• Over the past few years and relevant today, the availability of short-term (generally 1 day to 7 days which is used a lot by the IESO, and including less than 30 days investment) products such as Treasury Bills, BAs and Term Deposits have been irregular and not reliable for the IESO to find. The IESO generally deals in large amounts (several hundreds of millions) and given the lack of short term products at the size the IESO needs, the Sch 1 banks have been generally offering Term Deposits for the IESO at very low interest rates because the Banks do not need the IESO monies. In fact, a few banks offer the IESO less than 10bps for Term Deposits – which is significantly lower than Bank of Canada overnight rate and BAs rates. Therefore, a Term Deposit with very low interest yield does not align with a resulting lower counterparty risk for the IESO; and

• The IESO's Transmission Rights balances have in general remained higher than $100

million on average over the last few years despite an IESO target of $20 million. This has resulted in the IESO managing higher cash-flows

- While the Fair Hydro program is likely to not impact the IESO's overall net cash balances (borrow / sell should generally align), the timing of these cash flows may be different at times and the IESO may hold more cash (short term basis) for a few days. The sales/service agreement with OPG Trust has not been completed, and I am just listing this as a contingency in case for some reason IESO holds larger cash balances before paying back the Fair Hydro loans.

Regards.

Hi Anthony,

I wanted to circle back with you on this email, particularly regarding possibly updating the IESO's Treasury Policy. Since it does require the Minister of Finance's approval, the OFA would be involved in obtaining that approval from the Minister. When you do have a markup, please do share it with us. Any details on what the changes would be accomplishing etc would also be helpful.

Regards,
Salman

Subject: IESO Treasury Policy - likely revising for June 2017

Salman,

As part of the Fair Hydro initiative, the IESO plans to ask government to permit FHP debt in an update to the O. Reg. 280/14.

In addition, IESO is likely to update its treasury policy (see attached – as approved by IESO Board and Min of Fin in 2015) to permit for the FHP draws/initiative.

I likely may also ask to increase the short term Cdn Sch I banks limits from $420million to $500million.

As part of the treasury policy update I wanted to give you/OFA a fyi and determine if you/OFA wish to comment back to me before I undertake the above changes.

Call me to discuss if easier.

Regards.

Hi Ron

Attached is the IESO Treasury Policy required annually. See Anthony's email below for two key changes from last year. IESO had requested feedback for end-of-day as they are preparing for Board meetings June 13/14 (I think tomorrow will do). Salman shared this note this morning for comment, with Ken and Mike Manning. We have not yet heard back. Please let us now if you have any concerns or comments.

Thanks
Bruno

Subject: RE: IESO Treasury Policy - likely revising for June 2017

Salman,

Attached is a preliminary draft of the Treasury Policy and Sch A for your review.

Two changes have been made:

1. Permitting Fair Hydro program borrowings – self explanatory rationale; and
2. Increase from $420 million to $500 million in Sch A's Cdn Banks max limit per counter party.

The key rationale for the requested increase from $420 million to $500 million per counterparty is as follows:

• The market price of electricity has increased between 2014 to 2016 by approximately 16%-19% which has continued to result in the IESO managing higher and higher cash-flows and therefore seeking risk appropriate investments in accordance with the Treasury Policy – a large limit will allow the IESO to have more flexibility while being efficient with its cash;

• Over the past few years and relevant today, the availability of short-term (generally 1 day to 7 days which is used a lot by the IESO, and including less than 30 days investment) products such as Treasury Bills, BAs and Term Deposits have been irregular and not reliable for the IESO to find. The IESO generally deals in large amounts (several hundreds of millions) and given the lack of short term products at the size the IESO needs, the Sch 1 banks have been generally offering Term Deposits for the IESO at very low interest rates because the Banks do not need the IESO monies. In fact, a few banks offer the IESO less than 10bps for Term Deposits – which is significantly lower than Bank of Canada overnight rate and BAs rates. Therefore, a Term Deposit with very low interest yield does not align with a resulting lower counterparty risk for the IESO; and

• The IESO's Transmission Rights balances have in general remained higher than $100 million on average over the last few years despite an IESO target of $20 million. This has resulted in the IESO managing higher cash-flows

- While the Fair Hydro program is likely to not impact the IESO's overall net cash balances (borrow / sell should generally align), the timing of these cash flows may be different at times and the IESO may hold more cash (short term basis) for a few days. The sales/service agreement with OPG Trust has not been completed, and I am just listing this as a contingency in case for some reason IESO holds larger cash balances before paying back the Fair Hydro loans.

Subject: RE: IESO Treasury Policy - likely revising for June 2017

Salman,

Attached is a preliminary draft of the Treasury Policy and Sch A for your review.

Two changes have been made:

1. Permitting Fair Hydro program borrowings – self explanatory rationale; and
2. Increase from $420 million to $500 million in Sch A's Cdn Banks max limit per counter party.

The key rationale for the requested increase from $420 million to $500 million per counterparty is as follows:
• The market price of electricity has increased between 2014 to 2016 by approximately 16%-19% which has continued to result in the IESO managing higher and higher cash-flows and therefore seeking risk appropriate investments in accordance with the Treasury Policy – a large limit will allow the IESO to have more flexibility while being efficient with its cash;

• Over the past few years and relevant today, the availability of short-term (generally 1 day to 7 days which is used a lot by the IESO, and including less than 30 days investment) products such as Treasury Bills, BAs and Term Deposits have been irregular and not reliable for the IESO to find. The IESO generally deals in large amounts (several hundreds of millions) and given the lack of short term products at the size the IESO needs, the Sch 1 banks have been generally offering Term Deposits for the IESO at very low interest rates because the Banks do not need the IESO monies. In fact, a few banks offer the IESO less than 10bps for Term Deposits – which is significantly lower than Bank of Canada overnight rate and BAs rates. Therefore, a Term Deposit with very low interest yield does not align with a resulting lower counterparty risk for the IESO; and

• The IESO's Transmission Rights balances have in general remained higher than $100 million on average over the last few years despite an IESO target of $20 million. This has resulted in the IESO managing higher cash-flows

- While the Fair Hydro program is likely to not impact the IESO's overall net cash balances (borrow / sell should generally align), the timing of these cash flows may be different at times and the IESO may hold more cash (short term basis) for a few days. The sales/service agreement with OPG Trust has not been completed, and I am just listing this as a contingency in case for some reason IESO holds larger cash balances before paying back the Fair Hydro loans.

Regards.

Hi Anthony,

I wanted to circle back with you on this email, particularly regarding possibly updating the IESO's Treasury Policy. Since it does require the Minister of Finance's approval, the OFA would be involved in obtaining that approval from the Minister. When you do have a markup, please do share it with us. Any details on what the changes would be accomplishing etc would also be helpful.

Regards,
Salman

Salman,

As part of the Fair Hydro initiative, the IESO plans to ask government to permit FHP debt in an update to the O. Reg. 280/14.

In addition, IESO is likely to update its treasury policy (see attached – as approved by IESO Board and Min of Fin in 2015) to permit for the FHP draws/initiative.

I likely may also ask to increase the short term Cdn Sch I banks limits from $420million to $500million.

As part of the treasury policy update I wanted to give you/OFA a fyi and determine if you/OFA wish to comment back to me before I undertake the above changes.

Call me to discuss if easier.

Regards.

- While the Fair Hydro program is likely to not impact the IESO's overall net cash balances (borrow / sell should generally align), the timing of these cash flows may be different at times and the IESO may hold more cash (short term basis) for a few days. The sales/service agreement with OPG Trust has not been completed, and I am just listing this as a contingency in case for some reason IESO holds larger cash balances before paying back the Fair Hydro loans.

Regards.

Subject: IESO Treasury Policy - likely revising for June 2017

Salman,

As part of the Fair Hydro initiative, the IESO plans to ask government to permit FHP debt in an update to the O. Reg. 280/14.

In addition, IESO is likely to update its treasury policy (see attached – as approved by IESO Board and Min of Fin in 2015) to permit for the FHP draws/initiative.

I likely may also ask to increase the short term Cdn Sch I banks limits from $420million to $500million.

As part of the treasury policy update I wanted to give you/OFA a fyi and determine if you/OFA wish to comment back to me before I undertake the above changes.

Call me to discuss if easier.

Regards.

IESO Statement of Investment, Borrowing and Financial Management Policies and Procedures ("Treasury Policy")			
Office of Primary Responsibility	Treasury, Corporate Services	Policy #	**Treasury 01**
Subject.:	**IESO TREASURY POLICY**	Page:	1 of 4, and Schedule A
Approved by	Board of Directors	Effective	June 24, 2015
		Revised	June 14, 2017~~n / a~~

1. DEFINITIONS

CFO: means the IESO's Chief Financial Officer

IESO: means the Independent Electricity System Operator.

Treasury Policy: means this policy document, and means the Statement of Investment, Borrowing and Financial Management Policies and Procedures as referenced in Ontario Regulation 280 / 14.

2. PURPOSE:

The purpose of this Treasury Policy is as follows:

a) To adopt a policy for the sound and efficient management of the IESO's borrowing, investment, foreign exchange, financial affairs, and other treasury related activities;

b) To make investments when the investments are advisable for the sound and efficient management of the IESO's financial affairs;

c) To adhere to Ontario Regulation 280 / 14 made under the Electricity Act, 1998, as amended;

3. SCOPE

This Treasury Policy applies to all treasury related activities of the IESO (corporation) and the IESO's administered markets.

This Treasury Policy must be reviewed on an annual basis.

4. OUT OF SCOPE

This Treasury Policy does not apply to any activities pertaining to the IESO's pension plans[1].

Nothing in this Treasury Policy restricts the IESO's authority to enter into contracts referred to in section 25.32 or 25.35 of the Electricity Act.

5. RESPONSIBILITIES

5.01 **Manager, Treasury and Pension Operations (or equivalent)** is responsible for:

- Manage all day-to-day treasury activities and ensure adherence to this Treasury Policy;
- To establish documented treasury processes and procedures for internal control purposes;
- As necessary, recommend to the CFO any appropriate changes to Treasury Policy;
- Provide the CFO on a timely basis with any policy violations, concerns, or issues;
- To provide a report on the IESO's treasury activities to the CFO and IESO Board of Directors at least each quarter.

5.02 **Chief Financial Officer** is responsible for:

- Establish prudent and effective treasury and risk management practices;
- To manage the relationships between government and the IESO regarding all treasury matters;
- Reviewing any proposed changes to the Treasury Policy before submission to the IESO Board of Directors;

[1] Includes the IESO Registered Pension Plan and IESO Supplementary Employee Retirement Plan (SERP reserve).

5.03 **IESO Board of Directors** are responsible for:

- To adopt a Treasury Policy setting out policies for the IESO's borrowing, investment, foreign exchange, financial affairs, and other treasury related activities;
- To ensure any proposed change to the Treasury Policy is sent to the Minister of Finance for approval

6. PERMITTED ACTIVITIES

6.1 **Permitted Borrowings:**

a) All new borrowing facilities must be approved by the IESO Board of Directors.

b) The CFO will renew the annual SERP's letter of credit posted with the SERP trustee.

c) All borrowing facilities must be denominated in Canadian dollars.

d) The IESO shall establish bank accounts' overdraft capacity and services with its bank(s).

e) The IESO may only borrow from the following list of lenders:
   i. Government of Canada, Canadian provincial governments or any of their agencies; and
   ii. Canadian Schedule I or Schedule II or Schedule III financial institutions;

f) As determined by the CFO, the IESO may obtain a credit rating(s) to assist the IESO with establishing the IESO's creditworthiness to prospective lenders or counterparties.

g) Borrowing facilities shall only be utilized for the following purposes:
   i. To ensure the IESO corporation's operating liquidity and for purchases of IESO corporation's capital assets;
   ii. To ensure liquidity to complete the IESO's mandate for the Ontario electricity markets' settlements including the settlements for any Ontario government programs that the IESO is a service provider;
   iii. To ensure funding of any amounts, including variance accounts and timing differences, as prescribed by the Ontario Electricity Act and any Ontario regulation;
   ~~iii.~~iv. To ensure funding of any amounts, including deferral accounts and timing differences, pertaining to the IESO's mandate under the Ontario~~'s~~ Fair Hydro Plan Act~~program~~;
   ~~iv.~~v. To ensure funding as may be necessary to manage timing differences between the receipts and payments with respect to IESO procurement contracts, electricity markets transactions, Smart Metering, and taxes; and

Commented [RK1]: Should the wording provide some flavor and legislative context, as per some of the other sub-clauses?

~~v.~~vi. As directed by the Minister of Energy.~~;~~

6.2 **Permitted Investments and Forward Foreign Exchange Contracts:**

a) See **Schedule "A": Approved Financial Instruments Listing** for a listing of permitted investments and counterparties.
b) Investments or counterparties not listed in **Schedule "A"** are prohibited.
c) All investments must be denominated in either Canadian or US dollars.

End.

Hi Ron

Attached is the IESO Treasury Policy required annually. See Anthony's email below for two key changes from last year. IESO had requested feedback for end-of-day as they are preparing for Board meetings June 13/14 (I think tomorrow will do). Salman shared this note this morning for comment, with Ken and Mike Manning. We have not yet heard back. Please let us now if you have any concerns or comments.

Thanks
Bruno

Subject: RE: IESO Treasury Policy - likely revising for June 2017

Salman,

Attached is a preliminary draft of the Treasury Policy and Sch A for your review.

Two changes have been made:

1. Permitting Fair Hydro program borrowings – self explanatory rationale; and
2. Increase from $420 million to $500 million in Sch A's Cdn Banks max limit per counter party.

The key rationale for the requested increase from $420 million to $500 million per counterparty is as follows:
• The market price of electricity has increased between 2014 to 2016 by approximately 16%-19% which has continued to result in the IESO managing higher and higher cash-flows and therefore seeking risk appropriate investments in accordance with the Treasury Policy – a large limit will allow the IESO to have more flexibility while being efficient with its cash;

• Over the past few years and relevant today, the availability of short-term (generally 1 day to 7 days which is used a lot by the IESO, and including less than 30 days investment) products such as Treasury Bills, BAs and Term Deposits have been irregular and not reliable for the IESO to find. The IESO generally deals in large amounts (several hundreds of millions) and given the lack of short term products at the size the IESO needs, the Sch 1 banks have been generally offering Term Deposits for the IESO at very low interest rates because the Banks do not need the IESO monies. In fact, a few banks offer the IESO less than 10bps for Term Deposits – which is significantly lower than Bank of Canada overnight rate and BAs rates. Therefore, a Term Deposit with very low interest yield does not align with a resulting lower counterparty risk for the IESO; and

• The IESO's Transmission Rights balances have in general remained higher than $100 million on average over the last few years despite an IESO target of $20 million. This has resulted in the IESO managing higher cash-flows

- While the Fair Hydro program is likely to not impact the IESO's overall net cash balances (borrow / sell should generally align), the timing of these cash flows may be different at times and the IESO may hold more cash (short term basis) for a few days. The sales/service agreement with OPG Trust has not been completed, and I am just listing this as a contingency in case for some reason IESO holds larger cash balances before paying back the Fair Hydro loans.

Regards.

Minister of Finance

FROM: Scott Thompson
Deputy Minister

SUBJECT: **Minister's Approval of IESO's Treasury Policy**

Attached for your review and consideration is the Independent Electricity System Operator's (IESO) updated Treasury Policy.

As prescribed under Ontario Regulation 280/14 ("Regulation") under the *Electricity Act, 1998*, the IESO has submitted an updated IESO Treasury Policy ("Treasury Policy") for your approval.

Under the Regulation, the Minister of Finance may approve the proposed statement or refer it back to the IESO for further consideration. If the Minister of Finance does not approve the proposed statement and does not refer it back to the IESO for further consideration within 60 days, the Minister shall be deemed to have approved the IESO's proposed Treasury Policy.

The revised Treasury Policy incorporates the following two changes:

1. Permit borrowings to ensure funding of any amounts resulting from or required under the Ontario Fair Hydro Plan Act, 2017.
   - This change is a result of the recent passing of the Ontario Fair Hydro Plan Act, 2017.

2. Increase counterparty exposure to Schedule A Canadian Banks from the current $420million to $500 million, an increase of $80 million exposure per counterparty.
   - This ensures that the IESO has flexibility to efficiently manage its cash accounts as evolving business and increasing electricity prices in recent years requires IESO to manage increased levels of cash flows and seek appropriate short-term investments.

…/2

No fiscal costs to the government are anticipated from the approval of the policy as the IESO will continue its operations and cost recovery from the Ontario Energy Board as usual.

Staff at the Ontario Financing Authority have reviewed and recommend your approval of the IESO Treasury Policy.

Attached is a briefing note for your consideration, as well as an approval letter for your signature. OFA staff are available should you require a further briefing or have any questions.

Scott Thompson

MEMORANDUM TO: The Honourable Charles Sousa
Minister of Finance

FROM: Scott Thompson
Deputy Minister

SUBJECT: **Minister's Approval of IESO's Treasury Policy**

Attached for your review and consideration is the Independent Electricity System Operator's (IESO) updated Treasury Policy.

As prescribed under Ontario Regulation 280/14 ("Regulation") under the *Electricity Act, 1998*, the IESO has submitted an updated IESO Treasury Policy ("Treasury Policy") for your approval.

Under the Regulation, the Minister of Finance may approve the proposed statement or refer it back to the IESO for further consideration. If the Minister of Finance does not approve the proposed statement and does not refer it back to the IESO for further consideration within 60 days, the Minister shall be deemed to have approved the IESO's proposed Treasury Policy.

The revised Treasury Policy incorporates the following two changes:

1. Permit borrowings to ensure funding of any amounts resulting from or required under the Ontario Fair Hydro Plan Act, 2017.
   - This change is a result of the recent passing of the Ontario Fair Hydro Plan Act, 2017.

2. Increase counterparty exposure to Schedule A Canadian Banks from the current $420million to $500 million, an increase of $80 million exposure per counterparty.
   - This ensures that the IESO has flexibility to efficiently manage its cash accounts as evolving business and increasing electricity prices in recent years requires IESO to manage increased levels of cash flows and seek appropriate short-term investments.

~~No fiscal costs to the government are anticipated from the approval of the policy as the IESO will continue its operations and cost recovery from the Ontario Energy Board as usual.~~

…/2

No fiscal costs to the government are anticipated from the approval of the policy as the IESO will continue its operations and cost recovery from the Ontario Energy Board as usual.

Staff at the Ontario Financing Authority have reviewed and recommend your approval of the IESO Treasury Policy.

Attached is a briefing note for your consideration, as well as an approval letter for your signature. OFA staff are available should you require a further briefing or have any questions.

Scott Thompson

MINISTER OF FINANCE APPROVAL OF
IESO'S UPDATED TREASURY POLICY

ISSUE

As prescribed under Ontario Regulation 280/14 ("Regulation") under the *Electricity Act,* 1998, the IESO has submitted an updated IESO Treasury Policy ("Treasury Policy") for the Minister of Finance's approval.

- Under the Regulation, the IESO is required to maintain investment, borrowing and financial management policies and procedures.
- The Treasury Policy was last approved by the Minister of Finance in 2015.
- Under the Regulation, the Minister of Finance may approve the proposed statement or refer it back to the IESO for further consideration. If the Minister of Finance does not approve the proposed statement and does not refer it back to the IESO for further consideration within 60 days, the Minister shall be deemed to have approved the IESO's proposed Treasury Policy.

RECOMMENDATION

OFA staff have reviewed the changes proposed to the Treasury Policy and recommend that it be approved.

- The changes proposed would permit IESO borrowing facilities to be used to ensure funding of any amounts resulting from or required under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act").
- No fiscal costs to the government are anticipated from the approval of the proposed updated policy as the IESO will continue its operations and cost recovery under the OFHP Act and from the Ontario Energy Board.

KEY CHANGES IN THE TREASURY POLICY

The revised Treasury Policy incorporates the following two changes:

1. Permit borrowings to ensure funding of any amounts resulting from or required under the *Ontario Fair Hydro Plan Act, 2017*.
    - This change is a result of the recent passing of the OFHP Act.
2. Increase counterparty exposure to Schedule A Canadian Banks from the current $420million to $500 million, an increase of $80 million exposure per counterparty.
    - This ensures that the IESO has flexibility to efficiently manage its cash accounts as evolving business requires IESO to manage increased levels of cash flows and seek appropriate short-term investments.

CONSIDERATIONS

- On May 31, 2017, the government passed the OFHP Act to enable the implementation of the Ontario Fair Hydro Plan, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).
- Under the OFHP Act, in the early years of the plan a portion of the Global Adjustment charge to ratepayers will be deferred for recovery to the future and the IESO will incur a monthly funding shortfall ~~in the early years of the plan~~, as ~~a portion of the Global Adjustment charge to ratepayers will be deferred to the future~~.

- The IESO under the OFHP Act has a right to recover the deferred charges (or "regulatory asset"), which is expected to be sold by IESO to a financing entity established by OPG.
- Although IESO will not need long-term borrowing for its role in this process, it is expected to need short-term financing.
    - ~~As such, t~~There is expected to be initial and ongoing IESO cash flow requirement timing differences.
        - The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017 (planned for later in summer 2017; however, exact timing is subject to actual implementation).
        - Even once the SPV is set up to borrow, there is expected to be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO.
        - Also, under the legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.
    - The IESO is expected to enter into a revolving credit agreement with the Ontario Financing Authority to manage these cash flow timing differences.
- Furthermore, the IESO, as a settlement agency, collects funds from electricity users and makes payments to generators, transmitters and conservation programs. These balances are deposited in accounts for a period ranging from a few days to a few months. Interest revenue is earned by the IESO.
    - IESO has stated that since the market price of electricity has increased since 2014 by 16%-19%, it has resulted in IESO managing increased levels of cash flows. This larger limit allows IESO to better manage these increasing cash flows.

BACKGROUND

- The IESO and the former Ontario Power Authority (OPA) merged on January 1, 2015, into an amalgamated entity, also called the IESO.
- Prior to the amalgamation, the IESO was not subject to any regulations pertaining to its borrowing and investment activities. However, the former OPA was subject to Ontario Regulation 423/04 which provided oversight on the OPA's investment and borrowing activities and required that the OPA submit to the Minister of Finance its Treasury Policy, and any subsequent changes, for approval.
- In December 2014, Ontario Regulation 423/04 was repealed and replaced in December 2014 with Ontario Regulation 280/14 which outlines the specific parameters governing the IESO's investment and borrowing activities.
- ~~Given that the IESO's financial results are fully consolidated on the books of the Province, and that the IESO has credit facilities with the Province (through OEFC and OFA), the regulation is intended to provide the Minister of Finance with oversight over the financial investment and borrowing plans of the amalgamated entity.~~
- On June 15, 2015, LRC and Cabinet approved amendments to Ontario Regulation 280/14 to allow the IESO to continue its normal business operations including continued investment in securities that have been issued or guaranteed by the federal US government, manage foreign exchange risk, and continue managing its pension plans as it has in the past without any additional restrictions.

Formatted

Formatted

Formatted: Font: 11 pt, Font color: Auto

Formatted: Font: 11 pt, Font color: Auto

Formatted

- Given that the IESO's financial results are fully consolidated on the books of the Province, and that the IESO has credit facilities with the Province (through OEFC and OFA), the regulation is intended to provide the Minister of Finance with oversight over the financial investment and borrowing plans of the amalgamated entity.
- The regulation also allows the IESO to borrow for general corporate purposes (which includes borrowing for pension contributions, capital expenditures, etc.), consistent with the terms of its credit facility with the Ontario Electricity Financial Corporation (OEFC).

Dear Minister Sousa:

On behalf of the IESO, I am sending the attached IESO Treasury Policy and Schedule A (version June 14, 2017) for your review and approval.
Should you have questions on this, please contact either Anthony Martinello, Kimberly Marshall or John Rattray whose information is contained in the accompanying letter.

Sincerely,
David Barrett

MINISTER OF FINANCE APPROVAL OF
IESO'S UPDATED TREASURY POLICY

ISSUE

As prescribed under Ontario Regulation 280/14 ("Regulation") under the *Electricity Act,* 1998, the IESO has submitted an updated IESO Treasury Policy ("Treasury Policy") for the Minister of Finance's approval.

- Under the Regulation, the IESO is required to maintain investment, borrowing and financial management policies and procedures.
- The Treasury Policy was last approved by the Minister of Finance in 2015.
- Under the Regulation, the Minister of Finance may approve the proposed statement or refer it back to the IESO for further consideration. If the Minister of Finance does not approve the proposed statement and does not refer it back to the IESO for further consideration within 60 days, the Minister shall be deemed to have approved the IESO's proposed Treasury Policy.

RECOMMENDATION

OFA staff have reviewed the changes proposed to the Treasury Policy and recommend that it be approved.

- The changes proposed would permit IESO borrowing facilities to be used to ensure funding of any amounts resulting from or required under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act").
- No fiscal costs to the government are anticipated from the approval of the proposed updated policy as the IESO will continue its operations and cost recovery under the OFHP Act and from the Ontario Energy Board.

KEY CHANGES IN THE TREASURY POLICY

The revised Treasury Policy incorporates the following two changes:

1. Permit borrowings to ensure funding of any amounts resulting from or required under the *Ontario Fair Hydro Plan Act, 2017*.
    - This change is a result of the recent passing of the OFHP Act.
2. Increase counterparty exposure to Schedule A Canadian Banks from the current $420million to $500 million, an increase of $80 million exposure per counterparty.
    - This ensures that the IESO has flexibility to efficiently manage its cash accounts as evolving business requires IESO to manage increased levels of cash flows and seek appropriate short-term investments.

CONSIDERATIONS

- On May 31, 2017, the government passed the OFHP Act to enable the implementation of the Ontario Fair Hydro Plan, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).
- Under the OFHP Act, the IESO will incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. The deferred charges (or "regulatory asset") is expected to be sold by IESO to a

financing entity established by OPG. Although IESO will not need long-term borrowing for its role in this process, it is expected to need short-term financing.

- As such, there is expected to be initial and ongoing IESO cash flow requirement timing differences. The IESO is expected to enter into a revolving credit agreement with the Ontario Financing Authority to manage these cash flow timing differences.
- Furthermore, the IESO, as a settlement agency, collects funds from electricity users and makes payments to generators, transmitters and conservation programs. These balances are deposited in accounts for a period ranging from a few days to a few months. Interest revenue is earned by the IESO.
    - IESO has stated that since the market price of electricity has increased since 2014 by 16%-19%, it has resulted in IESO managing increased levels of cash flows. This larger limit allows IESO to better manage these increasing cash flows.

BACKGROUND

- The IESO and the former Ontario Power Authority (OPA) merged on January 1, 2015, into an amalgamated entity, also called the IESO.
- Prior to the amalgamation, the IESO was not subject to any regulations pertaining to its borrowing and investment activities. However, the former OPA was subject to Ontario Regulation 423/04 which provided oversight on the OPA's investment and borrowing activities and required that the OPA submit to the Minister of Finance its Treasury Policy, and any subsequent changes, for approval.
- In December 2014, Ontario Regulation 423/04 was repealed and replaced in December 2014 with Ontario Regulation 280/14 which outlines the specific parameters governing the IESO's investment and borrowing activities.
- ~~Given that the IESO's financial results are fully consolidated on the books of the Province, and that the IESO has credit facilities with the Province (through OEFC and OFA), the regulation is intended to provide the Minister of Finance with oversight over the financial investment and borrowing plans of the amalgamated entity.~~
- On June 15, 2015, LRC and Cabinet approved amendments to Ontario Regulation 280/14 to allow the IESO to continue its normal business operations including continued investment in securities that have been issued or guaranteed by the federal US government, manage foreign exchange risk, and continue managing its pension plans as it has in the past without any additional restrictions.
- Given that the IESO's financial results are fully consolidated on the books of the Province, and that the IESO has credit facilities with the Province (through OEFC and OFA), the regulation is intended to provide the Minister of Finance with oversight over the financial investment and borrowing plans of the amalgamated entity.
- The regulation also allows the IESO to borrow for general corporate purposes (which includes borrowing for pension contributions, capital expenditures, etc.), consistent with the terms of its credit facility with the Ontario Electricity Financial Corporation (OEFC).

MINISTER OF FINANCE APPROVAL OF
IESO'S UPDATED TREASURY POLICY

ISSUE

As prescribed under Ontario Regulation 280/14 ("Regulation") under the *Electricity Act,* 1998, the IESO has submitted an updated IESO Treasury Policy ("Treasury Policy") for the Minister of Finance's approval.

- Under the Regulation, the IESO is required to maintain investment, borrowing and financial management policies and procedures.
- The Treasury Policy was last approved by the Minister of Finance in 2015.
- Under the Regulation, the Minister of Finance may approve the proposed statement or refer it back to the IESO for further consideration. If the Minister of Finance does not approve the proposed statement and does not refer it back to the IESO for further consideration within 60 days, the Minister shall be deemed to have approved the IESO's proposed Treasury Policy.

RECOMMENDATION

OFA staff have reviewed the changes proposed to the Treasury Policy and recommend that it be approved.

- The changes proposed are not significant in nature and raise no concerns with staff.
- No fiscal costs to the government are anticipated from the approval of the policy as the IESO will continue its operations and cost recovery from the Ontario Energy Board as usual.

KEY CHANGES IN THE TREASURY POLICY

The revised Treasury Policy incorporates the following two changes:

1. Permit borrowings to ensure funding of any amounts resulting from or required under the *Ontario Fair Hydro Plan Act, 2017*.
    - This change is a result of the recent passing of the *Ontario Fair Hydro Plan Act, 2017.*
2. Increase counterparty exposure to Schedule A Canadian Banks from the current $420million to $500 million, an increase of $80 million exposure per counterparty.
    - This ensures that the IESO has flexibility to efficiently manage its cash accounts as evolving business requires IESO to manage increased levels of cash flows and seek appropriate short-term investments.

CONTEXT AND BACKGROUND

- The IESO and the former Ontario Power Authority (OPA) merged on January 1, 2015, into an amalgamated entity, also called the IESO.
- The IESO, as a settlement agency, collects funds from electricity users and makes payments to generators, transmitters and conservation programs. These balances are deposited in accounts for a period ranging from a few days to a few months. Interest revenue is earned by the IESO.
    - IESO has stated that since the market price of electricity has increased since 2014 by 16%-19%, it has resulted in IESO managing increased levels of cash flows. This larger limit allows IESO to better manage these increasing cash flows.

- Given that the IESO's financial results are fully consolidated on the books of the Province, and that the IESO has credit facilities with the Province (through OEFC and OFA), the regulation is intended to provide the Minister of Finance with oversight over the financial investment and borrowing plans of the amalgamated entity.
- Prior to the amalgamation, the IESO was not subject to any regulations pertaining to its borrowing and investment activities. However, the former OPA was subject to Ontario Regulation 423/04 which provided oversight on the OPA's investment and borrowing activities and required that the OPA submit to the Minister of Finance its Treasury Policy, and any subsequent changes, for approval.
- In December 2014, Ontario Regulation 423/04 was repealed and replaced in December 2014 with Ontario Regulation 280/14 which outlines the specific parameters governing the IESO's investment and borrowing activities.
- On June 15, 2015, LRC and Cabinet approved amendments to Ontario Regulation 280/14 to allow the IESO to continue its normal business operations including continued investment in securities that have been issued or guaranteed by the federal US government, manage foreign exchange risk, and continue managing its pension plans as it has in the past without any additional restrictions.
- The regulation also allows the IESO to borrow for general corporate purposes (which includes borrowing for pension contributions, capital expenditures, etc.), consistent with the terms of its credit facility with the Ontario Electricity Financial Corporation (OEFC).

MEMORANDUM TO: Scott Thompson
Deputy Minister of Finance

FROM: Gadi Mayman
Chief Executive Officer

SUBJECT: **Minister's Approval of IESO's Treasury Policy**

Attached for your review and consideration is a memo to the Minister of Finance recommending the Minister of Finance to approve the Independent Electricity System Operator's (IESO) Treasury Policy.

As prescribed under Ontario Regulation 280/14 ("Regulation") under the *Electricity Act, 1998*, the IESO has submitted an updated IESO Treasury Policy ("Treasury Policy") for the Minister of Finance's approval.

Under the Regulation, the Minister of Finance may approve the proposed statement or refer it back to the IESO for further consideration. If the Minister of Finance does not approve the proposed statement and does not refer it back to the IESO for further consideration within 60 days, the Minister shall be deemed to have approved the IESO's proposed Treasury Policy.

The revised Treasury Policy incorporates the following two changes:

1. Permit borrowings to ensure funding of any amounts resulting from or required under the Ontario Fair Hydro Plan Act, 2017.
    - This change is a result of the recent passing of the Ontario Fair Hydro Plan Act, 2017.

2. Increase counterparty exposure to Schedule A Canadian Banks from the current $420million to $500 million, an increase of $80 million exposure per counterparty.
    - This ensures that the IESO has flexibility to efficiently manage its cash accounts as evolving business and increasing electricity prices in recent years requires IESO to manage increased levels of cash flows and seek appropriate short-term investments.

…/2

No fiscal costs to the government are anticipated from the approval of the policy as the IESO will continue its operations and cost recovery from the Ontario Energy Board as usual.

Attached is a briefing note for your consideration, as well as an approval letter for the Minister's signature. OFA staff are available should you require a further briefing or have any questions.

IESO FAIR HYDRO PLAN CREDIT FACILITY
MINISTER OF FINANCE LENDING DIRECTIVE

The Independent Electricity System Operator (IESO) has requested a revolving credit facility in an amount of up to $2 billion from the Ontario Financing Authority ("OFA") to support its role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act"). To accommodate this request, the OFA requires a Lending Directive from the Minister of Finance.

- The IESO is requesting the credit facility be in place by July 1, 2017, with an initial term of 5-years plus a contingency of three months (effectively expiring on September 30, 2022).

RECOMMENDATION

- OFA staff recommend the Minister sign the Lending Directive allowing the OFA to lend to the IESO.
  - This will help the IESO to fulfil the commitments under the OFHP Act as the IESO will have to finance short to medium term funding shortfalls in the implementation of the Fair Hydro Plan.

MINISTER'S DIRECTIVE

Minister of Finance's Lending Directive would authorize the OFA to provide a revolving credit facility in an amount of up to $2 billion with a maturity date of September 30, 2022. The Lending Directive will also include the following conditions:

- The interest rate charged to IESO on all advances will be based on the Province's cost of funds plus a twenty-five basis point (0.25%) spread, consistent with the spread for current and past OFA credit facilities for the IESO.
- The credit facility agreement shall be subject to such other terms as the OFA deems appropriate from time to time.

FISCAL IMPACT

- There would be a relatively small but positive fiscal impact for the Province as a result of this credit facility.
  - The Province receives a small fiscal benefit by adding 25 basis points (i.e., 0.25%) to the Province's cost of funds provided to the IESO under the facility, which should more than offset any administrative cost impact on the OFA and Province.
  - The actual amount is expected to be small, as the IESO is expected to make draws for short periods to bridge brief timing differences in cash flows.
- Both the IESO and OFA are consolidated with the Province on a line by line basis. For the OFA and the Province, costs associated with the credit facility are recovered from the IESO. For the IESO, principal and interest associated with the credit facility are ultimately recovered from electricity ratepayers.
  - Notwithstanding this, recovery from electricity ratepayers is determined by the Ontario Energy Board. If IESO cannot sell the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, to a financing entity as per the Act, the IESO will have this revolving debt that can only begin to be repaid once ratepayers begin to pay down the deferred Global Adjustment amount.

DETAILS AND ANALYSIS

- On May 31, 2017, the government passed the OFHP Act to enable the implementation of the Ontario Fair Hydro Plan, which will lower electricity bills by 25 per cent on average for eligible

residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).

- Under the OFHP Act, the IESO will incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment ("GA") charge to ratepayers will be deferred to the future.
- During this period, GA amounts collected from ratepayers will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.
- The OFHP Act gives the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell the regulatory asset (i.e., the right to recover the deferred amounts in the future) to a financing entity.
  - It is anticipated that the regulatory asset will be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
  - The cash received from selling the regulatory asset will be used by the IESO to fund the incurred GA shortfall.
- IESO is expected to need short-term financing to manage initial and ongoing monthly IESO cash flow requirement timing differences.
  - The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017 (planned for later in summer 2017; however, exact timing is subject to actual implementation).
  - Even once the SPV is set up to borrow, there is expected to be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO.
  - Also, under the legislation, OPG's SPV is not required to purchase any portion of the regulatory asset, which could result in longer than planned IESO draws on the credit facility.

Current Status

- An existing credit facility between the IESO and the OFA is currently available for $975 million, which includes support for the current Regulated Price Plan (RPP) program. The IESO has proposed that a separate and additional credit facility be provided to support only the FHP credit needs. A separate facility for the FHP is preferable to ensure operational efficiency and tracking of related interest costs.
- As a result, the IESO has proposed to reduce the current $975 million credit facility by $500 million and create a new FHP facility in the amount of $2 billion.
  - The $500 million reduction in the current OFA facility is to eliminate duplicate credit needs and reflects that the FHP prices for eligible consumers is being implemented through the setting of prices under the RPP.
  - Specific terms of the agreement are being negotiated between the IESO and OFA.

	Existing OFA-IESO Facility	**New Proposed OFA-IESO FHP Facility**
Current Credit Facilities	$975 million	-
Reduction due to FHP	$(500 million)	-
Increase due to FHP	$ -	$2,000 million
Total Credit Facilities	**$475 million**	**$2,000 million**

BACKGROUND

- The IESO is a not-for-profit corporate entity established in 1998 by the *Electricity Act, 1998*. It is governed by an independent Board of Directors and its Chair and Directors are appointed by the Province.
- The IESO has full statute-based authority for establishing, monitoring and enforcing reliability standards in the province. All the companies that make up the power system in Ontario must meet the IESO's standards.
- Its fees and licences to operate are set by the Ontario Energy Board and it operates independently of all other participants in the electricity market.

MEMORANDUM TO: Scott Thompson
Deputy Minister of Finance

FROM: Gadi Mayman
Chief Executive Officer

SUBJECT: **Minister's Directive to OFA to provide IESO a Credit Facility Extension**

Attached for your review and consideration is a memo to the Minister of Finance recommending that the Minister direct the Ontario Financing Authority (OFA) to provide the Independent Electricity System Operator (IESO) a revolving credit facility in an amount of up to $2 billion. The credit facility is being requested by the IESO and will be used to support its role in the implementation and administration as prescribed under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act").

Under the OFHP Act, the IESO will incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment ("GA") charge to ratepayers will be deferred to the future. During this period, GA amounts collected from ratepayers will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers. The OFHP Act gives the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell the regulatory asset (i.e., the right to recover the deferred amounts in the future~~shortfall~~) to a financing entity.

- It is anticipated that the regulatory asset will be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
- The cash received from selling the regulatory asset will be used by the IESO to fund the incurred GA shortfall.

~~Although~~ IESO ~~will not need long-term borrowing for its role in this process, it~~ is expected to need short-term financing to manage initial and ongoing monthly IESO cash flow requirement timing differences.

…2

An existing credit facility between the IESO and the OFA is currently available for $975 million which includes support for the current Regulated Price Plan (RPP) program. The IESO has proposed that a separate and additional credit facility be provided to support only the FHP credit needs. A separate facility for the FHP is preferable to ensure operational efficiency and tracking of related interest costs.

- As a result, the IESO has proposed to reduce the current $975 million credit facility by $500 million and create a new FHP facility in the amount of $2 billion.
- The $500 million reduction in the current OFA facility is to eliminate duplicate credit needs and reflects that the FHP prices for eligible consumers is being implemented through the setting of prices under the ~~replacement of the current~~ RPP ~~by the new FHP~~.

Attached is a briefing note for your consideration, as well as a Lending Directive for the Minister's signature that would direct OFA to provide a $2 billion revolving credit facility to the IESO, with a maturity date of September 30, 2022, an interest rate of Province's cost of funds plus a twenty-five basis point spread which is consistent with the spread for current and past OFA credit facilities for the IESO, and any other terms the OFA deems appropriate.

Should a briefing be required, staff would be pleased to discuss this matter at your convenience.

Hi Ron,

I think OFA Legal is suggesting that the risk of further delay and things falling apart does not justify making edits on OFA's end. If you want to force that risk, however small, then I will just put the edits in there and tell them this is how it is.

I will do that now.

Thanks,

John

Hi John

Ask OFA Legal in what manner OFA has been able to independently confirm that there are no appropriations from the legislature, or are they saying that because Energy and IESO are signing to confirm, the OFA would take that as confirmation and therefore be able to comfortably sign such a letter? I'd want them to state that in writing and sign a blue sheet package with a briefing note included that has a statement on legal advice to that effect.

Hi Ron,

I will put that in an email to these counterparties when we share the latest draft….that while we have the wording as is, that before we start the sign off they are to confirm it.

It looks like we are ready to execute this…..not sure if Gadi has seen it but if okay with you, I will ask Anna to share with Gadi the draft.

Hi John,

I don't see OFA's role or capacity to confirm or not what appropriations there are from the legislature to IESO, unless you can independently get sign-off in writing from TBS that there are no such appropriations, I would not be see myself as having the capacity to sign a letter with such a confirmation by the OFA.

I think it would be fine to have the text read as both IESO and Energy both acknowledging and confirming, and the OFA acknowledge, but I don't see the OFA as confirming.

Subject: RE: IESO credit facility - Intercept Letter

Hi John,

I've discussed with Sarah N., and we think Ron's edits to the third paragraph of the letter agreement should be deleted and reverted back to the original language. The purpose of that paragraph is for all three parties to acknowledge the current situation, and to change the language for the OFA to "acknowledge" and the other parties to "confirm" the same details will create confusion and possibly further delay this matter.

Also, I recommend deleting the following language added by the IESO – "or through any other agencies, bodies or other means" in the last sentence of the second last paragraph.

Thank you,

Lisa

Subject: RE: IESO credit facility

Moody's (Gavin MacFarlane) has verbally raised their concern to me that the new $2B facility should be in place this month – main concern is that the IESO may/is rapidly burning through the $975M capacity at about $200M-$250M/month. Also, the first sale to Financing Entity is not expected until October(ish).
I am currently at about $405M utilized.
Also, both the IESO Board of Directors and Moody's were expecting these new facilities to be in place this month – and so, any delay would need to be explained.
Appreciate your efforts to co-ordinate a timely approval.
Call me to discuss if needed.

Regards.

Hi Anthony,

I am currently working on your request for the two facilities with the OFA.

I understand your main concern is your interactions with the ratings agencies, Moody's specifically. Is there a particular timeline that you have to meet? My estimation is that the required approvals can be obtained in the early part of next week or the week after. I know the week after is spilling into September.

I am happy to keep pushing for early next week but let me know if the first week of September

works. I am confirming as some extraordinary steps are involved.

Thanks,

John

Subject: Re: IESO credit facility - Intercept Letter

Hi John,

I don't see OFA's role or capacity to confirm or not what appropriations there are from the legislature to IESO, unless you can independently get sign-off in writing from TBS that there are no such appropriations, I would not be see myself as having the capacity to sign a letter with such a confirmation by the OFA.

I think it would be fine to have the text read as both IESO and Energy both acknowledging and confirming, and the OFA acknowledge, but I don't see the OFA as confirming.

Subject: RE: IESO credit facility - Intercept Letter

Hi John,

I've discussed with Sarah N., and we think Ron's edits to the third paragraph of the letter agreement should be deleted and reverted back to the original language. The purpose of that paragraph is for all three parties to acknowledge the current situation, and to change the language for the OFA to "acknowledge" and the other parties to "confirm" the same details will create confusion and possibly further delay this matter.

Also, I recommend deleting the following language added by the IESO – "or through any other agencies, bodies or other means" in the last sentence of the second last paragraph.

Thank you,

Lisa

Hi Ron,

I don't see a problem as it establishes clarity on the issue, not relevant for the OFA Lending Policy, according to OFA Legal. The policy of requiring the intercept applies to only one parent ministry.

I could be missing something.

Thanks,

John

Hi John,

Unless OFA legal confirms that legal interpretation, I don't see how I can sign it as written (unless TBS separately confirms in writing).

If that can be handled internally (or with TBS), with no editing needing to be circulated to the IESO and Energy, that can work. If not, then the wording would seem to me needs to be edited.

Hi Ron,

I think OFA Legal is suggesting that the risk of further delay and things falling apart does not justify making edits on OFA's end. If you want to force that risk, however small, then I will just put the edits in there and tell them this is how it is.

I will do that now.

Thanks,

John

Hi John

Ask OFA Legal in what manner OFA has been able to independently confirm that there are no appropriations from the legislature, or are they saying that because Energy and IESO are signing to confirm, the OFA would take that as confirmation and therefore be able to comfortably sign such a letter? I'd want them to state that in writing and sign a blue sheet package with a briefing note included that has a statement on legal advice to that effect.

Hi Ron,

Could we chat on this pls?

I would advise letting this go for no other reason than the highlighted. I don't necessarily agree with the other parts of the paragraph but not sure if I want to delay further.

Thanks,

John

Subject: RE: IESO credit facility - Intercept Letter

Hi John,

I've discussed with Sarah N., and we think Ron's edits to the third paragraph of the letter agreement should be deleted and reverted back to the original language. The purpose of that paragraph is for all three parties to acknowledge the current situation, and to change the language for the OFA to "acknowledge" and the other parties to "confirm" the same details will create confusion and

possibly further delay this matter.

Also, I recommend deleting the following language added by the IESO – "or through any other agencies, bodies or other means" in the last sentence of the second last paragraph.

Thank you,

Lisa

Subject: RE: IESO credit facility

Moody's (Gavin MacFarlane) has verbally raised their concern to me that the new $2B facility should be in place this month – main concern is that the IESO may/is rapidly burning through the $975M capacity at about $200M-$250M/month. Also, the first sale to Financing Entity is not expected until October(ish).
I am currently at about $405M utilized.
Also, both the IESO Board of Directors and Moody's were expecting these new facilities to be in place this month – and so, any delay would need to be explained.
Appreciate your efforts to co-ordinate a timely approval.
Call me to discuss if needed.

Regards.

Hi Anthony,

I am currently working on your request for the two facilities with the OFA.

I understand your main concern is your interactions with the ratings agencies, Moody's specifically. Is there a particular timeline that you have to meet? My estimation is that the required approvals can be obtained in the early part of next week or the week after. I know the week after is spilling into September.

I am happy to keep pushing for early next week but let me know if the first week of September works. I am confirming as some extraordinary steps are involved.

Thanks,

John

I am writing in relation to the Independent Electricity System Operator's (IESO) request to the Ontario Financing Authority (OFA) for a new revolving credit facility in an amount of up to $2 billion (the "New Credit Facility") to support the IESO's role in the implementation of and participation under the *Ontario Fair Hydro Plan Act, 2017.*

Under the OFA Lending Policy, the OFA requires an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis. The intercept provision allows the Minister of Finance to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts the public body fails to pay the OFA under a loan agreement. The ~~OFA,~~ IESO and the Ministry of Energy ("ENERGY~~MOE~~") ~~–~~ confirm and the OFA acknowledges ~~and confirm~~ that at this time there are no amounts appropriated by the Legislature for the IESO [Energy to confirm] and the intent of such intercept provision is that it would apply if and when amounts were to be appropriated for payment to the IESO in the future.

Commented [ESP1]: Defer to Corporate?

Prior to entering into a loan agreement with the IESO for the New Credit Facility (the "OFHP Credit Facility Agreement"), on an unsecured basis, the OFA requires the Ministry of Energy ("ENERGY~~MOE~~") and the IESO to agree to the terms and conditions set out below in relation to the above OFA Lending Policy intercept provision requirement.

These terms and conditions shall also apply to the IESO's existing $975 million credit facility, established in a credit agreement entered into between the OFA and the Ontario Power Authority dated January 1, 2005, as amended (the "Original Credit Facility Agreement").

- The OFA, the IESO, and ENERGY~~MOE~~ agree as follows in respect of any advances made by the OFA to the IESO pursuant to the OFHP Credit Facility Agreement or the Original Credit Facility Agreement (each a "Loan Agreement"; together, the "Loan Agreements"):
    - Pursuant to section 23 of the *Capital Investment Plan Act, 1993*, the IESO and ENERGY~~MOE~~ agree that in the event that the Legislature appropriates any funds for payment to the IESO for any purpose ("Appropriated Funds"), the Minister of Finance would be entitled to deduct from such Appropriated Funds amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under a Loan Agreement (the "intercept provision").
    - Under the intercept provision, which shall be included in the Loan Agreements, the IESO also agrees that any notice from the OFA to the Minister of Finance in relation to its failure to pay under a Loan Agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.
    - Prior to recommending to the Minister of Finance that the intercept provision be exercised, the OFA will raise the issue with ENERGY~~MOE~~ and seek

DRAFT

ENERGY~~MOE~~'s support in getting the IESO to pay the amounts owing within a reasonable cure period.

- Upon receipt of notice from the OFA that the IESO has failed to pay in accordance with the provisions of a Loan Agreement, ENERGY~~MOE~~ will provide the OFA with all information requested by the OFA respecting amounts appropriated by the Legislature for payments to the IESO, including the intended purpose and expected timing of such payments to be made by ENERGY~~MOE~~. Upon request, ENERGY~~MOE~~ will provide similar information to the Minister of Finance.

- ENERGY~~MOE~~ acknowledges and agrees that, upon receipt of a direction from the Minister of Finance that an amount is to be deducted from money appropriated by the Legislature for payment to the IESO, ENERGY~~MOE~~ will take all necessary action required by it in order to effect such deduction and payment to the OFA in accordance with the Minister of Finance's direction.

This letter agreement may be executed in counterparts. Therefore, if you are in agreement with the above terms and conditions in relation to the Loan Agreements, kindly sign this letter agreement below in triplicate and send back two copies to my attention.

Yes, your understanding is correct. There are currently no "exceptions" to or specific "carve outs" from the intercept requirement in the Policy and I agree with Toby. I was trying to address the question you had raised in your earlier e-mail.

Subject: RE: IESO credit facility

Hi Lisa, Toby,

I want to clarify that based on the approach we are moving forward with, the understanding of the OFA Lending Policy should be such that where there are no appropriation by Legislature, there is nothing contemplated by the OFA Lending Policy to intercept. Some of us in CEFD are a bit concerned about the wording 'carve-outs' and 'perhaps' below. I think Toby referred to 'carve-outs' to refer to exceptions to what is subject to the intercept. With the draft letter agreement, we are

taking a position that there is nothing to intercept and that we are agreeing to put the intercept clause in as in the future there could be appropriations by Legislature for the IESO at which point, it would become necessary in the future which would be a prudent thing to have.

I was getting Ron in the loop as potentially ready to manage the process with OPG.

Let me know pls. if I am off base on any of the above.

John

Cc: Sarah Harris <Sarah.Harris@ofina.on.ca>; Anna Strathy <Anna.Strathy@ofina.on.ca>
Subject: RE: IESO credit facility

On p. 3, item #6 under "Conditions Precedent", the OFA Lending Policy provides that the OFA must ensure that it has an "appropriate" intercept in place. While the intercept wording in the Policy itself does not provide flexibility (as noted by Toby), perhaps this provision allows for 'carve-outs' in situations where the operation of the intercept would not be appropriate (such as those outlined by John below)?

Subject: RE: IESO credit facility

Hi,

I'm happy to organize a call among us, if there is a need for it.

In an earlier note when we were seeking the Intercept Exemption Directive, we had the following bullets as part of the rationale section:

- While the IESO settlements system for the electricity sector may facilitate the flow of appropriations of the Ministry of Energy for energy-related programs such as the Ontario Rebate for Electricity Consumers (OREC), the Rural or Remote Rate Protection Program (RRRP), the Ontario Electricity Support Program (OESP) etc., these payments are for the benefit of various electricity consumers.

- Intercepting these program specific payments, which are appropriated by the Legislature for

the Ministry of Energy, under which the IESO may only be providing a conduit to local distribution companies under the IESO settlement system to provide benefits to ratepayers, in order to recover loan payments would not be in alignment with the wording or intent of the OFA's Lending Policy.

Would these not relate to the carve-outs that Toby is referring to? Let me know pls. if I am mis-interpreting things.

John

Although I am sympathetic to Anthony's concerns, I am not sure that the OFA lending policy leaves room for carve-outs for what is subject to the intercept.

Sarah and Lisa, do you see scope for doing so?

Toby

Subject: RE: IESO credit facility

Anthony had very cursory comments along two points – some concern expressed by Stikeman and Elliott about priority over payments and that they have some MOECC dealings related to Cap and Trade(?). I mentioned to him that the intent is not to cover anything other than appropriation for IESO's own operational funding and that happy to receive edits to cover such concerns.

Whitfield (MOF) <Tobias.Whitfield@ontario.ca>
Subject: RE: IESO credit facility

Hi –

I just spoke with Toby (I've copied him as an FYI) and he flagged that he doesn't know why IESO would need to share this with OPG in the first instance. The only issue/reason we could identify was that it may have something to do with the purchase by OPG of the "asset" (I'm using quotation marks because I don't know anything about this transaction or its structure other than how it is referred) from IESO and making sure that the "asset" is free of encumbrances. IESO may have reps or warranties in its dealings with OPG to this effect, and, I am guessing, but this may have been part of the rationale with respect to concerns that IESO had in earlier versions of the drafting in regard to definitions of "permitted liens" and ranking of debt. Our advice is to reach out to IESO and try to ascertain the reason for the request (John, as Anthony called you, perhaps you could call him back with this request?)

I understand that we have been treating this loan as confidential, and OFA can waive confidentiality and allow disclosure to OPG (if this route is agree to I would recommend that disclosure be made by IESO on a confidential basis) but the risk/caution is that adding more layers outside of the immediate parties to the intercept (which now includes MOE), will add further delay and complexity in what is essentially an administrative issue and as noted we are not plugged into the broader discussions going on between the other parties with respect to other components of the FHP process.

Hi John,

Off the top of my head I don't see any legal issues from the OFA perspective, but I defer to Lisa because she is closer to the documentation than I am so will ask her to weigh in.

We should also consider giving Toby a heads up because I think MOF Legal's been more involved in the OPG side of things, I don't know where things stand on the other various moving parts that are not directly within the mandate of the OFA. I will give him a quick call.

To: John Kim <John.Kim@ofina.on.ca>
Subject: RE: IESO credit facility

Moody's (Gavin MacFarlane) has verbally raised their concern to me that the new $2B facility should be in place this month – main concern is that the IESO may/is rapidly burning through the $975M capacity at about $200M-$250M/month. Also, the first sale to Financing Entity is not expected until October(ish).
I am currently at about $405M utilized.
Also, both the IESO Board of Directors and Moody's were expecting these new facilities to be in

place this month – and so, any delay would need to be explained.
Appreciate your efforts to co-ordinate a timely approval.
Call me to discuss if needed.

Regards.

Hi Anthony,

I am currently working on your request for the two facilities with the OFA.

I understand your main concern is your interactions with the ratings agencies, Moody's specifically. Is there a particular timeline that you have to meet? My estimation is that the required approvals can be obtained in the early part of next week or the week after. I know the week after is spilling into September.

I am happy to keep pushing for early next week but let me know if the first week of September works. I am confirming as some extraordinary steps are involved.

Thanks,

John

Subject: RE: IESO guarantee
Date: Friday, December 01, 2017 4:44:37 PM

Hi Ron,

Tim replied to my email via a phone call.

Tim is indicating that the IESO and Energy may have already drafted the agreement (insolvency guarantee). He left it vague on how far they have gone.

On the funding of the interest costs and fees….they are planning to use the OFA facility for it for the moratorium period. My question is – are we okay with that planned course of action? The way Tim explains it the cash for OPG Trust to pay the cost of borrowing will be coming from OFA facilities, via IESO.

Thanks,

John

Hadn't heard. Definitely need OPCD to weigh in on this, as I don't know what it does for the accounting. I'm also copying Bonnie, because I'd like to know how the rating agencies would deal with this.

I don't think that we provide this sort of guarantee to any other agency, so there's a precedent issue that I'm not sure I'm comfortable with, too.

OEFC -- IESO CREDIT FACILITY AGREEMENT & THE PERMITTED LIENS

The Independent Electricity System Operator ("IESO") has requested that OEFC amend the existing credit facility agreements between OEFC and IESO (for $160M and $120M) to address the additional obligations IESO is taking on under Ontario's Fair Hydro Plan. IESO has indicated that OEFC credit facilities will not be used for Ontario Fair Hydro Plan (FHP) purposes.

IESO'S REQUEST

- Under the FHP, the IESO and Ontario Power Generation (OPG) are interacting to refinance a portion of the Global Adjustment over a longer period of time.

- IESO and OPG are in a discussion to grant a security/priority interest on IESO's assets to OPG Trust for the period of the first 4 years of the GA deferral.

- The IESO is planning to seek its Board's approval on Nov 22, 2017 to enter into a security agreement with OPG Trust. The security agreement is currently in draft form. Without amending the existing OEFC $160M and $120M credit facility agreements (the "OEFC Agreements"), IESO could potentially be considered to be in default of the terms of the various agreements. IESO staff wrote:

  > *"…it likely is best to add to the definition of "Permitted Liens" in the two OEFC facilities to address a) IESO granting security to the OPG Trust during the first 4 years of fair hydro program and b) the possibility that the Clean Energy Adjustment funds collected by IESO might be considered to be subject to a lien. The IESO does not want to be inadvertently in default."*

- In order to address this issue, the IESO has requested to amend the definition of the "permitted liens" in both existing OEFC Agreements to include any liens related to the FHP. Specifically, adding a clause in the existing OEFC Agreements that any lien related to OFHP will not be viewed as negative pledge by OEFC, so those liens can be used to secure the performance of IESO's obligations to OPG under the FHP. This would allow IESO to grant security to the OPG Trust during the first 4 years of implementing the GA deferral and also avoid breaching the terms of the existing agreements with OEFC.

- To support IESO's role in the implementation and participation under the Ontario Fair Hydro Plan Act, 2017 ("OFHP Act"), in July 2017 the IESO had requested that the OFA make similar changes to the credit facility agreements with OFA in October.
  - On November 6, 2017, the OFA amended the $475M facility to amend the definition of "permitted liens" and also included same for the new $2B credit facility agreement between OFA and the IESO , as requested by the IESO.

CONSIDERATIONS

- With the proposed new security agreement between OPG Trust and IESO, OPG Trust would have a priority claim against potentially the Clean Energy Adjustment funds collected by or flowing-through the IESO, the OEFC could find itself unable to collect payments due from the IESO. The likelihood of this scenario could be assessed as low.

- IESO is an agency of the government consolidated line-by-line in the Province's accounts.

- The OFA agreed to IESO's requested changes to the OFA credit facilities.

- OFA'S Capital Markets Operations staff have commented that the legislation governing OEFC, the *Electricity Act, 1998*, may provide differing context from the OFA's objects and mandate under the *Capital Investment Plan Act, 1993*. and any changes to the OEFC agreements should take this into account.

RECOMMENDATIONS

- In order to support IESO's request in relation to its obligation with respect to FHP, OFA staff are of the view that the exisiting OEFC Agreements can be amended to include liens related to FHP under the definition of the "permitted liens".

BACKGROUND

- In order to support IESO's role with the implementation of the OFHP Act, OFA staff made similar changes to the definition of 'permitted liens" in existing OFA-IESO credit facility agreements on November 6, 2017.

- Currently, under the existing credit facility agreements between OEFC and the IESO, the definition of "permitted liens" does not include any lien arising from the IESO's role and obligations under the OFHP, including with respect to any amount received or receivable by the IESO (such as, without limitation, amounts received or receivable in respect of the Clean Energy Adjustment), or any other lien, whether arising from the action or inaction of IESO, that is created in connection with the OFHP.

OEFC -- IESO CREDIT FACILITY AGREEMENT & THE PERMITTED LIENS

The Independent Electricity System Operator ("IESO") has requested that OEFC amend the existing credit facility agreements between OEFC and IESO (for $160M and $120M) to address the additional obligations IESO is taking on under Ontario's Fair Hydro Plan. IESO has indicated that OEFC credit facilities will not be used for Ontario Fair Hydro Plan (FHP) purposes.

IESO'S REQUEST

- Under the FHP, the IESO and Ontario Power Generation (OPG) are interacting to refinance a portion of the Global Adjustment over a longer period of time.

- IESO and OPG are in a discussion to grant a security/priority interest on IESO's assets to OPG Trust for the period of the first 4 years of the GA deferral.

- The IESO is planning to seek its Board's approval on Nov 22, 2017 to enter into a security agreement with OPG Trust. The security agreement is currently in draft form. Without amending the existing OEFC $160M and $120M credit facility agreements (the "OEFC Agreements"), IESO could potentially be considered to be in default of the terms of the ~~security~~various agreements. IESO staff wrote:

  "…it likely is best to add to the definition of "Permitted Liens" in the two OEFC facilities to address a) IESO granting security to the OPG Trust during the first 4 years of fair hydro program and b) the possibility that the Clean Energy Adjustment funds collected by IESO might be considered to be subject to a lien. The IESO does not want to be inadvertently in default."

Commented [JK1]: Or vice versa, their agreements with the OEFC but this is fine.

- In order to address this issue, the IESO has requested to amend the definition of the "permitted liens" in both existing OEFC Agreements to include any liens related to the FHP. Specifically, adding a clause in the existing OEFC Agreements that any lien related to OFHP will not be viewed as negative pledge by OEFC, so those liens can be used to secure the performance of IESO's obligations to OPG under the FHP. This would allow IESO to grant security to the OPG Trust during the first 4 years of implementing the GA deferral and also avoid breaching the terms of the existing agreements with OEFC.

- To support IESO's role in the implementation and participation under the Ontario Fair Hydro Plan Act, 2017 ("OFHP Act"), in July 2017 the IESO had requested that the OFA make similar changes to the credit facility agreements with OFA in October.
  - On November 6, 2017, the OFA amended the $475M facility to amend the definition of "permitted liens" and also included same for the new $2B credit facility agreement between OFA and the IESO , as requested by the IESO.

CONSIDERATIONS

- With the proposed new security agreement between OPG Trust and IESO, OPG Trust would have a priority claim against potentially the Clean Energy Adjustment funds collected by or flowing-through the IESO, the OEFC could find itself unable to collect payments due from the IESO. The likelihood of this scenario could be assessed as low.

- IESO is an agency of the government consolidated line-by-line in the Province's accounts.

- The OFA agreed to IESO's requested changes to the OFA credit facilities.

- OFA'S Capital Markets Operations staff have commented that the legislation governing OEFC, the *Electricity Act, 1998*, may provide differing context from the OFA's objects and mandate under the *Capital Investment Plan Act, 1993*. and any changes to the OEFC agreements should take this into account.

RECOMMENDATIONS

- In order to support IESO's request in relation to its obligation with respect to FHP, OFA staff are of the view that the exisiting OEFC Agreements can be amended to include liens related to FHP under the definition of the "permitted liens".

BACKGROUND

- In order to support IESO's role with the implementation of the OFHP Act, OFA staff made similar changes to the definition of 'permitted liens" in existing OFA-IESO credit facility agreements on November 6, 2017.

- Currently, under the existing credit facility agreements between OEFC and the IESO, the definition of "permitted liens" does not include any lien arising from the IESO's role and obligations under the OFHP, including with respect to any amount received or receivable by the IESO (such as, without limitation, amounts received or receivable in respect of the Clean Energy Adjustment), or any other lien, whether arising from the action or inaction of IESO, that is created in connection with the OFHP.

Hi Ron,

Pls. see attached latest note on the IESO request to amend the two OEFC credit facilities. The file is saved in the folder below.

We have received comments from Documentation and Legal thus far but have not shared this version with them yet, as we are trying to manage the process.

Thanks,

John

OEFC -- IESO CREDIT FACILITY AGREEMENT & THE PERMITTED LIENS

~~ISSUE~~

The Independent Electricity System Operator ("IESO") has requested that OEFC amend the existing credit facility agreements between OEFC and IESO (for $160M and $120M) to address the additional obligations IESO is taking on under Ontario's Fair Hydro Plan. IESO has indicated that OEFC credit facilities will not be used for Ontario Fair Hydro Plan (FHP) purposes.

~~CONTEXT –~~ IESO'S REQUEST

- Under t~~T~~he FHP, ~~requires~~ the IESO and Ontario Power Generation (OPG) are interacting~~to work together~~ to refinance ~~Ontario's clean energy investments~~a portion of the Global Adjustment over a longer period of time.

- IESO and OPG are in a discussion to grant a security/priority interest on IESO's assets to OPG Trust for the period of the first 4 years of the GA deferral.

- The IESO is planning to seek its Board's approval on Nov 22, 2017 to enter into a ~~for the~~ security agreement with OPG Trust. The security agreement is currently in draft form. Without amending the existing OEFC $160M and $120M credit facility agreements (the "OEFC Agreements"), IESO could potentially be considered to be in default of the terms of the security agreement~~s~~. IESO staff wrote:

  > *"…it likely is best to add to the definition of "Permitted Liens" in the two OEFC facilities to address a) IESO granting security to the OPG Trust during the first 4 years of fair hydro program and b) the possibility that the Clean Energy Adjustment funds collected by IESO might be considered to be subject to a lien. The IESO does not want to be inadvertently in default."*

- In order to address this issue, the IESO has requested to amend the definition of the "permitted liens" in both existing OEFC Agreements to include any liens related to the FHP. Specifically, adding a clause in the existing OEFC Agreements that any lien related to OFHP will not be viewed as negative pledge by OEFC, so those liens can be used to secure the performance of IESO's obligations to OPG under the FHP. This would allow IESO to grant security to the OPG Trust during the first 4 years of implementing the GA deferral and also avoid ~~of~~ breaching the terms of the existing agreements with OEFC.

- To support IESO's role in the implementation and participation under the Ontario Fair Hydro Plan Act, 2017 ("OFHP Act"), in July 2017, the IESO had requested that the OFA ~~to~~ make ~~the same~~similar ~~request~~ changes to the credit facility agreements with OFA in October.
  - On November 6, 2017, the OFA amended the $475M facility to amend the definition of ~~the~~ "permitted liens" and also included same for the new $2B credit facility agreement between OFA and the IESO , as requested by the IESO.

CONSIDERATIONS

- ~~OFA'S Capital Markets – Operations staff have commented that the legislation governing OEFC, the *Electricity Act, 1998*, may provide differing context from the OFA's objects and mandate under the *Capital Investment Plan Act, 1993*.~~

- With the proposed new security agreement between OPG Trust and IESO, OPG Trust would have a priority claim against potentially the Clean Energy Adjustment funds collected by or flowing~~n~~-through the IESO, the OEFC could find itself unable to collect payments due from the IESO. The likelihood of this scenario could be assessed as low.

Formatted: Indent: Left: 0.25", No bullets or numbering

Commented [JK1]: Or vice versa, their agreements with the OEFC but this is fine.

Commented [JK2]: Unless Documentation can provide specific differences that are significant, I suggest we delete.

Commented [OK3R2]: The fact that OFA's objects/mandate are detailed under CIPA is a distinct differentiation from OEFC. This is relevant as it goes to the reach of OFA, which OEFC does not share.

Formatted: Indent: Left: 0", Bulleted + Level: 1 + Aligned at: 0.25" + Indent at: 0.5"

Formatted: Font: +Body (Calibri), 11 pt

Formatted: Indent: Left: 0.5", No bullets or numbering

- ~~and~~ IESO is an agency of the government consolidated line-by-line in the Province's accounts. ~~[This was a bullet inserted by CMD – Operations.]~~

- The OFA agreed to IESO's requested changes to ~~included the requested changes in~~ the OFA credit facilities.~~,~~

- OFA'S Capital Markets~~—~~ Operations staff have commented that the legislation governing OEFC, the *Electricity Act, 1998*, may provide differing context from the OFA's objects and mandate under the *Capital Investment Plan Act, 1993*, and any changes to the OEFC agreements should take this into account. ~~providing a precedent of having considered the changes/inclusion of the same request. Treating the current request differently by seeking either a Minister's directive or not granting the IESO its request would mean having to take steps on the OFA credit facilities which were either signed recently or amended recently.~~

Commented [JK4]: Given that we are moving towards a consensus, the rest of the sentence is moot.

Formatted: Font: +Body (Calibri), 11 pt

Formatted: Indent: Left: 0.5", No bullets or numbering

Commented [JK5]: Unless Documentation can provide specific differences that are significant, I suggest we delete.

Commented [OK6R5]: The fact that OFA's objects/mandate are detailed under CIPA is a distinct differentiation from OEFC. This is only relevant as it goes to the reach of OFA. Not fussed if you wish to delete.

Commented [OK7]: The OFA and OEFC are different corporate entities, so treatment of each may be different depending on the circumstances, even when dealing with the same borrower.

Commented [OK8]: The OFA credit facility was provided pursuant to the minister's directive, so seeking a minister's directive wrt OEFC would be consistent with how OFA was treated. Not suggesting this is necessary.

RECOMMENDATIONS

- In order to support IESO's request in relation to its obligation with respect to FHP~~remain consistent with the language recently incorporated in existing IESO-OFA agreements~~, OFA staff are of the view that the exisiting OEFC Agreements can be amended to include liens related to FHP under the definition of the "permitted liens".

BACKGROUND

- In order to support IESO's role with the implementation of the OFHP Act, OFA staff made similar changes to the definition of 'permitted liens" in existing OFA-IESO credit facility agreements on November 6, 2017.

- Currently, under the existing credit facility agreements between OEFC and the IESO, the definition of "permitted liens" does not include any lien arising from the IESO's role and obligations under the OFHP, including with respect to any amount received or receivable by the IESO (such as, without limitation, amounts received or receivable in respect of the Clean Energy Adjustment), or any other lien, whether arising from the action or inaction of IESO, that is created in connection with the OFHP.

AMENDING AGREEMENT NO. 7

This Amending Agreement is effective as of the 5th day of December, 2017.

BETWEEN: **INDEPENDENT ELECTRICITY SYSTEM OPERATOR ("IESO")**

as Borrower

AND: **ONTARIO ELECTRICITY FINANCIAL CORPORATION ("OEFC")**

as Lender

WHEREAS IESO and OEFC entered into a Revolving Credit Facility Agreement dated April 23, 2010, as amended by Amending Agreement No.1 dated July 21, 2010, Amending Agreement No. 2 dated October 14, 2011, Amending Agreement No. 3 dated April 30, 2013, Amending Agreement No. 4 dated April 30, 2014, Amending Agreement No. 5 dated December 19, 2014 and Amending Agreement No. 6 dated April 30, 2017 (collectively the "Agreement") pursuant to which OEFC agreed to provide a revolving credit facility to IESO in the principal amount of up to CDN $160 million;

AND WHEREAS the *Ontario Fair Hydro Plan Act, 2017* came into force on June 1, 2017;

AND WHEREAS at the request of the IESO the parties now wish to amend the Agreement to accommodate IESO's role and obligations under the *Ontario Fair Hydro Plan Act, 2017*;

THEREFORE, in consideration of the mutual covenants and agreements herein contained and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, and subject to the terms and conditions hereinafter set out, the parties agree that the Agreement is amended as follows:

1. The following definitions are added to Section 1.1 (Definitions) of the Agreement:

   "**Clean Energy Adjustment**" has the same meaning as that term is defined in the OFHP.

   "**OFHP**" means the *Ontario Fair Hydro Plan Act, 2017*, S.O. 2017, c. 16, Schedule 1, including any regulations made thereunder, and all as amended from time to time.

2. The definition of "Ontario's Fair Hydro Plan" is deleted in its entirety.

3. The definition of the term "Permitted Liens" in Section 1.1 (Definitions) of the Agreement is amended by deleting the word "and" at the end of paragraph (j); deleting

lien, whether arising from the action or inaction of IESO, that is created in connection with the OFHP.

3. Subsection 2.2(2) of the Agreement is deleted and replaced by the following:

(2) The Note shall at all times rank *pari passu* with all other unsecured Senior Debt of the IESO, subject to the existence of any Liens that secure Indebtedness as permitted by subsections 3.8 (a) through (f) hereof.

4. Delete the paragraph following the heading "Section 3.7 Other Indebtedness" and replace with the words "Intentionally Left Blank".

IN ALL OTHER RESPECTS, the Agreement is confirmed by the parties.

IN WITNESS WHEREOF the parties have executed and delivered this Amending Agreement as of the date first written above.

AMENDING AGREEMENT NO. 7

This Amending Agreement is made as of the 5th day of December, 2017 between:

INDEPENDENT ELECTRICITY SYSTEM OPERATOR ("IESO")

and

ONTARIO ELECTRICITY FINANCIAL CORPORATION ("OEFC")

WHEREAS IESO and OEFC have entered into an agreement providing for the Issuance of a Note dated April 1, 1999 (the "Original Agreement");

AND WHEREAS pursuant to amending agreements dated March 23, 2000, April 23, 2009, May 1, 2011, May 1, 2013, April 30, 2014 and April 30, 2017 the parties amended the Original Agreement (as so amended, the "Agreement");

AND WHEREAS the *Ontario Fair Hydro Plan Act, 2017* came into force on June 1, 2017;

AND WHEREAS at the request of the IESO the parties now wish to amend the Agreement to accommodate IESO's role and obligations under the *Ontario Fair Hydro Plan Act*, 2017;

NOW THEREFORE in consideration of the mutual agreements contained herein (the receipt and sufficiency of which are hereby acknowledged by each party), the parties agree as follows:

1. The following definitions are added to Section 1.1 (Definitions) of the Agreement:

   "**Clean Energy Adjustment**" has the same meaning as that term is defined in the OFHP.

   "**OFHP**" means the *Ontario Fair Hydro Plan Act, 2017*, S.O. 2017, c. 16, Schedule 1, including any regulations made thereunder, and all as amended from time to time.

2. The definition of "Permitted Liens" in Section 1.1 (Definitions) of the Agreement is amended by deleting the word "and" at the end of paragraph (j); deleting the "." at the end of paragraph (k) and replacing it with "; and"; and adding the following new paragraph (l):

   (l) any Lien arising from the IESO's role and obligations under the OFHP, including with respect to any amount received or receivable by the IESO (such as, without limitation, amounts received or receivable in respect of the Clean Energy Adjustment), or any other

lien, whether arising from the action or inaction of IESO, that is created in connection with the OFHP.

3. Subsection 2.2(2) of the Agreement is deleted and replaced by the following:

(2) The Note shall at all times rank *pari passu* with all other unsecured Senior Debt of the IESO, subject to the existence of any Liens that secure Indebtedness as permitted by subsections 3.8 (a) through (f) hereof.

4. Delete the paragraph following the heading "Section 3.7 Other Indebtedness" and replace with the words "Intentionally Left Blank".

IN ALL OTHER RESPECTS, the Agreement is confirmed by the parties.

IN WITNESS WHEREOF the parties have executed and delivered this Amending Agreement as of the date first written above.

OEFC -- IESO CREDIT FACILITY AGREEMENT & THE PERMITTED LIENS

The Independent Electricity System Operator ("IESO") has requested that OEFC amend the existing credit facility agreements between OEFC and IESO (for $160M and $120M) to address the additional obligations IESO is taking on under Ontario's Fair Hydro Plan. IESO has indicated that OEFC credit facilities will not be used for Ontario Fair Hydro Plan (FHP) purposes.

IESO'S REQUEST

- Under the FHP, the IESO and Ontario Power Generation (OPG) are interacting to refinance a portion of the Global Adjustment over a longer period of time.

- IESO and OPG are in a discussion to grant a security/priority interest on IESO's assets to OPG Trust for the period of the first 4 years of the GA deferral.

- The IESO is planning to seek its Board's approval on Nov 22, 2017 to enter into a security agreement with OPG Trust. The security agreement is currently in draft form. Without amending the existing OEFC $160M and $120M credit facility agreements (the "OEFC Agreements"), IESO could potentially be considered to be in default of the terms of the various agreements. IESO staff wrote:

  "…it likely is best to add to the definition of "Permitted Liens" in the two OEFC facilities to address a) IESO granting security to the OPG Trust during the first 4 years of fair hydro program and b) the possibility that the Clean Energy Adjustment funds collected by IESO might be considered to be subject to a lien. The IESO does not want to be inadvertently in default."

- The IESO provided a draft Security Agreement, dated November 7th, 2017, between them and the OPG Trust to OFA. According to the draft Security Agreement, in the unlikely event that the IESO runs into ~~a~~ financial difficulty, the IESO would give OPG Trust a priority in the IESO's assets, including all accounts of the IESO and all cash and proceeds from LDCs, that would put OPG Trust ahead of unsecured creditors, including the OFA and the OEFC.
  - The security agreement is not limited to the Clean Energy Adjustment funds collected by the IESO only.

Commented [JK1]: Opal, pls. confirm that this is the purpose of the "Permitted Liens" section of the credit agreement. This is more Documentation expertise.

- In order to address this issue, the IESO has requested to amend the definition of the "permitted liens" in both existing OEFC Agreements to include any liens related to the FHP. Specifically, adding a clause in the existing OEFC Agreements that any lien related to OFHP will not be viewed as negative pledge by OEFC, so those liens can be used to secure the performance of IESO's obligations to OPG under the FHP. This would allow IESO to grant security to the OPG Trust during the first 4 years of implementing the GA deferral and also avoid breaching the terms of the existing agreements with OEFC.

- To support IESO's role in the implementation and participation under the Ontario Fair Hydro Plan Act, 2017 ("OFHP Act"), in July 2017 the IESO had requested that the OFA make similar changes to the credit facility agreements with OFA in October.
  - On November 6, 2017, the OFA amended the $475M facility to amend the definition of "permitted liens" and also included same for the new $2B credit facility agreement between OFA and the IESO , as requested by the IESO.

CONSIDERATIONS

- -With the proposed new security agreement between OPG Trust and the IESO, OPG Trust would have a priority claim against ~~potentially the Clean Energy Adjustment funds collected by or flowing through~~ the IESO's assets, the OEFC could find itself unable to collect payments due from the IESO. The likelihood of this scenario could be assessed as low.

- The extent of this risk is subject to uncertainty at this time, given that the regulations that ~~determine~~govern the payments related to the Fair Allocation Amount ~~payable~~ in each period, and how that relates to the obligations to the Financing Entity, are still under development.

Commented [RK2]: Are they? Or "have not yet been put into practice"?

- IESO is an agency of the government consolidated line-by-line in the Province's accounts.
- The OFA agreed to IESO's requested changes to the OFA credit facilities.
- OFA'S Capital Markets Operations staff have commented that the legislation governing OEFC, the *Electricity Act, 1998*, may provide differing context from the OFA's objects and mandate under the *Capital Investment Plan Act, 1993*~~.~~ and any changes to the OEFC agreements should take this into account.
- According to the Minister's Directives associated with the OEFC Agreements, ~~it states that~~ the loan and the credit facilities~~y~~ are "subject to such other terms as OEFC deams appropriate~~the terms set out in the OEFC Agreements.~~ Therefore, an amendment for permitted liens can be done under the existing ~~this is not seen as a change to the~~ directives, and a new or revised directives from the Minister of Finance are not deemed necessary. This would be~~was~~ consistent with the approach when ~~amending~~ the pre-existing OFA-IESO credit facility agreement was amended~~s~~ for permited liens on November 6, 2017.

Commented [JK3]: I believe amending the OFA agreements were done under this view. Pls. correct if not the case.

RECOMMENDATIONS

- In order to support IESO's request in relation to its obligation with respect to FHP, OFA staff are of the view that the exisiting OEFC Agreements can be amended to include liens related to FHP under the definition of the "permitted liens".

BACKGROUND

- In order to support IESO's role with the implementation of the OFHP Act, OFA staff made similar changes to the definition of 'permitted liens" in existing OFA-IESO credit facility agreements on November 6, 2017.
- Currently, under the existing credit facility agreements between OEFC and the IESO, the definition of "permitted liens" does not include any lien arising from the IESO's role and obligations under the OFHP, including with respect to any amount received or receivable by the IESO (such as, without limitation, amounts received or receivable in respect of the Clean Energy Adjustment), or any other lien, whether arising from the action or inaction of IESO, that is created in connection with the OFHP.

Hi John,

I'm fine so long as CMD is, and OFA Legal. Not sure if we have a protocol or normal practice or concerns on sharing such documents.

Ron

Subject: FW: IESO

Hi Ron,

Would you have any issues on our end? I am happy to defer this to CMD and CMD seems to be open to the idea of having IESO share. As long as TD treats it as confidential, not sure if we would have any issue from the policy side of things.

Thanks,

John

Hi Anthony,

I think the steps we would take to allow it, if at all, could be quite onerous and time-consuming. Are there any specific concern they have that we should be able to address without actually letting them see the agreement?

John

Subject: IESO

John, William,

TD Bank has asked to review the $2B Fair Hydro credit facility executed between IESO and OFA.

TD wants to gain comfort (themselves) that the credit facility is going to support the IESO's fair hydro transactions during the next 4 years.

I have verbally assured them of the above, but they wish to review themselves.

Let me know if I may share and TD will treat the document as confidential.

Regards.

Hi Ron

We are having been working with Operations and Legal and I, OIC drafting is well on its way. We have also contacted cabinet office and Energy on the timing. We thought that it would make sense that this OIC proceed with the FHP leg and regs. CO was generally in agreement. There is a date on June 27, but there may also be an earlier date TBD. I believe the earlier date would be direct to cabinet. Our next step is to get back to Energy to confirm their timelines and that we will package this on same date.

Hi Ron, Malle,

In terms of the timeline of whether it would be possible to bring forward the s28 approval at the briefing next week. Given the draft stage of Energy's materials provided this morning, I am not sure the timeline would be workable. A lot would depend on Energy's provision of the full package.

Malle, Toby, what is your assessment given where things are at the moment?

Thanks,

John

Hi,

At the Energy Weekly on the FHP, Energy Legal said that the responses to the questions came over yesterday.

Have we seen and reviewed them? Are we comfortable with them?

Energy is looking to make a submission ASAP, and still looking for the s.28 approval in place by Tuesday so that the Minister can sign the indemnity on Tuesday.

Are there, Have we seen revised indemnities to OPG and IESO?

I understand that the plan for a Minister of Finance briefing generally on the FHP is for it to be scheduled for Tuesday, so, would it be possible to bring forward the s.28 approval at that briefing? And the IESO Treasury Policy amendment too?

Ron

IESO/OPG Indemnities

Ministry of Finance Questions

~~1. Does the Ministry of Energy have a Vote Item in place that could accommodate any payment of indemnity, should it arise?~~

Commented [A1]: Is this still a question, or is it being asked through a different channel?

~~2.~~1. Could you please provide specific concerns/scenarios for which OPG/IESO or its directors, officers and employees may become liable ~~for~~and which the indemnity is intended to cover?

- ~~i.e., acting in bad faith examples.~~[NTD: They have provided the examples which are related to financing mostly. Are there any other activities? Who would be most likely to sue: investors, what about other groups?]
- ~~Does indemnity~~ Are there situations where someone might not be acting in good faith ~~-~~and still warrant being covered under the indemnity? In that case, it would seem that the indemnity covers acting in bad faith. Should the indemnity cover actions "in good faith" to carry out the plan?~~. cover anything else other than acting in bad faith?~~
  i. Request for Approval ~~note~~ points out that *Electricity Act, 1998* already protects IESO's ~~and~~ directors, officers, employees or agents ~~certain persons~~ against civil proceedings if they act in good faith in the exercise or performance of powers or duties under the Act, etc. or for any neglect or default in the exercise or performance in good faith of such a power or duty. The~~.~~ Fair Hydro Plan ~~Bill 132~~ has similar language for OPG s. 39(1), ~~albeit~~ but only for employees of OPG (and the Province). Why doesn't the statutory provision also cover OPG's directors and officers of OPG and those of its subs?~~ just for the corp.~~
  ~~i.~~ii. Has consideration been given to providing an indemnity to directors, ~~f~~officers and employees but not to the corporate entities themselves (IESO, OPG and its subs)
- Currently, IESO collects payments from ratepayers via LDCs, so are there any new processes required as a result of implementing FHP? If so, what are new processes need to be in place that will increase IESO's business risk?

2. Should indemnity agreements be tailored to specific circumstances of each company? Currently they appear to be drafted identically.

3. Indemnity would cover "loss of profits" and "loss of opportunity" – Is this too broad?

4. Please provide more detail on the type of insurance that OPG and IESO have to cover these risks? i.e. directors and officers insurance?

5. Has OPG given a standard indemnity to its directors and officers that would be called upon first before the indemnity from the Province?

~~3.~~6. What is the standard that is applied to conducting a reasonable investigation for "due diligence" defence? Is it possible to fail to meet that standard without gross negligence or wilful misconduct?

7. What is the purpose of the provincial waiver of claims – as distinct from the protection provided- by ~~from Province or others through~~ the indemnity?

~~4.~~8. In what situations would a director, officer or employee be acting in a different capacity at the request of the company?

~~5.~~9. Does the indemnity for OPG and its subsidiaries also include SPV (financing entity) and its directors, officers and employees?

- What impact does this have on the SPV being treated as a separate entity to the OPG from an accounting perspective?
- Or does SPV require an indemnity as well and why?
- How does an indemnity for the SPV interact or overlap with the request for a guarantee from the Province in connection with the proposed financing transaction?
- Has consideration been given to limiting the indemnity to directors, officers and employees and not indemnifying the corporations, OPG, IESO, its subs? What are the implications?

~~6.~~10. Have previous Cabinet or TB submissions made reference to the requirement for indemnity agreements for IESO and OPG?

~~7.~~11. It is mentioned that IESO and OPG management view their participation under the OFHP Act as "…outside their typical business activities and corporate mandate". However, the legislation is specifically adding these activities as objects and activities of the companies? Wouldn't their other corporate documents be updated to reflect their role in OFHP? Can't the Minister of Energy provide an updated mandate to OPG and IESO? However, ~~does~~would this potentially affect accounting?

12. The latest draft of the OPG Indemnity Agreement, second recital, now states that the indemnity is for "…risk of liability due to or as a result of the Fair Hydro Plan.". Previously,

Formatted: Highlight

Formatted: Highlight

the indemnity only covered its role in the Fair Hydro Plan. Are there any concerns with this broader language?

~~8.~~13. 9(c) – Should this also reference that certain remedies such as specific performance etc not available against the Crown? Suggest reviewing against representations given in other agreements, etc.

14. Contingent Liability chart may need to be made more consistent with business case.
15. Assume any payments under the indemnity would be made by the Ministry of Energy from its allocations.

~~9. Is the Indemnity Agreement intended to reference the summary in the Contingent Liabilities table? Even if the table is for reference, it should be consistent with the business case, provided by Energy, and the Indemnity Agreement.~~

~~10. For example, comments around indemnity covering activities that may not be seen as in good faith are to be covered under the Indemnity Agreement, as per the business case note. This is not mentioned/referenced in the table [or in the agreement].~~

~~11. Note: Electricity Finance Branch, OFA is proceeding to draft Indemnity approvals on the following basis. Please indicate if you have different assumptions/understanding.~~

- ~~This is an approval under Section 28 of the FAA~~
- ~~Minister of Energy will provide a written request for S. 28 approval to the Minister of Finance~~
- ~~This will not require an OIC for a statutory appropriation and MOE will need to provide confirmation that should any liability arise as a result of the indemnity agreements, MOE will be responsible for funding, within its approved allocation, any payments.~~
    - ~~i. EFB assumes that any request for payments with respect to an indemnity would need to be reviewed as they occur and payments would require a voted appropriation from Ministry of Energy~~

Commented [A2]: Will a markup be sent to identify where there are inconsistencies?

Commented [A3]: Is this agreed to by TBS staff?

Subject: RE: draft IESO directive re intercept
Date: Wednesday, August 16, 2017 17:29:45

Hi Lisa,

I have been thinking about the wording “funding” and of course the IESO is receiving loans from the OFA and could potentially receive loans from other parts of the government (Ministry of Energy) so I wonder we should rephrase this as the reason for not requiring the intercept. Perhaps in the paragraph that describes the policy we should specifically refer to the wording of the intercept “entitled to deduct from money appropriated by the Leg for payment to IESO” so the nature of the “intercept” is described.

Then perhaps the statement about not receiving “funding” should be modified so that it says IESO does not receive funds in the form of grants or transfer payments from the Ministry of Energy pursuant to its annual appropriations or something along these lines which should be verified by the Ministry of Energy for its accuracy. I don’t know if there is anything additional to add along the lines of “from where does the IESO receive its revenues”? What if in the future IESO for whatever did start receiving such monies or is that not likely? I know that I am beginning to re-think a bit our discussion so perhaps we should limit the directive to the two current loans as things might change in future. Any future loan would require a new directive anyway and then the direction can be specific on that point.

I agree that the statement about IESO not receiving “funding” from the government should be confirmed by the CEFD based on information from the Ministry of Energy (assuming that it is Energy that is responsible for the IESO and would have knowledge of the funding issue) unless it is otherwise clear. I think that it would be useful if the accompanying briefing note elaborated on that point to confirm the source of IESO’s revenues and the associated risk and why the intercept is unnecessary for these loans.

Thanks.

DIRECTIVE

MINISTER OF FINANCE

LOANS TO THE INDEPENDENT ELECTRICITY SYSTEM OPERATOR

To: Ontario Financing Authority ("OFA")

Whereas:

Under the *Capital Investment Plan Act, 1993* ("CIPA"), the OFA provides financing to public bodies as directed by the Minister of Finance ("Minister").

The Independent Electricity System Operator ("IESO") is a public body for the purposes of CIPA.

Pursuant to a directive from the Minister dated June 29, 2017, the OFA was directed to provide a revolving credit facility to the IESO for the purposes of providing short to medium term financing related to the IESO's role in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Credit Facility").

Pursuant to the OFA Lending Policy, the OFA is required to include an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis, unless otherwise directed by the Minister, Treasury Board or Cabinet.

As the IESO receives no funding from the Province of Ontario, there is no funding to which the intercept provision applies.

Commented [LS1]: CEFD to review/confirm.

Therefore:

The OFA is not required to include an intercept provision in its OFHP Credit Facility agreement with the IESO, nor in any other unsecured loan agreements with the IESO.

Dated , 2017

Charles Sousa

Minister of Finance

Hi Ron,

I don't have any substantive comments on Lisa's draft. The key will be to get Energy onside with the approach. IESO staff were sympathetic to the proposed approach but I understand that Tom McKinley reached out to Toby on this.

Thanks,

John

Subject: Intercept letter agreement IESO MOE OFA Sept 2017-rev.docx

Good morning John and Sarah,

Further to our meeting yesterday, please see the attached draft points to be included in a letter agreement from the OFA, addressed to both the IESO and MOE.

Please add in the appropriate details, including addressees and signature lines, and send it back to legal for final review. Happy to discuss.

Thanks,

Lisa

I am writing in relation to the Independent Electricity System Operator's (IESO)~~'s~~ request to the Ontario Financing Authority (OFA) for a new revolving credit facility in an amount of up to $2 billion ~~from the OFA~~ (the "New Credit Facility") to support ~~its~~the IESO's role in the implementation of and participation under the *Ontario Fair Hydro Plan Act, 2017.*

~~Pursuant to~~Under the OFA Lending Policy, the OFA ~~is~~ require~~d~~ ~~to include~~ an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis. The intercept provision allows the Minister of Finance to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts the public body fails to pay the OFA under a loan agreement ~~from money appropriated by the Legislature for payment to the public body~~. I acknowledge and confirm that at this time there are no amounts appropriated by the Legislature for the IESO [Energy to confirm] and the intent of such a provision is to apply if and when amounts were to be appropriated in the future.

Prior to entering into a loan agreement with the IESO for the New Credit Facility (the "OFHP Credit Facility Agreement"), on an unsecured basis, the OFA requires the Ministry of Energy ("MOE") and the IESO to agree to the terms and conditions set out below in relation to the above OFA Lending Policy intercept provision requirement.

These terms and conditions shall also apply to the IESO's existing $975 million credit facility, established in a credit agreement entered into between the OFA and the Ontario Power Authority dated January 1, 2005, as amended (the "Original Credit Facility Agreement").

- ~~As such, t~~The OFA, the IESO, and MOE agree as follows in respect of any advances made by the OFA to the IESO pursuant to the OFHP Credit Facility Agreement or the Original Credit Facility Agreement (each a "Loan Agreement"; together, the "Loan Agreements"):
  - Pursuant to section 23 of the *Capital Investment Plan Act, 1993*, the IESO and MOE agree that in the event that the Legislature appropriates any funds for payment to the IESO for any purpose ("Appropriated Funds"), the Minister of Finance ~~is~~ would be entitled to deduct from such Appropriated Funds amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under a Loan Agreement (the "intercept provision").
  - Under the intercept provision, which shall be included in the Loan Agreements, the IESO also agrees that any notice from the OFA to the Minister of Finance in relation to its failure to pay under a Loan Agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.

Commented [RK1]: I had thought the earlier discussion contemplated an acknowledgement / confirmation that at this time there are currently no amounts appropriated by the Legislature for the IESO and that these provisions would apply if amounts were appropriated in the future.

Has there been an update to that thinking?

Commented [JK2R1]: Updated.

Formatted: Indent: Left: 1.75"

DRAFT

- Prior to recommending to the Minister of Finance that the intercept provision be exercised, the OFA will raise the issue with MOE and seek MOE's support in getting the IESO to pay the amounts owing within a reasonable cure period.

- Upon receipt of notice from the OFA that the IESO has failed to pay in accordance with the provisions of a Loan Agreement, MOE will provide the OFA with all information requested by the OFA respecting amounts appropriated by the Legislature for payments to the IESO, including the intended purpose and expected timing of such payments to be made by MOE. Upon request, MOE will provide similar information to the Minister of Finance.

- MOE acknowledges and agrees that, upon receipt of a direction from the Minister of Finance that an amount is to be deducted from money appropriated by the Legislature for payment to the IESO, MOE will take all necessary action required by it in order to effect such deduction and payment to the OFA in accordance with the Minister of Finance's direction.

This letter agreement may be executed in counterparts. Therefore, if you are in agreement with the above terms and conditions in relation to the Loan Agreements, kindly sign this letter agreement below in triplicate and send back two copies to my attention.

I am writing in relation to the IESO's request for a new revolving credit facility in an amount of up to $2 billion from the OFA (the "New Credit Facility") to support its role in the implementation of and participation under the *Ontario Fair Hydro Plan Act, 2017.*

Pursuant to the OFA Lending Policy, the OFA is required to include an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis. The intercept provision allows the Minister of Finance to deduct amounts equal to any amounts the public body fails to pay the OFA under a loan agreement from money appropriated by the Legislature for payment to the public body.

Prior to entering into a loan agreement with the IESO for the New Credit Facility (the "OFHP Credit Facility Agreement"), on an unsecured basis, the OFA would require~~s~~ the Ministry of Energy ("MOE") and the IESO to agree to the terms and conditions set out below in relation to the above OFA Lending Policy intercept provision requirement. These terms and conditions shall also apply to the IESO's existing $975 million credit facility, established in a credit agreement entered into between the OFA and the Ontario Power Authority dated January 1, 2005, as amended (the "Original Credit Facility Agreement").

As such, the OFA, the IESO, and MOE agree as follows in respect of any advances made by the OFA to the IESO pursuant to the OFHP Credit Facility Agreement or the Original Credit Facility Agreement (each a "Loan Agreement"; together, the "Loan Agreements"):

- Pursuant to section 23 of the *Capital Investment Plan Act, 1993*, the IESO and MOE agree that in the event that the Legislature appropriates any funds for payment to the IESO for any purpose ("Appropriated Funds"), the Minister of Finance ~~is~~ would be entitled to deduct from such Appropriated Funds amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under a Loan Agreement (the "intercept provision").

- Under the intercept provision, which shall be included in the Loan Agreements, the IESO also agrees that any notice from the OFA to the Minister of Finance in relation to its failure to pay under a Loan Agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.

- Prior to recommending to the Minister of Finance that the intercept provision be exercised, the OFA will raise the issue with MOE and seek MOE's support in getting the IESO to pay the amounts owing within a reasonable cure period.

- Upon receipt of notice from the OFA that the IESO has failed to pay in accordance with the provisions of a Loan Agreement, MOE will provide the OFA with all information requested by the OFA respecting amounts appropriated by the Legislature for payments to the IESO, including the intended purpose and

DRAFT

expected timing of such payments to be made by MOE. Upon request, MOE will provide similar information to the Minister of Finance.

- MOE acknowledges and agrees that, upon receipt of a direction from the Minister of Finance that an amount is to be deducted from money appropriated by the Legislature for payment to the IESO, MOE will take all necessary action required by it in order to effect such deduction and payment to the OFA in accordance with the Minister of Finance's direction.

This letter agreement may be executed in counterparts. Therefore, if you are in agreement with the above terms and conditions in relation to the Loan Agreements, kindly sign this letter agreement below in triplicate and send back two copies to my attention.

We can push back saying – we are already saying payments that are not appropriations of Energy is already ruled out. But then there is a risk of delay. If we are specifically ruling out this Ontario Climate Change solutions Deployment Corp. that is a known exemption, is it a problem to include?

Hi John.

1. The changes made are acceptable except for those made to the penultimate paragraph – please amend this para to read as follows:

> For further certainty, the OFA and ENERGY acknowledge and agree that the intercept provision as provided for herein, and this letter agreement generally, shall not apply with respect to any funds appropriated by the Legislature for payment to the IESO through ministries other than ENERGY or through Ontario Climate Change Solutions Deployment Corporation.

2. Re the "[Energy to confirm]" comment, we are ok with the sentence as written and don't need to confirm anything further.

3. Kimberly Marshall would sign the Intercept Letter on behalf of IESO.

Victor

Toronto, ON M7A 2C1

Ms. Kimberly Marshall
Vice-President, Corporate Services and Chief Financial Officer, IESO
120 Adelaide St W #1600
Toronto, ON M5H 1T1

Dear Mr. Steen Hume and Ms. Kimberly Marshall:

I am writing in relation to the Independent Electricity System Operator's ("IESO") request to the Ontario Financing Authority ("OFA") for a new revolving credit facility in an amount of up to CAD $2 billion (the "New Credit Facility") to support the IESO's role in the implementation of and participation under the *Ontario Fair Hydro Plan Act, 2017.* Under the OFA Lending Policy, the OFA requires an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis. In general, an intercept provision allows the Minister of Finance to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts the public body fails to pay the OFA under a loan agreement.

The ~~OFA,~~ IESO and the Ministry of Energy ("ENERGY") confirm and the OFA acknowledge~~s and confirm~~ that at this time there are no amounts appropriated by the Legislature for payment to the IESO ~~[Energy to confirm]~~ by ENERGY and the intent of such intercept~~-~~ provision is that it would~~-~~ apply if and when amounts were to be appropriated for payment by ENERGY to the IESO in the future.

Commented [ESP1]: Defer to Corporate?

Prior to entering into a loan agreement with the IESO for the New Credit Facility (the "OFHP Credit Facility Agreement") on an unsecured basis, the OFA requires ENERGY and the IESO to agree to the terms and conditions set out below in relation to the above OFA Lending Policy intercept provision requirement.

These terms and conditions shall also apply to the IESO's existing ~~[~~$975 million~~]~~ credit facility, established in a credit agreement entered into between the OFA and the Ontario Power Authority dated January 1, 2005, as amended (the "Original Credit Facility Agreement").

- The OFA, the IESO, and ENERGY agree as follows in respect of any advances made by the OFA to the IESO pursuant to the OFHP Credit Facility Agreement or the Original Credit Facility Agreement (each a "Loan Agreement"; together, the "Loan Agreements"):

    - Pursuant to section 23 of the *Capital Investment Plan Act, 1993*, the IESO and ENERGY agree that, in the event that the Legislature appropriates any funds for payment by ENERGY to the IESO for any purpose ("Appropriated Funds"), the Minister of Finance would be entitled to deduct from such Appropriated Funds amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under a Loan Agreement (the "intercept provision"). Terms relating to the intercept provision shall also be separately included in the Loan Agreements.

    - If the intercept provision is exercised, the IESO agrees that any notice from the OFA to the Minister of Finance in relation to its failure to make a payment that is due under a Loan Agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.

    - Prior to recommending to the Minister of Finance that the intercept provision be exercised, the OFA will raise the issue with ENERGY and seek ENERGY's support in getting the IESO to pay the amounts owing to OFA within a reasonable cure period.

    - Upon receipt of notice from the OFA that the IESO has failed to make one or more payments owing to it in accordance with the provisions of a Loan Agreement, ENERGY will provide the OFA with all information requested by the OFA respecting amounts appropriated by the Legislature for payments to the IESO by ENERGY, including the intended purpose and expected timing of such payments to be made by ENERGY. Upon request, ENERGY will provide similar information to the Minister of Finance.

    - ENERGY acknowledges and agrees that, upon receipt of a direction from the Minister of Finance that an amount is to be deducted from money appropriated by the Legislature for payment by ENERGY to the IESO, ENERGY will take all necessary action required by it in order to effect such deduction and payment to the OFA in accordance with the Minister of Finance's direction.

    - For further certainty, the OFA and ENERGY acknowledge and agree that the intercept provision as provided for herein, and this letter agreement generally, shall not apply with respect to any funds appropriated by the Legislature for payment to the IESO through ministries other than ENERGY or through Ontario Climate Change Solutions Deployment Corporation.

This letter agreement may be executed in counterparts. Therefore, if you are in agreement with the above terms and conditions in relation to the Loan Agreements, kindly sign this letter agreement below in triplicate and send back two copies to my attention.

Sincerely,

_____

Mr. Steen Hume
Assistant Deputy Minister, Ministry of Energy
7th Flr, 77 Grenville St
Toronto, ON M7A 2C1

Ms. Kimberly Marshall
Vice-President, Corporate Services and Chief Financial Officer, IESO
120 Adelaide St W #1600
Toronto, ON M5H 1T1

Dear Mr. Steen Hume and Ms. Kimberly Marshall:

I am writing in relation to the Independent Electricity System Operator's ("IESO") request to the Ontario Financing Authority ("OFA") for a new revolving credit facility in an amount of up to CAD $2 billion (the "New Credit Facility") to support the IESO's role in the implementation of and participation under the *Ontario Fair Hydro Plan Act, 2017.* Under the OFA Lending Policy, the OFA requires an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis. In general, an intercept provision allows the Minister of Finance to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts the public body fails to pay the OFA under a loan agreement.

The ~~OFA,~~ IESO and the Ministry of Energy ("ENERGY") confirm and the OFA acknowledge~~s and confirm~~ that at this time there are no amounts appropriated by the Legislature for payment to the IESO ~~[Energy to confirm]~~ by ENERGY and the intent of such intercept~~-~~ provision is that it would~~-~~ apply if and when amounts were to be appropriated for payment by ENERGY to the IESO in the future.

Commented [ESP1]: Defer to Corporate?

Prior to entering into a loan agreement with the IESO for the New Credit Facility (the "OFHP Credit Facility Agreement") on an unsecured basis, the OFA requires ENERGY and the IESO to agree to the terms and conditions set out below in relation to the above OFA Lending Policy intercept provision requirement.

These terms and conditions shall also apply to the IESO's existing ~~[~~$975 million~~]~~ credit facility, established in a credit agreement entered into between the OFA and the Ontario Power Authority dated January 1, 2005, as amended (the "Original Credit Facility Agreement").

- The OFA, the IESO, and ENERGY agree as follows in respect of any advances made by the OFA to the IESO pursuant to the OFHP Credit Facility Agreement or the Original Credit Facility Agreement (each a "Loan Agreement"; together, the "Loan Agreements"):

    - Pursuant to section 23 of the *Capital Investment Plan Act, 1993*, the IESO and ENERGY agree that, in the event that the Legislature appropriates any funds for payment by ENERGY to the IESO for any purpose ("Appropriated Funds"), the Minister of Finance would be entitled to deduct from such Appropriated Funds amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under a Loan Agreement (the "intercept provision"). Terms relating to the intercept provision shall also be separately included in the Loan Agreements.

    - If the intercept provision is exercised, the IESO agrees that any notice from the OFA to the Minister of Finance in relation to its failure to make a payment that is due under a Loan Agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.

    - Prior to recommending to the Minister of Finance that the intercept provision be exercised, the OFA will raise the issue with ENERGY and seek ENERGY's support in getting the IESO to pay the amounts owing to OFA within a reasonable cure period.

    - Upon receipt of notice from the OFA that the IESO has failed to make one or more payments owing to it in accordance with the provisions of a Loan Agreement, ENERGY will provide the OFA with all information requested by the OFA respecting amounts appropriated by the Legislature for payments to the IESO by ENERGY, including the intended purpose and expected timing of such payments to be made by ENERGY. Upon request, ENERGY will provide similar information to the Minister of Finance.

    - ENERGY acknowledges and agrees that, upon receipt of a direction from the Minister of Finance that an amount is to be deducted from money appropriated by the Legislature for payment by ENERGY to the IESO, ENERGY will take all necessary action required by it in order to effect such deduction and payment to the OFA in accordance with the Minister of Finance's direction.

    - For further certainty, the OFA and ENERGY acknowledge and agree that the intercept provision as provided for herein, and this letter agreement generally, shall not apply with respect to any funds appropriated by the Legislature for payment to the IESO through ministries other than ENERGY or through Ontario Climate Change Solutions Deployment Corporation.

This letter agreement may be executed in counterparts. Therefore, if you are in agreement with the above terms and conditions in relation to the Loan Agreements, kindly sign this letter agreement below in triplicate and send back two copies to my attention.

Sincerely,

_____

Hi John,

Not sure on reading your email to Lisa that Lisa understood what I thought was the issue.

Is it that there is an appropriation to GreenOn, and then GreenON funds an IESO program. Is that right? Check withy the IESO and TBS.

Would OFA Legal consider that not an appropriation (in effect) for the IESO?

Ron

Subject: RE: Intercept provision

Hi John,

If I understand your question correctly, the answer is that the Ministry of Environment and Climate Change (MOECCC) is not required to be a party to the FHP credit facility intercept MOU/letter agreement. The letter agreement is intended to be between the "responsible ministry" (in this case Ministry of Energy (MOE)) and the public body (in this case IESO).

The intercept would apply to money appropriated by the Legislature for "payment to the public body". Therefore, money appropriated by the Legislature for payment to a different ministry, a different public body, or to MOE (or an agency of MOE, etc.) for a program *unrelated* to the IESO, would not be caught by the intercept.

I've included an excerpt below which should be helpful in this regard. Please let me know if you would like to discuss further.

Lisa

Excerpt from OFA Lending Policy (emphasis added):

Pursuant to section 23 of the *Capital investment Plan Act* and prior to any loan agreement entered into between the OFA and a public body, such public body and its responsible ministry are to agree that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts that the public body fails to pay to the OFA on account of indebtedness under its loan agreement with the OFA. In addition, the public body is to agree that any notice from the OFA to the Minister of Finance in relation to its failure to pay under its loan agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.

Subject: Intercept provision

Hi Sarah, Lisa,

I have a request for a legal interpretation of the OFA Lending Policy.

The OFA Lending Policy as we currently have it, does it provide for a requirement [of the MOU/the letter agreement we have drafted] other than one ministry responsible for the public body? The way I read the policy, I believe there should be one Ministry that provides oversight of the public body.

This morning, at a meeting, IESO representative raised the issue of their managing the government's implementation of Green ON Fund (?). I am presuming that the same type of arrangement applies for this program as the Energy's program, i.e. no appropriation for IESO's operation, and this is TBD but would like to know how implementation of such a program funded by another ministry would factor into what we are looking to do.

The purpose of the question is to entertain whether the MOU/the letter agreement needs to include MOECC or not. I don't think so but would appreciate your assessment.

Thanks,

John

Yes, so that is a separate question I am asking TBS. I just wanted to confirm with OFA Legal a limited question of whether they would go as far as to require the MOECC's buy-in for the intercept provision.

OFA Legal is thus far onside with treating flow-through expenditure and non-operating appropriation separate, the same way social programs under FHP as being separate.

Attachments: Minister Directive for IESO Credit Facility Approval.pdf

---

Hi Anna,

As you may recall, the IESO has several financing facilities, two from the OEFC and two from the OFA.

The OFA ones have been used for interim financing for the IESO deferral account. When the deferral account was established, the IESO deferral account from the OFA was for up to $975 million, but that was replaced with two facilities – the $975 M facility was reduced to $475 million, and a new facility for $2 billion was established, with the latter focussed on short term financing of the IESO deferral account.

As with all OFA loans to public bodies, the OFA received a directive from the Minister for them (see attached for the $2 Bn facility).

Hi Ron,

Gadi's been invited to a meeting with Deputy Imbrognu and Ken Hartwick this afternoon to discuss the IESO deferral account – per your call with Gadi this morning. Gadi was hoping to get the answers to two questions before the meeting: 1) how big is the IESO line of credit (LOC)? 2) Does an increase to the LOC require a Minister's directive?

DIRECTIVE

MINISTER OF FINANCE

INDEPENDENT ELECTRICITY SYSTEM OPERATOR CREDIT FACILITY

To: Ontario Financing Authority ("OFA")

Whereas:

Under the *Capital Investment Plan Act, 1993* ("CIPA"), the OFA provides financing to public bodies as directed by the Minister of Finance.

The Independent Electricity System Operator ("IESO"), a public body for the purposes of CIPA, has requested funding from the OFA to support the IESO's role in the implementation and administration of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP").

In order to fulfil the Province's commitments under the OFHP, it is desirable for the Minister of Finance to provide direction to the OFA to provide a revolving credit facility for the purposes of providing short to medium term financing related to the OFHP.

Therefore:

Pursuant to sub-section 16(2) of CIPA, the OFA is directed to lend to the IESO under a revolving credit facility (the "Line of Credit") for the purpose of short to medium term financing related to the IESO's implementation of the OFHP, an aggregate principal amount of up to CAD $2 billion.

The Line of Credit shall be subject to the following terms:

- The Line of Credit shall be evidenced by an agreement between the IESO and the OFA containing terms and conditions consistent with this Directive (the "Credit Agreement").

- Interest on the Line of Credit shall be payable at a rate equal to the Province's cost of funds based on the terms of the Credit Agreement, and as determined by the Chief Executive Officer of the OFA or the Assistant Deputy Minister, Corporate and Electricity Finance Division, OFA, or a person designated by either of them, plus a twenty-five (25) basis point spread.

../2

- All amounts outstanding under the Line of Credit shall be repaid in full on or before the date no later than September 30, 2022.

- The Line of Credit shall be subject to such other terms as the OFA deems appropriate from time to time.

Hi Anna,

As discussed, IESO is looking to clear the anticipated $566 million in the deferral account arising from the April and May periods. Of that, currently, IESO has drawn $256 million from the OFA facility and would need to draw a further $310 million in about a week when the May settlement amounts are cleared.

With respect to the email chain that I discussed with you and Gadi, while it only made its way to CEFD this morning, OPG had emailed CMD on Friday. So, in the intervening period, this issue may have already been resolved as something to wait on for direction from the in-coming government.

Importance: High

Hi Ron,

Gadi's been invited to a meeting with Deputy Imbrognu and Ken Hartwick this afternoon to discuss the IESO deferral account – per your call with Gadi this morning. Gadi was hoping to get the answers to two questions before the meeting: 1) how big is the IESO line of credit (LOC)? 2) Does an increase to the LOC require a Minister's directive?

Anna

Subject: Minister's Directive IESO FHP 2017 v3

Hi Deena,

Attached, for Ron's review and any comment, is the latest draft of the Minister's Directive that will direct the OFA to provide the $2 billion revolving credit facility to the IESO for its role under the ONFHP. OFA legal and Documentation have reviewed this and we're preparing an approval package. We just wanted to get this on Ron's radar and for any additional feedback he may have.

Thank you,
Salman

Hi Scott,

Sure.

I will admit to being surprised about the request this morning to attend on Monday.

I know we had talked for awhile about a briefing for the Minister on the MOF-related items on the FHP (Support Agreement, s.28 & indemnity, OIC for the OFA lending to IESO, IESO Treasury Policy amendment approval, PILs ask), which is scheduled for Wednesday, but I saw that as distinct from the Energy Regs item.

I have been rarely invited to the Minister's pre-Cabinet briefing meetings (the only other time I can recall was when Brandon was briefing on the FHP in Feb/March using his placemat).

Hi Scott,

I had mentioned to Gwen when talking about scheduling our briefing that it would be good to brief the Minister on MOF-related items so that he is aware of them as the Energy items go forward, should the MOF-related items come up. But that was when I thought the Minister's briefing on the MOR-related items was targeted for this week.

The sequencing is not ideal from that perspective, but given that the s.28 submission is still pending, having our briefing on Wednesday instead of this week may be better for that purpose.

Ontario's Fair Hydro Plan
OFA Audit & Risk Management Committee Briefing

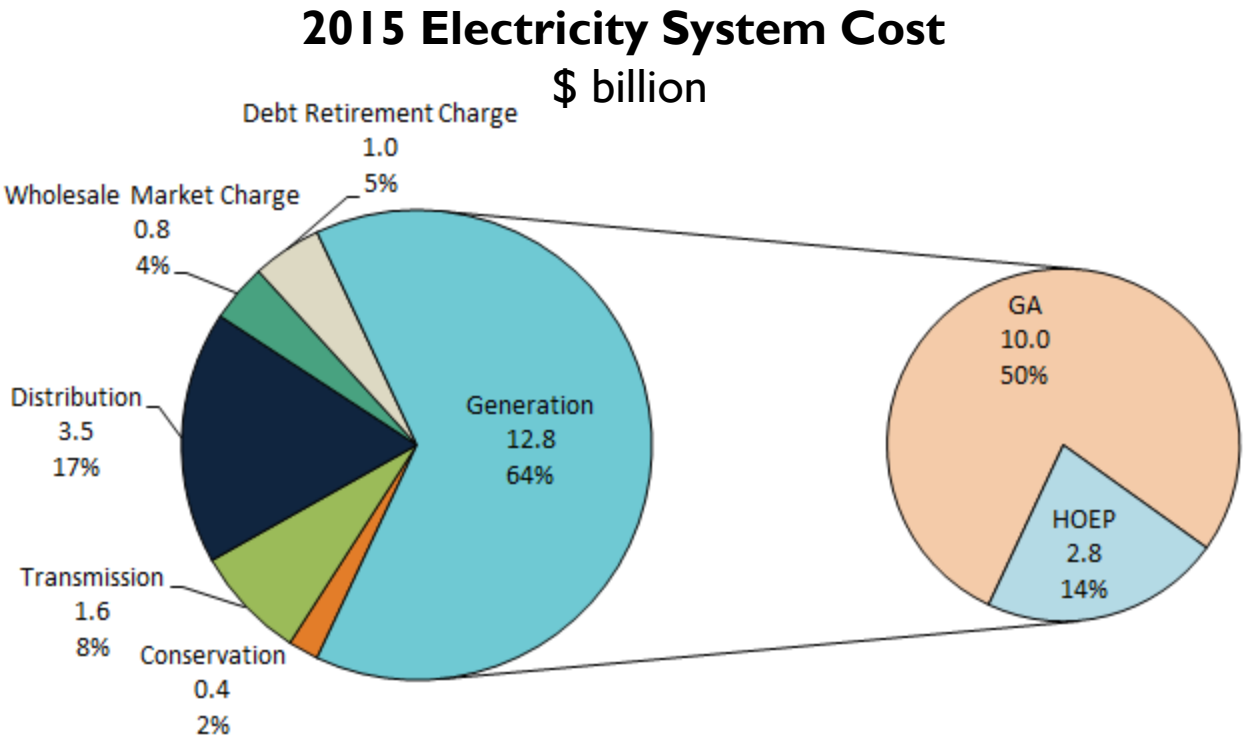
Corporate and Electricity Finance Division
June 16, 2017

Contents

- Context: Ontario's Electricity Market
- Overview: Ontario's Fair Hydro Plan
- Global Adjustment Refinancing
- OFA Involvement
  - Equity Injection
  - IESO increased credit facility
- Global Adjustment Refinancing Risks / Sensitivities
  - Financial modelling assumptions

Context: Ontario's Electricity Market

- In 2015, generation accounted for 64% of total electricity system costs. Total system costs in 2015 were $20 billion.



DEFINITIONS:

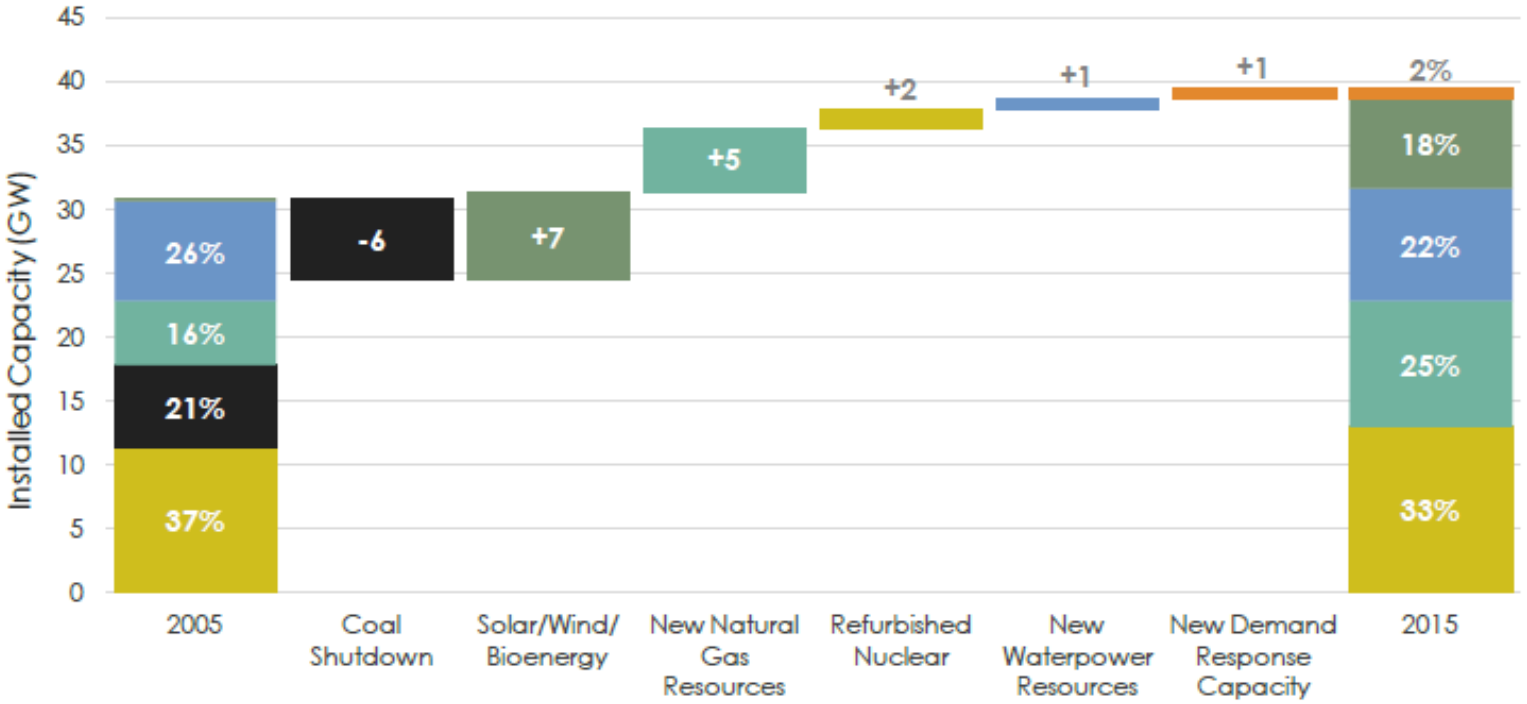
GA: The "Global Adjustment" accounts for differences between the market price of electricity and the rates paid to regulated and contracted generators and for conservations programs. The GA is collected from all electricity rates payers in Ontario

HOEP: Hourly Ontario Electricity Price.

Source: IESO

Context: Significant Change in Supply Mix

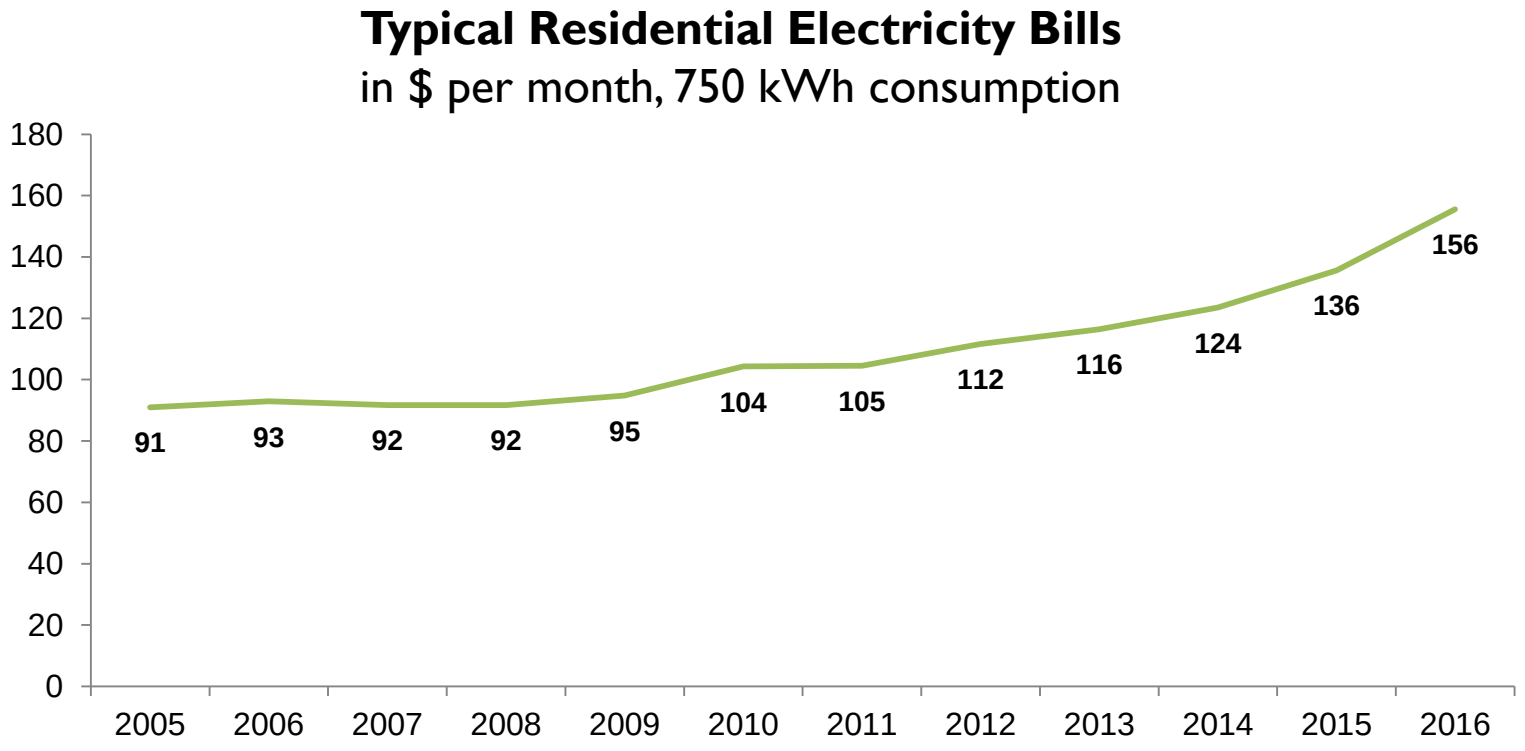
- Between 2005 and 2015, government invested more than $50 billion in the electricity system, including $35 billion in electricity generation to restore reliability, replace coal and meet environmental objectives.
  - Electricity costs are increasing as necessary investments are made to decarbonize and modernize the province's electricity infrastructure.



Source: IESO

Context: Electricity Prices Have Increased

- Since 2010, electricity prices have increased at a rate higher than the Consumer Price Index (CPI).



Source: Ministry of Energy

Overview:
Ontario's Fair Hydro Plan

Overview:
The Ontario Fair Hydro Plan ("OFHP")

- On May 31, 2017, the government passed the Ontario Fair Hydro Act, 2017, to enable the implementation of the OFHP, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).

- The measures that make up the 25 per cent average reduction include
  - Refinancing a portion of the Global Adjustment (GA) to allocate fairly the costs of Ontario's contracts for electricity infrastructure investments over the expected lifecycle of the generation infrastructure assets.
    - The Global Adjustment recovers a portion of the commodity supply and conservation costs of electricity.
  - The Ontario Rebate for Electricity Consumers, for an amount equal to the provincial portion of the HST, which took effect on January 1, 2017.
  - Shifting funding of the Ontario Electricity Support Program (OESP) and Rural or Remote Rate Protection (RRRP) program from electricity ratepayers to the province.

- People with low incomes, those served by local distribution companies (LDCs) with the highest distribution costs, OESP recipients and On-Reserve First Nation households would benefit from even greater reductions to their electricity bills.

Overview:
The Ontario Fair Hydro Plan (cont'd)

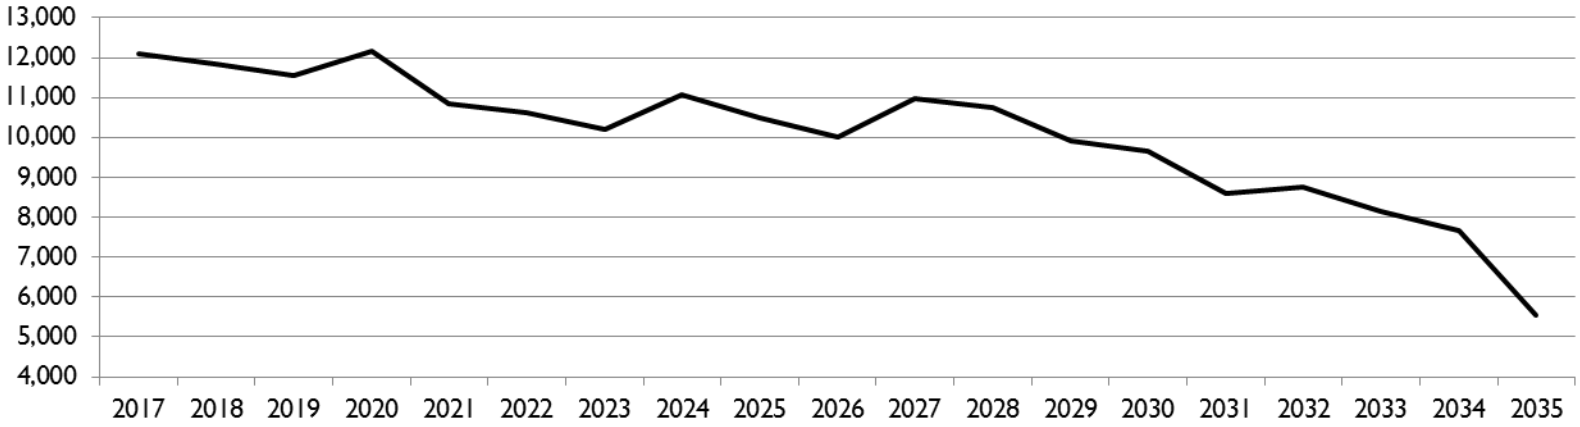
- Other measures that make up the Fair Hydro Plan include
  - Expanding the Industrial Conservation Initiative (ICI) to include electricity consumers, in the manufacturing and certain other sectors including greenhouses, with an average monthly peak demand of greater than 500 kW and less than 1 MW.
  - Expanding the OESP, by providing 50 per cent more support in the form of monthly credits for people with low incomes and increasing eligibility, effective May 1, 2017.
  - Establishing an Affordability Fund that will be accessible to LDCs for customers who do not qualify for low-income conservation programs and who are unable to undertake energy efficiency improvements without financial assistance.
  - Providing on-reserve First Nations households with a 100 per cent credit of the delivery line on their monthly electricity bills.
  - Enhancing the Rural or Remote Rate Protection (RRRP) program to provide distribution charge relief to about 800,000 customers and shift costs from ratepayers to provincial revenues. This would include customers served by local distribution companies (LDCs) with the highest rates.
  - Improving energy sector efficiency and modernize the province's electricity market, building on the collaboration of the Independent Electricity System Operator (IESO) and the Ontario Energy Board (OEB).
- The government-funded measures (OESP, RRRP, on-reserve credits and the Affordability Fund) have been estimated to cost the government about $2.5 billion in the first three years (and would have an on-going annual cost to government).

Refinancing the Global Adjustment

Refinancing the Global Adjustment

- Refinancing the Global Adjustment (GA) provides significant and immediate rate relief by spreading the cost of electricity investments over a longer period of time.
- Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction (i.e., the financed portion) in the GA would be about $2.5 billion per year on average over the first ten years.
- This measure would share the associated costs more fairly. The illustrative chart below shows how Global Adjustment (GA) cost is front-end loaded and forecast to decline over time.
- Energy and IESO forecasts are subject to update, including as part of the Ministry of Energy's current Long-term Energy Plan update process.

Forecast Global Adjustment Cost (nominal $ million)



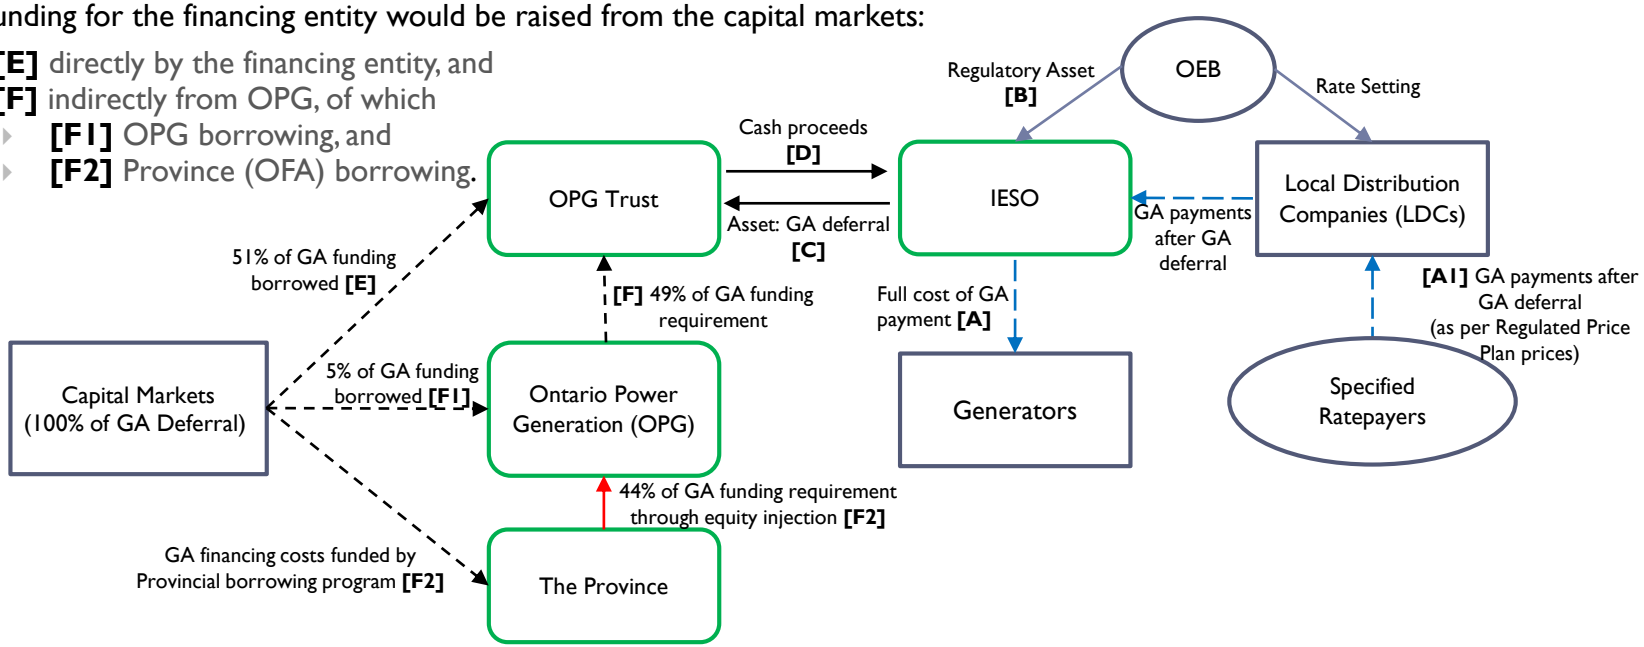
Source: IESO

Global Adjustment Financing: Policy Rationale

- The purpose of the Global Adjustment refinancing is to
  - Ensure that clean energy costs and clean energy benefits are fairly allocated among present and future specified consumers
  - Recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province, and
  - Align clean energy costs with clean energy benefits, in order to provide fairness for specified consumers over time.
- The majority of the province's electricity generators are under 20-year contracts. Many of these generators will be able to operate past their contract term.
- By recognizing that generation assets are expected to continue to provide benefit to future ratepayers, beyond the term of current contracts, future ratepayers are expected to be able to utilize these assets and reduce the need to finance the development of new generation assets.
- In the early years, a portion of the costs covered by the GA would be financed to reduce pressure on electricity ratepayers.
- In the later years, when some system costs are expected to be reduced due to continued operation of existing assets under 20-year contracts, the cost of financing would be recovered from ratepayers through a "Clean Energy Adjustment".

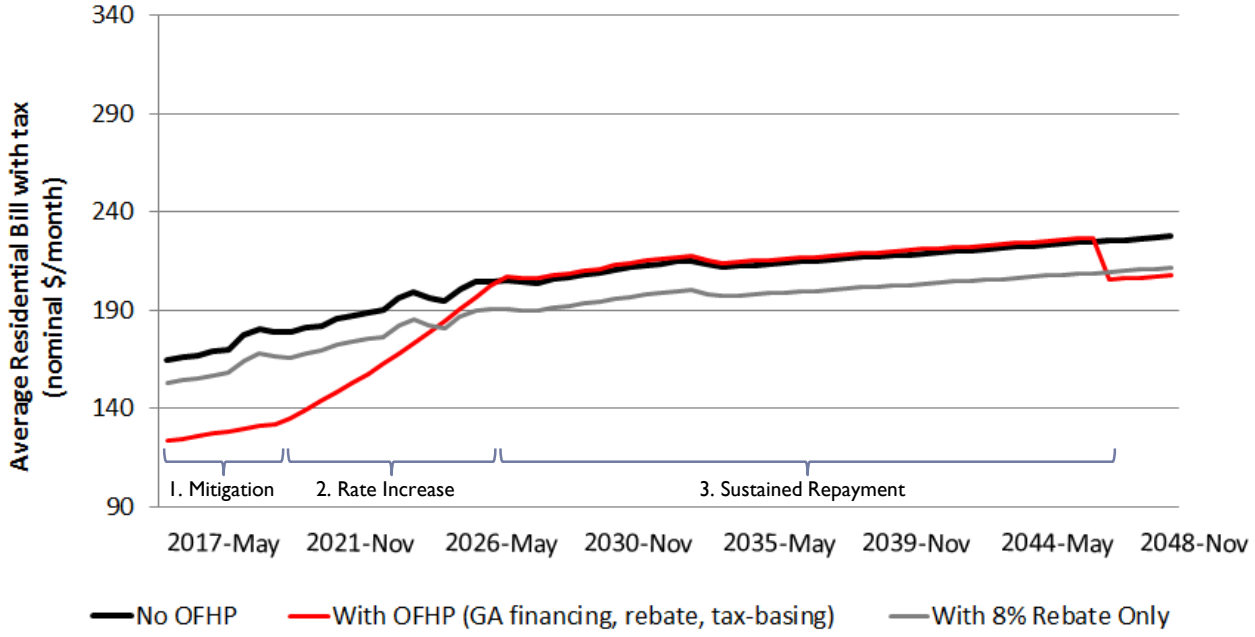
GA Financial Structure

- Through the OFHP, GA costs, including refinancing costs, will be recovered from ratepayers over a longer period of time.
  - The GA refinancing framework will be implemented through the IESO and Ontario Power Generation (OPG).
  - Under the OFHP, OPG would be able to establish a special purpose vehicle (OPG Trust) financing entity.
- **[A]** Under the OFHP, the IESO will continue to pay generators their contracted and regulated prices. **[A1]** However, LDC payments will be less, as Regulated Price Plan prices are set based on a portion of the GA deferred in order to support the initial 25% reduction (and subsequent adjustments).
- **[B]** The IESO will set up a deferral account, vis a vis a 'regulatory asset', with a right to recover the deferred costs and financing costs, as authorised by the OEB.
- **[C]** Under the Act, the Independent Electricity System Operator (IESO) would be able to sell the 'right to collect' deferred future revenue from ratepayers to the financing entity in return for cash proceeds **[D]**.
- The funding for the financing entity would be raised from the capital markets:
  - **[E]** directly by the financing entity, and
  - **[F]** indirectly from OPG, of which
    - **[F1]** OPG borrowing, and
    - **[F2]** Province (OFA) borrowing.



Global Adjustment Financing

- GA Financing structure and bill impacts can be thought of as having three phases (see illustrative chart below)



Phase 1: Mitigation

- 2017 residential bill 25% on average lower than original projection (pre-8% Ontario Rebate for Electricity Consumers).
- Increase in bill capped to 2% per year until 2021.

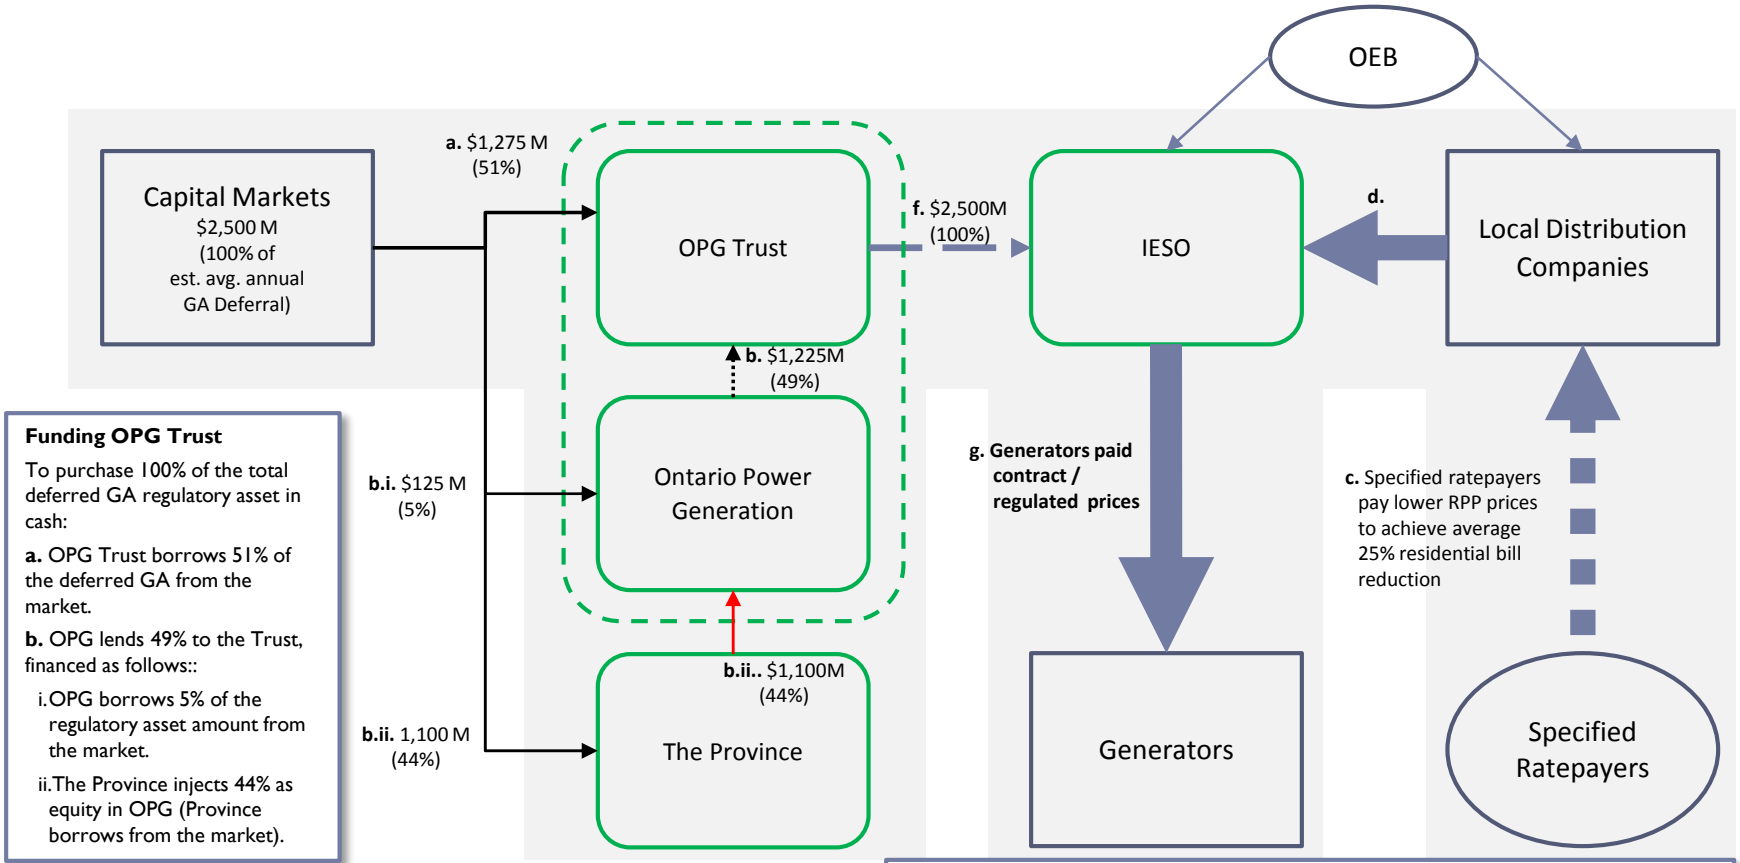
Phase 2: Rate Increase

- Residential bills continue lower than without the OFHP; however, not by 25% on average.
- Bill increases each year, limiting overall deferral and borrowing.
- Planned increases for the above purpose projected to end in 2028 when sustained repayment starts.

Phase 3: Sustained Repayment

- Bill higher than projection, excluding the GA deferral, until 2047 (estimated).
- Difference between with OFHP (red) and 8% rebate (grey) only represents recovery of deferred GA and financing.

GA Financing Structure: Illustrative Fund Flows* - Mitigation Phase



Funding OPG Trust

To purchase 100% of the total deferred GA regulatory asset in cash:

a. OPG Trust borrows 51% of the deferred GA from the market.

b. OPG lends 49% to the Trust, financed as follows::

i. OPG borrows 5% of the regulatory asset amount from the market.

ii. The Province injects 44% as equity in OPG (Province borrows from the market).

Deferral Mechanism

c. Specified ratepayers pay RPP prices, including the non-deferred portion of the GA to LDCs.

d. The LDCs remit this amount to the IESO ...

e. …The IESO recognizes a regulatory asset – the right to collect the deferred amount, and a financing cost, from ratepayers in the future.

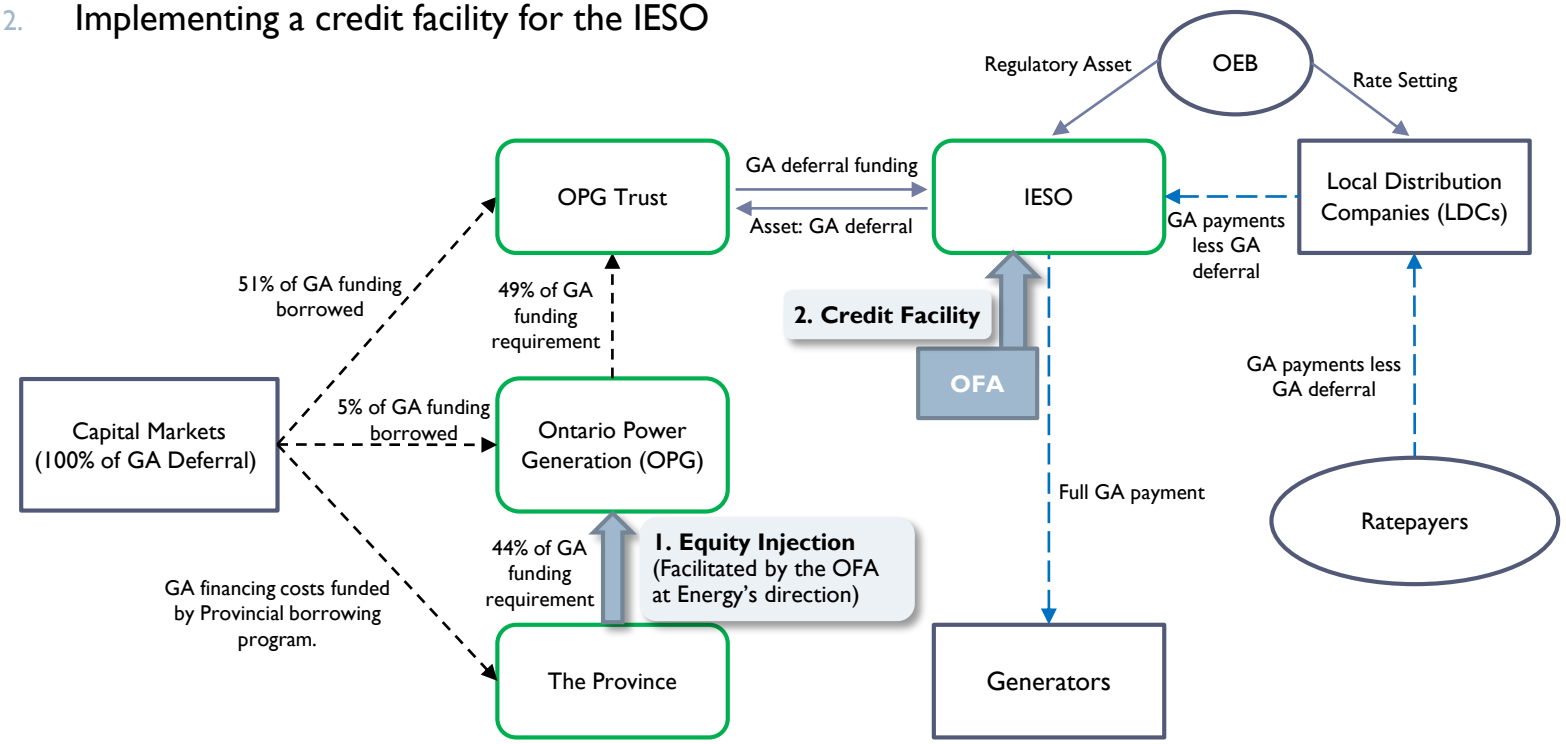
f. IESO sells this asset for cash to OPG Trust.

g. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA cost to Generators (and conservation costs).

* Amounts are illustrative and based on an assumed deferred cost, or regulatory of $2.5 billion.

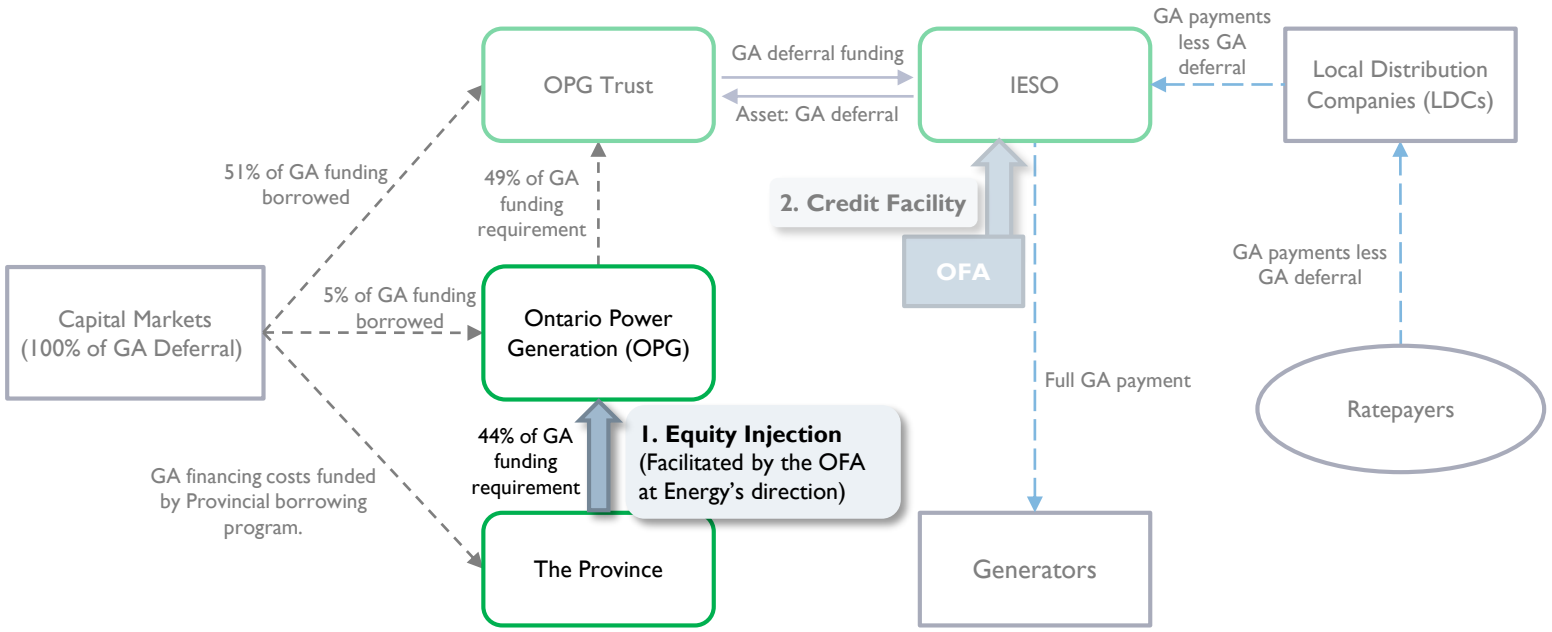
OFA Involvement with FHP Implementation

- Two aspects of the GA Financing:
  1. Facilitating the mechanism for equity injections into Ontario Power Generation. Ministry of Energy as shareholder has received an appropriation through the Treasury Board process for an operating asset expenditure to acquire the equity.
     - OFA would also be managing the Provincial borrowing program, including to support the equity injection.
  2. Implementing a credit facility for the IESO



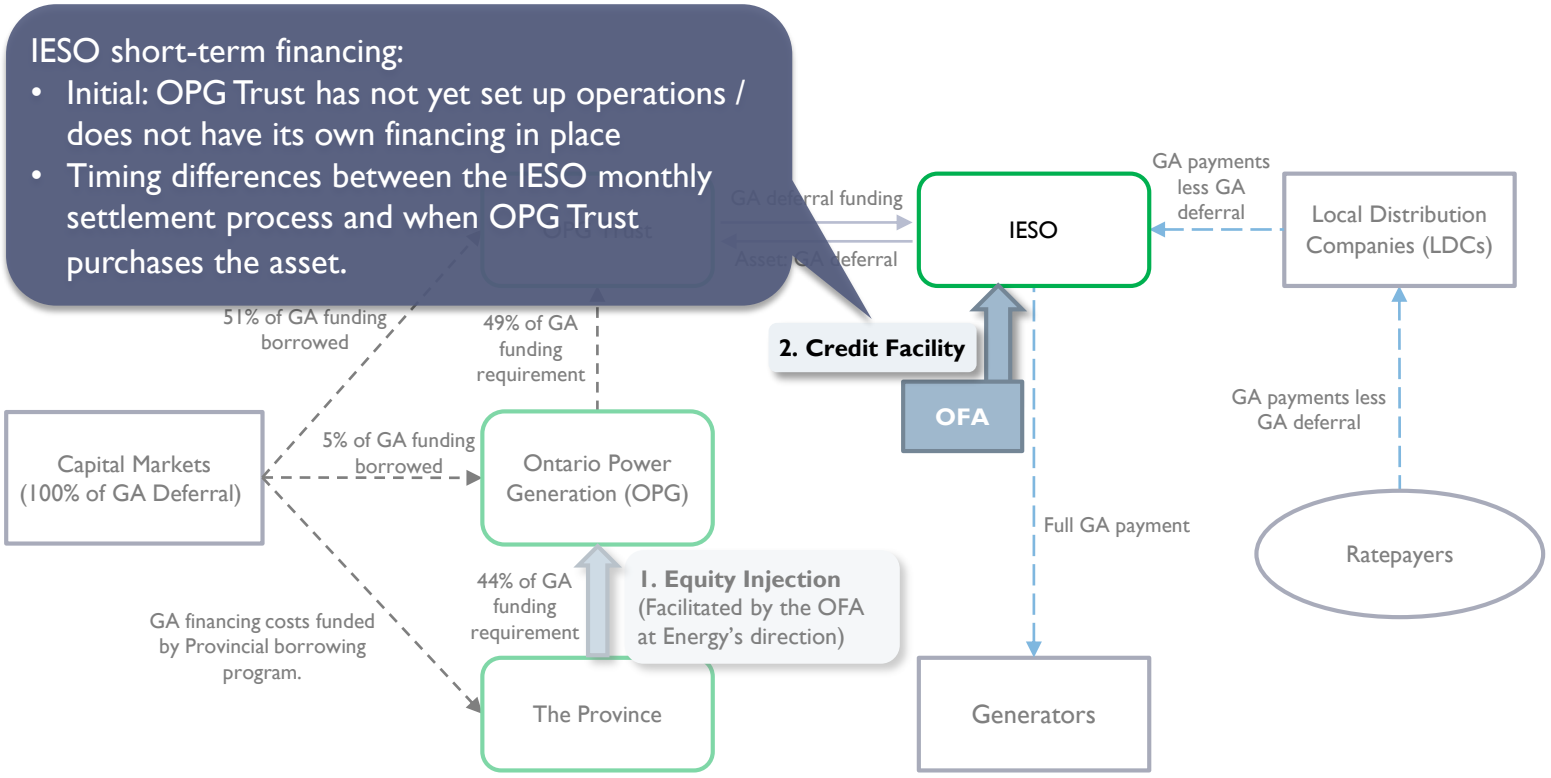
1. Equity Injection

- The 2017 Budget includes in the Ministry of Energy Estimates an investment operating asset of $1.1 bn related to the Province's equity injection to OPG. OPG would provide financing to the Trust through sub-ordinated debt, as part of the OPG Trust financing to regularly purchase IESO's regulatory asset through 2017-18.
- The structure would
  - increase gross debt of the Province (to finance the equity injection in OPG),
  - increase net investment in OPG (so no net debt impact),
  - increase interest on debt related to that external debt, which
  - on consolidation into Public Accounts, would be offset by increased earnings of OPG from sub-debt interest revenue.



2. OFA/IESO Credit Facility

- The Fair Hydro Act, 2017 provides for the IESO to sell the right to recover those deferred amounts of the global adjustment from specified consumers in the future (the "regulatory asset").
- It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG Trust"). The cash received would be used by the IESO to fund the current Global Adjustment deferral shortfall.



Risks / Cost Sensitivities

Global Adjustment Refinancing Model Assumptions

- Projected Global Adjustment Refinancing costs are affected by actual system costs and consumption, and actual interest rates.
- Variances from these key assumptions could affect actual refinancing costs, etc.

- Interest rates
  - Higher/lower Interest rates would lead to higher/lower refinancing costs
  - For example, a 1.5 percentage point lower interest rate assumption, compared to an illustrative 5% case used by the Ministry of Energy, would halve estimated cumulative interest costs, from about $21 bn to $11 bn.

- Electricity demand
  - Lower/higher electricity demand due to fewer consumers or lower/higher consumption among some consumers would increase/decrease Clean Energy Adjustment costs for remaining consumers.

- System Costs
  - Ministry of Energy is developing the updated Long-term Energy Plan (LTEP), expected to be released in about summer 2017. The LTEP is expected to include measures to continue to reduce system costs.
  - Actual system costs are expected to also be affected by other factors, such as the Ontario Energy Board rate application process.

Appendix

GA Financing: Illustrative Net Debt Impacts

Province of Ontario - Consolidated Statement of Financial Position

As at March 31, 2016 ($ Millions)		**GA Financing Impacts Est. Average Annual**
Liabilities		
Accounts Payable and Accrued Liabilities (Schedule 5)	19,361	
Debt (Note 2)	327,413	**1,100**
Other Long-Term Financing (Note 4)	14,145	
Deferred Revenue and Capital Contributions (Note 5)	10,779	
Pensions and Other Employee Future Benefits (Note 6)	12,107	
Other Liabilities (Note 7)	4,905	
	388,710	
Financial Assets		
Cash and Cash Equivalents	13,600	
Investments (Note 8)	21,765	
Accounts Receivable (Schedule 6)	11,059	
Loans Receivable (Schedule 7)	11,545	
Other Assets	1,936	
Investment in Government Business Enterprises (Schedule 9)	23,572	**1,100**
	83,477	
Net Debt	(305,233)	**0**
Non-Financial Assets		
Tangible Capital Assets (Note 9)	102,536	
Accumulated Deficit	(202,697)	

- Increased borrowing required to fund equity injections.
- Provincial debt will increase.

- Equity injections increase investment in OPG

- Offsetting impacts lead to zero net debt impact

Ontario's Fair Hydro Plan
OFA Audit & Risk Management Committee Briefing

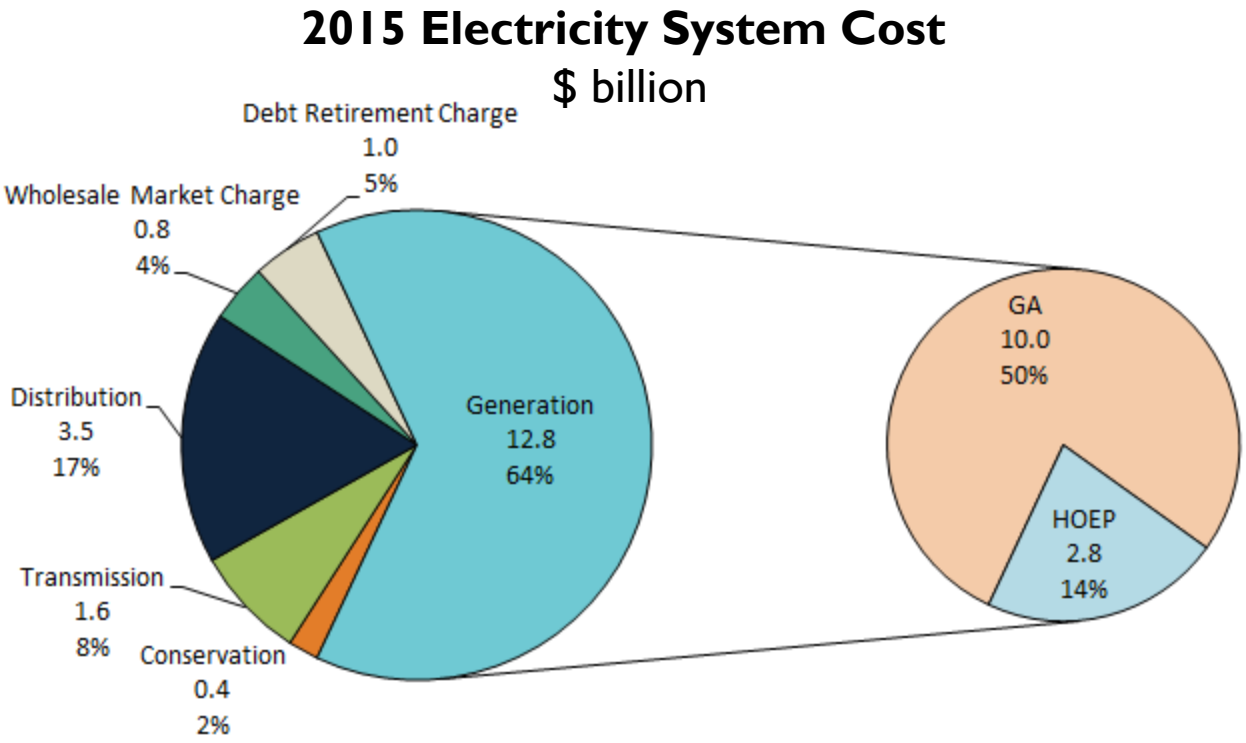
Corporate and Electricity Finance Division
June 16, 2017

Contents

- Context: Ontario's Electricity Market
- Overview: Ontario's Fair Hydro Plan
- Global Adjustment Refinancing
- OFA Involvement
  - Equity Injection
  - IESO increased credit facility
- Global Adjustment Refinancing Risks / Sensitivities
  - Financial modelling assumptions

Context: Ontario's Electricity Market

- In 2015, generation accounted for 64% of total electricity system costs. Total system costs in 2015 were $20 billion.



DEFINITIONS:

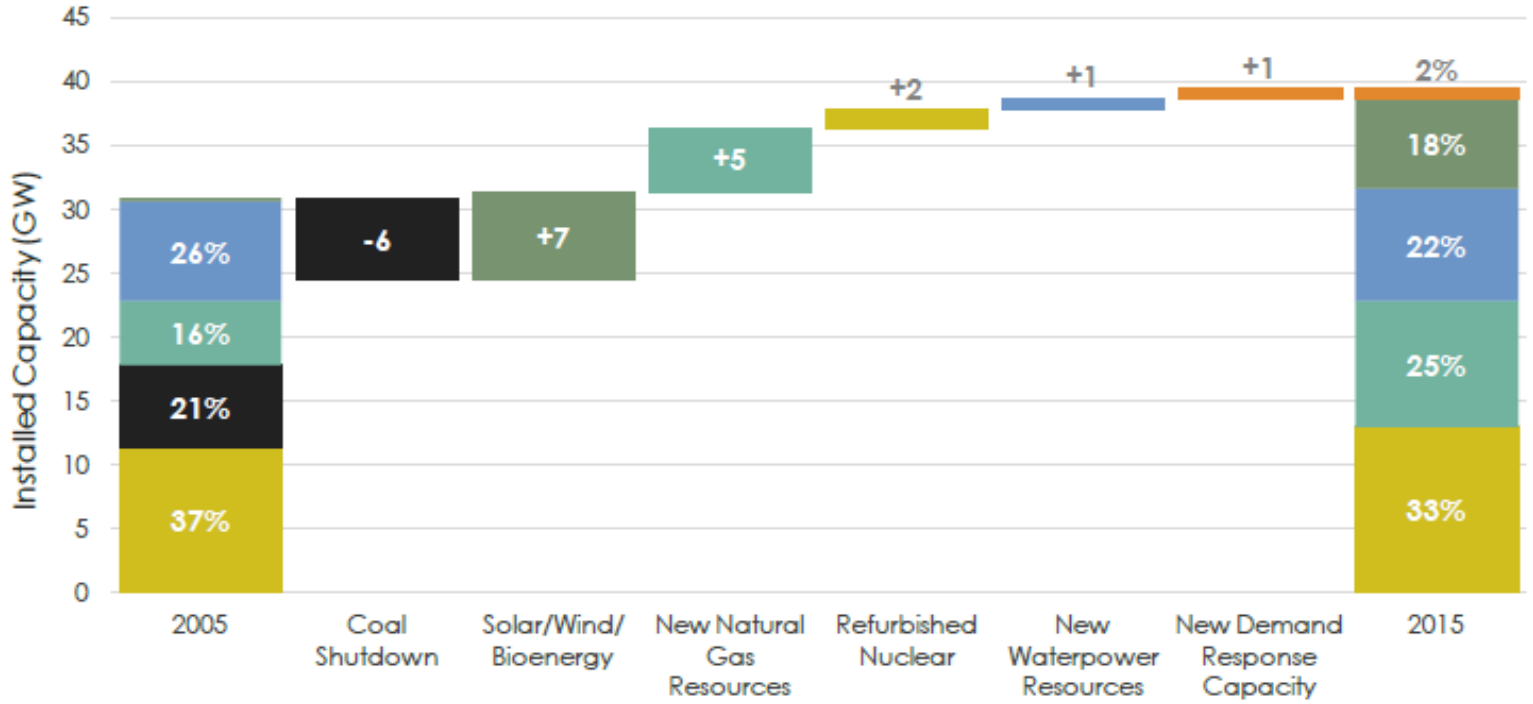
GA: The "Global Adjustment" accounts for differences between the market price of electricity and the rates paid to regulated and contracted generators and for conservations programs. The GA is collected from all electricity rates payers in Ontario

HOEP: Hourly Ontario Electricity Price.

Source: IESO

Context: Significant Change in Supply Mix

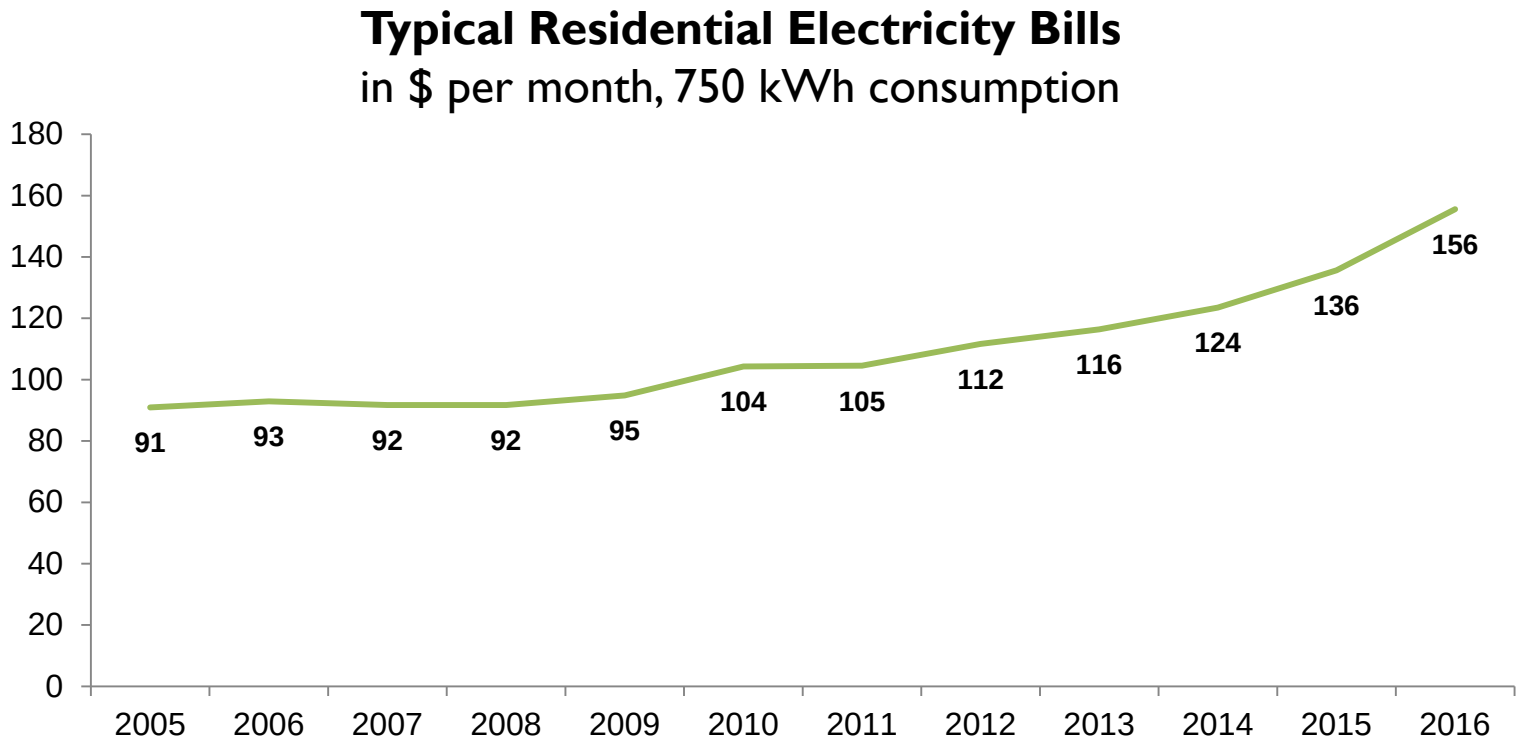
- Between 2005 and 2015, government invested more than $50 billion in the electricity system, including $35 billion in electricity generation to restore reliability, replace coal and meet environmental objectives.
  - Electricity costs are increasing as necessary investments are made to decarbonize and modernize the province's electricity infrastructure.



Source: IESO

Context: Electricity Prices Have Increased

- Since 2010, electricity prices have increased at a rate higher than the Consumer Price Index (CPI).



Source: Ministry of Energy

Overview:
Ontario's Fair Hydro Plan

Overview:
The Ontario Fair Hydro Plan ("OFHP")

- On May 31, 2017, the government passed the Ontario Fair Hydro Act, 2017, to enable the implementation of the OFHP, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).

- The measures that make up the 25 per cent average reduction include
  - Refinancing a portion of the Global Adjustment (GA) to allocate fairly the costs of Ontario's contracts for electricity infrastructure investments over the expected lifecycle of the generation infrastructure assets.
    - The Global Adjustment recovers a portion of the commodity supply and conservation costs of electricity.
  - The Ontario Rebate for Electricity Consumers, for an amount equal to the provincial portion of the HST, which took effect on January 1, 2017.
  - Shifting funding of the Ontario Electricity Support Program (OESP) and Rural or Remote Rate Protection (RRRP) program from electricity ratepayers to the province.

- People with low incomes, those served by local distribution companies (LDCs) with the highest distribution costs, OESP recipients and On-Reserve First Nation households would benefit from even greater reductions to their electricity bills.

Overview:
The Ontario Fair Hydro Plan (cont'd)

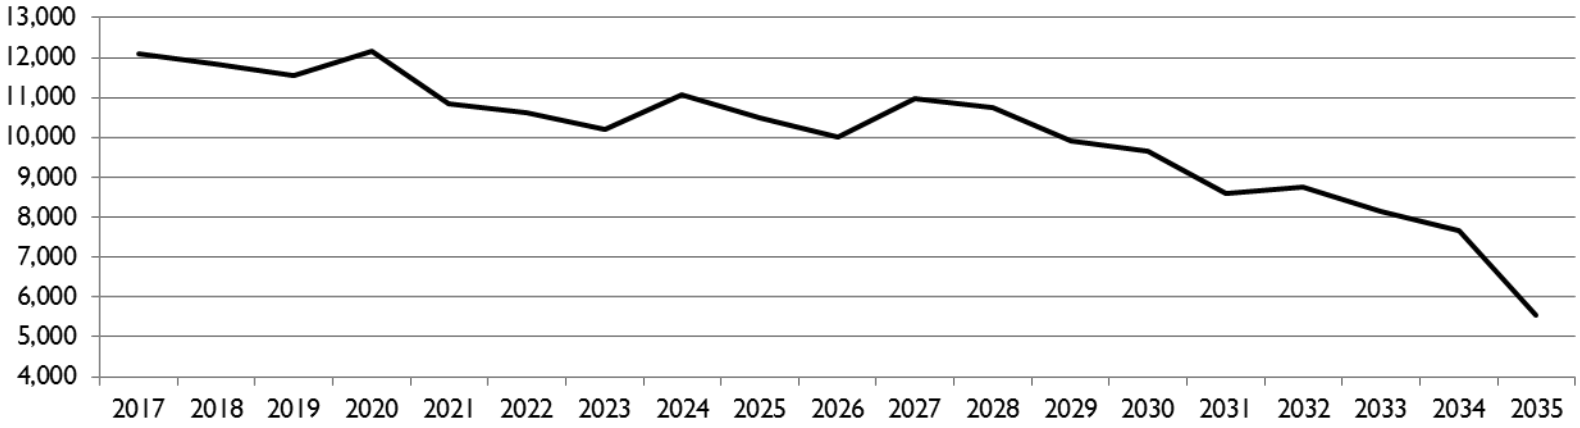
- Other measures that make up the Fair Hydro Plan include
  - Expanding the Industrial Conservation Initiative (ICI) to include electricity consumers, in the manufacturing and certain other sectors including greenhouses, with an average monthly peak demand of greater than 500 kW and less than 1 MW.
  - Expanding the OESP, by providing 50 per cent more support in the form of monthly credits for people with low incomes and increasing eligibility, effective May 1, 2017.
  - Establishing an Affordability Fund that will be accessible to LDCs for customers who do not qualify for low-income conservation programs and who are unable to undertake energy efficiency improvements without financial assistance.
  - Providing on-reserve First Nations households with a 100 per cent credit of the delivery line on their monthly electricity bills.
  - Enhancing the Rural or Remote Rate Protection (RRRP) program to provide distribution charge relief to about 800,000 customers and shift costs from ratepayers to provincial revenues. This would include customers served by local distribution companies (LDCs) with the highest rates.
  - Improving energy sector efficiency and modernize the province's electricity market, building on the collaboration of the Independent Electricity System Operator (IESO) and the Ontario Energy Board (OEB).
- The government-funded measures (OESP, RRRP, on-reserve credits and the Affordability Fund) have been estimated to cost the government about $2.5 billion in the first three years (and would have an on-going annual cost to government).

Refinancing the Global Adjustment

Refinancing the Global Adjustment

- Refinancing the Global Adjustment (GA) provides significant and immediate rate relief by spreading the cost of electricity investments over a longer period of time.
- Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction (i.e., the financed portion) in the GA would be about $2.5 billion per year on average over the first ten years.
- This measure would share the associated costs more fairly. The illustrative chart below shows how Global Adjustment (GA) cost is front-end loaded and forecast to decline over time.
- Energy and IESO forecasts are subject to update, including as part of the Ministry of Energy's current Long-term Energy Plan update process.

Forecast Global Adjustment Cost (nominal $ million)



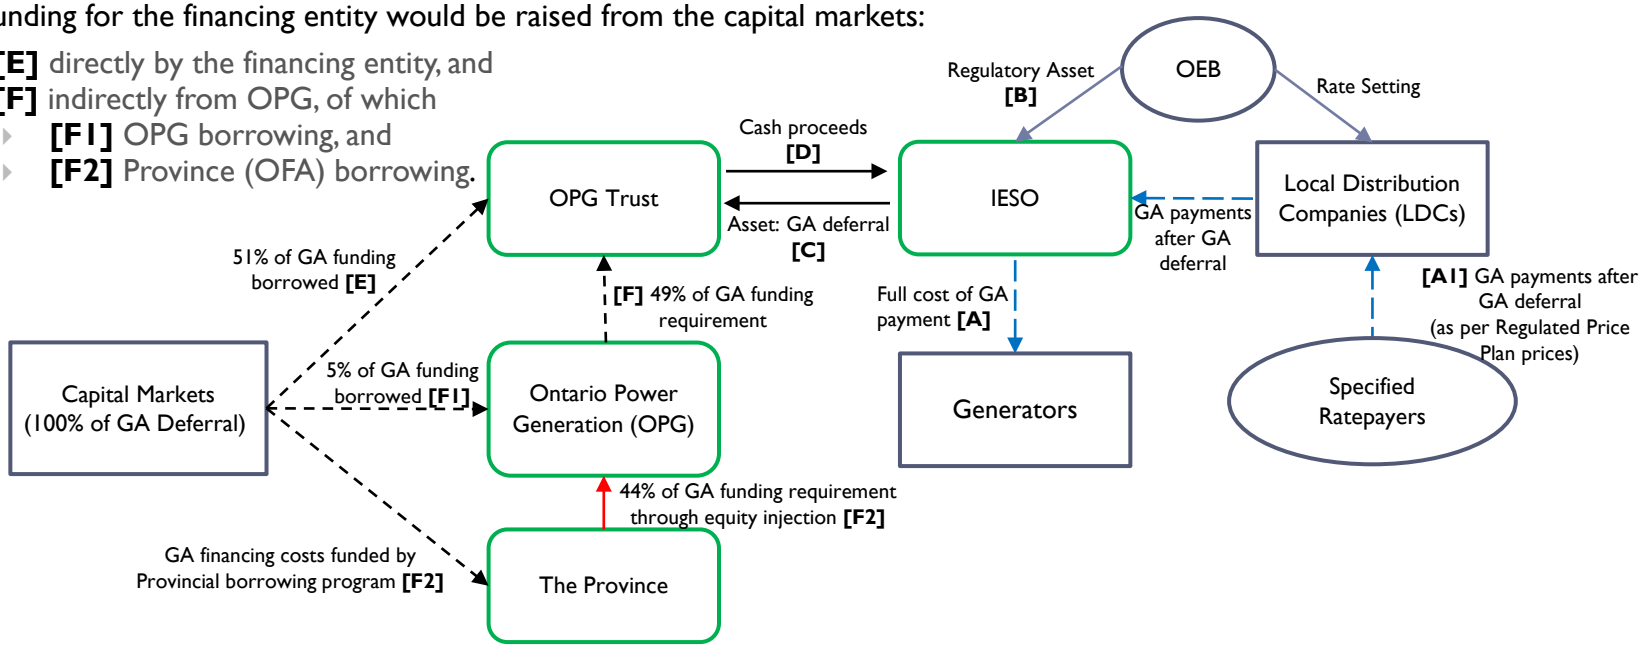
Source: IESO

Global Adjustment Financing: Policy Rationale

- The purpose of the Global Adjustment refinancing is to
  - Ensure that clean energy costs and clean energy benefits are fairly allocated among present and future specified consumers
  - Recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province, and
  - Align clean energy costs with clean energy benefits, in order to provide fairness for specified consumers over time.
- The majority of the province's electricity generators are under 20-year contracts. Many of these generators will be able to operate past their contract term.
- By recognizing that generation assets are expected to continue to provide benefit to future ratepayers, beyond the term of current contracts, future ratepayers are expected to be able to utilize these assets and reduce the need to finance the development of new generation assets.
- In the early years, a portion of the costs covered by the GA would be financed to reduce pressure on electricity ratepayers.
- In the later years, when some system costs are expected to be reduced due to continued operation of existing assets under 20-year contracts, the cost of financing would be recovered from ratepayers through a "Clean Energy Adjustment".

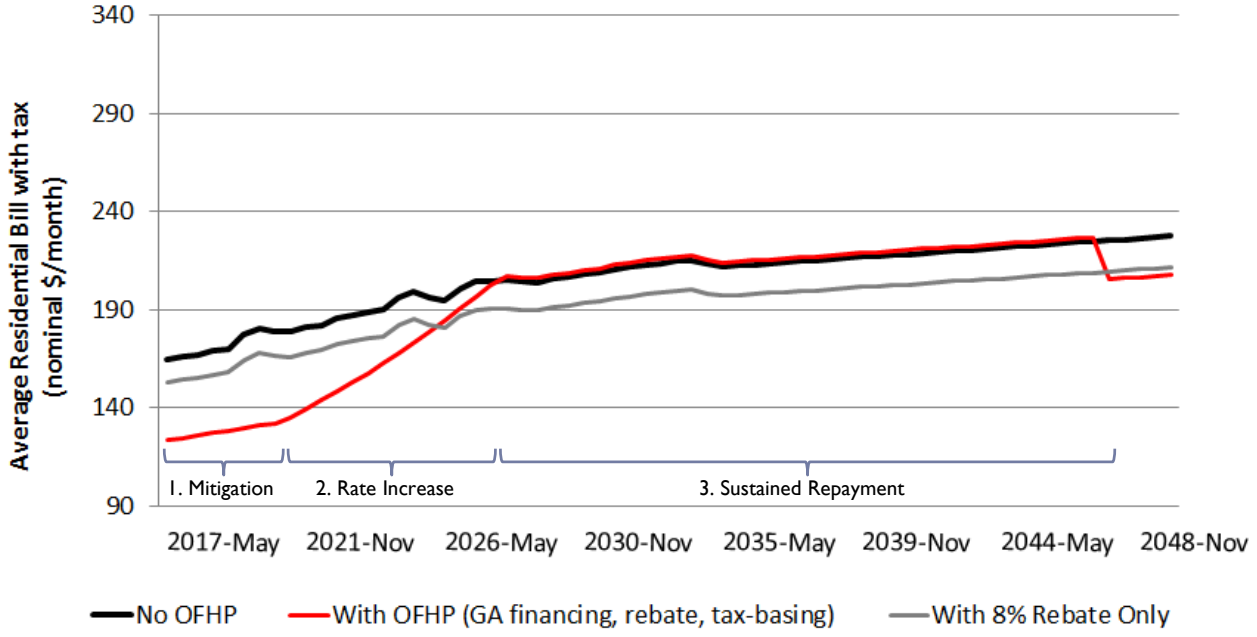
GA Financial Structure

- Through the OFHP, GA costs, including refinancing costs, will be recovered from ratepayers over a longer period of time.
  - The GA refinancing framework will be implemented through the IESO and Ontario Power Generation (OPG).
  - Under the OFHP, OPG would be able to establish a special purpose vehicle (OPG Trust) financing entity.
- **[A]** Under the OFHP, the IESO will continue to pay generators their contracted and regulated prices. **[A1]** However, LDC payments will be less, as Regulated Price Plan prices are set based on a portion of the GA deferred in order to support the initial 25% reduction (and subsequent adjustments).
- **[B]** The IESO will set up a deferral account, vis a vis a 'regulatory asset', with a right to recover the deferred costs and financing costs, as authorised by the OEB.
- **[C]** Under the Act, the Independent Electricity System Operator (IESO) would be able to sell the 'right to collect' deferred future revenue from ratepayers to the financing entity in return for cash proceeds **[D]**.
- The funding for the financing entity would be raised from the capital markets:
  - **[E]** directly by the financing entity, and
  - **[F]** indirectly from OPG, of which
    - **[F1]** OPG borrowing, and
    - **[F2]** Province (OFA) borrowing.



Global Adjustment Financing

- GA Financing structure and bill impacts can be thought of as having three phases (see illustrative chart below)



Phase 1: Mitigation

- 2017 residential bill 25% on average lower than original projection (pre-8% Ontario Rebate for Electricity Consumers).
- Increase in bill capped to 2% per year until 2021.

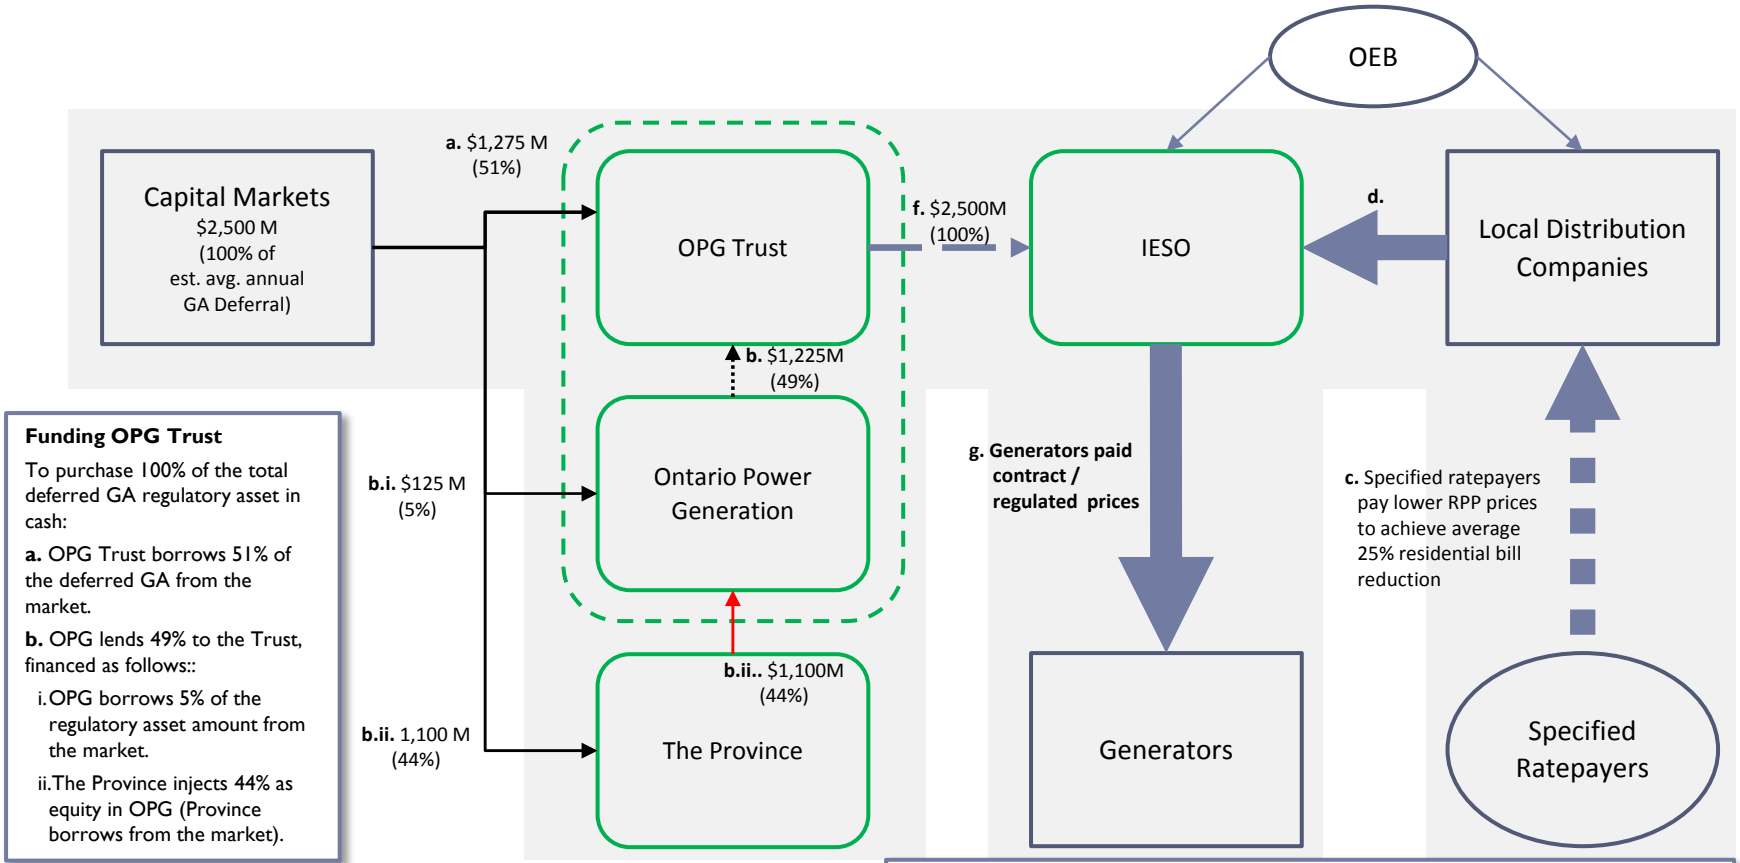
Phase 2: Rate Increase

- Residential bills continue lower than without the OFHP; however, not by 25% on average.
- Bill increases each year, limiting overall deferral and borrowing.
- Planned increases for the above purpose projected to end in 2028 when sustained repayment starts.

Phase 3: Sustained Repayment

- Bill higher than projection, excluding the GA deferral, until 2047 (estimated).
- Difference between with OFHP (red) and 8% rebate (grey) only represents recovery of deferred GA and financing.

GA Financing Structure: Illustrative Fund Flows* - Mitigation Phase



Funding OPG Trust

To purchase 100% of the total deferred GA regulatory asset in cash:

a. OPG Trust borrows 51% of the deferred GA from the market.

b. OPG lends 49% to the Trust, financed as follows::

i. OPG borrows 5% of the regulatory asset amount from the market.

ii. The Province injects 44% as equity in OPG (Province borrows from the market).

Deferral Mechanism

c. Specified ratepayers pay RPP prices, including the non-deferred portion of the GA to LDCs.

d. The LDCs remit this amount to the IESO ...

e. …The IESO recognizes a regulatory asset – the right to collect the deferred amount, and a financing cost, from ratepayers in the future.

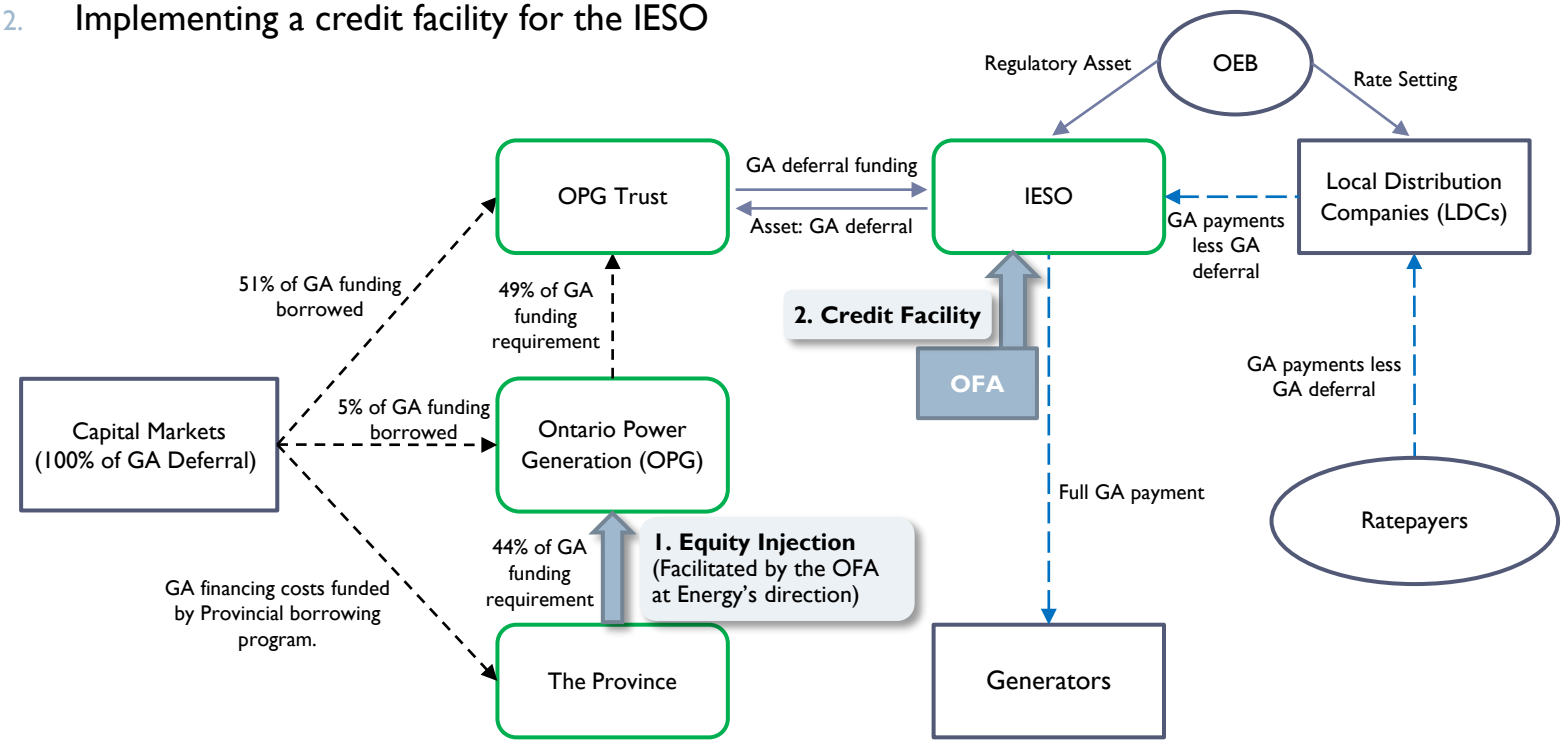
f. IESO sells this asset for cash to OPG Trust.

g. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA cost to Generators (and conservation costs).

* Amounts are illustrative and based on an assumed deferred cost, or regulatory of $2.5 billion.

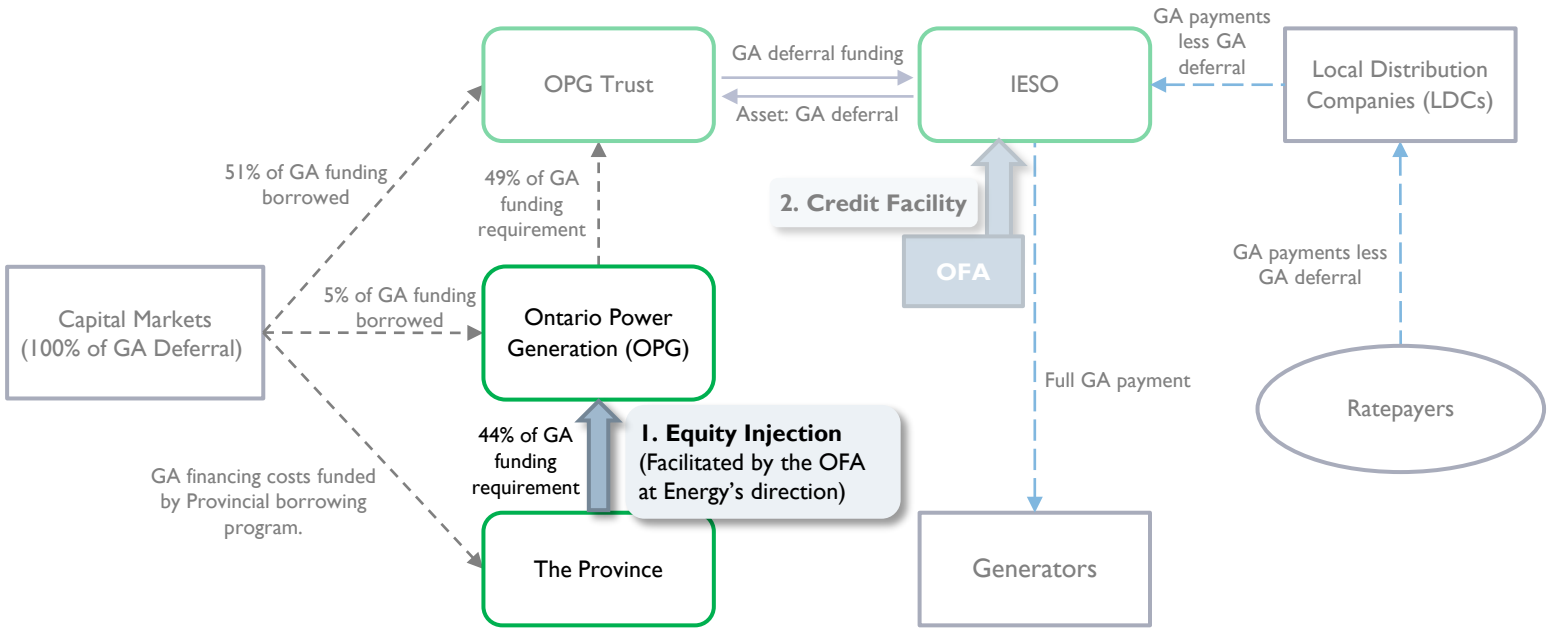
OFA Involvement with FHP Implementation

- Two aspects of the GA Financing:
  1. Facilitating the mechanism for equity injections into Ontario Power Generation. Ministry of Energy as shareholder has received an appropriation through the Treasury Board process for an operating asset expenditure to acquire the equity.
     - OFA would also be managing the Provincial borrowing program, including to support the equity injection.
  2. Implementing a credit facility for the IESO



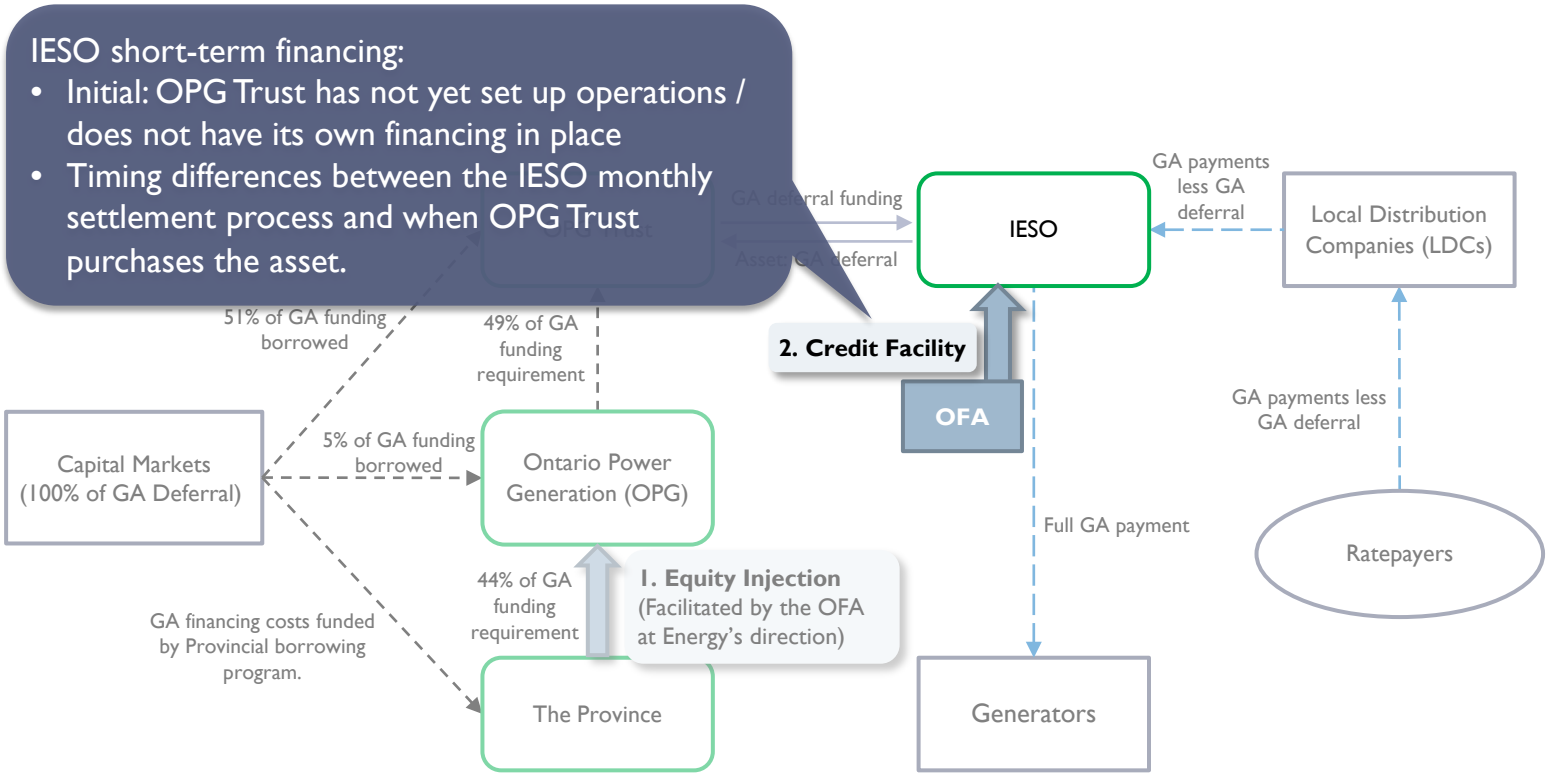
1. Equity Injection

- The 2017 Budget includes in the Ministry of Energy Estimates an investment operating asset of $1.1 bn related to the Province's equity injection to OPG. OPG would provide financing to the Trust through sub-ordinated debt, as part of the OPG Trust financing to regularly purchase IESO's regulatory asset through 2017-18.
- The structure would
  - increase gross debt of the Province (to finance the equity injection in OPG),
  - increase net investment in OPG (so no net debt impact),
  - increase interest on debt related to that external debt, which
  - on consolidation into Public Accounts, would be offset by increased earnings of OPG from sub-debt interest revenue.



2. OFA/IESO Credit Facility

- The Fair Hydro Act, 2017 provides for the IESO to sell the right to recover those deferred amounts of the global adjustment from specified consumers in the future (the "regulatory asset").
- It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG Trust"). The cash received would be used by the IESO to fund the current Global Adjustment deferral shortfall.



Risks / Cost Sensitivities

Global Adjustment Refinancing Model Assumptions

- Projected Global Adjustment Refinancing costs are affected by actual system costs and consumption, and actual interest rates.
- Variances from these key assumptions could affect actual refinancing costs, etc.

- Interest rates
  - Higher/lower Interest rates would lead to higher/lower refinancing costs
  - For example, a 1.5 percentage point lower interest rate assumption, compared to an illustrative 5% case used by the Ministry of Energy, would halve estimated cumulative interest costs, from about $21 bn to $11 bn.

- Electricity demand
  - Lower/higher electricity demand due to fewer consumers or lower/higher consumption among some consumers would increase/decrease Clean Energy Adjustment costs for remaining consumers.

- System Costs
  - Ministry of Energy is developing the updated Long-term Energy Plan (LTEP), expected to be released in about summer 2017. The LTEP is expected to include measures to continue to reduce system costs.
  - Actual system costs are expected to also be affected by other factors, such as the Ontario Energy Board rate application process.

Hi,

Please send the deck without notes, and perhaps best as a pdf. Could remove "draft" too in the upper corner.

I did look at the notes in an earlier draft you sent, and made a few edits (unmarked).

Thanks,
Ron

Ron

We have notes on some slides – I think they are OK, but I did not vet as closely as slides. We'll send the deck without notes, but maintain those for your use. Are you OK with that approach?

DRAFT

Ontario's Fair Hydro Plan
OFA Audit & Risk Management Committee Briefing

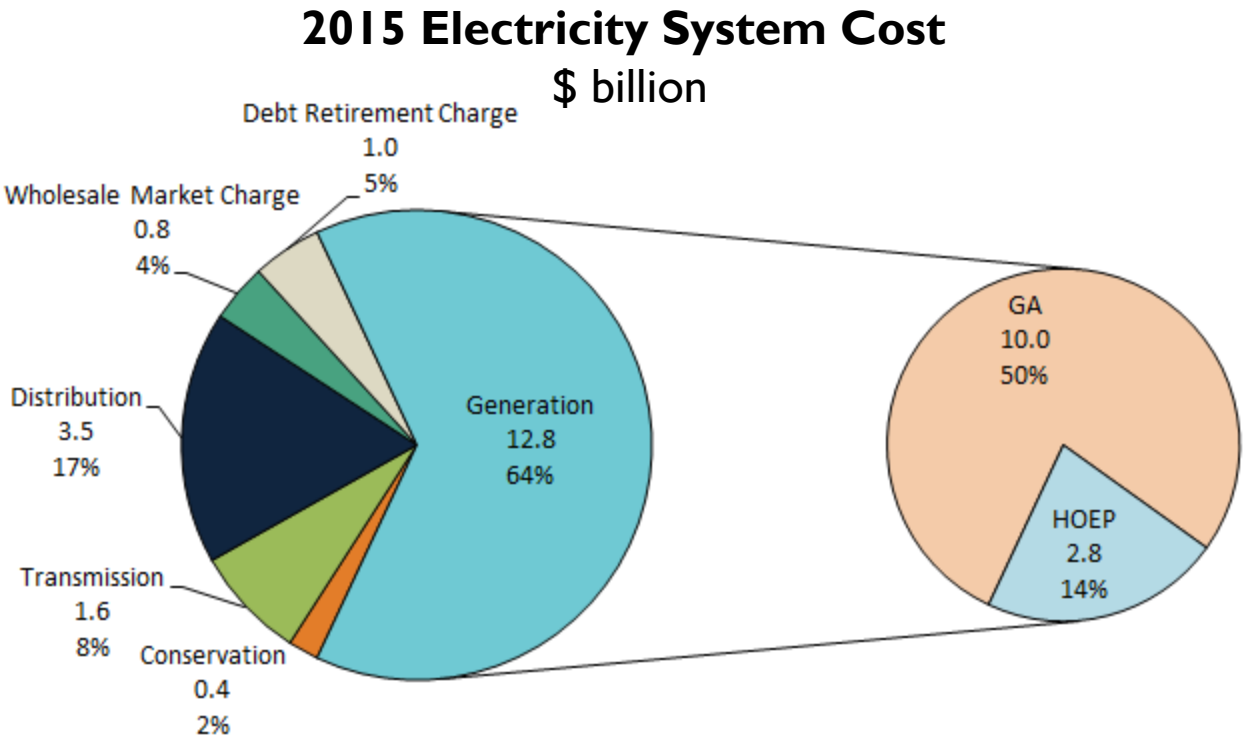
Corporate and Electricity Finance Division
June 16, 2017

Contents

- Context: Ontario's Electricity Market
- Overview: Ontario's Fair Hydro Plan
- Global Adjustment Refinancing
- OFA Involvement
  - Equity Injection
  - IESO increased credit facility
- Global Adjustment Refinancing Risks / Sensitivities
  - Financial modelling assumptions

Context: Ontario's Electricity Market

- In 2015, generation accounted for 64% of total electricity system costs. Total system costs in 2015 were $20 billion.



DEFINITIONS:

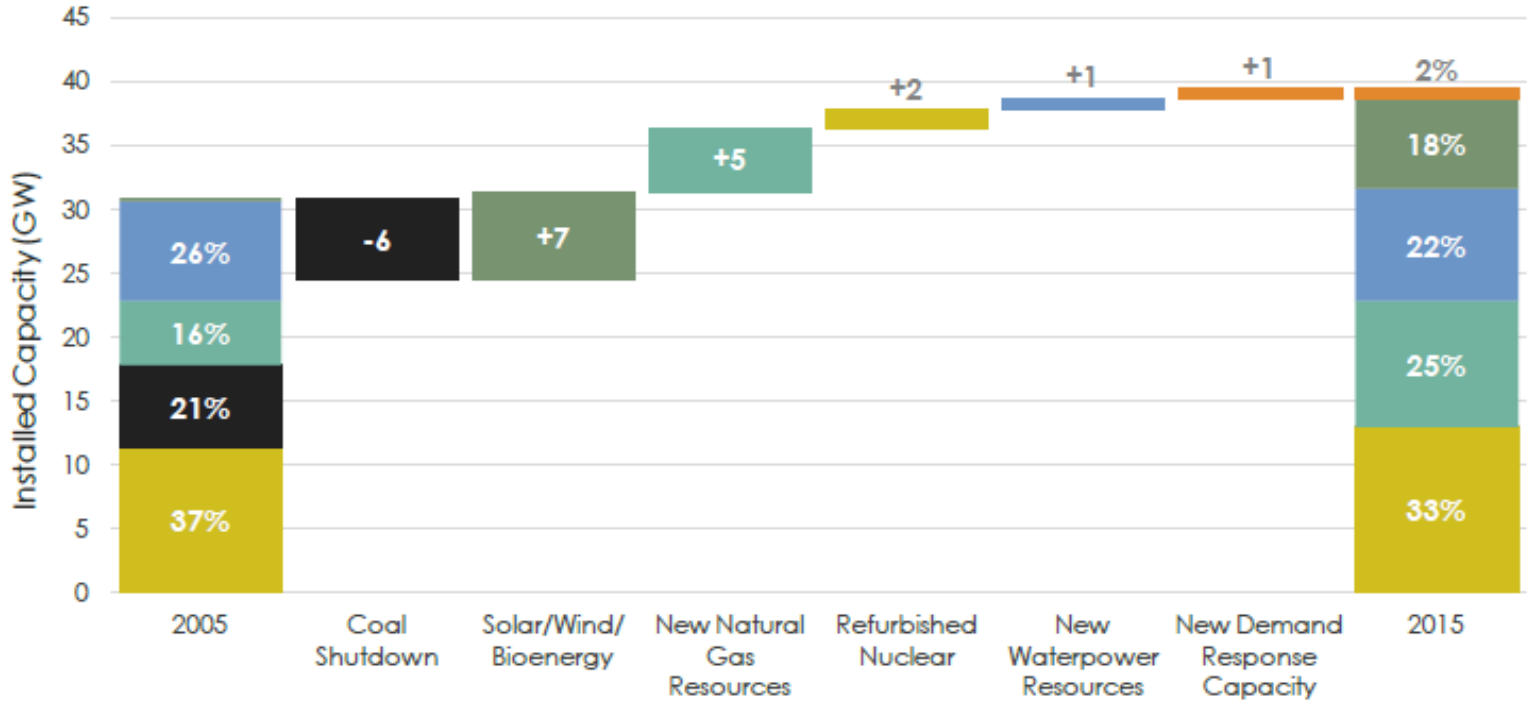
GA: The "Global Adjustment" accounts for differences between the market price of electricity and the rates paid to regulated and contracted generators and for conservations programs. The GA is collected from all electricity rates payers in Ontario

HOEP: Hourly Ontario Electricity Price.

Source: IESO

Context: Significant Change in Supply Mix

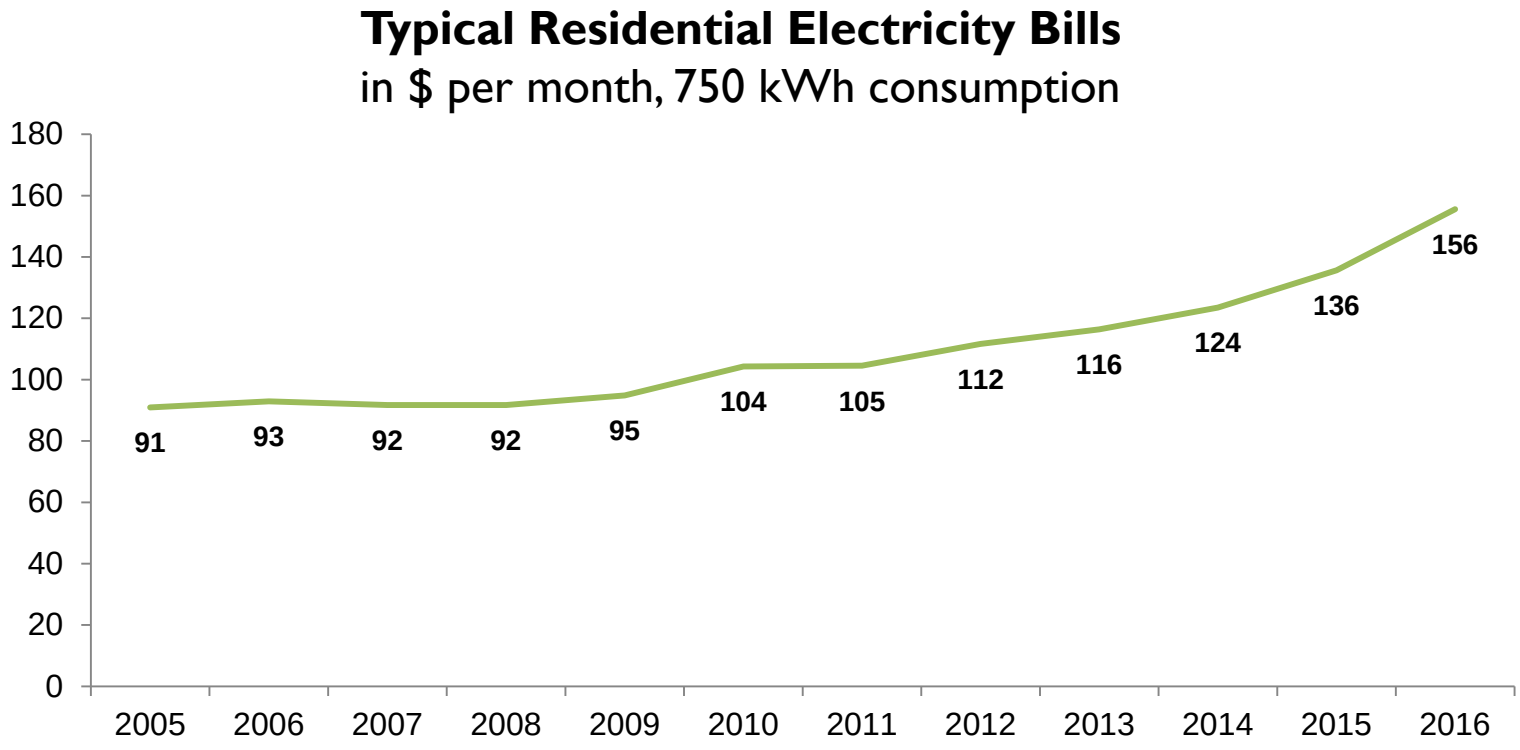
- Between 2005 and 2015, government invested more than $50 billion in the electricity system, including $35 billion in electricity generation to restore reliability, replace coal and meet environmental objectives.
  - Electricity costs are increasing as necessary investments are made to decarbonize and modernize the province's electricity infrastructure.



Source: IESO

Context: Electricity Prices Have Increased

- Since 2010, electricity prices have increased at a rate higher than the Consumer Price Index (CPI).



Source: Ministry of Energy

Overview:
Ontario's Fair Hydro Plan

DRAFT

Overview:
The Ontario Fair Hydro Plan ("OFHP")

- On May 31, 2017, the government passed the Ontario Fair Hydro Act, 2017, to enable the implementation of the OFHP, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).

- The measures that make up the 25 per cent average reduction include
  - Refinancing a portion of the Global Adjustment (GA) to allocate fairly the costs of Ontario's contracts for electricity infrastructure investments over the expected lifecycle of the generation infrastructure assets.
    - The Global Adjustment recovers a portion of the commodity supply and conservation costs of electricity.
  - The Ontario Rebate for Electricity Consumers, for an amount equal to the provincial portion of the HST, which took effect on January 1, 2017.
  - Shifting funding of the Ontario Electricity Support Program (OESP) and Rural or Remote Rate Protection (RRRP) program from electricity ratepayers to the province.

- People with low incomes, those served by local distribution companies (LDCs) with the highest distribution costs, OESP recipients and On-Reserve First Nation households would benefit from even greater reductions to their electricity bills.

DRAFT

Overview: The Ontario Fair Hydro Plan (cont'd)

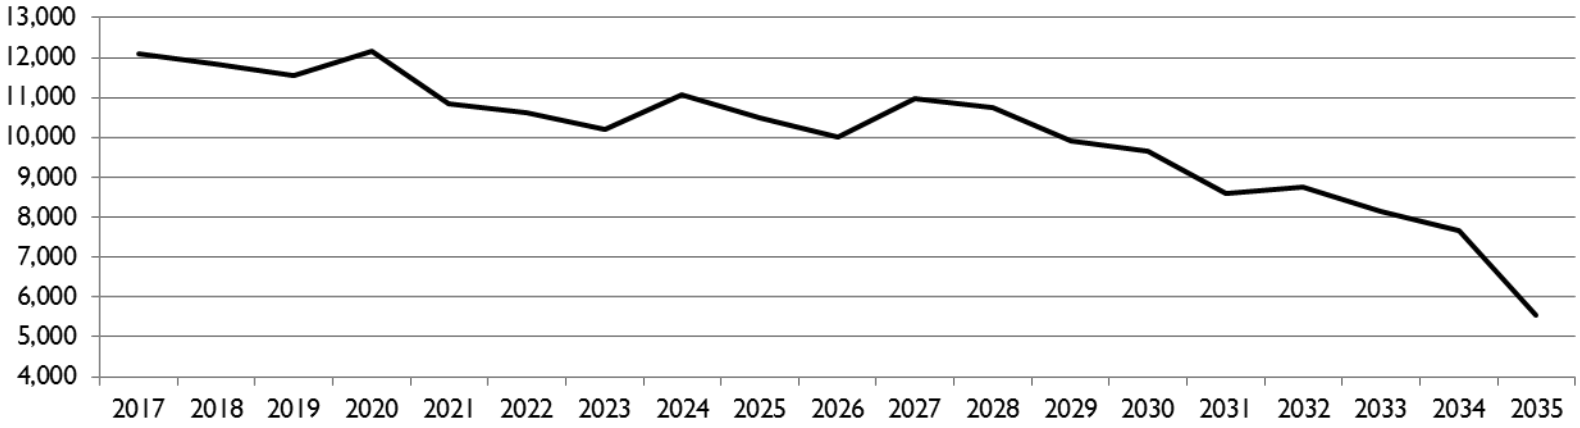
- Other measures that make up the Fair Hydro Plan include
  - Expanding the Industrial Conservation Initiative (ICI) to include electricity consumers, in the manufacturing and certain other sectors including greenhouses, with an average monthly peak demand of greater than 500 kW and less than 1 MW.
  - Expanding the OESP, by providing 50 per cent more support in the form of monthly credits for people with low incomes and increasing eligibility, effective May 1, 2017.
  - Establishing an Affordability Fund that will be accessible to LDCs for customers who do not qualify for low-income conservation programs and who are unable to undertake energy efficiency improvements without financial assistance.
  - Providing on-reserve First Nations households with a 100 per cent credit of the delivery line on their monthly electricity bills.
  - Enhancing the Rural or Remote Rate Protection (RRRP) program to provide distribution charge relief to about 800,000 customers and shift costs from ratepayers to provincial revenues. This would include customers served by local distribution companies (LDCs) with the highest rates.
  - Improving energy sector efficiency and modernize the province's electricity market, building on the collaboration of the Independent Electricity System Operator (IESO) and the Ontario Energy Board (OEB).
- The government-funded measures (OESP, RRRP, on-reserve credits and the Affordability Fund) have been estimated to cost the government about $2.5 billion in the first three years (and would have an on-going annual cost to government).

Refinancing the Global Adjustment

Refinancing the Global Adjustment

- Refinancing the Global Adjustment (GA) provides significant and immediate rate relief by spreading the cost of electricity investments over a longer period of time.
- Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction (i.e., the financed portion) in the GA would be about $2.5 billion per year on average over the first ten years.
- This measure would share the associated costs more fairly. The illustrative chart below shows how Global Adjustment (GA) cost is front-end loaded and forecast to decline over time.
- Energy and IESO forecasts are subject to update, including as part of the Ministry of Energy's current Long-term Energy Plan update process.

Forecast Global Adjustment Cost (nominal $ million)



Source: IESO

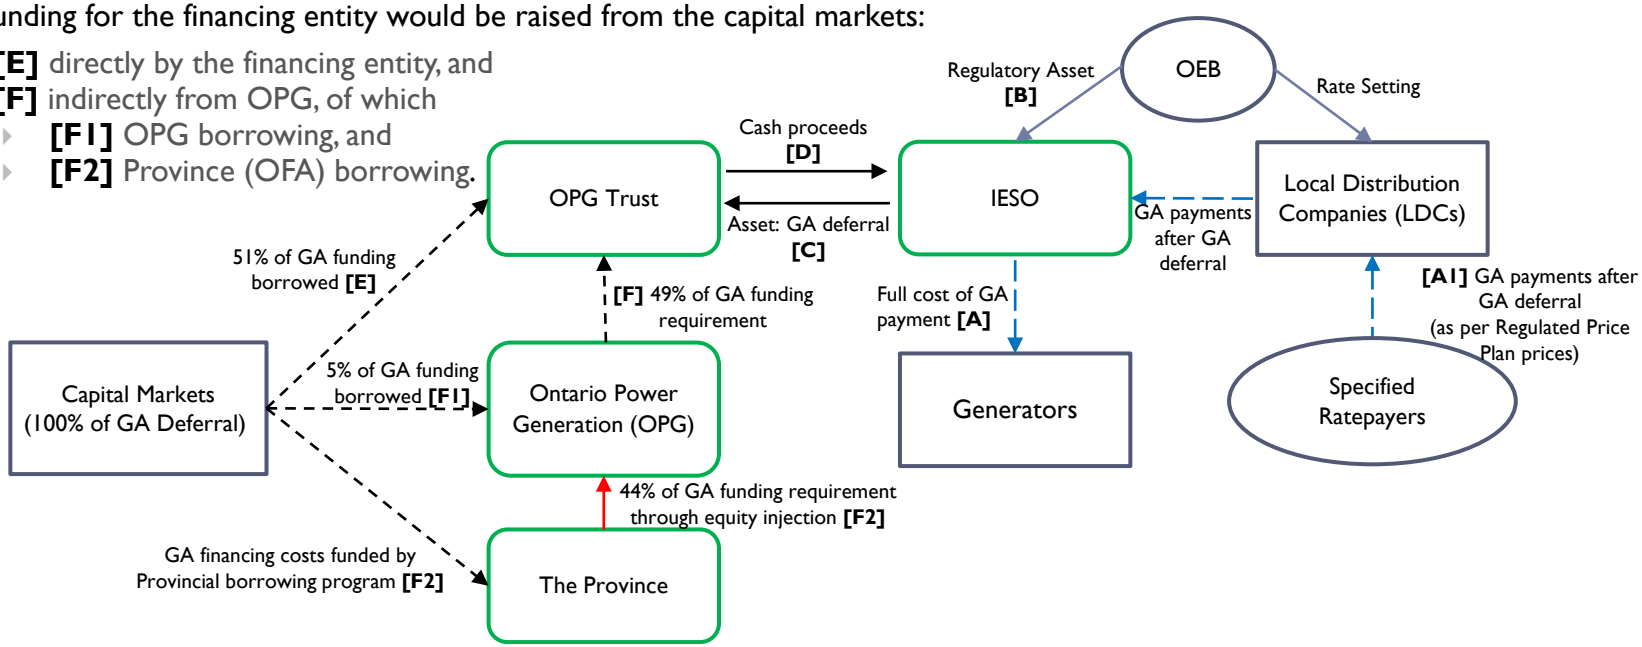
DRAFT

Global Adjustment Financing: Policy Rationale

- The purpose of the Global Adjustment refinancing is to
  - Ensure that clean energy costs and clean energy benefits are fairly allocated among present and future specified consumers
  - Recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province, and
  - Align clean energy costs with clean energy benefits, in order to provide fairness for specified consumers over time.
- The majority of the province's electricity generators are under 20-year contracts. Many of these generators will be able to operate past their contract term.
- By recognizing that generation assets are expected to continue to provide benefit to future ratepayers, beyond the term of current contracts, future ratepayers are expected to be able to utilize these assets and reduce the need to finance the development of new generation assets.
- In the early years, a portion of the costs covered by the GA would be financed to reduce pressure on electricity ratepayers.
- In the later years, when some system costs are expected to be reduced due to continued operation of existing assets under 20-year contracts, the cost of financing would be recovered from ratepayers through a "Clean Energy Adjustment".

GA Financial Structure

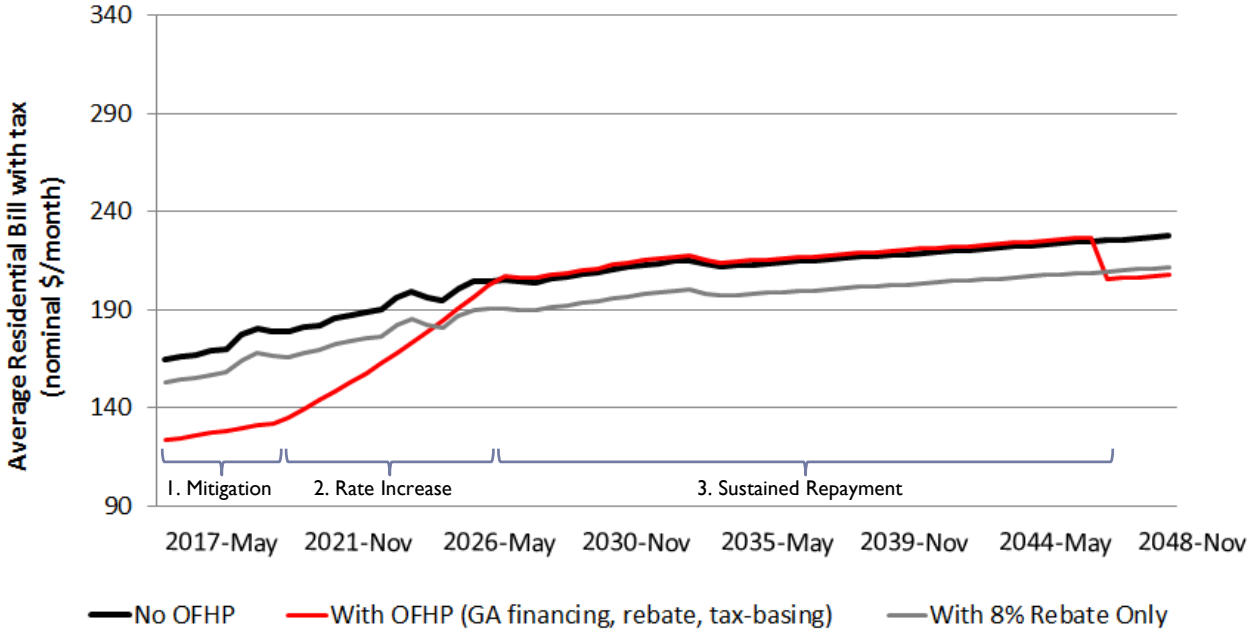
- Through the OFHP, GA costs, including refinancing costs, will be recovered from ratepayers over a longer period of time.
  - The GA refinancing framework will be implemented through the IESO and Ontario Power Generation (OPG).
  - Under the OFHP, OPG would be able to establish a special purpose vehicle (OPG Trust) financing entity.
- **[A]** Under the OFHP, the IESO will continue to pay generators their contracted and regulated prices. **[A1]** However, LDC payments will be less, as Regulated Price Plan prices are set based on a portion of the GA deferred in order to support the initial 25% reduction (and subsequent adjustments).
- **[B]** The IESO will set up a deferral account, vis a vis a 'regulatory asset', with a right to recover the deferred costs and financing costs, as authorised by the OEB.
- **[C]** Under the Act, the Independent Electricity System Operator (IESO) would be able to sell the 'right to collect' deferred future revenue from ratepayers to the financing entity in return for cash proceeds **[D]**.
- The funding for the financing entity would be raised from the capital markets:
  - **[E]** directly by the financing entity, and
  - **[F]** indirectly from OPG, of which
    - **[F1]** OPG borrowing, and
    - **[F2]** Province (OFA) borrowing.



DRAFT

Global Adjustment Financing

- GA Financing structure and bill impacts can be thought of as having three phases (see illustrative chart below)



Phase 1: Mitigation

- 2017 residential bill 25% on average lower than original projection (pre-8% Ontario Rebate for Electricity Consumers).
- Increase in bill capped to 2% per year until 2021.

Phase 2: Rate Increase

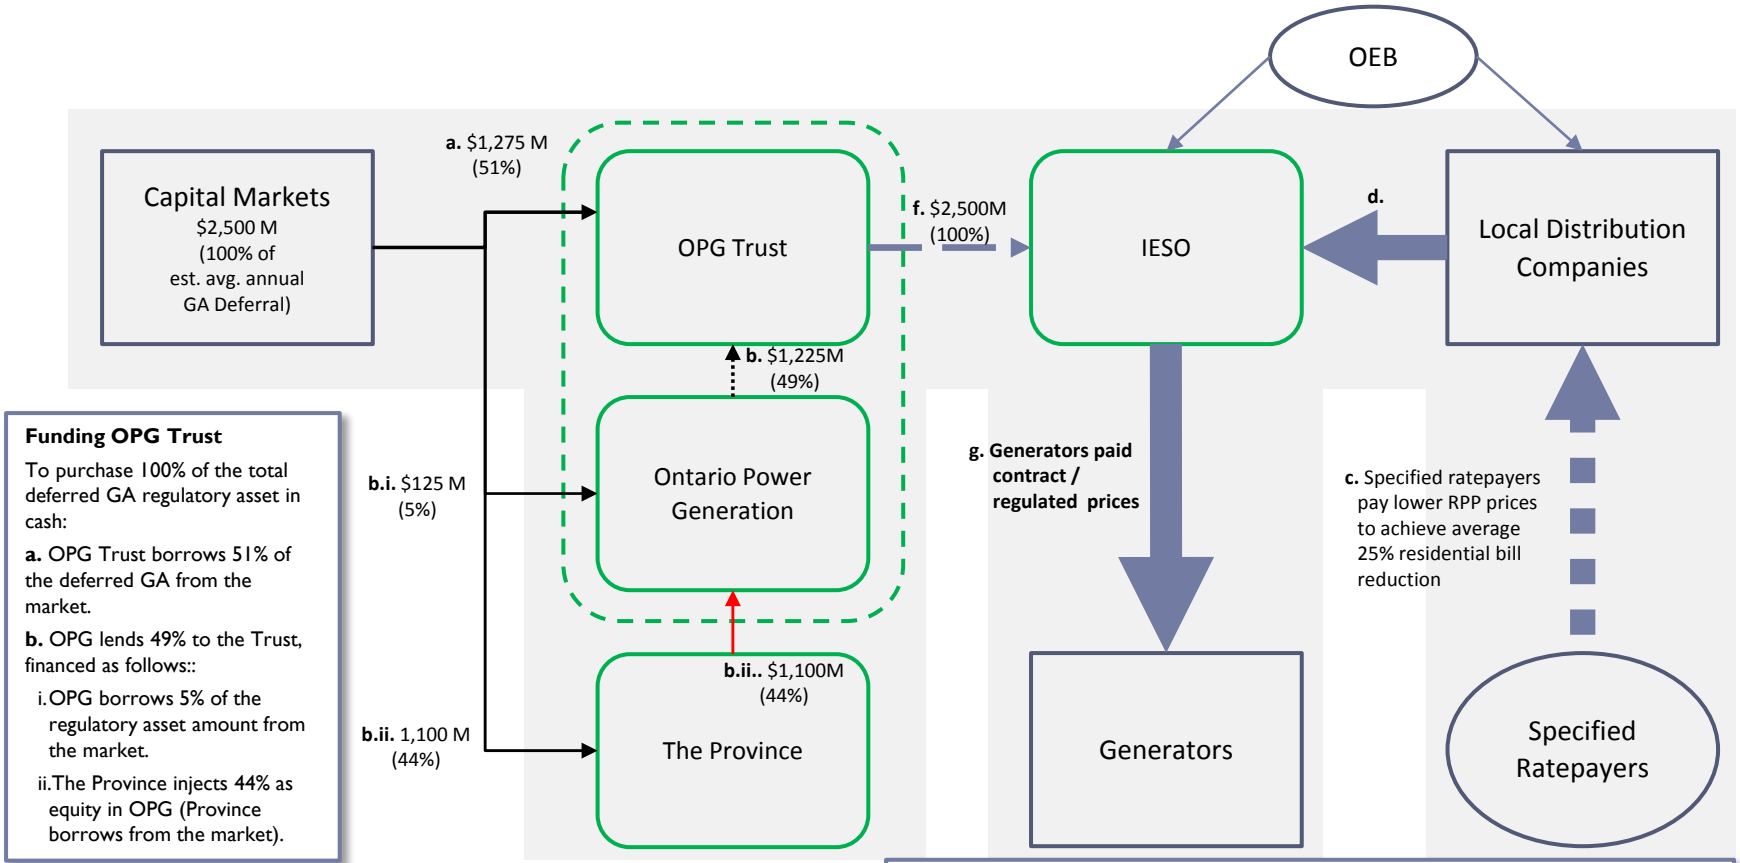
- Residential bills continue lower than without the OFHP; however, not by 25% on average.
- Bill increases each year, limiting overall deferral and borrowing.
- Planned increases for the above purpose projected to end in 2028 when sustained repayment starts.

Phase 3: Sustained Repayment

- Bill higher than projection, excluding the GA deferral, until 2047 (estimated).
- Difference between with OFHP (red) and 8% rebate (grey) only represents repayment of deferred GA and financing.

DRAFT

GA Financing Structure: Illustrative Fund Flows* - Mitigation Phase



Funding OPG Trust

To purchase 100% of the total deferred GA regulatory asset in cash:

a. OPG Trust borrows 51% of the deferred GA from the market.

b. OPG lends 49% to the Trust, financed as follows::

i. OPG borrows 5% of the regulatory asset amount from the market.

ii. The Province injects 44% as equity in OPG (Province borrows from the market).

Deferral Mechanism

c. Specified ratepayers pay RPP prices, including the non-deferred portion of the GA to LDCs.

d. The LDCs remit this amount to the IESO ...

e. …The IESO recognizes a regulatory asset – the right to collect the deferred amount, and a financing cost, from ratepayers in the future.

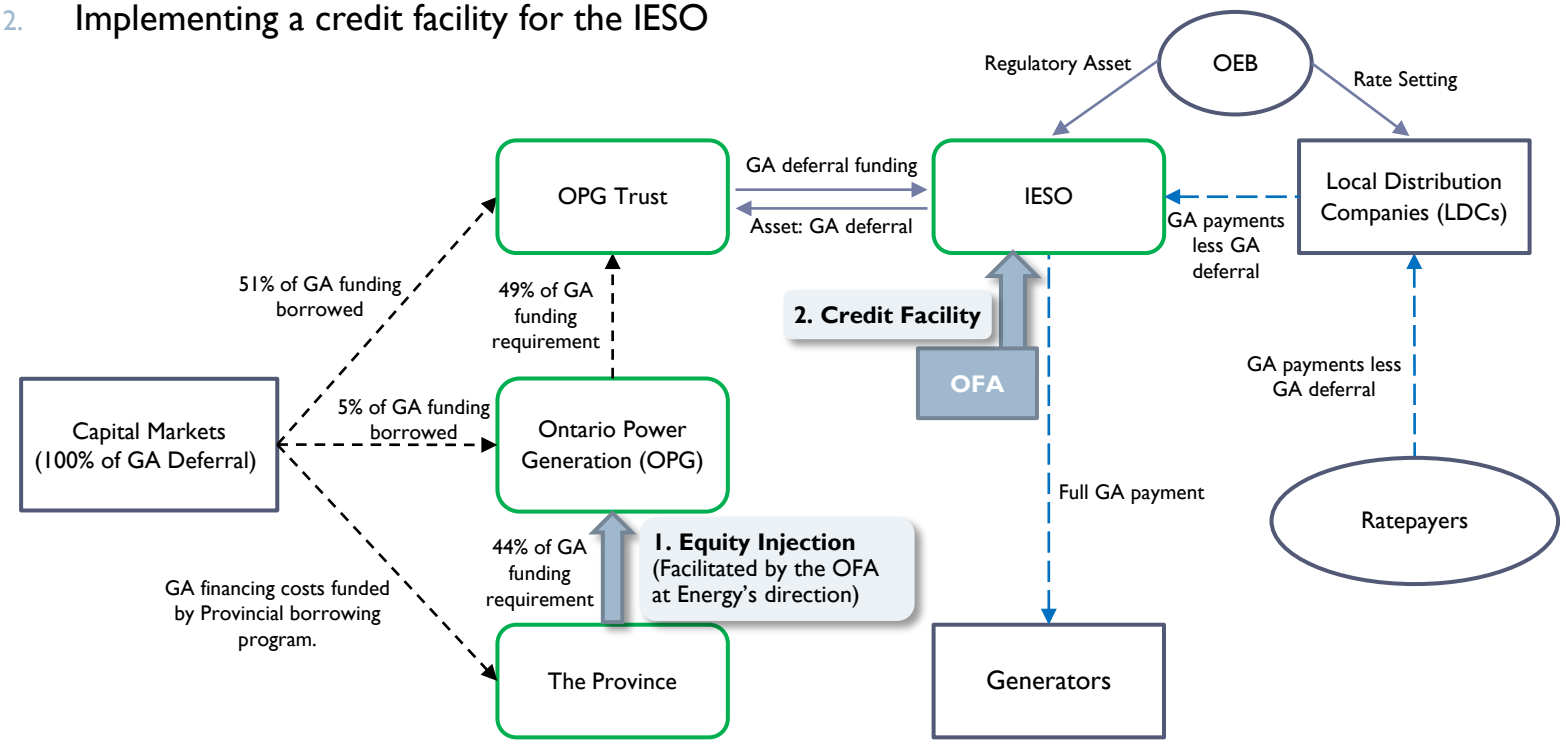
f. IESO sells this asset for cash to OPG Trust.

g. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA cost to Generators (and conservation costs).

* Amounts are illustrative and based on an assumed deferred cost, or regulatory of $2.5 billion.

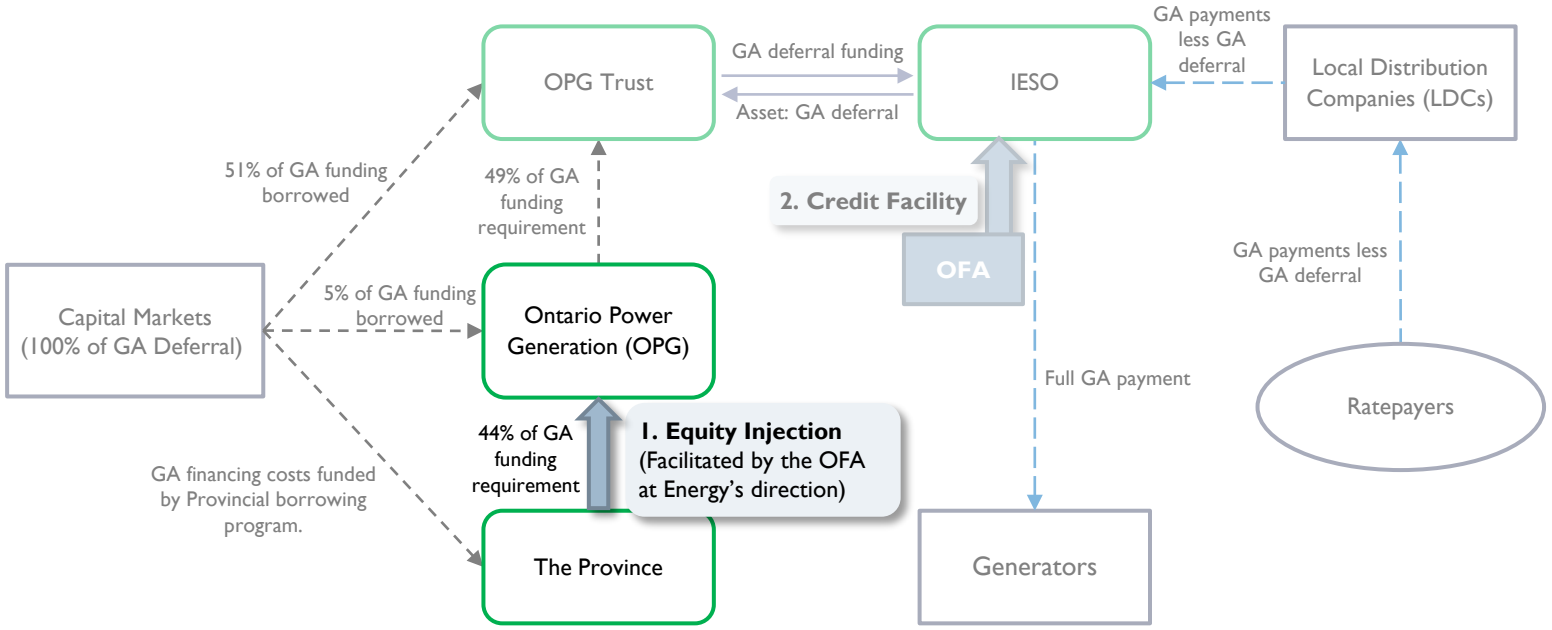
OFA Involvement with FHP Implementation

- Two aspects of the GA Financing:
  1. Facilitating the mechanism for equity injections into Ontario Power Generation. Ministry of Energy as shareholder has received an appropriation through the Treasury Board process for an operating asset expenditure to acquire the equity.
     - OFA would also be managing the Provincial borrowing program, including to support the equity injection.
  2. Implementing a credit facility for the IESO



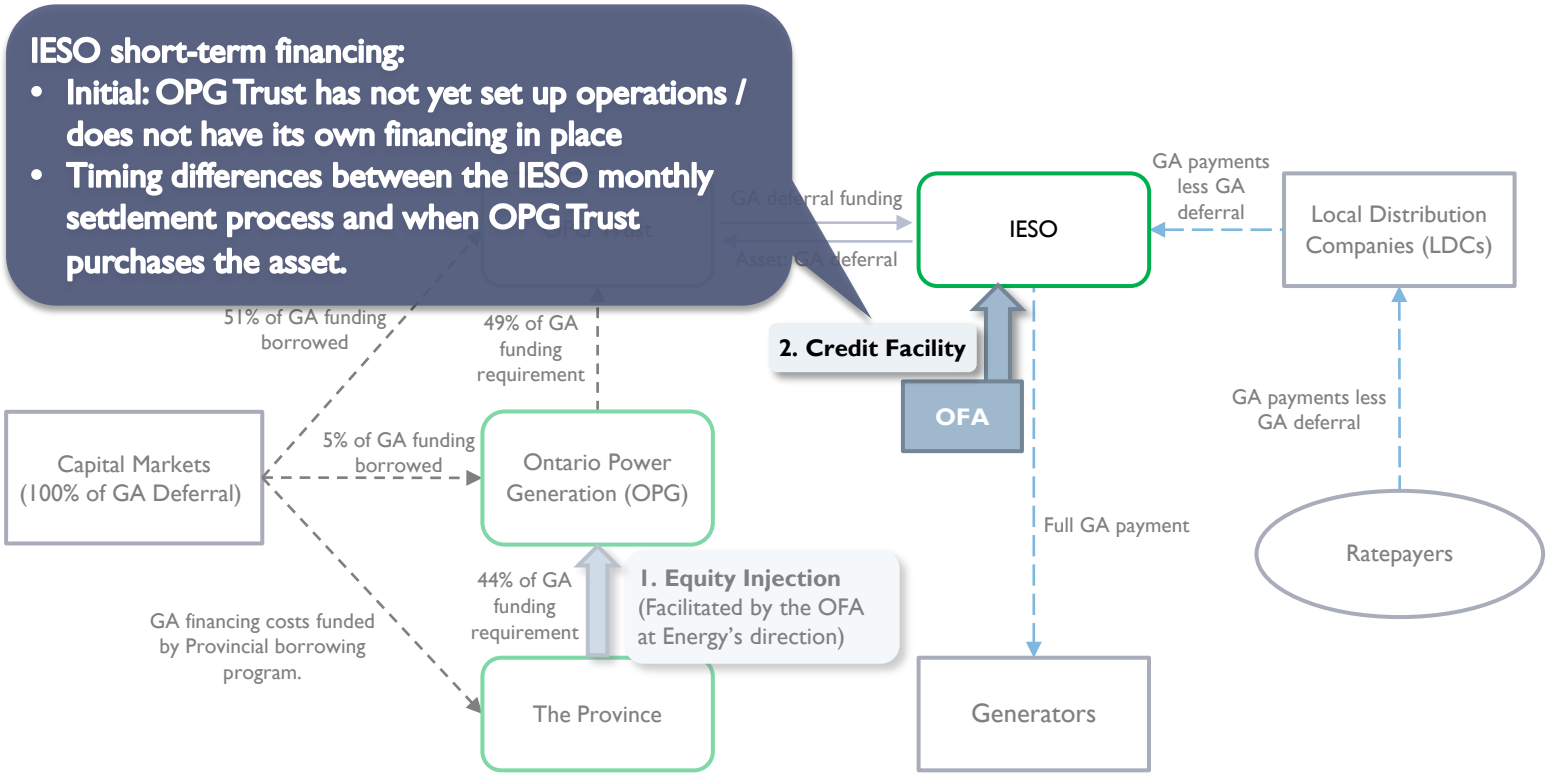
1. Equity Injection

- The 2017 Budget includes in the Ministry of Energy Estimates an investment operating asset of $1.1 bn related to the Province's equity injection to OPG. OPG would provide financing to the Trust through sub-ordinated debt, as part of the OPG Trust financing to regularly purchase IESO's regulatory asset through 2017-18.
- The structure would
  - increase gross debt of the Province (to finance the equity injection in OPG),
  - increase net investment in OPG (so no net debt impact),
  - increase interest on debt related to that external debt, which
  - on consolidation into Public Accounts, would be offset by increased earnings of OPG from sub-debt interest revenue.



2. OFA/IESO Credit Facility

- The Fair Hydro Act, 2017 provides for the IESO to sell the right to recover those deferred amounts of the global adjustment from specified consumers in the future (the "regulatory asset").
- It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG Trust"). The cash received would be used by the IESO to fund the current Global Adjustment deferral shortfall.



Risks / Cost Sensitivities

Global Adjustment Refinancing Model Assumptions

- Projected Global Adjustment Refinancing costs are affected by actual system costs and consumption, and actual interest rates.
- Variances from these key assumptions could affect actual refinancing costs, etc.

- Interest rates
  - Higher/lower Interest rates would lead to higher/lower refinancing costs
  - For example, a 1.5 percentage point lower interest rate assumption, compared to an illustrative 5% case used by the Ministry of Energy, would halve estimated cumulative interest costs, from about $21 bn to $11 bn.

- Electricity demand
  - Lower/higher electricity demand due to fewer consumers or lower/higher consumption among some consumers would increase/decrease Clean Energy Adjustment costs for remaining consumers.

- System Costs
  - Ministry of Energy is developing the updated Long-term Energy Plan (LTEP), expected to be released in about summer 2017. The LTEP is expected to include measures to continue to reduce system costs.
  - Actual system costs are expected to also be affected by other factors, such as the Ontario Energy Board rate application process.

Appendix

DRAFT

GA Financing: Illustrative Net Debt Impacts

Province of Ontario - Consolidated Statement of Financial Position

As at March 31, 2016 ($ Millions)		**GA Financing Impacts Est. Average Annual**
Liabilities		
Accounts Payable and Accrued Liabilities (Schedule 5)	19,361	
Debt (Note 2)	327,413	**1,100**
Other Long-Term Financing (Note 4)	14,145	
Deferred Revenue and Capital Contributions (Note 5)	10,779	
Pensions and Other Employee Future Benefits (Note 6)	12,107	
Other Liabilities (Note 7)	4,905	
	388,710	
Financial Assets		
Cash and Cash Equivalents	13,600	
Investments (Note 8)	21,765	
Accounts Receivable (Schedule 6)	11,059	
Loans Receivable (Schedule 7)	11,545	
Other Assets	1,936	
Investment in Government Business Enterprises (Schedule 9)	23,572	**1,100**
	83,477	
Net Debt	(305,233)	**0**
Non-Financial Assets		
Tangible Capital Assets (Note 9)	102,536	
Accumulated Deficit	(202,697)	

- Increased borrowing required to fund equity injections.
- Provincial debt will increase.

- Equity injections increase investment in OPG

- Offsetting impacts lead to zero net debt impact

Thanks Ron, looks pretty good. I have some minor suggested changes as follows:

Page 15: "The OFA's borrowing is also affected by the shift from funding the social programs from the rate base to being government-funded". These expenses are already part of the fiscal plan and since the Government is projecting a balanced budget, the shift of these expenses from the ratepayer to the taxpayer does not impact our borrowing program. Suggest that this be deleted.

Page 16 last bullet: "offset by increased earnings of OPG from sub-debt interest revenue" I would revise as follows: "Upon consolidation, offset by increased earnings of OPG from sub-debt interest revenue"

That's it.

Thanks

Subject: OFHP Deck

Hi Ken,

As you know, it was suggested that there be a presentation on the FHP for the OFA Board/ARMC.

Attached is a work-in-progress deck that staff are working on. It does not get into great detail, outlining the elements of the FHP, with a bit more on the GA financing structure and the OFA touchpoints on borrowing for the equity injection and notes the credit facility for IESO. Risks are also high-level, and it does not get into accounting risk, leaving that discussion as one between the AG and Province, as was positioned at the OEFC AC. I might think there may be verbal discussions.

Comments welcome.

DRAFT: Confidential and Commercially Sensitive Advice to the Minister

MINISTER OF ENERGY REQUEST FOR SECTION 28 APPROVAL FOR INDEMNITY AGREEMENTS IN FAVOUR OF OPG AND IESO FOR THEIR PARTICIPATION UNDER THE ONTARIO FAIR HYDRO PLAN ACT

ISSUE

The Minister of Energy is requesting approval from the Minister of Finance, pursuant to Section 28 of the *Financial Administration Act (*"FAA"*)* to enter into Indemnity Agreements ("Agreements"), on behalf of the Crown, in favour of Ontario Power Generation ("OPG"), and its subsidiaries and the Independent Electricity System Operator ("IESO") with respect to their respective roles in carrying out the ~~participation~~implementation of the Ontario Fair Hydro Plan ("O~~N~~FHP") under the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act"). The indemnities would extend to the directors, officers and employees of these entities as well as the agents of the IESO.

- The~~is~~ Minister of Energy would sign an Indemnity Agreement in favour of OPG and in favour of IESO.
- The Ministry of Energy indicates both OPG and the IESO are anticipated to carry out activities that fall outside the scope of their pre-OFHP typical business activities and corporate mandate. This creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG and/or the IESO to increased liability (pre-existing statutory protections from liability only extend to "good faith acts").
- In addition, statutory protections do not indemnify for costs relating to defending a claim.

RECOMMENDATION

- IESO and OPG have stated that ~~the requirement of~~ these indemnities are~~is~~ required for their participation in the implementation of ~~the~~ OFHP Act.
- In order for the OFHP Act to be successful, it is recommended by the Minister of Energy that the Minister of Finance approve this request.
- [The requirement for indemnities was referenced in the recent Cabinet Submission by Minister of Energy, dated _____.]

WHAT IS THE MINISTER BEING ASKED TO SIGN?

- The Minister is being asked to sign the section 28 approval forms and the transmittal letter to Minister Thibeault.

FISCAL IMPACT

- Ministry of Energy ("M~~OE~~ENE") states that the likelihood of this indemnity being called upon is low and ~~should it be called,~~ that the fiscal exposure is unquantifiable at this time~~, should it be called~~.

Commented [A1]: Would Energy think it fair to add this wording to its business case?

Commented [A2]: Is this expected, and when? Do we have a draft?

Commented [A3]: Is this statement in the business case? P. 5 says "The risk to the Province of giving the indemnities is undeterminable at this time." Where does it say that the likelihood of indemnity being called upon is low?

- MOENE has confirmed in its [draft] request letter that it bears responsibility for funding, within its approved allocation, for payments associated with the indemnities provided under the Agreements.

ANALYSIS

Scope of liability from Indemnities

The IESO and OPG are asking the Province to agree to indemnify, defend and hold harmless the IESO (and its agents) and OPG (and its subsidiaries), as well as their respective directors, officers and employees, from any all claims, liabilities, costs, or losses, taxes, fines, penalties judgments (including indirect and consequential damages/loss of profits, economic loss/loss of opportunity) that might, directly or indirectly, be incurred by any of the indemnified entities and individuals arise to the corporation, him or her (respectively) in relation ofto any civil, criminal administrative investigative or other claims or proceedings arising directly or indirectly as a result of the entities or individual's activities, acts and/or omissions in the implementation of or otherwise relating to the OFHPFair Hydro Plan (including where an individual is acting at the request of OPG or IESO in a different capacity than as a director, officer or employee of OPG or sa subsidiary). as a result of their direct roles in carrying out the activities related to the OFHP Act.

- The indemnity would also include coverage for the financing entity (SPV), created by OPG, (as a subsidiary of OPG) to facilitate the purchasesale of the deferred assets under the Global Adjustment ("GA") structure ("regulatory assets").

MOENE states that both OPG and the IESO are anticipated to carry outthe OFHP Act activities of both OPG and the IESO that would otherwise fall outside the scope of their typical business activities and corporate mandates. According to MENE, Tthis creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation, thereby exposing OPG and/or the IESO to increased liability.

Examples of specific risks to OPG include, without limitation,

- liability as a promoter under Canadian securities laws (or the equivalent, if any, under other applicable securities laws),
- secondary market liability under Canadian and/or other applicable securities laws,
- liability that the signatories to the prospectuses will have (i.e., the individuals signing the prospectus), and
- liability of OPG as the Financial Services Manager under any of the transaction agreements (e.g., the Financial Services Management Agreement, the Administration Agreement, the MSSA, the Master Trust Indenture and any Supplemental Indentures).

Commented [A4]: Is TBS okay with this?

Commented [A5R4]: The earlier draft PEMD note seems to suggest that Energy would need an appropriation for this, as this type of expenditure is not covered under existing FHP lines. Has this analysis been updated and Energy could rely on existing appropriations lines and room?

"Voted Appropriations
Although the Ministry indicates the risk associated with providing the indemnities are undeterminable, the amount of accumulated debt is quite significant. This raises a question about whether the Ministry has sufficient, if any, appropriations in place for 2017-18 to enter into the agreement to provide the indemnities.
- Sections 11.3(1) of the FAA indicates no agreement or undertaking shall be entered into in a fiscal year that would result in a charge to an appropriation for that fiscal year in excess of the amount available under that appropriation.
- Section 11.2(1) indicates no appropriation shall be charged with an amount that is for a purpose other than that for which the appropriation was provided.

Currently there are no explicit appropriations for GA refinancing other than the $1.1B investment asset for the projected OPG equity injection requirements in 2017-18. There is about $500M in Transfer Payments related for the Electricity Social Programs, that are to be funded from voted appropriations starting in 2017-18 should enabling legislation pass.

Commented [A6]: Where does it say this?

Commented [A7]: s.28 notes usually talk about mitigation, as does the contingent liability table. Anything we can add here?

Commented [A8]: It doesn't say "direct".

Commented [A9]: Has the scope of this indemnity been compared to the proposed Provincial guarantee related to the financing? Is there overlap or duplication?

Commented [A10]: Something seems to be msing here

Commented [A11]: Fair to insert?

Commented [A12]: Would Energy change this to "historical" in its business case?

Examples of specific risks to the IESO include, without limitation, liability for its role in potential securities offerings of OPG's financing entity, which may come with heightened exposure to liability for the IESO, particularly for offerings into the U.S. market. It is not clear whether the statutory protections would apply federally or in the U.S. context. If they would not extend to a U.S. claim, for example, it would support the need for a separate indemnity for the IESO.

If the indemnities are not provided, ENE indicates that this could ~~impa~~affect ~~the~~ OPG and IESO ~~directors~~'s willingness to undertake such activities, jeopardizing the successful implementation of the OFHP Act. Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the OFHP Act.

Key Comments:

In providing the approval under Section 28 of the FAA, it is important to flag the following key items that arise from the Indemnity Agreements that the Minister of Energy is ~~anticipated~~proposing to sign [subject to finalising drafting – TBC].

1. Acting in "Good Faith"

Without duplication of the coverage for liabilities that could arise for OPG and IESO, both are ~~essentially~~ requesting to be indemnified for their activities that may be found to have not be~~en seen to be~~ conducted in "good faith" and/or in the best interests for their respective corporations.

Since IESO and OPG are expected~~anticipated~~ to carry out activities under the OFHP ~~in the implementation of the OFHP Act~~ that fall outside the scope of their typical business activities and corporate mandate to date, management in IESO and OPG are of the view that this creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG and/or the IESO and their directors, officers and employees to increased liability.

- The concern seems to be that carrying out activities to implement the OFHP Act, even if in some cases required by the Act would not be considered to be in the best interest of the respective corporation.
  - Is there a difference between acting in good faith in the best interests of the corporation versus acting in good faith in the exercise or performance of powers or duties under the Act?
- ~~(S~~statutory protections from liability only extend to "good faith acts as set out below for IESO directors, officers, employees and agents and for OPG employees"~~)~~.
  - Since OPG is an OBCA corporation, directors and officers of OPG are subject to the standard set out in that Act ~~which is….~~[NTD: Should this reference the OBCA standard?].
  - The standard applicable to directors of IESO is set out in s. 12 of the Electricity Act, i.e., to act honestly and in good faith in the best interests of the IESO and exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances.

Commented [A13]: Can we know this in advance, or is this only to be known if tested in the courts?

Commented [A14]: The business case is somewhat inconsistent on specifically citing directors, or being broader. Which is it?

Commented [A15]: I think we need to include a subsection on existing indemnities, and when the proposed indemnities would not apply.

And lead this sub-section with the protections under statute, and why they may not be considered sufficient – claims on "good faith" as a question of fact to be considered by a court if a claim is brought forward.

And we should mention the waiver too.

Commented [A16]: Is this more of a "note to draft" to be answered?

Commented [A17]: There is no statutory protection for directors and officers of OPG. Most likely OPG has provided them with a typical indemnity consistent with OBCA provisions

Formatted: Bulleted + Level: 1 + Aligned at: 0.25" + Indent at: 0.5"

Commented [A18]: Spell this out first time?

Formatted: Bulleted + Level: 2 + Aligned at: 0.75" + Indent at: 1"

- So the standard is similar for both OPG and IESO directors.
- ~~The concern seems to be that carrying out activities to implement the OFHP Act, even if in some cases required by the Act would not be considered to be in the best interest of the respective corporation. Is there a difference between acting in good faith in the best interests of the corporation versus acting in good faith in the exercise or performance of powers or duties under the Act?~~

Commented [A19]: Is this more of a "note to draft" to be answered?

Both the *Electricity Act, 1998* and the *Ontario Fair Hydro Plan Act, 2017*, provide coverages for such liabilities as long as those activities are done in "good faith".

- Subsection 19(1) of the Electricity Act, 1998 already provides IESO directors, officers and employees with the following protection from liability:

> *"No action or other civil proceeding shall be commenced against a director, officer, employee or agent of the IESO or a member of a committee or panel established by the board of directors of the IESO for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under any Act, the regulations under any Act, the IESO's licence, the IESO's by-laws or the market rules, or for any neglect or default in the exercise or performance in good faith of such a power or duty."*

- Subsection 39(1) of the *Ontario Fair Hydro Plan Act, 2017* also provides similar protection from liability for OPG:

> *"No action or other civil proceeding shall be commenced against any employee of the Province or Ontario Power Generation Inc. for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under this Act, the regulations or for any alleged neglect or default in the exercise or performance in good faith of such a power or duty."*

2. Potential for Fiscal Exposure of the OFHP Act

~~On May 24, 2017, the Ontario Auditor General ("AG") provided remarks to The Standing Committee on Justice Policy on the then proposed *Ontario Fair Hydro Plan Act, 2017*. The AG commented that the GA structure that does not impact the Province's net debt or annual deficit is legislated accounting and not in accordance with Canadian Public Sector Accounting Standards.~~

In addition to potential fiscal impact from a call on the indemnity, there may be a risk associated with the anticipated accounting treatment of the GA Financing portion of the OFHP. With the Province providing guarantee agreements, financial support through credit facilities and the proposesed agreements to indemnify the IESO and OPG, thei~~s could weaken the~~ case for the anticipated accounting treatment ~~that the Province is relying that underpins~~of the GA structure could be weakened.

Commented [A20]: Whether to include or not, or how to position it, we should see what OPG and E&Y say on the impact on the accounting opinion.

Commented [A21]: Need to get an update from OPCD on whether the proposed indemnities would have a significant impact on this analysis.

[NTD: Should include a section that is more descriptive of the content of the proposed indemnity agreement too including exceptions for dishonesty, gross negligence and wilful misconduct, the issue re: due diligence as well as the waiver and the broad scope of the types of damages covered.

BACKGROUND

- On March 2, 2017, the government announced Ontario's Fair Hydro Plan (the "OFHP"), under which the government will to take steps to lower electricity bills [on an after-tax basis] by 25 per cent on average for a typical residential customer, starting July 1, 2017, relative to what the bills would otherwise have been without the OFHP.
- The ~~proposed~~ 25 per cent rate relief ~~measure~~ includes the ~~8 per cent~~ rebate amount equivalent to the 8 per cent Provincial portion of the HST that has been in effect since January 1, 2017 under the Ontario Rebate for Electricity Consumers Act, 2016, and the savings that are anticipated to result from the proposed shifting of the Ontario Electricity Support Program ("OESP") and the Rural or Remote Rate Protection program ("RRRP") costs from ratepayers to being funded by the Province.
- Changes to refinance a portion of the Global Adjustment ("GA") are ~~proposed to be~~ a component of the 25 per cent rate relief under the OFHP. This includes roles for both IESO and OPG:
  - IESO – proposed legislation would impose certain obligations and requirements on IESO to carry out various activities in relation to the implementation of the OFHP such as the deferral of costs related to the GA, the creation of a regulatory asset in relation to the GA financing component of the OFHP, the conveyance of that asset to a financing entity (expected to be established by OPG) and providing a servicing role in recovering the financing entity's funding costs from future ratepayers. IESO may also be required to play a role in potential securities offerings of OPG's financing entity. If so, this may come with heightened exposure to liability for the IESO.
  - ~~o~~ OPG – GA refinancing would result in a deferred GA amount that OPG is expected to fund and finance from a special purpose entity that OPG creates (i.e. a financing entity) and that associated risks are beyond OPG's usual business/operations. This is particularly true with respect to any securities offerings of OPG's financing entity. Products are expected to be offered into the Canadian and U.S. Markets. As a result, pre-existing indemnities and protections do not adequately protect OPG, its directors, officers and employees.
- The ~~G~~government introduced legislation, passed on May 31, 2017 and received Royal Ascent on June 1, 2017, to enable the implementation of the OFHP Act.
- ~~The implementation of the OFHP Act will involve the participation of the Ontario Power Generation ("OPG") and the Independent Electricity System Operator ("IESO") among other government entities.~~

MINISTER OF ENERGY REQUEST FOR SECTION 28 APPROVAL FOR INDEMNITY AGREEMENTS IN FAVOUR OF OPG AND IESO FOR THEIR PARTICIPATION UNDER THE ONTARIO FAIR HYDRO PLAN ACT

ISSUE

The Minister of Energy is requesting approval from the Minister of Finance, pursuant to Section 28 of the *Financial Administration Act (*"FAA"*)* to enter into Indemnity Agreements ("Agreements"), on behalf of the Crown, in favour of Ontario Power Generation ("OPG") and the Independent Electricity System Operator ("IESO") with respect to their respective roles in carrying out the ~~participation~~implementation of the Ontario Fair Hydro Plan ("ONFHP") under the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act").

- The~~is~~ Minister of Energy would sign an Indemnity Agreement in favour of OPG and in favour of IESO.

RECOMMENDATION

- IESO and OPG have stated that the requirement of these indemnities is required for their participation in the OFHP Act.
- In order for the OFHP Act to be successful, it is recommended by the Minister of Energy that the Minister of Finance approve this request.
- [The requirement for indemnities was referenced in the recent Cabinet Submission by Minister of Energy, dated _____.]

Commented [A1]: Is this expected, and when? Do we have a draft?

WHAT IS THE MINISTER BEING ASKED TO SIGN?

- The Minister is being asked to sign the section 28 approval forms and the transmittal letter to Minister Thibeault.

FISCAL IMPACT

- Ministry of Energy ("M~~O~~E~~E~~NE") states that the likelihood of this indemnity being called upon is low and ~~should it be called,~~ the fiscal exposure is unquantifiable at this time, should it be called.
- M~~O~~ENE has confirmed in its [draft] request letter that it bears responsibility for funding, within its approved allocation, for payments associated with the indemnities provided under the Agreements.

Commented [A2]: Is TBS okay with this?

ANALYSIS

Scope of liability from Indemnities

The IESO and OPG are asking the Province to agree to indemnify and hold harmless the IESO and OPG (and its subsidiaries), as well as their respective directors, officers and employees,

from any claims, liabilities, costs or losses that might arise to the corporation, him or her (respectively) as a result of their direct roles in carrying out the activities related to the OFHP Act.

- The indemnity would also include coverage for the financing entity (SPV), created by OPG, to facilitate the purchase~~sale~~ of the deferred assets under the Global Adjustment ("GA") structure.

M~~O~~ENE states that both OPG and the IESO are anticipated to carry out OFHP Act activities that otherwise fall outside the scope of their typical business activities and corporate mandates. This creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation, thereby exposing OPG and/or the IESO to increased liability.

Examples of specific risks to OPG include, without limitation,

- liability as a promoter under Canadian securities laws (or the equivalent, if any, under other applicable securities laws),
- secondary market liability under Canadian and/or other applicable securities laws,
- liability that the signatories to the prospectuses will have (i.e., the individuals signing the prospectus), and
- liability of OPG as the Financial Services Manager under any of the transaction agreements (e.g., the Financial Services Management Agreement, the Administration Agreement, the MSSA, the Master Trust Indenture and any Supplemental Indentures).

Examples of specific risks to the IESO include, without limitation, liability for its role in potential securities offerings of OPG's financing entity, which may come with heightened exposure to liability for the IESO, particularly for offerings into the U.S. market. It is not clear whether the statutory protections would apply federally or in the U.S. context. If they would not extend to a U.S. claim, for example, it would support the need for a separate indemnity for the IESO.

If the indemnities are not provided, this could ~~impa~~affect ~~the~~ OPG and IESO ~~directors~~'s willingness to undertake such activities, jeopardizing the successful implementation of the OFHP Act. Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the OFHP Act.

Commented [A3]: Fair to insert?

Commented [A4]: Would Energy change this to "historical" in its business case?

Commented [A5]: Can we know this in advance, or is this only to be known if tested in the courts?

Commented [A6]: The business case is somewhat inconsistent on specifically citing directors, or being broader. Which is it?

Key Comments:

In providing the approval under Section 28 of the FAA, it is important to flag the following key items that arise from the Agreements the Minister of Energy is ~~anticipated~~proposing to sign [subject to finalising drafting – TBC].

1. Acting in "Good Faith"

Without duplication of the coverage for liabilities that could arise for OPG and IESO, both are essentially requesting to be indemnified for their activities that may not be seen to be conducted in "good faith" for their respective corporations.

Since IESO and OPG are anticipated to carry out activities that fall outside the scope of their typical business activities and corporate mandate, management in IESO and OPG are of the view that this creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG and/or the IESO to increased liability (statutory protections from liability only extend to "good faith acts".

Both the *Electricity Act, 1998* and the *Ontario Fair Hydro Plan Act, 2017*, provide coverages for such liabilities as long as those activities are done in "good faith".

- Subsection 19(1) of the Electricity Act, 1998 already provides IESO directors, officers and employees with the following protection from liability:

  > *"No action or other civil proceeding shall be commenced against a director, officer, employee or agent of the IESO or a member of a committee or panel established by the board of directors of the IESO for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under any Act, the regulations under any Act, the IESO's licence, the IESO's by-laws or the market rules, or for any neglect or default in the exercise or performance in good faith of such a power or duty."*

- Subsection 39(1) of the *Ontario Fair Hydro Plan Act, 2017* also provides similar protection from liability for OPG:

  > *"No action or other civil proceeding shall be commenced against any employee of the Province or Ontario Power Generation Inc. for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under this Act, the regulations or for any alleged neglect or default in the exercise or performance in good faith of such a power or duty."*

2. Potential for Fiscal Exposure of the OFHP Act

~~On May 24, 2017, the Ontario Auditor General ("AG") provided remarks to The Standing Committee on Justice Policy on the then proposed *Ontario Fair Hydro Plan Act, 2017*. The AG commented that the GA structure that does not impact the Province's net debt or annual deficit is legislated accounting and not in accordance with Canadian Public Sector Accounting Standards.~~

With the Province providing guarantee agreements, financial support through credit facilities and these agreements to indemnify the IESO and OPG, this could weaken the case for the anticipated accounting treatment ~~that the Province is relying that underpins~~of the GA structure.

Commented [A7]: I think we need to include a subsection on existing indemnities, and when the proposed indemnities would not apply.

And lead this sub-section with the protections under statute, and why they may not be considered sufficient – claims on "good faith" as a question of fact to be considered by a court if a claim is brought forward.

And we should mention the waiver too.

Commented [A8]: Whether to include or not, or how to position it, we should see what OPG and E&Y say on the impact on the accounting opinion.

BACKGROUND

- On March 2, 2017, the government announced Ontario's Fair Hydro Plan (the "OFHP"), under which the government will to take steps to lower electricity bills [on an after-tax basis] by 25 per cent on average for a typical residential customer relative to what the bills would otherwise have been without the OFHP.
- The proposed 25 per cent rate relief ~~measure~~ includes the ~~8 per cent~~ rebate amount equivalent to the 8 per cent Provincial portion of the HST that has been in effect since January 1, 2017 under the Ontario Rebate for Electricity Consumers Act, 2016, and the savings that are anticipated to result from the proposed shifting of the Ontario Electricity Support Program ("OESP") and the Rural or Remote Rate Protection program ("RRRP") costs from ratepayers to being funded by the Province.
- Changes to the Global Adjustment ("GA") are ~~proposed to be~~ a component of the 25 per cent rate relief under the OFHP.
- The ~~G~~government introduced legislation, passed on May 31, 2017 and received Royal Ascent on June 1, 2017, to enable the implementation of the OFHP Act.
- ~~The implementation of the OFHP Act will involve the participation of the Ontario Power Generation ("OPG") and the Independent Electricity System Operator ("IESO") among other government entities.~~

Hi Ron,

Pls. see attached latest briefing note on the request for indemnities. The section added by Toby, I think, is very helpful.

On the accounting, we were thinking of sharing this with OPCD and have them add a section, if they wish to do so. Also, we discussed internally to share this with CMD and/or FTD as they are doing fair bit of work on that front.

Thanks,

John

Subject:	RE: OIC and IESO Financing
Date:	Wednesday, June 07, 2017 10:05:33 PM

Hi Steen,

The approval form is based on discussions with the IESO and the amount of credit facility requested. Note that while the IESO asked only for an initial five-year term for the facility, for the OIC, we are seeking approval for OFA borrowing room for the full term of the FHP so that the OFA would not need to return for a new OIC to be able to continue to provide a credit facility to IESO. Aside from that, the drafting is pretty plain, and IESO has not been asked to review. However, if any parts that you see need additional review, we can reach out.

As for the OIC, as stated, it has no FHP-related content and is attached more for information than a request for feedback.

Thanks Ron. We'll take a look.

Has IESO provided comments on the attached materials.

Cheers, Steen

From: Ronald Kwan [mailto:Ronald.Kwan@ofina.on.ca]
Sent: June-07-17 3:53 PM
To: Hume, Steen (ENERGY)
Subject: OIC and IESO Financing

Hi Steen,

As you'll recall, we are moving forward with OIC to expand the OFA's borrowing authority to facilitate the IESO's request for a credit facility from the OFA.

Attached is a draft approval form, which discusses this in reference to the FHP. Any comments you might have would be welcome.

As noted last week, the OIC itself is just on expanding the Province's ability to lend to the OFA (so that the OFA has the borrowing room to provide the facility), and the FHP is not mentioned in the

OIC.

Ron

Subject: OIC s22 CIPA - OFA-IESO - LRC package

Hi Ron,

Please find attached the LRC package for an OIC authorizing the Minister of Finance to lend to the OFA. In order for the OFA to lend to the IESO as part of the proposed Fair Hydro Plan Act, the OFA borrows from the Province (Minister of Finance). The OIC is being obtained under section 22 of the Capital Investment Plan Act.

The package is getting sign-off from MOF legal at the moment, and it's aiming to get yours and Gadi's sign off today in order to get this to DMO to make sure this will be on June 27th LRC date. MOF legal has already reviewed the package, so I do not expect any further changes from them. I will provide you the hard copy of the package once Legal signed off on that.

The documents are also saved here:

Proposed Items for Review

1. Approval of Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act, 1993 ("CIPA"),* authorizing the Minister of Finance to make a loan to the Ontario Financing Authority ("OFA").

Approvals required prior to LRC

	Committee and date	Cabinet Date
Policy		
TB/MBC	LRC, June 27, 2017	June 27, 2017

Deputy Minister _____ Date _____

Minister _____ Date _____

s. 1 Proposal and Context

- Approval is being sought for an OIC under section 22 of *Capital Investment Plan Act, 1993* ("CIPA"), which will authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority ("OFA") in an amount of up to $2.0 billion. Under the proposed OIC, loan(s) could be advanced during the period between the effective date of the OIC and [December 31, 2047.

- Subsection 22(1) of CIPA authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC"). Subsection 22(2) provides a statutory appropriation for loans made by the Minister to the OFA under subsection 22(1).

- Existing OICs authorize the Minister of Finance to provide loans to the OFA under which the OFA has provided loans and credit facilities to colleges, school boards and other public agencies such as Infrastructure Ontario, IESO, Ontario Lottery and Gaming Corporation and Liquor Control Board of Ontario.

- This proposed OIC is required to expand the overall Minister of Finance lending authority to the OFA to allow the OFA to provide loans ~~["including"?]~~ under credit facilities requested by the Independent Electricity System Operator ("IESO").
    - This will help the IESO to fulfil the commitments under the proposed Fair Hydro Act, 2017, under anticipated and potential timing differences in the implementation of the proposed Fair Hydro Plan.
    - The timing of this OIC is critical to ensure borrowing authority for the OFA is available to provide the IESO its requested financing arrangements upon the enactment of the proposed *Ontario Fair Hydro Plan Act, 2017.*

Formatted: Indent: Left: 0.5", Tab stops: 0.75", List tab + Not at 1"

s. 2 Approach and Intended Outcomes

- Under CIPA, the OFA provides financing to public bodies as directed by the Minister of Finance. The OFA obtains the funds it needs for its lending program by borrowing from the Province. This OIC would authorize the Minister of Finance under section 22 of CIPA to provide additional loans to the OFA.

- As per subsection 3(1) of CIPA, the Minister of Finance is responsible for the administration of CIPA with respect to the OFA.

- This proposed OIC is required to assist in fulfilling the commitments under the proposed *Ontario Fair Hydro Plan Act, 2017.*

- It is expected that as part of the implementation of the proposed arrangements, the Minister of Finance will direct the OFA to provide a revolving credit facility for short term financing related to the on-going *Ontario Fair Hydro Plan Act, 2017*. In particular, the OFA would be directed to provide a credit facility to the Independent Electricity System Operator ("IESO"). The IESO is a public body for the purposes of CIPA.

- Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.

- The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell that asset.
    - It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
    - The cash received would be used by the IESO to fund the current Global Adjustment shortfall.

- However, there is expected to be initial and potential ongoing IESO cash flow requirement timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under the proposed legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.

- As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset.

Formatted: Indent: Left: 0.25", No bullets or numbering

Formatted: Indent: Left: 0.25", No bullets or numbering

Formatted: Indent: Left: 0.25", No bullets or numbering

- IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan Act, 2017*. ~~The $2 billion request from IESO is based on current data and assumptions which could change.~~
- It is proposed that the OIC authorization be for $2.0 billion, which would be in addition to existing authority for the Minister of Finance to provide loans to the OFA, ~~[~~to ensure that there is sufficient borrowing authority in place for the OFA to meet the IESO requirements.

- ~~For the OFA to accommodate this request, the OFA requires additional borrowing authority from the Minister of Finance to ensure that it has sufficient funds to lend, hence the current request for an OIC.~~

- If approved, the Minister of Finance will subsequently provide a Directive to the OFA to direct it to provide credit facilities to the IESO in an amount not to exceed $2.5 billion.
    - The OFA currently provides a credit facility to the IESO of $975 million.
    - The IESO has requested that the existing credit facility be reduced to $475 million, and a new credit facility be provided of $2 billion, for a total amount of $2.475 million.

s. 3 Direction and Urgency

- As announced on March 2, 2017, and highlighted as a commitment in Budget 2017, the Province intends to implement the *Ontario Fair Hydro Plan Act, 2017,* which would reduce electricity bills by 25 per cent on average for eligible households.
- The ability for the OFA to have the requisite borrowing and lending capacity is instrumental in supporting implementation of the proposed *Ontario Fair Hydro Plan Act, 2017*.
- Ministry of Energy proposed regulations under the proposed *Ontario Fair Hydro Plan Act, 2017* are expected to track for Cabinet approval by end of June 2017. It is expected that this OIC also be submitted for approval concurrently as it supports a crucial component of the successfully implementation of the Fair Hydro Plan.
- A related Cabinet Minute from the Ministry of Energy is tracking for June 27, 2017 date.

s. 4 Impact Assessment and Costs

- With this OIC, the Minister of Finance will be authorized to lend an additional amount of $~~x~~2 billion to the OFA. Subject to the terms and conditions of a Directive from the Minister of Finance, loans from the Minister of Finance to the OFA are expected to be at the Province's cost of funds.
- Loans advanced will result in increased borrowing in the debt markets by the Province.
- Loans are expected to be repaid and, therefore, no fiscal impact is expected.

s. 5 Implementation

- If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister will be required that will provide direction to the OFA on how it can use the proceeds of the loan.

s. 6 Delivery and Results Tracking

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed *Ontario Fair Hydro Plan Act, 2017* and is required to ensure the timely implementation and support for the success of the Fair Hydro Plan.

s.7 Stakeholder Consultations

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed Fair Hydro Plan. The related Cabinet note for the initiative should be referred to.

MEMORANDUM TO: Scott Thompson
Deputy Minister of Finance

FROM: Gadi Mayman
Chief Executive Officer

SUBJECT: **Approval of an Order in Council under section 22 of the *Capital Investment Plan Act***

Attached for the Minister's review and consideration is a submission for ~~approval and signature is~~ an Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act* ("CIPA") for the purpose of authorizing the Minister of Finance to make loan(s) to the Ontario Financing Authority ("OFA"). The proceeds from these loans would allow the OFA to lend to the Independent Electricity Systems Operator ("IESO") in connection with the implementation of the Province's proposed *Ontario Fair Hydro Plan Act, 2017*, subject to the approval of the Legislature.

IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers. The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell that asset. It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV"), an OPG special purpose vehicle or trust). The cash received would be used by the IESO to fund the current Global Adjustment shortfall.

~~However, t~~There is expected to be initial and potential ongoing IESO cash flow requirement timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and

when the SPV purchases the asset from IESO. Also, under the proposed legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.

../2

As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset.

The OFA obtains the funding it needs to carry out its lending programs by borrowing from the Province. This proposed OIC authorizes the Minister of Finance to lend up to an additional Canadian $2.0 billion to the OFA. In addition, in order for the OFA to ~~make~~provide the IESO its requested credit facility~~loan to the IESO~~, a direction from the Minister of Finance to the OFA under CIPA will also be required.

Attached for your signature is a memorandum from you to the Minister requesting that the Minister recommend the OIC. This OIC is on track to be considered at LRC on June 27, 2017 together with proposed Ministry of Energy submission for regulations related to the proposed *Ontario Fair Hydro Plan Act, 2017.*

Staff are available to address any questions you may have regarding this matter.

Hi Gadi,

Just an FYI. It's a work in progress, but the DMO wanted to see a draft for today, which we will try to do.

I'm inclined to just have the amount as $2 bn, to meet the IESO request for the FHP-specific facility, unless there are other reasons/needs to expand the authority for other OFA purposes that you are aware of.

Date: Tuesday, May 30, 2017 11:16:39 PM

Hi Nancy,

Not the draft, as of yet. They are aware of the requirement and ask by IESO (and included in the TB report back TB assessment note and noted in the TB Minute in early May), but it would be an MOF submission, as under CIPA and the OFA.

Scott took a look at the draft. He said it looked fine, on a skim.

We can share the draft as is, if you're okay with it.

Ron

Hi Gadi,

Just an FYI. It's a work in progress, but the DMO wanted to see a draft for today, which we will try to do.

I'm inclined to just have the amount as $2 bn, to meet the IESO request for the FHP-specific facility, unless there are other reasons/needs to expand the authority for other OFA purposes that you are aware of.

Subject: OIC s22 CIPA - OFA-IESO - LRC package

Hi Ron,

Please find attached the LRC package for an OIC authorizing the Minister of Finance to lend to the OFA. In order for the OFA to lend to the IESO as part of the proposed Fair Hydro Plan Act, the OFA borrows from the Province (Minister of Finance). The OIC is being obtained under section 22 of the Capital Investment Plan Act.

The package is getting sign-off from MOF legal at the moment, and it's aiming to get yours and Gadi's sign off today in order to get this to DMO to make sure this will be on June 27th LRC date. MOF legal has already reviewed the package, so I do not expect any further changes from them. I will provide you the hard copy of the package

once Legal signed off on that.

Proposed Items for Review

1. Approval of Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act, 1993 ("CIPA"),* authorizing the Minister of Finance to make a loan to the Ontario Financing Authority ("OFA").

Approvals required prior to LRC

	Committee and date	Cabinet Date
Policy		
TB/MBC	LRC, June 27, 2017	June 27, 2017

Deputy Minister _____ Date _____

Minister _____ Date _____

s. 1 Proposal and Context

- Approval is being sought for an OIC under section 22 of *Capital Investment Plan Act, 1993* ("CIPA"), which will authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority ("OFA") in an amount of up to $2.0 billion. Under the proposed OIC, loan(s) could be advanced during the period between the effective date of the OIC and [December 31, 2047.

- Subsection 22(1) of CIPA authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC"). Subsection 22(2) provides a statutory appropriation for loans made by the Minister to the OFA under subsection 22(1).

- Existing OICs authorize the Minister of Finance to provide loans to the OFA under which the OFA has provided loans and credit facilities to colleges, school boards and other public agencies such as Infrastructure Ontario, IESO, Ontario Lottery and Gaming Corporation and Liquor Control Board of Ontario.

- This proposed OIC is required to expand the overall Minister of Finance lending authority to the OFA to allow the OFA to provide loans ["including"?] under credit facilities requested by the Independent Electricity System Operator ("IESO"). This will help the IESO to fulfil the commitments under the proposed Fair Hydro Act, 2017, under anticipated and potential timing differences in the implementation of the proposed Fair Hydro Plan. The timing of this OIC is critical to ensure borrowing authority for the OFA is available to provide the IESO its requested financing arrangements upon the enactment of the proposed *Ontario Fair Hydro Plan Act, 2017.*

s. 2 Approach and Intended Outcomes

- Under CIPA, the OFA provides financing to public bodies as directed by the Minister of Finance. The OFA obtains the funds it needs for its lending program by borrowing from the Province. This OIC would authorize the Minister of Finance under section 22 of CIPA to provide additional loans to the OFA.

- As per subsection 3(1) of CIPA, the Minister of Finance is responsible for the administration of CIPA with respect to the OFA.

- This proposed OIC is required to assist in fulfilling the commitments under the proposed *Ontario Fair Hydro Plan Act, 2017.*

- It is expected that as part of the implementation of the proposed arrangements, the Minister of Finance will direct the OFA to provide a revolving credit facility for short term financing related to the on-going *Ontario Fair Hydro Plan Act, 2017*. In particular, the OFA would be directed to provide a credit facility to the Independent Electricity System Operator ("IESO"). The IESO is a public body for the purposes of CIPA.

- Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.
- The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell that asset.
    - It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
    - The cash received would be used by the IESO to fund the current Global Adjustment shortfall.
- However, there is expected to be initial and potential ongoing timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under the proposed legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.
- As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset.

- IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan Act, 2017*. The $2 billion request from IESO is based on current data and assumptions which could change.

- It is proposed that the OIC authorization be $2.0 billion [to ensure that there is sufficient borrowing authority in place for the OFA to meet the IESO requirements.

- For the OFA to accommodate this request, the OFA requires additional borrowing authority from the Minister of Finance to ensure that it has sufficient funds to lend, hence the current request for an OIC.

- If approved, the Minister of Finance will subsequently provide a Directive to the OFA to direct it to provide credit facilities to the IESO in an amount not to exceed $2.5 billion.
    - The OFA currently provides a credit facility to the IESO of $975 million.
    - The IESO has requested that the existing credit facility be reduced to $475 million, and a new credit facility be provided of $2 billion, for a total amount of $2.475 million.

s. 3 Direction and Urgency

- As announced on March 2, 2017, and highlighted as a commitment in Budget 2017, the Province intends to implement the *Ontario Fair Hydro Plan Act, 2017,* which would reduce electricity bills by 25 per cent on average for eligible households.
- The ability for the OFA to have the requisite borrowing and lending capacity is instrumental in supporting implementation of the proposed *Ontario Fair Hydro Plan Act, 2017*.
- Ministry of Energy proposed regulations under the proposed *Ontario Fair Hydro Plan Act, 2017* are expected to track for Cabinet approval by end of June 2017. It is expected that this OIC also be submitted for approval concurrently as it supports a crucial component of the successfully implementation of the Fair Hydro Plan.
- A related Cabinet Minute from the Ministry of Energy is tracking for June 27, 2017 date.

s. 4 Impact Assessment and Costs

- With this OIC, the Minister of Finance will be authorized to lend an additional amount of $x billion to the OFA. Subject to the terms and conditions of a

Directive from the Minister of Finance, loans from the Minister of Finance to the OFA are expected to be at the Province's cost of funds.
- Loans advanced will result in increased borrowing in the debt markets by the Province.
- Loans are expected to be repaid and, therefore, no fiscal impact is expected.

s. 5 Implementation

- If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister will be required that will provide direction to the OFA on how it can use the proceeds of the loan.

s. 6 Delivery and Results Tracking

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed *Ontario Fair Hydro Plan Act, 2017* and is required to ensure the timely implementation and support for the success of the Fair Hydro Plan.

s.7 Stakeholder Consultations

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed Fair Hydro Plan. The related Cabinet note for the initiative should be referred to.

Proposed Items for Review

1. Approval of Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act, 1993 ("CIPA"),* authorizing the Minister of Finance to make a loan to the Ontario Financing Authority ("OFA").

Approvals required prior to LRC

	Committee and date	Cabinet Date
Policy		
TB/MBC	LRC, June 27, 2017	June 27, 2017

Deputy Minister _____ Date _____

Minister _____ Date _____

s. 1 Proposal and Context

- Approval is being sought for an OIC under section 22 of *Capital Investment Plan Act, 1993* ("CIPA"), which will authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority ("OFA") in an amount of up to $2.0 billion. Under the proposed OIC, loan(s) could be advanced during the period between the effective date of the OIC and [December 31~~June 30~~, 2047.

- Subsection 22(1) of CIPA authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC"). Subsection 22(2) provides a statutory appropriation for loans made by the Minister to the OFA under subsection 22(1).

- Existing OICs authorize the Minister of Finance to provide loans to the OFA under which the OFA has provided loans and credit facilities to colleges, school boards and other public agencies such as Infrastructure Ontario, IESO, Ontario Lottery and Gaming Corporation and Liquor Control Board of Ontario.

- This proposed OIC is required to expand the overall Minister of Finance lending authority to the OFA to allow the OFA to provide loans ["including"?] under credit facilities requested by the Independent Electricity System Operator ("IESO"). This will help the IESO to fulfil the commitments under the proposed Fair Hydro Act, 2017, under anticipated and potential timing differences in the implementation of the proposed Fair Hydro Plan. The timing of this OIC is critical to ensure borrowing authority for the OFA is available to provide the IESO its requested financing arrangements upon the enactment of the proposed *Ontario Fair Hydro Plan Act, 2017.*

Commented [SQ21]: Because we are picking a precise date, does this date work (30 year). Assumes plan is implemented July 1, 2017

Commented [RK2R1]: Could be shorter, as the recovery period should be starting well before then. Let's square-bracket for now.

s. 2 Approach and Intended Outcomes

- Under CIPA, the OFA provides financing to public bodies as directed by the Minister of Finance. The OFA obtains the funds it needs for its lending program by borrowing from the Province. This OIC would authorize the Minister of Finance under section 22 of CIPA to provide additional loans to the OFA.

- As per subsection 3(1) of CIPA, the Minister of Finance is responsible for the administration of CIPA with respect to the OFA.

- This proposed OIC is required to assist in fulfilling the commitments under the proposed *Ontario Fair Hydro Plan Act, 2017.*

- It is expected that as part of the implementation of the proposed arrangements, the Minister of Finance will direct the OFA to provide a revolving credit facility for short term financing related to the on-going *Ontario Fair Hydro Plan Act, 2017*. In particular, the OFA would be directed to provide a credit facility to the Independent Electricity System Operator ("IESO"). The IESO is a public body for the purposes of CIPA.

- Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.
- The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell that asset.
    - It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
    - The cash received would be used by the IESO to fund the current Global Adjustment shortfall.
- However, there is expected to be initial and potential ongoing timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under the proposed legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.
- As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset.

- IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan Act, 2017*. The $2 billion request from IESO is based on current data and assumptions which could change.

- It is proposed that the OIC authorization be $2.0 billion [to ensure that there is sufficient borrowing authority in place for the OFA to meet the IESO requirements.

- For the OFA to accommodate this request, the OFA requires additional borrowing authority from the Minister of Finance to ensure that it has sufficient funds to lend, hence the current request for an OIC.

- If approved, the Minister of Finance will subsequently provide a Directive to the OFA to direct it to provide credit facilities to the IESO in an amount not to exceed $2.5 billion.
    - The OFA currently provides a credit facility to the IESO of $975 million.
    - The IESO has requested that the existing credit facility be reduced to $475 million, and a new credit facility be provided of $2 billion, for a total amount of $2.475 million.

s. 3 Direction and Urgency

- As announced on March 2, 2017, and highlighted as a commitment in Budget 2017, the Province intends to implement the *Ontario Fair Hydro Plan Act, 2017,* which would reduce electricity bills by 25 per cent on average for eligible households.
- The ability for the OFA to have the requisite borrowing and lending capacity is instrumental in supporting implementation of the proposed *Ontario Fair Hydro Plan Act, 2017*.
- Ministry of Energy proposed regulations under the proposed *Ontario Fair Hydro Plan Act, 2017* are expected to track for Cabinet approval by end of June 2017. It is expected that this OIC also be submitted for approval concurrently as it supports a crucial component of the successfully implementation of the Fair Hydro Plan.
- A related Cabinet Minute from the Ministry of Energy is tracking for June 27, 2017 date.

s. 4 Impact Assessment and Costs

- With this OIC, the Minister of Finance will be authorized to lend an additional amount of $x billion to the OFA. Subject to the terms and conditions of a

Directive from the Minister of Finance, loans from the Minister of Finance to the OFA are expected to be at the Province's cost of funds.
- Loans advanced will result in increased borrowing in the debt markets by the Province.
- Loans are expected to be repaid and, therefore, no fiscal impact is expected.

s. 5 Implementation

- If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister will be required that will provide direction to the OFA on how it can use the proceeds of the loan.

s. 6 Delivery and Results Tracking

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed *Ontario Fair Hydro Plan Act, 2017* and is required to ensure the timely implementation and support for the success of the Fair Hydro Plan.

s.7 Stakeholder Consultations

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed Fair Hydro Plan. The related Cabinet note for the initiative should be referred to.

Hi Ron

Sorry, as I was looking at clean versions I noticed a couple of other needed edits. E.g. making end date 2047 consistent across documents. Please see attached. I went out on a limb and updated the French translation in 4- CIPA OIC, but will alert legal tomorrow morning to check everything. I'll hold off on clean versions for now pending a read through.

Bruno

Subject: OIC s22 CIPA - OFA-IESO - LRC package

Hi Ron,

Please find attached the LRC package for an OIC authorizing the Minister of Finance to lend to the OFA. In order for the OFA to lend to the IESO as part of the proposed Fair Hydro Plan Act, the OFA borrows from the Province (Minister of Finance). The OIC is being obtained under section 22 of the Capital Investment Plan Act.

The package is getting sign-off from MOF legal at the moment, and it's aiming to get yours and Gadi's sign off today in order to get this to DMO to make sure this will be on June 27th LRC date. MOF legal has already reviewed the package, so I do not expect any further changes from them. I will provide you the hard copy of the package once Legal signed off on that.

The documents are also saved here:

Ontario

Order in Council
Décret

On the recommendation of the undersigned, the Lieutenant Governor of Ontario, by and with the advice and concurrence of the Executive Council of Ontario, orders that:

Sur la recommandation de la personne soussignée, la lieutenante-gouverneure de l'Ontario, sur l'avis et avec le consentement du Conseil exécutif de l'Ontario, décrète ce qui suit :

WHEREAS pursuant to subsection 22(1) of the *Capital Investment Plan Act, 1993* (the "Act"), the Minister of Finance may purchase securities of or make loans to corporations established under subsection 2(1) of the Act in such amounts, at such times and on such terms and conditions as the Lieutenant Governor in Council considers expedient;

AND WHEREAS the Ontario Financing Authority (the "OFA") is a corporation established under subsection 2(1) of the Act;

AND WHEREAS pursuant to subsection 6(3) of the Act, the power of a corporation established under subsection 2(1) of the Act to borrow and issue securities, among other things, may only be exercised under the authority of a by-law that has been approved by the Minister of Finance;

AND WHEREAS the OFA wishes to borrow up to Two ~~hree~~ Billion ~~Five Hundred Million~~ Dollars in lawful money of Canada from the Minister of Finance and has been authorized to do so by a borrowing by-law approved in accordance with the Act;

THEREFORE:

Pursuant to subsection 22 (1) of the Act, the Minister of Finance is authorized to lend a maximum of Two ~~hree~~ Billion ~~Five Hundred Million~~ Dollars in lawful money of Canada to the OFA on the following terms and conditions:

(a) the loan may be advanced in such amounts and at such time or times as required by the OFA;

(b) repayment of advances made under the loan plus accrued interest may be made in whole or in part at any time provided that the loan plus any accrued interest shall be fully repaid by June 30, 2047~~53~~;

(c) each advance (an “Advance”) made under the loan hereby authorized shall bear interest at a rate which is determined as follows:

(i) from the date of the Advance to (but excluding) the date of repayment the Advance shall bear interest at a per annum rate equivalent to the yield earned on ninety day Province of Ontario treasury bills on the date before the Advance Date as determined by the Province, provided that if an Advance is outstanding for longer than ninety days, the interest rate shall be reset on the last day of each ninety day period (the “Reset Date”) to the yield earned on ninety day Province of Ontario treasury bills immediately preceding the Reset Date for such ninety day period as determined by the Province;

(ii) in the event that moneys included in an Advance are used by the OFA for the purpose of funding loans to third parties (a “Third Party Loan”), the rate of interest payable by the OFA to the Province on the portion of the Advance so used shall be adjusted effective as of the date that the portion of the Advance is used to fund the Third Party Loan so that the per annum rate of interest payable by the OFA on such moneys is equivalent to the per annum rate of interest payable to the OFA under the Third Party Loan less an amount as may be determined by the Minister of Finance in respect of such Third Party Loan or a class of such Third Party Loans, until but excluding the date on which the Third Party Loan is repaid, at which time the interest rate set out in subparagraph (i) shall again be applicable to that portion of the Advance; and

(iii) in the event that moneys described in subparagraph (ii), once repaid, are subsequently used to fund loans to third parties, subparagraph (ii) shall again be applicable in determining the interest rate payable to the Province on that portion of the Advance used to fund such loan, and so on, until the Advance shall be repaid to the Province in full;

(iv) despite subparagraphs (ii) and (iii), in the event that no interest is payable to the OFA under a Third Party Loan, no interest shall be payable by the OFA on the portion of the Advance so used and to the extent that the terms of a Third Party Loan provide for the deferral of the payment of accrued interest for a period, the interest payment terms of an Advance or portion thereof shall also be deferred for a similar period.

(d) interest for any period of less than one year shall be payable for the actual number of days included in such period, computed on the basis of a 365-day year;

(e) despite paragraph (b) of this Order, interest on any portion of an Advance made to the OFA under the loan that is used by the OFA to fund a Third Party Loan shall accrue on the basis stated above but shall become payable only to the extent the OFA receives payment of interest under the relevant Third Party Loan;

(f) despite paragraph (b) of this Order, any portion of the principal of an Advance made to the OFA under the loan that is used by the OFA to fund a Third Party Loan shall become payable only to the extent the OFA receives repayment of principal under the relevant Third Party Loan; and

(g) the loan hereby authorized shall be evidenced by a promissory note.

ATTENDU QUE le ministre des Finances peut, en vertu du paragraphe 22 (1) de la *Loi de 1993 sur le plan d'investissement* (la « Loi »), acheter des valeurs mobilières des personnes morales créées en vertu du paragraphe 2 (1) de la Loi ou leur consentir des prêts selon les montants, aux moments et aux conditions que le lieutenant-gouverneur en conseil estime opportuns;

ATTENDU QUE l'Office ontarien de financement (l'« OOF ») est une personne morale créée en vertu du paragraphe 2 (1) de la Loi;

ATTENDU QUE, conformément au paragraphe 6 (3) de la Loi, le pouvoir qu'ont les personnes morales créées en vertu du paragraphe 2 (1) de la Loi de contracter des emprunts et d'émettre des valeurs mobilières, entre autres, ne peut être exercé qu'aux termes d'un règlement administratif approuvé par le ministre des Finances;

ATTENDU QUE l'OOF souhaite emprunter jusqu'à concurrence de deux~~trois~~ milliards ~~cinq cent millions~~ de dollars en monnaie légale du Canada du ministre des Finances et qu'il a été autorisé à le faire par un règlement administratif d'emprunt approuvé conformément à la Loi;

PAR CONSÉQUENT :

en vertu du paragraphe 22 (1) de la Loi, le ministre des Finances est autorisé à prêter un montant maximal de deux ~~trois~~ milliards ~~cinq cent millions~~ de dollars en monnaie légale du Canada à l'OOF, aux conditions suivantes :

a) le prêt peut être consenti selon les montants et aux moments qui conviennent à l'OOF;

b) le remboursement des avances consenties au titre du prêt, plus les intérêts courus, peut à tout moment être effectué en totalité ou en partie, pourvu que le prêt et les intérêts courus soient entièrement remboursés au plus tard le 30 juin 2047~~53~~;

c) chaque avance (« avance ») faite au titre du prêt autorisé par les présentes portera intérêt au taux est fixé comme suit :

(i) de la date où elle a été faite jusqu'à la date (non comprise) de son remboursement, l'avance portera intérêt à un taux annuel équivalant au rendement gagné sur des bons du Trésor de la province de l'Ontario de quatre-vingt-dix jours à la date précédant la date de l'avance fixée par la province, pourvu que ce taux d'intérêt soit rajusté le dernier jour de chaque période de quatre-vingt-dix jours (« date de rajustement ») selon le rendement gagné sur de tels bons du Trésor immédiatement avant la date de rajustement pour une période de quatre-vingt-dix jours décidée par la province, si l'avance est impayée pendant plus de quatre-vingt-dix jours;

(ii) dans l'éventualité où l'OOF se servirait de sommes comprises dans une avance pour financer des prêts à des tiers, le taux d'intérêt à payer par l'OOF à la province sur la partie de l'avance ainsi utilisée sera rajusté à la date à laquelle la partie de l'avance sera utilisée pour le financement du prêt à un tiers de façon que le taux d'intérêt annuel à payer par l'OOF sur de telles sommes soit équivalent à ce

dernier taux moins un montant que pourra fixer le ministre des Finances à l'égard d'un tel prêt ou d'une telle catégorie de prêt, jusqu'à la date (non comprise) à laquelle le prêt à un tiers sera remboursé, date à laquelle le taux d'intérêt établi au sous-alinéa (i) s'appliquera de nouveau à cette partie de l'avance;

(iii) dans l'éventualité où les sommes décrites au sous-alinéa (ii), une fois remboursées, seraient ultérieurement utilisées pour le financement de prêts à des tiers, le sous-alinéa (ii) s'appliquera de nouveau dans l'établissement du taux d'intérêt à payer à la province sur la partie de l'avance utilisée à cette fin, et ainsi de suite, jusqu'à ce que l'avance ait été remboursée intégralement à la province;

(iv) malgré les sous-alinéas (ii) et (iii), dans l'éventualité où aucun intérêt ne serait payable à l'OOF au titre d'un prêt à un tiers, aucun intérêt ne sera à payer par l'OOF sur la partie de l'avance ainsi utilisée et dans la mesure où les conditions du prêt à un tiers prévoient le report du paiement d'intérêts courus pour une période, le paiement d'intérêts au titre d'une avance ou d'une partie d'une avance sera également reporté pour une période d'égale durée;

d) l'intérêt payable relativement à toute période de moins d'un an sera calculé en fonction du nombre de jours réellement compris dans cette période, par rapport à une année comptant 365 jours;

e) par dérogation à l'alinéa a) ci-dessus, l'intérêt sur toute partie d'une avance consentie à l'OOF dans le cadre du prêt que cette dernière utilise pour financer un prêt à un tiers est calculé comme il est indiqué ci-dessus, mais cet intérêt devient payable uniquement dans la mesure où l'OOF reçoit un paiement d'intérêts au titre du prêt à un tiers;

f) par dérogation à l'alinéa b) ci-dessus, toute partie du capital d'une avance consentie à l'OOF dans le cadre du prêt que cette dernière utilise pour financer un prêt à un tiers devient payable uniquement dans la mesure où l'OOF reçoit un remboursement du capital au titre du prêt à un tiers

g) le prêt autorisé en vertu des présentes sera attesté par un billet à ordre.

Proposed Items for Review

1. Approval of Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act, 1993 ("CIPA"),* authorizing the Minister of Finance to make a loan to the Ontario Financing Authority ("OFA").

Approvals required prior to LRC

	Committee and date	Cabinet Date
Policy		
TB/MBC	LRC, June 27, 2017	June 27, 2017

Deputy Minister _____ Date _____

Minister _____ Date _____

s. 1 Proposal and Context

- Approval is being sought for an OIC under section 22 of *Capital Investment Plan Act, 1993* ("CIPA"), which will authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority ("OFA") in an amount of up to $2.0~~3.5~~ billion. Under the proposed OIC, loan(s) could be advanced during the period between the effective date of the OIC and June 30, 204~~753~~.

- Subsection 22(1) of CIPA authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC"). Subsection 22(2) provides a statutory appropriation for loans made by the Minister to the OFA under subsection 22(1).

- Existing OICs authorize the Minister of Finance to provide loans to the OFA of up to $x, under which the OFA has provided loans and credit facilities to colleges, school boards and other public agencies such as Infrastructure Ontario, IESO, Ontario Lottery and Gaming Corporation and Liquor Control Board of Ontario.~~...~~

- This proposed OIC is required to expand the overall Minister of Finance lending authority to the OFA to allow the OFA to provide loans ["including"?] under credit facilities requested by the Independent Electricity System Operator (~~to the~~ ("IESO"). This ~~and~~ will help the IESO to fulfil the commitments under the proposed Fair Hydro Act, 2017, under anticipated and potential timing differences in the implementation of the proposed Fair Hydro Plan. The timing of this OIC is critical to ensure borrowing authority for the OFA is available ~~as it will be required~~ to provide the IESO its requested financing arrangements upon the enactment of the proposed *Ontario Fair Hydro Plan Act, 2017.*

Commented [SQ21]: Because we are picking a precise date, does this date work (30 year). Assumes plan is implemented July 1, 2017

Formatted: Indent: Left: 0.25", No bullets or numbering

Commented [SQ22]: We will need this number from Documentation as there are numerous OICs, including a large one ($6 billion+ for school boards)

Commented [RK3]: Include IESO in the list.

s. 2 Approach and Intended Outcomes

- Under CIPA, the OFA provides financing to public bodies as directed by the Minister of Finance. The OFA obtains the funds it needs for its lending program by borrowing from the Province. This OIC would authorize the Minister of Finance under section 22 of CIPA to provide additional loans to the OFA.

- As per subsection 3(1) of CIPA, the Minister of Finance is responsible for the administration of CIPA with respect to the OFA.

- This proposed OIC is required to assist in fulfilling the commitments under the proposed *Ontario Fair Hydro Plan Act, 2017.*

- It is expected that as part of the implementation of the proposed arrangements, the Minister of Finance will direct the OFA to provide a revolving credit facility for short term financing related to the on-going *Ontario Fair Hydro Plan Act, 2017*. In particular, the OFA would be directed to provide a credit facility~~will be lending~~ to the Independent Electricity System Operator ("IESO"). The IESO is a public body for the purposes of CIPA.

- Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.
- The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO ~~to sell~~ the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability~~.~~ to sell that asset.
    - It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
    - The cash received would be used by the IESO to fund the current Global Adjustment shortfall.
- However, there is expected to be initial and potential ongoing timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under ~~T~~the proposed legislation, ~~however, does not require the~~ OPG's SPV is not required to purchase any portion of the regulatory asset.
- As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset. ~~This short-term financing may also be required before the OPG SPV is operating and before it has its own financing in place to purchase the regulatory asset.~~

- IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan*

Formatted: Indent: Left: 0.5", Tab stops: 0.75", List tab + Not at 1"

Act, 2017. The $2 billion request from IESO is based on current data and assumptions which could change.

- ~~, therefore, i~~It is proposed that the OIC authorization be $~~3.5~~2.0 billion ~~[~~to ensure that there is sufficient ~~contingency~~borrowing authority in place for the OFA to meet the IESO ~~and other requirements once the implementation begins]~~'s.

- For the OFA to accommodate this request, the OFA requires additional borrowing authority from the Minister of Finance to ensure that it has sufficient funds to lend, hence the current request for an OIC.

- If approved, t~~T~~he Minister of Finance will subsequently ~~be required to~~ provide a Directive to the OFA to direct it to provide credit facilities ~~make loans~~ to the IESO in an amount not to exceed $~~3~~2.5 billion.
  - The OFA currently provides a credit facility to the IESO of $975 million.
  - The IESO has requested that the existing credit facility be reduced to $475 million, and a new credit facility be provided of $2 billion, for a total amount of $2.475 million.

Formatted: Font: 11 pt, Font color: Auto, English (United States)

Commented [RK4]: $2bn, unless there is an identifiable other reason OFA needs more borrowing authority.

Commented [RK5]: Add in only if this is justifiable.

Formatted: Font: 11 pt, Font color: Auto, English (United States)

Formatted: Indent: Left: 0.5", Tab stops: 0.75", List tab + Not at 1"

Formatted: Font: 11 pt, Font color: Auto, English (United States)

s. 3 Direction and Urgency

- As announced on March 2, 2017, and highlighted as a commitment in Budget 2017, the Province intends to implement the *Ontario Fair Hydro Plan Act, 2017*, which would reduce electricity bills by 25 per cent on average for eligible households.
- The ability for the OFA to have the requisite borrowing and lending capacity is instrumental in supporting implementation~~ing~~ of the proposed *Ontario Fair Hydro Plan Act, 2017*.
- Ministry of Energy proposed ~~R~~regulations under the proposed *Ontario Fair Hydro Plan Act, 2017* are expected to track for Cabinet approval by end of June 2017. It is expected that this OIC also be submitted for approval~~ed~~ concurrently as it ~~is~~supports a crucial component of the successfully implementation~~ing~~ of the Fair Hydro Plan.
- A related Cabinet Minute from the Ministry of Energy is tracking for June 27, 2017 date.

s. 4 Impact Assessment and Costs

- With this OIC, the Minister of Finance will be authorized to lend an additional amount of $x billion to the OFA. Subject to the terms and conditions of a Directive from the Minister of Finance, loans from the Minister of Finance to the OFA are expected to be at the Province's cost of funds.
- Loans advanced will result in increased borrowing in the debt markets by the Province.
- Loans are expected to be repaid and, therefore, no fiscal impact is expected.

s. 5 Implementation

- If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister will be required that will provide direction to the OFA on how ~~the OFA~~it can use the proceeds of the loan.

s. 6 Delivery and Results Tracking

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed *Ontario Fair Hydro Plan Act, 2017* and is required to ensure the timely implementation and support for the success of the Fair Hydro Plan.

s.7 Stakeholder Consultations

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed Fair Hydro Plan. The related Cabinet note for the initiative should be referred to.

s. 1 Proposal and Context

- Approval is being sought for an OIC under section 22 of *Capital Investment Plan Act, 1993* ("CIPA"), which will authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority ("OFA") in an amount of up to $2.0~~3.5~~ billion. Under the proposed OIC, loan(s) could be advanced during the period between the effective date of the OIC and June 30, 204~~753~~.

- Subsection 22(1) of CIPA authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC"). Subsection 22(2) provides a statutory appropriation for loans made by the Minister to the OFA under subsection 22(1).

- Existing OICs authorize the Minister of Finance to provide loans to the OFA of up to $x, under which the OFA has provided loans and credit facilities to colleges, school boards and other public agencies such as Infrastructure Ontario, IESO, Ontario Lottery and Gaming Corporation and Liquor Control Board of Ontario.~~...~~

- This proposed OIC is required to expand the overall Minister of Finance lending authority to the OFA to allow the OFA to provide loans ["including"?] under credit facilities requested by the Independent Electricity System Operator (~~to the~~ ("IESO"). This ~~and~~ will help the IESO to fulfil the commitments under the proposed Fair Hydro Act, 2017, under anticipated and potential timing differences in the implementation of the proposed Fair Hydro Plan. The timing of this OIC is critical to ensure borrowing authority for the OFA is available ~~as it will be required~~ to provide the IESO its requested financing arrangements upon the enactment of the proposed *Ontario Fair Hydro Plan Act, 2017.*

Commented [SQ21]: Because we are picking a precise date, does this date work (30 year). Assumes plan is implemented July 1, 2017

Formatted: Indent: Left: 0.25", No bullets or numbering

Commented [SQ22]: We will need this number from Documentation as there are numerous OICs, including a large one ($6 billion+ for school boards)

Commented [RK3]: Include IESO in the list.

s. 2 Approach and Intended Outcomes

- Under CIPA, the OFA provides financing to public bodies as directed by the Minister of Finance. The OFA obtains the funds it needs for its lending program by borrowing from the Province. This OIC would authorize the Minister of Finance under section 22 of CIPA to provide additional loans to the OFA.

- As per subsection 3(1) of CIPA, the Minister of Finance is responsible for the administration of CIPA with respect to the OFA.

- This proposed OIC is required to assist in fulfilling the commitments under the proposed *Ontario Fair Hydro Plan Act, 2017.*

- It is expected that as part of the implementation of the proposed arrangements, the Minister of Finance will direct the OFA to provide a revolving credit facility for short term financing related to the on-going *Ontario Fair Hydro Plan Act, 2017*. In particular, the OFA would be directed to provide a credit facility~~will be lending~~ to the Independent Electricity System Operator ("IESO"). The IESO is a public body for the purposes of CIPA.

- Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.
- The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO ~~to sell~~ the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability~~.~~ to sell that asset.
    - It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
    - The cash received would be used by the IESO to fund the current Global Adjustment shortfall.
- However, there is expected to be initial and potential ongoing timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under ~~T~~the proposed legislation, ~~however, does not require the~~ OPG's SPV is not required to purchase any portion of the regulatory asset.
- As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset. ~~This short-term financing may also be required before the OPG SPV is operating and before it has its own financing in place to purchase the regulatory asset.~~

- IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan*

Formatted: Indent: Left: 0.5", Tab stops: 0.75", List tab + Not at 1"

Act, 2017. The $2 billion request from IESO is based on current data and assumptions which could change.

- ~~, therefore, i~~It is proposed that the OIC authorization be $~~3.5~~2.0 billion ~~[~~to ensure that there is sufficient ~~contingency~~borrowing authority in place for the OFA to meet the IESO ~~and other requirements once the implementation begins]~~'s.

- For the OFA to accommodate this request, the OFA requires additional borrowing authority from the Minister of Finance to ensure that it has sufficient funds to lend, hence the current request for an OIC.

- If approved, t~~T~~he Minister of Finance will subsequently ~~be required to~~ provide a Directive to the OFA to direct it to provide credit facilities ~~make loans~~ to the IESO in an amount not to exceed $~~3~~2.5 billion.
  - The OFA currently provides a credit facility to the IESO of $975 million.
  - The IESO has requested that the existing credit facility be reduced to $475 million, and a new credit facility be provided of $2 billion, for a total amount of $2.475 million.

Formatted: Font: 11 pt, Font color: Auto, English (United States)

Commented [RK4]: $2bn, unless there is an identifiable other reason OFA needs more borrowing authority.

Commented [RK5]: Add in only if this is justifiable.

Formatted: Font: 11 pt, Font color: Auto, English (United States)

Formatted: Font: 11 pt, Font color: Auto, English (United States)

s. 3 Direction and Urgency

- As announced on March 2, 2017, and highlighted as a commitment in Budget 2017, the Province intends to implement the *Ontario Fair Hydro Plan Act, 2017*, which would reduce electricity bills by 25 per cent on average for eligible households.
- The ability for the OFA to have the requisite borrowing and lending capacity is instrumental in supporting implementation~~ing~~ of the proposed *Ontario Fair Hydro Plan Act, 2017*.
- Ministry of Energy proposed ~~R~~regulations under the proposed *Ontario Fair Hydro Plan Act, 2017* are expected to track for Cabinet approval by end of June 2017. It is expected that this OIC also be submitted for approval~~ed~~ concurrently as it ~~is~~supports a crucial component of the successfully implementation~~ing~~ of the Fair Hydro Plan.
- A related Cabinet Minute from the Ministry of Energy is tracking for June 27, 2017 date.

s. 4 Impact Assessment and Costs

- With this OIC, the Minister of Finance will be authorized to lend an additional amount of $x billion to the OFA. Subject to the terms and conditions of a Directive from the Minister of Finance, loans from the Minister of Finance to the OFA are expected to be at the Province's cost of funds.
- Loans advanced will result in increased borrowing in the debt markets by the Province.
- Loans are expected to be repaid and, therefore, no fiscal impact is expected.

s. 5 Implementation

- If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister will be required that will provide direction to the OFA on how ~~the OFA~~it can use the proceeds of the loan.

s. 6 Delivery and Results Tracking

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed *Ontario Fair Hydro Plan Act, 2017* and is required to ensure the timely implementation and support for the success of the Fair Hydro Plan.

s.7 Stakeholder Consultations

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed Fair Hydro Plan. The related Cabinet note for the initiative should be referred to.

MEMORANDUM TO: Scott Thompson
Deputy Minister of Finance

FROM: Gadi Mayman
Chief Executive Officer

SUBJECT: **Approval of an Order in Council under section 22 of the *Capital Investment Plan Act***

Attached for the Minister's approval and signature is an Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act* ("CIPA") for the purpose of authorizing the Minister of Finance to make loan(s) to the Ontario Financing Authority ("OFA"). The proceeds from these loans would allow the OFA to lend to the Independent Electricity Systems Operator ("IESO") in connection with the implementation of the Province's proposed *Ontario Fair Hydro Plan Act, 2017*, subject to the approval of the Legislature.

Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly ~~-~~funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers. The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO ~~to sell~~ the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell that asset. It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV"), an OPG special purpose vehicle or trust). The cash received would be used by the IESO to fund the current Global Adjustment shortfall.

However, there is expected to be initial and potential ongoing timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly

settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under the proposed legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.

../2

Scott Thompson
Page 2

As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset. ~~The proposed legislation, however, does not require the OPG SPV to purchase any portion of the regulatory asset. As a result, IESO requires short-term financing to be in place in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset.~~

~~../2~~
~~Scott Thompson~~
~~Page 2~~

The OFA obtains the funding it needs to carry out its lending program by borrowing from the Province. This proposed OIC authorizes the Minister of Finance to lend up to Canadian $2.0~~3.5~~ billion to the OFA. In addition, in order for the OFA to make the loan to the IESO, a direction from the Minister of Finance under CIPA will also be required.

Attached for your signature is a memorandum from you to the Minister requesting that the Minister recommend the OIC. This OIC is on track to be considered on June 27, 2017 together with proposed submission related to the proposed *Ontario Fair Hydro Plan Act, 2017.*

Staff are available to address any questions you may have regarding this matter.

Order in Council
Décret

On the recommendation of the undersigned, the Lieutenant Governor of Ontario, by and with the advice and concurrence of the Executive Council of Ontario, orders that:

Sur la recommandation de la personne soussignée, la lieutenante-gouverneure de l'Ontario, sur l'avis et avec le consentement du Conseil exécutif de l'Ontario, décrète ce qui suit :

WHEREAS pursuant to subsection 22(1) of the *Capital Investment Plan Act, 1993* (the "Act"), the Minister of Finance may purchase securities of or make loans to corporations established under subsection 2(1) of the Act in such amounts, at such times and on such terms and conditions as the Lieutenant Governor in Council considers expedient;

AND WHEREAS the Ontario Financing Authority (the "OFA") is a corporation established under subsection 2(1) of the Act;

AND WHEREAS pursuant to subsection 6(3) of the Act, the power of a corporation established under subsection 2(1) of the Act to borrow and issue securities, among other things, may only be exercised under the authority of a by-law that has been approved by the Minister of Finance;

AND WHEREAS the OFA wishes to borrow up to Two ~~hree~~ Billion ~~Five Hundred Million~~ Dollars in lawful money of Canada from the Minister of Finance and has been authorized to do so by a borrowing by-law approved in accordance with the Act;

THEREFORE:

Pursuant to subsection 22 (1) of the Act, the Minister of Finance is authorized to lend a maximum of Two ~~hree~~ Billion ~~Five Hundred Million~~ Dollars in lawful money of Canada to the OFA on the following terms and conditions:

(a) the loan may be advanced in such amounts and at such time or times as required by the OFA;

(b) repayment of advances made under the loan plus accrued interest may be made in whole or in part at any time provided that the loan plus any accrued interest shall be fully repaid by June 30, 2053;

(c) each advance (an “Advance”) made under the loan hereby authorized shall bear interest at a rate which is determined as follows:

(i) from the date of the Advance to (but excluding) the date of repayment the Advance shall bear interest at a per annum rate equivalent to the yield earned on ninety day Province of Ontario treasury bills on the date before the Advance Date as determined by the Province, provided that if an Advance is outstanding for longer than ninety days, the interest rate shall be reset on the last day of each ninety day period (the “Reset Date”) to the yield earned on ninety day Province of Ontario treasury bills immediately preceding the Reset Date for such ninety day period as determined by the Province;

(ii) in the event that moneys included in an Advance are used by the OFA for the purpose of funding loans to third parties (a “Third Party Loan”), the rate of interest payable by the OFA to the Province on the portion of the Advance so used shall be adjusted effective as of the date that the portion of the Advance is used to fund the Third Party Loan so that the per annum rate of interest payable by the OFA on such moneys is equivalent to the per annum rate of interest payable to the OFA under the Third Party Loan less an amount as may be determined by the Minister of Finance in respect of such Third Party Loan or a class of such Third Party Loans, until but excluding the date on which the Third Party Loan is repaid, at which time the interest rate set out in subparagraph (i) shall again be applicable to that portion of the Advance; and

(iii) in the event that moneys described in subparagraph (ii), once repaid, are subsequently used to fund loans to third parties, subparagraph (ii) shall again be applicable in determining the interest rate payable to the Province on that portion of the Advance used to fund such loan, and so on, until the Advance shall be repaid to the Province in full;

(iv) despite subparagraphs (ii) and (iii), in the event that no interest is payable to the OFA under a Third Party Loan, no interest shall be payable by the OFA on the portion of the Advance so used and to the extent that the terms of a Third Party Loan provide for the deferral of the payment of accrued interest for a period, the interest payment terms of an Advance or portion thereof shall also be deferred for a similar period.

(d) interest for any period of less than one year shall be payable for the actual number of days included in such period, computed on the basis of a 365-day year;

(e) despite paragraph (b) of this Order, interest on any portion of an Advance made to the OFA under the loan that is used by the OFA to fund a Third Party Loan shall accrue on the basis stated above but shall become payable only to the extent the OFA receives payment of interest under the relevant Third Party Loan;

(f) despite paragraph (b) of this Order, any portion of the principal of an Advance made to the OFA under the loan that is used by the OFA to fund a Third Party Loan shall become payable only to the extent the OFA receives repayment of principal under the relevant Third Party Loan; and

(g) the loan hereby authorized shall be evidenced by a promissory note.

ATTENDU QUE le ministre des Finances peut, en vertu du paragraphe 22 (1) de la *Loi de 1993 sur le plan d'investissement* (la « Loi »), acheter des valeurs mobilières des personnes morales créées en vertu du paragraphe 2 (1) de la Loi ou leur consentir des prêts selon les montants, aux moments et aux conditions que le lieutenant-gouverneur en conseil estime opportuns;

ATTENDU QUE l'Office ontarien de financement (l'« OOF ») est une personne morale créée en vertu du paragraphe 2 (1) de la Loi;

ATTENDU QUE, conformément au paragraphe 6 (3) de la Loi, le pouvoir qu'ont les personnes morales créées en vertu du paragraphe 2 (1) de la Loi de contracter des emprunts et d'émettre des valeurs mobilières, entre autres, ne peut être exercé qu'aux termes d'un règlement administratif approuvé par le ministre des Finances;

ATTENDU QUE l'OOF souhaite emprunter jusqu'à concurrence de deux~~trois~~ milliards ~~cinq cent millions~~ de dollars en monnaie légale du Canada du ministre des Finances et qu'il a été autorisé à le faire par un règlement administratif d'emprunt approuvé conformément à la Loi;

PAR CONSÉQUENT :

en vertu du paragraphe 22 (1) de la Loi, le ministre des Finances est autorisé à prêter un montant maximal de deux ~~trois~~ milliards ~~cinq cent millions~~ de dollars en monnaie légale du Canada à l'OOF, aux conditions suivantes :

a) le prêt peut être consenti selon les montants et aux moments qui conviennent à l'OOF;

b) le remboursement des avances consenties au titre du prêt, plus les intérêts courus, peut à tout moment être effectué en totalité ou en partie, pourvu que le prêt et les intérêts courus soient entièrement remboursés au plus tard le 30 juin 2053;

c) chaque avance (« avance ») faite au titre du prêt autorisé par les présentes portera intérêt au taux est fixé comme suit :

(i) de la date où elle a été faite jusqu'à la date (non comprise) de son remboursement, l'avance portera intérêt à un taux annuel équivalant au rendement gagné sur des bons du Trésor de la province de l'Ontario de quatre-vingt-dix jours à la date précédant la date de l'avance fixée par la province, pourvu que ce taux d'intérêt soit rajusté le dernier jour de chaque période de quatre-vingt-dix jours (« date de rajustement ») selon le rendement gagné sur de tels bons du Trésor immédiatement avant la date de rajustement pour une période de quatre-vingt-dix jours décidée par la province, si l'avance est impayée pendant plus de quatre-vingt-dix jours;

(ii) dans l'éventualité où l'OOF se servirait de sommes comprises dans une avance pour financer des prêts à des tiers, le taux d'intérêt à payer par l'OOF à la province sur la partie de l'avance ainsi utilisée sera rajusté à la date à laquelle la partie de l'avance sera utilisée pour le financement du prêt à un tiers de façon que le taux d'intérêt annuel à payer par l'OOF sur de telles sommes soit équivalent à ce

dernier taux moins un montant que pourra fixer le ministre des Finances à l'égard d'un tel prêt ou d'une telle catégorie de prêt, jusqu'à la date (non comprise) à laquelle le prêt à un tiers sera remboursé, date à laquelle le taux d'intérêt établi au sous-alinéa (i) s'appliquera de nouveau à cette partie de l'avance;

(iii) dans l'éventualité où les sommes décrites au sous-alinéa (ii), une fois remboursées, seraient ultérieurement utilisées pour le financement de prêts à des tiers, le sous-alinéa (ii) s'appliquera de nouveau dans l'établissement du taux d'intérêt à payer à la province sur la partie de l'avance utilisée à cette fin, et ainsi de suite, jusqu'à ce que l'avance ait été remboursée intégralement à la province;

(iv) malgré les sous-alinéas (ii) et (iii), dans l'éventualité où aucun intérêt ne serait payable à l'OOF au titre d'un prêt à un tiers, aucun intérêt ne sera à payer par l'OOF sur la partie de l'avance ainsi utilisée et dans la mesure où les conditions du prêt à un tiers prévoient le report du paiement d'intérêts courus pour une période, le paiement d'intérêts au titre d'une avance ou d'une partie d'une avance sera également reporté pour une période d'égale durée;

d) l'intérêt payable relativement à toute période de moins d'un an sera calculé en fonction du nombre de jours réellement compris dans cette période, par rapport à une année comptant 365 jours;

e) par dérogation à l'alinéa a) ci-dessus, l'intérêt sur toute partie d'une avance consentie à l'OOF dans le cadre du prêt que cette dernière utilise pour financer un prêt à un tiers est calculé comme il est indiqué ci-dessus, mais cet intérêt devient payable uniquement dans la mesure où l'OOF reçoit un paiement d'intérêts au titre du prêt à un tiers;

f) par dérogation à l'alinéa b) ci-dessus, toute partie du capital d'une avance consentie à l'OOF dans le cadre du prêt que cette dernière utilise pour financer un prêt à un tiers devient payable uniquement dans la mesure où l'OOF reçoit un remboursement du capital au titre du prêt à un tiers

g) le prêt autorisé en vertu des présentes sera attesté par un billet à ordre.

Hi Gadi,

Just an FYI. It's a work in progress, but the DMO wanted to see a draft for today, which we will try to do.

I'm inclined to just have the amount as $2 bn, to meet the IESO request for the FHP-specific facility, unless there are other reasons/needs to expand the authority for other OFA purposes that you are aware of.

Subject: OIC s22 CIPA - OFA-IESO - LRC package

Hi Ron,

Please find attached the LRC package for an OIC authorizing the Minister of Finance to lend to the OFA. In order for the OFA to lend to the IESO as part of the proposed Fair Hydro Plan Act, the OFA borrows from the Province (Minister of Finance). The OIC is being obtained under section 22 of the Capital Investment Plan Act.

The package is getting sign-off from MOF legal at the moment, and it's aiming to get yours and Gadi's sign off today in order to get this to DMO to make sure this will be on June 27th LRC date. MOF legal has already reviewed the package, so I do not expect any further changes from them. I will provide you the hard copy of the package once Legal signed off on that.

Proposed Items for Review

1. Approval of Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act, 1993 ("CIPA"),* authorizing the Minister of Finance to make a loan to the Ontario Financing Authority ("OFA").

Approvals required prior to LRC

	Committee and date	Cabinet Date
Policy		
TB/MBC	LRC, June 27, 2017	June 27, 2017

Deputy Minister _____ Date _____

Minister _____ Date _____

s. 1 Proposal and Context

- Approval is being sought for an OIC under section 22 of *Capital Investment Plan Act, 1993* ("CIPA"), which will authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority ("OFA") in an amount of up to $3.5 billion. Under the proposed OIC, loan(s) could be advanced during the period between the effective date of the OIC and June 30, 2053.

- Subsection 22(1) of CIPA authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC"). Subsection 22(2) provides a statutory appropriation for loans made by the Minister to the OFA under subsection 22(1).

- Existing OICs authorize the Minister of Finance to provide loans to the OFA of up to $x, under which the OFA has provided loans and credit facilities to …

- This proposed OIC is required to expand the overall Minister of Finance lending authority to the OFA to allow the OFA to provide loans ["including"?] under credit facilities requested by the Independent Electricity System Operator (~~to the~~ ("IESO"). This ~~and~~ will help the IESO to fulfil the commitments under the proposed Fair Hydro Act, 2017, under anticipated and potential timing differences in the implementation of the proposed Fair Hydro Plan. The timing of this OIC is critical to ensure borrowing authority for the OFA is available ~~as it will be required~~ to provide the IESO its requested financing arrangements upon the enactment of the proposed *Ontario Fair Hydro Plan Act, 2017.*

Commented [RK1]: Why this amount? Unless we can provide a reason beyond the FHP, I'd rather not go so high.

Commented [RK2]: Why this date? Tied to what?

Formatted: Indent: Left: 0.25", No bullets or numbering

Commented [RK3]: Include IESO in the list.

s. 2 Approach and Intended Outcomes

- Under CIPA, the OFA provides financing to public bodies as directed by the Minister of Finance. The OFA obtains the funds it needs for its lending program by borrowing from the Province. This OIC would authorize the Minister of Finance under section 22 of CIPA to provide additional loans to the OFA.

- As per subsection 3(1) of CIPA, the Minister of Finance is responsible for the administration of CIPA with respect to the OFA.

- This proposed OIC is required to assist in fulfilling the commitments under the proposed *Ontario Fair Hydro Plan Act, 2017.*

- It is expected that as part of the implementation of the proposed arrangements, the Minister of Finance will direct the OFA to provide a revolving credit facility for short term financing related to the on-going *Ontario Fair Hydro Plan Act, 2017*. In particular, the OFA would be directed to provide a credit facility~~will be lending~~ to the Independent Electricity System Operator ("IESO"). The IESO is a public body for the purposes of CIPA.

- Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.
- The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO ~~to sell~~ the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability~~.~~ to sell that asset.
    - It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
    - The cash received would be used by the IESO to fund the current Global Adjustment shortfall.
- However, there is expected to be initial and potential timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under ~~T~~the proposed legislation, ~~however, does not require the~~ OPG's SPV is not required to purchase any portion of the regulatory asset.
- As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset. ~~This short-term financing may also be required before the OPG SPV is operating and before it has its own financing in place to purchase the regulatory asset.~~

- IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan Act, 2017*. The $2 billion request from IESO is based on current data and assumptions which could change.

Formatted: Indent: Left: 0.5", Tab stops: 0.75", List tab + Not at 1"

Formatted: Font: 11 pt, Font color: Auto, English (United States)

- ~~, therefore, i~~It is proposed that the OIC authorization be $3.5 billion [to ensure that there is sufficient ~~contingency~~borrowing authority in place for the OFA to meet the IESO and other requirements ~~once the implementation begins~~].

- For the OFA to accommodate this request, the OFA requires additional borrowing authority from the Minister of Finance to ensure that it has sufficient funds to lend, hence the current request for an OIC.

- If approved, t~~T~~he Minister of Finance will subsequently ~~be required to~~ provide a Directive to the OFA to direct it to provide credit facilities ~~make loans~~ to the IESO in an amount not to exceed $~~3~~2.5 billion.
  - The OFA currently provides a credit facility to the IESO of $975 million.
  - The IESO has requested that the existing credit facility be reduced to $475 million, and a new credit facility be provided of $2 billion, for a total amount of $2.475 million.

Commented [RK4]: $2bn, unless there is an identifiable other reason OFA needs more borrowing authority.

Commented [RK5]: Add in only if this is justifiable.

Formatted: Font: 11 pt, Font color: Auto, English (United States)

Formatted: Indent: Left: 0.5", Tab stops: 0.75", List tab + Not at 1"

Formatted: Font: 11 pt, Font color: Auto, English (United States)

s. 3 Direction and Urgency

- As announced on March 2, 2017, and highlighted as a commitment in Budget 2017, the Province intends to implement the *Ontario Fair Hydro Plan Act, 2017*, which would reduce electricity bills by 25 per cent on average for eligible households.
- The ability for the OFA to have the requisite borrowing and lending capacity is instrumental in supporting implementation~~ing~~ of the proposed *Ontario Fair Hydro Plan Act, 2017*.
- Ministry of Energy proposed ~~R~~regulations under the proposed *Ontario Fair Hydro Plan Act, 2017* are expected to track for Cabinet approval by end of June 2017. It is expected that this OIC also be submitted for approval~~ed~~ concurrently as it ~~is~~supports a crucial component of the successfully implementation~~ing~~ of the Fair Hydro Plan.
- A related Cabinet Minute from the Ministry of Energy is tracking for June 27, 2017 date.

s. 4 Impact Assessment and Costs

- With this OIC, the Minister of Finance will be authorized to lend an additional amount of $x billion to the OFA. Subject to the terms and conditions of a

Directive from the Minister of Finance, loans from the Minister of Finance to the OFA are expected to be at the Province's cost of funds.

- Loans advanced will result in increased borrowing in the debt markets by the Province.
- Loans are expected to be repaid and, therefore, no fiscal impact is expected.

s. 5 Implementation

- If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister will be required that will provide direction to the OFA on how ~~the OFA~~it can use the proceeds of the loan.

s. 6 Delivery and Results Tracking

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed *Ontario Fair Hydro Plan Act, 2017* and is required to ensure the timely implementation and support for the success of the Fair Hydro Plan.

s.7 Stakeholder Consultations

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed Fair Hydro Plan. The related Cabinet note for the initiative should be referred to.

Ontario

Order in Council
Décret

On the recommendation of the undersigned, the Lieutenant Governor of Ontario, by and with the advice and concurrence of the Executive Council of Ontario, orders that:

Sur la recommandation de la personne soussignée, la lieutenante-gouverneure de l'Ontario, sur l'avis et avec le consentement du Conseil exécutif de l'Ontario, décrète ce qui suit :

WHEREAS pursuant to subsection 22(1) of the *Capital Investment Plan Act, 1993* (the "Act"), the Minister of Finance may purchase securities of or make loans to corporations established under subsection 2(1) of the Act in such amounts, at such times and on such terms and conditions as the Lieutenant Governor in Council considers expedient;

AND WHEREAS the Ontario Financing Authority (the "OFA") is a corporation established under subsection 2(1) of the Act;

AND WHEREAS pursuant to subsection 6(3) of the Act, the power of a corporation established under subsection 2(1) of the Act to borrow and issue securities, among other things, may only be exercised under the authority of a by-law that has been approved by the Minister of Finance;

AND WHEREAS the OFA wishes to borrow up to Three Billion Five Hundred Million Dollars in lawful money of Canada from the Minister of Finance and has been authorized to do so by a borrowing by-law approved in accordance with the Act;

Commented [RK1]: Why this amount? Unless we can provide a reason beyond the FHP, I'd rather not go so high.

THEREFORE:

Pursuant to subsection 22 (1) of the Act, the Minister of Finance is authorized to lend a maximum of Three Billion Five Hundred Million Dollars in lawful money of Canada to the OFA on the following terms and conditions:

(a) the loan may be advanced in such amounts and at such time or times as required by the OFA;

(b) repayment of advances made under the loan plus accrued interest may be made in whole or in part at any time provided that the loan plus any accrued interest shall be fully repaid by June 30, 2053;

(c) each advance (an “Advance”) made under the loan hereby authorized shall bear interest at a rate which is determined as follows:

(i) from the date of the Advance to (but excluding) the date of repayment the Advance shall bear interest at a per annum rate equivalent to the yield earned on ninety day Province of Ontario treasury bills on the date before the Advance Date as determined by the Province, provided that if an Advance is outstanding for longer than ninety days, the interest rate shall be reset on the last day of each ninety day period (the “Reset Date”) to the yield earned on ninety day Province of Ontario treasury bills immediately preceding the Reset Date for such ninety day period as determined by the Province;

(ii) in the event that moneys included in an Advance are used by the OFA for the purpose of funding loans to third parties (a “Third Party Loan”), the rate of interest payable by the OFA to the Province on the portion of the Advance so used shall be adjusted effective as of the date that the portion of the Advance is used to fund the Third Party Loan so that the per annum rate of interest payable by the OFA on such moneys is equivalent to the per annum rate of interest payable to the OFA under the Third Party Loan less an amount as may be determined by the Minister of Finance in respect of such Third Party Loan or a class of such Third Party Loans, until but excluding the date on which the Third Party Loan is repaid, at which time the interest rate set out in subparagraph (i) shall again be applicable to that portion of the Advance; and

(iii) in the event that moneys described in subparagraph (ii), once repaid, are subsequently used to fund loans to third parties, subparagraph (ii) shall again be applicable in determining the interest rate payable to the Province on that portion of the Advance used to fund such loan, and so on, until the Advance shall be repaid to the Province in full;

(iv) despite subparagraphs (ii) and (iii), in the event that no interest is payable to the OFA under a Third Party Loan, no interest shall be payable by the OFA on the portion of the Advance so used and to the extent that the terms of a Third Party Loan provide for the deferral of the payment of accrued interest for a period, the interest payment terms of an Advance or portion thereof shall also be deferred for a similar period.

(d) interest for any period of less than one year shall be payable for the actual number of days included in such period, computed on the basis of a 365-day year;

(e) despite paragraph (b) of this Order, interest on any portion of an Advance made to the OFA under the loan that is used by the OFA to fund a Third Party Loan shall accrue on the basis stated above but shall become payable only to the extent the OFA receives payment of interest under the relevant Third Party Loan;

(f) despite paragraph (b) of this Order, any portion of the principal of an Advance made to the OFA under the loan that is used by the OFA to fund a Third Party Loan shall become payable only to the extent the OFA receives repayment of principal under the relevant Third Party Loan; and

(g) the loan hereby authorized shall be evidenced by a promissory note.

ATTENDU QUE le ministre des Finances peut, en vertu du paragraphe 22 (1) de la *Loi de 1993 sur le plan d'investissement* (la « Loi »), acheter des valeurs mobilières des personnes morales créées en vertu du paragraphe 2 (1) de la Loi ou leur consentir des prêts selon les montants, aux moments et aux conditions que le lieutenant-gouverneur en conseil estime opportuns;

ATTENDU QUE l'Office ontarien de financement (l'« OOF ») est une personne morale créée en vertu du paragraphe 2 (1) de la Loi;

ATTENDU QUE, conformément au paragraphe 6 (3) de la Loi, le pouvoir qu'ont les personnes morales créées en vertu du paragraphe 2 (1) de la Loi de contracter des emprunts et d'émettre des valeurs mobilières, entre autres, ne peut être exercé qu'aux termes d'un règlement administratif approuvé par le ministre des Finances;

ATTENDU QUE l'OOF souhaite emprunter jusqu'à concurrence de trois milliards cinq cent millions de dollars en monnaie légale du Canada du ministre des Finances et qu'il a été autorisé à le faire par un règlement administratif d'emprunt approuvé conformément à la Loi;

PAR CONSÉQUENT :

en vertu du paragraphe 22 (1) de la Loi, le ministre des Finances est autorisé à prêter un montant maximal de trois milliards cinq cent millions de dollars en monnaie légale du Canada à l'OOF, aux conditions suivantes :

a) le prêt peut être consenti selon les montants et aux moments qui conviennent à l'OOF;

b) le remboursement des avances consenties au titre du prêt, plus les intérêts courus, peut à tout moment être effectué en totalité ou en partie, pourvu que le prêt et les intérêts courus soient entièrement remboursés au plus tard le 30 juin 2053;

c) chaque avance (« avance ») faite au titre du prêt autorisé par les présentes portera intérêt au taux est fixé comme suit :

(i) de la date où elle a été faite jusqu'à la date (non comprise) de son remboursement, l'avance portera intérêt à un taux annuel équivalant au rendement gagné sur des bons du Trésor de la province de l'Ontario de quatre-vingt-dix jours à la date précédant la date de l'avance fixée par la province, pourvu que ce taux d'intérêt soit rajusté le dernier jour de chaque période de quatre-vingt-dix jours (« date de rajustement ») selon le rendement gagné sur de tels bons du Trésor immédiatement avant la date de rajustement pour une période de quatre-vingt-dix jours décidée par la province, si l'avance est impayée pendant plus de quatre-vingt-dix jours;

(ii) dans l'éventualité où l'OOF se servirait de sommes comprises dans une avance pour financer des prêts à des tiers, le taux d'intérêt à payer par l'OOF à la province sur la partie de l'avance ainsi utilisée sera rajusté à la date à laquelle la partie de l'avance sera utilisée pour le financement du prêt à un tiers de façon que le taux d'intérêt annuel à payer par l'OOF sur de telles sommes soit équivalent à ce

dernier taux moins un montant que pourra fixer le ministre des Finances à l'égard d'un tel prêt ou d'une telle catégorie de prêt, jusqu'à la date (non comprise) à laquelle le prêt à un tiers sera remboursé, date à laquelle le taux d'intérêt établi au sous-alinéa (i) s'appliquera de nouveau à cette partie de l'avance;

(iii) dans l'éventualité où les sommes décrites au sous-alinéa (ii), une fois remboursées, seraient ultérieurement utilisées pour le financement de prêts à des tiers, le sous-alinéa (ii) s'appliquera de nouveau dans l'établissement du taux d'intérêt à payer à la province sur la partie de l'avance utilisée à cette fin, et ainsi de suite, jusqu'à ce que l'avance ait été remboursée intégralement à la province;

(iv) malgré les sous-alinéas (ii) et (iii), dans l'éventualité où aucun intérêt ne serait payable à l'OOF au titre d'un prêt à un tiers, aucun intérêt ne sera à payer par l'OOF sur la partie de l'avance ainsi utilisée et dans la mesure où les conditions du prêt à un tiers prévoient le report du paiement d'intérêts courus pour une période, le paiement d'intérêts au titre d'une avance ou d'une partie d'une avance sera également reporté pour une période d'égale durée;

d) l'intérêt payable relativement à toute période de moins d'un an sera calculé en fonction du nombre de jours réellement compris dans cette période, par rapport à une année comptant 365 jours;

e) par dérogation à l'alinéa a) ci-dessus, l'intérêt sur toute partie d'une avance consentie à l'OOF dans le cadre du prêt que cette dernière utilise pour financer un prêt à un tiers est calculé comme il est indiqué ci-dessus, mais cet intérêt devient payable uniquement dans la mesure où l'OOF reçoit un paiement d'intérêts au titre du prêt à un tiers;

f) par dérogation à l'alinéa b) ci-dessus, toute partie du capital d'une avance consentie à l'OOF dans le cadre du prêt que cette dernière utilise pour financer un prêt à un tiers devient payable uniquement dans la mesure où l'OOF reçoit un remboursement du capital au titre du prêt à un tiers

g) le prêt autorisé en vertu des présentes sera attesté par un billet à ordre.

Hi Nancy,

For sure.

A few copy edits were made subsequently, and the attached was sent for comment. Note that the OIC itself does not mention the FHP, but just would increase the OFA's borrowing room under CIPA.

Hi Nancy,

Not the draft, as of yet. They are aware of the requirement and ask by IESO (and included in the TB report back TB assessment note and noted in the TB Minute in early May), but it would be an MOF submission, as under CIPA and the OFA.

Scott took a look at the draft. He said it looked fine, on a skim.

We can share the draft as is, if you're okay with it.

Hi Gadi,

Just an FYI. It's a work in progress, but the DMO wanted to see a draft for today, which we will try to do.

I'm inclined to just have the amount as $2 bn, to meet the IESO request for the FHP-specific facility, unless there are other reasons/needs to expand the authority for other OFA purposes that you are aware of.

Subject: OIC s22 CIPA - OFA-IESO - LRC package

Hi Ron,

Please find attached the LRC package for an OIC authorizing the Minister of Finance to lend to the OFA. In order for the OFA to lend to the IESO as part of the proposed Fair Hydro Plan Act, the OFA borrows from the Province (Minister of Finance). The OIC is being obtained under section 22 of the Capital Investment Plan Act.

The package is getting sign-off from MOF legal at the moment, and it's aiming to get yours and Gadi's sign off today in order to get this to DMO to make sure this will be on June 27th LRC date. MOF legal has already reviewed the package, so I do not expect any further changes from them. I will provide you the hard copy of the package once Legal signed off on that.

The documents are also saved here:

Proposed Items for Review

1. Approval of Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act, 1993 ("CIPA"),* authorizing the Minister of Finance to make a loan to the Ontario Financing Authority ("OFA").

Approvals required prior to LRC

	Committee and date	Cabinet Date
Policy		
TB/MBC	LRC, June 27, 2017	June 27, 2017

Deputy Minister _____ Date _____

Minister _____ Date _____

s. 1 Proposal and Context

- Approval is being sought for an OIC under section 22 of *Capital Investment Plan Act, 1993* ("CIPA"), which will authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority ("OFA") in an amount of up to $2.0 billion. Under the proposed OIC, loan(s) could be advanced during the period between the effective date of the OIC and [December 31, 2047.

- Subsection 22(1) of CIPA authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC"). Subsection 22(2) provides a statutory appropriation for loans made by the Minister to the OFA under subsection 22(1).

- Existing OICs authorize the Minister of Finance to provide loans to the OFA under which the OFA has provided loans and credit facilities to colleges, school boards and other public agencies such as Infrastructure Ontario, IESO, Ontario Lottery and Gaming Corporation and Liquor Control Board of Ontario.

- This proposed OIC is required to expand the overall Minister of Finance lending authority to the OFA to allow the OFA to provide loans under credit facilities requested by the Independent Electricity System Operator ("IESO").
    - This will help the IESO to fulfil the commitments under the proposed Fair Hydro Act, 2017, under anticipated and potential timing differences in the implementation of the proposed Fair Hydro Plan.
    - The timing of this OIC is critical to ensure borrowing authority for the OFA is available to provide the IESO its requested financing arrangements upon the enactment of the proposed *Ontario Fair Hydro Plan Act, 2017.*

s. 2 Approach and Intended Outcomes

- Under CIPA, the OFA provides financing to public bodies as directed by the Minister of Finance. The OFA obtains the funds it needs for its lending program by borrowing from the Province. This OIC would authorize the Minister of Finance under section 22 of CIPA to provide additional loans to the OFA.

- As per subsection 3(1) of CIPA, the Minister of Finance is responsible for the administration of CIPA with respect to the OFA.

- This proposed OIC is required to assist in fulfilling the commitments under the proposed *Ontario Fair Hydro Plan Act, 2017.*

- It is expected that as part of the implementation of the proposed arrangements, the Minister of Finance will direct the OFA to provide a revolving credit facility for short term financing related to the on-going *Ontario Fair Hydro Plan Act, 2017*. In particular, the OFA would be directed to provide a credit facility to the Independent Electricity System Operator ("IESO"). The IESO is a public body for the purposes of CIPA.

- Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.

- The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell that asset.
    - It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
    - The cash received would be used by the IESO to fund the current Global Adjustment shortfall.

- However, there is expected to be initial and potential ongoing IESO cash flow requirement timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under the proposed legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.

- As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset.

- IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan Act, 2017*.
- It is proposed that the OIC authorization be for $2.0 billion, which would be in addition to existing authority for the Minister of Finance to provide loans to the OFA, to ensure that there is sufficient borrowing authority in place for the OFA to meet the IESO requirements.

-
- If approved, the Minister of Finance will subsequently provide a Directive to the OFA to direct it to provide credit facilities to the IESO in an amount not to exceed $2.5 billion.
    - The OFA currently provides a credit facility to the IESO of $975 million.
    - The IESO has requested that the existing credit facility be reduced to $475 million, and a new credit facility be provided of $2 billion, for a total amount of $2.475 million.

s. 3 Direction and Urgency

- As announced on March 2, 2017, and highlighted as a commitment in Budget 2017, the Province intends to implement the *Ontario Fair Hydro Plan Act, 2017,* which would reduce electricity bills by 25 per cent on average for eligible households.
- The ability for the OFA to have the requisite borrowing and lending capacity is instrumental in supporting implementation of the proposed *Ontario Fair Hydro Plan Act, 2017*.
- Ministry of Energy proposed regulations under the proposed *Ontario Fair Hydro Plan Act, 2017* are expected to track for Cabinet approval by end of June 2017. It is expected that this OIC also be submitted for approval concurrently as it supports a crucial component of the successfully implementation of the Fair Hydro Plan.
- A related Cabinet Minute from the Ministry of Energy is tracking for June 27, 2017 date.

s. 4 Impact Assessment and Costs

- With this OIC, the Minister of Finance will be authorized to lend an additional amount of $2 billion to the OFA. Subject to the terms and conditions of a

Directive from the Minister of Finance, loans from the Minister of Finance to the OFA are expected to be at the Province's cost of funds.
- Loans advanced will result in increased borrowing in the debt markets by the Province.
- Loans are expected to be repaid and, therefore, no fiscal impact is expected.

s. 5 Implementation

- If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister will be required that will provide direction to the OFA on how it can use the proceeds of the loan.

s. 6 Delivery and Results Tracking

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed *Ontario Fair Hydro Plan Act, 2017* and is required to ensure the timely implementation and support for the success of the Fair Hydro Plan.

s.7 Stakeholder Consultations

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed Fair Hydro Plan. The related Cabinet note for the initiative should be referred to.

s.8 Other Jurisdictions and Harmonization

LEGISLATION AND REGULATIONS COMMITTEE
BRIEFING NOTE

Finance

DRAFT IESO's borrowing requirement for the Fair Hydro Plan

Policy Approval: May 31, 2017 (Fair Hydro Act)	TB/MBC: May (Fair Hydro)	LRC Date: June 27, 2017	Cabinet Date: June 27, 2017	Effective Date:

Summary of Proposal

This proposal does not contain any variances from current government direction.

Context for Decision:

The Ministry of Finance (MOF) is seeking an Order in Council (OIC) to authorize the Minister to provide loan(s) to the Ontario Financing Authority (OFA) in an amount of up to $2.0B, which will provide the OFA with the capacity to provide additional loans to the Independent Electricity System Operator (IESO) in order to fulfil the commitments under the *Ontario Fair Hydro Plan Act, 2017*.

Formatted: Font: Italic

~~The IESO is responsible for financing short to medium term funding shortfalls in the implementation of the Fair Hydro Plan.~~

The Capital Investment Plan Act (CIPA) authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC").

Why does Ontario need these changes? Why now?

The proposed OIC is needed to ensure borrowing authority for the OFA is available to provide the IESO necessary resources to implement the *Ontario Fair Hydro Plan Act, 2017*, which was passed on May 31, 2017.

The IESO is anticipated to have to finance short to medium term funding shortfalls in the implementation of the Fair Hydro Plan.

- There is expected to be initial and potential ongoing IESO cash flow requirement timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017 (planned for later in summer 2017; however, exact timing is subject to actual implementation). Even once the SPV is set up to borrow, there is expected to be timing differences between the IESO's monthly settlement process when it has to

pay generators and when the SPV purchases the asset from IESO. [Also, under the legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.]

The Ministry of Energy (Energy) is expected to propose regulations under the *Ontario Fair Hydro Plan Act, 2017* for Cabinet approval by the end of June 2017. The proposed OIC should be considered for approval concurrently as it supports a crucial component for the successfully implementation of the *Ontario Fair Hydro Plan Act, 2017*.

Formatted: Font: Italic

Formatted: Font: Italic

How will this proposal impact Ontario?

This proposed OIC is required to assist in fulfilling the commitments under the *Ontario Fair Hydro Plan Act, 2017*.

The OFA currently provides a credit facility to the IESO of $975M. The IESO has requested that the existing credit facility be reduced to $475M, and a new credit facility be provided of $2.0B, for a total amount of $2.475B.

[place holder for Fair Hydro cross reference]

What is the expected cost to government?

With this OIC, the Minister of Finance will be authorized to lend an additional amount of $2.0B to the OFA. Loans advanced will result in increased borrowing in the debt markets by the Province, with associated interest costs. Loans are required under the OIC to bear offsetting interest, and are expected to be repaid and, therefore, no fiscal impact is expected.

What are the key steps to deliver this proposal?

If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister may provide direction to the OFA on how it can use the proceeds of the loan.

How will the changes be communicated?

MOF is not proposing any communications in relation to the proposed OIC.

[place holder for Fair Hydro?]

Cabinet Office Analysis

Introduction:

Under other OICs, the Minister of Finance is authorized to provide loans to the OFA, and in turn the OFA has provided loans and credit facilities to colleges, school boards and other public bodies such as Infrastructure Ontario, IESO, Ontario Lottery and Gaming Corporation and Liquor Control Board of Ontario.

Linkages:

The proposed OIC is required is to ensure the timely implementation and support for the success of the Fair Hydro Plan.

[place holder for Fair Hydro description]

Delivery:

If approved, the Minister of Finance would have authorization to provide a loan to the OFA with a directive on how the loan can be used.

Stakeholder response:

[place holder for Fair Hydro]

Risks:

Not being able to implement Fair Hydro.

Hi Ron

Sorry, here is latest. There was a small change yesterday in indemnity coverage, where OPG also wanted covered director, officers, employees of a financing entity (but not the financing entity itself), if they are also employees of the corporation or its subsidiaries.

There is also still some back and forth this morning between MoF Legal and Energy legal to clarify some things.

Hi Bruno/Toby,

FYI – attached is the finalized package for the OPG/IESO indemnities s.28. We've sent this up to our DMO (flagging that OPG Agreement is still subject to MOF/OFA confirmation re: revised wording at section 2).

The Memo, CL table, and business case incorporate all comments from OFA.

I'll let you know once this package is signed by our Minister and ready to send over to MOF.

Many thanks again for your ongoing assistance on this.

Thank you,

Harkamal

June , 2017

MEMORANDUM TO: Scott Thompson
Deputy Minister of Finance

FROM: Gadi Mayman
Chief Executive Officer

SUBJECT: **SECTION 28 APPROVAL FOR INDEMNITY AGREEMENTS IN FAVOUR OF OPG AND IESO**

Attached for your review and consideration is a memo to the Minister of Finance recommending that the Minister approve, pursuant to section 28 of the *Financial Administration Act* (*FAA*), the Ministry of Energy's request to provide indemnities in favour of Ontario Power Generation (OPG) and the Independent Electricity System Operator (IESO) to support their participation in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act").

In implementing the OFHP, OPG and the IESO expect to carry out activities that fall outside the scope of their pre-OFHP business activities and corporate mandate. They believe this could subject them to the risk of claims that they are not acting in the best interest of the corporation or in "good faith" with respect to their obligations to their respective corporations.

The statutory immunities provided under the *Electricity Act, 1998* and the OFHP Act prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith"). The Indemnity Agreements requested under this request would ensure that if a claim is brought against the OPG, OPG's subsidiaries (except for a financing entity), the IESO or their respective directors, officers and employees as a result of carrying out their roles in implementing the Ontario Fair Hydro Plan, they are fully protected for any costs, losses etc. subject to the limitations provided for in the Indemnity Agreements.

…2

IESO and OPG have stated that these indemnities are required for their participation in the OFHP Act.

Ministry of Energy states that the risk of the Province providing the indemnities is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. However, the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998*, for IESO, and under the OFHP Act, for OPG, pre-existing protection for director, officers and employees under insurance and the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

Ministry of Energy also notes that in the event that an indemnity claim does arise and a payment is required, they would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.

Below is a brief summary of the indemnities:

- The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees, and agents of the IESO and directors, officers, trustees and/or employees of a financing entity if he or she is also a director, officers or employee of the corporation or one of its subsidiaries.
- The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnity to the extent that the losses are already covered by an insurance policy or another indemnity.
- The indemnity also applies where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.
- The indemnity does not apply where the loss relates to the gross negligence or willful misconduct of the Protected Person.
- The Indemnity Agreement includes a waiver of claim provision. This additionally provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan.

MEMORANDUM TO: The Honourable Charles Sousa
Minister of Finance

FROM: Scott Thompson
Deputy Minister

SUBJECT: **Section 28 Approval for Indemnity Agreements in Favour of OPG and IESO**

Attached for your review and consideration is a memo to the Minister of Finance recommending that the Minister approve, pursuant to section 28 of the *Financial Administration Act (FAA)*, the Ministry of Energy's request to provide indemnities in favour of Ontario Power Generation (OPG) and the Independent Electricity System Operator (IESO) to support their participation in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act").

In implementing the OFHP, OPG and the IESO expect to carry out activities that fall outside the scope of their pre-OFHP business activities and corporate mandate. They believe this could subject them to the risk of claims that they are not acting in the best interest of the corporation or in "good faith" with respect to their obligations to their respective corporations.

The statutory immunities provided under the *Electricity Act, 1998* and the OFHP Act prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith"). The Indemnity Agreements requested under this request would ensure that if a claim is brought against the OPG, OPG's subsidiaries (except for a financing entity), the IESO or their respective directors, officers and employees as a result of carrying out their roles in implementing the Ontario Fair Hydro Plan, they are fully protected for any costs, losses etc. subject to the limitations provided for in the Indemnity Agreements.

…2

IESO and OPG have stated that these indemnities are required for their participation in the OFHP Act.

Ministry of Energy states that the risk of the Province providing the indemnities is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. However, the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998*, for IESO, and under the OFHP Act, for OPG, pre-existing protection for director, officers and employees under insurance and the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

Ministry of Energy also notes that in the event that an indemnity claim does arise and a payment is required, they would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.

Below is a brief summary of the indemnities:

- The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees, and agents of the IESO and directors, officers, trustees and/or employees of a financing entity if he or she is also a director, officers or employee of the corporation or one of its subsidiaries.
- The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnity to the extent that the losses are already covered by an insurance policy or another indemnity.
- The indemnity also applies where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.
- The indemnity does not apply where the loss relates to the gross negligence or willful misconduct of the Protected Person.
- The Indemnity Agreement includes a waiver of claim provision. This additionally provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan.

Should a briefing be required, staff would be pleased to discuss this matter at your convenience.

The Honourable Glenn Thibeault
Minister of Energy
900 Bay Street, 4th Floor
Toronto ON M7A 2E1

Dear Minister Thibeault,

Thank you for your letter requesting approval under section 28 of the *Financial Administration Act* of the Indemnity Agreements in favour of the IESO, its directors, officers, and employees, and in favour of OPG, OPG's subsidiaries (other than any financing entities as defined in the *Ontario Fair Hydro Plan Act, 2017*) and their respective directors, officers, and employees.

In response to your request, I am attaching the approval of the Indemnity Agreements for OPG and the IESO in order for them to participate in the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

Yours sincerely,

Charles Sousa
Minister

Subject: FW: OPG/IESO Indemnities - S.28 Approvals Package - FINALIZED

Hi Ron

Sorry, here is latest. There was a small change yesterday in indemnity coverage, where OPG also wanted covered director, officers, employees of a financing entity (but not the financing entity itself), if they are also employees of the corporation or its subsidiaries.

There is also still some back and forth this morning between MoF Legal and Energy legal to clarify some things.

Hi Bruno/Toby,

FYI – attached is the finalized package for the OPG/IESO indemnities s.28. We've sent this up to our DMO (flagging that OPG Agreement is still subject to MOF/OFA confirmation re: revised wording at section 2).

The Memo, CL table, and business case incorporate all comments from OFA.

I'll let you know once this package is signed by our Minister and ready to send over to MOF.

Many thanks again for your ongoing assistance on this.

Thank you,

Harkamal

MEMORANDUM TO: Scott Thompson
Deputy Minister of Finance

FROM: Gadi Mayman
Chief Executive Officer

SUBJECT: **Section 28 Approval for Indemnity Agreements In Favour of OPG and IESO**

Attached for your review and consideration is a memo to the Minister of Finance recommending that the Minister approve, pursuant to section 28 of the *Financial Administration Act* (*FAA*), the Ministry of Energy's request to provide indemnities in favour of Ontario Power Generation (OPG) and the Independent Electricity System Operator (IESO) to support their participation in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act").

In implementing the OFHP, OPG and the IESO expect to carry out activities that fall outside the scope of their pre-OFHP business activities and corporate mandates. They believe this could subject them to the risk of claims that they are not acting in the best interest of the corporation or in "good faith" with respect to their obligations to their respective corporations.

The statutory immunities provided under the *Electricity Act, 1998* and the OFHP Act prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith"). The Indemnity Agreements requested under this request would ensure that if a claim is brought against OPG, OPG's subsidiaries (except for a financing entity), the IESO or their respective directors, officers and employees as a result of carrying out their roles in implementing the Ontario Fair Hydro Plan, they are fully protected for any costs, losses etc., subject to the limitations provided for in the Indemnity Agreements.

…2

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the Ontario's Fair Hydro Plan.

Ministry of Energy states that the risk of the Province providing the indemnities is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. However, the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998*, for IESO, and under the OFHP Act, for OPG, pre-existing protection for director, officers and employees under insurance and the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

Ministry of Energy also notes that in the event that an indemnity claim does arise and a payment is required, they would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.

Below is a brief summary of the indemnities:

- The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees, and agents of the IESO and directors, officers, trustees and/or employees of a financing entity if he or she is also a director, officers or employee of the corporation or one of its subsidiaries.
- The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnity to the extent that the losses are already covered by an insurance policy or another indemnity.
- The indemnity also applies where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.
- The indemnity does not apply where the loss relates to the gross negligence or willful misconduct of the Protected Person.
- The Indemnity Agreement includes a waiver of claim provision. This additionally provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan.

Subject: OPG/IESO Indemnities - Section 28 Approvals

Hi Ron,

Energy is preparing a s28 FAA approval request related to OPG and IESO requests for indemnities related to their roles in implementing Ontario Fair Hydro Plan.

I've attached a draft note that is based on the draft materials provided in the second email. The third email indicates a further request to broaden coverage of indemnities that Energy is working on.

Since this is related to global adjustment refinancing, including market offerings, the OFA should be providing advice, but not sure exactly who would be providing that advice regarding a s28 request.

I'm also recommending that should there be a decision to provide the indemnities, it be done under Section 22 of the FAA.

James

Indemnities to OPG/IESO – Implementing Proposed Ontario Fair Hydro Act (if passed)

ISSUE

OPG and IESO are specifically asking for indemnities to the IESO, OPG (the entities) and their respective directors, officers and employees in order to allow them to carry out their roles in implementing the Ontario Fair Hydro Plan (OFHP), primarily Global Adjustment refinancing.

The Ministry indicates both OPG and the IESO are anticipated to carry out activities that fall outside the scope of their typical business activities and corporate mandate. This creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG and/or the IESO to increased liability (pre-existing statutory protections from liability only extend to "good faith acts").

Pending – May 18 update from TBS Legal – Energy decision pending on revised ask from OPG/IESO - a significant increase to the scope of the proposed indemnity agreement, so that it would (a) cover OPG's subsidiaries as well and (b) activities that are more generally related to the implementation of the global adjustment (not just activity that is directly related to the implementation of the legislation).

MOF RECOMMENDATION

Based on materials provided by ENERGY, TBS staff are recommending that the Ministry pursue providing the requested indemnities under Section 22(1) of the FAA – that the Lieutenant Governor in Council may by order authorize the Minister of Finance, on behalf of Ontario, to agree to guarantee or indemnify the debts, obligations, securities or undertakings of any person.

Should there be in the future a payment of an indemnity, it could be made under Section 12 of the FAA – Any amount required to be paid by or on behalf of the Crown by the terms of a guarantee or indemnity given pursuant to this or any other Act may be paid by the Minister of Finance from the Consolidated Revenue Fund.

BACKGROUND

On March 2, 2017, the government announced Ontario's Fair Hydro Plan (OFHP), which will lower bills by 25% for a typical residential consumer, starting in the summer of 2017. About half a million small businesses and farms are also expected to benefit. Major components include:

- Refinancing the Global Adjustment (GA)
- Electricity Social Programs moving to being funded from voted appropriations

- Extending the Industrial Conservation Initiative
- Improving Sector Efficiency
- Modernizing Ontario's Electricity Market

It was announced that a portion of the GA would be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system).

Refinancing a portion of GA provides significant and immediate rate relief, about 17% in 2017-18, by spreading the cost of electricity investments over the expected lifecycle of the infrastructure that has been built.

Implementation of OFHP is on-going. On May 9 and 10, 2017, the Ministry brought proposed legislation forward to TB/MBC and LRC, with the bill being introduced in the Legislature on May 11, 2017. In June 2017, the Ministry is bringing forward regulations to further facilitate implementation.

Both IESO and OPG have specifically asked for indemnities in order to allow them to carry out their roles in implementing the ONFHP.

Regarding roles, the Ministry indicates for:

- OPG – GA refinancing would result in a deferred GA amount that OPG is expected to fund from a special purpose entity that OPG creates (i.e. a financing entity) and that associated risks are beyond OPG's usual business/operations. This is particularly true with respect to any securities offerings of OPG's financing entity. Products are expected to be offered into the Canadian and U.S. Markets. As a result, pre-existing indemnities and protections do not adequately protect OPG, its directors, officers and employees.

- IESO – proposed legislation would impose certain obligations and requirements on IESO to carry out various activities in relation to the implementation of the OFHP such as the deferral of costs related to the GA, the creation of a regulatory asset in relation to the GA financing component of the OFHP, the conveyance of that asset to OPG's financing entity and providing a servicing role in recovering OPG's funding costs from future ratepayers. IESO may also be required to play a role in potential securities offerings of OPG's financing entity. If so, this may come with heightened exposure to liability for the IESO.

FINANCIAL IMPLICATIONS

The Ministry's submission indicates there is a risk that these corporations and key persons may be subject to increased liability specifically due to their roles with the OFHP. This risk arises in part because of the kind of market that OPG, and IESO

indirectly, are to participate in, and the steps that investors could take to protect their investments.

The Ministry indicates the risk to the Province of giving the indemnities is undeterminable at this time (cannot be quantified), but that the exposure will be linked to the OPG special purpose entity's debt offerings" of accumulated deferred Global Adjustment costs.

From the latest TB/MBC submission, in 2017-18 deferred global adjustment is forecasted to be about $2.5B, of which 51% is to be financed directly in capital markets, and $49%, about $1.1B, in an equity injection to OPG from the Province, with additional OPG shares being given to the province as OPG's sole shareholder.

With the planned approach capping electricity rate increases at 2% till 2020, total accumulated debt to be refinanced reaches a peak of $24.2B by 2027, financed by on-going Provincial equity injections and debt offerings into the market with subsequent collection of deferred amounts from ratepayers out to 2047 (See Appendix A). The Ministry indicates tentative timing for debt offerings to commence is Fall 2017.

Liabilities due to roles with the OFHP

In addition to the IESO and OPG roles outlined under Background, the nature of the indemnities, providing protection due to risk of increased liability specifically due to their roles with the OFHP, suggests that it could possible that if OPG and IESO suffered a loss because of, for example, higher borrowing costs elsewhere that could be shown to be attributable to the OFHP activities, those costs could be within the scope of the proposed indemnities.

Voted Appropriations

Although the Ministry indicates the risk associated with providing the indemnities are undeterminable, the amount of accumulated debt is quite significant. This raises a question about whether the Ministry has sufficient, if any, appropriations in place for 2017-18 to enter into the agreement to provide the indemnities.

- Sections 11.3(1) of the FAA indicates no agreement or undertaking shall be entered into in a fiscal year that would result in a charge to an appropriation for that fiscal year in excess of the amount available under that appropriation.

- Section 11.2(1) indicates no appropriation shall be charged with an amount that is for a purpose other than that for which the appropriation was provided.

Currently there are no explicit appropriations for GA refinancing other than the $1.1B investment asset for the projected OPG equity injection requirements in 2017-18. There is about $500M in Transfer Payments related for the Electricity Social Programs, that are to be funded from voted appropriations starting in 2017-18 should enabling legislation pass.

Appropriations – Alternate Approach

An alternate approach may be to have, under Section 22.1 of the FAA, the LGIC authorize the Minister of Finance to agree to guarantee or indemnify the debts, obligations, securities or undertakings of any person. Should claim be made, a payment of any amount could be made under Section 12 of the FAA, paid by the Minister of Finance from the Consolidated Revenue Fund.

- Section 22. (1) indicates the Lieutenant Governor in Council may by order authorize the Minister of Finance, on behalf of Ontario, to agree to guarantee or indemnify the debts, obligations, securities or undertakings of any person.

- Section 12 indicates any amount required to be paid by or on behalf of the Crown by the terms of a guarantee or indemnity given pursuant to this or any other Act may be paid by the Minister of Finance from the Consolidated Revenue Fund. .

BUSINESS CASE

Why is the section 28 approval needed?

The Province is being asked to agree to indemnify and hold harmless the IESO and OPG as well as their respective directors, officers and employees from any claims, liabilities, costs or losses that might arise to the corporation, him or her (respectively) as a result of their direct roles in carrying out activities related to the implementation of the ONFHP.

How has potential Crown liability been limited by the proposed indemnity?

The indemnities would not apply with respect to claims:

- Where coverage is provided under an insurance policy or claims fund to the extent a protected person is covered by a policy or fund.
- Where other indemnities already exist for protected persons.
- Brought about or contributed to by a protected person's dishonesty, gross negligence or willful misconduct
- Arising from circumstances where the corporation, director, officer or employee did not have grounds for believing that their conduct was lawful in the case of a criminal or administrative action or proceeding that enforces a monetary penalty

Measures to mitigate risk with securities:

- The Ministry has been worked closely with the Ontario Financing Authority (OFA) and TD Securities (TD), as the Province's external financial advisor, on the financing structure (i.e., legislation, provincial guarantees, OPG's equity injections and IESO's enhanced credit facilities).

- The proposed legislation enables a structure that OFA and TD believe will enable financing at a reasonable cost. Key elements that support this financing structure include:
    - OPG issuances of subordinated debt to the SPV/Trust representing up to 49% of total borrowing; and
    - Conditional (springing) guarantees by the Province to provide a backstop in the event of specific and limited events (e.g., changes to legislation that harm investor interests).
- The Ministry indicates OPG has a great deal of experience managing the risks associated with borrowing through its experience developing capital-intensive generation projects as well as their management of Nuclear Funds.
    - Equity injections are necessary to support OPG as the owner and manager of GA refinancing. The equity injections allow OPG to strengthen the capital structure of the Trust in order to secure financing at a reasonable cost.
    - OPG will seek to achieve the highest possible credit rating (i.e., AAA is possible) in order to reduce borrowing costs and attract a wide investor base.
- The proposed legislation provides for provincial assurances, guarantees and a statutory cause of action.
    - Provincial assurance provision focuses on limiting possible actions by the executive branch of government that might undermine the value of the proposed securities (including regulation-making).
    - Guarantee provisions are intended to backstop the provincial assurance provision and provide that:
        - The Minister of Energy and Minister of Finance may, with LGIC approval, enter into agreements regarding the performance of IESO or electricity vendors; and
        - The Minister of Energy and Minister of Finance may, pursuant to LGIC order, agree to guarantee and indemnify any debt, obligation, security or undertaking associated with an investment interest.
    - Statutory cause of action – pending, check with legal?

What are the possible consequences if section 28 approval is not given?

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the ONFHP.

If the indemnities are not provided, this could impact OPG and IESO directors' willingness to undertake activities that would fall outside of the scope of typical business

activities and mandate, due to the risk of liability, and consequently jeopardizing the successful implementation of the planned approach to GA refinancing component of the ONFHP. This could result in the planned approach to GA refinancing having to be funded from voted appropriations.

James Strang
General Government, Planning and Resources / PEMD

Notes: Assumes 30 year financing period and a nominal interest rate of 5% (compounded monthly). Ratepayer GA payments increase annually beyond 2020 such that the average monthly residential electricity bill increases by 6.3% per year to a maximum of $2.2 billion above the true cost of GA in any given year to cap repayment charges at around 10% of total bill. IESO forecast is based on IESO's revised OPO forecast as of February 2017. Includes the cancellation of LRP II and EFW, expansion of ICI. Does not include smoothed OPG rates. Above residential bill is based on a 750 kWh per month Toronto Hydro customer. Data shown above is by RPP period. Assumes RPP prices are adjusted in July 2021 instead of May 2021 to coincide with the end of the inflation cap. Fair allocation amounts subject to third party review.

Appendix B – Commentary from the Ministry's May 9, 2017 TB/MBC Submission

OPG Financing / OPG Equity Financing

The ability to engage in the fair distribution of clean energy costs requires financing during periods where the collection of the clean energy costs is deferred to later years. The proposed legislation outlines mechanisms that are required to enable the financing and meet requirements for rating agencies and investors.

IESO will have a funding gap resulting from the reduction in amounts collected over four years. The legislation enables IESO to record the under-collection of GA in a variance account, and deems this under-collected amount to be a "Regulatory Asset".

- OEB would determine rates to allow IESO to recover under-collection recorded in its variance account.
- IESO is authorized to sell all or a portion to the OPG Special Purpose Vehicle (SPV)/Trust under the Financing Plan.

As part of supporting the financing and administration of the GA refinancing mechanism, it is expected that OPG would purchase the right to future cash flows from IESO on an ongoing basis.

The sale of the regulatory asset from IESO to the OPG Special Purpose Vehicle (SPV)/Trust creates an "Investment Asset".

- The Investment Asset allows for the recovery of the under-collected GA as the Investment Asset may in turn be sold to other investors or group of investors.

The Ministry has worked closely with third-party financial advisors in advance of and throughout the drafting process to help to ensure that the proposed legislation enables refinancing of the GA.

These purchases would be financed in part by capital infusions from the Province to OPG for the purposes of stabilizing OPG's capital structure:

- OPG would require monthly "equity injections" from the Province which would be fiscally neutral as OPG would issue new shares to the Province in exchange;
- Funds from the Province would flow from the Ontario Financing Authority (OFA); and
- The Ministry, OFA and OPG are working through the specific mechanisms, timelines and share features.
- It is anticipated that the initial equity injection would take place as early as June 2017.

Through PRRT, the Ministry of Energy received approval for the creation of an operating asset "OPG Share Purchase" and expenditure increase of $1.1billion in 2017-18 within Vote 2905-5, which is based on the latest estimates by IESO, and provides flexibility to account for forecasting uncertainty. This approval is pending passage of the proposed legislation.

OPG will provide a two year forecast of its equity requirements to the Ministry on annual basis, as part of OPG's business plan process. Note: While included in the business plan, equity requirements will not form part of the Ministry of Energy's concurrence process.

For future funding requirements, the Ministry will seek appropriation through the PRRT process.

OPG will seek to achieve the highest possible credit rating (i.e., AAA is possible) in order to reduce borrowing costs and attract a wide investor base. Credit ratings will depend on provisions in legislation, regulation and agreements as well as the capital structure of the SPV / Trust. Despite these factors, rating agencies may see the Province's rating forming a ceiling given the contingent guarantees that the Province will provide (described above).

In addition, given the long term nature of this program (i.e., approximately thirty-years), the calculations related to refinancing of the GA set out in the proposed legislation will be subject to fluctuations in Ontario electricity demand, GA and interest rates in the medium to long-term.

- Should electricity demand be higher than forecast as a result of greater electrification, the cost of paying off the debt will be spread over a greater pool of consumption and decreasing future costs for individual ratepayers. Note: The reverse is also true in regards to decreasing demand.
- Should interest costs increase from the assumed 5%, total borrowing costs would rise. Given that this is a unique offering, managing investor confidence will be key to ensure borrowing costs don't rise. Note: The reverse is also true in regards to interest rates being lower than assumed.

IESO's Credit Facilities

IESO is in discussions with the Ontario Financing Authority (OFA) regarding an increase to its current "line of credit" with the OFA and OEFC (i.e., credit facilities). The increases are in response to IESO role in the delivery of OFHP and to provide a necessary buffer to fund short periods where OPG SPV/Trust does not fund a shortfall.

IESO advises that this is important not only for IESO solvency, but also to maintain its credit rating (i.e., IESO's contracted suppliers' credit arrangements are often based on IESO maintaining a certain rating).

IESO would require financing to compensate generators should it be required to hold any portion of the unpurchased Regulatory Asset beyond each monthly settlement period. OPG Trust is not expected to access public capital markets monthly, nor is it required to purchase the regulatory asset. Therefore, IESO will need a credit facility for interim financing. IESO may also require longer-term financing to maintain the deferral financing plan, should the OPG Trust not be able to access debt markets on a timely basis for purchase of some or all of the regulatory asset.

Hi James,

I had not heard that as a decision. We'll follow up.

Also, was the issue of this type of indemnity in Energy's TB Report Back submission from earlier this month? Would you be able to send us a copy of the submission.

Thanks,
Ron

MINISTRY OF ENERGY

TREASURY BOARD / MANAGEMENT BOARD of CABINET SUBMISSION

ONTARIO'S FAIR HYDRO PLAN – REPORT BACK

May 9, 2017

CONFIDENTIAL
MINISTRY OF ENERGY

1.0 MINISTRY REQUEST

1. The Ministry of Energy is reporting back to the Treasury Board/Management Board of Cabinet (TB/MBC) on following:

    i. Implementation of Global Adjustment (GA) Refinancing;

    ii. Delivery of Electricity Social Programs (i.e., Rural or Remote Rate Protection, Ontario Electricity Support Program and First Nations On-Reserve Delivery Credit); and

    iii. Expansion of Industrial Conservation Initiative (ICI).

2) APPROVE the Ministry funding a media buy procurement with a maximum value of $3,500,000 with PHD Canada, the Advertising Review Board's mandatory-use media planning and buying Agency of Record.

3) NOTE the Ministry of Energy has already spent approximately $1,000,000 with PHD Media in 2016-17 and is forecasting expense of approximately $2,500,000 in 2017-18.

4) NOTE the Ministry of Energy will return to TB/MBC to request a transfer of funds to the Ministry of Energy from the Bulk Media Buy program in Treasury Board Secretariat to fully recover the costs for the public education campaign.

5) APPROVE the creation of a new transfer payment line entitled "Price Mitigation Support Initiatives" under Vote/Item 2905-01, Electricity Price Mitigation, with a $1,000 placeholder, to support future rate mitigation initiatives.

Note: The Independent Electricity System Operator (IESO) is in discussions with the Ontario Financing Authority (OFA) regarding an increase to its current lines of credit with the OFA and OEFC.

2.0 PURPOSE OF REQUEST

On March 2, 2017, the government announced Ontario's Fair Hydro Plan (OFHP), which will lower bills by 25 per cent for a typical residential consumer, starting in the summer of 2017. Up to half a million small businesses and farms are also expected to benefit. Any rate increases for residential consumers over four years would be held to the rate of inflation. Note: These measures include the 8 per cent rebate introduced in January 2017 and builds on previously announced initiatives to deliver broad-based rate relief on electricity bills.

CONFIDENTIAL

As part of the OFHP approval process, TB/MBC requested that the Ministry "report back" before legislation to enable OFHP was introduced on the following items:

1) GA Refinancing;

2) Social Programs; and

3) ICI Expansion.

In addition to the report back, the Ministry is also requesting the creation of a new transfer payment line, "Price Mitigation Support Initiatives" in Vote 2905-01. The purpose for this is to provide the Ministry an appropriate transfer payment line to support future activities and initiatives around electricity price mitigation for Ontarians.

There is no fiscal impact associated with this request. All new funding placed into the transfer payment lines will be offset by services dollars previously approved within the Ministry's multi-year allocation.

In February 2017, the Ministry reported back to TB/MBC on the details related to the establishment of the new Affordability Fund announced in the OFHP. In April 2017, the Affordability Fund Trust was established. It is expected that electricity distributors will be able to begin applying to the Affordability Fund Trust in Summer 2017.

The Ministry has developed proposed legislation to implement key components of OFHP by summer 2017, and address financing, accounting and legal issues raised in the March 1, 2017 Cabinet Submission. Note: The Ministry is also preparing a number of supporting regulations to enable implementation of OFHP.

1. GA Refinancing:

Ontario's energy system is being transformed – more than $50 billion has been invested to decarbonize and modernize the electricity system, including an investment of over $35 billion in clean and renewable generation.

Over the last decade the government has invested in Ontario's transmission and distribution infrastructure (i.e., the grid), clean generation and phased out the use of coal-fired generation, which has resulted in electricity prices increasing.

<u>Proposal</u>

On March 2, 2017, as part of OFHP, it was announced that a portion of the GA would be refinanced in order to fairly allocate costs across present and

future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system).

Refinancing a portion of GA provides significant and immediate rate relief by spreading the cost of electricity investments over the expected lifecycle of the infrastructure that has been built. For example, by recognizing that generation assets are expected to continue to provide residual benefit to future ratepayers, beyond the term of current contracts, future ratepayers are expected to be able to utilize these assets and reduce the need to finance the development of new generation assets.

Under this proposal, the electricity bills of current residential consumers would be reduced by 25 per cent on average starting in summer 2017. In addition, increases to electricity bill would be held to the rate of inflation for four years. Up to 500,000 small businesses and farms would also benefit.

Implementation

To implement GA refinancing and mitigate financing, accounting and legal risks, the Ministry has:

- Worked closely with key ministries (i.e., TBS-OPCD, MOF-OFA/IGS, MAG, CO), OEB, IESO, OPG and their independent advisors and third party financing (i.e., dealers);

- Developed proposed legislation to respond to the financing, accounting and legal issues outlined in the March 1, 2017 Cabinet Submission. Note: The Ministry is also preparing a number of supporting regulations;

- Sought independent advice regarding financing, accounting and legal requirements from E&Y (OPG), KPMG (IESO), TD Securities (OFA) and Blakes (ENERGY);

- Launched a third party research project to assist with implementation of GA refinancing; and

- Developed comprehensive risk-based costing, including forecast models and sensitivity tests on key assumptions.

Proposed legislation to enable GA refinancing is planned for a May 2017 introduction.

CONFIDENTIAL

2. Social Programs:

To date, a number of electricity support programs are funded through the electricity rate-base. There is opportunity to provide support to a more targeted subset of customers who are disproportionately affected by increased electricity costs and to shift these costs to the tax base.

These customers include:

- **High Distribution Cost Customers:** Some customers in rural areas where the cost to distribute electricity is high can experience difficulty in reducing their electricity bill through conservation, particularly when reliant on electric heating.
- **Low-Income Customers:** Rising electricity costs make up a disproportionally large amount of the household expenditures for low-income households.
- **First Nation On-Reserve Customers:** On-Reserve First Nations customers experience challenges with energy affordability and are seeking to address historical grievances associated with electricity system infrastructure.

The proposed legislative amendments enable the creation or expansion of programs that provide meaningful rate relief to these customers.

Proposal

The Government is proposing to introduce legislation and regulatory changes for the enhanced electricity support programs which will shift costs from the rate base to the tax base, as well as establish the necessary frameworks to deliver these new or enhanced programs.

Rural or Remote Rate Protection

Rural or Remote Rate Protection (RRRP) mitigates some of the high costs of electricity distribution in rural or remote areas of the Province. It is a legacy program of the old Ontario Hydro and has existed in its current form since 2001.

The legislative proposal enables, through regulation, the transfer of the costs of funding the program for Hydro One's R2 customers from the rate-base to the tax-base for prescribed customers.

- R2 customers are those customers of Hydro One classified as living in the lowest density areas of the Province.

CONFIDENTIAL

Distribution Rate Protection

While the RRRP program helps mitigate some of the higher distribution costs for Hydro One R2 customers, as well as certain customers served by Algoma Power, Hydro One Remote Communities and James Bay First Nation LDCs, there is an opportunity to provide further relief to consumers served by higher cost distribution cost LDCs.

Proposed legislation will enable tax-based funding to support distribution rate protection for prescribed residential customers of LDCs with high-cost distribution rates. If passed, the eight high-distribution cost LDCs whose customers are eligible customers will be prescribed in regulation. Residential customers of Algoma Power and Hydro One R2 customers would be eligible for additional relief as these LDCs are the highest cost distributors in the province (as well as six additional higher-distribution cost LDCs).

Proposed legislation enables the establishment of a maximum monthly base distribution charge for those prescribed customers. If the proposed legislation is passed, the mechanism to set this charge will be established in regulation.

On-Reserve First Nations Delivery Credit

On July 12, 2016, the Province and First Nations in Ontario announced an agreement-in-principle for the Province to sell to First Nations for their collective benefit, shares of Hydro One Limited.

The Province would sell up to approximately 15 million shares (2.5 per cent of total current outstanding Hydro One common shares), depending on the level of First Nation participation, to a new collective investment fund owned by First Nations.

As part of discussions on Hydro One shares and rates at COO's All Chiefs Conference and the First Nations-Ontario Energy Table, the Minister of Energy issued a letter directing the OEB to prepare a report providing "advice on options for an appropriate electricity rate (or rate assistance) for on-reserve First Nations electricity consumers". The proposal is premised around the findings in the OEB Report submitted to the Ministry on December 29, 2016.

The program proposal involves the elimination of the delivery charge, or monthly service charge for those customers served by LDCs that do not have a delivery charge, for on-reserve customers prescribed in regulation.

The resulting First Nations Delivery Credit is a reflection of First Nation leadership on this issue and an example of the Political Accord coming to life.

CONFIDENTIAL

Ontario Electricity Support Program (OESP)

The OESP began on January 1, 2016 as a rate-payer funded program to provide relief to low income Ontarians who are struggling to afford their electricity bills. The OEB administers the program.

The Fair Hydro Plan committed to move the program from the rate base to the tax base, and to expand the OESP by increasing the credit amounts by 50 per cent, making more Ontarians eligible for the program, and aligning the OESP with other social assistance programs to increase uptake.

On March 23, 2017, the OEB issued a Decision and Order to end the OESP volumetric charge paid by all Ontario consumers on May 1, 2017 ($0.0011 per kilowatt-hour of power consumed). On April 10, 2017, Cabinet approved amendments to the OESP regulation (O.Reg. 314/15) to increase credit amounts by 50% and introduce new eligibility categories so more Ontarians can access the program. These changes will also come into effect on May 1, 2017.

The amendments to the *Ontario Energy Board Act, 1998* pertaining to OESP will move the program funding from the rate-base and transfer it to the tax-base, and enable alignment of the OESP with social assistance programs delivered by the Ministry of Community and Social Services.

Implementation

Rural or Remote Rate Protection (RRRP)

Appropriated funds shall be used to offset the cost of the RRRP program for electricity consumed on or after July 1, 2017.

The implementation of the amended RRRP program (moving the majority of costs to the tax base) will require oversight of the money appropriated from the legislature by the Ministry of Finance (MOF).

The OEB sets amount that LDCs charge for RRRP to all customers. Once the regulatory mechanism is in place to enable the recovery of the majority of RRRP costs from the tax base, the OEB will significantly reduce the RRRP charge. Change to the funding structure of the program does not require any additional implementation risks or efforts.

CONFIDENTIAL

Distribution Rate Protection

Appropriated funds shall be used to offset the cost of providing distribution rate protection to prescribed residential distribution rate protected consumers based on electricity consumed on or after July 1, 2017.

LDCs and eligible customers would be prescribed in regulation, if the legislation is passed. Additionally, the Ontario Energy Board would be empowered by regulation to determine the rate at which affected LDCs would be harmonized.

The efforts required to implement the program will fall upon the impacted LDCs who will need to adjust their billing systems in order to carry out the program.

On-Reserve First Nation Delivery Credit

A new regulation will need to be passed to set out the program particulars including eligibility for the program.

The LDCs will need to enter into communication plans in order to work with local First Nations Band Councils and to increase awareness of the delivery credit to all eligible consumers.

There are transitional provisions for both the enhanced rate protection and First Nations Delivery Credit that provide distributors with a prescribed time by which they must have adapted their billing systems while maintaining program eligibility for the rate assistance being provided. As part of the regulations, Energy intends to prescribe eligibility as of July 1, 2017. Distributors would be given a three month transitional period to begin delivering the rate assistance by no later than October 1, 2017.

Ontario Electricity Support Program

A legislative amendment to the *Ontario Energy Board Act, 1998* will allow funding to shift from the rate base to the tax base. The amendments will be proclaimed into force at a later date when the OESP charges collected to date (which are being held in an IESO variance account) are depleted. Amendments to the OESP regulation (O.Reg. 314/15) will be needed to implement these legislative changes.

CONFIDENTIAL

3. ICI Expansion:

Ontario is committed to providing competitive electricity rates for energy intensive consumers in the manufacturing sector while also promoting electricity conservation.

In January 2011, the Industrial Conservation Initiative (ICI) was announced to help large industrial electricity power users better manage their electricity costs while reducing electricity consumption during peak periods.

ICI provides a strong incentive for large electricity consumers to shift their electricity consumption to off-peak hours to reduce their bills by about one-third. Reducing peak demand increases the reliability of the electricity system, reduces greenhouse gas (GHG) emissions and helps defer the need to procure new resources. There are currently about 300 participating consumers who collectively reduced Ontario's peak demand by an estimated 1,000 MW in 2015.

Proposal

On March 2, 2017, as part of OFHP), the government announced plans to further reduce the ICI threshold from 1 megawatt (MW) to 500 kilowatts (kW) and to target more small manufacturing and industrial consumers.

- As of January 1, 2017, the regulatory amendments came into effect to make ICI available to electricity consumers with an average monthly peak demand greater than 1 MW. The lowering of the ICI threshold to 1MW and removal of sector restrictions was announced in the 2016 Speech from the Throne.

Implementation

Effective April 13, 2017, electricity consumers and market participants in the manufacturing and greenhouse sectors in Ontario with an average monthly peak demand of greater than 500 kW and less than or equal to 1 MW are eligible to opt-in to ICI. Billing for electricity consumers that opt-in to ICI begins July 1, 2017.

- Provisions were also provided to allow electricity consumers to continue their participation in ICI if their demand falls below the monthly peak demand threshold while participating in certain prescribed Conservation and Demand Management (CDM) programs and/or Ontario Climate Change Solutions Deployment Corporations (OCCSDC) programs and pilots.

CONFIDENTIAL

In addition, the Ministry has retained the Ontario Chambers of Commerce (OCC) and the Canadian Manufacturing and Exporting (CME) to undertake targeted stakeholder outreach on ICI and other cost saving energy programs/measures available to the commercial and industrial sectors in Ontario.

3.0 KEY CONTEXT

On March 2, 2017, the government announced Ontario's Fair Hydro Plan (OFHP), which would reduce the electricity bills of residential consumers by 25 per cent on average starting in summer 2017. In addition, increases to electricity bill would be held to the rate of inflation for four years. Up to 500,000 small businesses and farms would also benefit.

OFHP also announced other measures to enhance business competitiveness, helping vulnerable consumers and bend the future cost curve of electricity (see Background for details).

On April 20, 2017, the OEB announced new Regulated Price Plan (RPP) rates effective May 1, 2017 that include a portion of the bill reduction proposed under OFHP and the shifting of the funding of the OESP to provincial revenues. The full reduction from OFHP is expected to be addressed through a July 1st RPP rate adjustment.

The Ministry's report back to TB/MBC focuses on the following OFHP initiatives:

1) GA Refinancing:

As part of OFHP, it was announced that a portion of the GA would be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system).

- Today's electricity consumers have been responsible for the costs of investments in developing the clean, modern and reliable electricity system that Ontario has today and that will continue to provide benefit to future generations. There is an opportunity to recognize the long-term benefit of these generation assets to the electricity system and "bring forward" that benefit for ratepayers today by deferring some of the current costs.

Refinancing a portion of GA provides significant and immediate rate relief by spreading the cost of electricity investments over the expected lifecycle of the infrastructure that has been built.

CONFIDENTIAL

To implement GA refinancing and to mitigate the financing, accounting and legal risks, the Ministry has:

- Worked closely with key ministries (i.e., TBS-OPCD, MOF-OFA/IGS, MAG, CO), OEB, IESO, OPG and their independent advisors and third party financing (i.e., dealers);

- Developed proposed legislation to respond to the financing, accounting and legal issues outlined in the March 1, 2017 Cabinet Submission. Note: The Ministry is also preparing a number of supporting regulations;

- Sought independent advice regarding financing, accounting and legal requirements from E&Y (OPG), KPMG (IESO), TD Securities (OFA) and Blakes (ENERGY);

- Launched a third party research project to assist with implementation of GA refinancing; and

- Developed comprehensive risk-based costing, including forecast models and sensitivity tests on key assumptions.

Financing, Accounting and Legal Risk Considerations / Mitigations

The Ministry was asked to report back to TBS/MBC with on details on how financing, accounting and legal risks would be mitigated.

Financing

OFHP Legislation

The purpose of the proposed legislation is to support the Government of Ontario's commitment to ensure that the costs of investments in the electricity system are allocated fairly among present and future generations of consumers. Costs to be allocated include clean and renewable generation facilities, conservation, demand management, energy efficiency programs.

The supporting legislation defines the mechanisms and framework that would achieve the refinancing of the (GA), including:

- Fair Allocation Amount: Is a calculation and allocation of clean energy costs over time. It is expected that the calculation would lead to decreased rates in the near term with rates higher than forecast in the long term. The Minister of Energy is to calculate the Fair Allocation Amount and provide the amount to the Financial Services Manager

CONFIDENTIAL

(OPG). Subsequent calculations may be undertaken by other agents as prescribed by the Minister.

- Fair Adjustment: Sets out the mechanism for the Ontario Energy Board (OEB) to determine the "relief", including the initial decrease in rates to achieve the 25% decrease, for the period July 1, 2017 to April 30, 2018. Under the legislation, the OEB must determine the amount within 15 business days of the legislation coming into force. The Fair Adjustment also allows the Lieutenant Governor in Council (LGIC) to make regulations prescribing electricity rates for the period May 1, 2018 to June 30, 2021.

- Clean Energy Adjustment: Is the mechanism to recover the under-collection of GA from eligible consumers during the recovery period. This is an adjustment to a consumer invoice on a monthly basis to repay principal, interest and other financing. IESO and each electricity distributor will act as an agent for the financing entity to impose, invoice and collect the clean energy adjustments.

The Ministry has prepared legislation and regulations in close collaboration with key ministries (i.e., TB, MOF, AG and CO), agencies (i.e., OEB, IESO, OPG) and third party financial advisors.

- The proposed legislation enables the province to provide assurances in the form of a "provincial guarantee" to OPG and investors regarding the permanence of the GA Refinancing framework and the authority of the legislature to pass the legislation. The intent is to ensure that the full value of any investment is recoverable.

- The legislation also enables the Province to guarantee borrowing of the trust in the event of a market disruption to mitigate OPG's financing risk. Specifics of these guarantees will be determined in agreements to be negotiated later this year

It is still possible that the full value of the Regulatory Asset may not be purchased. In such cases, IESO may be able to retain the unsold amounts recorded in its variance account for a short period of time.

In addition, the Ministry has been worked closely with the Ontario Financing Authority (OFA) and TD Securities (TD), as the Province's external financial advisor, on the financing structure (i.e., legislation, provincial guarantees, OPG's equity injections and IESO's enhanced credit facilities).

In particular, the proposed legislation enables a structure that OFA and TD believe will enable financing at a reasonable cost. Key elements that support this financing structure include:

CONFIDENTIAL

- OPG issuances of subordinated debt to the SPV/Trust representing up to 49% of total borrowing; and

- Conditional (springing) guarantees by the Province to provide a backstop in the event of specific and limited events (e.g., changes to legislation that harm investor interests).

Note: The ability to finance and the cost of financing will only be known with certainty once OPG takes this structure to market.

OPG Financing / OPG Equity Financing

The ability to engage in the fair distribution of clean energy costs requires financing during periods where the collection of the clean energy costs is deferred to later years. The proposed legislation outlines mechanisms that are required to enable the financing and meet requirements for rating agencies and investors.

IESO will have a funding gap resulting from the reduction in amounts collected over four years. The legislation enables IESO to record the under-collection of GA in a variance account, and deems this under-collected amount to be a “Regulatory Asset”.

- OEB would determine rates to allow IESO to recover under-collection recorded in its variance account.

- IESO is authorized to sell all or a portion to the OPG Special Purpose Vehicle (SPV)/Trust under the Financing Plan.

As part of supporting the financing and administration of the GA refinancing mechanism, it is expected that OPG would purchase the right to future cash flows from IESO on an ongoing basis.

The sale of the regulatory asset from IESO to the OPG Special Purpose Vehicle (SPV)/Trust creates an “Investment Asset”.

- The Investment Asset allows for the recovery of the under-collected GA as the Investment Asset may in turn be sold to other investors or group of investors.

The Ministry has worked closely with third-party financial advisors in advance of and throughout the drafting process to help to ensure that the proposed legislation enables refinancing of the GA.

CONFIDENTIAL

These purchases would be financed in part by capital infusions from the Province to OPG for the purposes of stabilizing OPG's capital structure:

- OPG would require monthly "equity injections" from the Province which would be fiscally neutral as OPG would issue new shares to the Province in exchange;

- Funds from the Province would flow from the Ontario Financing Authority (OFA); and

- The Ministry, OFA and OPG are working through the specific mechanisms, timelines and share features.

- It is anticipated that the initial equity injection would take place as early as June 2017.

Through PRRT, the Ministry of Energy received approval for the creation of an operating asset "OPG Share Purchase" and expenditure increase of $1.1billion in 2017-18 within Vote 2905-5, which is based on the latest estimates by IESO, and provides flexibility to account for forecasting uncertainty. This approval is pending passage of the proposed legislation.

OPG will provide a two year forecast of its equity requirements to the Ministry on annual basis, as part of OPG's business plan process. Note: While included in the business plan, equity requirements will not form part of the Ministry of Energy's concurrence process.

For future funding requirements, the Ministry will seek appropriation through the PRRT process.

OPG will seek to achieve the highest possible credit rating (i.e., AAA is possible) in order to reduce borrowing costs and attract a wide investor base. Credit ratings will depend on provisions in legislation, regulation and agreements as well as the capital structure of the SPV / Trust. Despite these factors, rating agencies may see the Province's rating forming a ceiling given the contingent guarantees that the Province will provide (described above).

In addition, given the long term nature of this program (i.e., approximately thirty-years), the calculations related to refinancing of the GA set out in the proposed legislation will be subject to fluctuations in Ontario electricity demand, GA and interest rates in the medium to long-term.

- Should electricity demand be higher than forecast as a result of greater electrification, the cost of paying off the debt will be spread over a greater pool of consumption and decreasing future costs for individual

CONFIDENTIAL

ratepayers. Note: The reverse is also true in regards to decreasing demand.

- Should interest costs increase from the assumed 5%, total borrowing costs would rise. Given that this is a unique offering, managing investor confidence will be key to ensure borrowing costs don't rise. Note: The reverse is also true in regards to interest rates being lower than assumed.

IESO's Credit Facilities

IESO is in discussions with the Ontario Financing Authority (OFA) regarding an increase to its current "line of credit" with the OFA and OEFC (i.e., credit facilities). The increases are in response to IESO role in the delivery of OFHP and to provide a necessary buffer to fund short periods where OPG SPV/Trust does not fund a shortfall.

IESO advises that this is important not only for IESO solvency, but also to maintain its credit rating (i.e., IESO's contracted suppliers' credit arrangements are often based on IESO maintaining a certain rating).

IESO would require financing to compensate generators should it be required to hold any portion of the unpurchased Regulatory Asset beyond each monthly settlement period. OPG Trust is not expected to access public capital markets monthly, nor is it required to purchase the regulatory asset. Therefore, IESO will need a credit facility for interim financing. IESO may also require longer-term financing to maintain the deferral financing plan, should the OPG Trust not be able to access debt markets on a timely basis for purchase of some or all of the regulatory asset.

Accounting

The legislation to enable GA refinancing has benefitted from the review and input of IESO/KPMG, OPG/E&Y and OPCD/E&Y.

The proposed legislation establishes mechanisms to enable the funding, sale and transfer between IESO and OPG that respond to the accounting requirements and advice outlined in the March 1, 2017 Cabinet Submission, such as concerns regarding consolidation by the Province.

Under the proposed legislation, OEB will issue an "accounting order" to authorize IESO to create a variance account in which it will record the funding shortfall and recover the shortfall in accordance with the legislation and regulations. This satisfies accounting concerns regarding OEB oversight in the establishment of the Regulatory Asset.

CONFIDENTIAL

IESO will effectively sell the "right to collect" deferred future revenue from ratepayers to OPG in return for cash proceeds.

The proposed legislation and the associated amendments to the Electricity Act, 1998, enable OPG to create OPG's SPV/Trust as a stand-alone entity able to conduct business separately under a Trust agreement.

To recover its revenue shortfall, IESO will establish a Regulatory Asset that it would sell to OPG's SPV/Trust.

KPMG

The Ministry has worked closely with the Independent Electricity System Operator (IESO) and KPMG on the accounting considerations of GA Refinancing (i.e., legislation, applications of accounting standards/principles, minimizing consolidation risks and ability to establish a regulatory asset).

In particular, the proposed legislation provides a structure that IESO and KMPG believe meets the necessary accounting requirements. Key elements include:

- An IESO variance account created by the proposed legislation that would be recognized as a "regulatory asset".

- An Ontario Power Generation (OPG) special purpose vehicle (SPV) / Trust that would not controlled by IESO and thus have no consolidation risk for IESO.

In addition, KMPG provided some commentary on the accounting requirement for the "derecognition" of the regulatory asset once it's sold to OPG SPV/Trust. KPMG advised that the regulatory asset should be derecognized upon transfer to the OPG SPV/Trust as IESO no longer has rights or obligations to the asset (i.e., the transformation from a regulatory asset to an investment asset).

OPG

The Ministry has worked closely with the Ontario Power Generation (OPG) and E&Y, on the accounting requirements to enable GA Refinancing with respect to consolidation (i.e., legislation, applications of accounting standards/principles, establishing a special purpose vehicle (SPV) / Trust).

The proposed legislation and the associated amendments to the Electricity Act, 1998, enable OPG to create OPG's SPV/Trust as a stand-alone entity able to conduct business separately under a Trust agreement. Note: To further support the operations and mechanics of the OPG SPV/Trust,

CONFIDENTIAL

additional work will be done through the regulations and supporting agreements/documents.

- OPG will have the authority to set up the SPV/Trust and assign it with powers regarding decision-making, funding and ongoing operation.

- OPG and IESO are developing a process that will allow interest payments to occur under GA Refinancing.

Based on the existing and proposed legislation, key operating conditions being addressed in regulations and supporting agreements/documents and no introduction of new conditions that would conflict with OPG's control of the SPV/Trust, E&Y concurs with OPG's assessment that the accounting requirements to support "consolidation" of OPG SPV / Trust with OPG Inc. can be met.

Legal

In principle, refinancing the Global Adjustment (GA) to spread the costs of generation and conservation assets over the useful life of the assets presents only a "low" risk of being an unconstitutional tax, as each cohort of consumers pays for a proportion of the GA cost roughly equal to the proportion of the benefit they receive from the useful life of the assets.

Legal risk arises if it becomes apparent that the Government is not spreading cost so that it is shared proportionately by future consumers who cause a need for or benefit from the generation asset, but rather is doing so in order to lower the price in the "short" term by increasing the price in the long term. If the proposed financing served to encumber future consumers with a premium payment to cover the GA financing in order to subsidize current ratepayers, then there would be a moderately high constitutional risk that the financing proposal would result in an unconstitutional tax.

Former Supreme Court Justice Ian Binnie has provided a legal opinion concluding that the current proposal is at a moderately high risk of being a tax, for the following reasons:

- The degree of constitutional risk is in direct proportion to the extent the government is not able to show a proper match between the cost of providing facilities for electricity generation and the group of consumers who benefit year to year from electricity generated by those facilities.

- If the government fails to establish that the relevant electricity generating assets will continue to perform economically over the 30-

CONFIDENTIAL

year period, or if the GA charge is in the opinion of the Court disproportionately backend loaded, the GA will not qualify as a regulatory charge (and would be characterized as a tax).

- By shifting costs to the 20-30 year customers, the government may in reality be disproportionately back-end loading the GA with the effect that the 20-30 year consumers will be subsidizing the 1-20 year consumers.

- The judges can be expected to be aware of the difficult political problem of high energy costs in in Ontario, and will take a careful look at the government's evidence in support of the re-allocation of the GA.

The legislation contains provisions to mitigate the constitutional law risks, including requiring the Minister of Energy to reallocate estimated clean energy costs attributable to each reference period in a way that takes into account the need to align those costs with the estimated clean energy benefits attributable to the same period. Limiting the near-term rate reductions to such amounts which can be justified as counterbalancing disproportionate GA payments during the 2005-2017 period ensures that the statutory 25% reduction is consistent with proportionate reallocation.

The bill provides for provincial assurances, guarantees and a statutory cause of action.

The provincial assurance provision is intended to mirror as closely as possible the language of a similar provision that appears in legislation in the United States that purports to limit a state legislature's ability to enact legislation that would affect the transaction.

The main legal risk associated with the provision is that its precise legal purpose and intended effect are not clear. Under Canadian law, it is not possible for legislation to limit the future exercise of legislative power by the Legislature, including the power to amend or repeal statutory provisions or to expropriate private rights conferred under past statutes.

In light of this limitation, the U.S. provision has been modified to focus on possible actions by the executive branch of government that might undermine the value of the proposed securities (including regulation-making), rather than seeking to constrain the Legislature's powers. However, in the absence of some future statutory amendment, it is not clear what, if any, executive action could have the effect of undermining the payment obligation that would be

CONFIDENTIAL

imposed on consumers under the Act and, therefore, it is not clear what practical risk the provision is designed to mitigate against. This uncertainty creates a risk that a reviewing court could construe the provision in unanticipated ways.

The guarantee provisions are intended to backstop the provincial assurance provision and provide that:

- The Minister of Energy and Minister of Finance may, with LGIC approval, enter into agreements regarding the performance of IESO or electricity vendors; and

- The Minister of Energy and Minister of Finance may, pursuant to LGIC order, agree to guarantee and indemnify any debt, obligation, security or undertaking associated with an investment interest.

Legal risk to the province will be assessed as the agreements are negotiated and drafted.

A statutory cause of action may be created by LGIC regulation. Much like the provincial assurance provision, the statutory cause of action provision is intended to mirror features of US legislation. Legal risk to the province will be assessed as the regulation defining the statutory cause of action is developed.

The Ministry retained Blakes to provide external legal advice in the development of the legislation. The Blakes team provided securitization, constitutional law, energy sector and government expertise. This team was integral to balancing the accounting, legal and finaceability imperatives, as well as differing interests among OPG, IESO, OEB and investment dealers, in crafting the legislation. Blakes will continue to advise through the development of regulations and the commercial agreements that will ensue.

Navigant Analysis

Navigant Consulting has been retained and is conducting research and analysis that would support the implementation of GA refinancing. Specifically, Navigant is conducting analysis that would inform the expected lifecycle of existing generation infrastructure. Navigant is also analyzing the financial benefits that could be achieved by more closely aligning the costs of this infrastructure with the period over which it is expected to provide benefits. In addition, the Ministry has asked for analysis of the social, health and environmental benefits of phasing-out of coal-fired generation in the province and identify which, if any of these benefits are already accounted for in generator contracts.

CONFIDENTIAL

2) Social Programs:

Program Design

Rural or Remote Rate Protection (RRRP)

The legacy RRRP program remains intact with no changes made to the amount of the rate protection or the eligible LDCs. The proposed legislation provides the authority for the government to prescribe classes of customers, customers or LDCs that would be funded through the tax-base rather than the rate-base.

If passed, the government proposes to identify Hydro One R2 customers, as having their RRRP funded through appropriated funds.

Distribution Rate Protection

New Distribution Rate Protection program, to complement the Rural or Remote Electricity Rate Protection (RRRP) program, would be established through proposed legislative amendments under the *Fair Hydro Act, 2017,* and the creation of consequential regulations. Eligible residential customers would have their monthly base distribution charges held to a maximum amount.

Distribution rate protection would be extended to eligible residential customers served by LDCs with the highest distribution costs. Roughly 800,000 customers would receive benefits from the broadened rate protection.

Customers of the following LDCs are eligible for the enhance protection: Hydro One (R1 and R2 rate classes), Algoma Power, Atikokan Hydro, InnPower, Chapleau Public Utilities Commission, Sioux Lookout Hydro, Lakeland Power (Parry Sound service territory) and Northern Ontario Wires Inc.

On-Reserve First Nations Delivery Credit

Eligible on-reserve customers will receive a 100% delivery credit or the elimination of their monthly service charge on their electricity bills. The eligibility requirements will be prescribed under regulation.

There are 11 LDCs identified by OEB that provide service to on-reserve customers affected by the program. These include: Algoma, Attawapiskat, Bluewater, Cat Lake, Cornwall, Fort Albany, Kashechewan, Hydro One,

CONFIDENTIAL

Remote Communities, PUC(Sault Ste. Marie), Thunder Bay. In total, about 21,500 customers may be eligible.

Ontario Electricity Support Program (OESP)

The OESP is an income-tested, application based program that lowers electricity costs of the most vulnerable consumers by a rebate directly on bills. The OESP is currently funded by the rate base.

OESP credits vary by income level and family size, and there are two credit scales that include:

- The basic program credit ranges from $30/month to $50/month.
- An enhanced credit that ranges from $45/month to $75/month for consumers that are either Indigenous, use electric heat or use certain electrically intensive medical devices.

Ontario's Fair Hydro Plan (OFHP) committed to move the program from the rate base to the tax base, and to expand the OESP by increasing the credit amounts by 50 per cent, making more Ontarians eligible for the program, and aligning the OESP with other social assistance programs to increase uptake.

The proposed legislative changes will address the move to the tax base, and regulatory changes approved by Cabinet on April 10, 2017 will enable the expansion of the OESP effective May 1, 2017. Discussions are ongoing with the OEB and MCSS on aligning OESP delivery with other social assistance programs.

<u>Roles and Responsibilities</u>

Rural or Remote Rate Protection

The roles and responsibilities of the Board remain the same in terms of administering the legacy RRRP program. ENERGY will now be responsible for appropriating the funds from the legislature on an annual basis to cover the costs faced by those consumers or classes of consumers prescribed under regulation (namely Hydro One R2 customers).

Enhanced RRRP or Distribution Rate Protection

The Board would be empowered, by regulation, to set the maximum monthly base distribution charge, based on prescribed criteria.

ENERGY would once again need to appropriate money from the legislature to cover the costs of administering the program.

CONFIDENTIAL

On-Reserve First Nations Delivery Credit

ENERGY would be responsible for appropriating the money from the legislature to cover the costs of administering the credit to on-reserve customers. In addition, ENERGY would need to work with LDCs, Chiefs of Ontario and Band Councils to ensure the program is delivered to all eligible consumers.

Ontario Electricity Support Program

The OEB will continue to the deliver the OESP under the current legislative framework until the variance account is depleted. When legislative changes to shift the program from the rate base to the tax base are proclaimed, the OEB will continue to administer the program, but certain decision making responsibilities and oversights will shift to the Minister of Energy.

MCSS will begin supporting OESP uptake by helping social assistance clients to apply to the OESP. Legislative and regulatory changes will enable this work.

The IESO will continue to manage payments to utilities, unit sub-meter providers, and the OEB in relation to OESP credit delivery and program administration costs. When legislative changes are proclaimed, IESO will begin reporting costs to the Ministry to support forecasting and audit.

3) ICI Expansion:

As part of OFHP, the government announced plans to further reduce the ICI threshold from 1 megawatt (MW) to 500 kilowatts (kW) and to target more small manufacturing and industrial consumers.

Effective April 13, 2017, electricity consumers and market participants in the manufacturing and greenhouse sectors (i.e., with North American Industry Classification Standard (NAICS) codes commencing with the digits "31", "32", "33", and “1114”) in Ontario with an average monthly peak demand of greater than 500 kW and less than or equal to 1 MW are eligible to opt-in to ICI. Billing for electricity consumers that opt-in to ICI begins July 1, 2017.

In addition, the Ministry has retained the OCC and the CME to undertake targeted stakeholder outreach.

The rate-base impact of expanding ICI to consumers in the manufacturing and greenhouse sectors is expected to be modest for non-ICI participants. **Note:** The extent of the impact will depend on the uptake in the newly

CONFIDENTIAL

expanded ICI. The Ministry of Energy regularly monitors electricity prices and electricity demand for all classes of electricity consumers and would be able to assess the potential impacts of the regulatory amendments, starting after July 2017.

4.0 BACKGROUND

Decarbonizing and Modernize Ontario's Energy System

Ontario's energy system is being transformed – more than $50 billion has been invested to decarbonize and modernize the electricity system, including an investment of over $35 billion in clean and renewable generation.

Over the last decade the government has invested in Ontario's transmission and distribution infrastructure (i.e., the grid), clean generation and phased out the use of coal-fired generation, which has resulted in electricity prices increasing.

The Ministry of Energy has taken a number of actions to lower electricity costs for all consumers by:

- Deferring investments in generation (e.g., new build nuclear), improving market efficiency (e.g., wind dispatch) and decreasing the cost of renewable procurements (e.g., Green Energy Investment Agreement (GEIA) renegotiation, decreasing Feed-In Tariff (FIT) prices; and

- Increasing cost effectiveness and improving efficiency by adopting new electricity market approaches (e.g., no new NUG contracting and demand response).

Following the 2016 Speech from the Throne, several actions were announced to further reduce electricity costs:

- As of January 1, 2017, Ontario is rebating an amount equal to the provincial portion of the HST to reduce eligible residential, small business and farm electricity bills by 8 per cent.

- Expanded support to eligible rural consumers by updating Rural or Remote Rate Protection (RRRP) with the additional relief, decreasing total electricity bills by an average of $45 each month when combined with the 8 per cent rebate.

- Expanding the Industrial Conservation Initiative (ICI) – up to one-third savings for participants.

- Suspending the LRP II and the Energy from Waste Standard Offer Program (EFWSOP) – up to $3.8 billion in savings.

CONFIDENTIAL

- Limiting the Feed-In Tariff (FIT) 5 procurement target to 150 MW and suspending future FIT procurements – average annual savings of $15 million.

Ontario's Fair Hydro Plan

On March 2, 2017, the government announced Ontario's Fair Hydro Plan (OFHP). The OFHP includes the following:

- Refinancing the GA over a longer period for Regulated Price Plan (RPP) eligible consumers, including residential consumers and most small businesses and farms.

- Shifting cost recovery for Rural or Remote Rate Protection (RRRP) and Ontario Electricity Support Program (OESP) from electricity bills to the tax base, lowering the regulatory charges paid by ratepayers. Consumers of all sizes would benefit from this change.

- Helping vulnerable electricity consumers by enhancing electricity support programs, including:

  - Broadening RRRP to provide delivery charge relief for the customers of the local distribution companies (LDCs) with the highest delivery charges. We currently support approximately 350,000 Ontarians living in rural or remote areas through RRRP. The enhancement would extend relief to approximately 800,000 households in total.

  - Expanding the OESP, which provides relief directly on the bills of low-income consumers who have applied and meet the eligibility criteria. The expansion would increase OESP credits by 50 per cent and allow more Ontarians to benefit from the program.

  - Establishing a new Affordability Fund, which would provide financial support to lower-income Ontarians who are not eligible for the Home Assistance Program to make home energy efficiency improvements, helping to manage their energy costs.

  - Establishing a Delivery Credit to eliminate delivery charges for all First Nations people living on reserve.

- Expanding the Industrial Conservation Initiative (ICI), which allows large consumers to reduce their electricity bills by up to one-third by reducing their consumption during peak hours. The expansion will allow manufacturers and greenhouses between 500 kW and 1 MW to

CONFIDENTIAL

participate, in addition to the consumers over 1 MW that are already eligible.

- OFHP also committed to reducing system costs by improving sector efficiency and modernizing Ontario's electricity market, working in collaboration with the Independent Electricity System Operator (IESO) and the Ontario Energy Board (OEB).

Legislation to Enable the Refinancing of Global Adjustment

To enable implementation of GA refinancing and mitigate financing, accounting and legal risks, the Ministry has developed proposed legislation (and is working on supporting regulations) that outlines:

- Roles and responsibilities for the OEB, IESO, OPG and the Province;
- A detailed Preamble, Purpose and Definitions;
- Details with respect to Fair Adjustment, Clean Energy Adjustment, Implementation (i.e., Financial Services Manager, Fair Allocation Amount, Financing Plan), Regulatory Asset and Investment Asset;
- Scope of provincial undertaking and enabling the Province to provide guarantees and indemnities to back stop that undertaking; and
- Amendments to other acts (i.e., *Electricity Act* and *Ontario Energy Board)*.

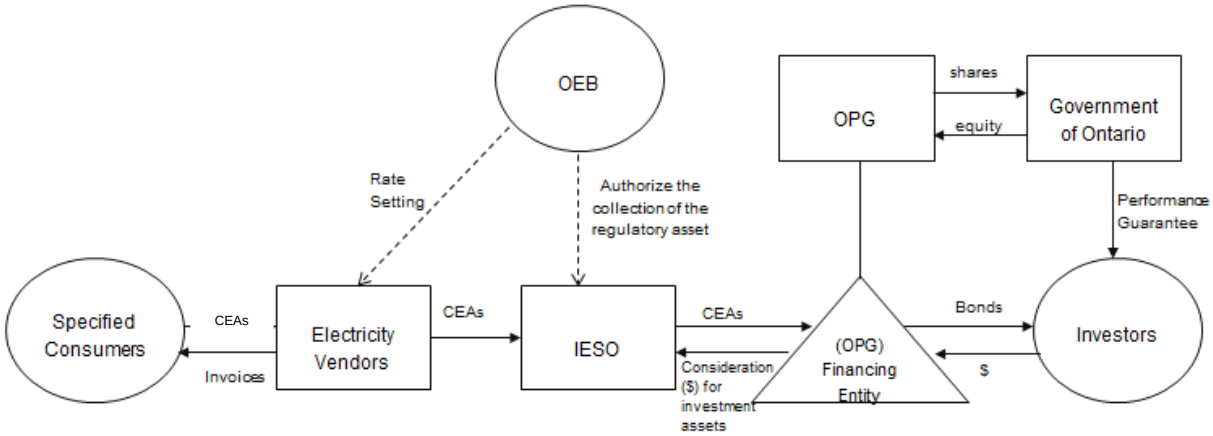
The supporting legislation defines the mechanisms and framework that would achieve the refinancing of the Global Adjustment.

The Ministry has worked closely with key ministries (i.e., TBS-OPCD, MOF-OFA/IGS, MAG, CO), OEB, IESO, OPG and their independent advisors and third party financing in the development of the proposed legislation.

CONFIDENTIAL

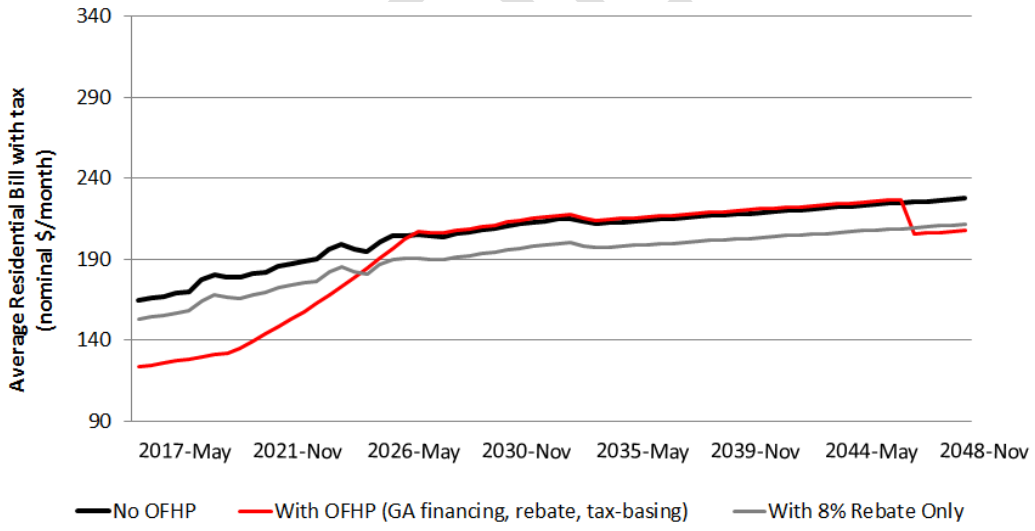
GA Refinancing Implementation Model – Overview

The diagram below outlines how the refinancing of GA would be implemented:



Note: CEAs are “clean energy adjustments”.

Multi-Year Profile of GA Refinancing / Assumptions



The chart above shows the expected multi-year profile under GA Refinancing for each Regulated Price Plan (RPP) period. In the first year, residential bills are projected to be 25 per cent lower as result of the OFHP. In the early years, bills increases are held to the rate of inflation – assumed to be 2% per year in the chart above. From July 1, 2021 onwards, prices increase at a higher rate compared to the first four years on the OFHP.

In the medium to longer term, residential bills exceed what they would have been but for the OFHP. However, in any given year, a typical residential bill under the OFHP cannot exceed what it would have been without OFHP by more than 10 per cent.

OPG's Financing Structure / Equity Financing

The ability to engage in the fair distribution of clean energy costs requires financing during periods where the collection of the clean energy costs is deferred to later years. The legislation outlines mechanisms that are required to enable the financing and meet requirements for rating agencies and investors.

IESO will have a funding gap resulting from the reduction in amounts collected during four years. The legislation enables IESO to record the under-collection of GA in a variance account, and deems this under-collected amount to be a "Regulatory Asset".

- OEB would determine rates to allow IESO to recover under-collection recorded in its variance account.

- IESO is authorized to sell all or a portion to the OPG Special Purpose Vehicle (SPV)/Trust under the Financing Plan.

As part of supporting the financing and administration of the GA refinancing mechanism, it is expected that OPG would purchase the right to future cash flows from IESO on an ongoing basis.

The sale of the regulatory asset from IESO to the OPG Special Purpose Vehicle (SPV)/Trust creates an "Investment Asset".

- The Investment Asset allows for the recovery of the under-collected GA as the Investment Asset may in turn be sold to other investors or group of investors.

As part of supporting the financing and administration of the GA refinancing mechanism, it is expected that OPG would purchase the right to future cash flows from IESO on an ongoing basis.

These purchases would be financed in part by capital infusions from the Province to OPG for the purposes of stabilizing OPG's capital structure:

- OPG would require monthly "equity injections" from the Province;

- Funds from the Province would flow from the Ontario Financing Authority (OFA); and

CONFIDENTIAL

- The Ministry, OFA and OPG are working through the specific mechanisms, timelines and share features.

Global Adjustment – Overview

The Global Adjustment (GA) accounts for the fixed costs, including capital costs, of running Ontario's generation fleet, as well as the cost of conservation programs. GA is instrumental in maintaining a reliable electricity system by ensuring that sufficient generating capacity is available.

It is via GA that much of the costs of investments in developing a clean, modern and reliable electricity system with a diverse supply mix are recovered.

The vast majority of GA costs now stem from greenhouse gas (GHG) emissions-free renewable and nuclear generation facilities, as well as natural gas plants that were constructed to improve system reliability and replace coal-fired capacity. Generators in Ontario received contracted or regulated rates, which are typically designed to recover capital, financing and fixed operations costs. The GA recovers these fixed costs of running the province's generation fleet, as well as the cost of conservation programs.

The majority of the province's electricity generators are under 20-year contracts and account for under 50% of the GA. Some of these generators will continue to provide value to the electricity system beyond their contract lives (i.e., beyond 20 years). Similarly, conservation costs are recovered annually on an 'as incurred basis' through GA while conservation initiatives can reasonably be expected to provide benefits to the electricity system over many years.

The Ministry is proposing in legislation to recognize the long-term benefit of specific assets to the electricity system and "bring forward" that benefit for ratepayers today by deferring some of the current costs. The proposed legislation outlines how costs would be fairly allocated among eligible consumers over time.

OEB's Regulated Price Plan (RPP) – Overview

On April 20, 2017, the OEB announced new Regulated Price Plan (RPP) rates effective May 1, 2017 that include a portion of the bill reduction proposed under OFHP and the shifting of the funding of the Ontario Electricity Support Program (OESP) to provincial revenues. The full reduction from OFHP is expected to be addressed through a July 1st RPP rate adjustment.

CONFIDENTIAL

Social Program

Rural or Remote Rate Protection (RRRP)

Part of the program helps fund the costs of Hydro One customers classified into the "R2" residential rate class. There are approximately 335,000 R2 customers across the Province. These customers have some of the highest distribution costs in the Province.

- From 2001-2016 the program provided $125.4 million annually to help defray these costs.
- In the 2016 Speech from the Throne, this funding was expanded by $116.4 million to a total of $241.9 million.
- As of Jan 2017 R2 customers receive $60.50/month off their distribution costs.
- These customers still have high distribution costs and are often faced with significantly higher than average bills.

The higher than average consumption patterns coupled with higher than average distribution rates has resulted in monthly bills many view as no longer affordable or equitable.

RRRP is currently funded by rate-payers. All IESO-grid connected consumers pay a charge of $0.0021 per kilowatt-hour to off-set the costs of delivering RRRP. For an average residential customer this amounts to ~$1.60 per month. This charge will be substantially reduced once the R2 portion of the RRRP program is funded through the tax-base, rather than rate payers.

Distribution Rate Protection (DRP)

RRRP is targeted to customers based on geographic and density-based criteria. Many customers, including those in rural areas, face higher than average distribution costs, but are not eligible to receive rate protection under RRRP.

Energy is proposing legislative amendments that will broaden rate protection by creating a new distribution rate protection program to complement the Rural or Remote Electricity Rate Protection program.

Distribution rate protection would be extended to eligible residential customers served by LDCs with the highest distribution costs. Roughly 800,000 customers would receive benefits from the broadened rate protection.

CONFIDENTIAL

- Providing distribution rate protection to a broader number of consumers would help mitigate geographic-based differences in rates for the consumers who are most impacted and often see such differences as inequitable.

Mitigation for all electricity consumers would be provided by moving the existing RRRP program costs and the proposed enhancements from the electricity rate base to the tax-base.

On-Reserve First Nations Delivery Credit

On-Reserve First Nations customers experience challenges with energy affordability and are seeking to address historical grievances associated with electricity system infrastructure.

ENERGY has a number of Bilateral Tables with the Chiefs of Ontario (COO) and First Nations that include the Energy Table to discuss policy issues, the Hydro One Negotiating Table to discuss Hydro One shares, and the Grievance Table.

The Grievance Table process was established at the request of COO as a means to avoid litigation to resolve historic grievances related to the energy sector and prevent these issues from impeding progress on broadening the ownership of Hydro One (H1).

The cost of electricity and delivery charges were identified as the prevailing grievance at the First Nations-Ontario Energy Table meeting in Timmins in 2016, and the Minister of Energy agreed to explore options for a First Nations Rate through the Grievance Table process.

Ontario Electricity Support Program (OESP)

The OESP launched on January 1, 2016. By the end of March 2017:

- Almost 192,000 have been enrolled in the program, which is approximately 1/3 of all potentially eligible low-income customers in Ontario.

- Over $60 million in credits have been provided to vulnerable consumers.

- 172 intake agencies have been mobilized to assist low income consumers to apply for the OESP.

CONFIDENTIAL

Industrial Conservation Initiative (ICI)

Ontario is committed to providing competitive electricity rates for energy intensive consumers in the manufacturing sector while also promoting electricity conservation.

In January 2011, ICI was announced to help large industrial power users better manage their electricity costs while reducing electricity consumption during peak periods. ICI provides a strong incentive for large electricity consumers to shift their electricity consumption to off-peak hours to reduce their bills by about one-third. Reducing peak demand increases the reliability of the electricity system, reduces greenhouse gas (GHG) emissions and helps defer the need to procure new resources. There are now about 300 participating consumers who collectively reduced Ontario's peak demand by an estimated 1,000 MW in 2015.

Currently, ICI is available to electricity consumers who have an average monthly peak demand greater than 1 MW (i.e., Class A). Smaller electricity consumers – known as “Class B” consumers – are charged GA based on their total consumption regardless of when it occurs.

ICI provides a strong incentive for participating consumers to reduce their consumption during peak hours to reduce their cost. Note: ICI is administered by the Independently Electricity System Operator (IESO) and Local Distribution Companies (LDCs).

As of January 1, 2017, the regulatory amendments came into effect to make ICI available to electricity consumers with an average monthly peak demand greater than 1 MW. The lowering of the ICI threshold to 1MW and removal of sector restrictions was announced in the 2016 Speech From the Throne.

On March 2, 2017, as part of Ontario’s Fair Hydro Plan (OFHP), the government announced plans to further reduce the ICI threshold from 1 megawatt (MW) to 500 kilowatts (kW) and to target more small manufacturing and industrial consumers.

Effective April 13, 2017, electricity consumers and market participants in the manufacturing and greenhouse sectors in Ontario with an average monthly peak demand of greater than 500 kW and less than or equal to 1 MW are eligible to opt-in to ICI. Billing for electricity consumers that opt-in to ICI begins July 1, 2017.

- Provisions were also provided to allow electricity consumers to continue their participation in ICI if their demand falls below the monthly peak demand threshold while participating in certain prescribed Conservation and CDM programs and/or OCCSDC programs and pilots.

CONFIDENTIAL

5.0 TIMING

As part of OFHP, the government announced that eligible electricity consumers would see the reduction to their electricity bills in the summer of 2017 (i.e., July).

On April 20, 2017, OEB announced that it has adjusted the RPP rates effective May 1, 2017 to account for its estimation of the impact of a portion of GA Refinancing. The Ministry anticipates that the OEB will set an interim rate adjustment following the passage of the legislation to enable GA Refinancing that would account for the full impact (i.e., 25 per cent).

The Ministry is planning to introduce legislation in early May 2017 and develop supporting regulations in early summer 2017 to enable GA Refinancing. Note: The OPG will require legislation and regulations to be in place to support its discussions with rating agencies and third-party financing.

The timeline for all of the social programs, with the exception of the OESP, is identical as the program implementation for the regulations that follow to be passed in unison for July 1, 2017.

Some of Ontario's Fair Hydro Plan commitments for the OESP came into effect on May 1, 2017 (e.g., removal of the OESP charge from customer bills; expanding credit amounts and program eligibility). Remaining changes associated with moving the program from the rate-base to the tax-base will be proclaimed at a later date when the OESP variance account is depleted. Additional regulatory amendments needed to implement this legislative change will come into effect on the same date.

As part of the OFHP, the government also announced the expansion of ICI to enable greater participation from the manufacturing sectors in Ontario.

The April 2017 ICI amendments enabled new electricity consumer's time to opt in to the expanded program ahead of the next ICI billing period (i.e., July 1, 2017). Note: Under ICI, as set out in Ontario Regulation 429/04, eligible electricity consumers must opt in to the ICI program on or before June 15 of each calendar each year.

6.0 FINANCIAL IMPACT

1) GA Refinancing:

As it relates to the "equity injection", these changes are expected to have no impact on the Provincial net debt position as the Province's increased investment in OPG will be offset by the incremental borrowing to fund the

CONFIDENTIAL

equity injections. The Province has assumed incremental income from OPG arising from interest income on the subordinated debt which OPG will lend to the OPG Special Purpose Vehicle (SPV)/Trust. This offsets forecast increases in Provincial interest on debt expenses associated with equity injections.

Proposed legislation to enable GA refinancing has been drafted to mitigate financing, accounting and legal risks. In addition, IESO and OPG have sought independent advice and confirmation with respect to financing, accounting and legal matters.

Note: There would be a significant impact on provincial net debt and the fiscal plan if the legal, financing and accounting conditions change.

2) Social Programs:

As approved in the TB/MBC submission of Mach 1, 2017 and confirmed in Vote-Item 2905-1, the financial impacts of the social programs for the period July 1 2017- March 31 2018 are as follows:

Program	2017-18 Budget
Rural or Remote Rate Protection	344,000,000
Ontario Electricity Support Program	140,000,000
On-Reserve First Nations Delivery Credit	15,000,000

The IESO manages a variance account for the OESP, which holds the difference between the amount of OESP charge collected from the rate base, and the amount of OESP paid out in the form of credits. The amount in the variance account is about $109 million as of March 1, 2017. These funds will be used to fund the OESP program until the variance account is depleted, at which point the transfer payment line will be used to finance the program costs. Due to the potential range in costs of the OESP, which will depend on program uptake and any costs associated with supporting increased participation, the set allocation is required despite the variance account.

ENERGY will report back as part of PRRT with an update on out-year projections following analysis on rate applications before the Ontario Energy Board.

3) ICI Expansion:

Since ICI is funded through the electricity rate-based and not the provincial tax-base, ICI expansion will have no direct financial impact for the Province.

With respect to rate-base impacts, expanding ICI to consumers in the manufacturing and greenhouse sectors (i.e., between 500 kW and 1 MW) is

CONFIDENTIAL

expected to result in a modest increase on electricity bills for non-ICI participants starting in July 2017. For example, preliminary analysis estimates that the increase on a typical residential bill would by up to 0.66% or just over $1/month based on a 2016 bill of about $158.

Note: The extent of the non-ICI participant impact will depend on the uptake in the newly expanded ICI. The Ministry of Energy regularly monitors electricity prices and electricity demand for all classes of electricity consumers and would be able to assess the potential impacts of the regulatory amendments, starting in July 2017.

7.0 STAKEHOLDER ANALYSIS

Stakeholder	Comments
Eligible Electricity Consumers	• As a result of OFHP, eligible electricity consumers will welcome the immediate reduction in electricity bills that they will experience in the short to medium term.
Electricity Agencies	• In the development of legislation to enable implementation of OFHP, the Ministry has been working closely with OEB, IESO and OPG and their independent advisors.
Local Distribution Companies (LDCs)	• The Ministry hosted LDC workshop sessions on March 16 and April 19, 2017. Nearly 40 LDC representatives attended in person or by phone and were briefed on OFHP, including implementation.
Chief of Ontario (COO)	• COO have publicly supported the introduction of the First Nations Delivery Credit. • ENERGY met with COO on April 26, 2017 to discuss implementation.
Future Industrial Conservation Initiative (ICI) Participants	• On March 9, 2017, the Ministry posted an ICI expansion proposal for comment on the Regulatory Registry for stakeholder comment. The Ministry has received 7 comments. • The Ministry is also working with the IESO, OCC and the CME regarding targeted outreach in relation to the ICI expansion.

8.0 RISK ASSESSMENT AND MITIGATION

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy
1) Global Adjustment (GA) Refinancing			
Maintaining OPG's Financial Viability / Capital Structure	L	H	• OPG requires equity injections on an on-going basis from the Province (i.e., Ministry of Energy). • Equity injections are necessary to support OPG as the owner and manager of GA refinancing. The equity injections allow OPG to strengthen the capital structure of the Trust in order to secure financing at a reasonable cost.

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy
			• In order to provide financing, OPG would develop a special purpose vehicle (SPV). • OPG has a great deal of experience managing the risks associated with borrowing through its experience developing capital-intensive generation projects as well as their management of Nuclear Funds. • OPG will seek to achieve the highest possible credit rating (i.e., AAA is possible) in order to reduce borrowing costs and attract a wide investor base.
OPG Securing Capital Markets Funding	L	H	• OPG will need to obtain a portion of the required funding from the capital markets. • The Ministry has worked closely with third-party financial advisors in advance of and throughout the drafting process to help to ensure that the proposed legislation enables refinancing of the GA. • In order to provide financing, OPG would develop a special purpose vehicle (SPV) which will use 100% debt financing to purchase the regulatory asset, financing 51% through capital markets as senior debt, with the remaining 49% being provided by OPG as subordinated debt. • The 49% subordinated debt from OPG will be financed through debt OPG issues in its own capacity, through capital markets (up to 5%) with the remainder (44-49%) financed through equity injections from the Province. This will help to ensure OPG's capital structure remains in line.
Managing Interest Cost Risks	M	H	• Proposed legislation has been drafted with input from third-party financers (i.e., dealers). • OPG's Special Purpose Vehicle (SPV) / Trust is borrowing in its own

CONFIDENTIAL

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy
			corporate capacity from the capital markets. • Risk that it may incur a higher interest cost than what was originally forecast (i.e., 5%).
Provincial Guarantee is Triggered	L	H	• The proposed legislation sets out that the province would provide assurances in the form of a "provincial guarantee" to OPG and investors regarding the permanence of the GA Refinancing framework. The intent is to ensure that the full value is recovered. • The legislation also establishes assurances that the Province would: - Through the Minister of Finance as provided by Lieutenant Governor in Council, agree to guarantee any debts and obligationsTR; and - Not hinder the charging and remittance of the under-collection of GA refinancing (i.e., through a provincial undertaking and guarantee).
IESO Failure to Establish a Regulatory Asset	L	H	• Under the proposed legislation, the Ontario Energy Board (OEB) is providing the necessary oversight required to enable IESO the ability to establish a Regulatory Asset. • To recover its revenue shortfall, IESO will establish as a Regulatory Asset that it would sell to OPG's SPV / Trust. • The OEB will issue an accounting order to authorize IESO to do create a variance account in which it will record the funding shortfall and recover the shortfall in accordance with the legislation and regulations.
GA Refinancing Approach is Viewed as an Indirect-tax	L	H	• Proposed legislation to enable GA refinancing the costs associated with electricity generation facilities will be allocated across present and future electricity consumers will be set out in the Fair Allocation Amount. • The degree of constitutional risk is in direct proportion to the extent the government is not able to show a

CONFIDENTIAL

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy
			proper match between the cost of providing facilities for electricity generation and the group of consumers who benefit year to year from electricity generated by those facilities. • The Fair Allocation Amount will help to ensure that the allocation of costs associated with electricity generation facilities is reflected over the term of GA Refinancing.
2) Social Programs			
Social Program Implementation Delays	L	M	• Work with LDCs; provide transitional provisions. • Work with Chiefs of Ontario (COO) to develop a plan to identify eligible on-reserve customers. • The bill includes transitional provisions that would ensure customers remain eligible for the rate protection and First Nations Delivery Credit from the prescribed date.
Social Program Cost Estimating	M	M	• OESP costs will depend on uptake of the program, which will be impacted by the 50% increase in credits, enhanced eligibility, and work with MCSS on aligning OESP delivery with their social assistance programs. • Distribution Rate Protection costs are driven by a number of variable factors including: the OEB's rate setting process; the lowest cost distributor in the prescribed cohort of "high cost distributors" and consumption patterns. • Work with Ontario Energy Board (OEB) and the Independent Electricity System Operatory (IESO) to ensure access to data for regular forecasting • A mechanism would be created in regulation to ensure that all parties are aligned in the yearly forecasting and costing of the program.

CONFIDENTIAL

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy
Non-Status Indigenous communities without reserves or Metis could raise a Charter challenge on the First Nations On-Reserve Delivery Credit Program	L	L	• This risk is mitigated by the ameliorative purpose of the program and because targeting First Nations communities for a reserve-based program corresponds to the distinct circumstances of reserve-based communities, relative to other Indigenous communities. A genuinely ameliorative program that targets some people but excludes others is shielded from a section 15 challenge if it serves or advances the ameliorative goal.
3) Industrial Conservation Initiative (ICI) Expansion			
Perceived Fairness Between Electricity Consumer Classes	M	L	• The expansion of the ICI program include electricity consumers in the manufacturing and greenhouse sectors with average monthly peak demand greater than 500 kW and less than 1 MW will impact those consumers that remain outside the program (i.e., Class B and RPP electricity consumers). • Increases to electricity bills will occur for non-ICI participants to ensure full cost recovery in the electricity system. Note: the extent of the impact on other non-ICI participants would depend on the uptake in the newly expanded ICI, but is expected to be modest. • Restricting eligibility to the manufacturing and greenhouse sector helps to ensure that the expanded ICI is focused on those consumers which are most impacted by GA costs and associated economic competitiveness pressures from neighbouring jurisdictions.

9.0 JURISDICTIONAL ANALYSIS

GA Refinancing approached outlined in the proposed legislation is model on a those used in the United States (e.g., Duke Energy), where utility debt is financed by selling it to investors with recovery from ratepayers over time.

CONFIDENTIAL

The Ministry conducted no jurisdictional analysis related to the expansion of social program funding as the structure of Ontario's electricity sector, and thus the delivery of these benefits, is unique.

The ICI program is unique to Ontario and the proposed expansion would not directly impact on other jurisdictions.

10.0 PERFORMANCE MEASURES

The proposed legislation sets parameters within which refinancing of GA can proceed. These parameters include the initial percentage reduction in eligible electricity rates, the number of years that rates will increase at a rate equivalent to CPI and the length of time within which the recovery of funds must take place (i.e., by 2047). In addition, OPG's existing financial reporting process provides an additional framework for monitoring and reporting of OPG's role in OFHP.

With respect to the social programs, performance will be evaluated by the amount of funding flowed to consumers in order to reduce their electricity bills. The Ministry will work with the OEB over the coming years to ensure that data is available to determine if the programs continue to provide meaningful rate relief.

The Ministry and the OEB have engaged with the Behavioral Insights Office at the TBS to consider ways to increase program participation. Discussions are ongoing.
.

With respect to ICI, the Ministry regularly monitors electricity prices and electricity demand for all classes of electricity consumers and would be able to assess the potential impacts of the regulatory amendments, starting in July 2017.

11.0 COMMUNICATIONS

ENERGY has developed a comprehensive, two-phase media campaign to increase awareness of Ontario's existing rate mitigation measures and new proposed electricity initiatives under Ontario's Fair Hydro Plan OFHP):

- Phase I – Launched on March 13, 2017 and included radio and digital media in English and French. This was followed by multi-cultural extensions on radio in 19 languages. Phase I of the media campaign is complete.

- Phase II – Is expected to launch early Summer 2017 and will include television, radio, print, digital and social media advertising support.

ENERGY received TB/MBC approval on February 6, 2017 for an exemption from the competitive acquisition requirement under the *Procurement Directive on Advertising, Public and Media Relations, and Creative Communications Services* for the development of the electricity cost reduction public education campaign. Through this, ENERGY acquired the services of Rain43, an Agency of Record under Advertising Review Board's corporate vendor of record arrangement for advertising, public and media relations, and communication services, to develop this public education campaign with an estimates maximum value of $1,500,000.

As of July 20, 2015, PHD Canada is the Advertising Review Board's mandatory-use media planning and buying Agency of Record. In 2016-17, through Phase I, ENERGY has spent approximately $1,000,000 on media planning and buying for radio and digital media. The cost of media space for television is substantially higher than radio; as such, ENERGY is forecasting to spend an additional $2,500,000 in 2017-18.

This campaign is integral for demonstrating Ontario's commitment to lower energy costs for ratepayers through the new proposed electricity initiatives. This campaign could also open the Ministry to increased scrutiny as critics may conclude savings are too little or too late to help those suffering from what the media has deemed energy poverty. Public perception may be unchanged as emotional triggers to rising electricity prices and the constant stream of negative news by the media could overpower the campaign.

The Ministry has assessed the risks, and deems the benefits for running this campaign outweigh any risks of not doing so. ENERGY anticipates reaction from electricity consumers is to be generally positive with an awareness that changes to the electricity system have led to a reliable, cleaner system that is now more affordable.

In addition, the communications for GA refinancing, delivery electricity social programs and ICI expansion will be referenced in ongoing announcements related to Ontario's Fair Hydro Plan (OFHP) broadly, and as necessary targeted communications for specific stakeholder group can be developed.

For example, the Ministry has retained the OCC and the CME to undertake targeted stakeholder outreach on ICI and other cost saving energy programs/measures available to the commercial and industrial sectors in Ontario.

The Ministry will ensure that the social programs are communicated effectively to stakeholders and specific target audiences. The Ministry will leverage its agencies and its relationship with LDCs to ensure eligible consumers are aware of the programs.

Chiefs of Ontario (COO) will be a vital partner in communicating the benefits of the First Nations Delivery Credit.

CONFIDENTIAL

The Ministry also believes there is opportunity for consultation on the design of the electricity bill, with a goal to refresh the regulatory framework to improve the value of the bill to the consumer across all LDCs. The Ministry proposes to convene with LDCs in July, once they've had sufficient time to implement the OFHP initiatives and prescribed messaging.

Changes of this nature will require more in-depth consultation with LDCs, as well as broader regulatory amendments to simplify the requirements, necessitating a longer period to implement. This refresh would also include opportunities to communicate OFHP savings in a more personalized and comprehensive manner. For example, each customer could receive a "personalized" message indicating how much they saved as a result of the plan.

Based on this feedback, the Ministry would aim to introduce regulatory amendments to simplify bill presentment and introduce dynamic OFHP messaging in the Fall 2017.

12.0 RECOMMENDATION

1) The Ministry of Energy is reporting back to the Treasury Board/Management Board of Cabinet (TB/MBC) on following:

    i. Implementation of Global Adjustment (GA) Refinancing;

    ii. Delivery of Electricity Social Programs (i.e., Rural or Remote Rate Protection, Ontario Electricity Support Program and First Nations On-Reserve Delivery Credit); and

    iii. Expansion of Industrial Conservation Initiative (ICI).

2) APPROVE the Ministry funding a media buy procurement with a maximum value of $3,500,000 with PHD Canada, the Advertising Review Board's mandatory-use media planning and buying Agency of Record.

3) NOTE the Ministry of Energy has already spent approximately $1,000,000 with PHD Media in 2016-17 and is forecasting expense of approximately $2,500,000 in 2017-18.

4) NOTE the Ministry of Energy will return to TB/MBC to request a transfer of funds to the Ministry of Energy from the Bulk Media Buy program in Treasury Board Secretariat to fully recover the costs for the public education campaign.

5) APPROVE the creation of a new transfer payment line entitled "Price Mitigation Support Initiatives" under Vote/Item 2905-01, Electricity Price

CONFIDENTIAL

Mitigation, with a $1,000 placeholder, to support future rate mitigation initiatives.

I think that we should probably attend the 2 pm meeting re: guarantee in person so perhaps we can also meet with Ron and John at 1pm down at the OFA.

Would that work?

Subject: OPG/IESO Indemnities

Further to our conversations on the indemnities, it appears that this request will go to the MOF instead of TBS.

Energy has asked us to expedite this matter, as there is a board meeting of OPG or IESO early next week, and they want to have an approval before then so that this can be signed off on at that meeting. We still need some additional information as to the parameters of what is driving the timeline – for instance, it appears that IESO will have to act before OPG and that OPG may not need the indemnity as soon, but we are also not sure if OPG is asking for an indemnity before taking any other actions.

We are preparing some comments on the draft indemnity and note, and will forward those shortly.

We will also reach out to Energy Legal to ask who their clients are, and initiate the conversation between the Energy policy staff and yourselves. Energy Legal has asked us what our timeline is, and I indicated that we would need to discuss with you before being able to give such an indication.

Best

CONFIDENTIAL AND PRIVILEGED LEGAL ADVICE – June 6, 2017

FAA 11.3 provides that no agreement or undertaking shall be entered into in a fiscal year that would result in a charge to an appropriation for that fiscal year in excess of the amount available under that appropriation – every agreement that provides for the payment of money by the Crown is deemed to contain a provision that payment by the Crown of moneys that come due under the agreement shall be subject to an appropriation to which that payments can be charged being available in the fiscal year in which the payment becomes due or the payment having been charged to an appropriation for a previous fiscal year.

Any payment under the indemnity is subject to an appropriation being available. Does there need to be an appropriation available at the time of execution of the indemnity, if it is not expected that payments will be needed this year? Energy will need to obtain supplementary estimates if it doesn't have sufficient funds available if called upon to pay under the indemnity.

Comments/Questions:

OPG

1. Indemnity is in favour of OPG, OPG subs, and their directors, officers and employees (including if they are acting in a different capacity at request of Corporation). When might they be acting in a different capacity? What will the corporation ask? Will the "financing entity" be considered an OPG sub and benefit from this indemnity?
2. Do we know what the corporate structure of the financial entity is proposed to be, and who will be acting on behalf of the financial entity and in what capacity?
3. Has OPG given a standard indemnity to its directors and officers that would be called upon first before the indemnity from the Province?
4. What type of insurance does OPG have in place to cover possible risks both for itself and for its directors, officers and employees?
5. Overall it would be better if the business case for the request set out in more detail OPG's and its subs' expected roles in the implementation of the Fair Hydro Plan. Then it could identify which of those roles present the most risk and how the risk can be mitigated.
6. Is it expected that OPG might have to sign as promoter? What about Province? Would indemnified individuals be signing on behalf of OPG as promoter or on behalf of financial entity? What sorts of liability might OPG, its directors, officers and employees have here? Is it for misrepresentations in prospectus? Is there any other risk?
7. What is meant by the sentence "This risk arises in part because of the kind of market that OPG and IESO indirectly are to participate in and the steps that investors could take to protect their investments"? This should be elaborated.
8. What does OPG do as Financial Services Manager?
9. Need a better description of any pre-existing indemnities including OPG indemnity to directors/officers.

10. OPG's objects are amended to include new objects related to their new objects under the Fair Hydro Plan. Why is it considered that these activities might not be carried out in good faith or in the best interest of the corporation?
11. Why doesn't s. 39(2) extend to directors and officers as well? Was there a specific reason?
12. Are there any issues relating to US securities law and liabilities that the Province is being asked to indemnify that we should be considering?

Comments on actual wording of indemnity agreement, May 18, 2017

- Is it possible to limit the indemnity to specific named subs of OPG?
- Is 2nd recital "may face risk of liability due to or as a result of the Fair Hydro Plan" necessary?
- Par. 1 – how is a loss "indirectly" suffered?
- Par. 1 – covers all punitive and/or consequential damages and loss of profits and damages in respect of economic loss and/or loss of opportunity? Should OPG be covered for "loss of opportunity/economic loss? Should OPG be covered for what damages/payments it actually incurs or must pay as a result of these damages and suits?
- Explain, the capacity in which a director, officer or employee might be working?
- Par. 3(b) – "except to the extent that provision of same would cause the Protected party to lose its entitlement to claim privilege with respect to same" – how standard is this type of exclusion – not seen before.
- 7(b) – why would actions be take "on the Province's part" – just wondering whether this is necessary. Need to compare these reps to other agreements. 7(c) doesn't seem to be comprehensive as it does quality the availability of equitable remedies such as specific performance and injunction and execution not available against Crown.
- Need to think further about "due diligence" defense exception wording.

Hi Malle,

That paragraph was my attempt to summarize paragraphs 1 and 2 from the OPG Agreement. In particular 2 below. But I wasn't providing any value-added in terms of interpreting paragraph 2, and I wasn't making the connection to the waiver. I'm happy to take your advice on the wording.

> 2. For greater clarity, "Corporation's subsidiaries" as used in this indemnity agreement do not include any financing entities (as defined in the Act), whether such financing entities are actually a subsidiary of the Corporation or not; and the terms "Protected Persons" or "Protected Persons" under this indemnity agreement do not include any financing entities (as defined in the Act), being a subsidiary of the Corporation or otherwise, provided that, for clarity, any such financing entities' respective directors, officers, trustees, and/or employees shall be considered "Protected Persons" if he or she is also a director, officer or employee of the Corporation or any of the Corporation's subsidiaries.

Thanks
Bruno

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Hi Bruno,

I reviewed the briefing note and have a question regarding the description of scope of indemnity in the first paragraph and on p. 2 – who the indemnity applies to. The complication is the activities of the OPG directors, officers and employees when they at the request of OPG undertake another activity in the implementation of the OFHP and in particular respecting OPG's role as Financial Services manager on behalf of the financing entity if it's a trust. This is explained on p. 8 of Energy's business case and of course is mentioned expressly in the OPG indemnity. It doesn't really seem that these individuals would be appointed as directors, officers and employees of the financing entity trust but it's possible. Maybe the language in these 2 paragraphs has been carefully written to cover these potential roles as it does mention "trustee" so that these individuals might be acting as a trustee of the financing entity in that case.

I wrote the below wording based on p. 8 so just send it for your consideration. I'm not sure if it's better or if you have specifically considered this point. I didn't mark up the note.
The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees. In the case of directors, officers and employees of OPG and its subsidiaries this could include where at the request of OPG, they undertake activities in another capacity in the implementation of the OFHP or OPG's role as Financial Services Manager of the financing entity, for example, signing documents on behalf of a financing entity that is a trust.

Also on p. 5 under Accounting Treatment, change MENE to Ministry of Energy.

Thank you.

Malle

Hi

If you are still making edits to the briefing note you can send them along but for now, attached is a markup and clean version with Toby's edits, IESO agent references removed and a couple of other minor edits. We will have approval package for sign-off tomorrow.

Thanks
Bruno

HI Malle

Sorry, just to clarify, are you still providing comments/edits to Toby's copy, or was that your edit which we can make.

Thanks
Bruno

Bruno,

Please find attached a markup of the note. I have made some changes to the organization and tried to streamline the note. We think there should also be a section on mitigation measures, and perhaps that can incorporate some of the existing note, plus anything that can be added from Energy's materials. There is still some work to do on the analysis part, but I wanted to make sure you had a head start on what I have done so far.

Best,
Toby

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I have also reviewed the note and have some suggestions to assist with make it shorter and more concise.

I don't think that we need to mention s. 5 because it doesn't apply to this indemnity. S. 5 requires a joint agreement by the 2 Ministers which is not the case here so I suggest we delete the references to this.

Can we remove the watermark as it makes it hard to read. It's still marked as a draft.

Maybe it would be helpful to accept all the font changes and remove the comments that are no longer required and then we can work from that version.

Thanks.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Thanks for comments and edits.

I'm wondering about language that I had added in the "Previous Direction on Indemnity for IESO and OPG" section. In that part, I note that language in s.5 (2) of the Act around Protection and Assurances might be general direction covering these indemnities. On re-reading I'm wondering if

any of the language in s.5 can be seen as providing general direction/coverage for the current indemnity agreement.

The "including" statement in s.5(2) is clearly about the IESO and vendor performance, but 5(2) is not limited to that. However, s.5(2) language says ["Minister and Minister of Finance may together enter into Agreements....with]" . The Agreement in question is just Minister of Energy and the parties. I'm not sure that s.28 approval satisfies the "together" part.

Also S.5(3) is about indemnifications, but my read was this was indemnifying debt rather than persons.

Thanks
Bruno

Please see attached my comments up to this point on the indemnity note. I have started to work on the analysis part of the note, as I think with the many changes in the note we have some duplication and could tighten that part up, so note that this markup does not reflect any changes to that part.

below regarding excluding the financing entity. Our comment is mainly to respond to their question back to us about inconsistencies between the contingent liability table and the approval request note. In particular, the Liability table stated the probability of liability as low while the business case noted risk indeterminable (albeit with some mitigating factors). As well the table noted maximum financial exposure will be linked to the OPG financing entity's debt offerings. It isn't clear from the note that potential claims are limited to debt offerings or indeed if the claims would necessarily directly related to debt offerings.

MINISTER OF ENERGY REQUEST FOR SECTION 28 APPROVAL FOR INDEMNITY AGREEMENTS IN FAVOUR OF OPG AND IESO FOR THEIR PARTICIPATION UNDER THE ONTARIO FAIR HYDRO PLAN ACT

ISSUE

The Minister of Energy is requesting approval from the Minister of Finance, pursuant to Section 28 of the *Financial Administration Act (*"FAA"*)* to enter into Indemnity Agreements ("Agreements"), on behalf of the Crown, in favour of Ontario Power Generation ("OPG"), and its subsidiaries (excluding a subsidiary that is a financing entity) and the Independent Electricity System Operator ("IESO") with respect to their roles in carrying out the implementation of the Ontario Fair Hydro Plan ("OFHP") under the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act"). The indemnities would extend to the directors, officers and employees of these entities, and, directors, officers, trustees and/or employees of a financing entity, if he or she is also a director, officer or employee of OPG or one of its subsidiaries.

Section 28 of the FAA requires that all ministries and public entities request the prior written approval of the Minister of Finance or the President of the Treasury Board for any transaction or commitment that would directly or indirectly increase the indebtedness or contingent liabilities of Ontario.

RECOMMENDATION

- It is recommended that the Minister of Finance approve, pursuant to Section 28 of the FAA, the Ministry of Energy's request to provide indemnities and waivers, on behalf of the Crown, in favour of Ontario Power Generation (OPG) and the Independent Electricity System Operator (IESO) in the forms requested (the "Indemnity Agreements" and individually an "Indemnity Agreement".
- IESO and OPG have stated that without these indemnities and waivers they will not be able to participate in the implementation of the OFHP Act.
- In order for the OFHP Act to be successful, it is recommended by the Minister of Energy that the Minister of Finance approve this request.

WHAT IS THE MINISTER BEING ASKED TO SIGN?

The Minister is being asked to sign the section 28 approval forms and the transmittal letter to Glenn Thibeault, Minister of Energy.

SUMMARY OF PROPOSED INDEMNITIES

This summary of the OPG/IESO Indemnity Agreement sets out why indemnities are being sought, who is being indemnified, for what, and also addresses the proposed waiver of claims, whereby the Province agrees not to bring certain claims against the indemnified parties.

Why are indemnities being sought?

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the OFHP. Providing the requested Indemnities will provide OPG, OPG's Subsidiaries, the IESO and each of their respective directors, officers and employees with assurance against liability in order to allow them to comprehensively carry out their respective roles in the successful implementation of the OFHP.

Both OPG and the IESO are required to carry out activities that may fall outside the scope of their typical business activities and corporate mandates. As a result, these activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG, OPG's Subsidiaries, IESO, and their respective directors, officers and employees to increased liability.

While statutory protection from liability is provided to IESO's directors, officers and employees, and to OPG's employees these protections are limited to "good faith acts". Therefore, the statutory protections do not preclude persons from bringing a claim against the Protected Persons (as defined in the Indemnities) in relation to these activities on the grounds of "bad faith" (see Appendix A for details on potential risks and Appendix B for details on limitations to existing protections to IESO, OPG and directors, officers and employees).

Who the Indemnity Applies to

The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees.

In the case of directors, officers and employees of OPG and its subsidiaries, they could also be indemnified for activities undertaken on behalf of an entity that is not included in the definition of Protected Persons where they are doing so in the implementation of the OFHP or for OPG's role as Financial Services Manager of a financing entity, for example, signing documents on behalf of a financing entity that is a trust at the request of OPG or acting as directors, officers or employees of entities that are carved out of the Indemnity Agreement, where they are doing so in the implementation of the OFHP and are also a director, officer or employee of OPG or any of OPG's subsidiaries.

What Indemnities are being provided?

Protected Persons are being indemnified against all losses, costs, damages and other expenses for any amount for which they incur damages in relation to any civil, criminal, administrative, investigative and/or other claim that relates to any act or omission that the Protected Person undertakes in relationship to the Fair Hydro Plan.

The Protected Persons are indemnified for regular and punitive as well as a broad range of other types of damages that are not always included in an indemnity, such as consequential damages and economic losses. The indemnity also covers costs and expenses for the Protected Persons in defending themselves against a claim. These indemnities are for any act or omission and activity that relates to the Fair Hydro Plan.

The Indemnity Agreements provide that the Protected Person shall not benefit from the indemnities contained therein to the extent that the losses are already covered by an insurance policy or another indemnity. The indemnities provided in the Indemnity Agreements also apply where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.

The indemnities do not apply where the loss relates to the gross negligence or wilful misconduct of the Protected Person. It is also explicitly carved out of this exception that a failure to conduct reasonable due diligence investigation will not in itself constitute gross negligence or wilful misconduct, which narrows the exception in the context of disclosure and activities relating to issuing securities in public markets such that failing to conduct due diligence will not necessarily invalidate the Indemnity.

Scope of liability in the indemnities

The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnities contained therein to the extent that the losses are already covered by an insurance policy or another indemnity (though to the extent that the Protected Person makes a claim on an indemnity that creates a loss for another Protected Person, such as OPG and its subsidiaries and the IESO, such other Protected Person may make a claim under an Indemnity Agreement). The indemnities provided in the Indemnity Agreement also apply where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.

The indemnities contained in the Indemnity Agreement do not apply where the loss relates to the gross negligence or wilful misconduct of the Protected Person. It is also explicitly carved out of this exception that a failure to conduct reasonable due diligence investigation will not in itself constitute gross negligence or wilful misconduct, which narrows the exception in the context of disclosure and activities relating to issuing securities in public markets such that failing to conduct due diligence will not necessarily invalidate the Indemnity.

Waiver of claim provision

The waiver of claims provision provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan.

The waiver of claims provision does not apply to claims for wilful misconduct, dishonesty or gross negligence.

Notification of Claims

The Indemnity Agreement sets out how the Protected Person should notify the Province of any claims, and how any proceedings should be dealt with amongst the parties, as well as how any expenses and amounts should be paid during the determination of the claim.

Provincial Warranty

The Indemnity Agreement includes a warranty section given by the Province. In this section the Province Warrants that it has the authority and capacity, and has taken all necessary steps to enter into the Indemnity Agreement.

- This is an unusual provision, but likely relates to the fact that the Province is not the employer of the indemnified party, or the officers and directors are not the officers and directors of the Province.

KEY CONSIDERATIONS AND RISKS

The Indemnity Agreements give an indemnity for a broader range of actions than those that are usually given to indemnitees of the Province, specifically by giving an indemnity for actions that are not in the best interest of the corporation and may not be in good faith;

The Indemnity Agreements extend to the OPG and the IESO as corporations, beyond the more normal practice of indemnifying directors, officers and employees; and also extends to subsidiaries of the OPG, excluding financing entities under the OFHP Act.

The Indemnity Agreements include a waiver of claims with respect to indemnitees who are individuals by the Province as shareholder, meaning that except for gross negligence, dishonesty and wilful misconduct, the Province cannot bring an action against an indemnified individual.

Potential Fiscal Impact

The Ministry of Energy states that the risk of the Province providing the Indemnity Agreements is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. The Ministry of Energy notes, however, the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998*, for IESO, and under the OFHP Act, for OPG,

(see further discussion below), pre-existing protection for director and officers under insurance and the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

Because the Indemnity Agreements are not capped the Provincial exposure is not limited and will extend to the extent of any claim that is covered by the Indemnity Agreements.

The Ministry of Energy notes that in the event that an indemnity claim does arise and a payment is required, the Ministry would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.

Accounting Treatment

There is a risk associated with the anticipated accounting treatment of the GA Financing portion of the OFHP. With the Province providing guarantee agreements, financial support through credit facilities and the proposed agreements to indemnify the IESO and OPG, the case for the anticipated accounting treatment of the GA structure could be weakened.

OPCD has confirmed that OPG has received advice that the accounting treatment will be consistent with the GA Financing Structure. IESO is expected to also confirm the same.

The Minister of Energy had initially considered limiting the indemnities to directors and officers. However, IESO and OPG both have indicated that they require their respective indemnity cover their corporations as well (and in the case of OPG, its subsidiaries) given the nature of the risks they face.

Previous Direction on Indemnity for IESO and OPG

There is no existing Cabinet direction for the Ministry of Energy to provide the requested Indemnities to IESO and OPG.

Insofar as IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the ONFHP, providing the requested indemnities will support implementation of the Fair Hydro Plan.

The Treasury Board Assessment Note of June 13, 2017, included reference to the indemnities required by OPG and IESO.

Other protections and assurances are current being discussed under a *Provincial Support Agreement* that would include indemnities for the Financing Entity against claims from creditors as a result of government amending or repealing the Act or court rulings adversely affecting the rights and interest of the Financing Entity and performance assurances from the Province for the IESO and electricity vendors.

DESCRIPTION OF RISK AND RISK MITIGATION

The ONFHP is a novel program, and as a financing structure it is the first of its kind in Canada. Because the work to be undertaken by OPG (and OPG's subsidiaries where applicable) and IESO in carrying out their roles in implementing the ONFHP will fall outside of the usual operations/business risk that these corporations face, there is a risk that these corporations may be subject to increased liability specifically due to their roles with the ONFHP. This risk arises in part because of the kind of market that OPG, and IESO indirectly, are to participate in, and the steps that investors could take to protect their investments (see further details on risks in Appendix A).

The exact nature and scope of the risk to the Province of giving the Indemnities is undeterminable at this time, but the risk of liability for the Province arising may be low, with respect to directors, officers and employees, as any such risk may be mitigated by the following factors:

- In the case of the IESO, the existence of a statutory immunity under subsection 19(1) of the *Electricity Act, 1998* may mitigate against a liability arising against its directors, officers and employees, but does not eliminate such risk.
- In the case of OPG, the proposed statutory immunity under subsection 39(1) of the *Act* may mitigate against a liability arising against its employees, but does not eliminate such risk.
- The Indemnities are limited to claims arising in relation to the Protected Persons' respective roles in relation to implementing the ONFHP.
- The Indemnities do not apply with respect to Losses for which coverage is provided under insurance, to the extent already paid under such insurance.
- The Indemnities do not apply to Losses that are a result of the Protected Person's dishonesty, gross negligence or wilful misconduct.

Although there is a provision in the Indemnity Agreements that provides that a claim relating to the OFHP should initially be made on any indemnity that is already in place from the IESO or OPG for the benefit of their respective directors, officers or employees before making a claim on the Province's indemnity, if the IESO or OPG suffer a loss because they have indemnified such director, officer or employee they would be able to make a claim under an Indemnity Agreement. Thus, the Province would, to the extent such a claim was not covered by an insurance policy, be liable for such a loss of the IESO or OPG.

With respect to the corporations themselves (and in the case of OPG, its Subsidiaries as well) the risk may be higher, but is undeterminable at this time. The likelihood of risk to the Province is characterized as medium, given that OPG and IESO have not identified any insurance or indemnities that would cover the corporations themselves (or in the case of OPG, the Subsidiaries themselves) in the event that such liability arises, nor is statutory protection provided for the corporations themselves.

BACKGROUND

On March 2, 2017, the government announced Ontario's Fair Hydro Plan (the "OFHP"), under which the government will take steps to lower electricity bills [on an after-tax basis] by 25 per cent on average for a typical residential customer, starting July 1, 2017, relative to what the bills would otherwise have been without the OFHP.

Changes to refinance a portion of the Global Adjustment ("GA") are a component of the 25 per cent rate relief under the OFHP. This includes roles for both IESO and OPG:

IESO – legislation imposes certain obligations and requirements on IESO to carry out various activities to implement the OFHP such as the creation of a regulatory asset in relation to deferred costs and the GA financing component of the OFHP, the conveyance of that asset to a financing entity (expected to be established by OPG) and providing a servicing role in recovering the financing entity's funding costs from future ratepayers. IESO may also be required to play a role in potential securities offerings of OPG's financing entity. This may come with heightened exposure to liability for the IESO.

OPG – OPG is expected to finance the purchase of the regulatory asset, related to deferred costs, through a financing entity that OPG creates. OPG considers risks associated with these OFHP-related activities to be beyond OPG's usual business/operations. This is particularly true with respect to any securities offerings of OPG's financing entity. Products are expected to be offered into the Canadian and U.S. Markets. As a result, pre-existing indemnities and protections do not adequately protect OPG, its directors, officers and employees.

The 25 per cent rate relief also includes the rebate amount equivalent to the 8 per cent Provincial portion of the HST that has been in effect since January 1, 2017 under the Ontario Rebate for Electricity Consumers Act, 2016, and the expected savings from the shifting of the Ontario Electricity Support Program ("OESP") and the Rural or Remote Rate Protection program ("RRRP") costs from ratepayers to being funded by the Province.

June 28, 2017

APPENDIX A

Potential Risks Related to OPG/IESO Roles in Implementing the Ontario Fair Hydro Plan

OPG – Role in Implementation of ONFHP and Associated Risks

The *Electricity Act, 1998* ("EA") has been amended to contemplate that OPG's objects include those related to the ONFHP. This amendment was designed to ensure that OPG could participate in the ONFHP. OPG will play a central role in the implementation of the ONFHP, particularly with respect to the implementation of the GA refinancing component of the ONFHP. As part of the ONFHP, it was announced that a portion of the GA will be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system). This would result in a deferred GA amount that a special purpose entity created by OPG (i.e. a financing entity as defined in the *Act*) is expected to finance.

In carrying out this role, OPG will be carrying out activities that fall outside of its typical business activities and corporate mandate relating to power generation. As a result, OPG, its directors, officers, and employees may be faced with increased risk of liability. Examples of such risks related to financing, include without limitation:

- liability as a promoter under Canadian securities laws (or the equivalent, if any, under other applicable securities laws);
- secondary market liability under Canadian and/or other applicable securities laws;
- liability the signatories to the prospectuses will have (i.e., the individuals signing the prospectus); and
- liability of OPG as the Financial Services Manager under any of the transaction agreements (e.g., the Financial Services Management Agreement, the Administration Agreement, the MSSA, the Master Trust Indenture and any Supplemental Indentures).

OPG and its Subsidiaries, and their respective directors, officers, employees may also be faced with risk of liability to:

- underwriters/agents selling debt securities of the financing entities
- the purchasers of debt securities of the financing entities (both initial purchasers and subsequent purchasers of the debt securities in the secondary markets)
- counterparties to agreements (e.g. the trustee of a financing entity that is a trust or IESO)
- other stakeholders (the Province, as shareholder of OPG, pensioners, and employees) of OPG if OPG (or any Subsidiary of it) is liable for any claim or obligation and cannot meet its obligations to these stakeholders as a result of such claims.
- Regulators (e.g. the Ontario Securities Commission)

- Parties who may challenge the *Act* or any component of it and include OPG as a party to such challenge.

As a result, pre-existing indemnities and protections do not adequately protect OPG, its Subsidiaries and each of their respective directors, officers and employees as explained further below.

Providing the requested Indemnity would help facilitate OPG and OPG's Subsidiaries in undertaking their role with respect to the implementation of the ONFHP.

IESO – *Role in Implementation of ONFHP and Associated Risks*

The *Act* also imposes certain obligations and requirements on the IESO to carry out various activities in relation to the implementation of the ONFHP such as the deferral of costs related to the GA, the creation of a regulatory asset in relation to the GA financing component of the ONFHP, the conveyance of that asset to OPG's financing entities and providing a servicing role in recovering OPG's funding costs from future ratepayers. The IESO may also be required to play a role in potential securities offerings of OPG's financing entities. If so, this may come with heightened exposure to liability for the IESO, particularly for offerings into the U.S. market. The IESO has expressed concern that all of this drives an increased risk of liability to the IESO, its directors, officers and employees, which is over and above typical operations risks and arises solely due to the ONFHP.

Other examples of sources/activities giving rise to increased risk of liability for the IESO, its directors, officers and employees include the following:

- Investors in any ONFHP investments or underwriters and banks regarding the offering of the investment asset to investors, as well as any securities prospectus or underwriting arrangements, with the IESO named and/or IESO being involved;
- OPG (or the financing entity) in relation to the commercial arrangements regarding transfer of the regulatory asset and servicing of the investment asset, and related activities;
- Market participants, program participants for issues in liquidity (e.g. short pay);
- Taxation authorities where prior approval of IESO's treatment is not approved by taxation authorities;
- Securities commissions regulators (U.S./Canada); and
- Parties who may challenge the *Act* or any component of it and include the IESO as a party to such challenge.

As a result, pre-existing indemnities and protections do not adequately protect IESO and each of their respective directors, officers and employees as explained further below.

Providing the requested Indemnity would help facilitate the IESO's undertaking of the activities requested by the Province in order to facilitate the implementation of the ONFHP.

APPENDIX B

Why Indemnities are being sought and limitations to protection under statutory protections and/or Insurance

Indemnities are required to facilitate IESO and OPG in carrying out their respective roles in implementing the ONFHP

The provision of the Indemnities is required in order to facilitate the implementation of the ONFHP. Both OPG and the IESO are required to carry out activities that may fall outside the scope of their typical business activities and corporate mandate. As a result, these activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG, OPG's Subsidiaries, IESO, and their respective directors, officers and employees to increased liability.

Even if the corporate mandates of OPG and the IESO were updated to include their role in implementing the ONFHP, this may not eliminate the risk of the types of liabilities outlined above completely, particularly due to the novelty of the ONFHP and the types of roles that OPG and IESO will be taking on. For example, persons could still challenge the *Act* or any component of it and include OPG or the IESO as a party to such challenge.

While statutory protection from liability is provided to IESO's directors, officers and employees, and to OPG's employees these protections are limited to "good faith acts". Therefore, the statutory protections do not preclude persons from bringing a claim against the Protected Persons (as defined in the Indemnities) in relation to these activities on the grounds of "bad faith". Generally speaking the Indemnities are intended to provide the Protected Persons with indemnification for losses/liabilities, including those for potentially "bad faith acts", unless any such acts arise as a result of the Protected Persons' dishonesty, gross negligence, or wilful misconduct. As described below in subsection (ii), the statutory protections also do not indemnify for costs relating to defending a claim. The statutory protections also do not extend to the corporations themselves.

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the ONFHP. Providing the requested Indemnities will provide OPG, OPG's Subsidiaries, the IESO and each of their respective directors, officers and employees with assurance against liability in order to allow them to comprehensively carry out their respective roles in the successful implementation of the ONFHP.

Statutory Immunity does not preclude a person from bringing an action or other civil proceeding

Subsection 19(1) of the *Electricity Act, 1998* provides IESO directors, officers and employees with the following protection from liability:

"No action or other civil proceeding shall be commenced against a director, officer, employee or agent of the IESO or a member of a committee or panel established by the board of directors of the IESO for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under any Act, the regulations under any Act, the IESO's licence, the IESO's by-laws or the market rules, or for any neglect or default in the exercise or performance in good faith of such a power or duty."

The *Electricity Act, 1998* does not contain a similar statutory immunity for OPG's directors, officers, employees or agents. However, under subsection 39(1) of the *Act*, a statutory immunity is provided to the OPG's employees. This provision states:

"No action or other civil proceeding shall be commenced against any employee of the Province or Ontario Power Generation Inc. for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under the Act, the regulations or for any alleged neglect or default in the exercise or performance in good faith of such a power or duty."

Subsection 39(2) of the Act provides that nothing in subsection 39(1) limits the effect of subsection 19(1) of the *Electricity Act, 1998.*

The statutory immunities provided under the *Electricity Act, 1998* and the *Act* prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith").

The immunity from suit provisions outlined above, are qualified by the words "for any act done in good faith in the exercise or performance or intended exercise or performance of a power or duty under this Act…" This is a question of fact that needs to be considered by a court of competent jurisdiction. As such, statutory immunity would not necessarily be a bar to litigation and does not ensure that the IESO's and OPG's employees, officer or directors (as applicable) would not become embroiled in litigation.

In the case of OPG, there is no similar statutory immunity explicitly provided for its directors, or officers so the risk of litigation is greater for these individuals.

For the reasons mentioned above, the Indemnities requested under this application would ensure that if a claim is brought against the Protected Persons as a result of carrying out their roles in implementing the ONFHP, they are fully protected for any costs, losses etc. subject to the limitations provided for in the Indemnities.

Insurance and indemnities that the IESO and OPG currently provide to its directors, officers and employees may not fully cover risk

OPG –Insurance and Indemnities

Currently, OPG has indicated that it maintains Directors and Officers liability insurance ("D&O Insurance") with limits of USD $110 Million. The D&O Insurance includes persona coverage (side A) and corporate reimbursement coverage (side B). Under the side A coverage, OPG has advised that the policy pays losses where the organization is either not permitted by law or unable due to insolvency to indemnify the insured person under the policy (includes directors, officers and designated executives). This includes losses arising from a claim made during the policy period for a wrongful act (e.g. breach of duty, neglect, error, misstatement or omission) of such insured person. The full $110 Million limit is available for side A coverage.

Under side B coverage, OPG has advised that the policy reimburses the organization for losses incurred to indemnify an insured person under a D&O claim. The coverage is up to a maximum of USD $75 million, less the corporate deductible of $500,000.

OPG has advised that directors and officers have priority of payments over the organization for the entire $110M limit.

While this insurance provides coverage for directors and officers of OPG, there is no similar coverage provided for OPG's employees. Further, any liability stated over the maximum amounts would not be covered by the insurance policy. Pursuant to section 2(a) of the IESO Indemnity and section 3(a) of the OPG Indemnity, a Protected Person shall not be entitled to indemnification to the extent that coverage is provided under an insurance policy and such Protected Person is actually paid under such insurance policy.

OPG has indicated that they provide their directors an indemnity but not to their directors or employees. OPG has not provided information about the scope of this indemnity. However, the Indemnities provide that a Protected Person shall not be entitled to indemnification to the extent that other indemnities are already provided to a Protected Person to the extent that the Protected Person is actually so indemnified. This language is meant to ensure that the covered losses under the Indemnities will be covered by other applicable indemnities first, before being covered by this indemnity.

OPG has not provided any information about insurance coverage and indemnities that its subsidiaries provide to their directors, officers and employees.

IESO – Insurance and Indemnities

The IESO has informed that it carries Directors & Officers insurance providing a maximum $15 million limit and $200,000 retention per claim. Employees are also included in the definition of Individual Insureds. The IESO also carries Professional liability insurance providing a maximum $75 million limit.

Aside from indemnification arising by operation of common law for employees acting within the scope of their employment, the IESO has informed that it has provided formal indemnity as follows:

- IESO has provided an indemnity to its board members.
- There is an indemnity provided to members of the Society of Energy Professionals pursuant to their collective agreement, whose members form a subset of all employees at the IESO.

Existing Indemnities to OPG and IESO from the Province

Existing indemnities previously provided by the Province to OPG have been limited to specific directives provided to OPG by the Province (e.g., in connection with the Bruce Lease). Accordingly, the scope of the existing indemnities provided by the Province would not cover the ONFHP. We are not aware of any indemnities provided to the IESO by the Province.

June 28, 2017

MEMORANDUM TO: Scott Thompson
Deputy Minister of Finance

FROM: Gadi Mayman
Chief Executive Officer

SUBJECT: **Section 28 Approval for Indemnity Agreements In Favour of OPG and IESO**

Attached for your review and consideration is a memo to the Minister of Finance recommending that the Minister approve, pursuant to section 28 of the *Financial Administration Act* (*FAA*), the Ministry of Energy's request to provide indemnities in favour of Ontario Power Generation (OPG) and the Independent Electricity System Operator (IESO) to support their participation in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act").

In implementing the OFHP, OPG and the IESO expect to carry out activities that may fall outside the scope of their typical business activities and corporate mandates. They believe this could subject them to the risk of claims that they are not acting in the best interest of the corporation or in "good faith" with respect to their obligations to their respective corporations.

The statutory immunities provided under the *Electricity Act, 1998* and the OFHP Act prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith"). The Indemnity Agreements requested under this request would ensure that if a claim is brought against OPG, OPG's subsidiaries (except for a financing entity), the IESO or their respective directors, officers and employees as a result of carrying out their roles in implementing the Ontario Fair Hydro Plan, they are fully protected for any costs, losses etc., subject to the limitations provided for in the Indemnity Agreements.

…2

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the Ontario's Fair Hydro Plan.

Ministry of Energy states that the risk of the Province providing the indemnities is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. However, the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998*, for IESO, and under the OFHP Act, for OPG, pre-existing protection for director, officers and employees under insurance and the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

Ministry of Energy also notes that in the event that an indemnity claim does arise and a payment is required, they would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.

Below is a brief summary of the indemnities:

- The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees.
- In the case of directors, officers and employees of OPG and its subsidiaries, they could also be indemnified for activities undertaken on behalf of an entity that is not included in the definition of Protected Persons where they are doing so in the implementation of the OFHP or for OPG's role as Financial Services Manager of a financing entity.
- The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnities to the extent that the losses are already covered by an insurance policy or another indemnity.
- The indemnity also applies where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.
- The indemnity does not apply where the loss relates to the gross negligence or wilful misconduct of the Protected Person.
- The Indemnity Agreement includes a waiver of claim provision. This additionally provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan.

MEMORANDUM TO: The Honourable Charles Sousa
Minister of Finance

FROM: Scott Thompson
Deputy Minister

SUBJECT: **Section 28 Approval for Indemnity Agreements in Favour of OPG and IESO**

Attached for your review and consideration is a memo to the Minister of Finance recommending that the Minister approve, pursuant to section 28 of the *Financial Administration Act (FAA)*, the Ministry of Energy's request to provide indemnities in favour of Ontario Power Generation (OPG) and the Independent Electricity System Operator (IESO) to support their participation in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act").

In implementing the OFHP, OPG and the IESO expect to carry out activities that may fall outside the scope of their typical business activities and corporate mandates. They believe this could subject them to the risk of claims that they are not acting in the best interest of the corporation or in "good faith" with respect to their obligations to their respective corporations.

The statutory immunities provided under the *Electricity Act, 1998* and the OFHP Act prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith"). The Indemnity Agreements requested under this request would ensure that if a claim is brought against OPG, OPG's subsidiaries (except for a financing entity), the IESO or their respective directors, officers and employees as a result of carrying out their roles in implementing the Ontario Fair Hydro Plan, they are fully protected for any costs, losses etc., subject to the limitations provided for in the Indemnity Agreements.

…2

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the Ontario's Fair Hydro Plan.

Ministry of Energy states that the risk of the Province providing the indemnities is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. However, the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998*, for IESO, and under the OFHP Act, for OPG, pre-existing protection for director, officers and employees under insurance and the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

Ministry of Energy also notes that in the event that an indemnity claim does arise and a payment is required, they would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.

Below is a brief summary of the indemnities:

- The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees.
- In the case of directors, officers and employees of OPG and its subsidiaries, they could also be indemnified for activities undertaken on behalf of an entity that is not included in the definition of Protected Persons where they are doing so in the implementation of the OFHP or for OPG's role as Financial Services Manager of a financing entity.
- The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnities to the extent that the losses are already covered by an insurance policy or another indemnity.
- The indemnity also applies where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.
- The indemnity does not apply where the loss relates to the gross negligence or wilful misconduct of the Protected Person.
- The Indemnity Agreement includes a waiver of claim provision. This additionally provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan.

The Honourable Glenn Thibeault
Minister of Energy
900 Bay Street, 4th Floor
Toronto ON M7A 2E1

Dear Minister Thibeault,

Thank you for your letter requesting approval under section 28 of the *Financial Administration Act* of the Indemnity Agreements in favour of the IESO, its directors, officers, and employees, and in favour of OPG, OPG's subsidiaries (other than any financing entities as defined in the *Ontario Fair Hydro Plan Act, 2017*) and their respective directors, officers, and employees.

In response to your request, I am attaching the approval, under section 28 of the *Financial Administration Act,* of the Indemnity Agreements for OPG and the IESO in order to allow them to comprehensively participate in the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

Yours sincerely,

Charles Sousa
Minister

Approval pursuant to section 28 of the
Financial Administration Act

For the purpose of section 28 of the *Financial Administration Act*, I hereby approve the giving of an indemnity by Her Majesty the Queen in right of Ontario, as represented by the Minister of Energy, to Ontario Power Generation Inc., certain of Ontario Power Generation Inc.'s subsidiaries (as set out in the attached form of Indemnity Agreement) and each of their respective directors, officers and employees, substantially in the form set out in the attached Schedule.

Charles Sousa
Minister of Finance

Attachment

EXECUTION VERSION

INDEMNITY AGREEMENT

THIS INDEMNITY AGREEMENT effective as of this 1st day of June, 2017.

BETWEEN: **Ontario Power Generation Inc.**
(hereinafter the "**Corporation**")

OF THE FIRST PART,

Her Majesty the Queen in Right of the Province of Ontario as Represented by the Minister of Energy

(hereinafter called the "**Province**")

OF THE SECOND PART

WHEREAS the Corporation and/or one or more of its subsidiaries may or, in certain circumstances is or will be required to, carry out certain activities with respect to (i) the *Ontario Fair Hydro Plan Act, 2017* (the "**Act**"), (ii) the regulations made pursuant to the Act, and/or (iii) the agreements (A) relating to any financing entity (as defined in the Act) and/or any debt issued by any such financing entity and/or (B) to which any such financing entity is a party (the Act, such regulations and agreements, collectively the "**Fair Hydro Plan**");

AND WHEREAS the Corporation, its subsidiaries and each of their respective directors, officers and employees may face risk of liability arising as a result of their respective activities, acts and/or omissions in the implementation of, or relating to, the Fair Hydro Plan.

NOW THEREFORE, in consideration of the sum of $1.00 now paid by the Corporation to the Province and other good and valuable consideration (the receipt of which is hereby acknowledged), the Province hereby agrees:

1. To indemnify, defend and save harmless the Corporation, each of the Corporation's subsidiaries (except for any such subsidiary that is a financing entity as defined in the Act) and each of their respective directors, officers, and employees (collectively the "**Protected Persons**" and individually, a "**Protected Person**") from and against all losses, costs, damages, charges, expenses, demands, liabilities, fines, penalties, judgments and/or settlement amounts directly or indirectly suffered, sustained or incurred by any Protected Person, including, without limitation, any direct, special, indirect, incidental, punitive, exemplary and/or consequential damages and/or loss of profits and damages in respect of economic loss and/or loss of opportunity, and all legal and other professional fees and out-of-pocket expenses (collectively, "**Losses**"), as a result of any civil, criminal, administrative, investigative and/or other claim, demand, action, suit, application, litigation, charge, complaint, prosecution, assessment, reassessment, investigation (formal or

informal), hearing and/or other proceeding of any nature or kind whatsoever (any of the foregoing being a "**Claim**") arising, directly or indirectly, as a result of each Protected Person's activities, acts and/or omissions in the implementation of, or otherwise relating to, the Fair Hydro Plan (including, without limitation, where a Protected Person is acting, at the request of the Corporation, in a different capacity than as a director, officer or employee of the Corporation or a subsidiary of the Corporation).

2. For greater clarity, "Corporation's subsidiaries" as used in this indemnity agreement do not include any financing entities (as defined in the Act), whether such financing entities are actually a subsidiary of the Corporation or not; and the terms "Protected Persons" or "Protected Persons" under this indemnity agreement do not include any financing entities (as defined in the Act), being a subsidiary of the Corporation or otherwise, provided that, for clarity, any such financing entities' respective directors, officers, trustees, and/or employees shall be considered "Protected Persons" if he or she is also a director, officer or employee of the Corporation or any of the Corporation's subsidiaries.

3. A Protected Person shall not be entitled to be indemnified in respect of Losses:

    (a) for which coverage is provided under an insurance policy or claims fund to the extent that such Protected Person is actually paid under such insurance policy or claims fund; or

    (b) for which other indemnities are already provided to such Protected Person to the extent that such Protected Person is actually so indemnified for those Losses by such indemnities; or

    (c) if and to the extent that a court of competent jurisdiction in a final, non-appealable judgment determines that the Claim associated with such Losses resulted from such Protected Person's dishonesty, gross negligence or willful misconduct; for greater clarity the Province acknowledges and agrees that any finding that such Protected Person failed to conduct such reasonable investigation as necessary to provide the Corporation, a subsidiary of the Corporation or a financing entity, as applicable, with reasonable grounds for believing any prospectus, registration statement, offering document or any other document filed by, or on behalf of, a financing entity under applicable securities laws contained no misrepresentation shall not in and of itself constitute "gross negligence" or "willful misconduct" for purposes of this Section 3(c) or otherwise disentitle such Protected Person from indemnification hereunder unless a court of competent jurisdiction in a final, non-appealable judgment determines that the Claim associated with such Losses resulted from the gross negligence or willful misconduct of the Protected Person claiming such indemnity, and in such circumstances, the Protected Person shall be disentitled from indemnification hereunder as a result of such Protected Person's gross negligence or willful misconduct; or

(d) in the case of a criminal or administrative action or proceeding that enforces a monetary penalty, to the extent such action or proceeding arises from circumstances in which such Protected Person did not have reasonable grounds for believing that such Protected Person's conduct was lawful.

4. Each Protected Person shall:

(a) Upon becoming aware of a Claim(s) for which such Protected Person may seek indemnification hereunder, as soon as practicable, deliver to the Province (through the Director of the Legal Services Branch of the Ministry of Energy) a notice setting forth in reasonable detail the particulars of the Claim(s);

(b) upon written request of the Province, furnish to the Province copies of any document, or provide to the Province any information, that relates to the Claim(s) that is in the possession or under the control of the Protected Person (except to the extent that provision of same would cause the Protected Person or another Protected Person to lose its entitlement to claim privilege with respect to the same);

(c) take all reasonable steps necessary to secure and preserve the rights of the Protected Person in respect of the Claim(s); and

(d) promptly take all reasonable steps to obtain indemnification or coverage, to the fullest extent possible, under insurance policies and/or under indemnities provided by the Corporation, as referred to in subsections 3(a) and (b) above.

A failure on the part of a Protected Person to take any of the actions provided in this section 4 shall not affect the rights of such Protected Person hereunder except to the extent that, as a result of such failure, the Province was actually prejudiced. A failure on the part of a Protected Person to take any of the actions provided in this section 4 shall not affect the rights of any other Protected Person.

5. The Province shall have the right to participate in or, where the Province has confirmed in writing to the applicable Protected Person(s) that all Losses in respect of a Claim will be indemnified under this indemnity agreement, assume control of the negotiation, settlement or defence of the Claim and in no event shall a Protected Person negotiate, settle, compromise or pay the Claim without the prior written consent of the Province, such consent not to be unreasonably withheld or delayed. If the Province elects to so participate in or assume control of the negotiation, settlement or defence of the Claim, the applicable Protected Person(s) shall co-operate fully with the Province in connection with the same, and each applicable Protected Person shall agree to be represented by legal counsel chosen by the Province, unless, in the opinion of such legal counsel, there would arise a conflict of interest preventing such legal counsel from representing the applicable Protected Person(s). Where it is such legal counsel's opinion that a conflict of interest prevents that legal counsel representing a Protected Person, the Protected Person will be entitled, after consultation with the Province and acting reasonably, to obtain legal counsel of the

Protected Person's choice, and the fees and expenses of the Protected Person's counsel incurred in the Protected Person's representation shall be Losses to which this indemnity extends.

6. The Province shall not agree to any settlement of a Claim on behalf of a Protected Person without the Protected Person's written consent unless (i) the terms of such settlement require only the payment of money (by persons or entities other than the Protected Person) and include an unconditional, full release of the Protected Person, and do not require a Protected Person to admit any wrongdoing or take or refrain from taking any action and (ii) the Province has indemnified the Protected Person with respect to, and held the Protected Person harmless from and against, all Losses incurred by or on behalf of the Protected Person in connection with the Claim.

7. For greater clarity, with respect to directors, officers and employees of the Corporation this indemnity shall apply only to Claim(s) that are referable to the period during which a director, officer or employee of the Corporation is actually a director, officer or employee of the Corporation and of which notice is received by the Province either during the period of time that the director, officer, or employee is a director officer, employee of the Corporation or after he or she ceases to be a director, officer, employee of the Corporation; and with respect to directors, officers and employees of the Corporation's subsidiaries, this indemnity shall only apply to Claim(s) that are referable to the period during which a director, officer or employee of a subsidiary of the Corporation is actually a director, officer or employee of that subsidiary of the Corporation, and of which notice is received by the Province either during the period of time that the director, officer, or employee is a director, officer, employee of that particular subsidiary of the Corporation or after he or she ceases to be a director, officer, employee of that subsidiary of the Corporation

8. The Province shall reimburse or advance the funds necessary for the payment of Losses incurred in connection with any Claim, including, without limitation, the investigation, monitoring, defence and appeal thereof, in advance of the final disposition of such Claim, within ninety (90) days of any request in writing by a Protected Person to the Province for such reimbursement or advance, accompanied by reasonable details and supporting documentation with respect to the Losses in respect of which such reimbursement or advance is requested, so long as the Protected Person is carrying out its obligations under section 4 of this agreement. A Protected Person shall promptly repay to the Province any advances that are ultimately in excess of amounts necessary for payment of any such Losses or for which it is judicially determined that the Protected Person is not entitled to indemnification hereunder.

9. The Province hereby waives any claim it, as the shareholder of the Corporation, could otherwise make against a Protected Person, who is an individual, whether now or in the future, relating in any way to the Corporation's, any of the Corporation's subsidiaries and/or any such Protected Person's activities, acts and/or omissions in the implementation of, or otherwise relating to, the Fair Hydro Plan (including, without limitation, where a Protected Person who is an individual is acting, at the request of the Corporation, in a different capacity than as a director, officer or employee of the Corporation or a subsidiary of the Corporation), provided that this waiver shall not apply to any claims of dishonesty, gross negligence or willful misconduct against a Protected Person who is an individual.

10. The Province represents and warrants to each Protected Person as follows and acknowledges that each Protected Person is relying on the following representations and warranties in connection with this indemnity agreement:

    (a) the Province has all necessary power, authority and capacity to enter into this indemnity agreement and to perform its obligations hereunder;

    (b) all necessary actions have been taken by the Province or on the Province's part to authorize its execution and delivery of this indemnity agreement, and without limiting the foregoing, the Province has received all necessary approvals under the *Financial Administration Act* (Ontario) (including approval of the Minister of Finance pursuant to Section 28 of the *Financial Administration Act* (Ontario)) and under the Act required for it to enter into this indemnity agreement;

    (c) this indemnity agreement has been duly executed and delivered by the Province and is a legal, valid and binding obligation of it enforceable against it in accordance with its terms, except as that enforcement may be limited by the provisions of the *Proceedings Against the Crown Act* (Ontario), subject to the application of equitable principles and that equitable remedies may be granted only in the discretion of a court of competent jurisdiction, section 11.3 of the *Financial Administration Act* (Ontario) and section 43 of the *Financial Administration Act* (Ontario).

11. It is the intention of the Province to constitute the Corporation as trustee for the Protected Persons that are not party to this indemnity agreement of the covenants, waivers, representations, warranties and obligations of the Province under this indemnity agreement and the Corporation agrees to accept such trust and to hold and enforce such covenants, representations, warranties and obligations on behalf of such Protected Persons.

12. This indemnity agreement shall be interpreted and governed in accordance with the laws of the Province of Ontario and the federal laws of Canada applicable therein.

13. The provisions of this indemnity agreement and the benefit of all covenants, waivers, representations, warranties and other obligations herein contained shall enure to the benefit of the Protected Persons and the Protected Persons' heirs, administrators, executors and assigns as applicable.

[Signature Page Follows]

NOW THEREFORE, the parties have executed this indemnity agreement effective as of the day and year first written above.

TO: **Minister of Energy**

Approval pursuant to section 28 of the
Financial Administration Act

For the purpose of section 28 of the *Financial Administration Act*, I hereby approve the giving of an indemnity by Her Majesty the Queen in right of Ontario, as represented by the Minister of Energy, to the Independent Electricity System Operator and each of its respective directors, officers and employees, substantially in the form set out in the attached Schedule.

Charles Sousa
Minister of Finance

Attachment

EXECUTION VERSION

INDEMNITY

THIS INDEMNITY effective as of this 1st day of June, 2017.

BETWEEN: **The Independent Electricity System Operator**
(hereinafter the "**Corporation**")

OF THE FIRST PART,

Her Majesty the Queen in Right of the Province of Ontario as Represented by the Minister of Energy

(hereinafter called the "**Province**"),

OF THE SECOND PART

WHEREAS the Corporation, and its directors, officers and/or employees, may, or in certain circumstances are or will be required to carry out certain activities with respect to (i) the implementation of *the Ontario Fair Hydro Plan Act, 2017* (the "Act"), (ii) the regulations made pursuant to the Act; and/or (iii) any agreements relating to the implementation of the Act or regulations, including with any financing entity (as defined in the Act), (the Act, such regulations and agreements, collectively referred to as the "Fair Hydro Plan");

AND WHEREAS the Corporation, and its directors, officers and/or employees may face risk of liability arising as a result of their respective activities, acts and/or omissions in the implementation of, or relating to, the Fair Hydro Plan;

NOW THEREFORE, in consideration of the sum of $1.00 now paid by the Corporation to the Province and other good and valuable consideration (the receipt of which is hereby acknowledged), the Province hereby agrees:

1. to indemnify, defend, and save harmless the Corporation and its directors, officers, and employees or a member of a committee or panel established by the directors of the Corporation (collectively the "Protected Persons" and individually, a "Protected Person") from and against all losses, costs, damages, charges, expenses, demands, liabilities, fines, penalties, judgments and/or settlement amounts directly or indirectly suffered, sustained or incurred by any Protected Person, including any special, indirect, incidental, punitive, exemplary and/or consequential damages and/or loss of profits and damages in respect of economic loss and/or loss of opportunity, and all legal and other professional fees and out-of-pocket expenses (collectively, "Losses"), as a result of any civil, criminal, administrative, investigative and/or other claim, demand, action, suit, application, litigation, charge, complaint, prosecution, assessment, reassessment, investigation

(formal or informal), hearing and/or other proceeding of any nature or kind whatsoever (any of the foregoing being a "Claim") arising, directly or indirectly, as a result of the Protected Person's activities, acts and/or omissions in the implementation of, or otherwise relating to, the Fair Hydro Plan.

2. A Protected Person shall not be entitled to be indemnified in respect of such Protected Person's Losses, or a portion thereof:

    (a) for which coverage is provided under an insurance policy or claims fund to the extent that such Protected Person is actually paid under such insurance policy or claims fund; or

    (b) for which other indemnities are already provided to a Protected Person to the extent that the Protected Person is actually so indemnified for those Losses by such indemnities; or

    (c) that are a result of such Protected Person's dishonesty, gross negligence or willful misconduct, but only if such dishonesty, gross negligence or willful misconduct on the Protected Person's part has been established by a final and non-appealable judgment or other final adjudication adverse to the Protected Person; for greater clarity the Province acknowledges and agrees that any finding that a Protected Person failed to conduct such reasonable investigation as necessary to provide the Corporation with reasonable grounds for believing any prospectus, registration statement, offering document or any other document filed by, or on behalf of, a financing entity under applicable securities laws, or any information provided to a financing entity in relation thereto, contained no misrepresentation shall not in and of itself constitute "gross negligence" or "willful misconduct" for purposes of this Section 2(c) or otherwise disentitle a Protected Person from indemnification hereunder unless a court of competent jurisdiction in a final, non-appealable judgment determines that the Claim associated with such Losses resulted from the gross negligence or willful misconduct of the Protected Person claiming such indemnity, and in such circumstances, the Protected Person shall be disentitled from indemnification hereunder as a result of such Protected Person's gross negligence or willful misconduct; or

    (d) in the case of a criminal or administrative action or proceeding that enforces a monetary penalty, if such action or proceeding arises from any circumstances in which a Protected Person did not have reasonable grounds for believing, and/or was reckless as to their belief, that the Protected Person's conduct was lawful in the case of a criminal or administrative action or proceeding that enforces a monetary penalty.

3. Each Protected Person shall:

(a) upon becoming aware of a Claim for which such Protected Person may seek indemnification hereunder, as soon as practicable deliver to the Province (through the Director of the Legal Services Branch of the Ministry of Energy) a notice setting forth in reasonable detail the particulars of the Claim(s);

(b) upon written request of the Province, acting reasonably, furnish to the Province copies of any document, or provide to the Province any information that relates to the Claim(s) that is in the possession or under the control of the Protected Person (except to the extent that provision of same would cause the Protected Party to lose its entitlement to claim privilege with respect to the same);

(c) take all reasonable steps necessary to secure and preserve the rights of the Protected Person in respect of the Claim; and

(d) promptly take all reasonable steps to obtain indemnification or coverage to the fullest extent possible under insurance policies or claims funds, or under indemnities provided by the Corporation, that are referred to in subsections 2(a) or (b) above.

A failure on the part of a Protected Person to take any of the actions provided in this section 3 shall not affect the rights of such Protected Person except to the extent that, as a result of such failure, the Province was actually prejudiced. A failure on the part of a Protected Person to take any of the actions provided in this section 3 shall not affect the rights of any other Protected Person.

4. The Province shall have the right to participate in or assume control of the negotiation, settlement or defence of the Claim(s) and in no event shall a Protected Person negotiate, settle, compromise or pay the Claim(s) without the prior written consent of the Province, such consent not to be unreasonably withheld or delayed. If the Province elects to so participate in or assume control of the negotiation, settlement or defence of the Claim(s), the applicable Protected Person(s) shall co-operate fully with the Province in connection with the same, and each applicable Protected Person shall agree to be represented by legal counsel chosen by the Province, unless, in the opinion of such legal counsel, there would arise a conflict of interest preventing such legal counsel from representing the applicable Protected Person. Where it is such legal counsel's opinion that a conflict of interest prevents that legal counsel representing a Protected Person, the Protected Person will be entitled, after consultation with the Province and acting reasonably, to obtain legal counsel of the Protected Person's choice, and the fees and expenses of the Protected Person's counsel incurred in the Protected Person's representation shall be Losses to which this indemnity extends.

5. The Province shall not agree to any settlement of a Claim on behalf of a Protected Person without the Protected Person's written consent unless (i) the terms of such settlement require only the payment of money (by persons or entities other than the Protected Person) and include an unconditional, full release of the Protected Person, and do not require a Protected Person to admit any wrongdoing or take or refrain from taking any action and (ii) the Province has indemnified

the Protected Person with respect to, and held the Protected Person harmless from and against, all Losses incurred by or on behalf of the Protected Person in connection with the Claim.

6. For greater clarity, with respect to directors, officers and employees of the Corporation this indemnity shall only apply to Claim(s) that are referable to the period during which a director, officer or employee of the Corporation is actually a director, officer or employee (respectively) of the Corporation, and of which notice is received by the Province either during the period of time that the director, officer, or employee is a director officer, employee of the Corporation or after he or she ceases to be a director, officer, employee of the Corporation.

7. The Province shall reimburse or advance the funds necessary for the payment of Losses incurred in connection with a Claim, including without limitation, the investigation, monitoring, defence and appeal thereof, in advance of the final disposition of such Claim, within ninety (90) days of the Protected Person completing all steps outlined in paragraph 3 of this indemnity agreement. The Protected Person shall promptly repay forthwith to the Province any advances that are ultimately in excess of amounts necessary for payment of any such Losses or for which it is judicially determined that the Protected Person is not entitled to indemnification hereunder.

8. The Province hereby waives any claim it could otherwise make against a Protected Person who is an individual, whether now or in the future, relating in any way to the Corporation's and/or any such Protected Person's activities, acts and/or omissions in the implementation of, or otherwise relating to, the Fair Hydro Plan (including, without limitation, where a Protected Person who is an individual is acting, at the request of the Corporation, in a different capacity than as a director, officer or employee of the Corporation), provided that this waiver shall not apply to claims of gross negligence, dishonesty, or willful misconduct against a Protected Person who is an individual.

9. The Province represents and warrants to each Protected Person as follows and acknowledges that each Protected Person is relying on the following representations and warranties in connection with this indemnity agreement:

    (a) the Province has all necessary power, authority and capacity to enter into this indemnity agreement and to perform its obligations hereunder;

    (b) all necessary actions have been taken by the Province or on the Province's part to authorize its execution and delivery of this indemnity agreement, and without limiting the foregoing, the Province has received all necessary approvals under the *Financial Administration Act* (Ontario) required for it to enter into this indemnity agreement;

    (c) this indemnity agreement has been duly executed and delivered by the Province and is a legal, valid and binding obligation of it enforceable against it in accordance with its terms, except as that enforcement may be limited by the provisions of the *Proceedings Against the Crown Act* (Ontario), to the application of equitable principles and except that equitable remedies may be granted only in the discretion of a court of competent jurisdiction; section 11.3 of the *Financial*

Administration Act (Ontario); and section 43 of the *Financial Administration Act* (Ontario).

10. It is the intention of the Province to constitute the Corporation as trustee for the Protected Persons that are not party to this indemnity agreement of the covenants and obligations of the Province under this indemnity agreement and the Corporation agrees to accept such trust and to hold and enforce such covenants and obligations on behalf of such Protected Persons.

11. This indemnity agreement shall be interpreted and governed in accordance with the laws of the Province of Ontario and the federal laws of Canada applicable therein.

12. The provisions of this indemnity agreement and the benefit of all covenants and obligations herein contained shall enure to the benefit of the Protected Persons and the Protected Persons' heirs, administrators, executors and assigns as applicable.

[Signature Page Follows]

NOW THEREFORE, the parties have executed this indemnity agreement effective as of the day and year first above written.

MEMORANDUM TO: Charles Sousa
Minister of Finance

FROM: Glenn Thibeault
Minister of Energy

RE: Request for section 28 approval of indemnities to the IESO, OPG, OPG's subsidiaries, and respective directors, officers, and employees in relation to the Ontario Fair Hydro Plan

---

I am writing to request approval under section 28 of the *Financial Administration Act* ("FAA") the forms of indemnity for the IESO, its directors, officers, and employees; and OPG, OPG's subsidiaries (other than any financing entities as defined in the *Ontario Fair Hydro Plan Act, 2017* (the "*Act*")) and their respective directors, officers, and employees (collectively the "Protected Persons"). Ministry of Finance and Ministry of Energy staff have worked together to review OPG's and IESO's indemnity requests and finalize materials.

OPG and the IESO have each requested an indemnity covering their respective corporations, directors, officers and employees in relation to their activities in carrying out the implementation of the Plan. OPG has also requested this form of indemnity for its subsidiaries (other than any financing entities as defined under the Act) ("Subsidiaries") and respective directors, officers and employees. The Ministry of Energy has committed to providing these indemnities. The Minister of Energy ("Minister") has been briefed and supports this request for approval.

The *Act* enables the implementation of the Ontario Fair Hydro Plan (the "Plan"). Under the Plan, the government has proposed to take steps to lower electricity bills on an after-tax basis by 25 per cent for a typical residential customer relative to what those bills would otherwise have been without the Plan. This proposed 25 per cent rate relief measure will be inclusive of the 8 per cent rebate that is already in effect under the *Ontario Rebate for Electricity Consumers Act, 2016* and the savings that are anticipated to result from the proposed shifting of the Ontario Electricity Support Program ("OESP") and the Rural or Remote Rate Protection program ("RRRP") costs from ratepayers to provincial revenues. Changes to the Global Adjustment ("GA") are also proposed to be a component of the 25 per cent rate relief under the Plan.

The Plan is a novel program, the first of its kind in Canada. Because the work to be undertaken by OPG, OPG's Subsidiaries, and IESO in carrying out their roles in implementing the Plan will fall outside of the usual operations/business risk that these corporation's face, there is a risk that these corporations and their directors, officers, and employees may be subject to increased liability specifically due to their roles with the Plan. This risk arises in part because of the kind of market that OPG, and IESO indirectly, are to participate in, and the steps that investors could take to protect their investments.

The indemnities will provide OPG, OPG's Subsidiaries, the IESO and their respective directors, officers and employees with assurance against liability in order to allow them to comprehensively carry out their respective roles in the successful implementation of the Plan.

My recommendation to provide this approval is based on the attached submission prepared by staff. The attached submission includes a description of the contingent liabilities. The cost or estimated cost of the contingent liabilities cannot be quantified. Should the payment be required, the Ministry will return to TB/MBC for an increase in its allocation.

Approval of these indemnities is requested by June 30, 2017. Failure to obtain approval could jeopardize the implementation of the Plan.

Thank you for your consideration of this request for section 28 approval. Please contact the Ministry of Energy should you have any questions pertaining to the request.

Sincerely,

Glenn Thibeault
Minister

Enclosures

Request for Approval
Pursuant to Section 28 of the *Financial Administration Act* (Ontario)

1. MINISTRY REQUEST

On March 2, 2017, the Premier announced Ontario's Fair Hydro Plan (the "ONFHP"), under which the government proposes to take steps to lower electricity bills on an after-tax basis by 25 per cent for a typical residential customer relative to what those bills would otherwise have been without the ONFHP. This proposed 25 per cent rate relief measure will be inclusive of the 8 per cent rebate that is already in effect under the *Ontario Rebate for Electricity Consumers Act, 2016* and the savings that are anticipated to result from the proposed shifting of the Ontario Electricity Support Program ("OESP") and the Rural or Remote Rate Protection program ("RRRP") costs from ratepayers to provincial revenues. Changes to the Global Adjustment ("GA") are also proposed to be a component of the 25 per cent rate relief under the ONFHP.

On June 1, 2017, Bill 132 received royal assent, which marked the coming into force of the *Ontario Fair Hydro Plan Act, 2017* (the "*Act*"). The *Act* enables the implementation of the ONFHP. The implementation of the ONFHP will require the participation of Ontario Power Generation ("OPG") and the Independent Electricity System Operator ("IESO") among other government entities. Both OPG and the IESO have each requested an indemnity covering their respective corporations, directors, officers and employees in relation to their respective activities in carrying out the implementation of the ONFHP. OPG is also seeking an indemnity for its subsidiaries (not including any financing entities as defined in the *Act*) ("Subsidiaries") and their respective directors, officers and employees.

The Ministry is seeking the approval pursuant to section 28 of the *Financial Administration Act* (Ontario) to provide these indemnities, in the forms attached as Appendix "A" and Appendix "B" (collectively the "Indemnities" and individually the "Indemnity"), on behalf of the Crown to OPG and the IESO, respectively.

Timing:

Approval is sought by June 30, 2017. The Indemnities are required in conjunction with the coming into force of the *Act* (came into force on June 1, 2017).

2. RECOMMENDATION

Approve the giving of the Indemnities to OPG and IESO effective as of the date upon which the Act was passed (June 1, 2017).

3. BACKGROUND

OPG – Role in Implementation of ONFHP and Associated Risks

The *Electricity Act, 1998* ("EA") has been amended to contemplate that OPG's objects include those related to the ONFHP. This amendment was designed to ensure that OPG could participate in the ONFHP. OPG will play a central role in the implementation of the ONFHP, particularly with respect to the implementation of the GA refinancing component of the ONFHP. As part of the ONFHP, it was announced that a portion of the GA will be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to

investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system). This would result in a deferred GA amount that a special purpose entity created by OPG (i.e. a financing entity as defined in the *Act*) is expected to finance.

In carrying out this role, OPG will be carrying out activities that fall outside of its typical business activities and corporate mandate relating to power generation. As a result, OPG, its directors, officers, and employees may be faced with increased risk of liability. Examples of such risks related to financing, include without limitation:

- liability as a promoter under Canadian securities laws (or the equivalent, if any, under other applicable securities laws);
- secondary market liability under Canadian and/or other applicable securities laws;
- liability the signatories to the prospectuses will have (i.e., the individuals signing the prospectus); and
- liability of OPG as the Financial Services Manager under any of the transaction agreements (e.g., the Financial Services Management Agreement, the Administration Agreement, the MSSA, the Master Trust Indenture and any Supplemental Indentures).

OPG and its Subsidiaries, and their respective directors, officers, employees may also be faced with risk of liability to:

- underwriters/agents selling debt securities of the financing entities
- the purchasers of debt securities of the financing entities (both initial purchasers and subsequent purchasers of the debt securities in the secondary markets)
- counterparties to agreements (e.g. the trustee of a financing entity that is a trust or IESO)
- other stakeholders (the Province, as shareholder of OPG, pensioners, and employees) of OPG if OPG (or any Subsidiary of it) is liable for any claim or obligation and cannot meet its obligations to these stakeholders as a result of such claims.
- Regulators (e.g. the Ontario Securities Commission)
- Parties who may challenge the *Act* or any component of it and include OPG as a party to such challenge.

As a result, pre-existing indemnities and protections do not adequately protect OPG, its Subsidiaries and each of their respective directors, officers and employees as explained further below.

Providing the requested Indemnity would help facilitate OPG and OPG's Subsidiaries in undertaking their role with respect to the implementation of the ONFHP.

IESO – *Role in Implementation of ONFHP and Associated Risks*

The *Act* also imposes certain obligations and requirements on the IESO to carry out various activities in relation to the implementation of the ONFHP such as the deferral of costs related to the GA, the creation of a regulatory asset in relation to the GA financing component of the ONFHP, the conveyance of that asset to OPG's financing entities and providing a servicing role in recovering OPG's funding costs from future ratepayers. The IESO may also be required to play a role in potential securities offerings of OPG's financing entities. If so, this may come with heightened exposure to liability for the IESO, particularly for offerings into the U.S. market. The IESO has expressed concern that all of this drives an increased risk of liability to the IESO,

its directors, officers and employees, which is over and above typical operations risks and arises solely due to the ONFHP.

Other examples of sources/activities giving rise to increased risk of liability for the IESO, its directors, officers and employees include the following:

- Investors in any ONFHP investments or underwriters and banks regarding the offering of the investment asset to investors, as well as any securities prospectus or underwriting arrangements, with the IESO named and/or IESO being involved;
- OPG (or the financing entity) in relation to the commercial arrangements regarding transfer of the regulatory asset and servicing of the investment asset, and related activities;
- Market participants, program participants for issues in liquidity (e.g. short pay);
- Taxation authorities where prior approval of IESO's treatment is not approved by taxation authorities;
- Securities commissions regulators (U.S./Canada); and
- Parties who may challenge the *Act* or any component of it and include the IESO as a party to such challenge.

As a result, pre-existing indemnities and protections do not adequately protect IESO and each of their respective directors, officers and employees as explained further below.

Providing the requested Indemnity would help facilitate the IESO's undertaking of the activities requested by the Province in order to facilitate the implementation of the ONFHP.

4. ANALYSIS SUPPORTING RECOMMENDATION

(a) Why the Indemnities are being sought?

(i) Indemnities are required to facilitate IESO and OPG in carrying out their respective roles in implementing the ONFHP

The provision of the Indemnities is required in order to facilitate the implementation of the ONFHP. Both OPG and the IESO are required to carry out activities that may fall outside the scope of their typical business activities and corporate mandate. As a result, these activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG, OPG's Subsidiaries, IESO, and their respective directors, officers and employees to increased liability.

Even if the corporate mandates of OPG and the IESO were updated to include their role in implementing the ONFHP, this may not eliminate the risk of the types of liabilities outlined above completely, particularly due to the novelty of the ONFHP and the types of roles that OPG and IESO will be taking on. For example, persons could still challenge the *Act* or any component of it and include OPG or the IESO as a party to such challenge.

While statutory protection from liability is provided to IESO's directors, officers and employees, and to OPG's employees these protections are limited to "good faith acts". Therefore, the statutory protections do not preclude persons from bringing a claim against the Protected Persons (as defined in the Indemnities) in relation to these activities on the grounds of "bad faith".

Generally speaking the Indemnities are intended to provide the Protected Persons with indemnification for losses/liabilities, including those for potentially "bad faith acts", unless any such acts arise as a result of the Protected Persons' dishonesty, gross negligence, or wilful misconduct. As described below in subsection (ii), the statutory protections also do not indemnify for costs relating to defending a claim. The statutory protections also do not extend to the corporations themselves.

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the ONFHP. Providing the requested Indemnities will provide OPG, OPG's Subsidiaries, the IESO and each of their respective directors, officers and employees with assurance against liability in order to allow them to comprehensively carry out their respective roles in the successful implementation of the ONFHP.

(ii) Statutory Immunity does not preclude a person from bringing an action or other civil proceeding

Subsection 19(1) of the *Electricity Act, 1998* provides IESO directors, officers and employees with the following protection from liability:

> "No action or other civil proceeding shall be commenced against a director, officer, employee or agent of the IESO or a member of a committee or panel established by the board of directors of the IESO for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under any Act, the regulations under any Act, the IESO's licence, the IESO's by-laws or the market rules, or for any neglect or default in the exercise or performance in good faith of such a power or duty."

The *Electricity Act, 1998* does not contain a similar statutory immunity for OPG's directors, officers, employees or agents. However, under subsection 39(1) of the *Act*, a statutory immunity is provided to the OPG's employees. This provision states:

> "No action or other civil proceeding shall be commenced against any employee of the Province or Ontario Power Generation Inc. for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under the Act, the regulations or for any alleged neglect or default in the exercise or performance in good faith of such a power or duty."

Subsection 39(2) of the Act provides that nothing in subsection 39(1) limits the effect of subsection 19(1) of the *Electricity Act, 1998.*

The statutory immunities provided under the *Electricity Act, 1998* and the *Act* prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith").

The immunity from suit provisions outlined above, are qualified by the words "for any act done in good faith in the exercise or performance or intended exercise or performance of a power or duty under this Act…" This is a question of fact that needs to be considered by a court of competent jurisdiction. As such, statutory immunity would not necessarily be a bar to litigation and does not ensure that the IESO's and OPG's employees, officer or directors (as applicable) would not become embroiled in litigation.

In the case of OPG, there is no similar statutory immunity explicitly provided for its directors, or officers so the risk of litigation is greater for these individuals.

For the reasons mentioned above, the Indemnities requested under this application would ensure that if a claim is brought against the Protected Persons as a result of carrying out their roles in implementing the ONFHP, they are fully protected for any costs, losses etc. subject to the limitations provided for in the Indemnities.

(iii) Insurance and indemnities that the IESO and OPG currently provide to its directors, officers and employees may not fully cover risk

OPG –Insurance and Indemnities

Currently, OPG has indicated that it maintains Directors and Officers liability insurance ("D&O Insurance") with limits of USD $110 Million. The D&O Insurance includes persona coverage (side A) and corporate reimbursement coverage (side B). Under the side A coverage, OPG has advised that the policy pays losses where the organization is either not permitted by law or unable due to insolvency to indemnify the insured person under the policy (includes directors, officers and designated executives). This includes losses arising from a claim made during the policy period for a wrongful act (e.g. breach of duty, neglect, error, misstatement or omission) of such insured person. The full $110 Million limit is available for side A coverage.

Under side B coverage, OPG has advised that the policy reimburses the organization for losses incurred to indemnify an insured person under a D&O claim. The coverage is up to a maximum of USD $75 million, less the corporate deductible of $500,000.

OPG has advised that directors and officers have priority of payments over the organization for the entire $110M limit.

While this insurance provides coverage for directors and officers of OPG, there is no similar coverage provided for OPG's employees. Further, any liability stated over the maximum amounts would not be covered by the insurance policy. Pursuant to section 2(a) of the IESO Indemnity and section 3(a) of the OPG Indemnity, a Protected Person shall not be entitled to indemnification to the extent that coverage is provided under an insurance policy and such Protected Person is actually paid under such insurance policy.

OPG has indicated that they provide their directors an indemnity but not to their directors or employees. OPG has not provided information about the scope of this indemnity. However, the Indemnities provide that a Protected Person shall not be entitled to indemnification to the extent that other indemnities are already provided to a Protected Person to the extent that the Protected Person is actually so indemnified. This language is meant to ensure that the covered losses under

the Indemnities will be covered by other applicable indemnities first, before being covered by this indemnity.

OPG has not provided any information about insurance coverage and indemnities that its subsidiaries provide to their directors, officers and employees.

IESO – Insurance and Indemnities

The IESO has informed that it carries Directors & Officers insurance providing a maximum $15 million limit and $200,000 retention per claim. Employees are also included in the definition of Individual Insureds. The IESO also carries Professional liability insurance providing a maximum $75 million limit.
Aside from indemnification arising by operation of common law for employees acting within the scope of their employment, the IESO has informed that it has provided formal indemnity as follows:

- IESO has provided an indemnity to its board members.
- There is an indemnity provided to members of the Society of Energy Professionals pursuant to their collective agreement, whose members form a subset of all employees at the IESO.

Existing Indemnities to OPG and IESO from the Province

Existing indemnities previously provided by the Province to OPG have been limited to specific directives provided to OPG by the Province (e.g., in connection with the Bruce Lease). Accordingly, the scope of the existing indemnities provided by the Province would not cover the ONFHP. We are not aware of any indemnities provided to the IESO by the Province.

(b) Description of Risk and any Risk Mitigants.

The ONFHP is a novel program, the first of its kind in Canada. Because the work to be undertaken by OPG (and OPG's subsidiaries where applicable) and IESO in carrying out their roles in implementing the ONFHP will fall outside of the usual operations/business risk that these corporations face, there is a risk that these corporations may be subject to increased liability specifically due to their roles with the ONFHP. This risk arises in part because of the kind of market that OPG, and IESO indirectly, are to participate in, and the steps that investors could take to protect their investments as described in section 3 above.

The exact nature and scope of the risk to the Province of giving the Indemnities is undeterminable at this time, but the risk of liability for the Province arising may be low, with respect to directors, officers and employees, as any such risk may be mitigated by the following factors:

1) In the case of the IESO, the existence of a statutory immunity under subsection 19(1) of the *Electricity Act, 1998* may mitigate against a liability arising against its directors, officers and employees, but does not eliminate such risk.

2) In the case of OPG, the proposed statutory immunity under subsection 39(1) of the *Act* may mitigate against a liability arising against its employees, but does not eliminate such risk.

3) The Indemnities are limited to claims arising in relation to the Protected Persons' respective roles in relation to implementing the ONFHP.

4) The Indemnities do not apply with respect to Losses for which coverage is provided under insurance or another indemnity, to the extent already paid under such insurance, or so indemnified under such indemnification in relation to the claims.

5) The Indemnities do not apply to Losses that are a result of the Protected Person's dishonesty, gross negligence or willful misconduct.

With respect to the corporations themselves (and in the case of OPG, its Subsidiaries as well) the risk may be higher, but is undeterminable at this time. The likelihood of risk to the Province is characterized as medium, given that OPG and IESO have not identified any insurance or indemnities that would cover the corporations themselves (or in the case of OPG, the Subsidiaries themselves) in the event that such liability arises, nor is statutory protection provided for the corporations themselves.

A contingent liability table is attached as Appendix "C".

(c) Scope of liability in the Indemnities

The Province would agree to indemnify and hold harmless the IESO and OPG, and OPG's subsidiaries as well as their respective directors, officers and employees from any claims, liabilities, costs or losses that might arise to the Protected Person as a result of their roles in carrying out activities related to the implementation of the ONFHP.

Under the Indemnities, a Protected Person would not be entitled to be indemnified in respect of Losses, or a portion thereof:

(a) for which coverage is provided under an insurance policy or claims fund to the extent that such Protected Person is actually paid under such insurance policy or claims fund;

(b) for which other indemnities are already provided to a Protected Person to the extent that the Protected Person is actually so indemnified for those Losses by such indemnities;

(c) that are the result of such Protected Person's dishonesty, gross negligence or willful misconduct, but only if such dishonesty, gross negligence or willful misconduct on the Protected Person's part has been established by a final and non-appealable judgment or other final adjudication adverse to the Protected Person; or

(d) in the case of a criminal or administrative action or proceeding that enforces a monetary penalty, if such action or proceeding arises from any circumstances in

which a Protected Person did not have reasonable grounds for believing was reckless as to their belief that the Protected Person's conduct was lawful in the case of a criminal or administrative action or proceeding that enforces a monetary penalty.

(d) Other Substantial Variances from the Province's Indemnity Template

The other substantial variances in the Indemnities includes a waiver provision whereby the Province waives its right to bring any claim it could otherwise make against a Protected Person who is an individual relating in any way to the Protected Persons' activities in the implementation, or otherwise relating to the ONFHP (including where a Protected Person is acting at the request of the corporation, in a different capacity than as a director, officer or employee of the Corporation – e.g. for example, where a financing entity is a trust, OPG's directors/officers/employees may need to sign the securities offering documents, but not in the capacity as OPG's directors/officers/employees, as the offering documents will not be the offering documents of OPG. The directors/officers/employees will be performing these functions as a result of OPG acting as a Financial Services Manager of the financing entity).

However, this waiver does not apply to gross negligence, dishonesty or willful misconduct claims that may be brought by the province against the applicable Protected Persons. The risk associated with providing this waiver is likely low given that it is consistent with the gross negligence carve out provided for in the Indemnity Agreements (section 2(c) in the IESO Indemnity and section 3(c) in the OPG Indemnity) and because the Province is unlikely to bring a claim against a Protected Person for Losses they have agreed to indemnify them for.

OPG has indicated that the inclusion of this waiver is very important to their Board given that its directors and officers are undertaking the ONFHP activities at the request of the Province. Accordingly, the directors, officers, employees do not want to take on liability towards the Province, as shareholder of OPG. The Indemnity is being provided to the IESO for consistency.

The Indemnities also include a representations and warranties section (section 8 in the IESO Indemnity and section 9 in the OPG Indemnity), which includes general representations and warranties with respect to the Province's authority to enter into these agreements and confirming that they have obtained the appropriate FAA approvals. We do not believe this variance poses a significant risk to the Province.

(e) Effect of failure to obtain section 28 approval

If the requested Indemnities are not provided, this could impact the OPG, OPG's Subsidiaries and IESO's (including their respective directors, officers and employees') willingness to fully undertake their roles in implementing the ONFHP. This may potentially jeopardize the successful implementation of this plan. For example, IESO directors may not be willing to carry out certain activities that would fall outside of the scope of its typical business activities and mandate if they view these as creating a risk of liability. Providing the Indemnities, would allow OPG, OPG's Subsidiaries, and IESO, along with their directors, officers and employees to more confidently carry out their role in implementing the ONFHP.

Hi Malle,

That paragraph was my attempt to summarize paragraphs 1 and 2 from the OPG

Agreement. In particular 2 below. But I wasn't providing any value-added in terms of interpreting paragraph 2, and I wasn't making the connection to the waiver. I'm happy to take your advice on the wording.

> 2. For greater clarity, "Corporation's subsidiaries" as used in this indemnity agreement do not include any financing entities (as defined in the Act), whether such financing entities are actually a subsidiary of the Corporation or not; and the terms "Protected Persons" or "Protected Persons" under this indemnity agreement do not include any financing entities (as defined in the Act), being a subsidiary of the Corporation or otherwise, provided that, for clarity, any such financing entities' respective directors, officers, trustees, and/or employees shall be considered "Protected Persons" if he or she is also a director, officer or employee of the Corporation or any of the Corporation's subsidiaries.

Thanks
Bruno

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Hi Bruno,

I reviewed the briefing note and have a question regarding the description of scope of indemnity in the first paragraph and on p. 2 – who the indemnity applies to. The complication is the activities of the OPG directors, officers and employees when they at the request of OPG undertake another activity in the implementation of the OFHP and in particular respecting OPG's role as Financial Services manager on behalf of the financing entity if it's a trust. This is explained on p. 8 of Energy's business case and of course is mentioned expressly in the OPG indemnity. It doesn't really seem that these individuals would be appointed as directors, officers and employees of the financing entity trust but it's possible. Maybe the language in these 2 paragraphs has been carefully written to cover these potential roles as it does mention "trustee" so that these individuals might be acting as a trustee of the financing entity in that case.

I wrote the below wording based on p. 8 so just send it for your consideration. I'm not sure if it's better or if you have specifically considered this point. I didn't mark up the note.
The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees. In the case of directors, officers and employees of OPG and its subsidiaries this could include where at the request of OPG, they undertake activities in another capacity in the implementation of the OFHP or OPG's role as Financial Services Manager of the financing entity, for example, signing documents on behalf of a financing entity that is a trust.

Also on p. 5 under Accounting Treatment, change MENE to Ministry of Energy.

Thank you.

Bruno,

Please find attached a markup of the note. I have made some changes to the organization and tried to streamline the note. We think there should also be a section on mitigation measures, and perhaps that can incorporate some of the existing note, plus anything that can be added from Energy's materials. There is still some work to do on the analysis part, but I wanted to make sure you had a head start on what I have done so far.

Best,
Toby

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Hi attached

Is a markup and relatively clean version of the file that Toby sent on Saturday. Most comments and the section 5 reference is removed.

Thanks
Bruno

OK Thanks. Yes, will delete s.5 reference. We'll edit version Toby sent to me on Saturday morning and send back.

Thanks
Bruno

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I have also reviewed the note and have some suggestions to assist with make it shorter and more concise.

I don't think that we need to mention s. 5 because it doesn't apply to this indemnity. S. 5 requires a joint agreement by the 2 Ministers which is not the case here so I suggest we delete the references to this.

Can we remove the watermark as it makes it hard to read. It's still marked as a draft.

Maybe it would be helpful to accept all the font changes and remove the comments that are no longer required and then we can work from that version.

Thanks.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Thanks for comments and edits.

I'm wondering about language that I had added in the "Previous Direction on Indemnity for IESO and OPG" section. In that part, I note that language in s.5 (2) of the Act around Protection and Assurances might be general direction covering these indemnities. On re-reading I'm wondering if any of the language in s.5 can be seen as providing general direction/coverage for the current indemnity agreement.

The "including" statement in s.5(2) is clearly about the IESO and vendor performance, but 5(2) is not limited to that. However, s.5(2) language says ["Minister and Minister of Finance may together enter into Agreements....with]" . The Agreement in question is just Minister of Energy and the parties. I'm not sure that s.28 approval satisfies the "together" part.

Also S.5(3) is about indemnifications, but my read was this was indemnifying debt rather than persons.

Thanks
Bruno

Please see attached my comments up to this point on the indemnity note. I have started to work on the analysis part of the note, as I think with the many changes in the note we have some duplication and could tighten that part up, so note that this markup does not reflect any changes to that part.

> I want to get back to Harkamal through email with a couple of comments including your comment below regarding excluding the financing entity. Our comment is mainly to respond to their question back to us about inconsistencies between the contingent liability table and the approval request note. In particular, the Liability table stated the probability of liability as low while the business case noted risk indeterminable (albeit with some mitigating factors). As well the table noted maximum financial exposure will be linked to the OPG financing entity's debt offerings. It isn't clear from the note that potential claims are limited to debt offerings or indeed if the claims would necessarily directly related to debt offerings.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions
Date: Tuesday, June 27, 2017 3:32:20 PM

Hi Ron

I spoke to Toby. As I understand it issue is as follows. OPG and IESO provide corporate indemnities. Case may arise where, say a director, makes a claim against OPG related to FHP work. OPG can then make a claim against the provincial indemnity.

I think concern is not that this in inconsistent with intent of provincial indemnity (to indemnify against claims related to implement PFHP), but rather being clear that claim could be made in this way. On the surface it may be interpreted as OPG passing on costs to the province. Energy does not want to change materials at this point. We can add a clarification bullet in the briefing note. I will draft something and circulate.

Bruno

Cc: Gavin He
Subject: FW: OPG/IESO indemnity Responses to OFA Questions

Hi Ron

There is a last minute issue. I don't fully understand but will call legal for an explanation.

Whatever, it is bottom-line is Energy not wanting to change wording at late hour and us making call if we are OK with this. Just a heads up but I'll try and understand this better and get back to you.

Bruno

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I had a follow up call with Harkamal. Energy is pushing back on revising the business case. They think that given the late notice, and that there is not a substantive change, they are uncomfortable revising the briefing materials, but have agreed to follow up with an email outlining their understanding. Please let me know if you are ok with that approach.

Toby

Tobias Whitfield

Cc: 'Salman Qadir'; Kim, John (OFA); He, Gavin (OFA); Hanslep, Malle (MOF)
Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I spoke with Harkamal, and she indicated that she now believes that OPG and the IESO would be subject to a claim on the indemnity to cover a claim made by a director, officer or employee on an indemnity provided by the corporation, and that she understands it was the policy intention to cover such a claim under the Provincial indemnity. I asked her to revise the business case to make that clear.

I want to check with you, as I think that it is important to make sure that this point is clear. I am not sure that it would make sense to not cover such a claim, while covering claims made directly against the corporation. However, I also think that the way it is set out to first have the claim against the corporate indemnity is a bit confusing if that is the intent, except to the extent that it gives an opportunity for such a claim to first be covered by any relevant insurance policy that the corporations may have.

Please let me know if you have further thoughts on this. Otherwise, I believe that Energy will forward a revised business case that can be included in the package.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Harkamal,

It has occurred to me that even though we require the use of existing indemnities before calling on the Provincial indemnity, if a director/officer/employee of OPG or IESO made a claim on the OPG/IESO indemnities, that would allow the OPG/IESO to make a claim on the Province's indemnity (if not covered by an insurance policy).

Is this a correct interpretation and has this possibility been discussed?

Thanks

Hi Toby – as discussed – OPG revised section 2 (see highlighted language) so that any directors, officers, employees of a financing entity are still included in the definition of "Protected Person" where he/she is a director, officer, employee of OPG or OPG's Subs.

Other than this, their changes for the most part were more word smithing. I've highlighted in yellow the changes OPG agreed to stand down on.

Thanks very much again,

Harkamal

Hi Bruno,

Attached is the updated business case and Contingent Liabilities Table. The Cover memo will follow shortly. I have tried to address all of the comments you had previously sent as well as incorporate the information from OPG and IESO's responses to your questions.

If you could please review and let me know if you have any further comments by end of day today it would much appreciated so that I can make any further edits necessary and get you a revised copy on Monday.

I know people have been encountering issues with their emails, so if you cannot access these documents, please let me know and I will try to resend.

As requested, I am also re-sending you the draft Indemnity agreements.

Thank you,

Harkamal

Hi John,

Apologies - for some reason, your email only popped up in my email inbox at 5:01pm (I note the time stamp below states 11:50am).

I did speak to Toby earlier and flagged that I will be sending updated drafts (pending further changes based on any comments you may have on the actual indemnity agreements) of the business case, exhibit A and memo tomorrow morning based on the information from OPG and IESO.

On our end I will need to get the indemnity agreements back to OPG/IESO early tomorrow to give them time to consider the further changes. Once the agreements have been finalized, we can further update the draft s.28 materials as needed on Monday/Tuesday next week and have our Minister send over the finalized package.

Please let me know if these next steps work for you.

Thank you,

Harkamal

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Hi Harkamal,

Further to this, could you give us a sense of when the updated draft package could be sent to us for review? Correct me if I am not mapping the next steps, etc. right but based on the information provided by OPG, Energy would be pulling together the updated business case, the contingent liability table and draft submission memo. We are still reviewing the answers included in the attached file but wanted to get a sense of the path forward and the timeline.

Thanks,

John

Ron

We can get back to them to see if they can revise. As I re-read revised note, risk is low with respect to directors etc, and medium with respect to corporation.

Subject: Re: OPG/IESO indemnity Responses to OFA Questions

Hi Bruno,

Please share with OPCD / TBS.

Also, is there more on why the wording with respect to reasonable due diligence?

And should the "low" assessment in the TB AN from the weekend be revised, as previously marked?

Thanks,
Ron

Bruno,

Please find attached a markup of the note. I have made some changes to the organization and tried to streamline the note. We think there should also be a section on mitigation measures, and perhaps that can incorporate some of the existing note, plus anything that can be added from Energy's materials. There is still some work to do on the analysis part, but I wanted to make sure you had a head start on what I have done so far.

Best,
Toby

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I have also reviewed the note and have some suggestions to assist with make it shorter and more concise.

I don't think that we need to mention s. 5 because it doesn't apply to this indemnity. S. 5 requires a joint agreement by the 2 Ministers which is not the case here so I suggest we delete the references to this.

Can we remove the watermark as it makes it hard to read. It's still marked as a draft.

Maybe it would be helpful to accept all the font changes and remove the comments that are no longer required and then we can work from that version.

Thanks.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Thanks for comments and edits.

I'm wondering about language that I had added in the "Previous Direction on Indemnity for IESO and OPG" section. In that part, I note that language in s.5 (2) of the Act around Protection and Assurances might be general direction covering these indemnities. On re-reading I'm wondering if any of the language in s.5 can be seen as providing general direction/coverage for the current indemnity agreement.

The "including" statement in s.5(2) is clearly about the IESO and vendor performance, but 5(2) is not limited to that. However, s.5(2) language says ["Minister and Minister of Finance may together enter into Agreements....with]" . The Agreement in question is just Minister of Energy and the parties. I'm not sure that s.28 approval satisfies the "together" part.

Also S.5(3) is about indemnifications, but my read was this was indemnifying debt rather than persons.

Thanks
Bruno

Please see attached my comments up to this point on the indemnity note. I have started to work on the analysis part of the note, as I think with the many changes in the note we have some duplication and could tighten that part up, so note that this markup does not reflect any changes to that part.

> I want to get back to Harkamal through email with a couple of comments including your comment below regarding excluding the financing entity. Our comment is mainly to respond to their question back to us about inconsistencies between the contingent liability table and the approval request note. In particular, the Liability table stated the probability of liability as low while the business case noted risk indeterminable (albeit with some mitigating factors). As well the table noted maximum financial exposure will be linked to the OPG financing entity's debt offerings. It isn't clear from the note that potential claims are limited to debt offerings or indeed if the claims would necessarily

directly related to debt offerings.

Hi Malle,

That paragraph was my attempt to summarize paragraphs 1 and 2 from the OPG Agreement. In particular 2 below. But I wasn't providing any value-added in terms of interpreting paragraph 2, and I wasn't making the connection to the waiver. I'm happy to take your advice on the wording.

> 2. For greater clarity, "Corporation's subsidiaries" as used in this indemnity agreement do not include any financing entities (as defined in the Act), whether such financing entities are actually a subsidiary of the Corporation or not; and the terms "Protected Persons" or "Protected Persons" under this indemnity agreement do not include any financing entities (as defined in the Act), being a subsidiary of the Corporation or otherwise, provided that, for clarity, any such financing entities' respective directors, officers, trustees, and/or employees shall be considered "Protected Persons" if he or she is also a director, officer or employee of the Corporation or any of the Corporation's subsidiaries.

Thanks

Cc: Gavin He <Gavin.He@ofina.on.ca>
Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Hi Bruno,

I reviewed the briefing note and have a question regarding the description of scope of indemnity in the first paragraph and on p. 2 – who the indemnity applies to. The complication is the activities of the OPG directors, officers and employees when they at the request of OPG undertake another activity in the implementation of the OFHP and in particular respecting OPG's role as Financial Services manager on behalf of the financing entity if it's a trust. This is explained on p. 8 of Energy's business case and of course is mentioned expressly in the OPG indemnity. It doesn't really seem that these individuals would be appointed as directors, officers and employees of the financing entity trust but it's possible. Maybe the language in these 2 paragraphs has been carefully written to cover these potential roles as it does mention "trustee" so that these individuals might be acting as a trustee of the financing entity in that case.

I wrote the below wording based on p. 8 so just send it for your consideration. I'm not sure if it's better or if you have specifically considered this point. I didn't mark up the note.
The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees. In the case of directors, officers and employees of OPG and its subsidiaries this could include where at the request of OPG, they undertake activities in another capacity in the implementation of the OFHP or OPG's role as Financial Services Manager of the financing entity, for example, signing documents on behalf of a financing entity that is a trust.

Also on p. 5 under Accounting Treatment, change MENE to Ministry of Energy.

Thank you.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Bruno,

Please find attached a markup of the note. I have made some changes to the organization and tried to streamline the note. We think there should also be a section on mitigation measures, and perhaps that can incorporate some of the existing note, plus anything that can be added from Energy's materials. There is still some work to do on the analysis part, but I wanted to make sure you had a head start on what I have done so far.

Best,
Toby

Hi attached

Is a markup and relatively clean version of the file that Toby sent on Saturday. Most comments and the section 5 reference is removed.

Thanks
Bruno

OK Thanks. Yes, will delete s.5 reference. We'll edit version Toby sent to me on Saturday morning and send back.

Thanks
Bruno

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I have also reviewed the note and have some suggestions to assist with make it shorter and more concise.

I don't think that we need to mention s. 5 because it doesn't apply to this indemnity. S. 5 requires a joint agreement by the 2 Ministers which is not the case here so I suggest we delete the references to this.

Can we remove the watermark as it makes it hard to read. It's still marked as a draft.

Maybe it would be helpful to accept all the font changes and remove the comments that are no longer required and then we can work from that version.

Thanks.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Thanks for comments and edits.

I'm wondering about language that I had added in the "Previous Direction on Indemnity for IESO and OPG" section. In that part, I note that language in s.5 (2) of the Act around Protection and Assurances might be general direction covering these indemnities. On re-reading I'm wondering if any of the language in s.5 can be seen as providing general direction/coverage for the current indemnity agreement.

The "including" statement in s.5(2) is clearly about the IESO and vendor performance, but 5(2) is not limited to that. However, s.5(2) language says ["Minister and Minister of Finance may together enter into Agreements....with]" . The Agreement in question is just Minister of Energy and the parties. I'm not sure that s.28 approval satisfies the "together" part.

Also S.5(3) is about indemnifications, but my read was this was indemnifying debt rather than persons.

Thanks
Bruno

Please see attached my comments up to this point on the indemnity note. I have started to work on the analysis part of the note, as I think with the many changes in the note we have some duplication and could tighten that part up, so note that this markup does not reflect any changes to that part.

> I want to get back to Harkamal through email with a couple of comments including your comment below regarding excluding the financing entity. Our comment is mainly to respond to their question back to us about inconsistencies between the contingent liability table and the approval request note. In particular, the Liability table stated the probability of liability as low while the business case noted risk indeterminable (albeit with some mitigating factors). As well the table noted maximum financial exposure will be linked to the OPG financing entity's debt offerings. It isn't clear from the note that potential claims are limited to debt offerings or indeed if the claims would necessarily directly related to debt offerings.

MINISTER OF ENERGY REQUEST FOR SECTION 28 APPROVAL FOR INDEMNITY AGREEMENTS IN FAVOUR OF OPG AND IESO FOR THEIR PARTICIPATION UNDER THE ONTARIO FAIR HYDRO PLAN ACT

ISSUE

The Minister of Energy is requesting approval from the Minister of Finance, pursuant to Section 28 of the *Financial Administration Act (*"FAA"*)* to enter into Indemnity Agreements ("Agreements"), on behalf of the Crown, in favour of Ontario Power Generation ("OPG"), and its subsidiaries (excluding a subsidiary that is a financing entity) and the Independent Electricity System Operator ("IESO") with respect to their roles in carrying out the implementation of the Ontario Fair Hydro Plan ("OFHP") under the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act"). The indemnities would extend to the directors, officers and employees of these entities, and, directors, officers, trustees and/or employees of a financing entity, if he or she is also a director, officer or employee of OPG or one of its subsidiaries.

Section 28 of the FAA requires that all ministries and public entities request the prior written approval of the Minister of Finance or the President of the Treasury Board for any transaction or commitment that would directly or indirectly increase the indebtedness or contingent liabilities of Ontario.

RECOMMENDATION

- It is recommended that the Minister of Finance approve, pursuant to Section 28 of the FAA, the Ministry of Energy's request to provide indemnities and waivers, on behalf of the Crown, in favour of Ontario Power Generation (OPG) and the Independent Electricity System Operator (IESO) in the forms requested (the "Indemnity Agreements" and individually an "Indemnity Agreement".
- IESO and OPG have stated that without these indemnities and waivers they will not be able to participate in the implementation of the OFHP Act.
- In order for the OFHP Act to be successful, it is recommended by the Minister of Energy that the Minister of Finance approve this request.

WHAT IS THE MINISTER BEING ASKED TO SIGN?

The Minister is being asked to sign the section 28 approval forms and the transmittal letter to Glenn Thibeault, Minister of Energy.

SUMMARY OF PROPOSED INDEMNITIES

This summary of the OPG/IESO Indemnity Agreement sets out why indemnities are being sought, who is being indemnified, for what, and also addresses the proposed waiver of claims, whereby the Province agrees not to bring certain claims against the indemnified parties.

Why are indemnities being sought?

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the OFHP. Providing the requested Indemnities will provide OPG, OPG's Subsidiaries, the IESO and each of their respective directors, officers and employees with assurance against liability in order to allow them to comprehensively carry out their respective roles in the successful implementation of the OFHP.

Both OPG and the IESO are required to carry out activities that may fall outside the scope of their typical business activities and corporate mandates. As a result, these activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG, OPG's Subsidiaries, IESO, and their respective directors, officers and employees to increased liability.

While statutory protection from liability is provided to IESO's directors, officers and employees, and to OPG's employees these protections are limited to "good faith acts". Therefore, the statutory protections do not preclude persons from bringing a claim against the Protected Persons (as defined in the Indemnities) in relation to these activities on the grounds of "bad faith" (see Appendix A for details on potential risks and Appendix B for details on limitations to existing protections to IESO, OPG and directors, officers and employees).

Who the Indemnity Applies to

The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees.

In the case of directors, officers and employees of OPG and its subsidiaries, they could also be indemnified for activities undertaken on behalf of an entity that is not included in the definition of Protected Persons where they are doing so in the implementation of the OFHP or for OPG's role as Financial Services Manager of a financing entity, for example, signing documents on behalf of a financing entity that is a trust at the request of OPG or acting as directors, officers or employees of entities that are carved out of the Indemnity Agreement, where they are doing so in the implementation of the OFHP and are also a director, officer or employee of OPG or any of OPG's subsidiaries.

What Indemnities are being provided?

Protected Persons are being indemnified against all losses, costs, damages and other expenses for any amount for which they incur damages in relation to any civil, criminal, administrative, investigative and/or other claim that relates to any act or omission that the Protected Person undertakes in relationship to the Fair Hydro Plan.

The Protected Persons are indemnified for regular and punitive as well as a broad range of other types of damages that are not always included in an indemnity, such as consequential damages and economic losses. The indemnity also covers costs and expenses for the Protected Persons in defending themselves against a claim. These indemnities are for any act or omission and activity that relates to the Fair Hydro Plan.

The Indemnity Agreements provide that the Protected Person shall not benefit from the indemnities contained therein to the extent that the losses are already covered by an insurance policy or another indemnity. The indemnities provided in the Indemnity Agreements also apply where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.

The indemnities do not apply where the loss relates to the gross negligence or wilful misconduct of the Protected Person. It is also explicitly carved out of this exception that a failure to conduct reasonable due diligence investigation will not in itself constitute gross negligence or wilful misconduct, which narrows the exception in the context of disclosure and activities relating to issuing securities in public markets such that failing to conduct due diligence will not necessarily invalidate the Indemnity.

Scope of liability in the indemnities

The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnities contained therein to the extent that the losses are already covered by an insurance policy or another indemnity (though to the extent that the Protected Person makes a claim on an indemnity that creates a loss for another Protected Person, such as OPG and its subsidiaries and the IESO, such other Protected Person may make a claim under an Indemnity Agreement). The indemnities provided in the Indemnity Agreement also apply where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.

The indemnities contained in the Indemnity Agreement do not apply where the loss relates to the gross negligence or wilful misconduct of the Protected Person. It is also explicitly carved out of this exception that a failure to conduct reasonable due diligence investigation will not in itself constitute gross negligence or wilful misconduct, which narrows the exception in the context of disclosure and activities relating to issuing securities in public markets such that failing to conduct due diligence will not necessarily invalidate the Indemnity.

Waiver of claim provision

The waiver of claims provision provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan.

The waiver of claims provision does not apply to claims for wilful misconduct, dishonesty or gross negligence.

Notification of Claims

The Indemnity Agreement sets out how the Protected Person should notify the Province of any claims, and how any proceedings should be dealt with amongst the parties, as well as how any expenses and amounts should be paid during the determination of the claim.

Provincial Warranty

The Indemnity Agreement includes a warranty section given by the Province. In this section the Province Warrants that it has the authority and capacity, and has taken all necessary steps to enter into the Indemnity Agreement.

- This is an unusual provision, but likely relates to the fact that the Province is not the employer of the indemnified party, or the officers and directors are not the officers and directors of the Province.

KEY CONSIDERATIONS AND RISKS

The Indemnity Agreements give an indemnity for a broader range of actions than those that are usually given to indemnitees of the Province, specifically by giving an indemnity for actions that are not in the best interest of the corporation and may not be in good faith;

The Indemnity Agreements extend to the OPG and the IESO as corporations, beyond the more normal practice of indemnifying directors, officers and employees; and also extends to subsidiaries of the OPG, excluding financing entities under the OFHP Act.

The Indemnity Agreements include a waiver of claims with respect to indemnitees who are individuals by the Province as shareholder, meaning that except for gross negligence, dishonesty and wilful misconduct, the Province cannot bring an action against an indemnified individual.

Potential Fiscal Impact

The Ministry of Energy states that the risk of the Province providing the Indemnity Agreements is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. The Ministry of Energy notes, however, the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998*, for IESO, and under the OFHP Act, for OPG,

(see further discussion below), pre-existing protection for director and officers under insurance and the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

Because the Indemnity Agreements are not capped the Provincial exposure is not limited and will extend to the extent of any claim that is covered by the Indemnity Agreements.

The Ministry of Energy notes that in the event that an indemnity claim does arise and a payment is required, the Ministry would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.

Accounting Treatment

There is a risk associated with the anticipated accounting treatment of the GA Financing portion of the OFHP. With the Province providing guarantee agreements, financial support through credit facilities and the proposed agreements to indemnify the IESO and OPG, the case for the anticipated accounting treatment of the GA structure could be weakened.

OPCD has confirmed that OPG has received advice that the accounting treatment will be consistent with the GA Financing Structure. IESO is expected to also confirm the same.

The Minister of Energy had initially considered limiting the indemnities to directors and officers. However, IESO and OPG both have indicated that they require their respective indemnity cover their corporations as well (and in the case of OPG, its subsidiaries) given the nature of the risks they face.

Previous Direction on Indemnity for IESO and OPG

There is no existing specific Cabinet direction for the Ministry of Energy to provide the requested Indemnities to IESO and OPG.

Insofar as IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the ONFHP, providing the requested indemnities will support implementation of the Fair Hydro Plan.

The Treasury Board Assessment Note of June 13, 2017, included reference to the indemnities required by OPG and IESO.

Other protections and assurances are currently being discussed under a *Provincial Support Agreement* that would include indemnities for the Financing Entity against claims from creditors as a result of government amending or repealing the Act or court rulings adversely affecting the rights and interest of the Financing Entity and performance assurances from the Province for the IESO and electricity vendors.

DESCRIPTION OF RISK AND RISK MITIGATION

The ONFHP is a novel program, and as a financing structure it is the first of its kind in Canada. Because the work to be undertaken by OPG (and OPG's subsidiaries where applicable) and IESO in carrying out their roles in implementing the ONFHP will fall outside of the usual operations/business risk that these corporations face, there is a risk that these corporations may be subject to increased liability specifically due to their roles with the ONFHP. This risk arises in part because of the kind of market that OPG, and IESO indirectly, are to participate in, and the steps that investors could take to protect their investments (see further details on risks in Appendix A).

The exact nature and scope of the risk to the Province of giving the Indemnities is undeterminable at this time, but the risk of liability for the Province arising may be low, with respect to directors, officers and employees, as any such risk may be mitigated by the following factors:

- In the case of the IESO, the existence of a statutory immunity under subsection 19(1) of the *Electricity Act, 1998* may mitigate against a liability arising against its directors, officers and employees, but does not eliminate such risk.
- In the case of OPG, the proposed statutory immunity under subsection 39(1) of the *Act* may mitigate against a liability arising against its employees, but does not eliminate such risk.
- The Indemnities are limited to claims arising in relation to the Protected Persons' respective roles in relation to implementing the ONFHP.
- The Indemnities do not apply with respect to Losses for which coverage is provided under insurance, to the extent already paid under such insurance.
- The Indemnities do not apply to Losses that are a result of the Protected Person's dishonesty, gross negligence or wilful misconduct.

Although there is a provision in the Indemnity Agreements that provides that a claim relating to the OFHP should initially be made on any indemnity that is already in place from the IESO or OPG for the benefit of their respective directors, officers or employees before making a claim on the Province's indemnity, if the IESO or OPG suffer a loss because they have indemnified such director, officer or employee they would be able to make a claim under an Indemnity Agreement. Thus, the Province would, to the extent such a claim was not covered by an insurance policy, be liable for such a loss of the IESO or OPG.

With respect to the corporations themselves (and in the case of OPG, its Subsidiaries as well) the risk may be higher, but is undeterminable at this time. The likelihood of risk to the Province is characterized as medium, given that OPG and IESO have not identified any insurance or indemnities that would cover the corporations themselves (or in the case of OPG, the Subsidiaries themselves) in the event that such liability arises, nor is statutory protection provided for the corporations themselves.

BACKGROUND

On March 2, 2017, the government announced Ontario's Fair Hydro Plan (the "OFHP"), under which the government will take steps to lower electricity bills [on an after-tax basis] by 25 per cent on average for a typical residential customer, starting July 1, 2017, relative to what the bills would otherwise have been without the OFHP.

Changes to refinance a portion of the Global Adjustment ("GA") are a component of the 25 per cent rate relief under the OFHP. This includes roles for both IESO and OPG:

IESO – legislation imposes certain obligations and requirements on IESO to carry out various activities to implement the OFHP such as the creation of a regulatory asset in relation to deferred costs and the GA financing component of the OFHP, the conveyance of that asset to a financing entity (expected to be established by OPG) and providing a servicing role in recovering the financing entity's funding costs from future ratepayers. IESO may also be required to play a role in potential securities offerings of OPG's financing entity. This may come with heightened exposure to liability for the IESO.

OPG – OPG is expected to finance the purchase of the regulatory asset, related to deferred costs, through a financing entity that OPG creates. OPG considers risks associated with these OFHP-related activities to be beyond OPG's usual business/operations. This is particularly true with respect to any securities offerings of OPG's financing entity. Products are expected to be offered into the Canadian and U.S. Markets. As a result, pre-existing indemnities and protections do not adequately protect OPG, its directors, officers and employees.

The 25 per cent rate relief also includes the rebate amount equivalent to the 8 per cent Provincial portion of the HST that has been in effect since January 1, 2017 under the Ontario Rebate for Electricity Consumers Act, 2016, and the expected savings from the shifting of the Ontario Electricity Support Program ("OESP") and the Rural or Remote Rate Protection program ("RRRP") costs from ratepayers to being funded by the Province.

APPENDIX A

Potential Risks Related to OPG/IESO Roles in Implementing the Ontario Fair Hydro Plan

OPG – Role in Implementation of ONFHP and Associated Risks

The *Electricity Act, 1998* ("EA") has been amended to contemplate that OPG's objects include those related to the ONFHP. This amendment was designed to ensure that OPG could participate in the ONFHP. OPG will play a central role in the implementation of the ONFHP, particularly with respect to the implementation of the GA refinancing component of the ONFHP. As part of the ONFHP, it was announced that a portion of the GA will be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system). This would result in a deferred GA amount that a special purpose entity created by OPG (i.e. a financing entity as defined in the *Act*) is expected to finance.

In carrying out this role, OPG will be carrying out activities that fall outside of its typical business activities and corporate mandate relating to power generation. As a result, OPG, its directors, officers, and employees may be faced with increased risk of liability. Examples of such risks related to financing, include without limitation:

- liability as a promoter under Canadian securities laws (or the equivalent, if any, under other applicable securities laws);
- secondary market liability under Canadian and/or other applicable securities laws;
- liability the signatories to the prospectuses will have (i.e., the individuals signing the prospectus); and
- liability of OPG as the Financial Services Manager under any of the transaction agreements (e.g., the Financial Services Management Agreement, the Administration Agreement, the MSSA, the Master Trust Indenture and any Supplemental Indentures).

OPG and its Subsidiaries, and their respective directors, officers, employees may also be faced with risk of liability to:

- underwriters/agents selling debt securities of the financing entities
- the purchasers of debt securities of the financing entities (both initial purchasers and subsequent purchasers of the debt securities in the secondary markets)
- counterparties to agreements (e.g. the trustee of a financing entity that is a trust or IESO)
- other stakeholders (the Province, as shareholder of OPG, pensioners, and employees) of OPG if OPG (or any Subsidiary of it) is liable for any claim or obligation and cannot meet its obligations to these stakeholders as a result of such claims.
- Regulators (e.g. the Ontario Securities Commission)

- Parties who may challenge the *Act* or any component of it and include OPG as a party to such challenge.

As a result, pre-existing indemnities and protections do not adequately protect OPG, its Subsidiaries and each of their respective directors, officers and employees as explained further below.

Providing the requested Indemnity would help facilitate OPG and OPG's Subsidiaries in undertaking their role with respect to the implementation of the ONFHP.

IESO – *Role in Implementation of ONFHP and Associated Risks*

The *Act* also imposes certain obligations and requirements on the IESO to carry out various activities in relation to the implementation of the ONFHP such as the deferral of costs related to the GA, the creation of a regulatory asset in relation to the GA financing component of the ONFHP, the conveyance of that asset to OPG's financing entities and providing a servicing role in recovering OPG's funding costs from future ratepayers. The IESO may also be required to play a role in potential securities offerings of OPG's financing entities. If so, this may come with heightened exposure to liability for the IESO, particularly for offerings into the U.S. market. The IESO has expressed concern that all of this drives an increased risk of liability to the IESO, its directors, officers and employees, which is over and above typical operations risks and arises solely due to the ONFHP.

Other examples of sources/activities giving rise to increased risk of liability for the IESO, its directors, officers and employees include the following:

- Investors in any ONFHP investments or underwriters and banks regarding the offering of the investment asset to investors, as well as any securities prospectus or underwriting arrangements, with the IESO named and/or IESO being involved;
- OPG (or the financing entity) in relation to the commercial arrangements regarding transfer of the regulatory asset and servicing of the investment asset, and related activities;
- Market participants, program participants for issues in liquidity (e.g. short pay);
- Taxation authorities where prior approval of IESO's treatment is not approved by taxation authorities;
- Securities commissions regulators (U.S./Canada); and
- Parties who may challenge the *Act* or any component of it and include the IESO as a party to such challenge.

As a result, pre-existing indemnities and protections do not adequately protect IESO and each of their respective directors, officers and employees as explained further below.

Providing the requested Indemnity would help facilitate the IESO's undertaking of the activities requested by the Province in order to facilitate the implementation of the ONFHP.

APPENDIX B

Why Indemnities are being sought and limitations to protection under statutory protections and/or Insurance

Indemnities are required to facilitate IESO and OPG in carrying out their respective roles in implementing the ONFHP

The provision of the Indemnities is required in order to facilitate the implementation of the ONFHP. Both OPG and the IESO are required to carry out activities that may fall outside the scope of their typical business activities and corporate mandate. As a result, these activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG, OPG's Subsidiaries, IESO, and their respective directors, officers and employees to increased liability.

Even if the corporate mandates of OPG and the IESO were updated to include their role in implementing the ONFHP, this may not eliminate the risk of the types of liabilities outlined above completely, particularly due to the novelty of the ONFHP and the types of roles that OPG and IESO will be taking on. For example, persons could still challenge the *Act* or any component of it and include OPG or the IESO as a party to such challenge.

While statutory protection from liability is provided to IESO's directors, officers and employees, and to OPG's employees these protections are limited to "good faith acts". Therefore, the statutory protections do not preclude persons from bringing a claim against the Protected Persons (as defined in the Indemnities) in relation to these activities on the grounds of "bad faith". Generally speaking the Indemnities are intended to provide the Protected Persons with indemnification for losses/liabilities, including those for potentially "bad faith acts", unless any such acts arise as a result of the Protected Persons' dishonesty, gross negligence, or wilful misconduct. As described below in subsection (ii), the statutory protections also do not indemnify for costs relating to defending a claim. The statutory protections also do not extend to the corporations themselves.

Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the ONFHP. Providing the requested Indemnities will provide OPG, OPG's Subsidiaries, the IESO and each of their respective directors, officers and employees with assurance against liability in order to allow them to comprehensively carry out their respective roles in the successful implementation of the ONFHP.

Statutory Immunity does not preclude a person from bringing an action or other civil proceeding

Subsection 19(1) of the *Electricity Act, 1998* provides IESO directors, officers and employees with the following protection from liability:

"No action or other civil proceeding shall be commenced against a director, officer, employee or agent of the IESO or a member of a committee or panel established by the board of directors of the IESO for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under any Act, the regulations under any Act, the IESO's licence, the IESO's by-laws or the market rules, or for any neglect or default in the exercise or performance in good faith of such a power or duty."

The *Electricity Act, 1998* does not contain a similar statutory immunity for OPG's directors, officers, employees or agents. However, under subsection 39(1) of the *Act*, a statutory immunity is provided to the OPG's employees. This provision states:

"No action or other civil proceeding shall be commenced against any employee of the Province or Ontario Power Generation Inc. for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under the Act, the regulations or for any alleged neglect or default in the exercise or performance in good faith of such a power or duty."

Subsection 39(2) of the Act provides that nothing in subsection 39(1) limits the effect of subsection 19(1) of the *Electricity Act, 1998.*

The statutory immunities provided under the *Electricity Act, 1998* and the *Act* prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith").

The immunity from suit provisions outlined above, are qualified by the words "for any act done in good faith in the exercise or performance or intended exercise or performance of a power or duty under this Act…" This is a question of fact that needs to be considered by a court of competent jurisdiction. As such, statutory immunity would not necessarily be a bar to litigation and does not ensure that the IESO's and OPG's employees, officer or directors (as applicable) would not become embroiled in litigation.

In the case of OPG, there is no similar statutory immunity explicitly provided for its directors, or officers so the risk of litigation is greater for these individuals.

For the reasons mentioned above, the Indemnities requested under this application would ensure that if a claim is brought against the Protected Persons as a result of carrying out their roles in implementing the ONFHP, they are fully protected for any costs, losses etc. subject to the limitations provided for in the Indemnities.

Insurance and indemnities that the IESO and OPG currently provide to its directors, officers and employees may not fully cover risk

OPG –Insurance and Indemnities

Currently, OPG has indicated that it maintains Directors and Officers liability insurance ("D&O Insurance") with limits of USD $110 Million. The D&O Insurance includes persona coverage (side A) and corporate reimbursement coverage (side B). Under the side A coverage, OPG has advised that the policy pays losses where the organization is either not permitted by law or unable due to insolvency to indemnify the insured person under the policy (includes directors, officers and designated executives). This includes losses arising from a claim made during the policy period for a wrongful act (e.g. breach of duty, neglect, error, misstatement or omission) of such insured person. The full $110 Million limit is available for side A coverage.

Under side B coverage, OPG has advised that the policy reimburses the organization for losses incurred to indemnify an insured person under a D&O claim. The coverage is up to a maximum of USD $75 million, less the corporate deductible of $500,000.

OPG has advised that directors and officers have priority of payments over the organization for the entire $110M limit.

While this insurance provides coverage for directors and officers of OPG, there is no similar coverage provided for OPG's employees. Further, any liability stated over the maximum amounts would not be covered by the insurance policy. Pursuant to section 2(a) of the IESO Indemnity and section 3(a) of the OPG Indemnity, a Protected Person shall not be entitled to indemnification to the extent that coverage is provided under an insurance policy and such Protected Person is actually paid under such insurance policy.

OPG has indicated that they provide their directors an indemnity but not to their directors or employees. OPG has not provided information about the scope of this indemnity. However, the Indemnities provide that a Protected Person shall not be entitled to indemnification to the extent that other indemnities are already provided to a Protected Person to the extent that the Protected Person is actually so indemnified. This language is meant to ensure that the covered losses under the Indemnities will be covered by other applicable indemnities first, before being covered by this indemnity.

OPG has not provided any information about insurance coverage and indemnities that its subsidiaries provide to their directors, officers and employees.

IESO – Insurance and Indemnities

The IESO has informed that it carries Directors & Officers insurance providing a maximum $15 million limit and $200,000 retention per claim. Employees are also included in the definition of Individual Insureds. The IESO also carries Professional liability insurance providing a maximum $75 million limit.

Aside from indemnification arising by operation of common law for employees acting within the scope of their employment, the IESO has informed that it has provided formal indemnity as follows:

- IESO has provided an indemnity to its board members.
- There is an indemnity provided to members of the Society of Energy Professionals pursuant to their collective agreement, whose members form a subset of all employees at the IESO.

Existing Indemnities to OPG and IESO from the Province

Existing indemnities previously provided by the Province to OPG have been limited to specific directives provided to OPG by the Province (e.g., in connection with the Bruce Lease). Accordingly, the scope of the existing indemnities provided by the Province would not cover the ONFHP. We are not aware of any indemnities provided to the IESO by the Province.

The Honourable Glenn Thibeault
Minister of Energy
900 Bay Street, 4th Floor
Toronto ON M7A 2E1

Dear Minister Thibeault,

Thank you for your letter requesting approval under section 28 of the Financial Administration Act of the Indemnity Agreements in favour of the IESO, its directors, officers, and employees, and in favour of OPG, OPG's subsidiaries (other than any financing entities as defined in the *Ontario Fair Hydro Plan Act, 2017*) and their respective directors, officers, and employees.

In response to your request, I am attaching the approval, under section 28 of the Financial Administration Act, of the Indemnity Agreements for OPG and the IESO in order to allow them to comprehensively participate in the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

Thank you again for writing.

Sincerely,

Charles Sousa
Minister

OFHP_GA - OPG IESO Indemnities - FAA s28 - BN_v10.docx

Hi Ron

James had suggested a s22 in which case any indemnity payments would be made under s12 of FAA (allows for indemnity payment from CRF). But I don't think a current appropriation was required in the s22 / s12 option. The potential appropriation discussion in that not was a bit confusing as it seemed to tie the amount to deferral amounts. I'm not sure that they are necessarily directly related. (But this is one of the points of clarification we have requested form OPG/IESO through Energy legal)

MoF Legal was fairly clear in their opinion that this had to be under s.28 - assuming agreement that this should be a Minister of Energy rather than Minister of Finance request. And they are of the opinion that approval for appropriation is requested if an indemnity is called upon. (attached fyi is some explanation that Legal provided to us).

As noted earlier, I revised the draft note (attached) to make explicit this assumption and I will request specific review of this by TBS (I'll resend to Legal as well). We are also sharing with OPCD re: accounting concerns, FTD/CMD mainly to keep them in the loop on the indemnity discussions given the other discussions e.g. provincial guarantee, PiLs exemption.

Thanks Bruno.

James' draft note from May had cited an FAA requirement. Is that not actually a requirement in this instance?

Subject: RE: OPG/IESO indemnity

Hi Ron

Yes, that is the response from TBS although as you note there is some ambiguity. TBS raises the question of how Energy would cover an indemnity and raises the question of mitigation strategies. I don't know what that would look like if potential amounts are undetermined.

The current draft note does have a comment that this issue needs some clarification. But it may be more effective to explicitly add our current understanding that 1) an appropriation is not required at this time 2) if a payment is required at some point in the future Energy would need to present a plan to cover the expense or, request an expense increase through TBC. We were planning to circulate a draft note with TBS, OPCD and others this morning. I will specifically request confirmation from TBS on this point.

I will also ask for clarification on the need for a mitigation strategy. If this is required, it sounds to me like TBS does need to get involved with the ministry on this.

Bruno

Subject: RE: OPG/IESO indemnity

Hi John, Bruno,

Has the response been incorporated into the BN?

And, while it is not clearly stated, is the response from TBS that it's a question how Energy would cover the indemnity if called on, but not a TB requirement that an allocation or line be approved in order for an indemnity to be provided, since other ministries have the same situation, with unquantifiable exposures and no allocation requirements?

Thanks,
Ron

Subject: RE: OPG/IESO indemnity

Hi Bruno – The situation is the same in other ministries. As the potential amount is not quantifiable, they do not have (or know the amount) of allocation requirements. The questions I raised were just thoughts, sorry to confuse things.

Thanks,
Chris

Hi Chris

Thanks, that's helpful. But in regard to the question you raise, I'm not sure how the ministry can have a voted allocation to cover the potential expense or demonstrate any specific mitigation strategy when they say the potential amount in unquantifiable. Do you know if TBS has dealt with these situations previously to see how this is handled?

Thanks
Bruno

Subject: RE: OPG/IESO indemnity

Hi Bruno – It is not a requirement for ENERGY to have a separate/specific line related to the indemnity payment, although ENERGY could choose to create a line (the token placeholder you've referenced) which would require a TB/MBC minute if that is the approach they would like to take.

The broader issue is that ENERGY does not have the voted allocation to cover the indemnity should it occur. So the question to the ministry is how will it be covered and what are the mitigation strategies?

In addition, the ministry did receive voted appropriation for the Fair Hydro Plan but this allocation is under executive control (e.g. cannot be used for other purposes than originally specified) and if ENERGY were to try to use attempt to use some of this $ in the event that an indemnity payment occurred they would also require a TB minute.

Let me know if this has helped or if you'd like to discuss.

Subject: FW: OPG/IESO indemnity

Hi Chris,

We are working with Energy to process the IESO/OPG indemnity agreements. We were advised by MoF Legal that this should be under S.28 of the FAA. Based on this we will work that through with Energy. The one question that we do have is whether Energy will need a line item for a potential future indemnity payment. E.g., one of those lines with a token $1,000 placeholder. If they do not already have an appropriate line, I presume this would need TBC approval. I'm trying to figure out the answer to this. If you have any insight that would be welcome. In the meantime, fyi, I've attached some questions we have sent to Energy with respect to the draft indemnity agreements.

Thanks

Hi John,

I believe that the board meets on the 14th. I will double check, but I think the significance is to have the approval so the board can formally approve/confirm the agreement for execution on that date. We would want to execute the IESO and OPG indemnities at the same time.

Since we still need to get the final okay from OPG/IESO on the indemnities with the edits I sent to you, I am wondering whether in the interests of time you can confirm if you have any significant and substantive concerns with the revised indemnity provisions (specifically the clause 2(c) and 8 – as I do not think there were outstanding concerns with the other provisions). Wondering if we can send over the indemnity agreements to IESO and OPG for their final okay while you complete your review).

Please let me know.

Thanks,

Harkamal

Subject: OPG/IESO indemnity

Hi Toby, Ronald and John,

I understand that, Ronald and John, you were looking for the indemnity agreements and s.28 business case and exhibit A. I've attached those here for your review.

Please note that the indemnity agreements are pending OPG and IESO final confirmation. I was hoping to send the edits in the attached back to them once MOF had confirmed they have no further issues with provisions 2(c) and 8 in the attached agreements. These edits are based on ongoing discussions with OPG. The IESO indemnity has been revised to reflect the language of the OPG indemnity. Could you please let me know at your earliest whether there are any outstanding issues with the indemnities on your end so that I can send these back to OPG and IESO for their final review and confirmation? We will need their approval of the form of the agreements before we submit for s.28 approval.

If you have any questions, please let me know.

Thanks,

Harkamal

IESO/OPG Indemnities

Questions

1. Re: June 02 email form Harkamal Multani. OPG proposed revisions to waiver and Section 2(c). The latter refers to the proposed Indemnity Agreement. In what document is the "waiver"?
   RESPONSE: Waiver is in section 6 of the proposed Indemnity Agreement.
2. What is the difference between s. 22 and s. 28 of the FAA?
   RESPONSE: There is not a choice to be made between using s. 22 and s. 28 of the FAA. They are different sections used for different purposes.
   FAA s. 28 requires that all ministries and public entities request the prior written approval of the Minister of Finance or the President of the Treasury Board for any transaction or commitment that would directly or indirectly increase the indebtedness or contingent liabilities of Ontario. Approval must be requested before the transaction is entered into and before any request is made to seek an approval from the LGIC (OIC) to authorize the transaction if an OIC is required to authorize the transaction. In some cases, ministries and public entities are required to obtain an OIC to authorize the borrowing of money or giving of guarantees. So an approval under s. 28 is required whether or not the indemnity is authorized by a statutory section or not. The purpose of s. 28 is to ensure that indemnities given by other ministries and public entities are approved centrally in order to monitor the fiscal plan, etc.
   Under s. 22 of the FAA, the LGIC may authorize the Minister of Finance to guarantee or indemnify the debts, obligations, securities or undertakings of any person. The OIC may fix the terms or authorize the Minister of Finance to fix the terms subject to any maximum liability specified in the OIC.
   Section 12 of the FAA is also a relevant section because it says any amount required to be paid by the Crown by the terms of a guarantee or indemnity given pursuant to a statute may be paid by the Minister of Finance from the CRF. This section creates a statutory appropriation for payments from the CRF for guarantees that are authorized in statutes. This includes guarantees authorized by OIC under s. 22 of the FAA but there are also other statutory guarantee sections.
   Do not think that currently there are any indemnities of directors/officers of Crown agencies that have been authorized by an OIC under s. 22 of the FAA. The risk of the requested indemnity is considered indeterminable in the business case. If the indemnity is called upon, shouldn't it be paid out of voted appropriation of the Ministry of Energy, rather than create a statutory charge for a vague and undeterminable liability? Section 22 OIC's normally cap the maximum liability of the Province and this could not be done. If done under s. 22 of the FAA, it would be the Minister of Finance, not the Minister of Energy that is providing the indemnity . The only implication of this is that the Minister of Finance implicitly also approves under s. 28 at the same time he is giving the guarantee.

Are there implications for what approvals are needed?

- Implications for which ministry (TBS/MoF) leads the indemnity request?
- Does s.22 vs s.28 depends on which Minister is providing indemnity and to whom?

3. What documentation is required for approval of indemnities?
   RESPONSE: The normal s. 28 approval process would be followed. Ultimately the Minister of Finance would be asked to sign a section 28 approval for the indemnity so the indemnity agreement would be attached to the approval form.

4. Are there specific examples of things OPG/IESO or its directors may become liable for?
   - i.e., acting in bad faith examples.
   - Does indemnity cover anything else other than acting in bad faith?
     i. Request Approval note points out that Electricity Act already protects IESO and certain persons against civil proceedings if they act in good faith. Bill 132 has similar language for OPG s. 39(1), albeit but just for the corp.
   - Suggestion that exposure is tied to SPV debt offering, but does this mean it is limited by the amount of debt offering? Or might liability, loss etc. not necessarily linked directly to debt offering amounts?

   RESPONSE: These are questions for the Ministry of Energy. We also had a few questions in the note we sent. The scope of the indemnity requested is very broad to cover all activities done in implementation of Fair Hydro Plan.

5. Should there be a future payment of an indemnity it would be made under s. 12 of FAA. (TBS note)
   - What does s.12 relate to S. 11.3 regarding "no agreement entered into without appropriation"?
   - How can there be an appropriation if, as not states, indemnities are undeterminable at this time and cannot be quantified?

   RESPONSE: If indemnity is called upon, payments should be made by Ministry of Energy out of voted appropriation. Normally these sorts of indemnity are not authorized under s. 22 of the FAA to create a statutory charge. If there were a statutory appropriation already (such as for a s. 22 OIC), then the requirement in s. 11.3 would already have been satisfied because appropriations can be voted or statutory. Ministry of Energy may need to obtain supplementary estimates at a future time if called upon to pay under the indemnity. Section 11.3 refers to "no agreement shall be entered into in a fiscal year that would result in a charge to an appropriation for that fiscal year in excess of the amount available under that appropriation." Therefore, is it expected that the Ministry of Energy will be paying under this indemnity in this fiscal year? Also, please note 11.3(2) that it is a condition of every contract that payment of moneys is subject to

an appropriation to which that payment can be charged being available in the fiscal year in which the payment becomes due.

6. And related to inability to quantify – how is fiscal risk handled?

7. Does OPG and directors indemnity include SPV?
    - Or does SPV require indemnity?

RESPONSE: Agree that this is a question.

MINISTER OF ENERGY REQUEST FOR SECTION 28 APPROVAL FOR INDEMNITY AGREEMENTS IN FAVOUR OF OPG AND IESO FOR THEIR PARTICIPATION UNDER THE ONTARIO FAIR HYDRO PLAN ACT

ISSUE

The Minister of Energy is requesting approval from the Minister of Finance, pursuant to Section 28 of the *Financial Administration Act (*"FAA"*)* to enter into Indemnity Agreements ("Agreements"), on behalf of the Crown, in favour of Ontario Power Generation ("OPG"),and its subsidiaries and the Independent Electricity System Operator ("IESO") with respect to their respective roles in carrying out the implementation of the Ontario Fair Hydro Plan ("OFHP") under the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act"). The indemnities would extend to the directors, officers and employees of these entities as well as the agents of the IESO.

Section 28 of the FAA requires that all ministries and public entities request the prior written approval of the Minister of Finance or the President of the Treasury Board for any transaction or commitment that would directly or indirectly increase the indebtedness or contingent liabilities of Ontario.

Formatted: Highlight

- The Minister of Energy would sign an Indemnity Agreement in favour of OPG and in favour of IESO.
- The Ministry of Energy indicates both OPG and the IESO expect to carry out activities that fall outside the scope of their pre-OFHP typical business activities and corporate mandate. This creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG and/or the IESO to increased liability (pre-existing statutory protections from liability only extend to "good faith acts").
- In addition, statutory protections do not indemnify for costs relating to defending a claim.

Commented [A1]: Would Energy think it fair to add this wording to its business case?

RECOMMENDATION

- IESO and OPG have stated that these indemnities are required for their participation in the implementation of the OFHP Act.
- In order for the OFHP Act to be successful, it is recommended by the Minister of Energy that the Minister of Finance approve this request.
- [The requirement for indemnities was referenced in the recent Cabinet Submission by Minister of Energy, dated _____.]

Commented [A2]: This is placeholder language. TBD/TBC

WHAT IS THE MINISTER BEING ASKED TO SIGN?

- The Minister is being asked to sign the section 28 approval forms and the transmittal letter to Minister Thibeault.

FISCAL IMPACT

- The fiscal impact of a future indemnity claim is unknown. Ministry of Energy ("MENE") states that the likelihood of this indemnity being called upon is low and that the fiscal exposure is unquantifiable at this time.
- An appropriation for the contingent liability is not required by the Ministry of Energy at this time.
- An approval would be required for a voted appropriation for the Ministry of Energy to make payments if indemnity was called upon.
- MENE has confirmed in its [draft] request letter that it bears responsibility for funding, within its approved allocation, for payments associated with the indemnities provided under the Agreements.

Formatted: Highlight

Commented [A3]: Is this statement in the business case? P. 5 says "The risk to the Province of giving the indemnities is undeterminable at this time." Whereas the contingent liability table says it is low.
Can we have MENE to put this right up front. Need a bit of a narrative – what we [Energy] believe and why.

Formatted: Highlight

Commented [BA4]: We need to make clear what this means. Is it meaningful to claim to be responsible for funding if amount is unknown? And bullets above note ministry would need an approval for an appropriation. (This could include no approval and instruction to manage).

SUMMARY OF PROPOSED INDEMNITIES

This summary of the OPG/IESO Indemnity Agreement sets out who is being indemnified, for what, and also addresses the proposed waiver of claims, whereby the Province agrees not to bring certain claims against the indemnified parties.

Who the Indemnity Applies to

- The indemnity is being given in favour of "Protected Persons" which comprises OPG, each of OPG's subsidiaries [NTD: We have not received confirmation of whether the financing entity is a subsidiary of OPG] and each of their respective directors, officers and employees.

- Protected Persons are being indemnified against all losses, costs, damages and other expenses for any amount for which they incur damages in relation to any civil, criminal, administrative, investigative and/or other claim, including a broad range of types of damages. This also includes punitive and a broad range of types of damages that are not always included in an indemnity, such as consequential damages and economic losses. The indemnity also covers costs and expenses for defending themselves. These indemnities are for any act or omission and activity that relates to the Fair Hydro Plan.

What indemnities are being provided?

- The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnity to the extent that the losses are already covered by an insurance policy or another indemnity.
- The indemnity also does not apply where the loss relates to the gross negligence or willful misconduct of the Protected Person. It is also explicitly carved out of this exception that a failure to conduct reasonable due diligence investigation will not in itself constitute gross negligence or willful misconduct, which narrows the exception in the context of disclosure and activities relating to issuing securities in public markets such that failing to conduct due diligence will not necessarily invalidate the Indemnity.
- The indemnity also applies where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.

- The Indemnity Agreement sets out how the Protected Person should notify the Province of any claims, and how any proceedings should be dealt with amongst the parties, as well as how any expenses and amounts should be paid during the determination of the claim.

The Indemnity Agreement includes a waiver of claim provision, which is not a normal provision for an indemnity agreement.

- This additionally provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan. This does not apply to claims for willful misconduct, dishonesty or gross negligence.

The Indemnity Agreement includes a warranty section given by the Province. In this section the Province Warrants that it has the authority and capacity, and has taken all necessary steps to enter into the Indemnity Agreement.

- This is an unusual provision, but likely relates to the fact that the Province is not the employer of the indemnified party, or the officers and directors are not the officers and directors of the Province.

ANALYSIS

Commented [A5]: s.28 notes usually talk about mitigation, as does the contingent liability table. Anything we can add here?

Scope of liability from Indemnities

The IESO and OPG are asking the Province to agree to indemnify, defend and hold harmless the IESO (and its agents) and OPG (and its subsidiaries), as well as their respective directors, officers and employees, from all claims, liabilities, costs, losses, taxes, fines, penalties judgments (including indirect and consequential damages/loss of profits, economic loss/loss of opportunity) that might, directly or indirectly, be incurred by any of the indemnified entities and individuals in relation to any civil, criminal administrative investigative or other claims or proceedings arising directly or indirectly as a result of the entities or individual's activities, acts and/or omissions in the implementation of or otherwise relating to the OFHP (including where an individual is acting at the request of OPG or IESO in a different capacity than as a director, officer or employee of OPG or a subsidiary).

- The indemnity would also include coverage for the financing entity (SPV), created by OPG, (as a subsidiary of OPG) to facilitate the purchase of the deferred assets ("regulatory assets") under the Global Adjustment ("GA").

Commented [A6]: Has the scope of this indemnity been compared to the proposed Provincial guarantee related to the financing? Is there overlap or duplication?

Commented [A7R6]: Comments from MOF Legal:

Even if Board has indemnities from OPG, wouldn't be able to cover as is not in the best interest of corporation.

MOF Legal: up to Energy to tell us. OPG must have given Board members the normal indemnities.

Bruce Lease one covers the not in the best interest of corporation.

OBCA indemnity: immunity from suit. May indemnity corp. directors and officers. Limited to indemnity in good faith. Other specific provisions exist in EA and FHA.

IESO covers quite a bit. Including Board, directors, employees.

MENE states that the OFHP Act activities of both OPG and the IESO would otherwise fall outside the scope of their typical business activities and corporate mandates. According to MENE, this creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation, thereby exposing OPG and/or the IESO to increased liability.

Commented [A8]: Fair to insert?

Commented [A9]: Would Energy change this to "historical" in its business case?

Commented [A10R9]: MOF Legal: OPG Board appears to be concerned some would say not in good faith despite objects being changed.

Examples of specific risks to OPG include, without limitation,

- liability as a promoter under Canadian securities laws (or the equivalent, if any, under other applicable securities laws),
- secondary market liability under Canadian and/or other applicable securities laws,
- liability that the signatories to the prospectuses will have (i.e., the individuals signing the prospectus), and
- liability of OPG as the Financial Services Manager under any of the transaction agreements (e.g., the Financial Services Management Agreement, the Administration Agreement, the MSSA, the Master Trust Indenture and any Supplemental Indentures).

Examples of specific risks to the IESO include, without limitation, liability for its role in potential securities offerings of OPG's financing entity, which may come with heightened exposure to liability for the IESO, particularly for offerings into the U.S. market. It is not clear whether the statutory protections would apply federally or in the U.S. context. If they would not extend to a U.S. claim, for example, it would support the need for a separate indemnity for the IESO.

If the indemnities are not provided, ENE indicates that this could affect OPG and IESO's willingness to undertake such activities, jeopardizing the successful implementation of the OFHP Act. Both the IESO and OPG have specifically asked for these Indemnities in order to allow them to carry out their roles in implementing the OFHP Act.

Commented [A11]: Can we know this in advance, or is this only to be known if tested in the courts?

Commented [A12R11]: IESO is indirectly involved. Not clear EA 19(1) for IESO. Unclear whether it'd protect from US suit. OFA Board also raised. MOF Legal: this is a valid point.

Commented [A13]: The business case is somewhat inconsistent on specifically citing directors, or being broader. Which is it?

Key Comments:

In providing the approval under Section 28 of the FAA, it is important to flag the following key items that arise from the Indemnity Agreements that the Minister of Energy is proposing to sign [subject to finalising drafting – TBC].

1. Acting in "Good Faith"

Without duplication of the coverage for liabilities that could arise for OPG and IESO, both are requesting to be indemnified for their activities that may be found to have not been conducted in "good faith" and/or in the best interests for their respective corporations.

Since IESO and OPG are expected to carry out activities under the OFHP that fall outside the scope of their typical business activities and corporate mandate to date, management in IESO and OPG are of the view that this creates the risk that such activities could be perceived as not being carried out in "good faith" or in the best interest of the corporation thereby exposing OPG and/or the IESO and their directors, officers and employees to increased liability.

- The concern seems to be that carrying out activities to implement the OFHP Act, even if in some cases required by the Act would not be considered to be in the best interest of the respective corporation.

  - Is there a difference between acting in good faith in the best interests of the corporation versus acting in good faith in the exercise or performance of powers or duties under the Act?
- Statutory protections from liability only extend to "good faith acts as set out below for IESO directors, officers, employees and agents and for OPG employees".
  - Since OPG is falls under Ontario's *Business Corporations Act* (OBCA), directors and officers of OPG are subject to the standard set out in that Act which includes a limitation on indemnities from corporations, whereby indemnities can only be given to the extent that the directors and officers carried out their activities in good faith and in the best interest of the corporation. The proposed Provincial indemnity, however, would not be restricted to that standard.
  - The standard applicable to directors of IESO is set out in s. 12 of the *Electricity Act, 1988*, i.e., to act honestly and in good faith in the best interests of the IESO and exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances.
  - So the standard is similar for both OPG and IESO directors.

Commented [A14]: There is no statutory protection for directors and officers of OPG. Most likely OPG has provided them with a typical indemnity consistent with OBCA provisions

Both the *Electricity Act, 1998* and the *Ontario Fair Hydro Plan Act, 2017*, provide coverages for such liabilities as long as those activities are done in "good faith".

- Subsection 19(1) of the Electricity Act, 1998 already provides IESO directors, officers and employees with the following protection from liability:

  "No action or other civil proceeding shall be commenced against a director, officer, employee or agent of the IESO or a member of a committee or panel established by the board of directors of the IESO for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under any Act, the regulations under any Act, the IESO's licence, the IESO's by-laws or the market rules, or for any neglect or default in the exercise or performance in good faith of such a power or duty."

- Subsection 39(1) of the *Ontario Fair Hydro Plan Act, 2017* also provides similar protection from liability for OPG:

  "No action or other civil proceeding shall be commenced against any employee of the Province or Ontario Power Generation Inc. for any act done in good faith in the exercise or performance or the intended exercise or performance of a power or duty under this Act, the regulations or for any alleged neglect or default in the exercise or performance in good faith of such a power or duty."

Commented [BA15]: Does this mean
- employee of the Province or employee of OPG, or
- employee of the Province or OPG (i.e., the corporation itself)?

2. Potential for Fiscal Exposure of the OFHP Act

In addition to the potential fiscal impact due to a call on the indemnity, there may be a risk associated with the anticipated accounting treatment of the GA Financing portion of the OFHP. With the Province providing guarantee agreements, financial support through credit facilities and

the proposed agreements to indemnify the IESO and OPG, the case for the anticipated accounting treatment of the GA structure could be weakened.

Commented [A16]: Whether to include or not, or how to position it, we should see what OPG and E&Y say on the impact on the accounting opinion.

Commented [A17]: Need to get an update from OPCD on whether the proposed indemnities would have a significant impact on this analysis.

BACKGROUND

- On March 2, 2017, the government announced Ontario's Fair Hydro Plan (the "OFHP"), under which the government will take steps to lower electricity bills [on an after-tax basis] by 25 per cent on average for a typical residential customer, starting July 1, 2017, relative to what the bills would otherwise have been without the OFHP.
- Changes to refinance a portion of the Global Adjustment ("GA") are a component of the 25 per cent rate relief under the OFHP. This includes roles for both IESO and OPG:
  - IESO – legislation imposes certain obligations and requirements on IESO to carry out various activities to implement the OFHP such as the creation of a regulatory asset in relation to deferred costs and the GA financing component of the OFHP, the conveyance of that asset to a financing entity (expected to be established by OPG) and providing a servicing role in recovering the financing entity's funding costs from future ratepayers. IESO may also be required to play a role in potential securities offerings of OPG's financing entity. This may come with heightened exposure to liability for the IESO.
  - OPG – OPG is expected to finance the purchase of the regulatory asset, related to deferred costs, through a financing entity that OPG creates. OPG considers risks associated with these OFHP-related activities to be beyond OPG's usual business/operations. This is particularly true with respect to any securities offerings of OPG's financing entity. Products are expected to be offered into the Canadian and U.S. Markets. As a result, pre-existing indemnities and protections do not adequately protect OPG, its directors, officers and employees.
- The 25 per cent rate relief also includes the rebate amount equivalent to the 8 per cent Provincial portion of the HST that has been in effect since January 1, 2017 under the Ontario Rebate for Electricity Consumers Act, 2016, and the expected savings from the shifting of the Ontario Electricity Support Program ("OESP") and the Rural or Remote Rate Protection program ("RRRP") costs from ratepayers to being funded by the Province.
- The government introduced legislation, passed on May 31, 2017 and received Royal Ascent on June 1, 2017, to enable the implementation of the OFHP Act.

Thanks Bruno.

James' draft note from May had cited an FAA requirement. Is that not actually a requirement in this instance?

Cc: John Kim <John.Kim@ofina.on.ca>
Subject: RE: OPG/IESO indemnity

Hi Ron

Yes, that is the response from TBS although as you note there is some ambiguity. TBS raises the question of how Energy would cover an indemnity and raises the question of mitigation strategies. I don't know what that would look like if potential amounts are undetermined.

The current draft note does have a comment that this issue needs some clarification. But it may be more effective to explicitly add our current understanding that 1) an appropriation is not required at this time 2) if a payment is required at some point in the future Energy would need to present a plan to cover the expense or, request an expense increase through TBC. We were planning to circulate a draft note with TBS, OPCD and others this morning. I will specifically request confirmation from TBS on this point.

I will also ask for clarification on the need for a mitigation strategy. If this is required, it sounds to me like TBS does need to get involved with the ministry on this.

Subject: RE: OPG/IESO indemnity

Hi John, Bruno,

Has the response been incorporated into the BN?

And, while it is not clearly stated, is the response from TBS that it's a question how Energy would cover the indemnity if called on, but not a TB requirement that an allocation or line be approved in order for an indemnity to be provided, since other ministries have the same situation, with unquantifiable exposures and no allocation requirements?

Thanks,
Ron

Subject: RE: OPG/IESO indemnity

Hi Bruno – The situation is the same in other ministries. As the potential amount is not quantifiable, they do not have (or know the amount) of allocation requirements. The questions I raised were just thoughts, sorry to confuse things.

Thanks,
Chris

Subject: RE: OPG/IESO indemnity

Hi Chris

Thanks, that's helpful. But in regard to the question you raise, I'm not sure how the ministry can have a voted allocation to cover the potential expense or demonstrate any specific mitigation strategy when they say the potential amount in unquantifiable. Do you know if TBS has dealt with these situations previously to see how this is handled?

Thanks
Bruno

Subject: RE: OPG/IESO indemnity

Hi Bruno – It is not a requirement for ENERGY to have a separate/specific line related to the indemnity payment, although ENERGY could choose to create a line (the token placeholder you've referenced) which would require a TB/MBC minute if that is the approach they would like to take.

The broader issue is that ENERGY does not have the voted allocation to cover the indemnity should it occur. So the question to the ministry is how will it be covered and what are the mitigation strategies?

In addition, the ministry did receive voted appropriation for the Fair Hydro Plan but this allocation is under executive control (e.g. cannot be used for other purposes than originally specified) and if ENERGY were to try to use attempt to use some of this $ in the event that an indemnity payment occurred they would also require a TB minute.

Let me know if this has helped or if you'd like to discuss.

Subject: FW: OPG/IESO indemnity

Hi Chris,

We are working with Energy to process the IESO/OPG indemnity agreements. We were advised by MoF Legal that this should be under S.28 of the FAA. Based on this we will work that through with

Energy. The one question that we do have is whether Energy will need a line item for a potential future indemnity payment. E.g., one of those lines with a token $1,000 placeholder. If they do not already have an appropriate line, I presume this would need TBC approval. I'm trying to figure out the answer to this. If you have any insight that would be welcome. In the meantime, fyi, I've attached some questions we have sent to Energy with respect to the draft indemnity agreements.

Thanks

Subject: RE: OPG/IESO indemnity

Hi John,

I believe that the board meets on the 14th. I will double check, but I think the significance is to have the approval so the board can formally approve/confirm the agreement for execution on that date. We would want to execute the IESO and OPG indemnities at the same time.

Since we still need to get the final okay from OPG/IESO on the indemnities with the edits I sent to you, I am wondering whether in the interests of time you can confirm if you have any significant and substantive concerns with the revised indemnity provisions (specifically the clause 2(c) and 8 – as I do not think there were outstanding concerns with the other provisions). Wondering if we can send over the indemnity agreements to IESO and OPG for their final okay while you complete your review).

Please let me know.

Thanks,

Harkamal

Subject: OPG/IESO indemnity

Hi Toby, Ronald and John,

I understand that, Ronald and John, you were looking for the indemnity agreements and s.28 business case and exhibit A. I've attached those here for your review.

Please note that the indemnity agreements are pending OPG and IESO final confirmation. I was hoping to send the edits in the attached back to them once MOF had confirmed they have no further issues with provisions 2(c) and 8 in the attached agreements. These edits are based on ongoing discussions with OPG. The IESO indemnity has been revised to reflect the language of the OPG indemnity. Could you please let me know at your earliest whether there are any outstanding issues with the indemnities on your end so that I can send these back to OPG and IESO for their final review and confirmation? We will need their approval of the form of the agreements before we submit for s.28 approval.

If you have any questions, please let me know.

Thanks,

Harkamal

Subject: RE: OPG/IESO indemnity

Hi Ron

Yes, that is the response from TBS although as you note there is some ambiguity. TBS raises the question of how Energy would cover an indemnity and raises the question of mitigation strategies. I don't know what that would look like if potential amounts are undetermined.

The current draft note does have a comment that this issue needs some clarification. But it may be more effective to explicitly add our current understanding that 1) an appropriation is not required at this time 2) if a payment is required at some point in the future Energy would need to present a plan to cover the expense or, request an expense increase through TBC. We were planning to circulate a draft note with TBS, OPCD and others this morning. I will specifically request confirmation from TBS on this point.

I will also ask for clarification on the need for a mitigation strategy. If this is required, it sounds to me like TBS does need to get involved with the ministry on this.

Subject: RE: OPG/IESO indemnity

Hi Bruno – It is not a requirement for ENERGY to have a separate/specific line related to the indemnity payment, although ENERGY could choose to create a line (the token placeholder you've referenced) which would require a TB/MBC minute if that is the approach they would like to take.

The broader issue is that ENERGY does not have the voted allocation to cover the indemnity should it occur. So the question to the ministry is how will it be covered and what are the mitigation strategies?

In addition, the ministry did receive voted appropriation for the Fair Hydro Plan but this allocation is under executive control (e.g. cannot be used for other purposes than originally specified) and if ENERGY were to try to use attempt to use some of this $ in the event that an indemnity payment occurred they would also require a TB minute.

Let me know if this has helped or if you'd like to discuss.

Hi Chris,

We are working with Energy to process the IESO/OPG indemnity agreements. We were advised by MoF Legal that this should be under S.28 of the FAA. Based on this we will work that through with Energy. The one question that we do have is whether Energy will need a line item for a potential future indemnity payment. E.g., one of those lines with a token $1,000 placeholder. If they do not already have an appropriate line, I presume this would need TBC approval. I'm trying to figure out

the answer to this. If you have any insight that would be welcome. In the meantime, fyi, I've attached some questions we have sent to Energy with respect to the draft indemnity agreements.

Thanks

Hi John,

I believe that the board meets on the 14th. I will double check, but I think the significance is to have the approval so the board can formally approve/confirm the agreement for execution on that date. We would want to execute the IESO and OPG indemnities at the same time.

Since we still need to get the final okay from OPG/IESO on the indemnities with the edits I sent to you, I am wondering whether in the interests of time you can confirm if you have any significant and substantive concerns with the revised indemnity provisions (specifically the clause 2(c) and 8 – as I do not think there were outstanding concerns with the other provisions). Wondering if we can send over the indemnity agreements to IESO and OPG for their final okay while you complete your review).

Please let me know.

Thanks,

Harkamal

Hi Ron

Yes, that is the response from TBS although as you note there is some ambiguity. TBS raises the question of how Energy would cover an indemnity and raises the question of mitigation strategies. I don't know what that would look like if potential amounts are undetermined.

The current draft note does have a comment that this issue needs some clarification. But it may be more effective to explicitly add our current understanding that 1) an appropriation is not required at this time 2) if a payment is required at some point in the future Energy would need to present a plan to cover the expense or, request an expense increase through TBC. We were planning to circulate a draft note with TBS, OPCD and others this morning. I will specifically request confirmation from TBS on this point.

I will also ask for clarification on the need for a mitigation strategy. If this is required, it sounds to me like TBS does need to get involved with the ministry on this.

Subject: RE: OPG/IESO indemnity

Hi Chris

Thanks, that's helpful. But in regard to the question you raise, I'm not sure how the ministry can have a voted allocation to cover the potential expense or demonstrate any specific mitigation strategy when they say the potential amount in unquantifiable. Do you know if TBS has dealt with these situations previously to see how this is handled?

Thanks
Bruno

Subject: RE: OPG/IESO indemnity

Hi Bruno – It is not a requirement for ENERGY to have a separate/specific line related to the indemnity payment, although ENERGY could choose to create a line (the token placeholder you've referenced) which would require a TB/MBC minute if that is the approach they would like to take.

The broader issue is that ENERGY does not have the voted allocation to cover the indemnity should it occur. So the question to the ministry is how will it be covered and what are the mitigation strategies?

In addition, the ministry did receive voted appropriation for the Fair Hydro Plan but this allocation is under executive control (e.g. cannot be used for other purposes than originally specified) and if ENERGY were to try to use attempt to use some of this $ in the event that an indemnity payment occurred they would also require a TB minute.

Let me know if this has helped or if you'd like to discuss.

Chris

Hi Chris,

We are working with Energy to process the IESO/OPG indemnity agreements. We were advised by MoF Legal that this should be under S.28 of the FAA. Based on this we will work that through with Energy. The one question that we do have is whether Energy will need a line item for a potential future indemnity payment. E.g., one of those lines with a token $1,000 placeholder. If they do not already have an appropriate line, I presume this would need TBC approval. I'm trying to figure out the answer to this. If you have any insight that would be welcome. In the meantime, fyi, I've attached some questions we have sent to Energy with respect to the draft indemnity agreements.

Thanks

Hi John,

I believe that the board meets on the 14th. I will double check, but I think the significance is to have the approval so the board can formally approve/confirm the agreement for execution on that date. We would want to execute the IESO and OPG indemnities at the same time.

Since we still need to get the final okay from OPG/IESO on the indemnities with the edits I sent to you, I am wondering whether in the interests of time you can confirm if you have any significant and substantive concerns with the revised indemnity provisions (specifically the clause 2(c) and 8 – as I do not think there were outstanding concerns with the other provisions). Wondering if we can send over the indemnity agreements to IESO and OPG for their final okay while you complete your review).

Please let me know.

Thanks,

Harkamal

Subject: RE: OPG/IESO indemnity
Date: Tuesday, June 13, 2017 12:55:11 PM

Hi Ron

Energy had requested s28. And Yes, James had suggested a s22. It wasn't totally clear why but TBS they seemed concerned about Sections 11.3(1) of the FAA which states that no agreement or undertaking shall be entered into in a fiscal year that would result in a charge to an appropriation for that fiscal year in excess of the amount available under that appropriation. TBS noted that the potential amount was undetermined and therefore not clear that Energy would have expense room if indemnity called upon. So they suggested the alternate s22, s12. And then they decided they weren't dealing with the request.

We asked MoF Legal for their opinion. Wrt. to s11.3, MoF legal noted, that there is no indication that Energy is paying an indemnity this fiscal so no indication that it will be in excess of appropriation.

Subject: Re: OPG/IESO indemnity

Hi,

I thought his note had landed on the s.22 option after stating that a s.28 option would require an appropriation being in place. But I may be mis-remembering. And it was only a draft, and may not have been a formal And final analysis.

Ron

On Jun 13, 2017, at 12:26 PM, Bruno Amara <Bruno.Amara@ofina.on.ca> wrote:

> Hi Ron
>
> James had suggested a s22 in which case any indemnity payments would be made under s12 of FAA (allows for indemnity payment from CRF). But I don't think a current

appropriation was required in the s22 / s12 option. The potential appropriation discussion in that not was a bit confusing as it seemed to tie the amount to deferral amounts. I'm not sure that they are necessarily directly related. (But this is one of the points of clarification we have requested form OPG/IESO through Energy legal)

MoF Legal was fairly clear in their opinion that this had to be under s.28 - assuming agreement that this should be a Minister of Energy rather than Minister of Finance request. And they are of the opinion that approval for appropriation is requested if an indemnity is called upon. (attached fyi is some explanation that Legal provided to us).

As noted earlier, I revised the draft note (attached) to make explicit this assumption and I will request specific review of this by TBS (I'll resend to Legal as well). We are also sharing with OPCD re: accounting concerns, FTD/CMD mainly to keep them in the loop on the indemnity discussions given the other discussions e.g. provincial guarantee, PiLs exemption.

Subject: RE: OPG/IESO indemnity

Hi Ron

Yes, that is the response from TBS although as you note there is some ambiguity. TBS raises the question of how Energy would cover an indemnity and raises the question of

mitigation strategies. I don't know what that would look like if potential amounts are undetermined.

The current draft note does have a comment that this issue needs some clarification. But it may be more effective to explicitly add our current understanding that 1) an appropriation is not required at this time 2) if a payment is required at some point in the future Energy would need to present a plan to cover the expense or, request an expense increase through TBC. We were planning to circulate a draft note with TBS, OPCD and others this morning. I will specifically request confirmation from TBS on this point.

I will also ask for clarification on the need for a mitigation strategy. If this is required, it sounds to me like TBS does need to get involved with the ministry on this.

Subject: RE: OPG/IESO indemnity

Hi John,

I believe that the board meets on the 14th. I will double check, but I think the significance is to have the approval so the board can formally approve/confirm the agreement for execution on that date. We would want to execute the IESO and OPG indemnities at the same time.

Since we still need to get the final okay from OPG/IESO on the indemnities with the edits I sent to you, I am wondering whether in the interests of time you can confirm if you have any significant and substantive concerns with the revised indemnity provisions (specifically the clause 2(c) and 8 – as I do not think there were outstanding concerns with the other provisions). Wondering if we can send over the indemnity agreements to IESO and OPG for their final okay while you complete your review).

Please let me know.

Thanks,

Harkamal

Hi Harkamal,

Just to update you, we have reached out to your clients on the request to connect at policy level today. In terms of the questions and comments, we are still working to pull together a list. Hopefully soon and we hope to share it with you and clients together.

I have a question regarding your requested timeline of June 13. I know there was a mention of board meetings scheduled but what are the factors driving the timeline? Is the timeline the same for both OPG and IESO?

Thanks,

John

Subject: OPG/IESO indemnity

Hi Toby, Ronald and John,

I understand that, Ronald and John, you were looking for the indemnity agreements and s.28 business case and exhibit A. I've attached those here for your review.

Please note that the indemnity agreements are pending OPG and IESO final confirmation. I was hoping to send the edits in the attached back to them once MOF had confirmed they have no further issues with provisions 2(c) and 8 in the attached agreements. These edits are based on ongoing discussions with OPG. The IESO indemnity has been revised to reflect the language of the OPG indemnity. Could you please let me know at your earliest whether there are any outstanding issues with the indemnities on your end so that I can send these back to OPG and IESO for their final review and confirmation? We will need their approval of the form of the agreements before we submit for s.28 approval.

If you have any questions, please let me know.

Thanks,

Harkamal

Proposed Items for Review

1. Approval of Order in Council ("OIC") under section 22 of the *Capital Investment Plan Act, 1993 ("CIPA"),* authorizing the Minister of Finance to make a loan to the Ontario Financing Authority ("OFA").

Approvals required prior to LRC

	Committee and date	Cabinet Date
Policy		
TB/MBC	LRC, June 27, 2017	June 27, 2017

Deputy Minister _____ Date _____

Minister _____ Date _____

s. 1 Proposal and Context

- Approval is being sought for an OIC under section 22 of *Capital Investment Plan Act, 1993* ("CIPA"), which will authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority ("OFA") in an amount of up to $2.0 billion. Under the proposed OIC, loan(s) could be advanced during the period between the effective date of the OIC and [December 31, 2047.

- Subsection 22(1) of CIPA authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC"). Subsection 22(2) provides a statutory appropriation for loans made by the Minister to the OFA under subsection 22(1).

- Existing OICs authorize the Minister of Finance to provide loans to the OFA under which the OFA has provided loans and credit facilities to colleges, school boards and other public agencies such as Infrastructure Ontario, IESO, Ontario Lottery and Gaming Corporation and Liquor Control Board of Ontario.

- This proposed OIC is required to expand the overall Minister of Finance lending authority to the OFA to allow the OFA to provide loans ["including"?] under credit facilities requested by the Independent Electricity System Operator ("IESO"). This will help the IESO to fulfil the commitments under the proposed Fair Hydro Act, 2017, under anticipated and potential timing differences in the implementation of the proposed Fair Hydro Plan. The timing of this OIC is critical to ensure borrowing authority for the OFA is available to provide the IESO its requested financing arrangements upon the enactment of the proposed *Ontario Fair Hydro Plan Act, 2017.*

s. 2 Approach and Intended Outcomes

- Under CIPA, the OFA provides financing to public bodies as directed by the Minister of Finance. The OFA obtains the funds it needs for its lending program by borrowing from the Province. This OIC would authorize the Minister of Finance under section 22 of CIPA to provide additional loans to the OFA.

- As per subsection 3(1) of CIPA, the Minister of Finance is responsible for the administration of CIPA with respect to the OFA.

- This proposed OIC is required to assist in fulfilling the commitments under the proposed *Ontario Fair Hydro Plan Act, 2017.*

- It is expected that as part of the implementation of the proposed arrangements, the Minister of Finance will direct the OFA to provide a revolving credit facility for short term financing related to the on-going *Ontario Fair Hydro Plan Act, 2017*. In particular, the OFA would be directed to provide a credit facility to the Independent Electricity System Operator ("IESO"). The IESO is a public body for the purposes of CIPA.

- Under the proposed *Ontario Fair Hydro Plan Act, 2017,* the IESO would incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. Global Adjustment amounts initially collected will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.
- The proposed *Ontario Fair Hydro Plan Act, 2017* allows the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell that asset.
    - It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
    - The cash received would be used by the IESO to fund the current Global Adjustment shortfall.
- However, there is expected to be initial and potential ongoing timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Even once the SPV is set up to borrow, there may be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under the proposed legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.
- As a result, IESO requires short-term financing to be in place for initial and potential monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset.

- IESO has requested that the OFA provide a revolving credit facility of up to $2 billion to support its role in the implementation of the *Ontario Fair Hydro Plan Act, 2017*. The $2 billion request from IESO is based on current data and assumptions which could change.

- It is proposed that the OIC authorization be $2.0 billion [to ensure that there is sufficient borrowing authority in place for the OFA to meet the IESO requirements.

- For the OFA to accommodate this request, the OFA requires additional borrowing authority from the Minister of Finance to ensure that it has sufficient funds to lend, hence the current request for an OIC.

- If approved, the Minister of Finance will subsequently provide a Directive to the OFA to direct it to provide credit facilities to the IESO in an amount not to exceed $2.5 billion.
    - The OFA currently provides a credit facility to the IESO of $975 million.
    - The IESO has requested that the existing credit facility be reduced to $475 million, and a new credit facility be provided of $2 billion, for a total amount of $2.475 million.

s. 3 Direction and Urgency

- As announced on March 2, 2017, and highlighted as a commitment in Budget 2017, the Province intends to implement the *Ontario Fair Hydro Plan Act, 2017,* which would reduce electricity bills by 25 per cent on average for eligible households.
- The ability for the OFA to have the requisite borrowing and lending capacity is instrumental in supporting implementation of the proposed *Ontario Fair Hydro Plan Act, 2017*.
- Ministry of Energy proposed regulations under the proposed *Ontario Fair Hydro Plan Act, 2017* are expected to track for Cabinet approval by end of June 2017. It is expected that this OIC also be submitted for approval concurrently as it supports a crucial component of the successfully implementation of the Fair Hydro Plan.
- A related Cabinet Minute from the Ministry of Energy is tracking for June 27, 2017 date.

s. 4 Impact Assessment and Costs

- With this OIC, the Minister of Finance will be authorized to lend an additional amount of $x billion to the OFA. Subject to the terms and conditions of a

Directive from the Minister of Finance, loans from the Minister of Finance to the OFA are expected to be at the Province's cost of funds.
- Loans advanced will result in increased borrowing in the debt markets by the Province.
- Loans are expected to be repaid and, therefore, no fiscal impact is expected.

s. 5 Implementation

- If the OIC is approved and signed, the Minister of Finance will have authorization to provide a loan to the OFA. A Directive from the Minister will be required that will provide direction to the OFA on how it can use the proceeds of the loan.

s. 6 Delivery and Results Tracking

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed *Ontario Fair Hydro Plan Act, 2017* and is required to ensure the timely implementation and support for the success of the Fair Hydro Plan.

s.7 Stakeholder Consultations

- As described in section 2 above, the requirement for this OIC is a result of the Province's proposed Fair Hydro Plan. The related Cabinet note for the initiative should be referred to.

---

Hi Scott,

Looping in Steen for his comments as well, and noting that there were some copy edits vs the version you saw yesterday.

I'd note that the OIC itself does not mention the FHP, but simply provides the additional borrowing room for the OFA to accommodate IESO's request.

Ron

Cc: Gavin He <Gavin.He@ofina.on.ca>
Subject: RE: Part 2 OFHP Regs - Draft Sub and RAN

Hi Ron

In RAN note pg 3, the IESO credit facility is discussed. I added the detailed explanation (slightly expanded version of explanation in powerpoint). But not sure if this is needed.

I note that in the RAN note and TB submission the credit facility discussion is in terms of "IESO is in discussion with OFA to do this" But hasn't the Minister already signed the OIC? But Agreement is still to come.

And a comment on some wording in the TB. The language has been that facility is for short- to medium-term financing, which includes the purpose below. May just be confusing that it is referred to as longer-term financing in the note. It may be semantics as I think they mead longer than short-ter.

Pg 14

IESO may also require longer-term financing to maintain the deferral financing plan, should the OPG Trust not be able to access debt markets on a timely basis for purchase of some or all of the regulatory asset.

Subject: Part 2 OFHP Regs - Draft Sub and RAN

Hi,

Attached is Energy's Draft Submission received (please keep confidential as not approved by Energy). The second file is a draft assessment note for review and comment. After consolidating feedback from central agencies, I'm intending to share with Energy later on Monday. The item is at Treasury Board Tuesday in the early afternoon.

James

TREASURY BOARD / MANAGEMENT BOARD OF CABINET
REQUEST ASSESSMENT NOTE

Ministry:	Energy
Meeting Date:	June 27, 2017
Agenda Class:	Major Item
Last reviewed by: TB/MBC – June 13, 2017	**Tracking to: Fast Track** LRC/Cabinet – June 27, 2017

SUBMISSION TITLE:	Report back on Ontario Fair Hydro Plan – Regulations Part 2 of 2

I. DECISION BEFORE THE BOARD

Receive the second of two report backs on proposed regulations related to the Ontario Fair Hydro Plan that require a recommendation prior to proceeding Cabinet for approval

II. RECOMMENDATIONS:

• Receive the second of two report backs on proposed regulations related to the Ontario Fair Hydro Plan that require a recommendation prior to proceeding to for approval including: o Global Adjustment Refinancing; o Ontario Electricity Support Program (OESP)	*Receive*
Note key aspects and program parameters of the proposed regulations	*Note*
Recommend the proposed regulations proceed to Cabinet for approval	*Recommend*
• Direct the Ministry to report back to TB/MBC on: o Details of its overall strategy to substantially increase OESP enrolment (note: includes increasing Social Assistance clients enrolled in OESP).	*Direct*

III. FINANCIAL SUMMARY

$ Millions	**2017-18**	**2018-19**	**2019-20**
Initiative cost requested	0.0	0.0	0.0
Initiative cost recommended	0.0	0.0	0.0
Recommended program base: Global Adjustment Refinancing*	0.0	0.0	0.0
Electricity social programs – OESP ^	140.0	261.0	325.0
Offset Recommended	0.0	0.0	0.0
Total Potential Fiscal Impact	0.0	0.0	0.0

*As part of Global Adjustment Refinancing, an Operating Asset for $1.1B for OPG Share Purchase was included as part of 2017 Budget.
^Multi-year appropriation approved as part of the 2017 Budget.

IV. KEY COMMENTS AND CONSIDERATIONS

In March 2017, the Ministry received Treasury Board/Management Board of Cabinet (TB/MBC) approval for electricity price mitigation measures that support a 25% electricity bill reduction on average (including the 8% Ontario Rebate For Electricity Consumers announced in 2016). The Ontario Fair Hydro Plan (OFHP) was announced on March 2, 2017.The plan includes refinancing a portion of the Global Adjustment (GA) and helping vulnerable electricity consumers ("social programs") amongst other initiatives for residential consumers (see Appendix C). The Ministry was directed to report back to TB/MBC on a number of items including the proposed legislation required to enact the initiatives under

OFHP (see Appendix D).

Report backs to date include:

- May 9th 2017, the Ministry provided an implementation update on the OFHP and the enabling legislation. TB/MBC recommended the proposed legislation proceed to Cabinet for approval and Ontario's *Fair Hydro Act, 2017* ("the Act") received Royal Assent on June 1, 2017. The Ministry was directed to report back to TB/MBC on a number of items including the proposed regulations required to support the implementation of the OFHP (see Appendix E).

- June 13, 2017, the Ministry provided the first of two updates on next steps in implementation of the OFHP, specifically providing the proposed regulations that would establish and amend the necessary regulations under the *Ontario Energy Board Act, 1998*, the *Electricity Act, 1998*, *Ontario Rebate for Electricity Consumers Act, 2016*, and the *Fair Hydro Plan Act, 2017*.

Proposed Regulations

The current submission before the Board is the second bundle of proposed regulations supporting implementation of the OFHP and would establish and amend regulations under the *Ontario Energy Board Act, 1998 and the Ontario Fair Hydro Plan Act, 2017*, related to GA Refinancing and the Ontario Electricity Support Program (OESP).

Implementation of Global Adjustment (GA) Refinancing

On March 2, 2017, as part of OFHP, the government announced that a portion of the GAs would be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system).

As Part 2 of the regulations report back (Part 1 was before the Board June 13, 2017), The ministry is proposing a new General Regulation under the OFHPA that would support the implementation of the refinancing of the GA by ensuring that the mechanisms for refinancing of GA as set out under the *OFHPA* are in place in time for the first debt offering in fall 2017:

- Roles and responsibilities of the Financial Services Manager (FSM) (i.e., OPG), OEB, and IESO in relation to the refinancing of GA
- Require that the clean energy adjustment be a specific line item on bills and that LDCs keep separate records of amounts invoiced to be produced at the request of specified parties (e.g., IESO, FSM)
- Provide criteria and detail to support key aspects of the OFHPA, including IESO deferral and the establishment and transfer of portions of the regulatory asset, as well as the establishment of the related variance account
- Provide further criteria related to the development and implementation of the financing plan by the FSM
- Provide for further principles that must be taken into account by the Minister of Energy in the calculation of the fair allocation amount (i.e., commodity prices, interest rates, inflation, population, electricity consumption and the useful life of electricity generation assets) and a methodology for making adjustments to the fair allocation amount, if required.

IESO Credit Facility

The Ministry of Energy indicates the IESO is responsible for financing short to medium term funding shortfalls in the implementation of Ontario's Fair Hydro Plan. This was noted by the Board as part of the legislative package brought on May 9, 2017.

To support this, the Ministry of Finance (MOF) is seeking an Order in Council (OIC) to authorize the Minister of Finance to provide loan(s) to the Ontario Financing Authority (OFA) in an amount of up to $2B, which will provide the OFA with the capacity to provide additional a credit facility of $2 billion~~loans~~ to the IESO in order to allow the IESO to fulfil its~~the~~ commitments under the Fair Hydro Act, 2017. The Capital Investment Plan Act (CIPA) authorizes the Minister of Finance to make loans to the OFA in the amounts, times and on the terms and conditions authorized by Lieutenant Governor in Council ("LGIC").

Under the *Ontario Fair Hydro Plan Act, 2017,* the IESO will incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment charge to ratepayers will be deferred to the future. During this period, Global Adjustment amounts collected from ratepayers will be insufficient to fund the IESO's contractual obligations to electricity producers and service providers. The *Ontario Fair Hydro Plan Act, 2017* gives the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell the regulatory asset to a financing entity. It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG SPV"), an OPG special purpose vehicle or trust. The cash received from selling the regulatory asset would be used by the IESO to fund the current Global Adjustment shortfall.

There is expected to be initial and ongoing IESO cash flow requirement timing differences. The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017 (planned for later in summer 2017; however, exact timing is subject to actual implementation). Even once the SPV is set up to borrow, there is expected to be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO. Also, under the proposed legislation, OPG's SPV is not required to purchase any portion of the regulatory asset.

As a result, IESO requires short-term financing to be in place for initial and expected monthly timing differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset.

The Ministry indicates further work to enable GA refinancing will be undertaken Summer/Fall 2017:

- Minister to determine the Fair Allocation Amount for each reference period;
- OPG/SPV to produce Financing Plans that would set out funding obligations for each reference period consistent with the Fair Allocation Amount;
- IESO to record deferral amounts and establish the regulatory asset;
- OPG/SPV to begin purchasing of investment asset; and
- OPG to work with lenders and credit rating agencies in establishing the vehicles for selling of investment asset interests.
-

(Energy, perhaps additional section outlining what will regularly be coming before TB/MBC once OFHP is underway)

Delivery of Electricity Social Programs:

Ontario Electricity Support Program

The ministry is proposing amendments to the existing Ontario Electricity Support Program (OESP) regulation that will enable the Ministry of Community and Social Services to help new and existing social assistance clients to enroll in the OESP.

The amendments are in support of efforts to increase enrollment by reducing application burdens on target populations and enable the development of automatic OESP enrollment procedures for some

populations already receiving other government programming (in this case already receiving social assistance).

- MCSS and Energy intend to bring a temporary resources request to the July 25, 2017 TB/MBC meeting. Early indications suggest about 50 temporary FTEs within MCSS and Energy providing the funding to support increasing enrolment of Social Assistance clients onto OESP.
- The March 1, 2017 Board Minute included direction to pursue additional measures to substantially increase OESP take-up. The Ministry indicates OESP enrolment is about 35% of the targeted low-income population (about 575,000 target population). Stats provided by MCSS indicate just over 109,000 Social Assistance clients being eligible for OESP (as they receive hydro bills directly), but MCSS does not know the portion of the 109,000 that are already OESP recipients.
    - As part of the July 2017 joint submission from MCSS and Energy, Energy should provide commentary on its overall strategy to move OESP towards 100% participation (This engagement of MCSS would be part of the strategy).

The Ministry indicates it will return to LRC/Cabinet in the Fall 2017 with a proclamation OIC to finalize transfer of the OESP from the IESO variance account to government funding. This timing is consistent with previous submissions and ensures the variance account is drawn down before government funding is provided.

On-Reserve First Nations Delivery Credit (FNDC)

The Ministry is proposing a correction to the recently established FNDC regulation to add "licensed distributor" in front of "serving Cat Lake First Nation."

Analysis/Risks

TBS staff noted as part of the May 9, 2017 submission focused on OFHP legislation indicated that financial, legal, and accounting external opinions and assessments of the planned approach to GA refinancing are supportive of the Ministry's intended plan for implementing Ontario's Fair Hydro Plan, noting the opinions and assessments must be revisited once key implementation details are finalised (e.g. draft legislation, regulations, special purpose vehicle documents, terms of conditions within various other agreements).
Future reassessments, Navigant's analysis of expected lifecycle for existing generation infrastructure (key), and other factors such as Ontario electricity demand, interest rates in the medium to long-term, and the rate of inflation may contribute to fiscal plan implications emerging over time.

This assessment has not changed with the current submission. The Ministry indicates Navigant's analysis is still pending along with finalized details for elements such as the special purpose vehicle documents, and terms/conditions within various other agreements.

Financial

- The multi-year fiscal profile identified by the Ministry as part of this submission (below) are consistent with the voted appropriation approved for the Ministry through the 2017 Budget. Cost forecasts for these programs were made through a combination of Ministry analysis that utilized consumption data and local distribution company rates to estimate program costs, and information provided to the Ministry by the OEB.

$M	2017-18	2018-19	2019-20	2020-21
Ontario Electricity Support Program (OESP)	140	261	325	375

- The Ministry notes it is currently assessing the potential impact of the Hydro One rate application and will report back to TB/MBC with the potential out-year impacts of this rate application.
- The allocations for the social programs are based on a number of variable inputs such as program uptake, electricity market conditions and forecasting models that are subject to change and represent an on-going fiscal risk. Sensitivity analysis will allow the government to develop a risk based outlook to understand potential fluctuations in the cost of these initiatives.
- There are no sunset dates for the programs and it is important to understand the full cost of the initiatives (including electricity price projections) for the longer term, beyond the year 2021-22.
- Lastly, further information is required on the detailed consumer impacts with assumptions and methodologies specified and documented to support better decision making and achieving the intended program goals.

Accounting

- The fiscal impact associated with the OFHP will be determined by how the series of complex transactions are accounted for on the Province's Consolidated Financial Statements which are prepared in accordance with public sector accounting standards established by CPA Canada. A number of details yet to be finalized through the regulations and various commercial agreements will impact the final accounting analysis.
- While accounting for the social programs and the Affordability Fund as transfers is fairly straightforward, the accounting for the GA mechanism is relatively more complex. To mitigate accounting risk associated with the latter, both the IESO's and OPG's external auditors have provided independent accounting opinions on the appropriate accounting for elements of the OFHP structure related to each entity, contingent on finalization of regulations and commercial agreements. Based on the audited financial results for these organizations, supported by the anticipated accounting opinions, the Office of the Provincial Controller will prepare the Province's consolidated financial statements based on public sector accounting standards.
- At this time, the Auditor General (AG) has not identified any concerns related to the accounting for the social programs or the Affordability Fund; however, the AG has voiced concerns regarding the planned accounting treatment for the OFHP as related specifically to the GA component which is expected to impact the Province's financial results for the first time in 2017-18. The AG has also publicly communicated her opposition to a change in the IESO's accounting policy to reflect rate regulated balances on its books. The Province supports the IESO's accounting treatment as more fairly presenting the economic substance of the entity's market-related activities.
- The AG is currently reviewing the Province's accounting analysis related to the Affordability Fund which reflects a $100M transfer payment to be reflected in the Province's 2016/17 Public Accounts.
- If the AG does not concur with the Province's accounting treatment, including the change in accounting treatment by the IESO, the AG may provide a qualifed audit opinion on the Provinces' financial statements in the Public Accounts.

Legal

- The ministry has stated the legal risk remains the same as identified at the May 10, 2017 Cabinet meeting regarding the *Fair Hydro Plan Act, 2017*, including and related to:

GA Refinancing

- In principle, refinancing the GA to spread the costs of generation and conservation assets over the useful life of the assets present only a low risk of being an unconstitutional tax, as each cohort of consumers pays for a proportion of the GA cost roughly equal to the proportion

of the benefit they receive from the useful life of the assets.

- Legal risk arises if it becomes apparent that the Government is not spreading cost so that it is shared proportionately by future consumers who cause a need for or benefit from the asset, but rather is doing so in order to lower the price in the short term by increasing the price in the long term. If the proposed financing served to encumber future consumers with a premium payment to cover the GA financing in order to subsidize current ratepayers, then there would be a moderately high constitutional risk that the financing proposal would result in an unconstitutional tax.
- The legislation contains provisions to mitigate the constitutional law risks, including requiring the Minister of Energy to reallocate estimated clean energy costs attributable to each reference period in a way that takes into account the need to align those costs with the estimated clean energy benefits attributable to the same period.

The Ministry has provided an update to key risks including mitigation strategies (see Appendix G). The overview of strategic risks, from May 9 2017 TB assessment note, has been brought forward providing context for the more operational nature of Appendix G.

In addition to the risks cited in Appendix G in the implementation of the OFHP, a number of supporting arrangements are being sought by the IESO and OPG, including the following:

Indemnities for OPG (Ontario Power Generation) and IESO

- OPG and IESO have requested indemnities from the Province for their respective Directors, Officers and employees in relation to their roles in the implementation of the OFHP. Ministry of Energy staff are putting together a section 28 approvals submission to the Minister of Finance for the Minister of Energy, on behalf of the Crown, to enter into Indemnity Agreements in favour of OPG, including its subsidiaries, and the IESO.~~sw~~
    - IESO and OPG have stated that these indemnities are required for their participation in the implementation of the OFHP Act.
    - Draft materials from Energy state that the likelihood of this indemnity being called upon is low and that the fiscal exposure is unquantifiable at this time.
    - Energy has confirmed in its draft request letter that it bears responsibility for funding, within its approved allocation, for payments associated with the indemnities provided under the Agreements.
- As currently proposed, the Minister of Finance will be requested to consider and sign the section 28 approval forms and the transmittal letter to Minister Thibeault.

Commented [RK1]: Is this in the latest drafts? Update.

Provincial Support Agreement or Provincial Guarantee Agreement

- As part of the OFHP and in order to provide support to those with claims against the Financing Entity (i.e., planned to be the OPG Trust) and with the ultimate objective of providing the highest possible credit ratings (and corresponding impact on interest costs to the ratepayers), the Province has been asked to provide both a Service Guarantee and a Performance Guarantee to support obligations of the IESO and the debt instruments issued by the Financing Entity.

Additional Report Backs

The Ministry has been asked to provide an update on outstanding report backs from OFHP related previous submissions. Appendix H contains the table sent to the Ministry, update is still pending.

As indicated earlier, this assessment note recommends Energy provide, as part of the joint submission with MCSS tracking to July 25, 2017 TB/MBC, an overview of its strategy to significantly increase OESP

enrolment.

Name of analyst:	James Strang/ Afshin Malekzadeh with input from OPCD, OFA and CoE	**Phone number:**	416-327-2071

Branch / Division:	GGPR / PEMD / Treasury Board Secretariat		

APPENDIX A: PROPOSED MINUTE

Commented [RK2]: Is it possible to add a "Note" type Minute on the request for indemnities and s.28 approval request?

Receive the second of two report backs on proposed regulations related to the Ontario Fair Hydro Plan that require a recommendation prior to proceeding to Cabinet for approval.

In this regard, the Board:

i) Note that the proposed new regulations and amendments to existing regulations include the following program parameters:

Electricity Social Programs:

Ontario Electricity Support Program (OESP)

a) To enable Ministry of Community and Social Services to sign up social assistance clients for OESP based upon Ontario Works (OW) and Ontario Disability Support Program (ODSP) eligibility criteria, and matching this eligibility to the existing OESP household size / income credit table.

On-Reserve First Nations Delivery Credit (FNDC)

a) A correction to the recently established FNDC regulation to add "licensed distributor" in front of "serving Cat Lake First Nation."

Implementation of Global Adjustment (GA) Refinancing:

a) Roles and responsibilities of the Financial Services Manager (FSM) (i.e., OPG) and OEB and IESO in relation to the refinancing of GA:
b) Require that the clean energy adjustment be a specific line item on bills and that LDCs keep separate records of amounts invoiced to be produced at the request of specified parties (e.g., IESO, FSM);
c) Provide criteria and detail to support key aspects of the OFHPA, including IESO deferral and the establishment and transfer of portions of the regulatory asset, as well as the establishment of the related variance account;
d) Provide further criteria related to the development and implementation of the financing plan by the FSM;
e) Provide for further principles that must be taken into account by the Minister of Energy in the calculation of the fair allocation amount (i.e., commodity prices, interest rates, inflation, population, electricity consumption and the useful life of electricity generation assets) and a methodology for making adjustments to the fair allocation amount, if required.

ii) Recommend the following proposed new regulations and amendments to existing regulations proceed to Cabinet for approval:

a) New General Regulation to be made under Part I of the *Ontario Fair Hydro Plan Act, 2017*, which is Schedule 1 of the *Fair Hydro Act, 2017*
b) Amendments to O. Reg. 197/17 (First Nation Delivery Credit) to be made under the *Ontario Energy Board Act, 1998* (OEBA)

c) Amendments to O. Reg. 314/15 (Ontario Electricity Support Program) to be made under the OEBA

iii) Direct the Ministry to report back to TB/MBC with details of its overall strategy to substantially increase OESP enrolment, as part of the pending joint submission with MCSS to increase Social Assistance clients enrolled in OESP.

APPENDIX B: FINANCIAL TABLES

FINANCIAL IMPACTS: CHANGES TO EXPENSE AND REVENUE					TABLE B1
		Fiscal Plan Basis			*Appropriations Basis*
$ Millions		**2017-18**	**2018-19**	**2019-20**	**2017-18**

	Oper	0.0000	0.0000	0.0000	0.0000
Total Fiscal Impact		**0.0000**	**0.0000**	**0.0000**	**0.0000**

APPENDIX C: OFHP OVERVIEW

Ontario Rebate for Electricity Consumers

The *Ontario Rebate for Electricity Consumers Act, 2016* will reduce electricity costs by 8 per cent on the amount before tax, an average savings of about $130 annually or $11 each month, for about five million residential consumers, farms and small businesses.

Eligible rural electricity ratepayers will receive additional relief, decreasing total electricity bills by an average of $540 a year or $45 each month.

Commercial, institutional and industrial ratepayers would also benefit from up to 34 per cent lower electricity costs through the expansion of the Industrial Conservation Initiative.

Details:

- The province is reducing costs for eligible rural ratepayers by providing additional funding to the Rural or Remote Rate Protection (RRRP) program.
- The Industrial Conservation Initiative (ICI) provides a strong incentive for large electricity consumers to shift their electricity consumption to off-peak hours to reduce their bills by up to one-third. Ontario intends to expand ICI to help reduce cost pressures on the electricity system and enable more consumers to reduce their electricity bill by up to one third.
- Ontario has removed the Debt Retirement Charge from residential electricity bills and introduced the Ontario Electricity Support Program (OESP) to provide a monthly credit to low-income households who have applied and meet the eligibility requirements to help reduce electricity costs.

Fair Hydro Act

The *Ontario Fair Hydro Act, 2017* reduces electricity bills for all residential consumers and as many as half a million small businesses and farms, starting this summer. Lower-income Ontarians and those living in eligible rural and northern communities will receive even greater reductions, as much as 40 to 50 per cent. As part of this plan, rate increases will be held to the rate of inflation for four years.

These measures include the eight per cent rebate introduced in January and build on previously announced initiatives to deliver broad-based rate relief on all electricity bills. Taken together, these changes are delivering the largest reduction to electricity rates in Ontario's history. To facilitate these immediate savings, the legislation:

Details:

- Enables the Independent Electricity System Operator (IESO) and Ontario Power Generation (OPG) to work together to spread out the costs of Ontario's clean energy investments over a longer period of time, which ensures that the costs of these investments are allocated fairly among current and future ratepayers. This will be accomplished through refinancing a portion of the Global Adjustment (GA), resulting in significant and immediate rate reductions.
- Modifies and broadens the Ontario Electricity Support Program (OESP) to expand benefits and ensure it is funded by government instead of ratepayers, reducing bills for all.
- Enhances the Rural or Remote Rate Protection (RRRP) program to provide distribution charge relief to a total of approximately 800,000 customers and shift costs from ratepayers to provincial revenues. The enhancement will benefit customers served by local distribution companies (LDCs) with the highest distribution rates. These savings will begin July 1, 2017.
- Provides on-reserve First Nations households serviced by licensed distributors with a 100 per cent credit of the delivery line on their monthly electricity bills, starting July 1, 2017.

APPENDIX D: PREVIOUS TB/MBC MINUTE (MARCH 1, 2017)

Approve electricity rate mitigation actions that support up to a 25% electricity bill reduction (including the 8% reduction announced in 2016) for an average household in 2017.

In this regard, the Board:

i. Direct the Ministry of Energy to implement electricity rate mitigation for all electricity consumers eligible to be billed under the Ontario Energy Board's Regulated Price Plan (RPP) and any other consumers who would be eligible for RPP if their electricity account was with a licensed distributor by:

   a) Subject to completed legal, accounting and financing risk assessments, refinance the Global Adjustment (GA) in order to partially defer RPP-eligible ratepayer GA costs by reducing projected after-tax electricity costs for a typical residential customer consuming 750kWh per month in 2017 by about 16%. Total projected bill increases will be kept in line with CPI until the end of 2021. From 2022 onwards, bills will increase at a rate that ensures gradual recovery of the accumulated debt by 2048, with escalation in subsequent years set above Consumer Price Index (CPI) in order to ensure that bill increases due to repayments are capped at around 10% of the total bill.

   b) Direct the Ministry to report back to TB/MBC by Spring 2017, prior to going to LRC with any legislation, on the approach to refinance Global Adjustment , including, but not limited to:

      - Formal accounting opinions from OPG and IESO auditors.
      - Completed legal, financing and accounting risk assessments. Assessments to include, but not limited to proposed legislation, technical aspects such as Eurig analysis, and risk to borrowing (in discussion with the OFA).
      - Report on the multi-year profile of GA smoothing, identifying specific assumptions.
      - Report on sensitivity analysis completed as assumptions vary, such as under different recovery rates and periods.
      - Overall risk mitigation plan addressing completed legal, accounting and financing risk assessments.

   c) If a non-fiscal mechanism cannot be established:
      1. Direct the Ministry to report back to Cabinet and TB/MBC with options for achieving a comparable level of electricity rate mitigation in the most cost effective way, in order to minimize the impact on the province's fiscal plan.
      2. Note costs to government of proceeding if cost of refinancing of Global Adjustment is recognized as an expense in the fiscal plan of up to $2,534,000,000 in 2017-18, $2,668,000,000 in 2018-19, $2,942,000,000 in 2019-20, $3,420,000,000 in 2020-21 and $3,232,000,000 in 2021-22.

ii. Broadening the Rural or Remote Rate Protection (RRRP) program to mitigate distribution charges for customers of Local Distribution Companies (LDC) with some of the highest distribution rates, and moving the program from a ratepayer funded program to a government funded program beginning in 2017, including:

   a) Harmonizing distribution cost for customers with the highest distribution rates (Hydro One (R1 and R2 rate classes), Algoma Power, Atikokan Hydro, InnPower, Chapleau Public Utilities Commission, Sioux Lookout Hydro, Lakeland Power (Parry Sound service

territory) and Northern Ontario Wires Inc) at the lowest distribution rate paid by the average consumer of the LDCs noted by fall 2017.

b) Note costs estimated at up to $459,000,000 in 2017-18, $472,000,000 in 2018-19, $484,000,000 in 2019-20, and $497,000,000 in 2020-21 and on-going as part of the 2017-18 PRRT planning process.

c) Direct that any underspending related to any of the initiatives be returned to Treasury Board/Management Board of Cabinet and not be reallocated within the Ministry.

d) Direct the Ministry to report back to TB/MBC by Spring 2017 with final program details, including fiscal plan implications to broaden RRRP.

e) Direct the Ministry to report back to TB/MBC in 2017-18 on the program's effectiveness, efficiency, and sustainability. Report back to include, but not limited to:

- Current program outcomes identified and results achieved to date.
- Establishing program performance management framework including targets for the broadened program now government funded
- Report on and assessment of impacts of consolidation of LDCs
- Assessment of distribution rates and implications for the program

iii. Expanding every benefit level of the Ontario Electricity Support Program by 50%, moving the program from a ratepayer funded program to a government funded program beginning in 2017 and pursuing additional measures to substantially increase take-up.

a) Note costs estimated at up to $186,000,000 in 2017-18, $261,000,000 in 2018-19, $325,000,000 in 2019-20, and $375,000,000 in 2020-21 and on-going as part of the 2017-18 PRRT planning process.

b) Direct that any underspending related to any of the initiatives be returned to Treasury Board/Management Board of Cabinet and not be reallocated within the Ministry.

c) Direct the Ministry to work Treasury Board Secretariat (Behavioural Insights Unit, Centre of Excellence for Evidence-Based Decision Making) to accelerate/ maximize program uptake.

d) Direct the Ministry to report back to TB/MBC by Spring 2017 with final program details, including fiscal plan implications to expand OESP.

e) Direct the Ministry to report back to TB/MBC in 2017-18 on the program's effectiveness, efficiency, and sustainability. Report back to include, but not limited to:

- Identify eligibility criteria, and refinements being made.
- Current program outcomes identified and results achieved to date.
- Establishing program performance management framework including targets for the expanded program now government funded.

iv. Establishing a new government funded Affordability Fund to provide energy efficiency measures to electricity customers who do not qualify for existing low income conservation programs and who have difficulty paying their electricity bills.

a) Approve to commit up to $200,000,000 on a multi-year basis to support the Affordability Fund.

b) Direct the Ministry to report back to TB/MBC with program details, including performance management framework, and multi-year funding profile, and fiscal plan implications.

v. Establishing a new province-wide government funded program beginning in 2017 that would eliminate the delivery charge for First Nations customers on reserve.

a) Note costs estimated at up to $20,000,000 in 2017-18, $20,000,000 in 2018-19, $20,000,000 in 2019-20, and $20,000,000 in 2020-21 and on-going as part of the 2017-18 PRRT planning process.

b) Direct the Ministry to report back to TB/MBC by Spring 2017 with final program details, including performance management framework, and clarifying how the programs aligns with the significant Ontario Energy Board estimate of program costs, from $13M to $20M.

c) Direct that any underspending related to any of the initiatives be returned to Treasury Board/Management Board of Cabinet and not be reallocated within the Ministry.

vi. Expanding the Industrial Conservation Initiative (ICI) by reducing the eligibility threshold to 500kW to enhance competitiveness for Class B manufacturers beginning July 2017.

a) Direct the Ministry to report back to TB/MBC by Spring 2017 with final program details, results achieved to date versus expectations for the ICI program, impacts of the change for participation, and impact for ratepayers as costs are recovered from ratepayers.

vii. Direct the Ministry:

a) To work with Treasury Board Secretariat and the Ministry of Finance on the development of a comprehensive risk-based costing, including forecast models and sensitivity tests on assumptions and financial estimates, for the electricity mitigation initiatives.

b) To report back to TB/MBC through regular updates including quarterly reports and the 2018-19 Program Review, Renewal and Transformation (PRRT) on the status of implementation, and revised out-year expenditure requirements if applicable.

c) To continue to work with the Ontario Energy Board, the Independent Electricity System Operator and Ontario Power Generation, through the Long-Term Energy Plan 2017, to further reduce electricity rates across the system.

d) To work with the Ministry of Finance, Treasury Board Secretariat, Cabinet Office and Office of the Premier on an integrated communications strategy.

APPENDIX E: PREVIOUS TB/MBC MINUTE (MAY 9, 2017)

Receive a report back providing an update on current implementation status, including proposed legislation, of the Ontario Fair Hydro Plan, previously at TB/MBC March 1, 2017 and announced on March 2, 2017.

In this regard, the Board:

i) Note that the proposed Fair Hydro Act, 2017, includes:

Electricity Social Programs:

a) Establishment of a First Nation Delivery Credit for On-Reserve Consumers, funded from voted appropriations.
b) Establishment of new distribution rate protection program to eligible residential customers served by LDCs with the highest distribution costs, funded from voted appropriations.
c) Shift from costs recovered from ratepayers to funding out of voted appropriations for Ontario Electricity Support Programs.
d) Delayed proclamation for OESP once proposed amendments are passed until the IESO variance account for the program is close to wound down.

Global Adjustment Refinancing:

a) Establishes the fair allocation adjustment that gives the relief to certain specified consumers during the period July 1, 2017 to June 30, 2021 to ensure intergenerational fairness.
b) Requirement for future consumers to pay the clean energy adjustment that backs financings.
c) Sets out that the Financial Services Manager (OPG) prepares the Financing Plan establishing when a funding obligation should be incurred so that the OPG entity can raise money to acquire the Investment Interest.
d) Establishes the LGIC's power to authorize the Ministers of Finance and Energy to guarantee and indemnify any debts, obligations, securities or undertakings associated with the investment interest.
e) Sets out how the regulatory asset will be determined and how it can be converted into the investment asset, and the investment asset rights.
f) Sets out that security interests can be granted in investment interests in the investment asset.

ii) Recommend the proposed Fair Hydro Act, 2017 to proceed to Cabinet for approval.

iii) Note a new credit facility is being sought by the IESO from the Ontario Financing Authority to ensure that it has the flexibility to finance clean energy costs if for some reason the OPG Trust, at any time, does not purchase any portion of the deferred Global Adjustment amounts payments. An Order in Council to allow the Ontario Financial Authority to provide an expanded credit facility will be requested.

iv) Direct the Ministry of Energy to work with Treasury Board Secretariat and the Ministry of Finance/Ontario Financing Authority and report back to TB/MBC on the details of proposed regulations prior to going to LRC, and to provide the Board with an update towards completed legal, accounting and financing risk assessments.

In this regard, direct the Ministry to:

a) Include a report related to GA Refinancing on findings from sensitivity analysis completed as assumptions vary, such as under different recovery rates, different interest rates, different

demand, etc., and combinations of key factors, and then to quantify the likelihood of high/medium/low impact scenarios, with assumptions and methodologies clearly specified and documented.

b) Include electricity social programs with details of forecasting models and costing estimates, including assumptions, sensitivities analysis that would allow identification of risks to the fiscal plan for Broadening RRRP, OESP. The Ministry is to include similar information for the Ontario Rebate for Electricity Consumers.

c) To report back with final program details for 2017-18 for GA Refinancing and Electricity Social Programs, including fiscal plan implications and consumer impacts with detailed assumptions and methodologies specified and documented.

d) To report back with updates to risk mitigation strategies that address key financial and operational risks.

v) Note the following outstanding report back requirements from March 1, 2017 minute:

a) Broadening RRRP – Direct the Ministry to report back to TB/MBC in 2017-18 on the effectiveness, efficiency, and sustainability. Report back to include, but not limited to:
   - Current program outcomes identified and results achieved to date, not just amount of funding flowed to consumers.
   - Establishing program performance management framework including targets for the broadened program now government funded
   - Report on and assessment of impacts of consolidation of LDCs
   - Assessment of distribution rates and implications for the program

b) OESP – Direct the Ministry to report back to TB/MBC in 2017-18 on the program's effectiveness, efficiency, and sustainability. Report back to include, but not limited to:
   - Identify eligibility criteria, and refinements being made.
   - Current program outcomes identified and results achieved to date, not just amount of funding flowed to consumers.
   - Establishing program performance management framework including targets for the expanded program now government funded.

c) Affordability Fund – Direct the Ministry to report back through quarterly reporting process with program details, including performance management framework, and multi-year funding profile, and fiscal plan implications.

d) On-Reserve First Nations Delivery Charge – Direct the Ministry to report back to TB/MBC by Spring 2017 with final program details, including performance management framework, and clarifying how the programs aligns with the significant Ontario Energy Board estimate of program costs, from $13M to $20M.

e) Industrial Conservation Initiative – Direct the Ministry to report back through quarterly reporting process with results achieved versus expectations for the ICI program, impacts of the change for participation, and impact for ratepayers as costs are recovered from ratepayers.

vi) Approve the Ministry to fund a media buy plan with a maximum value of $3,500,000 with PHD Canada, the Advertising Review Board's mandatory-use media planning and buying Agency of Record. In this regard,

a) Note the Ministry of Energy has already spent approximately $1,000,000 with PHD Media in 2016-17 and is forecasting expense of approximately $2,500,000 in 2017-18.

b) Note the Ministry of Energy will return to request a transfer of funds of up to $2,500,000 in 2017-18 to the Ministry of Energy from the Bulk Media Buy program in Treasury Board Secretariat to recover costs for the public education campaign.

APPENDIX F: PREVIOUS TB/MBC MINUTE (JUNE 13, 2017)

Receive the first of two report backs on proposed regulations related to the Ontario Fair Hydro Plan that require a recommendation prior to proceeding to Cabinet for approval.

In this regard, the Board:

i) Note that the proposed new regulations and amendments to existing regulations include the following program parameters:

Electricity Social Programs:

Rural and Remote Rate Protection (RRRP) and Distribution Rate Protection (DRP)

a) Provides for a fixed monthly credit ($60.50), replacing the existing prescribed annual amount and making the escalating factor unnecessary; and,
b) Sets out a process that the Ontario Energy Board (OEB) will utilize to determine the maximum monthly distribution charge that all prescribed high-cost distributors will charge their customers; and,
    1) Sets out the proposed distributors as Atikokan Hydro Inc.; InnPower Corporation; Chapleau Public Utilities Corporation; Sioux Lookout Hydro Inc.; Northern Ontario Wires Inc.; Lakeland Power Distribution Ltd. (Parry Sound Rate Zone); Algoma Power Inc. (residential); and, Hydro One Networks Inc. (Low & medium density classified customers).

On-Reserve First Nations Delivery Credit (FNDC)

a) Defines eligibility as being restricted to those residential rate class First Nations customers who are members of a band as defined under the federal Indian Act;
b) Eliminates the delivery charge, or monthly service charge for those customers served by Local Distribution Companies (LDCs) that do not have a delivery charge, for on-reserve residential First Nations customers; and,
c) Defines eligibility currently affects 11 LDCs serving on-reserve consumers: Algoma Power Inc., Attawapiskat Power Corporation, Bluewater Power Distribution Corporation, Cat Lake Power Utility Ltd., Cornwall Electric Distribution, Hydro One Networks Inc. Hydro One Remote Communities Inc., PUC Distribution Inc., and Thunder Bay Hydro Electricity Distribution; Fort Albany Power Corporation; and Kashechewan Power Corporation.

Implementation of Global Adjustment (GA) Refinancing:

a) Supports the required calculations to be made by the OEB;
b) Provides the methodology that the OEB will use in applying reductions to eligible and non-regulated consumers who are eligible for GA refinancing;
c) Sets out the near-term reductions (i.e., the reductions that will be applied by the OEB from July 1, 2017 to April 30, 2018), as well as the reductions from May 1,

2018 to April 30, 2019. Further adjustments to be made for future periods beginning May 1, 2019 would be set out in further amendments the regulation; and,

d) Provides the Independent Electricity System Operator (IESO) with the necessary authority related to its activities, including the funding, borrowing and financial arrangements.

ii) Recommend the below proposed new regulations and amendments to existing regulations proceed to Cabinet for approval:

a) New Regulation to be made under Part II of the *Ontario Fair Hydro Plan Act, 2017*, which is Schedule 1 of the *Fair Hydro Act, 2017*;
b) Amendment to O. Reg. 280/14 (IESO Eligible Investments and Borrowing) to be made under the *Electricity Act, 1998*;
c) New Invoicing Regulation to be made under the *Ontario Fair Hydro Plan Act, 2017*;
d) New Regulation (First Nation Delivery Credit) to be made under the *Ontario Energy Board Act, 1998* (OEBA);
e) New Regulation (Distribution Rate Protection) to be made under the OEBA;
f) Amendments to O. Reg. 442/01 (Rural or Remote Electricity Rate Protection) to be made under the OEBA;
g) Amendments to the O. Reg 363/16 (General) to be made under the *Ontario Rebate for Electricity Consumers Act, 2016* (ORECA); and,
h) Amendments to O. Reg. 275/04 (Information on Invoices to Certain Classes of Consumers of Electricity) to be made under the OEBA.

iii) Direct the Ministry to report back to TB/MBC with:

a) The details of additional proposed regulations with financial implications prior to proceeding to Cabinet for approval; and,
b) An update on previously minuted report back requirements.

APPENDIX F: DETAILS OF PROPOSED REGULATIONS

Partial Refinancing of the GA

The ministry is proposing a new General Regulation under the OFHPA that would support the implementation of the refinancing of the Global Adjustment (GA):

- Provide for the implementation of the roles and responsibilities of the Financial Services Manager (FSM)(i.e., OPG) and OEB and IESO in relation to the refinancing of GA:
    - methodology for calculating the clean energy adjustment, the finance amount and the true-up amount;
    - required communications by FSM with OEB on clean energy adjustments for each reference period during the recovery period;
    - requiring that OEB use the FSM calculations of clean energy adjustment to determine a kWh amount for the clean energy adjustment for each reference period during the recovery period using IESO demand forecasts;
    - clarify FSM's ability to charge fees to the financing entities for the costs of its services and required activities under the OFHPA. FSM to submit methodology used for determining fees to the OEB for review and approval;
- Require that the clean energy adjustment be a specific line item on bills and that LDCs keep separate records of amounts invoiced to be produced at the request of specified parties (e.g., IESO, FSM);
- Provide criteria and detail to support key aspects of the OFHPA, including IESO deferral and the establishment and transfer of portions of the regulatory asset, as well as the establishment of the related variance account;
- Provide further criteria related to the development and implementation of the financing plan by the FSM;
    - reasonable assumptions and additional principles and that the FSM must make or take into account, such as seeking to incur funding obligations on the best terms available and flexibility to cope with changes to future fair allocation amounts; and,
- Provide for further principles that must be taken into account by the Minister of Energy in the calculation of the fair allocation amount (i.e., commodity prices, interest rates, inflation, population, electricity consumption and the useful life of electricity generation assets) and a methodology for making adjustments to the fair allocation amount, if required.

Social Programs

Ontario Electricity Support Program

The OESP is an income-tested, application based program that lowers electricity costs of the most vulnerable consumers by providing a rebate directly on electricity bills.

The ministry is proposing amendments to O. Reg. 314/15 made under the OEBA to enable Ministry of Community and Social Services staff to sign up social assistance clients for OESP based upon Ontario Works (OW) and Ontario Disability Support Program (ODSP) eligibility criteria, and matching this eligibility to the existing OESP household size / income credit table. The amendment is in support of efforts to increase enrollment by reducing application burdens on target populations and enable the

development of automatic enrollment procedures for some populations already receiving other government programming.

The Ministry indicates it will return to LRC/Cabinet in the Fall 2017 with a proclamation OIC to finalize transfer of the OESP from the IESO variance account (used when OESP was funded by electricity ratepayers) to government funding. This timing is consistent with previous submission and ensures the variance account is drawn down before government funding is provided.

On-Reserve First Nations Delivery Credit (FNDC)

The Ministry is proposing a correction to the recently established FNDC regulation to add "licensed distributor" in front of "serving Cat Lake First Nation."

Regulations supporting implementation were before the Board June 13, 2017.

Rural and Remote Rate Protection (RRRP) and Distribution Rate Protection (DRP)

Regulations supporting implementation were before the Board June 13, 2017.

APPENDIX G: MINISTRY'S UPDATE ON RISKS AND MITIGATION STRATEGIES

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy/Update
1) Global Adjustment (GA) Refinancing			
Maintaining OPG's Financial Viability / Capital Structure	L	H	• OPG requires equity injections on an on-going basis from the Province (i.e., Ministry of Energy). • Equity injections are necessary to support OPG as the owner and manager of GA refinancing. The equity injections allow OPG to strengthen the capital structure of the Trust in order to secure financing at a reasonable cost. • In order to obtain financing, OPG would develop a special purpose vehicle (SPV). • OPG has a great deal of experience managing the risks associated with borrowing through its experience developing capital-intensive generation projects as well as their management of Nuclear Funds. • OPG will seek to achieve the highest possible credit rating (i.e., AAA is possible) in order to reduce borrowing costs and attract a wide investor base. **Update:** • Work is ongoing to finalize a draft term sheet that would serve as the basis for the Master Subscription Agreement between OPG/ENERGY and OFA. In addition, OFA and ENE to develop Service Level Agreement for monthly cash management services.
OPG Securing Capital Markets Funding	L	H	• OPG will need to obtain a portion of the required funding from the capital markets. • The Ministry, IESO, OPG and other ministries have worked closely with third-party financial advisors in advance of and throughout the drafting process to help to ensure that the legislation enables refinancing of the GA. • In order to provide financing, OPG would develop a special purpose vehicle (SPV) which will use 100% debt financing to purchase the regulatory asset, financing 51% through capital markets as senior debt, with the remaining 49% being provided by OPG as subordinated debt. • The 49% subordinated debt from OPG will be financed through debt OPG issues in its own capacity, through capital markets (up to 5%) with the remainder (44-49%) financed through equity injections from the Province. This will help to ensure OPG's capital structure remains in line. **Update:** • The legislation and proposed general regulation were developed with input from third-party financiers (i.e., dealers) to ensure that the OFHPA enables the refinancing of the Global

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy/Update
			Adjustment (GA). • OPG is continuing to work through the mechanics of securing financing (e.g., engaging rate agencies, etc). • In addition, in order to provide assurances to those with claims against the "Financing Entity" (e.g., holders of debt) and support credit ratings, the Province is providing both a Service Guarantee and a Performance Guarantee to ensure that the obligations of IESO are carried out including obligations related to collecting and remitting clean energy adjustments. Working is ongoing.
Managing Interest Cost Risks	M	H	• OPG's Special Purpose Vehicle (SPV) / Trust is borrowing in its own corporate capacity from the capital markets. • Risk that it may incur a higher interest cost than what was originally forecast (i.e., 5%). **Update:** • The legislation and proposed general regulation were developed with input of third-party financiers (i.e., dealers) to ensure that the OFHPA enables the refinancing of the GA • The provincial guarantee as set out in legislation should provide comfort to dealers, thereby increasing the likelihood of achieving more favourable interest rates. • Work is ongoing to scope the provincial guarantees. Note: The guarantees are required to support rating agency review which is expected by the end of July.
Provincial Guarantee is Triggered	L	H	• The legislation sets out that the province could provide assurances in the form of a "provincial guarantee" to OPG and investors regarding the permanence of the GA Refinancing framework. The intent is to ensure that the full value is recovered. • The legislation also enables the Province to: o Through the Ministers of Energy and Finance upon approval by Lieutenant Governor in Council, agree to guarantee any debts and obligations; and **Update:** • Work is ongoing to scope the provincial guarantees. Note: The guarantees are required to support rating agency review which is expected by the end of July.
IESO Failure to Establish a Regulatory Asset / Maintaining IESO Financial Viability	L	H	• Under the legislation, the Ontario Energy Board (OEB) is providing the necessary oversight required to enable IESO the ability to establish a Regulatory Asset. • To recover its revenue shortfall, IESO will establish as a Regulatory Asset that it would sell to OPG's SPV / Trust. • The OEB will issue an accounting order to authorize IESO to create a variance account in which it will record the funding shortfall and recover the shortfall in accordance with the legislation and regulations. • IESO requires short-term financing to be in place for initial and expected monthly timing

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy/Update
			differences, or in the event that the OPG SPV, at any time, does not purchase a portion of the regulatory asset. **Update:** • IESO has received an accounting opinion from KPMG that concurs with IESO's view that it has the ability to establish the regulatory asset. • In addition, OFA is planning to increase IESO's credit facility to support its role in implementing the OFHPA. OFA is proposing an OIC that would authorize the OFA to borrow an additional $2.0 billion, which would be in addition to existing authority for the Minister of Finance to provide loans to the OFA, to ensure that there is sufficient borrowing authority in place for the OFA to meet the IESO requested requirements.
Indemnities provided to OPG are triggered/called **(Not included in current June 27 submission)**	L*	~~H~~Not quantifiable*	• Ministry of Energy staff are putting together a s.28 (under the Financial Administration Act) approvals package for submission to the Minister of Finance for the Minister of Energy, on behalf of the Crown, to enter into Indemnity Agreements in favour of OPG, including its subsidiaries, and the IESO with respect to their respective roles in carrying out the implementation of the Ontario Fair Hydro Plan. o The indemnities are expected to provide coverage for both organizations and their respective Board members, officers and employees involved in implementing the plan. o As currently proposed, the Minister will be requested to consider and sign the section 28 approval forms and the transmittal letter to Minister Thibeault. **Update:** • Work is ongoing to finalize the s.28 (under the Financial Administration Act) approval for indemnities. Note: There could be potential interactions between the provincial guarantees and the indemnities sought by OPG and the IESO, discussed below. A due diligence is currently ongoing by MOF Legal, OFA and Energy staff. A final draft indemnities package is pending.
GA Refinancing Approach is Viewed as an Indirect-tax	L	H	• In principle, refinancing the GA to spread the costs of generation and conservation assets over the useful life of the assets presents only a "low" risk of being an unconstitutional tax, as each cohort of consumers pays for a proportion of the GA cost roughly equal to the proportion of the benefit they receive from the useful life of the assets. • Legal risk arises if it becomes apparent that the Government is not spreading cost so that it is shared proportionately by future consumers who cause a need for or benefit from the generation asset, but rather is doing so in order to lower the price in the "short" term by increasing the price in the long term. If the proposed financing served to encumber future consumers with a premium payment to cover the GA financing in order to subsidize current ratepayers, then there would be a moderately high constitutional risk that the financing proposal would result in an unconstitutional tax.

Risk	Likelihood (L/M/H)	Impact (L/M/H)	Mitigation Strategy/Update
			• The legislation attempts to mitigate the risks identified above by requiring that the costs moved into the future align with the benefits that future rate payers will receive. To create the flexibility to achieve this requirement, the amounts of the costs and benefits will not be enshrined in the legislation. **<u>Update:</u>** • The legislation was designed to mitigate this risk. • The Fair Allocation Amount, the process for which is further clarified under general regulation, will help to ensure that the allocation of costs associated with electricity generation facilities is reflected over the term of GA Refinancing.
2) Increasing social assistance clients' enrolment into the Ontario Electricity Support Program (OESP)			
Social Program Cost Estimating	M	M	• OESP costs will depend on uptake of the program, which will be impacted by the 50% increase in credits, enhanced eligibility, and work with MCSS on aligning OESP delivery with their social assistance programs • Work with Ontario Energy Board (OEB) and the Independent Electricity System Operator (IESO) to ensure access to data for regular forecasting. • A mechanism would be created in regulation to ensure that all parties are aligned in the yearly forecasting and costing of the program. • Social program regulations include provisions to require the IESO and the OEB to provide the Ministry with information required to update cost projections based on up-to-date figures.

APPENDIX H: UPDATE ON OUTSTANDING REPORT BACKS

Report back requirements	Expected Timing	Status (Pending from Energy)
Regulations - Report back to TB/MBC on the details of proposed regulations prior to going to LRC, and to provide the Board with an update towards completed legal, accounting and financing risk assessments	June 13 TB/MBC – Regulations for Electricity Support Programs (LRC/Cabinet - June 14) Late June TB/MBC – Regulations for Global Adjustment (LRC/Cabinet – June 27)	
Global Adjustment Refinancing - Include a report related to GA Refinancing on findings from sensitivity analysis completed as assumptions vary, such as under different recovery rates, different interest rates, different demand, etc., and combinations of key factors, and then to quantify the likelihood of high/medium/low impact scenarios, with assumptions and methodologies clearly specified and documented.	August TB/MBC (TBC) – Sensitivity Analysis	
Sensitivity Analysis – Electricity Social Programs - Include electricity social programs with details of forecasting models and costing estimates, including assumptions, sensitivities analysis that would allow identification of risks to the fiscal plan for Broadening RRRP, OESP. The Ministry is to include similar information for the Ontario Rebate for Electricity Consumers.	August TB/MBC (TBC) – Sensitivity Analysis	
Electricity Social Programs and GA Financing - To report back with final program details for 2017-18 for GA Refinancing and Electricity Social Programs, including fiscal plan implications and consumer impacts with detailed assumptions and methodologies specified and documented.	June 13 TB/MBC – Regulations for Electricity Support Programs (LRC/Cabinet - June 14)	
Risk Mitigation - To report back with updates to risk mitigation strategies that address key financial and operational risks.	TBD – potentially details would be in the Regulations submissions	
RRRP − Current program outcomes identified and results achieved to date, not just amount of funding flowed to consumers.	June 13 TB/MBC – Regulations for Electricity Support Programs (LRC/Cabinet - June 14)	

− Establishing program performance management framework including targets for the broadened program now government funded − Report on and assessment of impacts of consolidation of LDCs − Assessment of distribution rates and implications for the program		
OESP − Identify eligibility criteria, and refinements being made. − Current program outcomes identified and results achieved to date, not just amount of funding flowed to consumers. − Establishing program performance management framework including targets for the expanded program now government funded.	June 13 TB/MBC – Regulations for Electricity Support Programs (LRC/Cabinet - June 14)	
Affordability Fund - Direct the Ministry to report back through quarterly reporting process with program details, including performance management framework, and multi-year funding profile, and fiscal plan implications.	Quarterly Reporting	
On-Reserve First Nations Delivery Charge - Direct the Ministry to report back to TB/MBC by Spring 2017 with final program details, including performance management framework, and clarifying how the programs aligns with the significant Ontario Energy Board estimate of program costs, from $13M to $20M.	June 13 TB/MBC – Regulations for Electricity Support Programs (LRC/Cabinet - June 14)	
Industrial Conservation Initiative - Direct the Ministry to report back through quarterly reporting process with results achieved versus expectations for the ICI program, impacts of the change for participation, and impact for ratepayers as costs are recovered from ratepayers.	Quarterly Reporting	

APPENDIX I: OVERVIEW OF RISK (CENTRAL AGENCIES PERSPECTIVE)

Prepared by TBS staff, the following chart provides an overview of strategic (versus operational) risks to inform the approval/decision making process regarding the proposed legislation. Each part, GA Partial Refinancing & Electricity social programs, is a separate table.

Global Adjustment Partial Refinancing:

Objective: Provide immediate ratepayer relief by capping rate increases at Consumer Price Index (CPI) for four years and refinancing GA costs over a longer period of time. Develop and implement a financing structure that increases provincial borrowing, but has no impact on annual provincial surplus/deficit.

Risk	Level of Risk	Risk Response
The determination of the appropriate legal and accounting treatment to be applied to the financing model may result in the costs of GA smoothing being allocated to the province.	**Risk Likelihood:** Possible **Risk Impact:** Critical **Time Scale:** 6 to 12 months **Rationale:** • The structure of the GA deferral was designed to result in an increase in provincial borrowing, no increase in net debt and no impact on surplus/deficit. • The proposal assumes GA refinancing does not have a fiscal impact because the legal authority and accounting treatments are met. • If a favourable legal and accounting treatment is not implemented, there could be a negative impact on the province's fiscal plan up to $2.5B in 2017-18 and rising. • Rating agencies and investors in the Province's debt may view all of the borrowing as an obligation of the Province, especially taking into account the nature of provincial guarantees, which could put pressure on the Province's credit rating and overall borrowing capacity. • Proposed structure may result in a negative response from Ontario Auditor General (OAG) due to previous concerns regarding recognition of rate regulated assets and liabilities. The AG has already expressed concerns regarding the accounting treatment on the IESO's books which could lead to a qualification of the Province's consolidated financial statements. • Initial assessment of the accounting considerations suggests that the proposed model is in alignment with established accounting standards.	Risk can be mitigated by: • Commissioning external opinions on the legal, fiscal and accounting requirements, which could be used by the Province to justify structure of financial model and be utilized in discussions with the OAG. • Identify potential options to minimize the balance of rate regulated assets remaining on the IESO's books at fiscal year-end.

Risk	Level of Risk	Risk Response
Uncertainty in the financial model due to dependence on assumptions that are subject to potential volatility may result in higher than anticipated future costs for rate payers and the province.	**Risk Likelihood:** Likely **Risk Impact:** Major **Time Scale:** More than 36 months **Rationale** • The financial model developed is a high level and aggregate model, which is built on independent forecasts. There are a large number of assumptions built into the model explicitly and implicitly (as a larger number of assumptions are embedded into the other forecasts that are used as inputs into the model). • The proposal financing structure will accrue total interest of about $26.2 billion, which is sensitive to many factors, including interest rate, natural gas and carbon prices, generation costs and demand levels.	Risk can be mitigated by: • Development of a risk-based outlook, based on an analysis of scenarios, to determine the financial impact of potential changes in variables used in the financial models. • Building permissive language in the legislation and regulations to allow for timely course correction mechanisms (i.e. higher payment amounts and/or rate increases) • Regulations to prescribe the methodology to be applied by the Ontario Energy Board (OEB) to determine electricity rates in response to potential deviation from forecasted financing plans.
A legal determination that the Province is spreading the costs of GA financing in order to lower the price in the short term by increasing the price in the long term may result in the GA charge characterized as a tax and deemed unconstitutional.	**Risk Likelihood:** Medium **Risk Impact:** High **Time Scale:** Long-Term (More than 36 months) **Rationale** • If characterized as a tax, the GA charge could be subject to legal challenge and struck down as unconstitutional, allowing consumers to recover their payments. • Likelihood dependent on the extent the government is not able to show a proper match between the cost of providing facilities for electricity generation and the group of consumers who benefit year to year. The bigger the reduction in charges to current consumers, the higher likelihood of the risk being realized. • Internal and external expertise have provided opinion that the proposed structure is constitutionally sound in the short-term (2017-18), but the likelihood of the risk increases in the proceeding four years, which will impact commitment to keep rate increase in line with CPI. • If annual increases in bills or the commodity prices are subject to caps, additional borrowing/provincial funding may be required.	Risk can be avoided by: • Imposition of a valid tax. • Change in policy (i.e. allow greater rate increases during the remainder of the rate mitigation phase and higher increases and payment amounts throughout rate increase and payment phase). • Use of public funds to ease pressure. Risk can be mitigated by: • Improve forecasting model and close monitoring of costs and changes in variables built into model. • Analyze the costs and benefits of the long lived assets (specifically usability beyond a 20 year period) to assist in determining a supportable GA deferral structure. • Draft legislation with built-in provisions to allow for the balance of the legislation to remain in effect if any particular clause or section is struck down by a court.

Risk	Level of Risk	Risk Response
Financing the costs of GA smoothing through OPG SPV/Trust and the volatility of interest rates may increase the cost of GA smoothing and/or require additional provincial funding.	**Risk Likelihood:** Possible **Risk Impact:** Moderate **Time Scale:** 12 to 24 months **Rationale** • The proposed structure will be reviewed by credit agencies to allow OPG to borrow in the open market. Depending on assessment, there may be an impact on interest rate for borrowing, the amount of equity/funding the province may need to provide and the requirement for a provincial guarantee. • As the OPG SPV/Trust will be borrowing in its own corporate capacity from the public markets, it will likely incur a higher interest cost compared to the Province's borrowing. • If the Trust can't raise the full funding requirements, additional cash injections would be required. If the borrowing cap of $28B is reached sooner than forecast, the province may have to provide incremental funding to float the program to 2047. • Beyond 2022, when steep increases are required, there will likely be additional pressure on the government to offset a part of the scheduled increases. • Risk that credit rating agencies may perceive OPG SPV/Trust's borrowing as debt supported by Province, impacting Province's ratings and cost of borrowing.	Risk can be avoided by: • Province providing a potential guarantee for the cost of borrowing – however, would redirect risk back to the Province and negate benefits of proposed financing structure. Risk can be mitigated by: • Equity injections from the province to support OPG as the owner and manager of GA refinancing and allow OPG to strengthen the capital structure of the Trust in order to secure financing at a reasonable cost. • Proposed legislation to enable GA refinancing has been draft with input from third-party financers. Provides a 'narrow' provincial guarantee and ensuring that debt holders have the right of action against a future government to recover the amount outstanding including interest, fees, expenses and any damages.

Risk	Level of Risk	Risk Response
The determination of the appropriate legal and accounting treatment to be applied to the financing model may result in the costs of GA Refinancing having a fiscal impact to the province.	**Risk Likelihood:** Possible **Risk Impact:** Critical **Time Scale:** 6 to 12 months **Rationale:** • The structure of the GA deferral was designed to result in an increase in provincial borrowing, no increase in net debt and no impact on surplus/deficit. • The proposal assumes GA refinancing does not have a fiscal impact because the legal authority and accounting treatments are met. • If a favourable legal and accounting treatment is not implemented, there would be a negative impact on the province's fiscal plan of up to $2.5B in 2017-18 and rising. • Rating agencies and investors in Province's debt may view all of the borrowing as an obligation of the Province, which could put pressure on the Province's credit rating and overall borrowing capacity. • The proposed structure may result in an opinion from the Ontario Auditor General (OAG) considering previous concerns regarding recognition of rate regulated assets and liabilities. The OAG may take this into account when the provincial books are audited. • An initial assessment of the accounting considerations suggests that the proposed model is in alignment with established accounting standards. Additional analysis is still required.	Risk can be mitigated by: • Commissioning external opinions on the legal, fiscal and accounting requirements, which could be used by the Province to support discussions of the financial model with the OAG.
Uncertainty in the financial model due to dependence on assumptions that are subject to potential volatility may result in higher than anticipated future costs for rate payers and the province.	**Risk Likelihood:** Likely **Risk Impact:** Major **Time Scale:** More than 36 months **Rationale** • The financial model developed is a high level and aggregate model, which is built on independent forecasts. There are a large number of assumptions built into the model explicitly and implicitly (as a larger number of assumptions are embedded into the other forecasts that are used as inputs into the model). • The proposal financing structure will accrue total interest of about $26.2 billion, which is sensitive to many factors, including interest rate, natural gas and carbon prices, generation costs and demand levels.	Risk can be mitigated by: • Development of a risk-based outlook, based on an analysis of scenarios, to determine the sensitivity and financial impact of potential changes in variables used in the financial models. • Building permissive language in the legislation and regulations to allow for timely course correction mechanisms (i.e. higher payment amounts and/or rate increases) • Regulations to prescribe the methodology to be applied by the Ontario Energy Board (OEB) to determine electricity rates in response to potential deviation from forecasted financing plans.

Risk	Level of Risk	Risk Response
A legal determination that the Province is spreading the costs of GA refinancing in order to lower the price in the short term by increasing the price in the long term may result in the GA charge characterized as a tax and deemed unconstitutional.	**Risk Likelihood:** Possible **Risk Impact:** Major **Time Scale:** Long-Term (More than 36 months) **Rationale** • If characterized as a tax, the GA charge could be subject to legal challenge and struck down as unconstitutional, allowing consumers to recover their payments. • Likelihood dependent on the extent the government is not able to show a proper match between the cost of providing facilities for electricity generation and the group of consumers who benefit year to year. The bigger the reduction in charges to current consumers, the higher likelihood of the risk being realized. • Internal and external expertise have provided opinion that the proposed structure is constitutionally sound in the short-term (2017-18), but the likelihood of the risk increases in the proceeding four years, which will impact commitment to keep rate increase in line with CPI. • If annual increases in bills or the commodity prices are subject to caps, additional borrowing/provincial funding may be required.	Risk can be avoided by: • Imposition of a valid tax. • Change in policy (i.e. allow greater rate increases during the remainder of the rate mitigation phase and higher increases and payment amounts throughout rate increase and payment phase). • Use of public funds to ease pressure. Risk can be mitigated by: • Improve forecasting model and ongoing monitoring of costs and changes in variables built into model. • Analysis of the costs and benefits of the long lived assets (specifically usability beyond a 20 year period) to assist in determining a supportable GA deferral structure. • Draft legislation with built-in provisions to allow for the balance of the legislation to remain in effect if any particular clause or section is struck down by a court.

Risk	Level of Risk	Risk Response
Refinancing GA costs through an OPG SPV Trust may increase costs and/or require provincial funding.	**Risk Likelihood:** Possible **Risk Impact:** Major **Time Scale:** 12 to 24 months **Rationale** • The proposed borrowing structure will be reviewed by credit agencies to allow OPG to borrow in the open market. Depending on assessment, there may be an impact on the interest rate for borrowing, the amount of equity / funding the province may need to provide and the requirement for a provincial guarantee. • As the OPG SPV/Trust will be borrowing in its own corporate capacity from the public markets, it will likely incur a higher interest cost compared to the Province's borrowing. • There is a risk that credit rating agencies may perceive OPG SPV/Trust's borrowing as debt supported by Province, impacting Province's own ratings and cost of borrowing. • If the Trust can't raise the full funding requirements, additional cash injections would be required. If the borrowing cap of $28B (in the March 1, 2017 Cabinet Submission) is reached sooner than forecast, the province may have to provide incremental funding to float the program to 2047. • Beyond 2022, when steep increases are required, there will likely be additional pressure on the province to offset a part of the scheduled increases. • Fiscal impacts will be subject to fluctuations in Ontario electricity demand, GA and interests rates in the medium-to long term.	Risk can be mitigated by: • Providing a "provincial guarantee" for the cost of borrowing. • Drafting legislation to provide assurance to OPG and investors regarding the permanence of the GA refinancing framework and the authority of the legislation to pass the legislation; and enable the Province to guarantee borrowing of the trust in the event of a market disruption. • Specifics of a guarantee are dependent on the negotiation of agreements not yet initiated. • Equity injections from the province to support OPG as the owner and manager of GA refinancing and allow OPG to strengthen the capital structure of the Trust in order to secure financing at a reasonable cost.

Electricity social programs (Enhancing Electricity Support & Conservation Programs):

Objective: Shift funding of existing and new electricity support programs (RRRP, OESP, Affordability Fund, First Nations Credit) from rate to tax base.

Risk	Level of Risk	Risk Response
Uncertainty in forecasting due to exposure to changes and/or volatility (i.e. interest rates, electricity usage patterns, and distribution costs) may result in higher than anticipated fiscal impacts for the Province.	**Risk Likelihood:** Possible **Risk Impact:** Major **Timescale:** 12 to 24 months **Rationale:** • The energy sector is complex and a number of key assumptions used as inputs into forecasting model are variables/forecasts themselves, resulting in a high inherent risk that cost estimates are inaccurate. • Fiscal projection is highly dependent on factors which can fluctuate from year to year, including: o electricity usage; o distributions costs; and o consumer consumption patterns that may change due to extreme weather or other factors. • Fiscal projection is subject to knowledge of future distribution costs and dependent on submission of cost of service applications by Hydro One and LDCs. o Enhanced RRRP may create disincentives from the eligible LDCs towards productivity and performance improvements and/or cause ineligible LDC's to drive up distribution costs to gain access to program.	Risk can be mitigated by: • Development of a risk-based outlook, based on an analysis of scenarios, to determine the sensitivity and financial impact of potential changes in variables used in the forecasting models.

Hi James/Chris

I did have one follow-up. Did the final minute still include the following note (from proposed minute on page 9 of attached draft RAN)?

"Note the Ministry is working with central agencies on the credit facility for the Independent Electricity System Operator (IESO) and on a request for indemnities for Ontario Power Generation and IESO."

We're briefing Minister at 10am on Indemnity Agreement among other things and just want to confirm that work on this agreement was noted in the minutes.

Thanks
Bruno

Hi,

Attached is Energy's Draft Submission received (please keep confidential as not approved by Energy). The second file is a draft assessment note for review and comment. After consolidating feedback from central agencies, I'm intending to share with Energy later on Monday. The item is at Treasury Board Tuesday in the early afternoon.

Subject: RE: Policy question re OFHP Credit Facility Agreement
Date: Friday, August 04, 2017 3:56:03 PM

Hi John,

Is it fair to say that the earlier IESO (and original OPA) credit facility was unsecured because the OPA (and IESO) had access to the rate base for the items that the facility was bridging for (e.g., RPP)?

The issue here might be that the timing of the sale of the regulatory asset is subject to some uncertainty, and that access to the ratebase is deferred for a few years.

Is there any suggestion of a risk of a provision being required to be taken against draws? Under normal circumstances, of course, this is supposed to be a revolving and short-term facility – fair to say?

Ron

Subject: Policy question re OFHP Credit Facility Agreement
Importance: High

Hi Bruno and John,

I have some additional information pertaining to the structure of the OFA loan to IESO re: OFHP. While this information adds context, it doesn't address the policy question of whether an unsecured loan is appropriate (based on the extent of the insolvency risk) for this regulatory asset.

The current draft FHP Credit Facility Agreement is consistent with the OFA Lending Policy (last revised and approved April 16, 2010 – *status TBC*), which provides that except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, the OFA will generally lend on an unsecured basis (apart from the intercept provision) in respect of loans made by the OFA to public bodies (IESO is a public body for the purposes of CIPA). As such, the structure of this loan is consistent with the Policy (subject to my note below re: intercept provision). In my review of the supporting policy documentation, including the LRC minute, I didn't see any reference to a secured lending structure and I don't believe that there is any direction requiring this to be a secured loan. That being said, I query whether OFA CEFD staff are comfortable with this approach (see below).

In terms of the intercept provisions, which are required pursuant to s. 23 of CIPA, I have asked Toby from MOF Legal if they are aware of any agreement between the Ministry of Energy and the IESO agreeing that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the IESO amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under this loan agreement (as required by CIPA)? Are you aware of any such agreement? However, even if there were such an agreement in place, it is unclear to whether adding intercept provisions to the credit facility agreement, will provide further comfort. I

plan to discuss this matter further with MOF Legal.

Based on the foregoing (and pending any additional information that Toby may obtain from his discussions with the Ministry of Energy), I defer the following question to CEFD staff:

> **Are you comfortable with the current structure of this loan as an unsecured loan (and the risk that this may entail)?** This decision ultimately needs to be made by business/policy people.
>
> - **If yes,** the next draft of the agreement will be available in the next day or so to send to IESO for review. I will work with MOF Legal to draft/leverage intercept provisions to mitigate this risk (as far as possible, based on the foregoing). We are also working on the permitted liens, *pari passu* and negative pledge provisions of the draft agreement, as previously discussed.
>
> - **If no,** additional Ministerial/TB direction, and a new legal agreement (likely with the assistance of external legal counsel) will be required. This will take additional time.

Please do not hesitate to contact me if you would like to discuss further.

Thank you,

Lisa

Hi Bruno,

Would it have been an option or feasible for the credit facility to be secured by the regulatory asset? In theory, as the draws would only be until the financing entity purchases the regulatory asset, at that point the security could be released if IESO were required to use a portion of the proceeds of the sale of the regulatory asset to pay down the credit facility.

Subject: FW: Policy questions re OFHP Credit Facility Agreement

Hi Ron, John

I met with OFA Legal and Documentation on these ongoing discussions regarding the IESO/OFA credit facility. At this point in order to move this forward, a directive is required from the Minister exempting the intercept provision with respect to the $2B facility. This is because the OFA lending policy requires that unsecured loans have an intercept provision, which allows the Minister to deduct from a public bodies appropriation owing amounts. There is no appropriation for IESO, so this provision, is not required. They are looking to EFB to draft the directive and supporting briefing note. We are a bit short on resources, but I can assign someone to this next week, and I'm sure we can get input from both documentation and OFA Legal on this.

The Minister is away until September. Documentation will communicate with IESO on timing and process issues. Until September IESO will use the $975M facility. It is expected that by September there will be another draw taking IESO draw from $250M to $503M. There will need to be a process to move the draw from one facility to another. I don't think we are involved in that.

Bruno

Hi Ken,

Thanks for clarifying the approach on this matter.

Based on this, we will not be seeking a security interest in the Regulatory Asset and will be seeking a directive ASAP for an exemption from inclusion of the intercept provision in the $2B FHP facility. We will inform IESO that current $975 million facility will be used for funding draws until such time as we are able execute the new $2B FHP facility.

Thanks,
Sarah

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Sarah

Thanks for clear detailed email with good questions, however, instead of responding to each of the questions, I am going back to my earlier premise that none of the loans currently on the OFA loan book have any kind of security attached to them. A good example is the current line of credit extended to the IESO for $975 million. Given this I am very reluctant to impose a security requirement the proposed $2 billion facility to the IESO from the Province.

I understand that the security requirement which is part of the OFA lending policy can waived with ministerial approval, I suggest that it be obtained as soon as possible. If there are delays in obtaining this approval, especially since the minister will be on vacation from the end of this week onwards, I also suggest, if possible the previous facility of $975 million continue until the new facility is in place. This will allow IESO to fund any regulatory assets created in the intervening period.

I have discussed my proposed approach with Gadi, who is supportive.

Thanks

Ken k

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Ken,

Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.

Security Interest - Background

In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

> The steps of the transaction would be:
>
> 1 – The IESO makes payments to electricity producers at the contracted rate, but charges consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;
> 2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;
> 3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the asset free and clear of any security interest;
> 4 – The IESO repays the OFA for the loan.
>
> Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

> *"Dear Anthony,*
>
> *My apologies for the delay in providing the next turn of the FHP Credit Facility Agreement. We became aware of a potential requirement under the OFA's lending policy which needs to be considered internally for inclusion in the agreement, for which we require additional information. Would you kindly provide answers to the following questions?*
>
> - *Does IESO have other financial obligations (such as but not limited to swap agreements, other financial obligations etc.) that could become due and adversely impact IESO's ability to pay its debts when they become due?*
> - *Does IESO have any other financial obligations or security interests that could attach to the Regulator Asset/Special Purpose Vehicle?*
> - *[Include additional questions]*
>
> *I also want to make you aware that due to the internal assessment that must be made in respect of the OFA's lending policy, we will likely not be able to execute the new FHP facility prior to IESO's next funding request (for which IESO will be providing notice on August 17th, for funding on August 21st). Accordingly, the August FHP draw will be made under the existing $975 million credit facility. At the time we execute the new $2B facility, we would be able to transfer (by incorporating into the agreements the required provisions or by another*

agreed mechanism) any amount of loans exceeding $475 million (being the reduced facility limit under the draft amending agreement) under the existing facility to the new facility.

Best regards,"

In reference to the last sentence above in the draft e-mail to IESO, the intended financing structure for IESO credit facilities is to (i) execute a new $2B FHP facility and (ii) simultaneously reduce the existing $975 million facility by $500 million to $475 million. This would create a total aggregated limit of $2.475 billion. Ideally these 2 agreements would have been executed simultaneously prior to the August draw from IESO (since IESO's August draw will likely bring the balance of the existing credit facility to approx. $500M, exceeding the intended revised limit of $475 million).

Question for Ken: When we do execute both agreements, are there any obstacles from an operational perspective (settlement, cash, accounting, risk) with transferring any 'excess loan amount' from the existing credit facility to the new FHP credit facility? We would be looking to re-allocate certain loans from the existing facility to the new facility, without any cash flow impact. From a legal perspective we expect this should be fine, as we can work out the legal particulars with IESO.

General Note re: Timing Impact of Intercept Provision

Regardless of whether the OFA decides to include or exclude the intercept provision, the execution of the FHP facility will take longer than expected, likely taking an additional number of weeks.

If the decision is made not to include the intercept provision, a directive will need to be obtained from the Minister to this effect, potentially taking a few weeks.

If it is a determined an intercept provision is required, then this will likely even take longer than getting a directive from the Minister. In this case, the OFA would need to go back to the Ministry of Energy to effect the following: (I)Ministry of Energy will need to agree with IESO on acceptance of the inclusion of intercept provision in the FHP credit facility agreement and (ii) the OFA and Ministry of Energy will require an MOU whereby the parties agree on the inclusion of a the intercept provision in the FHP credit facility agreement.

Thanks
Sarah

Totally agree with Bruno, the province should not be taking a security intent in the reg asset, that would make the sale to the SPV or trust rather difficult.

It would also create issues in terms of the SPV's ability to obtain an appropriate credit rating as well as issue debt in the capital markets.

Thanks

Ken k

Thank you Sarah. I should add that under the OFA Lending Policy, the intercept provision (and accompanying MOU, etc.) must be included in OFA loan agreements *except* where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, if it is determined that the intercept provisions are not required/relevant in this case, Ministerial direction will be required. We can discuss further this afternoon.

Lisa

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,

In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
>
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.

Thank you,
Sarah

Subject: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hi Sarah H. and Will,

Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be minimal.

Before proceeding, we would like to ensure that the nature of the loan, the impact of intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.
    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.
- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Hi Bruno,

I would not think it unreasonable for MOF and OFA Legal to look for a point-by-point response to the email(s) from Toby and Lisa -- to the degree that the IESO credit facility situation may differ from that of loans to public bodies.

This would include discussing the point on the regulatory asset and the ultimate planned sale of the regulatory asset, and if there should be any provisions earmarking what the IESO is to do with proceeds from that sale – ensuring that proceeds be used to pay down the draws on the OFA credit facility.

As noted before, whatever is done would have to be viewed within the context of the objectives of the FHP, and not interfering with the achievement of those objectives (rather, the intent is to support them).

Not sure if putting in a security interest on the regulatory asset would be problematic from a smooth flowing of the FHP perspective.

I might think that a provision on use of proceeds from IESO's sale of the regulatory would be easier to put in place, without affecting the FHP mechanics, but others should weigh in on that.

Hi Ron

The emails below are in regard to the OFA / IESO lending agreement (and to emails from last week). The agreement is near final, but got hung up last week on a discussion of the $2B facility being unsecured (as are other loans) and whether this loan should be treated as all others.

Sarah Harris (Documentation is asking us to opine). My non-expert reaction was that it would be treated as other loans – as Ken suggests below. However, MoF Legal (Toby Whitfield) raises questions (below) which I'm not in a position to answer.

We have an internal call at 2pm today to discuss. Per John's reply to Documentation (Will Tan) last week, I'm inclined to support the current draft based on Ken's advice. But I want to check with you first in case you have other thoughts.

Happy to discuss.

Thanks
Bruno

Hi Ron

Yes, I believe that was a possibility and that was the option raised by MoF and OFA legal. But I think Ken's response below (with Gadi's) backing was let's move forward with the unsecured loan per other OFA facilities. I'm not sure if this was due to a combination of the additional tome it would take to redraft and get agreement with IESO and/or judgement on the level of risk in going with an unsecured facility. I believe IESO had issue with the secured loan language although I'm unsure of reasons. But will look into that.

Bruno

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Bruno,

Would it have been an option or feasible for the credit facility to be secured by the regulatory asset? In theory, as the draws would only be until the financing entity purchases the regulatory asset, at that point the security could be released if IESO were required to use a portion of the proceeds of the sale of the regulatory asset to pay down the credit facility.

Ron

Subject: FW: Policy questions re OFHP Credit Facility Agreement

Hi Ron, John

I met with OFA Legal and Documentation on these ongoing discussions regarding the IESO/OFA credit facility. At this point in order to move this forward, a directive is required from the Minister exempting the intercept provision with respect to the $2B facility. This is because the OFA lending policy requires that unsecured loans have an intercept provision, which allows the Minister to deduct from a public bodies appropriation owing amounts. There is no appropriation for IESO, so this provision, is not required. They are looking to EFB to draft the directive and supporting briefing note. We are a bit short on resources, but I can assign someone to this next week, and I'm sure we

can get input from both documentation and OFA Legal on this.

The Minister is away until September. Documentation will communicate with IESO on timing and process issues. Until September IESO will use the $975M facility. It is expected that by September there will be another draw taking IESO draw from $250M to $503M. There will need to be a process to move the draw from one facility to another. I don't think we are involved in that.

Bruno

Hi Ken,

Thanks for clarifying the approach on this matter.

Based on this, we will not be seeking a security interest in the Regulatory Asset and will be seeking a directive ASAP for an exemption from inclusion of the intercept provision in the $2B FHP facility. We will inform IESO that current $975 million facility will be used for funding draws until such time as we are able execute the new $2B FHP facility.

Thanks,
Sarah

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Sarah

Thanks for clear detailed email with good questions, however, instead of responding to each of the questions, I am going back to my earlier premise that none of the loans currently on the OFA loan book have any kind of security attached to them. A good example is the current line of credit extended to the IESO for $975 million. Given this I am very reluctant to impose a security requirement the proposed $2 billion facility to the IESO from the Province.

I understand that the security requirement which is part of the OFA lending policy can waived with ministerial approval, I suggest that it be obtained as soon as possible. If there are delays in obtaining this approval, especially since the minister will be on vacation from the end of this week onwards, I also suggest, if possible the previous facility of $975 million continue until the new facility is in place. This will allow IESO to fund any regulatory assets created in the intervening period.

I have discussed my proposed approach with Gadi, who is supportive.

Thanks

Ken k

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Hi Ken,

Yesterday we held an internal meeting to discuss issues identified by Lisa and Toby regarding inclusion of an intercept provision in the new $2B FHP Credit Facility, as well the factors that the OFA needs to consider on whether or not to seek a security interest in the Regulatory Asset. We will need to obtain further information from IESO to inform the OFA's final determination on these matters, and also require your input on certain items below.

Security Interest - Background

In reference to Bruno's comments and your comments below, if the OFA were to take a security interest in the Regulatory Asset, any security interest would only be applicable while the IESO was the holder of the asset, and only while it is being held by the IESO with money borrowed from the OFA.

The steps of the transaction would be:

1 – The IESO makes payments to electricity producers at the contracted rate, but charges

consumers a rate that is set by the FHP, which leaves a shortfall that must be made up;
2 – The IESO borrows money from the OFA to finance the shortfall – it is at this stage that the OFA would consider taking a security interest in the asset, up to the amount that the OFA lends to the IESO;
3 – The IESO bundles the right to charge consumers for the shortfall in the future through the GA into the Regulatory Asset, which is sold to the OPG SPV, which sale can be of the asset free and clear of any security interest;
4 – The IESO repays the OFA for the loan.

Steps 3 and 4 can happen simultaneously. If it is deemed to be something that the OFA would like to do, the security interest would only apply while the IESO holds the assets that it creates using the OFA loan to finance the purchase of electricity that it does not charge for. Once the asset is sold to the OPG SPV, the loan can be repaid and the security interest that the OFA had in the asset can be discharged.

Intercept Provision - Background

Regarding the inclusion of the intercept provision, the OFA Lending Policy (attached, see p. 4 "Security" section), stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

Question for Ken: Are you aware of how we might determine if the Legislature has appropriated funds for IESO? If the amounts are minimal, there would seem token benefit to include the intercept provision in the new FHP credit facility agreement

Draft E-mail to IESO

We would like to ensure that we obtain from IESO all the information that would be required to make a risk assessment as to whether an intercept provision and/or a security interest by the OFA in the Regulatory Asset would be required.

Request for Ken: We are drafting an e-mail to send to IESO today (below) to request information that is pertinent for an analysis regarding these matters. We would appreciate if you could please review the draft and amend it to include all key questions that would be required to make a risk assessment.

"Dear Anthony,

My apologies for the delay in providing the next turn of the FHP Credit Facility Agreement. We became aware of a potential requirement under the OFA's lending policy which needs to

be considered internally for inclusion in the agreement, for which we require additional information. Would you kindly provide answers to the following questions?

- *Does IESO have other financial obligations (such as but not limited to swap agreements, other financial obligations etc.) that could become due and adversely impact IESO's ability to pay its debts when they become due?*
- *Does IESO have any other financial obligations or security interests that could attach to the Regulator Asset/Special Purpose Vehicle?*
- *[Include additional questions]*

I also want to make you aware that due to the internal assessment that must be made in respect of the OFA's lending policy, we will likely not be able to execute the new FHP facility prior to IESO's next funding request (for which IESO will be providing notice on August 17th, for funding on August 21st). Accordingly, the August FHP draw will be made under the existing $975 million credit facility. At the time we execute the new $2B facility, we would be able to transfer (by incorporating into the agreements the required provisions or by another agreed mechanism) any amount of loans exceeding $475 million (being the reduced facility limit under the draft amending agreement) under the existing facility to the new facility.

Best regards,"

In reference to the last sentence above in the draft e-mail to IESO, the intended financing structure for IESO credit facilities is to (i) execute a new $2B FHP facility and (ii) simultaneously reduce the existing $975 million facility by $500 million to $475 million. This would create a total aggregated limit of $2.475 billion. Ideally these 2 agreements would have been executed simultaneously prior to the August draw from IESO (since IESO's August draw will likely bring the balance of the existing credit facility to approx. $500M, exceeding the intended revised limit of $475 million).

Question for Ken: When we do execute both agreements, are there any obstacles from an operational perspective (settlement, cash, accounting, risk) with transferring any 'excess loan amount' from the existing credit facility to the new FHP credit facility? We would be looking to re-allocate certain loans from the existing facility to the new facility, without any cash flow impact. From a legal perspective we expect this should be fine, as we can work out the legal particulars with IESO.

General Note re: Timing Impact of Intercept Provision

Regardless of whether the OFA decides to include or exclude the intercept provision, the execution of the FHP facility will take longer than expected, likely taking an additional number of weeks.

If the decision is made not to include the intercept provision, a directive will need to be obtained from the Minister to this effect, potentially taking a few weeks.

If it is a determined an intercept provision is required, then this will likely even take longer than

getting a directive from the Minister. In this case, the OFA would need to go back to the Ministry of Energy to effect the following: (I)Ministry of Energy will need to agree with IESO on acceptance of the inclusion of intercept provision in the FHP credit facility agreement and (ii) the OFA and Ministry of Energy will require an MOU whereby the parties agree on the inclusion of a the intercept provision in the FHP credit facility agreement.

Thanks
Sarah

Totally agree with Bruno, the province should not be taking a security intent in the reg asset, that would make the sale to the SPV or trust rather difficult.

It would also create issues in terms of the SPV's ability to obtain an appropriate credit rating as well as issue debt in the capital markets.

Thanks

>
> Apologies for delay. I perceive differing levels of comfort with the issue of security so I'm OK with discussing the questions raised this afternoon. I am concerned whether we have people on the call that can answer all the questions.
>
> But I have a basic question with respect to the issue of the Province taking a security interest in the asset and differences with this loan from others. Under the OFHP, the sale of the asset ultimately allows for payments to electricity generators. If the Province has a security interest in the asset, can we envisage a potential situation wherein the IESO would be repaying the OFA loan rather than paying generators, which would be

problematic for OFHP?

I had discussed with Ron. In regard to Toby's last question, Ron was wondering if there might be a provision on use of proceeds from IESO's sale of the regulatory asset. Ron had also asked whether OPCD had opined on any accounting issues, and whether OIC or Minister's directive gave any particular direction on this issue. In regard to the latter, I have checked. Minister's directive and OIC were fairly high level noting specific terms and conditions to be set out in the Agreement.

Bruno

Subject: RE: Policy questions re OFHP Credit Facility Agreement

Thank you Sarah. I should add that under the OFA Lending Policy, the intercept provision (and accompanying MOU, etc.) must be included in OFA loan agreements *except* where otherwise directed by the Minister of Finance, Treasury Board, or Cabinet. As such, if it is determined that the intercept provisions are not required/relevant in this case, Ministerial direction will be required. We can discuss further this afternoon.

Subject: FW: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hello Bruno and John,

In advance of our internal call this afternoon, Lisa and Toby have prepared the following e-mail below to consider whether the OFA should consider taking a security

interest in the Regulatory Asset as security for $2B credit facility, as well as the inclusion of the intercept provision. Ken Kandeepan expressed the following view yesterday:

> *"…[the $2B Facility] is unsecured but so is every loan issued by the OFA to a public body so not sure why the risk associated with this loan is greater or for that matter lower than the loans currently in the OFA's loan book.*
>
> *As such, this should be treated exactly like all the other loans. Note that the IESO is fully consolidated with that of the Province so loans issued by the OFA to IESO will be a wash upon consolidation."*

In light of this, could you please advise if there are there any additional considerations regarding the FHP structure that would could necessitate the inclusion of an intercept provision in the $2B facility and/or the OFA taking a security interest in the Regulatory Asset?

I am including Ken and Mike Manning in this e-mail, should they have any additional input or insight on this matter.

Thank you,
Sarah

Subject: Policy questions re OFHP Credit Facility Agreement
Importance: High

Hi Sarah H. and Will,

Based on the e-mails to date, I understand that OFA staff held a conference call yesterday and based the OFA Lending Policy and past practices, may have concluded that it is appropriate for the loan to the IESO in relation to the OFHP to be unsecured, as per other OFA loans to public bodies. However, as neither Toby (from MOF Legal) nor I were part of the aforementioned call, we wanted to clarify that this loan is NOT necessarily the same as other OFA unsecured loans to public bodies, and as such, the protection provided by the "intercept" provisions of the standard OFA loan agreements have limited application in this particular case (which is likely the reason why these provisions were not included in the original drafts). Our understanding is that, although the intercept provisions are intended to allow the Minister of Finance to deduct from money appropriated by the Legislature for payment to the Borrower amounts equal to any amounts that a Borrower fails to pay to the OFA on account of indebtedness under the loan agreement, in the case of the IESO as Borrower, these amounts are likely to be minimal.

Before proceeding, we would like to ensure that the nature of the loan, the impact of intercept provisions, and the insolvency and operational risks, have all been considered. Toby has succinctly summarized the questions which still need to be addressed during our call this afternoon in the e-mail which I have forwarded below.

Subject: RE: Policy question re OFHP Credit Facility Agreement

Lisa,

I have attempted to summarize my questions/issues in the below. Let me know if you have anything to add or have any edits.

The concerns I have with the IESO loan, and that should be considered are related to what could happen to the Regulatory Asset (the "Asset") if there are any credit or liquidity issues at the IESO. Because the Asset is something that it is possible to take security in, and that is an intangible that may be subject to a floating charge (ie, as a result of a GSA or from a financing agreement) I thought it would be prudent to consider whether the OFA should take a security interest in the Asset as security for the loan.

I am not familiar with the types of financial arrangements or other obligations that the IESO may be a party to, either as a result of its market operations or otherwise, but it may be possible that the IESO has entered into such arrangements, such as swaps or other derivatives agreements, loans or other financing arrangements for which security could be given.

I am not aware of what financial guarantees or other arrangements may be in place such that the Province may have guaranteed the IESO's obligations, but I don't believe that there are any. My understanding is that the IESO is consolidated with the Province's books, but that the IESO is not a crown agent, and the Province is not liable for the IESO's obligations to third parties. However, I am not sure about the underlying facts without more input from ENERGY and the IESO.

In light of these questions it may be worthwhile to consider some related issues:

- How does the proposed IESO loan compare to other OFA loans made to public bodies, such that it is appropriate to use the same requirements?
    - Size of loan – it is my understanding that there are not many loans that approach the size of the $2 billion loan that is proposed to the IESO.

    - Are the obligations of the IESO the obligations of the Province, and how does this compare to other public body loans?
    - What other financial obligations could the IESO have (such as swap agreements, other financial obligations) that could become due or create credit risk?
    - If in many public body loans, there is an intercept and an MOU with the appropriate ministry to create some security, does that make sense in this context? Are there significant transfers to the IESO?
    - Note that the OFA loan to the ROM was secured by pledges and an intercept, and that other Provincial loans to public bodies or other groups may be secured.
- Does the Province/OFA understand the financial obligations of the IESO such that it is confident that no other security interest could attach to the Asset?
- Given that the debt is specifically for the purpose of creating the Asset which will be "warehoused" at the IESO, once the Asset is sold to the financing entity, how will the Province ensure that the proceeds can only be used to repay the loan?

Subject: RE: Preliminary notice of first asset purchase and debt issuance under Fair Hydro Program

Ken R.,

Thanks for your email, and the chat last Friday morning to clarify the proposed process for the first transaction. As you know it is important to Ministry to ensure that we follow the proper process at all times, particularly for the first transaction. Here is the proposed process as I understand it from our chat.

1) IESO asset to be transferred is the balance as of November 30. I understand the projected balance is ~$1.2B of which 44 per cent which will covered by the request for the equity injection.
2) On Dec 7 or 8, IESO will get confirmation of the November 30 balance and relay to OPG
3) On Dec 7 or 8, OPG to send Ministry of Energy an unofficial, unsigned Transfer Notice indicating the balance, and the amount requested for equity injection along with the Share Subscription form. This notice will be missing the closing date but all other information will be complete and accurate.
4) Ministry of Energy to commence reviewing the request on the assumption that a formal signed Transfer notice will be provided between Dec 12 –15.
5) Ministry of Energy to make formal request to the OFA under an MOU, once the formal signed Transfer Notice is received by the Ministry from OPG. Only once the formal signed Transfer Notice is received by the Ministry of Energy from OPG, will the 5 day period starts, but we will endeavour to expedite, although only 2 of the 5 days are under our control.
6) OFA staff to process the payment within three business days as per the terms of the MOU and wire funds to the appropriate account as per the MOU

From a Ministry of Energy perspective, we are ok with the above approach for this transaction. Our main concern, legal and policy, is ensuring that we have the formal signed Transfer Notice in hand before making any request to the OFA.

I understand that the closing date of the equity injection is the same as the closing date for the external financing which makes it challenging to provide the formal Transfer Notice within the 5 days. Going forward, you mentioned the warehousing facility may help with this timing issue.

Mike M and Ken K may have additional comments from an OFA perspective.

Subject: Preliminary notice of first asset purchase and debt issuance under Fair Hydro Program

Shruti / Mike / Ken K,
Just wanted to give you a preliminary notice of expected funding requirements over the next month to facilitate the first purchase of the asset from the IESO and corresponding debt issued by the Trust, a part of which is supported by the equity injection from the Province. A formal notice will be provided in accordance with the relevant processes but given that this is the first transaction during a month when many people are away then we are providing this preliminary notice to help with lining up the relevant approvals.

The timing of the asset purchase will correspond to the debt issuance by the Trust. The exact timing will depend on completing the items required to market to investors – program documents and credit rating are the key elements.

In terms of dollar amount we anticipate the Trust purchasing the entire variance account balance. This is expected to be about $1.2 billion. As of the end of October, the account is just over $1 billion. It is expected that the senior debt for this first transaction will be both term debt and warehouse debt.

Since this is the first transaction in this structure and there are a number of moving parts at the current time then we will need to have some flexibility on the 5 business day requirement between notification and funding. One of the challenges is to include the Transfer Notice as part of the request for the equity since there is a similar 5 business day notice requirement. We may need to issue the equity request without the Transfer Notice attachment which would follow shortly after.

At the current time the expected dates are:
Pricing of term debt issuance – current target is sometime between Dec 12 to 15
Closing of debt issuance – Dec 19 to 22 (standard for securitization is T+5)

Closing date would correspond to the date for OPG to issue Class A shares to the Province in exchange for the corresponding funding from the Province.
Thanks,
Ken R

Hi Matt,

Can you confirm the following 1 thru 3. I'm working on 4 and 5. If you have any questions please let me know.
Thanks,
Anthony

1) What is the urgency for tracking the September 26th board date?
2) Do you know if OFA has engaged the DMO/MO and if they are in agreement with tracking this board date?
3) Do we know when legal will be signing off on the submission?
4) What are the expectations around engaging/seeking MOE Minister signoff/agreement?
5) Has TBS indicated whether or not a MO-to-MO reach out will be required since this is blowing the 3-week rule?

Can you confirm the following 1 thru 3. I'm working on 4 and 5. If you have any questions please let me know.

Thanks,

Anthony

1) What is the urgency for tracking the September 26th board date?

   The Provincial Guarantee is a required part of the refinancing component of the Ontario Fair Hydro Plan (FHP) Act.

   The first bond issue by OPG Financing Entity is required to take place in the fall to meet the objectives of the FHP. To meet this timeline, OPG will need to engage the credit rating agencies in September, and the Provincial guarantee is a key part of the assessment by the rating agencies. OPG also needs time to market the bonds.

   Once the guarantee is in place, the Financing Entity will require finalization of various documents to support the bonds, undertake activities such as investor road shows, etc. As a result, the September timeline can be considered to be on the FHP's critical path.

2) Do you know if OFA has engaged the DMO/MO and if they are in agreement with tracking this board date?
   OFA staff are of the understanding that DMO/MO fully support the timely implementation of a provincial guarantee and the FHP and are kept informed of developments related to the implementation of the FHP, including this item.

3) Do we know when legal will be signing off on the submission?
   Legal sign off on the submission is part of the timelines. Legal staff in MOF and Energy are involved in the development of the Provincial guarantee, including reviewing the term sheet and as part of the normal sign-off process.

4) What are the expectations around engaging/seeking MOE Minister signoff/agreement?
   OFA staff understand that as contemplated under the Ontario Fair Hydro Plan Act, both the Minister of Finance and Minister of Energy would have to agree to the guarantee.

   Energy staff have been briefing the Minister of Energy on FHP implementation, and the provision for a PG was part of the OFHP Act, which was a Ministry

   Both M following an Order-in-Council. Energy staff are preparing to brief the Minister of Energy in the week of August 28, 2017.

5) Has TBS indicated whether or not a MO-to-MO reach out will be required since this is blowing the 3-week rule?
   While OFA staff are not aware of any discussions about the MO-to-Mo outreach to-date, it would be reasonable to assume that all MO's involved are aware of this item and the timeline involved.

Hi Marianne,

Energy Legal sent over its draft responses this morning to the MOF Legal and staff questions from a couple weeks ago, and they are being reviewed.

I understand that MOF Legal is providing one key point on the drafting of the indemnity itself, and I understand that Energy is working on revising its draft business case and other parts of the s.28 approval request submission. They'd have to run by OPG and IESO the latest version of the draft indemnity.

I'd expect they'd aim to get a signed submission to us as quickly as possible after that.

They are aware of the scheduled briefing with the Minister on Wednesday. Staff are working on the s.28 BN that we do, and the approvals package with MOF Legal.

Scott may have more to add.

Hi Andrew,

Sure. Can you do 12pm? I'm in a meeting with the Minister until 12pm and then over at the Leg for Portugal Day Flag raising events at 4pm.

Thanks,
Liz

Subject: Quick chat...

Good Morning Liz:

Was communicating with Ali (via Berlin) and he suggested I contact you.

I have an Ontario Fair Hydro Plan related item I could use your help with.

Wonder if you have 5-7 mins for a quick chat, later today, please?

Carys can confirm but I think that I have windows @ 11.30 am or 4pm today, if that works for your book?

Many thanks, in advance.

Hi Ron,

We are confirming through TBS but wasn't planning to hold up the signing. The other concerns you have are already addressed in the latest versions we have.

I will look at the PRRT submission

Hi John,

Have you been able to confirm? Would Energy's Estimates be relevant, as well as the approved PRRT (we have a copy of the submission, which is of interest, but TBS staff may be best placed to talk to what was approved, or any supplementaries since PRRT).

And a few comments.

Hi Malle,

I've amended the directive to incorporate the original IESO credit facility agreement. Due to the evolution of the agreement (ie. numerous amendments and transition from the OPA to the IESO, I also thought it would be helpful to include background on this credit facility in the recitals. I would appreciate your feedback on this revised directive, as it is now more complex.

Thank you,

Lisa

DIRECTIVE

MINISTER OF FINANCE

LOANS TO THE INDEPENDENT ELECTRICITY SYSTEM OPERATOR

To: Ontario Financing Authority ("OFA")

Whereas:

Under the *Capital Investment Plan Act, 1993* ("CIPA"), the OFA provides financing to public bodies as directed by the Minister of Finance ("Minister").

Pursuant to directives dated December 22nd 2004, October 3rd, 2005, July 28th, 2006, October 14th, 2010, and December 18th, 2013, the Minister approved and directed the OFA to make loans (the "Advances") to the Ontario Power Authority (the "OPA") from time to time in an aggregate amount not to exceed $975 million at any time, as considered necessary by the OPA to meets its purposes.

Effective January 1, 2015, the OPA and the Independent Electricity System Operator amalgamated and continued as a corporation without share capital under Part II of the *Electricity Act, 1998* (the "Amalgamation") with the name Independent Electricity System Operator ("IESO").

Pursuant to the Amalgamation the obligations of the OPA became obligations of the IESO.

The terms and conditions governing the Advances are set out in a credit agreement entered into between the OFA and the OPA dated January 1, 2005, as subsequently amended by amending agreements dated February 14, 2005, October 11, 2015, September 27, 2006, July 13, 2007, November 9, 2010, December 20, 2013, December 19, 2014 and November 30, 2016 (as so amended, the "Original Credit Facility Agreement").

The IESO had requested a new revolving credit facility in an amount of up to $2 billion from the OFA to support the IESO's role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act"). In the same request, the IESO had requested a reduction to its existing credit facility from the current $975 million to $475 million.

Pursuant to a directive from the Minister dated June 29, 2017 (the "2017 Directive"), the OFA was directed to provide a new revolving credit facility to the IESO for the purposes of providing short to medium term financing related to the IESO's role in the implementation of the OFHP Act (the "OFHP Credit Facility").

Pursuant to the OFA Lending Policy, the OFA is required to include an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis, unless otherwise directed by the Minister, Treasury Board or Cabinet. The intercept provision applies to money appropriated by the Legislature for a public body.

The IESO is a public body for the purposes of CIPA.

As there is no operational funding appropriated by the Legislature for the IESO, ~~th~~an intercept provision would ha~~s~~ve no application for OFA loans to the IESO.

Commented [LS1]: Program area please confirm accuracy of directives.

Commented [RK2]: Should there also be a pursuant to paragraph on the 2016 directive for the $975 M facility, now to the new IESO?

Commented [RK3]: Why isn't the directive from 2016 also referenced above?

Commented [LS4]: Amended as per Malle's comments. Program area please confirm.

Commented [RK5R4]: Would it be helpful to use "Estimates"-type terminology, such as "eperating expense" funding instead?

Commented [RK6R4]: And have we confirmed?

DRAFT

Therefore:

The OFA is not required to include an intercept provision in the following two credit facility agreements with the IESO:

a) the Original Credit Facility Agreement, as may be amended from time to time; and,
b) the OFHP Credit Facility agreement, as may be amended from time to time.

(together, the "IESO Credit Facility Agreements")

The IESO Credit Facility Agreements shall remain subject to all other terms and conditions as set out in the applicable directives.

Dated , 2017

Charles Sousa

Minister of Finance

DRAFT

IESO FAIR HYDRO PLAN CREDIT FACILITY
INTENDED USE – DISCUSSION WITH ENERGY STAFF

In a discussion with Energy staff [following comments heard in a call to discuss the Change of Law Protection Agreement call on December 1, 2017], Corporate and Electricity Finance Division (CEFD) staff became aware of ~~an additional~~one aspect of the use of the Ontario Financing Authority (OFA) $2 billion credit facility for the Independent Electricity System Operator (IESO) developed for the implementation of the Fair Hydro Plan (FHP).

For the "moratorium" period of the FHP where the customer bill increases are to be kept to the rate of inflation, the described plan would use the $2 billion credit facility provided by the OFA to cover interest costs and fees charged by the Fair Hydro Plan Trust (OPG Trust) to the IESO [TBC].

Preliminary estimates from Energy materials could indicate an accumulation of approximately $1.2 billion in interest~~s~~ at the end of the moratorium period.

Furthermore, it is unclear how the IESO would [generate funds to] pay ~~back the credit facility and~~ the associated interest costs to the OFA for ~~these~~ drawdowns of the $2 billion credit facility; i.e., ratepayer recovered on an ongoing basis or be capitalized and paid off after the moratorium period.

Commented [SK1]: Wouldn't the CEA payments after the moratorium period pay back the facility. Just want to highlight that there are interest costs to be paid to the OFA during the moratorium period and unclear how those funds would be generated.

Commented [JK2R1]: It is most likely CEA but I think uncertainty remains?

Commented [GH3R1]: I moved this question to fiscal impact section below.

CONTEXT

The Independent Electricity System Operator (IESO) requested and ~~put in place~~entered into a revolving credit facility for an amount of up to $2 billion from the OFA to support its role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act").

To accommodate this request, the OFA obtained a Lending Directive from the Minister of Finance on June 29, 2017.

- The $2 billion IESO FHP-related facility was requested with an initial term of 5-years plus a contingency of three months (effectively expiring on September 30, 2022).
- The request in part enabled the IESO to have the facility beyond the initial moratorium period of customer bill increases being constrained by the rate of inflation.

In the briefing note outlining CEFD and other OFA staff recommendation to the Minister of Finance, there were three rationales ~~were~~ provided ~~to enact~~for the requested $2 billion credit facility:

- One of the primary reasons for putting in place a fairly large credit facility was to manage the initial transition as OPG Trust was not anticipated to be established nor able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Currently OPG Trust is expected to start using its own warehousing facility on December 18, 2017 for the first time. To this end, the facility served this intended roles effectively as it is maintaining the deferred GA portion in this facility currently.
- At the time of initial consideration, it was ~~often~~also discussed that under the legislation, OPG Trust is not required to purchase any portion of the regulatory asset, which led to discussions around how it could result in longer than planned IESO draws on the credit facility and a large balance accumulating in the facility.

Formatted: Indent: Left: 0.25"

- In the recommendation, staff referenced the need to allow the IESO to finance short to medium term funding shortfalls in its role in the FHP. It was always anticipated that there would be short and medium term timing differences in funding as mentioned in the Briefing Note as part of the Minister's Directive Package (see the actual wording below):

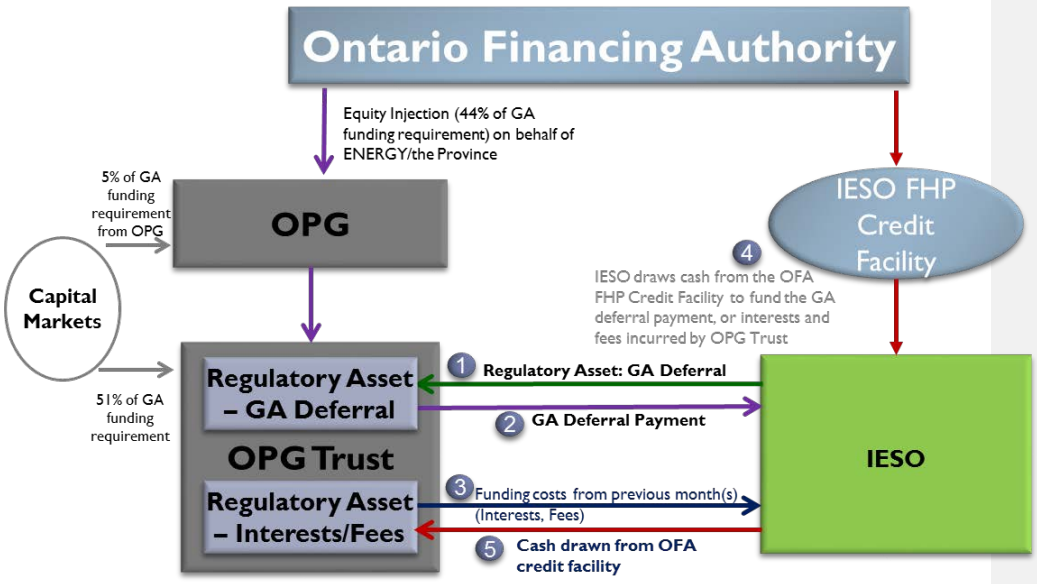
  This will help the IESO to fulfil the commitments under the OFHP Act as the IESO will have to finance short to medium term funding shortfalls in the implementation of the Fair Hydro Plan.

- ~~One of the primary reasons for putting in place a fairly large credit facility was to manage the initial transition as OPG Trust was not anticipated to be established nor able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017. Currently OPG Trust is expected to start using its own warehousing facility on December 18, 2017 for the first time. To this end, the facility served this intended roles effectively as it is maintaining the deferred GA portion in this facility currently.~~

INTENDED USE OF THE FHP-RELATED FACILITY

As in many policy initiatives, the program parameters continue to evolve for a number of FHP-related items, including the use of the $2 billion OFA facility for the IESO. Energy staff indicated that in order to facilitate the implementation of the FHP, the IESO will likely utilize the $2 billion OFA credit facility to defer the interest cost and fees component of the global adjustment (GA) deferral for the first 4 years of the FHP when the customer bills are to increase only by the rate of inflation.

See the diagram below for details of how the deferral of the interest cost and fees would occur in parallel to the deferral of the GA amounts:



1. *IESO calculates the total amount of GA deferral for the month*
2. *OPG pays the GA deferral amount to the IESO*
3. *OPG calculates the total ~~funding costs~~interest cost and fees ~~,(i.~~e.g., interest~~s~~, management fees, ~~and~~ etc., for the previous month), and send~~s~~ the invoice to the IESO*
4. *IESO draws cash from the OFA FHP Credit Facility to pay for the funding costs incurred by OPG Trust. IESO could use the credit facility to pay for the GA deferral amount as well in case of a shortfall*
5. *IESO prepares the Regulatory Assets, which consist of the GA deferral amount for the month and payment for the funding costs for the previous month, and sells the Regulatory Assets to OPG Trust.*

ANALYSIS

The ~~main intended~~ use of the credit facility~~'s role~~ to specifically fund interest cost and fees for the first four years is a ~~new~~relatively recent development for the intended use of the facility.

Short to medium term funding shortfalls were~~, at times,~~ always expected to be financed by this facility, as there would be potential timing differences each monthly settlement period and the OPG trust is not required to purchase the regulatory asset. In addition, ~~and~~ there were explicit discussions about the potential for market interruptions that could lead the IESO to be required to finance~~hold on to~~ deferrals related to the GA refinancing.

A systemic use of the facility for funding interest costs and fees for the first four years, while ~~is~~ a ~~new~~relatively recent development/understanding for CEFD staff, it could be seen as consistent with the purpose of the facility to support the IESO in managing short and medium term timing differences and the OPG financing entity's potential constraints in providing financing.

As the borrowing to fund interest cost and fees would only begin to be paid off after the initial moratorium period, the accumulation of interest cost and fees in the $2 billion credit facility would lead to decreased room for future GA deferral/borrowing needs. As such there may be a request for an expansion to the credit facility in the future. This is not expected to be likely in the ordinary course of operations of the FHP, as the otherwise largest purpose of the facility was to provide financing in the initial period before the OPG financing entity was fully established and able to acquire the regulatory asset.

FISCAL IMPACT~~iscal Impact~~

OPCD would need to opine on the potential fiscal impacts [TBC] of this funding structure due to the ongoing and cumulative nature of the funding of ~~fees and~~ interest cost~~s~~ and fees via the $2 billion credit facility.

If the IESO draws cash from the FHP credit facility to fund interest cost and fees for the first four years, it's unclear how and when IESO will pay back the credit facility~~,~~; i.e., OPG creates an account payable, or equivalent, to the IESO for the cash received, and pays it back when the collection of Clean Energy Adjustments starts.

[IESO staff indicated that they have consulted with OPCD staff on the accounting structure of such intended use of the IESO FHP credit facility, and there won't be a fiscal impact to the Province as it was set out via regulation. CEFD staff is getting clarification from OPCD on this.]

Without a mechanism to link the interest costs and fees back to the ratepayers, there could be fiscal implications related to such costs.

~~Preliminary estimates from Energy materials could indicate an accumulation of approximately $1.2 billion in interests at the end of the moratorium period.~~

~~Furthermore, it is unclear how the IESO would pay the interest costs to the OFA for these drawdowns of the $2 billion credit facility; i.e., ratepayer recover on an ongoing basis or be capitalized.~~

Commented [RK4]: Need more elaboration on this – options?

BACKGROUND

MINISTER'S DIRECTIVE

On June 29, 2017, Minister of Finance's Lending Directive authorized the OFA to provide a revolving credit facility in an amount of up to $2 billion with a maturity date of September 30, 2022. The Lending Directive also included the following conditions:

- The interest rate charged to IESO on all advances will be based on the Province's cost of funds plus a twenty-five basis point (0.25%) spread, consistent with the spread for current and past OFA credit facilities for the IESO.

- The credit facility agreement shall be subject to such other terms as the OFA deems appropriate from time to time.

  - This standard clause in the Minister's Directive was utilized recently to allow for changes to the definition of the Permitted Liens and other related sections of the OEFC lending agreements.

FISCAL IMPACT

- There would be a relatively small but positive fiscal impact for the Province as a result of this credit facility.
  - The Province receives a small fiscal benefit by adding 25 basis points (i.e., 0.25%) to the Province's cost of funds provided to the IESO under the facility, which should more than offset any administrative cost impact on the OFA and Province.
  - The actual amount is expected to be small, as the IESO is expected to make draws for short periods to bridge brief timing differences in cash flows.

- Both the IESO and OFA are consolidated with the Province on a line by line basis. For the OFA and the Province, costs associated with the credit facility are recovered from the IESO. For the IESO, principal and interest associated with the credit facility are ultimately recovered from electricity ratepayers.
  - Notwithstanding this, recovery from electricity ratepayers is determined by the Ontario Energy Board. If the IESO cannot sell the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017* to a financing entity as per the Act, the IESO will have this revolving debt that can only begin to be repaid once ratepayers begin to pay down the deferred GA amount.

FHP ACT

- On May 31, 2017, the government passed the OFHP Act to enable the implementation of the Ontario Fair Hydro Plan, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).

- Under the OFHP Act, the IESO will incur a monthly funding shortfall in the early years of the plan, as a portion of the GA charge to ratepayers will be deferred to the future.

- During this period, GA amounts collected from ratepayers will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.

- The OFHP Act gives the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell the regulatory asset (i.e., the right to recover the deferred amounts in the future) to a financing entity.
  - It is anticipated that the regulatory asset will be purchased by the financing entity to be established by OPG (OPG Trust).
  - The cash received from selling the regulatory asset will be used by the IESO to fund the incurred GA shortfall.
  - For the first four years, it [now] appears that part of the deferred amounts related to ~~carrying costs~~ interest cost and fees would be funded through IESO's facility from the OFA.

- The IESO had always been expected to need short-term financing to manage initial and ongoing monthly IESO cash flow requirement timing differences.
  - Even once the OPG Trust is fully set up to borrow, there is expected to be continued timing differences between the IESO's monthly settlement process when it has to pay generators and when the Trust purchases the asset from IESO.
  - Also, under the legislation, OPG Trust is not required to purchase any portion of the regulatory asset, which could result in longer than planned IESO draws on the credit facility, and an accumulation of a larger balance in the facility.

OFA FACILITIES FOR IESO

- An existing credit facility between the IESO and the OFA is currently available for $475 million (previously $975 million), which includes support for the current Regulated Price Plan (RPP) program. The IESO has proposed that a separate credit facility be provided to support only the FHP credit needs. A separate facility for the FHP is preferable to ensure operational efficiency and tracking of related ~~interest~~ costs.
- As a result, the IESO has proposed to reduce the current $975 million credit facility by $500 million and create a new FHP facility in the amount of $2 billion.
  - The $500 million reduction in the current OFA facility is to eliminate duplicate credit needs and reflects that the FHP prices for eligible consumers is being implemented through the setting of prices under the RPP.
  - Specific terms of the agreement are being negotiated between the IESO and OFA.

Existing OFA-IESO Facility	New Proposed OFA-IESO FHP Facility

Pre-Existing Credit Facilities	$975 million	-
Reduction due to FHP	($500 million)	-
Increase due to FHP	$ -	$2,000 million
Total Credit Facilities	**$475 million**	**$2,000 million**

- The OFA facilities provided to the IESO currently have the intercept provision as required under the OFA's Lending Policy, dated April 16, 2010. The pre-existing $975 million facility (now the $475 million facility) was amended to incorporate the required intercept provision. The intercept provision is intended to provide security to the OFA in its role as a lender to public bodies.

IESO

- The IESO is a not-for-profit corporate entity established in 1998 by the *Electricity Act, 1998*. It is governed by an independent Board of Directors and its Chair and Directors are appointed by the Province.
- The IESO has full statute-based authority for establishing, monitoring and enforcing reliability standards in the province. All the companies that make up the power system in Ontario must meet the IESO's standards.
- Its fees and licences to operate are set by the Ontario Energy Board and it operates independently of all other participants in the electricity market.

Thanks, that's a very good deck. I wouldn't fuss about getting it any more perfect than it already is, as my experience with our ARMC members is that they'd rather have material well in advance so that they have time to read it and understand it before it's presented at the meeting.

I don't know if you're aware, but the AG is planning to be at the beginning of both ARMC and the Board meeting, so if she decides to stay in between, she'll be in attendance for your presentation.

Subject: ARMC FHP Deck

Hi Gadi,

As it was suggested that there be a presentation on the FHP for the OFA Board/ARMC, attached is a work-in-progress deck.

It does not get into great detail, outlining the elements of the FHP, with a bit more on the GA financing structure and the OFA touchpoints on borrowing for the equity injection and notes the credit facility for IESO. Risks are also high-level, and it does not get into accounting risk, leaving that discussion as one between the AG and Province, as was positioned at the OEFC AC. I might think there may be verbal discussions.

Comments welcome.

Thanks,

Ron

Hi all,

Just a quick status update on the items for tomorrow's briefing:

- The attached final version of the briefing deck has been provided to DMO, and I told DMO that CEFD will bring hard copies of the deck.
- Outstanding approval packages:

1. Minister's Directive for IESO Credit Facility – the package is with DMO. DMO is also getting confirmation on the OIC approval (it should have been signed but they are just waiting for the confirmation).
2. IESO Treasury Policy – The package has been provided to DMO.
3. Section 28 approval for OPG and IESO Indemnity Agreements – The package has been provided to DMO.

- Jonathan will forward soft copies of the approval packages to MO. He also noted that we should be prepared to walk the Deputy and the Minister through the approval packages.

Please let me know if you have any questions.

Thanks,
Gavin He

Hi Gadi,

Just as a clarification, we don't need a regulation for the OIC to expand the IESO credit facility.

There are regs being brought forward by Energy that do affect IESO, including one on its requirements on treasury / investment policies. That does affect the affect the Minister of Finance in that the IESO has to amend its treasury policies for the FHP, and under the regulation, the Minister of Finance has to approve the IESO's policies. There should be an approval request coming forward.

Ron

Subject: RE: CBN Fact Check

Hi Gadi,

As a comment, yes, no reg is needed for the OFA-IESO credit facility, but you've seen the OIC package to expand the OFA's borrowing room from the Province under CIPA to allow for the expanded credit facility. That's still tracking for the 27th.

And I had understood from the Energy weekly that the Energy regs would not all be ready at once (note the list from the materials Energy sent yesterday, as attached, where only some are listed as ready – though I did not see the IESO borrowing one mentioned in the CBN, though listed as "ready"), so this would just be the first set (not that I have yet to see any of the actual proposed regs, just this CBN).

Hi David,

A few comments from us:

- Suggest a mention of accounting risks in the Fiscal subsection, particularly given the AG's stated position at Committee on this. May want to seek input from OPCD/TBS.
- Suggest including on page 6, as part of the objectives of the proposed regulations:
  - Details on how the interest on the Trust debt will be managed; and
  - The Clean Energy Adjustment as it relates to repayment from 2027 onwards.

Comments from CEFD will be relayed separately by Gavin.

Thanks, Anna

Anna/Gadi

Agree with Gadi's point re accounting risks. No need for regulations for both the guarantee and the new credit facility to IESO(confirmed with Malle). I would also suggest that the objectives of the proposed regulations spelled out on page 6 include:

- Details on how the interest on the Trust debt will be managed and
- The Clean Energy Adjustment as it relates to repayment from 2027 onwards.

Thanks

Ken k

Subject: Re: CBN Fact Check

I find it interesting that in the Risks section there is a lengthy description of the constitutional risk in the Legal subsection, but there is no mention of the accounting risks in the Fiscal subsection, in spite

of the AG's stated position at Committee on this. I think that it's a gap that needs to be at least mentioned in the CBN, doesn't it?

I'm assuming, because it isn't mentioned anywhere in the CBN, that there are no regs required for the guarantees that Mike has been working on with Blakes and OPG? Also, our direction on the $2 billion line of credit for the IESO can be done independently of these regs?

Thanks,
Gadi

Date: Thursday, May 11, 2017 8:08:09 PM

Not sure I agree with you Ron, the reason the RPP facility is provided by the OFA is more happenstance than clear choice of the OFA over the OEFC.

At least that is my understanding, you may have more inside knowledge.

I am just a little reluctant to have the OFA which has little to do with the electricity market extend its exposure further. Unless there is very valid reason it will be difficult to explain to the OFA Board why the OEFC was excluded in favour of the OFA.

You are correct with regard to the minute, I saw that too but failed to raise the issue. And finally the language that I used in my email simply states "it may be appropriate". It's simply a suggestion that should be explored.

Thanks

Ken k

We had this discussion before, and it would have been better to have had this discussion again internally before raising it with the IESO.

Subject: RE: DRAFT IESO FH credit letter

Good points though I believe that this falls within the mandate of OEFC which includes: "Providing financial assistance to the successor corporations of Ontario Hydro". Note that IESO already has a facility with OEFC and the only reason the RPP facility is with the OFA is because it was previously extended to the OPA and subsumed by IESO when the latter merged with the former.

Can we have a quick discussion on this tomorrow, not sure Mike will care as to which entity is providing the facility but if you do Mike pls join us.

Thanks

Hi Ken.

Leaving out IESO for now.

I think that there would be different challenges for this to be done through OEFC.

One is having this associated with OEFC's legacy mandate.

Another is the 50 bps DGF charged to OEFC. That may not come into play for any given period, but if it does, OEFC would either have to charge that

to IESO to stay whole, or carve this out from the DGF requirement, which would be an additional approval, and could raise the whole issue of why OEFC pays a DGF in the first place, or the appropriate size.

It would be in many ways simpler to have this facility provided by the OFA.

Ron

Subject: RE: DRAFT IESO FH credit letter

Hi Anthony,

Staff had a few suggestions/comments.

As discussed on the last call, we had talked about it being cleaner to have a separate facility for the FHP. The draft letter seems to have a potential for IESO drawing both on the new facility and the existing one. While drawing on the existing facility might be needed on an interim basis, it would seem cleaner and more transparent to have that possibility only until a new, separate facility is in place.

Subject: DRAFT IESO FH credit letter

See attached draft letter we hope to issue this week – for your comments (will appreciate by Thursday this week if any).

I did speak with Moody's on April 28 to obtain their feedback.

Call me @ 905.403.6944 to discuss (…Ken can we discuss the interest exp/income flows when you have a moment).

As mentioned the current $975M supports the RPP today which will be transitioned to the new FH going forward – for this draft as discussed with my CFO I have left the $975M as is but will seek to use for FH too.

Regards.

>
> Hello John,

I'm not sure if you've seen the attached letter as of yet. We have received this request from IESO to set-up a credit facility for IESO to borrow $1,500M to fund the Fair Hydro Program.

IESO indicates that they either wish to have the existing $975M credit facility between the OFA and IESO increased by $1,500M (incorporating their proposed provisions) or to have a separate $1,500M credit facility altogether. I'm aware that there have some discussions around this. Do you know if it has been decided if OFA or OEFC should provide this facility?

Thanks,
Sarah

Re: **IESO Credit Requirements for the 2017 Fair Hydro Plan~~rogram~~**

Dear Mr. Mayman,

As you are aware the Ontario government has announced its inten~~s~~tion to implement the proposed Fair Hydro Plan~~program~~ (FHP) to reduce electricity prices for eligible consumers in the province. Proposed l~~L~~egislation ~~is expected to be~~was introduced this month for the program. The Independent Electricity System Operator (IESO) is preparing to implement the FHP and has determined that to support the IESO's role in implementation it will need greater credit liquidity than currently exists.

The existing credit facility between the IESO and the Ontario Financing Authority~~'s~~ (OFA) is $975 million. The IESO proposes that an additional facility/commitment be provided in the amount of $1,500 million. This would enable the IESO to provide interim financing for the FHP's spreading out of global adjustment costs~~smoothing~~ for a period of several months, if needed.

We suggest the OFA's current $975 million agreement and the new separate (or co-mingled) FHP agreement consider the following key provisions:

- FHP: 5 year term to align with the FHP's initial period of deferral of electricity prices, ~~period~~ plus a few months of contingency (i.e., to September 30, 2022);
- FHP: interest charge to be Province's cost of funds for borrowing with a similar term as determined by OFA plus 0.25 per cent per annum;
- FHP: drawings to be based on minimum of 7 days to a maximum of 95 days, to minimize interest costs and permit efficient FHP asset transfers;
- Existing $975 million facility: draws to permit for FHP purposes until the credit agreement for FHP purposes has been made available; and

Commented [SQ21]: Please confirm that the requirement is $1.5 billion as it is preferred to keep the $975M separate from FHP.

Commented [SQ22]: It is preferred that a separate credit facility be set up for FHP purposes. OFA is working to obtain the appropriate approvals required. Option to use the existing facility may be exercised if timing does not permit putting in place a new credit facility.

Commented [KR(3]: Has CMD been consulted on this?

Commented [KR(4]: Overall, would it be better to purely separate out the FHP borrowing – so a larger than $1.5 bn new facility, and potentially shrink the existing $975 facility?

Commented [SQ25]: $975 million agreement is for purposes outlined under section 25.33 of the Electricity Act. Seems FHP would fall under that but legal to confirm.

- $975 million: a reduction in the 28 days minimum draw for the existing facility to a minimum of 7 days to a maximum of 95 days;

Commented [SQ26]: Subject to OFA Capital Markets.

Should the IESO find that there is persistent~~consistent~~ usage of these facilities we will contact the OFA for further arrangements.

Upon your reply to this letter, the IESO will seek any necessary IESO Board of Directors' approval for the above credit facility(ies) and we will provide such evidence for the OFA's records.

We appreciate the OFA's continue support and look forward to working with you. Please contact me should you need anything further.

Sincerely,

DRAFT

Subject: Re: DRAFT IESO FH credit letter
Date: Friday, May 12, 2017 8:21:51 AM

Hi Ken,

I raised many of the same considerations when the IESO request first came up, and a rationale could be put forward under various options. So, my response was not so much "my" position as where we are now, post TB and post-Cabinet (the Cabinet briefing note also included disclosure on the IESO request for financing from the OFA).

Energy and EIGS also asked, but also did not like the idea of any association with stranded debt (even if this would be net neutral on OEFC's balance sheet), and keeping the spread as tight as possible too.

The OEFC Board heard the same considerations, as I recall, though it was just part of the general discussion on the FHP, and the members were likely just taking in the information since the IESO request was not to OEFC.

It was also noted that a Minister's directive to the OFA would be required as part of this, so while the reasons why could be presented to the OFA Board, not sure it needs to be more than an info item.

And it is in part historical "happenstance" that the old OPA was not an Ontario Hydro successor corporation such that the current and historical faculty was done with the OFA as OPA was a public body, and thus that facility has a 25 vs 50 bps spread, providing an incentive for the new IESO to maintain the distinct facilities up to this point, and for its request wrt the FHP. But that is not just then historical, but has an impact going forward on the FHP.

Of course, a directive could be made to the OEFC instead, including on the spread (and potentially the DGF could be changed, or OEFC takes a loss). But a continuity evolution on the OFA facility has its positive considerations too for the current form of the ask from IESO.

Happy to discuss later this morning.

Ron

> Not sure I agree with you Ron, the reason the RPP facility is provided by the OFA is more happenstance than clear choice of the OFA over the OEFC.
>
> At least that is my understanding, you may have more inside knowledge.
>
> I am just a little reluctant to have the OFA which has little to do with the electricity market extend its exposure further. Unless there is very valid reason it will be difficult to explain to the OFA Board why the OEFC was excluded in

favour of the OFA.

You are correct with regard to the minute, I saw that too but failed to raise the issue. And finally the language that I used in my email simply states "it may be appropriate". It's simply a suggestion that should be explored.

Thanks

Ken k

Subject: RE: DRAFT IESO FH credit letter

Good points though I believe that this falls within the mandate of OEFC which includes: "Providing financial assistance to the successor corporations of Ontario Hydro". Note that IESO already has a facility with OEFC and the only reason the RPP facility is with the OFA is because it was previously extended to the OPA and subsumed by IESO when the latter merged with the former.

Can we have a quick discussion on this tomorrow, not sure Mike will care as to which entity is providing the facility but if you do Mike pls join us.

Thanks

Subject: Re: DRAFT IESO FH credit letter

Hi Ken.

Leaving out IESO for now.

I think that there would be different challenges for this to be done through OEFC.

One is having this associated with OEFC's legacy mandate.

Another is the 50 bps DGF charged to OEFC. That may not come into play for any given period, but if it does, OEFC would either have to charge that to IESO to stay whole, or carve this out from the DGF requirement, which would be an

additional approval, and could raise the whole issue of why OEFC pays a DGF in the first place, or the appropriate size.

It would be in many ways simpler to have this facility provided by the OFA.

Ron

Subject: RE: DRAFT IESO FH credit letter

Hi Anthony,

Staff had a few suggestions/comments.

As discussed on the last call, we had talked about it being cleaner to have a separate facility for the FHP. The draft letter seems to have a potential for IESO drawing both on the new facility and the existing one. While drawing on the existing facility might be needed on an interim basis, it would seem cleaner and more transparent to have that possibility only until a new, separate facility is in place.

Subject: DRAFT IESO FH credit letter

See attached draft letter we hope to issue this week – for your comments (will appreciate by Thursday this week if any).

I did speak with Moody's on April 28 to obtain their feedback.

Call me @ 905.403.6944 to discuss (…Ken can we discuss the interest exp/income flows when you have a moment).

As mentioned the current $975M supports the RPP today which will be transitioned to the new FH going forward – for this draft as discussed with my CFO I have left the $975M as is but will seek to use for FH too.

Hi John & Ron,

From DMO: In preparation for Marianne's return next week, we should work to provide rationale on the timing and urgency of this, e.g. What are the risks of not setting this up until the Minister returns early September?

Given the topic, I think the MO would want our Minister to review but will check with Marianne.

ONTARIO FINANCING AUTHORITY CREDIT FACILITY TO THE INDEPENDENT ELECTRICITY SYSTEM OPERATOR TO SUPPORT THE FAIR HYDRO PLAN:

EXPEDITED REQUEST – PRESIDENT OF TREASURY BOARD AS ALTERNATE FOR MINISTER OF FINANCE DIRECTIVE FOR AN EXEMPTION FROM THE OFA LENDING POLICY INTERCEPT PROVISION

The Independent Electricity System Operator (IESO) requests the Ontario Financing Authority (OFA) to execute and put in place the OFA to IESO credit facility required for its role under the Ontario Fair Hydro Plan Act, 2017. On June 29, 2017, the Minister of Finance provided a Lending Directive to accommodate IESO's request.

As required by OFA's Lending Policy, the OFA is returning to request a Minister's direction to exempt from the requirement to include an intercept provision in the Ontario Fair Hydro Plan (OFHP) Credit Facility agreement, as well as the original credit facility agreement.

STATUS UPDATE

- IESO's treasury and pension staff has raised ~~a~~ significant concerns about not having the OFHP credit facility in place by the end of August 2017:
  - A ratings agency, Moody's, has raised its~~their~~ concern that the $2 billion facility has not been put in place.
  - Moody's main concern relates to the rapid utilization of the existing $975M facility at a rate of about $200-250M per month~~.~~ (the existing facility is being used, as expected, by the IESO on an interim basis until the new facility is in place).
  - Given that the first bond issuance by OPG's Financing Entity is not expected until ~~the October~~later in the fall ~~timeline~~, the timely execution of the OFA to IESO OFHP credit facility is of a significant concern.
    - ~~o~~ OPG's financing entity would use the proceeds from the bond issuance, as well as financing from OPG and, indirectly, the Province as shareholder, to purchase the regulatory asset from IESO, which would use the proceeds to pay down the draws on the OFA credit facility.
  - The timely execution of the OFHP credit facility is also an important priority of the IESO management and Board of Directors, with the expectation that a credit agreement would be in place by the end of August 2017.

RECOMMENDED NEXT STEP

- Request obtaining the Intercept Exemption Directive from the President of Treasury Board, as alternate for the Minister of Finance.

Hi Everyone,

I didn't make as much progress as I'd have liked today, but tried to start with the items you'd have the most interest in so you had more time to review.

- Scott / Ron / Kaitlin / Gavin – please see slide 8 for a quick overview of the electricity package tracking to the Board / Cabinet on Tuesday;
- Brian / Ghufran – the resource revenue sharing placemat hasn't changed

from the version your staff approved a week or so ago, but thought you might want to see the Climate Change Adaptation Strategy (slide 3) and/or the Ring of Fire (slide 4) placemats. Note that I'm just guessing on Ring of Fire – I haven't seen the submission they're walking into the Minister's Table on Monday (which I understand is only a subset of the issues they highlighted at Major Projects this week).

Any comments welcomed,
Brandon

- Scott / Ron / Kaitlin / Gavin – please see slide 8 for a quick overview of the electricity package tracking to the Board / Cabinet on Tuesday;
- Brian / Ghufran – the resource revenue sharing placemat hasn't changed from the version your staff approved a week or so ago, but thought you might want to see the Climate Change Adaptation Strategy (slide 3) and/or the Ring of Fire (slide 4) placemats. Note that I'm just guessing on Ring of Fire – I haven't seen the submission they're walking into the Minister's Table on Monday (which I understand is only a subset of the issues they highlighted at Major Projects this week).

Any comments welcomed,
Brandon

Hi Gavin

Thx. I'm on the road, but I think the credit facility summary is missing explanation of why short term financing may be needed. I'll take closer look when I get home and send draft edits.

Bruno

Hi Everyone,

I didn't make as much progress as I'd have liked today, but tried to start with the items you'd have the most interest in so you had more time to review.

- Scott / Ron / Kaitlin / Gavin – please see slide 8 for a quick overview of the electricity package tracking to the Board / Cabinet on Tuesday;
- Brian / Ghufran – the resource revenue sharing placemat hasn't changed from the version your staff approved a week or so ago, but thought you might want to see the Climate Change Adaptation Strategy (slide 3) and/or the Ring of Fire (slide 4) placemats. Note that I'm just guessing on Ring of Fire – I haven't seen the submission they're walking into the Minister's Table on Monday (which I understand is only a subset of the issues they highlighted at Major Projects this week).

Given the if statement I'd be fine as is. They would have a hard time meeting that is my assessment. I've sent them an email.

Subject: FW: Draft bullets re s28 timin Pls see below for changes.

Hi Marianne,

Some bullets, as requested.

· CEFD has prepared a draft briefing note related to the s28 request related to IESO and OPG Indemnities based on information received from Energy Legal and has been consulting with MoF Legal on this request.

· In reviewing the information and draft indemnity agreements, there were some concerns raised regarding the scope of the requested indemnities and interaction with existing statutory protections and indemnities. As a result, CEFD submitted a number of questions seeking more information and clarification to Ministry of Energy Legal on June 8th . We understand that Ministry of Energy Legal has passed some of these questions on to OPG and IESO as well.

· CEFD/MoF Legal are currently awaiting the response to questions before being able to move forward with the section 28 request.

· MOF and Energy Legal have also been working on the draft of the indemnities requested. Energy Legal would also be consulting with OPG and IESO on the revised drafts.

· CEFD will finalize its briefing note as soon as possible after receiving the responses. CEFD expect that if Energy responds this week, and subsequently submits a signed s.28 approval request early/mid next week, that staff would be on track to bring forward a s.28 approval package to the Minister by the end of June.

Good Morning Liz:

Was communicating with Ali (via Berlin) and he suggested I contact you.

I have an Ontario Fair Hydro Plan related item I could use your help with.

Wonder if you have 5-7 mins for a quick chat, later today, please?

Carys can confirm but I think that I have windows @ 11.30 am or 4pm today, if that works for your book?

Many thanks, in advance.

Andrew Teliszewsky

Hi Ron,

I think so, yes. The path to resolution involves Energy addressing the comments and concerns raised and until that point, I don't believe MOF Legal staff are comfortable setting expectations around approvals timing, etc.

Thanks,

John

Hi John

See draft bullets on what's going on with s28. Wondering if we share with MoF Legal?

CEFD has prepared draft material related to the s28 request related to IES and OPG Indemnities. CEFD has been consulting with MoF Legal on this request. There were some concerns raised primarily around clarifying the scope of the requested indemnities and with respect to existing protection, for example under the Electricity Act (IESO) and Fair Hydro Act (OPG). CEFD submitted a number of questions in this regard to Ministry of Energy Legal on June 8. Ministry of Energy Legal noted that they would review and respond. CEFD shared a draft briefing note with Ministry of Energy Legal on June 12 and some follow-up questions. In response to a question from Ministry of Energy Legal, it was confirmed that CEFD/MoF Legal were waiting for a response to questions before being able to move forward with the s28 request. Ministry of Energy Legal noted that responses would be sent back as soon as they heard from IESO and OPG. CEFD will finalize as soon as possible after this.

Hi Ron – please see responses to your comments. Appreciate the input. Mark

Accounting for Ontario's Reduction in Current Electricity Prices

In May 2017, the government passed the *Ontario Fair Hydro Plan Act, 2017* (the Act).

The components of the plan to reduce current electricity prices include both aspects of the plan provided for in the Act as well as other policy decisions, as follows:

1. The Ontario Rebate for Electricity Consumers~~A rebate~~ (OREC) in the amount equivalent to the~~of~~ 8% provincial portion of the Harmonised Sales Tax (HST) ~~of~~on electricity bills ~~for~~of eligible residential, small business and farm consumers, commencing January 2017, funded by the ~~tax base~~government;
2. Increases to the Ontario Electricity Support Program, and transfer of the funding of this program from the electricity rate base to the ~~tax base~~government;
3. Reductions, existing and expanded for certain rural electricity consumers, funded by the ~~tax base~~government instead of the rate base;
4. Reduction equivalent to the delivery charge for First Nations residential consumers living on reserve, funded by the ~~tax base~~government;
5. A fund established to provide free, energy efficient devices and products to qualified individuals and organizations, funded by the ~~tax base~~government; and
6. An additional reduction in current electricity bills for eligible residential, small business and farm customers, commencing July 1, 2017, such that the impact of this reduction combined with the impact of items 1 to 3 above resulted in an average reduction of 25% for residential customers (with differential benefits for other eligible customers), which, unlike items 1 to 5 above, was to be funded by the electricity rate base. This reduction was to be recovered from electricity ratepayers in future years. This aspect of the plan is referred to as the Global Adjustment Refinancing.

The impact of Items 1 through 5 noted above– all funded by the ~~tax base~~government– are recognized as an expense in the consolidated financial statements as incurred.

Item 6, the Global Adjustment Refinancing, was to be funded by the electricity rate base, and to be recovered from electricity ratepayers in future years.

In September 2018, Cabinet ratified a decision to make a change to the Ontario Fair Hydro Plan Act to cancel the Global Adjustment Refinancing component as designed, including reducing the cost ~~amount~~ of the current electricity price reduction to be borne by future ratepayers, and by making any recovery from future ratepayers optional. This decision changes the estimated recovery from future ratepayers, and does not support the use of rate-regulated accounting.

The entities that recorded transactions in the year related to the Global Adjustment Refinancing are as follows:

Commented [RK1]: "tax base" seems an internal colloquialism, not an official publication, vs being funded by general government (or "provincial") revenues (current or future, if borrowed for now).

Commented [DM(2]: I think the intent was to clarify the distinction within the OFHPA between taxpayer and ratepayer w.r.t. its impact on the accounting - to maintain this distinction, could we say "funded by the government from tax revenue"?

Commented [KR(3R2]: I'd prefer just "government" – it's not necessarily "tax" revenue, as there won't be earmarking of funds from taxes to this vs other sources of government revenues (e.g., federal, fees, sales and rentals).

And there may be criticism on saying "revenue" as it's generally understood that, in the deferral period at least, this is essentially financed by incremental borrowing, not revenue.

Commented [RK4]: Is this part being Minuted now? Is this what ENDM is to return and report back on? Does / could this be reworded to reflect that this refers to reducing the cost, by having it be government borrowing?

Commented [DM(5]: The borrowing aspect doesn't impact the accounting (this is a FS note disclosure). "reducing the cost" I believe is more associated with less than 100% recovery of the GA refinancing

Commented [RK6]: Is this in the other or revised Minute? Can we review that Minute too?

Commented [DM(7]: This will be part of the minute – still being drafted by Operating Expenditure Management Division

DRAFT

- The Independent Electricity System Operator (IESO) is a consolidated government organization and reports its financial results in accordance with Public Sector Accounting Standards. The IESO is an entity regulated by the Ontario Energy Board.
- Ontario Power Generation (OPG), an entity wholly-owned by the Province, was appointed the Financial Services Manager under the Act and in December 2017 established the Fair Hydro Trust (the Trust), a wholly-owned subsidiary of OPG, as the financing entity contemplated by the Act.

In connection with the Global Adjustment Refinancing (item 6), in the initial years as originally designed, the IESO incurred a cash shortfall for the difference between the amounts collected from the electricity consumers and the contracted price paid to the power generators. The amount of the shortfall for the year ended March 31, 2018 was $1,789 million.

During the year, the IESO under the authority permitted under the Act, transferred $1,639 million of the shortfall to the Trust in exchange for an irrevocable right to the recovery of the transferred balance and financing and other costs to be received from specified consumers in the future. The remaining shortfall recorded by the IESO as a rate regulated asset as of March 31, 2018 was $150 million.

As a result of the decision made on September 12, 2018, the government has determined that the rate-regulated asset that IESO had recorded as of March 31, 2018 ($150 million) no longer meets the criteria to be recorded as an asset, as the decision significantly reduces the likelihood of recoverability. Accordingly, the government has written down the value of this asset to NIL in the consolidated financial statements of the Province.

The Trust recorded an intangible asset in connection with the payment made to IESO for the acquisition an irrevocable right to the recovery of the transferred balance and financing and other costs to be received from specified consumers in the future (the shortfall). The Trust funded the acquisition of the cash shortfall from the IESO during the year ($1,639 million) with subordinated debt from Ontario Power Generation to a maximum of 49% of the Trust's total outstanding debt, and the balance from third party lenders. Of the amount lent to the Trust from OPG, approximately 90% of that amount ($721 million) was funded by equity injections from the Province, and 10% was funded by debt borrowed by OPG from third party lenders. As of March 31, 2018, the Trust owed $803 million to OPG and $836 million to third party lenders.

As a result of the decision made on September 12, 2018, the government has determined that the intangible asset recorded by the Trust is impaired. Accordingly, the government has written down the value of this asset to NIL in the consolidated financial statements of the Province.

Commented [RK8]: The term used elsewhere seemed to be "investment asset" – or is that legislative "jargon" vs accounting jargon – with the latter using "intangible asset"?

Commented [DM(9]: Intangible is an accounting concept.

DRAFT

In connection with all of the debt issued by the Trust, the Province issued a limited guarantee to fund all future obligations associated with debt issued and outstanding at the time that the guarantee is invoked. These conditions are limited to the repealing or significant change to the Act, its regulations or other legislation, or any significant change to the structure of Ontario's electricity market which impacts the components of the plan.

As a result of the decision made on September 12, 2018, the government expects that ~~the~~ one of the conditions of the limited guarantee will be met, and as a result, the government will fund all future obligations issues and outstanding as of the date the guarantee is invoked. As of March 31, 2018, the amount of the obligations that the government expects to fund to the Trust is $1,639 million, resulting in a recovery to be recorded by the Trust (leaving the Trust whole) and an expense recorded by the Ministry of Energy of 1,639 million. The total expense recorded in the 2017-18 consolidated financial statements as a result of this decision is $1,789 million.

As a wholly-owned subsidiary of Ontario Power Generation, the assets and liabilities of the Trust are recorded as part of the Investment in Government Business Enterprises in the consolidated statement of financial position, and disclosed as part of Ontario Power Generation in Schedule 9 to these consolidated financial statements.

DRAFT

In summary, the impact on expenses and assets of the consolidated financial statements of the components of the plan to reduce current electricity rates, taking into consideration the decision of the government on September 12, 2018 is as follows:

Component	Funding source	Amount recognized as an expense (in millions)	Amount recognized as a rate regulated asset (in millions)
1 – ~~8% rebate~~OREC	~~Tax base~~Government	$810	NIL
2 – OESP	Government~~Tax base~~	$20	NIL
3 – Rural rate reduction	Government~~Tax base~~	$325	NIL
4 – First Nations delivery credit	Government~~Tax base~~	$15	NIL
5 – Affordability Fund (amount expensed in 2016–17)	Government~~Tax base~~	NIL	NIL
6 – Global Adjustment refinancing	Electricity Rate Base	$1,789	NIL

Commented [RK10]: Seems low – is this just the incremental amount? Or does this reflect that the prior ratepayer "surplus" recovery in OESP had to be worked off first, so only a very small amount was government-funded in 17-18?

Commented [DM(11]: Numbers provided by Energy

Any debt incurred to fund items 1 to 5 is part of general borrowing of the Province and recorded as Debt on the consolidated statement of financial position.

Debt incurred to fund item 6 is recorded based on the source of the financing:

Source of financing	Amount of debt at March 31, 2018 (in millions)	Where recognized in the consolidated statement of financial position
1 – Equity injection from Province to OPG	$721	Debt
2 – Debt borrowed by OPG from third party lenders and lent to the Trust	$82	Investment in Government Business Enterprises, the details of which are disclosed in Schedule 9
3 – Debt borrowed by Fair Hydro Trust from third party lenders	$836	Investment in Government Business Enterprises, the details of which are disclosed in Schedule 9

Subject: RE: FHP

Hi Ron: thanks for the call this afternoon.

Had a quick chat with Tom re the "intercept" matter. Can you connect Tom up with your lawyer on the file so that they can have a quick chat when time permits. Also any background materials on the matter would be helpful

Thanks, Steen

Hi Steen,

Are you available later today or tomorrow morning to discuss a couple of Fair Hydro Plan related issues.

Thanks,
Ron

Hi Ron,

I am reading more along the line that if OPG is allowing IESO to use the appropriation for its intended purpose then they are essentially saying that operating appropriations are sacred as in you go use it to survive.

But you know my English is very second language….

Subject: Re: Fair Hydro -- Revised MTSA and IESO Security Agreement

Hi John,

Rather that OPG appears to be allowing IESO to use the appropriations for their intended purpose, not as security for OPG, so why should OPG be fussed if the OFA intercepts the appropriations, should it come to that?

Cc: Anthony Martinello <Anthony.Martinello@ieso.ca>; Michael Boll <Michael.Boll@ieso.ca>; Lisa Stein <Lisa.Stein@ofina.on.ca>
Subject: Finalization of OFA-IESO Credit Agreements

Hi John. We have had internal discussions following your and my conversation yesterday afternoon regarding the finalization of the two OFA/IESO credit agreements (Amending Agreement #10 to the existing credit agreement; and the new $2 billion credit agreement for implementing the Fair Hydro Plan).

As discussed, we need urgently to finalize these credit agreements in order to avoid a funding shortfall for IESO in November relating to implementing the FHP. There will not be sufficient room under the existing OFA credit agreement – with its commitment of $975 million – to fund the amounts required by IESO in this regard.

Given this urgent funding need, we propose that OFA and IESO finalize the current drafts of the credit agreements and have them executed by both parties no later than Wednesday, November 1 in order to ensure that funds will be available for drawing by IESO in November.

We recognize that the on-going discussions with the OPG Trust about a possible grant of security over IESO's assets in connection with implementing the Fair Hydro Plan may result in the need for further amendments to the OFA-IESO credit agreements. However, we propose to amend the agreements as needed once we actually know what, if anything, is required in this regard.

We would appreciate it is OFA could let us know if it agrees with the above approach by Thursday this week in order that we may each proceed to take the steps required to finalize and execute the agreements, and maintain the timely funding of IESO's needs.

Regards,
Victor

As discussed, we need urgently to finalize these credit agreements in order to avoid a funding shortfall for IESO in November relating to implementing the FHP. There will not be sufficient room under the existing OFA credit agreement – with its commitment of $975 million – to fund the amounts required by IESO in this regard.

Given this urgent funding need, we propose that OFA and IESO finalize the current drafts of the credit agreements and have them executed by both parties no later than Wednesday, November 1 in order to ensure that funds will be available for drawing by IESO in November.

We recognize that the on-going discussions with the OPG Trust about a possible grant of security over IESO's assets in connection with implementing the Fair Hydro Plan may result in the need for further amendments to the OFA-IESO credit agreements. However, we propose to amend the agreements as needed once we actually know what, if anything, is required in this regard.

We would appreciate it is OFA could let us know if it agrees with the above approach by Thursday this week in order that we may each proceed to take the steps required to finalize and execute the agreements, and maintain the timely funding of IESO's needs.

Regards,
Victor

the proposed intercept letter. The IESO has raised the point that this intercept letter may extend to non-Min of Energy monies (e.g. MOECC) which I still have to land/discuss with my in-house legal. I hope to final this letter soon.

A few items as FYI for the proposed fair hydro structure:

1.
DRAFT - IESO is expected to post a letter of credit (or maybe a letter of guarantee solely written by IESO) in favour of the Trust for any non-credit rated LDCs defaults risk during the period 2021 to 2047. The amount has not been finalized but may be up to $75 million.

2.
DRAFT - The Trust is looking for the IESO to give a 1st priority/security over all IESO assets including accounts receivables in favour of the Trust. This item is being discussed amongst all parties. If this proceeds, the IESO will have to amend/restructure its current credit facilities with TD Bank, OFA, and OEFC as all are unsecured pari-passu.

Regards.

>
> We'd need to respond that way to Legal, as it has been Legal's advice on the issue

of compliance with the policy that has led to the exemption request and not have to check a non-compliance box in the quarterly compliance checklist.

If we move forward on that basis, the next time the lending policy is amended, the wording could then be clarified that an intercept is required only where applicable. The Board may ask about the "security" issue too, at that time.

If IESO has the credit facility, then it can finance the GA deferrals until OPG's financing entity purchases the regulatory asset, which I would think is the key accounting issue for the IESO. Whether it needs the larger facility right now is more of a timing issue. This monthly settlement, they are likely to take their total draw so far to over $600 million of the existing $975 facility, so could draw for another month or so before running out of room.

Subject: RE: IESO Credit Facility and Intercept Provision Exemption

Hi Anna

The intercept requirement arises from: the OFA Lending Policy which (p. 4 "Security" section) stipulates the OFA must include an intercept provision, unless the OFA either receives an exemption from the OFA Board OR receives direction from the Minister, Cabinet or Treasury Board.

The intercept provision provides that in the event of non-payment by IESO to the OFA under the Credit Facility, the Minister may take funds appropriated by the Legislature for IESO, and may instead use the funds to repay the OFA (in the amount that IESO has defaulted under the facility).

From a practical basis this is requirement is irrelevant since the IESO as the market operator receives no funding from the Province, hence nothing is appropriated by the Legislature for the Operator and there is nothing to intercept.

As such, not obtaining the Minister's exemption should have no impact on IESO's accounting. On the other hand by not doing so a requirement in the OFA's Lending Policy is being ignored.

Ron you may have something to add.

Thanks

Ken k

Hi Anna,

I would think of the first step is more an internal to the OFA one, on getting approval/direction to move forward to provide a facility to the IESO without the "security" of an intercept clause envisaged in the OFA lending policy. For that, we'd need to consider Legal's advice on moving forward while being compliant with the policy (which has been one key point that led to the exemption request).

Cc: Gadi Mayman
Subject: RE: IESO Credit Facility and Intercept Provision Exemption

Hi Anna,

We'll look into this. Note that it would not be just IESO's agreement required.

The OFA lending policy on intercepts also involves the oversight ministry of an agency:

> …prior to any loan agreement entered into between the OFA and a public body, such public body and its responsible ministry are to agree that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts that the public body fails to pay to the OFA on account of indebtedness under its loan agreement with the OFA. In addition, the public body is to agree that any notice from the OFA to the Minister of Finance in relation to its failure to pay under its loan agreement may be relied upon by the Minister of Finance without further inquiry or verification by the Minister of Finance.

In that context of going forward and including an intercept provision in the credit facility, Energy would need to provide such agreement (this is from last month`s discussions by staff with OFA Legal). Note that we have not discussed this with Energy at this point. There may be some challenges to expeditiously have Energy provide written agreement in this regard, noting that IESO will be wanting the facility in place soon.

As an aside, we had asked TBS staff in August to confirm our understanding that at this point there are no such moneys appropriated by the Legislature for payment to the IESO, but we'd want to confirm that more formally under this option of proceeding.

Perhaps an option could be that Energy might simply confirm that there are no such amounts appropriated (currently, though the question of the future could arise), or come to an internal agreement that since there are no amounts to intercept, that Energy does not need to agree to an intercept -- and see if folks are comfortable moving forward on that basis – to include an intercept provision now, which would have no practical effect, and move forward in the near term with a general amendment to the OFA lending policy that would provide for no intercept clause in the case

of loans / credit facilities to public bodies that have no appropriated amounts to intercept.

Hi Ken, Ron,

I spoke to Gadi and it sounds like the Deputy's preference would be to add the intercept provision to the agreement with IESO (explaining to them that it is required under our Lending Policy, but would not actually apply in this case) and therefore not have to seek an exemption from the Minister nor have to involve the Board in a change to our Lending Policy.

Would IESO be amenable to this?

Hi Ron,

OFA Legal took the position that this is management call.

I am used to people changing views but they have the version of the note from last week and have not raised an issue.

Thanks,

John

Hi Ron,

I did check the draft versions of the Security Agreement. The latest is attached here.

I don't believe it impacts the intercept that has not yet hit the IESO. The Covenant section that existed prior, that excluded appropriations, is not there. That said, Energy and IESO signed the intercept letter agreement / MOU after having checked with OPG.

The email below is Opal following up. I told her that I'm fine to have her share the note with anyone she sees fit. That I was following up with you.

Thanks,

John

Hi John,

I spoke with Gadi briefly about the inclusion of permitted liens language in the OEFC agreements, during a regular meeting on Friday. He didn't seem to have any particular concerns about the risks to OEFC, nor any objections to providing TD with a copy of the OFA-IESO agreement. I think it would be good to share the briefing note and with him. Let me know if you have any thoughts on this.

Purely as FYI, I will also keep MoF legal in the loop on this.

Opal.

Hi Lisa,

As you will recall, we circulated earlier version of the note which you had reviewed and Sarah Neville as well. My understanding was the Legal took the position that this was a business decision. I can share the latest version of the note Monday. I am off today so am not sure where things are but understood that an effort would be made to bring everyone onside.

Thanks,

John

Subject: RE: IESO Treasury Policy - likely revising for June 2017

Salman,

Attached is a preliminary draft of the Treasury Policy and Sch A for your review.

Two changes have been made:

<!--[if !supportLists]-->1. <!--[endif]-->Permitting Fair Hydro program borrowings – self explanatory rationale; and

<!--[if !supportLists]-->2. <!--[endif]-->Increase from $420 million to $500 million in Sch A's Cdn Banks max limit per counter party.

The key rationale for the requested increase from $420 million to $500 million per counterparty is as follows:

• The market price of electricity has increased between 2014 to 2016 by approximately 16%-19% which has continued to result in the IESO managing higher and higher cash-flows and therefore seeking risk appropriate investments in accordance with the Treasury Policy – a large limit will allow the IESO to have more flexibility while being efficient with its cash;

• Over the past few years and relevant today, the availability of short-term (generally 1 day to 7 days which is used a lot by the IESO, and including less than 30 days investment) products such as Treasury Bills, BAs and Term Deposits have been irregular and not reliable for the IESO to find. The IESO generally deals in large amounts (several hundreds of millions) and given the lack of short term products at the size the IESO needs, the Sch 1 banks have been generally offering Term Deposits for the IESO at very low interest rates because the Banks do not need the IESO monies. In fact, a few banks offer the IESO less than 10bps for Term Deposits – which is significantly lower than Bank of Canada overnight rate and BAs rates. Therefore, a Term Deposit with very low interest yield does not align with a resulting lower counterparty risk for the IESO; and

• The IESO's Transmission Rights balances have in general remained higher than $100 million on average over the last few years despite an IESO target of $20 million. This

has resulted in the IESO managing higher cash-flows

- <!--[if !supportLists]-->• <!--[endif]-->While the Fair Hydro program is likely to not impact the IESO's overall net cash balances (borrow / sell should generally align), the timing of these cash flows may be different at times and the IESO may hold more cash (short term basis) for a few days. The sales/service agreement with OPG Trust has not been completed, and I am just listing this as a contingency in case for some reason IESO holds larger cash balances before paying back the Fair Hydro loans.

Regards.

Hi Anthony,

I wanted to circle back with you on this email, particularly regarding possibly updating the IESO's Treasury Policy. Since it does require the Minister of Finance's approval, the OFA would be involved in obtaining that approval from the Minister. When you do have a markup, please do share it with us. Any details on what the changes would be accomplishing etc would also be helpful.

Subject: IESO Treasury Policy - likely revising for June 2017

Salman,

As part of the Fair Hydro initiative, the IESO plans to ask government to permit FHP debt in an update to the O. Reg. 280/14.

In addition, IESO is likely to update its treasury policy (see attached – as approved by IESO Board and Min of Fin in 2015) to permit for the FHP draws/initiative.

I likely may also ask to increase the short term Cdn Sch I banks limits from $420million to $500million.

As part of the treasury policy update I wanted to give you/OFA a fyi and determine if you/OFA wish to comment back to me before I undertake the above changes.

Call me to discuss if easier.

Regards.

MINISTER OF FINANCE APPROVAL OF
IESO'S UPDATED TREASURY POLICY

ISSUE

As prescribed under Ontario Regulation 280/14 ("Regulation") under the *Electricity Act,* 1998, the IESO has submitted an updated IESO Treasury Policy ("Treasury Policy") for the Minister of Finance's approval.

- Under the Regulation, the IESO is required to maintain investment, borrowing and financial management policies and procedures.
- The Treasury Policy was last approved by the Minister of Finance in 2015.
- Under the Regulation, the Minister of Finance may approve the proposed statement or refer it back to the IESO for further consideration. If the Minister of Finance does not approve the proposed statement and does not refer it back to the IESO for further consideration within 60 days, the Minister shall be deemed to have approved the IESO's proposed Treasury Policy.

RECOMMENDATION

OFA staff have reviewed the changes proposed to the Treasury Policy and recommend that it be approved.

- The changes proposed would permit IESO borrowing facilities to be used to ensure funding of any amounts resulting from or required under the Ontario Fair Hydro Plan Act, 2017 ("OFHP Act").
- ~~are not significant in nature and raise no concerns with staff~~.
- No fiscal costs to the government are anticipated from the approval of the proposed updated policy as the IESO will continue its operations and cost recovery under the OFHP Act and from the Ontario Energy Board ~~as usual~~.

KEY CHANGES IN THE TREASURY POLICY

The revised Treasury Policy incorporates the following two changes:

1. Permit borrowings to ensure funding of any amounts resulting from or required under the *Ontario Fair Hydro Plan Act, 2017*.
    - This change is a result of the recent passing of the *Ontario Fair Hydro Plan Act, 2017.*
2. Increase counterparty exposure to Schedule A Canadian Banks from the current $420million to $500 million, an increase of $80 million exposure per counterparty.
    - This ensures that the IESO has flexibility to efficiently manage its cash accounts as evolving business requires IESO to manage increased levels of cash flows and seek appropriate short-term investments.

CONSIDERATIONS~~TEXT AND BACKGROUND~~

- ~~The IESO and the former Ontario Power Authority (OPA) merged on January 1, 2015, into an amalgamated entity, also called the IESO.~~
- [Add in bullets on the FHP and Act and why the IESO will need need to engage in these activities.]
- The IESO, as a settlement agency, collects funds from electricity users and makes payments to generators, transmitters and conservation programs. These balances are

deposited in accounts for a period ranging from a few days to a few months. Interest revenue is earned by the IESO.
    - IESO has stated that since the market price of electricity has increased since 2014 by 16%-19%, it has resulted in IESO managing increased levels of cash flows. This larger limit allows IESO to better manage these increasing cash flows.

- ~~Given that the IESO's financial results are fully consolidated on the books of the Province, and that the IESO has credit facilities with the Province (through OEFC and OFA), the regulation is intended to provide the Minister of Finance with oversight over the financial investment and borrowing plans of the amalgamated entity.~~
- ~~Prior to the amalgamation, the IESO was not subject to any regulations pertaining to its borrowing and investment activities. However, the former OPA was subject to Ontario Regulation 423/04 which provided oversight on the OPA's investment and borrowing activities and required that the OPA submit to the Minister of Finance its Treasury Policy, and any subsequent changes, for approval.~~
- ~~In December 2014, Ontario Regulation 423/04 was repealed and replaced in December 2014 with Ontario Regulation 280/14 which outlines the specific parameters governing the IESO's investment and borrowing activities.~~
- ~~On June 15, 2015, LRC and Cabinet approved amendments to Ontario Regulation 280/14 to allow the IESO to continue its normal business operations including continued investment in securities that have been issued or guaranteed by the federal US government, manage foreign exchange risk, and continue managing its pension plans as it has in the past without any additional restrictions.~~
- ~~The regulation also allows the IESO to borrow for general corporate purposes (which includes borrowing for pension contributions, capital expenditures, etc.), consistent with the terms of its credit facility with the Ontario Electricity Financial Corporation (OEFC).~~

BACKGROUND

Formatted: Font: (Default) Arial, Bold

- The IESO and the former Ontario Power Authority (OPA) merged on January 1, 2015, into an amalgamated entity, also called the IESO.
- Prior to the amalgamation, the IESO was not subject to any regulations pertaining to its borrowing and investment activities. However, the former OPA was subject to Ontario Regulation 423/04 which provided oversight on the OPA's investment and borrowing activities and required that the OPA submit to the Minister of Finance its Treasury Policy, and any subsequent changes, for approval.

Formatted: Space Before: 6 pt, Add space between paragraphs of the same style

- In December 2014, Ontario Regulation 423/04 was repealed and replaced in December 2014 with Ontario Regulation 280/14 which outlines the specific parameters governing the IESO's investment and borrowing activities.
- Given that the IESO's financial results are fully consolidated on the books of the Province, and that the IESO has credit facilities with the Province (through OEFC and OFA), the regulation is intended to provide the Minister of Finance with oversight over the financial investment and borrowing plans of the amalgamated entity.
- On June 15, 2015, LRC and Cabinet approved amendments to Ontario Regulation 280/14 to allow the IESO to continue its normal business operations including continued investment in securities that have been issued or guaranteed by the federal US government, manage foreign exchange risk, and continue managing its pension plans as it has in the past without any additional restrictions.

- The regulation also allows the IESO to borrow for general corporate purposes (which includes borrowing for pension contributions, capital expenditures, etc.), consistent with the terms of its credit facility with the Ontario Electricity Financial Corporation (OEFC).

Subject: IESO and OFA - FHP Line of Credit Facility Directive

Hi Ron,

Please find attached the draft IESO credit facility package for your review and approval. The package has been reviewed by OFA and MOF Legal.

The documents are also saved under below folder:
\\ofina.on.ca\ofadfs\Users\CEF\Hydro 2017\IESO\Financing\IESO-OFA - FHP Line of Credit\Minister Directive Package

Regards,
Gavin He

IESO FAIR HYDRO PLAN CREDIT FACILITY
MINISTER OF FINANCE LENDING DIRECTIVE

The Independent Electricity System Operator (IESO) has requested a revolving credit facility in an amount of up to $2 billion from the Ontario Financing Authority ("OFA") to support its role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act"). To accommodate this request, the OFA requires a Lending Directive from the Minister of Finance.

- The IESO is requesting the credit facility be in place by July 1, 2017, with an initial term of 5-years plus a contingency of three months (effectively expiring on September 30, 2022).

RECOMMENDATION

- OFA staff recommend the Minister sign the Lending Directive allowing the OFA to lend to the IESO.
  - This will help the IESO to fulfil the commitments under the OFHP Act as the IESO will have to finance short to medium term funding shortfalls in the implementation of the Fair Hydro Plan.

MINISTER'S DIRECTIVE

Minister of Finance's Lending Directive would authorize the OFA to provide a revolving credit facility in an amount of up to $2 billion with a maturity date of September 30, 2022. The Lending Directive will also include the following conditions:

- The interest rate charged to IESO on all advances will be based on the Province's cost of funds plus a twenty-five basis point (0.25%) spread, consistent with the spread for current and past OFA credit facilities for the IESO.
- The credit facility agreement shall be subject to such other terms as the OFA deems appropriate from time to time.

FISCAL IMPACT

- There would be a relatively small but positive fiscal impact for the Province as a result of this credit facility.
  - The Province receives a small fiscal benefit by adding 25 basis points (i.e., 0.25%) to the Province's cost of ~~borrowing for~~ funds provided to the IESO under the facility, which should more than offset any administrative cost impact on the OFA and Province.
  - The actual amount is expected to be small, as the IESO is expected to make draws for short periods to bridge brief timing differences in cash flows.
- Both the IESO and OFA are consolidated with the Province on a line by line basis. For the OFA and the Province, costs associated with the credit facility are recovered from the IESO. For the IESO, principal and interest associated with the credit facility are ultimately recovered from electricity ratepayers.
  - Notwithstanding this, recovery from electricity ratepayers is determined by the Ontario Energy Board. If IESO cannot sell the regulatory asset created ~~by the shortfall to a Financing Entity as prescribed in~~under the *Ontario Fair Hydro Plan Act, 2017*, to a financing entity under the Act, the IESO will have this revolving debt that can only begin to be repaid once ~~and if the Ontario Energy Board makes a decision to increase the rates the~~ ratepayers begin ~~pay~~ to pay down the deferred Global Adjustment amount~~for the debt~~.

DETAILS AND ANALYSIS

Formatted: Keep with next

- On May 31, 2017, the government passed the OFHP Act to enable the implementation of the Ontario Fair Hydro Plan, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).
- Under the OFHP Act, the IESO will incur a monthly funding shortfall in the early years of the plan, as a portion of the Global Adjustment ("GA") charge to ratepayers will be deferred to the future.
- During this period, GA amounts collected from ratepayers will, therefore, be insufficient to fund the IESO's contractual obligations to electricity producers and service providers.
- The OFHP Act gives the IESO the right to recover those deferred amounts from specified consumers in the future (the "regulatory asset") and the ability to sell the regulatory asset (i.e., the right to recover the deferred amounts in the future~~shortfall~~) to a financing entity.
  - It is anticipated that the regulatory asset will be purchased by the financing entity to be established by OPG ("OPG SPV", an OPG special purpose vehicle or trust).
  - The cash received from selling the regulatory asset will be used by the IESO to fund the incurred GA shortfall.

- ~~Although~~ IESO ~~will not need long-term borrowing for its role in this process, it~~ is expected to need short-term financing to manage initial and ongoing monthly IESO cash flow requirement timing differences.
  - The OPG SPV is not anticipated to be established and able to borrow to finance the purchase of the regulatory asset from the IESO until later in 2017 (planned for later in summer 2017; however, exact timing is subject to actual implementation).
  - Even once the SPV is set up to borrow, there is expected to be timing differences between the IESO's monthly settlement process when it has to pay generators and when the SPV purchases the asset from IESO.
  - Also, under the legislation, OPG's SPV is not required to purchase any portion of the regulatory asset, which could result in longer than planned IESO draws on the credit facility.

Current Status

- An existing credit facility between the IESO and the OFA is currently available for $975 million, which includes support for the current Regulated Price Plan (RPP) program. The IESO has proposed that a separate and additional credit facility be provided to support only the FHP credit needs. A separate facility for the FHP is preferable to ensure operational efficiency and tracking of related interest costs.
- As a result, the IESO has proposed to reduce the current $975 million credit facility by $500 million and create a new FHP facility in the amount of $2 billion.
  - The $500 million reduction in the current OFA facility is to eliminate duplicate credit needs and reflects that the FHP prices for eligible consumers is being implemented through the ~~replacement of the current~~setting of prices under the RPP ~~by the new FHP~~.
  - Specific terms of the agreement are being negotiated between the IESO and OFA.

	Existing OFA ~~:~~ IESO Facility	**New Proposed OFA-IESO FHP Facility**
Current Credit Facilities	$975 million	~~$~~ -

Reduction due to FHP	$(500 million)	$ -
Increase due to FHP	$ -	$2,000 million
Total Credit Facilities	**$475 million**	**$2,000 million**

BACKGROUND

- The IESO is a not-for-profit corporate entity established in 1998 by the *Electricity Act, 1998*. It is governed by an independent Board of Directors and its Chair and Directors are appointed by the Province.
- The IESO has full statute-based authority for establishing, monitoring and enforcing reliability standards in the province. All the companies that make up the power system in Ontario must meet the IESO's standards.
- Its fees and licences to operate are set by the Ontario Energy Board and it operates independently of all other participants in the electricity market.

Hi John,

Unless OFA legal confirms that legal interpretation, I don't see how I can sign it as written (unless TBS separately confirms in writing).

If that can be handled internally (or with TBS), with no editing needing to be circulated to the IESO and Energy, that can work. If not, then the wording would seem to me needs to be edited.

Hi Ron,

I think OFA Legal is suggesting that the risk of further delay and things falling apart does not justify making edits on OFA's end. If you want to force that risk, however small, then I will just put the edits in there and tell them this is how it is.

I will do that now.

Thanks,

John

Subject: Re: IESO credit facility - Intercept Letter

Hi John

Ask OFA Legal in what manner OFA has been able to independently confirm that there are no appropriations from the legislature, or are they saying that because Energy and IESO are signing to confirm, the OFA would take that as confirmation and therefore be able to comfortably sign such a letter? I'd want them to state that in writing and sign a blue sheet package with a briefing note included that has a statement on legal advice to that effect.

Hi John,

I don't see OFA's role or capacity to confirm or not what appropriations there are from the legislature to IESO, unless you can independently get sign-off in writing from TBS that there are no such appropriations, I would not be see myself as having the capacity to sign a letter with such a confirmation by the OFA.

I think it would be fine to have the text read as both IESO and Energy both acknowledging and confirming, and the OFA acknowledge, but I don't see the OFA as confirming.

Subject: RE: IESO credit facility - Intercept Letter

Hi John,

I've discussed with Sarah N., and we think Ron's edits to the third paragraph of the letter agreement should be deleted and reverted back to the original language. The purpose of that paragraph is for all three parties to acknowledge the current situation, and to change the language for the OFA to "acknowledge" and the other parties to "confirm" the same details will create confusion and possibly further delay this matter.

Also, I recommend deleting the following language added by the IESO – "or through any other agencies, bodies or other means" in the last sentence of the second last paragraph.

Thank you,

Lisa

Moody's (Gavin MacFarlane) has verbally raised their concern to me that the new $2B facility should be in place this month – main concern is that the IESO may/is rapidly burning through the $975M capacity at about $200M-$250M/month. Also, the first sale to Financing Entity is not expected until October(ish).
I am currently at about $405M utilized.
Also, both the IESO Board of Directors and Moody's were expecting these new facilities to be in place this month – and so, any delay would need to be explained.
Appreciate your efforts to co-ordinate a timely approval.
Call me to discuss if needed.

Regards.

Hi Anthony,

I am currently working on your request for the two facilities with the OFA.

I understand your main concern is your interactions with the ratings agencies, Moody's specifically. Is there a particular timeline that you have to meet? My estimation is that the required approvals can be obtained in the early part of next week or the week after. I know the week after is spilling into September.

I am happy to keep pushing for early next week but let me know if the first week of September works. I am confirming as some extraordinary steps are involved.

Thanks,

John

Hi John

Ask OFA Legal in what manner OFA has been able to independently confirm that there are no appropriations from the legislature, or are they saying that because Energy and IESO are signing to confirm, the OFA would take that as confirmation and therefore be able to comfortably sign such a letter? I'd want them to state that in writing and sign a blue sheet package with a briefing note included that has a statement on legal advice to that effect.

Hi Ron,

I will put that in an email to these counterparties when we share the latest draft….that while we have the wording as is, that before we start the sign off they are to confirm it.

It looks like we are ready to execute this…..not sure if Gadi has seen it but if okay with you, I will ask Anna to share with Gadi the draft.

Hi John,

I don't see OFA's role or capacity to confirm or not what appropriations there are from the legislature to IESO, unless you can independently get sign-off in writing from TBS that there are no such appropriations, I would not be see myself as having the capacity to sign a letter

with such a confirmation by the OFA.

I think it would be fine to have the text read as both IESO and Energy both acknowledging and confirming, and the OFA acknowledge, but I don't see the OFA as confirming.

Hi John,

I've discussed with Sarah N., and we think Ron's edits to the third paragraph of the letter agreement should be deleted and reverted back to the original language. The purpose of that paragraph is for all three parties to acknowledge the current situation, and to change the language for the OFA to "acknowledge" and the other parties to "confirm" the same details will create confusion and possibly further delay this matter.

Also, I recommend deleting the following language added by the IESO – "or through any other agencies, bodies or other means" in the last sentence of the second last paragraph.

Thank you,

Lisa

Subject: RE: IESO credit facility

Moody's (Gavin MacFarlane) has verbally raised their concern to me that the new $2B facility should be in place this month – main concern is that the IESO may/is rapidly burning through the $975M capacity at about $200M-$250M/month. Also, the first sale to Financing Entity is not expected until October(ish).
I am currently at about $405M utilized.
Also, both the IESO Board of Directors and Moody's were expecting these new facilities to be in place this month – and so, any delay would need to be explained.
Appreciate your efforts to co-ordinate a timely approval.
Call me to discuss if needed.

Regards.

Hi John,

Unless OFA legal confirms that legal interpretation, I don't see how I can sign it as written (unless TBS separately confirms in writing).

If that can be handled internally (or with TBS), with no editing needing to be circulated to the IESO and Energy, that can work. If not, then the wording would seem to me needs to be edited.

Hi Ron,

I think OFA Legal is suggesting that the risk of further delay and things falling apart does not justify making edits on OFA's end. If you want to force that risk, however small, then I will just put the edits in there and tell them this is how it is.

I will do that now.

Thanks,

John

Hi Ron,

Just wondering if you have had a chance to review this note.

Would it make sense to check with Energy policy staff that they are looped in on this?

Thanks,

John

Hi Ron,

Pls. see attached latest note on the IESO request to amend the two OEFC credit facilities. The file is saved in the folder below.

We have received comments from Documentation and Legal thus far but have not shared this version with them yet, as we are trying to manage the process.

Thanks,

John

OEFC -- IESO CREDIT FACILITY AGREEMENT & THE PERMITTED LIENS

~~ISSUE~~

The Independent Electricity System Operator ("IESO") has requested that OEFC amend the existing credit facility agreements between OEFC and IESO (for $160M and $120M) to address the additional obligations IESO is taking on under Ontario's Fair Hydro Plan. IESO has indicated that OEFC credit facilities will not be used for Ontario Fair Hydro Plan (FHP) purposes.

~~CONTEXT –~~ IESO'S REQUEST

- Under ~~T~~the FHP, ~~requires the~~ IESO and Ontario Power Generation (OPG) are interacting~~to work together~~ to refinance a portion of the Global Adjustment ~~Ontario's clean energy investments~~ over a longer period of time.

- IESO and OPG are in a discussion to grant a security/priority interest on IESO's assets to OPG Trust for the period of the first 4 years of the GA deferral.

- The IESO is planning to seek its Board's approval on Nov 22, 2017 for the security agreement. Without amending the existing OEFC $160M and $120M credit facility agreements (the "OEFC Agreements"), IESO could potentially be considered to be in default of the terms of the agreements. IESO staff wrote:

  > *"…it likely is best to add to the definition of "Permitted Liens" in the two OEFC facilities to address a) IESO granting security to the OPG Trust during the first 4 years of fair hydro program and b) the possibility that the Clean Energy Adjustment funds collected by IESO might be considered to be subject to a lien. The IESO does not want to be inadvertently in default."*

- In order to address this issue, the IESO has requested to amend the definition of the "permitted liens" in both existing OEFC Agreements to include any liens related to the FHP. Specifically, adding a clause in the existing OEFC Agreements that any lien related to OFHP will not be viewed as negative pledge by OEFC, so those liens can be used to secure the performance of IESO's obligations to OPG under the FHP. This would allow IESO to grant security to the OPG Trust during the first 4 years of implementing the GA deferral and also avoid ~~of~~ breaching the terms of the existing agreements with OEFC.

- To support IESO's role in the implementation and participation under the Ontario Fair Hydro Plan Act, 2017 ("OFHP Act") in July 2017, the IESO had requested the OFA to make the same request to the credit facility agreements with OFA in October.
  - On November 6, 2017, the OFA amended the $475M facility to amend the definition of the "permitted liens" and also included same for the new $2B credit facility agreement between OFA and the IESO , as requested by the IESO.

CONSIDERATIONS

- With the new security agreement between OPG Trust and IESO, OPG Trust would have a priority claim against potentially the Clean Energy Adjustment funds collected by or flown-through the IESO, the OEFC could find itself unable to collect payments due from the IESO. The likelihood of this scenario could be assessed as low. ~~and~~

- IESO is also an agency of the government consolidated line-by-line in the Province's accounts. ~~[This was a bullet inserted by CMD – Operations.]~~

Formatted: Left: 1", Right: 1", Top: 0.69", Bottom: 0.56", Footer distance from edge: 0.28"

Formatted: Indent: Left: 0.25", No bullets or numbering

Commented [GH1]: We mentioned the security agreement in the above paragraph already, so we don't think we need to mention this again here.

Formatted: Font: +Body (Calibri), 11 pt

Formatted: Indent: Left: 0.5", No bullets or numbering

- The OFA included the requested changes in the OFA credit facilities, providing a precedent of having considered the changes/inclusion of the same request. Treating the current request differently by seeking either a Minister's directive or not granting the IESO its request would mean having to take steps on the OFA credit facilities which were either signed recently or amended recently.

- OFA'S Capital Markets – Operations staff have commented that the legislation governing OEFC, the *Electricity Act, 1998*, may provide differing context from the OFA's objects and mandate under the *Capital Investment Plan Act, 1993*.

- ~~The OFA included the requested changes in the OFA credit facilities, providing a precedent of having considered the changes/inclusion of the same request. Treating the current request differently by seeking either a Minister's directive or not granting the IESO its request would mean having to take steps on the OFA credit facilities which were either signed recently or amended recently.~~

Formatted: Indent: Left: 0.25", No bullets or numbering

Commented [JK2]: Unless Documentation can provide specific differences that are significant, I suggest we delete.

Commented [GH3]: Would you be able to list out some key differences related to this scenario?

RECOMMENDATIONS

- In order to facilitate IESO and OPG in the implementation of the Fair Hydro Act and remain consistent with the language recently incorporated in existing IESO-OFA agreements, ~~OFA s~~Staff for OEFC are of the view that the exisiting OEFC Agreements ~~can~~should be amended to include liens related to FHP under the definition of the "permitted liens".

Commented [KR(4]: What's Legal's view?

BACKGROUND

- In order to support IESO's role with the implementation of the OFHP Act, OFA staff made similar changes to the definition of 'permitted liens" in existing (and new) OFA-IESO credit facility agreements on November 6, 2017.

- Currently, under the existing credit facility agreements between OEFC and the IESO, the definition of "permitted liens" does not include any lien arising from the IESO's role and obligations under the OFHP, including with respect to any amount received or receivable by the IESO (such as, without limitation, amounts received or receivable in respect of the Clean Energy Adjustment), or any other lien, whether arising from the action or inaction of IESO, that is created in connection with the OFHP.

Hi,

At the Energy Weekly on the FHP, Energy Legal said that the responses to the questions came over yesterday.

Have we seen and reviewed them? Are we comfortable with them?

Energy is looking to make a submission ASAP, and still looking for the s.28 approval in place by Tuesday so that the Minister can sign the indemnity on Tuesday.

Are there, Have we seen revised indemnities to OPG and IESO?

I understand that the plan for a Minister of Finance briefing generally on the FHP is for it to be scheduled for Tuesday, so, would it be possible to bring forward the s.28 approval at that briefing? And the IESO Treasury Policy amendment too?

Ron

Hi Ron, Malle,

In terms of the timeline of whether it would be possible to bring forward the s28 approval at the briefing next week. Given the draft stage of Energy's materials provided this morning, I am not sure the timeline would be workable. A lot would depend on Energy's provision of the full package.

Malle, Toby, what is your assessment given where things are at the moment?

Thanks,

John

Hi John,

The "confirm" paragraph was dropped altogether, and the new IESO bullet that was at the end was moved up to that part of the letter instead? I likely missed the flag on that change. Is Legal okay with that?

We can push back saying – we are already saying payments that are not appropriations of Energy is already ruled out. But then there is a risk of delay. If we are specifically ruling out this Ontario Climate Change solutions Deployment Corp. that is a known exemption, is it a problem to include?

> The OFA ones have been used for interim financing for the IESO deferral account. When the deferral account was established, the IESO deferral account from the OFA

was for up to $975 million, but that was replaced with two facilities – the $975 M facility was reduced to $475 million, and a new facility for $2 billion was established, with the latter focussed on short term financing of the IESO deferral account.

As with all OFA loans to public bodies, the OFA received a directive from the Minister for them (see attached for the $2 Bn facility).

Hi Ron,

Gadi's been invited to a meeting with Deputy Imbrognu and Ken Hartwick this afternoon to discuss the IESO deferral account – per your call with Gadi this morning. Gadi was hoping to get the answers to two questions before the meeting: 1) how big is the IESO line of credit (LOC)? 2) Does an increase to the LOC require a Minister's directive?

Subject: RE: Meeting with Energy

Hi Anna,

As you may recall, the IESO has several financing facilities, two from the OEFC and two from the OFA.

The OFA ones have been used for interim financing for the IESO deferral account. When the deferral account was established, the IESO deferral account from the OFA was for up to $975 million, but that was replaced with two facilities – the $975 M facility was reduced to $475 million, and a new facility for $2 billion was established, with the latter focussed on short term financing of the IESO deferral account.

As with all OFA loans to public bodies, the OFA received a directive from the Minister for them (see attached for the $2 Bn facility).

Hi Ken,

Thanks. Good points. I think we'd been thinking of it as ceteris paribus, but better to delete the point given the government's balanced budget and related positioning.

Ron

Hi Gadi,

Just an FYI. It's a work in progress, but the DMO wanted to see a draft for today, which we will try to do.

I'm inclined to just have the amount as $2 bn, to meet the IESO request for the FHP-specific facility, unless there are other reasons/needs to expand the authority for other OFA purposes that you are aware of.

Hi Ron,

Please find attached the LRC package for an OIC authorizing the Minister of Finance to lend to the OFA. In order for the OFA to lend to the IESO as part of the proposed Fair Hydro Plan Act, the OFA borrows from the Province (Minister of Finance). The OIC is being obtained under section 22 of the Capital Investment Plan Act.

The package is getting sign-off from MOF legal at the moment, and it's aiming to get yours and Gadi's sign off today in order to get this to DMO to make sure this will be on June 27th LRC date. MOF legal has already reviewed the package, so I do not expect any further changes from them. I will provide you the hard copy of the package once Legal signed off on that.

The documents are also saved here:

Hi Nancy,

Not the draft, as of yet. They are aware of the requirement and ask by IESO (and included in the TB report back TB assessment note and noted in the TB Minute in early May), but it would be an MOF submission, as under CIPA and the OFA.

Scott took a look at the draft. He said it looked fine, on a skim.

We can share the draft as is, if you're okay with it.

Subject: OIC s22 CIPA - OFA-IESO - LRC package

Hi Ron,

Please find attached the LRC package for an OIC authorizing the Minister of Finance to lend to the OFA. In order for the OFA to lend to the IESO as part of the proposed Fair Hydro Plan Act, the OFA borrows from the Province (Minister of Finance). The OIC is being obtained under section 22 of the Capital Investment Plan Act.

The package is getting sign-off from MOF legal at the moment, and it's aiming to get yours and Gadi's sign off today in order to get this to DMO to make sure this will be on June 27th LRC date. MOF legal has already reviewed the package, so I do not expect any further changes from them. I will provide you the hard copy of the package once Legal signed off on that.

The documents are also saved here:
Z:\Users\CEF\Hydro 2017\IESO\Financing\IESO-OFA - FHP Line of Credit\LRC Draft Package<file://\\ofina.on.ca\ofadfs\Users\CEF\Hydro%202017\IESO\Financing\IESO-OFA%20-%20FHP%20Line%20of%20Credit\LRC%20Draft%20Package>

Thanks,
Gavin He

Subject: FW: OPG/IESO Indemnities - S.28 Approvals Package - FINALIZED

Hi Ron

Sorry, here is latest. There was a small change yesterday in indemnity coverage, where OPG also wanted covered director, officers, employees of a financing entity (but not the financing entity itself), if they are also employees of the corporation or its subsidiaries.

There is also still some back and forth this morning between MoF Legal and Energy legal to clarify some things.

Bruno

Hi Bruno/Toby,

FYI – attached is the finalized package for the OPG/IESO indemnities s.28. We've sent this up to our DMO (flagging that OPG Agreement is still subject to MOF/OFA confirmation re: revised wording at section 2).

The Memo, CL table, and business case incorporate all comments from OFA.

I'll let you know once this package is signed by our Minister and ready to send over to MOF.

Many thanks again for your ongoing assistance on this.

Thank you,

Harkamal

The Honourable Glenn Thibeault
Minister of Energy
900 Bay Street, 4th Floor
Toronto ON M7A 2E1

Dear Minister Thibeault,

Thank you for your letter requesting approval under section 28 of the *Financial Administration Act* of the Indemnity Agreements in favour of the IESO, its directors, officers, and employees, and in favour of OPG, OPG's subsidiaries (other than any financing entities as defined in the *Ontario Fair Hydro Plan Act, 2017*) and their respective directors, officers, and employees.

In response to your request, I am attaching the approval, under section 28 of the *Financial Administration Act,* of the Indemnity Agreements for OPG and the IESO in order to allow ~~for~~ them to comprehensively participate in the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

Yours sincerely,

Charles Sousa
Minister

MEMORANDUM TO: Scott Thompson
Deputy Minister of Finance

FROM: Gadi Mayman
Chief Executive Officer

SUBJECT: **Section 28 Approval for Indemnity Agreements In Favour of OPG and IESO**

Attached for your review and consideration is a memo to the Minister of Finance recommending that the Minister approve, pursuant to section 28 of the *Financial Administration Act* (*FAA*), the Ministry of Energy's request to provide indemnities in favour of Ontario Power Generation (OPG) and the Independent Electricity System Operator (IESO) to support their participation in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Act").

In implementing the OFHP, OPG and the IESO expect to carry out activities that fall outside the scope of their pre-OFHP business activities and corporate mandates. They believe this could subject them to the risk of claims that they are not acting in the best interest of the corporation or in "good faith" with respect to their obligations to their respective corporations.

The statutory immunities provided under the *Electricity Act, 1998* and the OFHP Act prohibit an action or other civil proceeding from being commenced against the enumerated persons for any act done in good faith in the exercise or performance of their duties. However, nothing precludes a person from bringing an action or other civil proceeding against these persons causing them to incur costs in defending the claim (for example, arguing that the act was not carried out in "good faith"). The Indemnity Agreements requested under this request would ensure that if a claim is brought against ~~the~~ OPG, OPG's subsidiaries (except for a financing entity), the IESO or their respective directors, officers and employees as a result of carrying out their roles in implementing the Ontario Fair Hydro Plan, they are fully protected for any costs, losses etc., subject to the limitations provided for in the Indemnity Agreements.

…2

IESO and OPG have stated that these indemnities are required for their participation in the OFHP Act.

Commented [KR(1]: Is this the wording they have used? Should we be using the wording in the Energy Business Case?

Ministry of Energy states that the risk of the Province providing the indemnities is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. However, the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998*, for IESO, and under the OFHP Act, for OPG, pre-existing protection for director, officers and employees under insurance and the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

Ministry of Energy also notes that in the event that an indemnity claim does arise and a payment is required, they would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.

Below is a brief summary of the indemnities:

- The indemnity is being given in favour of "Protected Persons" which comprises IESO and OPG, and OPG's subsidiaries (excluding the financing entity) as well as their respective directors, officers and employees, and agents of the IESO and directors, officers, trustees and/or employees of a financing entity if he or she is also a director, officers or employee of the corporation or one of its subsidiaries.
- The Indemnity Agreement provides that the Protected Person shall not benefit from the indemnity to the extent that the losses are already covered by an insurance policy or another indemnity.
- The indemnity also applies where, in the case of a criminal or administrative proceeding, the Protected Person had a reasonable belief that their conduct was lawful.
- The indemnity does not apply where the loss relates to the gross negligence or willful misconduct of the Protected Person.
- The Indemnity Agreement includes a waiver of claim provision. This additionally provides that the Province will not make a claim against a Protected Person who is an individual (i.e., does not apply to OPG/IESO or subsidiaries) relating to any activities associated with the Fair Hydro Plan.

…3

Attached is a briefing note for your consideration. Should a briefing be required, staff would be pleased to discuss this matter at your convenience.

Gadi Mayman

Hi Bruno,

Please share with OPCD / TBS.

Also, is there more on why the wording with respect to reasonable due diligence?

And should the "low" assessment in the TB AN from the weekend be revised, as previously marked?

Thanks,
Ron

Bruno,

Please find attached a markup of the note. I have made some changes to the organization and tried to streamline the note. We think there should also be a section on mitigation measures, and perhaps that can incorporate some of the existing note, plus anything that can be added from Energy's materials. There is still some work to do on the analysis part, but I wanted to make sure you had a head start on what I have done so far.

Best,
Toby

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I have also reviewed the note and have some suggestions to assist with make it shorter and more concise.

I don't think that we need to mention s. 5 because it doesn't apply to this

indemnity. S. 5 requires a joint agreement by the 2 Ministers which is not the case here so I suggest we delete the references to this.

Can we remove the watermark as it makes it hard to read. It's still marked as a draft.

Maybe it would be helpful to accept all the font changes and remove the comments that are no longer required and then we can work from that version.

Thanks.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Thanks for comments and edits.

I'm wondering about language that I had added in the "Previous Direction on Indemnity for IESO and OPG" section. In that part, I note that language in s.5 (2) of the Act around Protection and Assurances might be general direction covering these indemnities. On re-reading I'm wondering if any of the language in s.5 can be seen as providing general direction/coverage for the current indemnity agreement.

The "including" statement in s.5(2) is clearly about the IESO and vendor performance, but 5(2) is not limited to that. However, s.5(2) language says ["Minister and Minister of Finance may together enter into Agreements....with]" . The Agreement in question is just Minister of Energy and the parties. I'm not sure that s.28 approval satisfies the "together" part.

Also S.5(3) is about indemnifications, but my read was this was indemnifying debt rather than persons.

Thanks
Bruno

Please see attached my comments up to this point on the indemnity note. I have started to work on the analysis part of the note, as I think with the many changes in the note we have some duplication and could tighten that part up, so note that this markup does not reflect any changes to that part.

> I want to get back to Harkamal through email with a couple of comments including your comment below regarding excluding the financing entity. Our comment is mainly to respond to their question back to us about inconsistencies between the contingent liability table and the approval request note. In particular, the Liability table stated the probability of liability as low while the business case noted risk indeterminable (albeit with some mitigating factors). As well the table noted maximum financial exposure will be linked to the OPG financing entity's debt offerings. It isn't clear from the note that potential claims are limited to debt offerings or indeed if the claims would necessarily directly related to debt offerings.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Thanks for comments and edits.

I'm wondering about language that I had added in the "Previous Direction on Indemnity for IESO and OPG" section. In that part, I note that language in s.5 (2) of the Act around Protection and Assurances might be general direction covering these indemnities. On re-reading I'm wondering if any of the language in s.5 can be seen as providing general direction/coverage for the current indemnity agreement.

The "including" statement in s.5(2) is clearly about the IESO and vendor performance, but 5(2) is not limited to that. However, s.5(2) language says ["Minister and Minister of Finance may together enter into Agreements....with]" . The Agreement in question is just Minister of Energy and the parties. I'm not sure that s.28 approval satisfies the "together" part.

Also S.5(3) is about indemnifications, but my read was this was indemnifying debt rather than persons.

Thanks
Bruno

Please see attached my comments up to this point on the indemnity note. I have started to work on the analysis part of the note, as I think with the many changes in the note we have some duplication and could tighten that part up, so note that this markup does not reflect any changes to that part.

Our comment is mainly to respond to their question back to us about inconsistencies between the contingent liability table and the approval request note. In particular, the Liability table stated the probability of liability as low while the business case noted risk indeterminable (albeit with some mitigating factors). As well the table noted maximum financial exposure will be linked to the OPG financing entity's debt offerings. It isn't clear from the note that potential claims are limited to debt offerings or indeed if the claims would necessarily directly related to debt offerings.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Hi Ron

I spoke to Toby. As I understand it issue is as follows. OPG and IESO provide corporate indemnities. Case may arise where, say a director, makes a claim against OPG related to FHP work. OPG can then make a claim against the provincial indemnity.

I think concern is not that this in inconsistent with intent of provincial indemnity (to indemnify against claims related to implement PFHP), but rather being clear that claim could be made in this way. On the surface it may be interpreted as OPG passing on costs to the province. Energy does not want to change materials at this point. We can add a clarification bullet in the briefing note. I will draft something and circulate.

Subject: FW: OPG/IESO indemnity Responses to OFA Questions

Hi Ron

There is a last minute issue. I don't fully understand but will call legal for an explanation.

Whatever, it is bottom-line is Energy not wanting to change wording at late hour and us making call if we are OK with this. Just a heads up but I'll try and understand this better and get back to you.

Bruno

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I had a follow up call with Harkamal. Energy is pushing back on revising the business case. They think that given the late notice, and that there is not a substantive change, they are uncomfortable revising the briefing materials, but have agreed to follow up with an email outlining their understanding. Please let me know if you are ok with that approach.

Cc: 'Salman Qadir'; Kim, John (OFA); He, Gavin (OFA); Hanslep, Malle (MOF)
Subject: RE: OPG/IESO indemnity Responses to OFA Questions

I spoke with Harkamal, and she indicated that she now believes that OPG and the IESO would be subject to a claim on the indemnity to cover a claim made by a director, officer or employee on an indemnity provided by the corporation, and that she understands it was the policy intention to cover such a claim under the Provincial indemnity. I asked her to revise the business case to make that

clear.

I want to check with you, as I think that it is important to make sure that this point is clear. I am not sure that it would make sense to not cover such a claim, while covering claims made directly against the corporation. However, I also think that the way it is set out to first have the claim against the corporate indemnity is a bit confusing if that is the intent, except to the extent that it gives an opportunity for such a claim to first be covered by any relevant insurance policy that the corporations may have.

Please let me know if you have further thoughts on this. Otherwise, I believe that Energy will forward a revised business case that can be included in the package.

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Harkamal,

It has occurred to me that even though we require the use of existing indemnities before calling on the Provincial indemnity, if a director/officer/employee of OPG or IESO made a claim on the OPG/IESO indemnities, that would allow the OPG/IESO to make a claim on the Province's indemnity (if not covered by an insurance policy).

Is this a correct interpretation and has this possibility been discussed?

Thanks

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Hi Toby – as discussed – OPG revised section 2 (see highlighted language) so that any directors, officers, employees of a financing entity are still included in the definition of "Protected Person" where he/she is a director, officer, employee of OPG or OPG's Subs.

Other than this, their changes for the most part were more word smithing. I've highlighted in yellow the changes OPG agreed to stand down on.

Thanks very much again,

Hi John,

Apologies - for some reason, your email only popped up in my email inbox at 5:01pm (I note the time stamp below states 11:50am).

I did speak to Toby earlier and flagged that I will be sending updated drafts (pending further changes based on any comments you may have on the actual indemnity agreements) of the business case, exhibit A and memo tomorrow morning based on the information from OPG and IESO.

On our end I will need to get the indemnity agreements back to OPG/IESO early tomorrow to give them time to consider the further changes. Once the agreements have been finalized, we can further update the draft s.28 materials as needed on Monday/Tuesday next week and have our Minister send over the finalized package.

Please let me know if these next steps work for you.

Thank you,

Harkamal

Subject: RE: OPG/IESO indemnity Responses to OFA Questions

Hi Harkamal,

Further to this, could you give us a sense of when the updated draft package could be sent to us for review? Correct me if I am not mapping the next steps, etc. right but based on the information provided by OPG, Energy would be pulling together the updated business case, the contingent liability table and draft submission memo. We are still reviewing the answers included in the attached file but wanted to get a sense of the path forward and the timeline.

Thanks,

John

Hi,

I thought his note had landed on the s.22 option after stating that a s.28 option would require an appropriation being in place. But I may be mis-remembering. And it was only a draft, and may not have been a formal And final analysis.

Ron

On Jun 13, 2017, at 12:26 PM, Bruno Amara <Bruno.Amara@ofina.on.ca> wrote:

> Hi Ron
>
> James had suggested a s22 in which case any indemnity payments would be made under s12 of FAA (allows for indemnity payment from CRF). But I don't think a current appropriation was required in the s22 / s12 option. The potential appropriation discussion in that not was a bit confusing as it seemed to tie the amount to deferral amounts. I'm not sure that they are necessarily directly related. (But this is one of the points of clarification we have requested form OPG/IESO through Energy legal)
>
> MoF Legal was fairly clear in their opinion that this had to be under s.28 - assuming agreement that this should be a Minister of Energy rather than Minister of Finance request. And they are of the opinion that approval for appropriation is requested if an indemnity is called upon. (attached fyi is some explanation that Legal provided to us).
>
> As noted earlier, I revised the draft note (attached) to make explicit this assumption and I will request specific review of this by TBS (I'll resend to Legal as well). We are also sharing with OPCD re: accounting concerns, FTD/CMD mainly to keep them in the loop on the indemnity discussions given the other discussions e.g. provincial guarantee, PiLs exemption.

Thanks Bruno.

James' draft note from May had cited an FAA requirement. Is that not actually a requirement in this instance?

Subject: RE: OPG/IESO indemnity

Hi Ron

Yes, that is the response from TBS although as you note there is some ambiguity. TBS raises the question of how Energy would cover an indemnity and raises the question of mitigation strategies. I don't know what that would look like if potential amounts are undetermined.

The current draft note does have a comment that this issue needs some clarification. But it may be more effective to explicitly add our current understanding that 1) an appropriation is not required at this time 2) if a payment is required at some point in the future Energy would need to present a plan to cover the expense or, request an expense increase through TBC. We were planning to circulate a draft note with TBS, OPCD and others this morning. I will specifically request confirmation from TBS on this point.

I will also ask for clarification on the need for a mitigation strategy. If this is required, it sounds to me like TBS does need to get involved with the ministry on this.

Subject: RE: OPG/IESO indemnity

Hi John, Bruno,

Has the response been incorporated into the BN?

And, while it is not clearly stated, is the response from TBS that it's a question how Energy would cover the indemnity if called on, but not a TB requirement that an allocation or line be approved in order for an indemnity to be provided, since other ministries have the same situation, with unquantifiable exposures and no allocation requirements?

Thanks,
Ron

Subject: RE: OPG/IESO indemnity

Hi Bruno – It is not a requirement for ENERGY to have a separate/specific line related to the indemnity payment, although ENERGY could choose to create a line (the token placeholder you've referenced) which would require a TB/MBC minute if that is the approach they would like to take.

The broader issue is that ENERGY does not have the voted allocation to cover the indemnity should it occur. So the question to the ministry is how will it be covered and what are the mitigation strategies?

In addition, the ministry did receive voted appropriation for the Fair Hydro Plan but this allocation is under executive control (e.g. cannot be used for other purposes than originally specified) and if ENERGY were to try to use attempt to use some of this $ in the event that an indemnity payment occurred they would also require a TB minute.

Let me know if this has helped or if you'd like to discuss.

Hi Chris,

We are working with Energy to process the IESO/OPG indemnity agreements. We were advised by MoF Legal that this should be under S.28 of the FAA. Based on this we will work that through with Energy. The one question that we do have is whether Energy will need a line item for a potential future indemnity payment. E.g., one of those lines with a token $1,000 placeholder. If they do not already have an appropriate line, I presume this would need TBC approval. I'm trying to figure out the answer to this. If you have any insight that would be welcome. In the meantime, fyi, I've attached some questions we have sent to Energy with respect to the draft indemnity agreements.

Thanks

On Jun 13, 2017, at 12:26 PM, Bruno Amara <Bruno.Amara@ofina.on.ca> wrote:

Hi Ron

James had suggested a s22 in which case any indemnity payments would be made under s12 of FAA (allows for indemnity payment from CRF). But I don't think a current appropriation was required in the s22 / s12 option. The potential appropriation discussion in that not was a bit confusing as it seemed to tie the amount to deferral amounts. I'm not sure that they are necessarily directly related. (But this is one of the points of clarification we have requested form OPG/IESO through Energy legal)

MoF Legal was fairly clear in their opinion that this had to be under s.28 - assuming agreement that this should be a Minister of Energy rather than Minister of Finance request. And they are of the opinion that approval for appropriation is requested if an indemnity is called upon. (attached fyi is some explanation that Legal provided to us).

As noted earlier, I revised the draft note (attached) to make explicit this assumption and I will request specific review of this by TBS (I'll resend to Legal as well). We are also sharing with OPCD re: accounting concerns, FTD/CMD mainly to keep them in the loop on the indemnity discussions given the other discussions e.g. provincial guarantee, PiLs exemption.

Subject: Part 2 OFHP Regs - Draft Sub and RAN

Hi,

Attached is Energy's Draft Submission received (please keep confidential as not approved by Energy). The second file is a draft assessment note for review and comment. After consolidating feedback from central agencies, I'm intending to share with Energy later on Monday. The item is at Treasury Board Tuesday in the early afternoon.

>
> I note that in the RAN note and TB submission the credit facility discussion is in terms of "IESO is in discussion with OFA to do this" But hasn't the Minister already signed the

OIC? But Agreement is still to come.

And a comment on some wording in the TB. The language has been that facility is for short- to medium-term financing, which includes the purpose below. May just be confusing that it is referred to as longer-term financing in the note. It may be semantics as I think they mead longer than short-ter.

Pg 14

IESO may also require longer-term financing to maintain the deferral financing plan, should the OPG Trust not be able to access debt markets on a timely basis for purchase of some or all of the regulatory asset.

I don't believe there is any risk more material than usual and as for the provision for the draw. This is the govt policy and ofa is supporting per its normal policy.

Hi Lisa, William,

I am OK as long as the proposed approach is consistent with OFA's lending policy and practices. We have generally not opined on the details of the lending agreement, as we have been communicating.

I do want to copy Ken and Mike to ensure that they are onside, as well.

Thanks,

John

Subject: Policy question re OFHP Credit Facility Agreement
Importance: High

Hi Bruno and John,

I have some additional information pertaining to the structure of the OFA loan to IESO re: OFHP. While this information adds context, it doesn't address the policy question of whether an unsecured loan is appropriate (based on the extent of the insolvency risk) for this regulatory asset.

The current draft FHP Credit Facility Agreement is consistent with the OFA Lending Policy (last revised and approved April 16, 2010 – *status TBC*), which provides that except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, the OFA will generally lend on an unsecured basis (apart from the intercept

provision) in respect of loans made by the OFA to public bodies (IESO is a public body for the purposes of CIPA). As such, the structure of this loan is consistent with the Policy (subject to my note below re: intercept provision). In my review of the supporting policy documentation, including the LRC minute, I didn't see any reference to a secured lending structure and I don't believe that there is any direction requiring this to be a secured loan. That being said, I query whether OFA CEFD staff are comfortable with this approach (see below).

In terms of the intercept provisions, which are required pursuant to s. 23 of CIPA, I have asked Toby from MOF Legal if they are aware of any agreement between the Ministry of Energy and the IESO agreeing that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the IESO amounts equal to any amounts that the IESO fails to pay to the OFA on account of indebtedness under this loan agreement (as required by CIPA)? Are you aware of any such agreement? However, even if there were such an agreement in place, it is unclear to whether adding intercept provisions to the credit facility agreement, will provide further comfort. I plan to discuss this matter further with MOF Legal.

Based on the foregoing (and pending any additional information that Toby may obtain from his discussions with the Ministry of Energy), I defer the following question to CEFD staff:

> **Are you comfortable with the current structure of this loan as an unsecured loan (and the risk that this may entail)?** This decision ultimately needs to be made by business/policy people.
>
> <!--[if !supportLists]-->• <!--[endif]-->**If yes,** the next draft of the agreement will be available in the next day or so to send to IESO for review. I will work with MOF Legal to draft/leverage intercept provisions to mitigate this risk (as far as possible, based on the foregoing). We are also working on the permitted liens, *pari passu* and negative pledge provisions of the draft agreement, as previously discussed.
>
> <!--[if !supportLists]-->• <!--[endif]-->**If no,** additional Ministerial/TB direction, and a new legal agreement (likely with the assistance of external legal counsel) will be required. This will take additional time.

Please do not hesitate to contact me if you would like to discuss further.

Thank you,

Lisa
