Guarantee Activation Events:	Any of the following would constitute a Guarantee Activation Event: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act or any Regulation made thereunder; (B) the Legislative Assembly of Ontario causing to come into force any statute (including any amendment to the Act or a Regulation made thereunder), or causing to come into force or making any order-in-council or regulation, or causing to come into force any other discriminatory action (including by way of any order by the Ontario Energy Board), in any case, in a way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected; (C) the Legislative Assembly of Ontario directly or indirectly amending the Guarantee or any of the financing transaction agreements without the agreement of the Financing Entity; (D) a court of competent jurisdiction (i) declares any funding obligations of the Financing Entity to be invalid or unenforceable or (ii) in a final and non-appealable

	judgement determines that all or a portion of the Act is *ultra vires* in a way that adversely affects the rights and interests of the Financing Entity, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its funding obligations on the same basis as before such judgement; or (E) there is a change in the organization, structure or operations of the IESO or a change in the electricity market structure or operations in any way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected **[NTD: Alternatively, with respect to the IESO servicing obligations, include the Servicing Guarantee language with respect to the IESO that was included in the last mark-up of the term sheet received from the Province.]**
Guarantee:	Upon the occurrence of a Guarantee Activation Event, the Guarantor shall immediately assume and pay when due (without acceleration) all of the obligations of the Financing Entity. The obligations of the Financing Entity include its funding obligations as well as any other obligation the Financing Entity has related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commissions
Term:	The Guarantee will continue for as long as the Financing Entity has any outstanding financing or other contractual obligations and until such obligations have all been paid in full or otherwise satisfied

Approval Requirement:	The guarantee agreement containing the terms and conditions contemplated by this term sheet shall be entered into prior to the Financing Entity incurring its first funding obligation. The Province shall enter into the guarantee based on forms of program and series financing documents required for each financing transaction (e.g., form of supplemental indenture). As long as the financing transaction documents are generally consistent with the agreed upon form, the Province's specific approval for specific funding obligations incurred by the Financing Entity will not be required. Subsequent approval is only needed if the form of such documents are materially changed. For greater certainty, deal specific terms (such as tenor, pricing, etc) shall not be considered a change in the form of transaction and series documents
FIPPA:	The parties will acknowledge that the Guarantor will be bound by the Freedom of Information and Protection of Privacy Act (Ontario) and that any information provided to the Guarantor, or any agent or representative of the Guarantor in connection with the Guarantee may be subject to disclosure in accordance with the act or as otherwise required by law
Representations and Warranties:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Governing Law:	Province of Ontario

Warehousing Takeout Risk and Servicing (Commingling) Risk *Note – these items are provided for information purposes only as these risks were included in the previous version of the term sheet as items that the Dealers/OPG were looking for the Province for protection against. The current proposals with respect to these items is described below. These do not contain any requirement for the Province to directly backstop these risks.*	
<u>Commingling Risk (applies to Warehouse as well as any Term transactions)</u>	
Commingling Risk Mitigant:	For any LDC which is not investment grade rated by each of the rating agencies which are rating the funding obligations (the "Non-Investment Grade LDCs"), either: (A) The IESO must post a Letter of Credit (L/C), or deposit funds in a Commingling Reserve Account in a quantum equal to the Commingling Risk Amount; or (B) The IESO, for so long as it is rated investment grade by the rating agencies which are rating the funding obligations, will assume responsibility for commingling risk by the LDCs and will agree to remit to the Financing Entity any clean energy adjustment amounts collected by the LDC, regardless of whether the LDC remitted those amounts to the IESO for remittance to the Financing Entity
Commingling Risk Amount:	An amount equal to the sum of the expected Clean Energy Adjustment collections from the Non-Investment Grade LDCs over the next [45-60] days
Commingling Risk Amount Reset Date:	Each settlement date for the Financing Entity (monthly)
Beneficiary:	The beneficiary of the L/C or the Commingling Reserve Account would be the Financing Entity and the Indenture Trustee for the benefit of the creditors of the Financing Entity. The Financing Entity and/or the Indenture Trustee would have the ability to draw down the L/C or draw on the Commingling Reserve Account for any clean energy adjustment amounts expected to be received from the IESO but which were not received due to those funds not being remitted from an LDC to the IESO for that period
L/C Provider:	An entity rated at least A+ (or equivalent)

Approvals:	The approach is subject to approval from the IESO, by the rating agencies rating the funding obligations of the Financing Entity and the risk management areas of the banks providing the warehouse facilities
Warehouse Takeout Risk	
Commitment Period for Warehouse[1]:	Expected to be 12-24 months
Takeout for Warehouse:	Expected to be every 3-6 months
Warehouse Default Event:	One of the events of default for the warehouse will be the failure to repay the warehouse facility at the end of the commitment term
Consequences of Warehouse Default Event:	If the Warehouse Default Event[2] described above occurs, all amounts funded through the warehouse would become immediately due and payable, subject to the Warehouse Default Payment Cap, and Default Pricing will be charged on any amounts funded through the warehouse facility
Default Pricing:	Step up in pricing to [x] until the moratorium period ends and thereafter stepping-up in increments of [y] every six months until the warehouse facility is repaid

[1] Please note that this is not intended to be an exhaustive list of terms for the warehouse facility, but rather is a summary of a few select terms that relate to the warehouse takeout risk.

[2] Note there may be other Warehouse Default Events beyond the takeout risk item described above. The consequences for a breach of these other Warehouse Default Events may be different than the one described above where the default is related to failure to takeout the warehouse facility by the end of the commitment period.

Warehouse Default Payment Cap:	For any given reference period following the occurrence of a Warehouse Default Event, the amount that shall be remitted to the Financing Entity for repayment of the warehouse facilities will be the sum of (x) the interest amount due on the warehouse facilities (which, for greater certainty will include any program fees) and (y) the lessor of: (a) The outstanding amount funded through the warehouse facilities; and (b) The maximum amount that can be charged for that period so that clean energy adjustments are equal to, but do not exceed, the fair allocation amount for such period.
Approval Requirement:	Subject to approval by the risk management areas of the banks providing the warehouse facilities which will in part depend on receipt of information on the fair allocation curve and an understanding of how long the "tail risk" could be following a Warehouse Default Event

Provincial Protection and Assurances

Change in Law Risk

- Holders of Fair Hydro Plan debt could be negatively impacted by:
  - Changes to legislation or other discriminatory action by the Province as no government can limit the ability of future governments to amend or enact legislation or take other actions as it may deem appropriate
  - Court decision that the Fair Hydro Plan does not have the authority to levy the charge to consumers or declares any funding obligations to be invalid or unenforceable
  - Changes to the organization, structure or operations of the IESO or the electricity market
- Debt is not financeable without protection for these risks
- Risk is addressed through contractual guarantee that would be triggered upon the occurrence of specified events
- If guarantee is triggered there would not be an acceleration of payment
- If guarantee is triggered the Province would step in to service the obligations of the financing entity
- Guarantee may need to be revised at a future date, or approval from the Province may be required, if the financing entity must access US market as investors in that market will likely require additional compensation if the guarantee is triggered

Risks Not Covered by Provincial Guarantee

Short Term Debt Financing Takeout Risk

- Monthly purchases by the financing entity would initially be financed using short term debt as the financing entity needs to warehouse a larger amount for efficient execution in the term debt markets
  - Short term debt providers are exposed to the risk that takeout funding is not available in term debt markets for a period of time
- If this short term debt is not repaid by the end of the short term debt facility commitment this risk is addressed through an escalation of the pricing of such short term debt:
  - Interest rate for short term debt increases by a specified amount at the time of the event until the moratorium period ends
  - Thereafter, interest rate increases by a further specified amount for every additional 6 month interval during which the short term debt remains unpaid

LDC Commingling Risk

- Clean Energy Adjustment amounts will be collected from consumers by LDCs and held until remitted to the IESO / financing entity. For any LDC which is not rated or non-investment grade rated by each of the rating agencies which are rating the funding obligations, the agencies will require these LDCs to remit collections daily, unless other credit mitigants are established
- The majority of LDCs are not rated and it would be cost prohibitive to establish ratings for these entities; 10 LDCs are collectively rated by S&P, DBRS and Moody's (Moody's only rates Hydro One)
  - It is estimated that LDCs not rated by any agency deliver power to ~25% of the Ontario electricity market
- This risk is addressed through providing the financing entity with a letter of credit:
  - Amount of letter of credit is approximately one to two month's estimated collections from all unrated or non-investment grade LDCs
  - Letter of credit to be provided by the IESO on behalf of the LDCs
  - Cost of the letter of credit and any amounts drawn can be recovered by the IESO through the Global Adjustment
- Alternatively, this risk may be addressed by the IESO depositing funds into a commingling reserve account for a similar amount or the IESO contractually agreeing to assume responsibility for paying the CEA amounts required to be remitted by such LDCs

Hi Malle,
Perhaps Matt (on behalf of Anna) could arrange a time in the next day or two. Would Steve Ashbourne have provided written comments that could be circulated in advance.
Ron

Hi all,
We have received comments back on the term sheet from Steve Ashbourne, the Province's external counsel, and think it would be helpful to have an internal Provincial meeting to review the comments on the draft. On the legal side, it might be helpful to get some more insight into how the proposed guarantee and warehouse facility are to work from a business perspective. In addition, we are awaiting further draft documents that set the context and describe what is to be guaranteed as I understand that Torys (OPG's counsel) has been working on these.
It would be helpful to coordinate such a meeting soon with the appropriate Provincial representatives.
Thanks.
Malle

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides
Hi Ken,
Thanks for the additional information. I have already sent the draft to Energy Legal and will send it to Steve Ashbourne this morning.
Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.

- The last sentence in the opening italics that "the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate" has been deleted.
- It has been changed back to a guarantee from an indemnity.
- The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the "performance" guarantee is added into (E), i.e. IESO's role.
- Concept of "materiality" has been deleted for (B) and (D).
- A concept of "any other discriminatory action including OEB Orders has been introduced.
- The Guarantee wording includes the word "assume" as opposed to just "pay".

- Also, the guarantee has reverted to some of the very general wording that the Province is guarantee “all of the obligations of the Financing Entity” not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??
- Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?
- Also the second portion called Warehousing Takeout Risk and Servicing – it’s mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn’t contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don’t’ understand what the Province’s role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province’s guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province’s approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It’s not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains “discriminatory action” type language can be difficult to ensure that there are no unforeseen consequences and that the Province’s intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott’s group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well.

Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

Malle

Hi all

I got comments back from Steve on the term sheet today. I haven't reviewed them yet and will send them to you on Monday. There seem to be a lot of significant issues and as noted previously we don't have copies of any of the draft documents so it makes it very difficult to provide, comments on the term sheet and TB submission.
Thanks

Malle

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.

The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in

IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.

Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.

Thanks

Ken k

Hi Malle,

I would not know f this has been passed on to Energy Legal; by OPG yet. Ken, would you know?

As you stated, last week's meeting was a business meeting, without Legal representatives from various sides, including not having Steve Ashbourne attend, so I wouldn't think he'd have reviewed this new version either -- Ken, your sense on that?

Ron

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Ken,

Thank you for passing on the draft. I should send this on to Energy Legal as well in case they have not received it yet. Do you know if Steve Ashbourne of Blakes has been reviewing the term sheet recently and been involved in discussions on this?

This is the first version of the term sheet that we have received since it was sent over to OPG on late June. After that there was a response from Torys dated June 30th with some high level comments on the revised term sheet and an internal Provincial call to discuss the Province's response. Subsequently there was a meeting of representatives of the Province and OPG on July 13th which Toby and also Tom McKinlay of Energy legal attended to discuss considerations regarding the guarantee. It looks like there have been some further discussions regarding the term

sheet and understand that there may have been a meeting on the business side last week but MOF LSB was not asked to participate. In order to provide comments on this term sheet, it will be helpful for us to find out more about what the business discussions have been and what approach the Province wishes to take and also consult with Energy Legal and Blakes.

Is there a track changes version of this term sheet from June? Also, as I recall back in early July, we were going to ask OPG to provide to us some of the more detailed documents and drafts that would be associated with this guarantee such as the Master Trust Indenture, etc. Do you know if OPG has shared any of that with the Province?

Thanks.

Malle

Gadi, Ron and John

Pls see the attached revised guarantee and a short presentation on the salient points. It seems to include all of the revisions we requested, however, I will take another more detailed look. Ron and John one section particularly for your review, the Takeout Risk at the end of the Term Sheet indicates the link between the clean energy adjustment and the fair allocation amount as they impact the Takeout risk. I am not very clear about this so you may want to review this closely.

The request for the Letter of Credit still stands however, there is an alternative also provided we have to see tomorrow how comfortable IESO is with the latter.

Thanks

Ken K

Hi John

Just to follow up on Andrew Maciel's commitment to provide us with a revised term sheet for the guarantee reflecting yesterday's discussion, I was wondering if that can be done EOD Monday. I had a chat with Gadi and given some upcoming internal meetings at senior levels it would be helpful to provide the revised guarantee in front of decision makers.

Thanks

Ken k

> - Also, the guarantee has reverted to some of the very general wording that the Province is guarantee "all of the obligations of the Financing Entity" not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??
> - Approval requirement has been changed so that Province does not have right to

approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?

- Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well. Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

Malle

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.
The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in
IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.
Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.
Thanks
Ken k

Hi Ken,
Thanks for the additional information. I have already sent the draft to Energy Legal and will send it to Steve Ashbourne this morning.
Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.

- The last sentence in the opening italics that "the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate" has been deleted.
- It has been changed back to a guarantee from an indemnity.
- The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the "performance" guarantee is added into (E), i.e. IESO's role.
- Concept of "materiality" has been deleted for (B) and (D).
- A concept of "any other discriminatory action including OEB Orders has been introduced.
- The Guarantee wording includes the word "assume" as opposed to just "pay".
- Also, the guarantee has reverted to some of the very general wording that the Province is guarantee "all of the obligations of the Financing Entity" not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??
- Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?
- Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.
The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in
IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.
Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.
Thanks
Ken k

Hi Malle,
I would not know f this has been passed on to Energy Legal; by OPG yet. Ken, would you know?
As you stated, last week's meeting was a business meeting, without Legal representatives from

various sides, including not having Steve Ashbourne attend, so I wouldn't think he'd have reviewed this new version either -- Ken, your sense on that?

Hi Ken,
Thank you for passing on the draft. I should send this on to Energy Legal as well in case they have not received it yet. Do you know if Steve Ashbourne of Blakes has been reviewing the term sheet recently and been involved in discussions on this?
This is the first version of the term sheet that we have received since it was sent over to OPG on late June. After that there was a response from Torys dated June 30th with some high level comments on the revised term sheet and an internal Provincial call to discuss the Province's response.
Subsequently there was a meeting of representatives of the Province and OPG on July 13th which Toby and also Tom McKinlay of Energy legal attended to discuss considerations regarding the guarantee. It looks like there have been some further discussions regarding the term sheet and understand that there may have been a meeting on the business side last week but MOF LSB was not asked to participate. In order to provide comments on this term sheet, it will be helpful for us to find out more about what the business discussions have been and what approach the Province wishes to take and also consult with Energy Legal and Blakes.
Is there a track changes version of this term sheet from June? Also, as I recall back in early July, we were going to ask OPG to provide to us some of the more detailed documents and drafts that would be associated with this guarantee such as the Master Trust Indenture, etc. Do you know if OPG has shared any of that with the Province?
Thanks.

Subject: FW: EXTERNAL – Revised Term Sheet & summary slides

Gadi, Ron and John
Pls see the attached revised guarantee and a short presentation on the salient points. It seems to include all of the revisions we requested, however, I will take another more detailed look. Ron and John one section particularly for your review, the Takeout Risk at the end of the Term Sheet indicates the link between the clean energy adjustment and the fair allocation amount as they impact the Takeout risk. I am not very clear about this so you may want to review this closely.
The request for the Letter of Credit still stands however, there is an alternative also provided we have to see tomorrow how comfortable IESO is with the latter.
Thanks
Ken K

Hi John
Just to follow up on Andrew Maciel's commitment to provide us with a revised term sheet for the guarantee reflecting yesterday's discussion, I was wondering if that can be done EOD Monday. I had a chat with Gadi and given some upcoming internal meetings at senior levels it would be helpful to provide the revised guarantee in front of decision makers.
Thanks
Ken k

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.

The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in

IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.

PROVINCIAL GUARANTEE AND OTHER FINANCING ISSUES

ISSUE

To support the Fair Hydro Plan, OPG is requesting that the Government of Ontario provide a guarantee to the OPG Financing Entity and prospective debt holders such that the funding obligations of the Financing Entity will be met by the Province under certain circumstances.

TERMS OF THE GUARANTEE

Events that would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments that adversely affect the OPG Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

Guarantee:

- The Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers (i.e., trustees, auditors).
- The Provincial guarantee will continue until all obligations of the Financing Entity are fully discharged.

Recommendation:

- Pending review by MOF Legal, Energy Legal and external counsel (Blake's), recommend TB/MBC approve the terms of the Guarantee as set out in the term sheet and further detailed in the draft guarantee document to be provided by OPG.

OTHER FINANCING/ACCOUNTING RISKS TO BE RESOLVED

Commingling Risk:

- Refers to the risk associated with unrated/below investment grade Local Distribution Companies (LDCs) not remitting collections from ratepayers to the IESO.
- IESO to provide either a Letter of Credit or assume responsibility for this risk amounting to the expected Clean Energy Adjustment from these LDCs over the

next 45-60 days. OPG estimates the Letter of Credit to be approximately $50 million.
- IESO expressed concerns both from a mandate and accounting perspective on issuing either a Letter of Credit or assuming responsibility for the commingling risk.

Warehouse Takeout Risk:

- Refers to the risk associated with the Financing Entity unable to issue debt in order to pay down the short term financing provided by its banks.
- There may be potential costs to the ratepayer in the form of higher interest rates from the step–up pricing clause in the Financing Entity's agreement with the banks providing the short term financing.

NEXT STEPS

- MOF Legal, Energy Legal and external counsel (Blake's) to review term sheet and draft guarantee document
- OPG/IESO to consider outstanding financing/accounting issues
- TB/MBC decision on Provincial Guarantee (September TBC)

Hi John and John
One issue that I forgot to raise at the tele conference yesterday is the potential for the Province to purchase debt issued by the Financing Entity in the event of an impending warehouse default event coupled with the inability, for whatever reason, for the Entity to access the markets. Of course once, markets have stabilized the Province has the option to sell this note.
OPG was going to run this by E&Y to ascertain if such purchases impact the accounting treatment.
Pls let us know.
Thanks and if you haven't already done so can you pls forward the revised term sheet to Energy Legal as well.
Thanks
Ken k

Hi John

Just to follow up on Andrew Maciel's commitment to provide us with a revised term sheet for the guarantee reflecting yesterday's discussion, I was wondering if that can be done EOD Monday. I had a chat with Gadi and given some upcoming internal meetings at senior levels it would be helpful to provide the revised guarantee in front of decision makers.

Thanks

Ken k

Hi all,
Please find attached comments on the term sheet prepared by Steve Ashbourne, Province's external counsel, for our review and consideration. These comments are prepared for the purposes of internal discussion at the proposed meeting of Provincial staff and should not with others outside the Province.
Thank you.

Hi all,
We have received comments back on the term sheet from Steve Ashbourne, the Province's external counsel, and think it would be helpful to have an internal Provincial meeting to review the comments on the draft. On the legal side, it might be helpful to get some more insight into how the proposed guarantee and warehouse facility are to work from a business perspective. In addition, we are awaiting further draft documents that set the context and describe what is to be guaranteed as I

understand that Torys (OPG's counsel) has been working on these.
It would be helpful to coordinate such a meeting soon with the appropriate Provincial representatives.
Thanks.
Malle

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Ken,
Thanks for the additional information. I have already sent the draft to Energy Legal and will send it to Steve Ashbourne this morning.
Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.

- The last sentence in the opening italics that "the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate" has been deleted.
- It has been changed back to a guarantee from an indemnity.
- The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the "performance" guarantee is added into (E), i.e. IESO's role.
- Concept of "materiality" has been deleted for (B) and (D).
- A concept of "any other discriminatory action including OEB Orders has been introduced.
- The Guarantee wording includes the word "assume" as opposed to just "pay".
- Also, the guarantee has reverted to some of the very general wording that the Province is guarantee "all of the obligations of the Financing Entity" not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??
- Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?
- Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt

financing program of the Financing Entity work smoothly and effectively.
Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.
It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.
I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well.
Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.
Thanks.
Malle

Provincial Protection and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

Change in Law Guarantee	
Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	The indenture trustee, acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.[1]
Guarantee Activation Events:	Any of the following would constitute a Guarantee Activation Event: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act or any Regulation[2] made thereunder; (B) the Legislative Assembly of Ontario causing to come into force any statute (including any amendment to the Act or a Regulation[3] made thereunder), or causing to come into force or making [any order-in-council or regulation, or causing to come into force any other discriminatory action

[1] The proposal is that the direct beneficiary of the Guarantee will be the indenture trustee acting on behalf of the secured obligees of the FE (rather than the FE itself, as we initially proposed). Assuming that characterization is okay for the Province (e.g., Would the Province be considered to be an issuer under US securities laws? How would the Province get the benefit of the joint enforcement and governance arrangements in the Trust Indenture? Accounting implications?), the ordinary right of subrogation should entitle the Province to claim against the FE in respect of the assumed obligations, including to enforce the security given by the FE in relation to the assumed obligations.

[2] Confirm description. Should this refer to LGIC for Regulations?

[3] LGIC?

	(including by way of any order by the Ontario Energy Board)][4], that adversely affects the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations; (C) the Legislative Assembly of Ontario directly or indirectly amending the Guarantee or any of the financing transaction agreements without the agreement of the indenture trustee; (D) a court of competent jurisdiction (i) [declares any funding obligations of the Financing Entity to be invalid or unenforceable[5] or (ii)] in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that adversely affects the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations; or (E) [there is a change in the organization, structure or operations of the IESO or a change in the electricity market structure or operations in each case in any way that adversely affects the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations.][6]

[4] Too broad and unlimited.

[5] Delete. The Province will not be directly involved in creating or issuing FE obligations, and so the Province should not be asked to take responsibility for the validity or enforceability of FE obligations. OPG will be in charge of structuring, documenting and implementing the FE obligations, and so any problem should be the responsibility of OPG.

[6] Consider if the Province should take responsibility for IESO/market related changes that have an incidental effect on the underlying cash flows?

Guarantee:	The indenture trustee will have the right to require that, upon the occurrence of a Guarantee Activation Event, the Guarantor will assume and pay when due (without acceleration) all of the specified obligations[7] of the Financing Entity.[8] The specified obligations of the Financing Entity will include its funding obligations as well as any other obligation of the Financing Entity that ranks ahead of or equally with the rated debt obligations of the Financing Entity pursuant to the trust indenture. The exercise of such right by the indenture trustee in accordance with the trust indenture shall constitute the only remedy available under the Guarantee. Under no circumstances shall the Guarantor be obligated to pay or indemnify the Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Rights of Subrogation:	Without limiting the Guarantor's rights of subrogation as a guarantor by operation of law, upon becoming obligated to assume the obligations of a Financing Entity under the Guarantee, the Guarantor shall become entitled to all of the Beneficiaries' rights and interests under and in respect of each related investment interest and property of the Financing Entity, including under the agreements to which the Financing Entity is a party.[9]
Term:	The Guarantee will continue for as long as the Financing Entity has any outstanding financing or other contractual obligations that are or are intended to be secured by the Guarantee [and until such obligations have all been paid in full or otherwise satisfied][10]

[7] Need to discuss how best to narrow this. Practical issues arise. Perhaps can limit to amounts payable in priority to or pari passu with rated debt obligations in the priority of payments waterfall. For example, if amounts payable to OPG are lower priority, these could be excluded. This would require the Province to pre-agree to the priority of payments permitted under the program. In any event, need to limit to "specified creditors".

[8] Need to come up with a mechanic where the Province is subrogated to the FE's cash flow rights under the investment interest(s) and the FE's contractual rights in relation to the transfer, swaps, indemnities, etc.

[9] If the Province assumes the obligations of an FE, it should become directly entitled to all of the FEs rights and interests. This wording is intended to give the Province direct rights to collect CEAs and claim indemnities otherwise available to FEs.

[10] Not sure what this phrase adds to the concept of "outstanding"?

Approval Requirements:	A Guarantee will become effective in respect of a Financing Entity's obligations (including any modification) only after the Guarantor has confirmed in writing that the Guarantee applies to such obligations. A guarantee agreement between the Guarantor (subject to approval by the Minister of Energy and the Minister of Finance, acting together) and a Financing Entity, setting forth the terms and conditions of the Guarantee on a basis consistent with this term sheet, will annex the applicable forms of program and series documents under which obligations of the Financing Entity may arise (e.g., form of trust indenture and series supplemental indenture). As long as the documents under which an obligation arises are and remain consistent in all material respects with such agreed upon forms, the Guarantee provided for under the guarantee agreement will be effective in relation to such obligation. The forms of program and series documents may include alternative terms and conditions, including such matters such as tenor and pricing parameters, on which the specific terms of permitted obligations may be based without the further written agreement of the Guarantor.[11]
FIPPA:	The parties will acknowledge that the Guarantor will be bound by the Freedom of Information and Protection of Privacy Act (Ontario) and that any information provided to the Guarantor, or any agent or representative of the Guarantor in connection with the Guarantee may be subject to disclosure in accordance with the act or as otherwise required by law.
Representations and Warranties:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity.
No Changes to an Investment Interest:	A Financing Entity may not change its rights and interests under an investment interest in any way that could adversely affect the Guarantor's prospective rights and entitlements upon subrogation in respect of the investment interest.
Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity

[11] As a separate matter, consider whether the Province needs the ability to pre-agree the form of any IESO/FE transfer agreement and approve any amendments. Is it sufficient that IESO will be a party?

Governing Law:	Province of Ontario

Warehousing Takeout Risk and Servicing (Commingling) Risk *Note – these items are provided for information purposes only[12] as these risks were included in the previous version of the term sheet as items that the Dealers/OPG were looking for the Province for protection against. The current proposals with respect to these items is described below. These do not contain any requirement for the Province to directly backstop these risks.*
<u>Commingling Risk (applies to Warehouse as well as any Term transactions)</u>

[12] This mark-up is limited to identifying items of commercial significance that would impact the Province upon assumption of the related obligations under the Guarantee.

Commingling Risk[13] Mitigant:	For any LDC which is not investment grade rated by each of the rating agencies which are rating the funding obligations (the "Non-Investment Grade LDCs"), either: (A) The IESO must post a Letter of Credit (L/C)[14], or deposit funds[15] in a Commingling Reserve Account in a quantum equal to the Commingling Risk Amount; or (B) The IESO, for so long as it is rated investment grade by the rating agencies which are rating the funding obligations, will assume responsibility for commingling risk by the LDCs and will agree to remit to the Financing Entity any clean energy adjustment amounts collected by the LDC, regardless of whether the LDC remitted those amounts to the IESO for remittance to the Financing Entity. [16]
Commingling Risk Amount:	An amount equal to the sum of the expected Clean Energy Adjustment collections from the Non-Investment Grade LDCs over the next [45-60][17] days.
Commingling Risk Amount Reset Date:	Each settlement date for the Financing Entity (monthly)
Beneficiary:	The beneficiary of the L/C or the Commingling Reserve Account would be the Financing Entity and the Indenture Trustee for the benefit of the creditors of the Financing Entity[18]. The Financing Entity and/or the Indenture Trustee would have the ability to draw down the L/C or draw on the Commingling Reserve Account for any clean energy adjustment amounts expected to be received from the IESO but which were not received due to those funds not being remitted from an LDC to the IESO for that period.[19]

[13] Given the generous cross-subsidization implications of the existing finance amount calculation and failsafe true-up mechanism, this seems to be over-kill.

[14] Consider accounting implications.

[15] Economically inefficient due to negative carry implications.

[16] Consider accounting implications.

[17] Consider rationale. Monthly reconciliations and settlement suggest that 30 days would be sufficient.

[18] Make consistent with Guarantee arrangement, so that the indenture trustee would be the direct beneficiary.

[19] Address rights of subrogation.

L/C Provider:	An entity rated at least A+ (or equivalent).
Approvals:	The approach is subject to approval from the IESO, by the rating agencies rating the funding obligations of the Financing Entity and the risk management areas of the banks providing the warehouse facilities. Consideration of the arrangements will also form part of the approval process undertaken by the Ministers, on behalf of the Province.
Warehouse Takeout Risk	
Commitment Period for Warehouse[20]:	Expected to be 12-24 months.[21]
Takeout for Warehouse:	Expected to be every 3-6 months.
Warehouse Default Event:	One of the events of default[22] for the warehouse will be the failure to repay the warehouse facility at the end of the commitment term.
Consequences of Warehouse Default Event:	If the Warehouse Default Event[23] described above occurs, all amounts funded through the warehouse would become immediately due and payable, subject to the Warehouse Default Payment Cap, and Default Pricing will be charged on any amounts funded through the warehouse facility.

[20] Please note that this is not intended to be an exhaustive list of terms for the warehouse facility, but rather is a summary of a few select terms that relate to the warehouse takeout risk.

[21] The rationale for the limited terms of the bank commitments should be understood. For example, if the reason is due to regulatory capital implications (e.g., which are customarily a governor under ABCP programs), the banks may be willing to consider longer commitments provided the additional costs associated with increased regulatory capital obligations are included in the economic model.

[22] These should be spelled out in detail in the term sheet, given the economic consequences to the structure.

[23] Note there may be other Warehouse Default Events beyond the takeout risk item described above. The consequences for a breach of these other Warehouse Default Events may be different than the one described above where the default is related to failure to takeout the warehouse facility by the end of the commitment period.

Default Pricing:	Step up in pricing to [x] until the moratorium period ends and thereafter stepping-up in increments of [y] every six months until the warehouse facility is repaid.[24]
Warehouse Default Payment Cap:	For any given reference period following the occurrence of a Warehouse Default Event, the amount that shall be remitted[25] to the Financing Entity for repayment of the warehouse facilities will be the sum of (x) the interest amount due on the warehouse facilities (which, for greater certainty will include any program fees) and (y) the lessor of: (a) The outstanding amount funded through the warehouse facilities; and (b) The maximum amount that can be charged for that period so that clean energy adjustments are equal to, but do not exceed, the fair allocation amount for such period.[26]
Approval Requirement:	Subject to approval by the risk management areas of the banks providing the warehouse facilities which will in part depend on receipt of information on the fair allocation curve and an understanding of how long the "tail risk" could be following a Warehouse Default Event. Consideration of the arrangements will also form part of the approval process undertaken by the Ministers, on behalf of the Province.

[24] Consider cost consequences, including on assumption.

[25] This seems to conflict with the reality that the cash will not be available to service these amounts. Consider what is the consequence under the structure of an unremedied default event. If the impact is limited to step-up pricing on outstanding amounts, then there should be clarity that an unremedied default does not permit a realization of FE security (e.g., rights in relation to the CEAs opposite the specified consumers).

[26] It seems unclear how this relates to the requirements of section 21 of the OFHPA. This should not conflict with the implied limitation on charging CEAs during the moratorium period. For example, it does not reflect the readjustment amount concept.

Provincial Protection and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations ~~to be~~ made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

Change in Law Guarantee	
Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	The indenture trustee, acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.[1]
Guarantee Activation Events:	Any of the following would constitute a Guarantee Activation Event: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act or any Regulation[2] made thereunder; (B) the Legislative Assembly of Ontario causing to come into force any statute (including any amendment to the Act or a Regulation[3] made thereunder), or causing to come into force or making [any order-in-council or regulation, or causing to come into force any other discriminatory action (including by way of any order by the Ontario Energy Board)][4], ~~in any case, in a way~~ that adversely affects the ~~rights and interests of the Financing Entity under its~~

[1] The proposal is that the direct beneficiary of the Guarantee will be the indenture trustee acting on behalf of the secured obligees of the FE (rather than the FE itself, as we initially proposed). Assuming that characterization is okay for the Province (e.g., Would the Province be considered to be an issuer under US securities laws? How would the Province get the benefit of the joint enforcement and governance arrangements in the Trust Indenture? Accounting implications?), the ordinary right of subrogation should entitle the Province to claim against the FE in respect of the assumed obligations, including to enforce the security given by the FE in relation to the assumed obligations.

[2] Confirm description. Should this refer to LGIC for Regulations?

[3] LGIC?

[4] Too broad and unlimited.

~~investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the~~ ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations ~~on the same basis as before such amendment was effected~~;

(D) a court of competent jurisdiction (i) [declares any funding obligations of the Financing Entity to be invalid or unenforceable[5] or (ii)] in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that adversely affects ~~the rights and interests of the Financing Entity, including, for greater certainty, in any manner that is reasonably expected to limit~~ the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its ~~funding~~debt obligations ~~on the same basis as before such judgement~~; or

(E) [there is a change in the organization, structure or operations of the IESO or a change in the electricity market structure or operations in each case in any way that adversely affects the ~~rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the~~ ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations ~~on the same basis as before such amendment was effected~~

~~**[NTD: Alternatively, with respect to the IESO servicing obligations, include the Servicing Guarantee language with respect to the IESO that was included in the last mark-up of the term sheet received from the Province**~~.][6]

[5] Delete. The Province will not be directly involved in creating or issuing FE obligations, and so the Province should not be asked to take responsibility for the validity or enforceability of FE obligations. OPG will be in charge of structuring, documenting and implementing the FE obligations, and so any problem should be the responsibility of OPG.

[6] Consider if the Province should take responsibility for IESO/market related changes that have an incidental effect on the underlying cash flows?

Guarantee:	~~Upon~~The indenture trustee will have the right to require that, upon the occurrence of a Guarantee Activation Event, the Guarantor ~~shall immediately~~will assume and pay when due (without acceleration) all of the specified obligations[7] of the Financing Entity.[8] The specified obligations of the Financing Entity will include its funding obligations as well as any other obligation of the Financing Entity ~~has related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commissions~~that ranks ahead of or equally with the rated debt obligations of the Financing Entity pursuant to the trust indenture. The exercise of such right by the indenture trustee in accordance with the trust indenture shall constitute the only remedy available under the Guarantee. Under no circumstances shall the Guarantor be obligated to pay or indemnify the Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Rights of Subrogation:	Without limiting the Guarantor's rights of subrogation as a guarantor by operation of law, upon becoming obligated to assume the obligations of a Financing Entity under the Guarantee, the Guarantor shall become entitled to all of the Beneficiaries' rights and interests under and in respect of each related investment interest and property of the Financing Entity, including under the agreements to which the Financing Entity is a party.[9]
Term:	The Guarantee will continue for as long as the Financing Entity has any outstanding financing or other contractual obligations that are or are intended to be secured by the Guarantee [and until such obligations have all been paid in full or otherwise satisfied][10]
Approval ~~Requirement~~Requirements:	~~The guarantee agreement containing~~A Guarantee will become effective in respect of a Financing Entity's obligations (including any modification) only after the Guarantor has confirmed in

[7] Need to discuss how best to narrow this. Practical issues arise. Perhaps can limit to amounts payable in priority to or pari passu with rated debt obligations in the priority of payments waterfall. For example, if amounts payable to OPG are lower priority, these could be excluded. This would require the Province to pre-agree to the priority of payments permitted under the program. In any event, need to limit to "specified creditors".

[8] Need to come up with a mechanic where the Province is subrogated to the FE's cash flow rights under the investment interest(s) and the FE's contractual rights in relation to the transfer, swaps, indemnities, etc.

[9] If the Province assumes the obligations of an FE, it should become directly entitled to all of the FEs rights and interests. This wording is intended to give the Province direct rights to collect CEAs and claim indemnities otherwise available to FEs.

[10] Not sure what this phrase adds to the concept of "outstanding"?

	writing that the Guarantee applies to such obligations. A guarantee agreement between the Guarantor (subject to approval by the Minister of Energy and the Minister of Finance, acting together) and a Financing Entity, setting forth the terms and conditions ~~contemplated by this term sheet shall be entered into prior to the Financing Entity incurring its first funding obligation. The Province shall enter into the guarantee based on~~of the Guarantee on a basis consistent with this term sheet, will annex the applicable forms of program and series ~~financing documents required for each financing transaction~~documents under which obligations of the Financing Entity may arise (e.g., form of trust indenture and series supplemental indenture). As long as the ~~financing transaction~~ documents ~~are generally~~under which an obligation arises are and remain consistent in all material respects with ~~the~~such agreed upon ~~form, the Province's specific approval for specific funding obligations incurred by the Financing Entity will not be required. Subsequent approval is only needed if the form of such documents are materially changed. For greater certainty, deal specific terms (such as tenor,~~forms, the Guarantee provided for under the guarantee agreement will be effective in relation to such obligation. The forms of program and series documents may include alternative terms and conditions, including such matters such as tenor and pricing~~, etc) shall not be considered a change in the form of transaction and series documents~~ parameters, on which the specific terms of permitted obligations may be based without the further written agreement of the Guarantor.[11]
FIPPA:	The parties will acknowledge that the Guarantor will be bound by the Freedom of Information and Protection of Privacy Act (Ontario) and that any information provided to the Guarantor, or any agent or representative of the Guarantor in connection with the Guarantee may be subject to disclosure in accordance with the act or as otherwise required by law.
Representations and Warranties:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity.
No Changes to an Investment Interest:	A Financing Entity may not change its rights and interests under an investment interest in any way that could adversely affect the Guarantor's prospective rights and entitlements upon subrogation

[11] As a separate matter, consider whether the Province needs the ability to pre-agree the form of any IESO/FE transfer agreement and approve any amendments. Is it sufficient that IESO will be a party?

	in respect of the investment interest.
Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Governing Law:	Province of Ontario

Warehousing Takeout Risk and Servicing (Commingling) Risk *Note – these items are provided for information purposes only*[12] *as these risks were included in the previous version of the term sheet as items that the Dealers/OPG were looking for the Province for protection against. The current proposals with respect to these items is described below. These do not contain any requirement for the Province to directly backstop these risks.*	
Commingling Risk (applies to Warehouse as well as any Term transactions)	
Commingling Risk[13] **Mitigant:**	For any LDC which is not investment grade rated by each of the rating agencies which are rating the funding obligations (the "Non-Investment Grade LDCs"), either: (A) The IESO must post a Letter of Credit (L/C)[14], or deposit funds[15] in a Commingling Reserve Account in a quantum equal to the Commingling Risk Amount; or (B) The IESO, for so long as it is rated investment grade by the rating agencies which are rating the funding obligations, will assume responsibility for commingling risk by the LDCs and will agree to remit to the Financing Entity any clean energy adjustment amounts collected by the LDC, regardless of whether the LDC remitted those amounts to the IESO for remittance to the Financing

[12] This mark-up is limited to identifying items of commercial significance that would impact the Province upon assumption of the related obligations under the Guarantee.

[13] Given the generous cross-subsidization implications of the existing finance amount calculation and failsafe true-up mechanism, this seems to be over-kill.

[14] Consider accounting implications.

[15] Economically inefficient due to negative carry implications.

	Entity.[16]
Commingling Risk Amount:	An amount equal to the sum of the expected Clean Energy Adjustment collections from the Non-Investment Grade LDCs over the next [45-60][17] days.
Commingling Risk Amount Reset Date:	Each settlement date for the Financing Entity (monthly)
Beneficiary:	The beneficiary of the L/C or the Commingling Reserve Account would be the Financing Entity and the Indenture Trustee for the benefit of the creditors of the Financing Entity[18]. The Financing Entity and/or the Indenture Trustee would have the ability to draw down the L/C or draw on the Commingling Reserve Account for any clean energy adjustment amounts expected to be received from the IESO but which were not received due to those funds not being remitted from an LDC to the IESO for that period.[19]
L/C Provider:	An entity rated at least A+ (or equivalent).
Approvals:	The approach is subject to approval from the IESO, by the rating agencies rating the funding obligations of the Financing Entity and the risk management areas of the banks providing the warehouse facilities. Consideration of the arrangements will also form part of the approval process undertaken by the Ministers, on behalf of the Province.
Warehouse Takeout Risk	
Commitment Period for Warehouse[~~1~~20]:	Expected to be 12-24 months.[21]
Takeout for Warehouse:	Expected to be every 3-6 months.

[16] Consider accounting implications.
[17] Consider rationale. Monthly reconciliations and settlement suggest that 30 days would be sufficient.
[18] Make consistent with Guarantee arrangement, so that the indenture trustee would be the direct beneficiary.
[19] Address rights of subrogation.
[~~1~~20] Please note that this is not intended to be an exhaustive list of terms for the warehouse facility, but rather is a summary of a few select terms that relate to the warehouse takeout risk.
[21] The rationale for the limited terms of the bank commitments should be understood. For example, if the reason is due to regulatory capital implications (e.g., which are customarily a governor under ABCP programs), the banks may be willing to consider longer commitments provided the additional costs associated with increased regulatory capital obligations are included in the economic model.

Warehouse Default Event:	One of the events of default[22] for the warehouse will be the failure to repay the warehouse facility at the end of the commitment term.
Consequences of Warehouse Default Event:	If the Warehouse Default Event[223] described above occurs, all amounts funded through the warehouse would become immediately due and payable, subject to the Warehouse Default Payment Cap, and Default Pricing will be charged on any amounts funded through the warehouse facility.
Default Pricing:	Step up in pricing to [x] until the moratorium period ends and thereafter stepping-up in increments of [y] every six months until the warehouse facility is repaid.[24]
Warehouse Default Payment Cap:	For any given reference period following the occurrence of a Warehouse Default Event, the amount that shall be remitted[25] to the Financing Entity for repayment of the warehouse facilities will be the sum of (x) the interest amount due on the warehouse facilities (which, for greater certainty will include any program fees) and (y) the lesser of: (a) The outstanding amount funded through the warehouse facilities; and (b) The maximum amount that can be charged for that period so that clean energy adjustments are equal to, but do not exceed, the fair allocation amount for such period.[26]
Approval Requirement:	Subject to approval by the risk management areas of the banks providing the warehouse facilities which will in part depend on receipt of information on the fair allocation curve and an understanding of how long the "tail risk" could be following a Warehouse Default Event. Consideration of the arrangements will also form part of the approval process undertaken by the Ministers.

[22] These should be spelled out in detail in the term sheet, given the economic consequences to the structure.

[223] Note there may be other Warehouse Default Events beyond the takeout risk item described above. The consequences for a breach of these other Warehouse Default Events may be different than the one described above where the default is related to failure to takeout the warehouse facility by the end of the commitment period.

[24] Consider cost consequences, including on assumption.

[25] This seems to conflict with the reality that the cash will not be available to service these amounts. Consider what is the consequence under the structure of an unremedied default event. If the impact is limited to step-up pricing on outstanding amounts, then there should be clarity that an unremedied default does not permit a realization of FE security (e.g., rights in relation to the CEAs opposite the specified consumers).

[26] It seems unclear how this relates to the requirements of section 21 of the OFHPA. This should not conflict with the implied limitation on charging CEAs during the moratorium period. For example, it does not reflect the readjustment amount concept.

	on behalf of the Province.

Date:	Tuesday, July 18, 2017 1:04:31 PM

Thank you May, the email from E&Y is clear and given a choice between a performance methodology, that in our opinion, is not entirely reflective of capital markets decision making and jeopardizing the consolidation of the Trust, we are opting to accept OPG's methodology for the construction of the benchmark.
Pls proceed accordingly.

Subject: EY concurrence re: Draft Trust Performance Fee Recommendations
Hi Ken,
My name is May Lapira and I'm the newest addition to the Treasury team. Jenny has been working hard to get me updated on the accounting aspects of the Fair Hydro Plan so we can transition future correspondences over to me.
Per our discussion during the call earlier today, we have reached out to EY to obtain concurrence on our interpretation of their accounting position. Please see attached the email trail from EY's senior manager Brittany Keenan confirming that excluding the equity injection component from the definition of a 'benchmark bond' would result in non-commercial terms and could ultimately result in OPG not being able to consolidate the financing entity.
Please let me know if you have any follow up questions on this matter.
I look forward to working with you,
May

Subject: Equity Injection Term Sheet

Hey John, Carlos,

Attached is a term sheet from OPG that would form the basis of the Equity Injection Agreement. I think this would be an agreement between ENE/OPG and OFA. While it currently says 5 business days in this document Clara flagged that the IESO may be looking for it to be settled in as quickly as 1 day. Given how quick this needs to happen I've included a line about ENE delegating authority to the OFA to manage this monthly process. I think ENE would want to be kept in the loop but I don't think they would need to sign off each month. That being said I haven't run this up the chain at ENE yet or discussed with ENE controllership.

Id defer to you guys for short term mechanics for the most part as you have the experience on the borrowing side. If you could take a look and mark-up where desired then maybe we can chat?

Let me know if you have any questions.

Kaitlin

Fair Hydro Plan –Master Subscription Agreement
Term Sheet

- Parties: OPG, OFA, Ministry of Energy
- The Province agrees to inject 44% of total funding of GA asset by way of equity subscription in OPG, which amount OPG in turn will invest in the Fair Hydro Trust as subordinated debt (**Equity Injection Plan**)
- Minister of Energy/Province approves Equity Injection Plan, and initial equity injection amount for 2017/18 fiscal year, and delegates to appropriate ministry staff authority to implement Equity Injection Plan (**Delegated Authority**)
- Long term, OPG equity requirements will form part of the business planning process in place between OPG and Ministry of Energy, i.e., annually OPG to include forecasts of its equity requirements for the upcoming 3 years in its business plan submission -- NOTE: this portion of the business plan is not subject to concurrence by the shareholder
- Ministry of Energy will seek appropriation on an annual basis through PRRT for the amounts requested by OPG for its equity requirements-- NOTE: amount of annual appropriation to cover OPG multi-year forecasts
- The Ministry of Energy will delegate authority to the Ontario Financing Authority to manage the monthly settlement process
- OPG agrees use the equity subscription amounts solely for funding the Fair Hydro Trust's subordinated debt requirements as part of the Fair Hydro Plan
- OPG will amend its Articles to create an additional class of shares – Class A Shares – which will be non-voting and redeemable at OPG's option
- OPG will issue Class A Shares to the Province monthly at a value per share equal to book value, as determined from OPG's last approved quarterly financial statements -- Value of first Class A shares issued to Province will be based on book value of OPG common shares – i.e., existing shareholder's equity
- OPG will have the right to repay equity to the Province, through exercise of its right to redeem the Class A Shares, as principal repayment of the subordinated debt is made commencing in 2027
- Redemption value of the Class A Shares to be based on book value on the redemption date, i.e., the equity value per Class A share at the end of the prior financial quarter as set out in OPG's approved financial statements

Monthly Process/Mechanics of Share Subscriptions:

a) OPG notifies OFA and Ministry of Energy of required equity injection and number of shares

Timing: [same day as notice from Fair Hydro Trust]

Documents/steps:

(i) share subscription form,
(ii) supporting documentation/invoice from Fair Hydro Trust, confirming amount of GA asset purchase for the month

Commented [BA1]: Question about wording on this point. Is appropriation request not just for one year with multi-year projections included for fiscal planning purposes?

Formatted: Indent: Left: 0.5", No bullets or numbering

Commented [CY2]: May need a service level agreement between Ministry of Energy and OFA

Formatted: Highlight

Commented [SQ23]: As MOF legal pointed out, this will need to be clarified as its not clear whether MOE can delegate to OFA since it is not its agency.

As in past scenarios, OFA would do the "back office" transactions-related work, but direction would come from someone at Energy subject to an MOU being established re: services being rendered.

Commented [CY4]: New class of shares will make it easier to track the outflows in the first 10 years and the repayments starting in year 11-40

Commented [RK5]: Will the Trust be purchasing the IESO regulatory asset monthly, such that the sub-debt is issued monthly and OPG earns a return to help offset the Province's borrowing costs?

What if the Trust does not purchase monthly, but, e.g., quarterly – shouldn't the wording of the term sheet contemplate/encompass this?

Isn't it a problem if the asset is purchased less than monthly, such that the Trust does not issue debt or sub-debt, so there is no sub-debt interest to offset the Province's borrowing cost?

Commented [RK6]: Is this expected to be a fixed amount, as at the initial 1999 book value, and now and over the injection and redemption periods of the FHP?

What are the kinds of events that could change the book value? Risk / likelihood?

Or, is the book value of common shares the equity at the moment in time divided by the number of shares – more a fair value?

Commented [JK7R6]: There have been earlier discussions but would like to get clarity from OPG on the book value and if not the original book value how it would be computed.

Commented [SQ28]: This seems to imply that there will be no rate of return for the Province's equity injection, and so Province will eat the IOD cost – is this correct and confirmed now?

Commented [RK9]: Could it be zero?

b) OFA and OPG settle equity injection amounts

Timing: [five] business days from notice to OFA and ENE to payment/settlement with OPG [NOTE: timing to be confirmed based on IESO/Trust process requirements]

Documents/steps:

(i) completed/signed share subscription form from OFA and ENE/~~Province~~ to OPG

(ii) funds transfer from ~~OFA~~ Province to OPG account)

(iii) OPG receipt, together with secretary's certificate confirming issue of shares/update of share register sent to both OFA and ENE

Longer term Process/Approvals:

1. Equity Requirements Estimates:
   a. Business Plan Submissions
   b. OPG Board Approvals
      - [Bi-annual] Board of Directors' resolutions authorizing equity requirement for period
      - [Bi-annual Shareholder's resolutions authorizing equity requirement for period][NOTE: TBD if needed]

   c. Ministry of Energy appropriations
      ~~[describe annual process]~~Ministry of Energy will seek appropriation through PRRT process, including 3-year estimates that OPG provides through its business plan submission

Share Redemption Process

- TBD -- process to be determined at a later date and appended as Appendix to Master Subscription Agreement

Commented [CY10]: For the loans from OEFC to OPG, Mike Manning signs and we have a system that tracks bond/loan tickets.

The Equity injections are different than a loan and will require Province accounting entries - I will discuss with Mike Manning and Ken Kandeepan

Commented [KC11]: OFA: any details we can add based on your experience on the loan side? Who signs off at the OFA? Should we just make it the same process and delegate authority from ENE so OfA can execute?

Formatted: Highlight

Formatted: Not Highlight

Formatted: Highlight

Commented [CY12]: the Province is providing the funds

Formatted: Strikethrough

Fair Hydro Plan –Master Subscription Agreement
Term Sheet

- Parties: OPG, OFA, Ministry of Energy
- The Province agrees to inject 44% of total funding of GA asset by way of equity subscription in OPG, which amount OPG in turn will invest in the Fair Hydro Trust as subordinated debt (**Equity Injection Plan**)
- Minister of Energy/Province approves Equity Injection Plan, and initial equity injection amount for 2017/18 fiscal year, and delegates to appropriate ministry staff authority to implement Equity Injection Plan (**Delegated Authority**)
- Long term, OPG equity requirements will form part of the business planning process in place between OPG and Ministry of Energy, i.e., annually OPG to include forecasts of its equity requirements for the upcoming 3 years in its business plan submission -- NOTE: this portion of the business plan is not subject to concurrence by the shareholder
- Ministry of Energy will seek an asset appropriation on an annual basis through PRRT for the amounts requested by OPG for its equity requirements-- NOTE: amount of annual appropriation to cover OPG multi-year forecasts
- The Ministry of Energy will delegate authority to the Ontario Financing Authority to manage the monthly settlement process
- OPG agrees use the equity subscription amounts solely for funding the Fair Hydro Trust's subordinated debt requirements as part of the Fair Hydro Plan
- OPG will amend its Articles to create an additional class of shares – Class A Shares – which will be non-voting and redeemable at OPG's option
- OPG will issue Class A Shares to the Province monthly at a value per share equal to book value, as determined from OPG's last approved quarterly financial statements -- Value of first Class A shares issued to Province will be based on book value of OPG common shares – i.e., existing shareholder's equity
- OPG will have the right to repay equity to the Province, through exercise of its right to redeem the Class A Shares, as principal repayment of the subordinated debt is made commencing in 2027
- Redemption value of the Class A Shares to be based on book value on the redemption date, i.e., the equity value per Class A share at the end of the prior financial quarter as set out in OPG's approved financial statements

Monthly Process/Mechanics of Share Subscriptions:

a) OPG notifies OFA and Ministry of Energy of required equity injection and number of shares

Timing: [same day as notice from Fair Hydro Trust]

Documents/steps:

(i) share subscription form,
(ii) supporting documentation/invoice from Fair Hydro Trust, confirming amount of GA asset purchase for the month

Commented [KK1]: Its important to note that the appropriation is not an expense item, rather seeks to set up an asset.

Commented [BA2]: Question about wording on this point. Is appropriation request not just for one year with multi-year projections included for fiscal planning purposes?

Formatted: Indent: Left: 0.5", No bullets or numbering

Commented [CY3]: May need a service level agreement between Ministry of Energy and OFA

Formatted: Highlight

Commented [SQ24]: As MOF legal pointed out, this will need to be clarified as its not clear whether MOE can delegate to OFA since it is not its agency.

As in past scenarios, OFA would do the "back office" transactions-related work, but direction would come from someone at Energy subject to an MOU being established re: services being rendered.

Commented [KK5]: Are the Class A shares the same class as the current shares? I was under the impression that the shares issued under Equity Injection while still common shares will be designated differently in order to facilitate tracking.

Commented [CY6]: New class of shares will make it easier to track the outflows in the first 10 years and the repayments starting in year 11-40

Commented [RK7]: Will the Trust be purchasing the IESO regulatory asset monthly, such that the sub-debt is issued monthly and OPG earns a return to help offset the Province's borrowing costs?

What if the Trust does not purchase monthly, but, e.g., quarterly – shouldn't the wording of the term sheet contemplate/encompass this?

Isn't it a problem if the asset is purchased less than monthly, such that the Trust does not issue debt or sub-debt, so there is no sub-debt interest to offset the Province's borrowing cost?

Commented [RK8]: Is this expected to be a fixed amount, as at the initial 1999 book value, and now and over the injection and redemption periods of the FHP?

What are the kinds of events that could change the book value? Risk / likelihood?

...

Commented [JK9R8]: There have been earlier discussions but would like to get clarity from OPG on the book value and if not the original book value how it would be computed.

Commented [KK10]: How is this right to redeem formalized? TDS has indicated that the inclusion of any option to allow redemption moves the shares closer to the definition of debt.

Commented [SQ211]: This seems to imply that there will be no rate of return for the Province's equity injection, and so Province will eat the IOD cost – is this correct and confirmed now?

Commented [KK12]: How about dividends to the Province to ensure that it is whole on a cash as well as fiscal basis

Commented [RK13]: Could it be zero?

b) OFA and OPG settle equity injection amounts

Timing: [five] business days from notice to OFA and ENE to payment/settlement with OPG [NOTE: timing to be confirmed based on IESO/Trust process requirements]

Documents/steps:

(i) completed/signed share subscription form from OFA and ENE/~~Province~~ to OPG

(ii) funds transfer from ~~OFA~~ Province to OPG account)

(iii) OPG receipt, together with secretary's certificate confirming issue of shares/update of share register sent to both OFA and ENE

Longer term Process/Approvals:

1. Equity Requirements Estimates:
   a. Business Plan Submissions
   b. OPG Board Approvals
      - [Bi-annual] Board of Directors' resolutions authorizing equity requirement for period
      - [Bi-annual Shareholder's resolutions authorizing equity requirement for period][NOTE: TBD if needed]

   c. Ministry of Energy appropriations
      ~~[describe annual process]~~Ministry of Energy will seek appropriation through PRRT process, including 3-year estimates that OPG provides through its business plan submission

Share Redemption Process

- TBD -- process to be determined at a later date and appended as Appendix to Master Subscription Agreement

Commented [CY14]: For the loans from OEFC to OPG, Mike Manning signs and we have a system that tracks bond/loan tickets.

The Equity injections are different than a loan and will require Province accounting entries - I will discuss with Mike Manning and Ken Kandeepan

Commented [KC15]: OFA: any details we can add based on your experience on the loan side? Who signs off at the OFA? Should we just make it the same process and delegate authority from ENE so OfA can execute? My suggestion is that the details be part of an MOU or Services Agreement between the OFA and Energy

Formatted: Highlight

Formatted: Not Highlight

Subject:	RE: FHP - OPG Performance Fee
Date:	Thursday, July 06, 2017 2:29:56 PM

Hi Scott

I reviewed the email from Jackson Huang that you attached against E&Y's opinion (dated May 17) specifically against any mention of a management fee. Page 4 of the opinion states;" The purpose of the Trust is to allow OPG to earn a return on the Intangible Asset from the IESO by effectively managing financing to earn a spread, earn management fees, and earn interest fees. For the reasons noted above, OPG has control over the decisions to be made about the relevant activities".

It appears that E&Y conceptually envisages a management fee in addition to the spread earned by OPG on the 5% debt it funds and interest fees on the 44% funded by the Province's equity injection. Drawing parallels between the proposed FHP structure and ONFA, is in my opinion not particularly useful. The latter manages tangible monetary assets that earn income based on specific investment decisions. Such is not the case in the latter where the asset is intangible and its attraction is the owner's ability to benefit from certain legislated revenue streams that allow the repayment of the liabilities incurred in purchasing said asset. I am cc'ing Ron Kwan on this since he may want to add to the ONFA, FHP comparison. The bottom line is there is no asset management in the FHP, rather and management fees should be conceptually a reimbursement of the costs incurred by the FSM in discharging its mandate.

I would therefore propose a spectrum of options to address the management fee:

On the narrow end of the spectrum it can be argued that the act of lending the 44% equity funding to the Trust constitutes the "interest fees" referred to above in the opinion. Any spread that OPG includes in the rate charged to the Trust – we understand that OPG will indeed include a spread on the basis that this debt is defined as subordinate – can represent the management fee.

The middle of the spectrum can be represented by a spread component, over and above what OPG includes to address the sub debt issue, that constitutes the management fee. And at the broader end of the spectrum OPG can include a specific spread not just on the 44% funded via the equity injection but also on the 5% it funds through its own borrowings.

Finally your attached email proposes the following: pls see my comments in red

(i) inversely in relation to the weighted-average interest rate (for example, weighted by dollar amount of each funding obligation) of all new funding obligations incurred during a calendar year; and/or. Not sure what "inversely" means in this context, if the idea is to include a simple spread on the weighted average borrowing rate this is no different from what we have proposed above.

(ii) as a percentage [fixed under regulation or determined by OEB] of the "surplus" (where present value of all funding obligations discounted at a fixed rate [to be prescribed or determined by OEB] > actual present value of all funding obligations) or "deficit" during a period

[Note: this most closely tracks the adjustment mechanism in ONFA and creates a direct relationship between the FSM fees and the dollar effect of FSM's management; a period can be more than one calendar year which means the FSM fees payable for a calendar year would not change until a triggering event]. This is very confusing; what is "actual present value"

Thanks and happy to discuss.

Ken k

I think we are aligned. Does OFA have some suggestions about how to structure the fee? Feel free to float the "option 2" from the note and see if they have suggestions about how to make it better. I haven't yet sent that note up, as I am trying to work in some research that Jackson did (attached for your reference).

Subject: FHP - OPG Performance Fee
Hi Scott
I am writing this to you as an FYI since there may be some push back from OPG. I am cc'ing Cindy as well given the accounting implications raised by OPG. As you may be aware, OPG provided us with the proposed methodology for computing the performance fee. Both the benchmark and the actual include the 44% debt issued by OPG to the Trust which is in turn fully funded by the Province's equity injection.
Given that there are no capital market decision-making associated with this component of the debt, we are reluctant to sign off on OPG's methodology in its current form. OPG is not particularly happy with our response and posits that the accounting treatment requires a performance fee. While I agree that the E&Y opinion does refer to a performance fee I am a little doubtful that E&Y specified that all of the debt should be part of the computation. I have requested that OPG provide me with any specific reference by E&Y on the performance fee methodology. If E&Y does require that the benchmark and actual include the total debt issuance, we can reconsider our stance.
Finally, the performance fee methodology computes the fee for a particular year by applying the difference between the benchmark and the actual on the 5% that is borrowed by OPG. We

requested and obtained confirmation that the performance fee will be limited to new borrowings by OPG and not apply to any refinancing. OPG finds this acceptable and it also ensures that the performance fee will be capped at $1.2 million or so per annum.
Thanks
Ken k

Subject: Fair Hydro Business Issues

Hi Gadi, Mike, Ron,

I had a chat with Ken Hartwick on Friday afternoon about our position on fees as well as progress on what we have been calling “business issues” (equity injection process, sub-debt agreement, guarantees). He agreed that we could push out the fees conversation from this round of regulation drafting, but wanted to make sure we set up time in early July to talk through these issues and land them asap. Here is where I think we are on each point:

- Fees: OPG wants a very light touch from OEB and, formulaic approach that mimics fee structures for portfolio managers (base fee tied to AUM + variable fee tied to performance). ENE agrees with the variable fee component (limited to $1M floor / ceiling), but has concerns about a base fee that does not tie to costs and wants a more substantive role for OEB.

- Guarantees: as you know the Province’s position was shared on Friday

- Equity Injections: I believe OPG has provided a draft structure. Unless OFA has concerns, I think this is largely procedural.

- Sub-debt: I don’t have much visibility in to this one. I heard folks from OFA were in discussions. This should link in with the fees conversation given the relationship with performance.

I would suggest we try and have an internal conversation later this week to discuss where we are on each of these in order to be ready to meet with OPG the following week.

Let me know if this makes sense or if I am missing anything.

Thanks,

Scott

Financing Plan

ONTARIO POWER GENERATION

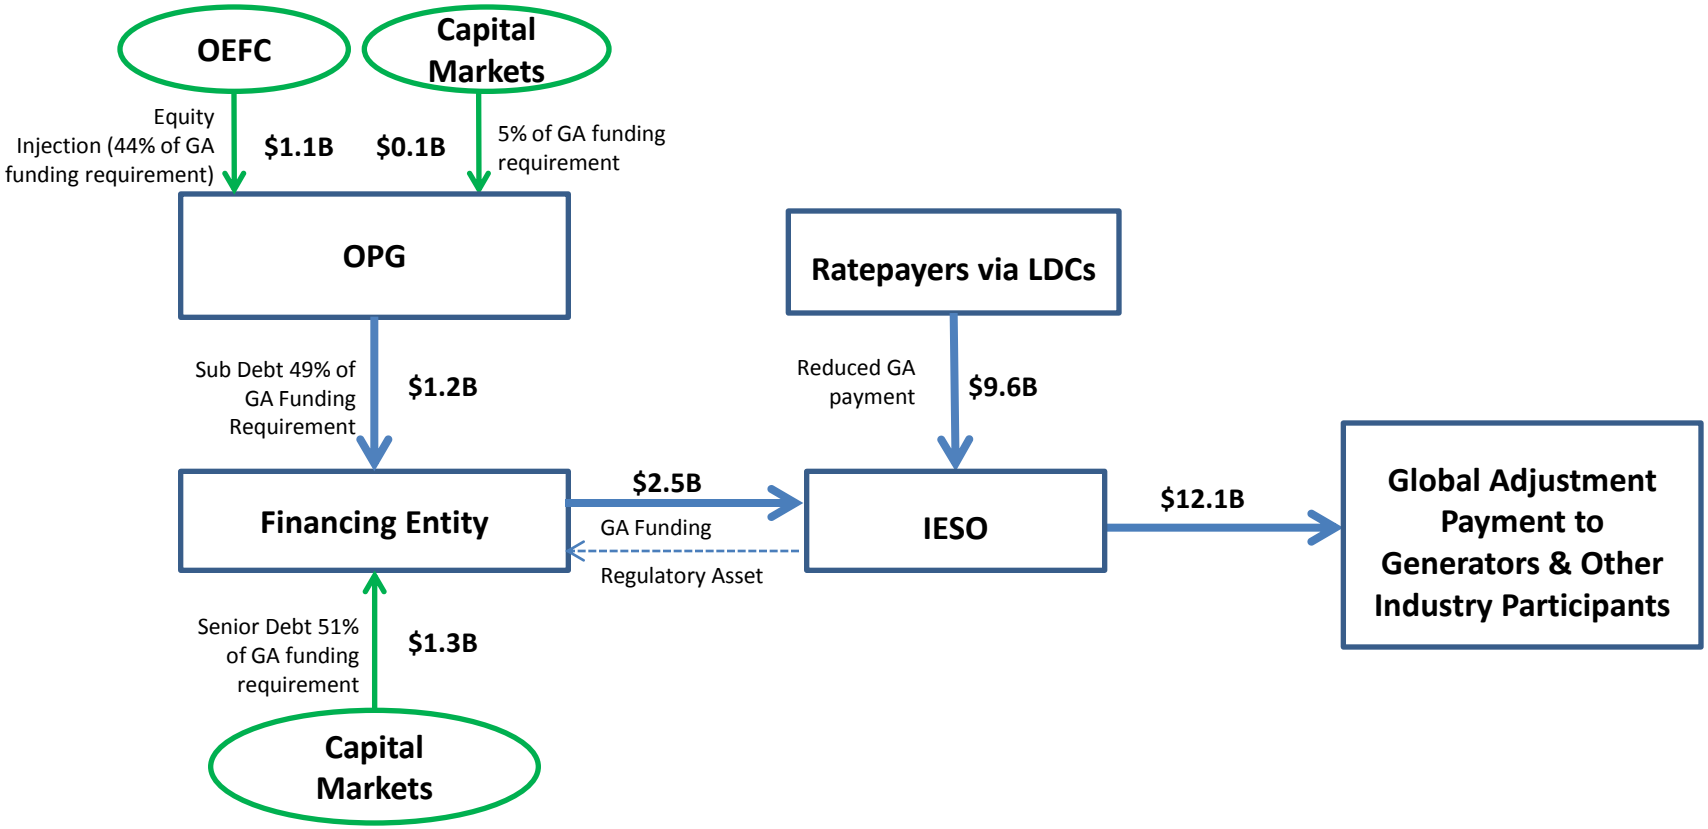
Financing Plan

Highlights:

- Legislation as currently drafted provides for a framework to implement the Fair Hydro Plan Act:
  - (i) to allow flexibility in OPG's corporate structure and to enable OPG to raise financing through public offerings of debt
  - (ii) for a regulatory asset consisting of the right to recover over time the amount of the Global Adjustment being deferred, together with interest and other costs
- Regulations and principal agreement need to be negotiated and agreed to in order to provide a completely financeable program
- A Financing Entity will be set up that will hold the claim on future customers and the debt issued to fund the payment to the IESO for the regulatory asset
- The GA financing platform will be developed to access both the Canadian and US markets in order to access best pricing and flexibility
- OPG will provide services to the Financing Entity including financings via a financial service and management agreement

Financing Plan – Structure

Illustration based on $2.5B GA Funding



Financing Plan - Components

- Debt components are:

	Risk Profile	Source	% of Total Funding Requirement
Tranche A Senior Debt	the least risky	Capital Markets	51%
Tranche B Sub Debt	In between A&C	OPG via Province	39%
Tranche C Sub Debt	the most risky	OPG via Province	5%
		OPG via Capital Markets	5%

Financing Plan – Rationale

The rationale for the structural debt percentages are:

- **Minimum of 51% from the Capital Markets**
  - Required from an accounting treatment perspective in order to consolidate the Financing Entity on OPG's financial statements, otherwise the debt is consolidated with the Province
  - Accounting treatment also requires OPG to direct the activities of the Financing Entity, and that the Province not directly or indirectly fund (through debt or equity) more than 50% of the Financing Entity to allow for OPG consolidation
- **Minimum Provincial equity contribution of up to 44%**
  - Help to is avoids the potential risk of a credit downgrade from the rating agencies as a result of the incremental debt consolidated on OPG financial statements negatively impacting credit metrics (Funds from Operations/ Debt)
- **Minimum OPG Investment of 5% from the Capital Market**
  - OPG requires a minimal amount of debt at risk financed through OPG operating cash flows or capital market debt. To demonstrate control of the Financing Entity OPG must own >=50% of the most subordinated debt and targeted to be no less than 5% of the total debt of the Financing Entity
  - The Province must not directly or indirectly fund (through debt or equity) more than 50% of OPG's investments in the most subordinated debt of the Financing Entity to lessen the materiality of OPG's debt at risk

Financing Plan – Other Elements

Other Structural Advantages:

- **Financing Entity:**
  - Is ring-fenced from OPG as a single purpose entity with no other operations that could add risk to the OPG entity
  - Is targeting a higher credit rating than OPG and therefore will have lower financing costs than OPG in the Capital Markets
  - Will record funding revenue reflecting the growth in the deferred asset value which will mitigate the negative impact on OPG's credit rating from the debt consolidation
  - Allows for flexibility to fund debt tranches with different terms, contractual consideration and subordination
  - Subordination will play an important credit enhancement role for the senior debt, and could act as a buffer or first loss of capital in any credit event
- **Operational attributes:**
  - OPG is the Financing and Services Manager for the Financing Entity and direct its activities
  - Short term debt can be warehoused in the Financing Entity until OPG accesses the Capital Markets
  - OPG will be independently accessing the public debt markets on a commercial basis
  - Opportunity to access the US market as appropriate

Financing Plan – Overview

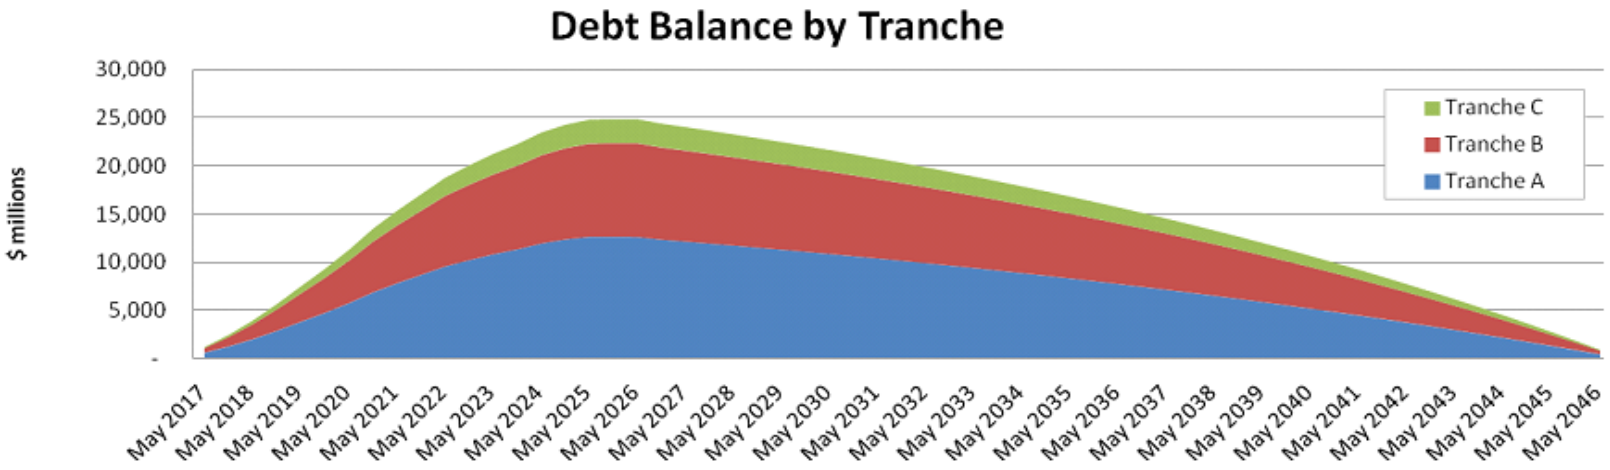
The Financing Plan has two main phases:

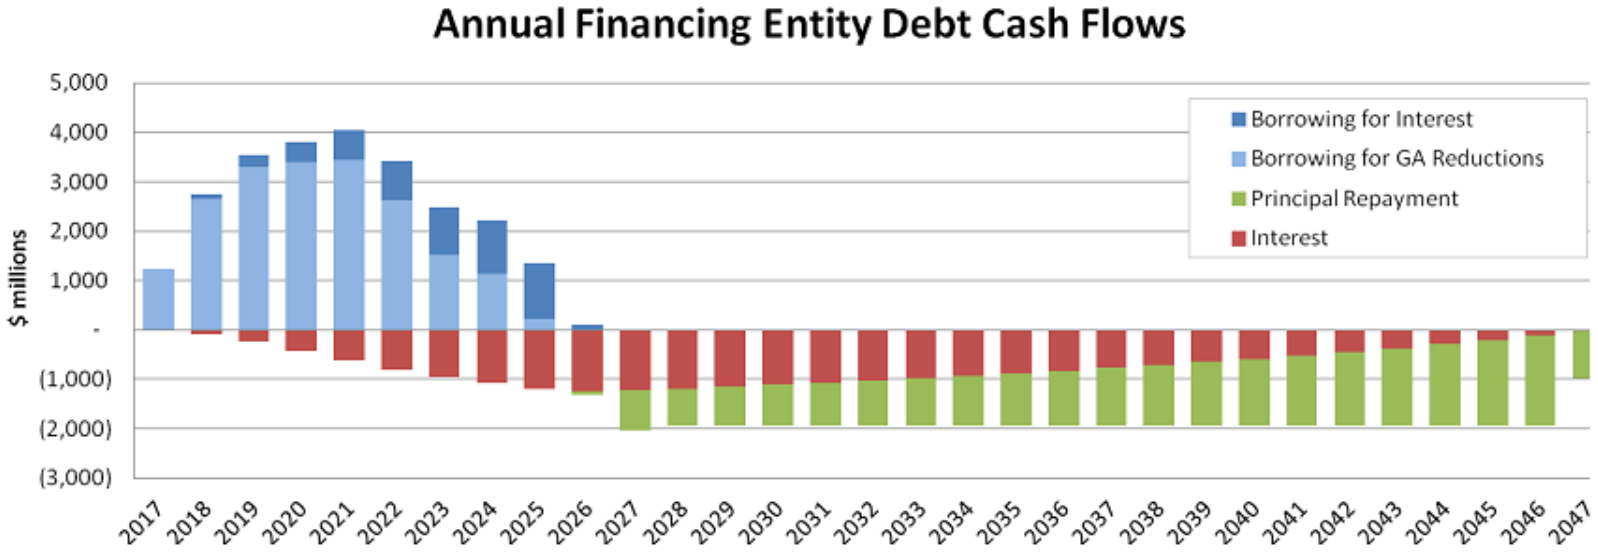
- **Net Borrowing Phase (2017-2026)**
  - During this 10 year period the debt created by the deferral of electricity charges will accumulate, together with associated interest costs & other fees, that in combination will establish the regulatory assets.
  - Monthly the Financing Entity will purchase the regulatory assets from IESO (purchase is ~$200M) as follows:
    - 51% through external capital markets (~$102M per month)
      - Initially the financing plan will access liquidity facilities at the Financing Entity level to fund and warehouse the monthly asset purchase requirement
      - On a quarterly basis when the accumulated monthly funding has reached a certain level ($300M), public debt will be offered to the market
    - Up to 49% subordinated debt in OPG
      - 44% funded through OPG via equity injections from the Province (~$88M/ month)
      - 5% funded through OPG via the capital markets (~$10M/ month)
  - Cash interest will be paid based on the lender agreements. The interest costs will be added to future borrowing requirements, and do not flow through to consumers during this period

Financing Plan – Program Overview

- **Debt Amortization Phase (2027-2046)**
  - Starting 2027, the accumulated debt created by the deferral will be recovered and paid down by 2047
  - Similar to mortgage style debt payment, a combination of principal and interest will be paid to lenders during this 20 yr period
  - Financing Entity structure continues until all the debt is repaid
  - Target to keep the charge paid by ratepayers during the amortization period to less than 10% of a customers bills to meet credit rating agency guidelines

Debt Profile & Cash Flows





ONTARIO POWER GENERATION

Financing Plan – Funding Alternatives

Key Considerations

- There are several potential funding sources that can be considered to structure the overall financing program, including securitization (issued in Canada or the U.S.), bonds, bank financing, and subordinated debt

Short Term	
ABCP Conduit	▪ R-1(high)/P-1 credit ratings required from DBRS and Moody's (limited market capacity if these ratings are not achieved) ▪ Requires periodic take-outs to repay warehouse funding; take-out risk needs to be addressed as amortization of debt currently not contemplated to commence until after year 10
Bank	▪ No external rating required ▪ Take-out risk needs to be addressed as amortization of debt currently not contemplated to commence until after year 10
Long Term	
Canadian Term ABS	▪ AAA ratings required from at least two of DBRS, Moody's, S&P or Fitch (limited market capacity if these ratings are not achieved) ▪ Tenors > 10 years to be explored
Canadian Bond	▪ This type of financing has not been tested in the Canadian market ▪ AAA ratings not required to access the market ▪ Provides access to broadest investor base in the Canadian market
US Term Debt (ABS/Bonds)	▪ Proven market for securitization and higher market capacity available than Canadian Term ABS ▪ Ratings required from at least two of S&P, Moody's or Fitch (AAA required for Term ABS) ▪ Requires cross-currency swaps
Subordinated Debt	▪ Nature of subordinated debt, repayment terms/flexibility and contingent Provincial support applicable to subordinated debt will impact pricing ▪ Quantum of subordinated debt creates equity like thickness and may serve as a credit enhancement for the senior debt

Indicative Pricing Consideration

Indicative Pricing Considerations

- Although all of the debt issued by the Financing Entity is expected to be afforded the same level of protection including a provincial guarantee, a higher return on the subordinated debt (sub debt) would be required to compensate for incremental risk to the extent:
  - The rating agencies attribute a lower rating to the sub debt relative to the senior debt because of its ranking in the cash flow waterfall
  - The ratings of senior debt need to be credit enhanced by all or a portion of the sub debt as follows:
    1) Flexibility to defer charges to rate payers and hence extend the expected duration of the sub debt to manage the total amount charged to rate payers as a proportion of the total bill during the recovery period – could result in non repayment by 2047 if a hard cap is included
    2) Defer principal payments on certain classes of sub debt until more senior notes are fully repaid

Feature	Tranche B Subordinated Debt	Tranche C Subordinated Debt
	Explanation	**Explanation**
Credit Risk	Credit enhancement to Tranche A (senior debt)	Credit enhancement to Tranche A (senior debt) Act as first “loss absorber”
Duration/Tenor Premium	Same duration as Market Notes	Same duration as Market Notes
Certainty of timing of payments	Same as Market Notes but lower in the waterfall	Some additional volatility in timing of payments, but trued-up every 6 months
Liquidity Premium	Issue size expected to be similar to senior debt	Relatively small amount which will have less liquidity

From the conversations that I've been involved with Blakes, Energy, TBS, OPG, etc., one of the challenges that they're trying to overcome is the perception of the banks providing advice to OPG that this is a securitization transaction, which, while it has many similarities, it is not. It seems that TD is also falling into this trap in their analysis, so it would be worthwhile to try to move them off of this perspective for their next round of advice on this, which will have to be in advance of next Tuesday morning when we'll be meeting with the Deputy and the Minister's office in advance of this item going to Fiscal Prep on Wednesday.

I understand where Susan and the TD team are going on this, but TD needs to take the Province's perspective on this, not come at it from the angle of how to structure this to make the financing as easy as possible. We will not, as many of you are aware from our previous discussions, provide anything except the skinniest possible guarantee that would make this financeable, while still ensuring that the appropriate accounting treatment is possible to be achieved.

Thanks,

Gadi

Mike, Jim, Carlos

Please see below for our comments on the draft term sheet for the Provincial Support Agreement. Let us know when you would like to discuss further. Also, please note that we have not sent the

comments or the term sheet to Steve Ashbourne at Blakes. Please let us know if you would like us to do so.

Attached is a sample servicing guarantee for a general securitization transaction to provide examples of common features. Note that the sample guarantee is formatted for a corporate transaction and would have to be adjusted accordingly. Also attached is a brief description of the servicing obligations typically covered by a servicing guarantee.

In reviewing the term sheet, we believe that the Servicing Guarantee is narrow in scope.

- Not a conventional servicing guarantee for securitization transactions
- It may not be acceptable for the rating agencies, particularly if monthly remittances of collections from the LCDs are necessary.

As drafted, it solely allows for the appointment of a replacement servicer by the Guarantor upon the occurrence of a Servicer Default (due to breach of servicing performance).

- It does not cover any losses arising from a breach of the electricity vendors' servicing obligations (typical servicing obligations described in attachment)
- It would preclude the monthly remittance of collections by the LDS to IESO for deposit into the Trust's collection account.

Other Items of Consideration:

- Not typical for the Indenture Trustee to be obligated to provide any reporting to the Guarantor
- Confidentiality would be difficult to maintain for a public issuance. The guarantee is a material component of the transaction and will have to be disclosed in detail in the IM, and possibly posted as a material contract
- Consistent with other "AAA" transactions, performance under the guarantee is expected to occur promptly, typically within 2 business days for payment obligations
- Guarantee does not cover a market disruption and the inability to refinance existing due and maturing issuances (including ABCP)

comments or the term sheet to Steve Ashbourne at Blakes. Please let us know if you would like us to do so.

Attached is a sample servicing guarantee for a general securitization transaction to provide examples of common features. Note that the sample guarantee is formatted for a corporate transaction and would have to be adjusted accordingly. Also attached is a brief description of the servicing obligations typically covered by a servicing guarantee.

In reviewing the term sheet, we believe that the Servicing Guarantee is narrow in scope.

- Not a conventional servicing guarantee for securitization transactions
- It may not be acceptable for the rating agencies, particularly if monthly remittances of collections from the LCDs are necessary.

As drafted, it solely allows for the appointment of a replacement servicer by the Guarantor upon the occurrence of a Servicer Default (due to breach of servicing performance).

- It does not cover any losses arising from a breach of the electricity vendors' servicing obligations (typical servicing obligations described in attachment)
- It would preclude the monthly remittance of collections by the LDS to IESO for deposit into the Trust's collection account.

Other Items of Consideration:

- Not typical for the Indenture Trustee to be obligated to provide any reporting to the Guarantor
- Confidentiality would be difficult to maintain for a public issuance. The guarantee is a material component of the transaction and will have to be disclosed in detail in the IM, and possibly posted as a material contract
- Consistent with other "AAA" transactions, performance under the guarantee is expected to occur promptly, typically within 2 business days for payment obligations
- Guarantee does not cover a market disruption and the inability to refinance existing due and maturing issuances (including ABCP)

Hi Carlos,

Please see attached for comments. While the comments are not material in nature, we have suggested other options that you may wish to consider. I have cc'd Maharukh and Mark in the event you have questions. Please let us know if you would like a call to discuss.

Regards,

Susan

Susan

Here is the latest draft from OPG with input from CIBC/RBC/GS.

We are starting to review the document. Can you also review and forward comments back to us.

I am also expecting OPG and IESO to review and provide more feedback regarding servicing guarantee and LDC co-mingling risks.

Please call if you have any questions - we can discuss timeline.

Regards

Carlos

Comments on the Provincial Protection and Assurances Term Sheet

Our review of the Term Sheet focused on three key aspects:

- Change in Law
- Servicing (commingling)
- Warehouse Takeout Risk

Change in Law:

On Guarantee Activation Events:

- Consider whether some of these types of events should be subject to having a "materially adverse effect" standard on the rights and interest of the special purpose entity, possibly (B), (C) and (E). Generally, imposing this standard for guarantees is not that common. Legal counsel should be able to provide more guidance.
- Guarantee Activation Event (C) – It would be helpful to understand under what circumstances the Province can have the ability to change its contractual obligations under a Guarantee and/or transaction documents without the consent of the Financing Entity. Material changes to transaction documents are typically also subject to the satisfaction of Rating Agency Condition "RAC" (i.e. the action does not result in the rating agency lowering the transaction rating). Investors place great reliance on the RACs in transaction documents to ensure that their interests are protected.

  If it's possible to make changes to the Guarantee and transaction documents without the Financing Entity consent than consider if a Guarantee Activation Event to occur if RAC is not satisfied (i.e. this action results in a ratings downgrade of the transaction).
- Guarantee Activation Event (E) - Is the concern here that a change in IESO's organization, structure, etc or change in the electricity market structure will affect IESO's servicing ability [as alluded in the NTD] or financial capability due to its strong linkage to the Province?

  If so, it seems the focus of IESO servicing capability is more fixated on its strong linkage with the Province rather than the actual rating of the Province or IESO. With the addition of this Guarantee Activation Event, there is no specific servicing guarantee for IESO needed (and there is at this point no minimum rating requirement for IESO as servicer other than if it wishes to assume the commingling risks of the LDCs). If so, this Event is a reasonable compromise in lieu of a servicing guarantee for IESO.
- Approval Requirement: Consider whether the Province wishes to have the right of "subsequent approval" if the form of the document if the document is materially changed or the changes adversely affect the Provinces rights/interest and obligations under the transaction.
- Last Point in Power Point Presentation – What are the additional compensations that US investors would require if the guarantee is triggered? We would expect that the additional compensation would also be available for existing and future Canada investors.

Servicing (commingling)

Commingling Risk of Non-Investment Grade LDCs:

- Mitigants proposed to address the commingling risk (backed by a L/C or deposit funds in the Commingling Reserve Account) are commonly used in securitization transactions.
- Commingling Risk Amount based on 45-60 days collections is generally the standard time frame applied for securitization transactions to determine the amount to cover for the commingling risk. The rating agency will determine the amount based on the frequency with which collections are remitted by the LDC's to IESO and also the time frame over which the LDC can be replaced as servicer
- L/C Provider rating of A+ is consistent with the rating requirement needed by rating agencies for credit enhancers. But, consider if there are two or more rating agencies involved in the transaction, if the rating test should be met for all rating agencies or at least one rating agency.

Warehouse Takeout Risk

- Warehouse Default Event: Failure to repay the warehouse facility at the end of the commitment period, results in the occurrence of a "default event" with the warehouse facility becoming immediately due and payable. In the securitization context, declaration of a "default event" and acceleration of the debt, would typically also allow the purchaser/warehouse banks to sell and realize on their collateral. It does not appear that the intent here is to allow the banks to sell the collateral, but the occurrence of the event simply allows for the amortization of the facility and increased pricing. If so, it would be more appropriate to use the term "Warehouse Amortization Event". Generally, lenders of the warehouse facilities would not have the ability to "sell" the collateral, but the pricing would be very punitive.
- Warehouse Default Payment Cap - If repayment is also due to existing note holders after the occurrence of a Warehouse Default Event, the amount under clause (b) for warehouse default payment cap amount would typically be calculated pro-rata with payments due to the other note holders of the Financing Entity

Hi Mike,

Welcome back from your trip.

Know you've been busy catching up but just wanted to quickly check in with you on your e-mail search results. We met when you were away and have determined that it would be helpful if custodians could further sort their correspondences between OFA and MOF, separating MOF e-mails for DMO review. See below for an example:

We had committed to providing the DMO with e-mails by EOD tomorrow. Carlos has completed his search and is able to assist with further instructions if you need clarification - Thanks,

Gwun

Subject: Guarantee Discussion with OPG

As you know the recent version of the guarantee language is quite different from the initial language. John Lee wants to talk to us about it, and we had originally set up a meeting for tomorrow morning. I think it would make sense to broaden the group involved on our side, and talking to Gadi he thinks we should involve Cindy or Nadine, and I think that it would be good to get Legal Services involved too. This will make coordination a bit more tricky – making tomorrow morning unlikely for a meeting.
I'm going to ask Anis to line up a meeting, and it would be helpful Ken if you think Cindy, Nadine or both should be invited? On the Legal side, it would be good if Opal could point us to the right person.
Regards, Mike

Provincial Support Agreement Term Sheet

Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") is provided exclusively to the parties listed herein in connection with the draft Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Defined terms used herein have the meanings ascribed to them in the Act. The provincial support agreement (the "**Provincial Support Agreement**") will contain the terms and conditions set out in this Term Sheet in addition to such other representations, warranties, indemnities, and other terms and conditions as the Guarantor and the Beneficiaries (each as defined below) may reasonably require.*

Guarantor:	Her Majesty the Queen in right of Ontario, as represented by the Minister of Energy.
Beneficiaries:	The indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**") on behalf of itself and all other persons having debt or other claims against a Financing Entity secured under the Master Trust Indenture (collectively, the "**Beneficiaries**") including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee, the trustee of the Financing Entity if the Financing Entity is a trust, and any other administrator of the Financing Entity.
Term:	The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[1] after all funding obligations (to be defined to include principal, interest, fees, hedge settlement and termination obligations and other related amounts) of all Financing Entities have been repaid.

[1] This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.

Performance Guarantee:	Under the Master Sale and Servicing Agreement to be entered into by IESO and the Financing Entity, **[and OPG as Financial Services Manager]** ("**MSSA**"), IESO will have obligations both as a seller and as a servicer. Pursuant to a performance guarantee, the Guarantor will guarantee in favour of the Beneficiaries to perform, or cause the performance of (which may be by way of the appointment of a replacement servicer), the obligations of IESO as servicer under the MSSA and the Act including the obligations of any replacement servicer. The Guarantor will also guarantee the servicing obligations of the electricity vendors under the Act. The servicing obligations covered will include all obligations related to the collecting and remitting of clean energy adjustments and will protect the Beneficiaries from any risks arising from collections of clean energy adjustments being commingled with other amounts. In the event that the performance guarantee is unenforceable against the Guarantor, the Provincial Support Agreement will contemplate a separate legal obligation by the Guarantor to indemnify the Beneficiaries for any losses that result.
Payment Guarantee Event:	A Payment Guarantee Event will occur if: (A) the Legislative Assembly of Ontario repeals the Act; or (B) the Legislative Assembly of Ontario amends the Act or a Regulation thereunder is amended in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest; or (C) a court of competent jurisdiction (i) determines all or a portion of the Act to be *ultra vires* in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable; or (D) funding obligations are due and payable at a time when a market disruption (a period of [six months or more] when capital markets term funding is not available to effect refinancings of funding obligations) is occurring and, in the case of long term funding obligations only, a moratorium or limitation on the imposition and collection of clean energy adjustments to repay such funding obligations is in effect under the Act.

Payment Guarantee:	Upon the occurrence of a Payment Guarantee Event under clauses (A), (B) or (C) of the above definition: (x) the Guarantor shall assume and pay when due (without acceleration) all funding obligations and all other obligations of the Financing Entities to the Beneficiaries by paying all regularly scheduled amounts in respect thereof during the term of each Financing Entity's contractual obligation to such Beneficiaries; and (y) Beneficiaries holding funding obligations consisting of bonds [with a remaining term to maturity of greater than one year] shall have the option to put the bonds to the Financing Entity for a put price equal to 101% of the principal amount thereof plus accrued and unpaid interest. In connection with any put under this clause (y), the Guarantor shall guarantee payment of the put price and any related hedge breakage but shall not be responsible for any other default, penalty, prepayment or make whole amounts.
Limits under Guarantees:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or loss of profits.
Priority of Payments:	The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.
Subrogation:	Where the Guarantor has repaid all Beneficiaries in full, to the extent of such payments the Guarantor shall be subrogated in and to all the rights of recovery of the Beneficiaries in respect of their applicable indebtedness and obligations and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all indebtedness and obligations owing to the Beneficiaries, the Indenture Trustee will acknowledge and agree on behalf of the Beneficiaries that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiaries have or may exercise in respect of the repaid indebtedness and obligations, all in accordance with the terms of the Master Trust Indenture. Prior to the repayment in full of the indebtedness and obligations owed to the Beneficiaries, the Guarantor shall have no rights of subrogation.
Notice Requirements:	The Indenture Trustee will be required to provide notice to the Guarantor of a Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.

Closing:	Date to be determined but no later than **[**■, 2017**]**. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered.
Reporting Requirements of a Financing Entity:	The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture.
Conditions Precedent to Closing:	Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.[2]
Representations:	Customary representations and warranties of the Guarantor.
FIPPA:	Acknowledgement that the Guarantor is bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Guarantor or its agents or representatives in connection with the Transaction Documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Customary confidentiality obligations to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor.
Governing Law:	Province of Ontario

[2] Opinions on the validity and enforceability of Provincial Support Agreement will be required.

Provincial Support Agreement Term Sheet~~—~~

Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") is provided exclusively to the parties listed herein in connection with the draft Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Defined terms used herein have the meanings ascribed to them in the Act. The provincial support agreement (the "**Provincial Support Agreement**") will contain the terms and conditions set out in this Term Sheet in addition to such other representations, warranties, indemnities, and other terms and conditions as the Guarantor and the Beneficiaries (each as defined below) may reasonably require.*

Guarantor:	Her Majesty the Queen in right of Ontario, as represented by the Minister of Energy.
Beneficiaries:	The ~~trust company acting as~~ indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**") ~~acting for the benefit of~~on behalf of itself and all other persons ~~who may have contractual~~having debt or other claims against a Financing Entity secured under the Master Trust Indenture (collectively, the "**Beneficiaries**") ~~(~~including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee ~~and~~, the trustee of the Financing Entity[1]~~)~~ if the Financing Entity is a trust, and any other administrator of the Financing Entity.
Term:	The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[2]1 after all ~~Funding Obligations~~funding obligations (to be defined to include principal, interest, fees, hedge settlement and termination obligations and other related amounts) of all Financing Entities have been repaid.
Performance Guarantee:	~~**[Upon the occurrence of a Performance Guarantee Event]**, the Indenture Trustee will be entitled to require the Guarantor to appoint a replacement servicer who will perform IESO's duties as servicer under~~Under the Master Sale and Servicing Agreement ~~between IESO, as seller and servicer,~~to be entered into by IESO and the Financing Entity~~, as purchaser~~, **[and OPG as Financial Services Manager]** ("**MSSA**")~~.~~, IESO will have obligations both

[1] ~~We have assumed that the initial Financing Entity will be a trust.~~

[2]1 This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.

	as a seller and as a servicer. Pursuant to a performance guarantee, the Guarantor will guarantee in favour of the Beneficiaries to perform, or cause the performance of (which may be by way of the appointment of a replacement servicer), the obligations of IESO as servicer under the MSSA and the Act including the obligations of any replacement servicer. The Guarantor will also guarantee the servicing obligations of the electricity vendors under the Act. The servicing obligations covered will include all obligations related to the collecting and remitting of clean energy adjustments and will protect the Beneficiaries from any risks arising from collections of clean energy adjustments being commingled with other amounts. In the event that the performance guarantee is unenforceable against the Guarantor, the Provincial Support Agreement will contemplate a separate legal obligation by the Guarantor to indemnify the ~~Indenture Trustee~~Beneficiaries for any losses that result.
~~**Performance Guarantee Event:**~~	~~A "Servicer Default" occurs under the MSSA[3]~~
~~**Payment Guarantee:**~~	~~**[Upon the occurrence of a Payment Guarantee Event and within [5/10] business days after receiving a demand from the Indenture Trustee]**, the Guarantor shall **[guarantee and indemnify the Indenture Trustee (for and on behalf of the Beneficiaries) by paying all regularly scheduled interest and principal payments during the term of a Financing Entity's contractual obligation to such Beneficiary]/[assume the contractual obligations of a Financing Entity to the Beneficiaries]**[4], which for greater certainty shall not include any default, penalty, prepayment, or make whole amounts.~~
Payment Guarantee Event:	A Payment Guarantee Event will occur if: (A) ~~if~~ the Legislative Assembly of Ontario repeals the Act; or (B) ~~if~~ the Legislative Assembly of Ontario amends the Act or a Regulation thereunder is amended in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest; or (C) ~~if~~ a court of competent jurisdiction (i) determines all or a portion of the Act to be *ultra vires* in a way that adversely impacts the ability of a Financing Entity to fully recover an investment

[3] ~~Each Servicer Default will include its own cure period before the event becomes a Servicer Default.~~
[4] ~~To confirm if Province will become the debtor under the applicable debt documentation or if the Financing Entity will continue to be the primary obligor with the Province acting as secondary obligor.~~

	interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable; or (D) funding obligations are due and payable at a time when a market disruption (a period of [six months or more] when capital markets term funding is not available to effect refinancings of funding obligations) is occurring and, in the case of long term funding obligations only, a moratorium or limitation on the imposition and collection of clean energy adjustments to repay such funding obligations is in effect under the Act.
Payment Guarantee:	Upon the occurrence of a Payment Guarantee Event under clauses (A), (B) or (C) of the above definition: (x) the Guarantor shall assume and pay when due (without acceleration) all funding obligations and all other obligations of the Financing Entities to the Beneficiaries by paying all regularly scheduled amounts in respect thereof during the term of each Financing Entity's contractual obligation to such Beneficiaries; and (y) Beneficiaries holding funding obligations consisting of bonds [with a remaining term to maturity of greater than **one year]** shall have the option to put the bonds to the Financing Entity for a put price equal to 101% of the principal amount thereof plus accrued and unpaid interest. In connection with any put under this clause (y), the Guarantor shall guarantee payment of the put price and any related hedge breakage but shall not be responsible for any other default, penalty, prepayment or make whole amounts.
Limits under Guarantees:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or loss of profits.
Priority of Payments:	The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.
Subrogation:	Where the Guarantor has repaid ~~a Beneficiary~~all Beneficiaries in full, to the extent of such ~~payment,~~payments the Guarantor ~~is~~shall be subrogated in and to all the rights of recovery of ~~such~~the Beneficiar~~y~~ies in respect of their applicable indebtedness and obligations and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all ~~amounts~~indebtedness and obligations owing to ~~a~~the Beneficiar~~y~~ies,

	the Indenture Trustee will acknowledge and agree on behalf of ~~such~~the Beneficiar~~y~~ies that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiar~~y~~ies ha~~s~~ve or may exercise in respect of the repaid indebtedness and obligations, all in accordance with the terms of the Master Trust Indenture. Prior to the repayment in full of the indebtedness and obligations owed to the Beneficiaries, the Guarantor shall have no rights of subrogation.
Notice Requirements:	The Indenture Trustee will be required to provide notice to the Guarantor of a ~~Performance Guarantee Event or~~ Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.
Closing:	Date to be determined but no later than **[**■, 2017**]**. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered.
Reporting Requirements of a Financing Entity:	The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture.
Conditions Precedent to Closing:	Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.~~5~~[2]
Representations:	Customary representations and warranties of the Guarantor.
FIPPA:	Acknowledgement that the Guarantor is bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Guarantor or its agents or representatives in connection with the Transaction Documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Customary confidentiality obligations to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor.
Governing Law:	Province of Ontario

~~5~~[2] Opinions on the validity and enforceability of Provincial Support Agreement will be required.

Subject: Guarantee Discussion with OPG

As you know the recent version of the guarantee language is quite different from the initial language. John Lee wants to talk to us about it, and we had originally set up a meeting for tomorrow morning. I think it would make sense to broaden the group involved on our side, and talking to Gadi he thinks we should involve Cindy or Nadine, and I think that it would be good to get Legal Services involved too. This will make coordination a bit more tricky – making tomorrow morning unlikely for a meeting.
I'm going to ask Anis to line up a meeting, and it would be helpful Ken if you think Cindy, Nadine or both should be invited? On the Legal side, it would be good if Opal could point us to the right person.
Regards, Mike

Provincial Support Agreement Term Sheet

Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") is provided exclusively to the parties listed herein in connection with the draft Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Defined terms used herein have the meanings ascribed to them in the Act. The provincial support agreement (the "**Provincial Support Agreement**") will contain the terms and conditions set out in this Term Sheet in addition to such other representations, warranties, indemnities, and other terms and conditions as the Guarantor and the Beneficiaries (each as defined below) may reasonably require.*

Guarantor:	Her Majesty the Queen in right of Ontario, as represented by the Minister of Energy.
Beneficiaries:	The indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**") on behalf of itself and all other persons having debt or other claims against a Financing Entity secured under the Master Trust Indenture (collectively, the "**Beneficiaries**") including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee, the trustee of the Financing Entity if the Financing Entity is a trust, and any other administrator of the Financing Entity.
Term:	The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[1] after all funding obligations (to be defined to include principal, interest, fees, hedge settlement and termination obligations and other related amounts) of all Financing Entities have been repaid.

[1] This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.

Performance Guarantee:	Under the Master Sale and Servicing Agreement to be entered into by IESO and the Financing Entity, **[and OPG as Financial Services Manager]** ("**MSSA**"), IESO will have obligations both as a seller and as a servicer. Pursuant to a performance guarantee, the Guarantor will guarantee in favour of the Beneficiaries to perform, or cause the performance of (which may be by way of the appointment of a replacement servicer), the obligations of IESO as servicer under the MSSA and the Act including the obligations of any replacement servicer. The Guarantor will also guarantee the servicing obligations of the electricity vendors under the Act. The servicing obligations covered will include all obligations related to the collecting and remitting of clean energy adjustments and will protect the Beneficiaries from any risks arising from collections of clean energy adjustments being commingled with other amounts. In the event that the performance guarantee is unenforceable against the Guarantor, the Provincial Support Agreement will contemplate a separate legal obligation by the Guarantor to indemnify the Beneficiaries for any losses that result.
Payment Guarantee Event:	A Payment Guarantee Event will occur if: (A) the Legislative Assembly of Ontario repeals the Act; or (B) the Legislative Assembly of Ontario amends the Act or a Regulation thereunder is amended in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest; or (C) a court of competent jurisdiction (i) determines all or a portion of the Act to be *ultra vires* in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable; or (D) funding obligations are due and payable at a time when a market disruption (a period of [six months or more] when capital markets term funding is not available to effect refinancings of funding obligations) is occurring and, in the case of long term funding obligations only, a moratorium or limitation on the imposition and collection of clean energy adjustments to repay such funding obligations is in effect under the Act.

Payment Guarantee:	Upon the occurrence of a Payment Guarantee Event under clauses (A), (B) or (C) of the above definition: (x) the Guarantor shall assume and pay when due (without acceleration) all funding obligations and all other obligations of the Financing Entities to the Beneficiaries by paying all regularly scheduled amounts in respect thereof during the term of each Financing Entity's contractual obligation to such Beneficiaries; and (y) Beneficiaries holding funding obligations consisting of bonds [with a remaining term to maturity of greater than one year] shall have the option to put the bonds to the Financing Entity for a put price equal to 101% of the principal amount thereof plus accrued and unpaid interest. In connection with any put under this clause (y), the Guarantor shall guarantee payment of the put price and any related hedge breakage but shall not be responsible for any other default, penalty, prepayment or make whole amounts.
Limits under Guarantees:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or loss of profits.
Priority of Payments:	The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.
Subrogation:	Where the Guarantor has repaid all Beneficiaries in full, to the extent of such payments the Guarantor shall be subrogated in and to all the rights of recovery of the Beneficiaries in respect of their applicable indebtedness and obligations and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all indebtedness and obligations owing to the Beneficiaries, the Indenture Trustee will acknowledge and agree on behalf of the Beneficiaries that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiaries have or may exercise in respect of the repaid indebtedness and obligations, all in accordance with the terms of the Master Trust Indenture. Prior to the repayment in full of the indebtedness and obligations owed to the Beneficiaries, the Guarantor shall have no rights of subrogation.
Notice Requirements:	The Indenture Trustee will be required to provide notice to the Guarantor of a Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.

Closing:	Date to be determined but no later than **[**■, 2017**]**. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered.
Reporting Requirements of a Financing Entity:	The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture.
Conditions Precedent to Closing:	Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.[2]
Representations:	Customary representations and warranties of the Guarantor.
FIPPA:	Acknowledgement that the Guarantor is bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Guarantor or its agents or representatives in connection with the Transaction Documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Customary confidentiality obligations to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor.
Governing Law:	Province of Ontario

[2] Opinions on the validity and enforceability of Provincial Support Agreement will be required.

Provincial Support Agreement Term Sheet~~—~~

Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") is provided exclusively to the parties listed herein in connection with the draft Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Defined terms used herein have the meanings ascribed to them in the Act. The provincial support agreement (the "**Provincial Support Agreement**") will contain the terms and conditions set out in this Term Sheet in addition to such other representations, warranties, indemnities, and other terms and conditions as the Guarantor and the Beneficiaries (each as defined below) may reasonably require.*

Guarantor:	Her Majesty the Queen in right of Ontario, as represented by the Minister of Energy.
Beneficiaries:	The ~~trust company acting as~~ indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**") ~~acting for the benefit of~~on behalf of itself and all other persons ~~who may have contractual~~having debt or other claims against a Financing Entity secured under the Master Trust Indenture (collectively, the "**Beneficiaries**") ~~(~~including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee ~~and~~, the trustee of the Financing Entity[1]~~)~~ if the Financing Entity is a trust, and any other administrator of the Financing Entity.
Term:	The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[2]1 after all ~~Funding Obligations~~funding obligations (to be defined to include principal, interest, fees, hedge settlement and termination obligations and other related amounts) of all Financing Entities have been repaid.
Performance Guarantee:	~~**[Upon the occurrence of a Performance Guarantee Event]**, the Indenture Trustee will be entitled to require the Guarantor to appoint a replacement servicer who will perform IESO's duties as servicer under~~Under the Master Sale and Servicing Agreement ~~between IESO, as seller and servicer,~~to be entered into by IESO and the Financing Entity~~, as purchaser~~, **[and OPG as Financial Services Manager]** ("**MSSA**")~~.~~, IESO will have obligations both

[1] ~~We have assumed that the initial Financing Entity will be a trust.~~

[2]1 This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.

	as a seller and as a servicer. Pursuant to a performance guarantee, the Guarantor will guarantee in favour of the Beneficiaries to perform, or cause the performance of (which may be by way of the appointment of a replacement servicer), the obligations of IESO as servicer under the MSSA and the Act including the obligations of any replacement servicer. The Guarantor will also guarantee the servicing obligations of the electricity vendors under the Act. The servicing obligations covered will include all obligations related to the collecting and remitting of clean energy adjustments and will protect the Beneficiaries from any risks arising from collections of clean energy adjustments being commingled with other amounts. In the event that the performance guarantee is unenforceable against the Guarantor, the Provincial Support Agreement will contemplate a separate legal obligation by the Guarantor to indemnify the ~~Indenture Trustee~~Beneficiaries for any losses that result.
~~**Performance Guarantee Event:**~~	~~A "Servicer Default" occurs under the MSSA[3]~~
~~**Payment Guarantee:**~~	~~**[Upon the occurrence of a Payment Guarantee Event and within [5/10] business days after receiving a demand from the Indenture Trustee]**, the Guarantor shall **[guarantee and indemnify the Indenture Trustee (for and on behalf of the Beneficiaries) by paying all regularly scheduled interest and principal payments during the term of a Financing Entity's contractual obligation to such Beneficiary]/[assume the contractual obligations of a Financing Entity to the Beneficiaries]**[4], which for greater certainty shall not include any default, penalty, prepayment, or make whole amounts.~~
Payment Guarantee Event:	A Payment Guarantee Event will occur if: (A) ~~if~~ the Legislative Assembly of Ontario repeals the Act; or (B) ~~if~~ the Legislative Assembly of Ontario amends the Act or a Regulation thereunder is amended in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest; or (C) ~~if~~ a court of competent jurisdiction (i) determines all or a portion of the Act to be *ultra vires* in a way that adversely impacts the ability of a Financing Entity to fully recover an investment

[3] ~~Each Servicer Default will include its own cure period before the event becomes a Servicer Default.~~
[4] ~~To confirm if Province will become the debtor under the applicable debt documentation or if the Financing Entity will continue to be the primary obligor with the Province acting as secondary obligor.~~

	interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable; or (D) funding obligations are due and payable at a time when a market disruption (a period of [six months or more] when capital markets term funding is not available to effect refinancings of funding obligations) is occurring and, in the case of long term funding obligations only, a moratorium or limitation on the imposition and collection of clean energy adjustments to repay such funding obligations is in effect under the Act.
Payment Guarantee:	Upon the occurrence of a Payment Guarantee Event under clauses (A), (B) or (C) of the above definition: (x) the Guarantor shall assume and pay when due (without acceleration) all funding obligations and all other obligations of the Financing Entities to the Beneficiaries by paying all regularly scheduled amounts in respect thereof during the term of each Financing Entity's contractual obligation to such Beneficiaries; and (y) Beneficiaries holding funding obligations consisting of bonds [with a remaining term to maturity of greater than **one year]** shall have the option to put the bonds to the Financing Entity for a put price equal to 101% of the principal amount thereof plus accrued and unpaid interest. In connection with any put under this clause (y), the Guarantor shall guarantee payment of the put price and any related hedge breakage but shall not be responsible for any other default, penalty, prepayment or make whole amounts.
Limits under Guarantees:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or loss of profits.
Priority of Payments:	The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.
Subrogation:	Where the Guarantor has repaid ~~a Beneficiary~~all Beneficiaries in full, to the extent of such ~~payment,~~payments the Guarantor ~~is~~shall be subrogated in and to all the rights of recovery of ~~such~~the Beneficiar~~y~~ies in respect of their applicable indebtedness and obligations and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all ~~amounts~~indebtedness and obligations owing to ~~a~~the Beneficiar~~y~~ies,

	the Indenture Trustee will acknowledge and agree on behalf of ~~such~~the Beneficiar~~y~~ies that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiar~~y~~ies ha~~s~~ve or may exercise in respect of the repaid indebtedness and obligations, all in accordance with the terms of the Master Trust Indenture. Prior to the repayment in full of the indebtedness and obligations owed to the Beneficiaries, the Guarantor shall have no rights of subrogation.
Notice Requirements:	The Indenture Trustee will be required to provide notice to the Guarantor of a ~~Performance Guarantee Event or~~ Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.
Closing:	Date to be determined but no later than **[**■, 2017**]**. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered.
Reporting Requirements of a Financing Entity:	The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture.
Conditions Precedent to Closing:	Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.~~5~~[2]
Representations:	Customary representations and warranties of the Guarantor.
FIPPA:	Acknowledgement that the Guarantor is bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Guarantor or its agents or representatives in connection with the Transaction Documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Customary confidentiality obligations to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor.
Governing Law:	Province of Ontario

~~5~~[2] Opinions on the validity and enforceability of Provincial Support Agreement will be required.

Thanks Opal.
Toby and I will attend the meeting today at 2. I note that footnote 2 mentions that opinions on the validity and enforceability of the provincial support agreement will be required. The proposed legislation provides for both Ministers to jointly give the guarantee. Does anyone know whether Energy Legal and Blakes (who I believe is the Province's outside counsel) have reviewed the revised term sheet? It will be helpful to get a better understanding of the scope and timing of this proposed guarantee. I note that the description of the beneficiaries is very broad. Wouldn't it be expected that the actual guarantee scope would be tailored to the obligations in specific instruments or transactions that are required to be guaranteed.
Thanks.
Malle

Subject: FW: House Book Updates due April 28, 2017

Good morning,
Communications has asked us to update our CINs to reflect the language of the 2017 Budget. Could your teams please review the following CINs and update as needed?

1. Borrowing and Debt
2. Ontario Credit Rating
3. Green Bonds
4. DBRS Response to the Fair Hydro Plan

Please send your updated CINs to me **by Tuesday, April 25 for CEO review**. The CINs will not be sent to Communications until Friday, April 28, after the release of the Document.
Thanks, Anna

Subject: House Book Updates due April 28, 2017

Hi all,
Thanks once again for providing the Contentious Issue Notes (CINs) for the Spring House Book (see attachment of Index of CINs by Program Area).
The Minister announced today that the 2017 Budget will be tabled on Thursday, April 27th, MO expects the CINs to be updated to reflect the new language of the 2017 Budget.
Therefore we would like to get an update of the CINs impacted by the Budget by Friday, April 28th.
Please send the updated notes to my attention.

Subject: FW: House Book Updates due April 28, 2017

Good morning,
Communications has asked us to update our CINs to reflect the language of the 2017 Budget. Could your teams please review the following CINs and update as needed?

1. Borrowing and Debt
2. Ontario Credit Rating
3. Green Bonds
4. DBRS Response to the Fair Hydro Plan

Please send your updated CINs to me **by Tuesday, April 25 for CEO review**. The CINs will not be sent to Communications until Friday, April 28, after the release of the Document.
Thanks, Anna

Subject: House Book Updates due April 28, 2017

Hi all,
Thanks once again for providing the Contentious Issue Notes (CINs) for the Spring House Book (see attachment of Index of CINs by Program Area).
The Minister announced today that the 2017 Budget will be tabled on Thursday, April 27th, MO expects the CINs to be updated to reflect the new language of the 2017 Budget.
Therefore we would like to get an update of the CINs impacted by the Budget by Friday, April 28th.
Please send the updated notes to my attention.
Marc Pichette

Subject: RE: IESO Facility
Date: Tuesday, April 25, 2017 2:47:58 PM

Hi Mike,
The original credit facility provides the following:
Interest shall accrue on the principal amount of each Advance from and including the date of the Advance to but excluding the Repayment Date of such Advance, at an annual rate equal to the **Province's cost of funds for borrowings with a similar term as determined by the OF A plus 0.25 percent per annum**, before as well as after the date such principal amount or interest thereon becomes due hereunder and both before and after default and shall be payable on the Repayment Date for such Advance. Any amount of interest arising hereunder which is not paid when due shall bear interest at the same rate compounded monthly at which it accrued from the due date for payment until the date of actual payment. The amount of interest payable on an Advance will be calculated by the OF A by dividing the interest rate applicable to the Advance by 365 or 366, as the case may be, and multiplying the result by the principal amount of the Advance and further multiplying the result by the number of days in the period from the date of the Advance to the Repayment Date of the Advance.
It does not appear that any amendments (there are 9) have changed this.
Thanks,
Opal.

Subject:	RE: IESO Treasury Policy - likely revising for June 2017
Date:	Monday, June 05, 2017 9:17:09 AM

Hi all – good morning,
I just received an email from Anthony from IESO asking for comments for EOD. The changes requested don't appear to be substantial, but hoping we can get back to him today. Please let me know if I should expect comments from you/your teams, if any, otherwise, we'll aim to get back to him later this afternoon.
Thank you in advance for your help,
Salman

Subject: FW: IESO Treasury Policy - likely revising for June 2017

Hi Ken/Mike/Carlos,
Hope your week is going well.
We received the attached request to review IESO's latest update to their treasury policy which will require Minister of Finance's approval. As applicable, if your teams can review and provide comments, if any, we can consolidate and get back to IESO before they go to their Board in mid-June. We're hoping to get back to IESO early/mid next week.
Please let me know.
Thank you,
Salman

To: Salman Qadir <Salman.Qadir@ofina.on.ca>
Subject: RE: IESO Treasury Policy - likely revising for June 2017

Salman,
Attached is a preliminary draft of the Treasury Policy and Sch A for your review.
Two changes have been made:

1. Permitting Fair Hydro program borrowings – self explanatory rationale; and
2. Increase from $420 million to $500 million in Sch A's Cdn Banks max limit per counter party.

The key rationale for the requested increase from $420 million to $500 million per counterparty is as follows:
• The market price of electricity has increased between 2014 to 2016 by approximately 16%-19% which has continued to result in the IESO managing higher and higher cash-flows and therefore seeking risk appropriate investments in accordance with the Treasury Policy – a large limit will allow the IESO to have more flexibility while being efficient with its cash;
• Over the past few years and relevant today, the availability of short-term (generally 1 day to 7 days which is used a lot by the IESO, and including less than 30 days investment) products such as Treasury Bills, BAs and Term Deposits have been irregular and not reliable for the IESO to find. The IESO generally deals in large amounts (several hundreds of millions) and given the lack of short term products at the size the IESO needs, the Sch 1 banks have been generally offering Term Deposits for

the IESO at very low interest rates because the Banks do not need the IESO monies. In fact, a few banks offer the IESO less than 10bps for Term Deposits – which is significantly lower than Bank of Canada overnight rate and BAs rates. Therefore, a Term Deposit with very low interest yield does not align with a resulting lower counterparty risk for the IESO; and

• The IESO's Transmission Rights balances have in general remained higher than $100 million on average over the last few years despite an IESO target of $20 million. This has resulted in the IESO managing higher cash-flows

- While the Fair Hydro program is likely to not impact the IESO's overall net cash balances (borrow / sell should generally align), the timing of these cash flows may be different at times and the IESO may hold more cash (short term basis) for a few days. The sales/service agreement with OPG Trust has not been completed, and I am just listing this as a contingency in case for some reason IESO holds larger cash balances before paying back the Fair Hydro loans.

Regards.

Hi Anthony,

I wanted to circle back with you on this email, particularly regarding possibly updating the IESO's Treasury Policy. Since it does require the Minister of Finance's approval, the OFA would be involved in obtaining that approval from the Minister. When you do have a markup, please do share it with us. Any details on what the changes would be accomplishing etc would also be helpful.

Regards,

Salman

Subject: IESO Treasury Policy - likely revising for June 2017

Salman,

As part of the Fair Hydro initiative, the IESO plans to ask government to permit FHP debt in an update to the O. Reg. 280/14.

In addition, IESO is likely to update its treasury policy (see attached – as approved by IESO Board and Min of Fin in 2015) to permit for the FHP draws/initiative.

I likely may also ask to increase the short term Cdn Sch I banks limits from $420million to $500million.

As part of the treasury policy update I wanted to give you/OFA a fyi and determine if you/OFA wish to comment back to me before I undertake the above changes.

Call me to discuss if easier.

Regards.

Hi Ken,
Thanks for your list, of course.
In your experience, would you say that where the FHP and accounting are in an email, that, e.g., one or more of the following would also occur?
Regulatory asset
Deferral [account]
Regulated
Others?
Just trying to see if we can use IT searches that filter for "accounting" ***and*** one of the rate-regulation type terms, along with variants of FHP, GA, smoothing, rate mitigation/price mitigation, etc.
Trying to avoid, or reduce, having to manually ensure that where, say the GA gets mentioned and caught in an electronic search, having to then exclude all the NUG related ones; or any FHP ones that just don't have any discussions on accounting.
Thanks,
Ron

Hello Ron and Mike –
We have now received some guidance and determined a process for next steps.
We would like to set up a meeting for tomorrow afternoon to review process, confirm search terms and time frame, and confirm the "custodians" (i.e. those staff who would have responsive records). It would probably be prudent to have any identified "custodians" in attendance so that we can make sure we have agreement on the search terms and next steps as this will need to move quickly.
I will send out a meeting request based on your calendars and would ask that you forward it internally to staff who should attend.
Thanks very much for your assistance with this request.

Solicitor Client Privilege

Hello Ron and Mike,
We have received a request for information from the Auditor General for the documents/e-mails listed below. Ken Kandeepan has been the point person on this matter in Gadi's absence this week. Pursuant to the *Auditor General Act* S.10(2), OFA and OEFC are required to provide the AG with free access to these materials.

- Engagement Agreements with E&Y and KPMG and any others dealing with the Fair Hydro Plan Proposed Accounting
- All emails between E&Y and KPMG and other Public Accounting Firms staff on the Fair Hydro Plan - Accounting
- All emails between OFA/OEFC and the Ministry of Energy on the Fair Hydro Plan Accounting
- All emails between OPCD/Treasury Board/Ministry of Finance and OFA/OEFC on the Fair Hydro Plan Accounting

- All emails between IESO and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails between OEB and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails between OPG and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails/material provided to the OFA/OEFC Board/Audit Committee on the Fair Hydro Plan Accounting

We are still determining next steps, process and timing, and will provide further guidance in due course, but we wanted to make you aware of the request. Please identify individuals, including yourselves if appropriate, in your respective branches who may have responsive emails/documents. Please make sure these individuals are aware of the request and remind them that they have an obligation to preserve requested documents/emails.

We are exploring the option of running an automated search and anticipate that we will be seeking guidance from you and your respective teams in the coming days with respect to scoping the search request and identifying search strings/key words to ensure that all responsive e-mails are captured.

In the meantime, please let me know if you have any questions or would like to discuss.

Thanks very much, and best regards,

Sarah

Hi Ken,
I'm not sure I have the AG's email and what terms she cited.
Would you be able to pass that on.
Also, I'd assume that once all the emails with those terms were pulled up, many would be non-responsive, as the terms could appear in non-FHP related emails, and non-accounting FHP-related emails, so quite a lot of manual work to do.
Thanks,
Ron

Hi Ron and Mike
I went through the email folder that I created in January for all emails relating to the Fair Hydro Plan and found the following alternate terms for the Plan which I will request Andrew to include in his search terms. Be useful if you can do a quick scan of your emails and see if any other terms should be included in the search parameters. These of course would be in addition to the terms already specified by the AG in her email.
GA and/or Global Adjustment
GA Smoothing and/or Global Adjustment Smoothing
GA Financing and/or Global Adjustment Financing/Refinancing

Electricity Mitigation and/or Electricity Price Mitigation
Deferred GA or Deferred Global Adjustment
Rate Mitigation
Global Adjustment Deferral
OPG Trust and/or PG Trust Consolidation
Equity Injection
Equity Financing
Fair Hydro Plan/Trust
Thanks
Ken K

Solicitor Client Privilege

Hello Ron and Mike,
We have received a request for information from the Auditor General for the documents/e-mails listed below. Ken Kandeepan has been the point person on this matter in Gadi's absence this week. Pursuant to the *Auditor General Act* S.10(2), OFA and OEFC are required to provide the AG with free access to these materials.

- Engagement Agreements with E&Y and KPMG and any others dealing with the Fair Hydro Plan Proposed Accounting
- All emails between E&Y and KPMG and other Public Accounting Firms staff on the Fair Hydro Plan - Accounting
- All emails between OFA/OEFC and the Ministry of Energy on the Fair Hydro Plan Accounting
- All emails between OPCD/Treasury Board/Ministry of Finance and OFA/OEFC on the Fair

Hydro Plan Accounting

- All emails between IESO and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails between OEB and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails between OPG and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails/material provided to the OFA/OEFC Board/Audit Committee on the Fair Hydro Plan Accounting

We are still determining next steps, process and timing, and will provide further guidance in due course, but we wanted to make you aware of the request. Please identify individuals, including yourselves if appropriate, in your respective branches who may have responsive emails/documents. Please make sure these individuals are aware of the request and remind them that they have an obligation to preserve requested documents/emails.

We are exploring the option of running an automated search and anticipate that we will be seeking guidance from you and your respective teams in the coming days with respect to scoping the search request and identifying search strings/key words to ensure that all responsive e-mails are captured.

In the meantime, please let me know if you have any questions or would like to discuss.

Thanks very much, and best regards,

Sarah

Hi Ken,
Thanks for your list, of course.
In your experience, would you say that where the FHP and accounting are in an email, that, e.g., one or more of the following would also occur?
Regulatory asset
Deferral [account]
Regulated
Others?
Just trying to see if we can use IT searches that filter for "accounting" ***and*** one of the rate-regulation type terms, along with variants of FHP, GA, smoothing, rate mitigation/price mitigation, etc.
Trying to avoid, or reduce, having to manually ensure that where, say the GA gets mentioned and caught in an electronic search, having to then exclude all the NUG related ones; or any FHP ones that just don't have any discussions on accounting.
Thanks,
Ron

Hello Ron and Mike,
We have received a request for information from the Auditor General for the documents/e-mails

listed below. Ken Kandeepan has been the point person on this matter in Gadi's absence this week. Pursuant to the *Auditor General Act* S.10(2), OFA and OEFC are required to provide the AG with free access to these materials.

- Engagement Agreements with E&Y and KPMG and any others dealing with the Fair Hydro Plan Proposed Accounting
- All emails between E&Y and KPMG and other Public Accounting Firms staff on the Fair Hydro Plan - Accounting
- All emails between OFA/OEFC and the Ministry of Energy on the Fair Hydro Plan Accounting
- All emails between OPCD/Treasury Board/Ministry of Finance and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails between IESO and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails between OEB and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails between OPG and OFA/OEFC on the Fair Hydro Plan Accounting
- All emails/material provided to the OFA/OEFC Board/Audit Committee on the Fair Hydro Plan Accounting

We are still determining next steps, process and timing, and will provide further guidance in due course, but we wanted to make you aware of the request. Please identify individuals, including yourselves if appropriate, in your respective branches who may have responsive emails/documents. Please make sure these individuals are aware of the request and remind them that they have an obligation to preserve requested documents/emails.

We are exploring the option of running an automated search and anticipate that we will be seeking guidance from you and your respective teams in the coming days with respect to scoping the search request and identifying search strings/key words to ensure that all responsive e-mails are captured.

In the meantime, please let me know if you have any questions or would like to discuss.

Thanks very much, and best regards,

Sarah

Hi Gadi,
This document is a newer one dated 2017 and is a request for financing. There are a number of schedules referenced in it (see the second page of the index) but the schedules are not attached. I wonder if it would be possible to obtain them as it would be very helpful to understanding the scope of the guarantee proposed in it. Schedule 1 is the Form of Canada Guarantee and there are some other schedules such as Form of Canada Guarantee Opinion Letters etc.
The one I found was from an earlier transaction in 2012.
Thanks.

Hi Gadi,

Without spending too much time on it, I gather that the guarantee we have provided simply entails Canada talking over payment of the cashflows on the bonds (see sections 2.2-2.3). Hope this helps. Nice talking to you.

FYI, MO is asking CO that we add the Provincial Guarantee to our list of topics to cover with PO on the 16th.
We'll need to think about what a briefing product could look like and who would lead it. Perhaps this is something we could discuss at our RMI meeting this afternoon.

Subject: Re: Next Round Hydro Quebec
Good Morning:
Had wanted to update folks planning for our time on 16 August.
We have those two hours and am now proposing that we attempt to cover three separate topics (3 x ~ 40 mins each).
1. Hydro Quebec
2. OFHP / LTEP curve
3. NEW : OFHP "Provincial Guarantee"
Note : the Provincial Guarantee is a core requirement of the debt / borrowing platform that is

required for the dealers and rating agencies to confirm a score for this product so that OPG trust can go to market this fall.
Gadi has been doing battle with dealers on this and we think that 16th would be an appropriate milestone to brief decision makers on the results. Forward planning, this would require a TB/MBC conversation and the overall goal for that would be to have that done when Cabinet is around that last week of August.
Anyway, if we can add this to the agenda to 16th, then we'd probably want to increase size of room to have a sort of mini-FPC so that MOF and TBS MO are participants.
I think that Hydro Quebec item will be quick based on where we are at with discussions and the LTEP curve we got really good directional thinking at yesterday afternoon's multicorners, so if we invited counterparts for 1.15pm then we should be okay, I wager / hope?
Hope this makes sense - let me know if this works for your end and then I'll make sure that I bring TBS and MOF (Ali and Jason) up the curve and ensure they are ready for 16th in advance.
Many thanks, in advance.

Good Morning:

Appreciate that we are not yet through tomorrow's multicorners discussions regarding Hydro Quebec, however to ensure continued coordination and to plan ahead for when senior PO staff have returned from various holidays, a "next date" has been provided to us via Bevan's calendar.

Wednesday 16 August @ noon - 1pm.

If CO would be so kind as to organize calendar invitation would be terrific.

Many thanks, in advance.

Hi Kaitlin,
Yes, there is still some work to be done on the Sub-Debt.
The OFA has not seen any revised documents from OPG. With Attached is the email from Ken Kandeepan to Sheen Liu at OPG on July 31 that dealt only with the Sub-Debt and Performance Fees with one major change and some other recommendations, Ken did clarify with Sheen that the OFA could not comment on the fix fee.
The main point is that it should be between OPG, Fair Hydro Trust and the Ministry of Energy.
Regards
Carlos

Ken,
Thanks for providing your concurrence in the Trust's approach to performance benchmarking. In order to move forward with completing all Fair Hydro Plan related legal documents, could you please also confirm your agreement to the methodology/process as illustrated in the other two documents provided to you in the past (both attached above for your reference)? Specifically, we would appreciate your confirmation re the following items:

1. Fee Structure, including both fixed and variable fees (as described in FHPA Regulations – Fees.docx)
2. The process of (a) taking out subordinated loan from OFA; and (b) establishing relevant pricing (as described in Draft subordinated Debt Term Sheet.doc)

If you have other outstanding comments relating to Fair Hydro Plan, please also let us know so that we could incorporate them before finalizing the structure and legal documents.
Your timely response will be appreciated.
Regards
Sheen

Hi Ken,
My name is May Lapira and I'm the newest addition to the Treasury team. Jenny has been working hard to get me updated on the accounting aspects of the Fair Hydro Plan so we can transition future correspondences over to me.
Per our discussion during the call earlier today, we have reached out to EY to obtain concurrence on our interpretation of their accounting position. Please see attached the email trail from EY's senior manager Brittany Keenan confirming that excluding the equity injection component from the definition of a 'benchmark bond' would result in non-commercial terms and could ultimately result in OPG not being able to consolidate the financing entity.
Please let me know if you have any follow up questions on this matter.
I look forward to working with you,
May

Subject: FW: OFA Feedback re Fair Hydro Plan - Sub Debt

Hi Kaitlin,
Yes, there is still some work to be done on the Sub-Debt.
The OFA has not seen any revised documents from OPG. With Attached is the email from Ken Kandeepan to Sheen Liu at OPG on July 31 that dealt only with the Sub-Debt and Performance Fees with one major change and some other recommendations, Ken did clarify with Sheen that the OFA could not comment on the fix fee.

The main point is that it should be between OPG, Fair Hydro Trust and the Ministry of Energy.
Regards
Carlos

Ken,
Thanks for providing your concurrence in the Trust's approach to performance benchmarking. In order to move forward with completing all Fair Hydro Plan related legal documents, could you please also confirm your agreement to the methodology/process as illustrated in the other two documents provided to you in the past (both attached above for your reference)? Specifically, we would appreciate your confirmation re the following items:

1. Fee Structure, including both fixed and variable fees (as described in FHPA Regulations – Fees.docx)
2. The process of (a) taking out subordinated loan from OFA; and (b) establishing relevant pricing (as described in Draft subordinated Debt Term Sheet.doc)

If you have other outstanding comments relating to Fair Hydro Plan, please also let us know so that we could incorporate them before finalizing the structure and legal documents.
Your timely response will be appreciated.
Regards
Sheen

Specifically, we would appreciate your confirmation re the following items:

1. Fee Structure, including both fixed and variable fees (as described in FHPA Regulations – Fees.docx)
2. The process of (a) taking out subordinated loan from OFA; and (b) establishing relevant pricing (as described in Draft subordinated Debt Term Sheet.doc)

If you have other outstanding comments relating to Fair Hydro Plan, please also let us know so that we could incorporate them before finalizing the structure and legal documents.

Your timely response will be appreciated.

Regards

Sheen

Subject: EXTERNAL – RE: EY concurrence re: Draft Trust Performance Fee Recommendations

*** Exercise caution. This is an EXTERNAL email. DO NOT open attachments or click links from unknown senders or unexpected email. ***

Thank you May, the email from E&Y is clear and given a choice between a performance methodology, that in our opinion, is not entirely reflective of capital markets decision making and jeopardizing the consolidation of the Trust, we are opting to accept OPG's methodology for the construction of the benchmark.

Pls proceed accordingly.

Ken k

Subject: EY concurrence re: Draft Trust Performance Fee Recommendations

Hi Ken,

My name is May Lapira and I'm the newest addition to the Treasury team. Jenny has been working hard to get me updated on the accounting aspects of the Fair Hydro Plan so we can transition future correspondences over to me.

Per our discussion during the call earlier today, we have reached out to EY to obtain concurrence on our interpretation of their accounting position. Please see attached the email trail from EY's senior manager Brittany Keenan confirming that excluding the equity injection component from the definition of a 'benchmark bond' would result in non-commercial terms and could ultimately result in OPG not being able to consolidate the financing entity.

Please let me know if you have any follow up questions on this matter.

I look forward to working with you,

May

Fair Hydro Plan – Subordinated Debt Loan Arrangement
Term Sheet

- Parties: OPG, Fair Hydro Trust, ~~OFA~~, Ministry of Energy

- In accordance with the Master Subscription Agreement among OPG, ~~OFA~~ and Ministry of Energy, the Province agrees to inject 44% of total funding of GA asset by way of equity subscriptions in OPG, and OPG agrees to use the equity subscription amounts solely for funding the Fair Hydro Trust's subordinated debt (Equity Injection Plan) requirements as part of the Fair Hydro Plan

- OPG will lend the equity injection from the Province to Fair Hydro Trust by way of subordinated debt (one or more mezzanine level)

- Initial credit rating will be assigned to the subordinated debt of Fair Hydro Trust

- Based on monthly funding requirement of GA asset, the Trust will use short term financing, such as bank facilities, and take out bonds once accumulative short term funding reaches certain levels.

- The mechanism to implement Equity Injection Plan will be based on monthly equity injections reflecting funding requirements of GA asset

- Interest rates on the subordinated debt will be established as follows:

    - During the Trust short term financing period when bank facilities are used as funding vehicles, the interest rate on subordinated debt will be the sum of (1) funding rate on senior debt, and (2) additional spread margin of [xx], reflecting the credit rating difference between the senior and subordinated debt

    - At the time when senior bonds are being issued to take out (term out) the short term financing, OPG will seek indicative coupon rates on the subordinated debt from dealers, reflecting the sum of underlying Government of Government of Canada yield of equivalent term and the appropriate credit spread. The average indicative coupon rate from dealers will be calculated and set as the subordinated debt rate. The process will be similar to the one established for pricing of OPG debt drawn from OEFC facilities.

Commented [KK1]: The OFA is not part of the master subscription agreement and hence should be removed.

Commented [KK2]: OPG can simplify (only set rates once) and reduce financing risk (there is no certainty as to the timing or term structure of the senior debt issuance) of the suggested process by terming out the subordinated debt at the time of each monthly equity injection from the Province

TORYS/OPG COMMENTS: JUNE 22, 2017

Fees, subs. 19 (3) of the Act

(x.1) For the purposes of this section, "incremental annual funding obligation" means the aggregate of all funding obligations issued by all financing entities in a calendar year.

10xx. (1) For the purposes of subsection 19 (3) of the Act, the Financial Services Manager may establish and charge fees to financing entities in relation to the following matters:

1. The services provided by the Financial Services Manager to financing entities, which may include services related to planning, financing, negotiation and execution of agreements, the payment of costs and expenses on behalf of a financing entity, front office services and administrative services.

2. The costs of doing anything that the Financial Services Manager is required or permitted to do under the Act.

(2) The fees mentioned in subsection (1) shall be established annually and shall be comprised of a fixed fee and a variable fee based on performance.

(x.2) The fixed fee referred to in (2) shall be payable monthly and calculated as follows:

$$(A \times B) / 12$$

Where,

A = a percentage, expressed as a per annum rate, based on market comparable fees determined by the Financial Services Manager charged by service providers for similar services, and

B = the average of the opening and closing balances of the aggregate principal amount of outstanding funding obligations issued by all financing entities in the previous calendar month.

(x.3) The variable fee referred to in (2) shall be calculated as the sum of the amounts calculated, using the following formula, for all tranches of funding obligations issued by all financing entities in the relevant year:

$$(A \times (B - C)) \times D$$

Where,

A = the principal amount of the applicable tranche of net incremental annual funding obligations,

B = the forecast interest rate for the applicable tranche of incremental annual funding obligations, as determined by the Financial Services Manager on or before the end of the calendar year prior to the calendar year in which the fee is being determined and based on the term of the applicable tranche of incremental annual funding obligations,

C = the actual interest rate for the applicable tranche of incremental annual funding obligations,

D = 5%

(3) The variable fee payable for any calendar year shall not be:

1. more than 1% of (D × the incremental annual funding obligations), or

2. less than -1% of (D × the incremental annual funding obligations).

(3.x) If the variable fee is a negative amount, such amount shall be deducted from the fixed fee payable in the following calendar year in twelve equal monthly instalments.

Board approval of fees, subs. 19 (4) of the Act

11xx. (1) The Financial Services Manager shall submit its proposed fees, together with the methodology used for determining its proposed fees, to the Board for approval no later than August 31, 2017. ***[NTD: Need to determine how to deal with the 1st fee. Understand that OPG is proposing a fixed fee for this year. OPG: There will not be a variable fee for the 1st year.]***

(2) The Board may approve the fees proposed under (1) and the methodology used to determine those fees or it may refer the proposal back to the Financial Services Manager for further consideration with the Board's recommendations.

(3) The Financial Services Manager may from time to time, but not more than once in any 12 month period, submit proposed amendments to the approved methodology for determining fees, together with its proposed fees based on such proposed amendments, to the Board and the Board may approve the proposed amendments and the proposed fees or may refer the proposal back to the Financial Services Manager for further consideration with the Board's recommendations.

Commented [A1]: Pls note that as it stands it appears to include all of the borrowings in any given year which is both new borrowings and refinancing maturities. Including the word "net" ensures that the performance fee is limited to new borrwoings only.

(4) If the Financial Services Manager submits proposed amendments to its approved methodology for determining fees, the proposed amendments together with the proposed fees based on such proposed amendments shall be submitted to the Board for approval no later than 120 days before the Financial Services Manager intends for the fees, determined on the basis of the amended methodology, to commence being charged.

(5) Section 10 applies with such modifications as the context may require to any application by the Financial Services Manager for approval to amend the approved methodology for determining fees and for approval of the resulting fees.

(6) The Financial Services Manager may annually establish and charge fees to financing entities in accordance with the methodology approved by the Board under (2) or (3), as applicable, and such fees shall be deemed to have been approved by the Board for purposes of subsection 19(4) of the Act provided that, in each year where the Financial Services Manager establishes and charges fees that are deemed to have been approved under this subsection, the Financial Services Manager shall submit to the Board, for information purposes, a report setting out the fees that have been established for the year and demonstrating that the approved methodology has been appropriately applied.

(7) When the Financial Services Manager submits its proposed fees and methodology under (1), or its proposed amendments to the approved methodology and resulting proposed fees under (3), the Financial Services Manager shall provide the Board with the following:

1. The methodology that the Financial Services Manager has used to calculate its fixed and variable fees.

2. The methodology that the Financial Services Manager has used to benchmark the market comparable fees charged by service providers for similar services.

3. The identity of the financing entities that are liable to pay the proposed fees.

4. Such other information as the Board may require.

(x.1) Fees established by the Financial Services Manager and approved by the Board shall be included in the definition of “expenses” for the purposes of determining finance amounts under the Act.

Subject: RE: OFA : IESO - Fair Hydro funding call April 28
Date: Thursday, April 27, 2017 9:50:11 AM

Two additional items to consider to support #1 below:

- The proposed FH target is 25% (including OREC 8%) after-tax reduction on a representative consumer bill – there are items on a bill that may increase during the FH program which may mean the FH reductions needs to be larger in order to achieve the target (so the monthly IESO shortfall may be larger than planned);
- The proposed FH plan has that the IESO will be paying the OPGTrust admin/vendor costs plus any FH interest costs (all of which are expected to be added to the FH asset) – also these amounts will not be recovered until post 2022.

Regards.

Subject: OFA : IESO - Fair Hydro funding call April 28

Proposed Agenda for Friday's discussions:

1.

IESO's need to have $ commitment for funding Fair Hydro shortfalls – we can discuss the quantum during the call

Background to support the $ commitment's rationale:

- Fair Hydro plan propose to lower bills for the next 4 years – with no recovery until post 2022;
- OPG has no requirement to purchase from the IESO;
- For any purchases made, OPG may need a timing delay (liquidity, alignment for investors timing etc.) – may be one or two months after IESO settles the Fair Hydro shortfall each month;
- The monthly Fair Hydro amounts will continue to have +/- forecast variance amounts (these are expected to be funded by IESO, same as RPP today) and the OEB will consider these variances for each FH rate setting

2.

The current $975M OFA-IESO credit facility may be utilized to include the Fair Hydro funding commitment

Background:

- The current $975M includes a component for today's RPP shortfalls – so this amount can be reduced or transformed into the Fair Hydro commitment;
- Looking for more flexibility on the current minimum 28 day borrowing period,.. if OPG buys from IESO ….would like IESO to pay down the debt as soon as possible;
- Moody's (IESO rating) will be examining if IESO has sufficient capacities to fund FH;
- Examine material adverse clause to accommodate FH

3.

IESO to examine whether O.Reg 280/14 needs to be updated for Fair Hydro – if so, will need IESO Board and Minister of Finance's approvals;

Regards.

As the draft Fair Hydro legislation is closer to being finalized…..the legislation is giving more clarity on the IESO's expected funding needs.

I think we should have another call this week to discuss more concrete action items regarding the IESO's funding needs to pay for the Fair Hydro shortfalls/holding regulatory asset amounts.

Please let me know if any of the following times works, afterwhich I will send out an invite:

1hour meeting either:

April 26 2017 4pm

April 27 2017 11am

April 28 2017 2pm

Regards.

Thanks john – yep I'll proceed on the basis we discussed last week. I've asked ENE legal to take a first crack at edits to the MSA (with just ENE and OPG as parties) and let them know that you guys are drafting up an SLA for ENE/OFA. Let me know when you think a draft might be ready.

Subject: RE: OFHP - Business Issue next steps

Hi – There's a strong interest in proceeding with the OFA as a party to the MSA. In terms of the significant reworking that you mentioned to make this agreeable I'm happy to take back any edits to the document– ENE legal has some edits to make as well but I think it would be helpful to see what works from the OFA's perspective first. I don't see any major policy issues popping up in this document its more just mechanics.
Happy to discuss,
Kaitlin

Ok I'll run that by ENE and see if there's any major concerns. Couple follow ups:

1. Can we still have a contact at OFA listed in the MSA that OPG can provide notice to?
2. When do you expect a draft SLA/MOU to be ready for ENE legal review?
3. Will ENE need to give OFA approval every month to issue the equity or can we delegate that authority for "up to xxB annually"?

Thanks,

Kaitlin

Hi Kaitlin,

Following our call, I had an internal discussion. Our preference is that the OFA not be a party to the Master Subscription Agreement. If we are to be a party, the agreement would need to reviewed and reworked fairly materially. If there is a strong view on wanting to see the OFA as party to it, then let's go down that path and have that discussion.

Whether it be an MOU or SLA, the OFA and Energy would be able to set out the terms of the equity injection.

Happy to discuss.

John

Subject: RE: OFHP - Business Issue next steps

It's based on a high-level term sheet that the policy areas were comfortable with (attached), though this wasn't ever formally approved or moved up the chain it was more just to get staff aligned so not locked into anything by any means.

I have not seen the Master Sale and Servicing Agreement - I have heard it mentioned a couple times through so suspect ENE legal would have a copy.

I think the purpose of having OFA be a direct party is to make sure OPG, OFA and ENE are all fully aware of each of their roles and to formalise the authority for OPG to deal directly with the OFA on the item. The high-level idea is that while ENE will be responsible for getting the annual appropriations, there is no monthly approval process/role for ENE. ENE will be one of the parties to receive notice, but it makes sense for the Subscription notice to go directly to OFA so ENE isn't a middle man adding time pressure. I was hopeful that this agreement could act as sort of a delegation of authority to some extent.

I agree the SLA is duplicative in this regard - my preference would be to scrap the SLA and just have the master agreement if it can accomplish the above intention, but if there is a preference to have a separate SLA and make the Master agreement just between OPG and ENE then happy to proceed on that basis.

Happy to discuss,

Kaitlin

Subject: RE: OFHP - Business Issue next steps

Hi John,

Both OFA Legal and I have reviewed the subscription agreement on a preliminary basis. Why has the OFA been made a direct party to the agreement as it seems that the OFA has a "service" type function here which could be accommodated by a service level agreement between the Ministry Energy and the OFA.

Do you know who prepared this draft and is it based on a term sheet or another document that sets out what the roles of the various parties in this would be.

Thank you.

Malle

Subject: RE: OFHP - Business Issue next steps

Hi John,

Since OFA is directly being made a party to the subscription agreement, we should also get OFA legal's input so I will send this to Sarah Neville for her review too if that's ok. As well I would like to discuss the northern service level agreement with them and whether there are other situations where the OFA acts as an agent to make payments out of the CRF. I agree that some type of service level agreement would

I notice that the subscription agreement mentions that the first equity injection/share subscription will occur August 2017. Is this a realistic timeframe?

The commitments in section 1 seem very broad and open-ended – The Minister of Energy commits to fund up to 44% of the total financing required by the Fair Hydro Trust, to acquire Assets from the IESO under the Act and Regulations by way of equity subscription in OPG. The Master Sale and Servicing Agreement is in square brackets. Is a draft copy of this agreement available for review?

Also not sure what the purpose of s. 3.4 is and whether the Minister of Energy can agree to this process. I note that there is a note to draft there already.

Tom McKinlay of Energy Legal is also reviewing this draft and called to discuss it with me.

Thanks.

Hi Toby,

Just wanted to get something going with an introductory email and to provide you with some context.

Pls. take a look at the Fair Hydro Master Subscription Agreement and the way the equity injection mechanism is envisioned, the operational set up with be under some sort of a service level agreement between Energy and OFA to facilitate the proposed monthly equity injection.

I have a type of service level agreement or MOU in this instance for the Northern Industrial Electricity Rate program as attached. We are hoping something similar could be put in place between Energy and the OFA for this purpose. (The MOU had been drafted by OFA Legal a few years ago when NIER first came into place and have been revised a few times since)

Happy to discuss.

Thanks,

John

Thanks Ken – Are you aware how the potential timing issue with appropriations is handled on the credit side? OPG seemed to think that the OFA had some process in place so that even though only 1 year of appropriations is approved at a time there is always coverage post March 31, 2017 in the event the budget is delayed but OPG needs to borrow. I was just hoping to incorporate something similar on the ENE side so that we don't run into any issues.

OPG provided a draft Master Subscription Agreement based on the term sheet. I will run this by legal as well but please feel free to provide comments/edits.

Hi Kaitlin

My apologies for the delay in responding, just going through my emails from last week, I am ok with the term sheet, you had however, raised a comment re the appropriations. Note that since the OFA will simply be a service provided in this arrangement, i.e.,

We will not be able to provide cash management services including the transfer of the funds from the Province to OPG for the equity injection until the appropriations are approved.

Thanks

Ken k

Hi all – just following up on the equity injection term sheet. I'm going to send this to ENE legal now so that they can start to digest given that the next step will be preparation of the Master Subscription Agreement. I'm assuming there aren't any major concerns but if there are items you'd like to modify if you could pass those along this week I'd appreciate it. Please note that there is a question embedded in the document regarding appropriations that I'm hoping one of you will have insight on.

At the meeting with OPG a few weeks back you had mentioned that there would likely need to be some sort of Service Level Agreement between OFA and ENE – is there a similar agreement you already have in place that we could work from?

Thanks,

Kaitlin

Hi everyone,

As a follow up to today's meeting there are a couple items I think can move forward at this point.

1. Equity Injection Mechanics (draft term sheet attached)
    a. If comfortable, OPG would draft Master Subscription agreement, OFA/ENE would develop service level agreement for cash management services and ENE legal would move forward with amendment to OPG articles to facilitate new class of shares
2. Performance Fee Recommendation (OPG recommended approach attached)
    a. If comfortable, OPG would assist ENE in developing regulation language

My proposed next steps, subject to your agreement, would be to share these documents with ENE legal today and then table them at a Thursday morning meeting with ENE DMO/MO (along with an updated "business issues" note, which I'll send around for everyone's input in the next day or so). After that meeting I would send the same materials /update to MOF DMO along with any new updates received at that meeting.

Could you please confirm you have no further comments and that you agree with this approach and also that there's no other materials/terms that you think need to move up through approvals at this point in time?

Thanks in advance,

Kaitlin

Hi Kaitlin,

I think the example raised was the example we have with MNDM on NIER. We can quickly work on something like it….the bigger question though is whether SLA between OFA and Energy is sufficient for respective Legal branches.

Thanks,

John

P.S. FYI, I'm off for a few days after tomorrow until Thursday next week.

Fair Hydro Plan –Master Subscription Agreement
Term Sheet

- Parties: OPG, OFA, Ministry of Energy
- The Province agrees to inject 44% of total funding of GA asset by way of equity subscription in OPG, which amount OPG in turn will invest in the Fair Hydro Trust as subordinated debt (**Equity Injection Plan**)
- Minister of Energy/Province approves Equity Injection Plan, and initial equity injection amount for 2017/18 fiscal year, and delegates to appropriate ministry staff authority to implement Equity Injection Plan (**Delegated Authority**)
- Long term, OPG equity requirements will form part of the business planning process in place between OPG and Ministry of Energy, ie, annually OPG to include forecasts of its equity requirements for the upcoming 3 years in its business plan submission -- NOTE: this portion of the business plan is not subject to concurrence by the shareholder
- Ministry of Energy will seek appropriation on an annual basis through PRRT for the amounts requested by OPG for its equity requirements-- NOTE: amount of annual appropriation to cover OPG multi year forecasts
- Ministry of Energy and Ontario Financing Authority will have a service level agreement in place which provides authority for OFA to provide cash management services to facilitate these share purchases on an ongoing basis on behalf of the Ministry of Energy
- OPG agrees use the equity subscription amounts solely for funding the Fair Hydro Trust's subordinated debt requirements as part of the Fair Hydro Plan
- OPG will amend its Articles to create an additional class of shares – Class A Shares – which will be non-voting and redeemable at OPG's option
- OPG will issue Class A Shares to the Province monthly at a value per share equal to book value, as determined from OPG's last approved quarterly financial statements -- Value of first Class A shares issued to Province will be based on book value of OPG common shares – ie, existing shareholder's equity
- OPG will have the right to repay equity to the Province, through exercise of its right to redeem the Class A Shares, as principal repayment of the subordinated debt is made commencing in 2027
- Redemption value of the Class A Shares to be based on book value on the redemption date, ie, the equity value per Class A share at the end of the prior financial quarter as set out in OPG's approved financial statements

Formatted: Indent: Left: 0.5", No bullets or numbering

Monthly Process/Mechanics of Share Subscriptions:

a) OPG notifies OFA and Ministry of Energy of required equity injection and number of shares

Timing: [same day as notice from Fair Hydro Trust]

Documents/steps:

(i) share subscription form,

(ii) supporting documentation/invoice from Fair Hydro Trust, confirming amount of GA asset purchase for the month

b) OFA and OPG settle equity injection amounts
Timing: [five] business days from notice to OFA to payment/settlement with OPG
[NOTE: timing to be confirmed based on IESO/Trust process requirements]
Documents/steps:
(i) completed/signed share subscription form from OFA/Province to OPG
(ii) funds transfer from OFA to OPG account)
(iii) OPG receipt, together with secretary's certificate confirming issue of shares/update of share register sent to OFA and Ministry of Energy

Longer term Process/Approvals:

1. Equity Requirements Estimates:
   a. Business Plan Submissions: OPG to include forecasts of equity requirements for the business planning period as well as supporting documentation
   a.
   b. OPG Board Approvals
      - [Bi-annual] Board of Directors' resolutions authorizing equity requirement for period
      - [Bi-annual Shareholder's resolutions authorizing equity requirement for period][NOTE: TBD if needed]

   c. Ministry of Energy appropriations
   [describe annual process]- Ministry of Energy to update appropriations for upcoming 3 year cycle through the PRRT process, including 3 year rolling estimates along with supporting information as provided by OPG through its business planning process.

Share Redemption Process

- TBD -- process to be determined at a later date and appended as Appendix to Master Subscription Agreement

Formatted: Indent: Left: 2", No bullets or numbering

Commented [KC1]: Technically appropriation authority doesn't come into effect until the Budget passes. In the event of a post-March 31 Budget, we would need to seek a temporary allocation from OPCD until the budget is approved. Is this handled differently on the loan side at OFA?

Hi Ken, Mike,
On these items, maybe #2 more so than #1, my understanding is that draft regulation is being drafted on the basis of our discussion on Monday.
Any concerns/comments? I will speak to Ron about it this afternoon.
Thanks,
John

Outstanding Business Issues – Ontario Fair Hydro Plan

Briefing Note

PURPOSE

Provide an overview of a few of the key remaining outstanding business issues that OPG and the Province are working through

BUSINESS ISSUES

1. **Provincial Support Agreement Term Sheet (Performance and Payment Guarantees)**
   - As part of the OFHP, the IESO will create and sell a regulatory asset to the OPG financing entity
   - In order to provide assurances to those with claims against the Financing Entity (eg. Holders of debt), and support credit ratings, the Province is providing both a Service Guarantee and a Performance Guarantee to ensure that the obligations of the IESO are carried out including obligations related to collecting and remitting clean energy adjustments.
   - **Next Steps:**
     - OPG and OFA have discussed a draft term sheet and the OFA, MOF and Blakes will work together to provide comments
     - Timing: Guarantees are required to support rating agency review which is expected by the end of July.

2. **Payments in Lieu of Taxes (PILs) Exemption**
   - Provincial staff, with OPG's concurrence, recommends minimizing, to the extent possible, the PILs payable by the OPG financing vehicle, as those costs will be recovered from ratepayers.
   - The Province is considering regulation changes to exempt from PILs the income arising to the OPG financing vehicle / OPG as a consequence of the Fair Hydro Plan.
   - As part of the OFHP, the financing entity will raise debt and acquire "investment assets" from the IESO. Given the unique nature of the investment assets, there are no specific rules which govern the manner which investment assets should be treated for tax purposes, and further analysis is required to ensure the cost of the investment assets are appropriately recognized as a deduction or offset in computing the income of the financing entity.
   - **Next Steps:**
     - The MOF, OFA and OPG are working together to determine required regulation changes.
     - Torys prepared a memo on the item
     - Timing: MOF will be setting up a call with tax policy, OPG and Torys to discuss a memo Torys prepared on the item in the next few days

3. **Fair Hydro Plan - Master Subscription Agreement Term Sheet (Equity Injection Process)**
    - OPG will require equity injections on a monthly basis, to match the timing of the purchase of the IESO regulatory asset, as applicable, in order to maintain its capital structure, and will require flexibility in order to issue shares as needed by the Province.
    - The Ministry of Energy received appropriation for a fiscally-neutral operating asset expenditure of $1.1B through PRRT to support equity injections for the 2017-18 period, and will continue to provide multi-year forecasts each year through PRRT.
    - **Next Steps:**
        - ~~The Ministry of Energy, OFA and OPG are working through the short term mechanics of this process, which will ultimately feed into a Master Subscription Agreement. A draft term sheet is underway.~~Approval of the draft term sheet (see note).
        - Once term sheet is approved, this will serve as the basis for the Master Subscription Agreement between OPG/ENE and OFA
        - OFA and ENE to develop Service Level Agreement for monthly cash management services
        - Amendment to OPG articles required to facilitate issuance of new class of shares
        - Timing: OPG will require the ability to issue equity in ~~July~~August, so mechanics and agreements should be finalized in ~~June~~July.

4. **Management Fees**
    - OPG will be providing all required services to the Trust as part of the OFHP, including planning, strategy, financing, deal execution etc.
    - The legislation allows OPG to establish and charge a management fee for those services in accordance with the regulations, which are currently in development.
    - ~~OPG and OEB are currently working together on a management fee structure that balances the interests of minimizing costs and satisfying accounting consolidation requirements.~~
    - There are two components to the management fee model proposed by OPG:
        - Base fee: the structure will allow OPG to earn a commercial fee, an accounting consolidation requirement, with periodic OEB review of the commercial basis of that fee. OEB and OPG are in discussions in order to develop a model that satisfies the accounting requirements and is consistent with OEB's processes.
        - Performance ~~management~~ fee: OPG has the ability to gain or lose depending on the actual financing cost relative to a benchmark, which would be shared equally between ratepayers and OPG. Gain/loss is capped at 1% of annual incremental issuance amount.
    - **Next Steps:**

- Base fee: OEB to provide comments on OPG's proposed base fee framework.
- Performance Fee: ~~OPG and OEB will bring forward a recommended framework for developing management fees.~~Approval of the draft framework (see note).
- Timing: ~~TBD~~For incorporation into the June 27th regulations

5. **Subordinated Debt Loan Agreement**
   - OPG will lend the equity injection from the Province to the Fair Hydro Trust by way of subordinated debt
   - Based on monthly funding requirements of the GA asset, the Trust will use short term financing and take out bonds once short term funding reaches certain levels
   - OPG and OFA are working on a Debt Loan Arrangement that would establish the interest rates on the subordinated debt
   - **Next Steps:**
     - OPG and OFA will bring forward a recommended framework for determining interest rates
     - Timing: TBD

6. **IESO – Increased OFA Credit Facilities**
   - THE OPG financing entity is not expected to be immediately operational, so the IESO will need to have transitional financing in place to manage the difference in the payments to generators and other service providers vs payments from loads / LDCs.
   - There may also be on-going monthly cash flow timing differences that the IESO will need a credit facility for.
   - In addition, the OPG financing entity has the right to purchase the regulatory asset from IESO but is not required to purchase it.
   - IESO is working with the OFA to increase the credit facilities in the event that the OPG financing entity does not purchase the regulatory asset
   - **Next Steps:**
     - OFA is drafting a new agreement for a $2 billion credit facility for the OFA to lend funds to IESO for FHP purposes. Concurrently, the OFA is seeking the Minister's approval for an LRC submission to approve an OIC for an additional $2 billion in borrowing capacity, as well as a Directive from the Minister of Finance, which are both necessary for the OFA to lend funds to IESO under the requested new Credit Facility.
     - Timing: The OIC is scheduled for the June 27, 2017 LRC meeting. The Directive and Credit Facility Agreement are currently being drafted, to be in place by July 1st, 2017

7. **OPG Indemnity**
    - OPG (and IESO) are asking for the Province to indemnify the IESO, OPG (the entities) and their respective directors, officers and employee in order to allow them to carry out their roles in implementing the Ontario Fair Hydro Plan and primarily the Global Adjustment refinancing.
    - Indemnification will need to ensure separation between the Province and OPG is maintained
    - **Next Steps:**
        - Staff in Ministry of Finance and Treasury Board Secretariat have received initial documents and are currently reviewing.
        - Depending on the structure of the indemnity requested, an OIC may be required to provide authority to the Minister of Finance
        - Timing: If an OIC is required this would be included in the June 27th, 2017 submission

Hi Kaitlin,

On the OFA side, we are of the view that the MSA should be between OPG and Energy.

Thanks,

John

Subject: RE: OFHP - Business Issue next steps

Hi – There's a strong interest in proceeding with the OFA as a party to the MSA. In terms of the significant reworking that you mentioned to make this agreeable I'm happy to take back any edits to the document– ENE legal has some edits to make as well but I think it would be helpful to see what works from the OFA's perspective first. I don't see any major policy issues popping up in this document its more just mechanics.

Happy to discuss,

Kaitlin

Ok I'll run that by ENE and see if there's any major concerns. Couple follow ups:

1. Can we still have a contact at OFA listed in the MSA that OPG can provide notice to?
2. When do you expect a draft SLA/MOU to be ready for ENE legal review?
3. Will ENE need to give OFA approval every month to issue the equity or can we delegate that authority for "up to xxB annually"?

Thanks,

Kaitlin

Hi Kaitlin,

Following our call, I had an internal discussion. Our preference is that the OFA not be a party to the Master Subscription Agreement. If we are to be a party, the agreement would need to reviewed and reworked fairly materially. If there is a strong view on wanting to see the OFA as party to it, then let's go down that path and have that discussion.

Whether it be an MOU or SLA, the OFA and Energy would be able to set out the terms of the equity

injection.
Happy to discuss.

Subject: RE: OFHP - Business Issue next steps

It's based on a high-level term sheet that the policy areas were comfortable with (attached), though this wasn't ever formally approved or moved up the chain it was more just to get staff aligned so not locked into anything by any means.
I have not seen the Master Sale and Servicing Agreement - I have heard it mentioned a couple times through so suspect ENE legal would have a copy.
I think the purpose of having OFA be a direct party is to make sure OPG, OFA and ENE are all fully aware of each of their roles and to formalise the authority for OPG to deal directly with the OFA on the item. The high-level idea is that while ENE will be responsible for getting the annual appropriations, there is no monthly approval process/role for ENE. ENE will be one of the parties to receive notice, but it makes sense for the Subscription notice to go directly to OFA so ENE isn't a middle man adding time pressure. I was hopeful that this agreement could act as sort of a delegation of authority to some extent.
I agree the SLA is duplicative in this regard - my preference would be to scrap the SLA and just have the master agreement if it can accomplish the above intention, but if there is a preference to have a separate SLA and make the Master agreement just between OPG and ENE then happy to proceed on that basis.
Happy to discuss,
Kaitlin

Hi Toby,

Just wanted to get something going with an introductory email and to provide you with some context.

Pls. take a look at the Fair Hydro Master Subscription Agreement and the way the equity injection mechanism is envisioned, the operational set up with be under some sort of a service level agreement between Energy and OFA to facilitate the proposed monthly equity injection.

I have a type of service level agreement or MOU in this instance for the Northern Industrial Electricity Rate program as attached. We are hoping something similar could be put in place between Energy and the OFA for this purpose. (The MOU had been drafted by OFA Legal a few years ago when NIER first came into place and have been revised a few times since)

Happy to discuss.

Thanks,

John

Thanks Ken – Are you aware how the potential timing issue with appropriations is handled on the credit side? OPG seemed to think that the OFA had some process in place so that even though only 1 year of appropriations is approved at a time there is always coverage post March 31, 2017 in the event the budget is delayed but OPG needs to borrow. I was just hoping to incorporate something similar on the ENE side so that we don't run into any issues.

OPG provided a draft Master Subscription Agreement based on the term sheet. I will run this by legal as well but please feel free to provide comments/edits.

Hi Kaitlin

My apologies for the delay in responding, just going through my emails from last week, I am ok with the term sheet, you had however, raised a comment re the appropriations. Note that since the OFA will simply be a service provided in this arrangement, i.e.,

We will not be able to provide cash management services including the transfer of the funds from the Province to OPG for the equity injection until the appropriations are approved.

Thanks

Ken k

Hi all – just following up on the equity injection term sheet. I'm going to send this to ENE legal now so that they can start to digest given that the next step will be preparation of the Master Subscription Agreement. I'm assuming there aren't any major concerns but if there are items you'd like to modify if you could pass those along this week I'd appreciate it. Please note that there is a question embedded in the document regarding appropriations that I'm hoping one of you will have insight on.

At the meeting with OPG a few weeks back you had mentioned that there would likely need to be some sort of Service Level Agreement between OFA and ENE – is there a similar agreement you already have in place that we could work from?

Thanks,

Kaitlin

Subject: OFHP - Business Issue next steps

Hi everyone,

As a follow up to today's meeting there are a couple items I think can move forward at this point.

1. Equity Injection Mechanics (draft term sheet attached)
    a. If comfortable, OPG would draft Master Subscription agreement, OFA/ENE would develop service level agreement for cash management services and ENE legal would move forward with amendment to OPG articles to facilitate new class of shares
2. Performance Fee Recommendation (OPG recommended approach attached)
    a. If comfortable, OPG would assist ENE in developing regulation language

My proposed next steps, subject to your agreement, would be to share these documents with ENE legal today and then table them at a Thursday morning meeting with ENE DMO/MO (along with an updated "business issues" note, which I'll send around for everyone's input in the next day or so). After that meeting I would send the same materials /update to MOF DMO along with any new updates received at that meeting.

Could you please confirm you have no further comments and that you agree with this approach and also that there's no other materials/terms that you think need to move up through approvals at this point in time?

Thanks in advance,

Kaitlin

Hi Ken, Sarah,
Any issue on OFA being listed in the MSA, per #1 below? To the extent that SLA/MOU would clearly indicate that Energy is responsible and the OFA facilitates certain services, I don't have a problem with #1.
In terms of #3, we may want to put the onus on Energy to notify OFA if any material changes occur, e.g. law/legal framework, approvals in place for the equity injection, etc., but if it is Energy's preference to stay out operationally, I don't know if I'd see a problem with that.
Open to other views.
John

If we are to be a party, the agreement would need to reviewed and reworked fairly materially. If there is a strong view on wanting to see the OFA as party to it, then let's go down that path and have that discussion.

Whether it be an MOU or SLA, the OFA and Energy would be able to set out the terms of the equity injection.

Happy to discuss.

John

Subject: RE: OFHP - Business Issue next steps

It's based on a high-level term sheet that the policy areas were comfortable with (attached), though this wasn't ever formally approved or moved up the chain it was more just to get staff aligned so not locked into anything by any means.

I have not seen the Master Sale and Servicing Agreement - I have heard it mentioned a couple times through so suspect ENE legal would have a copy.

I think the purpose of having OFA be a direct party is to make sure OPG, OFA and ENE are all fully aware of each of their roles and to formalise the authority for OPG to deal directly with the OFA on the item. The high-level idea is that while ENE will be responsible for getting the annual appropriations, there is no monthly approval process/role for ENE. ENE will be one of the parties to receive notice, but it makes sense for the Subscription notice to go directly to OFA so ENE isn't a middle man adding time pressure. I was hopeful that this agreement could act as sort of a delegation of authority to some extent.

I agree the SLA is duplicative in this regard - my preference would be to scrap the SLA and just have the master agreement if it can accomplish the above intention, but if there is a preference to have a separate SLA and make the Master agreement just between OPG and ENE then happy to proceed on that basis.

Happy to discuss,

Kaitlin

Hi John,
Both OFA Legal and I have reviewed the subscription agreement on a preliminary basis.
Why has the OFA been made a direct party to the agreement as it seems that the OFA has a "service" type function here which could be accommodated by a service level agreement between the Ministry Energy and the OFA.
Do you know who prepared this draft and is it based on a term sheet or another document that sets out what the roles of the various parties in this would be.
Thank you.

Hi Toby,
Just wanted to get something going with an introductory email and to provide you with some context.

Pls. take a look at the Fair Hydro Master Subscription Agreement and the way the equity injection mechanism is envisioned, the operational set up with be under some sort of a service level agreement between Energy and OFA to facilitate the proposed monthly equity injection.
I have a type of service level agreement or MOU in this instance for the Northern Industrial Electricity Rate program as attached. We are hoping something similar could be put in place between Energy and the OFA for this purpose. (The MOU had been drafted by OFA Legal a few years ago when NIER first came into place and have been revised a few times since)
Happy to discuss.
Thanks,
John

Thanks Ken – Are you aware how the potential timing issue with appropriations is handled on the credit side? OPG seemed to think that the OFA had some process in place so that even though only 1 year of appropriations is approved at a time there is always coverage post March 31, 2017 in the event the budget is delayed but OPG needs to borrow. I was just hoping to incorporate something similar on the ENE side so that we don't run into any issues.
OPG provided a draft Master Subscription Agreement based on the term sheet. I will run this by legal as well but please feel free to provide comments/edits.

Hi all – just following up on the equity injection term sheet. I'm going to send this to ENE legal now so that they can start to digest given that the next step will be preparation of the Master Subscription Agreement. I'm assuming there aren't any major concerns but if there are items you'd like to modify if you could pass those along this week I'd appreciate it. Please note that there is a

question embedded in the document regarding appropriations that I'm hoping one of you will have insight on.

At the meeting with OPG a few weeks back you had mentioned that there would likely need to be some sort of Service Level Agreement between OFA and ENE – is there a similar agreement you already have in place that we could work from?

Thanks,

Kaitlin

Subject: OFHP - Business Issue next steps

Hi everyone,

As a follow up to today's meeting there are a couple items I think can move forward at this point.

1. Equity Injection Mechanics (draft term sheet attached)
    a. If comfortable, OPG would draft Master Subscription agreement, OFA/ENE would develop service level agreement for cash management services and ENE legal would move forward with amendment to OPG articles to facilitate new class of shares
2. Performance Fee Recommendation (OPG recommended approach attached)
    a. If comfortable, OPG would assist ENE in developing regulation language

My proposed next steps, subject to your agreement, would be to share these documents with ENE legal today and then table them at a Thursday morning meeting with ENE DMO/MO (along with an updated "business issues" note, which I'll send around for everyone's input in the next day or so). After that meeting I would send the same materials /update to MOF DMO along with any new updates received at that meeting.

Could you please confirm you have no further comments and that you agree with this approach and also that there's no other materials/terms that you think need to move up through approvals at this point in time?

Thanks in advance,

Kaitlin

I agree that some type of service level agreement would
I notice that the subscription agreement mentions that the first equity injection/share subscription will occur August 2017. Is this a realistic timeframe?
The commitments in section 1 seem very broad and open-ended – The Minister of Energy commits to fund up to 44% of the total financing required by the Fair Hydro Trust, to acquire Assets from the IESO under the Act and Regulations by way of equity subscription in OPG.
The Master Sale and Servicing Agreement is in square brackets. Is a draft copy of this agreement available for review?
Also not sure what the purpose of s. 3.4 is and whether the Minister of Energy can agree to this process. I note that there is a note to draft there already.
Tom McKinlay of Energy Legal is also reviewing this draft and called to discuss it with me.
Thanks.
Malle

Hi Toby,
Just wanted to get something going with an introductory email and to provide you with some context.
Pls. take a look at the Fair Hydro Master Subscription Agreement and the way the equity injection mechanism is envisioned, the operational set up with be under some sort of a service level agreement between Energy and OFA to facilitate the proposed monthly equity injection.
I have a type of service level agreement or MOU in this instance for the Northern Industrial Electricity Rate program as attached. We are hoping something similar could be put in place between Energy and the OFA for this purpose. (The MOU had been drafted by OFA Legal a few years ago when NIER first came into place and have been revised a few times since)
Happy to discuss.
Thanks,
John

Thanks Ken – Are you aware how the potential timing issue with appropriations is handled on the credit side? OPG seemed to think that the OFA had some process in place so that even though only 1 year of appropriations is approved at a time there is always coverage post March 31, 2017 in the event the budget is delayed but OPG needs to borrow. I was just hoping to incorporate something similar on the ENE side so that we don't run into any issues.

OPG provided a draft Master Subscription Agreement based on the term sheet. I will run this by legal as well but please feel free to provide comments/edits.

Hi everyone,

As a follow up to today's meeting there are a couple items I think can move forward at this point.

1. Equity Injection Mechanics (draft term sheet attached)
    a. If comfortable, OPG would draft Master Subscription agreement, OFA/ENE would

develop service level agreement for cash management services and ENE legal would move forward with amendment to OPG articles to facilitate new class of shares

2. Performance Fee Recommendation (OPG recommended approach attached)
    a. If comfortable, OPG would assist ENE in developing regulation language

My proposed next steps, subject to your agreement, would be to share these documents with ENE legal today and then table them at a Thursday morning meeting with ENE DMO/MO (along with an updated "business issues" note, which I'll send around for everyone's input in the next day or so). After that meeting I would send the same materials /update to MOF DMO along with any new updates received at that meeting.

Could you please confirm you have no further comments and that you agree with this approach and also that there's no other materials/terms that you think need to move up through approvals at this point in time?

Thanks in advance,

Kaitlin

Hi Ken,
I read over the agreement and have one change. In Exhibit D "Payment/Wire Transfer Instructions" the legal name and address of the beneficiary (I assume OPG) has to be included.
Thanks,
Risa Thau

I went through this quickly and I don't have any comments; I believe that the actual transfer of funds to OPG for the equity injection will be governed by a SLA between OFA and the Ministry of Energy and we of course need to review that carefully. However, I would like you take a quick look and let me know if you have any comments.
Thanks

DRAFT: JUNE 22, 2017

MASTER SHARE SUBSCRIPTION AGREEMENT

among

MINISTER OF ENERGY

- and –

ONTARIO POWER GENERATION

- and -

ONTARIO FINANCING AUTHORITY

Dated as of ■, 2017

EXHIBITS

Exhibit A	--	Share Subscription Form
Exhibit B	--	Subscription Supporting Information
Exhibit C	--	Receipt and Certificate
Exhibit D	--	Payment/Wire Transfer instructions
Exhibit E	--	Share Redemption Process

MASTER SHARE SUBSCRIPTION AGREEMENT

THIS AGREEMENT made as of ■, 2017.

AMONG:

HER MAJESTY THE QUEEN IN RIGHT OF ONTARIO, as represented by the Minister of Energy

(the "**Minister**")

- and -

ONTARIO POWER GENERATION INC., a corporation established under the laws of the Province of Ontario

("OPG")

- and -

ONTARIO FINANCING AUTHORITY, a [ ]

(the "**OFA**")

Background

1. The Government of Ontario enacted the *Ontario Fair Hydro Act, 2017* (the "Act") to implement its Fair Hydro Plan (the "FHP"). The Act's purpose is, among other things, to ensure that clean energy costs and clean energy benefits are fairly allocated among present and future specified consumers.

2. The Act and the regulations promulgated under the Act (the "Regulations") creates certain assets related to the deferral of electricity charges (the "Assets"), which Assets will be acquired from the Independent Electricity System Operator ("IESO") by the special purpose financing entity established by OPG to implement the financing plan to fund the deferral under the Act (the "Fair Hydro Trust") **[NTD: use "Financing Entity"??].**

3. The Fair Hydro Trust will acquire the Assets monthly from IESO and finance them in accordance with the financing plan, which includes both senior debt (minimum of 51%) from external sources and subordinated debt (up to 49%) from OPG.

4. The Minister has agreed to fund up to 44% of the total funding requirement for the Assets through equity injections in OPG and OPG has agreed to use the equity injections solely for funding the Fair Hydro Trust's subordinated debt (the "Equity Injection Plan").

5. For purposes of the Equity Injection Plan, OPG [will amend] [has amended] its articles to create a new class of non-voting, redeemable shares (the "Class A Shares"). The Minister will subscribe for Class A Shares monthly in accordance with the process set forth in this Agreement and OPG will in turn invest these amounts in subordinated debt of the Fair Hydro Trust.

6. OPG will be entitled from time to time to redeem or buy back outstanding Class A Shares in connection with repayment of the Fair Hydro Trust subordinated debt or other purposes as may be approved by the OPG board of directors.

7. The Minister and the OFA have entered into a service level agreement (the "SLA") which provides the OFA with authority to provide cash management services to facilitate the share purchases on an ongoing basis on behalf of the Minister.

8. The parties desire to set out in this Agreement the process and mechanisms by which the equity injections and share purchases will occur and their respective roles and responsibilities in the Equity Injection Plan.

NOW THEREFORE the parties hereto agree as follows:

1. Confirmation of Equity Injection and Use of Funds

1.1 The Minister commits to fund up to 44% of the total financing required by the Fair Hydro Trust, to acquire Assets from the IESO under the Act and Regulations, by way of equity subscriptions in OPG.

1.2 OPG agrees to use the equity received from the Minister solely to lend as subordinated debt to the Fair Hydro Trust to fund the Fair Hydro Trust's obligations under the [Master Sale and Servicing Agreement][**NTD: confirm name]** between the IESO and the Fair Hydro Trust, and the Act and Regulations.

2. Monthly Share Subscription Process

2.1 The Minister, through the OFA, will subscribe for and purchase Class A Shares from OPG monthly, in an amount, and for a value, as determined by OPG in accordance with paragraph 2.2 below.

2.2 Each month, coincident with the asset acquisition to be made by the Fair Hydro Trust from the IESO under the [Master Sale and Servicing Agreement], OPG will provide notice to the Minister and the OFA of the amount of equity injection required and the corresponding number of shares to be issued by OPG and subscribed by the Minister. This notice will be in the form of the Share Subscription attached as Exhibit A. OPG will also provide reasonable supporting information for the values and amounts set out in the Share Subscription, in the form of the Subscription Supporting Information attached as Exhibit B.

2.3 For purposes of providing the reasonable supporting information required under paragraph 2.2 above, OPG agrees:

(i) that the value of the monthly equity injection/share subscription amount will reflect the monthly funding requirements of the Fair Hydro Trust acquisitions under the [Master Sale and Servicing Agreement],; and

(ii) Class A Shares will be issued to the Minister at a value per share equal to their book value as determined from OPG's last approved quarterly financial statements. **[NTD: do we need any more specificity here?]**

2.4 Within [five] Business Days of receipt of the notice and supporting information described in paragraph 2.2, the OFA will deliver the executed Share Subscription to OPG and wire transfer, in immediately available funds, the required equity funds in accordance with the payment instructions set out in Exhibit D or as may be otherwise provided by OPG from time to time. For purposes of this Agreement, "Business Day" means any day other than a Saturday, a Sunday or a day on which banking institutions in Toronto, Ontario are authorized or obligated by law, regulation or executive order to be closed.

2.5 OPG will issue a receipt to the Minister and the OFA, in the form of Exhibit C attached, confirming receipt of the equity amount and certifying as to the update of OPG's corporate share register with issue of the shares in the name of the Minister.

2.6 The first equity injection/share subscription will occur [August x 2017] (the "Initial Equity Injection"). Equity injections will continue monthly so long as the Fair Hydro Trust is purchasing assets and incurring debt obligations, including subordinated debt in favour of OPG, pursuant to the Act and Regulations.

3. Equity Requirement Forecasts and Approvals

3.1 OPG will prepare and submit forecasts of equity requirements for the applicable business planning period as part of its business plan submissions to the Shareholder in accordance with the Memorandum of Agreement between the Minister and OPG effective July 17, 2015 (the "MOA") as amended, restated or replaced from time to time. For clarity, OPG will submit annually, as part of its business plan submissions, the FHP equity requirements forecast for the upcoming 3 years.

3.2 OPG's equity requirement forecast submissions will include all reasonable supporting information and documentation. **[NTD: any more specificity required?]**

3.3 The OFA and the Minister confirm that OPG's equity requirement forecasts submitted with OPG's business plans will not require concurrence by the Shareholder as set out in the MOA.

3.4 In accordance with the submissions made under paragraph 3.1 above, the Minister will update the appropriations for the upcoming 3 year cycle through the PRRT process, including 3 year rolling estimates along with supporting information as provided by OPG through its business planning process.**[NTD: clarify that purpose of this clause is to confirm Energy will seek out and obtain required appropriations]**

4. Share Redemption Process

5.1 The Minister and OPG agree to set out the required process for any future redemption by OPG of outstanding Class A Shares in an appendix to this Agreement and attach it as Exhibit E. Exhibit E will be finalized before the first share redemption [and in any case no later than [90] Business Days before the effective date of such redemption].**[NTD: confirm if need timeframe]**

6. Miscellaneous

6.1 Notices

Any notice, report or other communication to be given under this Agreement will be in writing and will be effective (a) upon receipt when sent by mail or courier, (b) on the date personally delivered to an authorized officer of the party to which sent, or (c) on the date transmitted by electronic transmission with a confirmation of receipt in all cases, addressed as follows:

in the case of the Minister:

■

in the case of the OFA:

■

in the case of OPG:

Ontario Power Generation Inc.
700 University Avenue

Toronto, Ontario
M5G 1X6

Attention: ■
Email: ■

and

Attention: ■
Email: ■

Each party may by notice given as above to the other party or parties hereto, designate any further or different address to which subsequent notices, reports and other communications will be sent.

6.2 Separate Counterparts; Electronic Delivery

This Agreement may be executed by the parties in separate counterparts, each of which when so executed and delivered will be considered an original, but all such counterparts together constitute but one and the same instrument. Delivery of an executed signature page to this Agreement by a party by electronic transmission will be as effective as delivery of a manually executed copy of this Agreement by such party.

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed by their respective officers as of the day and year first above written.

Subject: RE: OFHP - Business Issue next steps

Hi – There's a strong interest in proceeding with the OFA as a party to the MSA. In terms of the significant reworking that you mentioned to make this agreeable I'm happy to take back any edits to the document– ENE legal has some edits to make as well but I think it would be helpful to see what works from the OFA's perspective first. I don't see any major policy issues popping up in this document its more just mechanics.
Happy to discuss,
Kaitlin

Subject: RE: OFHP - Business Issue next steps

Ok I'll run that by ENE and see if there's any major concerns. Couple follow ups:

1. Can we still have a contact at OFA listed in the MSA that OPG can provide notice to?
2. When do you expect a draft SLA/MOU to be ready for ENE legal review?
3. Will ENE need to give OFA approval every month to issue the equity or can we delegate that authority for "up to xxB annually"?

Thanks,
Kaitlin

Hi Kaitlin,

Following our call, I had an internal discussion. Our preference is that the OFA not be a party to the Master Subscription Agreement. If we are to be a party, the agreement would need to reviewed and reworked fairly materially. If there is a strong view on wanting to see the OFA as party to it, then let's go down that path and have that discussion.

Whether it be an MOU or SLA, the OFA and Energy would be able to set out the terms of the equity injection.

Happy to discuss.

John

Subject: RE: OFHP - Business Issue next steps

It's based on a high-level term sheet that the policy areas were comfortable with (attached), though this wasn't ever formally approved or moved up the chain it was more just to get staff aligned so not locked into anything by any means.

I have not seen the Master Sale and Servicing Agreement - I have heard it mentioned a couple times through so suspect ENE legal would have a copy.

I think the purpose of having OFA be a direct party is to make sure OPG, OFA and ENE are all fully aware of each of their roles and to formalise the authority for OPG to deal directly with the OFA on the item. The high-level idea is that while ENE will be responsible for getting the annual appropriations, there is no monthly approval process/role for ENE. ENE will be one of the parties to receive notice, but it makes sense for the Subscription notice to go directly to OFA so ENE isn't a middle man adding time pressure. I was hopeful that this agreement could act as sort of a delegation of authority to some extent.

I agree the SLA is duplicative in this regard - my preference would be to scrap the SLA and just have the master agreement if it can accomplish the above intention, but if there is a preference to have a separate SLA and make the Master agreement just between OPG and ENE then happy to proceed on that basis.

Happy to discuss,

Kaitlin

Hi Malle,

My understanding is that OPG staff drafted the draft agreement. Clara Greco at OPG is the contact person.

Looping Kaitlin in as she has been in contact with OPG on this one.

Thanks,

John

Hi John,

Both OFA Legal and I have reviewed the subscription agreement on a preliminary basis.

Why has the OFA been made a direct party to the agreement as it seems that the OFA has a “service” type function here which could be accommodated by a service level agreement between the Ministry Energy and the OFA.

Do you know who prepared this draft and is it based on a term sheet or another document that sets out what the roles of the various parties in this would be.

Thank you.

Malle

Subject: RE: OFHP - Business Issue next steps

Hi John,

Since OFA is directly being made a party to the subscription agreement, we should also get OFA legal’s input so I will send this to Sarah Neville for her review too if that’s ok. As well I would like to discuss the northern service level agreement with them and whether there are other situations where the OFA acts as an agent to make payments out of the CRF. I agree that some type of service level agreement would

I notice that the subscription agreement mentions that the first equity injection/share subscription will occur August 2017. Is this a realistic timeframe?

The commitments in section 1 seem very broad and open-ended – The Minister of Energy commits to fund up to 44% of the total financing required by the Fair Hydro Trust, to acquire Assets from the IESO under the Act and Regulations by way of equity subscription in OPG.

The Master Sale and Servicing Agreement is in square brackets. Is a draft copy of this agreement available for review?

Also not sure what the purpose of s. 3.4 is and whether the Minister of Energy can agree to this process. I note that there is a note to draft there already.

Tom McKinlay of Energy Legal is also reviewing this draft and called to discuss it with me.

Thanks.

Hi Toby,

Just wanted to get something going with an introductory email and to provide you with some context.

Pls. take a look at the Fair Hydro Master Subscription Agreement and the way the equity injection mechanism is envisioned, the operational set up with be under some sort of a service level agreement between Energy and OFA to facilitate the proposed monthly equity injection.

I have a type of service level agreement or MOU in this instance for the Northern Industrial Electricity Rate program as attached. We are hoping something similar could be put in place between Energy and the OFA for this purpose. (The MOU had been drafted by OFA Legal a few years ago when NIER first came into place and have been revised a few times since)

Happy to discuss.

Thanks,

John

Thanks Ken – Are you aware how the potential timing issue with appropriations is handled on the credit side? OPG seemed to think that the OFA had some process in place so that even though only 1 year of appropriations is approved at a time there is always coverage post March 31, 2017 in the event the budget is delayed but OPG needs to borrow. I was just hoping to incorporate something similar on the ENE side so that we don't run into any issues.

OPG provided a draft Master Subscription Agreement based on the term sheet. I will run this by legal as well but please feel free to provide comments/edits.

Hi Kaitlin

My apologies for the delay in responding, just going through my emails from last week, I am ok with the term sheet, you had however, raised a comment re the appropriations. Note that since the OFA will simply be a service provided in this arrangement, i.e.,

We will not be able to provide cash management services including the transfer of the funds from the Province to OPG for the equity injection until the appropriations are approved.

Thanks

Ken k

Hi all – just following up on the equity injection term sheet. I'm going to send this to ENE legal now so that they can start to digest given that the next step will be preparation of the Master Subscription Agreement. I'm assuming there aren't any major concerns but if there are items you'd like to modify if you could pass those along this week I'd appreciate it. Please note that there is a question embedded in the document regarding appropriations that I'm hoping one of you will have insight on.

At the meeting with OPG a few weeks back you had mentioned that there would likely need to be some sort of Service Level Agreement between OFA and ENE – is there a similar agreement you already have in place that we could work from?

Thanks,

Kaitlin

Subject: OFHP - Business Issue next steps

Hi everyone,

As a follow up to today's meeting there are a couple items I think can move forward at this point.

1. Equity Injection Mechanics (draft term sheet attached)
    a. If comfortable, OPG would draft Master Subscription agreement, OFA/ENE would develop service level agreement for cash management services and ENE legal would move forward with amendment to OPG articles to facilitate new class of shares
2. Performance Fee Recommendation (OPG recommended approach attached)
    a. If comfortable, OPG would assist ENE in developing regulation language

My proposed next steps, subject to your agreement, would be to share these documents with ENE legal today and then table them at a Thursday morning meeting with ENE DMO/MO (along with an updated "business issues" note, which I'll send around for everyone's input in the next day or so). After that meeting I would send the same materials /update to MOF DMO along with any new updates received at that meeting.

Could you please confirm you have no further comments and that you agree with this approach and also that there's no other materials/terms that you think need to move up through approvals at this point in time?

Thanks in advance,

Kaitlin

Hi all,

ENE MO asked for a quick note on 4 of the outstanding business issues that are being worked through and are hoping to see something tomorrow morning.

I've pulled together a high level explanation of each of the items and next steps/timing (to the extent I know).

Would greatly appreciate if you guys could take a look and provide any edits/comments today/early tomorrow if possible. I'm also not too involved in a few of these discussions so if there's others within OFA you think should review feel free to pass along.

Thanks in advance,
Kaitlin

Outstanding Business Issues – Ontario Fair Hydro Plan
Briefing Note

PURPOSE
Provide an overview of a few of the key remaining outstanding business issues that OPG and the Province are working through

BUSINESS ISSUES

1. **Provincial Support Agreement Term Sheet (~~Service and~~ Performance and Payment Guarantees)**
   - As part of the OFHP, the IESO will create and sell a regulatory asset to the OPG financing entity
   - In order to provide assurances to those with claims against the Financing Entity (eg. Holders of debt), and support credit ratings, the Province is providing both a Service Guarantee and a Performance Guarantee to ensure that the obligations of the IESO are carried out including obligations related to collecting and remitting clean energy adjustments.
   - **Next Steps:**
     - OPG and OFA and working towards the development of a term sheet
     - Timing: Guarantees are required to support rating agency review which is expected by the end of July

2. **Payments in Lieu of Taxes (PILs) Exemption**
   - The Province would like to minimize to the extent possible , the PILs payable by the OPG financing vehicle, as those costs will be recovered from ratepayers
   - The Province is considering regulation changes to exempt the income arising as a consequence of the Fair Hydro Plan from PILs
   - As part of the OFHP, the financing entity will raise debt and acquire "investment assets" from the IESO. Given the unique nature of the investment assets, there are no specific rules which govern the manner which investment assets should be treated for tax purposes, and further analysis is required to ensure the cost of the investment assets are appropriately recognized as a deduction or offset in computing the income of the financing entity
   - **Next Steps:**
     - The Ministries of Finance, OFA and OPG are working together to determine required regulation changes
     - Timing: [Next steps for a decision / when is a decision required / when would these regulation changes occur]

3. **Fair Hydro Plan - Master Subscription Agreement Term Sheet (Equity Injection Process)**

- OPG will require equity injections on a monthly basis in order to maintain its capital structure, and will require flexibility in order to issue shares as needed by the Province
- The Ministry of Energy received appropriation for $1.1B through PRRT to support equity injections for the 2017-18 period, and will continue to provide multi-year forecasts each year through PRRT
- **Next Steps:**
    - The Ministry of Energy, OFA and OPG are working through the short term mechanics of this process which will ultimately feed into a Master Subscription Agreement. A draft term sheet is underway.
    - Timing: OPG will require the ability to issue equity in July, so mechanics and agreements should be finalized in June

4. **Management Fees**
    - OPG will be providing all required services to the Trust as part of the OFHP, including planning, strategy, financing, deal execution etc.
    - The legislation allows OPG to establish and charge a management fee for those services in accordance with the regulations which are currently in development
    - OPG and OEB are currently working together on a management fee structure that balances the interests of minimizing costs and satisfying accounting consolidation requirements
    - **Next Steps:**
        - OPG and OEB will bring forward a recommended framework for developing management fees
        - Timing: For incorporation into regulations being brought forward in June

5. **IESO – Increased Credit Facilities**
    - The OPG financing entity has the right to purchase the regulatory asset from IESO but does not have to purchase it.
    - IESO is working with the OFA to increase the credit facilities in the event that the OPG financing entity does not purchase the regulatory asset
    - **Next Steps:**
        - OFA is drafting a new agreement for a $2 billion credit facility for the OFA to lend funds to IESO for FHP purposes. Concurrently, the OFA is seeking LRC approval for a new $2 billion OIC, as well as a Directive from the Minister of Finance, which are both necessary for the OFA to lend funds to IESO under the new Credit Facility. .....
        - Timing: The OIC is scheduled as item for the June 27, 2017 LRC meeting. The Directive and Credit Facility Agreement are currently being drafted, to be in place by July 1st, 2017.....

Hey Ken – In Scotts absence I'm hoping you can help me with a couple items:

1. On the performance fees – Did Scott share an ENE note with 3 options for your review last week? No
2. On the Sub-Debt – could you share the latest term sheet and what is the status of this one? Is it over to OFA to provide comments back to OPG or are we waiting on OPG for something? To the best of my knowledge we didn't have any major issues with the latest term sheet.

Thanks and happy to chat if that's easier

Hi Mike, I just came by but you were on the phone. Would you be able to touch base with OPG before the meeting this week? Or maybe you have already. Gadi would like us to have a sense of the banks' demands before we walk in to the meeting.

Thanks, Anna

Good morning,

I hope everyone had a nice long weekend. FYI, the meeting with OPG tomorrow afternoon will likely be rescheduled to accommodate an expanded group (i.e., Cindy Veinot, Steen Hume, possibly legal counsel). Please let me know if there are any days/times this week that you are not available.

Thanks, Anna

Subject:	RE: OPG Performance fees
Date:	Sunday, May 21, 2017 10:42:33 AM

Hi Scott
Sorry for the delay in responding, after a discussion with Gadi the OFA is comfortable with the approach proposed by OPG. We also recommend that the $1M upside/downside limit on performance fees in relation to a pre-determined benchmark be enshrined in the Financing Plan to be developed by OPG. The OFA is also willing to work with OPG on the development of the benchmark.
Thanks
Ken k

Sent: Monday, May 15, 2017 9:17 AM
To: Ken Kandeepan
Cc: Ronald Kwan ; Mike Manning ; Carlos Yep ; Veinot, Cindy (TBS)
Subject: RE: OPG Performance fees
I talked to OPG on this. Here are some other considerations:

- Risk / reward goes both ways. Unlike most management fee structures where the performance fee provides an at risk upside to the manager, but no downside, the distribution of potential benefits and losses is symmetric between ratepayers and OPG.
- OPG's current thinking is that it would work with OFA to set a benchmark for borrowing costs at the start of the year based on GOC yields + a premium. If OPG over-performs (under-performs) the benefit (downside) would be shared between the company and ratepayers 50/50 up to +/- $1M. Above or below $1M, all of the benefit (downside) would flow to ratepayers.
- OPG does not particularly like this symmetry but this is apparently required to meet accounting requirements.
- From my perspective, $1M is a small number, so I am not too concerned about overall impacts on ratepayers.

Thanks,
Scott

Subject: RE: OPG Performance fees
Hi Scott
Yes the MOF does like OPG to make money since on a PSAB basis it benefits the Province's fiscal position. In this instance however, the marginal increase to the fiscal bottom line comes at the expense of the ratepayers in terms of additional debt, hence our push back.
Pls see below my responses on the two issues that you have raised. I am cc'ing Cindy as well since she may have her own thoughts and a discussion maybe value added in terms of arriving at a common understanding.

Thanks

MoF asking OPG to make less money! This feels so backward!
I will chat with OPG to dig in to the rationale. I take your point that OPG will benefit from the loans to the trust. However, I see two weaknesses with the argument:

1) Lenders don't typically consolidate borrowers, so it takes more than interest revenues to meet this test. Not sure if you are referring to the "Power" or "profit" principle. If the former the Province lends to IO for all its needs and yet exercises power since IO is consolidated with the Province in much the same way the Trust and OPG will be consolidated. Note that OPG benefits from the interest income on the 44% relating to the equity injection even if the Trust is not consolidated.
2) Earning interest income on equity is going to take down the company's ROE (one of the key metrics that we are tracking on overall company performance). Therefore I wouldn't see this as a particularly compelling allocation of funds from a commercial perspective. This is a good point however, OPG considers the 44% it lends to the Trust as sub-debt most likely priced higher than the debt borrowed by the Trust from the markets. In the event the interest on the 44% is less than OPG's current ROE of the company, your point holds however, if the interest is higher it actually adds to OPG's ROE.

Subject: OPG Performance fees

Hi Scott
This issue has come up a couple of times and after discussing with Gadi we felt that you may be able to raise it either directly with OPG or via Energy. As the Financial Services Manager, OPG is proposing a performance fee for itself based beating a benchmark for borrowing costs the Trust incurs in presumably the 51% it seeks to borrow from the capital markets.
OPG argues that the latter of the two fundamental principles, "Power" and "Profit" allowing the Trust to be consolidated with OPG requires the implementation of a performance fee structure. The counter argument is that OPG already has access to profit, by virtue of its position as the funding entity for 44% of the debt incurred by the Trust. OPG uses the funds it receives from the Province's equity injection, for which it pays no interest, for this purpose.
Upon consolidation with the Trust, OPG's interest income will therefore increase by the amount of the interest the Trust receives on 44% of its overall debt, a relatively risk free profit source, at least over the duration of the Fair Hydro Plan. While the use of a benchmark is appropriate and contributes to an efficient borrowing program, any performance fees arising from beating the benchmark will effectively be funded by the ratepayers, by increasing the investment asset and the

associated debt to be repaid by ratepayers.
Mike and I will be happy to provide any further technical assistance that you may require as you raise this issue.
Thanks
Ken k

I will chat with OPG to dig in to the rationale. I take your point that OPG will benefit from the loans to the trust. However, I see two weaknesses with the argument:

1) Lenders don't typically consolidate borrowers, so it takes more than interest revenues to meet this test
2) Earning interest income on equity is going to take down the company's ROE (one of the key metrics that we are tracking on overall company performance). Therefore I wouldn't see this as a particularly compelling allocation of funds from a commercial perspective.

Subject: OPG Performance fees

Hi Scott
This issue has come up a couple of times and after discussing with Gadi we felt that you may be able to raise it either directly with OPG or via Energy. As the Financial Services Manager, OPG is proposing a performance fee for itself based beating a benchmark for borrowing costs the Trust incurs in presumably the 51% it seeks to borrow from the capital markets.
OPG argues that the latter of the two fundamental principles, "Power" and "Profit" allowing the Trust to be consolidated with OPG requires the implementation of a performance fee structure. The counter argument is that OPG already has access to profit, by virtue of its position as the funding entity for 44% of the debt incurred by the Trust. OPG uses the funds it receives from the Province's equity injection, for which it pays no interest, for this purpose.
Upon consolidation with the Trust, OPG's interest income will therefore increase by the amount of the interest the Trust receives on 44% of its overall debt, a relatively risk free profit source, at least over the duration of the Fair Hydro Plan. While the use of a benchmark is appropriate and contributes to an efficient borrowing program, any performance fees arising from beating the benchmark will effectively be funded by the ratepayers, by increasing the investment asset and the associated debt to be repaid by ratepayers.
Mike and I will be happy to provide any further technical assistance that you may require as you raise this issue.
Thanks
Ken k

Hi All
Given the comparatively low materiality and the fact that the benchmark will be set by the OFA with OPG absorbing any underperformance makes this viable from my perspective. Pls let me know if you agree.
If so I will touch base with Gadi just to make sure and respond to Scott.
Thanks

Subject: RE: OPG Performance fees
I talked to OPG on this. Here are some other considerations:

- Risk / reward goes both ways. Unlike most management fee structures where the performance fee provides an at risk upside to the manager, but no downside, the distribution of potential benefits and losses is symmetric between ratepayers and OPG.
- OPG's current thinking is that it would work with OFA to set a benchmark for borrowing costs at the start of the year based on GOC yields + a premium. If OPG over-performs (under-performs) the benefit (downside) would be shared between the company and ratepayers 50/50 up to +/- $1M. Above or below $1M, all of the benefit (downside) would flow to ratepayers.
- OPG does not particularly like this symmetry but this is apparently required to meet accounting requirements.
- From my perspective, $1M is a small number, so I am not too concerned about overall impacts

on ratepayers.

Thanks,

Scott

Subject: RE: OPG Performance fees

Hi Scott

Yes the MOF does like OPG to make money since on a PSAB basis it benefits the Province's fiscal position. In this instance however, the marginal increase to the fiscal bottom line comes at the expense of the ratepayers in terms of additional debt, hence our push back.

Pls see below my responses on the two issues that you have raised. I am cc'ing Cindy as well since she may have her own thoughts and a discussion maybe value added in terms of arriving at a common understanding.

Thanks

I will chat with OPG to dig in to the rationale. I take your point that OPG will benefit from the loans to the trust. However, I see two weaknesses with the argument:

1) Lenders don't typically consolidate borrowers, so it takes more than interest revenues to meet this test. Not sure if you are referring to the "Power" or "profit" principle. If the former the Province lends to IO for all its needs and yet exercises power since IO is consolidated with the Province in much the same way the Trust and OPG will be consolidated. Note that OPG benefits from the interest income on the 44% relating to the equity injection even if the Trust is not consolidated.
2) Earning interest income on equity is going to take down the company's ROE (one of the key metrics that we are tracking on overall company performance). Therefore I wouldn't see this as a particularly compelling allocation of funds from a commercial perspective. This is a good point however, OPG considers the 44% it lends to the Trust as sub-debt most likely priced higher than the debt borrowed by the Trust from the markets. In the event the interest on the 44% is less than OPG's current ROE of the company, your point holds however, if the interest is higher it actually adds to OPG's ROE.

- Risk / reward goes both ways. Unlike most management fee structures where the performance fee provides an at risk upside to the manager, but no downside, the distribution of potential benefits and losses is symmetric between ratepayers and OPG.
- OPG's current thinking is that it would work with OFA to set a benchmark for borrowing costs at the start of the year based on GOC yields + a premium. If OPG over-performs (under-performs) the benefit (downside) would be shared between the company and ratepayers 50/50 up to +/- $1M. Above or below $1M, all of the benefit (downside) would flow to ratepayers.
- OPG does not particularly like this symmetry but this is apparently required to meet accounting requirements.
- From my perspective, $1M is a small number, so I am not too concerned about overall impacts on ratepayers.

Thanks,
Scott

Subject: RE: OPG Performance fees

Hi Scott
Yes the MOF does like OPG to make money since on a PSAB basis it benefits the Province's fiscal position. In this instance however, the marginal increase to the fiscal bottom line comes at the expense of the ratepayers in terms of additional debt, hence our push back.
Pls see below my responses on the two issues that you have raised. I am cc'ing Cindy as well since she may have her own thoughts and a discussion maybe value added in terms of arriving at a common understanding.
Thanks

MoF asking OPG to make less money! This feels so backward!

I will chat with OPG to dig in to the rationale. I take your point that OPG will benefit from the loans to the trust. However, I see two weaknesses with the argument:

1) Lenders don't typically consolidate borrowers, so it takes more than interest revenues to meet this test. Not sure if you are referring to the "Power" or "profit" principle. If the former the Province lends to IO for all its needs and yet exercises power since IO is consolidated with the Province in much the same way the Trust and OPG will be consolidated. Note that OPG benefits from the interest income on the 44% relating to the equity injection even if the Trust is not consolidated.
2) Earning interest income on equity is going to take down the company's ROE (one of the key metrics that we are tracking on overall company performance). Therefore I wouldn't see this as a particularly compelling allocation of funds from a commercial perspective. This is a good point however, OPG considers the 44% it lends to the Trust as sub-debt most likely priced higher than the debt borrowed by the Trust from the markets. In the event the interest on the 44% is less than OPG's current ROE of the company, your point holds however, if the interest is higher it actually adds to OPG's ROE.

Subject: OPG Performance fees

Hi Scott

This issue has come up a couple of times and after discussing with Gadi we felt that you may be able to raise it either directly with OPG or via Energy. As the Financial Services Manager, OPG is proposing a performance fee for itself based beating a benchmark for borrowing costs the Trust incurs in presumably the 51% it seeks to borrow from the capital markets.

OPG argues that the latter of the two fundamental principles, "Power" and "Profit" allowing the Trust to be consolidated with OPG requires the implementation of a performance fee structure. The counter argument is that OPG already has access to profit, by virtue of its position as the funding entity for 44% of the debt incurred by the Trust. OPG uses the funds it receives from the Province's equity injection, for which it pays no interest, for this purpose.

Upon consolidation with the Trust, OPG's interest income will therefore increase by the amount of the interest the Trust receives on 44% of its overall debt, a relatively risk free profit source, at least over the duration of the Fair Hydro Plan. While the use of a benchmark is appropriate and contributes to an efficient borrowing program, any performance fees arising from beating the benchmark will effectively be funded by the ratepayers, by increasing the investment asset and the associated debt to be repaid by ratepayers.

Mike and I will be happy to provide any further technical assistance that you may require as you raise this issue.
Thanks

Hi Scott
Sorry for the delay in responding, after a discussion with Gadi the OFA is comfortable with the approach proposed by OPG. We also recommend that the $1M upside/downside limit on performance fees in relation to a pre-determined benchmark be enshrined in the Financing Plan to be developed by OPG. The OFA is also willing to work with OPG on the development of the benchmark.
Thanks

Subject: OPG/IESO Indemnities

Further to our conversations on the indemnities, it appears that this request will go to the MOF instead of TBS.
Energy has asked us to expedite this matter, as there is a board meeting of OPG or IESO early next week, and they want to have an approval before then so that this can be signed off on at that meeting. We still need some additional information as to the parameters of what is driving the timeline – for instance, it appears that IESO will have to act before OPG and that OPG may not need the indemnity as soon, but we are also not sure if OPG is asking for an indemnity before taking any other actions.
We are preparing some comments on the draft indemnity and note, and will forward those shortly. We will also reach out to Energy Legal to ask who their clients are, and initiate the conversation between the Energy policy staff and yourselves. Energy Legal has asked us what our timeline is, and I indicated that we would need to discuss with you before being able to give such an indication.

CONFIDENTIAL AND PRIVILEGED LEGAL ADVICE – June 6, 2017

FAA 11.3 provides that no agreement or undertaking shall be entered into in a fiscal year that would result in a charge to an appropriation for that fiscal year in excess of the amount available under that appropriation – every agreement that provides for the payment of money by the Crown is deemed to contain a provision that payment by the Crown of moneys that come due under the agreement shall be subject to an appropriation to which that payments can be charged being available in the fiscal year in which the payment becomes due or the payment having been charged to an appropriation for a previous fiscal year.

Any payment under the indemnity is subject to an appropriation being available. Does there need to be an appropriation available at the time of execution of the indemnity, if it is not expected that payments will be needed this year? Energy will need to obtain supplementary estimates if it doesn't have sufficient funds available if called upon to pay under the indemnity.

Comments/Questions:

OPG

1. Indemnity is in favour of OPG, OPG subs, and their directors, officers and employees (including if they are acting in a different capacity at request of Corporation). When might they be acting in a different capacity? What will the corporation ask? Will the "financing entity" be considered an OPG sub and benefit from this indemnity?
2. Do we know what the corporate structure of the financial entity is proposed to be, and who will be acting on behalf of the financial entity and in what capacity?
3. Has OPG given a standard indemnity to its directors and officers that would be called upon first before the indemnity from the Province?
4. What type of insurance does OPG have in place to cover possible risks both for itself and for its directors, officers and employees?
5. Overall it would be better if the business case for the request set out in more detail OPG's and its subs' expected roles in the implementation of the Fair Hydro Plan. Then it could identify which of those roles present the most risk and how the risk can be mitigated.
6. Is it expected that OPG might have to sign as promoter? What about Province? Would indemnified individuals be signing on behalf of OPG as promoter or on behalf of financial entity? What sorts of liability might OPG, its directors, officers and employees have here? Is it for misrepresentations in prospectus? Is there any other risk?
7. What is meant by the sentence "This risk arises in part because of the kind of market that OPG and IESO indirectly are to participate in and the steps that investors could take to protect their investments"? This should be elaborated.
8. What does OPG do as Financial Services Manager?
9. Need a better description of any pre-existing indemnities including OPG indemnity to directors/officers.

10. OPG's objects are amended to include new objects related to their new objects under the Fair Hydro Plan. Why is it considered that these activities might not be carried out in good faith or in the best interest of the corporation?
11. Why doesn't s. 39(2) extend to directors and officers as well? Was there a specific reason?
12. Are there any issues relating to US securities law and liabilities that the Province is being asked to indemnify that we should be considering?

Comments on actual wording of indemnity agreement, May 18, 2017

- Is it possible to limit the indemnity to specific named subs of OPG?
- Is 2nd recital "may face risk of liability due to or as a result of the Fair Hydro Plan" necessary?
- Par. 1 – how is a loss "indirectly" suffered?
- Par. 1 – covers all punitive and/or consequential damages and loss of profits and damages in respect of economic loss and/or loss of opportunity? Should OPG be covered for "loss of opportunity/economic loss? Should OPG be covered for what damages/payments it actually incurs or must pay as a result of these damages and suits?
- Explain, the capacity in which a director, officer or employee might be working?
- Par. 3(b) – "except to the extent that provision of same would cause the Protected party to lose its entitlement to claim privilege with respect to same" – how standard is this type of exclusion – not seen before.
- 7(b) – why would actions be take "on the Province's part" – just wondering whether this is necessary. Need to compare these reps to other agreements. 7(c) doesn't seem to be comprehensive as it does quality the availability of equitable remedies such as specific performance and injunction and execution not available against Crown.
- Need to think further about "due diligence" defense exception wording.

Good question, the appendix to the MOE cabinet submission includes an opinion from E&Y where this point is very forcefully made. That is why the debt from the Province option is no longer on the table.
Thanks
Ken k

Hi Ken,
Thanks for these helpful comments. I do have a question on your first comment. I haven't been as close to the accounting discussion as you have been - why would providing debt from the Province to OPG, for this purpose, affect its status as a GBE, if the loan is provided at a market rate. I haven't gone through this deck carefully yet but wanted to clarify this point.
I do recognize that ultimately OPG would want to make a commercial decision so we are looking to be educated on various structures.
Happy to chat in the lock-up tomorrow.
John

Carlos, and others
I believe the discussion with TDS will be scheduled for either Thursday of Friday and I am not available on both days so here are my comments.

- Page 3: Option#3 is not feasible since it is essentially a type of debt from the Province to OPG and may impact the latter's GBE status, which jeopardizes the entire arrangement.
- Options 2 and 4 are superior to 1 from the Province's perspective providing a greater assurance of dividends, which means less cash flow risk for the province.
- The last bullet on page 4 is a little confusing especially the phrase; "and the debt issued to OPG by the SPV/Trust". It's actually the other way around, OPG uses the cash flow from the equity injection to issue debt to the Trust.
- The cash flow from the equity injection is essentially cost free for OPG however, the Trust will generate interest income on 100% of its debt, as such when the trust is consolidated with OPG, the latter will show a net interest income. This income can be paid out as dividends to the Province and in essence defray the Province's interest payments on the debt incurred to fund the equity injection.

Thanks and as always happy to discuss.

Hi Will

I am little confused here, yes its unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.

As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation.

Thanks and I am cc'ing Siva and John the former is responsible for the OFA and the latter for the implementation of the Fair Hydro plan.

Subject: Policy question re OFHP Credit Facility Agreement
Importance: High

Hi Bruno and John,

I have some additional information pertaining to the structure of the OFA loan to IESO re: OFHP. While this information adds context, it doesn't address the policy question of whether an unsecured loan is appropriate (based on the extent of the insolvency risk) for this regulatory asset.

The current draft FHP Credit Facility Agreement is consistent with the OFA Lending Policy (last revised and approved April 16, 2010 – *status TBC*), which provides that except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, the OFA will generally lend on an unsecured basis (apart from the intercept provision) in respect of loans made by the OFA to public bodies (IESO is a public body for the purposes of CIPA). As such, the structure of this loan is consistent with the Policy (subject to my note below re: intercept provision). In my review of the supporting policy documentation, including the LRC minute, I didn't see any reference to a secured lending structure and I don't believe that there is any direction requiring this to be a secured loan. That being said, I query whether OFA CEFD staff are comfortable with this approach (see below).

In terms of the intercept provisions, which are required pursuant to s. 23 of CIPA, I have asked Toby from MOF Legal if they are aware of any agreement between the Ministry of Energy and the IESO agreeing that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the IESO amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under this loan agreement (as required by CIPA)? Are you aware of any such agreement? However, even if there were such an agreement in place, it is unclear to whether adding intercept provisions to the credit facility agreement, will provide further comfort. I plan to discuss this matter further with MOF Legal.

Based on the foregoing (and pending any additional information that Toby may obtain from his discussions with the Ministry of Energy), I defer the following question to CEFD staff:

Are you comfortable with the current structure of this loan as an unsecured loan (and the

risk that this may entail)? This decision ultimately needs to be made by business/policy people.

- **If yes,** the next draft of the agreement will be available in the next day or so to send to IESO for review. I will work with MOF Legal to draft/leverage intercept provisions to mitigate this risk (as far as possible, based on the foregoing). We are also working on the permitted liens, *pari passu* and negative pledge provisions of the draft agreement, as previously discussed.

- **If no,** additional Ministerial/TB direction, and a new legal agreement (likely with the assistance of external legal counsel) will be required. This will take additional time.

Please do not hesitate to contact me if you would like to discuss further.

Thank you,

Lisa

Subject: RE: Policy question re OFHP Credit Facility Agreement

Hi Will

I am little confused here, yes its unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.

As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation.

Thanks and I am cc'ing Siva and John the former is responsible for the OFA and the latter for the implementation of the Fair Hydro plan.

Ken k

Good morning Ken,

I hope you enjoyed the long weekend.

Do you agree with the current structure of the credit facility as unsecured?

Or would you like some additional back ground regarding this matter?

Thanks,
Will

Subject: Policy question re OFHP Credit Facility Agreement
Importance: High

Hi Bruno and John,
I have some additional information pertaining to the structure of the OFA loan to IESO re: OFHP. While this information adds context, it doesn't address the policy question of whether an unsecured loan is appropriate (based on the extent of the insolvency risk) for this regulatory asset.
The current draft FHP Credit Facility Agreement is consistent with the OFA Lending Policy (last revised and approved April 16, 2010 – *status TBC*), which provides that except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, the OFA will generally lend on an unsecured basis (apart from the intercept provision) in respect of loans made by the OFA to public bodies (IESO is a public body for the purposes of CIPA). As such, the structure of this loan is consistent with the Policy (subject to my note below re: intercept provision). In my review of the supporting policy documentation, including the LRC minute, I didn't see any reference to a secured lending structure and I don't believe that there is any direction requiring this to be a secured loan. That being said, I query whether OFA CEFD staff are comfortable with this approach (see below).
In terms of the intercept provisions, which are required pursuant to s. 23 of CIPA, I have asked Toby

from MOF Legal if they are aware of any agreement between the Ministry of Energy and the IESO agreeing that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the IESO amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under this loan agreement (as required by CIPA)? Are you aware of any such agreement? However, even if there were such an agreement in place, it is unclear to whether adding intercept provisions to the credit facility agreement, will provide further comfort. I plan to discuss this matter further with MOF Legal.

Based on the foregoing (and pending any additional information that Toby may obtain from his discussions with the Ministry of Energy), I defer the following question to CEFD staff:

Are you comfortable with the current structure of this loan as an unsecured loan (and the risk that this may entail)? This decision ultimately needs to be made by business/policy people.

- **If yes,** the next draft of the agreement will be available in the next day or so to send to IESO for review. I will work with MOF Legal to draft/leverage intercept provisions to mitigate this risk (as far as possible, based on the foregoing). We are also working on the permitted liens, *pari passu* and negative pledge provisions of the draft agreement, as previously discussed.
- **If no,** additional Ministerial/TB direction, and a new legal agreement (likely with the assistance of external legal counsel) will be required. This will take additional time.

Please do not hesitate to contact me if you would like to discuss further.

Thank you,

Lisa

Hi Lisa,
I was having a discussion with Ken R. on another matter (the equity injection discussion) and had a discussion with him about this issue. Here are some observations:
We know that the IESO is a public body for the purpose of the CIPA. And I understand that in the absence of this designation, the OFA would not be able to make loans to the IESO.
The intercept provision, I understand, is common in OFA loan arrangements or required under the OFA Lending Policy. Given that the intercept provision allows the OFA to access payments from the Province to OFA borrowers in the event of a default and that the IESO receives no such funding from the Province (the IESO is ratepayer-funded), would there still be any relevance in having or requiring the intercept provision? If we agree that there is no relevance, then would you reasonably arrive at the conclusion that seeking the direction from the Minister is not required?
The Minister, I understand, is away until September.
Happy to chat or hear comments.
Thanks,
John

Subject: RE: Policy questions re OFHP Credit Facility Agreement
Hello all. Just to clarify, the OFA Lending Policy provides that the OFA will generally lend on an unsecured basis in respect of loans made by the OFA to public bodies, unless otherwise directed. As such, no further direction/waiver is required to provide an unsecured loan to the IESO. However, the Policy also requires that, pursuant to s. 23 of CIPA, the intercept provisions (and accompanying MOU, etc.) must be included in unsecured OFA loan agreements except where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, in this case, as it has now been determined that the intercept provisions are not required, I will work with MOF Legal to obtain the required Ministerial direction waiving the Policy requirement to include these provisions.

Hi Ken,

Thanks for clarifying the approach on this matter.

Based on this, we will not be seeking a security interest in the Regulatory Asset and will be seeking a directive ASAP for an exemption from inclusion of the intercept provision in the $2B FHP facility. We will inform IESO that current $975 million facility will be used for funding draws until such time as we are able execute the new $2B FHP facility.

Thanks,

Sarah

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Sarah

Thanks for clear detailed email with good questions, however, instead of responding to each of the questions, I am going back to my earlier premise that none of the loans currently on the OFA loan book have any kind of security attached to them. A good example is the current line of credit extended to the IESO for $975 million. Given this I am very reluctant to impose a security requirement the proposed $2 billion facility to the IESO from the Province.

I understand that the security requirement which is part of the OFA lending policy can waived with ministerial approval, I suggest that it be obtained as soon as possible. If there are delays in obtaining this approval, especially since the minister will be on vacation from the end of this week onwards, I also suggest, if possible the previous facility of $975 million continue until the new facility is in place. This will allow IESO to fund any regulatory assets created in the intervening period.

I have discussed my proposed approach with Gadi, who is supportive.
Thanks
Ken k

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Ken,

Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.

Security Interest - Background

In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

The steps of the transaction would be:

1 – The IESO makes payments to electricity producers at the contracted rate, but charges consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;

2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;

3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the asset free and clear of any security interest;

4 – The IESO repays the OFA for the loan.

Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

> *"Dear Anthony,*
>
> *My apologies for the delay in providing the next turn of the FHP Credit Facility Agreement. We became aware of a potential requirement under the OFA's lending policy which needs to be considered internally for inclusion in the agreement, for which we require additional information. Would you kindly provide answers to the following questions?*
>
> - *Does IESO have other financial obligations (such as but not limited to swap agreements, other financial obligations etc.) that could become due and adversely impact IESO's ability to pay its debts when they become due?*
> - *Does IESO have any other financial obligations or security interests that could attach to the Regulator Asset/Special Purpose Vehicle?*
> - *[Include additional questions]*
>
> *I also want to make you aware that due to the internal assessment that must be made in respect of the OFA's lending policy, we will likely not be able to execute the new FHP facility prior to IESO's next funding request (for which IESO will be providing notice on August 17th, for funding on August 21st). Accordingly, the August FHP draw will be made under the existing $975 million credit facility. At the time we execute the new $2B facility, we would be able to transfer (by incorporating into the agreements the required provisions or by another agreed mechanism) any amount of loans exceeding $475 million (being the reduced facility limit under the draft amending agreement) under the existing facility to the new facility.*
>
> *Best regards,"*

In reference to the last sentence above in the draft e-mail to IESO, the intended financing structure for IESO credit facilities is to (i) execute a new $2B FHP facility and (ii) simultaneously reduce the existing $975 million facility by $500 million to $475 million. This would create a total aggregated limit of $2.475 billion. Ideally these 2 agreements would have been executed simultaneously prior to the August draw from IESO (since IESO's August draw will likely bring the balance of the existing credit facility to approx. $500M, exceeding the intended revised limit of $475 million).

Question for Ken: When we do execute both agreements, are there any obstacles from an operational perspective (settlement, cash, accounting, risk) with transferring any 'excess loan amount' from the existing credit facility to the new FHP credit facility? We would be looking to re-allocate certain loans from the existing facility to the new facility, without any cash flow impact. From a legal perspective we expect this should be fine, as we can work out the legal particulars with IESO.

General Note re: Timing Impact of Intercept Provision

Regardless of whether the OFA decides to include or exclude the intercept provision, the execution

of the FHP facility will take longer than expected, likely taking an additional number of weeks.
If the decision is made not to include the intercept provision, a directive will need to be obtained from the Minister to this effect, potentially taking a few weeks.
If it is a determined an intercept provision is required, then this will likely even take longer than getting a directive from the Minister. In this case, the OFA would need to go back to the Ministry of Energy to effect the following: (I)Ministry of Energy will need to agree with IESO on acceptance of the inclusion of intercept provision in the FHP credit facility agreement and (ii) the OFA and Ministry of Energy will require an MOU whereby the parties agree on the inclusion of a the intercept provision in the FHP credit facility agreement.
Thanks
Sarah

Totally agree with Bruno, the province should not be taking a security intent in the reg asset, that would make the sale to the SPV or trust rather difficult.
It would also create issues in terms of the SPV's ability to obtain an appropriate credit rating as well as issue debt in the capital markets.
Thanks

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,

In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.

Thank you,
Sarah

Subject: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hi Sarah H. and Will,

Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be minimal.

Before proceeding, we would like to ensure that the nature of the loan, the impact of intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or

other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.
    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.
- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Hello all. Just to clarify, the OFA Lending Policy provides that the OFA will generally lend on an unsecured basis in respect of loans made by the OFA to public bodies, unless otherwise directed. As such, no further direction/waiver is required to provide an unsecured loan to the IESO. However, the Policy also requires that, pursuant to s. 23 of CIPA, the intercept provisions (and accompanying MOU, etc.) must be included in unsecured OFA loan agreements except where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, in this case, as it has now been determined that the intercept provisions are not required, I will work with MOF Legal to obtain the required Ministerial direction waiving the Policy requirement to include these provisions.

Subject: RE: Policy questions re OFHP Credit Facility Agreement
Hi Ken,
Thanks for clarifying the approach on this matter.
Based on this, we will not be seeking a security interest in the Regulatory Asset and will be seeking a directive ASAP for an exemption from inclusion of the intercept provision in the $2B FHP facility. We will inform IESO that current $975 million facility will be used for funding draws until such time as we are able execute the new $2B FHP facility.
Thanks,

Sarah

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Sarah

Thanks for clear detailed email with good questions, however, instead of responding to each of the questions, I am going back to my earlier premise that none of the loans currently on the OFA loan book have any kind of security attached to them. A good example is the current line of credit extended to the IESO for $975 million. Given this I am very reluctant to impose a security requirement the proposed $2 billion facility to the IESO from the Province.

I understand that the security requirement which is part of the OFA lending policy can waived with ministerial approval, I suggest that it be obtained as soon as possible. If there are delays in obtaining this approval, especially since the minister will be on vacation from the end of this week onwards, I also suggest, if possible the previous facility of $975 million continue until the new facility is in place. This will allow IESO to fund any regulatory assets created in the intervening period.

I have discussed my proposed approach with Gadi, who is supportive.

Thanks

Ken k

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Ken,

Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.

Security Interest - Background

In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

The steps of the transaction would be:

1 – The IESO makes payments to electricity producers at the contracted rate, but charges

consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;
2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;
3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the asset free and clear of any security interest;
4 – The IESO repays the OFA for the loan.
Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

"Dear Anthony,

My apologies for the delay in providing the next turn of the FHP Credit Facility Agreement. We became aware of a potential requirement under the OFA's lending policy which needs to be considered internally for inclusion in the agreement, for which we require additional information. Would you kindly provide answers to the following questions?

- *Does IESO have other financial obligations (such as but not limited to swap agreements, other financial obligations etc.) that could become due and adversely impact IESO's ability to pay its debts when they become due?*
- *Does IESO have any other financial obligations or security interests that could attach to the Regulator Asset/Special Purpose Vehicle?*
- *[Include additional questions]*

I also want to make you aware that due to the internal assessment that must be made in respect of the OFA's lending policy, we will likely not be able to execute the new FHP facility

prior to IESO's next funding request (for which IESO will be providing notice on August 17th, for funding on August 21st). Accordingly, the August FHP draw will be made under the existing $975 million credit facility. At the time we execute the new $2B facility, we would be able to transfer (by incorporating into the agreements the required provisions or by another agreed mechanism) any amount of loans exceeding $475 million (being the reduced facility limit under the draft amending agreement) under the existing facility to the new facility.

Best regards,"

In reference to the last sentence above in the draft e-mail to IESO, the intended financing structure for IESO credit facilities is to (i) execute a new $2B FHP facility and (ii) simultaneously reduce the existing $975 million facility by $500 million to $475 million. This would create a total aggregated limit of $2.475 billion. Ideally these 2 agreements would have been executed simultaneously prior to the August draw from IESO (since IESO's August draw will likely bring the balance of the existing credit facility to approx. $500M, exceeding the intended revised limit of $475 million).

Question for Ken: When we do execute both agreements, are there any obstacles from an operational perspective (settlement, cash, accounting, risk) with transferring any 'excess loan amount' from the existing credit facility to the new FHP credit facility? We would be looking to re-allocate certain loans from the existing facility to the new facility, without any cash flow impact. From a legal perspective we expect this should be fine, as we can work out the legal particulars with IESO.

General Note re: Timing Impact of Intercept Provision

Regardless of whether the OFA decides to include or exclude the intercept provision, the execution of the FHP facility will take longer than expected, likely taking an additional number of weeks.

If the decision is made not to include the intercept provision, a directive will need to be obtained from the Minister to this effect, potentially taking a few weeks.

If it is a determined an intercept provision is required, then this will likely even take longer than getting a directive from the Minister. In this case, the OFA would need to go back to the Ministry of Energy to effect the following: (I)Ministry of Energy will need to agree with IESO on acceptance of the inclusion of intercept provision in the FHP credit facility agreement and (ii) the OFA and Ministry of Energy will require an MOU whereby the parties agree on the inclusion of a the intercept provision in the FHP credit facility agreement.

Thanks

Sarah

Subject: Re: Policy questions re OFHP Credit Facility Agreement

Totally agree with Bruno, the province should not be taking a security intent in the reg asset, that would make the sale to the SPV or trust rather difficult.

It would also create issues in terms of the SPV's ability to obtain an appropriate credit rating as well as issue debt in the capital markets.

Thanks

Ken k

> Hi Sarah
> Apologies for delay. I perceive differing levels of comfort with the issue of security so I'm OK with discussing the questions raised this afternoon. I am concerned whether we have people on the call that can answer all the questions.
> But I have a basic question with respect to the issue of the Province taking a security interest in the asset and differences with this loan from others. Under the OFHP, the sale of the asset ultimately allows for payments to electricity generators. If the Province has a security interest in the asset, can we envisage a potential situation wherein the IESO would be repaying the OFA loan rather than paying generators, which would be problematic for OFHP?
> I had discussed with Ron. In regard to Toby's last question, Ron was wondering if there might be a provision on use of proceeds from IESO's sale of the regulatory asset.
> Ron had also asked whether OPCD had opined on any accounting issues, and whether OIC or Minister's directive gave any particular direction on this issue. In regard to the latter, I have checked. Minister's directive and OIC were fairly high level noting specific terms and conditions to be set out in the Agreement.

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,

In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.

Thank you,

Sarah

Subject: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hi Sarah H. and Will,

Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be minimal.

Before proceeding, we would like to ensure that the nature of the loan, the impact of

intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.
Lisa

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.
    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.

- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Hi Ken,
Thanks for clarifying the approach on this matter.
Based on this, we will not be seeking a security interest in the Regulatory Asset and will be seeking a directive ASAP for an exemption from inclusion of the intercept provision in the $2B FHP facility. We will inform IESO that current $975 million facility will be used for funding draws until such time as we are able execute the new $2B FHP facility.
Thanks,
Sarah

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Ken,

Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.

Security Interest - Background

In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

The steps of the transaction would be:

1 – The IESO makes payments to electricity producers at the contracted rate, but charges consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;

2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;

3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the asset free and clear of any security interest;

4 – The IESO repays the OFA for the loan.

Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

> *"Dear Anthony,*
>
> *My apologies for the delay in providing the next turn of the FHP Credit Facility Agreement. We became aware of a potential requirement under the OFA's lending policy which needs to be considered internally for inclusion in the agreement, for which we require additional information. Would you kindly provide answers to the following questions?*
>
> - *Does IESO have other financial obligations (such as but not limited to swap agreements, other financial obligations etc.) that could become due and adversely impact IESO's ability to pay its debts when they become due?*
> - *Does IESO have any other financial obligations or security interests that could attach to the Regulator Asset/Special Purpose Vehicle?*
> - *[Include additional questions]*
>
> *I also want to make you aware that due to the internal assessment that must be made in respect of the OFA's lending policy, we will likely not be able to execute the new FHP facility prior to IESO's next funding request (for which IESO will be providing notice on August 17th, for funding on August 21st). Accordingly, the August FHP draw will be made under the existing $975 million credit facility. At the time we execute the new $2B facility, we would be able to transfer (by incorporating into the agreements the required provisions or by another agreed mechanism) any amount of loans exceeding $475 million (being the reduced facility limit under the draft amending agreement) under the existing facility to the new facility.*
>
> *Best regards,"*

In reference to the last sentence above in the draft e-mail to IESO, the intended financing structure for IESO credit facilities is to (i) execute a new $2B FHP facility and (ii) simultaneously reduce the existing $975 million facility by $500 million to $475 million. This would create a total aggregated limit of $2.475 billion. Ideally these 2 agreements would have been executed simultaneously prior to the August draw from IESO (since IESO's August draw will likely bring the balance of the existing credit facility to approx. $500M, exceeding the intended revised limit of $475 million).

Question for Ken: When we do execute both agreements, are there any obstacles from an operational perspective (settlement, cash, accounting, risk) with transferring any 'excess loan amount' from the existing credit facility to the new FHP credit facility? We would be looking to re-allocate certain loans from the existing facility to the new facility, without any cash flow impact. From a legal perspective we expect this should be fine, as we can work out the legal particulars with IESO.

General Note re: Timing Impact of Intercept Provision

Regardless of whether the OFA decides to include or exclude the intercept provision, the execution of the FHP facility will take longer than expected, likely taking an additional number of weeks.

If the decision is made not to include the intercept provision, a directive will need to be obtained from the Minister to this effect, potentially taking a few weeks.

If it is a determined an intercept provision is required, then this will likely even take longer than getting a directive from the Minister. In this case, the OFA would need to go back to the Ministry of Energy to effect the following: (I)Ministry of Energy will need to agree with IESO on acceptance of the inclusion of intercept provision in the FHP credit facility agreement and (ii) the OFA and Ministry of Energy will require an MOU whereby the parties agree on the inclusion of a the intercept provision in the FHP credit facility agreement.
Thanks
Sarah

Thank you Sarah. I should add that under the OFA Lending Policy, the intercept provision (and accompanying MOU, etc.) must be included in OFA loan agreements *except* where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, if it is determined that the intercept provisions are not required/relevant in this case, Ministerial direction will be required. We can discuss further this afternoon.

Lisa

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,

In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.

Thank you,

Sarah

Subject: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hi Sarah H. and Will,

Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be minimal.

Before proceeding, we would like to ensure that the nature of the loan, the impact of intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place

such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.
    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.
- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Hi Ken,
Thanks for clarifying the approach on this matter.
Based on this, we will not be seeking a security interest in the Regulatory Asset and will be seeking a directive ASAP for an exemption from inclusion of the intercept provision in the $2B FHP facility. We will inform IESO that current $975 million facility will be used for funding draws until such time as we are able execute the new $2B FHP facility.
Thanks,
Sarah

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Sarah
Thanks for clear detailed email with good questions, however, instead of responding to each of the questions, I am going back to my earlier premise that none of the loans currently on the OFA loan book have any kind of security attached to them. A good example is the current line of credit extended to the IESO for $975 million. Given this I am very reluctant to impose a security requirement the proposed $2 billion facility to the IESO from the Province.
I understand that the security requirement which is part of the OFA lending policy can waived with ministerial approval, I suggest that it be obtained as soon as possible. If there are delays in obtaining this approval, especially since the minister will be on vacation from the end of this week onwards, I also suggest, if possible the previous facility of $975 million continue until the new facility is in place. This will allow IESO to fund any regulatory assets created in the intervening period.
I have discussed my proposed approach with Gadi, who is supportive.
Thanks
Ken k

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Ken,
Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA

needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.

Security Interest - Background

In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

The steps of the transaction would be:

1 – The IESO makes payments to electricity producers at the contracted rate, but charges consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;

2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;

3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the asset free and clear of any security interest;

4 – The IESO repays the OFA for the loan.

Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

"Dear Anthony,

My apologies for the delay in providing the next turn of the FHP Credit Facility Agreement. We became aware of a potential requirement under the OFA's lending policy which needs to

be considered internally for inclusion in the agreement, for which we require additional information. Would you kindly provide answers to the following questions?

- *Does IESO have other financial obligations (such as but not limited to swap agreements, other financial obligations etc.) that could become due and adversely impact IESO's ability to pay its debts when they become due?*
- *Does IESO have any other financial obligations or security interests that could attach to the Regulator Asset/Special Purpose Vehicle?*
- *[Include additional questions]*

I also want to make you aware that due to the internal assessment that must be made in respect of the OFA's lending policy, we will likely not be able to execute the new FHP facility prior to IESO's next funding request (for which IESO will be providing notice on August 17th, for funding on August 21st). Accordingly, the August FHP draw will be made under the existing $975 million credit facility. At the time we execute the new $2B facility, we would be able to transfer (by incorporating into the agreements the required provisions or by another agreed mechanism) any amount of loans exceeding $475 million (being the reduced facility limit under the draft amending agreement) under the existing facility to the new facility.

Best regards,"

In reference to the last sentence above in the draft e-mail to IESO, the intended financing structure for IESO credit facilities is to (i) execute a new $2B FHP facility and (ii) simultaneously reduce the existing $975 million facility by $500 million to $475 million. This would create a total aggregated limit of $2.475 billion. Ideally these 2 agreements would have been executed simultaneously prior to the August draw from IESO (since IESO's August draw will likely bring the balance of the existing credit facility to approx. $500M, exceeding the intended revised limit of $475 million).

Question for Ken: When we do execute both agreements, are there any obstacles from an operational perspective (settlement, cash, accounting, risk) with transferring any 'excess loan amount' from the existing credit facility to the new FHP credit facility? We would be looking to re-allocate certain loans from the existing facility to the new facility, without any cash flow impact. From a legal perspective we expect this should be fine, as we can work out the legal particulars with IESO.

<u>General Note re: Timing Impact of Intercept Provision</u>

Regardless of whether the OFA decides to include or exclude the intercept provision, the execution of the FHP facility will take longer than expected, likely taking an additional number of weeks.

If the decision is made <u>not</u> to include the intercept provision, a directive will need to be obtained from the Minister to this effect, potentially taking a few weeks.

If it is a determined an intercept provision <u>is required</u>, then this will likely even take longer than getting a directive from the Minister. In this case, the OFA would need to go back to the Ministry of Energy to effect the following: (I)Ministry of Energy will need to agree with IESO on acceptance of the inclusion of intercept provision in the FHP credit facility agreement and (ii) the OFA and Ministry of Energy will require an MOU whereby the parties agree on the inclusion of a the intercept provision in the FHP credit facility agreement.

Thanks

Sarah

Totally agree with Bruno, the province should not be taking a security intent in the reg asset, that would make the sale to the SPV or trust rather difficult.
It would also create issues in terms of the SPV's ability to obtain an appropriate credit rating as well as issue debt in the capital markets.
Thanks
Ken k

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,
In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.
Thank you,
Sarah

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.

    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.
- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Subject: RE: Policy questions re OFHP Credit Facility Agreement
Hi Ken,
Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.
Security Interest - Background
In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

The steps of the transaction would be:
1 – The IESO makes payments to electricity producers at the contracted rate, but charges consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;
2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;
3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the

asset free and clear of any security interest;

4 – The IESO repays the OFA for the loan.

Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

"Dear Anthony,

My apologies for the delay in providing the next turn of the FHP Credit Facility Agreement. We became aware of a potential requirement under the OFA's lending policy which needs to be considered internally for inclusion in the agreement, for which we require additional information. Would you kindly provide answers to the following questions?

- *Does IESO have other financial obligations (such as but not limited to swap agreements, other financial obligations etc.) that could become due and adversely impact IESO's ability to pay its debts when they become due?*
- *Does IESO have any other financial obligations or security interests that could attach to the Regulator Asset/Special Purpose Vehicle?*
- *[Include additional questions]*

I also want to make you aware that due to the internal assessment that must be made in respect of the OFA's lending policy, we will likely not be able to execute the new FHP facility prior to IESO's next funding request (for which IESO will be providing notice on August 17th, for funding on August 21st). Accordingly, the August FHP draw will be made under the existing $975 million credit facility. At the time we execute the new $2B facility, we would be able to transfer (by incorporating into the agreements the required provisions or by another agreed mechanism) any amount of loans exceeding $475 million (being the reduced facility limit under the draft amending agreement) under the existing facility to the new facility.

Best regards,"

In reference to the last sentence above in the draft e-mail to IESO, the intended financing structure for IESO credit facilities is to (i) execute a new $2B FHP facility and (ii) simultaneously reduce the existing $975 million facility by $500 million to $475 million. This would create a total aggregated limit of $2.475 billion. Ideally these 2 agreements would have been executed simultaneously prior to the August draw from IESO (since IESO's August draw will likely bring the balance of the existing credit facility to approx. $500M, exceeding the intended revised limit of $475 million).

Question for Ken: When we do execute both agreements, are there any obstacles from an operational perspective (settlement, cash, accounting, risk) with transferring any 'excess loan amount' from the existing credit facility to the new FHP credit facility? We would be looking to re-allocate certain loans from the existing facility to the new facility, without any cash flow impact. From a legal perspective we expect this should be fine, as we can work out the legal particulars with IESO.

General Note re: Timing Impact of Intercept Provision

Regardless of whether the OFA decides to include or exclude the intercept provision, the execution of the FHP facility will take longer than expected, likely taking an additional number of weeks.

If the decision is made not to include the intercept provision, a directive will need to be obtained from the Minister to this effect, potentially taking a few weeks.

If it is a determined an intercept provision is required, then this will likely even take longer than getting a directive from the Minister. In this case, the OFA would need to go back to the Ministry of Energy to effect the following: (I)Ministry of Energy will need to agree with IESO on acceptance of the inclusion of intercept provision in the FHP credit facility agreement and (ii) the OFA and Ministry of Energy will require an MOU whereby the parties agree on the inclusion of a the intercept provision in the FHP credit facility agreement.

Thanks

Sarah

Subject: Re: Policy questions re OFHP Credit Facility Agreement

Totally agree with Bruno, the province should not be taking a security intent in the reg asset, that would make the sale to the SPV or trust rather difficult.

It would also create issues in terms of the SPV's ability to obtain an appropriate credit rating as well as issue debt in the capital markets.

Thanks

Hi Sarah
Apologies for delay. I perceive differing levels of comfort with the issue of security so I'm OK with discussing the questions raised this afternoon. I am concerned whether we have people on the call that can answer all the questions.
But I have a basic question with respect to the issue of the Province taking a security interest in the asset and differences with this loan from others. Under the OFHP, the sale of the asset ultimately allows for payments to electricity generators. If the Province has a security interest in the asset, can we envisage a potential situation wherein the IESO would be repaying the OFA loan rather than paying generators, which would be problematic for OFHP?
I had discussed with Ron. In regard to Toby's last question, Ron was wondering if there might be a provision on use of proceeds from IESO's sale of the regulatory asset.
Ron had also asked whether OPCD had opined on any accounting issues, and whether OIC or Minister's directive gave any particular direction on this issue. In regard to the latter, I have checked. Minister's directive and OIC were fairly high level noting specific terms and conditions to be set out in the Agreement.

Thank you Sarah. I should add that under the OFA Lending Policy, the intercept provision (and accompanying MOU, etc.) must be included in OFA loan agreements *except* where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, if it is determined that the intercept provisions are not required/relevant in this case, Ministerial direction will be required. We can discuss further this afternoon.

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High
Hello Bruno and John,
In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security

interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.

Thank you,

Sarah

Importance: High

Hi Sarah H. and Will,

Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be minimal.

Before proceeding, we would like to ensure that the nature of the loan, the impact of intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.
    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.
- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Attachments:	OFA Lending Policy Final (April 16 2010).pdf

Hi Ken,

Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.

Security Interest - Background

In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

The steps of the transaction would be:

1 – The IESO makes payments to electricity producers at the contracted rate, but charges consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;

2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;

3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the asset free and clear of any security interest;

4 – The IESO repays the OFA for the loan.

Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to

make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

> *"Dear Anthony,*

OFA LENDING POLICY

Approved:	**April 11, 2008**
Revised and approved:	**April 16, 2010**

SCOPE

The Ontario Financing Authority (OFA) is a crown corporation that has the statutory authority to lend to public bodies under the *Capital Investment Plan Act (CIPA).*

Public bodies are defined in CIPA as Crown agencies, hospitals and any other facilities receiving capital funding from the Minister of Health and Long-Term Care, municipalities, universities that receive operating funds from the Province, colleges of applied arts and technology, school boards, and any other entity named or described as a public body in the regulations which as of this date include the Deposit Insurance Corporation of Ontario, the Ontario Pension Benefits Guarantee Fund and the Law Society of Upper Canada and the Ontario Power Authority.

This policy addresses lending activities to public bodies undertaken where the OFA is acting as an intermediary on behalf of the Province.

AMENDMENTS

This policy replaces the OFA lending policy that was approved by the OFA Board of Directors on April 11, 2008.

Any amendments or exceptions to this policy must be approved by the OFA Board of Directors.

POLICY FRAMEWORK

On June 21, 2007, the government approved a new framework for financing public bodies that are consolidated on the Province's financial statements. Consolidated public bodies include school boards, colleges, hospitals and corporations, boards and commissions.

Generally, the policy framework mandates the OFA to provide long-term financing for capital purposes to school boards, colleges and hospitals, as well as to Provincial corporations, boards and commissions who borrow as agents of the Crown, where the financing is recommended by the responsible ministry.

The policy framework also mandates the OFA to charge a cost recovery rate for all loans to public bodies, and a proxy commercial rate where the project is deemed to be commercial in nature. Determinations as to the nature of the project are to be made by the OFA in consultation with the recommending ministry.

TYPE OF FINANCING

The policy framework mandates the OFA to provide long-term financing to public bodies, which will be undertaken on a fixed rate or variable rate basis. Except where the Minister of Finance, Treasury Board or Cabinet determines there is a significant benefit to the public body or to the Province, the OFA will not provide:

1. Short-term financing for operating or working capital purposes.

2. Construction financing where capital projects require significant project monitoring expertise to keep construction running on time and on budget.

3. Financing to consolidated corporations, boards and commissions that are not Crown agents.

LOAN APPROVALS

1. The OFA will only advance a loan to a public body where the Minister of Finance, Treasury Board or Cabinet expressly directs or approves the OFA to advance a loan to a public body.

2. Where the Minister of Finance, Treasury Board or Cabinet expressly directs or approves the OFA to advance a loan to a public body, no further Board approval is required.

3. The OFA Board shall annually review a borrowing and on-lending plan (the OFA's Annual Borrowing and On-Lending Plan), which shall include the OFA's annual borrowing requirements from the Province and projected on-lending activities to Ontario public bodies for the year. As part of its review, the OFA Board shall approve the OFA's cost recovery spread and proxy commercial interest rate spreads related to the OFA's annual lending activities to public bodies.

4. The OFA Board will be advised at its next regularly scheduled meeting of any deviations from the OFA's Annual Borrowing and On-Lending Plan.

LENDING DIRECTIVE

The OFA will prepare an annual lending directive for the Minister of Finance's consideration based on the proposed loans in the OFA's Annual Borrowing and On-Lending Plan which require consent under Section 28 of the *Financial Administration Act* ("FAA") or which are to be made to School Boards. The lending directive will expressly direct or approve the OFA to advance these loans to public bodies for the fiscal year. The lending directive will include the maximum authorized amount of the loans to individual borrowers or the maximum amount of all the loans to a group of borrowers, such as School Boards or Community Colleges, and where possible, the borrower's name and the specific purpose(s) for which the loans are required, with the other terms and

conditions of the loans being delegated to the CEO of the OFA or the Assistant Deputy Minister, Corporate and Electricity Finance Division, OFA, or a person designated by either of them for approval.

The OFA will prepare specific lending directives for consideration by Minister of Finance for proposed loans in the the OFA's Annual Borrowing and On-Lending Plan which do not require consent under Section 28 of the FAA, other than loans to School Boards, at the time that the requests for the OFA to enter into such loans are being processed.

CONDITIONS PRECEDENT

Except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, and prior to the OFA making any loan to a public body, the OFA will:

1. Receive and review the public body's loan request as submitted and recommended by the responsible ministry.

2. Determine the public body's ability to repay the loan by relying on information submitted by the responsible ministry and public body, which may include information on the capital project, business case, cash flow projections and audited financial statements, and such other information as may be required.

3. Where required, ensure that the responsible ministry or public body has obtained prior written approval for the proposed loan pursuant to Section 28 of the FAA. The CEO of the OFA will not act as the delegate of the Minister of Finance to provide approval under Section 28 of the FAA for a loan when the OFA is the lender.

4. Evaluate the underlying risk of the project in order to determine if the project is commercial in nature, and if so establish an appropriate proxy commercial basis points spread to charge the public body as approved by the OFA Board (see "Proxy Commercial Rate").

5. Enter into a loan agreement with the public body containing terms and conditions consistent with the lending directive and satisfactory to the CEO of the OFA or the Assistant Deputy Minister, Corporate and Electricity Finance Division, OFA, or a person designated by either of them , including appropriate (i) positive and negative covenants of the public body, (ii) representations and warranties by the public body, (iii) conditions precedent, (iv) remedies upon default provisions, (v) reporting provisions, (vi) event of default provisions, and (vii) intercept provisions.

6. Ensure that it has an appropriate intercept in place for the loan (see "Intercept").

SECURITY

Except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, the OFA will generally lend on an unsecured basis (apart from the intercept provision, as provided below) in respect of loans made by the OFA to public bodies.

INTERCEPT

Except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet:

1. Pursuant to section 23 of the *Capital investment Plan Act* and prior to any loan agreement entered into between the OFA and a public body, such public body and its responsible ministry are to agree that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts that the public body fails to pay to the OFA on account of indebtedness under its loan agreement with the OFA. In addition, the public body is to agree that any notice from the OFA to the Minister of Finance in relation to its failure to pay under its loan agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.

2. Prior to recommending to the Minister of Finance that the intercept be exercised, the OFA will raise the issue with the responsible ministry and seek the ministry's support in getting the public body to pay the amounts owing within a reasonable cure period.

3. Should the public body not cure the default within a reasonable period of time, the OFA will give written notice to the Minister of Finance, with a copy to the responsible ministry, of a public body's failure to pay under its loan agreement and requesting the deduction of amounts equal to the amounts that a public body has failed to pay under its loan agreement.

4. Prior to any loan agreement entered into between the OFA and a public body, the responsible ministry is to covenant and agree that, upon receipt of notice from the OFA that a public body has failed to pay in accordance with the provisions of its loan agreement, the responsible ministry will provide all information requested by the OFA respecting amounts appropriated by the Legislature for payment to the public body including the intended purpose and expected timing of such payments to be made by the responsible ministry. Upon request, the responsible ministry agrees to provide similar information to the Minister of Finance.

5. Prior to any loan agreement entered into between the OFA and a public body, the responsible ministry is to acknowledge and agree that, upon receipt of a direction from the Minister of Finance, that an amount is to be deducted from

money appropriated by the Legislature for payment to the public body, the responsible ministry will take all necessary action required by it in order to effect such deduction in accordance with the Minister of Finance's direction and pay the amount to the OFA at the time specified.

COST RECOVERY

1. The OFA will recover its lending costs by charging public bodies a rate equal to the **Province's total cost of funds**, which will include the Province's direct borrowing costs (including commissions) as well as a spread to cover all costs related to the upfront and ongoing loan monitoring and administration of the OFA's lending activities.

2. The OFA will use a **basis-points-spread (bps) based cost recovery methodology** to recover the costs of its direct borrowing and on-lending activities. The costs relate to both the upfront and ongoing loan monitoring and administration and are expressed in terms of basis points per annum and will be recovered over the term of the loan.

3. The annual basis-point spread charged to public bodies for cost recovery shall be approved by the OFA Board and included in the OFA's Annual Borrowing and On-Lending Plan. The Capital Markets Treasury Division of the OFA, with the assistance of Internal Audit, will conduct an annual review to ensure that the cost recovery methodology is appropriate and that there are no significant under/over- recoveries that may require management's corrective action.

PROXY COMMERCIAL RATE

1. In addition to charging the Province's total cost of funds, the OFA will charge a proxy commercial basis points spread for projects that are commercial in nature in order to better reflect the costs of the underlying risk for financing of such projects. The proxy commercial basis points spread will be added to the Province's total cost of funds and recovered over the term of the loan. Loans are deemed to be commercial in nature where generally less than 50% of the operating revenues generated by the underlying project are attributable to government sources.

2. The methodology for determining proxy commercial basis points spreads (including the amount(s) of these spreads) charged to public bodies for projects deemed commercial in nature shall be approved by the OFA Board and included in the OFA's Annual Borrowing and On-Lending Plan. Proxy commercial basis points spreads will also be re-evaluated (and, if deemed necessary, reset upon approval of the OFA Board) in situations where there are significant changes to fixed income credit spreads. The OFA Corporate Finance Branch is responsible for recommending any changes to the

methodology or spread resets to the OFA Board, while the Capital Markets Division is responsible for informing the Corporate Finance Branch of any significant changes to fixed income credit spreads.

REPORTING REQUIREMENTS

1. A report outlining the status of all outstanding loans will be tabled with the OFA Board annually (the OFA's Annual Borrowing and On-Lending Plan) and at such other times as the OFA Board requests.

2. For each loan outstanding, such report will identify: the borrower, the purpose of the loan, the principal amount outstanding, and such other information as the OFA Board may request.

3. All OFA loans to public bodies will continue to be annually reported in the notes to the OFA's audited financial statements as disclosed in the OFA's Annual Report.

Hi Sarah

Apologies for delay. I perceive differing levels of comfort with the issue of security so I'm OK with discussing the questions raised this afternoon. I am concerned whether we have people on the call that can answer all the questions.

But I have a basic question with respect to the issue of the Province taking a security interest in the asset and differences with this loan from others. Under the OFHP, the sale of the asset ultimately allows for payments to electricity generators. If the Province has a security interest in the asset, can we envisage a potential situation wherein the IESO would be repaying the OFA loan rather than paying generators, which would be problematic for OFHP?

I had discussed with Ron. In regard to Toby's last question, Ron was wondering if there might be a provision on use of proceeds from IESO's sale of the regulatory asset.

Ron had also asked whether OPCD had opined on any accounting issues, and whether OIC or Minister's directive gave any particular direction on this issue. In regard to the latter, I have checked. Minister's directive and OIC were fairly high level noting specific terms and conditions to be set out in the Agreement.

Thank you Sarah. I should add that under the OFA Lending Policy, the intercept provision (and accompanying MOU, etc.) must be included in OFA loan agreements *except* where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, if it is determined that the intercept provisions are not required/relevant in this case, Ministerial direction will be required. We can discuss further this afternoon.

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,

In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.
As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.

Thank you,

Sarah

Subject: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hi Sarah H. and Will,

Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be minimal.

Before proceeding, we would like to ensure that the nature of the loan, the impact of intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could

happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.
    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.
- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Hi John,

As I've noted in my e-mail below, in order for the intercept provisions to be excluded from a loan agreement for an unsecured loan provided by the OFA to a public body, the OFA Lending Policy requires direction from the Minister, Treasury Board, or Cabinet. Toby and I have discussed the rationale that you have provided below, and we agree that it supports the business case for this direction.

Happy to discuss further.

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Lisa,

I was having a discussion with Ken R. on another matter (the equity injection discussion) and had a discussion with him about this issue. Here are some observations:

We know that the IESO is a public body for the purpose of the CIPA. And I understand that in the absence of this designation, the OFA would not be able to make loans to the IESO.

The intercept provision, I understand, is common in OFA loan arrangements or required under the OFA Lending Policy. Given that the intercept provision allows the OFA to access payments from the Province to OFA borrowers in the event of a default and that the IESO receives no such funding from the Province (the IESO is ratepayer-funded), would there still be any relevance in having or requiring the intercept provision? If we agree that there is no relevance, then would you reasonably arrive at the conclusion that seeking the direction from the Minister is not required?

The Minister, I understand, is away until September.

Happy to chat or hear comments.

Thanks,

John

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hello all. Just to clarify, the OFA Lending Policy provides that the OFA will generally lend on an unsecured basis in respect of loans made by the OFA to public bodies, unless otherwise directed. As such, no further direction/waiver is required to provide an unsecured loan to the IESO. However, the Policy also requires that, pursuant to s. 23 of CIPA, the intercept provisions (and accompanying MOU, etc.) must be included in unsecured OFA loan agreements except where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, in this case, as it has now been determined that the intercept provisions are not required, I will work with MOF Legal to obtain the required Ministerial direction waiving the Policy requirement to include these provisions.

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Ken,

Thanks for clarifying the approach on this matter.

Based on this, we will not be seeking a security interest in the Regulatory Asset and will be seeking a directive ASAP for an exemption from inclusion of the intercept provision in the $2B FHP facility. We will inform IESO that current $975 million facility will be used for funding draws until such time as we

are able execute the new $2B FHP facility.
Thanks,
Sarah

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Sarah
Thanks for clear detailed email with good questions, however, instead of responding to each of the questions, I am going back to my earlier premise that none of the loans currently on the OFA loan book have any kind of security attached to them. A good example is the current line of credit extended to the IESO for $975 million. Given this I am very reluctant to impose a security requirement the proposed $2 billion facility to the IESO from the Province.
I understand that the security requirement which is part of the OFA lending policy can waived with ministerial approval, I suggest that it be obtained as soon as possible. If there are delays in obtaining this approval, especially since the minister will be on vacation from the end of this week onwards, I also suggest, if possible the previous facility of $975 million continue until the new facility is in place. This will allow IESO to fund any regulatory assets created in the intervening period.
I have discussed my proposed approach with Gadi, who is supportive.
Thanks
Ken k

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Ken,
Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.
Security Interest - Background
In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

The steps of the transaction would be:

1 – The IESO makes payments to electricity producers at the contracted rate, but charges consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;

2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;

3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the asset free and clear of any security interest;

4 – The IESO repays the OFA for the loan.

Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

"Dear Anthony,

My apologies for the delay in providing the next turn of the FHP Credit Facility Agreement. We became aware of a potential requirement under the OFA's lending policy which needs to be considered internally for inclusion in the agreement, for which we require additional information. Would you kindly provide answers to the following questions?

- *Does IESO have other financial obligations (such as but not limited to swap agreements, other financial obligations etc.) that could become due and adversely impact IESO's ability to pay its debts when they become due?*
- *Does IESO have any other financial obligations or security interests that could attach to the Regulator Asset/Special Purpose Vehicle?*
- *[Include additional questions]*

I also want to make you aware that due to the internal assessment that must be made in respect of the OFA's lending policy, we will likely not be able to execute the new FHP facility prior to IESO's next funding request (for which IESO will be providing notice on August 17th, for funding on August 21st). Accordingly, the August FHP draw will be made under the existing $975 million credit facility. At the time we execute the new $2B facility, we would be able to transfer (by incorporating into the agreements the required provisions or by another agreed mechanism) any amount of loans exceeding $475 million (being the reduced facility limit under the draft amending agreement) under the existing facility to the new facility.

Best regards,"

In reference to the last sentence above in the draft e-mail to IESO, the intended financing structure for IESO credit facilities is to (i) execute a new $2B FHP facility and (ii) simultaneously reduce the existing $975 million facility by $500 million to $475 million. This would create a total aggregated limit of $2.475 billion. Ideally these 2 agreements would have been executed simultaneously prior to the August draw from IESO (since IESO's August draw will likely bring the balance of the existing credit facility to approx. $500M, exceeding the intended revised limit of $475 million).

Question for Ken: When we do execute both agreements, are there any obstacles from an operational perspective (settlement, cash, accounting, risk) with transferring any 'excess loan amount' from the existing credit facility to the new FHP credit facility? We would be looking to re-allocate certain loans from the existing facility to the new facility, without any cash flow impact. From a legal perspective we expect this should be fine, as we can work out the legal particulars with IESO.

General Note re: Timing Impact of Intercept Provision

Regardless of whether the OFA decides to include or exclude the intercept provision, the execution of the FHP facility will take longer than expected, likely taking an additional number of weeks.

If the decision is made not to include the intercept provision, a directive will need to be obtained from the Minister to this effect, potentially taking a few weeks.

If it is a determined an intercept provision is required, then this will likely even take longer than getting a directive from the Minister. In this case, the OFA would need to go back to the Ministry of Energy to effect the following: (I)Ministry of Energy will need to agree with IESO on acceptance of the inclusion of intercept provision in the FHP credit facility agreement and (ii) the OFA and Ministry of Energy will require an MOU whereby the parties agree on the inclusion of a the intercept provision in the FHP credit facility agreement.

Thanks

Sarah

Subject: Re: Policy questions re OFHP Credit Facility Agreement

Totally agree with Bruno, the province should not be taking a security intent in the reg asset, that would make the sale to the SPV or trust rather difficult.

It would also create issues in terms of the SPV's ability to obtain an appropriate credit rating as well

as issue debt in the capital markets.
Thanks

> Hi Sarah
> Apologies for delay. I perceive differing levels of comfort with the issue of security so I'm OK with discussing the questions raised this afternoon. I am concerned whether we have people on the call that can answer all the questions.
> But I have a basic question with respect to the issue of the Province taking a security interest in the asset and differences with this loan from others. Under the OFHP, the sale of the asset ultimately allows for payments to electricity generators. If the Province has a security interest in the asset, can we envisage a potential situation wherein the IESO would be repaying the OFA loan rather than paying generators, which would be problematic for OFHP?
> I had discussed with Ron. In regard to Toby's last question, Ron was wondering if there might be a provision on use of proceeds from IESO's sale of the regulatory asset.
> Ron had also asked whether OPCD had opined on any accounting issues, and whether OIC or Minister's directive gave any particular direction on this issue. In regard to the latter, I have checked. Minister's directive and OIC were fairly high level noting specific terms and conditions to be set out in the Agreement.

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,

In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.

Thank you,

Sarah

Subject: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hi Sarah H. and Will,

Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be

minimal.
Before proceeding, we would like to ensure that the nature of the loan, the impact of intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,
I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.
The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.
I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.
I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.
In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.
    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an

intercept, and that other Provincial loans to public bodies or other groups may be secured.

- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Hi Carlos

This is very good and if you and Mike et al, agree I suggest that we have a meeting with Gadi and appraise him of OPG's potential earnings on the 44% equity injection and raise the question of whether an additional Asset Management Fee is in fact required. If he is agreeable we can then pass it on to Scott Nelms who can communicate this message to OPG.

Thanks

Ken k

To: Ken Kandeepan ; John Psinas ; John Kim ; Bruno Amara ; Mike Manning ; James Devine
Subject: Proforma FHP Debt with july 4,2017 rates + spreads

Ken,

I have projected out the FHP debt that grows to $28B before it starts to get reduced using John Kim's estimates

Assumptions used:

Debt is 30yrs

OPG Spread survey @ July 4, 2017: 30y @ GoC+152bp (or 72 over Ont)

Ontario spreads for 30y @72bps

Canada rates stay constant and GoC 30yrs @ 2.20% as of July 4,2017

Spread on tranche1, 2, 3

Tranche 1 = senior debt =GoC+152 ie same os OPG

Tranche 2= sub-debt =GoC+252

Tranche 3= junior sub debt =GoC+352

Here are some of the results over the time horizon:

1/Performance max fee on new marginal debt = **$14M** in total over the next 11 yrs (max $1.7M)

2/Basic fee on total debt outstanding @ 5bps = **$259M** in total over the next 30 yrs (max $14M)

3/OPG's interest income on the 44% equity injection by the Province = **$11.0B** over 30 yrs

Ontario PDI interest = $**6.8B** over 30yrs

Deemed spread retained by OPG after deducting Ontario PDI = **$4.2B** over 30yrs

4/Total Trust **Interest Expense** = $**21.1B** over 30yrs

Regards

Carlos

Confidential and Privileged Legal Advice

The below note is a summary of preliminary concerns with the draft term sheet for a Provincial Support Agreement (the "Guarantee") raised by MOF LSB, Ministry of Energy LSB and the Province's outside counsel, Blakes. The concerns are grouped in categories for convenience.

Beneficiaries – The Guarantee's description of proposed beneficiaries is very broad. The Guarantee provides that the legal beneficiary is the Indenture Trustee under the Master Trust Indenture on behalf of itself and all persons that have claims against the Financing Entity secured under the master trust indenture. This would include persons ranging from the Financial Services Manager (OPG) to holders of various types of debt and hedge counterparties. Because we have not seen a term sheet for the Master Trust Indenture, we cannot be sure of the actual extent of beneficiaries.

- Need to clarify which obligations the Province is being requested to guarantee and under what various agreements to determine scope and limit of guarantee.
- Should the subordinated notes (held by OPG) be guaranteed?
- Should the beneficiaries be limited to holders of the notes issued by the financing entity?
- Is there a term sheet for the proposed financing to be issued by the Financing Entity?
- Is there a request for a guarantee of payment on other back-up or ancillary borrowing and obligations other than those issued in the market?
- Is there a draft of the Master Trust Indenture?

Scope of Financial Guarantee – The proposed Guarantee is not restricted to any particular debt offering or related transaction. Rather, it is currently framed as a "program-wide" guarantee that encompasses any and all future transactions undertaken by OPG in connection with this initiative. This is too broad and the Guarantee should be limited to individual transactions and specified creditors, negotiated at the time of each transaction.

Term of Guarantee – Currently the Guarantee continues for one year beyond the last obligation to be repaid. This does not seem necessary and it should end when the last repayment is made.

Performance Guarantee – The province does not typically provide performance guarantees. Blakes noted that performance guarantees are quite typical in structured finance offerings and that they are generally regarded as being less onerous than an

outright payment guarantee (because the guarantor is only guaranteeing the performance of certain specified obligations, as opposed to the payment of the underlying obligation). Ultimately the performance guarantee may result in a payment if the Province cannot compel performance.

Usually a performance guarantee is given by a parent, where some of the obligations rely on the actions of subsidiaries. However, under the current structure of the Term Sheet, Ontario would be guaranteeing the performance obligations of Local Distribution Companies (LDCs) directly and since these are not akin to subsidiaries and the Province has very little authority to compel performance by LDCs, this type of guarantee could expose the Province to some difficulty if an LDC ever failed to perform. Therefore, it would be appropriate that the performance guarantee should be limited to the performance of the Independent Electricity System Operator (IESO). The IESO, on the other hand, may have direct relationships with the LDCs, and it may be more appropriate for some type of commitment for the performance of the LDCs to be made by the IESO.

Payment Guarantee – There are three triggers of this part of the guarantee: (1) changing the legislation or regulations to undermine the future payment stream constituting the regulatory asset; (2) the legislation and/or the fair hydro plan being deemed by a court to be unconstitutional or unenforceable; and (3) a liquidity problem that makes it impossible to continue financing the structure or to refinance maturing debt.

With respect to the changes in law, because the Fair Hydro Plan is modelled on some US transactions, a concern has arisen that there is no legal barrier in Canada to changing the law or passing a law that undermines the value of the regulatory asset and the repayment of the obligations. Therefore, it may be that a payment guarantee triggered by adverse legislative action would go a long way to reassure potential investors and he thought that this kind of assurance (at least in some form) will be necessary to support any transaction. However, the kinds of future legislative actions that would trigger a Payment Guarantee Event are framed in vague terms. This could mean that a Beneficiary of the guarantee would try to trigger the guarantee even where there was no repayment failure, but only upon a theoretical diminution in the value of the regulatory asset or some kind of timing issue that delays payment, but not in a material way that undermines the repayment capacity of the Financing Entity.

The second trigger, arising from a finding that the structure is unconstitutional or otherwise unenforceable at law, should also be narrowed to only apply to a “final, non-appealable decision”, otherwise a lower court ruling that is not upheld and does not

unwind the structure could trigger a claim on the guarantee even where there is no risk of payment default.

Similarly, Blakes suggested that the concept of "market disruption" in the Term Sheet is also too vague and would unreasonably expose the government to risks around future refinancing transactions (*i.e.*, by effectively requiring Ontario to be the "standby purchaser" of any securities in the case of a lack of liquidity in the financial markets). This is the type of risk that is probably best addressed at the time such a risk arises, as it is impossible to predict the context and effect of such an event.

The put option is of particular concern because the current model might allow noteholders to require the province to buy back their investments in response to regulatory amendments affecting the value of their investments in only incidental or immaterial ways. Blakes cautioned that we need to guard against providing a form of assurance that enables U.S. hedge funds to hold the government hostage for the next 30 years.

Further action items and questions:

- **Time Lines and Communication with OPG** – We need to understand where this Guarantee fits into the transaction and find out why it is moving forward at this early stage. The Province needs to communicate to OPG that the Province does not agree with this draft term sheet and is not implied to be something the Province is agreeing to at such a preliminary stage.

- **Market Demands** –What precisely is the market going to demand to support the transaction? The Province's interest would seem to be in providing the most limited guarantee that is both (i) necessary to support the transaction; and (ii) ensures the highest value for both ratepayers and taxpayers.

Hi Gadi:

I talked to John Lee today regarding our upcoming meeting. His assessment is that the dealers will stick to the principles you outlined at the last meeting and provide some options for further consideration. John says the dealers are working on a one page summary that he will be able to send to us in advance of the meeting. He expects it will be more of a business issues meeting rather than a legal meeting. His goal will be to get clarity on the path going forward; understand the options and finalize a plan for moving forward. I expect the one pager may be available over the next day or so.

Yes, I agree that it would make sense to loop in Scott on this since I understand that he is also involved in this project and it may be that he would also be one of the Provincial attendees to attend the meeting with Blakes. Since I have not been involved in previous calls with Scott in this, it may be best if someone from the OFA contacts him on this.

Hi Malle,

It might be helpful to loop in Scott Nelms in advance via email, too, as he could provide some insights on Energy and OPG's perspectives, in advance of a meeting.

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Hi Malle,
Thanks for the list.
Would it be helpful if the group met again to discuss?
When are you meeting with Energy Legal and Blakes?
Ron

Hi all,
We are also putting together an issues list for discussion with Energy Legal and Blakes and will share it with you as well.
Is there any type of draft term sheet for the proposed financing transaction itself or the master sales and servicing agreement? Any general description of the proposed transaction would be helpful to us.
Thank you.

CONFIDENTIAL AND PRIVILEGED LEGAL ADVICE

ISSUES LIST – PROVINCIAL SUPPORT AGREEMENT DRAFT MAY 12, 2017

1. Guarantor will be the Minister of Energy and the Minister of Finance on behalf of the Province (see. 5(3) of proposed Fair Hydro Act, 2017).

2. Description of proposed beneficiaries of guarantee is very broad. Provides that beneficiary is Indenture trustee under master trust indenture on behalf of itself and all persons that have claims against a Financing Entity secured under the master trust indenture. Persons range from the Financial Services Manager (OPG) to holders of various types of debt and hedge counterparties. Need to clarify which obligations the Province is being requested to guarantee and under what various agreements to determine scope and limit of guarantee. Is there a term sheet for the proposed financing to be issued by the Financing Entity? Is there a request for a guarantee of payment on other back-up or ancillary borrowing and obligations other than those issued in the market? Is there a draft of the Master Trust Indenture?

3. Why does the term of the guarantee continue for one year after the obligations have been repaid?

4. Performance Guarantee – This is also a very broad guarantee of performance of the IESO and all electricity services providers in favour of the same broad group of beneficiaries. How can the Province ensure that these entities perform their obligations practically? Also the Province is to protect beneficiaries from any commingling risk. It is noted that in the event the performance guarantee is unenforceable against the Province, there would be a separate legal obligation in the provincial support agreement to indemnify beneficiaries for any losses. Would there be any trigger events applicable to the obligation to indemnify as there are for the payment guarantee. If not, is this an issue for accounting treatment purposes? Also, is there an overlap between the performance and payment guarantee? So long as the funding obligations are paid on time by the financing entity, is there a need for other guarantees from the Province? Note that the Province does have immunity from specific types of enforcement under the Proceedings against the Crown Act. Is there a sample term sheet for the Master Sale and Servicing Agreement? Which provisions of the proposed bill are being relied on for this – is it section 5(2)? section 33. There doesn't seem to be a mechanism in the Act to replace the IESO as servicer. Should the Guarantee specify that the Province can appoint a replacement servicer?

5. Payment Guarantee Event – Regarding (B) and (C), the interpretation of when the triggering event has occurred will be an issue – is there a way to make it more objective or how can this be handled if there is a dispute? Regarding (D), think that there is going to be more discussion of the need for this provision from a business perspective. However, is this assuming, that the Province is guaranteeing both long term and short

term funding obligations? Need to clarify when and which obligations the province will be guaranteeing?

6. Payment Guarantee – Again it will be necessary to clarify which obligations the province is guaranteeing to understand what the range of payments to be made are. Also, (y) does not seem acceptable to the Province from a business perspective.

7. Limits under Guarantee – The guarantee wording should be clear so that the Province is guaranteeing payment of certain debt or specific obligations only and the Province's liability should be capped. Province should not be exposed to the risk of any other types of damages or losses.

8. Priority of Payments – Until we know who the beneficiaries are and with respect to what obligations, it is difficult to comment on this.

9. Subrogation – Need to ensure that the Province has appropriate recovery rights and not sure that it is appropriate that all beneficiaries are paid in full before Province gets subrogation rights. Also there is no acceleration here and Province really pays on an ongoing basis so how should subrogation work in such a case.

10. Conditions Precedent – Need to know what they are proposed to be.

11. Representations – Need to know what they are proposed to be as Province does not typically provide representations in connection with guarantees it provides.

12. Confidentiality Obligations – Thought the guarantee is part of a public financing so wouldn't the terms all be known?

13. Legal Opinions – Content, who will be providing them and to whom would they be provided.

General Questions on proposed legislation and interaction with guarantee:

14. General review of relevant sections would be appreciated and how the provisions fit with the requirements of the financing. In particular, s. 5, 13, 19, 21, 22, 33, 41 par 7

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Just a follow up to our call earlier, does it also make sense to invite Cindy Veinot provincial controller to the proposed meeting since accounting issues are also key.

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Provincial Support Arrangement

Here are some questions to frame our discussion at 9 a.m. this morning, based on the May 12th version of the Term Sheet:

1. Should the Province's support covenant run in favour of the indenture trustee (for beneficiaries) or only the finance entity and be pledged? This may impact matters such as whether the Province is seen as a 'co-issuer' under US securities laws and perhaps the Province's accounting treatment.

2. Should the support covenant be given in respect of all potential claimants from the financing entit(y/ies), or only specified creditors? For example, should the 'subordinated notes' be given the full benefit of the support covenant?

3. Should the support covenant be given up-front in an open-ended, program-wide fashion, or be given in relation to individual transactions and specified creditors of the financing entity at the relevant time of transacting and only for the duration of the relevant underlying obligations?

4. Should the support covenant purport to extend to more than one financing entity?

5. Extending the arrangement to 1 year beyond the latest obligation (broadly construed) essentially means the support covenant will hang out there indefinitely – is this intended?

6. Is the scope of the "performance guarantee" (i.e., servicing, commingling; EV's and IESO) appropriate? Should we make clear that it would not extend to "seller" obligations arising under the MSSA? Can the Province commit to "perform or cause the performance" as a powers matter?

7. Consider the deletions of the "Performance Guarantee Event" concept. As marked up, the performance guarantee would not require any process to first pursue remedies against IESO.

8. If a "payment guarantee" is to be provided, it will raise issues for the Province, including accounting treatment and scope of the support undertaking. Has this sort of investigation been undertaken by the Province at this point?

9. Consider the overall scope of the "payment guarantee event" provision. Issues include the risk that an amendment of the Act or Regulation has a non-material, incidental impact on the timing of payment (i.e., the receipt of funds from an EV), which triggers an effective put at a premium. Another is that a lower court finding of *ultra vires* could trigger the obligation, rather than a "final, non-appealable decision".

10. Should the support arrangement extend to cover "invalidity" or "unenforceability" (see (C) under "Payment Guarantee Event") that arises for reasons other than the validity of the Act and Regulation (e.g., if the actual funding obligation, which the Province may not even be aware of, is impugned for an unrelated reason, such as entity governance or contracting issues)?

11. The "market disruption" provision (see (D) under "Payment Guarantee Event") needs considerable further thought and refinement (e.g., as proposed, the event is based on the ability to refinance the particular funding obligations, rather than "general market disruption"). Is the Province prepared to be a standby purchaser of any funding obligations in any market-based illiquidity scenario? Note that private market liquidity or "extendable note features" may be available at a cost. In any event, support from the Province of this type should probably only be addressed very specifically and at the time of the specific transaction and narrowly with respect to the obligations for which this sort of protection is specifically required. Note that depending on the maturities incurred under the financing plan, this could cause a major funding requirement for the Province.

12. The "stand-in" payment provisions contemplated in clause (x) under "Payment Guarantee" need to be better understood. Assuming that they result in the rating of any bonds being downgraded to the Province's then rating, should the Province have a redemption option in that scenario?

13. The "put at a premium" provisions contemplated in clause (y) under "Payment Guarantee" would need to be refined so that the entire structure (i.e., all related finding obligations, such as swaps, sub debt and liquidity commitments) would be 'unwound' in total, rather than only certain debt to avoid standing or perpetuating attendant obligations. Is the 101% pay-out always appropriate? If the Province is liable for payments under obligations, will it need certainty as to the underlying terms and conditions?

14. What is the consequence of the market disruption scenario described in (D) under "Payment Guarantee Event" – it doesn't seem to be covered under "Payment Guarantee"?

15. The postponement of subrogation rights is a problem. In effect, a payment to a senior ranking creditor would provide credit enhancement to all junior ranking obligations which may not have been the intended beneficiaries of the support arrangement (including service providers and sub debt). The general approach to subrogation needs to be considered at the time of incurrence of a funding obligation in relation to the particular scenario and circumstances.

16. "Notice", "Closing", "Governing Law" and other mechanics will need to be revised as required to the extent that the provision of support is intended to be transaction-specific, creditor-specific, etc.

17. To the extent that the support is given up-front, the Province will need to have the benefit of its own very specific condition precedents, including to approve each future transaction and finding obligation – would this disrupt the accounting treatment anticipated for OPG based on excessive control over financings?

18. Consider whether accepting or acknowledging "customary representations" and "customary confidentiality obligations" in this context makes sense. Customary for the Province?

19. Has anyone considered the Province's related governance requirements and related due diligence (e.g., the implications of a US offering under US securities laws). In the absence of a structure and contracts, how can the Province be assured that it is not

inadvertently becoming liable for unintended obligations, duties and liabilities (e.g., servicer buy-backs; "servicer advances"; entity-level tax payments; etc.)?

20. Has the Province's own accounting treatment for these been investigated? What limitations should be tabled at this stage?

21. Does the Province have concerns regarding potential for incongruences between the level of actual "independence" from the Province and public perception in relation to the OFHPA generally?

Subject: FW: Question - OIC for new IESO Credit Facility

Hi Mike,

I originally sent this e-mail below to Linda and she thought it looked fine, but she thought I should also run it by you.

As part of putting in place the new credit facility between IESO and the OFA, a new OIC is required for the OFA to borrow from the Province, so the Province may in turn make loans to IESO. As matter of prudence, I am asking is for you to review the rates that the OFA pays to the Province in the OIC are still appropriate. The OIC package must go to the DMO today.

In short, the rates included in the OIC are effectively the same as the existing OIC underpinning the $975 million credit facility between the OFA and IESO. Specifically, section(c)(ii) of the OIC says if the OFA uses the borrowed monies to fund 3rd party loans, then the rate will **be equivalent to rate of interest payable to the OFA under 3rd party loan less an amount as may be determined by the Minister of Finance** in respect of such Third Party Loan or a class of such Third Party Loans.

The OIC also contains a more general borrowing rate. That is, Section (c)(i) says if the OFA simply borrows funds from the Minister (which have not been loaned to a third party), the OFA pays the rate equal to **the 90 day ONT T-Bill yield.** However, for the purposes of this OIC, it is unlikely that this section would ever be used.

Again, both rates above are consistent with existing OICs.

Please let me if these rates look okay.

Thanks,
Sarah

Subject: Question - OIC for new IESO Credit Facility

Hi Linda,

As a matter of prudence, I just wanted to check with you on one aspect of the draft OIC for OFA to make loans to IESO under the proposed credit facility in relation to the Fair Hydro Plan. The OIC package will be delivered today to the DMO, but I wanted to confirm with you that the rates that under the Section (c) of the attached OIC are still appropriate (perhaps it is I should be asking Mike?, but since this is IESO related, I wanted to check with you first).

Section (c) deals with the rates the OFA pays to the Minister for any funds it borrows, and is essentially the same as the OFA's existing OIC from 1999. Section (c)(i) says if the OFA simply borrows funds from the Minister (which have not been loaned to a third party), the OFA pays the rate equal to **the 90 day ONT T-Bill yield.** Section(c)(ii) says that if the OFA uses the borrowed monies to fund 3rd party loans, then the rate will **be equivalent to rate of interest payable to the OFA under 3rd party loan less an amount as may be determined by the Minister of Finance** in respect of such Third Party Loan or a class of such Third Party Loans.

Please let me know your thoughts.

Thanks,
Sarah

Subject: RE: Question - OIC for new IESO Credit Facility
Date: Tuesday, May 30, 2017 1:29:36 PM

Hi Mike,

The OIC is drafted using wording that is similar to the wording already being used in the existing OICs where the OFA borrows money from the Minister (i.e. underpinning college loans, existing IESO-OFA Credit Facility, etc.).

The OIC permits the OFA a couple of options:

(i) the OFA simply borrows funds from the Minister without lending to 3rd parties. In that case, the OFA would pay to the Minister at a rate equal to **the 90 day ONT T-Bill yield, reset every 90 days.** For **the purpose of this OIC (**that is, for the OFA to lend funds to IESO) **this provision would not be used**.

(ii) the OFA borrows funds from the Minister and then lends those funds to 3rd parties. In this case, the OFA would pay the Minister at the rate **equivalent to the rate of interest payable to the OFA under 3rd party loan, less an amount as may be determined by the Minister of Finance** in respect of such Third Party Loan or a class of such Third Party Loans. This would be the section applicable to for the OFA lending to IESO. In this circumstance, the OFA can charge IESO Ontario's cost plus 25bps; the OFA would then pay the Minister at this rate, less an amount as may be determined by the Minister.

So the short answer is that, under option (ii), the OFA can charge IESO's cost of plus 25 bps, and then the OFA must pay the Minister at the same rate on the funds, less an amount determined by the Minister. The fact that the Minister decides the amount to be deducted gives us flexibility in determining the spread to deduct when paying back the Province.

The only time option (i) comes into play is IF the OFA ever wants to borrow funds from the Minister without lending those funds to third parties.

Hi Sarah:

Are you saying the wording in the OIC is general and that we can charge IESO Ontario's cost plus 25 bps separately?

Thanks, Mike

Subject: FW: Question - OIC for new IESO Credit Facility

Hi Mike,

I originally sent this e-mail below to Linda and she thought it looked fine, but she thought I should

also run it by you.
As part of putting in place the new credit facility between IESO and the OFA, a new OIC is required for the OFA to borrow from the Province, so the Province may in turn make loans to IESO. As matter of prudence, I am asking is for you to review the rates that the OFA pays to the Province in the OIC are still appropriate. The OIC package must go to the DMO today.
In short, the rates included in the OIC are effectively the same as the existing OIC underpinning the $975 million credit facility between the OFA and IESO. Specifically, section(c)(ii) of the OIC says if the OFA uses the borrowed monies to fund 3rd party loans, then the rate will **be equivalent to rate of interest payable to the OFA under 3rd party loan less an amount as may be determined by the Minister of Finance** in respect of such Third Party Loan or a class of such Third Party Loans.
The OIC also contains a more general borrowing rate. That is, Section (c)(i) says if the OFA simply borrows funds from the Minister (which have not been loaned to a third party), the OFA pays the rate equal to **the 90 day ONT T-Bill yield.** However, for the purposes of this OIC, it is unlikely that this section would ever be used.
Again, both rates above are consistent with existing OICs.
Please let me if these rates look okay.
Thanks,
Sarah

Subject: Question - OIC for new IESO Credit Facility
Hi Linda,
As a matter of prudence, I just wanted to check with you on one aspect of the draft OIC for OFA to make loans to IESO under the proposed credit facility in relation to the Fair Hydro Plan. The OIC package will be delivered today to the DMO, but I wanted to confirm with you that the rates that under the Section (c) of the attached OIC are still appropriate (perhaps it is I should be asking Mike?, but since this is IESO related, I wanted to check with you first).
Section (c) deals with the rates the OFA pays to the Minister for any funds it borrows, and is essentially the same as the OFA's existing OIC from 1999. Section (c)(i) says if the OFA simply borrows funds from the Minister (which have not been loaned to a third party), the OFA pays the rate equal to **the 90 day ONT T-Bill yield.** Section(c)(ii) says that if the OFA uses the borrowed monies to fund 3rd party loans, then the rate will **be equivalent to rate of interest payable to the OFA under 3rd party loan less an amount as may be determined by the Minister of Finance** in respect of such Third Party Loan or a class of such Third Party Loans.
Please let me know your thoughts.
Thanks,
Sarah

Hi Bonnie,
The Ontario Fair Hydro Plan Act legislation provides for the recovery, from eligible ratepayers, of financing costs by the financing entity, including financing done through the financing entity, OPG and indirectly by the Province, for the equity injection. The Province would, therefore, expect a return on equity from OPG which would at least cover its borrowing cost. For prudence, this recovery to match the interest cost is built into the current fiscal plan. [Not public information] In addition, the increased investment in OPG, from the equity injection, would a higher level of asset for the Province's balance sheet to offset the increased borrowing to appear on its balance sheet, thus mitigating the concern expressed in DBRS' question, i.e. no increase in net debt.
Our colleagues in FTD/CMD and GBED likely would have additional insight as well, copying here Ken and Mike in the response.

Hi Gadi,
Would you have an idea when Energy will be circulating the draft TB Report Back?
I was talking to Steen on Wednesday on the IESO request for an expanded credit facility from the OFA, and he asked for some input.
Some potential input is attached, modifying the flow chart that Energy had in its March CabSub, to show a potential role for the OFA for financing the IESO (at least on an interim basis).
Steen also asked if we'd be looking for an approval. I'm not sure that is needed (assuming that IESO eventually can still sell the asset to OPG's SPV eventually, as planned), but perhaps a "Note" in the Minute would be helpful, along the lines of "Note that [the Minister of Finance will direct] the OFA [to/will] provide a credit facility to the IESO to facilitate …"

DRAFT

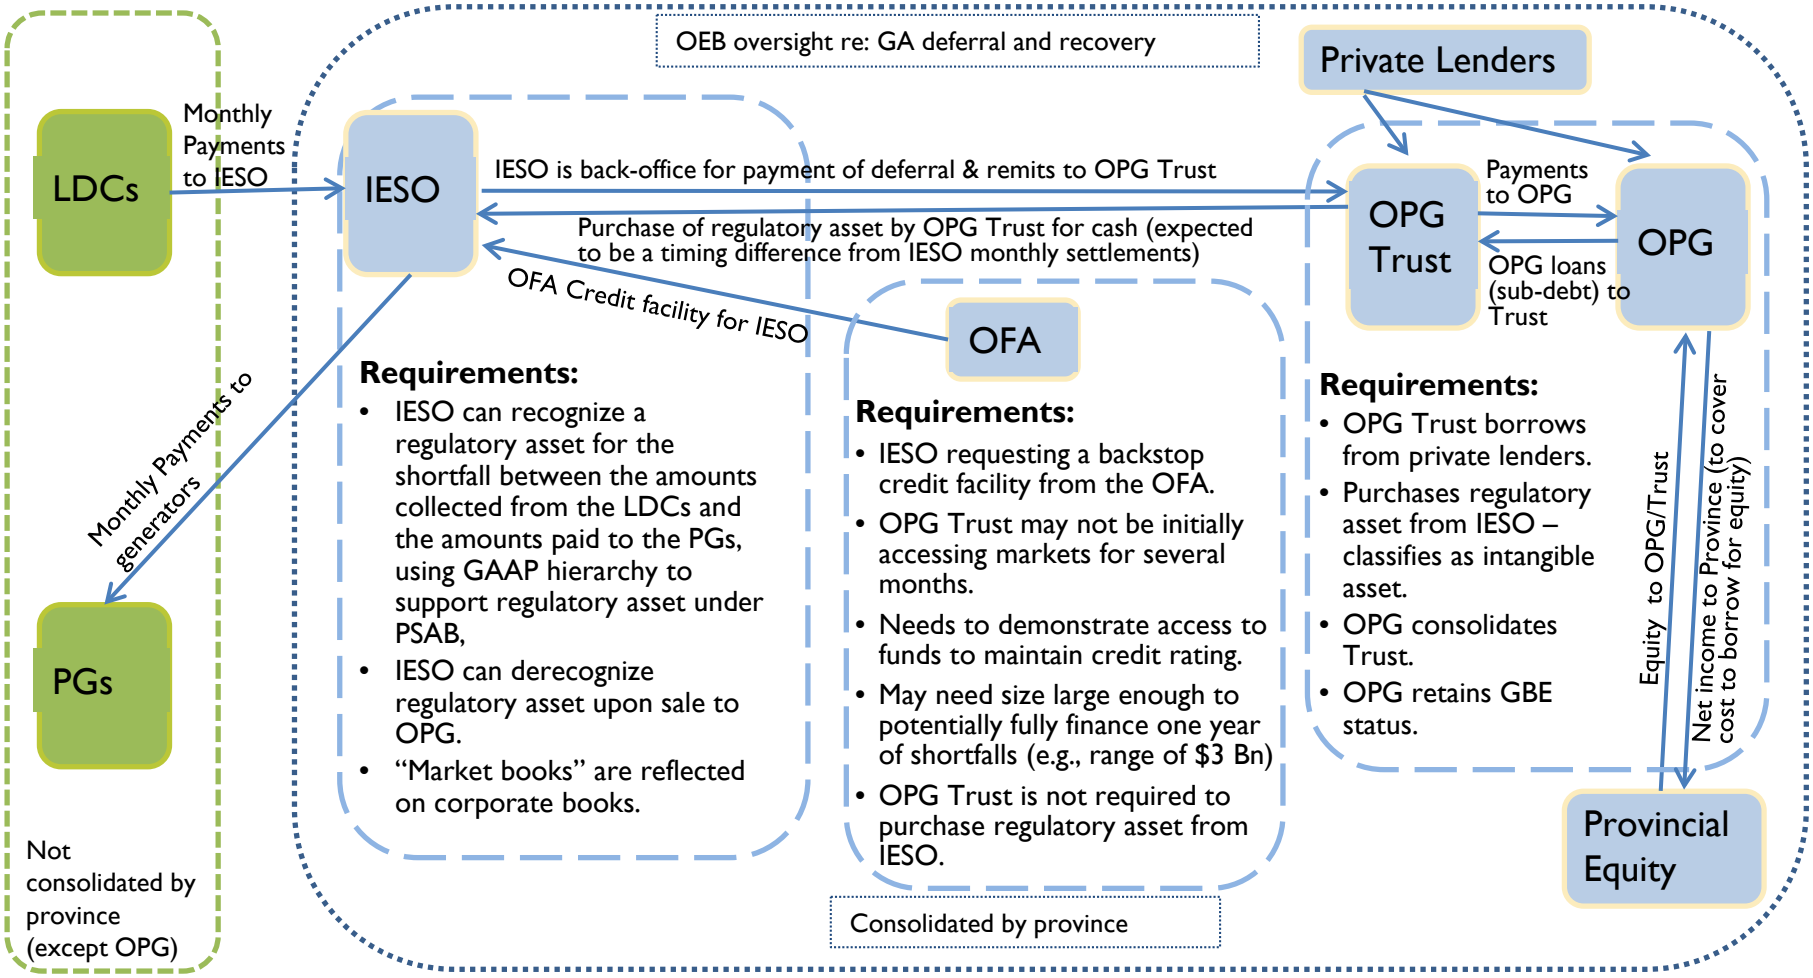
GA Financing Plan: Role of IESO

Corporate and Electricity Finance Division
May 1, 2017

DRAFT

GA Smoothing – Proposed Structure

- The following diagram provides an overview of the proposed GA smoothing structure, as well as interactions between sector entities and elements required to meet accounting objectives.



Note: Proposed structure is subject to legal and accounting confirmation, absent that confirmation, there would be a fiscal impact to the province.

DRAFT

IESO Financing Requirements

- IESO will need to ensure that it continues to have the funds available to provide payments to generators on a monthly basis as part of the IESO settlements process, while recoveries from LDCs for Regulated Price Plan (RPP) / Fair Hydro Plan eligible customers will be lower.
- IESO has an existing credit facility from the OFA; however, a new or expanded facility is being requested.
- IESO would require financing to compensate generators should it be required to hold any portion of the unpurchased Regulatory Asset beyond each monthly settlement period.
  - OPG Trust is not expected to access public capital markets for several months after the start of the FHP, and may be purchasing the asset with a lag vs monthly settlements. Also, OPG Trust is not required to purchase the regulatory asset.
  - IESO will need a credit facility for interim financing.
  - IESO may require longer-term financing to maintain the deferral financing plan, should the OPG Trust not be able to access debt markets on a timely basis for purchase of some or all of the regulatory asset.
- Based on Ministry of Energy's GA deferral plan, it is estimated that approximately $2.5-3.0 billion need to be deferred per year for over first 10 years, equal to approximately $200-250 million per month, on average.[1]
  - The size of the credit facility required to backstop IESO could be $2.5 to $3.0 billion. [TBC]
- The monthly and annual amount being deferred and the resulting monthly amounts can be substantially different than forecast based on various factors, such as seasonality or electricity usage, as well as potential changes to electricity costs from OEB rate decisions, with IESO estimating deferral amounts as high as $400 million per month.
- Other factors that may increase IESO's financing requirements:
  - IESO will also incur financing charges that will need to be refinanced.
  - The financing and administration costs that OPG Trust incurs will need to be paid.
- There is an accounting risk on how OFA financing of the IESO requirements would be treated.
  - Even if IESO is allowed to recognized the Regulatory Asset, there is a risk as to whether this recognition will be permitted under the accounting standards (PSAS) upon consolidation with the Province.

[1] Based on Ministry of Energy's annual GA deferral amounts, assuming the monthly deferral is equally-weighted.

---

Hi Gadi,
Would you have an idea when Energy will be circulating the draft TB Report Back?
I was talking to Steen on Wednesday on the IESO request for an expanded credit facility from the OFA, and he asked for some input.
Some potential input is attached, modifying the flow chart that Energy had in its March CabSub, to show a potential role for the OFA for financing the IESO (at least on an interim basis).
Steen also asked if we'd be looking for an approval. I'm not sure that is needed (assuming that IESO eventually can still sell the asset to OPG's SPV eventually, as planned), but perhaps a "Note" in the Minute would be helpful, along the lines of "Note that [the Minister of Finance will direct] the OFA [to/will] provide a credit facility to the IESO to facilitate …"
Energy's PW.

DRAFT

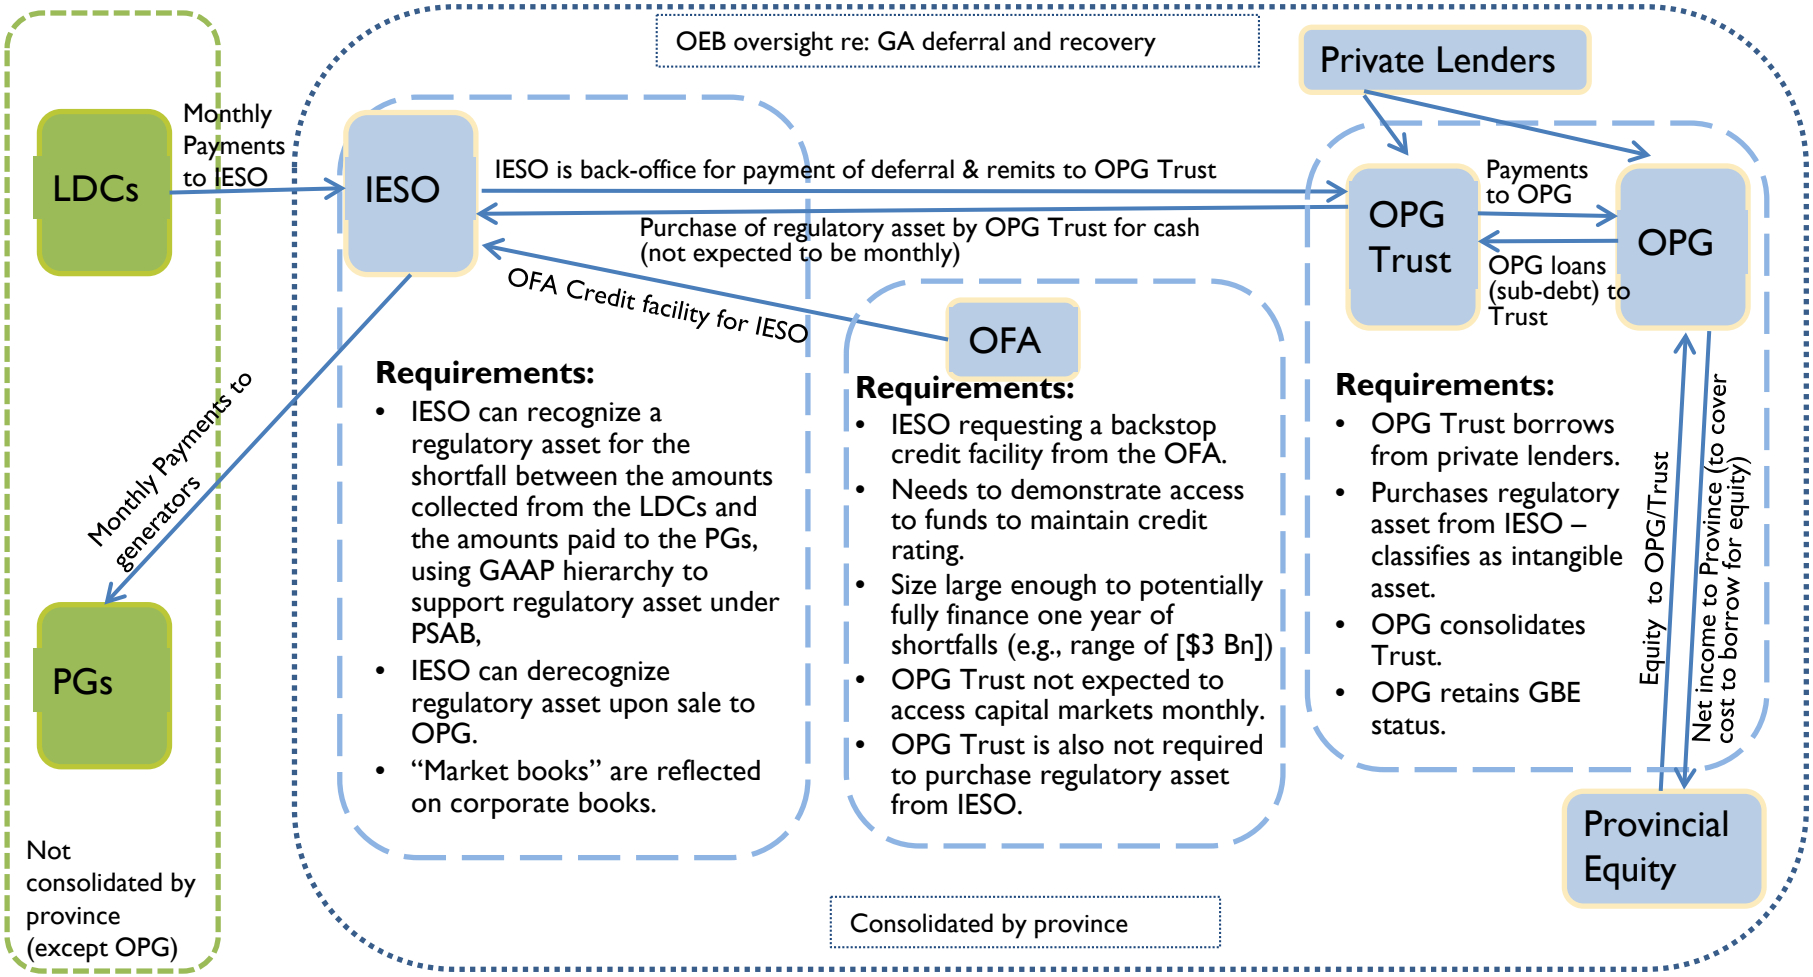
GA Financing Plan: Role of IESO

Corporate and Electricity Finance Division
April 28, 2017

DRAFT

GA Smoothing – Proposed Structure

- The following diagram provides an overview of the proposed GA smoothing structure, as well as interactions between sector entities and elements required to meet accounting objectives.



Note: Proposed structure is subject to legal and accounting confirmation, absent that confirmation, there would be a fiscal impact to the province.

DRAFT

IESO Financing Requirements

- IESO will need to ensure that it continues to have the funds available to provide payments to generators on a monthly basis as part of the IESO settlements process, while recoveries from LDCs for Regulated Price Plan (RPP) / Fair Hydro Plan eligible customers will be lower.
- IESO has an existing credit facility from the OFA; however, a new or expanded facility is being requested.
- IESO would require financing to compensate generators should it be required to hold any portion of the unpurchased Regulatory Asset beyond each monthly settlement period.
  - OPG Trust is not expected to access public capital markets monthly, nor is it required to purchase the regulatory asset.
  - IESO will need a credit facility for interim financing
  - IESO may require longer-term financing to maintain the deferral financing plan, should the OPG Trust not be able to access debt markets on a timely basis for purchase of some or all of the regulatory asset.
- Based on Ministry of Energy's GA deferral plan, it is estimated that approximately $2.5-3.0 billion need to be deferred per year for over first 10 years, equal to approximately $200-250 million per month, on average.[1]
  - The amount of credit facility required to backstop IESO could be $2.5 to $3.0 billion per year. [TBC]
- However, the monthly and annual amount being deferred and the resulting monthly amounts can be substantially different based on various factors, such as seasonality or electricity usage, as well as potential changes to electricity costs from OEB rate decisions, with IESO estimating deferral amounts as high as $400 million per month.
- Other factors that may increase IESO's financing requirements:
  - IESO will also incur financing charges that will need to be refinanced.
  - The financing and administration costs that OPG Trust incurs will need to be paid.
- There is an accounting risk on how OFA financing of the IESO requirements would be treated.
  - Even if IESO is allowed to recognized the Regulatory Asset, there is a risk as to whether this recognition will be permitted under the accounting standards (PSAS) upon consolidation with the Province.

Good morning,
As you may know, coming out of the Rate Mitigation meeting yesterday with Energy, it was decided that TB/MBC will need to decide on the Provincial Guarantee. OFA has been tasked with preparing a Treasury Board submission that will track to TB/Cabinet on September 12th/13th (see attached Action Items).
I'm going to develop a first draft of the submission and circulate it to this group next week for comment. After the first round of comments, I'll recirculate to a wider group, including Scott Nelms' team and OPCD. To assist in my preparation of the submission, could I ask you to **send me any materials you have on the Provincial Guarantee** – latest term sheet, briefing notes, decks, etc.?
Mike, I know you're away next week, so if there's anything in particular that you think TB/MBC should be made aware of with respect to the decision on the guarantee, please let me know and I'll make sure it's incorporated into the submission.
Many thanks and happy to discuss.
Anna

Hi All,
Attached are Media Q&As for PA, the timeline for the response is EOD Friday. It looks like there have been a lot of questions added since the ADM signoff on Tuesday.
David, questions 40 and 41 related to credit ratings (also looking confirmation on Q29 stating Ontario being most indebted sub sovereign in the world, which I recall being the case).
Darren, questions 32 and 47 relate to the Hydro rebate plan and the Hydro One sale, I believe that's something you'd take a look at in Francisco's absence?
John as we discussed 29, 30, 31 are IOD related.
Please also take a scan through in case there is anything else not mentioned.
Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: Review Required: Public Accounts - Media Qs&As (comprehensive)

Importance: High
Hi Sarah, Patrick,

In follow-up to the ADM approvals of communications products for Public Accounts yesterday (Aug 29) morning, we have updated our comprehensive media Q&A document.
Please see attached for the comprehensive media Q&A document, which includes "top media questions" (approved by TBS/MOF ADMs yesterday), as well as other questions related to accounting changes, debt, deficit, Trillium Trust, etc. While the document is long, many of the questions re-iterate key information that is included in the already-approved top media questions section.
For your reference, I will also be sending this document to MOF Communications for their review, as well as to Energy (for questions related to Fair Hydro).
Can you please review the document and **provide your feedback/approval** for the questions relevant to OPCD and OTB **by Friday September 1st end of day**. We appreciate your work on this as we continue to work toward deadlines for DMO/MO approvals.
David- cc-ing you for your review on the Trillium Trust questions in particular (and to confirm will also be sharing this with MOF).
Thank you, and please do not hesitate to let us know if you have any questions.

Best,

Alisha

Subject: RE: Review Required: Public Accounts - Media Qs&As (comprehensive)
Date: Thursday, August 31, 2017 10:16:27 AM

Ken,

They added a number of questions since the ADM sign off two days ago, some that touch upon IOD, Credit Ratings, etc. Overall, a lot of the questions in the revised Media Q&As are centered around the AG and best reviewed by OPCD and TBS in general, such as the pension question.

They also added some Fair Hydro Plan questions even though not really related to this year's Public Accounts. I don't know who wrote them, likely OPCD, but they seem to be fairly worded, general and in a neutral tone. However, I believe you and Gadi did meet with the AG herself post April (I think in July), so it may not be true that the AG "declined" to discuss the Fair Hydro issue at the meeting, as the Fair Hydro meeting question # 1 below states.

- Fair Hydro Accounting (Other Matters)

1. **The Auditor General alleges the government withheld information from her on the accounting treatment for the Fair Hydro Plan. Why would she say that?**

   First, I would note that the accounting for the Fair Hydro Plan is separate and distinct from the Public Accounts we're here to talk about today.

   Having said that, we respectfully disagree with the Auditor General's claim that the government withheld information from her or her office.

   In March, the Ministry of Energy provided the Auditor General's Office with Cabinet documents from February and March related to the Fair Hydro Plan. These documents together provided a comprehensive overview of all elements of the plan that were known at that time, including accounting memos from both the Independent Electricity System Operator (IESO) and Ontario Power Generation (OPG).

   On April 19, 2017, senior ministry officials from Treasury Board Secretariat, Finance and Energy met with the Auditor General and her staff to provide a briefing on the accounting for the Fair Hydro Plan.

   Since that April 19 briefing, ministry officials from Treasury Board Secretariat have met with the Auditor General several times. At each meeting, officials included the Fair Hydro Plan and IESO accounting on the agenda. However, in each case the Auditor declined those requests to discuss this issue with her.

2. **The Auditor General has some serious concerns about how you're accounting for the Fair Hydro Plan. What do you say to this?**

   (Has been approved by TBS & MOF ADMs on August 29, 2017)

   The accounting for the Fair Hydro Plan is a separate and distinct issue to the Public Accounts for 2016-17 that we're here to talk about today.

   However, under the Fair Hydro Plan accounting structure, the Province's net debt and annual surplus/deficit won't be negatively impacted since all costs are expected to be recovered through future rates.

   The Ministry of Finance continues to work closely with Treasury Board Secretariat, the Ministry of Energy, Ontario Power Generation (OPG), the Independent Electricity System Operator (IESO) and external advisors to address the outstanding accounting related considerations which will be key to managing the fiscal impact of the Global Adjustment refinancing.

The Auditor General has also been briefed on the government's refinancing structure.

For further questions, I direct you to contact my colleague at the Ministry of Energy.

3. **Why did you set up the Fair Hydro Plan accounting in this way?**

Again, I would note that the accounting for the Fair Hydro Plan is separate and distinct from the Public Accounts we're here to talk about today.

However, in order to meet the needs of users, including the legislature and the public, for accountability in government reporting and decision making, it is essential that public sector financial statements reflect the economic substance of the government's activities.

All of the agreements necessary for the Global Adjustment (GA) Refinancing are not yet complete. The final accounting for the GA Refinancing will be completed once all of the elements are complete.

In analyzing the appropriate accounting treatment for the GA refinancing component of the Fair Hydro Plan on the province's consolidated financial statements in 2017-18 and forward, the province considered authoritative guidance issued by the Public Sector Accounting Board, as well as the accounting assessments of the Independent Electricity System Operator (IESO) and Ontario Power Generation (OPG) management, including the accounting opinions of their external auditors.

The complexity and unique structure of the GA Refinancing structure requires the use of professional judgment to ensure that key financial reporting objectives of transparency and accountability are best served.

Any further questions about the Fair Hydro Plan should be directed to my colleague the Minister of Energy.

Hi All,

Attached are Media Q&As for PA, the timeline for the response is EOD Friday. It looks like there have been a lot of questions added since the ADM signoff on Tuesday.

David, questions 40 and 41 related to credit ratings (also looking confirmation on Q29 stating Ontario being most indebted sub sovereign in the world, which I recall being the case).

Darren, questions 32 and 47 relate to the Hydro rebate plan and the Hydro One sale, I believe that's something you'd take a look at in Francisco's absence?

John as we discussed 29, 30, 31 are IOD related.

Please also take a scan through in case there is anything else not mentioned.
Thanks,
Matt Breadner on behalf of Anna Strathy

Hi Sarah, Patrick,

In follow-up to the ADM approvals of communications products for Public Accounts yesterday (Aug 29) morning, we have updated our comprehensive media Q&A document.
Please see attached for the comprehensive media Q&A document, which includes "top media questions" (approved by TBS/MOF ADMs yesterday), as well as other questions related to accounting changes, debt, deficit, Trillium Trust, etc. While the document is long, many of the questions re-iterate key information that is included in the already-approved top media questions section.
For your reference, I will also be sending this document to MOF Communications for their review, as well as to Energy (for questions related to Fair Hydro).
Can you please review the document and **provide your feedback/approval** for the questions relevant to OPCD and OTB **by Friday September 1st end of day**. We appreciate your work on this as we continue to work toward deadlines for DMO/MO approvals.
David- cc-ing you for your review on the Trillium Trust questions in particular (and to confirm will also be sharing this with MOF).
Thank you, and please do not hesitate to let us know if you have any questions.

Best,

Matt,

Please find attached my edits. To summarize:

Question 10 (page 8) and question 39 (page 30) . Added a sentence about BC and Quebec qualified opinions not affecting their Credit Rating. However, David Cross may have further edits for question 39.

Question 29 (page 25), added "lower than forecast deficit" and deleted the phrase about IOD staying low to 2019-20 (It actually slightly rises).

Question 30 (page 26) added the phrase from the Budget that for every $1 spent on infrastructure, GDP rises by $6. (This is $6 reference is mentioned in question 27 already)

Thanks.

John

DRAFT

Top Media Qs&As

Top media Qs&As have been approved by TBS & MOF ADMs on August 29, 2017

1. **The Auditor General has issued a qualified opinion for the second year in a row. Is this a sign of fiscal mismanagement?**

   We continue to move forward and present the Province's finances fairly and accurately and in accordance with Canadian Public Sector Accounting Board standards. Ontario has a strong track record of producing high-quality financial reports on a timely basis. The Auditor General's qualified opinion is based on a different interpretation of Public Sector Accounting Board standards for net pension assets and recognition of market accounts.

   Last year there was a disagreement among the Province's professional accounting staff and the Auditor General's Office on the appropriate application of Public Sector Accounting Board standards regarding pension accounting.

   As a result, the Pension Asset Expert Advisory Panel was established to deliver independent advice and recommendations on the issue to the Province.

   The independent panel members concluded the Province's share of the net pension assets of both the Ontario Teachers' Pension Plan and the Ontario Public Service Employees' Union Pension Plan should be recognized in Ontario's financial statements.

   After significant deliberation, including consideration of the recommendations of the panel, Ontario confirmed that the accounting for these plans prior to 2015-16 was appropriate, and are prepared in accordance with public sector accounting standards for pension asset accounting. Further, Ernst & Young LLP provided additional analysis and concluded that no valuation analysis was required for either plan. The 2016-17 financial statements include these pension assets, and we continue to apply the accounting treatment of pension assets that the Province has used consistently since 2001.

   This year the Independent Electricity System Operator (IESO) began recognizing its market accounts' assets (amounts due from power distributors) and liabilities (amounts due to power producers) in their financial results. IESO has chosen to recognize these markets accounts on its books for transparency reasons, as it better reflects its net financial position on behalf of the IESO-administered markets at year-end. This change was supported by the IESO's audit committee, an independent external auditor, and finally by the Office of the Provincial Controller. This change also has no impact to the province's annual deficit, net debt or accumulated deficit.

   This accounting is consistent with the presentation used previously by the Ontario Power Authority (which was merged with the IESO on January 1, 2015)

in its financial statements, which was not subject to qualification from the Office of the Auditor General at that time.

2. The Auditor General is critical of the IESO accounting changes. Is this another example of Ontario's 'funny math'?

No. The Independent Electricity System Operator (IESO) began recognizing its market accounts' assets (amounts due from power distributors) and liabilities (amounts due to power producers) in their financial results. IESO has chosen to recognize these markets accounts on its books for transparency reasons, as it better reflects its net financial position on behalf of the IESO-administered markets at year-end.

Public Sector Accounting Board standards encourage preparers and auditors to consider guidance in other accounting frameworks to address transparency and accountability:

- This accounting change was accepted by the IESO's independent external auditor, which issued an unqualified, or "clean," audit opinion. These accounting changes were highlighted in the IESO's annual report which was published online in March 2017.
- Further, this accounting is consistent with the presentation used previously by the Ontario Power Authority (which was merged with the IESO on January 1, 2015) in its financial statements, which was not subject to qualification from the Office of the Auditor General at that time.

This change has no impact to the province's annual deficit, net debt or accumulated deficit.

As such, this accounting change has been supported by the professional accounting staff of the Office of the Provincial Controller.

We will continue to work with the Auditor General to build on the government's track record of responsible fiscal management and high quality financial reporting.

If pressed on rate-regulated accounting:

The IESO made the decision to adopt rate-regulated accounting because it better reflects the economic substance of certain types of expenses that may not be directly recovered through the normal revenue requirement model.

The IESO, like Hydro One and Ontario Power Generation (OPG), is regulated by the Ontario Energy Board. The IESO adopted rate-regulated accounting for its year ended December 31, 2016. The impact on the financial statements of the

DRAFT

Province is a decrease of $82 million in the 2016-17 opening accumulated deficit and an increase in the 2016-17 annual deficit by $24 million.

This accounting change was accepted by the IESO's independent external auditor, which issued an unqualified, or "clean," audit opinion. These accounting changes were highlighted in the IESO's annual report which was published online in March 2017.

3. Why are you still fighting with the Auditor General over pension accounting?

In preparing last year's Public Accounts, the Province's professional accounting staff and the Auditor General's Office engaged in discussions about the appropriate application of Public Sector Accounting Board standards regarding pension accounting for the Province's jointly sponsored pension plans.

As a result, the Pension Asset Expert Advisory Panel was established to deliver independent advice and recommendations to the Province on the issue. The independent panel members concluded the Province's share of the net pension assets of both the Ontario Teachers' Pension Plan and the Ontario Public Service Employees' Union Pension Plan should be recognized in Ontario's financial statements.

After significant deliberation, including consideration of the recommendations of the panel, Ontario confirmed that the accounting for these plans prior to 2015-16 was appropriate. Further, Ernst & Young LLP provided additional analysis and concluded that no valuation analysis was required for either plan. The 2016-17 financial statements include these pension assets, and we continue to apply the accounting treatment of pension assets that the Province has used consistently since 2001.

We will continue to work with the Auditor General to build on the government's track record of responsible fiscal management and high quality financial reporting.

4. How were you able to beat your deficit target in 2016-17?

In 2016-17 we maintained our focus on responsible fiscal management and investing in the right priorities. We are making progress on our economic plan by making investments to spur growth, transforming government and responsibly managing spending.

Average annual growth of total government spending has been held to 2.3 per cent for the past five years. As a result of growth in revenue that exceeded growth in program expense, as well as lower than forecast interest on debt, the

deficit is $3.3 billion lower than projected in the 2016 Budget. It is also $0.5 billion lower than the interim projection in the 2017 Budget.

This is the eighth year in a row the government has beaten its deficit target.

5. The government is claiming the deficit has been reduced to $1B deficit for 2016-17 and that the budget will be balanced over the next three years. However, the AG is saying that the deficit for 2016-17 was more than $2B due to the treatment of pension assets, and the FAO has stated that the government's revenue forecast is more than $1B too "optimistic". Isn't the government really hiding a $3-4B deficit instead of a balanced budget?

Commented [AT1]: From MOF; updated Aug 29

There is no hidden deficit. In the *2010 Budget*, the government committed to eliminating the deficit and returning to a balanced budget by 2017-18. Through targeted, measured and fiscally responsible decisions, Ontario has restored its fiscal and economic strength.

Today we are confirming that the 2016-17 deficit of $1 billion is $3.3 billion lower than projected in the 2016 Budget and $0.5 billion lower than the interim projection in the 2017 Ontario Budget. This marks the eighth year in a row that Ontario has beaten its deficit target.

The success in eliminating the deficit is supported by a strong track record in managing spending -- having held average growth in spending to 2.3 per cent over the past five years.

In addition, over the last several years, the government's investments to strengthen economic growth have paid off. Ontario is a leader in economic growth, with our real GDP having outpaced that of all the G7 countries for the last three years. The strengthened economy has resulted in increased revenue for the Province – in fact, over the past two fiscal years, revenue has come in higher than projected, supporting Ontario's return to a balanced budget.

It is also important to point out that private sector forecasters have revised upward their expectations for the Ontario economy since the 2017 Budget, reflecting the growing strength of the Ontario economy. The government is also taking steps to improve tax fairness and address the underground economy in order to ensure the integrity of the Province's revenues.

Finally, Ontario's fiscal plan incorporates prudence in the form of a reserve to protect the fiscal outlook against unforeseen adverse changes in the Province's revenue and expense. The reserve has been set at $0.6 billion in 2017-18, $0.6 billion in 2018-19, and $0.9 billion in 2019-20.

Balancing the budget means that the government can invest more in the programs and services that people rely on.

DRAFT

6. **Interest on debt is still massive and the Bank of Canada is expected to raise interest rates again this fall. How is the government preparing for this and will this affect your ability to maintain a balanced budget?**

   The increase in the Bank of Canada's policy rate reflects the growing strength of the Canadian and Ontario economy. Ontario's economy remains strong and has continued to grow and create jobs in an uncertain global environment.

   A quarter-point increase in the policy rate is not likely to have a material impact on the Ontario economic outlook. The 2017 Ontario Budget anticipated that the interest rates would rise modestly.

   As noted in the 2017 Budget, the Province's average cost of 10 year borrowing in 2017-18 is forecast to be 3 per cent. The impact of a 100 basis point increase in borrowing rates is forecast to be approximately $300 million. The interest rate forecast used in the Budget was prudent, and anticipated that long-term interest rates would rise as we progressed through the fiscal year.

7. **You claim to have balanced the budget yet you keep piling on more debt. How do you plan to pay down the debt?**

   Commented [AT2]: From MOF/OFA; updated Aug 30

   We maintain a target of reducing the net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029-30. In the balanced 2017 Budget, the government is setting an interim target to reduce the net debt-to-GDP ratio to 35 per cent by 2023–24.

   In a balanced budget environment, debt would be incurred primarily to invest in capital assets. We are making progress on our economic plan by making investments to spur growth, transforming government and responsibly managing spending – including addressing the underground economy and maintaining tax fairness. Our strategic investments in infrastructure provide economic benefits: a recent study by the Centre for Spatial Economics (C4SE) finds that, over the long term, real GDP in Ontario will rise up to $6 on average per one dollar of public infrastructure spending.

   These strategic investments are creating jobs and contributing to economic growth. Ontario's GDP grew one per cent in the first quarter of 2017, outperforming that of Canada, the U.S. and all other G7 countries.

8. **Spending for hospitals, school boards and colleges seems to be much higher in Public Accounts than in the 2017 Budget. Why is this?**

   To increase transparency, this year we have made a simple change to how we are reporting third party revenues for broader public sector organizations.

DRAFT

For the first time, Public Accounts are presenting third party revenues for hospitals, school boards and colleges with provincial revenue. Third party revenues earned by these organizations, such as tuition fees, patient fees, research grants and donations, are no longer netted against the respective sectors' expenses, as they were in prior years for Public Accounts and the 2017 Budget.

This is simply a presentation change for Public Accounts. It is fiscally neutral, i.e. there is no change to the annual deficit, net debt or accumulated deficit. To ensure consistency in year-to-year and to Budget comparisons, we are reclassifying all previous years and the 2016 Budget. The 2017 Fall Economic Statement and 2018 Budget will also reflect this presentation change.

The Auditor General supports the Province's decision to adopt this presentation change. It is consistent with the accounting principles for governments issued by the Public Sector Accounting Board, and the reporting practices of other senior Canadian governments.

9. The Public Accounts show a drawdown of $260 million from the Trillium Trust. What did you spend the money on?

The government began allocating proceeds from the Trillium Trust in 2016-17 to help support infrastructure initiatives such as GO Regional Express Rail (GO RER), the Hurontario Light Rail Transit (LRT) and the Ontario Community Infrastructure Fund (OCIF).

We expect the Trillium Trust to be drawn down by about an additional $400 million in 2017–18.

Our strategic investments in infrastructure provide economic benefits: a recent study by the Centre for Spatial Economics (C4SE) finds that, over the long term, real GDP in Ontario will rise up to $6 on average per one dollar of public infrastructure spending.

10. Does a qualified opinion impact the Province's credit rating?

The Province's financial results show that the government has once again beaten its annual deficit targets. In April 2017, we delivered our first balanced budget since the global recession and we are on track to do so again next year and the year after.

The rating agencies will assess whether the underlying factors that lead to a qualified opinion directly affect the creditworthiness of the Province. However, there were no credit rating implications in 2016 when the Province received a qualified audit opinion on its 2015-16 Public Accounts. Qualified opinions by the Auditor Generals of British

DRAFT

Columbia and Quebec have been made in their respective provinces in the past, with no negative impacts on their province's credit ratings.

In 2017 the C.D. Howe Institute, an independent research organization that assesses the fiscal planning and reporting of governments in Canada, also commented positively on the financial reporting practices of Ontario relating to its fiscal reporting activities that include Public Accounts, the annual Budget and Estimates.

11. The Auditor General has some serious concerns about how you're accounting for the Fair Hydro Plan. What do you say to this?

The accounting for the Fair Hydro Plan is a separate and distinct issue to the Public Accounts for 2016-17 that we're here to talk about today.

However, under the Fair Hydro Plan accounting structure, the Province's net debt and annual surplus/deficit won't be negatively impacted since all costs are expected to be recovered through future rates.

The Ministry of Finance continues to work closely with Treasury Board Secretariat, the Ministry of Energy, Ontario Power Generation (OPG), the Independent Electricity System Operator (IESO) and external advisors to address the outstanding accounting related considerations which will be key to managing the fiscal impact of the Global Adjustment refinancing.

The Auditor General has also been briefed on the government's refinancing structure.

For further questions, I direct you to contact my colleague at the Ministry of Energy.

12. Program spending increased again this year. Why?

Program spending in 2016-17 was $141.7 billion, down $0.1 billion from the 2016 Budget. Average annual growth of total government spending has been held to 2.3 per cent for the past five years.

Healthcare represents the largest share of government program spending at $56 billion. Transformation efforts continue to make the sector more effective and sustainable while continuing to improve access for patients, especially the increased demands from an aging and growing population. The government has invested in new drugs, technologies, community and home care, long term care homes, mental health, physicians' services and specialized cancer treatments.

Other increases include:

DRAFT

- $26.6 billion in education, mainly due to the introduction of full-day kindergarten;
- $16 billion in children's and social services, due to increased annual social assistance rates as well as investments in developmental services, autism and complex special needs programs, as well as the Ontario Child Benefit;
- $10.1 billion in post-secondary and training, due to enrolment growth in colleges and universities along with increased student financial assistance programs and increases in capital funding for post-secondary institutions;
- $4.6 billion in justice sector expenses due mainly to the upload of court security costs from municipalities, compensation for the Ontario Provincial Police and correctional services programs, as well as improved access to legal aid.

DRAFT

Media Qs&As – Comprehensive List

General Public Accounts Information

1. **What is Public Accounts?**

   The Public Accounts of Ontario is a key accountability and transparency document in the government's financial cycle. It's a look back that compares Ontario's actual performance to what was planned in the Budget.

   The Public Accounts present the financial statements of the Province, provide financial highlights of the past fiscal year, and report on performance in priority areas.

   Public Accounts is audited by the Auditor General and is typically released in the fall of the following fiscal year.

2. **Why can't I find some organizations' financial statements in the Public Accounts?**

   Volume 2 contains the individual financial statements of government organizations, business enterprises and other financial statements. At the time of print, some organizations may not have had time to provide their financial statements. When this happens, we post them to Ontario.ca/publicaccounts as soon as they're available. The omission has no impact on the financial results reported in Public Accounts.

Accounting Changes

3. **Why have you restated prior year's financial statements?**

   When preparing the 2016-17 Public Accounts, Ontario's professional accounting staff adopted accounting changes to further enhance accountability and transparency.

   These changes include:
   a. **Accounting for hospitals, school boards and colleges** - third-party revenues (i.e. tuition fees, patient fees, research grants and donations) are now reported together with provincial revenue. This change increases transparency and is supported by the Auditor General.
   b. **Accounting for energy sector government business enterprises** - the financial results of investments in Hydro One and Ontario Power Generation (OPG) now reflect International Financial Reporting Standards. Previously, these results were reported using U.S. Generally Accepted Accounting Principles. This change was made to meet Public Sector Accounting Board standards and is supported by the Auditor General.

DRAFT

c. **Accounting for the Independent Electricity System Operator (IESO)** - the IESO has adopted rate-regulated accounting, and is now recognizing its market accounts assets and liabilities in its financial results.
d. **Accounting for net pension assets of jointly sponsored pension plans** - the Province is reporting net pension assets for jointly sponsored pension plans. This is in line with Public Sector Accounting Board standards and the recommendations of the independent Pension Asset Expert Advisory Panel.

- **Broader Public Sector Accounting Presentation Change**

4. Spending for hospitals, school boards and colleges seems to be much higher in Public Accounts than in the 2017 Budget. Why is this?
(Has been approved by TBS & MOF ADMs on August 29, 2017)

Commented [AT3]: Top Ten; updated Aug 29

To increase transparency, this year we have made a simple change to how we are reporting third party revenues for broader public sector organizations.

For the first time, Public Accounts are presenting third party revenues for hospitals, school boards and colleges with provincial revenue. Third party revenues earned by these organizations, such as tuition fees, patient fees, research grants and donations, are no longer netted against the respective sectors' expenses, as they were in prior years for Public Accounts and the 2017 Budget.

This is simply a presentation change for Public Accounts. It is fiscally neutral, i.e. there is no change to the annual deficit, net debt or accumulated deficit. To ensure consistency in year-to-year and to Budget comparisons, we are reclassifying all previous years and the 2016 Budget. The 2017 Fall Economic Statement and 2018 Budget will also reflect this presentation change.

The Auditor General supports the Province's decision to adopt this presentation change. It is consistent with the accounting principles for governments issued by the Public Sector Accounting Board, and the reporting practices of other senior Canadian governments.

5. What is consolidated reporting?

This presentation change may also be referred to as line-by-line consolidated reporting. This type of reporting is a more transparent way of presenting the details in the Broader Public Sector (BPS).

This change means that both expenses and revenues will be shown as separate items (on a gross basis), as opposed to being reported together (on a net basis).This affects what you see in the reporting breakdown of figures for hospitals, school boards, colleges and universities. However this has no impact to the annual deficit, net debt or accumulated deficit.

DRAFT

Line-by-line consolidated reporting is in keeping with Public Sector Accounting Board standards and will mean that our presentation for Public Accounts is consistent with other governments across Canada. The Auditor General is supportive of this change.

- **Ontario Power Generation and Hydro One Accounting Change**

6. **Why is there a change to the accounting for Ontario Power Generation (OPG) and Hydro One?**

   In the 2016-17 Public Accounts, the financial results of Ontario's investments in Hydro One and Ontario Power Generation (OPG) now reflect International Financial Reporting Standards. Previously, these results were reported using U.S. Generally Accepted Accounting Principles. This change was made to meet Public Sector Accounting Board requirements and is supported by the Auditor General.

7. **What is the impact of this change to their bottom line?**

   Energy and OPCD to provide details

- **Pension Asset Accounting**

   See section: Auditor General – Qualified Opinion for more information.

- **Independent Electricity System Operator (IESO) Accounting Changes**

8. **What accounting changes were made by the Independent Electricity System Operator (IESO)? Why?**

   The Independent Electricity System Operator (IESO) began recognizing its market accounts' assets (amounts due from power distributors) and liabilities (amounts due to power producers) in their financial results. IESO has chosen to recognize these markets accounts on its books for transparency reasons, as it better reflects its net financial position on behalf of the IESO-administered markets at year-end.

   The IESO also made the decision to adopt rate-regulated accounting because it better reflects the economic substance of certain types of expenses that may not be directly recovered through the normal revenue requirement model.

   This accounting change was accepted by the IESO's independent external auditor, which issued an unqualified, or "clean," audit opinion. These accounting changes were highlighted in the IESO's 2016 annual report which was published online in March 2017.

Commented [AT4]: Updated Aug 29 using content approved byTBS/MOF ADMs

Auditor General – Qualified Opinion

9. The Auditor General has issued a qualified opinion for the second year in a row. Is this a sign of fiscal mismanagement?
(Has been approved by TBS & MOF ADMs on August 29, 2017)

Commented [AT5]: Top Question; updated Aug 29

We continue to move forward and present the Province's finances fairly and accurately and in accordance with Canadian Public Sector Accounting Board standards. Ontario has a strong track record of producing high-quality financial reports on a timely basis. The Auditor General's qualified opinion is based on a different interpretation of Public Sector Accounting Board standards for net pension assets and recognition of market accounts.

Last year there was a disagreement among the Province's professional accounting staff and the Auditor General's Office on the appropriate application of Public Sector Accounting Board standards regarding pension accounting. As a result, the Pension Asset Expert Advisory Panel was established to deliver independent advice and recommendations on the issue to the Province.

The independent panel members concluded the Province's share of the net pension assets of both the Ontario Teachers' Pension Plan and the Ontario Public Service Employees' Union Pension Plan should be recognized in Ontario's financial statements.

After significant deliberation, including consideration of the recommendations of the panel, Ontario confirmed that the accounting for these plans prior to 2015-16 was appropriate, and are prepared in accordance with public sector accounting standards for pension asset accounting. Further, Ernst & Young LLP provided additional analysis and concluded that no valuation analysis was required for either plan. The 2016-17 financial statements include these pension assets, and we continue to apply the accounting treatment of pension assets that the Province has used consistently since 2001.

This year the Independent Electricity System Operator (IESO) began recognizing its market accounts' assets (amounts due from power distributors) and liabilities (amounts due to power producers) in their financial results. IESO has chosen to recognize these markets accounts on its books for transparency reasons, as it better reflects its net financial position on behalf of the IESO-administered markets at year-end. This change was supported by the IESO's audit committee, an independent external auditor, and finally by the Office of the Provincial Controller. This change also has no impact to the province's annual deficit, net debt or accumulated deficit.

DRAFT

This accounting is consistent with the presentation used previously by the Ontario Power Authority (which was merged with the IESO on January 1, 2015) in its financial statements, which was not subject to qualification from the Office of the Auditor General at that time.

10. **This year it's IESO accounting. Last year it was pension assets. Before that it was government advertising. Why are you still fighting with the Auditor General? This seems to be a pattern of behavior where you try and undermine her authority.**

    Our government has the utmost respect for all independent officers of the legislature, and we value the important perspective they bring.

- **Pension Asset Accounting**

11. **Why are you still fighting with the Auditor General over pension accounting?**
    (Has been approved by TBS & MOF ADMs on August 29, 2017)

    In preparing last year's Public Accounts, the Province's professional accounting staff and the Auditor General's Office engaged in discussions about the appropriate application of Public Sector Accounting Board standards regarding pension accounting for the Province's jointly sponsored pension plans.

    As a result, the Pension Asset Expert Advisory Panel was established to deliver independent advice and recommendations to the Province on the issue. The independent panel members concluded the Province's share of the net pension assets of both the Ontario Teachers' Pension Plan and the Ontario Public Service Employees' Union Pension Plan should be recognized in Ontario's financial statements.

    After significant deliberation, including consideration of the recommendations of the panel, Ontario confirmed that the accounting for these plans prior to 2015-16 was appropriate. Further, Ernst & Young LLP provided additional analysis and concluded that no valuation analysis was required for either plan. The 2016-17 financial statements include these pension assets, and we continue to apply the accounting treatment of pension assets that the Province has used consistently since 2001.

    We will continue to work with the Auditor General to build on the government's track record of responsible fiscal management and high quality financial reporting.

12. **What was the panel's rationale for its decision?**

Commented [AT6]: Top Question; updated Aug 29

DRAFT

The Pension Asset Expert Advisory Panel recommended that the Province's share of the net pension assets of both the Ontario Teachers' Pension Plan (OTPP) and the Ontario Public Service Employees Union Pension Plan (OPSEUPP) should be recognized as an asset in Ontario's financial statements.

The panel said that:

- Recognizing the asset will provide a faithful representation of the Province's financial position.
- The accounting surplus in the plan has a future economic benefit.
- The government controls access to that accounting surplus.
- The accounting surplus exists as the result of past transactions and events.
- It would be misleading not to recognize the Province's share of the assets in Public Accounts.

In addition, the panel concluded that the government will be able to benefit from the full amount of each net pension asset, and as a result, no reduction in the value is necessary.

Ernst & Young LLP provided additional analysis and concluded that no valuation analysis was required for either plan, confirming the independent panel's recommendation.

13. The Auditor General was critical of the panel's authority and credibility. What's your response to this?

The panel members are all highly-qualified experts in their field. They were carefully chosen for their expertise in the areas of jointly sponsored pension plans, actuarial modelling for pension plans and public sector accounting standards:

- **Patricia O'Malley (panel chair)** is a Chartered Professional Accountant. She has been a member of the Canadian Accounting Standards Oversight Council since 2013, was Chair of the Canadian Accounting Standards Board and was a member of the International Accounting Standards Board from 2001 to 2007.
- **Murray Gold** is a leading legal practitioner and senior pension and benefits partner at Koskie Minsky LLP.
- **Uros Karadzic** is a senior actuary at Ernst and Young's People Advisory Services Reward practice, which includes pension, benefit and compensation consulting.

DRAFT

- **Paul Martin** is a Chartered Professional Accountant, Comptroller with the Government of New Brunswick and previously a partner with the national accounting firm of Grant Thornton LLP.

The panel was completely independent from government, and arrived at its advice based on its own analysis of this complex issue.

14. How much did you pay the panel members? Do you think that money was justified?

The total cost of the panel was $221,113. This included compensation and travel expenses for the four panelists, as well as procurement. These rates are consistent with the Agencies and Appointments Directive, which specified up to $2,000 per day for appointees with unique and specialized expertise, or urgent issues affecting government priorities and requiring intense time commitments over a short period of time.

Commented [AT7]: Need to confirm with OPCD

The panel members have expertise in the areas of jointly sponsored pension plan governance, actuarial modelling for pension plans and public sector accounting standards, and provided independent advice on how to move forward with how Public Sector Accounting Board standards should be applied to current and potential future net pension assets.

• IESO Accounting

15. The Auditor General is critical of the IESO accounting changes. Is this another example of Ontario's 'funny math'?
(Has been approved by TBS & MOF ADMs on August 29, 2017)

Commented [AT8]: Top Question; updated Aug 29

No. The Independent Electricity System Operator (IESO) began recognizing its market accounts' assets (amounts due from power distributors) and liabilities (amounts due to power producers) in their financial results. IESO has chosen to recognize these markets accounts on its books for transparency reasons, as it better reflects its net financial position on behalf of the IESO-administered markets at year-end.

Public Sector Accounting Board standards encourage preparers and auditors to consider guidance in other accounting frameworks to address transparency and accountability:

- This accounting change was accepted by the IESO's independent external auditor, which issued an unqualified, or "clean," audit opinion. These

DRAFT

accounting changes were highlighted in the IESO's annual report which was published online in March 2017.

- Further, this accounting is consistent with the presentation used previously by the Ontario Power Authority (which was merged with the IESO on January 1, 2015) in its financial statements, which was not subject to qualification from the Office of the Auditor General at that time.

This change has no impact to the province's annual deficit, net debt or accumulated deficit.

As such, this accounting change has been supported by the professional accounting staff of the Office of the Provincial Controller.

We will continue to work with the Auditor General to build on the government's track record of responsible fiscal management and high quality financial reporting.

If pressed on rate-regulated accounting:

The IESO made the decision to adopt rate-regulated accounting because it better reflects the economic substance of certain types of expenses that may not be directly recovered through the normal revenue requirement model.

The IESO, like Hydro One and Ontario Power Generation (OPG), is regulated by the Ontario Energy Board. The IESO adopted rate-regulated accounting for its year ended December 31, 2016. The impact on the financial statements of the Province is a decrease of $82 million in the 2016-17 opening accumulated deficit and an increase in the 2016-17 annual deficit by $24 million.

This accounting change was accepted by the IESO's independent external auditor, which issued an unqualified, or "clean," audit opinion. These accounting changes were highlighted in the IESO's annual report which was published online in March 2017.

16. What is the Auditor General's argument with these changes?

Commented [AT9]: Updated Aug 29 using content approved byTBS/MOF ADMs

The Auditor General claims that the change to the IESO's accounting policy to recognize market account assets and liabilities is inappropriate, as these market accounts are not assets and liabilities of the Province.

However, the IESO has chosen to recognize these markets accounts on its books for transparency reasons, as it better reflects its net financial position on behalf of the IESO-administered markets at year-end.

DRAFT

Public Sector Accounting Board standards encourage preparers and auditors to consider guidance in other accounting frameworks to address transparency and accountability:

- This accounting change was accepted by the IESO's independent external auditor, which issued an unqualified, or "clean," audit opinion. These accounting changes were highlighted in the IESO's annual report which was published online in March 2017.
- Further, this accounting is consistent with the presentation used previously by the Ontario Power Authority (which was merged with the IESO on January 1, 2015) in its financial statements, which was not subject to qualification from the Office of the Auditor General at that time.

This change has no impact to the province's annual deficit, net debt or accumulated deficit.

As such, this accounting change has been supported by the professional accounting staff of the Office of the Provincial Controller.

We will continue to work with the Auditor General to build on the government's track record of responsible fiscal management and high quality financial reporting.

17. Between IESO and the pension issue from last year it seems like you just make up new rules when you don't like what you hear from the Auditor General. How do you respond to that?

We continue to move forward and present the Province's finances fairly and accurately and in accordance with Canadian Public Sector Accounting Board standards. Ontario has a strong track record of producing high-quality financial reports on a timely basis. The Auditor General's qualified opinion is based on a different interpretation of Public Sector Accounting Board standards for net pension assets and recognition of market accounts.

In many cases the application of accounting standards requires professional judgment. The Province's professionally accredited accounting staff are highly qualified practitioners, with a high degree of expertise in their field. A difference of opinion on the interpretation of accounting standards is not unique to this situation. Other jurisdictions have also experienced differences of opinion between preparers and auditors on complex accounting matters.

Commented [AT10]: Need OPCD to provide examples of jurisdictions.

18. Will you strike an expert panel to study to IESO issue, like you did last year for pension accounting?

We have no plans to establish a panel at this time.

The changes made to the IESO accounting were accepted by the IESO's audit committee, board of directors, and their independent external auditor. These changes were outlined in the IESO's 2016 annual report, which was published in March 2017. The Office of the Provincial Controller supports these changes.

19. Your reasons for change are yet again at odds with the Auditor General. Why should we believe you, when she is an independent officer of the legislature?

The Auditor General's responsibility is to conduct an independent audit and provide her audit opinion based on her own professional judgment. A difference of opinion on the interpretation of accounting standards is not unique to this situation. Other jurisdictions have also experienced differences of opinion between preparers and auditors on complex accounting matters.

Commented [AT11]: Need OPCD to provide examples of jurisdictions.

- **Fair Hydro Accounting (Other Matters)**

20. The Auditor General alleges the government withheld information from her on the accounting treatment for the Fair Hydro Plan. Why would she say that?

First, I would note that the accounting for the Fair Hydro Plan is separate and distinct from the Public Accounts we're here to talk about today.

Having said that, we respectfully disagree with the Auditor General's claim that the government withheld information from her or her office.

In March, the Ministry of Energy provided the Auditor General's Office with Cabinet documents from February and March related to the Fair Hydro Plan. These documents together provided a comprehensive overview of all elements of the plan that were known at that time, including accounting memos from both the Independent Electricity System Operator (IESO) and Ontario Power Generation (OPG).

On April 19, 2017, senior ministry officials from Treasury Board Secretariat, Finance and Energy met with the Auditor General and her staff to provide a briefing on the accounting for the Fair Hydro Plan.

Since that April 19 briefing, ministry officials from Treasury Board Secretariat have met with the Auditor General several times. At each meeting, officials included the Fair Hydro Plan and IESO accounting on the agenda. However, in each case the Auditor declined those requests to discuss this issue with her.

21. The Auditor General has some serious concerns about how you're accounting for the Fair Hydro Plan. What do you say to this?
(Has been approved by TBS & MOF ADMs on August 29, 2017)

Commented [AT12]: Top Question; updated Aug 29

The accounting for the Fair Hydro Plan is a separate and distinct issue to the Public Accounts for 2016-17 that we're here to talk about today.

However, under the Fair Hydro Plan accounting structure, the Province's net debt and annual surplus/deficit won't be negatively impacted since all costs are expected to be recovered through future rates.

The Ministry of Finance continues to work closely with Treasury Board Secretariat, the Ministry of Energy, Ontario Power Generation (OPG), the Independent Electricity System Operator (IESO) and external advisors to address the outstanding accounting related considerations which will be key to managing the fiscal impact of the Global Adjustment refinancing.

The Auditor General has also been briefed on the government's refinancing structure.

For further questions, I direct you to contact my colleague at the Ministry of Energy.

22. Why did you set up the Fair Hydro Plan accounting in this way?

Again, I would note that the accounting for the Fair Hydro Plan is separate and distinct from the Public Accounts we're here to talk about today.

However, in order to meet the needs of users, including the legislature and the public, for accountability in government reporting and decision making, it is essential that public sector financial statements reflect the economic substance of the government's activities.

All of the agreements necessary for the Global Adjustment (GA) Refinancing are not yet complete. The final accounting for the GA Refinancing will be completed once all of the elements are complete.

In analyzing the appropriate accounting treatment for the GA refinancing component of the Fair Hydro Plan on the province's consolidated financial statements in 2017-18 and forward, the province considered authoritative guidance issued by the Public Sector Accounting Board, as well as the accounting assessments of the Independent Electricity System Operator (IESO) and Ontario Power Generation (OPG) management, including the accounting opinions of their external auditors.

DRAFT

The complexity and unique structure of the GA Refinancing structure requires the use of professional judgment to ensure that key financial reporting objectives of transparency and accountability are best served.

Any further questions about the Fair Hydro Plan should be directed to my colleague the Minister of Energy.

Ontario's Fiscal Position

- **Balanced Budget**

23. The government is claiming the deficit has been reduced to $1B deficit for 2016-17 and that the budget will be balanced over the next three years. However, the AG is saying that the deficit for 2016-17 was more than $2B due to the treatment of pension assets, and the FAO has stated that the government's revenue forecast is more than $1B too "optimistic". Isn't the government really hiding a $3-4B deficit instead of a balanced budget? *(Information provided by MOF on August 29, 2017)*

Commented [AT13]: Top Question; updated Aug 29

There is no hidden deficit. In the *2010 Budget*, the government committed to eliminating the deficit and returning to a balanced budget by 2017-18. Through targeted, measured and fiscally responsible decisions, Ontario has restored its fiscal and economic strength.

Today we are confirming that the 2016-17 deficit of $1 billion is $3.3 billion lower than projected in the 2016 Budget and $0.5 billion lower than the interim projection in the 2017 Ontario Budget. This marks the eighth year in a row that Ontario has beaten its deficit target.

The success in eliminating the deficit is supported by a strong track record in managing spending -- having held average growth in spending to 2.3 per cent over the past five years.

In addition, over the last several years, the government's investments to strengthen economic growth have paid off. Ontario is a leader in economic growth, with our real GDP having outpaced that of all the G7 countries for the last three years. The strengthened economy has resulted in increased revenue for the Province – in fact, over the past two fiscal years, revenue has come in higher than projected, supporting Ontario's return to a balanced budget.

It is also important to point out that private sector forecasters have revised upward their expectations for the Ontario economy since the 2017 Budget, reflecting the growing strength of the Ontario economy. The government is also

taking steps to improve tax fairness and address the underground economy in order to ensure the integrity of the Province's revenues.

Finally, Ontario's fiscal plan incorporates prudence in the form of a reserve to protect the fiscal outlook against unforeseen adverse changes in the Province's revenue and expense. The reserve has been set at $0.6 billion in 2017-18, $0.6 billion in 2018-19, and $0.9 billion in 2019-20.

Balancing the budget means that the government can invest more in the programs and services that people rely on.

24. The Financial Accountability Office (FAO) just released a commentary saying your balanced budget is in question because it's based on optimistic revenue forecasts. Will you decrease spending or increase taxes to make up for this potential shortfall?

The government stands by the revenue forecast presented in the 2017 Budget. As recently presented in the 2017-18 First Quarter Finances, revenues are on track and the government is continuing to project a balanced budget in 2017-18.

Taxation revenue growth projected in the 2017 Budget aligns with growth actually experienced in recent years.

The government builds prudence into its economic forecast. Since the time of the 2017 Budget, private sector forecasters have revised up their economic growth projections for Ontario over the 2017-20 period, reflecting the strength in the Ontario economy.

25. How were you able to beat your deficit target in 2016-17?
(Has been approved by TBS & MOF ADMs on August 29, 2017)

Commented [AT14]: Top Question; updated Aug 29

In 2016-17 we maintained our focus on responsible fiscal management and investing in the right priorities. We are making progress on our economic plan by making investments to spur growth, transforming government and responsibly managing spending.

Average annual growth of total government spending has been held to 2.3 per cent for the past five years. As a result of growth in revenue that exceeded growth in program expense, as well as lower than forecast interest on debt, the deficit is $3.3 billion lower than projected in the 2016 Budget. It is also $0.5 billion lower than the interim projection in the 2017 Budget.

This is the eighth year in a row the government has beaten its deficit target.

26. You beat your deficit targets again. Aren't you just padding your estimates so you can beat them at the end of the day?

No. The government's fiscal projections are based on the best economic and fiscal information available at the time. They reflect a realistic and responsible plan to manage the Province's resources, while still protecting the vital services that Ontarians rely on.

Beating our deficit targets helps to keep interest on debt at a manageable level and protects future generations from rising interest costs, which could otherwise crowd out spending on government priorities.

The government recognizes that a fiscally sound approach to managing the Province's finances will provide the foundation for the long-term well-being and prosperity of Ontarians, and protect the public services that Ontarians rely on.

- **Debt**

27. You claim to have balanced the budget yet you keep piling on more debt. How do you plan to pay down the debt?
(Provided by MOF/OFA on August 30, 2017)

Commented [AT15]: Top Question; Updated by MOF/OFA Aug 30

We maintain a target of reducing the net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029-30. In the balanced 2017 Budget, the government is setting an interim target to reduce the net debt-to-GDP ratio to 35 per cent by 2023–24.

In a balanced budget environment, debt would be incurred primarily to invest in capital assets. We are making progress on our economic plan by making investments to spur growth, transforming government and responsibly managing spending – including addressing the underground economy and maintaining tax fairness. Our strategic investments in infrastructure provide economic benefits: a recent study by the Centre for Spatial Economics (C4SE) finds that, over the long term, real GDP in Ontario will rise up to $6 on average per one dollar of public infrastructure spending.

These strategic investments are creating jobs and contributing to economic growth. Ontario's GDP grew one per cent in the first quarter of 2017, outperforming that of Canada, the U.S. and all other G7 countries.Interest on Debt

28. Interest on debt is still massive and the Bank of Canada is expected to raise interest rates again this fall. How is the government preparing for this and will this affect your ability to maintain a balanced budget?

Commented [AT16]: Top Question; updated Aug 29

DRAFT

(Has been approved by TBS & MOF ADMs on August 29, 2017)

The increase in the Bank of Canada's policy rate reflects the growing strength of the Canadian and Ontario economy. Ontario's economy remains strong and has continued to grow and create jobs in an uncertain global environment.

A quarter-point increase in the policy rate is not likely to have a material impact on the Ontario economic outlook. The 2017 Ontario Budget anticipated that the interest rates would rise modestly,

As noted in the 2017 Budget, the Province's average cost of 10 year borrowing in 2017-18 is forecast to be 3 per cent. The impact of a 100 basis point increase in borrowing rates is forecast to be approximately $300 million. The interest rate forecast used in the Budget was prudent, and anticipated that long-term interest rates would rise as we progressed through the fiscal year.

29. The government is paying an enormous amount of money just paying the interest on its debt. How are you addressing this?

Interest on debt expense was $11.7 billion, which was $0.7 billion below the plan of $12.4 billion, due mainly to lower-than-forecast interest rates, lower-than-forecast deficit and cost-effective borrowing and debt management.

While interest costs have grown in absolute terms, they have steadily fallen as a percentage of Ontario's revenues since 2013-14. The interest on debt-to-revenue ratio is now at its lowest level from the peak of 15.5 per cent in 1999-2000.

Interest on debt-to-revenue is forecast to have been 8.4 per cent for 2016–17. This ratio is the lowest it has been in 25 years. It is forecast to decline to 8.2 per cent in 2017-18~~ and remain low throughout the outlook period to 2019–20~~.

We incurred increases to Ontario's debt during the recession for two reasons: to finance deficits and invest in capital assets. However we are making progress on our economic plan by making investments to spur growth, and are managing spending responsibly.

These strategic investments are creating jobs and contributing to economic growth. Ontario's GDP grew one per cent in the first quarter of 2017, outperforming that of Canada, the U.S. and all other G7 countries.

DRAFT

Our fiscal plan is working. Ontario is on track to balance the budget this year while making investments in the programs and services people and families rely on most.

30. You are spending more on interest payments for the debt than what you spend on post-secondary education. In fact, the payments equal more than 20 per cent of the health budget. How can you justify this?

Our priority following the 2008-09 recession was to achieve balance. In the first few years after the recession, the increase in net debt was primarily due to the deficit.

Approximately 61 per cent of the increase in net debt from 2008–09 to 2016–17 was due to the deficit, with net investments in capital assets responsible for the balance.

With balanced budgets, from 2017-18 onwards, the increase in net debt will be exclusively from investments in capital assets. In addition, the government is investing in public infrastructure which is vital to growing the economy and ensuring a high quality of life, whether people live in large, small, urban, northern or rural Ontario communities. Every $1 spent on public infrastructure can increase GDP by up to $6 in the long term. The balanced budget is giving the government the fiscal flexibility to do more to help people and spur economic growth.

Formatted: Normal, Line spacing: single, Don't adjust space between Latin and Asian text, Don't adjust space between Asian text and numbers

- **Most Indebted Subsovereign, Future Generations**

31. This government has a spending problem and Ontario is now the most indebted sub-sovereign borrower in the world. Why should we trust your plan?

With a growing economy and a balanced budget, this is the time to make investments in key services that matter most to people, like health care and education, while at the same time lowering costs for necessities like electricity and child care.

Ontario is on track to balance the budget this year while making investments in the programs and services people and families rely on most. This year and last, Ontario's debt-to-GDP ratio has improved from 39.6 per cent in the 2016 budget, to a forecasted 37.8 per cent in 2016-17, and it continues to track downward.

Our plan is also helping to grow the economy, with the largest investment in public infrastructure in the Province's history — more than $190 billion over 13 years starting in 2014-15. New schools, hospitals and transit projects are

DRAFT

improving quality of life and creating jobs in communities across Ontario.

Supporting ongoing economic growth is a top priority and we are encouraged by the influx of many innovative and dynamic businesses that are investing across the Province, bringing good jobs, higher wages and greater prosperity to our communities. We will continue to implement our balanced plan to build a healthy and sustainable economy for all of Ontario.

32. Some say you are unfairly placing the burden of debt on future generations through things like your Hydro rebate plan and your failure to address the Province's growing debt. How do you respond?

With a growing economy and a balanced budget, this is the time to make investments in key services that matter most to people, like health care and education, while at the same time lowering costs for necessities like electricity and child care.

We have heard from people across the Province that investing in greener generation, transmission and distribution have increased electricity bills too quickly, which is why our plan will ensure costs are distributed more fairly over time. The plan significantly reduces rates today and ensures fairness and predictability for tomorrow.

Most of Ontario's electricity generators are under 20-year contracts, but many of these facilities are expected to generate power after their contracts end. These are long-term assets for our electricity system. We are bringing forward some of the net value of these assets by spreading a portion of the costs of these contracts over a longer period.

With respect to debt, we remain committed to reducing the net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029-30. In the balanced 2017 Budget, the government is setting an interim target to reduce the net debt-to-GDP ratio to 35 per cent by 2023–24

- **Revenue**

33. How much money did you bring in in 2016-17?

Provincial revenues increased by $4.6 billion, or 3.4 per cent over the previous year. This increase was due in part to nominal GDP growth of 4.6 per cent in 2016, which contributed to higher taxation revenues. There were also higher

DRAFT

transfers from the federal government – including the Canada Health Transfer, Canada Social Transfer and funding for infrastructure projects.

Taxation revenues were $2.5 billion, or 2.8 per cent higher-than-projected in the 2016 budget. Corporate tax revenues were $2.8 billion higher. This was due to stronger-than-expected revenues from tax returns. Sales tax revenues were $0.8 billion higher, due to Ontario's larger share of the HST, and the strong housing market contributed $0.7 billion more in land transfer tax revenues.

Transfers from the Government of Canada were $0.6 billion lower than the 2016 Budget forecast. This was mainly due to lower-than-expected funding for infrastructure projects and other payments for government agencies, hospitals, school boards and colleges.

Fees, donations and other revenues from broader public sector organizations were $0.6 billion higher than the budget forecast, mainly due to higher-than-expected revenues from non-provincial sources for hospitals, and higher international tuition fees.

- **Asset Sales**

34. One-time asset sales are a way to bring in money, but isn't this burning the furniture to heat the house when it comes to a long-term revenue strategy?

We are committing money made from any asset sales to the Trillium Trust, which is helping to fund transit, transportation and other key infrastructure projects across Ontario.

The government made more than $200 million from the sale of the LCBO head office lands, along with $2 billion in gross proceeds from the second offering of Hydro One common shares in April 2016. In addition, the sale of the government's interest in Hydro One Brampton Networks resulted in a gain of $109 million.

These proceeds have also been committed to the Trillium Trust for infrastructure projects that help the economy grow, and create jobs for Ontarians.

See section: Trillium Trust for more information.

- **Transfers from the Federal Government**

35. Transfers from the federal government were lower than expected. Aren't you banking on another entity to get your fiscal house in order?

DRAFT

The Government of Ontario, like all Provinces in Canada, receives funding from the federal government. These transfers are done on an ongoing basis to help provide programs and services.

Transfers from the Government of Canada were lower than the 2016 Budget forecast by $0.6 billion. This was mainly due to lower-than-expected funding for infrastructure projects and other federal payments including transfers to government agencies, hospitals, school boards and colleges. This decline was partially offset by new transfers under the strategic investment fund for affordable housing and post-secondary education and training.

- **Revenue from International Tuition Fees**

36. International tuition fees helped the Province's bottom line but isn't this on the backs of young people who want to learn here?

MAESD to provide response

- **Program Spending**

37. Program spending increased again this year. Why?
(Has been approved by TBS & MOF ADMs on August 29, 2017)

Commented [AT17]: Top Question; updated Aug 29

Program spending in 2016-17 was $141.7 billion, down $0.1 billion from the 2016 Budget. Average annual growth of total government spending has been held to 2.3 per cent for the past five years.

Healthcare represents the largest share of government program spending at $56 billion. Transformation efforts continue to make the sector more effective and sustainable while continuing to improve access for patients, especially the increased demands from an aging and growing population. The government has invested in new drugs, technologies, community and home care, long term care homes, mental health, physicians' services and specialized cancer treatments.

Other increases include:

- $26.6 billion in education, mainly due to the introduction of full-day kindergarten;
- $16 billion in children's and social services, due to increased annual social assistance rates as well as investments in developmental services, autism and complex special needs programs, as well as the Ontario Child Benefit;

DRAFT

- $10.1 billion in post-secondary and training, due to enrolment growth in colleges and universities along with increased student financial assistance programs and increases in capital funding for post-secondary institutions;
- $4.6 billion in justice sector expenses due mainly to the upload of court security costs from municipalities, compensation for the Ontario Provincial Police and correctional services programs, as well as improved access to legal aid.

38. You finally balanced the budget and now you're spending more on expensive election promises like free pharmacare. Why aren't you paying down debt instead?

With a growing economy and a balanced budget, this is the time to make investments in key services that matter most to people, like health care and education, while at the same time lowering costs for necessities like electricity and child care.

Providing more access to vital services isn't just an investment in our future. It's the right thing to do.

- **Credit Rating**

39. Does a qualified opinion impact the Province's credit rating?
(Has been approved by TBS & MOF ADMs on August 29, 2017)

Commented [AT18]: Top Question; updated Aug 29

The Province's financial results show that the government has once again beaten its annual deficit targets. In April 2017, we delivered our first balanced budget since the global recession and we are on track to do so again next year and the year after.

The rating agencies will assess whether the underlying factors that lead to a qualified opinion directly affect the creditworthiness of the Province. However, there were no credit rating implications in 2016 when the Province received a qualified audit opinion on its 2015-16 Public Accounts. Qualified opinions by the Auditor Generals of British Columbia and Quebec have been made in their respective provinces in the past, with no negative impacts on their province's credit ratings.

In 2017 the C.D. Howe Institute, an independent research organization that assesses the fiscal planning and reporting of governments in Canada, also commented positively on the financial reporting practices of Ontario relating to its fiscal reporting activities that include Public Accounts, the annual Budget and Estimates.

DRAFT

40. What do you say to the credit rating agencies that have highlighted provincial debt as an area of credit weakness?

According to our first quarter finances released last month, we continue to project a balanced budget in 2017-18, unchanged from the 2017 Budget.

With stronger-than-expected first quarter economic growth and the government's responsible approach to fiscal management, we can continue to invest in programs and services that help people across the Province.

Ontario's economy continues to grow at a steady pace despite an uncertain global environment. Most key economic indicators show that growth continues in the second quarter. Our plan is working.

We remain committed to reducing the net debt-to-GDP ratio to its pre-recession level of 27 per cent, with current projections showing that this will be achieved by 2029-30. In the balanced 2017 Budget, the government is setting an interim target to reduce the net debt-to-GDP ratio to 35 per cent by 2023–24.

41. What is your credit rating as it stands today?

Following the release of the 2017 Budget, all four rating agencies have confirmed Ontario's long-term credit ratings. This reflects rating agencies' confidence in our government's plan to grow Ontario's economy and create jobs for Ontarians.

If pressed:
Ontario's ratings are:

	Long-Term	Short-Term
Moody's:	Aa2	P-1
DBRS:	AA (low)	R-1 (mid)
Fitch:	AA-	F1+
Standard and Poor's:	A+	A-1

- **C.D. Howe Institute**

42. Why does the C.D. Howe Institute weigh in on the government's fiscal situation?

The C.D. Howe Institute is an independent not-for-profit research institute that supports economically sound public policies. It is widely considered to be Canada's most influential think tank and is a trusted source of essential policy

DRAFT

intelligence, distinguished by research that is nonpartisan, evidence-based and subject to definitive expert review.

Each year the C.D. Howe Institute produces a report on its assessment of the fiscal planning and reporting practices of senior Canadian governments. The institute observes that financial reports are a vital tool for understanding governments' plans and activities.

43. Why does this matter?

We consider reports like the C.D. Howe's Fiscal Accountability of Canada's Senior Governments important because they are written by independent experts. Studies such as this are essential for governments to continuously assess and improve their financial planning and reporting.

Ontario has received high marks for prominently presenting revenue and expense projections in the Budget that are on the same Public Sector Accounting Basis as the Public Accounts and Estimates.

The C.D. Howe Institute has recognized Ontario as one of the leading jurisdictions in Canada when it comes to fiscal accountability

Trillium Trust

44. What is the Trillium Trust?

The Trillium Trust was introduced in the 2014 Budget and provides for the dedication of prescribed net proceeds from the sale of designated assets to support key infrastructure priorities, such as roads, bridges and public transit.

The Trillium Trust is appearing for the first time in Public Accounts because the first drawdowns were made in 2016-17. The Trillium Trust Act, 2014 requires that all expenditures made under the act to support infrastructure investments are to be reflected in the Public Accounts.

Designated assets include the Province's shares of Hydro One and Hydro One Brampton, as well as the LCBO head office lands, the OPG head office building and the Lakeview lands.

We expect the Trillium Trust to be drawn down by about an additional $400 million in 2017–18.

DRAFT

The Ministry of Finance shows spending out of the Trillium Trust, and ministries that are benefitting from projects that are funded from the trust are reflected in this year's Public Accounts. These figures are included in Volume 1 of Public Accounts.

The funding will help support initiatives, such as GO Regional Express Rail (GO RER), the Hurontario Light Rail Transit (LRT) and the Ontario Community Infrastructure Fund (OCIF).

45. The Public Accounts show a drawdown of $260 million from the Trillium Trust. What did you spend the money on?
(Has been approved by TBS & MOF ADMs on August 29, 2017)

Commented [AT19]: Top Question; updated Aug 29

The government began allocating proceeds from the Trillium Trust in 2016-17 to help support infrastructure initiatives such as GO Regional Express Rail (GO RER), the Hurontario Light Rail Transit (LRT) and the Ontario Community Infrastructure Fund (OCIF).

We expect the Trillium Trust to be drawn down by about an additional $400 million in 2017–18.

Our strategic investments in infrastructure provide economic benefits: a recent study by the Centre for Spatial Economics (C4SE) finds that, over the long term, real GDP in Ontario will rise up to $6 on average per one dollar of public infrastructure spending.

46. How much is currently in the trust?

Commented [AT20]: To confirm figures

In March 2017, the government credited the Trillium Trust with an additional $538 million in net revenue gains from the sale of Hydro One shares in 2016, bringing the total amount in the Trust to $5.3 billion.

The Trillium Trust was also credited with $246 million from the sale of the LCBO head office lands, and $1.35 billion in net proceeds from the sale of Ontario's shares in General Motors.

Like most large infrastructure investments, initial spending on projects is focused on planning, design, property acquisition and other activities to get projects construction-ready.

DRAFT

As this preliminary work is completed and construction activity gets underway, further project requirements will be identified that will be funded from the Trillium Trust in subsequent years.

The government is committed to investing the full amount from the Trillium Trust to support transit, transportation and other priority infrastructure.

47. If the Province raised about $2 billion in the secondary offering of Hydro One shares in 2016, why was only $538 million credited to the Trillium Trust?

Commented [AT21]: Updated Aug 30

The *Trillium Trust Act, 2014*, provides for the dedication of net revenue gains to the Trillium Trust associated with the sale of designated assets to support investments in transit, transportation and priority infrastructure across the Province.

The net revenue gains credited to the Trillium Trust from the secondary offering of Hydro One shares are derived from the gross proceeds, less fees/expenses incurred and less the book value of the shares sold, not including the shares purchased by OPG.

The government will move forward with regulations to credit the Trillium Trust with the net revenue gains from the shares purchased by OPG in the future.

The Province also used the $1.3 billion in proceeds related to the book value of the Hydro One shares sold to pay down the Province's debt and other payables with the Ontario Electricity Financial Corporation (OEFC).

Through the broadening of Hydro One ownership, the Province is meeting its target to generate $4 billion in net revenue gains that, through the Trillium Trust, will be reinvested in infrastructure under Moving Ontario Forward, and $5 billion to reduce debt.

Digital Tools/Open Government

Commented [AT22]: Updated Aug 30

48. What is the government doing to be transparent in regards to Public Accounts?

As part of our commitment to openness and transparency, we are using data visualization tools to help Ontarians better understand the Province's finances.

This year's tools are available at Ontario.ca/publicaccounts and include:

DRAFT

- Interactive data visualization tools that graphically present details on asset and expense information contained in Volume 1;
- Fully sortable data tables that summarize the financial statements from Volume 2, and the detailed scheduled payments from Volume 3; and
- Downloadable open data sets that provide the five-year trend for government revenue by source, revenue by sector, and statement of operations. This year's total number of open data downloads is 11, up from five last year.

These tools help make the Province's finances easier to understand, access and use, and are part of Ontario's commitment to creating a more open and transparent government.

49. How does this help the average Ontarian?

The more information we can provide to Ontarians about where their tax money is going, the better. That is why the government is providing new digital tools online to help Ontarians better understand their government's finances. Presenting the Public Accounts data in innovative, visual formats is part of Ontario's commitment to Open Government.

50. What are Open Data sets?

The Ontario government is committed to leading the most open, transparent, and accountable government in the country. Public access to information and opening up government data supports this commitment. Ontario is the first province in Canada to adopt the International Open Data Charter.

The International Open Data Charter contains a set of six principles that will build on Ontario's open by default data policy to increase civic participation, openness and accountability.

To date, we have released more than 585 open data sets and the Open Data sets for Public Accounts are being added to the catalogue. It can be found at www.ontario.ca/opendata

Subject:	RE: Revised Version of Provincial Support Arrangements
Date:	Tuesday, June 20, 2017 11:40:52 AM

Hi all

I don't have any comments on the revised version, however, I do have a proposal that may address a number of the practical issues that were discussed yesterday, assuming the occurrence of an indemnification event.

OPG provides a guarantee to the Trust, somewhat similar to their initial draft, the Province provides OPG an indemnity against the aforementioned guarantee. Given that the current language refers to "each financing entity" perhaps that what we are doing right now, however, I am not very clear on that.

Feel free to shoot this down, I am also cc'ing Cindy since this approach may address some of the accounting concerns that may arise from the need for the Trust to be independent from the Prince yet be backstopped by a Provincial Protection and Assurance.

Thanks

Ken k

Subject: FW: Revised Version of Provincial Support Arrangements

Please see attached, for your review and comment, a revised draft that Stephen prepared based on our conversation yesterday. MOF Legal has no further comments on this draft.

I think that the two significant changes to note are:

1. The addition of the concept of "third party claims" as the driver of the indemnity section, meaning that the Indemnitee (which is a Financing Entity) can only bring a claim after a claim has been brought against them by a creditor.
2. The addition of the concept of conditions that would be required to step in in the event of funding mismatches, such as a market disruption event. As discussed yesterday, this provision is soft, so it is not clear what exactly this commits the Province to, but does give some comfort based on the language in this section.

Since there is a large group on this email, I think the best approach is to wait until noon for comments. If there are none by then, I will let Stephen and Energy know that we are ok with the draft, and Scott Nelms and whoever else needs to be involved with opening the discussions with OPG can use this version.

Hi. As a follow-up to our meeting earlier today, here is a revised version of the draft term sheet. The blackline shows changes from the June 14th version. Please let me know if you have any questions or concerns with the comments – including the deletion of the 'privilege' reference. Scott has the OFA's green light to share the draft term sheet with OPG. Please send along any final thoughts as soon as you can. The plan will be for Scott to send it out tomorrow morning. Thanks, Steve

Subject:	RE: Term Sheet - Provincial Support Agreement relating to the Fair Hydro Trust
Date:	Tuesday, April 25, 2017 10:01:02 AM

Hi Mike,
Would you like to have a call a bit later this morning, i.e. 11 or so to discuss the Support Agreement and any further information you may have obtained about it. After that we can follow up further with Energy Legal on it and maybe Blakes who is the province's outside counsel.
The range of beneficiaries as outlined in the draft term sheet is very broad. I would think that if the Province were to provide a financial guarantee it would be with respect to obligations arising under specific agreements, i.e. payment of principal interest on bonds, notes, credit facility and the guarantee would be specifically written in favour of the lenders, or the swap counterparties under a specific swap agreement or transaction. For example "credit enhancers" seems to be a pretty general term to be using as a "beneficiary" of a provincial guarantee. It's a bit difficult to provide comments on the guarantee scope when we are not familiar with the proposed transaction. Also, as noted we don't have experience with the Performance Guarantee aspect and how that would work.
Also, footnote 2 references a requirement that would be in regulations. We did note an unusual provision in the draft legislation which references the Province not taking any action that might impair the investment asset. I think this sort of provision is found in the U.S. state legislation authorizing the Duke Power and Long Island Power Authority transactions that are examples of similar transactions according to Energy.

The plan is to send this document to the Dealers for their input once we get comments or concurrence from your group. Stu Preston will coordinate the discussions with the Dealers on this issue from our side. Would it be yourself or someone else from your group addressing this issue from the OFA perspective? I expect there will be some back and forth on this issue and eventually rating agency input as well.
John

Hi,

I just wanted to follow up on this and see if there is an appetite to discuss this amongst our smaller group at this point. Energy is briefing up on this draft and we probably should meet with them and our outside counsel at Blakes soon to come to a decision about how this draft will be communicated to the other parties to this transaction.

Subject: Updated Draft Provincial Support Discussion Document

Please find attached a markup of the proposal from OPG regarding the Provincial Support Agreeement.

This markup is the result of discussions between us at MOF Legal, lawyers from Energy Legal and the Province's external counsel at Blakes.

The changes are significant and we would like to get your feedback on our proposed approach.

Perhaps we can have a discussion first with this group, and then a broader discussion with the Energy team and Stephen Ashbourne from Blakes.

Please let us know when you have had a chance to review and are available to discuss.

Subject: financing bullets

Hi Gadi, Mike,
As discussed, we have drafted some language to insert into the Fair Hydro Plan Treasury Board and Cabinet Submissions. Please take a look and let us know if this works from your perspective:

Draft Language

The Ministry has been worked closely with the Ontario Financing Authority (OFA) and TD Securities (TD), as the Province's external financial advisor, on the financing structure (i.e., legislation, provincial guarantees, OPG's equity injections and IESO's enhanced credit facilities).

In particular, the proposed legislation enables a structure that OFA and TD believe will enable financing at a reasonable cost. Key elements that support this financing structure include:

)PG issuances of subordinated debt to the SPV representing up to 49% of total borrowing; and

Conditional (springing) guarantees by the Province to provide a backstop in the event of specific

and limited events (e.g., changes to legislation that harm investor interests).

Please note that the ability to finance and the cost of financing will only be known with certainty once OPG takes this structure to market.

Happy to discuss further as needed.

Thanks,

Scott

Subject: financing bullets

Hi Gadi, Mike,

As discussed, we have drafted some language to insert into the Fair Hydro Plan Treasury Board and Cabinet Submissions. Please take a look and let us know if this works from your perspective:

Draft Language

The Ministry has been worked closely with the Ontario Financing Authority (OFA) and TD Securities (TD), as the Province's external financial advisor, on the financing structure (i.e., legislation, provincial guarantees, OPG's equity injections and IESO's enhanced credit facilities).

In particular, the proposed legislation enables a structure that OFA and TD believe will enable financing at a reasonable cost. Key elements that support this financing structure include:

- OPG issuances of subordinated debt to the SPV representing up to 49% of total borrowing; and
- Conditional (springing) guarantees by the Province to provide a backstop in the event of specific and limited events (e.g., changes to legislation that harm investor interests).

Please note that the ability to finance and the cost of financing will only be known with certainty once OPG takes this structure to market.

Happy to discuss further as needed.

Thanks,

Scott

Looks fine to me, subject to any comments that Mike might have. Is it OK if we run this past TD, given that we've got their name in it?

Subject: Re: DRAFT IESO FH credit letter
Date: Thursday, May 11, 2017 5:03:59 PM

Hi Ken.

Leaving out IESO for now.

I think that there would be different challenges for this to be done through OEFC.

One is having this associated with OEFC's legacy mandate.

Another is the 50 bps DGF charged to OEFC. That may not come into play for any given period, but if it does, OEFC would either have to charge that to IESO to stay whole, or carve this out from the DGF requirement, which would be an additional approval, and could raise the whole issue of why OEFC pays a DGF in the first place, or the appropriate size.

It would be in many ways simpler to have this facility provided by the OFA.

Ron

Subject: RE: DRAFT IESO FH credit letter

Hi Anthony,

Staff had a few suggestions/comments.

As discussed on the last call, we had talked about it being cleaner to have a separate facility for the FHP. The draft letter seems to have a potential for IESO drawing both on the new facility and the existing one. While drawing on the existing facility might be needed on an interim basis, it would seem cleaner and more transparent to have that possibility only until a new, separate facility is in place.

Subject: DRAFT IESO FH credit letter

See attached draft letter we hope to issue this week – for your comments (will appreciate by Thursday this week if any).

I did speak with Moody's on April 28 to obtain their feedback.

Call me @ 905.403.6944 to discuss (…Ken can we discuss the interest exp/income flows when you have a moment).

As mentioned the current $975M supports the RPP today which will be transitioned to the new FH going forward – for this draft as discussed with my CFO I have left the $975M as is but will seek to use for FH too.

Regards.

> I have concerns with the weighted average calculation of both the benchmark and actual issuance including the debt issued to the Trust by OPG funded by the 44% equity injection given that there are no market forces in play with regard both issuance and

funding of this tranche, at least from an OPG perspective.

The only way in which this tranche is acceptable for performance inclusion is by OPG linking the yield on this debt to what was issued to the markets by the Trust. For example the debt from the equity injection is X bps above or below what was issued in the markets for equal tenors. Even so a linked component in the benchmark, in my opinion, adds limited value.

Thanks

Hi All,

Attached is a briefing deck for the Minister of Energy on the FHP Provincial Guarantee. The OFA has been asked to provide review and comments by EOD today.

They're also looking for an OFA attendee for the Minister of Energy's briefing next week, so please let me know if any of you would be willing to attend.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: Draft Provincial Guarantee Deck

Hi Matt,

ENERGY has asked us to prepare a product for a Minister's briefing next week on the OFHP. They wanted a specific product on the Provincial Guarantee. Given the main OFA folks working on this file are on vacation, I've prepared the attached draft deck. I was hoping you could circulate this to folks internally for review and comment. We've been asked to provide a draft deck to the DMO tomorrow. Could you please aim to provide any OFA comments by end of day today.

Also, is there someone from the OFA who could attend next week's briefing to answer questions as required? Please let me know who that might be.

Thanks in advance,
Keley

> **Subject:** Re: Drafts of accounting memos
> Thanks, Ken. Could you forward the OPG paper. As you've suggested, I'm particularly interested in how much they plan to reward themselves as performance fees. The first year is a bit of an easy one for them, as Energy, and I

agree with this, has set the model based on 5% interest rates, and we know that they will borrow at rates far below that at the beginning, firstly because of where rates currently are, and, secondly, because they will be borrowing in terms far shorter than 30-years.
As for your comments on the ministry having approval rights, or a veto, on the financing plan, while that entirely makes sense in the world that I live in, I don't think, and I'll defer to you and Cindy on this, it works on the accounting/consolidation side.
Thanks again,
Gadi

Hi Cindy
Thanks for forwarding these, I have a few comments as follows.
Happy to discuss.
Thanks
Ken K
General Comments - OPG Accounting Considerations
The paper is very OPG centric with little or no acknowledgement of the role of the other participants in the Fair Hydro Plan. It appears that OPG intends to change a performance fee and management fee as the Financial Service manager. While the latter is reasonable since the Trust will most likely leverage existing OPG resources for front and back office functions, a performance fee will only add to the value of the regulatory asset to be repaid by future ratepayers.
The performance fee appears to be based on OPG beating a pre-set benchmark cost of borrowing for the Trust. I am not sure that ratepayers should be on the hook for this, if OPG beats the benchmark the benefits should be passed on to the ratepayers not retained by the company. The reward for performance exceeding the benchmark should be limited to the compensation of OPG/Trust trading floor staff and be part of the overall management fee OPG charges for managing the Trust. The role of the Financial Services Manager should not be conflated by OPG with managing a mutual or hedge fund where gains from beating a benchmark accrue to the managing entity. Plus

this also raises the question of who sets the benchmark.
The overall concept should be of fiscal neutrality, where the Trust capitalizes the actual interest incurred annually plus a reasonable administration fee paid to OPG. This will ensure that future ratepayers are not overly burdened.
Specific Comments

- Page 1 second bullet; as mentioned above rewards for performance should be limited to compensation for trading floor staff, not a performance fee for OPG, adopting the former will result in a substantially lower impact to ratepayers when compared to the latter.
- Page 2 last bullet: If the role of Financial Service Manager is taken away from OPG and given to another entity wouldn't it make sense for that entity to take on the debt incurred to date as long as that is practically feasible. It's not particularly efficient for two separate entities to be managing debt incurred for the same purpose and the ratepayers to be saddled with two sets of management fees.
- Last item on page 2, Purpose and Design of the Trust: the purpose of the Trust is not to allow OPG to earn a fee, rather to exist as a vehicle to smooth the GA costs between current and future ratepayers. OPG's fees should be limited a to a reasonable management fee and the interest fee accruing from the debt issued to the Trust funded by the 44% equity injection.
- Page 3, Financing Plan, 2nd and 3rd bullets: the ministry should have some approval authority over the Financing Plan and giving OPG the ability to unilaterally amend the plan is problematic.
- Page 3 last bullet: OPG having the power to reject purchasing the investment asset places the entire Fair Hydro Plan in jeopardy, including the possibility of a large regulatory asset being included in IESO's financial statements and by extension in the Province's PA.
- Page 4, the analysis under "Assessment": fees and Financing Plan, pls see comments above.
- Page 5, 1st bullet Fees: already covered in previous comments
- Page 5, 2nd bullet: OPG should recognize that the only 5% of its own debt is at risk, the balance 44% being funded via the equity injection the risk resides with Province since there is expectation on the part of the latter that the equity injection will also be repaid in proportion to the repayment of the debt the Trust owes to the markets.
- Page 5, 3rd bullet: wouldn't direct funding from the Province to OPG, impact the sanctity of the GBE model? In the event of a market disruption, a better approach maybe for IESO to continue accumulating the regulatory asset, however, there are accounting implications re including said asset in the Province's PA upon consolidation.
- Page 6, last two items relating to "Assessment": I am a little confused regarding OPG's exposure to variable returns, assuming the model includes a tru-up mechanism that allows the Trust to recover any variation from the pre-determined benchmark borrowing rate, the risk arising from a variance is

entirely borne by the ratepayers.

- Page 9, item 4: As mentioned previously the Province should have some authority over the Financing Plan including the ability to veto provisions and/or amendments.
- Page 9, item 6: equity injection is from the Province not OEFC.
- Page 10, item 8 (b) and (c): benchmark vs. actual previously discussed.

Thanks, Ken. Could you forward the OPG paper. As you've suggested, I'm particularly interested in how much they plan to reward themselves as performance fees. The first year is a bit of an easy one for them, as Energy, and I agree with this, has set the model based on 5% interest rates, and we know that they will borrow at rates far below that at the beginning, firstly because of where rates currently are, and, secondly, because they will be borrowing in terms far shorter than 30-years.

As for your comments on the ministry having approval rights, or a veto, on the financing plan, while that entirely makes sense in the world that I live in, I don't think, and I'll defer to you and Cindy on this, it works on the accounting/consolidation side.

Thanks again,
Gadi

Hi Cindy
Thanks for forwarding these, I have a few comments as follows.
Happy to discuss.
Thanks
Ken K
General Comments - OPG Accounting Considerations
The paper is very OPG centric with little or no acknowledgement of the role of the other participants in the Fair Hydro Plan. It appears that OPG intends to change a performance fee and management fee as the Financial Service manager. While the latter is reasonable since the Trust will most likely leverage existing OPG resources for front and back office functions, a performance fee will only add to the value of the regulatory asset to be repaid by future ratepayers.

The performance fee appears to be based on OPG beating a pre-set benchmark cost of borrowing for the Trust. I am not sure that ratepayers should be on the hook for this, if OPG beats the benchmark the benefits should be passed on to the ratepayers not retained by the company. The reward for performance exceeding the benchmark should be limited to the compensation of OPG/Trust trading floor staff and be part of the overall management fee OPG charges for managing the Trust. The role of the Financial Services Manager should not be conflated by OPG with managing a mutual or hedge fund where gains from beating a benchmark accrue to the managing entity. Plus this also raises the question of who sets the benchmark.

The overall concept should be of fiscal neutrality, where the Trust capitalizes the actual interest incurred annually plus a reasonable administration fee paid to OPG. This will ensure that future ratepayers are not overly burdened.

Specific Comments

- Page 1 second bullet; as mentioned above rewards for performance should be limited to compensation for trading floor staff, not a performance fee for OPG, adopting the former will result in a substantially lower impact to ratepayers when compared to the latter.
- Page 2 last bullet: If the role of Financial Service Manager is taken away from OPG and given to another entity wouldn't it make sense for that entity to take on the debt incurred to date as long as that is practically feasible. It's not particularly efficient for two separate entities to be managing debt incurred for the same purpose and the ratepayers to be saddled with two sets of management fees.
- Last item on page 2, Purpose and Design of the Trust: the purpose of the Trust is not to allow OPG to earn a fee, rather to exist as a vehicle to smooth the GA costs between current and future ratepayers. OPG's fees should be limited a to a reasonable management fee and the interest fee accruing from the debt issued to the Trust funded by the 44% equity injection.
- Page 3, Financing Plan, 2nd and 3rd bullets: the ministry should have some approval authority over the Financing Plan and giving OPG the ability to unilaterally amend the plan is problematic.
- Page 3 last bullet: OPG having the power to reject purchasing the investment asset places the entire Fair Hydro Plan in jeopardy, including the possibility of a large regulatory asset being included in IESO's financial statements and by extension in the Province's PA.
- Page 4, the analysis under "Assessment": fees and Financing Plan, pls see comments above.
- Page 5, 1st bullet Fees: already covered in previous comments
- Page 5, 2nd bullet: OPG should recognize that the only 5% of its own debt is at risk, the balance 44% being funded via the equity injection the risk resides with Province since there is expectation on the part of the latter that the equity injection will also be repaid in proportion to the repayment of the debt the Trust owes to the markets.
- Page 5, 3rd bullet: wouldn't direct funding from the Province to OPG, impact the sanctity of the GBE model? In the event of a market disruption, a better approach maybe for IESO to continue accumulating the regulatory asset, however, there are accounting implications re including said asset in the Province's PA upon consolidation.
- Page 6, last two items relating to "Assessment": I am a little confused regarding OPG's exposure to variable returns, assuming the model includes a tru-up mechanism that allows the Trust to recover any variation from the pre-determined benchmark borrowing rate, the risk arising from a variance is entirely borne by the ratepayers.

- Page 9, item 4: As mentioned previously the Province should have some authority over the Financing Plan including the ability to veto provisions and/or amendments.
- Page 9, item 6: equity injection is from the Province not OEFC.
- Page 10, item 8 (b) and (c): benchmark vs. actual previously discussed.

> Hi Ken,
> Thanks for the additional information. I have already sent the draft to Energy Legal and will send it to Steve Ashbourne this morning.
> Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.
>
> - <!--[if !supportLists]-->- <!--[endif]-->The last sentence in the opening italics that “the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate” has been deleted.
> - <!--[if !supportLists]-->- <!--[endif]-->It has been changed back to a guarantee from an indemnity.
> - <!--[if !supportLists]-->- <!--[endif]-->The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the “performance” guarantee is added into (E), i.e. IESO’s role.
> - <!--[if !supportLists]-->- <!--[endif]-->Concept of “materiality” has been deleted for (B) and (D).
> - <!--[if !supportLists]-->- <!--[endif]-->A concept of “any other discriminatory action including OEB Orders has been introduced.
> - <!--[if !supportLists]-->- <!--[endif]-->The Guarantee wording includes the word “assume” as opposed to just “pay”.
> - <!--[if !supportLists]-->- <!--[endif]-->Also, the guarantee has reverted to some of the very general wording that the Province is guarantee “all of the obligations of the Financing Entity” not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??
> - <!--[if !supportLists]-->- <!--[endif]-->Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long

as documents are consistent – but who decides?

<!--[if !supportLists]-->- <!--[endif]-->Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well. Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

Malle

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have

removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.
The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in
IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.
Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.
Thanks
Ken k

Hi Ken,
Thank you for passing on the draft. I should send this on to Energy Legal as well in case they have not received it yet. Do you know if Steve Ashbourne of Blakes has been reviewing the term sheet recently and been involved in discussions on this?
This is the first version of the term sheet that we have received since it was sent over to OPG on late June. After that there was a response from Torys dated June 30th with some high level comments on the revised term sheet and an internal Provincial call to discuss the Province's response. Subsequently there was a meeting of representatives of the Province and OPG on July 13th which Toby and also Tom McKinlay of Energy legal attended to discuss considerations regarding the guarantee. It looks like there have been some further discussions regarding the term sheet and understand that there may

have been a meeting on the business side last week but MOF LSB was not asked to participate. In order to provide comments on this term sheet, it will be helpful for us to find out more about what the business discussions have been and what approach the Province wishes to take and also consult with Energy Legal and Blakes.
Is there a track changes version of this term sheet from June? Also, as I recall back in early July, we were going to ask OPG to provide to us some of the more detailed documents and drafts that would be associated with this guarantee such as the Master Trust Indenture, etc. Do you know if OPG has shared any of that with the Province?
Thanks.

Hi John
Just to follow up on Andrew Maciel's commitment to provide us with a revised term sheet for the guarantee reflecting yesterday's discussion, I was wondering if that can be done EOD Monday. I had a chat with Gadi and given some upcoming internal meetings at senior levels it would be helpful to provide the revised guarantee in front of decision makers.
Thanks
Ken k

Hi all

I got comments back from Steve on the term sheet today. I haven't reviewed them yet and will send them to you on Monday. There seem to be a lot of significant issues and as noted previously we don't have copies of any of the draft documents so it makes it very difficult to provide, comments on the term sheet and TB submission.
Thanks

Malle

On Aug 17, 2017, at 9:23 AM, Hanslep, Malle (MOF) <Malle.Hanslep@ontario.ca<mailto:Malle.Hanslep@ontario.ca>> wrote:
Hi Ken,

Thanks for the additional information. I have already sent the draft to Energy Legal and will send it to Steve Ashbourne this morning.

Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.

- The last sentence in the opening italics that "the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate" has been deleted.

- It has been changed back to a guarantee from an indemnity.

- The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the "performance" guarantee is added into (E), i.e. IESO's role.

- Concept of "materiality" has been deleted for (B) and (D).

- A concept of "any other discriminatory action including OEB Orders has been introduced.

- The Guarantee wording includes the word "assume" as opposed to just "pay".

- Also, the guarantee has reverted to some of the very general wording that the Province is guarantee "all of the obligations of the Financing Entity" not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??

- Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?

- Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in

September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well.

Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.

The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in

IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.

Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.

Thanks

Ken k

Gadi, Ron and John

Pls see the attached revised guarantee and a short presentation on the salient points. It seems to include all of the revisions we requested, however, I will take another more detailed look. Ron and John one section particularly for your review, the Takeout Risk at the end of the Term Sheet indicates the link between the clean energy adjustment and the fair allocation amount as they impact the Takeout risk. I am not very clear about this so you may want to review this closely.

The request for the Letter of Credit still stands however, there is an alternative also provided we have to see tomorrow how comfortable IESO is with the latter.

Thanks

Hi John

Just to follow up on Andrew Maciel's commitment to provide us with a revised term sheet for the guarantee reflecting yesterday's discussion, I was wondering if that can be done EOD Monday. I had a chat with Gadi and

given some upcoming internal meetings at senior levels it would be helpful to provide the revised guarantee in front of decision makers.

Thanks

Ken k

Jim and Carlos, although we've been looking to Steve Ashbourne and MOF Legal to provide input for a more general guarantee which would be consistent with your and my view. Meeting taking place today. Steve Ashbourne doesn't like OPG's term sheet approach as it likely takes away our future flexibility which is likely right. So I guess we get back to OPG soon with our thoughts which should reduce the importance of the OPG term sheet. Nevertheless they will need some basic assumptions, especially on the performance component. So make wholes and puts should not be on the table.mike

> Hi Mike, who's working on the OPG guarantee while you're away? I'm at a meeting with Energy and Steen came up to me quite concerned to say that the latest version they saw from OPG and Tories was for quite a broad guarantee, including a make whole provision. If that's the case, it doesn't sound like they've taken on our comments and our unwillingness to provide a make whole, or a put, or any structure that could expose to the Province to having to make a multi-billion dollar payment rather than just stepping having to step in to replace OPG's coupon and principal payment obligations when they come due.

Subject: Fair Hydro Business Issues

Hi Gadi, Mike, Ron,

I had a chat with Ken Hartwick on Friday afternoon about our position on fees as well as progress on what we have been calling “business issues” (equity injection process, sub-debt agreement, guarantees). He agreed that we could push out the fees conversation from this round of regulation drafting, but wanted to make sure we set up time in early July to talk through these issues and land them asap. Here is where I think we are on each point:

- Fees: OPG wants a very light touch from OEB and, formulaic approach that mimics fee structures for portfolio managers (base fee tied to AUM + variable fee tied to performance). ENE agrees with the variable fee component (limited to $1M floor / ceiling), but has concerns about a base fee that does not tie to costs and wants a more substantive role for OEB.

- Guarantees: as you know the Province’s position was shared on Friday

- Equity Injections: I believe OPG has provided a draft structure. Unless OFA has concerns, I think this is largely procedural.

- Sub-debt: I don’t have much visibility in to this one. I heard folks from OFA were in discussions. This should link in with the fees conversation given the relationship with performance.

I would suggest we try and have an internal conversation later this week to discuss where we are on each of these in order to be ready to meet with OPG the following week.

Let me know if this makes sense or if I am missing anything.

Thanks,

Scott

I'm copying Mike, Ken and Ron, because they'd know if we paid for anyone, but the only firms we've engaged are TD, but this is part of the services they provide to us under our underwriting agreement, so there's no extra cost, and Blakes for legal advice on the guarantee, but I believe that is being covered under their engagement with Energy, so I don't believe we've been charged separately.

Heads up on below --- new AG request for all FHP consulting and legal costs. I've reached out to legal and will touch base with you both on approach for how to respond to this one.

From: Hosick, Sarah (TBS)
Sent: August 28, 2017 9:45 AM
To: Kaufman, Paul (TBS); Smook, Nick (TBS)
Subject: FW: Fair Hydro Plan Consultant Costs

Hi Nick and Paul,

We received the request below from the AG's office for all consulting and legal costs (and related contracts) associated with the Fair Hydro Plan across the government.

Wanted to check in with your thoughts as the AG's office doesn't provide a definition of what is included in FHP, and we want to ensure that ministries interpret the request the same way. We are not in a position to provide this information from the other organizations listed (e.g., IESO, OPG, OEB, etc.) and would instead provide a contact for AG's office to reach out directly to those organizations.

Any other considerations from your perspectives before we share this with the affected ministries?

Thanks

Sarah

Subject: Fair Hydro Plan Consultant Costs

Mark:

We would like to obtain all consulting and legal costs (and related contracts) associated with the Fair Hydro Plan across the government. This would include ministries (e.g., Ministry of Energy, Ministry of Finance, Ministry of Attorney General and all others), OPG, IESO, OEB, OFA, and all other agencies that have used consulting or legal services in relation to the Fair Hydro Plan. Please provide us all costs from December 1, 2016 to present. If you can provide this to us by September 5 that would be great. Please call me or Audelyn if you have any questions or need to discuss.

Thank-you Mark.

Bill

You're right in your assumption, Matt, and the Deputy and Associate Deputy of TB are aware, and supportive, of our need to be on the 26th for exactly that reason, so I'm not sure why CQSD thinks our Minister would have to reach out to theirs. I'd be shocked if TB didn't make this a priority item for the 26th meeting, and didn't bump something else if the agenda is too packed..

We were actually originally intending to go to the first TB meeting in September, but Energy decided that we could wait until this meeting to line up with when they are going to TB for their FHP report back. It is absolutely essential that we make this meeting, or OPG may not be able to complete their initial financing for the Trust by calendar year-end (it's already tight) which, I understand, creates a potential accounting issue for the IESO if they still have the entire asset on their books at their year-end.

Thanks,
Gadi

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

- Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

- Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt… MOF ? What process will be used to report it ? How often ?

- Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

- Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

- In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?
- Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

- Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

- I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?

Thanks,

Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!

Lindsay

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Anna

Hi Matt,

Who is the legal lead on it ? Need that info as well.

Also what is the rush to proceed to the Sept. 26 TB/MBC meeting ?

A MO to MO reach out is required and I need to support that with a rational.

Thanks,

Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

- <!--[if !supportLists]-->● <!--[endif]-->Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- <!--[if !supportLists]-->● <!--[endif]-->No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

- <!--[if !supportLists]-->● <!--[endif]-->Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

- <!--[if !supportLists]-->● <!--[endif]-->Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

- <!--[if !supportLists]-->● <!--[endif]-->Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

<!--[if !supportLists]-->● <!--[endif]-->In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?

<!--[if !supportLists]-->● <!--[endif]-->Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

<!--[if !supportLists]-->● <!--[endif]-->Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

<!--[if !supportLists]-->● <!--[endif]-->I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,

Matt Breadner on behalf of Anna Strathy

Hi Matt,

Here are my questions on the submission.

TB/MBC should "Authorize", maybe its not "Approve"

Are we taking out the term guarantee throughout the document ?

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

Where is the contingent liability going to reside ? Which Ministry ?

Interest on debt…MOF ? What process will be used to report it ? How often ?

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

I still have the same questions as earlier ie. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

When would the numbers from Energy be finalized ? OPCD review as well ?

Still need the answer of the 5 questions I sent last week by my Director.

We would need to share a copy soon with TBS as there is a large number of submissions moving forward for Sept. 26 TB/MBC date.

I pretty much agree with Legal points.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,
Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).
This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?
Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?
Thanks,

Matt Breadner on behalf of Anna Strathy

Hi Lindsay and Anthony,

I'll have another draft ready soon that incorporates some feedback from MOF legal and the OFA, I plan on sharing it with the both of you for feedback before distributing again to the wider group. We have reached out to energy for feedback as well, I understand they're working on it, but in the meantime I plan on proceeding with sending out an updated version before that. And as Anthony stated, yes it is still very much in a draft form.

Thanks,

Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,
Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.
Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.
Thanks!
Lindsay

Subject: FW: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Lindsay,
Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that

the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?
Thanks, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,
Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.
This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.
I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.
Please don't hesitate to contact me should you have any questions.

Hi Gadi,

I was thinking about the approach further and I think it would be best if I write to Len Hatzis (legal director at TBS) and Carolyn (so she is aware) first to let Len know the background that the DM of TBS is in favour of the Minister of Finance signing any required guarantee (although maybe he is well aware of this already) and also MOF/OFA view that we shouldn't exempt generally transactions under the new proposed Act from s. 28.
Then Len can let me know which TBS counsel are working on it as I think that it may be Nick and Paul but don't know for sure and don't know what their involvement on this file has been and I don't think I should send the email to TBS without letting Carolyn know.

Subject: RE: Guarantee

We have discussed this with the OFA, and we have endeavoured to provide a provision that we think should allow the financial guarantee being contemplated. Please let us know if you think it provides the necessary scope for what would be required to meet the Province's needs. We deleted the existing provision, although if you think that more general contractual authority is needed, something else could be considered. However, we don't think that it is appropriate to have a statutory appropriation for such general indemnity and guarantee provisions.

We would expect that the guarantee would be capped and only provide for the repayment of the principal and interest of the debt securities of the financial asset owner, and that would usually be done in the OIC.

We don't have any experience with performance guarantees. Is there a need for the Minister of Energy to require performance by the LDCs? We were also wondering if Blakes or another party involved in these discussions might have an example of what is being considered.

We also removed the exemption from s. 28 of the FAA. We have discussed this with OFA staff, and given the importance and breadth of this Act and Program, it doesn't seem appropriate to exempt the entire Act from s. 28 of the FAA.

Hi Carolyn,

Thanks for your email. Would it be possible to arrange a conference call today with yourself or your counsel most knowledgeable on this proposed securitization and transaction so that we can get an understanding of it and how it fits into any proposed authorizing legislation. Unfortunately we are not familiar with the proposed transaction although we have seen some general background information about the proposal. What role would a guarantee of investment dealers have in the transaction? We do have a copy of the legislation that we got via our clients at OFA and they were more engaged in the issue of a future proposed equity injection, but the most recent version that we have seen does not mention guarantees although there seems to be a very general contract authorization section. Of course, we have to generally think about s. 28 as well.

A call today to over the main elements of the proposed transaction and the legislation would be very helpful so that we can get back to Gadi.

Hi Michael & Malle – we will be sending you draft legislation to take a look at. Actual guarantees will follow later.

This relates to the government's Fair Hydro Plan and the promise to reduce rates by 25% by July. We are doing a sort of securitization, for which the legislation will provide a framework. We are contemplating provisions that allow "the Minister" to enter into agreements with respect to transactions contemplated by the legislation. Gadi and DM Angus are of the view that Minister should be MOF, as the agreements are likely to be guarantees to investment dealers. Indemnities for the boards of OPG and IESO will also be required, although we didn't talk about who would sign those.

Happy to answer your questions or walk you through the proposed bill.

Subject: RE: Guarantee

We have discussed this with the OFA, and we have endeavoured to provide a provision that we think should allow the financial guarantee being contemplated. Please let us know if you think it provides the necessary scope for what would be required to meet the Province's needs. We deleted the existing provision, although if you think that more general contractual authority is needed, something else could be considered. However, we don't think that it is appropriate to have a statutory appropriation for such general indemnity and guarantee provisions.

We would expect that the guarantee would be capped and only provide for the repayment of the principal and interest of the debt securities of the financial asset owner, and that would usually be done in the OIC.

We don't have any experience with performance guarantees. Is there a need for the Minister of Energy to require performance by the LDCs? We were also wondering if Blakes or another party involved in these discussions might have an example of what is being considered.

We also removed the exemption from s. 28 of the FAA. We have discussed this with OFA staff, and given the importance and breadth of this Act and Program, it doesn't seem appropriate to exempt the entire Act from s. 28 of the FAA.

Best
Toby

Hi Carolyn,

Thanks for your email. Would it be possible to arrange a conference call today with yourself or your counsel most knowledgeable on this proposed securitization and transaction so that we can get an understanding of it and how it fits into any proposed authorizing legislation. Unfortunately we are not familiar with the proposed transaction although we have seen some general background information about the proposal. What role would a guarantee of investment dealers have in the transaction? We do have a copy of the legislation that we got via our clients at OFA and they were more engaged in the issue of a future proposed equity injection, but the most recent version that we have seen does not mention guarantees although there seems to be a very general contract authorization section. Of course, we have to generally think about s. 28 as well.

A call today to over the main elements of the proposed transaction and the legislation would be very helpful so that we can get back to Gadi.

Subject: RE: Guarantee

Hi Michael & Malle – we will be sending you draft legislation to take a look at. Actual guarantees will follow later.

This relates to the government's Fair Hydro Plan and the promise to reduce rates by 25% by July. We are doing a sort of securitization, for which the legislation will provide a framework. We are contemplating provisions that allow "the Minister" to enter into agreements with respect to transactions contemplated by the legislation. Gadi and DM Angus are of the view that Minister should be MOF, as the agreements are likely to be guarantees to investment dealers. Indemnities for the boards of OPG and IESO will also be required, although we didn't talk about who would sign those.

Happy to answer your questions or walk you through the proposed bill.

Hi Carolyn,

Gadi Mayman gave us a heads up that you might be giving us a call about a proposed guarantee that the Minister of Finance may be required to sign in relation to the changes to the global adjustment.

We're happy to discuss this. This afternoon is busy but tomorrow afternoon may work.

Thanks!

Michael

Hi Gadi,
I notice we have a meeting set up for tomorrow morning to chat about OFHP Provincial guarantees. We had a conversation with MoF / TBS / OFA folks earlier this week, and I think we had agreed on language to propose back to OFA. I was going to send that on to OPG, but wondered whether you would prefer that I hold off until we have that discussion.
Thanks,
Scott

Hi folks,

I will work with legal to compile the search terms listed and the identified variants and permutations for our search.

We can add various operators (and/or/not) to search parameters to add specificity, however, more permutations and combinations will likely result in multiple searches being conducted on the same target mailbox as too many operators becomes extremely narrow and pushes the limitations of the inherent search function within the email environment. This is further exacerbated by our large mailbox sizes.

If there are specific combinations of terms and operators, please identify those where possible. We can verify again once we circulate the compiled list prior to executing the search.

Please let me know if you have any questions or concerns.

Thanks,

Hi Ken,
Thanks for your list, of course.
In your experience, would you say that where the FHP and accounting are in an email, that, e.g., one or more of the following would also occur?
Regulatory asset
Deferral [account]
Regulated
Others?
Just trying to see if we can use IT searches that filter for "accounting" ***and*** one of the rate-regulation type terms, along with variants of FHP, GA, smoothing, rate mitigation/price mitigation, etc.
Trying to avoid, or reduce, having to manually ensure that where, say the GA gets mentioned and caught in an electronic search, having to then exclude all the NUG related ones; or any FHP ones that just don't have any discussions on accounting.
Thanks,
Ron

Hi Ron and Mike
I went through the email folder that I created in January for all emails relating to the Fair Hydro Plan and found the following alternate terms for the Plan which I will request Andrew to include in his search terms. Be useful if you can do a quick scan of your emails and see if any other terms should be included in the search parameters. These of course would be in addition to the terms already specified by the AG in her email.
GA and/or Global Adjustment
GA Smoothing and/or Global Adjustment Smoothing
GA Financing and/or Global Adjustment Financing/Refinancing
Electricity Mitigation and/or Electricity Price Mitigation
Deferred GA or Deferred Global Adjustment
Rate Mitigation
Global Adjustment Deferral
OPG Trust and/or PG Trust Consolidation
Equity Injection
Equity Financing
Fair Hydro Plan/Trust

Thanks
Ken K

Hello Ron and Mike –
We have now received some guidance and determined a process for next steps.
We would like to set up a meeting for tomorrow afternoon to review process, confirm search terms and time frame, and confirm the "custodians" (i.e. those staff who would have responsive records). It would probably be prudent to have any identified "custodians" in attendance so that we can make sure we have agreement on the search terms and next steps as this will need to move quickly.
I will send out a meeting request based on your calendars and would ask that you forward it internally to staff who should attend.
Thanks very much for your assistance with this request.
Sarah

Subject: Information Request - Action Required
Importance: High

Solicitor Client Privilege

Hello Ron and Mike,
We have received a request for information from the Auditor General for the documents/e-mails listed below. Ken Kandeepan has been the point person on this matter in Gadi's absence this week. Pursuant to the *Auditor General Act* S.10(2), OFA and OEFC are required to provide the AG with free access to these materials.

- <!--[if !supportLists]-->● <!--[endif]-->Engagement Agreements with E&Y and KPMG and any others dealing with the Fair Hydro Plan Proposed Accounting
- <!--[if !supportLists]-->● <!--[endif]-->All emails between E&Y and KPMG and other Public Accounting Firms staff on the Fair Hydro Plan - Accounting
- <!--[if !supportLists]-->● <!--[endif]-->All emails between OFA/OEFC and the Ministry of Energy on the Fair Hydro Plan Accounting
- <!--[if !supportLists]-->● <!--[endif]-->All emails between OPCD/Treasury Board/Ministry of Finance and OFA/OEFC on the Fair Hydro Plan Accounting
- <!--[if !supportLists]-->● <!--[endif]-->All emails between IESO and OFA/OEFC on the Fair Hydro Plan Accounting

<!--[if !supportLists]-->● <!--[endif]-->All emails between OEB and OFA/OEFC on the Fair Hydro Plan Accounting

<!--[if !supportLists]-->● <!--[endif]-->All emails between OPG and OFA/OEFC on the Fair Hydro Plan Accounting

<!--[if !supportLists]-->● <!--[endif]-->All emails/material provided to the OFA/OEFC Board/Audit Committee on the Fair Hydro Plan Accounting

We are still determining next steps, process and timing, and will provide further guidance in due course, but we wanted to make you aware of the request. Please identify individuals, including yourselves if appropriate, in your respective branches who may have responsive emails/documents. Please make sure these individuals are aware of the request and remind them that they have an obligation to preserve requested documents/emails.

We are exploring the option of running an automated search and anticipate that we will be seeking guidance from you and your respective teams in the coming days with respect to scoping the search request and identifying search strings/key words to ensure that all responsive e-mails are captured.

In the meantime, please let me know if you have any questions or would like to discuss.

Thanks very much, and best regards,

Sarah

Subject: FW: Nalcor: Request for Financing document

Hi Gadi,

Without spending too much time on it, I gather that the guarantee we have provided simply entails Canada talking over payment of the cashflows on the bonds (see sections 2.2-2.3). Hope this helps.

Nice talking to you.

Rob

Mike, I assume that TD would have the schedules, as they've just submitted their RFP response for the new financing. Given that they're our advisor on the fair hydro plan, could you ask them for copies of the schedules?

Thanks,
Gadi

Hi Gadi,
This document is a newer one dated 2017 and is a request for financing. There are a number of schedules referenced in it (see the second page of the index) but the schedules are not attached. I wonder if it would be possible to obtain them as it would be very helpful to understanding the scope of the guarantee proposed in it. Schedule 1 is the Form of Canada Guarantee and there are some other schedules such as Form of Canada Guarantee Opinion Letters etc.
The one I found was from an earlier transaction in 2012.
Thanks.

Subject: Re: OFA role in reviewing fees
Date: Wednesday, August 30, 2017 9:16:36 PM

Hi Scott:
Will have talk to Gadi, but I think notionally we may be able help. I've been thinking that the investment manager model is going to generate some huge fees which I think will be hard to justify, and the process is vastly different. I think there is risk in approving something which doesn't pass the smell test.
Regards, Mike

> Hi Mike,
>
> DM of Energy was interested in whether OFA could play a role in reviewing the OPG trust fee structure on an ongoing basis. As you may know, Energy and OPG have been discussing how fees to act as financial services manager for the trust will be set for some time. OPG would like to use a traditional asset manager model (management fee based on AUM + performance fee). Energy would prefer to replace the fixed management fee with a “cost +” model that is reviewed and approved by the OEB.
>
> Energy has received strong push back from OPG from an accounting perspective on this model and on OEB oversight. The DM was blue-skying and wondered whether OFA could step into the role of reviewer of the fee structure to ensure it was reasonable. This would help with optics and hopefully result in a more reasonable cost to ratepayers on an ongoing basis. I think OFA will be doing something similar on sub-debt so wondered if that could be extended.
>
> I realize Gadi will need to weigh in on this, but if you have any preliminary thoughts that would be helpful. We have a meeting tomorrow AM with the broader group on OFHP and I will be asked this question. Any early insights would be much appreciated.

Thanks Ken – Are you aware how the potential timing issue with appropriations is handled on the credit side? OPG seemed to think that the OFA had some process in place so that even though only 1 year of appropriations is approved at a time there is always coverage post March 31, 2017 in the event the budget is delayed but OPG needs to borrow. I was just hoping to incorporate something similar on the ENE side so that we don't run into any issues.

OPG provided a draft Master Subscription Agreement based on the term sheet. I will run this by legal as well but please feel free to provide comments/edits.

Hi Kaitlin

My apologies for the delay in responding, just going through my emails from last week, I am ok with the term sheet, you had however, raised a comment re the appropriations. Note that since the OFA will simply be a service provided in this arrangement, i.e.,

We will not be able to provide cash management services including the transfer of the funds from the Province to OPG for the equity injection until the appropriations are approved.

Thanks

Ken k

Hi all – just following up on the equity injection term sheet. I'm going to send this to ENE legal now so that they can start to digest given that the next step will be preparation of the Master Subscription Agreement. I'm assuming there aren't any major concerns but if there are items you'd like to modify if you could pass those along this week I'd appreciate it. Please note that there is a question embedded in the document regarding appropriations that I'm hoping one of you will have insight on.

At the meeting with OPG a few weeks back you had mentioned that there would likely need to be some sort of Service Level Agreement between OFA and ENE – is there a similar agreement you already have in place that we could work from?

Thanks,

Kaitlin

Subject: OFHP - Business Issue next steps

Hi everyone,

As a follow up to today's meeting there are a couple items I think can move forward at this point.

1. Equity Injection Mechanics (draft term sheet attached)
    a. If comfortable, OPG would draft Master Subscription agreement, OFA/ENE would develop service level agreement for cash management services and ENE legal would move forward with amendment to OPG articles to facilitate new class of shares
2. Performance Fee Recommendation (OPG recommended approach attached)
    a. If comfortable, OPG would assist ENE in developing regulation language

My proposed next steps, subject to your agreement, would be to share these documents with ENE legal today and then table them at a Thursday morning meeting with ENE DMO/MO (along with an updated "business issues" note, which I'll send around for everyone's input in the next day or so). After that meeting I would send the same materials /update to MOF DMO along with any new updates received at that meeting.

Could you please confirm you have no further comments and that you agree with this approach and also that there's no other materials/terms that you think need to move up through approvals at this point in time?

Thanks in advance,

Kaitlin

John

My initial view is that the notice under 1. should be directed to MoE but could be copied to the OFA.

Consistent with that position and with the procedures under prior service agreements a delegation of authority from MoE to the OFA under 3 would not be appropriate.

Hi Kaitlin,

Following our call, I had an internal discussion. Our preference is that the OFA not be a party to the Master Subscription Agreement. If we are to be a party, the agreement would need to reviewed and reworked fairly materially. If there is a strong view on wanting to see the OFA as party to it, then let's go down that path and have that discussion.

Whether it be an MOU or SLA, the OFA and Energy would be able to set out the terms of the equity injection.

Happy to discuss.

John

Subject: RE: OFHP - Business Issue next steps

It's based on a high-level term sheet that the policy areas were comfortable with (attached), though this wasn't ever formally approved or moved up the chain it was more just to get staff aligned so not locked into anything by any means.

I have not seen the Master Sale and Servicing Agreement - I have heard it mentioned a couple times through so suspect ENE legal would have a copy.

I think the purpose of having OFA be a direct party is to make sure OPG, OFA and ENE are all fully aware of each of their roles and to formalise the authority for OPG to deal directly with the OFA on the item. The high-level idea is that while ENE will be responsible for getting the annual appropriations, there is no monthly approval process/role for ENE. ENE will be one of the parties to receive notice, but it makes sense for the Subscription notice to go directly to OFA so ENE isn't a middle man adding time pressure. I was hopeful that this agreement could act as sort of a delegation of authority to some extent.

I agree the SLA is duplicative in this regard - my preference would be to scrap the SLA and just have the master agreement if it can accomplish the above intention, but if there is a preference to have a separate SLA and make the Master agreement just between OPG and ENE then happy to proceed on that basis.

Happy to discuss,

Kaitlin

Hi Malle,

My understanding is that OPG staff drafted the draft agreement. Clara Greco at OPG is the contact person.

Looping Kaitlin in as she has been in contact with OPG on this one.

Thanks,

John

Hi John,

Both OFA Legal and I have reviewed the subscription agreement on a preliminary basis. Why has the OFA been made a direct party to the agreement as it seems that the OFA has a "service" type function here which could be accommodated by a service level agreement between the Ministry Energy and the OFA.

Do you know who prepared this draft and is it based on a term sheet or another document that sets out what the roles of the various parties in this would be.

Thank you.

Malle

Hi John,

Since OFA is directly being made a party to the subscription agreement, we should also get OFA legal's input so I will send this to Sarah Neville for her review too if that's ok. As well I would like to discuss the northern service level agreement with them and whether there are other situations where the OFA acts as an agent to make payments out of the CRF. I agree that some type of service level agreement would

I notice that the subscription agreement mentions that the first equity injection/share subscription will occur August 2017. Is this a realistic timeframe?

The commitments in section 1 seem very broad and open-ended – The Minister of Energy commits to fund up to 44% of the total financing required by the Fair Hydro Trust, to acquire Assets from the IESO under the Act and Regulations by way of equity subscription in OPG. The Master Sale and Servicing Agreement is in square brackets. Is

a draft copy of this agreement available for review?
Also not sure what the purpose of s. 3.4 is and whether the Minister of Energy can agree to this process. I note that there is a note to draft there already.
Tom McKinlay of Energy Legal is also reviewing this draft and called to discuss it with me.
Thanks.

Hi Toby,
Just wanted to get something going with an introductory email and to provide you with some context.
Pls. take a look at the Fair Hydro Master Subscription Agreement and the way the equity injection mechanism is envisioned, the operational set up with be under some sort of a service level agreement between Energy and OFA to facilitate the proposed monthly equity injection.
I have a type of service level agreement or MOU in this instance for the Northern Industrial Electricity Rate program as attached. We are hoping something similar could be put in place between Energy and the OFA for this purpose. (The MOU had been drafted by OFA Legal a few years ago when NIER first came into place and have been revised a few times since)
Happy to discuss.
Thanks,
John

Thanks Ken – Are you aware how the potential timing issue with appropriations is handled on the credit side? OPG seemed to think that the OFA had some process in place so that even though only 1 year of appropriations is approved at a time there is always coverage post March 31, 2017 in the event the budget is delayed but OPG needs to borrow. I was just hoping to incorporate something similar on the ENE side so that we don't run into any issues.
OPG provided a draft Master Subscription Agreement based on the term sheet. I will run this by legal as well but please feel free to provide comments/edits.

Hi Kaitlin

My apologies for the delay in responding, just going through my emails from last week, I am ok with the term sheet, you had however, raised a comment re the appropriations. Note that since the OFA will simply be a service provided in this arrangement, i.e.,

We will not be able to provide cash management services including the transfer of the funds from the Province to OPG for the equity injection until the appropriations are approved.

Thanks

Ken k

Hi all – just following up on the equity injection term sheet. I'm going to send this to ENE legal now so that they can start to digest given that the next step will be preparation of the Master Subscription Agreement. I'm assuming there aren't any major concerns but if there are items you'd like to modify if you could pass those along this week I'd appreciate it. Please note that there is a question embedded in the document regarding appropriations that I'm hoping one of you will have insight on.

At the meeting with OPG a few weeks back you had mentioned that there would likely need to be some sort of Service Level Agreement between OFA and ENE – is there a similar agreement you already have in place that we could work from?

Thanks,

Kaitlin

Subject: OFHP - Business Issue next steps

Hi everyone,

As a follow up to today's meeting there are a couple items I think can move forward at this point.

1. Equity Injection Mechanics (draft term sheet attached)
    a. If comfortable, OPG would draft Master Subscription agreement, OFA/ENE would develop service level agreement for cash management services and ENE legal would move forward with amendment to OPG articles to facilitate new class of shares
2. Performance Fee Recommendation (OPG recommended approach attached)
    a. If comfortable, OPG would assist ENE in developing regulation language

My proposed next steps, subject to your agreement, would be to share these documents with ENE legal today and then table them at a Thursday morning meeting

with ENE DMO/MO (along with an updated “business issues” note, which I’ll send around for everyone’s input in the next day or so). After that meeting I would send the same materials /update to MOF DMO along with any new updates received at that meeting.
Could you please confirm you have no further comments and that you agree with this approach and also that there’s no other materials/terms that you think need to move up through approvals at this point in time?
Thanks in advance,
Kaitlin

Hi Toby,

Thanks. I have not gone through the draft, but on the guarantee, to clarify, when you say there is new language around the guarantee, but that it does not contemplate both Ministers signing a guarantee, on a quick word search on "guarantee", it seems to say it would just be the Minister of Finance, not both ministers. That would seem okay from an MOF point of view.

Is that right?

Ron

Subject: Re: Ontario Fair Hydro Plan

I'm surprised on both, especially the second, as it was Energy's Chief of Staff that suggested that the two Ministers would be responsible for the guarantee. As for the first, there was a lengthy discussion on the s28, and Energy was basing their request for exemption on the Hydro One precedent, but the Deputy and Associate Deputy of TB and I rejected that argument given that Hydro One was a sale of shares, or the ownership of the company, while this plan will create debt that could become a liability of the Province.

I've added Dave in the DMO on to make sure I'm not overstepping here, but I think that we should push back very hard that the Ministry of Finance can't accept the exemption from s28 (and you could check with TB Legal Services as I think their direction from their Deputy would be the same).

Subject: Fw: Ontario Fair Hydro Plan

Please see attached the latest draft of the legislation. My understanding is that there is only room to make small tweaks based on the timeline right now.

Please note that Energy has not removed the exemption from section 28 in this draft. I am not sure if there has been any further discussion on that subject, but I think that if we want to push back on this issue it needs to be communicated as soon as possible.

Also, there is new language around the guarantee, but it does not contemplate the current plan to have both Ministers sign the guarantee. I have let Energy Legal know that this would make sense to change.

Subject:	Re: Ontario Fair Hydro Plan
Date:	Wednesday, April 26, 2017 4:46:26 PM

I'm surprised on both, especially the second, as it was Energy's Chief of Staff that suggested that the two Ministers would be responsible for the guarantee. As for the first, there was a lengthy discussion on the s28, and Energy was basing their request for exemption on the Hydro One precedent, but the Deputy and Associate Deputy of TB and I rejected that argument given that Hydro One was a sale of shares, or the ownership of the company, while this plan will create debt that could become a liability of the Province.

I've added Dave in the DMO on to make sure I'm not overstepping here, but I think that we should push back very hard that the Ministry of Finance can't accept the exemption from s28 (and you could check with TB Legal Services as I think their direction from their Deputy would be the same).

Please see attached the latest draft of the legislation. My understanding is that there is only room to make small tweaks based on the timeline right now.

Please note that Energy has not removed the exemption from section 28 in this draft. I am not sure if there has been any further discussion on that subject, but I think that if we want to push back on this issue it needs to be communicated as soon as possible.

Also, there is new language around the guarantee, but it does not contemplate the current plan to have both Ministers sign the guarantee. I have let Energy Legal know that this would make sense to change.

Hi, Toby. I am pleased to attach the most recent version of the draft legislation pertaining to the electricity rate reductions and intergenerational cost transfer.

Thanks for your help on all of this, and note that this version does not include amendments to EA ss.89 and 90 (PILS amendments). Those discussions are ongoing between MOF policy, OPG/Tory's and ENERGY is awaiting those discussions to close before finalizing the legislation on these matters.

Best regards,

James

Hi Toby,

Thanks. I have not gone through the draft, but on the guarantee, to clarify, when you say there is new language around the guarantee, but that it does not contemplate both Ministers signing a guarantee, on a quick word search on "guarantee", it seems to say it would just be the Minister of Finance, not both ministers. That would seem okay from an MOF point of view.

Is that right?

Ron

Totally agree with Bruno, the province should not be taking a security intent in the reg asset, that would make the sale to the SPV or trust rather difficult.

It would also create issues in terms of the SPV's ability to obtain an appropriate credit rating as well as issue debt in the capital markets.

Thanks

> Apologies for delay. I perceive differing levels of comfort with the issue of security so I'm OK with discussing the questions raised this afternoon. I am concerned whether we have people on the call that can answer all the questions.
> But I have a basic question with respect to the issue of the Province taking a security interest in the asset and differences with this loan from others. Under the OFHP, the sale of the asset ultimately allows for payments to electricity generators. If the Province has a security interest in the asset, can we envisage a potential situation wherein the IESO would be repaying the OFA loan rather than paying generators, which would be problematic for OFHP?
> I had discussed with Ron. In regard to Toby's last question, Ron was wondering if there might be a provision on use of proceeds from IESO's sale of the regulatory asset.
> Ron had also asked whether OPCD had opined on any accounting issues, and whether OIC or Minister's directive gave any particular direction on this issue. In regard to the latter, I have checked. Minister's directive and OIC were fairly high level noting specific terms and conditions to be set out in the Agreement.

Thank you Sarah. I should add that under the OFA Lending Policy, the intercept provision (and accompanying MOU, etc.) must be included in OFA loan agreements *except* where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, if it is determined that the intercept provisions are not required/relevant in this case, Ministerial direction will be required. We can discuss further this afternoon.
Lisa

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,
In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.
Thank you,
Sarah

Subject: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hi Sarah H. and Will,
Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded

that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be minimal.

Before proceeding, we would like to ensure that the nature of the loan, the impact of intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?

    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.
    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.
- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Doesn't look like Cindy can make that time either, so there are too many people that should be involved in this discussion with OPG that can't make it. I'd suggest that we leave it in the hands of everyone who is going to be around next week, and then I can weigh in when I get back. I think you're all aware of the firm direction that I've left with the banks and OPG, without much room to move, even though I'm guessing the banks are going to try to come back with a structure that attempts to transfer as much risk on to us as possible.

Subject: RE: Provincial Support Term Sheet

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Just a follow up to our call earlier, does it also make sense to invite Cindy Veinot provincial controller to the proposed meeting since accounting issues are also key.

Sent from my BlackBerry 10 smartphone on the Rogers network.

Subject: RE: Provincial Support Term Sheet

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Hi all,

We are also putting together an issues list for discussion with Energy Legal and Blakes and will share it with you as

well.

Is there any type of draft term sheet for the proposed financing transaction itself or the master sales and servicing agreement? Any general description of the proposed transaction would be helpful to us.

Thank you.

> Hi Bonnie,
> The Ontario Fair Hydro Plan Act legislation provides for the recovery, from eligible ratepayers, of financing costs by the financing entity, including financing done through the financing entity, OPG and indirectly by the Province, for the equity injection. The Province would, therefore, expect a return on equity from OPG which would at least cover its borrowing cost. For prudence, this recovery to match the interest cost is built into the current fiscal plan. [Not public information] In addition, the increased investment in OPG, from the equity injection, would a higher level of asset for the Province's balance sheet to offset the increased borrowing to appear on its balance sheet, thus mitigating the concern expressed in DBRS' question, i.e. no increase in net debt.
> Our colleagues in FTD/CMD and GBED likely would have additional insight as well, copying here Ken and Mike in the response.

Cc: David Cross <David.Cross@ofina.on.ca>
Subject: Question about the province's equity injection in OPG

DBRS is wondering if we have any details on how the province will recoup its equity investment. Do we have any details on this.

"The Province has indicated that it intends to recoup the equity investment over time but has not clarified its required return on the equity or the timing of the repayment. The Province will borrow to fund this equity investment, and in the absence of further information, DBRS considers this debt to be tax-supported debt, consistent with established practice."

Hi Gadi,

As discussed, I beefed up the fiscal and accounting risk point, and moved it up.

Hi Gadi,

Would you have an idea when Energy will be circulating the draft TB Report Back?

I was talking to Steen on Wednesday on the IESO request for an expanded credit facility from the OFA, and he asked for some input.

Some potential input is attached, modifying the flow chart that Energy had in its March CabSub, to show a potential role for the OFA for financing the IESO (at least on an interim basis).

Steen also asked if we'd be looking for an approval. I'm not sure that is needed (assuming that IESO eventually can still sell the asset to OPG's SPV eventually, as planned), but perhaps a "Note" in the Minute would be helpful, along the lines of "Note that [the Minister of Finance will direct] the OFA [to/will] provide a credit facility to the IESO to facilitate …"

Energy's PW.

DRAFT

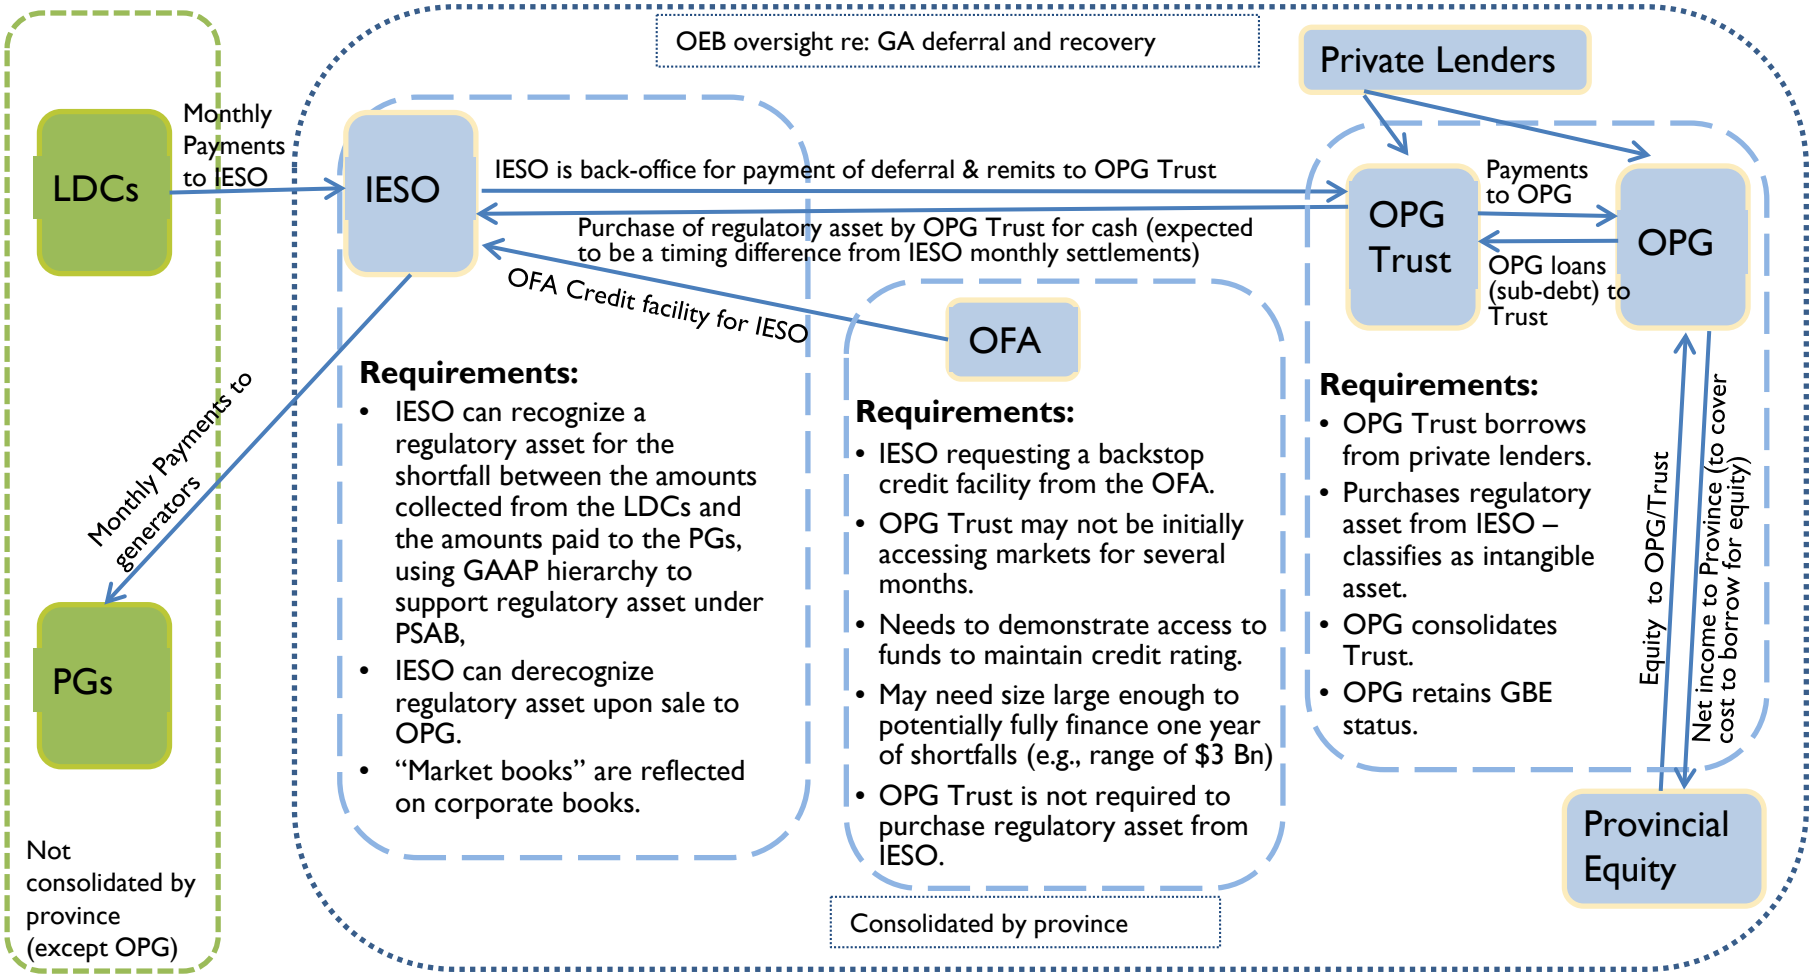
GA Financing Plan: Role of IESO

Corporate and Electricity Finance Division
May 1, 2017

DRAFT

GA Smoothing – Proposed Structure

- The following diagram provides an overview of the proposed GA smoothing structure, as well as interactions between sector entities and elements required to meet accounting objectives.



Note: Proposed structure is subject to legal and accounting confirmation, absent that confirmation, there would be a fiscal impact to the province.

DRAFT

IESO Financing Requirements

- IESO will need to ensure that it continues to have the funds available to provide payments to generators on a monthly basis as part of the IESO settlements process, while recoveries from LDCs for Regulated Price Plan (RPP) / Fair Hydro Plan eligible customers will be lower.
- IESO has an existing credit facility from the OFA; however, a new or expanded facility is being requested.
- IESO would require financing to compensate generators should it be required to hold any portion of the unpurchased Regulatory Asset beyond each monthly settlement period.
  - OPG Trust is not expected to access public capital markets for several months after the start of the FHP, and may be purchasing the asset with a lag vs monthly settlements. Also, OPG Trust is not required to purchase the regulatory asset.
  - IESO will need a credit facility for interim financing.
  - IESO may require longer-term financing to maintain the deferral financing plan, should the OPG Trust not be able to access debt markets on a timely basis for purchase of some or all of the regulatory asset.
- Based on Ministry of Energy's GA deferral plan, it is estimated that approximately $2.5-3.0 billion need to be deferred per year for over first 10 years, equal to approximately $200-250 million per month, on average.[1]
  - The size of the credit facility required to backstop IESO could be $2.5 to $3.0 billion. [TBC]
- There is a fiscal impact and accounting risk on OFA financing of the IESO requirements if it were to be more than temporary borrowing to cover timing differences on when the OPG SPV buys the regulatory asset vs the timing of IESO monthly settlements.
  - Even if IESO is allowed to recognized the Regulatory Asset, on consolidation into Public Accounts, the regulatory asset would not be expected to be recognised, so that the deferral amount and associated financing costs would be expected to have a fiscal impact..
- The monthly and annual amount being deferred and the resulting monthly amounts can be substantially different than forecast based on various factors, such as seasonality or electricity usage, as well as potential changes to electricity costs from OEB rate decisions, with IESO estimating deferral amounts as high as $400 million per month.
- Other factors that may increase IESO's financing requirements:
  - IESO will also incur financing charges that will need to be refinanced.
  - The financing and administration costs that OPG Trust incurs will need to be paid.

[1] Based on Ministry of Energy's annual GA deferral amounts, assuming the monthly deferral is equally-weighted.

Thanks, Cindy flipped me OPG's accounting paper and E&Y's opinion, both draft and will try and give you a brief summary tomorrow,

I note from the Action Items that IESO also expects to get something similar from KPMG. Will try get that from Kim or Cindy.

> >
> > In particular, the proposed legislation enables a structure that OFA and TD believe will enable financing at a reasonable cost. Key elements that support this financing structure include:
>
> <!--[if !supportLists]-->• <!--[endif]-->OPG issuances of

subordinated debt to the SPV representing up to 49% of total borrowing; and

<!--[if !supportLists]-->• <!--[endif]-->Conditional (springing) guarantees by the Province to provide a backstop in the event of specific and limited events (e.g., changes to legislation that harm investor interests).

Please note that the ability to finance and the cost of financing will only be known with certainty once OPG takes this structure to market.

Happy to discuss further as needed.

Thanks,
Scott

Subject: RE: OPG - Sub Debt + Variable Fee

Ok.
Who were you talking to at OPG – regarding taking OFA out of the equity injection / subordinated debt document?

Memorandum of Understanding
Relating to the
Fair Hydro Plan

Dated: **XXXXXXX**

Between:

Her Majesty the Queen in right of Ontario
as represented by the Minister of Energy (the "**Minister**")

And:

Ontario Financing Authority
an agency of the Province of Ontario (the "**OFA**")

Whereas:

1. The Government of Ontario enacted the *Ontario Fair Hydro Plan Act, 2017* (the "Act") to implement its Fair Hydro Plan (the "FHP").

2. The Act and the regulations promulgated under the Act (the "Regulations") provides the right for IESO to create certain assets related to the deferral of electricity charges (the "Assets"), which Assets may be acquired from the Independent Electricity System Operator ("IESO") by one or more special purpose financing entities, under the Act established by OPG to implement the FHP (each an "OPG Financing Entity"), which are expected to include a Fair Hydro Trust.

3. An OPG Financing Entity is expected to acquire the Assets monthly from the IESO and will finance the Assets in accordance with the financing plan, which includes both senior debt (minimum of 51%) from external sources and subordinated debt (up to 49%) from OPG.

4. The Minister has agreed to provide up to 44% of the total funding requirement for the Assets through equity injections in OPG and OPG has agreed to use the equity injections solely for funding an OPG Financing Entity's subordinated debt (the "Equity Injection Plan").

5. For purposes of the Equity Injection Plan, OPG has amended its articles to create a new class of non-voting, redeemable shares (the "Class A Shares").

6. The Minister will subscribe for Class A Shares monthly.

7. Each month OPG will deliver to the Minister a share subscription form (the "Share Subscription") setting out the amount of equity injection required (the "Subscription

Payment") and the corresponding number of Class A Shares to be issued by OPG and subscribed for by the Minister.

8. The Minister is required to pay the Subscription Payments out of amounts appropriated by the Legislature for that purpose for the fiscal year in which the payment is made ("Appropriated Amount").

9. The Minister has advised the OFA that the Minister is required to make the Subscription Payments within [*] business days of the receipt by the Minister of the Share Subscription (the "Share Subscription Payment Date").

10. The Minister considers it advisable for the OFA to make the Subscription Payments on behalf of the Minister and the OFA has agreed to make the Subscription Payments on behalf of the Minister.

11. The Minister and the OFA wish to enter into this MOU to confirm their agreement regarding the terms on which the OFA will make the Subscription Payments.

Therefore:

The Minister and the OFA agree as follows:

1. Payment Authorization

(i) The Minister authorizes the OFA to make the Subscription Payments on behalf of the Minister and the OFA agrees to make the Payments on behalf of the Minister.

(ii) The Minister shall ensure that the certificate under section 11.4 of the *Financial Administration Act* (reproduced as Schedule A to this MOU) required for each of the Subscription Payments is obtained, and shall provide the OFA with a copy of such certificate within **[*]** days after the Subscription Payment is made.

(iii) It is agreed by the Minister and the OFA that the OFA is acting as an agent, on behalf of the Minister, for the purposes of

i. Transacting with the Ontario Shared Services "IFIS" system in order to access funds appropriated for the Minister in respect of the Fair Hydro Plan, and

ii. Making the required Subscription Payments on behalf of the Minister as further described in this MOU.

2. Payment Process

a) The Minister will take all necessary steps to provide the OFA with a good quality unapproved electronic copy of each Share Subscription, on the same day the Minister receives the Share Subscription from OPG to allow the OFA to begin the procedures for making the Subscription Payment.

b) The Minister will deliver to the OFA a good quality copy of each Share Subscription executed and approved for payment by **[insert appropriate MoE official]** - at least three business days before the Share Subscription Payment Date. The approval for payment shall include confirmation that there is a sufficient Appropriated Amount from which to make the Subscription Payment. Upon receipt of the executed and approved Share Subscription, the OFA will make the Subscription Payment on behalf of the Minister, in the amount of the Share Subscription.

c) The OFA shall not be required to make any Subscription Payment on behalf of the Minister if the Minister has not delivered to the OFA an executed and approved Share Subscription as provided in paragraph b) above.

d) The Subscription Payments will be made from the Consolidated Revenue Fund and the amount of each Subscription Payment will be entered by the OFA via a journal entry into the Province's IFIS system under a pre-defined Minister account immediately upon the completion of the Subscription Payment or shortly thereafter.

3. Reporting Requirements and Records

a) The OFA will deliver a notice by e-mail to the Minister's contact person to confirm the completion of each Subscription Payment in the amount of the Share Subscription.

b) The OFA will keep and maintain all records related to the Share Subscriptions for a period of seven (7) years.

c) The requirements under this section shall survive any termination of the MOU.

d) The Public Accounts, Volume 3 reporting related to the Subscription payments will be performed by the Minister.

4. Limited Role of the OFA

The OFA will only be responsible for making the Subscription Payments in accordance with section 2 and reporting and record keeping in accordance with section 3. For greater clarity, the OFA will not be responsible for auditing or otherwise verifying the correctness of the Share Subscriptions; monitoring the OPG's application of the Subscription Payments; monitoring the balance from time to time of the Appropriated Amount; or ensuring the Appropriated Amount is sufficient.

5. Review and Termination

a) The Minister and the OFA will review this MOU as necessary.

b) This MOU may be terminated by either party at any time, on 90 days' notice.

c) Upon termination of this MOU, provided the OFA has the power and authority to make such Subscription Payments, the OFA will make Subscription Payments in respect of executed and approved Share Subscriptions delivered by the Minister to the OFA on or before the date of termination in accordance with subsection 2(c) of this MOU, but will not be obligated to make any further Subscription Payments on any executed and approved Share Subscriptions delivered by the Minister to the OFA after the date of termination of this MOU. All provisions of this MOU relating to Subscription Payments made by OFA will continue to apply with respect to such Subscription Payments made by the OFA after the termination date, notwithstanding termination of this MOU.

d) The parties will cooperate to help to ensure a smooth transition of the payment function upon termination.

6. No Service Charges

The OFA will not charge the Minister for the OFA's services or for its disbursements or other expenses incurred under this MOU.

7. Contacts

a) Each party shall designate a member of its staff to be a contact person for the purposes of administering this MOU.

b) As of the date of this MOU the OFA's contact persons are:

Tel:
email:

Tel: email:

should also be sent to:

Tel: email: & email:

c) As of the date of this MOU the Minister's contact person is:

Tel:
email:

d) Either party may designate a different member of its staff as its contact person by providing notice to the other party in accordance with section 7.

8. Notice

a) Any notice under this MOU shall be in writing and shall be deemed given when delivered by hand or email, and addressed to the party's contact person.

b) In the case of the OFA, the addresses for notice are:
Hand Delivery:
Ontario Financing Authority
Suite 1400
1 Dundas St. W.
Attention: Ken Kandeepan, Chief Financial and Risk Officer
email: Ken.Kandeepan@ofina.on.ca

c) In the case of the Minister, the addresses for notice are:
Hand Delivery:
Ministry of Energy

9. Execution

The parties have executed this MOU, effective as of the date first above written.

Her Majesty the Queen in right of Ontario
as represented by the Minister of Energy

SCHEDULE A

Section 11.4, *Financial Administration Act*, R.S.O. 1990, c. F.12

11.4 (1) No payment shall be made out of the Consolidated Revenue Fund unless, in addition to any other voucher or certificate that may be required, a person referred to in subsection (2) certifies,

(a) in the case of a payment for the supply of goods or the rendering of services after the goods are delivered or the services are rendered, that the goods have been supplied or the services have been rendered and that,

(i) the payment is in accordance with the agreement, or

(ii) the amount of the payment is reasonable, if the amount of the payment is not specified in the agreement;

(b) in the case of a payment for the supply of goods or the rendering of services before the delivery of the goods or the supply of the services, that the payment is in accordance with the agreement; or

(c) in the case of a payment not described in clause (a) or (b), that the payee is eligible for or entitled to the payment. 2002, c. 8, Sched. B, s. 2.

Persons authorized to certify payments

(2) Only the following persons have authority to give a certificate under subsection (1):

1. A minister or deputy minister.
2. The Speaker of the Assembly.
3. The Auditor General.
4. The Chief Electoral Officer.
5. A person authorized by the Management Board of Cabinet.
6. A person authorized by a person referred to in any of paragraphs 1 to 5. 2002, c. 8, Sched. B, s. 2; 2004, c. 17, s. 32; 2007, c. 15, s. 40 (1).

Attachments:	Term Sheet - Provincial Support Agreement (2).docx

Mike:

Further to our discussion last week, please find attached the draft term sheet relating to the Provincial Support. In this draft the Province will assume the obligations of the debt under certain conditions. The plan is to send this document to the Dealers for their input once we get comments or concurrence from your group. Stu Preston will coordinate the discussions with the Dealers on this issue from our side. Would it be yourself or someone else from your group addressing this issue from the OFA perspective? I expect there will be some back and forth on this issue and eventually rating agency input as well.

John

Provincial Support Agreement Term Sheet –

Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") is provided exclusively to the parties listed herein in connection with the draft Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Defined terms used herein have the meanings ascribed to them in the Act. The provincial support agreement (the "**Provincial Support Agreement**") will contain the terms and conditions set out in this Term Sheet in addition to such other representations, warranties, indemnities, and other terms and conditions as the Guarantor and the Beneficiaries (each as defined below) may reasonably require.*

Guarantor:	Her Majesty the Queen in right of Ontario, as represented by the Minister of Energy.
Beneficiaries:	The trust company acting as indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**") acting for the benefit of all persons who may have contractual claims against a Financing Entity (collectively, the "**Beneficiaries**") (including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee and the trustee of the Financing Entity[1]).
Term:	The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[2] after all Funding Obligations of all Financing Entities have been repaid.
Performance Guarantee:	**[Upon the occurrence of a Performance Guarantee Event]**, the Indenture Trustee will be entitled to require the Guarantor to appoint a replacement servicer who will perform IESO's duties as servicer under the Master Sale and Servicing Agreement between IESO, as seller and servicer, and the Financing Entity, as purchaser, **[and OPG as Financial Services Manager]** ("**MSSA**"). In the event that the performance guarantee is unenforceable against the Guarantor, the Provincial Support Agreement will contemplate a separate legal obligation by the Guarantor to indemnify the Indenture Trustee.

[1] We have assumed that the initial Financing Entity will be a trust.

[2] This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.

Performance Guarantee Event:	A "Servicer Default" occurs under the MSSA[3]
Payment Guarantee:	**[Upon the occurrence of a Payment Guarantee Event and within [5/10] business days after receiving a demand from the Indenture Trustee]**, the Guarantor shall **[guarantee and indemnify the Indenture Trustee (for and on behalf of the Beneficiaries) by paying all regularly scheduled interest and principal payments during the term of a Financing Entity's contractual obligation to such Beneficiary]/[assume the contractual obligations of a Financing Entity to the Beneficiaries]**[4], which for greater certainty shall not include any default, penalty, prepayment, or make whole amounts.
Payment Guarantee Event:	(A) if the Legislative Assembly of Ontario repeals the Act; or (B) if the Legislative Assembly of Ontario amends the Act or Regulation thereunder in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all obligations incurred by such Financing Entity in respect of such investment interest; or (C) if a court of competent jurisdiction (i) determines all or a portion of the Act to be *ultra vires* in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable.
Limits under Guarantees:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or loss of profits.
Priority of Payments:	The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.

[3] Each Servicer Default will include its own cure period before the event becomes a Servicer Default.

[4] To confirm if Province will become the debtor under the applicable debt documentation or if the Financing Entity will continue to be the primary obligor with the Province acting as secondary obligor.

Subrogation:	Where the Guarantor has repaid a Beneficiary, to the extent of such payment, the Guarantor is subrogated in and to all the rights of recovery of such Beneficiary in respect of the applicable indebtedness and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all amounts owing to a Beneficiary, the Indenture Trustee will acknowledge and agree on behalf of such Beneficiary that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiary has or may exercise in respect of the repaid indebtedness, all in accordance with the terms of the Master Trust Indenture.
Notice Requirements:	The Indenture Trustee will be required to provide notice to the Guarantor of a Performance Guarantee Event or Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.
Closing:	Date to be determined but no later than **[**■, 2017**]**. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered.
Reporting Requirements of a Financing Entity:	The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture.
Conditions Precedent to Closing:	Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.[5]
Representations:	Customary representations and warranties of the Guarantor.
FIPPA:	Acknowledgement that the Guarantor is bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Guarantor or its agents or representatives in connection with the Transaction Documents may be subject to disclosure in accordance with that act or as otherwise required by law.

[5] Opinions on the validity and enforceability of Provincial Support Agreement will be required.

Confidentiality Obligations:	Customary confidentiality obligations to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor.
Governing Law:	Province of Ontario

Guarantor:	Her Majesty the Queen in right of Ontario, as represented by the Minister of Energy.
Beneficiaries:	The trust company acting as indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**") acting for the benefit of all persons who may have contractual claims against a Financing Entity (collectively, the "**Beneficiaries**") (including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee and the trustee of the Financing Entity[1]).
Term:	The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[2] after all Funding Obligations of all Financing Entities have been repaid.
Performance Guarantee:	**[Upon the occurrence of a Performance Guarantee Event]**, the Indenture Trustee will be entitled to require the Guarantor to appoint a replacement servicer who will perform IESO's duties as servicer under the Master Sale and Servicing Agreement between IESO, as seller and servicer, and the Financing Entity, as purchaser, **[and OPG as Financial Services Manager]** ("**MSSA**"). In the event that the performance guarantee is unenforceable against the Guarantor, the Provincial Support Agreement will contemplate a separate legal obligation by the Guarantor to indemnify the Indenture Trustee.

[1] We have assumed that the initial Financing Entity will be a trust.

[2] This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.

Performance Guarantee Event:	A "Servicer Default" occurs under the MSSA[3]
Payment Guarantee:	**[Upon the occurrence of a Payment Guarantee Event and within [5/10] business days after receiving a demand from the Indenture Trustee]**, the Guarantor shall **[guarantee and indemnify the Indenture Trustee (for and on behalf of the Beneficiaries) by paying all regularly scheduled interest and principal payments during the term of a Financing Entity's contractual obligation to such Beneficiary]/[assume the contractual obligations of a Financing Entity to the Beneficiaries]**[4], which for greater certainty shall not include any default, penalty, prepayment, or make whole amounts.
Payment Guarantee Event:	(A) if the Legislative Assembly of Ontario repeals the Act; or (B) if the Legislative Assembly of Ontario amends the Act or Regulation thereunder in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all obligations incurred by such Financing Entity in respect of such investment interest; or (C) if a court of competent jurisdiction (i) determines all or a portion of the Act to be *ultra vires* in a way that adversely impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable.
Limits under Guarantees:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or loss of profits.
Priority of Payments:	The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.

[3] Each Servicer Default will include its own cure period before the event becomes a Servicer Default.

[4] To confirm if Province will become the debtor under the applicable debt documentation or if the Financing Entity will continue to be the primary obligor with the Province acting as secondary obligor.

Subrogation:	Where the Guarantor has repaid a Beneficiary, to the extent of such payment, the Guarantor is subrogated in and to all the rights of recovery of such Beneficiary in respect of the applicable indebtedness and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all amounts owing to a Beneficiary, the Indenture Trustee will acknowledge and agree on behalf of such Beneficiary that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiary has or may exercise in respect of the repaid indebtedness, all in accordance with the terms of the Master Trust Indenture.
Notice Requirements:	The Indenture Trustee will be required to provide notice to the Guarantor of a Performance Guarantee Event or Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.
Closing:	Date to be determined but no later than **[**■, 2017**]**. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered.
Reporting Requirements of a Financing Entity:	The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture.
Conditions Precedent to Closing:	Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.[5]
Representations:	Customary representations and warranties of the Guarantor.
FIPPA:	Acknowledgement that the Guarantor is bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Guarantor or its agents or representatives in connection with the Transaction Documents may be subject to disclosure in accordance with that act or as otherwise required by law.

[5] Opinions on the validity and enforceability of Provincial Support Agreement will be required.

Confidentiality Obligations:	Customary confidentiality obligations to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor.
Governing Law:	Province of Ontario

Morning
Lots of long Ont and PQ selling
DFL $180 m
PQ asset manager selling about 70 long PQ.
Alt was looking but tone is crap.
Still sort of talking to BofA about USD 4 yr. FRN but pushed it off to next week.
Sort of looking like flat to breakevens but you need to go out to 4 yrs.
Bof A would underwrite $500 but would like to have a partner on the deal
Went to the FHP meeting yesterday.
I have attached a PDF with ny notes if you care.

July 12

Fair Hydro Plan notes.

Gadi set out the provinces position very clearly at the meeting.

Willing to provide the required guarantee but the goal is to keep this off of the provinces books.

The cost of funds is higher than if the province were funding this, so in exchange OPG and market participants must be willing to accept some of the risk.

If the Province provides a rock solid guarantee then there is a risk that it will be viewed as provincial debt and be placed on the province's books.

Lots of back and forth legal blah blah about small details but at the end Gadi made some progress on a couple of big issues.

In the event of a new government or legislative change Ontario will step in and make the payments.

There was a section that said Ontario wants to be able to call the bonds at par (problem) Gadi sort of said that we would give up on this one.

Servicing guarantee:

Was a sticking point We don't want to indemnify this one. Nor does OPG

I asked John after the meeting if OPG could provide a guantee in the event that an LDC failed to provide the FHP proceeds to the IESO

He seemed reluctant "said it would be weired" then said it would require a process.

Gadi sort of said that AAA or something less will not have a big impact on how this security trades.

Goldman talked about what sort of provincial guarantee would be required by the rating agencies and the bankers had some concerns about payments to the IESO in the event that an LDC fails to make a payment.

---

Please find attached a markup of the proposal from OPG regarding the Provincial Support Agreeement.

This markup is the result of discussions between us at MOF Legal, lawyers from Energy Legal and the Province's external counsel at Blakes.

The changes are significant and we would like to get your feedback on our proposed approach.

Perhaps we can have a discussion first with this group, and then a broader discussion with the Energy team and Stephen Ashbourne from Blakes.

Please let us know when you have had a chance to review and are available to discuss.

Best

Provincial Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

Performance Guarantees	
Performance Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Performance Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

Performance Guarantee:	Pursuant to a Performance Guarantee, the Performance Guarantor will guarantee the performance, or cause the performance, of the obligations of IESO as servicer under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including servicing obligations undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. It is anticipated that such obligations will include matters related to the billing, collection and remittance of clean energy adjustments by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments with other amounts. In the event that the Performance Guarantee is held to be unenforceable against the Performance Guarantor, the Performance Guarantee will contemplate, in the alternative, a functionally equivalent direct covenant of the Performance Guarantor.
Term:	The Performance Guarantor's obligations under a Performance Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Performance Guarantee.
Approval Requirement:	The servicing obligations (including any amendments) to which the Performance Guarantee relates, together with the provisions of any Performance Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Performance Guarantee:	Under no circumstances shall the Performance Guarantor be obligated to pay special or punitive damages, or for loss of profits.
Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.

Indemnity of the Province:	The Province of Ontario will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee (including because of claims made against the Indemnitee by one or more of its specified creditors) that result from any of the following (each, an "**Indemnification Event**"): (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act; (B) the Legislative Assembly of Ontario amending the Act or a Regulation made thereunder in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest.
Term:	The Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, the will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Indemnity:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or for loss of profits.
Undertakings regarding Certain Mismatches	
Avoidance of Mismatches	If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy all of its related payment obligations and thereby avoid any Mismatch.

Possible Undertaking to Fund Mismatches	If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to avoid a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to avoid the Mismatch. Any such undertaking may only be given at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and would be on such terms and conditions, including appropriate compensation to the Province of Ontario, as the Minister of Energy and the Minister of Finance determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
<u>Documentation</u>	
Representations, Terms and Conditions:	Subject to approval of the Minister of Energy and the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Performance Guarantor and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Performance Guarantor or the Indemnitor, or any agent or representative of the Performance Guarantor or the Indemnitor, in connection with the transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Confidentiality obligations of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

Provincial ~~Support Agreement~~Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") ~~is provided exclusively to the parties listed herein in connection with the draft~~relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. ~~Defined~~Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial ~~support agreement (the "**Provincial Support Agreement**") will contain the terms and conditions set out~~protection and assurance arrangements contemplated in this Term Sheet ~~in addition to such other representations, warranties, indemnities, and other~~will include such terms and conditions as the ~~Guarantor and the Beneficiaries (each as defined below) may reasonably require~~Minister of Energy and the Minister of Finance determine to be appropriate.*

Performance Guarantees	
Performance Guarantor:	~~Her Majesty the Queen in right~~The Province of Ontario, ~~as represented~~ by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	~~The indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**")~~Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Performance Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and ~~all~~ other persons having debt or other claims against ~~a~~the Financing Entity that are secured under ~~the Master Trust Indenture (collectively, the "**Beneficiaries**") including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee, the trustee of the Financing Entity if the Financing Entity is a trust, and any other administrator of the Financing Entity~~a related trust indenture.

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

~~**Term:**~~	~~The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[1] after all funding obligations (to be defined to include principal, interest, fees, hedge settlement and termination obligations and other related amounts) of all Financing Entities have been repaid.~~
Performance Guarantee:	~~Under the Master Sale and Servicing Agreement to be entered into by IESO and the Financing Entity, **[and OPG as Financial Services Manager]** ("**MSSA**"), IESO will have obligations both as a seller and as a servicer. Pursuant to a performance guarantee~~Pursuant to a Performance Guarantee, the Performance Guarantor will guarantee ~~in favour of the Beneficiaries to perform~~the performance, or cause the performance, of ~~(which may be by way of the appointment of a replacement servicer),~~ the obligations of IESO as servicer under the ~~MSSA and the~~ Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including ~~the obligations of any replacement servicer. The Guarantor will also guarantee the~~ servicing obligations ~~of the~~undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. ~~The servicing~~It is anticipated that such obligations ~~covered~~ will include ~~all obligations~~matters related to the ~~collecting~~billing, collection and ~~remitting~~remittance of clean energy adjustments ~~and will protect the Beneficiaries from any risks arising from~~by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments ~~being commingled~~ with other amounts. In the event that the ~~performance guarantee~~Performance Guarantee is held to be unenforceable against the Performance Guarantor, the ~~Provincial Support Agreement~~Performance Guarantee will contemplate ~~a separate legal obligation by the Guarantor to indemnify the Beneficiaries for any losses that result~~, in the alternative, a functionally equivalent direct covenant of the Performance Guarantor.
Term:	The Performance Guarantor's obligations under a Performance Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Performance Guarantee.
Approval Requirement:	The servicing obligations (including any amendments) to which the Performance Guarantee relates, together with the provisions of

[1] ~~This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.~~

	any Performance Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Performance Guarantee:	Under no circumstances shall the Performance Guarantor be obligated to pay special or punitive damages, or for loss of profits.
Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.
~~Payment Guarantee Event~~Indemnity of the Province:	~~A Payment Guarantee Event will occur if~~The Province of Ontario will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee (including because of claims made against the Indemnitee by one or more of its specified creditors) that result from any of the following (each, an "**Indemnification Event**"): (A) the Legislative Assembly of Ontario ~~repeals~~repealing (and not replacing on an equivalent basis) the Act; ~~or~~ (B) the Legislative Assembly of Ontario ~~amends~~amending the Act or a Regulation made thereunder ~~is amended~~ in a way that materially and adversely ~~impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such~~affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction ~~(i)~~in a final and non-appealable judgement determines that all or a portion of the Act ~~to be~~is *ultra vires* in a way that materially and adversely ~~impacts~~affects the ~~ability~~rights and interests of ~~a~~the Financing Entity ~~to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable; or~~ ~~(D) funding obligations are due and payable at a time when a market disruption (a period of [six months or more] when capital~~

	~~markets term funding is not available to effect refinancings of funding obligations) is occurring and, in the case of long term funding obligations only, a moratorium or limitation on the imposition and collection of clean energy adjustments to repay such funding obligations is in effect under the Act~~under its investment interest.
~~Payment Guarantee~~Term:	~~Upon the occurrence of a Payment Guarantee Event under clauses (A), (B) or (C) of the above definition:~~ ~~(x) the Guarantor shall assume and pay when due (without acceleration) all funding obligations and all other obligations of the Financing Entities to the Beneficiaries by paying all regularly scheduled amounts in respect thereof during the term of each Financing Entity's contractual obligation to such Beneficiaries; and~~ ~~(y) Beneficiaries holding funding obligations consisting of bonds [with a remaining term to maturity of greater than **one year**]~~ ~~shall have the option to put the bonds to the Financing Entity for a put price equal to 101% of the principal amount thereof plus accrued and unpaid interest. In connection with any put under this clause (y), the Guarantor shall guarantee payment of the put price and any related hedge breakage but shall not be responsible for any other default, penalty, prepayment or make whole amounts.~~ The Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, the will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under ~~Guarantees~~Indemnity:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or for loss of profits.
~~Priority of Payments:~~	~~The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.~~
~~Subrogation:~~	~~Where the Guarantor has repaid all Beneficiaries in full, to the extent of such payments the Guarantor shall be subrogated in and to all the rights of recovery of the Beneficiaries in respect of their~~

	~~applicable indebtedness and obligations and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all indebtedness and obligations owing to the Beneficiaries, the Indenture Trustee will acknowledge and agree on behalf of the Beneficiaries that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiaries have or may exercise in respect of the repaid indebtedness and obligations, all in accordance with the terms of the Master Trust Indenture. Prior to the repayment in full of the indebtedness and obligations owed to the Beneficiaries, the Guarantor shall have no rights of subrogation.~~
~~**Notice Requirements:**~~**Undertakings regarding Certain Mismatches**	~~The Indenture Trustee will be required to provide notice to the Guarantor of a Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.~~
~~**Closing:**~~**Avoidance of Mismatches**	~~Date to be determined but no later than [■, 2017]. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered~~If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy all of its related payment obligations and thereby avoid any Mismatch.
~~**Reporting Requirements of a Financing Entity:**~~ **Possible Undertaking to Fund Mismatches**	~~The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture~~If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to avoid a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to avoid the Mismatch. Any such undertaking may only be given at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and would be on such terms and conditions, including appropriate compensation to the Province of Ontario, as the Minister of Energy and the Minister of Finance

	determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
~~Conditions Precedent to Closing:~~Documentation	~~Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.~~[2]
Representations, Terms and Conditions:	~~Customary representations~~Subject to approval of the Minister of Energy and ~~warranties of the Guarantor~~the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Performance Guarantor ~~is~~and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Performance Guarantor or ~~its agents or representatives~~the Indemnitor, or any agent or representative of the Performance Guarantor or the Indemnitor, in connection with the ~~Transaction Documents~~transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	~~Customary confidentiality~~Confidentiality obligations ~~to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor~~of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

[2] ~~Opinions on the validity and enforceability of Provincial Support Agreement will be required.~~

Subject:	additional IESO Proposed Changes to OFHP Credit Facility
Date:	Tuesday, July 11, 2017 5:26:59 PM
Attachments:	RE IESO OFA new FH credit facility.msg IESO_OFA FHP 2017 Credit Letter - SIGNED.DOCX

Hello Mike,

We have received an email proposing a new change with respect to the IESO Credit Requirement letter for the Fair Hydro Plan.

Noted in the original IESO FHP request:

- New $2 billion FHP Credit Facility
- Reduction of the existing credit facility from $975 million down to $475 million. ($2.475 billion total credit facility)
- 5 year term, expires September 30, 2022.
- Minimum 7 days, to a maximum of 95 days draw to minimize interest costs and permit efficient FHP asset transfers.

Proposed change: minimum 5 days, to a maximum of 95 days draw.

Mike, is the change from 7 days, minimum draw to 5 days, something we can entertain from a capital markets perspective?

I am including Bruno, John and Salman as they may have thoughts from an Electricity Finance perspective (I understand Ronald Kwan was circulated the original IESO FHP Credit Requirement request).

Best regards,

We are working on the $2B draft now.

Is there any flexibility on changing the 7 day (not business days) minimum draw to 5 days? I'm trying to mitigate having OPG monies in hand while not having yet to repay the OFA. Please advise.

Regards.

Hello Anthony,

Please find the attached draft FHP IESO OFA Credit Facility Agreement. Please review and provide your comments. The draft Amending Agreement 10 will follow on Monday.
Have a great weekend.

Will

Subject: FW: IESO : OFA new FH credit facility

Hello Anthony,

Currently the credit facility agreement is being reviewed by OFA legal for review and comment. Once the recommended changes have been made the draft is then reviewed by MOF legal for review and comment. I expect to have the agreement to you early next week.

Thanks,

Will

Re: **IESO Credit Requirements for the 2017 Fair Hydro Plan**

Dear Mr. Mayman,

As you are aware the Ontario government has announced its intension to implement the proposed Fair Hydro Plan (FHP) to reduce electricity prices for eligible consumers in the province. Proposed legislation was introduced this month for the FHP. The Independent Electricity System Operator (IESO) is preparing to implement the FHP and has determined that in order to support the IESO's role in FHP implementation it will need greater credit liquidity than currently exists.

An existing credit facility between the IESO and the Ontario Financing Authority (OFA) is currently available for $975 million which includes support for the current Regulated Price Plan (RPP) program. The IESO proposes that a separate and additional credit facility be provided by either the OFA or Ontario Electricity Financial Corporation (OEFC) to support only the FHP credit needs. A separate facility for the FHP is preferable to ensure operational efficiency and interest tracking.

IESO's FHP Credit Requirements and Rationale

Below we have outlined the IESO's expected credit needs including the current OFA facility as follows:

	OFA:IESO Facility	New FHP facility
Current credit facilities	$975 million	$ -
Reduction due to FHP	($500 million)	$ -
Increase due to FHP	$ -	$2,000 million
Totals Credit Facilities	$475 million	$2,000 million

The above $500 million reduction in the current OFA facility is to eliminate duplicate credit needs and reflect the replacement of the current RPP by the new FHP. In addition, the IESO has had recent discussions with OFA staff to explain the rationale to support the overall $2,000 million FHP commitment.

We suggest the new FHP credit facility consider the following key provisions:

- 5 year term - to align with the FHP's initial period of deferral of electricity prices plus a contingency period (i.e. to September 30, 2022);
- interest charge - to be Province's cost of funds for borrowing with a similar term as determined by OFA / OEFC plus 0.25 percent per annum;
- Draws - to be based on minimum of 7 days to a maximum of 95 days, to minimize interest costs and permit efficient FHP asset transfers; and
- Existing $975 million OFA facility : draws to permit for FHP purposes until a new separate credit agreement for FHP purposes has been made available;

Upon your reply to this letter, the IESO will seek any necessary IESO Board of Directors' approval for the above credit facilities and we will provide such evidence for your records.

We appreciate your continued support and look forward to working with you. Please contact me should you need anything further.

Sincerely,

Kimberly Marshall

Ken

Here are some comments that you can add:

Currently, OPG plans to use proxy short term funding (banking facilities) rates on the subordinated debt until such time as the FHT issues Senior Debt to take out (term out) the short term funding. OPG can **simplify** (only set rates once) and **reduce financing risk** (there is no certainty as to the timing or term structure of the senior debt issuance) of the suggested process by terming out the subordinated debt at the time of each monthly equity injection from the Province.

Regards

Carlos

////////////// this is the original wording

- Interest rates on the subordinated debt will be established as follows:
    - During the Trust short term financing period when bank facilities are used as funding vehicles, the interest rate on subordinated debt will be the sum of (1) funding rate on senior debt, and (2) additional spread margin of [xx], reflecting the credit rating difference between the senior and subordinated debt
    - At the time when senior bonds are being issued to take out (term out) the short term financing, OPG will seek indicative coupon rates on the subordinated debt from dealers, reflecting the sum of underlying Government of Government of Canada yield of equivalent term and the appropriate credit spread. The average indicative coupon rate from dealers will be calculated and set as the subordinated debt rate. The process will be similar to the one established for pricing of OPG debt drawn from OEFC facilities.

Hi Mike,

As per my VM, I talked to Gadi and he suggested your team was working with TD on some language for the TB sub / Cab sub explaining that the structure can be financed. Energy folks are hoping to include language as soon as it is available. TB/Cab is next week so timing is tight.

Happy to chat,

Scott

Hi Gadi, Mike,

As discussed, we have drafted some language to insert into the Fair Hydro Plan Treasury Board and Cabinet Submissions. Please take a look and let us know if this works from your perspective:

Draft Language

The Ministry has been worked closely with the Ontario Financing Authority (OFA) and TD, as the Province's external financial advisor, on the financing structure (i.e., legislation, provincial guarantees, OPG's equity injections and IESO's enhanced credit facilities).

In particular, the proposed legislation enables a structure that OFA and TD believe will enable financing at a reasonable cost. Key elements that support this financing structure include:

- OPG issuances of subordinated debt to the SPV representing up to 49% of total borrowing; and
- Conditional (springing) guarantees by the Province to provide a backstop in the event of specific and limited events (e.g., changes to legislation that harm investor interests).

Please note that the ability to finance and the cost of financing will only be known with certainty once OPG takes this structure to market.

Happy to discuss further as needed.

Thanks,

Scott
