Strategic/ Policy Risk Primary Accountability: Capital Markets Division	Strategies and policies fail to achieve required results. Prime examples are failing to meet the borrowing requirements and failures in implementing core risk management strategies.	LOW Past experience indicates that the likelihood of major strategic failures is relatively **low** as they cannot always be eliminated. There are elements of borrowing and risk management which are outside the Province's control which can negatively impact required results. For example, financial conditions could result in higher interest costs or interest rate risk than anticipated or refinancing risk in future years may be much higher than desired if investor demand for longer term bonds is substantially reduced.	EXTREMELY HIGH The financial consequences of strategic failures in borrowing or risk management strategies and associated policies can be **extremely high**, and the annual Financing, Debt & Electricity Management Plan outlines strategies which attempt to address the challenges, including contingencies for unexpected events. In addition, management monitors major market and policy developments throughout the year very closely and will develop and implement new strategies and policies if conditions warrant. Even though the likelihood of major strategic failures is low, the impact remains extremely high resulting in an overall high risk assessment.	HIGH	Strategic plans and policies to mitigate strategic and policy risk are initially developed and implemented in a thorough manner as outlined in the OFA's annual Financing, Debt & Electricity Management Plan ("the Plan"). This includes an analysis of risk factors and contingency plans. The Plan is approved by the respective Boards (OFA and OEFC) and receives input from Board members. Market conditions and policy developments are monitored on a continual basis throughout the year to identify new and emerging developments which could impact strategic and/or policy risks. Existing control strategies are modified as required to mitigate adverse developments. Procedures are in place to ensure that staff are aware of relevant policies. Policy violations are rare, and a robust control framework exists to identify violations quickly. Most violations would not have a large enough impact to threaten achieving required strategic results.

Meeting stakeholder expectations Primary Accountability: Capital Markets Division	The risk that the OFA may fail to meet stakeholder expectations, including those of the Province and other public bodies. Stakeholder expectations include strategic/policy risk factors as well as the risk of failing to meet performance benchmarks.	MEDIUM There is a **medium** likelihood of failure to meet stakeholder expectations and performance benchmarks. Market factors tend to be relatively unpredictable and many factors are out of OFA's control. The current environment of expanding service requirements and constrained resources adds some risk; however, it is expected to be minimal. Based on past experience, it is expected that most stakeholder expectations will be met.	EXTREMELY HIGH Given that the impact of not meeting stakeholder expectations can be **extremely high**, combined with a medium likelihood the net result is a high risk assessment. The impact of a one percentage point increase in yields was estimated to be $300 million for 2017–18. Although the OFA has been able to extend the borrowing term in recent years, interest rate risk will remain elevated for several years. Continuous communication with the Deputy Minister and Minister ensures that expectations for the Province are clearly understood. Commitments are made after thorough and careful analysis to ensure that resources and expertise are in place to meet those expectations. Close and continuous communication and meetings with relevant public bodies (e.g. Agencies) who use our services ensures that expectations and service requirements are clearly understood. In addition, formal service level agreements (e.g. investment management agreements) have been developed which clearly outline the services and benchmark performance standards.	HIGH	An analysis of risk factors and contingencies is included in the OFA's annual Financing, Debt & Electricity Management Plan. This analysis is revisited throughout the year. Given the relatively unpredictable nature of market factors, ongoing monitoring of market and policy factors provides a level of risk mitigation. Continuous dialogue with stakeholders and regular reporting are also useful in keeping abreast of both expectations and performance. Emerging issues which may affect expectations are identified and are regularly reported to the Deputy/Chair as well as the Board (OFA and OEFC). This provides greater assurance that expectations will be met or managed through approved mitigation strategies. Meeting performance benchmarks for the Province and other public bodies also depends on adequate resources being available to maximize performance. This includes information systems services, and most importantly, staff. A highly educated and experienced workforce provides a higher likelihood that stakeholder expectations will be met. The OFA works to attract and retain highly qualified staff.

Public image Primary Accountability: Capital Markets Division	The risk that the OFA may damage its reputation with stakeholders and third party service providers.	LOW The likelihood of reputational risk to the OFA is **low.** There are extensive policies to govern staff conduct including, with respect to conflicts of interest, procurement and workplace harassment. In addition, procedures are in place to ensure that staff are aware of all policies. There are also regular reporting requirements and internal controls to reduce the potential for policy violations. Dealings with the press are handled through official MOF communication staff and investor and other stakeholder information is handled with extreme care. Accordingly, the likelihood of reputational risk problems with stakeholders and service providers is **low**, although mistakes can happen and there are certain factors which the OFA cannot control.	HIGH The impact of image problems can be **high** which combined with a low likelihood results in an overall medium risk assessment.	MEDIUM	Public image risk is mitigated through a host of strategies: i) a strong policy framework to provide greater information to staff to make them aware of potential public image problems; ii) strong internal controls to reduce the risk of policy violations and adverse information releases; iii) public communication protocols to reduce the risk of incorrect and damaging information releases; iv) an investor relations program which is responsive to investor needs and responds to investor requests for information promptly; v) ongoing dialogue with dealers to keep abreast of information in the marketplace relating to both Ontario and the OFA; and vi) a management structure and culture which promotes security of information and extreme care in disclosing information in a public forum. Strategies iii-v involve constant communication with external stakeholders. This feedback loop provides the OFA with a method of assessing the organization's public image. The OFA has a comprehensive procurement policy that ensures that its suppliers and service providers are selected in a fair manner. When appropriate, the OFA requires that service providers obtain security clearance. OFA contracts with service providers address confidentiality and contract precedents generally require approval before a contractor may use its association with the OFA for any purpose. All substantive contracts that Capital Markets enters into in the name of the OFA must be reviewed by the OFA Legal Branch. All substantive contracts that Capital Markets enters

					into in the name of the Province, must be reviewed by MOF Legal.
Quality of relationship with stakeholders Primary Accountability: Capital Markets Division	The risk that the OFA's stakeholder relationships are poorly managed. Stakeholders relevant to this risk are investors, dealers, credit rating agencies, and employees.	LOW The likelihood of failure managing OFA's stakeholder relationships is **low** as the OFA strives to deal with all of its stakeholders in a fair, transparent and responsive manner.	HIGH The quality of the business relationships with stakeholders that the OFA is engaged in such as investors, dealers, credit rating agencies and employees can have a **high** impact on the success and cost of OFA activities. However, the likelihood of failure in these activities is relatively low which results in an overall medium risk assessment.	MEDIUM	The OFA provides relevant, non-confidential information to investors in a fair and transparent manner, including information pertaining to the Budget and quarterly finances. Confidential information is handled in a manner consistent with laws and regulations, such as the *Public Services Ontario Act, 2006* and the *Securities Act, 1990*. The annual Investor Relations Plan is developed each year with the goal of providing updates to investors, both domestic and international, on a regular basis through outreach and information products. Requests for information or meetings from investors are responded to very promptly. The quality of the Province's relationships with stakeholders is constantly monitored. Should the strategies in the annual Investor Relations Plan fail to achieve the desired relationship levels, the OFA can choose to engage additional financial dealers or more senior Ministry of Finance representatives to participate in its investor outreach activities. Dealers are utilized in a fair and objective manner for bond issues. A syndicate evaluation is used to rank domestic dealers objectively, and commissions for domestic bond issues are based on this annual evaluation. Dealers thus know the OFA's service priorities and understand their bond issue allocations for the year. International issues also utilize dealers based on their level of service and strengths they bring to particular markets and issuance opportunities. The OFA continuously communicates with its dealers and also has regular

Risk Element or Classification	Identification of Risk / Risk Description	Likelihood and Rationale	Impact and Rationale	Overall Assessment of Risk Element	Mitigation Strategy
					meetings with them, and thus relationship issues tend to be dealt with quickly. Given the high importance of Ontario's credit ratings to its borrowing program, the OFA has very well established relationships with the credit ratings agencies. The OFA has regular meetings with the agencies, responds promptly to requests for information, and facilitates participation of more specialized or senior government officials as required. See Workforce Risk Category for discussion of mitigation strategies for risks related to employees as stakeholders.
Risk Category: ACCOUNTABILITY / GOVERNANCE **Governance/ Accountability/ Organizational Risk**: Risk that the organizational structure, accountabilities or responsibilities are not defined, designed, communicated or implemented to meet the organization's objectives, and/or that culture and management commitments do not support the formal structures. Risk of conflict of interest for board members. Inadequate ethics / codes of conduct. Inadequate definitions of roles and responsibilities. Risk of failure to comply with administrative requirements, such as directives. **Legal/ Contractual Compliance Risk:** Risk related to the potential cost of complying with a contractual agreement, or of litigation (including established policy and procedure) against the agency or government. Risk that a government initiative or action will contravene a contract, Memorandum of Understanding or policy. The costs/risks related to changing legislation could include lawsuits, settlements, fines, penalties and legal fees. Risk of failure to comply with administrative requirements such as directives.					
Governance, Information and Regulatory Compliance Primary Accountability: Finance and Treasury Division	The risk that oversight and governance responsibilities are not clearly defined; the risk that internal and external information produced or used is incomplete, out-of-date, inaccurate, irrelevant or inappropriately disclosed.	LOW The likelihood of failing in this area is **low**. Various policies and procedures define roles and responsibilities required for effective governance, including oversight by the OFA Board, chaired by the Deputy Minister of Finance, and largely comprised of independent, external	HIGH The impact of failing in this area is **high;** however, combined with the low likelihood of this happening results in a medium risk assessment	MEDIUM	Regular and special meetings of the OFA Board and its Committees, comprised of the Audit and Risk Management Committee (ARMC), Human Resources and Governance Committee (HRGC) and the ONFA Investment Committees (ONFA IC). The OFA uses secure communication procedures with internal and external parties; it also undertakes effective oversight of service providers, reconciliation processes, stringent disclosure policies, staff learning and development, and timely filing of regulatory reports.
Risk and issue management Primary Accountability: Risk Control Division Secondary Accountability: Finance and Treasury Division	The risk that the OFA may not effectively manage and mitigate financial risks including fraud risk.	LOW A review process established at the OFA that includes daily compliance monitoring, division of responsibilities, and a highly-developed and rehearsed response plan for emergencies results in a **low** likelihood.	EXTREMELY HIGH The OFA is a major participant in capital markets and has extensive dealings with banks on behalf of the Ontario government. As a result, the potential impact for errors and omissions is **extremely high** given the associated high dollar value**.** The extensive mitigation strategies employed by the OFA however, reduce the overall assessed risk to Medium.	MEDIUM	Financial risks associated with the OFA capital market activities are managed through the OFA risk management framework, which includes policies, each one of which is updated, reviewed by the Ontario Internal Audit Division (OIAD) and approved by the Board on an annual basis. Compliance with policies is monitored through a daily reporting cycle including where applicable on a real time basis, and credit risks are also monitored in real time. Fraud: Division of responsibilities between divisions to create a separate front, middle and back office for capital markets transactions and appropriate separation of duties and signing authorizations within divisions reduce risk of fraud. All staff are encouraged to report any wrongdoing at all times and senior management is asked to confirm quarterly whether they are aware of any wrongdoing.

					Issues management: In addition to a monthly Capital Markets update letter, the CEO also reports on any issues or concerns quarterly to the Board and has regular meetings with the Chair. Division Heads/Directors report quarterly to the Board on their area's progress in achieving the objectives identified under the Annual Business Plan. The OFA's financial statements are prepared and presented on a quarterly basis to the ARMC and the Board. They are also shared with senior staff of the Office of the Auditor General. The OFA provides the IOD, debt and derivative information that is presented in the Public Accounts of the Province. The numbers and the process including the underlying internal controls are audited annually by the Office of the Auditor General. Up to now, no material issues have been identified as part of this audit. OFA prepares issues notes, and feeds into the Ministry's communications branch for issues management and to address contentious issues. The OIAD develops a three year audit plan for the OFA that is updated annually. Audits under this plan, as well as special reviews as and when required provide an overall comfort level. The ARMC conducts in camera sessions with internal audit, staff of the Office of the Auditor General and the OFA's Chief Financial and Risk Officer at each quarterly meeting during which they are free to candidly raise any concerns about overall risk and issues management issues at the OFA. To avoid financial risk resulting from an inability to function during an emergency, the OFA has a

					highly-developed and rehearsed response plan for emergencies, addressing key risks such as fire, terrorist attack, pandemic or other threat. The work of the OFA can be carried out with all staff working from home. The OFA also maintains a collocate site at a remote location that houses a continuously available, mirrored IT infrastructure. Staff are subject to randomly declared, OFA-wide, work-from-home drills at least annually. OIAD reviews and comments on business continuity test results.
Statutory requirements are met Primary Accountability: Legal Division	Risk of material non-compliance with statutory requirements	LOW The likelihood of material non-compliance is considered **low** because OFA staff have experience and awareness regarding legal compliance in relation to the performance of their jobs. While regulation in some areas (such as in capital markets and the banking and payment card industry) is complex and continues to evolve, program areas have ready access to legal advice.	HIGH Impact is considered **high** since failure to comply with a statutory requirement could negatively affect the reputation of the OFA and the Government. Also, violations relating to capital markets operations could have serious financial implications. Combined with a **low** likelihood, the resulting overall risk assessment is medium.	MEDIUM	Currently, the OFA and Ministry of Finance Legal Branches advise of statutory requirements and changes affecting OFA operations and also are available to advise on steps to effectively address any non-compliance. Information on legal requirements relating to Public Servants is distributed to staff using the Policy and Procedure Management system. Non-compliance with laws, regulations and directives is reported to the Legal Director, who reports it to the CEO and the Board of Directors. CEO/Board direct remedial action (which may include learning and development). Education is encouraged and Divisions budget for necessary learning.
Reliability of financial systems Primary Accountability: Finance and Treasury Division	The risk that the OFA's financial information and reporting system is not reliable or fails to meet quality standards.	LOW The review process that the OFA has established including audits by the Internal Audit Division and the Office of Auditor General of Ontario ensures that the likelihood of occurrence is **low**.	HIGH While the impact of less than reliable financial information is indeed **high**, the low likelihood of this happening results in an overall medium risk assessment.	MEDIUM	The OFA has well-established processes and procedures for monitoring and reporting on its financial performance to its ARMC and Board of Directors and to the Ministry of Finance as well as Treasury Board Secretariat (TBS). OFA financials are prepared on a quarterly basis for discussion, and shared with the staff of the Office of the Auditor General and approval by the ARMC and Board of Directors. In addition the OFA financials are audited

					annually by the Office of the Auditor General who has provided unqualified opinions on all past financials. Staff of the Office of the Auditor General also audit, on an annual basis, the OFA's work on the Province's debt and IOD. This annual audit includes reviewing the underlying systems and internal controls. Up to now, no material issues have been identified and the OFA has implemented all recommendations arising from this audit. Changes to accounting pronouncements are also addressed during the quarterly discussions with the ARMC and the Office of the Auditor General. Annual budgets and audited financials are submitted to the Ministry as per TBS requirements. A further level of assurance exists as a result of the work carried out by the OIAD. OIAD develops a 3 year audit plan with consultation from Division heads and all findings and recommendations are presented to the ARMC. The OFA's progress in implementing recommendations are also presented on a quarterly basis to the same committee.

An economic slowdown straining the fiscal plan, thus affecting the borrowing program.	Fiscal strain stemming from a significant economic slowdown would likely result in higher borrowing requirements. Since then, the Ontario economy has experienced modest growth. However, over the last three years, real GDP growth has accelerated, averaging 2.6 per cent per year. Private sector economists expect continued economic growth, with Ontario remaining a provincial growth leader over the next two years.	program over a couple of years, but persistent sub-par growth would also be painful. The impact on revenues of a one percentage point change in nominal GDP is estimated to be $965 million for 2017–18. The world economy is currently highly reliant on U.S. economic growth and would be at risk if that fades. Given that Ontario's borrowing requirements are already quite large, the impact would likely be high, meaning that interest costs could increase appreciably. One result could be a reduced average term of borrowing to reduce borrowing costs or respond to reduced demand for longer term debt which would increase refinancing and floating rate risk. There could also be pressure to increase foreign exchange or counterparty credit exposures in order to reduce costs. The overall assessment of this risk is high.		In addition, the OFA is provided with a wealth of forecasts and economic insight from the Ministry of Finance. The OFA undertakes its borrowing strategically to reduce the effects of forecasted events and also looks to pre-borrowing to the extent possible. The OFA can also engage with independent experts to provide advice on how to reduce any adverse events that may have an impact on the borrowing program.
Financial market risk Primary Accountability: Risk Control Division	Higher-than- forecast borrowing requirement and/or interest rates, resulting in higher annual IOD charges. Financial loss attributable to changes in interest rates, credit spreads, foreign exchange and liquidity risk.	MEDIUM Higher-than-forecast borrowing requirement and/or interest rates is given a **medium** likelihood due to the historical frequency of interest rate changes, and the current medium-term forecast of provincial borrowing requirements.	HIGH The size of the Province's annual borrowing requirement creates a **high** degree of sensitivity to market conditions, especially interest rates. IOD has generally produced cost savings compared to budget forecasts due to cost effective debt management, as well as interest rates that have been	HIGH	Sound and effective risk management infrastructure, including policies, procedures, risk management reporting, and Information Technology (IT) systems. The OFA uses a conservative risk limited approach to forecasting IOD expenses. This is achieved by using interest rate forecasts provided by the Office of Economic Policy for the two out years and a 20 year interest rate average for the third out year.

			trending down for about 35 years. This experience may not be expected to continue, so financial market risk is assessed as being high. In the *2017 Budget,* it was estimated that a one percentage point increase in interest rates would have impacted IOD by approximately $300 million for 2017–18.		Accurately measure and assess portfolio exposures and ensure compliance with the related limits as approved by the Board, including foreign exchange and net interest rate resetting exposure limits and IOD. Maximum foreign exchange exposure of five per cent. Maximum net interest rate resetting exposure of 35 per cent. Maximum loss policy on IOD of three per cent of budgeted IOD. The OFA has reduced the sensitivity of IOD to interest rates by extending the term of recent borrowings. It also maintains exposure to foreign currency at levels far below the five per cent limit. While the policy limit for net interest rate resetting exposure is 35 per cent, the annual debt management plan sets out ranges that are usually considerably lower thus further limiting the risk.
Inability to complete the borrowing program due to market breakdown or loss of faith in the Province's ability to repay debt Primary Accountability: Capital Markets Division	Unable to achieve the borrowing program target of a particular fiscal year.	LOW The likelihood of not completing the borrowing program is **low** and would be based on a major market disruption or a major adverse credit situation at the Province. Both events are considered to have a low likelihood.	EXTREMELY HIGH The consequences of a major market disruption or a major adverse credit situation at the Province would obviously be **extremely high**, and thus overall risk is high.	HIGH	The OFA continually monitors demand for its bonds and has a strong relationship with its financial dealers. The OFA is aware, through external forecasts, Ministry of Finance advice, and its own analysis of bond markets, of the faith investors place in its bond offerings. The Capital Markets Division employs financial strategies to reduce the effects of forecasted events. The OFA can also engage with independent experts to provide advice on how to reduce any adverse events that may have an impact on the borrowing program.

					The OFA has very well established relationships with the credit ratings agencies. The OFA has regular meetings with the agencies, responds promptly to request for information, and facilitates participation of more specialized or senior government officials as required.
Risk of credit rating downgrade Primary Accountability: Risk Control Division	Risk that a credit rating downgrade from a major credit rating agency results in increased costs to borrowing program and/or reduced market access.	MEDIUM The likelihood of a credit rating downgrade is **medium.** The OFA has regular meetings with the agencies, and is regularly advised of rating agency concerns. As a result of these regular meetings with agencies and outperformance of its fiscal targets in recent years, the risk of a credit downgrade is not considered to be high, although debt levels remain high.	HIGH A credit rating downgrade, could reduce the pool of investors able to buy Government of Ontario bonds. As a worst-case, investors might be forced to sell, creating competition for our primary distribution, therefore resulting in a **high** impact for the Province. Note: This risk is assessed as high. The best mitigating strategy, reducing the debt burden is not under the control of the OFA.	HIGH	Maintain close relationships and ongoing dialogue with credit rating agencies to keep them informed of the Province's financial status priorities, and initiatives. Diversify funding sources. Increase investor relations activities. Ensure that decision-makers at Queen's Park continue to be mindful of the serious consequences of the Province not achieving a balanced budget and continuing to reduce its net debt-to-GDP ratio in accordance with Government commitments.
Credit Risk Primary Accountability: Risk Control Division	Risk that the Province incurs a significant loss because a counterparty or counterparties does/do not meet, or default(s), on their obligations to the Province.	LOW The size of Ontario's borrowing program requires the OFA to be open to borrowing opportunities in a variety of currencies. As the OFA has opted to keep currency risk at very low levels, this requires that hedging transactions be entered into with bank counterparties, creating credit risk. A bank default is considered to be a **low** probability event.	HIGH A bank default would be a **high** impact event, however, the assessment is overall medium as a result of the OFA's implementation of a comprehensive mitigation strategy including collateralized swap agreements and limiting transactions to highly rated counterparties.	MEDIUM	Ensure compliance with a sound and effective credit risk management infrastructure, including: an overarching credit risk policy that is reviewed and approved by the OFA Board on an annual basis, transacting with highly rated counterparties, limiting credit exposure concentration, and ongoing monitoring of key indicators of credit and market conditions. The Province will continue to enter into collateralized swap agreements with more of its swap counterparties to limit its credit risk. Such

					agreements allow the Province to cap its credit risk by requiring counterparties to post collateral when marked-to-market exposures exceed specific thresholds.
Electricity related policy, price and other risk Primary Accountability: Corporate & Electricity Finance Division	The electricity sector's financial performance affects the government's fiscal position largely through the performance of OPG, Hydro One, municipal electric utilities and the Ontario Electricity Financial Corporation (OEFC), including the latter's interest on debt expense. Their financial performance's impact on the Province can be due to, e.g., the companies' operational performance, regulatory decisions (e.g., OEB rate decisions), and accounting changes (e.g., IFRS provincial consolidation adjustments). As well, performance can be affected by electricity demand and electricity supply factors related to the economy, investment plans, temporary plant shutdowns and weather.	MEDIUM The likelihood of this risk is deemed **medium.** Some factors which could materially affect electricity sector performance such as OEB regulatory decisions and lower/higher demand due to a turnaround in the business cycle are hard to predict. Many performance factors such as policy or accounting decisions tend to be known in advance and potential impacts can be factored into the fiscal plan.	MEDIUM The impact is deemed **medium**. While the electricity sector has a significant fiscal impact, contributing an average $1.7B to the surplus (and helping to pay down electricity sector debt and other liabilities) over the past ten years, it is not large compared to the total size of the Provincial Budget. In any given year, the impact could be more material. For example, in 2015–16 the Hydro One IPO largely accounted for the higher than usual electricity sector surplus of $3.9B. Note that the IPO was planned, so not a surprise risk to the fiscal plan.	MEDIUM	Electricity sector performance, fiscal and policy updates and advice are regularly provided to senior Ministry of Finance officials and government in order to monitor potential electricity sector fiscal impacts over the medium term. Maintain strong working relationships with other Ministry of Finance partners, ministries and agencies.

Risk Element or Classification	Identification of Risk / Risk Description	Likelihood and Rationale	Impact and Rationale	Overall Assessment of Risk Element	Mitigation Strategy
	The electricity sector can also affect positively or negatively the fiscal position of the Province, and the borrowing plan, by policy decisions (e.g., ending the Debt Retirement Charge, or price mitigation measures)				
Operational, including systems, internal control and reputation risks Primary Accountability: Strategic Corporate Services Division	Risk from inadequate or failed internal processes and IT systems or from external events. The possibility that internal controls may not safeguard assets or prevent errors or fraud. The risk that negative publicity about the OFA's business practices may lead to financial or reputation costs or litigation.	LOW The likelihood of this risk is deemed **low**. The OFA's mandate and operations in a capital markets environment requires the extensive use of information technology. The fact that the OFA's mandate has also increased over the past years with no corresponding increase in staff resources has also resulted in a dependence on information technology. While this has allowed for efficiencies, this dependence also gives rise to the risk that IT systems may be poorly specified, operate incorrectly, or that the use of combinations of systems may have unintended consequences.	HIGH The financial impact of such risks could be compounded by harm to the OFA's reputation, therefore its impact is deemed **high.** This risk, reduced by the mitigating strategy, is assessed as medium.	MEDIUM	Maintain state-of-the-art IT systems, conduct daily back up, frequent update and testing of BCP involving remote desktop and co-locate. Appropriate documentation and timely reporting; update financial controls based on best practices; continued involvement of Internal Audit in developing new functions and reviewing existing financial policies; ensure oversight of service providers. As part of its annual audit, the Office of the Auditor General issues recommendations on areas where they feel internal controls can be tightened. Monitor print media to identify OFA-specific issues to protect OFA's reputation. Centralized external communication strategy. Early involvement of legal counsel.
Service providers (e.g. custodians, fiscal agents, banks etc.)	Poor service from existing providers and/or lack of qualified service providers.	LOW The likelihood of this risk is deemed **low.** Service providers are selected	MEDIUM	LOW	All existing service providers provide services under a formal contract. Low investment returns or inadequate investment controls on nuclear funds. Primary Accountability: Capital Markets Division	If funds are not properly invested or general financial market returns are low or negative, substantial contributions could be required by one or both of the Province and OPG. In addition, the Province's reputation may be damaged if controls or investment policies deviate from industry best practices.	MEDIUM Prolonged poorer than targeted performance of the nuclear funds over the medium-term is given a **medium** likelihood. The nuclear funds have a very long time horizon and would be expected to have poor returns over some time periods but are required to earn real returns in excess of 3.25 per cent in the long run. The funds have exceeded the 3.25 per cent annualised real return benchmark on average since their inception in 2003, but there is some risk that cumulative average annualised returns may be inadequate in future or that the costs of decommissioning and used fuel disposal could well exceed current projections. Returns will be driven to	HIGH The financial impact of poor performance could be quite substantial and is rated **high** given the size of the funds, and could result in substantial unexpected contributions from one or both of the Province and OPG. The overall risk assessment is high. Given the current size of the funds, a one percentage point decline in annual performance would equate to $170 million in reduced value for the funds, which could affect future funding requirements. Such loss, however, will not translate dollar-to-dollar on the Province's annual statement of operations at consolidation, as the Province's revenue recognition related to the	HIGH	The funds are diversified across asset classes and managers to reduce overall risk. Further diversification is being achieved as the funds move into alternative investments. The funds are also long-lived, and can be adjusted and returns recover over the long term, which result in the recovery of past Provincial contributions to cover investment return shortfalls, if any. In addition, a Statement of Investment Policies and Procedures (SIPP) and Statement of Investment Risk Policies (SIRP) are in place which outline basic policies which to a large extent address many of the risk factors. An extensive asset-liability study is undertaken every five years to attempt to optimize the asset allocation to meet the funds objectives to meet the cost requirements. In addition, the funds are closely monitored by staff and up to the respective Board levels by both the OFA and OPG including, for the OFA, by the ONFA IC. Unfortunately, the risk of sub-par returns cannot be entirely eliminated as it will be largely driven by

Decommissioning and waste disposal costs and liability risk surprises are largely mitigated by the quinquennial ONFA Reference Plan update. The contribution schedules can be adjusted following a reference plan update to allow for returns in the funds to help cover liability revisions and past target rate of return shortfalls. The funds are audited on a regular basis which reduces the potential for fraud or other control problems. Staff monitor the funds very closely and are looking for irregularities. The internal auditors of both OPG and the OFA are also proactive in examining control issues. The funds rely largely on external managers, and efforts are made to select highly professional managers who follow investment industry best practices.
Default on Loans to Public Bodies Primary Accountability: Corporate & Electricity Finance Division	Risk of default by public bodies on OFA loans	LOW Although the OFA has restructured or provided a loan deferral in the past, this has been relatively rare, so an "unlikely" scenario (less than 20 per cent probability) is reasonable, and its likelihood is rated as **low.** This is aside from the Ottawa Convention Centre (OCC), loan from the OFA which represents less than 1 per cent of the OFA's total loan portfolio). Ministry of Tourism, Culture	LOW Impact of a default may be "noticeable" and public, but loan write-downs to public bodies that are consolidated on the Province's financial statements would likely not create a fiscal impact, and, therefore, its impact is deemed **low** resulting in an overall low risk assessment.	LOW	Prior due diligence and analysis of debt repayment ability of public bodies on OFA loans. Ensure grant (where available) intercept mechanisms continue to be included in loan agreements. Early detection through loan monitoring by line ministry and restructuring of loan repayment terms. MTCS has engaged a consultant to review OCC. The report is expected late in 17–18, with implementation potentially affecting 18–19 and going forward.

		and Sport (MTCS) has engaged a consultant to review the OCC.			
Default on Guarantees under the Aboriginal Loan Guarantee Program (ALGP) Primary Accountability: Corporate & Electricity Finance Division	In the event of a call on an ALGP guarantee arising from a default on the underlying loan, the fiscal impact would be recorded in the fiscal year in which the claim was paid.	LOW Debt service reserve account, ongoing monitoring, bank account controls are in place to mitigate risk of default.	LOW Any default would have a negative fiscal impact on the Province in the year in which the Province paid a claim pursuant to the guarantee. As guarantees are limited to a maximum of $50 million (unless Treasury Board approves an exception), and the average is smaller, the impact is small in the Provincial context. However, there may be a reputational impact for the Province/OFA as well.	LOW	Ongoing monitoring by staff of approved loan guarantees, including project performance and compliance with loan and guarantee agreements. No specific Board oversight of ALGP because the program relates to Provincial guarantees.
Increased borrowing to fund loans to public bodies Primary Accountability: Corporate & Electricity Finance Division	Risk of unexpected loans that were not included in the OFA Annual Borrowing and On-Lending Plan.	LOW Over the past five years, only one unanticipated non-school board loan caused the OFA to breach its loan contingency reserve. An “unlikely” rating of less than 20 per cent probability of occurrence is, therefore, prudent, resulting in a **low** likelihood.	LOW In the overall borrowing plan, any unexpected loans would likely not have a “noticeable” effect, as most incremental borrowing is not material in the context of the whole borrowing program and therefore can usually be accommodated. This results in a **low** impact and a low overall risk assessment.	LOW	Ensure there exists an unassigned contingency equal to 10 per cent of forecasted loans to public bodies. Push off less urgent loans for execution in the following fiscal year. For OLG and LCBO, request business updates from the Government Business Enterprises Division (GBED) to identify potential borrowing requirements (e.g., for site expansion); include estimates in Borrowing and On-lending Plan. Where a policy decision is taken requiring the OFA to provide funding for a strategic project, facilitate private sector financing, especially if interest cost savings are only deemed to be minimal.

Government cost constraints Primary Accountability: Finance and Treasury Division	Cost constraints may limit the OFA's ability to provide services in a timely manner.	MEDIUM While good budgeting process and budget to actual comparison exists, the OFA is not insulated against budgetary constraints. The likelihood is deemed **medium.**	HIGH If budgetary constraints are severe enough the delivery of core services will be impacted justifying a **high** impact and high overall risk assessment.	HIGH	Timely budget preparation in accordance with PRRT requirements. The budget preparation process is aimed at allocating resources according to priorities. Detailed planning and monitoring to meet priorities within cost constrained environment. Comparison on a quarterly basis between budget and actual to ensure that priorities are being met within approved expenditures. Effective financial management on a year by year basis that ensures minimal variances between budget and actual. The OFA also retains its surplus which can act as a source of funds to meet non salary related expenses upon approval from the Ministry of Finance.
Risk Category: WORKFORCE **RISK AREA**: Workforce: Operational Workforce Risks.					
Employee Fraud Primary Accountability: Finance and Treasury Division	Risk that losses will be incurred because an employee is dishonest.	LOW The likelihood is **low** due to stringent internal controls and systems that cannot be easily circumvented.	MEDIUM The impact is deemed to be **medium** resulting in an overall low risk assessment.	LOW	Continue to communicate code of values and measures for disclosing wrongdoing to OFA staff. Strong system of internal controls, including segregation of duties, which are regularly reviewed by internal auditors as well as the Office of the Auditor General. While no material issues have been identified to date from these audits that essentially cover the full fiscal year, all audit recommendations have been implemented. Detailed and timely exception reporting with managerial oversight.

Primary Accountability: Each Hiring Division, with support from the Strategic Corporate Services Division	available due to resignations, retirements, turnover, inability to hire, lack of skills, illness, etc., including the risk that misalignment of incentive structures with functions of the OFA may impede recruitment, promotion, innovation and staff initiative.	The likelihood is deemed **medium**. The issue has gained traction due to the disparity between pay scales in other agencies and pension funds compared to their OFA counterparts. As a result, overall, the pool of applicants to positions at the OFA has diminished over the past few years. Although most positions have adequate backup and succession planning, there are some areas within the OFA that are tightly staffed and some positions are highly specialized which creates vulnerability. In addition, compensation constraints have limited the ability to adequately replace staff externally at comparable experience and skill levels. An absence of financial incentives may also have impacted levels of staff engagement/initiative for existing staff (e.g. not taking promotions to management or not taking on special projects). The OFA makes extensive use of information technology as an offset to staffing constraints created by the increased scope and complexity of its activities.	The impact is deemed **extremely high** resulting in an overall high risk assessment.		Board and Human Resources and Governance Committee, provide support and training, where feasible provide competitive salary and benefits, foster a good and efficient working environment and a culture that recognizes and rewards performance, set out performance plans and monitor, recognize and value achievements, good communications and teamwork, and implement employee engagement strategies. Where possible, offer results-based pay for performance, including a competitive, market-based salary and a comprehensive and flexible benefits package. Maintain unique compensation structure for A/XOFA positions. The OPS is now conducting employee engagement surveys on an annual basis which will enable the OFA to track changes in employee engagement levels and better align responses and initiatives with results in the shorter term. The OFA is also undertaking a review of its organizational culture to ensure it continues to align with the OFA's values and corporate objectives as the OFA's mandate continues to increase in complexity and volume. The implementation of the new long-term compensation strategy for OPS non-bargaining specialists, managers and executives implemented in November 2017 is expected to help mitigate human resource risk. Among the changes were: adjusting base salaries and salary ranges for managers and non-bargaining staff and lifting the freeze on movement within them; providing

Risk Element or Classification	Identification of Risk / Risk Description	Likelihood and Rationale	Impact and Rationale	Overall Assessment of Risk Element	Mitigation Strategy
					equivalent increases to those negotiated by bargaining agents on a go-forward basis; streamlining the compensation structure for executives (EXE) to ensure that salaries target the market median of similar jurisdictions and public sector comparators: reinstating merit pay based on performance for non-bargaining specialists and managers; and, the introduction of a modern job evaluation system for the management compensation plan including a separate managerial stream intended to reduce salary range compression and inversion between managers and staff reporting to them by restoring a five percent differential in salary. Furthermore, this compensation strategy allowed for compensation revisions to the FMCG class (A/XOFA). These latter changes were approved by the Board in April 2017 to help in restoring competitive compensation with Broader Public Sector comparators. It is too early to tell whether these changes are sufficient to reverse the recent trend of disappointing responses to positions advertised externally and an inability to attract qualified candidates for positions in the A/XOFA classification and others including those requiring accounting designations and specialized formal education in financial engineering and information technology or investment and corporate finance experience.

Risk Category: INFORMATION TECHNOLOGY & INFRASTRUCTURE **RISK AREA:** Information and Information Technology (I & IT): The risk that information produced or used (e.g., performance data) is incomplete, out-of-date, inaccurate, irrelevant or inadequately protected from inappropriate disclosure. Risk that information or other technology (e.g., architecture, hardware, software) does not support business requirements, and/or does not support availability, access, integrity, relevance and security of data. Includes business continuity risk. Risk related to information or technology (e.g. upgrading or replacing of IT systems, etc.) Should include privacy and security risks.					
Privacy and security Primary Accountability: Strategic Corporate Services Division	Risk related to the OFA's handling of sensitive/ confidential information on behalf of the government. Potential compromise of confidential information or personal data through identity theft, or unauthorized electronic or physical access of information.	LOW The risk is considered **low**, as management ensures that staff are cognizant of the importance of information security.	MEDIUM The impact is deemed medium, resulting in an overall low risk assessment.	LOW	**Personal Information Privacy:** The OFA is a designated institution under *Freedom of Information and Protection of Privacy Act* (FIPPA). All OFA staff are provided with FIPPA training within 6 months of starting employment and must take FIPPA training annually thereafter. Employees are prompted through the OFA's Policy Management System (PPM) to review their obligations and must answer questions prior to confirming they have understood and agreed to comply. The OFA has a Privacy Breach Protocol in place in the event that a breach is identified under FIPPA. This Protocol is managed by the Legal Branch. All HR related information and systems containing Personal Information, as defined under FIPPA, are scheduled to be amalgamated into one system by fiscal year 2020–21, with updated restrictions and selective access to users. The new amalgamated system is still in its design phase but will incorporate role-based access for authentication and authorization, to ensure the highest level of privacy protection of personal information. A privacy impact assessment will be conducted, if required.

					An Information Management initiative is currently underway at the OFA. It aims to reduce the costs and risks associated with information and data handling by maturing the OFA's current information governance and establishing effective Records and Information Management (RIM) practices aligned to Business Unit (BU) priorities. These practices will be based on IM best practices, but require a significant effort of time and energy to identify and remediate 20+ years of ad-hoc electronic data handling. The process the OFA has embarked on is an iterative 3-year cycle of identification and remediation of data. The initial discovery and assessment phases for SCSD and Legal Service Branch has begun in Q3 of fiscal year 2017–18, and is expected to expand to the rest of the OFA in fiscal year 2018–19. The SCSD is targeting Q4 of fiscal year 2020–21 to complete the remediation of key data identified in the assessment.
					Security: All staff and fee-for-service contract workers must complete security clearance and background checks in order to be granted access to all key applications and systems within the organization in accordance with the *Contractor Security Screening Operating Policy*. The OPS I&IT Directive does not apply to the OFA. The OFA has its own I&IT policies that meet or exceed the OPS Directive. The OFA measures its I&IT standards against established industry benchmarks and best practices.

					Access to all electronic data and systems requires authentication which is managed through the OFA Identity and Access Management System (IAM) in alignment with the *OFA IT Access Control Policy*. The IAM system controls authentication and authorization. Role-based access controls are setup according to the 'business owner's' level of specified granularity, and the ability to directly review, assign and revoke access is granted to the owner via Systems Access Manager. Security of electronic information is continually assessed through third party security assessments on infrastructure from external vendors (Penetration Testing and Vulnerability Assessments) are conducted annually. Security of hard copy information is provided by enterprise IT perimeter security solutions, key card locked main doors, safes, and security cameras. Physical security audits are conducted on a 3-year cycle, with 5 years allowed to remediate given fiscal constraints on leasehold improvements. Yearly audits by the Ontario Internal Audit Division (OIAD) are completed on treasury systems, and periodically include reviews of the IT security and access control mechanisms. Recommendations arising from such audits are actioned and report backs are provided to OIAD. ARMC receives quarterly reports from OIAD on all audit findings.

					All audit materials and security reviews are stored in a centralized repository that informs the technology roadmap and guides policy development decisions. The OFA currently has an *Incident Response Policy and Procedures* document from 2008. This document is being re-developed to include a Data Incident Response Plan, further establishing a framework and protocols for action and communication during an event. It is anticipated that development of the Plan will include active representation and membership across the organization, and is scheduled to be completed by Q4 of fiscal year 2018–19. Regular security policy compliance monitoring and reporting is managed through PPM. This ensures staff are reminded about their requirement to read and verify compliance of all security policies in a timely fashion. **Confidentiality:** The *Public Service Ontario Act, 2006* and related *Conflict of Interest Regulation* require OFA employees, as public servants, not to disclose or use information obtained in the course of their duties. The OFA also has a *Conflict of Interest Policy* which is communicated to staff through PPM annually. Business continuity Primary Accountability: Strategic Corporate Services Division	Risk that the processes in place to ensure that critical I&IT systems are not available for operation to support business requirements (disaster recovery & business continuity planning)	LOW The risk is considered **low**, as the OFA has a comprehensive Business Continuity Plan (BCP) which is regularly tested.	HIGH The consequences for the OFA not being able to carry out its business, even for one day, would be severe, therefore its impact is deemed **high.** As a result, the OFA maintains a twin of its IT infrastructure in a separate disaster recovery location (DR Site), which reduces the overall assessed risk to medium.	MEDIUM	As part of the OFA BCP, Strategic Corporate Services Division (SCSD) ensures that all critical systems, information and IT infrastructure are highly available and replicated to the OFA's DR Site. Critical production systems are routinely run out of the DR Site in order to verify the system operates properly in the BCP environment. Furthermore, SCSD maintains the technical infrastructure to support the OFA decentralized recovery plan. This includes mobile devices and remote access services. Periodic drills are held to ensure that staff are able to use the OFA's BCP infrastructure in a productive manner.
Procurement Primary Accountability: Strategic Corporate Services Division	The direct impact of delays to any procurement activity are twofold: Financial risks, as this directly impacts the budgeting cycle within the organization and also results in higher service delivery and resource costs of the legal and procurement teams, respectively.	MEDIUM The likelihood is deemed **medium.** The OFA operates within the government procurement framework, adapted to its own unique requirements. The requirement to adhere to complex public sector procurement rules, as set out in the OFA's Procurement Policy has the potential of slowing down urgently needed IT infrastructure, creating a degree of risk. Some	MEDIUM The impact is deemed **medium,** resulting in a medium overall risk assessment	MEDIUM	Standardized approval forms and RFX (Request for Information, Proposal or Quotation) precedent templates streamline the procurement process. Establishing Service Level Agreements within the organization to ensure consistent timelines for document review and approvals will help ensure project deadlines are achieved. A dedicated office supports the goal of increased consistency and

In some circumstances, CEO approval of an exemption or a different process may be requested, if available.

Economic Conditions

The economic outlook for Ontario described below is based on the average private sector view as of January 2018. As with all projections, there are positive and negative risks to the outlook. The most significant immediate risks to the outlook are rising interest rates and uncertainty regarding future U.S. economic policy. For business planning purposes, the OFA recognizes that it may confront increased demands to provide financing and other services.

Ontario's economy is expected to continue to grow at a solid pace. Ontario real GDP increased 2.6 per cent in 2016. Private-sector forecasters, on average, estimate Ontario real GDP grew by 2.9 per cent in 2017, and expect growth of 2.2 per cent in 2018, 2.0 per cent in 2019 and 2.1 per cent in 2020. The economic outlook is influenced by external factors, such as U.S. economic growth, oil prices and the Canadian dollar. An advancing U.S. and global economy combined with low oil prices and a competitive Canadian dollar continues to support Ontario's economic growth. Over the forecast period, rising interests are expected to shift economic growth from interest-rate-sensitive sectors, such as household consumption and housing, which have led activity in recent years. Trade is expected to be an important contributor to growth, as Ontario's exports are projected to rise on average by 2.1 per cent annually over the 2018–20 period. Solid demand prospects will also continue to encourage businesses to invest over the projection period, as firms adopt new technologies, produce more innovative goods and services, and expand into new trade markets. However, uncertainties surrounding U.S. trade policies pose downside risks to Ontario's growth forecast.

The United States is Ontario's largest trading partner, accounting for approximately 80 per cent of the Province's international merchandise exports in 2016. Economic growth in the U.S. slowed to 1.5 per cent in 2016 following a strong 2.9 per cent in 2015. According to the January 2018 Blue Chip consensus outlook, the U.S. economy is estimated to have grown by 2.3 per cent in 2017, and is expected to grow by 2.7 per cent in 2018 and 2.4 per cent in 2019.

The price of WTI (West Texas Intermediate) crude oil fell by over 70 per cent from its June 2014 peak of $108 US per barrel to below $30 US per barrel in early 2016, a reflection of strong supply and weaker global demand. WTI oil prices have since risen to an average $51 US per barrel in 2017, up from $43 US per barrel in 2016. The current private-sector forecast average for the WTI price of oil is $54 US in 2018, well below levels recorded over the 2010-14 period.

Sharply lower oil prices and diverging monetary policy between Canada and the United States contributed to a depreciation of the Canadian dollar to an average of 78.2 cents US in 2015. The Canadian dollar declined further in 2016, averaging 75.4 cents US before climbing up to an average 77.5 cents US in 2017. Private-sector forecasters expect the Canadian dollar will average 78.8 cents US in 2018.

Ontario's resale housing market advanced rapidly over the 2015-16 period and into early 2017, supported by low borrowing rates, rising employment, income gains and growth in the number of households. Housing market activity has cooled following the introduction of the Fair Housing Plan. Sales of existing homes dropped by 9.5 per cent while resale prices rose by 9.7 per cent in 2017. Ontario housing starts also increased in 2017. Over the next few years housing market activity is expected to remain moderate as gradually rising interest rates, historically high valuations and mortgage debt are expected to temper healthy demographic-related demand.

There are risks surrounding the housing market outlook. Home price gains in Ontario have outstripped incomes in recent years, fuelling mortgage debt accumulation. As a result, affordability in Ontario's housing market has eroded. Despite historically low mortgage rates, monthly carrying costs are elevated

relative to long-term trends. High levels of debt combined with elevated resale prices leave Ontario households potentially vulnerable in the event of an adverse economic shock.

Financial Markets

The Bank of Canada has raised the overnight rate target since last summer, first to 0.75 per cent in July 2017, to 1 per cent in September 2017 and again to 1.25 per cent in January 2017. The decision was largely driven by a strong Canadian economy in 2017 fuelled by stronger-than-expected consumption and residential investment, reflecting solid employment growth. The Bank of Canada also noted stronger-than-expected global growth but cautioned the uncertainty surrounding the future of NAFTA. On average, private-sector economists expect further rate hikes in 2018.

In the United States, the Federal Reserve raised rates three times throughout 2017, citing a continuously strengthening labour market and solid economic growth. It is expected that the Fed will continue to raise rates, though at a gradual pace. On the other hand, monetary policy in the European Union continues to remain accommodative. In December 2017, the European Central Bank (ECB) announced that interest rates will remain unchanged and are expected to stay "at present or lower levels for an extended period of time, and well past the horizon of the net asset purchases." The ECB also plans to continue its asset purchase program until at least September of 2018, albeit at a lower monthly pace than in 2017.

In Canada, long-term interest rates have remained at historically low levels for several years but have risen in recent months. Long-term interest rates are projected to gradually rise over the next few years but still remain low compared to the long-term historical average.

According to private-sector forecasters, the Canadian three-month Treasury bill rate is expected to rise gradually from an average of 0.7 per cent in 2017 to 1.4 per cent in 2018, and 2.1 per cent in 2019. According to the January 2018 Blue Chip consensus outlook, the three-month U.S. Treasury bill rate is expected to average 1.8 per cent in 2018, before rising to 2.4 per cent in 2019.

The 10-year Government of Canada bond rate averaged 1.8 per cent in 2017. According to private-sector forecasters, the 10-year Government of Canada bond rate is projected to rise, averaging 2.4 per cent in 2018 and 3.0 per cent in 2019. According to the Blue Chip consensus outlook, the yield on 10-year U.S. government notes is expected to average 2.7 per cent in 2018 and 3.2 per cent in 2019, up from 2.4 per cent in 2017.

Government Initiatives

Government policy implementation and developments, including price mitigation measures, and financial performance in Ontario's electricity sector, including OPG, Hydro One and municipal electricity utilities, may affect borrowing requirements through the cash flows to the Province and OEFC.

The OFA will continue to monitor the Green Bond market to identify future issuance opportunities under its Green Bond Program. The OFA will provide policy analysis and advice on the Trillium Trust, to dedicate net revenue gains from qualifying asset sales to help support public transit, transportation, and other priority infrastructure investments across Ontario. The OFA will also provide financial support to the Ministry of Environment and Climate Change in respect of the government’s Cap and Trade program, as well as in the establishment of a Greenhouse Gas Reduction Account and a climate change agency. In addition, the OFA will continue to provide loans to public bodies in support of government initiatives such as the new Ontario Cannabis Retail Corporation and greenhouse gas reduction initiatives implemented by colleges and universities.

The OFA will also provide financial analysis and advice in support of the Province's commitment to unlock the value of designated assets, and will continue to work with Infrastructure Ontario and other areas of government on optimizing certain holdings in the Province's real estate portfolio, in particular, the sale of the Seaton lands.

Regulatory Compliance

The OFA will ensure that information required to be disclosed by the Province in its debt securities offerings related documents, periodic published reports (including the Ontario Budget, the quarterly finances, the Public Accounts of the Province of Ontario and the annual fall Economic Outlook and Fiscal Review) and other disclosures filed or submitted under applicable securities legislation, rules and regulations in the United States, the United Kingdom, Luxembourg, Australia, Switzerland and Singapore is filed on time and otherwise in accordance with those requirements. Regulatory requirements will be monitored continually to ensure the Province has ongoing access to these markets.

PERFORMANCE MEASURES

1. Execute the Province's borrowing program

Objective	Performance Measure	Target
a. Complete the borrowing program while ensuring that the Province always has adequate liquidity.	Sufficient liquidity on hand at all times to ensure the Province can meet its financial obligations. Ensure borrowing is completed with minimal negative impact on the Province's reputation in the financial markets.	Borrowing program completed and cash requirements met on a timely basis.
b. Manage the borrowing program in a sound and cost-effective manner.	The performance measurement of the timing of the long-term fixed-rate borrowing program is expressed as a percentile ranking of the all-in borrowing cost against a statistical distribution of benchmark interest rates observed throughout the year. Other debt management activities such as buy-backs are also incorporated in this measurement.	Achieve a percentile ranking of 45 to 55 for regular borrowings and 50 to 75 for strategic foreign borrowings. All results are validated by the OIAD.
c. Ontario Savings Bonds (OSB) Program	Fund borrowing requirements at cost-effective rates for a broadly based retail program which allows individual investors in Ontario to participate in providing funding to the Province. OSBs reduce other borrowing requirements which, in turn, reduces pressure on new issue spreads.	Ensure the program is cost-effective in the context of a retail borrowing program. Maintain and review Service Level Agreement between OFA and Fiscal Agent on an annual basis.

2. Manage the Province's debt, investments, ONFA and financial risk, and contribute to the development of the Province's fiscal plan and outlook

Objective	Performance Measure	Target
a. Preservation of capital on money market investments. Manage liquid reserves in a sound and cost-effective manner.	Credit losses on liquid reserves and investment portfolio of funds managed for other government bodies. The investment return on the portion of liquid reserves invested in Government of Canada Treasury bills and similar riskless instruments compared to an average 61-day portfolio benchmark. This benchmarking process is consistent with private sector industry practice. Maintain liquid reserve levels within a pre-determined range (as set out in the Financing and Debt Management Plan) and provide an explanation to the Board of any deviations from that range.	No credit losses on any investments. Generate actual returns that are within ±2 basis points of the 61-day benchmark portfolio. Results are validated by the OIAD.
b. With OPG, prudently manage the Used Fuel and Decommissioning Segregated Funds' investments.	Ensure investment management is consistent with ONFA objectives.	Manage, monitor, and analyze the performance of the funds and the performance of investment managers. Continue refinement of investment strategies, risk management, policies and procedures. Meet the real return objective of 3.25 per cent, and exceed the market benchmark over the life of the funds.
c. Prudently manage funds for government bodies through the centralized/ segregated fund initiative.	Reduce investment costs. Ensure public bodies' funds are managed consistently with investment industry best practices.	Establish and continue to efficiently manage segregated funds with government public bodies that meet client requirements.

Objective	Performance Measure	Target
d. Minimize financial risk by ensuring risk exposures and program losses remain within approved exposure and loss limits.	Foreign exchange exposure. Net interest rate resetting exposure. IOD losses as a percent of budgeted IOD. Credit exposures relative to approved policy limits.	Foreign exchange exposure not to be above five per cent of total debt. The 2017–18 Financing, Debt and Electricity Management Plan had an approved range of 0 per cent to 2.5 per cent in Foreign Exchange Exposure. Currently, the exposure of 0.2 per cent of debt. The 2018–19 Financing, Debt and Electricity Management Plan will have a recommended range subject to Board of Directors approval later in the year. Net interest rate resetting exposure not to be above 35 per cent of total debt. The 2017–18 Financing, Debt and Electricity Management Plan had an approved range of 11.4 per cent to 15.4 per cent in Ontario's Gross Floating Rate exposure, with a target of 13.4 per cent. Interest Rate Resetting Exposure is expected to be 12.9 per cent as of March 31, 2018, with an expected range of 10.9 per cent to 13.9 per cent. A new range and target for Floating Rate and Interest Rate Resetting Exposure will be approved in the 2018–19 Financing, Debt and Electricity Management Plan. IOD losses not to exceed three per cent of budgeted IOD. Credit exposures to be kept within approved policy limits.
e. Use risk control policies to ensure programs are managed in a prudent and cost-effective manner.	Risk management policies are kept current with industry best practices. Exposure limits established in the policies are reasonable and prudent. Exposures are monitored and reported in a timely and accurate manner.	Policies for market risk, credit risk, use of derivatives and other financial instruments and risk management reporting are to be reviewed annually, and amendments or decisions not to amend are to be approved by the Board of Directors. Review limits on net interest rate resetting, foreign exchange and

		credit exposures, and credit concentration. Calculate and report exposures daily. Perform monthly stress testing on the Province's market and credit exposures.
f. Measure and report performance of the Province's borrowing, debt management, and investment programs.	Timeliness and accuracy of performance measurement and reporting.	Report on borrowing and debt management performance daily, and on the money market program performance monthly.
g. Evaluate the potential impact of stressed capital market conditions on OFA programs and IOD.	Conduct stress tests of the credit exposures, and IOD, and report the results as described in the risk management policies.	Stress testing is performed and reported on a monthly basis as described in the risk management policies.
h. Forecast IOD for the Province and the OEFC.	Forecasts for the current year and medium-term are provided for the Budget, Fall Statement and quarterly finances.	IOD forecasts for the current year and medium-term to be provided monthly and updated for the Budget, Fall Statement and quarterly finances in a timely manner.
i. Assess the credit quality of municipalities and other approved entities applying for Infrastructure Ontario loans and provide credit risk advice to the Credit Review Committee (CRC)	Review loan applications and analyze reports. Attend CRC meetings to provide advice and vote on each application.	Provide an advisory role at Infrastructure Ontario's CRC meetings.

implications of government initiatives.		Provide the Borrowing and Debt Management chapter in the Budget and Fall Statement; and update Ontario's Financing Program in Ontario Finances (quarterly).

3. Manage key financial relationships

Objective	Performance Measure	Target
a. Manage Ontario's relationships with domestic and international investors.	Maintain dialogues with investors, investment dealers and the international investment community by providing timely financial updates, including investor publications and securities filing documents.	Continue to monitor fixed income markets, economic conditions, and investors' interests and requirements to ensure road shows are effective for both the Province and its investors. Investor Relations to continue to track meeting activity with investors. Program benchmarks to include number of meetings with new accounts, effectiveness of communications material and website usage. Provide IR information products, including updates to the OFA website, on a timely basis. Meet ongoing disclosure and regulatory filing requirements with the SEC, UKLA, LuxSE, ASX, SIX Exchange Regulation and the SGX. Provide panelists or speakers at domestic and international industry conferences.
b. Manage Ontario's relationships with the credit rating agencies. Hi Lisa and Salman,

I note that IESO made the following for the term of the credit facility request in their attached letter:

> o 5 year term - to align with the FHP's initial period of deferral of electricity prices plus a contingency period (i.e. to September 30, 2022);

I think that an the actual date should be referenced in the OIC, since they are asking for slightly in excess of a 5 year period.

I think we would usually want to run the draft directive by Patrick as LSB as well?

Thanks,
Sarah

Hi Lisa,

I've made some changes to the directive, some based on our discussion and some based on an example of another directive I found for a line of credit (see pdf attached, albeit between OEFC and IESO). You'll see that there are still some questions to confirm, so we can leave those comments in.

If you can take a look at the drafting and if you're okay with it (feel free to make additional changes), I will clean it up and circulate to CMD/senior management for another review and to gauge some feedback on the remaining questions.

Accordingly, I can drop by any time today to discuss further.

Thank you again,
Salman

Commented [SQ26R5]: This will be subject to how the agreement is set up. Will need to speak with Carlos.

As of now, IESO is requesting that advances be allowed for as minimum as 7-days. There is no equivalent rate for a 7-day borrowing. Initial conversations with CMD suggested we simply do "if advance less than 30 days, use 30-day t-bill" – or similarly, since advances are expected to be no more than 95 days, simply use 90-day t-bill rate for all advances.

Commented [SQ27]: OIC expires on December 31, 2047. However, changing this date to match IESO request, so suggesting for this to state "5-year after date of corresponding credit agreement.

Commented [LS8]: IESO is requesting 5 year term. New directive after 5 years?

Pursuant to Orders in Council ###/##, made under subsection 22(1) of the *Capital Investment Plan Act, 1993,* the Minister of Finance is authorized to make loans to the OFA and to determine the amount of the spread to be retained by the OFA where those funds are subsequently loaned to public bodies. It is hereby determined that for the Loan made under the authority of this Directive, the amount of the spread retained by the OFA shall be equal totwenty-five (25) basis points.

Commented [LS9]: For further discussion.

Commented [SQ210]: For senior management:

Should the spread be retained like most other loan agreements? Or should we remit this back to Province.

Re: **IESO Credit Requirements for the 2017 Fair Hydro Plan**

Dear Mr. Mayman,

As you are aware the Ontario government has announced its intension to implement the proposed Fair Hydro Plan (FHP) to reduce electricity prices for eligible consumers in the province. Proposed legislation was introduced this month for the FHP. The Independent Electricity System Operator (IESO) is preparing to implement the FHP and has determined that in order to support the IESO's role in FHP implementation it will need greater credit liquidity than currently exists.

An existing credit facility between the IESO and the Ontario Financing Authority (OFA) is currently available for $975 million which includes support for the current Regulated Price Plan (RPP) program. The IESO proposes that a separate and additional credit facility be provided by either the OFA or Ontario Electricity Financial Corporation (OEFC) to support only the FHP credit needs. A separate facility for the FHP is preferable to ensure operational efficiency and interest tracking.

IESO's FHP Credit Requirements and Rationale

Below we have outlined the IESO's expected credit needs including the current OFA facility as follows:

	OFA:IESO Facility	New FHP facility
Current credit facilities	$975 million	$ -
Reduction due to FHP	($500 million)	$ -
Increase due to FHP	$ -	$2,000 million
Totals Credit Facilities	$475 million	$2,000 million

The above $500 million reduction in the current OFA facility is to eliminate duplicate credit needs and reflect the replacement of the current RPP by the new FHP. In addition, the IESO has had recent discussions with OFA staff to explain the rationale to support the overall $2,000 million FHP commitment.

We suggest the new FHP credit facility consider the following key provisions:

- 5 year term - to align with the FHP's initial period of deferral of electricity prices plus a contingency period (i.e. to September 30, 2022);
- interest charge - to be Province's cost of funds for borrowing with a similar term as determined by OFA / OEFC plus 0.25 percent per annum;
- Draws - to be based on minimum of 7 days to a maximum of 95 days, to minimize interest costs and permit efficient FHP asset transfers; and
- Existing $975 million OFA facility : draws to permit for FHP purposes until a new separate credit agreement for FHP purposes has been made available;

Upon your reply to this letter, the IESO will seek any necessary IESO Board of Directors' approval for the above credit facilities and we will provide such evidence for your records.

We appreciate your continued support and look forward to working with you. Please contact me should you need anything further.

Sincerely,

Kimberly Marshall

Hi Lisa,

I've made some changes to the directive, some based on our discussion and some based on an example of another directive I found for a line of credit (see pdf attached, albeit between OEFC and IESO). You'll see that there are still some questions to confirm, so we can leave those comments in.

If you can take a look at the drafting and if you're okay with it (feel free to make additional changes), I will clean it up and circulate to CMD/senior management for another review and to gauge some feedback on the remaining questions.

Accordingly, I can drop by any time today to discuss further.

Thank you again,

DIRECTIVE AND DETERMINATION
MINISTER OF FINANCE
INDEPENDENT ELECTRICITY SYSTEM OPERATOR CREDIT FACILITY

To: Ontario Financing Authority ("OFA")

~~**WHEREAS**~~**Whereas**:

The *Ontario Fair Hydro Plan Act, 2017* received Royal Assent on June 1, 2017 which will require the participation of the Independent Electricity System Operator ("IESO").

The IESO has requested financing to fund short to medium term funding shortfalls that the IESO may incur as a result of the *Ontario Fair Hydro Plan Act, 2017*.

~~**WHEREAS: [IESO has requsted funding…..]**~~

Therefore:

Pursuant to subsection 16(2) of the *Capital Investment Plan Act, 1993*, the OFA is directed to ~~provide a~~lend ~~revolving credit facility~~ to the ~~Independent Electricity System Operator ("IESO")~~IESO under a revolving credit facility (the "Line of Credit") in an aggregate ~~total~~ principal amount of up to CAD $2,000,000,000.00 ~~(the "Loan")~~.

The following terms and conditions shall apply in respect of the ~~Loan~~Line of Credit:

1. The ~~Loan~~ Line of Credit shall be made for the purpose of providing IESO financing of short to medium term funding shortfalls in the implementation of , and its participation in,the *Ontario Fair Hydro Plan Act, 2017.*

   A ~~Loan~~ Line of Credit to IESO will only be made at the request and on the recommendation of the Minister of Energy.

Commented [SQ26R5]: This will be subject to how the agreement is set up. Will need to speak with Carlos.

As of now, IESO is requesting that advances be allowed for as minimum as 7-days. There is no equivalent rate for a 7-day borrowing. Initial conversations with CMD suggested we simply do "if advance less than 30 days, use 30-day t-bill" – or similarly, since advances are expected to be no more than 95 days, simply use 90-day t-bill rate for all advances.

Commented [SQ27]: OIC expires on December 31, 2047. However, changing this date to match IESO request, so suggesting for this to state "5-year after date of corresponding credit agreement.

Commented [LS8]: IESO is requesting 5 year term. New directive after 5 years?

Pursuant to Orders in Council ###/##, made under subsection 22(1) of the *Capital Investment Plan Act, 1993,* the Minister of Finance is authorized to make loans to the OFA and to determine the amount of the spread to be retained by the OFA where those funds are subsequently loaned to public bodies. It is hereby determined that for the Loan made under the authority of this Directive, the amount of the spread retained by the OFA shall be equal totwenty-five (25) basis points.

Commented [LS9]: For further discussion.

Commented [SQ210]: For senior management:

Should the spread be retained like most other loan agreements? Or should we remit this back to Province.

Hi Lisa,

Sarah's group is working on the agreement and the terms of the agreement, at a high level, are what were included in IESO's request letter, which the OFA appears to have agreed to.

I think the directive covers the key terms of the request which were in the request letter from IESO and anything further will be subject to any negotiation between OFA and IESO. If a specific term is in the directive language is causing an issue, we could leave it out?

It may look like a lot of track changes, but most of them are just moving things around.

I just don't want the directive to be similar to the term sheet since the term sheet may change if need be and the directive still needs flexibility for any negotiation that may need to occur.

Happy to share it with MOF legal as is as well.

Regards,
Salman

In my view it would be prudent to develop a term sheet prior to finalizing the draft directive as it is

currently missing details. Is this a possibility? Once I receive a term sheet I will create a new draft of the directive.

ONTARIO FINANCING AUTHORITY

MANAGEMENT SUMMARY OF FINANCIAL RESULTS

For the year ended March 31, 2017

REVENUE

Total Revenue increased by $0.4 million, from $27.2 million in March 31, 2016 to $27.6 million for the year ended March 31, 2017.

This is largely due to:

- an increase of $0.1 M ($4.8M vs. $4.7M) in cost recovery from the Province as a result of higher operating expenses ($23.9M vs. $23.8 M)
- an increase of $0.3M in additional interest revenue ($3.7M vs $3.4) due to an increase in partial retention of interest rate spread on higher loans to colleges and corporations ($522.3M vs. $350.5M) and a higher interest income earned on higher bank balances ($ 21.7M vs $18.4 M).

EXPENSES

Year-over-year comparison of total expenses for the year ended March 31, 2017 revealed that expenses increased by $0.1 million ($23.9 M, to $23.8M).

The increase in the actual expenses is mainly attributable to:

- an increase in salaries and benefits by $0.2 M ($19.3M vs. $19.1M) primarily due to salary increases for staff offset by delays in filling vacancies as well as staff on parental leave replaced by lower cost contract staff

Partly off-set by,

- Lower administrative and general expenses of $0.1M ($3.8M vs. $3.9M) due to lower rental expenses related to prior year-end adjustment for operating and maintenance expenses ($1.8M vs. $1.9M).

Summary of Financial Results

The Ontario Financing Authority (OFA) manages the Province's debt, interest on debt, and investment of liquid reserves, and recovers the cost of these services from the Province. The OFA also provides financial services to Crown agencies and other public bodies and these costs are recovered on a fee-for-service basis.

The outstanding balance of the loans to public bodies at March 31, 2017 was $6,003.5 million, a net increase of $31.1 million from $5,972.4 million in March 2016 (Note 5). The table below summarizes these changes:

(in thousands of dollars)

Borrower	March 31, 2017	March 31, 2016	Change

University of Ontario Institute of Technology	5,501	10,611	(5,110)
			31,148

The OFA continued to provide investment management services to other public bodies in managing aggregate investment amount of $1,904 million (2016 – $2,733 million) (Note 6).

The OFA recovered operating costs from agencies and related parties amounting to $4.8 million for the year ended March 31, 2017 (2016 – $4.8 million) (Note 6). The OFA's annual surplus for the year amounted to $3.7 million (2016 – $3.4 million) from the retention of the interest rate spread on loans to public bodies.

Prudent financial management on the part of the OFA ensured that actual expenditures continued to be below the budget resulting in cost recoveries from the Province that were $3.0 million lower than the budgeted amount. Interest revenue was $0.7 million greater than the budget contributing to an equal increase in the annual surplus.

ONTARIO FINANCING AUTHORITY

Notes to Financial Statements

For the year ended March 31, 2017

BACKGROUND

The Ontario Financing Authority (the "OFA") was established as an agency, of the Crown, on November 15, 1993, by the *Capital Investment Plan Act, 1993* (the "Act"). In accordance with the Act, the OFA:

- conducts borrowing, investment and financial risk management for the Province of Ontario ("the Province");
- manages the Provincial debt;
- provides centralized financial services for the Province including banking and cash management;
- advises ministries, Crown agencies and other public bodies on financial policies and projects;
- assists Crown agencies and other public bodies to borrow and invest money;
- acts at the direction of the Province in lending to certain public bodies;
- invests on behalf of some public bodies;
- with Ontario Power Generation Inc. (OPG), manages the investment activities of OPG's Used Fuel Segregated Fund and Decommissioning Segregated Fund; and
- carries out the day-to-day operations of Ontario Electricity Financial Corporation (OEFC) and provides a broad range of financial services to Ontario Infrastructure and Lands Corporation (Infrastructure Ontario).

In addition, the OFA's objects include:

- providing such other financial services as are considered advantageous to the Province or any public body; and
- any additional objects as directed by the Lieutenant Governor in Council.

The OFA is a corporation established under the laws of Ontario. The OFA is exempt from federal and provincial income taxes under paragraph 149(1)(d) of the *Income Tax Act* (Canada).

1. SIGNIFICANT ACCOUNTING POLICIES

(a) Basis of Accounting: These financial statements are prepared by management in accordance with Canadian Public Sector Accounting Standards for provincial reporting entities established by the Canadian Public Sector Accounting Board.

(b) Tangible capital assets: Tangible capital assets are stated at cost. Amortization is provided using the straight-line method over the estimated useful life of the asset, as listed below.

Furniture and equipment	5 years
Computer hardware	3 years
Leasehold improvements	Term of lease

Funding received from the Province for the acquisition of tangible capital assets is recorded as deferred revenue and amortized to cost recovery on the same basis as the tangible capital assets.

(c) Measurement uncertainty: The preparation of financial statements in accordance with Canadian public sector accounting standards requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Items requiring the use of significant estimates include: useful life of tangible capital assets, accruals and the accrued benefit obligation. Estimates are based on the best information available at the time of preparation of the financial statements and are reviewed annually to reflect new information as it becomes available. Measurement uncertainty exists in these financial statements. Actual results could differ from these estimates.

(d) Accounts Payable and Accrued Liabilities: Accounts payable relate to normal business transactions with third-party vendors and are subject to standard commercial terms. Accrued liabilities relate to accruals for salaries and benefits.

(**e) Revenue and Expenses**: OFA is funded from the Consolidated Revenue Fund (CRF) as part of Treasury Program. OFA can charge fees subject to statutory and regulatory authority and it earns revenues from public bodies outside of the CRF; the OFA retains revenues earned from the interest rate spread on its loans to public bodies.

(f) Financial Instruments: The OFA's financial assets and liabilities are accounted for as follows:

- Cash is subject to an insignificant risk of change in value so carrying value approximates fair value;

- Accounts receivable, Due from Agencies & related parties, Due from the Province of Ontario, accounts payable, Due to the Province of Ontario and Deferred Revenue are recorded at cost; and

- Accrued employee benefits obligation is recorded at cost on the entitlements earned by employees up to March 31, 2017 (disclosed in note 8 b). A fair value estimate based on actuarial assumptions about when these benefits will actually be paid has not been made, as it is not expected that there would be a significant difference from the recorded amount.

The OFA does not use derivative financial instruments on its own behalf.

3. DEFERRED REVENUE

Deferred revenue represents the unamortized portion of the cost recovered from the Province for the acquisition of tangible capital assets as well as prepaid expenses to be allocated over the period the resources are consumed.

(in thousands of dollars)

	Tangible Capital Assets	Prepaid Expenses	Total
Balance, beginning of year	$ 1,201	$ 350	$ 1,551

Amortization of $831,000 represents the offset to the contributions received for the purchase of tangible capital assets. The $590,000 expensed represents the amount allocated to the current year expenses from the prepaid expenses.

4. DEBT AND INVESTMENT MANAGEMENT FOR THE PROVINCE

The OFA manages debt on behalf of the Province amounting to $332.4 billion, as at March 31, 2017 (2016 Actual–$327.4 billion) as per the interim projection published in the 2017 Annual Budget. The OFA also manages investments amounting to $44.4 billion as at March 31, 2017 (2016 – $47.0 billion), including $19.9 billion (2016-$18.6 billion) under the joint management of funds owned by Ontario Power Generation Inc. (OPG) under the *Ontario Nuclear Funds Agreement (ONFA)*. The Province, OPG and certain OPG subsidiaries entered into the agreement in March 2002 to set aside funds necessary to dispose of nuclear waste and used fuel and to decommission nuclear power stations. The agreement came into force on July 24, 2003.

Cost recovery from the Province for all debt management and investment activities for the year ended March 31, 2017 was $18.3 million (2016 – $18.3 million).

5. TRANSACTIONS WITH PUBLIC BODIES

The OFA provides financing to various public bodies on direction from the Province. As the OFA is directed by the Province to make these loans in furtherance of stated Provincial initiatives, and these loans are included in the Province's consolidated financial statements, these transactions are not reflected in these financial statements.

Funds for these loans are advanced to the OFA by the Province under credit facilities aggregating $16.9 billion expiring from 2036 to 2044. Principal repayments received from public bodies by the OFA are forwarded to the Province. The interest rates charged to public bodies is generally be slightly higher than the rate charged by the Province on the advances to fund the loans ("the spread").

The OFA will generally retain a portion of the spread in order to recover the administrative costs of managing these loans. The spread retained by the OFA includes a cost recovery component and, where applicable, a proxy commercial interest rate spread. The inclusion of the proxy commercial spread results in an interest rate equivalent to what would be charged on the loan by a commercial lender and reflects the relative risk associated with the loan. During the year ended March 31, 2017, $3.7 million in interest rate spread revenue was recognized (2016 – $3.4 million) of which $2.1 million is receivable at year end (2016 –$1.7 million).

As at March 31, 2017, the principal amounts receivable by the OFA on behalf of the Province represent long term and short term loans. Interest accrued on the outstanding loans listed below amounted to $93.9 million (2016 – $93.6 million), of which $92.7 million (2016 – $92.6 million) will be flowed to the Province.

These are related party transactions, with the exception of those with the Corporation of the City of Windsor and the University of Ontario Institute of Technology.

Interest continues to accrue over the five year deferral period. The outstanding amount includes capitalized interest of $8 million.

The Royal Ontario Museum (ROM) is a Crown agency of the Province under a Special Act of the Ontario Legislature and has borrowed $26.0 million (2016 – $30.1 million) bearing floating rate interest, currently set at 2.27 per cent. All outstanding loans are scheduled to be repaid by March 2027.

7. RISK MANAGEMENT AND FINANCIAL INSTRUMENTS

The main risks that the OFA's financial instruments are exposed to are credit risk, liquidity risk and market risk. These risks are limited to the financial instruments reflected on the statement of financial position and do not extend to the financing provided to various public bodies, disclosed in note 5 to the financial statements.

Credit risk

Credit risk is the risk that the counterparty to a financial instrument may fail to discharge an obligation or commitment into which it has entered. This risk is minimal as most of the receivables are from the Province of Ontario.

The risk of not collecting the receivables related to OEFC, OILC and others is also considered to be minimal.

Liquidity risk

Liquidity risk is the risk that the OFA will not be able to meet its cash flow obligations as they fall due. The OFA's exposure to liquidity risk is minimal as all operating and capital expenses are cost recovered primarily from the Province of Ontario.

Market risk

The market risk arises from the possibility that changes in market prices will affect the value of the financial instruments of the OFA. The OFA is not exposed to market risk.

8. FUTURE EMPLOYEE BENEFITS

(a) Pension Benefits

The OFA provides pension benefits to its full-time employees through participation in the Public Service Pension Plan (PSPP), which is a multi-employer defined benefit pension plan established by the Province of Ontario. The Ministry of Government and Consumer Services (MGCS) is responsible for funding the employer's contribution to the Pension Fund and accordingly, the OFA has no additional liability for these future costs. In addition, the cost of post-retirement, non-pension benefits is paid by MGCS and is not reported in these financial statements.

(b) Accrued Employee Benefits Obligation

The legislated severance entitlement upon retirement for the Association of Management, Administrative and Professional Crown Employees of Ontario (AMAPCEO), excluded employees, management-excluded employees and other Management employees who retire after January 1, 2016, will be paid based on the salary in effect on December 31, 2015.The legislated severance entitlement upon retirement for the Ontario Public Service Employee Union (OPSEU), excluded employees who retire after January 1, 2016, will be paid based on salary in effect on December 31, 2016.

For all other employees subject to terms set out in collective agreements who have completed five years of service, the OFA provides termination pay equal to one week's salary for each year of service up to a maximum of 50 percent of their annual salary.

The costs of these legislated severance entitlements earned by AMAPCEO and OPSEU, excluded employees, management excluded employees, management employees as at March 31, 2017 amounted to $3,918,000 (2016 – $4,076,000). In addition, the unused vacation entitlements earned by all employees as at March 31, 2017 amounted to $757,000 (2016 – $624,000). On an ongoing basis, MGCS is responsible for funding the legislated severance entitlements, as well as unused vacation entitlements and accordingly no additional expense or liability is reported in these financial statements.

9. COMMITMENTS AND CONTINGENCIES

Lease Commitment:

The OFA rents its premises under an operating lease which expires on June 30, 2017. The lease agreement has been extended for another 5 years and the minimum base rental payments for the lease are as follows:

(in thousands of dollars)

	March 31, 2017
2018	876
2019	893
2020	952
2021	972
2022	972
Total	**$4,665**

OFA is committed to pay its proportionate share of realty taxes and operating expenses for the premises for the year ended March 31, 2017, which amounted to $999,900 (2016– $1,133,000).

Committed Credit Facilities:

At the direction of the Province, the OFA has committed to finance a number of public bodies for which funds have not yet been advanced. The details are as follows:

The Deposit Insurance Corporation of Ontario (DICO) was provided a maximum $400 million revolving credit facility to ensure DICO's capacity to address systematic difficulties in the credit union system or the failure of large institutions that require resources above those in the Deposit Insurance Reserve Fund (DIRF) which is currently valued at approximately $232.7 million. All principal and interest is required to be repaid by December 31, 2029. As of March 31, 2017, DICO had not utilized this credit facility.

The Ontario Infrastructure and Lands Corporation (OILC) is a Crown agency of the Province under the *Ontario Infrastructure and Lands Corporation Act, 2011* and has been provided a Revolving Credit Facility to a maximum amount of $200 million maturing in June 2019. As of March 31, 2017 OILC had not drawn any funds from this facility.

Contingencies:

At March 31, 2017, there were no claims under which the OFA would be financially liable. The Province continues to guarantee the term deposits issued by the Province of Ontario Savings Office prior to 2003.

Audit Findings Report to the Audit and Risk Management Committee

For the Year Ended March 31, 2017

Auditing and professional standards require that the auditor communicate to the Audit and Risk Management Committee ("those charged with oversight") certain information regarding the scope and results of the audit that may assist those charged with oversight in fulfilling its responsibilities to:

- review the financial statements for the year ended March 31, 2017; and
- recommend that the Board of Directors approve the financial statements.

However, as this report is a by-product of the audit it does not necessarily identify all matters that may be of interest to those charged with oversight in fulfilling its responsibilities. The required communications are summarized below by area.

Area	Comments
Auditors' Responsibilities Under Canadian Generally Accepted Auditing Standards (GAAS) Our audit was designed in accordance with Canadian GAAS to provide reasonable, but not absolute, assurance that the financial statements are free of material misstatement.	We completed our audit of the Ontario Financing Authority's March 31, 2017 financial statements in accordance with Canadian GAAS, as outlined in our Audit Planning Report to those charged with oversight dated April 11, 2017 with the exception of the following items: • Receipt of a signed representation letter by management on June 16, 2017, the expected date of the Board of Director's approval of the financial statements; • Receipt of a letter from your external and internal legal counsel regarding any litigation or claims; • Obtaining evidence of the Board of Director's approval of the financial statements. Upon approval of the audited financial statements by the Board of Directors, we will be issuing an unqualified audit opinion on the financial statements. We expect that our audit opinion on the financial statements will be dated June 16, 2017, the expected date of approval of the financial statements by the Board of Directors.
Auditors' Independence Auditors are required to report annually on their independence to those charged with oversight.	We are objective and are not aware of any relationship with the Ontario Financing Authority that would impair our independence for the purpose of expressing an opinion on the financial statements. Our independence and compliance with ethical standards was discussed in detail in our Audit Planning Report to the Audit and Risk Management Committee dated April 11, 2017.

Area	Comments
Significant Accounting Policies	
Management is responsible for selecting the appropriate financial reporting and selecting accounting policies in accordance with this framework. Significant accounting policies, as well as changes to those policies or to their application, and any new accounting and reporting standards introduced during the year, must be disclosed.	The significant accounting policies used by the Ontario Financing Authority have been applied in accordance with the Canadian public sector accounting standards and have been adequately disclosed in the notes to the financial statements. There were no changes in the policies or their application, and no new reporting standards were introduced this year.
Management Judgments and Accounting Estimates	
Preparing financial statements usually requires the use of accounting estimates. Certain estimates are particularly sensitive because of their significance to the financial statements and the possibility that future events may differ significantly from management's expectations.	Areas where estimates were used include: • Accruals for Trader's and Senior Staff Performance Bonus; • Amortization rates of capital assets which are based on the assets estimated useful life; and • Estimated liability for legislated severance and unused vacation accruals. We concluded on the basis of the best information available at the time that the estimates used by management were reasonable and were disclosed adequately in the notes to the financial statements.
Results of Work Performed and Key Findings	
Our audit approach to significant financial statement areas was communicated in our Audit Planning Report dated April 11, 2017. Significant financial statement areas were identified as: • Management override of controls	In each of the significant financial statement areas, the results of testing were satisfactory and the work performed was based on the procedures identified in our Audit Planning Report dated April 11, 2017.
Other Information in Documents Containing Audited Financial Statements	
Management is responsible for providing us with the annual report or any other publication that will contain the audited financial statements, with sufficient lead time for us to review it prior to printing.	We will review any such documents provided to us to ensure that the audited financial statements have been accurately reproduced and that other financial information in the document is consistent with the audited statements. We will report any unresolved matters resulting from our review to those charged with oversight. A significant portion of the Authority's Annual report deals with the activities it performs on behalf of the Province related to debt management and investment activities. We will have our Public Account's team review the annual report for any inconsistencies with the Provincial Operational Financial Statements.

Area	Comments
	As detailed in our Audit Planning Report dated April 11, 2017, the Ontario Financing Authority is required to submit an annual report to the Ministry of Finance within 90 days of the fiscal year-end. Ontario Financing Authority is also responsible for posting the annual report on a provincial agency or government website within 30 days of tabling in the legislature. We noted that the annual report for the year ended March 31, 2016 was submitted to the Ministry of Finance before the deadline. As well, we noted that the annual report was published online within the allotted timeframe.
Dealing with Management We must report matters such as our inability to obtain essential information, significant delays in receiving information, or receiving unreliable information.	We received the full co-operation of management and employees and to our knowledge had complete access to the accounting records and other documents that we needed in order to carry out our audit. We had no disagreements with management, and we resolved all auditing, accounting, and presentation issues to our satisfaction.
Significant Matters Discussed with Management We must report matters such as management's consultations with other accountants on accounting principles and other financial reporting matters, business strategies that may affect the risk of material misstatement and any disagreements with management on accounting and financial reporting matters.	Management advised us they did not consult other accountants regarding accounting or financial reporting matters. We did not note any business strategies or circumstances that would increase the risk of material misstatement and had no disagreements with management on accounting and financial reporting matters.
Financial Reporting Errors Errors, both intentional and unintentional, include calculation/input mistakes, improper application of accounting principles, and inadequate disclosure. Material accounting and disclosure errors are those that are likely to change or influence the decisions of persons relying on the financial statements and must therefore be corrected. We are required to report all financial reporting errors, other than those that are clearly trivial. For the purposes of our audit, trivial errors are defined as errors that are inconsequential, both individually and in the aggregate.	Preliminary planning materiality as communicated in the Audit Planning Report dated April 11, 2017 was set at $450,000. Final materiality decreased to $409,000. Based on materiality of $409,000, we have set a threshold of $327,000 that we used in determining whether misstatements that were accumulated during the audit require adjustment. We did not note any non-trivial financial reporting errors or deficiencies in financial statement disclosures. Trivial financial reporting errors, which are those that were less than $20,450, were not reported.

Area	Comments
Significant Deficiencies in Internal Control	
Management is responsible for establishing a system of internal controls that enables the preparation of financial statements that are free from material misstatement, whether due to fraud or error.	The purpose of our audit is to express an opinion on the financial statements, not the systems of internal control. However, during the course of our audit, we may note significant control deficiencies relevant to the financial statements in order to design appropriate audit procedures to address the risks identified.
A significant deficiency is a control deficiency, or a combination of control deficiencies, that can lead to a material misstatement of the financial statements or loss of assets that would not be prevented, or detected and corrected, on a timely basis.	We did not observe any significant deficiencies in internal controls that we believe should be brought to the attention of the Audit and Risk Management Committee.
Compliance with Provincial Requirements Regarding Expense Claims	
The external auditors of Ontario's agencies, boards, and commissions are expected to examine internal controls designed to ensure compliance with provincial policies and legislation regarding expense claims by employees and contract staff. This work can also be carried out by or in conjunction with Ontario Internal Audit.	We reviewed the controls established by management and the Board of Directors to ensure compliance with provincial policies and legislation regarding expense claims by employees and contract staff, and examined a sample of claims to check that the controls were operating effectively during 2017. We did not find any weaknesses in the compliance controls and did not find any serious instances of non-compliance in the sample we tested. We noted that the Integrity Commissioner informed the Ontario Financing Authority in November 2016 that when the Commissioner finds that an entity is compliant, its expenses are no longer reviewed and the entity is "graduated" and removed from the list of entities under review. As a result, there is no longer a requirement that Ontario Financing Authority submit its expenses to the Integrity Commissioner. We note that the Ontario Financing Authority continues to disclose in its public website the travel expenses of the CEO, his direct reports and the top 5 employee travel expenses for the year.
Fraud and Illegal Acts	
In planning our audit, we ask those charged with oversight and management to confirm their respective responsibilities regarding the prevention and detection of fraud or illegal acts, and whether they had any knowledge of fraud, suspected fraud, or illegal acts and if so, what action was taken. Also, in the course of our audit we may find evidence that suggests that a material misstatement may have been the result of a fraud or illegal act.	Both the Audit and Risk Management Committee and management advised us that they were not aware of any fraud, suspected fraud, or illegal acts. In the course of our audit we did not find any evidence indicating material misstatements resulting from fraud or illegal acts.

Area	Comments
Written Representations Management is required to provide us with a written statement that management has fulfilled its responsibility for the preparation of the financial statements. Management must also represent that it has provided us with full access and all relevant information and has recorded and reflected all transactions in the financial statements.	We anticipate that management will provide us with a signed representation letter dated June 16, 2017. These representations will appear in substantially the same form as those listed in Appendix A.
Related-party Transactions Parties are related if one party has the ability to exercise, directly or indirectly, control, joint control, or significant influence over the other. Two or more parties are related when they are subject to common control, joint control or common significant influence. Common examples of related parties are: management, directors, their immediate families, and public-sector entities controlled by the provincial government.	Our review of related-party transactions found that these transactions were properly identified and measured. Disclosures, if required, were appropriate.
Other Matters	Subsequent to the completion of our fieldwork, management informed us that the IESO has requested an additional credit facility for the amount of $2 billion. This new facility is subject to approval. IESO's current credit facility of $975M, will, once the new facility is approved, be reduced to $475 million. The current credit facility is already disclosed in Note 5 of the Ontario Financial Authority's financial statements. Should the new facility be approved, we will consider whether any additional note disclosure is warranted. We are not aware of any other matters, other than noted above, that would require the attention of the Audit and Risk Management Committee when it recommends the financial statements for approval by the Board of Directors.
Other Matters— **Post Audit Feedback Questionnaire**	We look forward to receiving a response from the Audit and Risk Management Committee and management to the Post-Audit Feedback Questionnaire at Appendix B after the audited financial statements are approved. Responses may be completed jointly by the Committee and management, or completed and submitted separately.

AUDITEE LETTERHEAD

June 16, 2017

Ms. Bonnie Lysyk, MBA, CPA, CA, LPA
Auditor General
Office of the Auditor General of Ontario
20 Dundas Street West, Suite 1530
Toronto, Ontario
M5G 2C2

Dear Ms. Lysyk:

We are providing this representation letter in connection with your audit of the financial statements of Ontario Financing Authority (the "OFA") for the year ended March 31, 2017, for the purpose of expressing an opinion as to whether the financial statements present fairly, in all material respects, the statements of financial position, results of operations, net financial assets and cash flow in accordance with Canadian public sector accounting standards. We are providing representation until June 16, 2017, which is the date the financial statements were approved by our Board of Directors and the date of your audit opinion.

We acknowledge that we are responsible for the fair presentation of the financial statements in accordance with Canadian public sector accounting standards and for the design and implementation of internal control to prevent and detect fraud and error. We acknowledge that your examination was planned and conducted in accordance with Canadian generally accepted auditing standards so as to enable you to express an opinion on the financial statements. We understand that while your work includes an examination of the accounting system, internal control, and related data to the extent you considered necessary in the circumstances, it is not designed to identify, nor can it be expected to disclose, fraud, shortages, errors, and other irregularities, should any exist.

Certain representations in this letter are described as being limited to matters that are material. An item is considered material, regardless of its monetary value, if it is probable that its omission from or misstatement in the financial statements would influence the decision of a reasonable person relying on the financial statements.

We confirm, to the best of our knowledge and belief, as of June 16, 2017, the following representations made to you during your audit.

Financial Statements

1. The financial statements referred to above present fairly, in all material respects, the financial position of the OFA as at March 31, 2017, and the results of its operations and its cash flows for the year then ended in accordance with Canadian public sector accounting standards.

Completeness of Information

2. Proper books of account have been kept, and the financial statements at the statement of financial position date are in agreement with them.

3. We have provided you with:

    - Access to all information of which we are aware that is relevant to the preparation of the financial statements, such as records, documentation and other matters;

    - Additional information that you have requested from us for the purpose of the audit, including minutes of meetings of directors of committees of directors held throughout the period and up to the date of your auditor's report

    - Unrestricted access to persons within the entity from whom you determined it necessary to obtain audit evidence.

4. All accounts and transactions have been appropriately described and properly recorded or disclosed in the financial statements and in the accounting records underlying the financial statements.

Fraud and Error

5. We have assessed the risk that the financial statements may be materially misstated as a result of fraud and have determined such risk to be low.

6. We have no knowledge of fraud or suspected fraud that affects the entity and involves:

    - Management;

    - Employees who have significant roles in internal control; or

    - Others where the fraud could have a material effect on the financial statements.

7. We have no knowledge of any allegations of fraud or suspected fraud affecting the OFA's financial statements communicated by employees, former employees, regulators, or others.

8. All actions taken by the OFA have been within its corporate powers. We are unaware of any violations or suspected or possible violations of laws or regulations, the effects of which should be considered for disclosure in the financial statements or as the basis for recording a contingent loss.

9. We have no knowledge of any illegal acts committed by OFA's directors, officers, or employees acting on the OFA's behalf, the consequences of which could result in a significant misstatement of the financial statements.

10. We are not aware of any unadjusted financial-statement misstatements, both individually and in the aggregate, that would have a material impact on the financial statements.

Recognition, Measurement, and Disclosure

11. The OFA has satisfactory title to all owned assets, and such assets have been fairly stated and recorded in the accounts. Where the value of any asset has been impaired, an appropriate provision

has been made in the account. There are no liens or encumbrances on such assets, nor has any asset been pledged.

12. We have identified to you, and appropriately measured and disclosed in the financial statements, all known related parties and related-party transactions, including guarantees, non-monetary transactions, and transactions for no consideration, in accordance with the requirements of Canadian public sector accounting standards.

13. There are no off-balance-sheet financial instruments except for the financing to various public bodies on direction from the Province of Ontario (the "Province"). These loans are included in the Province's consolidated financial statements and are not reflected in these financial statements.

14. All information regarding terms and conditions, interest-rate risk, credit risk, and fair value of financial instruments has been properly disclosed.

15. We have included budgetary data in our financial statements, which is relevant to the users of financial statements and consistent with that originally planned and approved by the Treasury Board Secretariat. Planned results and amounts were presented for the same scope of activities and on a basis consistent with that used for actual results.

16. We have disclosed to you and properly identified in the accounting records all the OFA's bank accounts, as well as any funds held on behalf of the OFA by other parties.

17. The receivables shown in the statement of financial position represent bona fide claims against debtors for charges arising on or before the statement date. These receivables do not include any amounts that are collectible after one year

18. The estimated useful lives of tangible capital assets as disclosed in the financial statements, are a reasonable basis for amortization.

19. We have disclosed to you all significant estimates and fair value measurements. We believe that:
    a. the measurement methods used are in accordance with Canadian public sector accounting standards and are appropriate in the circumstances and consistently applied;
    b. the underlying assumptions reflect management's best estimates, are reasonable and consistently applied; and
    c. significant estimates and measurement uncertainties known to management that are required to be disclosed in accordance with *PS 2130, Measurement Uncertainty* have been appropriately disclosed.

20. We have disclosed to you, and the OFA has complied with, all aspects of contractual agreements that could have a material effect on the financial statements in the event of non-compliance.

21. All arrangements, whether formal or informal, explicit or implied, to provide retirement income and other post-retirement benefits to employees after they cease employment have been disclosed to you.

22. Employee future benefit obligations, costs and assets have been determined, accounted for and disclosed in accordance with the requirements of *or PS 3250, Retirement Benefits* and *PS 3255, Post-employment Benefits, Compensated Absences and Termination Benefits.*

23. All direct or contingent liabilities, contractual obligations, and substantial commitments, whether written or oral, other than those incurred in the ordinary course of business, that would materially affect the financial statements have been appropriately disclosed in the financial statements.

24. There are no outstanting legal actions or possible legal claims that existed at the statement date and up to the date of your auditor';s report, whether or not they have been discussed with legal counsel, that would require disclosure in the financial statemetns.

25. The financial statements do not report any known or contingent liabilities arising from environmental matters because there are none to report.

26. No events have occurred subsequent to the statement date and up to the date of your auditor's report that Canadian public sector accounting standards would require adjustment to or disclosure in the financial statements.

27. No significant matters, other than those disclosed in the financial statements, have arisen that would require a restatement of the comparative figures presented in the financial statements.

Sincerely,

Gadi Mayman, CEO, Ontario Financing Authority

Ken Kandeepan, CFRO, Ontario Financing Authority

OFA ARMC MEETING
RESOLUTION: June 16, 2017

Cost Recovery Fee and Proxy Commercial Interest Rate Spreads for OFA 2017-18 Loans

Resolved that:

The following are recommended by OFA staff to the OFA Board of Directors for approval:

1. No change in the cost recovery fee of 2.5 basis points (bps) per annum on new loans to public bodies to cover costs related to upfront loan origination and on-going loan monitoring and administration;

2. An increase in the maximum proxy commercial interest rate spread to 75 bps up from 65 bps in fiscal 2016-17. The following commercial interest rate spreads are to be assigned to different project risk ratings as:

"C" Risk Rating:	Province's cost of funds + cost recovery fee + 75 bps.
"B" Risk Rating:	Province's cost of funds + cost recovery fee + 50 bps.
"A" Risk Rating:	Province's cost of funds + cost recovery fee + 25 bps.

3. For those loans with a credit risk rating higher than a "C" Risk Rating, it is recommended that the OFA charge an additional credit spread premium that is reflective of the loan's risk profile.

4. OFA continue to conduct an annual review of both spreads to ensure that there are no significant long-term under/over recoveries that may require corrective action and the proxy commercial spread is reflective of credit market conditions.

OFA'S ANNUAL BORROWING AND ON-LENDING PLAN
FISCAL YEAR 2017-18

ISSUE

The OFA Lending Policy requires that the Board review the Annual Borrowing and On-Lending Plan and approve the OFA's cost recovery fee and proxy commercial interest rate spreads related to the OFA's on-lending activities to public bodies.

RECOMMENDATION

It is recommended that the OFA Board approve:

1. No change in the cost recovery fee of 2.5 basis points (bps) per annum on new loans to public bodies to cover costs related to upfront loan origination and on-going loan monitoring and administration; and
2. An increase in the maximum proxy commercial interest rate spread to 75 bps up from 65 bps in fiscal 2016-17. The following commercial interest rate spreads are to be assigned to different project risk ratings as:

   "C" Risk Rating: Province's cost of funds + cost recovery fee + 75 bps.
   "B" Risk Rating: Province's cost of funds + cost recovery fee + 50 bps.
   "A" Risk Rating: Province's cost of funds + cost recovery fee + 25 bps.

For those loans with a credit risk rating higher than a "C" Risk Rating, it is recommended that the OFA charge an additional credit spread premium that is reflective of the loan's risk profile.

It is further recommended that the OFA continue to conduct an annual review of both spreads to ensure that there are no significant long-term under/over recoveries that may require corrective action and the proxy commercial spread is reflective of credit market conditions.

COST RECOVERY SPREAD

- The OFA's Lending Policy requires the OFA to recover all costs related to the upfront and ongoing loan monitoring and administration of the OFA's lending activities.
- The OFA uses a basis points (bps) spread cost recovery methodology. The total costs are divided by the average loan portfolio balance to reach the cost recovery spread in bps.
- The calculation methodology reflects current realities of a mature loan portfolio, and it supports the OFA's recommendation to maintain the cost recovery spread for new loans at 2.5 bps per annum in fiscal 2017-18.
- The Ontario Internal Audit Division (OIAD) reviewed the calculation methodology in March 2017 and concluded that the bps spread calculation methodology proposed by the OFA was reasonable and appropriate.
- The cost recovery fee is charged as a basis points spread on the loan interest rate and recovered over the term of the loan. It is estimated that 2.5 bps is required to recover the costs of administering OFA loans in 2017-18.

	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18E
Size of Loan Portfolio	$5.5 billion	$6.0 billion	$6.0 billion	$6.0 billion	$6.0 billion	$5.8 billion
Estimated FTEs	11.37	10.80	10.39	8.14	9.44	7.89
Cost Recovery Spread	2.5 bps	2.5 bps	2.5 bps	2.5 bps	2.5 bps	2.5 bps
Total Costs	**$1,665,713**	**$1,623,226**	**$1,443,454**	**$1,151,310**	**1,414,570**	**$1,233,150**
Cost Recovery Revenue	**$1,735,219**	**$1,875,800**	**$1,937,069**	**$1,921,531**	**$1,906,227**	**$1,863,679**
Cumulative Over/(Under) Recoveries	**($2,704,324)**	**($2,451,750)**	**($1,958,134)**	**($1,187,913)**	**(696,256)**	**(65,727)**

- On a cumulative basis, the OFA is still in an under-recovered position, due to a legacy of no recoveries at the inception of the on-lending program. However, it is expected this will shift to an over recovered position in 2018-19 as the cost recovery spread of 5 bps that was charged in earlier years of the program was too high.
- Although the OFA took corrective action early on to reduce the cost recovery spread to 2.5 bps, the annual over-recovery will persist until the loans that were charged 5 bps have been fully paid off.
- The revenues have remained relatively constant since the size of the loan portfolio has remained relatively stable. Over the next few years, the size of the loan portfolio is expected to slowly decrease since the school board loan program has come to an end. New loan issues may be surpassed by principal repayments on existing loans.
- The total costs for 2016-17 increased from a year earlier mainly due to the development of an in-house new loan system, the OFA Loan Management System (OLMS). More FTE equivalents were required to carry out the system development.
- The total costs for 2017-18 are expected to decrease from the previous year due to improved operational efficiency after the launch of the OLMS.

PROXY COMMERCIAL SPREAD

- The OFA Lending Policy requires the OFA to charge a proxy commercial interest rate spread for projects that are deemed commercial in nature, in order to better reflect the underlying risk of such projects. The spread is added to the Province's costs of funds and cost recovery fee and recovered over the term of the loan.
- The proposed 75 bps spread is arrived at based on a methodology used in the past two years, which analyzes various sources of long-term bonds with similar commercial risk profiles and constructs for either "A/A-" or "A/BBB" rated long-term bond indices.
- An average interest rate spread of the three indices over the Province's 20-year cost of funds is calculated and it is further reduced by 10 bps to convert the long-term interest rate spread to a medium-term interest rate spread as the average duration of OFA loans is approximately 10 years.
- With the appropriate interest rate spreads representing risks embedded in the loans, the borrowers should be more motivated to pay back their loans in a timely manner.
- As recommended, the maximum medium term interest rate spread is 75 bps versus 65 bps in F2016-17.
- In fiscal 2016-17, the total OFA retained interest from the proxy commercial spreads was $1,452,707, a 16% increase from a year earlier resulting from a relatively higher average outstanding amount of agency loans throughout the year. The agency loans are subjected to the proxy commercial spread charge as opposed to the school board loans for which only an administration fee is charged over the province's cost of borrowing.

Fiscal Year	Composite Medium-term Spread Over Province's Cost of Funds	Recommended Maximum Spread	OFA Retained Interest
2017-18	75 bps (recommended)	75 bps (recommended)	N/A
2016-17	65 bps	65 bps	$1,452,707
2015-16	70 bps	70 bps	$1,249,255
2014-15	45 bps	45 bps	$1,303,898
2013-14	54 bps	55 bps	$1,288,346
2012-13	55 bps	55 bps	$1,132,813
2011-12	52 bps	50 bps	$832,391
2010-11	50 bps	50 bps	$540,818

- Loans are deemed to be commercial in nature when generally less than 50% of the operating revenues generated by the underlying project are attributable to government sources. The OFA evaluates the project risk of these loans in order to establish a proxy commercial rate of interest. Two risk measures are used to evaluate the risk:

  1. The percentage of total project revenue attributable to government sources; and
  2. The average Debt Service Coverage Ratio (DSCR) of the project, where DSCR is defined as the number of times the average annual free cash flow generated over the term of the loan would cover the principal and interest payments of the associated debt.

- For a given "commercial" loan, each of these two risk measures are evaluated and assigned an overall project risk ranking as follows:

PERCENTAGE OF REVENUE FROM GOVERNMENT SOURCES

AVERAGE DSCR	LESS THAN 30%	GREATER THAN 30%
LESS THAN 1.35X	"C" Rating	"B" Rating
GREATER THAN 1.35X	"B" Rating	"A" Rating

Where: "C" Risk Rating = Province's cost of funds + cost recovery fee + 75 bps.
"B" Risk Rating = Province's cost of funds + cost recovery fee + 50 bps.
"A" Risk Rating = Province's cost of funds + cost recovery fee + 25 bps.

5. TRANSACTIONS WITH PUBLIC BODIES

The OFA provides financing to various public bodies on direction from the Province. As the OFA is directed by the Province to make these loans in furtherance of stated Provincial initiatives, and these loans are included in the Province's consolidated financial statements, these transactions are not reflected in these financial statements.

Funds for these loans are advanced to the OFA by the Province under credit facilities aggregating $16.9 billion expiring from 2036 to 2044. Principal repayments received from public bodies by the OFA are forwarded to the Province. The interest rates charged to public bodies will generally be slightly higher than the rate charged on the advances from the Province to fund the loans ("the spread").

The OFA will generally retain a portion of the spread in order to recover the administrative costs of managing these loans. The spread retained by the OFA includes a cost recovery component and, where applicable, a proxy commercial interest rate spread. The inclusion of the proxy commercial spread results in an interest rate equivalent to what would be charged on the loan by a commercial lender and reflects the relative risk associated with the loan. During the year ended March 31, 2017, $3.5 million in interest rate spread revenue was recognized (2016 – $3.4 million) of which $2.1 million in receivable at year end (2016 – $1.7 million).

As at March 31, 2017, the principal amounts receivable by the OFA on behalf of the Province represent debentures and short term loans. In addition to the outstanding loans below, interest accrued on these loans amounted to $93.9 million (March 2016 – $93.6 million), of which $92.7 million (2016 – $92.6 million) will be flowed to the Province.

These are related party transactions, with the exception of those with the Corporation of the City of Windsor and the University Of Ontario Institute Of Technology.

OFA LOANS TO CONSOLIDATED PUBLIC BODIES

ISSUE

What cost recovery fee should the OFA charge on loans to public bodies in 2017-18?

RECOMMENDATION

It is recommended that the cost recovery spread remain unchanged at 2.5 bps given the estimated 2.3 bps it will cost the OFA to administer the loan program in 2017-18.

It is further recommended that the OFA continue to conduct an annual review to ensure the cost recovery methodology and interest rate spread is appropriate and that there are no significant long-term under-/over-recoveries that may require OFA management's corrective action.

- Although revenues continue to outpace costs, this is partially a revenue timing issue since loan origination costs are incurred upfront and recovered over the life of the loans.
- Loan initiation costs are not recovered upfront because the OFA does not charge an upfront fee, but uses a basis points spread cost recovery methodology. It is expected that these costs will be fully recovered over the life of the loans, assuming the loans remain in good standing and are fully repaid.
- On a cumulative basis, the OFA is still in an under-recovered position. However, it is expected this will begin to turn into an over-recovery in 2018-19 as the cost recovery spread of 5 bps that was charged at the inception of the program was too high.
- Although the OFA took corrective action early on to reduce the cost recovery spread to 2.5 bps, the cumulative over-recovery will persist until the loans that were charged 5 bps have been fully paid off.
- The rate of revenue increase peaked in 2014-15 and is declining gradually as growth in the size of the loan portfolio plateaus. Over the next few years, the size of the loan portfolio is expected to decline slowly as the school board loan program is coming to an end with the

last tranche being drawn in March 2017. It is expected that future new loan issues will be slightly outpaced by principal repayments on existing loans.

- The total estimate costs for fiscal 2017-18 are expected to be lower than those of fiscal 2016-17 because in 2016-17, extra costs were incurred to support the development of a new OFA Loan Management System (OLMS).
- The proportional FTE method is used for fiscal 2016-17 and 2017-18 for estimating overhead costs.

ANALYSIS OF FORECAST VERSUS ACTUAL COST RECOVERIES

- The fiscal 2016-17 cost recovery fee estimation at the beginning of the year is revised at the end of the year based on additional information obtained.
- The assumption of $400 million new loan issuance at the beginning of the year is revised to $439 million which includes an unexpected credit line drawing of $ $230 million for the Independent Electricity System Operator (IESO). The additional new loan amount were partially offset by the reduction of the last tranche of school board loan issued in March 2017 from expected $200 million to $67 million.
- The FTE allocation for upfront costs is reduced by 0.84 to reflect the reduced activities of new loan issuance (without considering the IESO line of credit drawing).
- The salary and overhead costs are revised by taking fiscal 2015-16 as the expense base year. The salary costs are adjusted by an across the board salary increase in fiscal 2016-17 of 6.4%.
- A difference of $27,171 in cumulative under recoveries is identified, however it is not a significant amount to warrant a corrective action.

ESTIMATED COSTS

The total administrative costs for the OFA to carry out the loan program to public bodies were calculated as follows:

1. Determine the estimated number of FTEs required by each division/branch to fulfill the OFA's loan initiation or ongoing activities; and
2. Multiply the estimated number of FTEs by the average cost per FTE per division/branch involved in the loan program.

Below is a detailed breakdown of FTE estimates per division for both upfront costs and ongoing loan monitoring costs. For comparison purposes, estimates for fiscal 2016-17 and 2017-18 are shown below.

--- Exclude loans issued without cost recovery fee charges	5,258,584,854
Total cost recovery fee	**0.02345%**

The fiscal 2017-18 calculation of cost estimates considers:

1) Loan origination costs and loan monitoring costs were combined to arrive at the total estimate costs of $1.2 million which was divided by the estimated average loans under management which are subject to fee recoveries in 2017-18 to reach the annual cost recovery fee of 0.02345% or 2.3 basis points per annum.

2) The average overhead costs per FTE were estimated by having the total OFA overhead costs in fiscal 2015-16 divided by the total OFA FTEs of 165 and multiplied by an inflation factor of 1.02. Next, the average overhead costs were multiplied by estimated divisional FTEs to arrive at the overhead costs of $229,542.

3) The estimated salary costs were based on 2016-17 estimates and adjusted for an expected increase of 3.9%.

4) The development of the new OLMS system in 2016-17 and its subsequent launch on April 5, 2017 effectively reduces the FTE counts for fiscal 2017-18, especially in the OFA IT group, that is, the Strategic Corporate Services Branch.

ESTIMATED REVENUES

- Assuming the OFA Board approves keeping the cost recovery spread at 2.5 bps based on the calculations above, estimated revenues are expected to be $1.9 million in 2017-18.
- Fiscal 2017-18 revenues are based on average loans under management which are subject to fee recoveries as not all of the $336 million in expected new loans will be issued at the beginning of the year.
- The new loan forecast for fiscal 2017-18 is lower than the previous year as the school board loan program has come to an end in fiscal 2016-17.
- The loan portfolio is expected to decrease slightly to $5.7 billion at end of year 2017-18 and average loans under management are assumed to be $5.8 billion throughout the year.
- The current estimate assumes that all of the $336 million in expected loans in 2017-18 will be advanced. Although this is a prudent assumption, experience has shown that the actual amount of loans advanced in a given year could be slightly more or less than what was forecasted.
- For fiscal 2016-17, the actual revenue recovered was $1,906,227, slightly lower than the estimated cost recovery revenue of $1,916,997.

BACKGROUND

- In 2007, Treasury Board approved the “Financing Public Bodies” initiative where the OFA is mandated to provide long-term financing for consolidated public bodies, including school boards, colleges, and hospitals, as well as corporations, boards, and commissions that borrow as agents of the Crown. The OFA was also directed by Treasury Boards to charge a cost recovery rate for this loan program.
- The OFA Lending Policy requires the OFA to conduct an annual review to ensure that the cost recovery methodology and interest rate spread is appropriate and that there are no significant long-term under-/over-recoveries that may require OFA management’s corrective action.

- In fiscal 2016-17, a simplified cost recovery fee calculation methodology was proposed and approved by the OFA Board of Directors and reviewed by the Internal Audit Division (IAD).
- The same fee calculation methodology is proposed for fiscal 2017-18 as no significant change is expected for OFA to manage new loan issuance and ongoing loan administration in the coming fiscal year.

APPENDIX III:

PROXY COMMERCIAL INTEREST RATE SPREADS ON LOANS TO PUBLIC BODIES

ISSUE

What is the maximum proxy commercial interest rate spread the OFA should charge on loans to public bodies where the underlying activity is commercial in nature?

RECOMMENDATION

It is recommended that maximum proxy commercial interest rate spread for “commercial” loans be increased to 75 basis points (bps) for fiscal year 2017-18 from the previous year spread of 65 bps.

ANALYSIS & RATIONALE

The reasons for the change are as follows:

1. The methodology for calculating proxy commercial interest rate spreads is the same as that used for the prior year through examining and analyzing long-term bonds with risk profiles similar to loans to public bodies in order to reflect the risk factors of today’s complex “commercial” projects undertaken by public bodies.
2. The proposed 75 bps spread is arrived at based on a calculation methodology which analyzes various sources of long-term bonds with similar commercial risk profiles and constructs for either “A/A-“ or “A/BBB” rated long-term bond indices. An average interest rate spread of three indices over the Province’s 20-year cost of funds is calculated, which is then converted to a spread over medium term Ontario bond. The average duration of OFA loans is estimated at 10 years.
3. The three constructed indices are comprised of the Casgrain three month average (February to April 2017) of PPP (Public Private Partnership) index based on 24 projects in Canada with “A” range PPP credit, the average of 5-year composite indices of Canada Utility A and Corporate BBB, and the Ontario Quasi-government entity long-term bond index. The details are provided in Schedule I: Proxy Commercial Interest Rate Spread Calculation.
4. The interest rates on loans deemed to be commercial in nature should reflect major risk factors in the credit markets, while shielding public bodies from extreme short-term volatility. The credit spread on the average of indices of comparable bonds is 75bps over the Province’s credit spreads.
5. With the appropriate interest rate spreads representing risks embedded in the loans, the borrowers should be more motived to pay back loans.

The Province’s spread over the government of Canada (the benchmark) was narrowed over the past year, and the spread of commercial long-term bonds over the benchmark has slightly widened which results in the OFA’s need to increase its maximum proxy commercial interest rate spread to 75 bps from 65 bps. For those loans with higher than usual credit risk, it is recommended that the OFA charge an additional credit spread premium that is reflective of the loan’s risk profile.

It is further recommended that the OFA continue to re-evaluate and monitor the proxy commercial interest rate spreads as credit spreads have varied significantly over the past few years.

In fiscal 2016-17, the total OFA retained interest from the proxy commercial spreads was $1,452,707, a 16% increase from a year earlier resulting from a relative higher average outstanding amount of agency loans throughout the year. The agency loans are subjected to the proxy commercial spread charge as opposed to the school board loans for which only an administration fee is charged over the province's cost of borrowing.

Fiscal Year	Composite Medium-term Spread Over Province's Cost of Funds	Recommended Maximum Spread	OFA Retained Interest
2017-18	75 bps	75 bps (recommended)	N/A
2016-17	65 bps	65 bps	$1,452,707
2015-16	70 bps	70 bps	$1,249,255
2014-15	45 bps	45 bps	$1,303,898
2013-14	54 bps	55 bps	$1,288,346
2012-13	55 bps	55 bps	$1,132,813
2011-12	52 bps	50 bps	$832,391
2010-11	50 bps	50 bps	$540,818

Identification of Appropriate Credit Spread

- "Commercial" projects undertaken by public bodies exhibit qualities and characteristics that could be considered similar to those of quasi-government PPP projects.
    - The public and private partnership feature gives PPP projects a quasi-government structure; and
    - There exists government guidance for project initiation, planning, controlling, executing and closure.

- The commercial risk spread identified through composite indices of comparable 'A or A/BBB' rated bonds is considered to be an appropriate index for measuring the risk of commercial projects undertaken by public bodies.

Approach in Setting Appropriate Credit Spread

- Establish a proxy commercial interest rate spread based on the risk of the project using two risk measures to evaluate project risk:
    i) the percentage of total project revenue attributable to government sources; and
    ii) the average debt service coverage ratio (DSCR) of the project.
- As illustrated in **Table A**, below, a project would fall into one of three different overall project risk categories depending on its risk measure scores: "A", "B", or "C" risk ratings

Table A – Overall Project Risk Rating

AVERAGE DSCR	PERCENTAGE OF REVENUE FROM GOVERNMENT SOURCES: LESS THAN 30%	PERCENTAGE OF REVENUE FROM GOVERNMENT SOURCES: GREATER THAN 30%
LESS THAN 1.35X	"C" Rating	"B" Rating
GREATER THAN 1.35X	"B" Rating	"A" Rating

- The interest rate spreads assigned to different project risk ratings are:
    - **"C" Risk Rating**: Province's cost of funds plus cost recovery charge plus 75 bps.
    - **"B" Risk Rating**: Province's cost of funds plus cost recovery charge plus 50 bps.
    - **"A" Risk Rating**: Province's cost of funds plus cost recovery charge plus 25 bps.

Liquid Reserves Statement of Investment Policy and Procedures

Resolved that:

> The Liquid Reserves Statement of Investment Policy and Procedures last reviewed by staff on May 23, 2017, in the form presented to this meeting is recommended to the OFA Board of Directors for approval.

ANNUAL APPROVAL TO THE LIQUID RESERVE STATEMENT OF INVESTMENT POLICY AND PROCEDURES

Issue

Seeking annual Board approval to The Liquid Reserve Statement of Investment Policy and Procedures.

Background

The Liquid Reserve Statement of Investment Policy and Procedures was originally approved by the Board of Directors in June 2009. As per the policy, the Liquid Reserve Statement of Investment Policy and Procedures is to be reviewed on an annual basis and approved by the Board of Directors.

Upon review, the following changes were made this year:

- Page 2, definition of *Unrestricted Liquid Reserves* was added and the definition of the *Money Market Portfolio* was updated to clarify that bonds purchased for medium-term strategic cash management purposes are excluded from the portfolio.
- Page 8, **Governance** section was updated to reflect changes in various Risk Management policies.

Recommendation

It is recommended that the OFA Board of Directors approve the Liquid Reserve Statement of Investment Policy and Procedures.

Liquid Reserve Statement of Investment Policy and Procedures

Introduction

The Ontario Financing Authority is responsible for managing the financial liquidity of the Province of Ontario. The goal of liquidity management is to maintain sufficient cash and liquid investments to meet the Province's daily operating requirements and to withstand a range of stress events, including those involving the loss or impairment of funding sources. Liquidity is managed through the use of short-term and long-term borrowing and the maintenance of a Liquid Reserve. The Statement of Investment Policy and Procedures provides the basis for a liquidity management framework and will address the following:

1) Application and Scope
2) Definitions
3) Investment Objectives
4) Funding of Liquid Reserves
5) Roles and Responsibilities
6) The Province of Ontario Financing, Debt & Electricity Management Plan
7) Policies and Money Market limits
8) Performance Measurement and Benchmarking
9) Monitoring and reporting requirements
10) Governance

Application and Scope

This policy covers the management of the Province of Ontario's Liquid Reserve and Money Market Portfolio. It does not cover the management of any client's portfolios.

Definitions

Liquid Reserve: The Liquid Reserve is comprised of cash and short-term investments managed by the OFA for the Province of Ontario before consolidation with other government entities. This represents all investments managed by the OFA for use by the Province of Ontario that are readily convertible to known amounts of cash for the purpose of meeting short-term cash commitments. "Short-term" is defined by management intent rather than the length of time to maturity of the asset itself. For the purpose of this definition, short-term investments include long-term bonds held for hedging purposes as it is management's intent to hold them for less than a year. Therefore, the Liquid Reserve would include cash in the Province's bank accounts, money market securities and long-term bonds which have not been lent out through a sale and re-purchase agreement (repo), adjusted for net pledged collateral under Credit Support Annex (CSA) agreements. In essence, it represents all the cash and

financial securities held by the Province of Ontario, adjusted for the net pledged collateral posted under all CSA's.

Unrestricted Liquid Reserves: The Liquid Reserve excluding net collateral received from derivative counterparties.

Money Market Portfolio: This refers to a subset of the Province's Unrestricted Liquid Reserve. It includes all money market securities, short-term bonds, foreign currency denominated securities hedged back to Canadian dollars and investments made through purchase and re-sale agreements (reverse repo), including internal reverse repos, less any securities lent out of the money market portfolio through a repo agreement. It differs from the *Unrestricted Liquid Reserve* in that it excludes outright bond positions held for hedging purposes and for medium-term strategic cash management purposes but does include internal reverse repos of those bonds into the money market portfolio. The Money Market Portfolio also excludes any cash held in the Province's bank accounts.

Investment Objectives

The primary objectives in managing the Liquid Reserve are to meet the Province's and OEFC's cash requirements in a sound, cost effective manner and to hedge market risks associated with the long-term debt portfolio and borrowing program in accordance with the liquidity risk tolerance as established in the Annual Financing, Debt & Electricity Management Plan. Investments in the Liquid Reserve are expected to adhere to the following principles:

1. Security of Capital: Investment holdings should have a relatively low sensitivity to adverse developments in the economy and the capital markets. Investments are limited to investment grade, high quality credits.

2. Cash Flow Management: Cash flow forecasts should be updated daily and the maturity date of investments in the Money Market Portfolio should match large cash requirement dates where feasible.

3. Asset Liquidity: Investments must be sufficiently liquid to meet unexpected cash requirements on short notice. An instrument is considered sufficiently liquid if it can be easily and immediately converted into cash with minimum transaction costs. In addition to investments made within the Money Market Portfolio to meet operational cash requirements, the purchase and sale of bonds for hedging purposes has a direct impact on the Province's overall liquidity and asset mix of the Liquid Reserve. When developing hedging strategies, the impact on liquidity and overall asset mix must be considered.

4. Collateral Eligibility: When developing investment and hedging strategies, consideration must be given to the instrument's eligibility under the Province's CSA agreements. All else being equal, preference should be given to eligible securities.

5. Performance: The Money Market Portfolio should aim to meet the rate of return of a 60-day custom benchmark consisting of Overnight Rates, 30-,90- and 180-day Government of Canada Treasury Bills. The performance of hedging transactions are measured within their respective programs.

Funding of Liquid Reserves

In order to reduce the potential cost of holding liquid reserves, as well as to follow best practices in terms of asset/liability management, liquid reserves will be funded with floating rate exposure.

- The cost of maintaining liquid reserves is deemed to be the difference between the rate of return on liquid reserve investments versus the cost of Ontario's gross floating rate exposure.
- Any planned year-over-year changes in liquid reserves will be managed in conjunction with changes to gross floating rate exposure.

Roles and Responsibilities

Capital Markets: is responsible for determining how the Province's annual financing requirements will be met and for implementing the Province's approved financing strategies, including managing the short and long-term borrowing programs and management of the Province's Liquid Reserve. These strategies are outlined at the beginning of each year in the Province of Ontario Financing, Debt & Electricity Management Plan and are reviewed by Capital Markets continuously. Any planned deviations from approved strategies are reported to the OFA Board of Directors as necessary.

The Finance and Treasury Division is responsible for forecasting daily levels of the Liquid Reserve and reporting actuals. The division provides the following reports daily:

1. The Cash Flow Summary which forecasts the daily ending liquid reserve level. The forecast excludes uncontracted borrowings. These forecasts are used extensively by capital markets for determining and revising the liquid reserve management strategy.
2. The Cash Guideline which provides the previous day's actual ending Liquid Reserve level including actual cash balances, adjusted for net pledged collateral. In addition, a daily liquid reserve report provides a breakdown by portfolio type of the outstanding liquid reserve plus actual cash.

Three schedules are also submitted to the Borrowing Strategy Committee monthly:

1. Liquid Reserve and Cash Flow Projections which provides the fiscal year's current outlook compared to the cash budget with a projection of the year end's Liquid Reserve.
2. Variance Report which explains the variance between the projected current outlook and cash budget for the fiscal year.
3. Liquidity Ratio report which is an indicator of how much of the funding requirements in the next twelve months is covered by the liquid reserves.

This process ensures a robust framework for projecting cash flows over an appropriate time horizon.

The Finance and Treasury Division is also responsible for settling and accounting for all capital markets transactions and reporting on actual levels of cash, cash equivalents and temporary investments managed by the OFA for Ontario Public Accounts.

Risk Control Division: is responsible for developing risk management policies, monitoring and reporting on risk exposure levels, reviewing credit ratings of approved issuers and performance measurement of the Money Market Portfolio and other Capital Markets programs. Risk Control is responsible for running stress testing scenarios to determine market sensitivities of the Province's hedging and borrowing related activities and credit exposures.

Capital Markets Operations: Negotiates, with the support from the Ministry of Finance Legal Services Branch, documentation related to potential and approved instruments and monitors the legal developments related to the OFA's capital markets activities and informs of new exposures resulting from legal developments or regulatory changes.

Risk Management Committee: reviews risk exposures, capital market transactions and strategies related to Liquid Reserve management activities on a weekly basis. Stress testing results provided by Risk Control Division which are in excess of specified trigger levels are reviewed by the Risk Management Committee to determine if any remedial actions are required.

The Province of Ontario Financing, Debt & Electricity Management Plan

The Province's funding requirements are dependent on the Province's cash deficit or surplus, investment in capital assets, net loans and investments, debt maturities and debt redemptions. The Province of Ontario Financing, Debt & Electricity Management Plan outlines the overall strategy to meet funding requirements including planned Canada Pension Plan borrowing, long-term and

short-term borrowing and planned changes in the level of the Liquid Reserve as well as defining strategies for the management of the Province's market risk exposures and liquidity risk. As part of this strategy, the Province of Ontario Financing, Debt & Electricity Management Plan will include a liquidity management plan that will address:

- planned long and short-term borrowing;
- planned changes in the level of the Liquid Reserve;
- planned changes in the level of gross floating rate exposure;
- forecasted in-year levels of the Liquid Reserve, including an analysis of various stress-test scenarios;
- a minimum Liquid Reserve level which includes contingency planning for potential collateral needed under the Province's CSA agreements;
- the cost of maintaining the Liquid Reserve; and
- a review of the prior year's strategy.

Policies and Money Market Portfolio Limits

The Province of Ontario's investment powers are governed by the Financial Administration Act, 1990. In particular, Section 3.1, along with Orders-in-Council made pursuant to Section 3.1 (i), outlines the types of investments that the Minister of Finance may enter into on behalf of the Province of Ontario. The Capital Investment Plan Act, 1993, established the Ontario Financing Authority as a crown agency responsible for assisting public bodies and the Province of Ontario to borrow and invest money, develop and carry out financing programs, issue securities, manage cash, currency and other financial risks. In this regard, the OFA has established a series of policies and procedures which comprise the risk management framework for managing the Province's liquidity and financial risks in accordance with the Province's risk tolerance.

Policies:
Management of the Province's Liquid Reserve and Money Market Portfolio are governed by the OFA's Risk Policies and Procedures. Specifically:

After Hours Trading Procedures: ensures key OFA personnel are aware of trades entered after daily risk control reports have been produced.

Authorized Trading Limits: Defines who in the OFA can enter and authorize financial transactions on behalf of the Province and establishes trading limits for each transactor and authorizer.

Credit Risk Policy: establishes a framework and process for credit risk management to ensure that the OFA manages the Province's exposures in a sound and cost effective manner. This includes the process for approving counterparties and issuers and the setting of credit and term limits for all

approved counterparties and issuers. As part of this policy, Risk Control maintains a list of approved counterparties and issuers.

ITS Control Principles: ensures all trades are entered on a timely basis in order to ensure the integrity of the OFA Integrated Treasury System (ITS).

Market Risk Policy: Establishes a framework and related processes for the sound and efficient management of market risk exposures associated with managing the Province's Liquid Reserve.

Policy on the Use of Derivatives and Other Financial Instruments: sets out key principles and processes for the use and authorization of derivatives and other financial instruments, specifically addressing the pricing, settlement and accounting of all such transactions. As per the policy, Risk Control Division maintains a list of approved financial instruments that can be used in the management of the OFA's capital markets activities, including the management of the Liquid Reserve and the Money Market portfolio.

Risk Management Reporting Policy: ensures that the risk exposures associated with the OFA's Capital Market activities are identified, measured and reported to OFA management, the Board of Directors and other clients in a timely, accurate and comprehensive manner.

Money Market Portfolio Limits:

In addition to the limits imposed on the management of the Liquid Reserve from the above policies, the management of the Money Market Portfolio is further governed by limits imposed and clarified in this policy:
Term to Maturity of Securities: The term to maturity is measured from the trade date to the date of maturity. The term to maturity of any investment held in the Liquid Reserve is governed by the OFA Credit and Related Legal Risks Policy. In addition, the Money Market Portfolio has further term limits including:

- a 2 year plus 2 month term for securities issued by the Federal Government, Provinces & Guarantees[1];
- a 380 day term limit for securities issued by foreign sovereigns and supranationals;
- a 380 day term limit for securities issued by schedule I, II, III and equivalently regulated banks, investment dealers and guarantees as well as commercial paper issuers guaranteed by Schedule I, II, III banks;
- a 105 day term limit for securities issued by corporations and trusts;
- a 380 day term limit on the term to maturity of reverse repo agreements (the term limit does not apply to the term to maturity of the underlying collateral) and;

[1] The only exception to this is the Student Loan Corporation of Newfoundland & Labrador which has a 730 day limit.

- Acceptable collateral received on reverse repo agreements is limited to securities issued by the Federal Government, Provinces & Guarantees.

Performance Measurement & Benchmarking

In-year changes to the level of the Province's Liquid Reserve are dependent upon the timing of cash revenue receipts versus cash expenditures, changes in collateral flows between the Province and CSA counterparties, and the pace of the long-term and short-term borrowing programs. Capital markets will develop a base forecast and strategy on how to manage any known large fluctuations in the Liquid Reserve in the annual Province of Ontario Financing, Debt & Electricity Management Plan. This strategy will be reviewed and discussed on a continuous basis and actual results versus the planned strategy will be reported on annually in the Province of Ontario Financing, Debt & Electricity Management Plan.

The cost savings of the Province of Ontario Money Market and New Borrowing Programs are measured against performance benchmarks.

Monitoring & Reporting:

Risk Control Division is responsible for reporting on the mark-to-market of all of the Province's financial positions, the Province's credit exposure (including credit concentration) and monitoring adherence to OFA policies on a daily basis. They are also responsible for monitoring compliance with all Risk policies and procedures on an on-going basis. This includes reporting on the composition of the Liquid Reserve and Money Market Portfolio, including:

- credit exposures of the Liquid Reserve,
- stress testing of CSA counterparties to determine potential collateral needs,
- concentration limits of the Liquid Reserve,
- composition and term to maturity of the Money Market Portfolio.

The Finance and Treasury Division reports on the level of liquid reserves as well as forecasting changes in liquid reserves on a daily basis. Forecasted changes in liquid reserves include 'what-if' scenarios for short-term borrowing. They also report on the changes in Cash and Cash Equivalents line in the Financing Table of the Annual Budget as well as the Quarterly Financial Updates of the Province. Likewise, the Finance and Treasury Division along with the Office of the Provincial Controller reports on the consolidated Cash and Temporary Investments line in the Annual Budget on an estimated basis for both the interim and the budget year.

Governance:

Risk Control Division reviews and updates risk management policies on a regular basis.

The Risk Management Committee (RMC) reviews the Province's Liquid Reserve position on a weekly basis~~. Any corporate issuers of commercial paper exceeding 90% of their allowable exposure are subject to risk assessment by RMC.~~

Credit exposure limits and concentration limits are set out in the *Credit ~~and Related Legal~~ Risk~~s~~ Policy*. The Board of Directors is notified of violations of any credit exposure limit before noon of the following day in accordance with the *Credit Risk Policy* and the *Risk Management Reporting Policy*.

~~As per the *Market Risk Policy*, a CEO trigger level on the Debt and Investment Management Loss is included in the annual *Financing, Debt and Electricity Management Plan.* The CEO is notified if the aggregate Debt and Investment Management Loss for actively managed positions during the current fiscal year exceeds this level.~~

This Statement of Investment Policies and Procedures will be reviewed on an annual basis and approved by the Board of Directors.

Revised OFA Policy on the Use of Derivatives

Resolved that:

The revised OFA Policy on the Use of Derivatives, in the form of the draft presented to this meeting, is recommended to the OFA Board of Directors for approval.

DRAFT – FOR DISCUSSION ONLY

REVISIONS TO THE OFA POLICY ON THE USE OF DERIVATIVES AND OTHER FINANCIAL INSTRUMENTS

Issue

Seeking Board approval for revisions to the OFA's Policy on the Use of Derivatives and Other Financial Instruments.

Background

The OFA Corporate Governance Policy requires that Risk Control Division reviews the OFA's risk management policies annually to ensure they reflect best practices and are consistent with the latest development in global capital markets. The OFA's Policy on the Use of Derivatives and Other Financial Instruments is due for review. Other policies do not require updating at this time.

Recommendations and Rationale

We recommend that the OFA Board of Directors approve the following proposed changes to the OFA's Policy on the Use of Derivatives and Other Financial Instruments

1) On the title page, the "Ontario Financing Authority" was replaced with "OFA Treasury Program" to clarify that this policy applies to IOD-related OFA transactions on behalf of the Province. Corresponding definitional and editorial changes were made throughout the policy.

2) Section 8.3 [Roles and Responsibilities: BSC] was updated, as in other policies, to specify that BSC and RMC meet on a monthly and weekly basis, respectively.

3) Following a review, the list of approved option instruments in Appendix 2 [List of Approved Financial Instruments] was simplified.

1. INTRODUCTION

In carrying out its mandate, the Ontario Financing Authority (OFA) uses a variety of Financial Instruments, including Derivatives. These instruments can be highly complex in their design and can significantly expose the Treasury Program ~~create significant exposure~~ to Market, Credit, Operational, and Legal Risks. To manage these risks effectively, the OFA has put in place an extensive risk management infrastructure involving all areas at the OFA concerned with trading, settlement, accounting, and risk management for Financial Instruments.

The two most significant risks associated with the use of Derivatives and other Financial Instruments are Market Risk and Credit Risk. The infrastructure requirements for managing these risks, including portfolio exposure metrics, compliance monitoring and reporting, are addressed in the OFA's ***Market Risk Policy, Credit Risk Policy*** and ***Risk Management Reporting Policy***. This policy focuses primarily on the governance structure for the use of Financial Instruments.

2. PURPOSE

The purpose of this policy is to ensure that due diligence is exercised in the process of the approval and ongoing review of all instruments that the OFA is authorized to transact. The policy sets out key principles and processes governing the authorization and use of Derivatives and other Financial Instruments.

3. DEFINITIONS

For the purpose of this policy:

Credit Risk is the risk of an economic loss attributable to the failure of a counterparty or issuer to fulfill its contractual obligations, thus causing the holder of the claim to suffer a loss in cash flows or market value. For the purpose of this policy, credit risk also includes related Legal Risk and Settlement Risk.

A **Credit Support Annex** is a supplement to the ISDA Master Agreement which provides the terms and conditions for posting collateral on bilaterally traded OTC derivatives.

A **Derivative** is a financial instrument whose value is derived from the value of one or more reference financial instruments or indices. Derivatives include futures, forward foreign exchange contracts, swaps, options and Structured Financial Instruments.

A **Financial Instrument** is a security or an agreement that provides for the conditional or unconditional exchange of a stream of payments and/or securities. Financial instruments include securities and financial instruments referred to in Part I, Section 3(1) of the ***Financial Administration Act*** (FAA; provided as Appendix 1).

Hedging is the process of entering into financial transactions that, when combined with existing financial positions, offset the impact of fluctuations in interest rates, foreign exchange rates and other market variables. A hedging transaction can be undertaken on an outstanding position, portfolio or in anticipation of a planned position in the future. Hedging also includes exposure management within approved policy limits.

Interest on Debt (IOD) is the consolidated interest expense of the Province.

Legal Risk is the risk of loss resulting from a legal impediment such as inadequate documentation, a regulatory prohibition on a specific counterparty or non-enforceability of a contract.

Leverage describes a Derivative or a financial position where the payoff profile magnifies the impact of market movements. Leveraged positions that offset each other shall not be considered leverage.

Market Liquidity Risk is the risk of being unable to close or open positions in Financial Instruments quickly enough and in sufficient quantities at a reasonable price to avoid adverse financial impacts.

Market Risk is the risk that the value of a portfolio will adversely change as a result of unfavorable changes in market variables such as interest and foreign exchange rates, or changes in market liquidity.

Net Leverage describes a Leveraged position that is not completely offset by other transactions.

A **New Financial Instrument** is a financial instrument whose underlying structural characteristics have not been used by the OFA in the past or a financial instrument that is not currently permitted under the FAA.

Operational Risk is the risk of loss due to human error or fraud or the risk that systems will fail to accurately record, monitor or account for transactions or positions.

Settlement Risk is the risk that a transaction does not settle because a dealer, broker, or counterparty does not deliver payment or a security under the terms of a transaction.

A **Structured Financial Instrument** is a financial instrument whose cash flows are highly sensitive to changes in one or more underlying assets or Derivatives.

Treasury Program includes activities undertaken by the OFA on behalf of the Province for the purpose of borrowing, debt management, and liquid reserves management

4. APPLICATION AND SCOPE

This policy applies to all management and staff of the OFA including all their activities related to the use of Derivatives and other Financial Instruments in arms-length capital market transactions on behalf of the Province's Treasury Program.

The policy does not apply to OFA loans on direction from the Province or Provincial loans to other public bodies or to corporations owned by the crown, or the Province's investments in private sector corporations, or funds managed by the OFA including those under the Ontario Nuclear Funds Agreement.

5. APPROVAL OF POLICY

This policy and amendments recommended by the OFA Risk Control Division and reviewed by the OFA Audit and Risk Management Committee, become effective upon approval by the OFA Board of Directors.

6. PRINCIPLES

The governance structure for managing risks inherent in the use of Derivatives and other Financial Instruments is based on the following key principles:

Principle 1: The OFA shall use only those Derivatives and other Financial Instruments:

- that are permissible under the FAA. Their use shall be in compliance with applicable laws, regulations, policies and procedures (see Appendix 1 for details);
- that the OFA can price, settle, monitor and account for in a manner consistent with industry best practice; and
- whose risk exposures, including Market Liquidity Risk, can be measured or assessed by the OFA.

Principle 2: The OFA shall monitor market and industry best practices related to the use of Financial Instruments, and associated financial, accounting and legal developments and adopt them, if applicable. In particular, the OFA shall negotiate on a best-efforts basis Credit Support Annexes with all its Derivative counterparties to reduce the risks inherent in such instruments.

Principle 3: The OFA shall use Derivatives only for the purpose of Hedging.

Principle 4: The OFA shall not intentionally use Derivatives to create Net Leverage.

Principle 5: The OFA shall periodically review the appropriateness and risk profile of approved Financial Instruments (provided in Appendix 2), especially under stressed market conditions.

7. RISK MANAGEMENT PROCESS AND OPERATIONAL REQUIREMENTS

This section outlines the processes at the OFA for dealing with risks inherent in Derivatives and other Financial Instruments, as well as the approval process for New Financial Instruments.

7.1 Authorized Use of Derivatives

Derivatives shall be used only for Hedging purposes. All derivative transactions shall be undertaken within the exposure and loss limits established in the OFA's ***Market Risk Policy*** and– ***Credit Risk Policy***.

The use of Derivatives is not permitted to create Net Leverage. If such use results in a Leveraged position, it must be neutralized by an offsetting transaction.

7.2 Preparation for the Use of New Financial Instruments

In the event that Capital Markets Division (CMD) believes that it would be advantageous for the OFA to make use of a New Financial Instrument, it shall provide Finance and Treasury Division, as well as Risk Control Division, advance notice in writing including:

- Description of the New Financial Instrument and its risk profile and that it is permissible under the FAA;
- Intended use of the new instrument together with a rationale for using it;
- Description of the applicable pricing methodology;
- Assessment of its market practices; and
- Outline of how CMD intends to manage risks inherent in this instrument.

Each division shall develop, test and implement the requisite infrastructure necessary to manage the Market, Credit, IOD, Operational and Legal Risks associated with the use of the New Financial Instrument. All divisions shall verify that the New Financial Instrument can be priced, settled, monitored and accounted for in accordance with industry and other applicable standards. Each division will then confirm its readiness to RMC before further steps can be taken.

CMD shall present a request, including all supporting documentation, for the future use of the New Financial Instrument to BSC for recommendation to the OFA Board of Directors for approval.

If a New Financial Instrument is not authorized for use by the Province under the FAA, then approval by the OFA Board of Directors is contingent upon obtaining an amendment to the FAA or an Order-in-Council under the FAA that authorizes use of the New Financial Instrument.

7.3 Financial Instruments Which the OFA Has Not Used but Can Price

Capital Markets may use a Financial Instrument which the OFA has not used in the past but can replicate using existing financial engineering building blocks in the OFA's Integrated Treasury System (ITS) and priced accordingly, provided it contains only risks associated with the respective approved Financial Instruments. This instrument shall not be considered a New Financial Instrument. The use of this instrument does not require approval by the OFA Board of Directors but will be subject to the same due diligence and internal control process as outlined in Sections 7.2.

7.4 Settlement and Accounting

Finance and Treasury Division (FTD) shall ensure the details of transactions captured in ITS accurately represent the specifics of the transactions, and shall settle trades.

FTD shall account for and report on Financial Instruments using the Province's and other OFA clients' applicable financial accounting policies.

7.5 Exposure Measurement, Monitoring and Reporting

Risk Control Division (RCD) shall measure and report exposures arising from Financial Instruments in accordance with the ***OFA Risk Management Reporting Policy***. RCD shall monitor Credit and Market Risk exposures arising from the use of Financial Instruments in compliance with the OFA's ***Market Risk Policy*** and ***Credit Risk Policy***.

CMD shall monitor all exposures to ensure that they satisfy applicable program objectives and limits, as well as approved strategies, for example, as described in the annual Financing, Debt & Electricity Management Plan and the OFA risk management policies.

7.6 Monitoring and Periodic Assessment of Financial Instruments

CMD, jointly with RCD, shall proactively monitor changes in market practices and conditions, striving to detect stressed market conditions that can make the valuation of Structured Financial Instruments and other Derivatives particularly difficult.

RCD shall monitor the adequacy of pricing sources for the daily valuation of positions in approved Financial Instruments.

FTD shall monitor changes to financial accounting practices and their implications for the Province's Interest on Debt (IOD) and net debt, and where necessary, seek the assistance of the Office of the Provincial Controller and/or external subject matter expertise.

CMD shall monitor legal developments related to approved Financial Instruments, with the assistance of the Legal Services Branch of the Ministry of Finance.

RMC shall periodically (at least every two years) review product and market developments, product structure and pricing methods of approved Derivatives and other Financial Instruments to ensure that the OFA continues to be able to manage in a sound and efficient manner the risks associated with these instruments.

The CEO may suspend the use of any Financial Instrument or remove a Financial Instrument from the ***List of Approved Financial Instruments*** (Appendix 2) if it is deemed necessary or prudent. Reinstatement of the Derivative or other Financial Instruments removed from the approved list will be subject to the due diligence process applicable to a New Financial Instrument, as per Section 7.2.

OFA ARMC MEETING
RESOLUTION: June 16, 2017

Revised OFA ARMC Charter

Resolved that:

The revised OFA Audit and Risk management Charter in the form presented to this meeting, is recommended to the OFA Board of Directors for approval.

OFA Board of Directors
Audit and Risk Management Committee
Amendments to Audit and Risk Management Committee Charter

Issue:

- At the April 21, 2017 Audit and Risk Management Committee (ARMC) meeting, the Secretary of the Committee was directed to consider additional amendments to the ARMC Charter.

Status:

- The Committee Secretary circulated proposed further amendments to the ARMC Chair and the Board Vice Chair in advance of the June ARMC meeting to obtain feedback and input.

Summary of Changes:

- The distinction between the roles and responsibilities of the Ontario Internal Auditor Division (Internal Audit) and the Office of the Auditor General (Auditor General) has been clarified through the consistent use of clearly defined terms (Pg 1: "Authority" & Article 3).

- The Board's responsibilities, as highlighted by the Auditor General in the annual Audit Plan (e.g. assisting the Board in monitoring management's efforts to create a culture of honesty and ethical behavior) are more clearly articulated as being delegated by the Board to the ARMC in the Charter through the following changes:

    - revisions to the "Purpose" section of the Charter, which incorporate specific reference to the substantive Board responsibilities highlighted by the Auditor General in her audit plan, tracked to the language in the MOU that the OFA has with the Province (Pg 1);

    - revisions to the internal controls review framework, which include specific language regarding the risk of management override of internal controls. Revisions have been made to the sub-bullet requiring that reports of the Internal Auditors address internal controls. Internal Audit was consulted on this change and confirmed it is acceptable, but notes the potential for management override is an inherent limitation in any control system (Pg 4; Article 1B);

    - additional revisions to the internal controls framework to amend the sub-bullet focused on management's communication of codes of conduct to staff. This change

directly connects the ARMC's duties to the Board's responsibility to oversee management's efforts to create a culture of honesty and ethical behavior (Pg 4; 1B).

- The ARMC's oversight role in respect of identifying and measuring risks has been updated to reflect the ARMC's new annual review (in February) of the risk identification and assessment included in the annual OFA business plan. Related assurances from the Internal Auditors have also been added with regard to Internal Audit's review of the OFA's processes for identifying and reporting risks mitigation strategies (Pg3; 1A).

- Amendments to the "Membership" and "Process" sections of the Charter been made to clean up language and enhance clarity.

  - Key Risk Exposure – Financial & Operational Risk
  - We conclude that:
    - There is proper segregation of duties for payment initiation, verification, approval and release; and
    - The internal controls built into the CIBC CMO Wire Payment process are generally adequate.
  - Improvement Opportunities: Develop processes and procedures level documentation including:
    - CIBC CMO Wire Payment processes and procedures;
    - Indentification of internal controls;
    - Testing controls and resolution of issues/effects identified, prior to implementation.

- ✓ RCD – Capital Markets Performance Validation
  - Key Audit Observations: Accountability and Financial Risk
  - We noted that significant year-end adjsutments ($63.8 million) are applied to Strategic Foreign Borrowing (SFB) performance measurement. These adjustments are related to gains/losses from FX hedging activities from prior years' issues. These adjustments had a large impact on the performance in fiscal 2016-17.

3. Update on the 2017/18 Audit and Consulting Plan

- ✓ Per ARMC request at the April 21st meeing, the Interest Rate Swap (IRS) audit is moved from fiscal 2019/20 to fiscal 2017/18;

- ✓ The segregated funds management engagement is deferred to fiscal 2018/19 to accommodate the above change. The funds are invested in money market and were last audited in fiscal 2013/14, with no significant issues noted.

G. Borrowing and Money Market Performance

Conventional Issues*	35%	45% - 55%	25.7 bps below Median
Strategic Foreign Borrowings	NA	50% - 75%	NA

*Excludes pre-borrowing of $3.2 billion in FY16/17 for FY17/18, given the direction to lock in hedging gains in order to mitigate potential IOD pressures in the fiscal year. The Borrowing Program for FY2017-18 began on April 12, 2017 due to IOD hedging transactions.

Money Market

As of 31May2017, the actual return of riskless instruments was 0.63%, out-performing the benchmark by 7 basis points for a $3.1 million positive performance, and out-performing the target range of plus or minus 2 basis points. Riskless instruments are those issued by the Governments of Canada and Ontario and entities fully guaranteed by the Government of Canada, repos of the foregoing instruments, and swaps with CSA counterparties; instruments denominated in foreign currency must be perfectly hedged back to CAD using derivatives with CSA counterparties. The actual return of excluded instruments was 0.35%.

H. Credit and IOD Stress Tests

Stress testing is a complementary approach to Value at Risk (VaR) analysis. It allows Risk Control Division to evaluate the impact of extreme movements in markets, consumer prices and credit quality on the OFA's credit exposures and IOD.

Stress testing results are produced and presented at the monthly Borrowing Strategy Committee (BSC) meeting. The Stress Testing results are also reported to the Risk Management Committee (RMC) for discussion if a stressed scenario generates potential losses in excess of $100 million.

For the period from 31Mar2017 to 31May2017:

- The Credit Event Stress Testing revealed that the Province would have experienced a default loss to Royal Bank of Canada exceeding $100 million relating to exposures in non-money market positions.

- IOD stress testing examines the impact on projected IOD of a 125 basis point increase in interest rates, a jump in inflation, a 20% decline in the value of the Canadian dollar, default of a counterparty, and additional borrowing for the reserve. As reported in monthly BSC reports, the combined effects of these extreme scenarios would cause breaches of the IOD loss limit in FY17-18.

SCSD Project Risks and Delays as of June 2017

Presented to the Audit and Risk Management Committee of the OFA Board of Directors

Project Risk or Delay	Description	Risk Priority	Mitigation Strategy	Completion Date
Security Information and Event Management (SIEM)	As the OFA's security protection landscape continues to grow, more information is being provided from protective and detective devices. The volume of information is too large to integrate manually. SIEM is an essential tool to monitor and correlate information from multiple sources, and provides automatic incident response. The OFA's existing SIEM solution does not facilitate automatic incident response, and is thus at risk because incidents could take place without manual staff intervention. The current SIEM solution is also at the end of its product support.	Medium	The OFA will procure an updated SIEM. This product will gather information from existing security devices including firewalls, network access control and intrusion prevention, as well as feed *additional information from device to device to facilitate automated incident response.* *The procurement has been moved to Q3 FY16/17 and implementation will be completed by Q1 FY 2017/2018.* The approximate procurement value for an enterprise SIEM solution is 315k. An overall security strategy and 3 year roadmap has been developed to ensure consistency in our architecture.	The SIEM project is a multi-year, multi-phase project. **Update: June 12, 2017** Established an updated technical roadmap that identifies new requirements and functionality for the evolving security landscape. We are still targeting a Proof of Concept of viable SIEM solutions in Q4 of FY17/18.

eDiscovery	As the government continues to be subject to closer scrutiny, and courts are becoming more willing to order the collection of electronic records with shorter timelines, the need for a complete, comprehensive and defensible eDiscovery solution and process continues to grow. The OFA currently uses a collection of separate tools and manual processes to accomplish eDiscovery related tasks, resulting in increased time and effort, and the risk of inadvertent omissions.	Medium	The OFA wanted to implement a Commvault eDiscovery solution but was unsuccessful due to compatibility issues with the OFA's existing IT infrastructure. The OFA accordingly decided to abandon the Commvault solution and perform a more detailed investigation of the current leaders in the market, and conduct an onsite proof-of-concept before actual procurement, to ensure the new solution meets our needs. The approximate procurement value of an eDiscovery solution is $125k. Following my previous recommendation that the OFA first develop an Information Management Strategy for compliance, SCSD and Legal Branch have collectively prioritized defining practices, processes and accountabilities throughout the eDiscovery request process. Crown Law Office Civil (CLOC) from the Ministry of Attorney General (MAG) have hired Gartner to conduct a market scan for a solution based on similar requirements, and we have an agreement to leverage their results to inform our procurement next steps.	**Update: June 12, 2017** Revised requirements for capability and technical integration specific to the OFA, for what an eDiscovery solution should encompass, have been assembled and is to be reviewed prior to evaluating solutions in the vendor community. Targeting a PoC for a solution in Q3 17/18.

Collocate Facility Move	In December 2016, SCSD ran a competitive procurement for collocate services resulting in a contract being awarded to a new vendor in March 2017. This situation has put tremendous pressure on SCSD to accommodate a move from one facility to another by July 31, 2017.	Medium	The OFA will utilized a relocation service provided by the new vendor. Planning and scheduling during the months of April and May. The move is schedule for early-to-mid June, to allow for a 1.5 month contingency gap.	**Update: June 12, 2017** On June 9th – 11th, SCSD successfully transitioned all infrastructure and services to the new Collocate Facility.

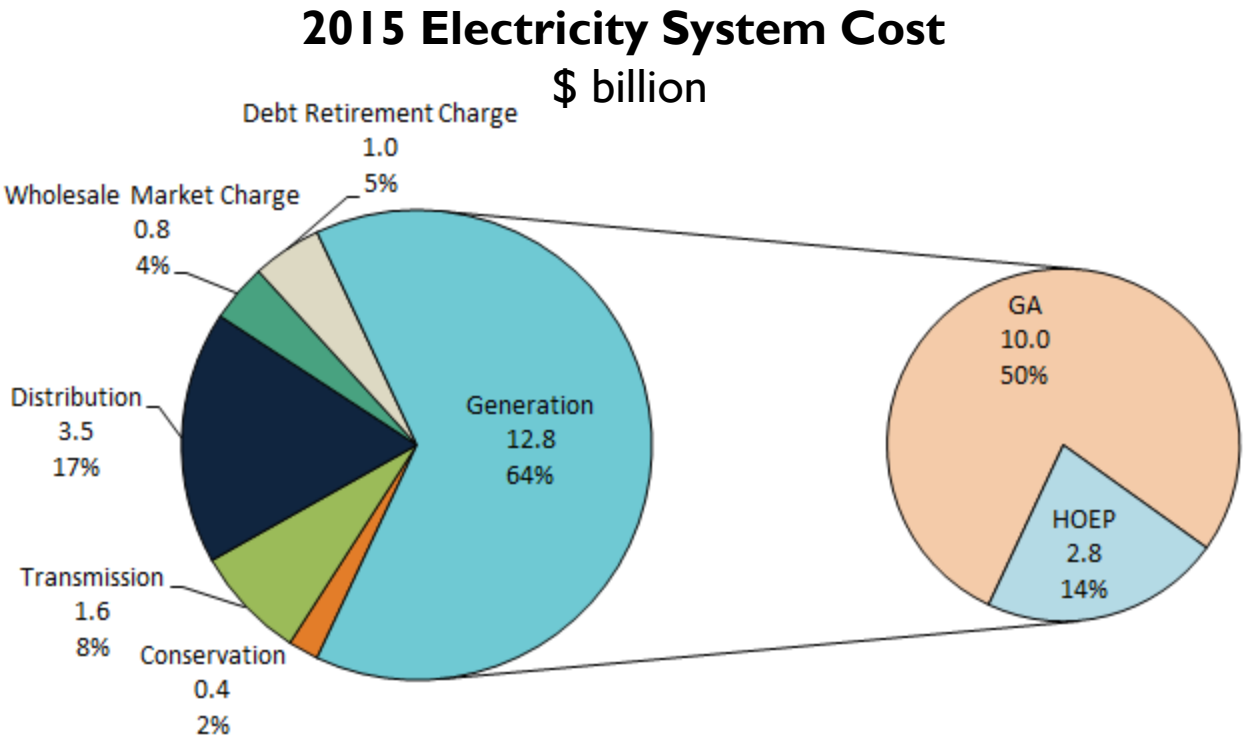
Context: Ontario's Electricity Market

- In 2015, generation accounted for 64% of total electricity system costs. Total system costs in 2015 were $20 billion.



DEFINITIONS:

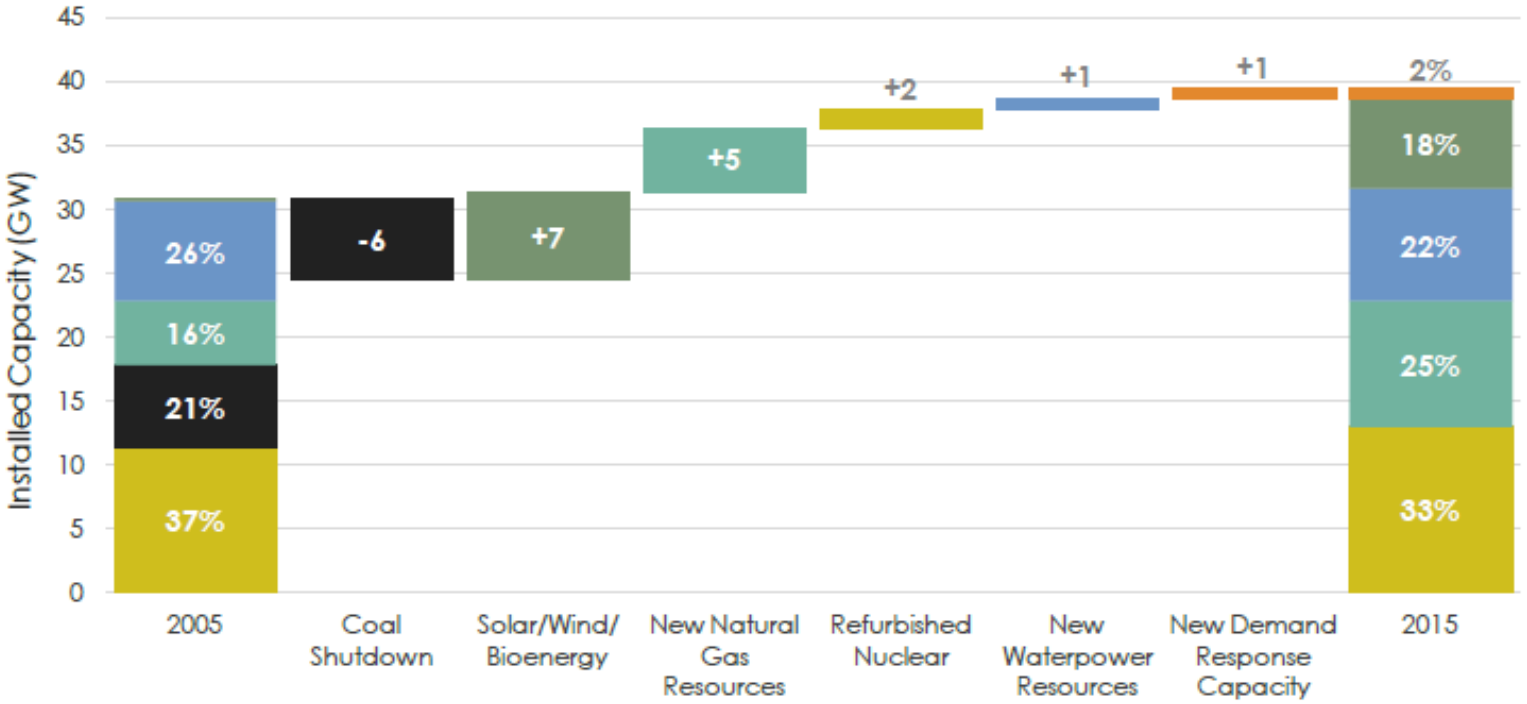
GA: The "Global Adjustment" accounts for differences between the market price of electricity and the rates paid to regulated and contracted generators and for conservations programs. The GA is collected from all electricity rates payers in Ontario

HOEP: Hourly Ontario Electricity Price.

Source: IESO

Context: Significant Change in Supply Mix

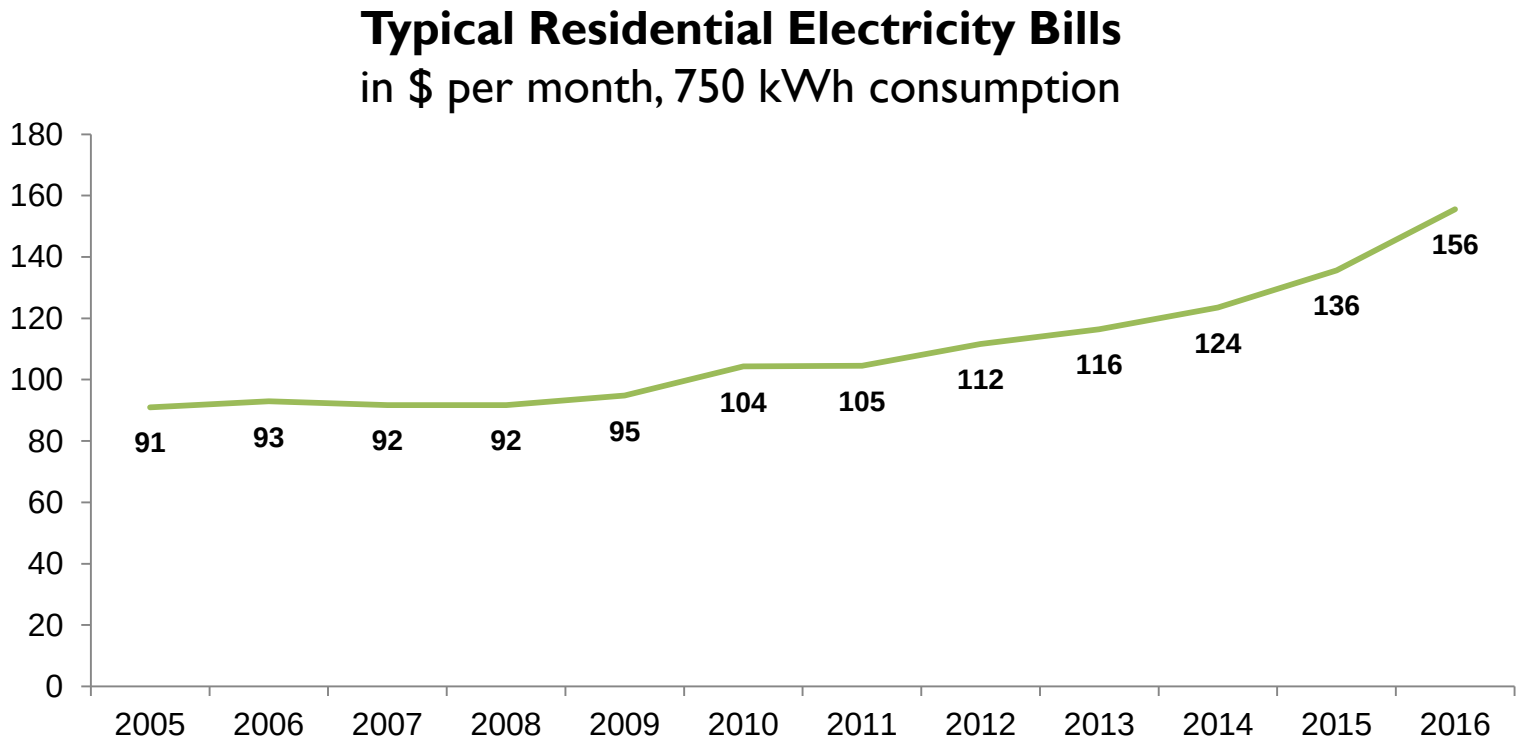
- Between 2005 and 2015, government invested more than $50 billion in the electricity system, including $35 billion in electricity generation to restore reliability, replace coal and meet environmental objectives.
  - Electricity costs are increasing as necessary investments are made to decarbonize and modernize the province's electricity infrastructure.



Source: IESO

Context: Electricity Prices Have Increased

- Since 2010, electricity prices have increased at a rate higher than the Consumer Price Index (CPI).



Source: Ministry of Energy

Overview:
Ontario's Fair Hydro Plan

Overview:
The Ontario Fair Hydro Plan ("OFHP")

- On May 31, 2017, the government passed the Ontario Fair Hydro Act, 2017, to enable the implementation of the OFHP, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).

- The measures that make up the 25 per cent average reduction include
  - Refinancing a portion of the Global Adjustment (GA) to allocate fairly the costs of Ontario's contracts for electricity infrastructure investments over the expected lifecycle of the generation infrastructure assets.
    - The Global Adjustment recovers a portion of the commodity supply and conservation costs of electricity.
  - The Ontario Rebate for Electricity Consumers, for an amount equal to the provincial portion of the HST, which took effect on January 1, 2017.
  - Shifting funding of the Ontario Electricity Support Program (OESP) and Rural or Remote Rate Protection (RRRP) program from electricity ratepayers to the province.

- People with low incomes, those served by local distribution companies (LDCs) with the highest distribution costs, OESP recipients and On-Reserve First Nation households would benefit from even greater reductions to their electricity bills.

Overview:
The Ontario Fair Hydro Plan (cont'd)

- Other measures that make up the Fair Hydro Plan include
  - Expanding the Industrial Conservation Initiative (ICI) to include electricity consumers, in the manufacturing and certain other sectors including greenhouses, with an average monthly peak demand of greater than 500 kW and less than 1 MW.
  - Expanding the OESP, by providing 50 per cent more support in the form of monthly credits for people with low incomes and increasing eligibility, effective May 1, 2017.
  - Establishing an Affordability Fund that will be accessible to LDCs for customers who do not qualify for low-income conservation programs and who are unable to undertake energy efficiency improvements without financial assistance.
  - Providing on-reserve First Nations households with a 100 per cent credit of the delivery line on their monthly electricity bills.
  - Enhancing the Rural or Remote Rate Protection (RRRP) program to provide distribution charge relief to about 800,000 customers and shift costs from ratepayers to provincial revenues. This would include customers served by local distribution companies (LDCs) with the highest rates.
  - Improving energy sector efficiency and modernize the province's electricity market, building on the collaboration of the Independent Electricity System Operator (IESO) and the Ontario Energy Board (OEB).
- The government-funded measures (OESP, RRRP, on-reserve credits and the Affordability Fund) have been estimated to cost the government about $2.5 billion in the first three years (and would have an on-going annual cost to government).

Refinancing the Global Adjustment

Refinancing the Global Adjustment

- Refinancing the Global Adjustment (GA) provides significant and immediate rate relief by spreading the cost of electricity investments over a longer period of time.
- Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction (i.e., the financed portion) in the GA would be about $2.5 billion per year on average over the first ten years.
- This measure would share the associated costs more fairly. The illustrative chart below shows how Global Adjustment (GA) cost is front-end loaded and forecast to decline over time.
- Energy and IESO forecasts are subject to update, including as part of the Ministry of Energy's current Long-term Energy Plan update process.

Forecast Global Adjustment Cost (nominal $ million)

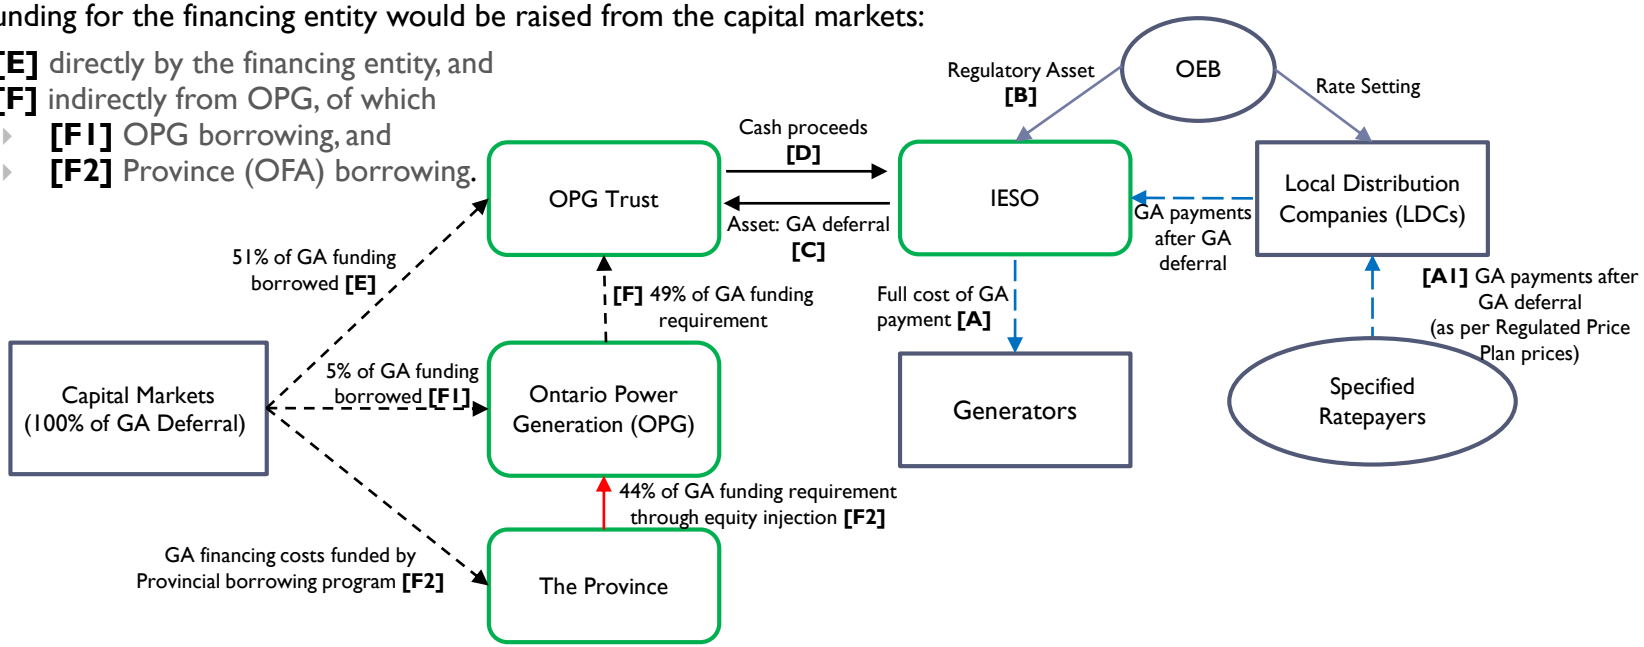
Global Adjustment Financing: Policy Rationale

- The purpose of the Global Adjustment refinancing is to
  - Ensure that clean energy costs and clean energy benefits are fairly allocated among present and future specified consumers
  - Recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province, and
  - Align clean energy costs with clean energy benefits, in order to provide fairness for specified consumers over time.
- The majority of the province's electricity generators are under 20-year contracts. Many of these generators will be able to operate past their contract term.
- By recognizing that generation assets are expected to continue to provide benefit to future ratepayers, beyond the term of current contracts, future ratepayers are expected to be able to utilize these assets and reduce the need to finance the development of new generation assets.
- In the early years, a portion of the costs covered by the GA would be financed to reduce pressure on electricity ratepayers.
- In the later years, when some system costs are expected to be reduced due to continued operation of existing assets under 20-year contracts, the cost of financing would be recovered from ratepayers through a "Clean Energy Adjustment".

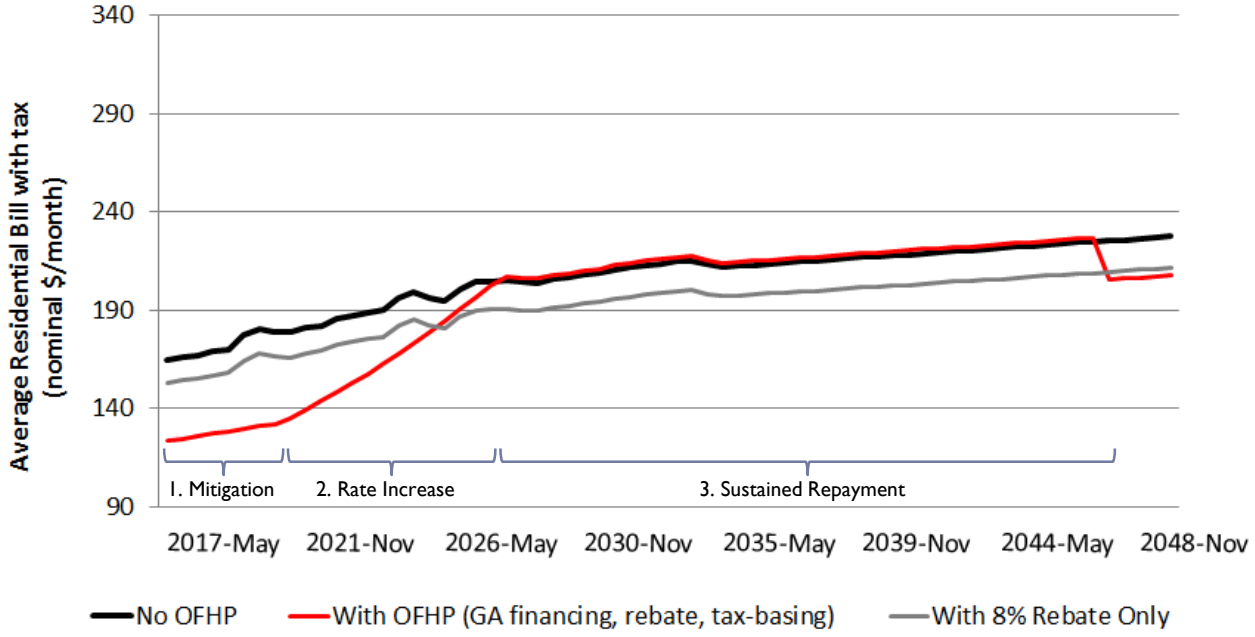
GA Financial Structure

- Through the OFHP, GA costs, including refinancing costs, will be recovered from ratepayers over a longer period of time.
  - The GA refinancing framework will be implemented through the IESO and Ontario Power Generation (OPG).
  - Under the OFHP, OPG would be able to establish a special purpose vehicle (OPG Trust) financing entity.
- **[A]** Under the OFHP, the IESO will continue to pay generators their contracted and regulated prices. **[A1]** However, LDC payments will be less, as Regulated Price Plan prices are set based on a portion of the GA deferred in order to support the initial 25% reduction (and subsequent adjustments).
- **[B]** The IESO will set up a deferral account, vis a vis a 'regulatory asset', with a right to recover the deferred costs and financing costs, as authorised by the OEB.
- **[C]** Under the Act, the Independent Electricity System Operator (IESO) would be able to sell the 'right to collect' deferred future revenue from ratepayers to the financing entity in return for cash proceeds **[D]**.
- The funding for the financing entity would be raised from the capital markets:
  - **[E]** directly by the financing entity, and
  - **[F]** indirectly from OPG, of which
    - **[F1]** OPG borrowing, and
    - **[F2]** Province (OFA) borrowing.



Global Adjustment Financing

- GA Financing structure and bill impacts can be thought of as having three phases (see illustrative chart below)



Phase 1: Mitigation

- 2017 residential bill 25% on average lower than original projection (pre-8% Ontario Rebate for Electricity Consumers).
- Increase in bill capped to 2% per year until 2021.

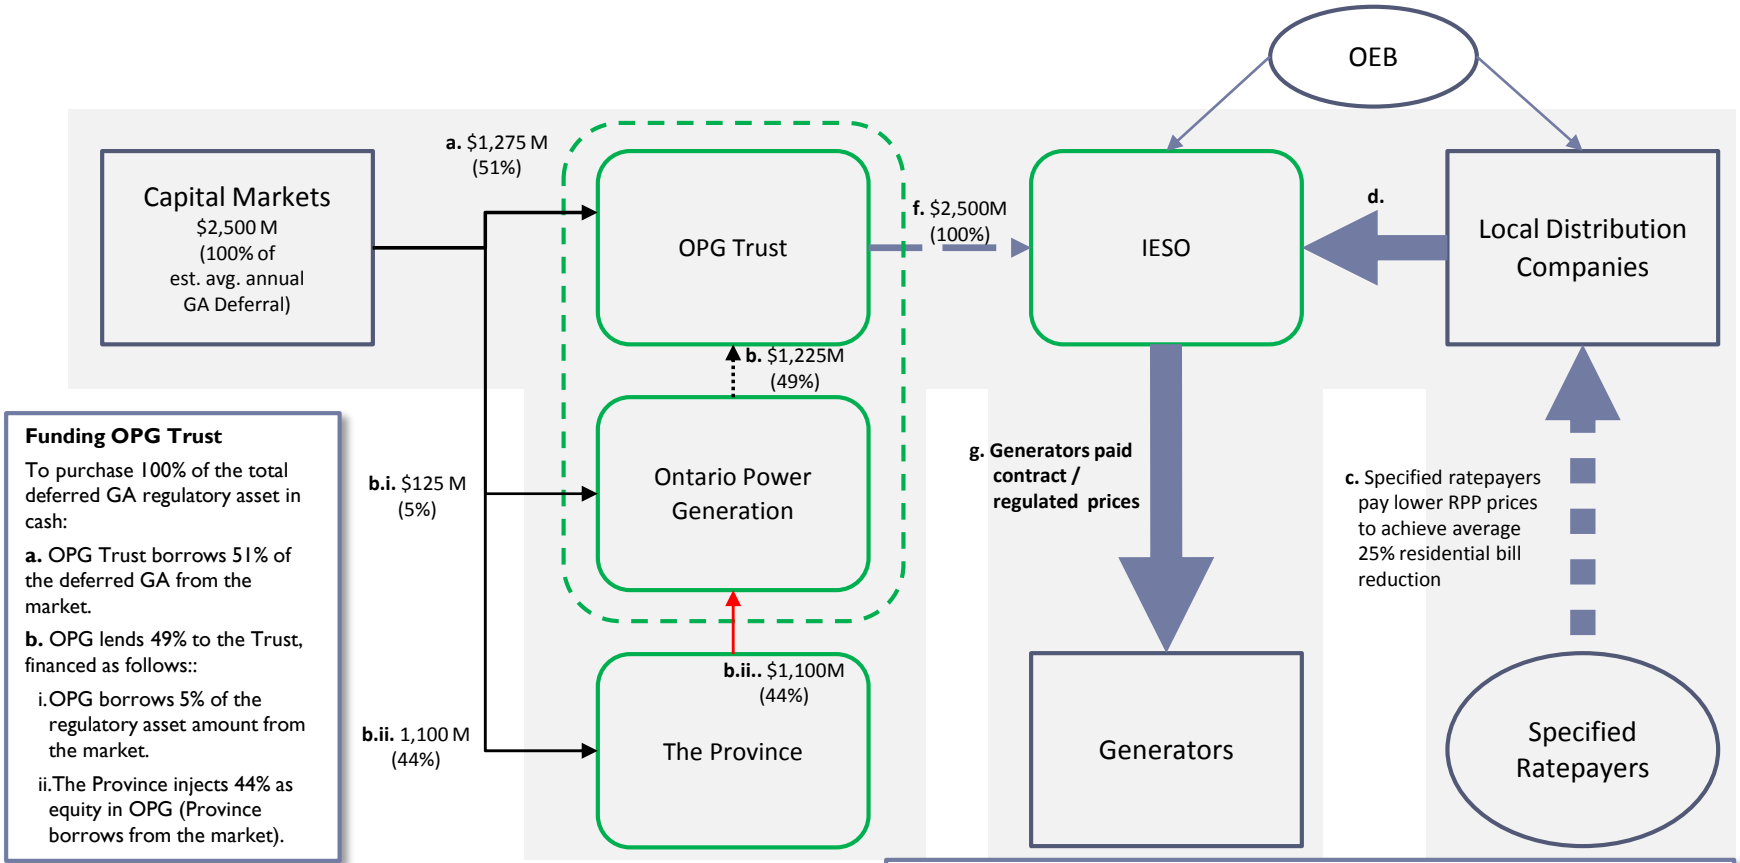
Phase 2: Rate Increase

- Residential bills continue lower than without the OFHP; however, not by 25% on average.
- Bill increases each year, limiting overall deferral and borrowing.
- Planned increases for the above purpose projected to end in 2028 when sustained repayment starts.

Phase 3: Sustained Repayment

- Bill higher than projection, excluding the GA deferral, until 2047 (estimated).
- Difference between with OFHP (red) and 8% rebate (grey) only represents recovery of deferred GA and financing.

GA Financing Structure: Illustrative Fund Flows* - Mitigation Phase



Funding OPG Trust

To purchase 100% of the total deferred GA regulatory asset in cash:

a. OPG Trust borrows 51% of the deferred GA from the market.

b. OPG lends 49% to the Trust, financed as follows::

i. OPG borrows 5% of the regulatory asset amount from the market.

ii. The Province injects 44% as equity in OPG (Province borrows from the market).

Deferral Mechanism

c. Specified ratepayers pay RPP prices, including the non-deferred portion of the GA to LDCs.

d. The LDCs remit this amount to the IESO ...

e. …The IESO recognizes a regulatory asset – the right to collect the deferred amount, and a financing cost, from ratepayers in the future.

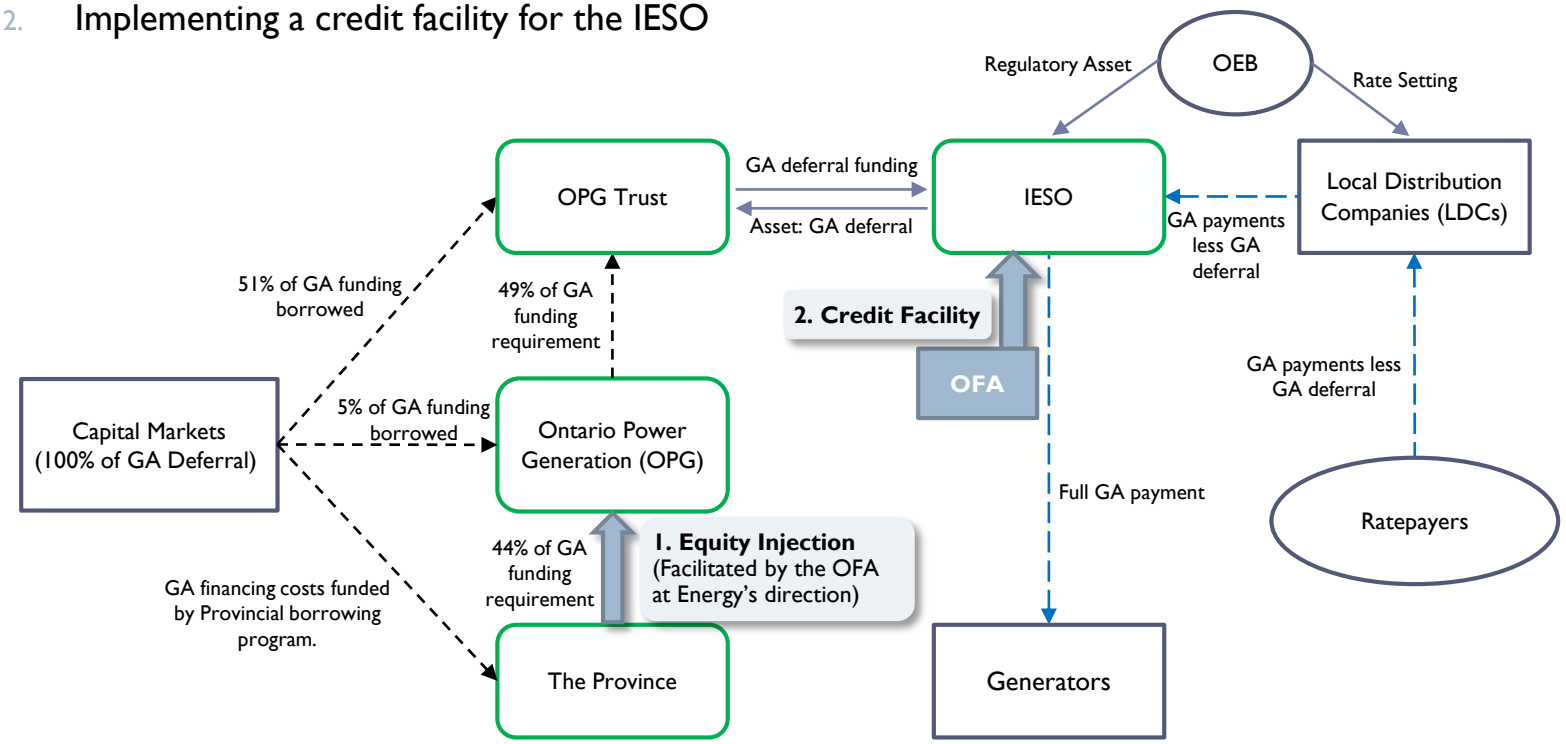
f. IESO sells this asset for cash to OPG Trust.

g. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA cost to Generators (and conservation costs).

* Amounts are illustrative and based on an assumed deferred cost, or regulatory of $2.5 billion.

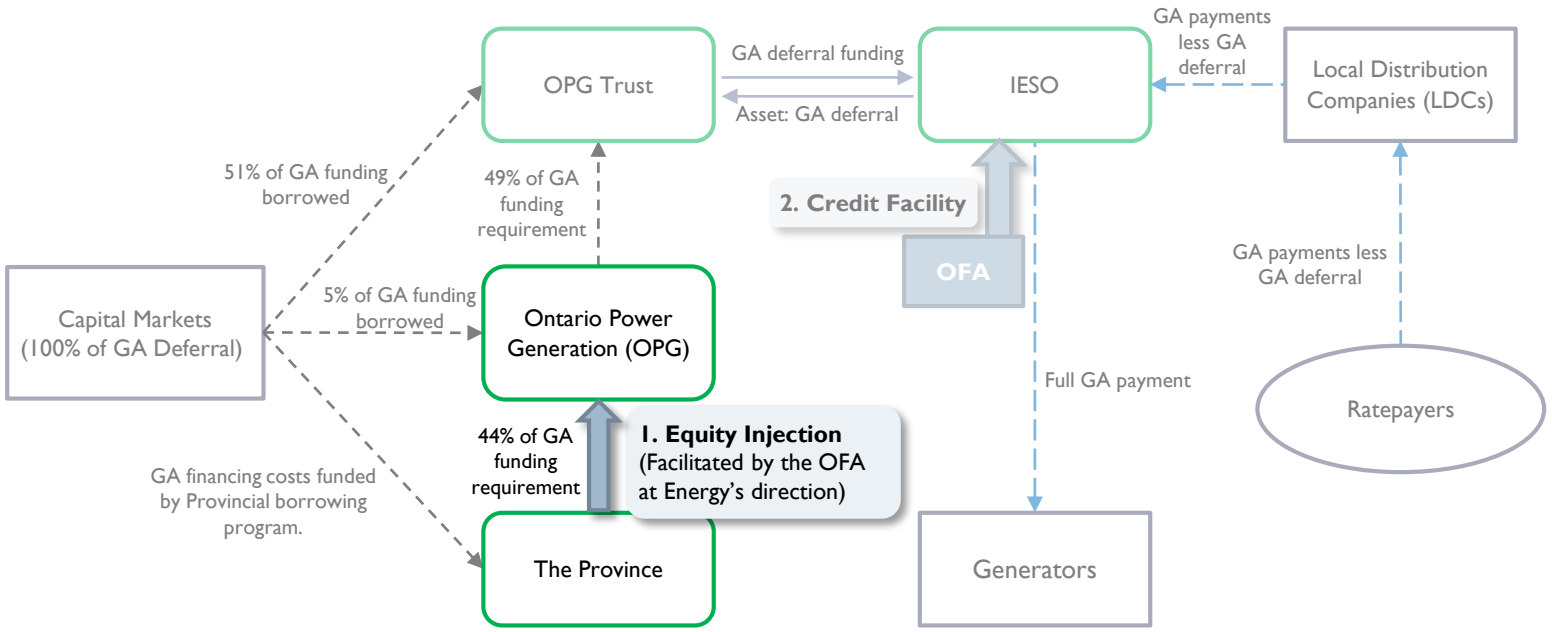
OFA Involvement with FHP Implementation

- Two aspects of the GA Financing:
  1. Facilitating the mechanism for equity injections into Ontario Power Generation. Ministry of Energy as shareholder has received an appropriation through the Treasury Board process for an operating asset expenditure to acquire the equity.
     - OFA would also be managing the Provincial borrowing program, including to support the equity injection.
  2. Implementing a credit facility for the IESO



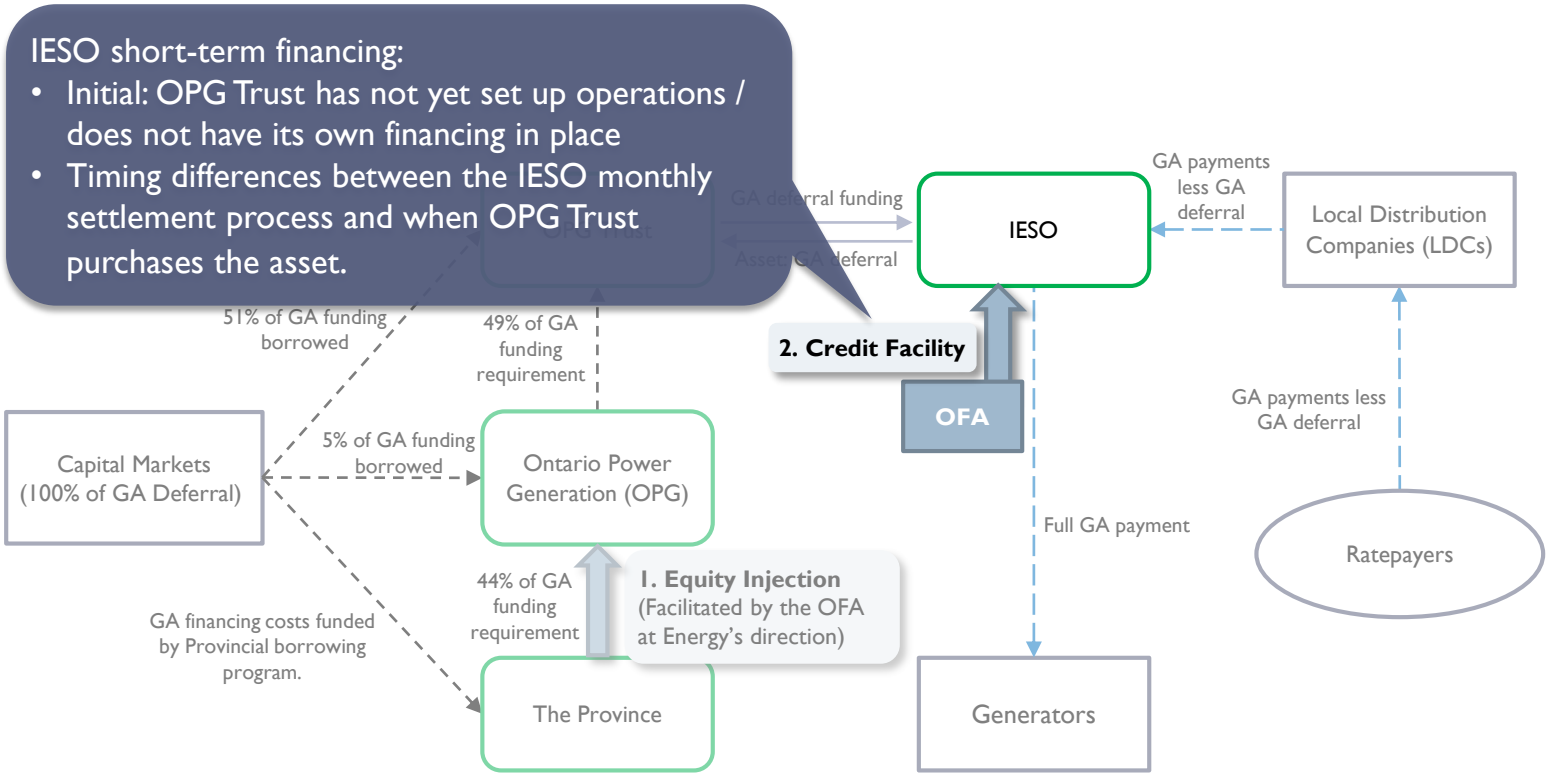
1. Equity Injection

- The 2017 Budget includes in the Ministry of Energy Estimates an investment operating asset of $1.1 bn related to the Province's equity injection to OPG. OPG would provide financing to the Trust through sub-ordinated debt, as part of the OPG Trust financing to regularly purchase IESO's regulatory asset through 2017-18.
- The structure would
  - increase gross debt of the Province (to finance the equity injection in OPG),
  - increase net investment in OPG (so no net debt impact),
  - increase interest on debt related to that external debt, which
  - on consolidation into Public Accounts, would be offset by increased earnings of OPG from sub-debt interest revenue.



2. OFA/IESO Credit Facility

- The Fair Hydro Act, 2017 provides for the IESO to sell the right to recover those deferred amounts of the global adjustment from specified consumers in the future (the "regulatory asset").
- It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG Trust"). The cash received would be used by the IESO to fund the current Global Adjustment deferral shortfall.



Risks / Cost Sensitivities

Global Adjustment Refinancing Model Assumptions

- Projected Global Adjustment Refinancing costs are affected by actual system costs and consumption, and actual interest rates.
- Variances from these key assumptions could affect actual refinancing costs, etc.

- Interest rates
  - Higher/lower Interest rates would lead to higher/lower refinancing costs
  - For example, a 1.5 percentage point lower interest rate assumption, compared to an illustrative 5% case used by the Ministry of Energy, would halve estimated cumulative interest costs, from about $21 bn to $11 bn.

- Electricity demand
  - Lower/higher electricity demand due to fewer consumers or lower/higher consumption among some consumers would increase/decrease Clean Energy Adjustment costs for remaining consumers.

- System Costs
  - Ministry of Energy is developing the updated Long-term Energy Plan (LTEP), expected to be released in about summer 2017. The LTEP is expected to include measures to continue to reduce system costs.
  - Actual system costs are expected to also be affected by other factors, such as the Ontario Energy Board rate application process.

Thanks, Lisa.

I've accepted your changes and cleaned up the draft. Based on Salman's comment, I've removed the question IESO regarding "medium" term vs short term advances.

As such, I only have one comment box left as an inquiry for IESO.

I cleaned up one typo, and the title on the Grid Note was in the wrong place.

Will – Would you please format the grid note to be on one page and resend to us.

Thanks,
Sarah

OFA shall and is unconditionally and absolutely authorized and directed by the IESO to record on the Grid Note (i) the date and amount of each Advance, including any Advance all or a portion of which is continued by election under Section 3.3; (ii) the applicable rate of interest for each Advance; (iii) the repayment date of each Advance; (iv) the date and amount of each payment of interest and each payment of principal in respect of each Advance; and (v) the outstanding principal amount of the Grid Note. Such notations, in the absence of manifest error, shall be prima facie evidence of such advances and repayments; provided that the failure of the OFA to record the same shall not affect the obligations of the Borrower to pay such amounts to the OFA.

The outstanding principal amount of each Advance under this Grid Note together with all interest accrued thereon shall become due and payable as specified in the Credit Agreement dated July (·), 2017 as amended, supplemented or restated from time to time, between the Borrower and the OFA (the "Credit Agreement"). All capitalized terms used herein and not otherwise defined herein shall have the meanings given to such terms in the Credit Agreement.

This Grid Note is issued pursuant to, and is subject to and payable in accordance with the provisions of, the Credit Agreement.

This Grid Note is not transferable or negotiable without the prior written consent of the IESO.

The IESO waives presentment for payment and notice of non-payment.

This Grid Note shall be governed by and interpreted and enforced in accordance with the laws of the Province of Ontario and the federal laws of Canada applicable therein.

IN WITNESS WHEREOF the IESO has executed this Grid Note.

OFA -- IESO CREDIT FACILITY
MINISTER OF FINANCE DIRECTIVE FOR AN EXEMPTION FROM THE INTERCEPT PROVISION ("INTERCEPT EXEMPTION DIRECTIVE")
REQUIRED UNDER THE OFA'S LENDING POLICY

CONTEXT

The IESO had requested a new revolving credit facility in an amount of up to $2 billion from the OFA to support its role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act"). In the same request, the IESO had requested a reduction to its existing credit facility (currently provided under the "Original Credit Facility Agreement", see Background section) from the current $975 million to $475 million.

On June 29, 2017, the OFA received a directive from the Minister to accommodate the IESO's request and provide a revolving credit facility to the IESO in an amount of up to $2 billion (the "OFHP Credit Facility").

Pursuant to the OFA Lending Policy, the OFA is required to include an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis, unless otherwise directed by the Minister of Finance [or Treasury Board or Cabinet]. In accordance with section 23 of the *Capital Investment Plan Act, 1993* ("CIPA"), the intercept provision allows the Minister to deduct amounts equal to any amounts the public body fails to pay to the OFA under a loan agreement from money appropriated by the Legislature for payment to the public body.

Per the requirements of the OFA's Lending Policy, the OFA is returning to request a Minister's direction to exempt the requirement to include an intercept provision in the OFHP Credit Facility agreement with the IESO, as well as the Original Credit Facility Agreement, both of which may be amended from time to time.

- The OFA Lending Policy provides the following requirement for unsecured loans to public bodies under CIPA:

  > Except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, and prior to the OFA making any loan to a public body, the OFA will [e]nsure that it has an appropriate intercept in place for the loan.

- The OFA Lending Policy also includes the following requirements in relation to the intercept provision:

  > The public body and its responsible ministry are to agree that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts that the public body fails to pay to the OFA on account of indebtedness under its loan agreement with the OFA.

RECOMMENDATION

- OFA staff recommend the Minister sign the attached Intercept Exemption Directive allowing the OFA to exclude intercept provisions from the OFHP Credit Facility Agreement, as well as the Original Credit Facility Agreement, both of which may be amended from time to time.

- The requested Intercept Exemption Directive would only apply to the two specified IESO credit facilities.

MINISTER'S DIRECTIVE

- The Minister of Finance's Intercept Exemption Directive would authorize the OFA to exempt the Original Credit Facility Agreement and the OFHP Credit Facility agreement, both as amended from time to time, from the OFA Lending Policy requirement to include an intercept provision.

RATIONALE FOR EXEMPTION

- This Intercept Exemption Directive will enable the IESO to fulfil its commitments under the OFHP Act as the IESO will have to finance for a short or medium term period the funding shortfalls in the implementation of the OFHP Act, as well as the continued implementation of the market support function for the IESO through the $475 million facility (to be amended from the current $975 million facility).

- Including an intercept provision in the credit facility agreements with the IESO would have no practical usefulness as the IESO receives no operational funding from the Province of Ontario.

- While the IESO settlements system for the electricity sector may facilitate the flow of appropriations of the Ministry of Energy for energy-related programs such as the Ontario Rebate for Electricity Consumers (OREC), the Rural or Remote Rate Protection Program (RRRP), the Ontario Electricity Support Program (OESP) etc., these payments are for the benefit of various electricity consumers.

- Intercepting these program specific payments, which are appropriated by the Legislature for the Ministry of Energy, under which the IESO may only be providing a conduit to local distribution companies under the IESO settlement system to provide benefits to ratepayers, in order to recover loan payments would not be in alignment with the wording or intent of the OFA's Lending Policy.

FISCAL IMPACT

- There is no expected incremental fiscal impact for the Province from providing an exemption from the intercept provision requirement of the OFA Lending Policy.
  - [The IESO is an entity consolidated to the Province and if there were any amounts to intercept, there would be no incremental fiscal impact of having the Intercept Exemption Provision.]

BACKGROUND

<u>The IESO</u>

- The IESO is a not-for-profit corporate entity established in 1998 by the *Electricity Act, 1998*. It is governed by an independent Board of Directors and its Chair and Directors are appointed by the Province.

- The IESO has full statute-based authority for establishing, monitoring and enforcing reliability standards in the province. All the companies that make up the power system in Ontario must meet the IESO's standards.

- Its fees and licences to operate are set by the Ontario Energy Board and it operates independently of all other participants in the electricity market.

- The IESO is a public body for the purposes of CIPA.

OFA Credit Facilities to the IESO

- Pursuant to directives dated December 22nd 2004, October 3rd, 2005, July 28th, 2006, October 14th, 2010, December 18th, 2013, and November 28, 2016, the Minister of Finance ("Minister") approved and directed the Ontario Fiancing Authority ("OFA") to make loans (the "Advances") to the Ontario Power Authority (the "OPA") from time to time in an aggregate amount not to exceed $975 million at any time, as considered necessary by the OPA to meets its purposes.

- Effective January 1, 2015, the OPA and the Independent Electricity System Operator amalgamated and continued as a corporation without share capital under Part II of the *Electricity Act*, *1998* (the "Amalgamation") with the name Independent Electricity System Operator ("IESO").

- Pursuant to the Amalgamation the obligations of the OPA became obligations of the IESO.

- The terms and conditions governing the Advances are set out in a credit agreement entered into between the OFA and the OPA dated January 1, 2005, as subsequently amended by amending agreements dated February 14, 2005, October 11, 2015, September 27, 2006, July 13, 2007, November 9, 2010, December 20, 2013, December 19, 2014 and November 30, 2016 (as so amended, the "Original Credit Facility Agreement").

MINISTER OF FINANCE

LOANS TO THE INDEPENDENT ELECTRICITY SYSTEM OPERATOR

To: Ontario Financing Authority ("OFA")

Whereas:

Under the *Capital Investment Plan Act, 1993* ("CIPA"), the OFA provides financing to public bodies as directed by the Minister of Finance ("Minister").

Effective January 1, 2015, the Ontario Power Authority (the "OPA") and the Independent Electricity System Operator amalgamated and continued as a corporation without share capital under Part II of the *Electricity Act, 1998* (the "Amalgamation") with the name Independent Electricity System Operator ("IESO").

Pursuant to directives dated December 22nd, 2004, October 3rd, 2005, July 28th, 2006, October 14th, 2010, December 18th, 2013, and November 28th, 2016, the Minister approved and directed the OFA to make loans (the "Advances") to the OPA and the IESO after the Amalgamation from time to time in an aggregate amount not to exceed $975 million at any time, as considered necessary by the OPA and IESO after the Amalgamation to meets its purposes.

Pursuant to the Amalgamation the obligations of the OPA became obligations of the IESO.

The terms and conditions governing the Advances are set out in a credit agreement entered into between the OFA and the OPA dated January 1, 2005, as subsequently amended by amending agreements dated February 14, 2005, October 11, 2015, September 27, 2006, July 13, 2007, November 9, 2010, December 20, 2013, December 19, 2014 and November 30, 2016 (as so amended, the "Original Credit Facility Agreement").

The IESO had requested a new revolving credit facility in an amount of up to $2 billion from the OFA to support the IESO's role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act"). In the same request, the IESO had requested a reduction to its existing credit facility from the current $975 million to $475 million.

Pursuant to a directive from the Minister dated June 29, 2017 (the "2017 Directive"), the OFA was directed to provide a new revolving credit facility of up to $2 billion to the IESO for the purposes of providing short to medium term financing related to the IESO's role in the implementation of the OFHP Act (the "OFHP Credit Facility").

Pursuant to the OFA Lending Policy, the OFA is required to include an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis, unless otherwise directed by the Minister, Treasury Board or Cabinet. The intercept provision applies to money appropriated by the Legislature for a public body.

The IESO is a public body for the purposes of CIPA.

As there is no operational funding appropriated by the Legislature for the IESO, the intercept provision has no application for OFA loans to the IESO.

Therefore:

The OFA is not required to include an intercept provision in the following two credit facility agreements with the IESO:

a) the Original Credit Facility Agreement, as may be amended from time to time; and,
b) the OFHP Credit Facility agreement, as may be amended from time to time.

(together, the "IESO Credit Facility Agreements")

The IESO Credit Facility Agreements shall remain subject to all other terms and conditions as set out in the applicable directives.

Hi all, I have re-drafted the directive re: IESO OFA credit facility (attached, with comments). Please review and let me know if you would like to discuss further. I note that the draft directive requires that the credit agreement between the IESO and the OFA must contain terms and conditions consistent with the directive. It also refers to the draft OIC.

DIRECTIVE

MINISTER OF FINANCE

INDEPENDENT ELECTRICITY SYSTEM OPERATOR CREDIT FACILITY

To: Ontario Financing Authority ("OFA")

Whereas:

Under the *Capital Investment Plan Act, 1993* ("CIPA"), the OFA provides financing to public bodies as directed by the Minister of Finance.

Pursuant to OIC ####, the Minister of Finance is authorized to lend a maximum of $2 billion to the OFA for the credit facility

The Independent Electricity System Operator ("IESO"), a public body for the purposes of CIPA, has requested funding from the OFA to support the IESO's role in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP").

In order to fulfil the Province's commitments under the OFHP, it is desirable for the Minister of Finance to provide direction to the OFA to provide a revolving credit facility for the purposes of short to medium term financing related to the OFHP.

~~The OFA will be borrowing funds for this requested credit facility under the authority of OIC ###.~~

Therefore:

i) **Line of Credit**

Pursuant to sub-section 16(2) of CIPA, the OFA is directed to lend to the IESO under a revolving credit facility (the "Line of Credit") for the purpose of short to medium term financing related to the IESO's implementation of the OFHP, an aggregate principal amount of up to CAD $2 billion.

The Line of Credit shall be subject to the following terms:

- The Line of Credit shall be evidenced by an agreement between the IESO and the OFA containing terms and conditions consistent with this Directive (the "Credit Agreement").

- Interest on the Line of Credit shall be payable at a rate established as of [insert], equal to the Province's cost of funds as based on the term as set out the Credit Agreement, and as determined by the Chief Executive Officer of the OFA or the Assistant Deputy Minister, Corporate and Electricity Finance Division, OFA, or a person designated by either of them, plus a twenty-five (25) basis point spread ~~to cover the OFA's lending costs~~ ("~~Cost Recovery Fee~~Spread").

- ~~Advances under t~~The Line of Credit will only be made at the request and on the recommendation of the Minister of Energy.

Commented [LS1]: Program area to confirm; differs from LRC form

Commented [SQ22R1]: Mentioned in s1 of LRC form:

oThis will help the IESO to fulfil the commitments under the *Fair Hydro Act, 2017* as the IESO will have to finance short to medium term funding shortfalls in the implementation of the Fair Hydro Plan.

Commented [SQ23]: Should this be mentioned in the second Whereas recital?

Commented [LS4]: Program area

Commented [SQ25R4]: This is a revolving credit facility, rates would be established as the OFA deems necessary, as set out in the Credit Agreement.

Commented [SQ26]: This is simply a spread – I would not classify this as a cost recovery fee.

Commented [LS7]: Business decision; program area to confirm.

Commented [SQ28R7]: Not Advances. Only the Agreement itself.

Commented [LS9]: Further discussion required. This may require the Minister of Energy to be a party to the loan agreement.

Commented [SQ210R9]: This is incorrect. The Credit Agreement will be made at the request of and recommendation of Minister of Energy, if at all – not the advances. Minister of Energy won't be a party to the proposed agreement.

DRAFT

- All amounts outstanding under the Line of Credit shall be repaid in full on or before the date no later than ~~five years after the execution of the Credit Agreement~~September 30, 2022.

- The Line of Credit shall be subject to such other terms as the OFA deems appropriate from time to time.

ii) Retention of spread

Pursuant to Order in Council ####, made under sub-section 22(1) of CIPA, the Minister of Finance is authorized to make loans to the OFA and to determine the amount of the spread to be retained by the OFA where those funds are subsequently loaned to public bodies. It is hereby determined that for the Line of Credit made under the authority of this Directive, the amount of the spread retained by the OFA shall be for the amount of the ~~Cost Recovery Fee~~Spread as set out above.

Dated , 2017

Charles Sousa

Minister of Finance

Commented [LS11]: Is this reasonable given the principal amount of the line? Previous draft provided had 40 year term (as per draft OIC). IESO has requested 5 year term in letter dated 05/12/17,

Commented [SQ212R11]: We made the decision to do the OIC for the entire OFHP period in order to avoid going back to LRC for a new OIC as we expect the requirement for a credit facility will be there.
The Directive is more aligned with the ask from IESO, and is meant to be a little tighter on the terms.

As per IESO request and previous drafts, this should say September 30, 2022.

Commented [LS13]: Confirm authorization is contained in new OIC

Commented [LS14]: As previously discussed, this is a business decision. My understanding is that this is generally retained only where there is commercial risk. Should this be remitted back to the Province?

Commented [SQ215R14]: We will be retaining this to remain consistent with past credit facility – unless otherwise advised.

Hi Will – we have reviewed OFA's draft of Amendment #10 and only have a very few comments, which I have inserted in the attached for your review/consideration, mostly just addressing drafting inconsistencies and the like.

The one substantive proposal we would make is that the termination date for this $475MM revolving loan be extended beyond the current end-date of December 31, 2019 (as stipulated in Amending Agreement #9) to be aligned with the end-date of the FHP Credit Agreement which is September 30 2022. If agreed, it would require minor amendments to sections 2.4 and 5.1(b) of the Agreement. FYI, such a change would be within the scope of the authorization provided by IESO's board resolution.

Let us know your thoughts on this.

Victor

Hello Anthony and Victor,

The Election for to roll-over a portion or all of the interest triggered a number of changes which includes updates to definitions, Section 3.2, 3.3, Schedules 1, 2 and 3.

Section 3.3(4) was added from the FHP Agreement, which addresses calculation of interest on a Continued Advance

> (4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the grid promissory note in respect of Advances in accordance with Section 3.2(2).

Reason for the scope of changes that have been added (this draft updates all of the Schedules to the Agreement and also aligns the language in the related sections of the Agreement).

Please review and comment.

Hi,

Just for clarity. Below is an example of the OFA's regular email and grid notes (see attached) that the IESO receives each month directly from the OFA.
You will note that the grid notes shows one row and its respective aggregated amount for each month's advance (previous + new).

It was noted on yesterday's call that each respective advance has its own row and # of days updated in the grid note – in practice the IESO does not see this.
I assume there is an internal OFA grid document which provides each advance as segregate rows.

Victor and I are reviewing today's draft.

INDEPENDENT ELECTRICITY SYSTEM OPERATOR

Commented [VB5]: The term "Note" is not defined in the Agreement as far as I can tell, having checked all amendments. It occurs 6 times on this page. In the 2nd para, the term "grid promissory note" is also used and means the same thing. These should be consistent. "Note" should be defined, or we could use "Grid Note" throughout, but again it's preferable for it to be defined in some manner.

Commented [LS6]: "Grid Note" now defined in s. 3.2 of Credit Agreement.

Commented [VB7]: The original 2005 agreement is not defined as or entitled "Credit Agreement", so this occurrence should be lower case.

Commented [WT8R7]: agreed

Commented [LS9]: "Grid Note" now defined in s. 3.2 of Credit Agreement.

Hello Shajee,

As part of the existing OFA IESO Revolving Credit Facility Amending Agreement No. 10 to reduce to $475 million (from $975 million), IESO has requested to extend the agreement expiry date from December 31, 2019 to September 30, 2022 to align it with the new FHP $2 billion Credit Facility. From an OEFC perspective, do you have any concerns regarding this? FYI subject to the new directive being signed we anticipate that the Amending Agreement No. 10 and FHP Credit Facility to be signed by Friday.

Hi Will – we have reviewed OFA's draft of Amendment #10 and only have a very few comments, which I have inserted in the attached for your review/consideration, mostly just addressing drafting inconsistencies and the like.

The one substantive proposal we would make is that the termination date for this $475MM

revolving loan be extended beyond the current end-date of December 31, 2019 (as stipulated in Amending Agreement #9) to be aligned with the end-date of the FHP Credit Agreement which is September 30 2022. If agreed, it would require minor amendments to sections 2.4 and 5.1(b) of the Agreement. FYI, such a change would be within the scope of the authorization provided by IESO's board resolution.

Let us know your thoughts on this.
Regards,
Victor

Hello Anthony and Victor,

The Election for to roll-over a portion or all of the interest triggered a number of changes which includes updates to definitions, Section 3.2, 3.3, Schedules 1, 2 and 3.

Section 3.3(4) was added from the FHP Agreement, which addresses calculation of interest on a Continued Advance

> (4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the grid promissory note in respect of Advances in accordance with Section 3.2(2).

Reason for the scope of changes that have been added (this draft updates all of the Schedules to the Agreement and also aligns the language in the related sections of the Agreement).

Please review and comment.

Thanks,

Will

As per Anthony's request, we making changes to the Amending Agreement No. 10 to allow IESO:

- Elect to continue all or a portion of the principal and interest .
- The advancement period of 28 days up to 95 days will remain the same.
- Section 3.3 (2) new advances will change from 1 business day to two business days prior notice because advancements under the Borrowing Notice allow for two business days' notice.

Commented [VB4]: The term "Note" is not defined in the Agreement as far as I can tell, having checked all amendments. It occurs 6 times on this page. In the 2nd para, the term "grid promissory note" is also used and means the same thing. These should be consistent. "Note" should be defined, or we could use "Grid Note" throughout, but again it's preferable for it to be defined in some manner.

Commented [VB5]: The original 2005 agreement is not defined as or entitled "Credit Agreement", so this occurrence should be lower case.

Hello Caroline,

I have spoken to Anthony and he has requested to update the existing credit facility agreement ($975 million down to $475 million) to have the same option to roll-over principle and interest. Risa Thau had no concerns from an accounting and operational standpoint. Mike Manning and James Devine also had no concerns from a Capital Markets perspective. Please include the language in the Amending Agreement No. 10 to reflect this.

I have updated the Grid note be appear the same as the FHP Grid Note. I have reviewed you're changes to the Amending Agreement No. 10 and have no other comments.

Thanks,

Will

Subject: Draft Amending Agreement No. 10

Hello,

Please find attached draft changes to Amending Agreement No. 10. I worked from the document that Will emailed to the IESO on August 18 at 3:18pm which Lisa shared with me. Please let me know if you have any comments/questions/changes or would like to discuss.

This draft updates all of the Schedules to the Agreement. We also thought it would be prudent to align the language in the related sections of the Agreement. If you are forwarding this to the IESO, please let them know that this is the reason for the scope of the changes that have been included.

I also wanted to flag that Mike Manning's new title should be used on any documents that he signs (Executive Director & Chief Investment Officer).

Thanks,

Caroline

As discussed, the extension date of the existing $475 million Revolving Credit Facility to align with the FHP Revolving Credit Facility will be deferred to a future amended and restated agreement. We have included minor edits. Please review and comment.

Hi Will – we have reviewed OFA's draft of Amendment #10 and only have a very few comments, which I have inserted in the attached for your review/consideration, mostly just addressing drafting inconsistencies and the like.

The one substantive proposal we would make is that the termination date for this $475MM revolving loan be extended beyond the current end-date of December 31, 2019 (as stipulated in Amending Agreement #9) to be aligned with the end-date of the FHP Credit Agreement which is September 30 2022. If agreed, it would require minor amendments to sections 2.4 and 5.1(b) of the Agreement. FYI, such a change would be within the scope of the authorization provided by IESO's board resolution.

Let us know your thoughts on this.
Regards,
Victor

Hello Anthony and Victor,

The Election for to roll-over a portion or all of the interest triggered a number of changes which includes updates to definitions, Section 3.2, 3.3, Schedules 1, 2 and 3.

Section 3.3(4) was added from the FHP Agreement, which addresses calculation of interest on a

Continued Advance

(4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the grid promissory note in respect of Advances in accordance with Section 3.2(2).

Reason for the scope of changes that have been added (this draft updates all of the Schedules to the Agreement and also aligns the language in the related sections of the Agreement).

Please review and comment.

Thanks,

Will

Hello gentleman,

I have been informed by a colleague that we are instructed by the deputy minister for us to pursue our minister to sign the directive for early next week.

As per Anthony's request, we making changes to the Amending Agreement No. 10 to allow IESO:

- Elect to continue all or a portion of the principal and interest .
- The advancement period of 28 days up to 95 days will remain the same.
- Section 3.3 (2) new advances will change from 1 business day to two business days prior notice because advancements under the Borrowing Notice allow for two business days' notice.

Sorry for the inconvenience.

Hello Anthony,

We have reviewed the grid note you provided and your observation is correct that you are provided with one line item with the consolidated total amount compared to the distinct separate the advances we originally understood.

Yes, we have access to a version of the grid note that separates the advances that is not provided to you, which caused the confusion.

Does the revised Section 3.3(2) and Schedule 2 (Form of Election Notice) still functional to you?

Thanks,

Hi,

Just for clarity. Below is an example of the OFA's regular email and grid notes (see attached) that the IESO receives each month directly from the OFA.
You will note that the grid notes shows one row and its respective aggregated amount for each month's advance (previous + new).

It was noted on yesterday's call that each respective advance has its own row and # of days updated in the grid note – in practice the IESO does not see this.
I assume there is an internal OFA grid document which provides each advance as segregate rows.

Victor and I are reviewing today's draft.

Regards.

Hi Lisa and everyone,

Along with comments from Ken over the weekend, just circling everyone in on the latest information from TBS. Pls. advise if your assessment changes but to me, TBS appears to be advising that Green ON Fund is not IESO's operation expense/allocation but allocation from MOECC to Green ON Fund.

Also, IESO staff have thus far signalled positively on the letter agreement. We are potentially looking about 2 days to conclude the process.

One caveat is that OPG is requesting that the trust be given first priority/security over all IESO assets. While the issue is still being discussed, if this is to proceed, the IESO will have to amend its current facilities. I would consider this almost as a separate issue in that if the scenario plays out, then we would need to look at and potentially open up all existing facilities.

John, I checked with our MOECC analyst, Green ON Fund is an agency of MOECC and is flowing funding to IESO.

Hi James,

The Green ON Fund…am I correct to think that this is also not part of IESO's operating expense/allocation? As for the items below (for Energy), it is a program expense facilitated through the IESO?

Thanks,

John

Sorry for the delay, had to dig in the email archives.

There is no IESO allocation in Printed Estimates. There is an OREC transfer payment. In the 17-18 PRRT workbook for OREC is the following:

- Electricity utilities are reimbursed by submitting and receiving claims which are netted against their other monthly transactions from the IESO, and the IESO submits and receives one monthly amount from the Ontario Financing Authority on behalf of the Ministry of Energy – this process is streamlined and leverages an already existing reimbursement process, thereby minimizing costs.

The second attachment, email, contains the consolidation worksheet from OPCD. For IESO, I don't see any Transfer Payment flows in from the Province.

Is there a way to quickly see if any allocations were made for the IESO? Whichever way is good. We just want to confirm there is no appropriation for the IESO's operation or operating expense.

Hi Will. I understand from Anthony that the November advances etc have now occurred under the new FHP line of credit and the 2005 line of credit.

Just wanted to check in with you on arranging for the exchange of the Grid Notes regarding the 2005 line of credit i.e. we will provide to OFA the new $475MM Note in exchange for the return to us of the old $975MM Note.

Let me know what your standard practice is.

Thanks,
Victor

Hello all,

I thought we should meet to plot out the following:

1. MOF Legal update (if Toby provides Lisa with an update prior to this meeting).
2. Status update message to IESO. (general message, timeline, temporary use of the $975 million CF etc.)
3. Go over FHP Agreement and when to provide draft to IESO.
4. Next steps.

Thanks,

Hi John – The directive I'm referring to would be the second one, the directive to amend the existing facilities once the intercept was in place, should that be requested. That was Gadi's view, I think on the basis that it would be removing something at OPG's request after the intercept was already in place, rather than at first instance, and if we couldn't manage to obtain a directive it would lead to OPG having to borrow at a lower credit rating.

I think Anna has a better handle on the various dynamics at play between the various players which were underlying Gadi's concern. I noted these were issues better addressed by CEFD, just wanted you to be aware this had come up today as I expect this will move fast (hopefully) in the coming days.

Hi Sarah,

The second paragraph action was taken, re: required approvals for amending the facility or facilities in place.

As for the third paragraph, you mention that obtaining a directive later will be more difficult than it would now. Which directive are you referring to? Are you referring to 1. The directive to exempt the intercept provision or 2. The directive to amend the existing facility or possibly facilities (if we have the FHP one executed in the next few days [TBD]). If both facilities are put in place and the situation calls for an amendment (#2) to grant OPG priority of payments/assets, why would there be

greater difficulty on reacting to a scenario that we do not have any certainty to as of this point in time.

Thanks,

John

Hi John and Francisco –

By way of heads up, I just had my weekly with Gadi and he asked me about the FHP. I noted the time pressures and that both policy options were still on the table (directive/intercept) but that correspondence from this morning indicated IESO may be getting ready to include intercept as comments had been received on the tri-partite letter this morning.

We also discussed at a high level the OPG security request in respect of IESO assets, and I summarized our discussion from Friday and my advice to communicate to IESO (which advice was followed) that OFA can't make any representations that the agreements could or would be amended in the future, absent required approvals, should IESO wish to remove the intercept at a later date.

Gadi was somewhat concerned that if this option is pursued the OPG security issue should be resolved in advance of concluding the loan agreement with the IESO on the basis that in his view obtaining a directive later will be more difficult than it would be now. I am not sure this is possible given timing and I know we had canvassed this at our meeting last week so wanted to flag the concern Gadi raised for you so that you can address it as this moves through the decision making process.

Please let me know if you have any questions.

Good morning Lisa,

Anthony has notified us of his intentions on Nov 21, to move the entire balance of $840mm + new advance, to the $2B credit facility. I have put together a timeline/checklist based on the aforementioned scenario in an effort to get everyone on the same page. You will notice that the FHP credit facility is set-up first to be available when the transfer is eventually ready to be done. The Amending Agreement No. 10 will be signed and reduced closer to the time of the transfer.

Please find the attached checklist outlining the order of events. I have also created a separate internal checklist. Please review both checklists so I may share the **EXTERNAL** checklist it with Anthony.

Subject: RE: FHP Credit Facility Agreement

Hi Will. Attached you will find IESO's mark-up of the FHP Credit Facility Agreement. Most of the changes are self-explanatory, but it may be helpful if I provide a few words of explanation about the more substantive changes:

1. We added paragraph (k) to the definition of "Permitted Liens" to address the possibility that the Clean Energy Adjustment funds collected by IESO might be considered to be subject to a lien, and we did not want to be inadvertently in default. (Please note that, assuming this addition to the definition of "Permitted Liens" is acceptable, the same or similar language should also be added to the definition of Permitted Liens in Amending Agreement #10 to the existing OFA line of credit that we discussed yesterday.)

2. We amended Section 2.2 Use of Proceeds as shown in the draft because: (i) there is a possibility that the funding provided under the FHP Credit Agreement may accumulate and be outstanding for an extended period of time (i.e. in excess of 12 months); and (ii) the use of the terminology "cash flow timing differences" does not seem appropriate given its implication of a shorter-term funding requirement (something on the order of month-to-month), taking into account all of the obligations of IESO under the FHP.

3. We amended the exceptions to the *pari passu* requirement under Section 3.3(5) to avoid a

conflict with the different list of exceptions in s.4.6, the negative pledge. An alternative, and arguably cleaner, way of avoiding the conflict between s.3.3(5) and s.4.6 would be to delete the *pari passu* requirement in s.3.3(5) altogether, since the negative pledge in s.4.6 already contains more tailored language that performs essentially the same function.

In addition to the above changes marked-up directly on the document, in general with respect to all revolving lines, it seems that the definition of "Advances" should probably also include Continued Advances where an Election Notice is used (though I didn't make any changes to reflect this). I say this because Advances can become Continued Advances through an initial Election Notice, and then those Continued Advances can be continued again as further Continued Advances, and so on. In other words, the practice and intent of IESO and OFA has been and continues to be that an original Advance can be Continued (rolled-over) many times but, unless I am missing something, the language and definitions do not quite capture that intent. It might be easier if I were to discuss what is essentially a drafting point with your Legal Counsel assigned to this – as I say, it's entirely possible that I am simply missing something here.

I didn't know who would be reviewing this from your Legal group, so did not copy anyone else at OFA – I will rely on you to forward it as required.

Regards,
Victor

Subject: RE: FHP Credit Facility Agreement

Hi Will. Attached you will find IESO's mark-up of the FHP Credit Facility Agreement. Most of the changes are self-explanatory, but it may be helpful if I provide a few words of explanation about the more substantive changes:

1. We added paragraph (k) to the definition of "Permitted Liens" to address the possibility that the Clean Energy Adjustment funds collected by IESO might be considered to be subject to a lien, and we did not want to be inadvertently in default. (Please note that, assuming this addition to the definition of "Permitted Liens" is acceptable, the same or similar language should also be added to the definition of Permitted Liens in Amending Agreement #10 to the existing OFA line of credit that we discussed yesterday.)

2. We amended Section 2.2 Use of Proceeds as shown in the draft because: (i) there is a possibility that the funding provided under the FHP Credit Agreement may accumulate and be outstanding for an extended period of time (i.e. in excess of 12 months); and (ii) the use of the terminology "cash flow timing differences" does not seem appropriate given its implication of a shorter-term funding requirement (something on the order of month-to-month), taking into account all of the obligations of IESO under the FHP.

3. We amended the exceptions to the *pari passu* requirement under Section 3.3(5) to avoid a conflict with the different list of exceptions in s.4.6, the negative pledge. An alternative, and arguably cleaner, way of avoiding the conflict between s.3.3(5) and s.4.6 would be to delete the *pari passu* requirement in s.3.3(5) altogether, since the negative pledge in s.4.6 already contains more tailored language that performs essentially the same function.

In addition to the above changes marked-up directly on the document, in general with respect to all revolving lines, it seems that the definition of "Advances" should probably also include Continued Advances where an Election Notice is used (though I didn't make any changes to reflect this). I say this because Advances can become Continued Advances through an initial Election Notice, and then those Continued Advances can be continued again as further Continued Advances, and so on. In other words, the practice and intent of IESO and OFA has been and continues to be that an original Advance can be Continued (rolled-over) many times but, unless I am missing something, the language and definitions do not quite capture that intent. It might be easier if I were to discuss what is essentially a drafting point with your Legal Counsel assigned to this – as I say, it's entirely possible that I am simply missing something here.

I didn't know who would be reviewing this from your Legal group, so did not copy anyone else at OFA – I will rely on you to forward it as required.

Regards,
Victor

Advance; and (c) the new Repayment Date of the proposed Continued Advance, which shall be no earlier than 5~~7~~ days and not later than 95 days after the current Repayment Date. If the IESO fails to deliver an Election Notice to the OFA for any Advance as provided herein, such Advance shall be repayable on the applicable Repayment Date.

(3) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the Grid Note in accordance with Section 3.2(2).

(4) Any portion of an Advance not continued for a further period in accordance with Section 3.3(2) shall be repayable on the applicable Repayment Date.

(5) The Credit Facility shall at all times rank *pari passu* with all other unsubordinated Indebtedness of the IESO, subject to the existence of (i) any Permitted Liens of the IESO, and (ii) any other Liens that secure Indebtedness in accordance with Section 4.6 hereof.

(6) All amounts owing in respect of the Advances shall be paid without exercising any right of~~or~~ set off or counterclaim by the IESO.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the Province of Ontario's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

(3) If the IESO elects to continue an Advance in accordance with Section 3.3(2), the OFA shall determine the interest rate applicable after the original Repayment Date of the Advance and endorse the said rate on the grid forming part of the Grid Note in respect of Advances held by it.

Section 3.5 Conditions Precedent

The obligation of the IESO to make the Advances pursuant to Section 2.1 is subject to the following conditions being satisfied to the OFA's satisfaction at the time of making each Advance:

The e-mail chain below, and esp. the e-mail from Victor Buza (IESO) may shed some light on your questions, specifically with respect to the "permitted liens" and the negative pledge. Please review and then let me know if you would like to discuss further.

Thank you,

Subject: RE: FHP Credit Facility Agreement

Hi Lisa,

Further to our call yesterday, we are fine retracting the comment about the criminal rate of interest and maintaining this language. Also, the intention is not to secure the $2 billion revolving credit facility agreement against any IESO assets but I think it would be helpful to confirming this with Victor just to be sure. We reviewed sections 3.3(5) and 4.6 again and do not believe IESO would be offside so long as this revolving credit facility agreement was treated equally with all other unsubordinated obligations. As we are not aware which IESO liabilities may be secured against assets and who may have a priority claim against these assets, we think the language should remain as is. What we do know is that only that certain types of liens will be permitted under this agreement. The language we commonly use for the Province to describe this type of debt is: "direct, unsecured, unsubordinated obligations".

Happy to discuss further and we will make the changes to the form of notices once we received your revised draft.

Best regards,

JF

We do not have the exact definitions of RRRP and RPP as they relate to the FHP and it is our position that IESO may be in a better position to define these. Opal and I discussed this yesterday and felt that the references to RRRP and RPP should be included in the form of notices seeing how we already account for these separately for interest tracking purposes under the existing $975M agreement.

> **Subject:** RE: FHP Credit Facility Agreement

Hi JF,

I'm in the process of working on the latest draft and I'm waiting to speak to Victor Buza regarding a couple of drafting matters. In the meantime, do you want to send me the new definitions or should I send you the latest black-line (still in progress) and you can incorporate and send back to me?

Also, it is no longer necessary to copy Sarah N. on these e-mails. I will keep her in the loop as necessary.

Thanks,

Lisa

Hi Lisa,

One additional important comment we have is that we believe we should consider incorporating language to distinguish between the "Rural or Remote Electricity Rate Protection (RRRP) variance" and the "Regulated Price Plan (RPP) variance" since we noted that on the last two Election Notices provided to the OFA on July 19, 2017, IESO made this distinction. Furthermore, the advances related to RRRP and RPP are tracked separately in the OFA's loan system (OLMS), so the new Revolving Credit Facility Agreement should probably include such definitions and placeholders in the form of borrowing and election notices and possibly also the grid note itself.

Happy to discuss further.

Many thanks,
Jean-Francois

Subject: RE: FHP Credit Facility Agreement

Hi Will. Attached you will find IESO's mark-up of the FHP Credit Facility Agreement. Most of the changes are self-explanatory, but it may be helpful if I provide a few words of explanation about the more substantive changes:

1. We added paragraph (k) to the definition of “Permitted Liens” to address the possibility that the Clean Energy Adjustment funds collected by IESO might be considered to be subject to a lien, and we did not want to be inadvertently in default. (Please note that, assuming this addition to the definition of “Permitted Liens” is acceptable, the same or similar language should also be added to the definition of Permitted Liens in Amending Agreement #10 to the existing OFA line of credit that we discussed yesterday.)

2. We amended Section 2.2 Use of Proceeds as shown in the draft because: (i) there is a possibility that the funding provided under the FHP Credit Agreement may accumulate and be outstanding for an extended period of time (i.e. in excess of 12 months); and (ii) the use of the terminology “cash flow timing differences” does not seem appropriate given its implication of a shorter-term funding requirement (something on the order of month-to-month), taking into account all of the obligations of IESO under the FHP.

3. We amended the exceptions to the *pari passu* requirement under Section 3.3(5) to avoid a conflict with the different list of exceptions in s.4.6, the negative pledge. An alternative, and arguably cleaner, way of avoiding the conflict between s.3.3(5) and s.4.6 would be to delete the *pari passu* requirement in s.3.3(5) altogether, since the negative pledge in s.4.6 already contains more tailored language that performs essentially the same function.

In addition to the above changes marked-up directly on the document, in general with respect to all revolving lines, it seems that the definition of “Advances” should probably also include Continued Advances where an Election Notice is used (though I didn’t make any changes to reflect this). I say this because Advances can become Continued Advances through an initial Election Notice, and then those Continued Advances can be continued again as further Continued Advances, and so on. In other words, the practice and intent of IESO and OFA has been and continues to be that an original Advance can be Continued (rolled-over) many times but, unless I am missing something, the language and definitions do not quite capture that intent. It might be easier if I were to discuss what is essentially a drafting point with your Legal Counsel assigned to this – as I say, it’s entirely possible that I am simply missing something here.

I didn’t know who would be reviewing this from your Legal group, so did not copy anyone else at OFA – I will rely on you to forward it as required.

Regards,
Victor

Welcome back!

There were some additional edits to the agreements last week related to the form of Election Notice. I have uploaded all my emails to the matter site. I didn't cc you on all my emails, but Will added you to most of his emails.

Once you have had a chance to settle in, do you want to have a quick call with Will and Sarah to talk about the current status of the agreements?

Thanks,

Will – see attached $2B draft for your review.
As discussed, we amended the election notice to make it more efficient for both IESO and OFA.
We will await your comments on this $2B draft before we make draft comments on the amendment #10 – as we likely should revise amendment #10's borrowing/election form notices to align with the attached $2B draft.

ARTICLE 2
REVOLVING CREDIT FACILITY

Section 2.1 Availability.

The OFA agrees, on the terms and conditions of this Agreement, to make Advances to the IESO. The OFA shall make each Advance in Dollars.

Section 2.2 Use of Proceeds.

The IESO shall use the proceeds of Advances for the purposes for which it is authorized to borrow funds pursuant to Regulation 280/14 made under the *Electricity Act, 1998*, subject to the condition that proceeds of Advances may be used only for IESO's financing needs and requirements of any kind arising in connection with the IESO's role with respect to and obligations under the OFHP.

Section 2.3 Credit Facility Limit.

The Advances Outstanding shall not at any time exceed the Commitment. The Credit Facility shall revolve and no payment under the Credit Facility shall reduce the Commitment.

Section 2.4 Mandatory Repayment.

Subject to Sections 2.5 and 5.2, the IESO shall repay each Advance together with the interest accrued thereon on the applicable Repayment Date, and, in any event, shall repay all Advances Outstanding, together with all accrued interest and all other amounts owing hereunder on September 30, 2022.

Section 2.5 Prepayments.

The IESO is not entitled to prepay any part of the Advances Outstanding or the interest accrued thereon without the prior written consent of the OFA.

Section 2.6 Payments under this Agreement.

(1) The OFA shall make Advances to the IESO under this Agreement to or to the order of the IESO by wire transfer of immediately available funds in accordance with wire transfer instructions given by the IESO to the OFA from time to time, or in such other manner as the IESO may specify to the OFA from time to time.

(2) The IESO shall make any payment required hereunder to be made by it to the OFA, to or to the order of the OFA, by wire transfer of immediately available funds in accordance with wire transfer instruction given by the OFA to the IESO from time to time, or in such other manner as the OFA may specify to the IESO from time to time. The IESO shall make each such payment in Canadian Dollars.

Section 2.7 Computations of Interest.

(1) All computations of interest shall be made by the OFA taking into account the actual number of days (including the first day but excluding the last day) occurring in the period for which such interest is payable on the basis of a year of 365 days or 366 days, as the case may be.

(2) For the purposes of disclosure pursuant to the *Interest Act* (Canada), the yearly rate of interest which is equivalent to a rate of interest payable under this Agreement for any period of less than a year may be determined by multiplying the rate of interest for such period by a fraction, the numerator of which is the actual number of days in a year commencing on and including the first day in such period and ending on but excluding the corresponding day in the next calendar year and the denominator of which is the actual number of days in such period.

Section 2.8 Limit on Rate of Interest.

(1) Notwithstanding any provision contained in this Agreement, the IESO shall not be obliged to make any payments of interest or other amounts payable to the OFA hereunder in excess of the amount or rate which would be prohibited by applicable law or would result in the receipt by the OFA of interest at a criminal rate (as such terms are construed under the *Criminal Code* (Canada)).

(2) In the event that any such payments are limited or prohibited as provided in Section 2.8(1), the OFA shall have no further obligation to make any Advances available hereunder and the Advances Outstanding, together with all accrued interest and all other amounts owing hereunder, shall become immediately due and payable.

Section 2.9 Application of Payments.

All payments made by the IESO under this Agreement shall be applied firstly to the payment of interest payable to the OFA on late payments of principal or interest hereunder, secondly, to the payment of accrued and unpaid interest payable to the OFA hereunder and thirdly, to the payment of the outstanding principal amount of any Advances payable to the OFA.

ARTICLE 3
ADVANCES

Section 3.1 Advances.

The OFA agrees, on the terms and conditions of this Agreement, to make Advances to the IESO under the Credit Facility from time to time on any Business Day prior to September 23, 2022.

Section 3.2 Procedure for Advances.

(1) Subject to Section 3.3(5), each Advance shall be made subject to two Business Days' prior notice given not later than 10:00 a.m. (Toronto time) by the IESO to the OFA. Each notice of an Advance (a "**Borrowing Notice**") shall be substantially in the form of Schedule 1, other than a Borrowing Notice that is included in an Election Notice as permitted by Section 3.3(3). Each Borrowing Notice shall be irrevocable and binding on the IESO and shall specify (a) the requested date of the Advance; (b) the principal amount of the Advance, and (c) the Repayment Date of the Advance which shall not be earlier than 5 days and not later than 95 days after the date of the requested Advance. Each Borrowing Notice shall also certify the use of proceeds of the Advance in accordance with Section 2.2. The OFA will make the principal amount of each Advance available to the IESO in accordance with Article 2.

(2) On or before the date of the first Advance hereunder, the IESO shall execute and deliver to the OFA a grid promissory note in respect of Advances substantially in the form of Schedule 3 (the "**Grid Note**"). The IESO authorizes the OFA to record on the Grid Note (a) the date and amount of each Advance or Continued Advance; (b) the applicable rate of interest for each Advance or Continued Advance; (c) the Repayment Date of each Advance or Continued Advance; (d) the date and amount of each payment of interest and each payment of principal or portion thereof in respect of each Advance or Continued Advance; and (e) the outstanding principal amount of the Grid Note. Such notations, in the absence of manifest error, shall be *prima facie* evidence of the such advances and repayments; provided that the failure of the OFA to record any amount, rate or date shall not affect the obligation of the IESO to pay the Advances Outstanding and all interest accrued thereon and any other amounts due under this Agreement.

Section 3.3 Elections Regarding Advances.

(1) The IESO may elect to continue all or a portion of the principal amount of any Advance and any amount of interest on such Advance (together, the "**Continued Advance**") for a further period of at least 5 days and up to a maximum of 95 days beginning on the then current Repayment Date in accordance with Section 3.3(2).

(2) Each notice to continue an Advance for a further period (an "**Election Notice**") shall be provided by the IESO to the OFA at least two Business Days prior to the Repayment Date of the Advance (the "**Current Repayment Date**"), and in each case, not later than 10:00 a.m. (Toronto time). Each such Election Notice shall be given substantially in the

form of Schedule 2 and shall be irrevocable and binding upon the IESO and shall specify: (a) the Current Repayment Date; (b) the new aggregate total amount of the proposed Continued Advance; (c) the amount of interest or principal, if any, to be paid or re-paid by the IESO with respect to such Advance on the Current Repayment Date; and (d) the new Repayment Date of the proposed Continued Advance, which shall be no earlier than 5 days and not later than 95 days after the current Repayment Date (the "**New Repayment Date"**). If the IESO fails to deliver an Election Notice to the OFA for any Advance as provided herein, such Advance shall be repayable on the applicable Repayment Date.

(3) An Election Notice with respect to a proposed Continued Advance may include a Borrowing Notice for a further Advance proposed to be made on the Current Repayment Date. The Repayment Date of such further Advance shall be the New Repayment Date of the Continued Advance that is specified in the Election Notice. Such Borrowing Notice shall be given substantially in the form of Schedule 2.

(4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the Grid Note in accordance with Section 3.2(2).

(5) Any portion of an Advance not continued for a further period in accordance with Section 3.3(2) shall be repayable on the applicable Repayment Date.

(6) The Credit Facility shall at all times rank *pari passu* with all other unsubordinated and unsecured Indebtedness of the IESO, subject to the existence of any Liens that secure Indebtedness, as permitted by subections 4.6 (a) through (e) hereof.

(7) All amounts owing in respect of the Advances shall be paid without exercising any right of set off or counterclaim by the IESO.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the Province of Ontario's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case

may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

(3) If the IESO elects to continue an Advance in accordance with Section 3.3(2), the OFA shall determine the interest rate applicable after the original Repayment Date of the Advance and endorse the said rate on the grid forming part of the Grid Note in respect of Advances held by it.

Section 3.5 Conditions Precedent

The obligation of the OFA to make the Advances to the IESO pursuant to Section 2.1 is subject to the following conditions being satisfied to the OFA's satisfaction at the time of making each Advance:

(a) that the representations and warranties of the IESO contained in this Agreement are true and correct as at the date of making the Advance;

(b) that no Event of Default has occurred and is continuing;

(c) that there shall, in the reasonable opinion of the OFA, have been no material adverse change in the financial condition of the IESO or a Material Subsidiary; and

ADVANCES

The OFA will make the principal amount of each Advance available to the IESO in accordance with Article 2.

(2) On or before the date of the first Advance hereunder, the IESO shall execute and deliver to the OFA a grid promissory note in respect of Advances substantially in the form of Schedule 3 (the "**Grid Note**"). Such notations, in the absence of manifest error, shall be *prima facie* evidence of the such advances and repayments; provided that the failure of the OFA to record any amount, rate or date shall not affect the obligation of the IESO to pay the Advances Outstanding and all interest accrued thereon and any other amounts due under this Agreement.

Section 3.3 Elections Regarding Advances.

(1) The IESO may elect to continue all or a portion of the principal amount of any Advance and any amount of interest on such Advance (together, the "**Continued Advance**") for a further period of at least 5 days and up to a maximum of 95 days beginning on the then current Repayment Date in accordance with Section 3.3(2).

(2) Each notice to continue an Advance for a further period (an "**Election Notice**") shall be provided by the IESO to the OFA at least two Business Days prior to the Repayment Date of the Advance (the "**Current Repayment Date**"), and in each case, not later than 10:00 a.m. (Toronto time). Each such Election Notice shall be given substantially in the

form of Schedule 2 and shall be irrevocable and binding upon the IESO and shall specify: (a) the Current Repayment Date; (b) the new aggregate total amount of the proposed Continued Advance; (c) the amount of interest or principal, if any, to be paid or re-paid by the IESO with respect to such Advance on the Current Repayment Date; and (d) the new Repayment Date of the proposed Continued Advance, which shall be no earlier than 5 days and not later than 95 days after the current Repayment Date (the "**New Repayment Date"**). If the IESO fails to deliver an Election Notice to the OFA for any Advance as provided herein, such Advance shall be repayable on the applicable Repayment Date.

(3) An Election Notice with respect to a proposed Continued Advance may include a Borrowing Notice for a further Advance proposed to be made on the Current Repayment Date. The Repayment Date of such further Advance shall be the New Repayment Date of the Continued Advance that is specified in the Election Notice. Such Borrowing Notice shall be given substantially in the form of Schedule 2.

(4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the Grid Note in accordance with Section 3.2(2).

(5) Any portion of an Advance not continued for a further period in accordance with Section 3.3(2) shall be repayable on the applicable Repayment Date.

(6) The Credit Facility shall at all times rank *pari passu* with all other unsubordinated and unsecured Indebtedness of the IESO, subject to the existence of any Liens that secure Indebtedness, as permitted by subections 4.6 (a) through (e) hereof.

(7) All amounts owing in respect of the Advances shall be paid without exercising any right of set off or counterclaim by the IESO.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the Province of Ontario's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case

may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

(3) If the IESO elects to continue an Advance in accordance with Section 3.3(2), the OFA shall determine the interest rate applicable after the original Repayment Date of the Advance and endorse the said rate on the grid forming part of the Grid Note in respect of Advances held by it.

Section 3.5 Conditions Precedent

The obligation of the OFA to make the Advances to the IESO pursuant to Section 2.1 is subject to the following conditions being satisfied to the OFA's satisfaction at the time of making each Advance:

Hi Lisa,

Welcome back!

There were some additional edits to the agreements last week related to the form of Election Notice. I have uploaded all my emails to the matter site. I didn't cc you on all my emails, but Will added you to most of his emails.

Once you have had a chance to settle in, do you want to have a quick call with Will and Sarah to talk about the current status of the agreements?

Thanks,

Will – see attached $2B draft for your review.

As discussed, we amended the election notice to make it more efficient for both IESO and OFA.

We will await your comments on this $2B draft before we make draft comments on the amendment #10 – as we likely should revise amendment #10's borrowing/election form notices to align with the attached $2B draft.

Regards.

Hello Lisa,

Please find the OFHP IESO OFA Credit Facility Agreement, agreement comparison and the original agreement.

Question:
Section 3.4 Interest on Advances.
To date all advances/rollovers under IESO OFA Credit Facility $975 million (28-95 days) have been approximately 30 days and there has been no circumstances where the term has exceeded 30days and the 1 month cost of funds for borrowing with a similar term has always applied.

Right now for the new OFHP IESO OFA Credit Facility advances will range from 7 – 95 days and either the 1 month or the 3 month cost of funds for borrowing will apply.

The question therefore is, is the language in Section 3.4 an accurate representation (provides enough flexibility for the trader)if a trader was to apply the 3 month cost of funds for borrowing a borrowing request at 45 days for example. If not, please provide suggestive language for flexibility.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the OFA's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after default and shall be payable on the Repayment Date for such Advance. Any amount of interest

Thanks,

Will

Hello Lisa,

Please find the OFHP IESO OFA Credit Facility Agreement, agreement comparison and the original agreement.

Question:
Section 3.4 Interest on Advances.
To date all advances/rollovers under IESO OFA Credit Facility $975 million (28-95 days) have been approximately 30 days and there has been no circumstances where the term has exceeded 30days and the 1 month cost of funds for borrowing with a similar term has always applied.

Right now for the new OFHP IESO OFA Credit Facility advances will range from 7 – 95 days and either the 1 month or the 3 month cost of funds for borrowing will apply.

The question therefore is, is the language in Section 3.4 an accurate representation (provides enough flexibility for the trader)if a trader was to apply the 3 month cost of funds for borrowing a borrowing request at 45 days for example. If not, please provide suggestive language for flexibility.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the OFA's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after default and shall be payable on the Repayment Date for such Advance. Any amount of interest

Hi William,

I started looking at this agreement and realized that you have copied the terms of the Directive into the

recital – they do not belong there. Can you please delete these and provide me with a blacklined compare version from the original agreement for ease of reference?

Thank you,

Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

ADVANCES

The OFA agrees, on the terms and conditions of this Agreement, to make Advances to the IESO under the Short-Term Credit Facility from time to time on any Business Day prior to August 31, 2022.

Commented [WT2]: Question for Lisa, other agreements stop taking advances one month before the agreement is set to expire. Since FHP has a 7 day minimum advancement should this be moved upto September 23, 2022?

Section 3.2 **Procedure for Advances.**

(1) Subject to Section 3.3(3), each Advance shall be made subject to two Business Days' prior notice given not later than 10:00 a.m. (Toronto time) by the IESO to the OFA. Each notice of an Advance (a **"Borrowing Notice")** shall be substantially in the form of Schedule 1, shall be irrevocable and binding on the IESO and shall specify (a) the requested date of the Advance, and (b) the principal amount of the Advance, and (c) the Repayment Date of the Advance which shall be not later than 7 days and not later than 95 days after the date of the requested Advance. The OFA will make the principal amount of each Advance available to the IESO in accordance with Article 2

(2) On or before the date of the first Advance hereunder, the IESO shall execute and deliver to the OFA a grid promissory note in respect of Advances substantially in the form of Schedule 3. The IESO authorizes the OFA to record on the grid promissory note (a) the date and amount of each Advance, including any Advance all or a portion of which is continued by election under Section 3.3; (b) the applicable rate of interest for each Advance; (c) the Repayment Date of each Advance; (d) the date and amount of each payment of interest and each payment of principal in respect of each Advance; and (e) the

outstanding principal amount of the grid promissory note. Such notations, in the absence of manifest error, shall be prima facie evidence of the such advances and repayments; provided that the failure of the OFA to record any amount, rate or date shall not affect the obligation of the IESO to pay the Advances Outstanding and all interest accrued thereon and any other amounts due under this Agreement.

Section 3.3 Elections Regarding Advances.

(1) The IESO may elect to continue all or a portion of the principal amount of any Advance for a further period of 7 days and up to a maximum of 95 days beginning on the then current Repayment Date in accordance with Section 3.3(2).

If the IESO fails to deliver an Election Notice to the OFA for any Advance as provided herein, such Advance shall be repayable on the applicable Repayment Date.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the OFA's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will

be calculated by the OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

(3) If the IESO elects to continue an Advance in accordance with Section 3.3(2), the OFA shall determine the interest rate applicable after the original Repayment Date of the Advance and endorse the said rate on the grid forming part of the IESO promissory note in respect of Advances held by it.

AMENDING AGREEMENT NO. 2 TO NOTE AGREEMENT

THIS AGREEMENT is made as of April 23, 2009 between:

A. INDEPENDENT ELECTRICITY SYSTEM OPERATOR, (the "Company")

B. ONTARIO ELECTRICITY FINANCIAL CORPORATION ("OEFC")

RECITALS:

1. Pursuant to section 116 of the *Electricity Act, 1998*, the Lieutenant Governor in Council made an order ("Transfer Order") transferring certain officers, employees, assets, liabilities, rights and obligations of Ontario Hydro to the Company;

2. Pursuant to the Transfer Order, the Company and OEFC entered into an agreement dated April 1, 1999 ("Note Agreement") under which the Company issued a note in the amount of $70.3 million ("Initial Note") to OEFC in partial payment for the assets and rights described above;

3. The Company and OEFC entered into an amending agreement dated March 23, 2000 (which together with the Note Agreement is referred to in this amending agreement as the "Amended Note Agreement") to provide for the issuance of a new note ("Existing Note") in the amount of $78.2 million in replacement for the Initial Note;

4. The Company was continued under the name Independent Electricity System Operator pursuant to subsection 4(1) of the Electricity Act, 1998 effective January 1, 2005;

5. The Minister of Finance has directed OEFC to extend the term of the loan from May 1, 2009 to May 1, 2011.

6. The parties wish to further amend the Amended Note Agreement.

NOW THEREFORE, in consideration of the mutual agreements contained herein (the receipt and adequacy of which are acknowledged), the parties agree as follows:

Hello Lisa,

Regarding:

"The question therefore is, is the language in Section 3.4 an accurate representation (provides enough flexibility for the trader)if a trader was to apply the 3 month cost of funds for borrowing a borrowing request at 45 days for example. If not, please provide suggestive language for flexibility".

I discussed the wording in Section 3.4 (2) with Carlos. Currently there is a system limitation that only allows Trading to select a 1 month and a 3 month cost of funds and as an operational decision not to use linear interpolation. In light of these operational limitations Carlos is of the view that the current wording in Section 3.4 (2) below is satisfactory.

Let me know if you have any additional concerns.

Thanks,

Will

I've reviewed 5 agreements and they all seem to generally to be worded similarly or a variation of the same meaning. Let me know if you require more information.

Hi William,

Can you please confirm the exact process for determining the rate? Is it interpolation? Do you have precedent agreements with such language? Or perhaps MOF Legal might have some precedents.

Thank you,

Hello Lisa,

Please find the OFHP IESO OFA Credit Facility Agreement, agreement comparison and the original agreement.

Question:
Section 3.4 Interest on Advances.
To date all advances/rollovers under IESO OFA Credit Facility $975 million (28-95 days) have been approximately 30 days and there has been no circumstances where the term has exceeded 30days and the

1 month cost of funds for borrowing with a similar term has always applied.

Right now for the new OFHP IESO OFA Credit Facility advances will range from 7 – 95 days and either the 1 month or the 3 month cost of funds for borrowing will apply.

The question therefore is, is the language in Section 3.4 an accurate representation (provides enough flexibility for the trader)if a trader was to apply the 3 month cost of funds for borrowing a borrowing request at 45 days for example. If not, please provide suggestive language for flexibility.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the OFA's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after default and shall be payable on the Repayment Date for such Advance. Any amount of interest

Hi Toby,

What are your thoughts on the IESO's amendment to s. 3.2(3)? I believe it reflects the discussion from our conference call yesterday.

In terms of the intercept letter, we cannot amend the opening paragraph as the OFA Lending Policy requirement is that this agreement must be in place "prior to entering into a loan agreement….".

Subject to any comments from documentation and CEFD, I am okay with the IESO's other proposed amendments.

Subject: RE: FHP Revolving Credit Facility Agreement 2017-2022 Version v7 Revised by IESO Oct 31

Following our conference call this afternoon, please find attached a revised draft of the FHP Credit Facility. Main changes are to s.3.2(3) and to the Intercept provision. See also minor tweaks to the new Entire Agreement Clause (s.7.8) and to the Form of Grid Note (Schedule 3). Other than for s. 3.2(3), I accepted all of your changes so any changes you see are mine.

Anthony has not had a chance to review this so he may have comments, though I am hoping this is pretty closely in keeping with our discussions.

Regarding the Intercept Letter, could you please consider amending the opening to the third paragraph to read: "Prior to or concurrent with entering into a loan agreement with the IESO for the New Credit Facility…"

Comments on AA#10 to follow tomorrow morning.

Regards,
Victor

Hi Victor,

Please find attached the latest black-lined version of the FHP Credit Facility Agreement. In this version, we have made some additional amendments to section 5.7 (Intercept) and section 7.8 (Entire Agreement). We have also added a new sub-section – 3.2(3) to address the IESO's repayment of a portion of the existing credit facility using the first advance. Minor amendments were also made to the Definitions section and the heading in section 4.1.

Please let us know if you have any further comments or if you would like to discuss further. If you are satisfied with this version, we will prepare an execution version and also send over AA#10 for your review.

Thank you,

Lisa

The OFA agrees, on the terms and conditions of this Agreement, to make Advances to the IESO. The OFA shall make each Advance in Dollars.

Section 2.2 Use of Proceeds.

The IESO shall use the proceeds of Advances for the purposes for which it is authorized to borrow funds pursuant to Regulation 280/14 made under the *Electricity Act, 1998*, as such regulation may be amended or replaced from time to time, subject to the condition that proceeds of Advances may be used only for IESO's financing needs and requirements of any kind arising in connection with the IESO's role with respect to and obligations under the OFHP.

Section 2.3 Credit Facility Limit.

The Advances Outstanding shall not at any time exceed the Commitment. The Credit Facility shall revolve and no payment under the Credit Facility shall reduce the Commitment.

Section 2.4 Mandatory Repayment.

Subject to Sections 2.5 and 5.2, the IESO shall repay each Advance together with the interest accrued thereon on the applicable Repayment Date, and, in any event, shall repay all Advances Outstanding, together with all accrued interest and all other amounts owing hereunder on September 30, 2022.

(2) The IESO shall make any payment required hereunder to be made by it to the OFA, to or to the order of the OFA, by wire transfer of immediately available funds in accordance with wire transfer instruction given by the OFA to the IESO from time to time, or in such other manner as the OFA may specify to the IESO from time to time. The IESO shall make each such payment in Canadian Dollars.

Section 2.7 Computations of Interest.

(1) All computations of interest shall be made by the OFA taking into account the actual number of days (including the first day but excluding the last day) occurring in the period for which such interest is payable on the basis of a year of 365 days or 366 days, as the case may be.

(2) For the purposes of disclosure pursuant to the *Interest Act* (Canada), the yearly rate of interest which is equivalent to a rate of interest payable under this Agreement for any period of less than a year may be determined by multiplying the rate of interest for such period by a fraction, the numerator of which is the actual number of days in a year commencing on and including the first day in such period and ending on but excluding the corresponding day in the next calendar year and the denominator of which is the actual number of days in such period.

Section 2.8 Limit on Rate of Interest.

(1) Notwithstanding any provision contained in this Agreement, the IESO shall not be obliged to make any payments of interest or other amounts payable to the OFA hereunder in excess of the amount or rate which would be prohibited by applicable law or would result in the receipt by the OFA of interest at a criminal rate (as such terms are construed under the *Criminal Code* (Canada)).

(2) In the event that any such payments are limited or prohibited as provided in Section 2.8(1), the OFA shall have no further obligation to make any Advances available hereunder and the Advances Outstanding, together with all accrued interest and all other amounts owing hereunder, shall become immediately due and payable.

Section 2.9 Application of Payments.

All payments made by the IESO under this Agreement shall be applied firstly to the payment of interest payable to the OFA on late payments of principal or interest hereunder, secondly, to the payment of accrued and unpaid interest payable to the OFA hereunder and thirdly, to the payment of the outstanding principal amount of any Advances payable to the OFA.

ARTICLE 3
ADVANCES

Section 3.1 Advances.

Section 3.2 Procedure for Advances.

(1) Subject to Section 3.3(5), each Advance shall be made subject to two Business Days' prior notice given not later than 10:00 a.m. (Toronto time) by the IESO to the OFA. Each notice of an Advance (a "**Borrowing Notice**") shall be substantially in the form of Schedule 1, other than a Borrowing Notice that is included in an Election Notice as permitted by Section 3.3(3). Each Borrowing Notice shall be irrevocable and binding on the IESO and shall specify (a) the requested date of the Advance; (b) the principal amount of the Advance, and (c) the Repayment Date of the Advance which shall not be earlier than 5 days and not later than 95 days after the date of the requested Advance. Each Borrowing Notice shall also certify the use of proceeds of the Advance which shall in any case be in accordance with Section 2.2. The OFA will make the principal amount of each Advance available to the IESO in accordance with Article 2.

(2) On or before the date of the first Advance hereunder, the IESO shall execute and deliver to the OFA a grid promissory note in respect of Advances substantially in the form of Schedule 3 (the "**Grid Note**"). Such notations, in the absence of manifest error, shall be *prima facie* evidence of such Advances and repayments; provided that the failure of the OFA to record any amount, rate or date shall not affect the obligation of the IESO to pay the Advances Outstanding and all interest accrued thereon and any other amounts due under this Agreement.

(3) ~~For the purposes of~~Respecting the first Advance to be made under this Agreement (the "**First Advance**"), ~~the purpose of which shall include the repayment of a~~ specified portion thereof (the "**Repayment Amount**") shall be used to repay a portion of the IESO's outstanding indebtedness to the OFA under the c~~C~~redit a~~A~~greement between the Parties dated January 1, 2005, as amended~~,~~ (the "**Existing Credit Facility**"). Section 3.3 Elections Regarding Advances.

(1) The IESO may elect to continue all or a portion of the principal amount of any Advance and any amount of interest on such Advance (together, the "**Continued Advance**") for a further period of at least 5 days and up to a maximum of 95 days beginning on the then current Repayment Date in accordance with Section 3.3(2).

(2) Each notice to continue an Advance for a further period (an "**Election Notice**") shall be provided by the IESO to the OFA at least two Business Days prior to the Repayment Date of the Advance (the "**Current Repayment Date**"), and in each case, not later than 10:00 a.m. (Toronto time). Each such Election Notice shall be given substantially in the form of Schedule 2 and shall be irrevocable and binding upon the IESO and shall specify: (a) the Current Repayment Date; (b) the new aggregate total amount of the proposed Continued Advance; (c) the amount of interest or principal, if any, to be paid or re-paid by the IESO with respect to such Advance on the Current Repayment Date; and (d) the new Repayment Date of the proposed Continued Advance, which shall be no earlier than 5 days and not later than 95 days after the current Repayment Date (the "**New Repayment Date"**). If the IESO fails to deliver an Election Notice to the OFA for any Advance as provided herein, such Advance shall be repayable on the applicable Repayment Date.

(3) An Election Notice with respect to a proposed Continued Advance may include a Borrowing Notice for a further Advance proposed to be made on the Current Repayment Date. The Repayment Date of such further Advance shall be the New Repayment Date of the Continued Advance that is specified in the Election Notice. Such Borrowing Notice shall be given substantially in the form of Schedule 2.

(4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the Grid Note in accordance with Section 3.2(2).

(5) Any portion of an Advance not continued for a further period in accordance with Section 3.3(2) shall be repayable on the applicable Repayment Date.

(6) The Credit Facility shall at all times rank *pari passu* with all other unsubordinated and unsecured Indebtedness of the IESO, subject to the existence of any Liens that secure Indebtedness, as permitted by subections 4.6 (a) through (e) hereof.

(7) All amounts owing in respect of the Advances shall be paid without exercising any right of set off or counterclaim by the IESO.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the Province of Ontario's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after Default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

(3) If the IESO elects to continue an Advance in accordance with Section 3.3(2), the OFA shall determine the interest rate applicable after the original Repayment Date of the Advance and endorse the said rate on the grid forming part of the Grid Note in respect of Advances held by it.

Section 3.5 Conditions Precedent

The obligation of the OFA to make the Advances to the IESO pursuant to Section 2.1 is subject to the following conditions being satisfied to the OFA's satisfaction at the time of making each Advance:

(a) that the representations and warranties of the IESO contained in this Agreement are true and correct as at the date of making the Advance;

(b) that no Event of Default has occurred and is continuing;

(c) that there shall, in the reasonable opinion of the OFA, have been no material adverse change in the financial condition of the IESO or a Material Subsidiary; and

(d) that the OFA has received such other documentation which it has reasonably requested to ensure that the IESO is in compliance with the terms and conditions of this Agreement, including certified true copies of any necessary resolutions, a written legal opinion from counsel to the IESO confirming that the borrowing is within the legal powers of the IESO and that the Agreement is a direct, unsecured obligation of the IESO enforceable against the IESO in form satisfactory to the OFA.

(b) If the OFA determines that it is necessary to request the Minister of Finance to exercise the Intercept, the OFA will give written notice to the Minister of Finance, with a copy to the Ministry of Energy, detailing~~of~~ the IESO's failure to pay when due any amounts owing ~~under this Agreement~~hereunder and requesting the deduction from the Appropriated Funds of amounts equal to the amounts that the IESO has failed to pay to the OFA under this Agreement.

(c) The IESO agrees that any notice from the OFA to the Minister of Finance in relation to this section 5.7 (Intercept) may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance and, upon receipt of such notice, an amount equal to the amount that the IESO has failed~~s~~ to pay to the OFA on account of indebtedness under this Agreement shall be deducted from the Appropriated Funds and paid to the OFA.

Ok, I think we may be there on the FHP credit agreement. See attached.

I have accepted all changes and only made one minor change, that being to the definition of OFHP, which I conformed with the version of the definition in AA#10. That is the only track change you should find in this document.

FYI I also hit return and deleted spaces in a few places in an effort to regularize the formatting, but feel free to make further formatting changes as required.

Can I assume that, apart from that change, all the other changes are acceptable to OFA? I'd like to go through the Agreement accepting whatever tracked changes I can and see if anything is left of if it is now done.

Hello Victor,

Lisa is in a meeting until 3 p.m.., so I am forwarding our comments on the FHP agreement on her behalf.

We have made a minor change to section 3.2(3) - specifically, we deleted the language "and shall also be noted in the grid of the Grid Note" following "The amount of the Repayment Amount shall be detailed in the Borrowing Notice." This is because the Repayment Amount ($825M) is not the first entry on the FHP Grid; the first entry will be for the entire advance of approximately $1B ($825M + new funds). Anthony and Will just had a call to discuss the particulars of what the various grid notes under the existing facility and new facility will be on November 21st (including partial repayment of the outstanding $840M loan) and Anthony will be circulating an e-mail summarizing that conversation. The Effective Date of the amending agreement to reduce the existing facility will also be November 21st, not November 22nd.

In terms of the intercept letter, we cannot amend the opening paragraph as the OFA Lending Policy requirement is that this agreement must be in place "prior to entering into a loan agreement….". It looks, in practice, that the intercept letter will be executed prior to these two facility agreements, so we surmise this would not be an issue.

We received your most recent draft of the amending agreement. Lisa will be able to review once she is out of her meeting, after 3 p.m.

Thanks,
Sarah

Following our conference call this afternoon, please find attached a revised draft of the FHP Credit Facility. Main changes are to s.3.2(3) and to the Intercept provision. See also minor tweaks to the new Entire Agreement Clause (s.7.8) and to the Form of Grid Note (Schedule 3). Other than for s. 3.2(3), I accepted all of your changes so any changes you see are mine.

Anthony has not had a chance to review this so he may have comments, though I am hoping this is pretty closely in keeping with our discussions.

Regarding the Intercept Letter, could you please consider amending the opening to the third paragraph to read: "Prior to or concurrent with entering into a loan agreement with the IESO for the New Credit Facility…"

Comments on AA#10 to follow tomorrow morning.

Victor

Hi Victor,

Please find attached the latest black-lined version of the FHP Credit Facility Agreement. In this

version, we have made some additional amendments to section 5.7 (Intercept) and section 7.8 (Entire Agreement). We have also added a new sub-section – 3.2(3) to address the IESO's repayment of a portion of the existing credit facility using the first advance. Minor amendments were also made to the Definitions section and the heading in section 4.1.

Please let us know if you have any further comments or if you would like to discuss further. If you are satisfied with this version, we will prepare an execution version and also send over AA#10 for your review.

Each Borrowing Notice shall be irrevocable and binding on the IESO and shall specify (a) the requested date of the Advance; (b) the principal amount of the Advance, and (c) the Repayment Date of the Advance which shall not be earlier than 5 days and not later than 95 days after the date of the requested Advance. (3) Respecting the first Advance to be made under this Agreement (the "**First Advance**"), a specified portion thereof (the "**Repayment Amount**") shall be used to repay a portion of the IESO's outstanding indebtedness to the OFA under the credit agreement between the Parties dated January 1, 2005, as amended (the "**Existing Credit Facility**"). The amount of the Repayment Amount shall be detailed in the Borrowing Notice issued in respect of the First Advance. Concurrently with the First Advance, OFA shall provide to IESO an updated grid in respect of the grid note issued under the Existing Credit Facility evidencing the repayment of the Repayment Amount thereunder.

Section 3.3 Elections Regarding Advances.

(1) The IESO may elect to continue all or a portion of the principal amount of any Advance and any amount of interest on such Advance (together, the "**Continued Advance**") for a further period of at least 5 days and up to a maximum of 95 days beginning on the then current Repayment Date in accordance with Section 3.3(2).

(2) Each notice to continue an Advance for a further period (an "**Election Notice**") shall be provided by the IESO to the OFA at least two Business Days prior to the Repayment Date of the Advance (the "**Current Repayment Date**"), and in each case, not later than

10:00 a.m. (Toronto time). Each such Election Notice shall be given substantially in the form of Schedule 2 and shall be irrevocable and binding upon the IESO and shall specify: (a) the Current Repayment Date; (b) the new aggregate total amount of the proposed Continued Advance; (c) the amount of interest or principal, if any, to be paid or re-paid by the IESO with respect to such Advance on the Current Repayment Date; and (d) the new Repayment Date of the proposed Continued Advance, which shall be no earlier than 5 days and not later than 95 days after the current Repayment Date (the "**New Repayment Date"**). If the IESO fails to deliver an Election Notice to the OFA for any Advance as provided herein, such Advance shall be repayable on the applicable Repayment Date.

(3) An Election Notice with respect to a proposed Continued Advance may include a Borrowing Notice for a further Advance proposed to be made on the Current Repayment Date. The Repayment Date of such further Advance shall be the New Repayment Date of the Continued Advance that is specified in the Election Notice. Such Borrowing Notice shall be given substantially in the form of Schedule 2.

(4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the Grid Note in accordance with Section 3.2(2).

(5) Any portion of an Advance not continued for a further period in accordance with Section 3.3(2) shall be repayable on the applicable Repayment Date.

Section 3.4 Interest on Advances.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the Province of Ontario's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after Default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the

OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

(3) If the IESO elects to continue an Advance in accordance with Section 3.3(2), the OFA shall determine the interest rate applicable after the original Repayment Date of the Advance and endorse the said rate on the grid forming part of the Grid Note in respect of Advances held by it.

On the occurrence of an Event of Default relating to a failure by IESO to pay when due any amounts owing hereunder, subject to the OFA's compliance with any relevant provisions hereof and as set out in the Intercept Letter, the Minister of Finance is irrevocably authorized to deduct from the Appropriated Funds amounts equal to any amounts that the IESO has failed to pay to the OFA in accordance with the provisions of this Agreement and to pay such amounts directly to the OFA ("**Intercept**").

(b) If, after following the process specified in the Intercept Letter (including, without limitation, allowing for a reasonable cure period on the terms specified therein), the OFA determines that it is necessary to request the Minister of Finance to exercise the Intercept, the OFA will give written notice to the Minister of Finance, with a copy to the Ministry of Energy, detailing the IESO's failure to pay when due any amounts owing hereunder and requesting the deduction from the Appropriated Funds of amounts equal to the amounts that the IESO has failed to pay to the OFA under this Agreement.

(c) The IESO agrees that any notice from the OFA to the Minister of Finance in relation to this section 5.7 (Intercept) may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance and, upon receipt of such notice, an amount equal to the amount that the IESO has failed to pay when due to the OFA on account of indebtedness under this Agreement shall be deducted from the Appropriated Funds and paid to the OFA.

(d) For further certainty, the OFA acknowledges and agrees that the Intercept as provided for herein and in the Intercept Letter shall not apply with respect to any funds appropriated by the Legislature for payment to the IESO through ministries other than the Ministry of Energy or through Ontario Climate Change Solutions Deployment Corporation.

(e) The parties agree that, with respect to the exercise of the Intercept generally, the terms of this section 5.7 shall be applied consistently with the terms set out in the Intercept Letter which shall apply in full. Notwithstanding the foregoing, in the event of a conflict or

Section 2.6 Payments under this Agreement.

(1) The OFA shall make Advances to the IESO under this Agreement to or to the order of the IESO by wire transfer of immediately available funds in accordance with wire transfer instructions given by the IESO to the OFA from time to time, or in such other manner as the IESO may specify to the OFA from time to time.

(2) The IESO shall make any payment required hereunder to be made by it to the OFA, to or to the order of the OFA, by wire transfer of immediately available funds in accordance with wire transfer instruction given by the OFA to the IESO from time to time, or in such other manner as the OFA may specify to the IESO from time to time. The IESO shall make each such payment in Canadian Dollars.

Section 2.7 Computations of Interest.

(1) All computations of interest shall be made by the OFA taking into account the actual number of days (including the first day but excluding the last day) occurring in the period for which such interest is payable on the basis of a year of 365 days or 366 days, as the case may be.

(2) For the purposes of disclosure pursuant to the *Interest Act* (Canada), the yearly rate of interest which is equivalent to a rate of interest payable under this Agreement for any period of less than a year may be determined by multiplying the rate of interest for such period by a fraction, the numerator of which is the actual number of days in a year commencing on and including the first day in such period and ending on but excluding the corresponding day in the next calendar year and the denominator of which is the actual number of days in such period.

Section 2.8 Limit on Rate of Interest.

(1) Notwithstanding any provision contained in this Agreement, the IESO shall not be obliged to make any payments of interest or other amounts payable to the OFA hereunder in excess of the amount or rate which would be prohibited by applicable law or would result in the receipt by the OFA of interest at a criminal rate (as such terms are construed under the *Criminal Code* (Canada)).

(2) In the event that any such payments are limited or prohibited as provided in Section 2.8(1), the OFA shall have no further obligation to make any Advances available hereunder and the Advances Outstanding, together with all accrued interest and all other amounts owing hereunder, shall become immediately due and payable.

Section 2.9 Application of Payments.

All payments made by the IESO under this Agreement shall be applied firstly to the payment of interest payable to the OFA on late payments of principal or interest hereunder, secondly, to the payment of accrued and unpaid interest payable to the OFA hereunder and thirdly, to the payment of the outstanding principal amount of any Advances payable to the OFA.

ARTICLE 3
ADVANCES

Section 3.1 Advances.

The OFA agrees, on the terms and conditions of this Agreement, to make Advances to the IESO under the Credit Facility from time to time on any Business Day prior to September 23, 2022.

Section 3.2 Procedure for Advances.

(1) Subject to Section 3.3(5), each Advance shall be made subject to two Business Days' prior notice given not later than 10:00 a.m. (Toronto time) by the IESO to the OFA. Each notice of an Advance (a "**Borrowing Notice**") shall be substantially in the form of Schedule 1, other than a Borrowing Notice that is included in an Election Notice as permitted by Section 3.3(3). Each Borrowing Notice shall be irrevocable and binding on the IESO and shall specify (a) the requested date of the Advance; (b) the principal amount of the Advance, and (c) the Repayment Date of the Advance which shall not be earlier than 5 days and not later than 95 days after the date of the requested Advance. Each Borrowing Notice shall also certify the use of proceeds of the Advance which shall in any case be in accordance with Section 2.2. The OFA will make the principal amount of each Advance available to the IESO in accordance with Article 2.

(2) On or before the date of the first Advance hereunder, the IESO shall execute and deliver to the OFA a grid promissory note in respect of Advances substantially in the form of Schedule 3 (the "**Grid Note**"). The IESO authorizes the OFA to record on the Grid Note (a) the date and amount of each Advance or Continued Advance; (b) the applicable rate of interest for each Advance or Continued Advance; (c) the Repayment Date of each Advance or Continued Advance; (d) the date and amount of each payment of interest and each payment of principal or portion thereof in respect of each Advance or Continued Advance; and (e) Advances Outstanding. Such notations, in the absence of manifest error, shall be *prima facie* evidence of such Advances and repayments; provided that the failure of the OFA to record any amount, rate or date shall not affect the obligation of the IESO to pay the Advances Outstanding and all interest accrued thereon and any other amounts due under this Agreement.

(3) Respecting the first Advance to be made under this Agreement (the "**First Advance**"), a specified portion thereof (the "**Repayment Amount**") shall be used to repay a portion of the IESO's outstanding indebtedness to the OFA under the credit agreement between the Parties dated January 1, 2005, as amended (the "**Existing Credit Facility**"). The amount of the Repayment Amount shall be detailed in the Borrowing Notice issued in respect of the First Advance. Concurrently with the First Advance, OFA shall provide to IESO an updated grid in respect of the grid note issued under the Existing Credit Facility evidencing the repayment of the Repayment Amount thereunder.

Section 3.3 Elections Regarding Advances.

(1) The IESO may elect to continue all or a portion of the principal amount of any Advance and any amount of interest on such Advance (together, the "**Continued Advance**") for a further period of at least 5 days and up to a maximum of 95 days beginning on the then current Repayment Date in accordance with Section 3.3(2).

(2) Each notice to continue an Advance for a further period (an "**Election Notice**") shall be provided by the IESO to the OFA at least two Business Days prior to the Repayment Date of the Advance (the "**Current Repayment Date**"), and in each case, not later than

10:00 a.m. (Toronto time). Each such Election Notice shall be given substantially in the form of Schedule 2 and shall be irrevocable and binding upon the IESO and shall specify: (a) the Current Repayment Date; (b) the new aggregate total amount of the proposed Continued Advance; (c) the amount of interest or principal, if any, to be paid or re-paid by the IESO with respect to such Advance on the Current Repayment Date; and (d) the new Repayment Date of the proposed Continued Advance, which shall be no earlier than 5 days and not later than 95 days after the current Repayment Date (the "**New Repayment Date**"). If the IESO fails to deliver an Election Notice to the OFA for any Advance as provided herein, such Advance shall be repayable on the applicable Repayment Date.

(3) An Election Notice with respect to a proposed Continued Advance may include a Borrowing Notice for a further Advance proposed to be made on the Current Repayment Date. The Repayment Date of such further Advance shall be the New Repayment Date of the Continued Advance that is specified in the Election Notice. Such Borrowing Notice shall be given substantially in the form of Schedule 2.

(4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the Grid Note in accordance with Section 3.2(2).

(5) Any portion of an Advance not continued for a further period in accordance with Section 3.3(2) shall be repayable on the applicable Repayment Date.

(6) The Credit Facility shall at all times rank *pari passu* with all other unsubordinated and unsecured Indebtedness of the IESO, subject to the existence of any Liens that secure Indebtedness, as permitted by subections 4.6 (a) through (e) hereof.

(7) All amounts owing in respect of the Advances shall be paid without exercising any right of set off or counterclaim by the IESO.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the Province of Ontario's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after Default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the

OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

(3) If the IESO elects to continue an Advance in accordance with Section 3.3(2), the OFA shall determine the interest rate applicable after the original Repayment Date of the Advance and endorse the said rate on the grid forming part of the Grid Note in respect of Advances held by it.

Section 3.5 Conditions Precedent

The obligation of the OFA to make the Advances to the IESO pursuant to Section 2.1 is subject to the following conditions being satisfied to the OFA's satisfaction at the time of making each Advance:

(a) that the representations and warranties of the IESO contained in this Agreement are true and correct as at the date of making the Advance;

(b) that no Event of Default has occurred and is continuing;

(c) that there shall, in the reasonable opinion of the OFA, have been no material adverse change in the financial condition of the IESO or a Material Subsidiary; and

(d) that the OFA has received such other documentation which it has reasonably requested to ensure that the IESO is in compliance with the terms and conditions of this Agreement, including certified true copies of any necessary resolutions, a written legal opinion from counsel to the IESO confirming that the borrowing is within the legal powers of the IESO and that the Agreement is a direct, unsecured obligation of the IESO enforceable against the IESO in form satisfactory to the OFA.

(c) The IESO agrees that any notice from the OFA to the Minister of Finance in relation to this section 5.7 (Intercept) may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance and, upon receipt of such notice, an amount equal to the amount that the IESO has failed to pay when due to the OFA on account of indebtedness under this Agreement shall be deducted from the Appropriated Funds and paid to the OFA.

(d) For further certainty, the OFA acknowledges and agrees that the Intercept as provided for herein and in the Intercept Letter shall not apply with respect to any funds appropriated by the Legislature for payment to the IESO through ministries other than the Ministry of Energy or through Ontario Climate Change Solutions Deployment Corporation.

(e) The parties agree that, with respect to the exercise of the Intercept generally, the terms of this section 5.7 shall be applied consistently with the terms set out in the Intercept Letter which shall apply in full. Notwithstanding the foregoing, in the event of a conflict or

inconsistency between the terms and conditions of the Intercept Letter and the terms and conditions contained in this Agreement, the terms and conditions contained in this Agreement shall prevail.

(2) The IESO shall make any payment required hereunder to be made by it to the OFA, to or to the order of the OFA, by wire transfer of immediately available funds in accordance with wire transfer instruction given by the OFA to the IESO from time to time, or in such other manner as the OFA may specify to the IESO from time to time. The IESO shall make each such payment in Canadian Dollars.

Section 2.7 Computations of Interest.

(1) All computations of interest shall be made by the OFA taking into account the actual number of days (including the first day but excluding the last day) occurring in the period for which such interest is payable on the basis of a year of 365 days or 366 days, as the case may be.

(2) For the purposes of disclosure pursuant to the *Interest Act* (Canada), the yearly rate of interest which is equivalent to a rate of interest payable under this Agreement for any period of less than a year may be determined by multiplying the rate of interest for such period by a fraction, the numerator of which is the actual number of days in a year commencing on and including the first day in such period and ending on but excluding the corresponding day in the next calendar year and the denominator of which is the actual number of days in such period.

(2) In the event that any such payments are limited or prohibited as provided in Section 2.8(1), the OFA shall have no further obligation to make any Advances available hereunder and the Advances Outstanding, together with all accrued interest and all other amounts owing hereunder, shall become immediately due and payable.

ARTICLE 3
ADVANCES

Section 3.1 Advances.

The OFA agrees, on the terms and conditions of this Agreement, to make Advances to the IESO under the Credit Facility from time to time on any Business Day prior to September 23, 2022.

Section 3.2 Procedure for Advances.

(1) Subject to Section 3.3(5), each Advance shall be made subject to two Business Days' prior notice given not later than 10:00 a.m. (Toronto time) by the IESO to the OFA. Each notice of an Advance (a "**Borrowing Notice**") shall be substantially in the form of Schedule 1, other than a Borrowing Notice that is included in an Election Notice as permitted by Section 3.3(3). Each Borrowing Notice shall be irrevocable and binding on the IESO and shall specify (a) the requested date of the Advance; (b) the principal amount of the Advance, and (c) the Repayment Date of the Advance which shall not be earlier than 5 days and not later than 95 days after the date of the requested Advance. Each Borrowing Notice shall also certify the use of proceeds of the Advance which shall in any case be in accordance with Section 2.2. The OFA will make the principal amount of each Advance available to the IESO in accordance with Article 2.

(2) On or before the date of the first Advance hereunder, the IESO shall execute and deliver to the OFA a grid promissory note in respect of Advances substantially in the form of Schedule 3 (the "**Grid Note**"). The IESO authorizes the OFA to record on the Grid Note (a) the date and amount of each Advance or Continued Advance; (b) the applicable rate of interest for each Advance or Continued Advance; (c) the Repayment Date of each Advance or Continued Advance; (d) the date and amount of each payment of interest and each payment of principal or portion thereof in respect of each Advance or Continued Advance; and (e) Advances Outstanding. Such notations, in the absence of manifest error, shall be *prima facie* evidence of such Advances and repayments; provided that the failure of the OFA to record any amount, rate or date shall not affect the obligation of the IESO to pay the Advances Outstanding and all interest accrued thereon and any other amounts due under this Agreement.

(3) Respecting the first Advance to be made under this Agreement (the "**First Advance**"), a specified portion thereof (the "**Repayment Amount**") shall be used to repay a portion of the IESO's outstanding indebtedness to the OFA under the credit agreement between the Parties dated January 1, 2005, as amended (the "**Existing Credit Facility**"). The amount of the Repayment Amount shall be detailed in the Borrowing Notice issued in respect of the First Advance. Concurrently with the First Advance, OFA shall provide to IESO an updated grid in respect of the grid note issued under the Existing Credit Facility evidencing the repayment of the Repayment Amount thereunder.

Section 3.3 Elections Regarding Advances.

(1) The IESO may elect to continue all or a portion of the principal amount of any Advance and any amount of interest on such Advance (together, the "**Continued Advance**") for a further period of at least 5 days and up to a maximum of 95 days beginning on the then current Repayment Date in accordance with Section 3.3(2).

(2) Each notice to continue an Advance for a further period (an "**Election Notice**") shall be provided by the IESO to the OFA at least two Business Days prior to the Repayment Date of the Advance (the "**Current Repayment Date**"), and in each case, not later than

10:00 a.m. (Toronto time). Each such Election Notice shall be given substantially in the form of Schedule 2 and shall be irrevocable and binding upon the IESO and shall specify: (a) the Current Repayment Date; (b) the new aggregate total amount of the proposed Continued Advance; (c) the amount of interest or principal, if any, to be paid or re-paid by the IESO with respect to such Advance on the Current Repayment Date; and (d) the new Repayment Date of the proposed Continued Advance, which shall be no earlier than 5 days and not later than 95 days after the current Repayment Date (the "**New Repayment Date**"). If the IESO fails to deliver an Election Notice to the OFA for any Advance as provided herein, such Advance shall be repayable on the applicable Repayment Date.

(3) An Election Notice with respect to a proposed Continued Advance may include a Borrowing Notice for a further Advance proposed to be made on the Current Repayment Date. The Repayment Date of such further Advance shall be the New Repayment Date of the Continued Advance that is specified in the Election Notice. Such Borrowing Notice shall be given substantially in the form of Schedule 2.

(4) The calculation of interest on a Continued Advance shall be determined in the same manner as an Advance under Section 3.4 and shall be recorded on the Grid Note in accordance with Section 3.2(2).

(5) Any portion of an Advance not continued for a further period in accordance with Section 3.3(2) shall be repayable on the applicable Repayment Date.

(6) The Credit Facility shall at all times rank *pari passu* with all other unsubordinated and unsecured Indebtedness of the IESO, subject to the existence of any Liens that secure Indebtedness, as permitted by subections 4.6 (a) through (e) hereof.

(7) All amounts owing in respect of the Advances shall be paid without exercising any right of set off or counterclaim by the IESO.

Section 3.4 Interest on Advances.

(1) The IESO shall pay interest on the unpaid principal amount of each Advance in accordance with this Section 3.4 from and including the date of such Advance until the principal amount of such Advance is repaid in full.

(2) Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the Province of Ontario's cost of funds for borrowings with a similar term as determined by the OFA plus 0.25 percent per annum, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after Default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the

OFA by dividing the interest rate applicable to the Advance by 365 or 366, as the case may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.

(3) If the IESO elects to continue an Advance in accordance with Section 3.3(2), the OFA shall determine the interest rate applicable after the original Repayment Date of the Advance and endorse the said rate on the grid forming part of the Grid Note in respect of Advances held by it.

Section 3.5 Conditions Precedent

The obligation of the OFA to make the Advances to the IESO pursuant to Section 2.1 is subject to the following conditions being satisfied to the OFA's satisfaction at the time of making each Advance:

(a) that the representations and warranties of the IESO contained in this Agreement are true and correct as at the date of making the Advance;

(b) that no Event of Default has occurred and is continuing;

(c) that there shall, in the reasonable opinion of the OFA, have been no material adverse change in the financial condition of the IESO or a Material Subsidiary; and

Section 4.7 Payment of OFA Expenses

In addition to any liability of the IESO to the OFA under any other provision of this Agreement, the IESO will, on demand, reimburse and indemnify OFA for all reasonable costs, charges and expenses, including reasonable fees and disbursements of its agents and counsel, incurred by OFA in connection with the Agreement (including those services incurred in the preservation of rights under or enforcement of this Agreement at any time during the continuance of a Default or Event of Default and for any reasonable loss or expense incurred by OFA as a result of any failure by the IESO to fulfill any of its obligations under this Agreement). All such costs, charges and expenses shall bear interest at the Province of Ontario's cost of funds plus 0.25 percent per annum (as determined by the OFA) calculated and payable monthly not in advance from in each case from the date on which the OFA incurs the cost, charge or expense until the date on which the IESO reimbursement the OFA therefor. The OFA agrees, acting reasonably, to invoice the IESO for any such costs, charges and expense as they are incurred, together with interest at the aforesaid rate (with interest on overdue interest).

Section 4.8 Reporting.

The IESO will promptly provide to the OFA any reports or supporting documents that the OFA may request from time to time.

Section 4.9 Late Repayment of Advance.

In the event that the IESO fails to repay the principal amount of any Advance and all interest accrued thereon when due, the IESO shall pay interest on the unpaid amount of such Advance at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment.

ARTICLE 5

(g) the IESO or any Material Subsidiary:

(i) becomes unable to meet its obligations as they generally become due or has ceased paying its current obligations in the ordinary course of business as they generally become due;

Section 5.2 Acceleration of Maturity; Rescission and Annulment.

If an Event of Default occurs and is continuing, then and in every such case the OFA may at its option, in addition to any other remedy available to the OFA at law, by written notice to the IESO, take any or all of the following actions:

(a) suspend the right of the IESO to request any further Advance until the Event of Default has been cured to the OFA's satisfaction or, if the Event of Default is not

cured within three (3) Business Days after the date on which written notice of such Event of Default shall have been given to the IESO by the OFA, declare all amounts owing hereunder including all interest accrued to be due and payable immediately, by a notice in writing to the IESO, and upon any such declaration all such amounts shall become immediately due and payable.

Section 5.4 OFA May File Proof of Claim.

If proceedings for the receivership, insolvency, liquidation, bankruptcy, winding-up, reorganization, arrangement or composition of the IESO under any applicable law are pending, or if a receiver, trustee, custodian or other similar official shall have been appointed for the property of the IESO, or if any other judicial proceedings relative to the IESO, its creditors or its property are pending, the OFA shall be entitled and empowered, by intention in such proceeding or otherwise:

(a) to file and prove a claim for all amounts owing under this Agreement and to file such other papers or documents as may be necessary or advisable in order to have the claims of the OFA (including any claim for fees and disbursements of the OFA, its agents and counsel) allowed in such judicial proceeding; and

(b) to collect and receive any monies or other property payable or deliverable on any such claim.

Section 5.5 Rights and Remedies Cumulative.

No right or remedy herein conferred upon or reserved to the OFA is intended to be exclusive of any other such right or remedy, and every such right and remedy shall, to the extent permitted by law, be cumulative and in addition to every other right and remedy given hereunder or now or hereafter existing at law or in equity or otherwise. The assertion or employment of any right or remedy hereunder, or otherwise, shall not prevent the concurrent assertion or employment of any other appropriate right or remedy.

Section 5.6 Delay or Omission not Waiver.

No delay or omission of the OFA to exercise any right or remedy accruing upon any Event of Default shall impair any such right or remedy or constitute a waiver of any such Event of Default or an acquiescence therein. Every right or remedy given by this Article 5 or by law to OFA may be exercised from time to time, and as often as may be deemed expedient, by the OFA.

Section 5.7 Intercept

(a) The IESO hereby acknowledges that, in accordance with the terms of the letter agreement of even date herewith entered between the Ministry of Energy, the IESO and the OFA made pursuant to Section 23 of the *Capital Investment Plan Act, 1993* (the "**Intercept Letter**"), the Minister of Finance is entitled to deduct only from those monies appropriated by the Legislature for payment through the Ministry of Energy to the IESO ("**Appropriated Funds**"), amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under this Agreement. On the occurrence of an Event of Default relating to a failure by IESO to pay when due any amounts owing hereunder, subject to the OFA's compliance with any relevant provisions hereof and as set out in the Intercept Letter, the Minister of Finance is irrevocably authorized to deduct from the Appropriated Funds amounts equal to any amounts that the IESO has failed to pay to the OFA in accordance with the provisions of this Agreement and to pay such amounts directly to the OFA ("**Intercept**").

(b) If, after following the process specified in the Intercept Letter (including, without limitation, allowing for a reasonable cure period on the terms specified therein), the OFA determines that it is necessary to request the Minister of Finance to exercise the Intercept, the OFA will give written notice to the Minister of Finance, with a copy to the Ministry of Energy, detailing the IESO's failure to pay when due any amounts owing hereunder and requesting the deduction from the Appropriated Funds of amounts equal to the amounts that the IESO has failed to pay to the OFA under this Agreement.

(c) The IESO agrees that any notice from the OFA to the Minister of Finance in relation to this section 5.7 (Intercept) may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance and, upon receipt of such notice, an amount equal to the amount that the IESO has failed to pay when due to the OFA on account of indebtedness under this Agreement shall be deducted from the Appropriated Funds and paid to the OFA.

(d) For further certainty, the OFA acknowledges and agrees that the Intercept as provided for herein and in the Intercept Letter shall not apply with respect to any funds appropriated by the Legislature for payment to the IESO through ministries other than the Ministry of Energy or through Ontario Climate Change Solutions Deployment Corporation.

(e) The parties agree that, with respect to the exercise of the Intercept generally, the terms of this section 5.7 shall be applied consistently with the terms set out in the Intercept Letter which shall apply in full. Notwithstanding the foregoing, in the event of a conflict or

inconsistency between the terms and conditions of the Intercept Letter and the terms and conditions contained in this Agreement, the terms and conditions contained in this Agreement shall prevail.

Ms. Kimberly Marshall
Vice-President, Corporate Services and Chief Financial Officer, IESO
120 Adelaide St W #1600
Toronto, ON M5H 1T1

Dear Mr. Steen Hume and Ms. Kimberly Marshall:

I am writing in relation to the Independent Electricity System Operator's ("IESO") request to the Ontario Financing Authority ("OFA") for a new revolving credit facility in an amount of up to CAD $2 billion (the "New Credit Facility") to support the IESO's role in the implementation of and participation under the *Ontario Fair Hydro Plan Act, 2017.* Under the OFA Lending Policy, the OFA requires an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis. In general, an intercept provision allows the Minister of Finance to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts the public body fails to pay the OFA under a loan agreement.

The IESO and the Ministry of Energy ("ENERGY") confirm and the OFA acknowledges that at this time there are no amounts appropriated by the Legislature for payment to the IESO by ENERGY and the intent of such intercept provision is that it would apply if and when amounts were to be appropriated for payment by ENERGY to the IESO in the future.

Prior to entering into a loan agreement with the IESO for the New Credit Facility (the "OFHP Credit Facility Agreement") on an unsecured basis, the OFA requires ENERGY and the IESO to agree to the terms and conditions set out below in relation to the above OFA Lending Policy intercept provision requirement.

These terms and conditions shall also apply to the IESO's existing $975 million credit facility, established in a credit agreement entered into between the OFA and the Ontario Power Authority dated January 1, 2005, as amended (the "Original Credit Facility Agreement").

... 2

- The OFA, the IESO, and ENERGY agree as follows in respect of any advances made by the OFA to the IESO pursuant to the OFHP Credit Facility Agreement or the Original Credit Facility Agreement (each a "Loan Agreement"; together, the "Loan Agreements"):

    - Pursuant to section 23 of the *Capital Investment Plan Act, 1993*, the IESO and ENERGY agree that, in the event that the Legislature appropriates any funds for payment by ENERGY to the IESO for any purpose ("Appropriated Funds"), the Minister of Finance would be entitled to deduct from such Appropriated Funds amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under a Loan Agreement (the "intercept provision"). Terms relating to the intercept provision shall also be separately included in the Loan Agreements.

    - If the intercept provision is exercised, the IESO agrees that any notice from the OFA to the Minister of Finance in relation to its failure to make a payment that is due under a Loan Agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.

    - Prior to recommending to the Minister of Finance that the intercept provision be exercised, the OFA will raise the issue with ENERGY and seek ENERGY's support in getting the IESO to pay the amounts owing to OFA within a reasonable cure period.

    - Upon receipt of notice from the OFA that the IESO has failed to make one or more payments owing to it in accordance with the provisions of a Loan Agreement, ENERGY will provide the OFA with all information requested by the OFA respecting amounts appropriated by the Legislature for payments to the IESO by ENERGY, including the intended purpose and expected timing of such payments to be made by ENERGY. Upon request, ENERGY will provide similar information to the Minister of Finance.

    - ENERGY acknowledges and agrees that, upon receipt of a direction from the Minister of Finance that an amount is to be deducted from money appropriated by the Legislature for payment by ENERGY to the IESO, ENERGY will take all necessary action required by it in order to effect such deduction and payment to the OFA in accordance with the Minister of Finance's direction.

    - For further certainty, the OFA and ENERGY acknowledge and agree that the intercept provision as provided for herein, and this letter agreement generally, shall not apply with respect to any funds appropriated by the Legislature for payment to the IESO through ministries other than ENERGY or through Ontario Climate Change Solutions Deployment Corporation.

... 3

This letter agreement may be executed in counterparts. Therefore, if you are in agreement with the above terms and conditions in relation to the Loan Agreements, kindly sign this letter agreement below in triplicate and send back two copies to my attention.

Sincerely,

Ronald Kwan

Assistant Deputy Minister, Corporate and Electricity Finance Division, OFA

c. Gadi Mayman, Chief Executive Officer, OFA

The undersigned hereby agree to the terms and conditions as set out in this letter agreement and have executed this letter agreement as of the date first noted above.

Promissory Note

For value received, the Ontario Financing Authority (the "Borrower") promises to pay to Her Majesty the Queen in right of Ontario as represented by the Minister of Finance, Province of Ontario (the "Lender") at the City of Toronto in lawful money of Canada, the lesser of:

(i) Two Billion Dollars; and

(ii) the aggregate unpaid principal balance of all advances made by the Lender as recorded on the reverse of this note or on any attachment described below;

at such time and on such other terms and conditions including the payment of interest as follows;

(a) the Borrower shall be entitled to advances of the loan (an "Advance") in such amounts and at such times as it requires provided that the aggregate amount advanced shall not exceed Two Billion Dollars;

(b) the Borrower shall be entitled to repay Advances either in whole or in part and at such time or times as it determines provided that all Advances plus any accrued interest shall be fully repaid by December 31, 2047;

(c) the Borrower shall be entitled to use the loan as a revolving credit facility allowing for successive advances of moneys repaid under the loan; provided that the maximum principal amount of the loan outstanding at any time shall not exceed Two Billion Dollars;

(d) the Borrower shall pay to the Lender interest on each Advance at a rate which is determined as follows

(i) from the date of Advance to (but excluding) the date of repayment the Borrower shall pay to the Lender interest on the Advance at a per annum rate equivalent to the yield earned on ninety day Province of Ontario treasury bills on the date before the Advance Date as determined by the Province, provided that if an Advance is outstanding for longer than ninety days, the interest rate shall be reset on the last day of each ninety day period (the "Reset Date") to the yield earned on ninety day Province of

Ontario treasury bills immediately preceding the Reset Date as determined by the Province;

(ii) in the event that moneys included in an Advance are subsequently loaned by the Borrower to third parties for the purposes contemplated in the Act, (a "Third Party Loan") the rate of interest payable by the Borrower to the Lender on the portion of the Advance so loaned shall be adjusted at the option of the OFA effective as of the date of the Third Party Loan so that the per annum rate of interest payable by the Borrower on such moneys is equivalent to either:

(A) the per annum rate of interest payable to the Borrower under the Third Party Loan, or

(B) the per annum rate of interest payable to the Borrower under the Third Party Loan less an amount not exceeding 25 basis points,

rather than the rate specified in subparagraph (i), until (but excluding) the date on which the Third Party Loan is repaid to the OFA, at which time the interest rate set out in subparagraph (i) shall again be applicable to that portion of the Advance; and

(iii) in the event that moneys described in subparagraph (ii), once repaid, are subsequently loaned to third parties again, subparagraph (ii) shall again be applicable in determining the interest rate payable to the Lender on that portion of the Advance included in any subsequent loan, and so on, until the Advance shall be repaid to the Province in full;

(e) despite subparagraphs (c)(ii) and (iii) in the event that no interest is payable to the Borrower under a Third Party Loan, no- interest shall be payable by the Borrower on the portion of the Advance so loaned and to the extent that the terms of a Third Party Loan provide for the deferral of the payment of accrued interest for a period, the interest payment terms of an Advance or portion thereof shall also be deferred for a similar period;

(f) interest for any period of less than one year shall be payable for the actual number of days included in such period, computed on the basis of a 365-day year;

(g) despite paragraph (b), interest on any portion of an Advance made to the Borrower under the loan that is loaned by the Borrower as a Third Party Loan shall accrue on the basis stated above but shall become payable only to the extent the Borrower receives payment of interest under the relevant Third Party Loan; and

(h) despite paragraph (b), any portion of the principal of an Advance made to the Borrower under the loan that is loaned by the Borrower as a Third Party Loan shall become payable only to the extent the Borrower receives repayment of principal under the relevant Third Party Loan.

The undersigned authorizes the Lender to record on the reverse of this note or on any attachment to this note all advances, repayments and prepayments of principal and interest and the unpaid balance of principal from time to time. The undersigned agrees that in the absence of manifest error the record kept by the Lender on this note or any attachment shall be conclusive evidence of the matters recorded, provided that the failure of the Lender to record or correctly record any amount or date shall not affect the obligation of the undersigned to pay the outstanding principal amount of the Advances and interest.

Hi Lisa,

I have included mention of the letter agreement and removed the term semi-executed. Business process aside, do you mind reviewing this before to IESO?

Thanks,

Will

Hello Anthony and Victor,

Pending the execution of the intercept letter agreement next week, we can certainly target executing the FHP credit facility at that same time, however, we propose holding-off the executing the amending agreement until November 22nd.

Currently there is $840M outstanding under the existing credit facility agreement; we cannot reduce the limit of the $975M to $475M while the $840M is still outstanding. As per our discussion with Anthony, it is IESO's intention that the next draw for the whole balance of $840M (plus any new funding) will be entirely funded through the new FHP facility (i.e. that is move all funding for next draw on November 21st from the existing $975 million Credit Facility to the $2 Billion FHP Credit Facility).

In order to achieve this with least disruption we propose:

- Sign the FHP Credit Facility agreement first next week (assuming intercept letter will be signed at the same time).
- For next advance, Prior to November 21st funding date, IESO sends to the OFA the FHP Borrowing Notice under the new Facility specifying the amount of the next advance ($840 million + new advance).
- Allow the $840 million outstanding under the existing $975 million Credit Facility to mature on November 21st and OFA will fund the November 21st advance (whereby OFA will send any net difference of funds above the $840M to IESO) under the new Facility.
- Arrange to execute Amending Agreement No. 10, on November 22 to reduce the existing credit facility on $475M.

Please provide you thoughts if this is suitable.

The details regarding the credit facility/moving funds/amounts are business matters. In terms of the legal details, what do you mean by "semi-executed"? The letter agreement needs to be executed first and it is not mentioned here.

Hello Anthony and Victor,

As per our discussion with Anthony, the entire balance of $840 million will be moved from the existing $975 million Credit Facility to the $2 Billion FHP Credit Facility. Currently we cannot reduce the existing $975 million limit under the facility while $840 million is still outstanding under it.

We propose to signing the FHP Credit Facility agreement first on November 1st and receiving the FHP Borrowing Notice to advance ($840 million + new advance) on November 16. Allow the $840 million outstanding under the existing $975 million Credit Facility to mature on November 21st . Sign the semi-executed Amending Agreement No. 10 on November 16 to reduced the existing credit facility on November 22nd.

Please provide you thoughts is this is suitable.

Why not sign all docs on the same day this week including:
-intercept letter
-$2B facility
-the $975M non-rollover notice (this would confirm that in mid-Nov IESO will not rollover the $825M (the RRRP will continue to rollover with this facility) due on Nov 21)
-issue a rollover notice for $2B facility to say the $825M is being rolled over – note that I will need to borrow another approx. $225M too
-the AA # 10

This way all is in place by this week's end. Let me know or call me to discuss 905-403-6944.

Hi Lisa – regarding the subcategories of borrowing purposes which we have previously listed in borrowing notices, we would prefer to continue with the current practice of listing the subcategory of purpose directly in the borrowing notice rather than enshrining a potentially overly-restrictive list of sub-categories directly in the body of the Agreement. The Agreement already contains a broad restriction as to permitted purposes in s.2.2 – namely borrowing must be related to OFHP – and adding a closed and enumerated list of sub-categories of purposes could create problems down the road.

The concern is that there may over the course of the OFHP be a number of borrowing sub-categories other than RRRP and RPP. RPP will make up the vast majority of all such borrowing, and RRRP borrowing will be the next largest borrowing sub-category – though even at that, it will constitute only a very small portion of total borrowing. Then there may be other and very occasional OFHP-related borrowing that, in terms of percentage of total borrowings is expected to be miniscule, but will still fall under the broad OFHP purpose (e.g. FN Delivery Credit, etc).

We intend to continue to list the different sub-categories of borrowing (RPP etc) in each borrowing notice for internal tracking reasons, etc. In addition our practice has been to issue different borrowing notices for different subcategories of borrowing, and this will also continue. So would it not be sufficient if we just continue with current practice – or maybe just add a note to the Form of Borrowing Notice as a reminder to specify any sub-categories of OFHP-related borrowing purposes ?

Hi Victor,

Thank you for the call this morning. Further to our discussion, my clients have suggested that we should consider incorporating language to distinguish between the "Rural or Remote Electricity Rate Protection (RRRP) variance" and the "Regulated Price Plan (RPP) variance" since on the last two Election Notices provided to the OFA on July 19, 2017, IESO made this distinction. As such, I will leave placeholders in the next draft of the agreement (definitions and perhaps also in section 3.2(1) (Procedure for Advances) for further discussion.

Thank you,

Lisa

Hello Lisa,

We are fine with Victor's explanation. I have removed the borrowing subcategory, on the Borrowing Notice and Election Notice to say [Insert relevant subcategory of borrowing], instead.
These changes were added to Bruno's version from 10:51am.
If Bruno provides his sign-off at your 4pm meeting, please forward to Victor. If not, I will forward it to Victor first thing tomorrow morning.

Hi Lisa,
I noticed some clean up and tweaking is needed on Schedule 1, which affects section 3.2(1) as well
I have attached proposed change, but I've also attached your last version from yesterday so we can look side by side.
I know you're in 'directive land' right now, so whenever you have the opportunity to discuss this, plus the amending agreement, that would be great.
Thanks,
Sarah

Hello Lisa,

I have cleaned up the draft and accepted IESO amendments that do not require further discussion. I also made the appropriate changes to Schedule 1 and Schedule 2. Please add back the intercept provision wording.

I wanted to request your thoughts on a drafting issue with regards to rolling-over of interest. Section 3.3 Allow IESO to continue all or a portion of interest on such Advance for a further period. If IESO to elects to "roll-over" some or all of the interest from the current advance and previous advances would it be allowed to do so based on the wording in the Section 3.3, Schedule 2 etc.?

Currently, IESO pays all of the outstanding accrued interest. As long as the client makes the minimum payment of interest the client is allowed to borrow up to the maximum of the credit facility.

"The IESO may elect to continue all or a portion of the principal amount of any Advance and any amount of interest on such Advance (together, the "**Continued Advance**") for a further period of at least 5 days and up to a maximum of 95 days beginning on the then current Repayment Date in accordance with Section 3.3(2).

Thanks,

Will

Hi Will

See attached. We are fine with "Use of proceeds" and "Clean Energy Adjustment". Minor proposed edit on the latter. I am not comfortable commenting on "Permitted liens (k)" as I do not fully understand this issue and in particular in relation to the "Negative Pledge" section.

But for what it's worth, I would not think that section (j) captures the specific wording of section (k). As this credit facility is for OFHP purposes, I assume the intent was to ensure liens related to OFHP are specifically noted. Was sec. (k) drafted by IESO? But as noted, if EFB is asked for comment I would have a number of more general questions about the "Liens" and legal aspects of these including:

1) permitted vs. not permitted liens. I think the Negative Pledge section relates to this and includes "permitted liens" as an exception
2) the list of permitted liens seems fairly specific list except for (k) which more generally notes and any liens related to IESO's OFHP obligations. I'm not suggesting any specific problem with this, but again wonder how this related to the Negative Pledge section.

I'm happy to discuss further.

Thanks
Bruno

Hello Bruno,

We in the final rounds for the FHP Credit Facility agreement. However, we have some specific areas for Electricity Finance to comment on before we finalize the agreement.

Specifically:

Clean Energy Adjustment
Permitted Liens (k) – If approved in this credit facility, this change will be carried over to Amending Agreement 10.
Section 2.2 Use of Proceeds

Thanks,

Will

Hi Will,

Please insert the applicable placeholders in the borrowing and election notices where required. You can base these on the July 17, 2017 notices previously sent to the OFA which we discussed together with Opal last week.

Thanks,
JF

Hi all,

Please see the attached black-lined version of the agreement, containing my further comments and amendments. This version requires further OFA internal review before it is sent back to the IESO.

Also, as per our discussions, I understand that JF will be including placeholders regarding the RRRP and the RPP variances.

Please let me know if you would like to discuss further.

Thank you,

Lisa
