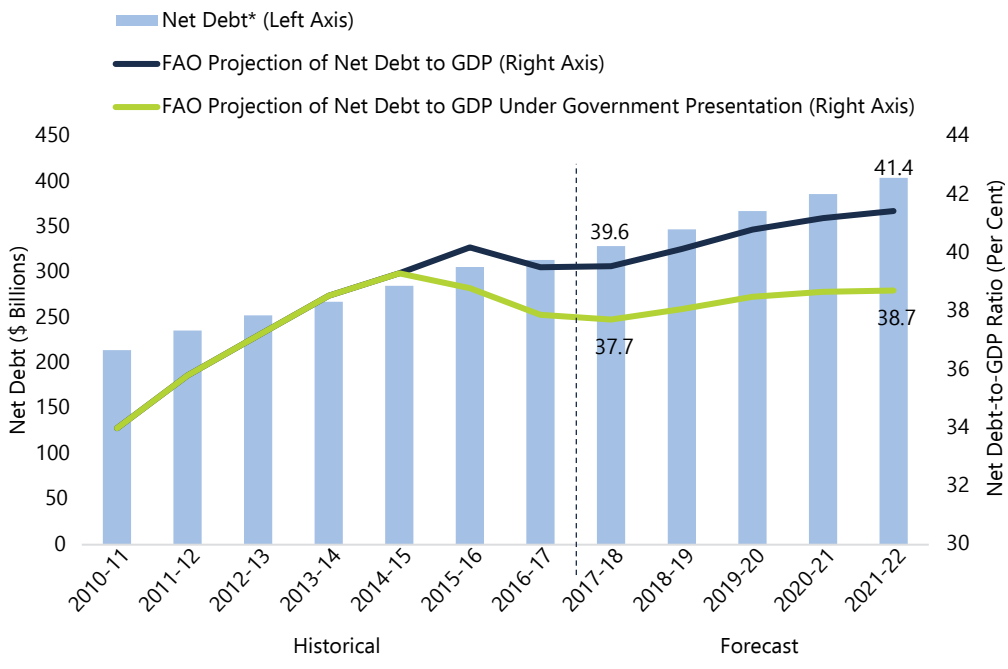
Source: Ontario Public Accounts, 2017 Ontario Economic Outlook and Fiscal Review and FAO.

Borrowing and Net Debt

Despite higher funding requirements for capital expenditures and the Fair Hydro Plan, Ontario's borrowing is expected to decline to $23.9 billion in 2017-18, the lowest level of borrowing since 2007.

However, beginning 2018-19, borrowing requirements are expected to increase significantly due to higher annual debt maturities, additional funding requirements for the Fair Hydro Plan and rising capital expenditures. By 2020-21, the FAO projects borrowing to increase to over $45 billion – nearly double the borrowing requirement in 2017-18.

Borrowing Outlook



Source: 2017 Ontario Economic Outlook and Fiscal Review and FAO.

The FAO projects Ontario's net debt-to-GDP ratio will remain essentially unchanged in 2017-18 at 39.6 per cent. However, over the next four years, the FAO projects that Ontario's net debt will increase by approximately $75 billion to over $400 billion, increasing the net debt-to-GDP ratio to 41.4 per cent by 2021-22.[22]

22 The FAO's estimate of net debt reflects the Auditor General's recommended accounting framework.

Net Debt Outlook

Note: Net debt is presented on the Auditor General's basis, which includes the fiscal impact of the Fair Hydro Plan and pension adjustment.

Source: 2017 Ontario Economic Outlook and Fiscal Review, Ontario Public Accounts and FAO.

The government continues to maintain a net debt-to-GDP target of 35 per cent by 2023-24 and 27 per cent by 2029-30. However, the FAO's net debt-to-GDP projections under both accounting presentations suggest that additional fiscal measures would be required for the government to achieve its net debt-to-GDP targets.

4 APPENDIX

Developments since the FAO's Spring 2017 Economic and Fiscal Outlook

The FAO's current projection of Ontario's budget balance has deteriorated compared to the spring outlook.

- The Fair Hydro Plan, which boosts expenses by an average of $2.8 billion over the outlook, accounts for the majority of the higher deficit.

- In addition, compared to the spring, the FAO forecasts more moderate growth in revenues from personal income tax and the Land Transfer Tax over the outlook. This is offset by stronger expected growth in federal transfers and GBE income.

Subject: FAO EFO Report Summary Note / Request for Input
Date: Wednesday, December 06, 2017 13:29:52
Attachment 1: Summary of Draft FAO Fall Fiscal Outlook_v2a.docx
Attachment 2: RE: FAO's Fall 2017 EFO

Hi All,

Attached is a draft FAO EFO report summary note for review with a few caveats. An embargoed copy of the FAO's final EFO report will be released tomorrow and might result in updates. In addition, OEP will be adding a summary on the economic outlook and related key messages in order to have one consolidated product. For your general reference, I'm re-attaching the final comments that were submitted to the FAO.

Could your areas please review the attached summary note and aim to provide ADM approved edits in tracked changes by **EOD tomorrow**? These edits should align with the final EFO report being released tomorrow.

Please let me know if you have any questions.

Thanks,

Ryan

Ryan Birks

Special Policy Advisor and Executive Assistant

ADMO, Office of the Budget

FAO's 2017 Fall Fiscal Outlook – OB Summary

ISSUE

The Financial Accountability Office is set to release its 'Fall Economic and Fiscal Outlook' report. This note summarizes the fiscal chapter of the report.

TOP MESSAGES

- I would like to thank the Financial Accountability Officer (FAO) for releasing his fall economic and fiscal outlook for Ontario. We value the FAO's independent assessment and projections of the province's fiscal plan.
- As outlined in the 2017 Ontario Economic Outlook and Fiscal Review, the government is projecting a balanced budget for 2017–18 and to remain balanced in 2018–19 and 2019–20.
- The FAO report also projects a balanced budget for Ontario this year.
- The government has a strong track record of beating its fiscal targets. In fact, the Public Accounts of Ontario reported that the 2016–17 deficit was $1.0 billion, beating our annual deficit target again, for the eighth year in a row.
- The 2017 Ontario Economic Outlook and Fiscal Review builds on the government's track record of fiscal management that has resulted in $29 billion in accumulated deficits being avoided over the past seven years, relative to the 2010 Budget forecast.
- We are also targeting a net debt-to-GDP ratio of 35 per cent by 2023–24 and reducing Ontario's net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029–30.
- Since 2014, Ontario's real GDP growth has strengthened, positioning Ontario as a growth leader, not only in Canada, but among G7 countries. In fact, over the 2014-17 period, Ontario's real GDP growth is on pace to exceed that of all G7 countries.
- Private-sector economists are projecting continued growth for Ontario over the forecast horizon; the FAO's real GDP projections are aligned with the 2017 Fall Economic Statement over the 2017 to 2020 period.
- This shows that our plan to make strategic investments in Ontario to grow the economy is working.
- A balanced budget is providing the Province the fiscal flexibility to invest more in health care, education, support for seniors and small businesses and other public services that matter most to Ontario families. It also adds stability to Ontario's finances and positions the government to better respond to demographic challenges and unexpected global economic shocks that the province will face over the next decade.

KEY POINTS

Fiscal Outlook

- The FAO is projecting a budget deficit of $3.9 billion in 2017–18 using the **Auditor General's recommended accounting treatment for both the Fair Hydro Plan and the net pension assets of jointly sponsored pension plans.** In the absence of any fiscal policy changes this grows steadily to $9.6 billion in 2021-22.
- Under the **government's accounting presentation (excluding the AG's recommendations)**, the FAO projects a small surplus for 2017–18 of $0.3 billion (excluding the reserve) and a return to deficits beyond 2017–18 driven by revenue factors - loss of temporary revenues combined with more moderate tax revenue growth.
- The FAO suggests that by not adopting the AG's recommended accounting presentation, the 2017 Budget and the 2017 FES reduced transparency and clarity of Ontario's fiscal position and as a result Ontario will continue to receive qualified options from the AG.

Budget Balance - FAO's Fiscal Outlook ($ Billions)	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21	2021-22
AG Presentation	-5.0	-2.5	-3.9	-7.2	-7.9	-8.9	-9.6
Government Presentation	-3.5	-1.0	0.3	-1.9	-2.0	-2.6	-3.5
2017 FES -- Excluding Reserve	-3.5	-1.0	0.5	0.5	0.8	N/A	N/A

Revenue Outlook

- Using the AG presentation, the FAO is projecting average annual revenue growth of 2.6 per cent from 2016-17 to 2019-20 as compared with the government's projections of 4.0 per cent. The main drivers are:
    - The FAO projections for taxation revenues are $2.9 billion lower by 2019-20 than the projections in the 2017 FES due to lower projected growth in household spending, labour income and corporate profits.
    - The FAO projects that, based on the AG presentation, the Fair Hydro Plan will lower net income from OPG by $3.4 billion lower by 2019-20.
    - In addition, the FAO continues to highlight a number of one-time 2017-18 revenues, including: increase to sales and rentals from sale of final tranche of H1, higher federal transfers for infrastructure (PTIF), one-time boost from extra Cap and Trade auction. Taken together the FAO estimates that these amount to $4.5 billion in additional one-time revenues in 2017-18.

Expense Outlook

- From 2017–18 to 2019–20 the FAO's outlook adopts the government's 2017 FES projections for program spending, **adjusted to reflect the AG's recommended accounting presentation.** Beyond 2019–20 the FAO projects program spending will grow faster -- at an average annual rate of 4.1 per cent – due to population pressures.

Borrowing and Net Debt

- Using the **government's accounting presentation** net debt-to-GDP is expected to reach 38.4 per cent by 2019–20 and 38.6 per cent by 2021–22. This increases to 41.3 per cent by 2021–22 **under the AG's accounting presentation**.
    - The 2017 FES projected a net debt-to-GDP ratio of 37.0 per cent by 2019–20.

David;

Thanks again for the opportunity to review and provide feedback/fact-checks and comments on the draft report. Please find attached a consolidated set of comments from MOF and TBS on the Economic and Fiscal Chapters.

We think there may be some value in having a follow-up call next week to discuss some of these pieces – but let us know what you think once you've reviewed. We're happy to arrange something.

Some of these more significant edits may require a conversations to clarify, including:

· The language and representation of the differences in accounting interpretations. We may have discussed this at the time of the Budget outlook document, but we think its important to get the language right in terms of how this is articulated so that it's a more objective and fact-based representation.

· In addition, it appears that the way the FAO has built in the AG's interpretation of the Fair Hydro Plan accounting treatment is incorrect – as the current presentation in this draft EFO shows it appearing on the revenue side (on OPG's net income) – instead, the AG's recommendation was that is an expense impact on consolidation from IESO and further that the IESO is not a GBE – so it impacts the way the section (and charts under that section) are currently presented. This will require a significant change to your numbers and presentation. This may require additional explanation, so let us know.

· There are also some comments related to FAO projections for the amount of borrowing, as well as references about above trend growth in key tax drivers – these were essentially that the forecast is consistent with historical growth/trends and private sector forecasts, and the importance to note where “one-time” revenues identified as such by the FAO are actually also fiscally neutral – so should not be linked to a fiscal gap contribution by these shorter-term revenues.

Tim, Brian Karen

Please find attached drafts of Economic Outlook and Fiscal Outlook chapters from the FAO's upcoming 'Economic and Fiscal Outlook' report.

The chapters are password protected using the same password as in the past.

As in the past, we are on a very tight schedule to enable us to release this report in early December, before the Legislature rises for the holiday break.

However, please note that we are still waiting for the detailed program spending projection consistent with FES (see attached email request from last week). This information is essential to calibrate our models and ensure consistency with the government's projections. If we do not receive that information shortly, we will be forced to proceed with our own estimates which could impact the results and conclusions presented in the report. Please be aware that we will need to be clear with MPPs, during our technical briefing, that we did not receive all the additional background information that we requested. (We did, however, receive the detailed revenue information from FES last week. Thanks)

We are asking for your comments/concerns by end of day Friday (November 24).

Happy to set up a phone call to discuss.

Thanks again for your support and assistance.

Hello Tim, Brian,

As you are aware, we are preparing our Fall EFO for release in early December.

As in the past, we are planning to send you drafts of the 2 core chapters of the report (economic outlook and fiscal outlook) on Wednesday morning, for your comments. We will also provide the supporting data tables, providing additional details on the projection. The current report follows the basic template of our earlier EFOs, and may be a little shorter.

We would greatly appreciate receiving the Ministry's comments by Friday (November 24) end of day.

Thanks, as always, for your assistance.

David

Hi All - this has likely made its way through you're EA, but we are asking for ADM approved comments by tomorrow at 11am to be sent back through your division's EAs. We will consolidate and send back out to everyone and call a quick meeting if needed.

Also note - pls flag any cabinet confidentiality issues. Thanks again for your help.

Hi All,

OB will coordinate consolidating comments/edits for the FAO's request. In order to meet their tight timeline, can you please send your ADM approved edits in track changes to myself (with Selena and Daniel in copy) by 11am tomorrow? If your ADMs have general comments for the cover email to the FAO, please include them as well.

After we've consolidated all of the edits/comments, we'll recirculate them to the group. If needed, we can organize a regroup with ADMs around 1pm tomorrow.

Please let me know if you have any questions.

Thanks,
Ryan

Subject: RE: FAO's Upcoming EFO Report

Good Morning,

Please find attached drafts of the Economic Outlook and Fiscal Outlook chapters from the FAO's upcoming 'Economic and Fiscal Outlook' report.
The chapters are password protected using the same password as in the past.

The FAO's fiscal forecast incorporates the tax revenue adjustments that we received on Friday afternoon -- and which brings our short-term forecast much closer the Budget 2017 forecast.

Unfortunately, we are on a very tight schedule to enable us to release this report at the end of the May.

So, we are asking for your comments/concerns including any potential cabinet confidentiality issues by end of day tomorrow (Tuesday, May 9)

Thanks again for your support and assistance.

Hello,

Thanks again for our meeting on Tuesday. We appreciate the information you have provided as well as the responses to our questions at the meeting.

On Monday morning (as early as possible) we plan to provide you with draft copies of the Economic Outlook and Fiscal Outlook chapters (including Forecast Tables) from the FAO's upcoming EFO report.

We would hope you would be able to provide us with any comments or concerns on these chapters by Tuesday (May 9), end of day.

As in the past, the FAO will provide a final copy of the report 48 hours prior to release to both Ministers. I would email you a copy at the same time.

Thanks,

David West

Thanks David,

We're working on pulling together the various information pieces and people for a meeting Tuesday between 1pm and 2pm, so will be in touch to confirm.

As in past approaches, we won't be able to have everything for you on Tuesday but will be able to provide a downpayment for sure.

Have a great weekend
Tim

Subject: Follow-Up on the 2017 Budget

Good Morning!

Congratulations on delivering yesterday's big, black budget!

I wanted to follow-up on the FAO's requests for some additional information.

First, as we have discussed, we have three requests for specific data/tables:

1. We would like to obtain the detailed revenue and expense tables (Tables 6.14 and 6.15) extended to 2019-20.

- Are these detailed tables available to 2020-21? If so, then please include (:))

2. As staff have been discussing, we would like to obtain more detailed information on the one-time adjustments to taxation revenues beginning in 2015-16 and extending over the forecast. This is basically additional information to that provided in tables 6.7, 6.8 and 6.9.

3. As detailed in the letter and background documents sent to Deputies Thompson and Angus on April 3, we are requesting pension expense and employer contribution details for the OTPP and OPSEUPP.

We would also appreciate a meeting early next week (preferably Tuesday afternoon) to allow you to respond to a number of questions that we have with regard to the 2017 Budget.

We'll provide a list of specific questions later this afternoon, but these questions will cover a number of areas, including:

- Clarification on where the Fair Hydro Plan appears in the expenses
- Additional details/clarification on new health spending, including the new pharmacare plan
- Clarification on future assumptions for asset sales and any details behind the 'Sales and Rentals' line in the detailed Revenue table.
- Clarification on the assumptions behind new federal funding announced in the 2017 federal budget (e.g. affordable housing, child care, home care)
- Some background on the decision to reduce the estimate of 'Carbon Allowance Proceeds' and assumptions on associated expense
- Additional details/clarification on new infrastructure spending
- Assumptions behind the plan to reduce net debt-to-GDP to 35% and eventually to 27%.

We'll provide a list later this afternoon that expands somewhat on these question topics.

Happy to discuss any of these requests.

Thanks again for your support,
David

Economic and Fiscal Outlook

2017

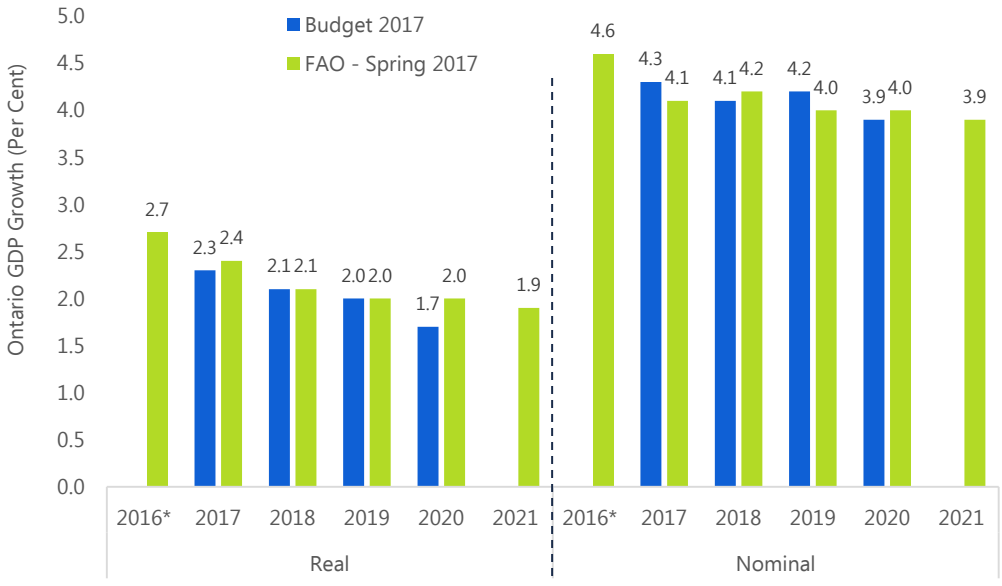
Draft Report

Confidential Document

May 2017

Economic Outlook

Overview



Ontario Economy Expected to Remain Strong in 2017

The Ontario economy finished 2016 with a strong 2.7 per cent increase in real GDP, reflecting solid growth in the second half of the year. Real GDP growth last year was significantly above the 2.1 per cent average gain seen from 2011 to 2015. Strong household spending, residential investment and exports contributed to the increase in real GDP in 2016.

Supported by the strong economic momentum in 2016 and continued improvement in economic indicators in the first quarter of 2017, the FAO is projecting real GDP to rise by 2.4 per cent in 2017 and 2.1 per cent in 2018.

Nominal GDP – the broadest measure of the tax base – increased by a robust 4.6 per cent in 2016. The FAO is projecting nominal GDP to increase by 4.1 per cent in 2017 and 4.2 per cent in 2018, reflecting solid gains in labour income and corporate profits.

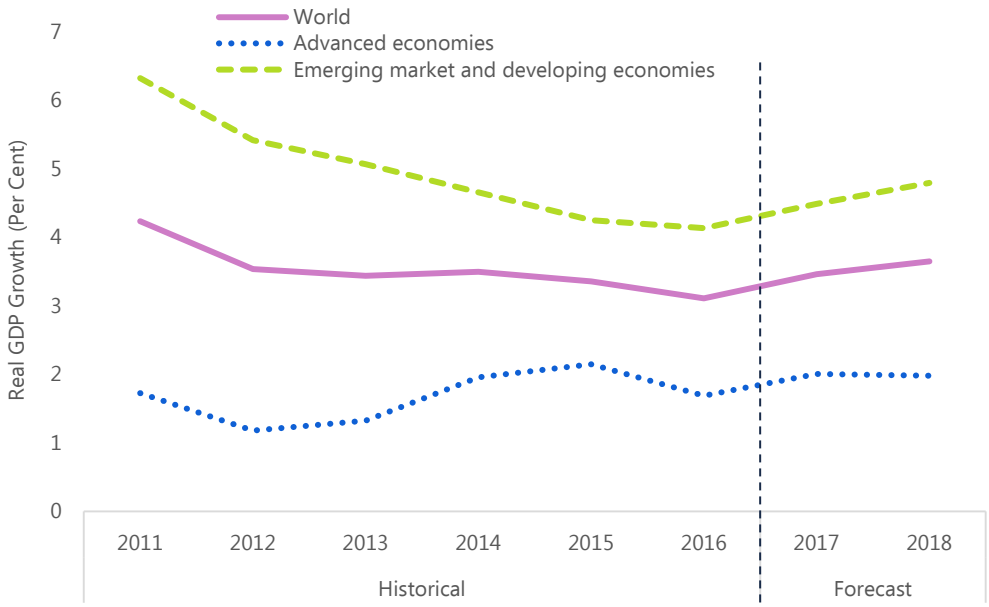
Global Economy Gaining Momentum

In its latest World Economic Outlook,[1] the International Monetary Fund (IMF) is forecasting global economic growth to strengthen from 3.1 per cent in 2016 to 3.5 per cent in 2017 and 3.6 per cent in 2018. The IMF revised the outlook slightly higher for 2017, but left it unchanged for 2018, compared to its October 2016 outlook.[2]



For advanced economies, the IMF's forecast for 2017 and 2018 has improved slightly from its October projection with growth of 2.0 per cent in 2017 and 2018.

Growth prospects for emerging market and developing economies are much more varied, but overall have weakened slightly from the IMF's October outlook, due to weaker economic conditions in key export markets. On average, the IMF has lowered its growth forecast for emerging markets and developing countries to 4.5 per cent in 2017, with 2018's forecast remaining unchanged at 4.8 per cent.

The IMF expects China – the world's second largest economy – to grow by 6.6 per cent in 2017 and 6.2 per cent in 2018, reflecting continued support from government policy. In the medium term, China's economic growth is expected to gradually moderate as its economy rebalances from investment and manufacturing-led growth to a more service-intensive economy.

U.S. Economic Growth to Strengthen in 2017

U.S. real GDP advanced by a relatively moderate 1.6 per cent in 2016, the weakest increase in three years. For 2017 and 2018, the FAO projects U.S. growth to improve to 2.3 per cent, with household spending, business investment and residential construction being key contributors to overall growth.[3]

However, the lack of specific details on the new U.S. administration's proposed policies has raised the risks associated with the current U.S. outlook. Many forecasters are cautiously optimistic that some of the proposed fiscal policies, such as expected cuts to corporate tax rates, could boost U.S. economic growth in the short-term.[4] But this optimism is tempered by the potential for large future increases in the U.S. budget deficit, which could weigh on economic growth over the medium-term.

From 2019 to 2021, U.S. real GDP growth is projected to average 2.1 per cent annually, which is in-line with the average rate seen from 2012 to 2016.

U.S. Economic Growth Moderates Beyond 2017

[3] The FAO forecast for the U.S. economy in 2017 is based on the U.S. Congressional Budget Office's (CBO) latest forecast. For 2018 to 2021, the U.S. forecast is based on the average of the CBO outlook and the forecasts of three independent model-based forecasters – the Conference Board of Canada (CBOC), the Centre for Spatial Economics (C4SE) and the Policy and Economic Analysis Program (PEAP) at the University of Toronto.
[4] These forecasters include the IMF, CBO, TD Bank, RBC, BMO Capital Markets and National Bank Economics.

Canadian Economic Growth Expected to Rebound

The outlook for the Canadian economy has improved following strong growth over the second half of 2016.

Continued momentum in recent economic indicators point to a solid start for 2017. Canadian real GDP is currently projected to grow by 2.2 per cent in 2017 and 2.3 per cent in 2018, recovering from more moderate growth in 2015 and 2016.[5] Strength in household spending and non-energy exports are expected to contribute to overall growth in 2017 and 2018.

Beyond 2018, Canadian real GDP is projected to increase at an average annual rate of 2.0 per cent, as the economy continues to adjust to slower growth in the energy sector.
