Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province’s perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.

The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit

their collections, for whatever reason, once the CEA kicks in

IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.

Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.

Thanks

Ken k

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Ken,

Thank you for passing on the draft. I should send this on to Energy Legal as well in case they have not received it yet. Do you know if Steve Ashbourne of Blakes has been reviewing the term sheet recently and been involved in discussions on this?

This is the first version of the term sheet that we have received since it was sent over to OPG on late June. After that there was a response from Torys dated June 30th with some high level comments on the revised term sheet and an internal Provincial call to discuss the Province's response. Subsequently there was a meeting of representatives of the Province and OPG on July 13th which Toby and also Tom McKinlay of Energy legal attended to discuss considerations regarding the guarantee. It looks like there have been some further discussions regarding the term sheet and understand that there may have been a meeting on the business side last week but MOF LSB was not asked to participate. In order to provide comments on this term sheet, it will be helpful for us to find out more about what the business discussions have been and what approach the Province wishes to take and also consult with Energy Legal and Blakes.

Is there a track changes version of this term sheet from June? Also, as I recall back in early July, we were going to ask OPG to provide to us some of the more detailed documents and drafts that would be associated with this guarantee such as the Master Trust Indenture, etc. Do you know if OPG has shared any of that with the Province?

Thanks.

Hi Matt,

I didn`t review any more following the consolidated set of markups you sent me, with CEFD edits.

I think it`s fine to send that out to the group for further feedback.

As for next week`s meeting, I`d be fine if you attend, unless John can.

Ron

Hi Ron,

I just wanted to touch base on the status of the TB submission before you're off next week.

As it stands, once you're done with your review, I'll distribute the latest copy to Anthony, and once he's commented distribute it to the wider group next week.

I also wanted to ask about the FHP briefing for the energy Minister on Tuesday. Gadi mentioned that if no one else is available I could attend on behalf of the OFA, which I'm happy to do. However, if there is someone more senior who you'd like to attend as well, please let me know.

Thanks,
Matt

Hi Ron,

As promised, here is the latest version for your review.

The only comments we've received so far are from Malle, but they are mostly general and I was

unsure how to translate them into specific edits given my unfamiliarity with this file.

Before she left Anna gave me some direction on who I could follow up with to address Malle's various points. I've followed up, but the responses I've received are essentially "TBD/ still under review". I've left comments in the margins indicating each individual response.

Please let me know if you have any questions and what I can do to help going forward.

Thanks,
Matt on behalf of Anna Strathy

Hi Ron,

No, Anna has not sent any feedback to Malle from Gadi.

My plan is to follow up on the feedback Malle has provided with a variety of parties (Anna left a list) send the draft over to you for review, share it with Anthony Reiss in corporate and then distribute it to the wider distribution group after that.

Please let me know if that sounds like a reasonable approach to you.

Thanks,
Matt

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Ken,

Thanks for the additional information. I have already sent the draft to Energy Legal and will send it to Steve Ashbourne this morning.

Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.

- The last sentence in the opening italics that "the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate" has been deleted.
- It has been changed back to a guarantee from an indemnity.
- The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the "performance" guarantee is added into (E), i.e. IESO's role.
- Concept of "materiality" has been deleted for (B) and (D).
- A concept of "any other discriminatory action including OEB Orders has been introduced.
- The Guarantee wording includes the word "assume" as opposed to just "pay".
- Also, the guarantee has reverted to some of the very general wording that the Province is guarantee "all of the obligations of the Financing Entity" not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating

agencies and any fees due to the securities commission??

- Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?
- Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well.

Perhaps it might be helpful to schedule a meeting for next week to discuss

the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

Ok, thanks Ron.

I'll send it to Anthony and hopefully on Monday to the wider group (I'll cc Gadi when it goes out to the wider group).

Enjoy your weekend.

Matt

Hi Matt,

I didn`t review any more following the consolidated set of markups you sent me, with CEFD edits.

I think it`s fine to send that out to the group for further feedback.

As for next week`s meeting, I`d be fine if you attend, unless John can.

Ron

Hi Ron,

I just wanted to touch base on the status of the TB submission before you're off next week.

As it stands, once you're done with your review, I'll distribute the latest copy to Anthony, and once he's commented distribute it to the wider group next week.

I also wanted to ask about the FHP briefing for the energy Minister on Tuesday. Gadi mentioned that if no one else is available I could attend on behalf of the OFA, which I'm happy to do. However, if there is someone more senior who you'd like to attend as well, please let me know.

Thanks,
Matt

Hi Ron,

As promised, here is the latest version for your review.

The only comments we've received so far are from Malle, but they are mostly general and I was unsure how to translate them into specific edits given my unfamiliarity with this file.

Before she left Anna gave me some direction on who I could follow up with to address Malle's various points. I've followed up, but the responses I've received are essentially "TBD/ still under review". I've left comments in the margins indicating each individual response.

Please let me know if you have any questions and what I can do to help going forward.

Thanks,
Matt on behalf of Anna Strathy

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Ron,

No, Anna has not sent any feedback to Malle from Gadi.

My plan is to follow up on the feedback Malle has provided with a variety of parties (Anna left a list) send the draft over to you for review, share it with Anthony Reiss in corporate and then distribute it to the wider distribution group after that.

Please let me know if that sounds like a reasonable approach to you.

Thanks,
Matt

> Hi Ken,
>
> Thanks for the additional information. I have already sent the draft to Energy Legal and will send it to Steve Ashbourne this morning.
>
> Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.
>
> - The last sentence in the opening italics that "the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate" has been deleted.
> - It has been changed back to a guarantee from an indemnity.
> - The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the "performance" guarantee is added into (E), i.e. IESO's role.
> - Concept of "materiality" has been deleted for (B) and (D).
> - A concept of "any other discriminatory action including OEB Orders has been introduced.
> - The Guarantee wording includes the word "assume" as opposed to just "pay".
> - Also, the guarantee has reverted to some of the very general wording that the Province is guarantee "all of the obligations of the Financing Entity" not just the debt obligations. These include any other obligation

of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??

- Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?
- Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well.

Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.

The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in

IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.

Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.

Thanks

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Ken,

Thank you for passing on the draft. I should send this on to Energy Legal as well in case they have not received it yet. Do you know if Steve Ashbourne of Blakes has been reviewing the term sheet recently and been involved in discussions on this?

This is the first version of the term sheet that we have received since it was sent over to OPG on late June. After that there was a response from Torys dated June 30th with some high level comments on the revised term sheet and an internal Provincial call to discuss the Province's response. Subsequently there was a meeting of representatives of the Province and OPG on July 13th which Toby and also Tom McKinlay of Energy legal attended to discuss considerations regarding the guarantee. It looks like there have been some further discussions regarding the term sheet and understand that there may

have been a meeting on the business side last week but MOF LSB was not asked to participate. In order to provide comments on this term sheet, it will be helpful for us to find out more about what the business discussions have been and what approach the Province wishes to take and also consult with Energy Legal and Blakes.

Is there a track changes version of this term sheet from June? Also, as I recall back in early July, we were going to ask OPG to provide to us some of the more detailed documents and drafts that would be associated with this guarantee such as the Master Trust Indenture, etc. Do you know if OPG has shared any of that with the Province?

Thanks.

Gadi, Ron and John

Pls see the attached revised guarantee and a short presentation on the salient points. It seems to include all of the revisions we requested, however, I will take another more detailed look. Ron and John one section particularly for your review, the Takeout Risk at the end of the Term Sheet indicates the link between the clean energy adjustment and the fair allocation amount as they impact the Takeout risk. I am not very clear about this so you may want to review this closely.

The request for the Letter of Credit still stands however, there is an alternative also provided we have to see tomorrow how comfortable IESO is with the latter.

Thanks

Hi John

Just to follow up on Andrew Maciel's commitment to provide us with a revised term sheet for the guarantee reflecting yesterday's discussion, I was wondering if that can be done EOD Monday. I had a chat with Gadi and given some upcoming internal meetings at senior levels it would be helpful to provide the revised guarantee in front of decision makers.

Thanks

Ken k

Date:	Friday, April 28, 2017 11:26:13 AM

From the conversations that I've been involved with Blakes, Energy, TBS, OPG, etc., one of the challenges that they're trying to overcome is the perception of the banks providing advice to OPG that this is a securitization transaction, which, while it has many similarities, it is not. It seems that TD is also falling into this trap in their analysis, so it would be worthwhile to try to move them off of this perspective for their next round of advice on this, which will have to be in advance of next Tuesday morning when we'll be meeting with the Deputy and the Minister's office in advance of this item going to Fiscal Prep on Wednesday.

I understand where Susan and the TD team are going on this, but TD needs to take the Province's perspective on this, not come at it from the angle of how to structure this to make the financing as easy as possible. We will not, as many of you are aware from our previous discussions, provide anything except the skinniest possible guarantee that would make this financeable, while still ensuring that the appropriate accounting treatment is possible to be achieved.

Thanks,
Gadi

Subject: Fair Hydro Plan - Provincial Support Agreement - Term Sheet

Mike, Jim, Carlos

Please see below for our comments on the draft term sheet for the Provincial Support Agreement. Let us know when you would like to discuss further. Also, please note that we have not sent the comments or the term sheet to Steve Ashbourne at Blakes. Please let us know if you would like us to do so.

Attached is a sample servicing guarantee for a general securitization transaction to provide examples of common features. Note that the sample guarantee is formatted for a corporate transaction and would have to be adjusted accordingly. Also attached is a brief description of the servicing obligations typically covered by a servicing guarantee.

In reviewing the term sheet, we believe that the Servicing Guarantee is narrow in scope.

- Not a conventional servicing guarantee for securitization transactions
- It may not be acceptable for the rating agencies, particularly if monthly remittances of collections from the LCDs are necessary.

As drafted, it solely allows for the appointment of a replacement servicer by the Guarantor upon the occurrence of a Servicer Default (due to breach of servicing performance).

- It does not cover any losses arising from a breach of the electricity vendors' servicing obligations (typical servicing obligations described in attachment)
- It would preclude the monthly remittance of collections by the LDS to IESO for deposit into the Trust's collection account.

Other Items of Consideration:

- Not typical for the Indenture Trustee to be obligated to provide any reporting to the Guarantor
- Confidentiality would be difficult to maintain for a public issuance. The guarantee is a material component of the transaction and will have to be disclosed in detail in the IM, and possibly posted as a material contract
- Consistent with other "AAA" transactions, performance under the guarantee is expected to occur promptly, typically within 2 business days for payment obligations
- Guarantee does not cover a market disruption and the inability to refinance existing due and maturing issuances (including ABCP)

We do have an underwriting agreement with them already, which I'd suggest would cover this. Mike and I are in my office now, and his suggestion is that he will call TD and BMO today and ask them to come in for half an hour each early next week to discuss how they could provide value in this process. A bit of competition is probably a good idea, and Mike has narrowed it down to these two as the best options given that RBC and CIBC are already taken by OPG. Scott, would you be able to come over here for those discussions, and then between you and Mike, you can decide which of the two would be the best fit?

We pay TD plenty of commissions for underwriting our bonds, and those commissions are understood to also include providing other services to us, including advice, so I don't think that I'd consider this as free advice and don't see the need to pay more money to them beyond what we already pay.

Hi Gadi:
I think having dealer advice on our side would be beneficial. I expect that OPG will have us outgunned with the dealer input that they will be receiving. It would be quite easy for us to pick from our dealer syndicate (thinking TD or BMO or Scotia Capital) and hopefully benefit from the advice we would receive. This could be done very quickly (i.e., as early as next week) and I expect could be done at no cost. The larger dealers would have utilities and U.S. expertise which would be beneficial and also have good input into what investors will require going forward. After all, the major Canadian dealers will be the ones making markets and having the most expertise on the structure. They would likely be quite eager to provide us advice on this matter and get involved.
Mike

Subject: Re: Financial Advisor

TD did the Muskrat Falls deal, and structured it in what, at the time, was the most cost-effective way of doing it, but I don't think there was any legislation involved so it didn't have the same complexities. I don't know if there's a particularly big difference between any of the six banks, and they'll all likely push for the most iron clad guarantee that we're able to give, so maybe my idea isn't a great one on reflection, and we should fall back on a Blair Franklin type. Mike, any thoughts?

In the end, it's really about what the accountants say is acceptable or not, so I'm not sure having a second opinion from a financial advisor is of as much value as a second opinion on the direction that E&Y is giving OPG.

Subject: RE: Financial Advisor

Serge talked to Alan yesterday, and apparently Alan feels he is conflicted given his ongoing involvement with OPG. I will float the idea of going to the other banks, as a check. Is there one of the 4 that has a particularly strong team?

Subject: Re: Financial Advisor

I'm not sure how much value added that any of these boutiques would provide. The people that know the markets are the investment bankers that are actually going to be part of the syndicate that will have to market, sell and trade these bonds. Why not have one of TD, Scotia, National or BMO provide this double-checking? If we're worried about the conflict that they are going to give advice that will make it easier to sell the bonds to ultimately make their life as syndicate members easier, then I can see the potential attraction of an advisor that isn't in that business, but why can't Alan be that guy? I don't see that any of those that you've named would provide better external advice to the Province than he would, unless we're concerned that he's too embedded with OPG, but I don't think so.

As for the names you've mentioned, Hansel, if that turns out to be the third one, is run by a lawyer which might be helpful, but I don't know if they know much about bonds, maybe that's where Bill Gula comes in, Blair Franklin definitely knows bonds, as Fred Mifflin used to be head of government Finance at BMO many years ago and they advised the Feds on Muskrat Falls, and I haven't heard of Origin.

I've added Mike, because he knows way more about the bond market and what investors will want than anyone we've talked about in this exchange, so he may have some ideas as to where the Province should go for external advice.

Hope that helps.

Gadi

Hi Gadi,

Energy and Blakes suggest that the Province needs its own financial advisor to test what we are hearing from OPG. As I understand it, there are some elements that OPG believes are requirements in the legislation. The Province would like someone with a market perspective (in addition to your team) that can test the need for each of those requirements as they arise. Given timing, they need someone who can be available in real time to provide this advice.

I will circle back as to whether that is Hansell and not Hanslep. Let me know if there are other names that you might suggest.

Scott

Subject: Re: Financial Advisor

Hi Scott, what is it that we're looking for from a financial advisor? Is this to help with the structuring of OPG Trust's debt issuance? I know Blair Franklin, and they advised Canada on Muskrat Falls. I'm not familiar with Origin, and I don't know Bill Gula, but is that Hansell LLP, not Hanslep?

In any case, I'm not sure what any of them bring to the table beyond what the three banks already engaged would provide, with Alan and the OFA weighing in when their inevitable conflicts get in the way?

I'd be happy to discuss further to get more colour on what you're looking for.

Gadi

Subject: Financial Advisor

Hi,

I spoke with Alan Hibben. He's fully engaged on the file with OPG. He suggested three other firms/people -- Origin Financial, Blair Franklin, and Bill Gula (Hanslep LLP). Carolyn, suggest you chat with Judy if Blakes has worked with any of the above. Scott, you could talk to Gadi etc if he has some thoughts on the above as well.
Let's group after your chats.
Serge

Hi there,

The DMO's office is requesting materials. Do you know when you will expect to have program area sign-off ?

I would also need a contact from MOE corporate controllership as they will need to provide a package for sign-off for their DM and Minister.

Once I know what their scheduling is for approvals we can schedule the DM and Minister briefings.

I would need their signed package before we have our DM and Minister sign.

Just to give everyone a heads up and provide some context.

The CAO briefing is this Monday, the DM briefing is scheduled for September 12. Minister briefing is not scheduled yet.

At this point in time these look more like an information briefing than a signing briefing.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Good morning,

Based on the input from Anthony and Malle, we'll proceed with this as a joint submission from Finance and Energy. As I understand from Keley, Energy is likely to be amenable.

Anthony, I will reach out to Energy once again for review and comment on the submission (after updating the current draft to reflect comments from Keley, Malle and Comms). Once we have Energy's comments, Keley has offered to share our CEO-signed submission with Energy's DMO to secure signatures.

Jonathan, FYI, there may be some coordination required between our two DMOs to coordinate the two Ministers' signatures. I understand from Anthony that we've been targeting September 14 for Minister approval.

Thanks, Anna

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Malle,

I think what you are suggesting with respect to joint signatures makes sense. Energy was aware that their Minister would need to sign the guarantee agreement and weren't opposed to signing other documents, they just wanted confirmation on what other signatures were required. We could perhaps add back the joint signature in the next round of the submission that gets circulated to the broader group, including energy.

Thanks,
Keley

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Keley,

Just one point on the comment about the s. 28 approval. Section 28 also requires approval before seeking an OIC that would authorize a guarantee so whichever Minister is coming forward to obtain the OIC would have to seek the Minister of Finance's approval. If it is the Minister of Finance seeking the OIC, then a separate approval signed by the Minister is generally not required as the Minister is also impliedly approving under s. 28; however if only the Minister of Energy is seeking the OIC, then it would be required. Perhaps the outcome will be that both Ministers sign both the recommendation for the OIC, the TB submission and ultimately the guarantee agreement.

I noted the s. 28 approval point in particular because Torys raised it back in July in their response to the term sheet at that time, i.e. to ensure s. 28 approval was obtained so they may be looking for evidence that it has been obtained.

Thanks,

Malle

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting

yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the

guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Hi Ron & John,

The only rationale I sent to DMO was related to the IESO credit facility (attached).
I hadn't sent out the info in the emails with subject "questions" – just tracked it, since it seemed to be under discussion between both of you.

Hope this helps,
Deena

Hi John.

I thought you had drafted responses to six earlier questions and that I had done a bit of a markup.

Wouldn't OPG say that October 17 plus the needed ratings finalization and marketing make it too tight to do a bond issue in November before the December slow down?

Ron

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should “Authorize”, maybe it’s not “Approve”

- Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- No not everywhere. I’m trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We’re referring to the agreement as a “support agreement” which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I’d sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE’s previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

- Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

- Ultimately a question for

OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

- Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

- In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?
- Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

- Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

- I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review

first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on

Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a “Provincial Support Agreement” as opposed to “Provincial guarantee” as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?

Thanks,

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the

expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!
Lindsay

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be

disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact

me should you have any questions.

ONTARIO FINANCING AUTHORITY CREDIT FACILITY TO THE INDEPENDENT ELECTRICITY SYSTEM OPERATOR TO SUPPORT THE FAIR HYDRO PLAN:

EXPEDITED REQUEST – PRESIDENT OF TREASURY BOARD AS ALTERNATE FOR MINISTER OF FINANCE DIRECTIVE FOR AN EXEMPTION FROM THE OFA LENDING POLICY INTERCEPT PROVISION

The Independent Electricity System Operator (IESO) requests the Ontario Financing Authority (OFA) to execute and put in place the OFA to IESO credit facility required for its role under the Ontario Fair Hydro Plan Act, 2017. On June 29, 2017, the Minister of Finance provided a Lending Directive to accommodate IESO's request.

As required by OFA's Lending Policy, the OFA is returning to request a Minister's direction to exempt from the requirement to include an intercept provision in the Ontario Fair Hydro Plan (OFHP) Credit Facility agreement, as well as the original credit facility agreement.

STATUS UPDATE

- IESO's treasury and pension staff has raised significant concerns about not having the OFHP credit facility in place by the end of August 2017:
  - A ratings agency, Moody's, has raised its concern that the $2 billion facility has not been put in place.
  - Moody's main concern relates to the rapid utilization of the existing $975M facility at a rate of about $200-250M per month (the existing facility is being used, as expected, by the IESO on an interim basis until the new facility is in place).
  - Given that the first bond issuance by OPG's Financing Entity is not expected until later in the fall, the timely execution of the OFA to IESO OFHP credit facility is of a significant concern.
    - OPG's financing entity would use the proceeds from the bond issuance, as well as financing from OPG and, indirectly, the Province as shareholder, to purchase the regulatory asset from IESO, which would use the proceeds to pay down the draws on the OFA credit facility.
  - The timely execution of the OFHP credit facility is also an important priority of the IESO management and Board of Directors, with the expectation that a credit agreement would be in place by the end of August 2017.

RECOMMENDED NEXT STEP

- Request obtaining the Intercept Exemption Directive from the President of Treasury Board, as alternate for the Minister of Finance.

Hi Gadi,

CQSD is asking for a justification as to why we're pressuring to proceed with the Sept, 26 TB/MBC meeting.

Apparently a Minister to Minister reach out is required and as there are multiple submissions scheduled for that date Anthony says he'll need a rational to make sure it stays on the agenda. If it doesn't make the Sept 26 meeting it would be bumped to October 17th, which is the next board meeting.

I'm not entirely sure what rational to give him. Could we make the case that the financing entity will need to go to market this calendar year, which essentially means November, making an October 17th meeting fairly late?

Thanks,
Matt

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Matt,

Here are my questions on the submission.

TB/MBC should "Authorize", maybe its not "Approve"

Are we taking out the term guarantee throughout the document ?

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

I still have the same questions as earlier ie. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

When would the numbers from Energy be finalized ? OPCD review as well ?

Still need the answer of the 5 questions I sent last week by my Director.

We would need to share a copy soon with TBS

as there is a large number of submissions moving forward for Sept. 26 TB/MBC date.

I pretty much agree with Legal points.

Thanks,
Anthony

Hi Matt,

I'm going to review tomorrow morning and will provide feedback then.

You may want your Senior Management and Legal review one more time before sending out to a broader audience.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?

Thanks,
Matt Breadner on behalf of Anna Strathy

Submission on Provincial Guarantee

Hi Lindsay and Anthony,

I'll have another draft ready soon that incorporates some feedback from MOF legal and the OFA, I plan on sharing it with the both of you for feedback before distributing again to the wider group. We have reached out to energy for feedback as well, I understand they're working on it, but in the meantime I plan on proceeding with sending out an updated version before that. And as Anthony stated, yes it is still very much in a draft form.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!
Lindsay

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review.

You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Oh yes, that one. It was a very informal document….as attached.

I can do up a note very quickly. I think it is a good idea to do the September date. Just that I believe the bottleneck may occur in other ways still.

Hi John.

I thought you had drafted responses to six earlier questions and that I had done a bit of a markup.

Wouldn't OPG say that October 17 plus the needed ratings finalization and marketing make it too tight to do a bond issue in November before the December slow down?

Ron

Also what is the rush to proceed to the Sept. 26 TB/MBC meeting ?

A MO to MO reach out is required and I need to support that with a rational.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

- Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

- Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

- Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

- Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

- In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?
- Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

- Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

- I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna Strathy

This message, including any attachments, is meant only for the use of the individual(s) to whom it is intended and may contain information that is privileged/confidential. Any unauthorized use, copying or disclosure is strictly prohibited. If you are not the intended recipient or have received this message in error, please notify us immediately by reply e-mail and permanently delete this message, including any attachments, without reading them, and destroy all copies. Thank you.

Can you confirm the following 1 thru 3. I'm working on 4 and 5. If you have any questions please let me know.

Thanks,

Anthony

1) What is the urgency for tracking the September 26th board date?
   The first bond issue by OPG Financing Entity is expected the fall timeframe (around October/November). Once the guarantee is in place, the Financing Entity will require finalization of documentations, undertake activities such as investor road shows, etc. As a result, the September timeline can be considered to be on FHP's critical path.

2) Do you know if OFA has engaged the DMO/MO and if they are in agreement with tracking this board date?
   OFA staff are of the understanding that DMO/MO fully support the timely implementation of all aspects of the FHP and are kept well informed of developments related to the implementation of the FHP, including this item.

3) Do we know when legal will be signing off on the submission?
   Yes, both MOF Legal and Energy Legal will be signing off on the submission, as legal staff are involved in reviewing the term sheet and as part of the normal sign-off process.

4) What are the expectations around engaging/seeking MOE Minister signoff/agreement?
   OFA staff understand that as contemplated under the Ontario Fair Hydro Plan Act, both Ministers would have to agree to the guarantee following an Order-in-Council. Energy staff are preparing to brief the Minister of Energy in the week of August 28, 2017.

5) Has TBS indicated whether or not a MO-to-MO reach out will be required since this is blowing the 3-week rule?
   While OFA staff are not aware of any discussions about the MO-to-Mo outreach to-date, it would be reasonable to assume that all MO's involved are aware of this item and the timeline involved.

Hi Ron,

I don't believe a rationale was drafted….given the state of reviewing the term sheet, I wonder if we should leave it open ended. October 17th doesn't seem so late at the moment.

Rational would be very simple. I can even give it over the phone to Anthony.

John

Hi,

I thought a rationale was drafted. Did it get finalised and sent out?

Ron

>
> Hi Gadi,
>
> CQSD is asking for a justification as to why we're pressuring to proceed with the Sept, 26 TB/MBC meeting.
>
> Apparently a Minister to Minister reach out is required and as there are multiple submissions scheduled for that date Anthony says he'll need a rational to make sure it stays on the agenda. If it doesn't make the Sept 26 meeting it would be bumped to

October 17th, which is the next board meeting.

I'm not entirely sure what rational to give him. Could we make the case that the financing entity will need to go to market this calendar year, which essentially means November, making an October 17th meeting fairly late?

Thanks,
Matt

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Matt,

Who is the legal lead on it ? Need that info as well.

Also what is the rush to proceed to the Sept. 26 TB/MBC meeting ?

A MO to MO reach out is required and I need to support that with a rational.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

- Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under

certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

- Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt… MOF ? What process will be used to report it ? How often ?

- Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

- Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

- In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?
- Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

- Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

- I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna Strathy

Hi Matt,

Here are my questions on the submission.

TB/MBC should “Authorize”, maybe its not “Approve”

Are we taking out the term guarantee throughout the document ?

How does this request relate to MOE’s previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt… MOF ? What process will be used to report it ? How often ?

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

I still have the same questions as earlier ie. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

When would the numbers from Energy be finalized ? OPCD review as well ?

Still need the answer of the 5 questions I sent last week by my Director.

We would need to share a copy soon with TBS as there is a large number of submissions moving forward for Sept. 26 TB/MBC date.

I pretty much agree with Legal points.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?

Thanks,
Matt Breadner on behalf of Anna Strathy

Hi Lindsay and Anthony,

I'll have another draft ready soon that incorporates some feedback from MOF legal and the OFA, I plan on sharing it with the both of you for feedback before distributing again to the wider group. We have reached out to energy for feedback as well, I understand they're working on it, but in the meantime I plan on proceeding with sending out an updated version before that. And as Anthony stated, yes it is still very much in a draft form.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!
Lindsay

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

PROVINCIAL GUARANTEE TO OPG FINANCING ENTITY

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee or guarantees in respect of debts, obligations, securities or undertakings associated with investment interests acquired by ~~to~~ one or more financing entities established by Ontario Power Generation Inc. ~~OPG Financing Entities established to perform under~~ pursuant to s. 22 of the ~~Ontario~~ Fair H~~h~~ydro ~~Plan~~ Act, 2017 ("OPG Financing Entities") ~~and such entity or entities prospective debt holders~~, that, under certain circumstances as set out in the guarantee, the Province would pay when due amounts in respect of ~~assume~~ the debt obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Approve that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide a ~~provincial~~ guarantee, to be authorized by Order in Council ~~as contemplated~~ under the ~~*Ontario*~~ *Fair Hydro* ~~*Plan*~~ *Act*, 2017 in ~~to~~ respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend to~~that~~ Cabinet ~~approve~~ an Order in Council, ~~in accordance with~~ to be made under subsection 5(3) of the ~~Ontario~~ Fair Hydro Act, 2017 that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the

Commented [MOF LSB1]: It would be useful to be able to narrow the scope of the guarantee wording. Currently it is not limited to principal and interest on the debt issued by the financing entity but could cover fees of service providers, rating agencies, etc. We should work toward making this clearer and if we could get copies of draft agreements such as the Master Trust Indenture, Supplemental Indenture, draft offering documents, any other agreements that would shed some light on how the debt instruments are issued and their terms and conditions this would be helpful.

Commented [RK2R1]: I think in the past we have discussedthat the Province would just be making the payments.

On the call with OPG last week, it was discussed if the Province would be taking over the whole sub, and thus all its obligations, and I thought we set that possibility aside, though a government in the future could look at broader optins, which we would need to assess at that time.

Commented [RK3]: Wouldn't it be better to write out the name of the Act in full?

Commented [MOF LSB4]: Not sure that it is TB's role to approve the guarantee given that it is to be authorized by OIC and that either the OIC or the two Ministers determine the terms, but we can leave this wording to a later time.

Commented [RK5R4]: Suggest discussing with TB analyst the form of the request to TB and the TB Minute.

Commented [MOF LSB6]: Assume that the draft OIC would be attached but depending on when this goes to TB, is there sufficient detail and certainty to draft the OIC. Will there be a maximum liability set out in the OIC – usually there is in the OIC as well as in the guarantee itself.

Commented [RK7R6]: In this case, could it be tied to the requirements of the Act, without a specific maximum, or tied to amount consistent to some determination under the Act, such as the fair allocation amout determination, or cumualative annual fair adjustment amounts under the Act (including financing costs)?

guarantee.

Commented [MOF LSB8]: Is it expected that both Ministers will sign the recommendation on the OIC? Need to consider whether and how the s. 28 process would work. If Minister of Finance recommends the OIC and also signs the guarantee, it may be that a separate approval is not required.

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP)~~, which would~~to lower electricity bills by 25%, on average, for a typical residential consumer, and holding increases to the rate of inflation for four years~~, starting in the summer of 2017~~. The OFHP includes the deferral of a portion of the Global Adjustment portion of the cost of electricity. The deferral is built around the principle that the costs incurred to put in place assets for generation and support conservation to move to a clean, reliable system, would last longer than their typical 20-year contract period and would be able to provide benefits for future ratepayers, and that the costs should be spread more fairly between current and future rates.

To this end, immediate rate relief to eligible ratepayers is provided by deferring and spreading the cost recovery of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. This estimate is being updated and will be presented to [TB/MBC/Cabinet] as part of a report-back by the Ministry of Energy.

Under the ~~*Ontario*~~ *Fair Hydro* ~~*Plan*~~ *Act, 2017*, (the Act), which came into effect on June 1, 2017, the IESO is able to establish a variance account to record the deferral amounts arising from the difference between collections from current ratepayers and payment obligations to generators and conservation, and to create a regulatory asset to recover the balance in the variance account~~approximately equal to the difference between collections from current ratepayers and payment obligations to generators and conservation~~. The Act provides for the IESO to sell the regulatory asset; i.e., ~~and~~ the right to recover those deferred amounts from specified consumers in the future. Under the Act, ~~a~~ Ontario Power Generation Inc. as the Financial Services Manager under section 18, is authorized under section 22 to establish one or more financing entities that may incur funding obligations. Such a Financing Entity will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the eligible ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative, judicial and organizational risk, the debt would not be financeable. OPG is, therefore, requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of

Commented [MOF LSB9]: This is the short title of the Act.

Commented [MOF LSB10]: Might be helpful to include more information about OPG developing the Financing Plan, what funding obligations are, etc.

Commented [MOF LSB11]: Depending on what the scope of the guarantee is, wording should be refined to describe it more accurately – i.e. it is a guarantee of the Financing Entity's debt obligations in favour of the holders of the debt or maybe it's broader than that.

the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

In the event the guarantee is triggered, the Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

The guarantee would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Commented [MOF LSB12]: The wording in this section will need more work once we have reviewed the current term sheet.

Commented [MOF LSB13]: Not sure it is correct that Province will "take over the obligations" – isn't the Province just going to pay as they come due? Also again note outstanding payments to service providers (whoever they might be) is broader than payments on the financing entities debt.

Commented [RK14R13]: Please provide revised wording.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the guarantee is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the guarantee is providedgiven approved, the GovernmentProvince of Ontario takes on a contingent liability. The amount of the liability wouldill increase over the duration of the Fair Hydro Plan and peak at an estimated [$24B to $26B (to be revised as Energy re-estimates)] of debt principal, along with associated interest payments.

In the event the guarantee is triggered, the Province's net debt wouldill be expected to increase by an amount equal to the contingent liability for the debt outstanding at that point in time. The Province's interest payments will also increase by an amount an amount equal to the weighted average cost ofof the debt interest servicing for the debt payment obligations it has assumed under the guarantee.

Commented [MOF LSB15]: OPCD to review

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between [$0.8B and $1.3B] per annum, depending on the interest rate at which the Financing entity will be able to borrow at.

It is important to note that, if the guarantee is triggered, and the Province assumes the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the Act continue or not, in some form. If the payment streams from ratepayers in the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. RECOMMENDATION

(a) Approve that the Minister of Finance and Minister of Energy provide a provincial guarantee, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the

Commented [MOF LSB16]: In general, this TB submission needs more information on:
-The amount of debt that will be issued and over what time period.
-The maximum amount that the Province will guarantee.
-Where the debt will be issued
-In order to describe the risk

Commented [RK17R16]: Could include Energy's curve from the March 2nd CabSub, as well as the interim update in the more recent LTEP deck--- but would be subject to updates per Energy's anticipated forthcoming submissions cited above.

Commented [MOF LSB18]: Include of a discussion of the risk associated with the trigger events – what are the risks – are there legal risks regarding the legislation and whether a court might find it to be invalid for some reason – have legal opinions been obtained on this? Are some of these risks within the control of the government so can be mitigated in some way?

Commented [RK19R18]: We should get input from Energy on this, to be consistent with what is, or will be, in Energy submissions.

Commented [MOF LSB20]: It may be the case that this is a more general approval and the 2 Ministers will determine the terms and condition in accordance with the authorization given to them by the OIC. It depends on how soon the actual wording of the guarantee can be confirmed as opposed to the draft term sheet – The province should not sign of commit to the term sheet as the province's authority comes from the OIC.

guarantee.

Hi all,

Here are my comments on the TB submission. As noted, it is at a fairly preliminary stage. At this point, I am sending them just to OFA or MOF staff. I will send them to Energy Legal separately for their information. Please let me know if you have any questions on any of them.

Thanks.

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

PROVINCIAL GUARANTEE TO OPG FINANCING ENTITY

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee or guarantees in respect of debts, obligations, securities or undertakings associated with investment interests acquired by ~~to~~ one or more financing entities established by Ontario Power Generation Inc. ~~OPG Financing Entities established to perform under~~ pursuant to s. 22 of the ~~Ontario~~ Fair H~~h~~ydro ~~Plan~~ Act, 2017 ("OPG Financing Entities") ~~and such entity or entities prospective debt holders~~, that, under certain circumstances as set out in the guarantee, the Province would pay when due amounts in respect of ~~assume~~ the debt obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Approve that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide a ~~provincial~~ guarantee, to be authorized by Order in Council ~~as contemplated~~ under the ~~*Ontario*~~ *Fair Hydro* ~~*Plan*~~ *Act*, 2017 in ~~to~~ respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend to~~that~~ Cabinet ~~approve~~ an Order in Council, ~~in accordance with~~ to be made under subsection 5(3) of the ~~Ontario~~ Fair Hydro Act, 2017 that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the

Commented [MOF LSB1]: It would be useful to be able to narrow the scope of the guarantee wording. Currently it is not limited to principal and interest on the debt issued by the financing entity but could cover fees of service providers, rating agencies, etc. We should work toward making this clearer and if we could get copies of draft agreements such as the Master Trust Indenture, Supplemental Indenture, draft offering documents, any other agreements that would shed some light on how the debt instruments are issued and their terms and conditions this would be helpful.

Commented [RK2R1]: I think in the past we have discussedthat the Province would just be making the payments.

On the call with OPG last week, it was discussed if the Province would be taking over the whole sub, and thus all its obligations, and I thought we set that possibility aside, though a government in the future could look at broader optins, which we would need to assess at that time.

Commented [RK3]: Wouldn't it be better to write out the name of the Act in full?

Commented [MOF LSB4]: Not sure that it is TB's role to approve the guarantee given that it is to be authorized by OIC and that either the OIC or the two Ministers determine the terms, but we can leave this wording to a later time.

Commented [RK5R4]: Suggest discussing with TB analyst the form of the request to TB and the TB Minute.

Commented [MOF LSB6]: Assume that the draft OIC would be attached but depending on when this goes to TB, is there sufficient detail and certainty to draft the OIC. Will there be a maximum liability set out in the OIC – usually there is in the OIC as well as in the guarantee itself.

Commented [RK7R6]: In this case, could it be tied to the requirements of the Act, without a specific maximum, or tied to amount consistent to some determination under the Act, such as the fair allocation amout determination, or cumualative annual fair adjustment amounts under the Act (including financing costs)?

guarantee.

Commented [MOF LSB8]: Is it expected that both Ministers will sign the recommendation on the OIC? Need to consider whether and how the s. 28 process would work. If Minister of Finance recommends the OIC and also signs the guarantee, it may be that a separate approval is not required.

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP)~~, which would~~to lower electricity bills by 25%, on average, for a typical residential consumer, and holding increases to the rate of inflation for four years~~, starting in the summer of 2017~~. The OFHP includes the deferral of a portion of the Global Adjustment portion of the cost of electricity. The deferral is built around the principle that the costs incurred to put in place assets for generation and support conservation to move to a clean, reliable system, would last longer than their typical 20-year contract period and would be able to provide benefits for future ratepayers, and that the costs should be spread more fairly between current and future rates.

To this end, immediate rate relief to eligible ratepayers is provided by deferring and spreading the cost recovery of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. This estimate is being updated and will be presented to [TB/MBC/Cabinet] as part of a report-back by the Ministry of Energy.

Under the ~~*Ontario*~~ *Fair Hydro* ~~*Plan*~~ *Act, 2017*, (the Act), which came into effect on June 1, 2017, the IESO is able to establish a variance account to record the deferral amounts arising from the difference between collections from current ratepayers and payment obligations to generators and conservation, and to create a regulatory asset to recover the balance in the variance account~~approximately equal to the difference between collections from current ratepayers and payment obligations to generators and conservation~~. The Act provides for the IESO to sell the regulatory asset; i.e., ~~and~~ the right to recover those deferred amounts from specified consumers in the future. Under the Act, ~~a~~ Ontario Power Generation Inc. as the Financial Services Manager under section 18, is authorized under section 22 to establish one or more financing entities that may incur funding obligations. Such a Financing Entity will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the eligible ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative, judicial and organizational risk, the debt would not be financeable. OPG is, therefore, requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of

Commented [MOF LSB9]: This is the short title of the Act.

Commented [MOF LSB10]: Might be helpful to include more information about OPG developing the Financing Plan, what funding obligations are, etc.

Commented [MOF LSB11]: Depending on what the scope of the guarantee is, wording should be refined to describe it more accurately – i.e. it is a guarantee of the Financing Entity's debt obligations in favour of the holders of the debt or maybe it's broader than that.

the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

In the event the guarantee is triggered, the Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

The guarantee would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Commented [MOF LSB12]: The wording in this section will need more work once we have reviewed the current term sheet.

Commented [MOF LSB13]: Not sure it is correct that Province will "take over the obligations" – isn't the Province just going to pay as they come due? Also again note outstanding payments to service providers (whoever they might be) is broader than payments on the financing entities debt.

Commented [RK14R13]: Please provide revised wording.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the guarantee is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the guarantee is providedgiven approved, the GovernmentProvince of Ontario takes on a contingent liability. The amount of the liability wouldill increase over the duration of the Fair Hydro Plan and peak at an estimated [$24B to $26B (to be revised as Energy re-estimates)] of debt principal, along with associated interest payments.

In the event the guarantee is triggered, the Province's net debt wouldill be expected to increase by an amount equal to the contingent liability for the debt outstanding at that point in time. The Province's interest payments will also increase by an amount equal to the weighted average cost ofof the debt interest servicing for the debt payment obligations it has assumed under the guarantee.

Commented [MOF LSB15]: OPCD to review

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between [$0.8B and $1.3B] per annum, depending on the interest rate at which the Financing entity will be able to borrow at.

It is important to note that, if the guarantee is triggered, and the Province assumes the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the Act continue or not, in some form. If the payment streams from ratepayers in the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. RECOMMENDATION

(a) Approve that the Minister of Finance and Minister of Energy provide a provincial guarantee, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the guarantee.

Commented [MOF LSB16]: In general, this TB submission needs more information on:
-The amount of debt that will be issued and over what time period.
-The maximum amount that the Province will guarantee.
-Where the debt will be issued
-In order to describe the risk

Commented [RK17R16]: Could include Energy's curve from the March 2nd CabSub, as well as the interim update in the more recent LTEP deck--- but would be subject to updates per Energy's anticipated forthcoming submissions cited above.

Commented [MOF LSB18]: Include of a discussion of the risk associated with the trigger events – what are the risks – are there legal risks regarding the legislation and whether a court might find it to be invalid for some reason – have legal opinions been obtained on this? Are some of these risks within the control of the government so can be mitigated in some way?

Commented [RK19R18]: We should get input from Energy on this, to be consistent with what is, or will be, in Energy submissions.

Commented [MOF LSB20]: It may be the case that this is a more general approval and the 2 Ministers will determine the terms and condition in accordance with the authorization given to them by the OIC. It depends on how soon the actual wording of the guarantee can be confirmed as opposed to the draft term sheet – The province should not sign of commit to the term sheet as the province's authority comes from the OIC.

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

PROVINCIAL GUARANTEE TO OPG FINANCING ENTITY

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee or guarantees to one or more OPG Financing Entities established to perform under the Ontario Fair hydro Plan Act and such entity or entities prospective debt holders, that, under certain circumstances, the Province would assume the debt obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Approve that the Minister of Finance and Minister of Energy provide a provincial guarantee, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the guarantee.

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP), which would lower bills by 25% for a typical residential consumer, starting in the summer of 2017. The OFHP includes the deferral of a portion of the Global Adjustment portion of the cost of electricity. The deferral is built around the principle that the costs incurred to put in place assets for generation and support conservation to move to a clean, reliable system, would last longer than their typical 20-year contract period and would be able to provide benefits for future ratepayers, and that the costs should be spread more fairly.

To this end, immediate rate relief to eligible ratepayers is provided by spreading the cost of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. This estimate is being updated and will be presented to TB/MBC as part of a report-back by the Ministry of Energy.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the Act), which came into effect on June 1, 2017, the IESO is able to create a regulatory asset approximately equal to the difference between collections from current ratepayers and payment obligations to generators and conservation. The Act provides for the IESO to sell the regulatory asset and the right to recover those deferred amounts from specified consumers in the future. Under the Act, a Financing Entity will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative, judicial and organizational risk, the debt would not be financeable. OPG is, therefore, requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and

- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

In the event the guarantee is triggered, the Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

The guarantee would continue until all obligations of the Financing Entity are fully discharged.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the guarantee is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the guarantee is approved, the Government of Ontario takes on a contingent liability. The amount of the liability will increase over the duration of the Fair Hydro Plan and peak at an estimated [$24B to $26B (to be revised as Energy re-estimates)] of debt principal, along with associated interest payments.

In the event the guarantee is triggered, the Province's net debt will increase by an amount equal to the contingent liability at that point in time. The Province's interest payments will also increase by an amount equal to the weighted average cost of the debt it has assumed under the guarantee.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between [$0.8B and $1.3B] per annum, depending on the interest rate at which the Financing entity will be able to borrow at.

It is important to note that, if the guarantee is triggered, and the Province assumes the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the Act continue or not, in some form. If the payment streams from ratepayers in the Clean Energy Adjustment (CEA) continue, this would offset the debt and

interest payments; however, if the CEA is ended (e.g., if determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. RECOMMENDATION

(a) Approve that the Minister of Finance and Minister of Energy provide a provincial guarantee, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the guarantee.

PROVINCIAL GUARANTEE TO OPG FINANCING ENTITY

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee or guarantees in respect of debts, obligations, securities or undertakings associated with investment interests acquired by ~~to~~ one or more financing entities established by Ontario Power Generation Inc. ~~OPG Financing Entities established to perform under~~ pursuant to s. 22 of the ~~Ontario~~ Fair H~~h~~ydro ~~Plan~~ Act, 2017 ("OPG Financing Entities") ~~and such entity or entities prospective debt holders~~, that, under certain circumstances as set out in the guarantee, the Province would pay when due amounts in respect of ~~assume~~ the debt obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Approve that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide a ~~provincial~~ guarantee, to be authorized by Order in Council ~~as contemplated~~ under the ~~*Ontario*~~ *Fair Hydro* ~~*Plan*~~ *Act*, 2017 in ~~to~~ respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend to~~that~~ Cabinet ~~approve~~ an Order in Council, ~~in accordance with~~ to be made under subsection 5(3) of the ~~Ontario~~ Fair Hydro Act, 2017 that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the

Commented [MOF LSB1]: It would be useful to be able to narrow the scope of the guarantee wording. Currently it is not limited to principal and interest on the debt issued by the financing entity but could cover fees of service providers, rating agencies, etc. We should work toward making this clearer and if we could get copies of draft agreements such as the Master Trust Indenture, Supplemental Indenture, draft offering documents, any other agreements that would shed some light on how the debt instruments are issued and their terms and conditions this would be helpful.

Commented [MOF LSB2]: Not sure that it is TB's role to approve the guarantee given that it is to be authorized by OIC and that either the OIC or the two Ministers determine the terms, but we can leave this wording to a later time.

Commented [MOF LSB3]: Assume that the draft OIC would be attached but depending on when this goes to TB, is there sufficient detail and certainty to draft the OIC. Will there be a maximum liability set out in the OIC – usually there is in the OIC as well as in the guarantee itself.

guarantee.

Commented [MOF LSB4]: Is it expected that both Ministers will sign the recommendation on the OIC? Need to consider whether and how the s. 28 process would work. If Minister of Finance recommends the OIC and also signs the guarantee, it may be that a separate approval is not required.

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP), which would lower bills by 25% for a typical residential consumer, starting in the summer of 2017. The OFHP includes the deferral of a portion of the Global Adjustment portion of the cost of electricity. The deferral is built around the principle that the costs incurred to put in place assets for generation and support conservation to move to a clean, reliable system, would last longer than their typical 20-year contract period and would be able to provide benefits for future ratepayers, and that the costs should be spread more fairly.

To this end, immediate rate relief to eligible ratepayers is provided by spreading the cost of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. This estimate is being updated and will be presented to TB/MBC as part of a report-back by the Ministry of Energy.

Under the ~~*Ontario*~~ *Fair Hydro* ~~*Plan*~~ *Act, 2017*, (the Act), which came into effect on June 1, 2017, the IESO is able to create a regulatory asset approximately equal to the difference between collections from current ratepayers and payment obligations to generators and conservation. The Act provides for the IESO to sell the regulatory asset and the right to recover those deferred amounts from specified consumers in the future. Under the Act, a Ontario Power Generation Inc. as the Financial Sevices Manager under section 18 is authorized under section 22 to establish one or more financing entities that may incur funding obligations. Financing Entity will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative, judicial and organizational risk, the debt would not be financeable. OPG is, therefore, requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;

Commented [MOF LSB5]: This is the short title of the Act.

Commented [MOF LSB6]: Might be helpful to include more information about OPG developing the Financing Plan, what funding obligations are, etc.

Commented [MOF LSB7]: Depending on what the scope of the guarantee is, wording should be refined to describe it more accurately – i.e. it is a guarantee of the Financing Entity's debt obligations in favour of the holders of the debt or maybe it's broader than that.

Commented [MOF LSB8]: The wording in this section will need more work once we have reviewed the current term sheet.

- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

In the event the guarantee is triggered, the Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

The guarantee would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Commented [MOF LSB9]: Not sure it is correct that Province will "take over the obligations" – isn't the Province just going to pay as they come due? Also again note outstanding payments to service providers (whoever they might be) is broader than payments on the financing entities debt.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the guarantee is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the guarantee is given ~~approved,~~ the Government of Ontario takes on a contingent liability. The amount of the liability will increase over the duration of the Fair Hydro Plan and peak at an estimated [$24B to $26B (to be revised as Energy re-estimates)] of debt principal, along with associated interest payments.

In the event the guarantee is triggered, the Province's net debt will increase by an amount equal to the contingent liability at that point in time. The Province's interest payments will also increase by an amount equal to the weighted average cost of the debt it has assumed under the guarantee.

Commented [MOF LSB10]: OPCD to review

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between [$0.8B and $1.3B] per annum, depending on the interest rate at which the Financing entity will be able to borrow at.

Commented [MOF LSB11]: In general, this TB submission needs more information on:
-The amount of debt that will be issued and over what time period.
-The maximum amount that the Province will guarantee.
-Where the debt will be issued
-In order to describe the risk

It is important to note that, if the guarantee is triggered, and the Province assumes the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of

the Act continue or not, in some form. If the payment streams from ratepayers in the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

Commented [MOF LSB12]: Include of a discussion of the risk associated with the trigger events – what are the risks – are there legal risks regarding the legislation and whether a court might find it to be invalid for some reason – have legal opinions been obtained on this? Are some of these risks within the control of the government so can be mitigated in some way?

7. RECOMMENDATION

(a) Approve that the Minister of Finance and Minister of Energy provide a provincial guarantee, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

Commented [MOF LSB13]: It may be the case that this is a more general approval and the 2 Ministers will determine the terms and condition in accordance with the authorization given to them by the OIC. It depends on how soon the actual wording of the guarantee can be confirmed as opposed to the draft term sheet – The province should not sign of commit to the term sheet as the province's authority comes from the OIC.

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the guarantee.

PROVINCIAL GUARANTEE TO OPG FINANCING ENTITY

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee or guarantees to one or more OPG Financing Entities established to perform under the Ontario Fair hydro Plan Act and such entity or entities prospective debt holders, that, under certain circumstances, the Province would assume the debt obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Approve that the Minister of Finance and Minister of Energy provide a provincial guarantee, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the guarantee.

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP), which would lower bills by 25% for a typical residential consumer, starting in the summer of 2017. The OFHP includes the deferral of a portion of the Global Adjustment portion of the cost of electricity. The deferral is built around the principle that the costs incurred to put in place assets for generation and support conservation to move to a clean, reliable system, would last longer than their typical 20-year contract period and would be able to provide benefits for future ratepayers, and that the costs should be spread more fairly.

To this end, immediate rate relief to eligible ratepayers is provided by spreading the cost of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. This estimate is being updated and will be presented to TB/MBC as part of a report-back by the Ministry of Energy.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the Act), which came into effect on June 1, 2017, the IESO is able to create a regulatory asset approximately equal to the difference between collections from current ratepayers and payment obligations to generators and conservation. The Act provides for the IESO to sell the regulatory asset and the right to recover those deferred amounts from specified consumers in the future. Under the Act, a Financing Entity will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative, judicial and organizational risk, the debt would not be financeable. OPG is, therefore, requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and

- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

In the event the guarantee is triggered, the Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

The guarantee would continue until all obligations of the Financing Entity are fully discharged.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the guarantee is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the guarantee is approved, the Government of Ontario takes on a contingent liability. The amount of the liability will increase over the duration of the Fair Hydro Plan and peak at an estimated [$24B to $26B (to be revised as Energy re-estimates)] of debt principal, along with associated interest payments.

In the event the guarantee is triggered, the Province's net debt will increase by an amount equal to the contingent liability at that point in time. The Province's interest payments will also increase by an amount equal to the weighted average cost of the debt it has assumed under the guarantee.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between [$0.8B and $1.3B] per annum, depending on the interest rate at which the Financing entity will be able to borrow at.

It is important to note that, if the guarantee is triggered, and the Province assumes the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the Act continue or not, in some form. Good morning,

Based on the input from Anthony and Malle, we'll proceed with this as a joint submission from Finance and Energy. As I understand from Keley, Energy is likely to be amenable.

Anthony, I will reach out to Energy once again for review and comment on the submission (after updating the current draft to reflect comments from Keley, Malle and Comms). Once we have Energy's comments, Keley has offered to share our CEO-signed submission with Energy's DMO to secure signatures.

Jonathan, FYI, there may be some coordination required between our two DMOs to coordinate the two Ministers' signatures. I understand from Anthony that we've been targeting September 14 for Minister approval.

Thanks, Anna

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Malle,

I think what you are suggesting with respect to joint signatures makes sense. Energy was aware that their Minister would need to sign the guarantee agreement and weren't opposed to signing other documents, they just wanted confirmation on what other signatures were required. We could perhaps add back the joint signature in the next round of the submission that gets circulated to the broader group, including energy.

Thanks,
Keley

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Keley,

Just one point on the comment about the s. 28 approval. Section 28 also requires approval before seeking an OIC that would authorize a guarantee so whichever Minister is coming forward to obtain the OIC would have to seek the Minister of Finance's approval. If it is the Minister of Finance seeking the OIC, then a separate approval signed by the Minister is generally not required as the Minister is also impliedly approving under s. 28; however if only the Minister of Energy is seeking the OIC, then it would be required. Perhaps the outcome will be that both Ministers sign both the recommendation for the OIC, the TB submission and ultimately the guarantee agreement.

I noted the s. 28 approval point in particular because Torys raised it back in July in their response to the term sheet at that time, i.e. to ensure s. 28 approval was obtained so they may be looking for evidence that it has been obtained.

Thanks,

Malle

Hi Anna,

A few comments on the submission from us attached. With respect to your questions

below around who signs the submission / recommends the OIC, I understand CQSD was looking into this. It would be helpful if we could confirm this for the next version of the submission so that ENERGY can be made aware if their Minister needs to sign.

Thanks,
Keley

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet

to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the

Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a “Provincial Support Agreement” as opposed to “Provincial guarantee” as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We’re looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We’ll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I’ll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Hi Malle,

I think what you are suggesting with respect to joint signatures makes sense. Energy was aware that their Minister would need to sign the guarantee agreement and weren't opposed to signing other documents, they just wanted confirmation on what other signatures were required. We could perhaps add back the joint signature in the next round of the submission that gets circulated to the broader group, including energy.

Thanks,
Keley

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Keley,

Just one point on the comment about the s. 28 approval. Section 28 also requires approval before seeking an OIC that would authorize a guarantee so whichever Minister is coming forward to obtain the OIC would have to seek the Minister of Finance's approval. If it is the Minister of Finance seeking the OIC, then a separate approval signed by the Minister is generally not required as the Minister is also impliedly approving under s. 28; however if only the Minister of Energy is seeking the OIC, then it would be required. Perhaps the outcome will be that both Ministers sign both the recommendation for the OIC, the TB submission and ultimately the guarantee agreement.

I noted the s. 28 approval point in particular because Torys raised it back in July in their response to the term sheet at that time, i.e. to ensure s. 28 approval was obtained so they may be looking for evidence that it has been obtained.

Thanks,

Malle

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking

Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Malle,

Thank you for this. I've included my responses below in red, and seeking input/confirmation from others (Anthony/Keley/Jonathan) in highlighted text. I've been away the last two weeks so I apologize if any of my information below is out of date.

I'm also copying the broader group from the OFA here to keep everyone in the loop.

Thanks, Anna

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else

that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Hi Anna,

We are working on a draft OIC which will include some points of decision. If the OIC does not contain a maximum liability, it may be useful to include in the TB submission some commentary on how the two Ministers will limit the Province's exposure in determining the terms and conditions and maximum liability in the guarantee agreement.

We also took a look at the TB submission again and in terms of updating content, should it be updated to reflect the most recent draft that was circulated by John Kim to Steen Hume last evening? This is a clean version of the draft dated August 29, 2017 which reflected MOE/OFA Comments. I don't know what the status of that version is and whether it has been sent to OPG yet.

Thanks.

Malle

Hi Anna,

A few comments on the submission from us attached. With respect to your questions below around who signs the submission / recommends the OIC, I understand CQSD was looking into this. It would be helpful if we could confirm this for the next version of the submission so that ENERGY can be made aware if their Minister needs to sign.

Thanks,
Keley

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for

s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

PROVINCIAL SUPPORT AGREEMENT TO OPG FINANCING ENTITY

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee or guarantees in respect of debts, obligations, securities or undertakings associated with investment interests acquired by one or more financing entities established by Ontario Power Generation Inc. pursuant to s. 22 of the Ontario Fair Hydro Plan Act, 2017 ("OPG Financing Entities"), that, under certain circumstances as set out in the support agreement, the Province would pay when due amounts in respect of the debt obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Authorize that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide a support agreement, to be authorized by Order in Council under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend to Cabinet an Order in Council, to be made under subsection 5(3) of the Ontario Fair Hydro Plan Act, 2017 that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister of Energy and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) ~~Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the support agreement.~~

3. BACKGROUND:

Commented [MOF LSB1]: It would be useful to be able to narrow the scope of the guarantee wording. Currently it is not limited to principal and interest on the debt issued by the financing entity but could cover fees of service providers, rating agencies, etc. We should work toward making this clearer and if we could get copies of draft agreements such as the Master Trust Indenture, Supplemental Indenture, draft offering documents, any other agreements that would shed some light on how the debt instruments are issued and their terms and conditions this would be helpful.

Commented [RK2]: Need to confirm direction.

Formatted: Highlight

Commented [RK3]: In this case, could it be tied to the requirements of the Act, without a specific maximum, or tied to amount consistent to some determination under the Act, such as the fair allocation amount determination, or cumulative annual fair adjustment amounts under the Act (including financing costs)?

Commented [AS4]: Analysis on maximum liability still underway by energy, working with OPG (Matt).

Formatted: Highlight

Commented [KC5]: My understanding is that such a business case is not required given the Minister of Finance is signing the agreement that increases the contingent liabilities.

Formatted: Highlight

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP) to lower electricity bills by 25%, on average, for a typical residential consumer, and holding increases to the rate of inflation for four years. The OFHP includes the deferral of a portion of the Global Adjustment portion of the cost of electricity. The deferral is built around the principle that the costs incurred to put in place assets for generation and support conservation to move to a clean, reliable system, would last longer than their typical 20-year contract period and would be able to provide benefits for future ratepayers, and that the costs should be spread more fairly between current and future rates.

To this end, immediate rate relief to eligible ratepayers is provided by deferring and spreading the cost recovery of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. This estimate is being updated and will be presented to [TB/MBC/Cabinet] as part of a report-back by the Ministry of Energy.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the Act), which came into effect on June 1, 2017, the IESO is able to establish a variance account to record the deferral amounts arising from the difference between collections from current ratepayers and payment obligations to generators and conservation, and to create a regulatory asset to recover the balance in the variance account. The Act provides for the IESO to sell the regulatory asset; i.e., the right to recover those deferred amounts from specified consumers in the future. Under the Act, Ontario Power Generation Inc. as the Financial Services Manager under section 18, is authorized under section 22 to establish one or more financing entities that may incur funding obligations. Such a Financing Entity will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the eligible ratepayers.

Commented [MOF LSB6]: Might be helpful to include more information about OPG developing the Financing Plan, what funding obligations are, etc.

Commented [RK7]: I'd see if Energy can share its description on this.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative, judicial and organizational risk, the debt would not be financeable. OPG is, therefore, requesting that the Government of Ontario provide a support agreement to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Support Agreement:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair

Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

In the event the support agreement is triggered, the Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

The support agreement would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Commented [MOF LSB8]: Not sure it is correct that Province will "take over the obligations" – isn't the Province just going to pay as they come due? Also again note outstanding payments to service providers (whoever they might be) is broader than payments on the financing entities debt.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the support agreement is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the support agreement is provided the Province of Ontario takes on a contingent liability. The amount of the liability would increase over the duration of the Fair Hydro Plan and peak at an estimated [$24B to $26B (to be revised as Energy re-estimates)] of debt principal, along with associated interest payments.

In the event the support agreement is triggered, the Province's net debt would be expected to increase by an amount equal to the contingent liability for the debt outstanding at that point in time. The Province's interest payments will also increase by the debt interest servicing of the debt payment obligations it has assumed under the guarantee.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between [$0.8B and $1.3B] per annum, depending on the interest rate at which the Financing entity will be able to borrow at.

Commented [MOF LSB9]: OPCD to review

Commented [MOF LSB10]: In general, this TB submission needs more information on:
-The amount of debt that will be issued and over what time period.
-The maximum amount that the Province will guarantee.
-Where the debt will be issued
-In order to describe the risk

Commented [RK11]: Could include Energy's curve from the March 2nd CabSub, as well as the interim update in the more recent LTEP deck---but would be subject to updates per Energy's anticipated forthcoming submissions cited above.

It is important to note that, if the support agreement is triggered, and the Province assumes the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the Act continue or not, in some form. If the payment streams from ratepayers in the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

Commented [MOF LSB12]: Include of a discussion of the risk associated with the trigger events – what are the risks – are there legal risks regarding the legislation and whether a court might find it to be invalid for some reason – have legal opinions been obtained on this? Are some of these risks within the control of the government so can be mitigated in some way?

Commented [RK13]: We should get input from Energy on this, to be consistent with what is, or will be, in Energy submissions.

7. RECOMMENDATION

(a) Approve that the Minister of Finance and Minister of Energy provide a support agreement, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

Commented [MOF LSB14]: It may be the case that this is a more general approval and the 2 Ministers will determine the terms and condition in accordance with the authorization given to them by the OIC. It depends on how soon the actual wording of the guarantee can be confirmed as opposed to the draft term sheet – The province should not sign of commit to the term sheet as the province's authority comes from the OIC.

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

Formatted: Highlight

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister of Energy and the Minister of Finance; and

Formatted: Highlight

specify a maximum liability for the guarantee or indemnity.

(c) ~~Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the support agreement.~~

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy

acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance

item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

PROVINCIAL SUPPORT AGREEMENT TO OPG FINANCING ENTITY

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee or guarantees in respect of debts, obligations, securities or undertakings associated with investment interests acquired by one or more financing entities established by Ontario Power Generation Inc. pursuant to s. 22 of the Ontario Fair Hydro Plan Act, 2017 ("OPG Financing Entities"), that, under certain circumstances as set out in the support agreement, the Province would pay when due amounts in respect of the debt obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Authorize that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide a support agreement, to be authorized by Order in Council under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend to Cabinet an Order in Council, to be made under subsection 5(3) of the Ontario Fair Hydro Plan Act, 2017 that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the support agreement.

3. BACKGROUND:

Commented [MOF LSB1]: It would be useful to be able to narrow the scope of the guarantee wording. Currently it is not limited to principal and interest on the debt issued by the financing entity but could cover fees of service providers, rating agencies, etc. We should work toward making this clearer and if we could get copies of draft agreements such as the Master Trust Indenture, Supplemental Indenture, draft offering documents, any other agreements that would shed some light on how the debt instruments are issued and their terms and conditions this would be helpful.

Commented [RK2]: Need to confirm direction.

Commented [RK3]: In this case, could it be tied to the requirements of the Act, without a specific maximum, or tied to amount consistent to some determination under the Act, such as the fair allocation amount determination, or cumulative annual fair adjustment amounts under the Act (including financing costs)?

Commented [AS4]: Analysis on maximum liability still underway by energy, working with OPG (Matt).

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP) to lower electricity bills by 25%, on average, for a typical residential consumer, and holding increases to the rate of inflation for four years. The OFHP includes the deferral of a portion of the Global Adjustment portion of the cost of electricity. The deferral is built around the principle that the costs incurred to put in place assets for generation and support conservation to move to a clean, reliable system, would last longer than their typical 20-year contract period and would be able to provide benefits for future ratepayers, and that the costs should be spread more fairly between current and future rates.

To this end, immediate rate relief to eligible ratepayers is provided by deferring and spreading the cost recovery of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. This estimate is being updated and will be presented to [TB/MBC/Cabinet] as part of a report-back by the Ministry of Energy.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the Act), which came into effect on June 1, 2017, the IESO is able to establish a variance account to record the deferral amounts arising from the difference between collections from current ratepayers and payment obligations to generators and conservation, and to create a regulatory asset to recover the balance in the variance account. The Act provides for the IESO to sell the regulatory asset; i.e., the right to recover those deferred amounts from specified consumers in the future. Under the Act, Ontario Power Generation Inc. as the Financial Services Manager under section 18, is authorized under section 22 to establish one or more financing entities that may incur funding obligations. Such a Financing Entity will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the eligible ratepayers.

Commented [MOF LSB5]: Might be helpful to include more information about OPG developing the Financing Plan, what funding obligations are, etc.

Commented [RK6]: I'd see if Energy can share its description on this.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative, judicial and organizational risk, the debt would not be financeable. OPG is, therefore, requesting that the Government of Ontario provide a support agreement to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Support Agreement:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair

Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

In the event the support agreement is triggered, the Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

The support agreement would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Commented [MOF LSB7]: Not sure it is correct that Province will "take over the obligations" – isn't the Province just going to pay as they come due? Also again note outstanding payments to service providers (whoever they might be) is broader than payments on the financing entities debt.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the support agreement is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the support agreement is provided the Province of Ontario takes on a contingent liability. The amount of the liability would increase over the duration of the Fair Hydro Plan and peak at an estimated [$24B to $26B (to be revised as Energy re-estimates)] of debt principal, along with associated interest payments.

In the event the support agreement is triggered, the Province's net debt would be expected to increase by an amount equal to the contingent liability for the debt outstanding at that point in time. The Province's interest payments will also increase by the debt interest servicing of the debt payment obligations it has assumed under the guarantee.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between [$0.8B and $1.3B] per annum, depending on the interest rate at which the Financing entity will be able to borrow at.

Commented [MOF LSB8]: OPCD to review

Commented [MOF LSB9]: In general, this TB submission needs more information on:
-The amount of debt that will be issued and over what time period.
-The maximum amount that the Province will guarantee.
-Where the debt will be issued
-In order to describe the risk

Commented [RK10]: Could include Energy's curve from the March 2nd CabSub, as well as the interim update in the more recent LTEP deck---but would be subject to updates per Energy's anticipated forthcoming submissions cited above.

It is important to note that, if the support agreement is triggered, and the Province assumes the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the Act continue or not, in some form. If the payment streams from ratepayers in the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

Commented [MOF LSB11]: Include of a discussion of the risk associated with the trigger events – what are the risks – are there legal risks regarding the legislation and whether a court might find it to be invalid for some reason – have legal opinions been obtained on this? Are some of these risks within the control of the government so can be mitigated in some way?

Commented [RK12]: We should get input from Energy on this, to be consistent with what is, or will be, in Energy submissions.

7. RECOMMENDATION

(a) Approve that the Minister of Finance and Minister of Energy provide a support agreement, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

Commented [MOF LSB13]: It may be the case that this is a more general approval and the 2 Ministers will determine the terms and condition in accordance with the authorization given to them by the OIC. It depends on how soon the actual wording of the guarantee can be confirmed as opposed to the draft term sheet – The province should not sign of commit to the term sheet as the province's authority comes from the OIC.

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

(c) Note that the ministry of Energy will also be submitting to the Minister of Finance a request for approval, under Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the support agreement.

Hi Ron & John,

The only rationale I sent to DMO was related to the IESO credit facility (attached).
I hadn't sent out the info in the emails with subject "questions" – just tracked it, since it seemed to be under discussion between both of you.

Hope this helps,
Deena

> Apparently a Minister to Minister reach out is required and as there are multiple submissions scheduled for that date Anthony says he'll need a rational to make sure it stays on the agenda. If it

doesn't make the Sept 26 meeting it would be bumped to October 17th, which is the next board meeting.

I'm not entirely sure what rational to give him. Could we make the case that the financing entity will need to go to market this calendar year, which essentially means November, making an October 17th meeting fairly late?

Thanks,
Matt

Hi Matt,

Who is the legal lead on it ? Need that info as well.

Also what is the rush to proceed to the Sept. 26 TB/MBC meeting ?

A MO to MO reach out is required and I need to support that with a rational.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

- Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ?

What is MOE saying ?

- Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

- Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

- Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

- In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?
- Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

- Still waiting on this information.

Still need the answer of the 5

questions I sent last week by my Director.

- I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second

round?

Thanks,
Matt Breadner on behalf of Anna Strathy

Hi Lindsay and Anthony,

I'll have another draft ready soon that incorporates some feedback from MOF legal and the OFA, I plan on sharing it with the both of you for feedback before distributing again to the wider group. We have reached out to energy for feedback as well, I understand they're working on it, but in the meantime I plan on proceeding with sending out an updated version before that. And as Anthony stated, yes it is still very much in a draft form.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks Lindsay. You make some great points. Energy should be made aware of this, but I don't have any contact info at this time.

Materials are still very much draft. I would keep the approach high level for now, as we receive more info. then things will be updated.

Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!
Lindsay

Subject: FW: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

We are working on a draft OIC which will include some points of decision. If the OIC does not contain a maximum liability, it may be useful to include in the TB submission some commentary on how the two Ministers will limit the Province's exposure in determining the terms and conditions and maximum liability in the guarantee agreement.

We also took a look at the TB submission again and in terms of updating content, should it be updated to reflect the most recent draft that was circulated by John Kim to Steen Hume last evening? This is a clean version of the draft dated August 29, 2017 which reflected MOE/OFA Comments. I don't know what the status of that version is and whether it has been sent to OPG yet.

Thanks.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Sure.

The two sections in the legislation that would be relevant so far are:
p. 10 Section 5xx(3)) authorization for contracts generally – should probably be revised to refer to guarantee and made a statutory charge and also add some scope for the guarantee.
p. 28 section 37XX says that s. 28 of the FA does not apply with respect to any transaction…under this Act.

Subject: FW: Guarantee

Hi Gadi, Anna,

We had a call with Carolyn Calwell and Paul Johnson at Energy Legal.

Please find attached a summary description of the guarantee for a number of obligations related to the proposed transaction that is being requested by OPG's investment dealers. There are 2 guarantees being requested: a guarantee of payment in certain situations as well as a performance guarantee. Although the Province has provided payment guarantees in the past, I am not aware of the Province provided guarantees of performance so this would be a new type of guarantee. We understand that these guarantees would have to be authorized by the proposed legislation so the wording of the authorizing sections needs to be worked on. Right now the section is very general and doesn't yet include the word "guarantee". Also there should be some wording around the type or scope of the guarantee or what it is in relation to. As well, I am assuming that payment under the guarantee would have to be a charge on the CRF in order to provide sufficient support. I am not sure whether the Province's liability under these guarantees can be capped. Also I understand there is a section in the proposed legislation indicating s. 28 FAA does not apply so this is something for us to consider too.

I understand that Tory's (OPG's counsel) is working on a first draft of the guarantee, but it does not appear that the scope of the guarantee would be settled before legislation is introduced.

I don't' know if you have seen the attached document previously. Who would you like us to speak to at the OFA about this proposal?

Thanks.

Subject: RE: Guarantee

Hi Carolyn,

Thanks for your email. Would it be possible to arrange a conference call today with yourself or your counsel most knowledgeable on this proposed securitization and transaction so that we can get an understanding of it and how it fits into any proposed authorizing legislation. Unfortunately we are not familiar with the proposed transaction although we have seen some general background information about the proposal. What role would a guarantee of investment dealers have in the transaction? We do have a copy of the legislation that we got via our clients at OFA and they were more engaged in the issue of a future proposed equity injection, but the most recent version that we have seen does not mention guarantees although there seems to be a very general contract authorization section. Of

course, we have to generally think about s. 28 as well.

A call today to over the main elements of the proposed transaction and the legislation would be very helpful so that we can get back to Gadi.

Subject: RE: Guarantee

Hi Michael & Malle – we will be sending you draft legislation to take a look at. Actual guarantees will follow later.

This relates to the government's Fair Hydro Plan and the promise to reduce rates by 25% by July. We are doing a sort of securitization, for which the legislation will provide a framework. We are contemplating provisions that allow "the Minister" to enter into agreements with respect to transactions contemplated by the legislation. Gadi and DM Angus are of the view that Minister should be MOF, as the agreements are likely to be guarantees to investment dealers. Indemnities for the boards of OPG and IESO will also be required, although we didn't talk about who would sign those.

Happy to answer your questions or walk you through the proposed bill.

Subject: RE: Guarantee

Thank you.

Given timelines on this project, can we have a quick call on this today, maybe at about 3:30. I would just like find out what staff know and think about the proposal generally. Carolyn said that they would like comments on the legislation by noon on Sunday and pens down is next Friday.

Subject: FW: Guarantee

Hi Gadi, Anna,

We had a call with Carolyn Calwell and Paul Johnson at Energy Legal.

Please find attached a summary description of the guarantee for a number of obligations related to the proposed transaction that is being requested by OPG's investment dealers. There are 2 guarantees being requested: a guarantee of payment in certain situations as well as a performance guarantee. Although the Province has provided payment guarantees in the past, I am not aware of the Province provided guarantees of performance so this would be a new type of guarantee. We understand that these guarantees would have to be authorized by the proposed legislation so the wording of the authorizing sections needs to be worked on. Right now the section is very general and doesn't yet include the word "guarantee". Also there should be some wording around the type or scope of the guarantee or what it is in relation to. As well, I am assuming that payment under the guarantee would have to be a charge on the CRF in order to provide sufficient support. I am not sure whether the Province's liability under these guarantees can be capped. Also I understand there is a section in the proposed legislation indicating s. 28 FAA does not apply so this is something for us to consider too.

I understand that Tory's (OPG's counsel) is working on a first draft of the guarantee, but it does not appear that the scope of the guarantee would be settled before legislation is introduced.

I don't' know if you have seen the attached document previously. Who would you like us to speak to at the OFA about this proposal?

Thanks.

Hi Carolyn,

Thanks for your email. Would it be possible to arrange a conference call today with yourself or your counsel most knowledgeable on this proposed securitization and transaction so that we can get an understanding of it and how it fits into any proposed authorizing legislation. Unfortunately we are not familiar with the proposed transaction although we have seen some general background information about the proposal. What role would a guarantee of investment dealers have in the transaction? We do have a copy of the legislation that we got via our clients at OFA and they were more engaged in the issue of a future proposed equity injection, but the most recent version that we have seen does not mention guarantees although there seems to be a very general contract authorization section. Of course, we have to generally think about s. 28 as well.

A call today to over the main elements of the proposed transaction and the legislation would be very helpful so that we can get back to Gadi.

Hi Michael & Malle – we will be sending you draft legislation to take a look at. Actual guarantees will follow later.

This relates to the government's Fair Hydro Plan and the promise to reduce rates by 25% by July. We are doing a sort of securitization, for which the legislation will provide a framework. We are contemplating provisions that allow "the Minister" to enter into agreements with respect to transactions contemplated by the legislation. Gadi and DM Angus are of the view that Minister should be MOF, as the agreements are likely to be guarantees to investment dealers. Indemnities for the boards of OPG and IESO will also be required, although we didn't talk about who would sign those.

Happy to answer your questions or walk you through the proposed bill.

Hi Gadi,

I was thinking about the approach further and I think it would be best if I write to Len Hatzis (legal director at TBS) and Carolyn (so she is aware) first to let Len know the background that the DM of TBS is in favour of the Minister of Finance signing any required guarantee (although maybe he is well aware of this already) and also MOF/OFA view that we shouldn't exempt generally transactions under the new proposed Act from s. 28.
Then Len can let me know which TBS counsel are working on it as I think that it may be Nick and Paul but don't know for sure and don't know what their involvement on this file has been and I don't think I should send the email to TBS without letting Carolyn know.

Subject: RE: Guarantee

We have discussed this with the OFA, and we have endeavoured to provide a provision that we think should allow the financial guarantee being contemplated. Please let us know if you think it provides the necessary scope for what would be required to meet the Province's needs. We deleted the existing provision, although if you think that more general contractual authority is needed, something else could be considered. However, we don't think that it is appropriate to have a statutory appropriation for such general indemnity and guarantee provisions.

We would expect that the guarantee would be capped and only provide for the repayment of the principal and interest of the debt securities of the financial asset owner, and that would usually be done in the OIC.

We don't have any experience with performance guarantees. Is there a need for the Minister of Energy to require performance by the LDCs? We were also wondering if Blakes or another party involved in these discussions might have an example of what is being considered.

We also removed the exemption from s. 28 of the FAA. We have discussed this with OFA staff, and given the importance and breadth of this Act and Program, it doesn't seem appropriate to exempt the entire Act from s. 28 of the FAA.

Mike, I assume that TD would have the schedules, as they've just submitted their RFP response for the new financing. Given that they're our advisor on the fair hydro plan, could you ask them for copies of the schedules?

Thanks,
Gadi

Subject: RE: Nalcor: Request for Financing document

Hi Gadi,

This document is a newer one dated 2017 and is a request for financing. There are a number of schedules referenced in it (see the second page of the index) but the schedules are not attached. I wonder if it would be possible to obtain them as it would be very helpful to understanding the scope of the guarantee proposed in it. Schedule 1 is the Form of Canada Guarantee and there are some other schedules such as Form of Canada Guarantee Opinion Letters etc.

The one I found was from an earlier transaction in 2012.

Thanks.

Malle

Hi Gadi,

Without spending too much time on it, I gather that the guarantee we have provided simply entails Canada talking over payment of the cashflows on the bonds (see sections 2.2-2.3). Hope this helps.

Nice talking to you.

Subject: Re: Next Round Hydro Quebec

Good Morning:

Had wanted to update folks planning for our time on 16 August.

We have those two hours and am now proposing that we attempt to cover three separate topics (3 x ~ 40 mins each).

1. Hydro Quebec
2. OFHP / LTEP curve
3. NEW : OFHP "Provincial Guarantee"

Note : the Provincial Guarantee is a core requirement of the debt / borrowing platform that is required for the dealers and rating agencies to confirm a score for this product so that OPG trust can go to market this fall.

Gadi has been doing battle with dealers on this and we think that 16th would be an appropriate milestone to brief decision makers on the results. Forward planning, this would require a TB/MBC conversation and the overall goal for that would be to have that done when Cabinet is around that last week of August.

Anyway, if we can add this to the agenda to 16th, then we'd probably want to increase size of room to have a sort of mini-FPC so that MOF and TBS MO are participants.

I think that Hydro Quebec item will be quick based on where we are at with discussions and the LTEP curve we got really good directional thinking at yesterday afternoon's multicorners, so if we invited counterparts for 1.15pm then we should be okay, I wager / hope?

Hope this makes sense - let me know if this works for your end and then I'll make sure that I bring

TBS and MOF (Ali and Jason) up the curve and ensure they are ready for 16th in advance.

Many thanks, in advance.

Good Morning:

Appreciate that we are not yet through tomorrow's multicorners discussions regarding Hydro Quebec, however to ensure continued coordination and to plan ahead for when senior PO staff have returned from various holidays, a "next date" has been provided to us via Bevan's calendar.

Wednesday 16 August @ noon - 1pm.

If CO would be so kind as to organize calendar invitation would be terrific.

Many thanks, in advance.

Andrew Teliszewsky

Subject: Next Round Hydro Quebec

Good Afternoon:

Have confirmed next round Hydro Quebec briefing in Bevan's calendar works for 3-4pm on Friday 21 July (one week from right now).

IESO has advised that this is “pushing them” but will need to be made to work given senior PO calendar.

Asking CO to please find the location that suits and dispatch the outlook calendar invites, please.

Many thanks, in advance.

Update

This meeting has been shortened from 4:00pm to 2:00pm.

Hi Everyone,

This will be a meeting to discuss the Ontario Fair Hydro Plan (OFHP) and will include Blakes, Torys, OPG, IESO, and Ministry Counsel.

The meeting will be held at Blakes and the main contact on site will be Lindsay Dicks (416-863-4347 or Lindsay.Dicks@blakes.com). Please inform Lindsay if there will be additional people attending from your group because she will need to pass this information along to their security desk.

To the representatives from OPG and IESO, please forward this meeting invitation to your respective outside counsel for their attendance.

Any materials available for this meeting will be provided in a future update.

If you are unable to attend in person, please use the following conference call information:

Toll-free dial-in number: 1-866-633-1033

Local dial-in number: 416-212-8013

Conference ID: 3164921#

If there are any additional scheduling needs or updates, please contact Joseph Pau (416-326-1018).

Thanks,

PROVINCIAL GUARANTEE FAIR HYDRO PLAN – ISSUES AND ~~NEXT STEPS~~OTHER FINANCING ISSUES

Formatted: Bottom: 0.44"

Formatted: No underline

Provincial Guarantee ~~–~~ OPG Proposed Draft Term Sheet Summary

OFA received the latest OPG proposed re-draft of a Provincial support agreement term sheet, which would provide a Provincial step-in protection for the Financing Entity's debt under an activation event.

Provincial Guarantee Activation Events:

- Decisions by the Legislative Assembly – Repeal, amendments to statute ~~and/or financing transaction agreements~~, adverse decisions of the courts and change in the organizational structure of IESO, adversely impacting the Financing Entity.

Guarantee:

- The Province to take over ~~the all of~~ the obligations of the Financing Entity including payments to service providers – trustees, auditors, rating agencies, etc. Provincial guarantee will continue until all obligations of the Financing Entity are discharged.

Commented [RK1]: Would it be important to note that there would, as such, be no penalty, fee, "make-whole" etc.

- Pending MOF Legal [and Blake's] review and additional drafting, OFA generally agree to the concept in the proposed draft. ~~[Insert bullet on status – e.g., generally agreed to in concept. Legal drafting to come.]~~

Commented [JK2]: Assuming this is OK with everyone.

Recommendation:

Formatted: Normal, No bullets or numbering

- [Assuming we are moving ahead with the guarantee – pending MOF Legal's review.]

Other Discussions and Considerations

There also continue to be discussions on other aspects, such as what had been referred to as servicing or performance guarantees, and on the "warehousing" financing.

Commingling Risk:

- Add bullet to define the issue. Could note that this has been referred to in the past as a "performance guarantee" issue, as people in the briefing may recall that issue.

Commented [JK3]: Will leave this to Ken and Anna to draft as I have not been close to the 'other' discussion items.

- OPG proposes that IESO ~~to~~ would provide either a Letter of Credit or assume responsibility for this risk amounting to the expected Clean Energy Adjustment from the non-investment Grade LDCs over the next 45-60 days. IOPG estimates the L/C to be approximately $50 million.

Warehouse Takeout Risk:

- [Insert bullet to define the issue.]

Commented [JK4]: Same as above.

- Warehouse Default Event – failure to repay the warehouse facility at the end of the commitment term of 12 to 24 months.

Commented [RK5]: Likely should note the take-out periodicity too – every 3-6 months – which would indicate when an issue might become readily apparent.

-
- Incurs a cost to the ratepayer in the form of higher interest rates from the step –up pricing clause in the Financing Entity's agreement with the banks providing the warehouse facility.

Business Issues to be resolved:

Formatted: Font: Bold, Underline

- IESO expressed reluctance on issuing either an L/C or assuming responsibility for the commingling risk. Counter to FHP direction to-date wrt IESO being relieved of a role once the regulatory asset is sold. Accounting would need to be considered.
- IESO to discuss internally and respond
  - ~~Potential legal issues – MOF and Energy Legal along with Blake's to review Term Sheet~~

Next Steps:

- MOF and Energy Legal along with Blake's to review Term Sheet
- Respond to OPG with issues
- Provide OPG with a timeline for the up-coming TB submission on the guarantee so that deadlines are established for resoling outstanding issues and completing a draft version of the guarantee.

PROVINCIAL GUARANTEE FAIR HYDRO PLAN – ISSUES AND NEXT STEPS

Formatted: Bottom: 0.44"

Formatted: No underline

Provincial Guarantee ~~–~~ OPG Proposed Draft Term Sheet Summary

Provincial Guarantee Activation Events:

- Decisions by the Legislative Assembly – Repeal, amendments to statute and/or financing transaction agreements, adverse decision of the courts and change in the organization structure of IESO adversely impacting the Financing Entity.

Guarantee:

- The Province to take over the all of the obligations of the Financing Entity including payments to service providers – trustees, auditors, rating agencies, etc. Provincial guarantee will continue until all obligations of the Financing Entity are discharged.
- [Insert bullet on status – e.g., generally agreed to in concept. Legal drafting to come.]

Commented [RK1]: Would it be important to note that there would, as such, be no penalty, fee, "make-whole" etc.

Commingling Risk:

- Add bullet to define the issue. Could note that this has been referred to in the past as a "performance guarantee" issue, as people in the briefing may recall that issue.
- OPG proposes that IESO ~~to~~ would provide either a Letter of Credit or assume responsibility for this risk amounting to the expected Clean Energy Adjustment from the non-investment Grade LDCs over the next 45-60 days. IOPG estimates the L/C to be approximately $50 million.

Warehouse Takeout Risk:

- [Insert bullet to define the issue.]
- Warehouse Default Event – failure to repay the warehouse facility at the end of the commitment term of 12 to 24 months.
- Incurs a cost to the ratepayer in the form of higher interest rates from the step –up pricing clause in the Financing Entity's agreement with the banks providing the warehouse facility.

Commented [RK2]: Likely should note the take-out periodicity too – every 3-6 months – which would indicate when an issue might become readily apparent.

Business Issues to be resolved:

Formatted: Font: Bold, Underline

- IESO expressed reluctance on issuing either an L/C or assuming responsibility for the commingling risk. Counter to FHP direction to-date wrt IESO being relieved of a role once the regulatory asset is sold. Accounting would need to be considered.
- IESO to discuss internally and respond
  - ~~Potential legal issues – MOF and Energy Legal along with Blake's to review Term Sheet~~

Formatted: Indent: Left: 0.5", No bullets or numbering

Next Steps:

Formatted: Font: Bold, Underline

- MOF and Energy Legal along with Blake's to review Term Sheet
- Respond to OPG with issues
- Provide OPG with a timeline for the up-coming TB submission on the guarantee so that deadlines are established for resoling outstanding issues and completing a draft version of the guarantee.

Formatted: Space After: 0 pt, Line spacing: single

PROVINCIAL GUARANTEE AND OTHER FINANCING ISSUES

ISSUE

To support the Fair Hydro Plan, OPG is requesting that the Government of Ontario provide a guarantee to the OPG Financing Entity and prospective debt holders such that the funding obligations of the Financing Entity will be met by the Province under certain circumstances.

TERMS OF THE GUARANTEE

Events that would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments that adversely affect the OPG Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

Guarantee:

- The Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers (i.e., trustees, auditors).
- The Provincial guarantee will continue until all obligations of the Financing Entity are fully discharged.

Recommendation:

- Pending review by MOF Legal, Energy Legal and external counsel (Blake's), recommend TB/MBC approve the terms of the Guarantee as set out in the term sheet and further detailed in the draft guarantee document to be provided by OPG.

OTHER FINANCING/ACCOUNTING RISKS TO BE RESOLVED

Commingling Risk:

- Refers to the risk associated with unrated/below investment grade Local Distribution Companies (LDCs) not remitting collections from ratepayers to the IESO.
- IESO to provide either a Letter of Credit or assume responsibility for this risk amounting to the expected Clean Energy Adjustment from these LDCs over the

next 45-60 days. OPG estimates the Letter of Credit to be approximately $50 million.
- IESO expressed concerns both from a mandate and accounting perspective on issuing either a Letter of Credit or assuming responsibility for the commingling risk.

Warehouse Takeout Risk:

- Refers to the risk associated with the Financing Entity unable to issue debt in order to pay down the short term financing provided by its banks.
- There may be potential costs to the ratepayer in the form of higher interest rates from the step–up pricing clause in the Financing Entity's agreement with the banks providing the short term financing.

NEXT STEPS

- MOF Legal, Energy Legal and external counsel (Blake's) to review term sheet and draft guarantee document
- OPG/IESO to consider outstanding financing/accounting issues
- TB/MBC decision on Provincial Guarantee (September TBC)

Cc: Christina Zhang <Christina.Zhang@ofina.on.ca>
Subject: RE: Provincial Guarantee

Just a few random thoughts:

- I would think OPG borrowing with a guarantee is a game changer. As we've seen with Newfoundland, guarantees can be expensive, and I expect this one would be too, relative to Ontario's regular borrowing costs. If it is going on the Province's balance sheet, shouldn't that be done in the most efficient way. In addition, I'm surprised the Ontario borrowing and on-lending approach doesn't have more traction as it certainly provides more cost-savings potential, and this might definitely be required.
- I'm also unclear of the benefits of OPG direct borrowing, given that it appears to be direct government policy to me, and is anyone going to think otherwise? Again I don't have the full perspective and may be missing some of the rationale.

It would be great to discuss when you have the time.

Subject: FW: Provincial Guarantee

Hi Mike,

Ken is familiar with what I'm asking about here, so either he or I could fill you in on more details if you'd like. The bottom line is that OPG has now determined, not surprisingly to me, that the debt that they issue to public markets for the GA smoothing option, would require a provincial guarantee. Not a full guarantee, they

pointed out this morning, but just a guarantee that investors would be made whole, and have all of their costs covered, if a future government were to change the legislation under which this structure would be created. To me, that is pretty much equivalent to a full guarantee, as that's likely the only way the system fails, and investors would take on any risk.

My question is why that guarantee, and therefore the diminishment of risk to investors, is treated differently from an accounting perspective than the simpler process of us just borrowing and on-lending to them.

Please let me know if you have any questions, or would like to discuss this further.

Thanks,
Gadi

Subject: Provincial Guarantee

Hi Ken, we all had to rush off to our next meetings following our meeting this morning, so we didn't get a chance to have a discussion about why a Provincial guarantee of all of OPG's debt related to the trust isn't a problem for the accounting treatment that we'd need to get to in order to make the GA smoothing plan work, while direct borrowing and on-lending from the Province would be, if it's greater than 49% of the total borrowing (actually 44% in your current model).

From a capital markets, investor and rating agency perspective, the guarantee is extremely likely to be lumped in with the rest of the Province's debt, and the guaranteed debt would be considered just as much of a provincial obligation as the rest of our debt, particularly in this case where the reason that the guarantee is needed is because investors will demand it in order to protect themselves from legislative amendments by a future government. For that reason, it could be hard to justify, from a capital markets or cost perspective, having OPG borrowing in its own name with a government guarantee, so is it possible to revisit the potential accounting treatment and determine whether, now that we've effectively moved to a guaranteed structure, we could just have the Province, through the OFA or OEFC, do all of the borrowing and on-lend to OPG? Is this something that you'd been planning to address in the accounting material that you're sending over today?

Thanks,

Hi Gadi:
I talked to John Lee today regarding our upcoming meeting. His assessment is that the dealers will stick to the principles you outlined at the last meeting and provide some options for further consideration. John says the dealers are working on a one page summary that he will be able to send to us in advance of the meeting. He expects it will be more of a business issues meeting rather than a legal meeting. His goal will be to get clarity on the path going forward; understand the options and finalize a plan for moving forward. I expect the one pager may be available over the next day or so.

Doesn't look like Cindy can make that time either, so there are too many people that should be involved in this discussion with OPG that can't make it. I'd suggest that we leave it in the hands of everyone who is going to be around next week, and then I can weigh in when I get back. I think you're all aware of the firm direction that I've left with the banks and OPG, without much room to move, even though I'm guessing the banks are going to try to come back with a structure that attempts to transfer as much risk on to us as possible.

All,

I attach a revised draft of the indicative term sheet for the provincial support arrangement in clean and blackline. This draft includes one clarification to the section entitled “Satisfaction of a Servicing Guarantee”.

I have retained clause (y) in the Satisfaction of an Indemnity section for the time being, as I understand that this optionality is important to the OFA. That said, let us know if the OFA has any further comments or questions based on Mark’s email below.

Please let us know if you have any further comments, or if you are signed-off on this draft as soon as possible this afternoon, as I understand that the Department of Energy plans to send a revised draft to OPG before the close of business today.

Kind regards,
Adam

Subject: RE: Provincial Support Agreement | Meeting with OFA, OPCD, Energy, TD and Blakes

Hi all,

I know that the concept of an accelerated payment was discussed in yesterday's call and speaking with Steve this is the rationale for including clause (y) in the Satisfaction of an Indemnity section:

(y) causing the acceleration of the funding obligation and paying the outstanding amount owing thereunder in full, including in the case of debt instruments issued by the applicable Financing Entity by causing the redemption of the debt instruments and paying an amount equal to the then outstanding principal amount thereof plus accrued and unpaid interest up to the date of payment (without any default, penalty, prepayment or make whole premium).

However, we want to note that the ability to redeem the bonds at par (plus accrued) would be off market and could hinder the marketability of an offering. Happy to discuss further. Thanks,

ML

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

Servicing Guarantees	
Servicing Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Servicing Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.
Servicing Guarantee:	Pursuant to a Servicing Guarantee, the Servicing Guarantor will guarantee the performance, or cause the performance, of the obligations of IESO as servicer under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including servicing obligations undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. It is anticipated that such obligations will include matters related to the billing, collection and remittance of clean energy adjustments by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments with other amounts. In the event that the Servicing Guarantee is held to be

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

	unenforceable against the Servicing Guarantor, the Servicing Guarantee will contemplate, in the alternative, a functionally equivalent direct covenant of the Servicing Guarantor.
Term:	The Servicing Guarantor's obligations under a Servicing Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Servicing Guarantee.
Satisfaction of a Servicing Guarantee:	The Servicing Guarantor will have the option to satisfy its obligations under a Servicing Guarantee by paying when due the amounts that would be remitted to the applicable Financing Entity ~~assuming that~~as if IESO and each electricity vendor had complied with its obligations under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest.
Approval Requirement:	The servicing obligations (including any amendments) to which the Servicing Guarantee relates, together with the provisions of any Servicing Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Servicing Guarantee:	Under no circumstances shall the Servicing Guarantor be obligated to pay consequential, special or punitive damages, or for economic loss or loss of profits.

Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together, or an entity owned by the Province of Ontario whose indemnity obligations, as contemplated by this Term Sheet, are in turn unconditionally guaranteed by the Province of Ontario.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.
Indemnity of the Province:	The Indemnitor will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee because of third party claims made against the Indemnitee by one or more of its specified creditors that result from any of the following: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act; (B) the Legislative Assembly of Ontario amending the Act or a Regulation made thereunder in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest.
Term:	An Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.
Satisfaction of an Indemnity:	The Indemnitor will have the option to satisfy its obligations under an Indemnity in respect of a funding obligation by: (x) assuming and paying when due (without acceleration) the regularly scheduled amounts due and payable in respect of the funding obligation during the term and to the extent of the applicable Financing Entity's contractual obligations thereunder; or

	(y) causing the acceleration of the funding obligation and paying the outstanding amount owing thereunder in full, including in the case of debt instruments issued by the applicable Financing Entity by causing the redemption of the debt instruments and paying an amount equal to the then outstanding principal amount thereof plus accrued and unpaid interest up to the date of payment (without any default, penalty, prepayment or make whole premium).
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Indemnity:	Under no circumstances shall the Indemnitor be obligated to indemnify any Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Undertakings regarding Certain Mismatches	
Addressing Mismatches	If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise expected to be available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy its related payment obligations and thereby address any Mismatch.
Possible Undertaking to Fund Mismatches	If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to address a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to address the Mismatch. Any such undertaking would be provided at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and, if given, would be on such terms, including appropriate

	compensation to the Province of Ontario, and be subject to such conditions (for example and without limitation, funding being conditional on the occurrence of a market disruption that results in the non-availability of capital markets term funding to effect a refinancing of the funding obligation) as the Minister of Energy and the Minister of Finance determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
Documentation	
Representations, Terms and Conditions:	Subject to approval of the Minister of Energy and the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Servicing Guarantor and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Servicing Guarantor or the Indemnitor, or any agent or representative of the Servicing Guarantor or the Indemnitor, in connection with the transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Confidentiality obligations of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

Provincial Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

Servicing Guarantees	
Servicing Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Servicing Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

Servicing Guarantee:	Pursuant to a Servicing Guarantee, the Servicing Guarantor will guarantee the performance, or cause the performance, of the obligations of IESO as servicer under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including servicing obligations undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. It is anticipated that such obligations will include matters related to the billing, collection and remittance of clean energy adjustments by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments with other amounts. In the event that the Servicing Guarantee is held to be unenforceable against the Servicing Guarantor, the Servicing Guarantee will contemplate, in the alternative, a functionally equivalent direct covenant of the Servicing Guarantor.
Term:	The Servicing Guarantor's obligations under a Servicing Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Servicing Guarantee.
Satisfaction of a Servicing Guarantee:	The Servicing Guarantor will have the option to satisfy its obligations under a Servicing Guarantee by paying when due the amounts that would be remitted to the applicable Financing Entity as if IESO and each electricity vendor had complied with its obligations under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest.
Approval Requirement:	The servicing obligations (including any amendments) to which the Servicing Guarantee relates, together with the provisions of any Servicing Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Servicing Guarantee:	Under no circumstances shall the Servicing Guarantor be obligated to pay consequential, special or punitive damages, or for economic loss or loss of profits.

Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together, or an entity owned by the Province of Ontario whose indemnity obligations, as contemplated by this Term Sheet, are in turn unconditionally guaranteed by the Province of Ontario.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.
Indemnity of the Province:	The Indemnitor will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee because of third party claims made against the Indemnitee by one or more of its specified creditors that result from any of the following: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act; (B) the Legislative Assembly of Ontario amending the Act or a Regulation made thereunder in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest.
Term:	An Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.

Satisfaction of an Indemnity:	The Indemnitor will have the option to satisfy its obligations under an Indemnity in respect of a funding obligation by: (x) assuming and paying when due (without acceleration) the regularly scheduled amounts due and payable in respect of the funding obligation during the term and to the extent of the applicable Financing Entity's contractual obligations thereunder; or (y) causing the acceleration of the funding obligation and paying the outstanding amount owing thereunder in full, including in the case of debt instruments issued by the applicable Financing Entity by causing the redemption of the debt instruments and paying an amount equal to the then outstanding principal amount thereof plus accrued and unpaid interest up to the date of payment (without any default, penalty, prepayment or make whole premium).
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Indemnity:	Under no circumstances shall the Indemnitor be obligated to indemnify any Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Undertakings regarding Certain Mismatches	
Addressing Mismatches	If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise expected to be available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy its related payment obligations and thereby address any Mismatch.

Possible Undertaking to Fund Mismatches	If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to address a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to address the Mismatch. Any such undertaking would be provided at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and, if given, would be on such terms, including appropriate compensation to the Province of Ontario, and be subject to such conditions (for example and without limitation, funding being conditional on the occurrence of a market disruption that results in the non-availability of capital markets term funding to effect a refinancing of the funding obligation) as the Minister of Energy and the Minister of Finance determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
Documentation	
Representations, Terms and Conditions:	Subject to approval of the Minister of Energy and the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Servicing Guarantor and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Servicing Guarantor or the Indemnitor, or any agent or representative of the Servicing Guarantor or the Indemnitor, in connection with the transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Confidentiality obligations of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

Provincial Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

Performance Guarantees	
Performance Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Performance Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

Performance Guarantee:	Pursuant to a Performance Guarantee, the Performance Guarantor will guarantee the performance, or cause the performance, of the obligations of IESO as servicer under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including servicing obligations undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. It is anticipated that such obligations will include matters related to the billing, collection and remittance of clean energy adjustments by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments with other amounts. In the event that the Performance Guarantee is held to be unenforceable against the Performance Guarantor, the Performance Guarantee will contemplate, in the alternative, a functionally equivalent direct covenant of the Performance Guarantor.
Term:	The Performance Guarantor's obligations under a Performance Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Performance Guarantee.
Approval Requirement:	The servicing obligations (including any amendments) to which the Performance Guarantee relates, together with the provisions of any Performance Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Performance Guarantee:	Under no circumstances shall the Performance Guarantor be obligated to pay special or punitive damages, or for loss of profits.
<u>Indemnity</u>	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.

Indemnity of the Province:	The Indemnitor will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee because of third party claims made against the Indemnitee by one or more of its specified creditors that result from any of the following (each, an "**Indemnification Event**"): (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act; (B) the Legislative Assembly of Ontario amending the Act or a Regulation made thereunder in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest.
Term:	The Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Indemnity:	Under no circumstances shall the Indemnitor be obligated to indemnify any Beneficiary for special or punitive damages, or for loss of profits.
<u>Undertakings regarding Certain Mismatches</u>	
Avoidance of Mismatches	If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise expected to be available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy its related payment obligations and thereby avoid any Mismatch.

Possible Undertaking to Fund Mismatches	If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to avoid a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to avoid the Mismatch. Any such undertaking may only be given at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and, if given, would be on such terms, including appropriate compensation to the Province of Ontario, and be subject to such conditions (for example and without limitation, funding being conditional on the occurrence of a market disruption that results in an inability to refinance the funding obligation) as the Minister of Energy and the Minister of Finance determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
<u>Documentation</u>	
Representations, Terms and Conditions:	Subject to approval of the Minister of Energy and the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Performance Guarantor and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Performance Guarantor or the Indemnitor, or any agent or representative of the Performance Guarantor or the Indemnitor, in connection with the transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Confidentiality obligations of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

Provincial ~~Support Agreement~~Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") ~~is provided exclusively to the parties listed herein in connection with the draft~~relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. ~~Defined~~Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial ~~support agreement (the "**Provincial Support Agreement**") will contain the terms and conditions set out~~protection and assurance arrangements contemplated in this Term Sheet ~~in addition to such other representations, warranties, indemnities, and other~~will include such terms and conditions as the ~~Guarantor and the Beneficiaries (each as defined below) may reasonably require~~Minister of Energy and the Minister of Finance determine to be appropriate.*

Performance Guarantees	
Performance Guarantor:	~~Her Majesty the Queen in right~~The Province of Ontario, ~~as represented~~ by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	~~The indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**")~~Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Performance Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and ~~all~~ other persons having debt or other claims against ~~a~~the Financing Entity that are secured under ~~the Master Trust Indenture (collectively, the "**Beneficiaries**") including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee, the trustee of the Financing Entity if the Financing Entity is a trust, and any other administrator of the Financing Entity~~a related trust indenture.

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

~~Term:~~	~~The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[1] after all funding obligations (to be defined to include principal, interest, fees, hedge settlement and termination obligations and other related amounts) of all Financing Entities have been repaid.~~
Performance Guarantee:	~~Under the Master Sale and Servicing Agreement to be entered into by IESO and the Financing Entity, **[and OPG as Financial Services Manager]** ("**MSSA**"), IESO will have obligations both as a seller and as a servicer. Pursuant to a performance guarantee~~Pursuant to a Performance Guarantee, the Performance Guarantor will guarantee ~~in favour of the Beneficiaries to perform~~the performance, or cause the performance, of ~~(which may be by way of the appointment of a replacement servicer),~~ the obligations of IESO as servicer under the ~~MSSA and the~~ Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including ~~the obligations of any replacement servicer. The Guarantor will also guarantee the~~ servicing obligations ~~of the~~undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. ~~The servicing~~It is anticipated that such obligations ~~covered~~ will include ~~all obligations~~matters related to the ~~collecting~~billing, collection and ~~remitting~~remittance of clean energy adjustments ~~and will protect the Beneficiaries from any risks arising from~~by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments ~~being commingled~~ with other amounts. In the event that the ~~performance guarantee~~Performance Guarantee is held to be unenforceable against the Performance Guarantor, the ~~Provincial Support Agreement~~Performance Guarantee will contemplate ~~a separate legal obligation by the Guarantor to indemnify the Beneficiaries for any losses that result~~, in the alternative, a functionally equivalent direct covenant of the Performance Guarantor.
Term:	The Performance Guarantor's obligations under a Performance Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Performance Guarantee.
Approval Requirement:	The servicing obligations (including any amendments) to which the Performance Guarantee relates, together with the provisions of

[1] ~~This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.~~

	any Performance Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Performance Guarantee:	Under no circumstances shall the Performance Guarantor be obligated to pay special or punitive damages, or for loss of profits.
Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.
~~Payment Guarantee Event~~Indemnity of the Province:	~~A Payment Guarantee Event will occur if~~The Indemnitor will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee because of third party claims made against the Indemnitee by one or more of its specified creditors that result from any of the following (each, an "**Indemnification Event**"): (A) the Legislative Assembly of Ontario ~~repeals~~repealing (and not replacing on an equivalent basis) the Act; ~~or~~ (B) the Legislative Assembly of Ontario ~~amends~~amending the Act or a Regulation made thereunder ~~is amended~~ in a way that materially and adversely ~~impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such~~affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction ~~(i)~~in a final and non-appealable judgement determines that all or a portion of the Act ~~to be~~is *ultra vires* in a way that materially and adversely ~~impacts~~affects the ~~ability~~rights and interests of ~~a~~the Financing Entity ~~to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable; or~~ ~~(D) funding obligations are due and payable at a time when a market disruption (a period of [six months or more] when capital~~

	~~markets term funding is not available to effect refinancings of funding obligations) is occurring and, in the case of long term funding obligations only, a moratorium or limitation on the imposition and collection of clean energy adjustments to repay such funding obligations is in effect under the Act~~under its investment interest.
~~Payment Guarantee~~Term:	~~Upon the occurrence of a Payment Guarantee Event under clauses (A), (B) or (C) of the above definition:~~ ~~(x) the Guarantor shall assume and pay when due (without acceleration) all funding obligations and all other obligations of the Financing Entities to the Beneficiaries by paying all regularly scheduled amounts in respect thereof during the term of each Financing Entity's contractual obligation to such Beneficiaries; and~~ ~~(y) Beneficiaries holding funding obligations consisting of bonds [with a remaining term to maturity of greater than **one year**]~~ ~~shall have the option to put the bonds to the Financing Entity for a put price equal to 101% of the principal amount thereof plus accrued and unpaid interest. In connection with any put under this clause (y), the Guarantor shall guarantee payment of the put price and any related hedge breakage but shall not be responsible for any other default, penalty, prepayment or make whole amounts.~~ The Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under ~~Guarantees~~Indemnity:	Under no circumstances shall the ~~Guarantor~~Indemnitor be obligated to indemnify any Beneficiary for special or punitive damages, or for loss of profits.
~~Priority of Payments:~~	~~The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.~~
~~Subrogation:~~	~~Where the Guarantor has repaid all Beneficiaries in full, to the extent of such payments the Guarantor shall be subrogated in and to all the rights of recovery of the Beneficiaries in respect of their~~

	~~applicable indebtedness and obligations and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all indebtedness and obligations owing to the Beneficiaries, the Indenture Trustee will acknowledge and agree on behalf of the Beneficiaries that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiaries have or may exercise in respect of the repaid indebtedness and obligations, all in accordance with the terms of the Master Trust Indenture. Prior to the repayment in full of the indebtedness and obligations owed to the Beneficiaries, the Guarantor shall have no rights of subrogation.~~
~~**Notice Requirements:**~~**Undertakings regarding Certain Mismatches**	~~The Indenture Trustee will be required to provide notice to the Guarantor of a Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.~~
~~**Closing:**~~**Avoidance of Mismatches**	~~Date to be determined but no later than [■, 2017]. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered~~If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise expected to be available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy its related payment obligations and thereby avoid any Mismatch.
~~**Reporting Requirements of a Financing Entity:**~~ **Possible Undertaking to Fund Mismatches**	~~The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture~~If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to avoid a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to avoid the Mismatch. Any such undertaking may only be given at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and, if given, would be on such terms, including appropriate compensation to the Province of Ontario, and be subject to such conditions (for example and

	without limitation, funding being conditional on the occurrence of a market disruption that results in an inability to refinance the funding obligation) as the Minister of Energy and the Minister of Finance determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
~~Conditions Precedent to Closing:~~Documentation	~~Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.[2]~~
Representations, Terms and Conditions:	~~Customary representations~~Subject to approval of the Minister of Energy and ~~warranties of the Guarantor~~the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Performance Guarantor ~~is~~and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Performance Guarantor or ~~its agents or representatives~~the Indemnitor, or any agent or representative of the Performance Guarantor or the Indemnitor, in connection with the ~~Transaction Documents~~transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	~~Customary confidentiality~~Confidentiality obligations ~~to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor~~of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

[2] ~~Opinions on the validity and enforceability of Provincial Support Agreement will be required.~~

Subject:	RE: Provincial Support Agreement | Meeting with OFA, OPCD, Energy, TD and Blakes
Date:	Friday, June 23, 2017 12:31:52 PM

Hi all,

I know that the concept of an accelerated payment was discussed in yesterday's call and speaking with Steve this is the rationale for including clause (y) in the Satisfaction of an Indemnity section:

(y) causing the acceleration of the funding obligation and paying the outstanding amount owing thereunder in full, including in the case of debt instruments issued by the applicable Financing Entity by causing the redemption of the debt instruments and paying an amount equal to the then outstanding principal amount thereof plus accrued and unpaid interest up to the date of payment (without any default, penalty, prepayment or make whole premium).

However, we want to note that the ability to redeem the bonds at par (plus accrued) would be off market and could hinder the marketability of an offering. Happy to discuss further. Thanks,

ML

Hi Ron,

Anna is planning to send this back to EIGS but wanted to check is you have any comments? Gadi and Legal have no comments on this.

Regards,
Gavin He

Provincial Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

~~Performance~~Servicing Guarantees	
~~Performance~~Servicing Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a ~~Performance~~Servicing Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.
~~Performance~~Servicing Guarantee:	Pursuant to a ~~Performance~~Servicing Guarantee, the ~~Performance~~Servicing Guarantor will guarantee the performance, or cause the performance, of the obligations of IESO as servicer under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including servicing obligations undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. It is anticipated that such obligations will include matters related to the billing, collection and remittance of clean energy adjustments by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

	adjustments with other amounts. In the event that the ~~Performance~~Servicing Guarantee is held to be unenforceable against the ~~Performance~~Servicing Guarantor, the ~~Performance~~Servicing Guarantee will contemplate, in the alternative, a functionally equivalent direct covenant of the ~~Performance~~Servicing Guarantor.
Term:	The ~~Performance~~Servicing Guarantor's obligations under a ~~Performance~~Servicing Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the ~~Performance~~Servicing Guarantee.
Satisfaction of a Servicing Guarantee:	The Servicing Guarantor will have the option to satisfy its obligations under a Servicing Guarantee by paying when due the amounts that would be remitted to the applicable Financing Entity assuming that IESO and each electricity vendor had complied with its obligations under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest.
Approval Requirement:	The servicing obligations (including any amendments) to which the ~~Performance~~Servicing Guarantee relates, together with the provisions of any ~~Performance~~Servicing Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under ~~Performance~~Servicing Guarantee:	Under no circumstances shall the ~~Performance~~Servicing Guarantor be obligated to pay consequential, special or punitive damages, or for economic loss or loss of profits.

Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together, or an entity owned by the Province of Ontario whose indemnity obligations, as contemplated by this Term Sheet, are in turn unconditionally guaranteed by the Province of Ontario.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.
Indemnity of the Province:	The Indemnitor will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee because of third party claims made against the Indemnitee by one or more of its specified creditors that result from any of the following ~~(each, an "**Indemnification Event**")~~: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act; (B) the Legislative Assembly of Ontario amending the Act or a Regulation made thereunder in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest.
Term:	~~The~~An Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.
Satisfaction of an Indemnity:	The Indemnitor will have the option to satisfy its obligations under an Indemnity in respect of a funding obligation by: (x) assuming and paying when due (without acceleration) the regularly scheduled amounts due and payable in respect of

	the funding obligation during the term and to the extent of the applicable Financing Entity's contractual obligations thereunder; or (y) causing the acceleration of the funding obligation and paying the outstanding amount owing thereunder in full, including in the case of debt instruments issued by the applicable Financing Entity by causing the redemption of the debt instruments and paying an amount equal to the then outstanding principal amount thereof plus accrued and unpaid interest up to the date of payment (without any default, penalty, prepayment or make whole premium).
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Indemnity:	Under no circumstances shall the Indemnitor be obligated to indemnify any Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Undertakings regarding Certain Mismatches	
~~**Avoidance of**~~**Addressing Mismatches**	If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise expected to be available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy its related payment obligations and thereby ~~avoid~~address any Mismatch.
Possible Undertaking to Fund Mismatches	If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to ~~avoid~~address a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake

	on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to ~~avoid~~address the Mismatch. Any such undertaking ~~may only~~would be ~~given~~provided at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and, if given, would be on such terms, including appropriate compensation to the Province of Ontario, and be subject to such conditions (for example and without limitation, funding being conditional on the occurrence of a market disruption that results in ~~an inability to refinance~~the non-availability of capital markets term funding to effect a refinancing of the funding obligation) as the Minister of Energy and the Minister of Finance determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
Documentation	
Representations, Terms and Conditions:	Subject to approval of the Minister of Energy and the Minister of Finance acting together.
FIPPA:	Acknowledgement that the ~~Performance~~Servicing Guarantor and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the ~~Performance~~Servicing Guarantor or the Indemnitor, or any agent or representative of the ~~Performance~~Servicing Guarantor or the Indemnitor, in connection with the transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Confidentiality obligations of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

Provincial Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

Servicing Guarantees	
Servicing Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Servicing Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

Servicing Guarantee:	Pursuant to a Servicing Guarantee, the Servicing Guarantor will guarantee the performance, or cause the performance, of the obligations of IESO as servicer under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including servicing obligations undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. It is anticipated that such obligations will include matters related to the billing, collection and remittance of clean energy adjustments by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments with other amounts. In the event that the Servicing Guarantee is held to be unenforceable against the Servicing Guarantor, the Servicing Guarantee will contemplate, in the alternative, a functionally equivalent direct covenant of the Servicing Guarantor.
Term:	The Servicing Guarantor's obligations under a Servicing Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Servicing Guarantee.
Satisfaction of a Servicing Guarantee:	The Servicing Guarantor will have the option to satisfy its obligations under a Servicing Guarantee by paying when due the amounts that would be remitted to the applicable Financing Entity assuming that IESO and each electricity vendor had complied with its obligations under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest.
Approval Requirement:	The servicing obligations (including any amendments) to which the Servicing Guarantee relates, together with the provisions of any Servicing Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Servicing Guarantee:	Under no circumstances shall the Servicing Guarantor be obligated to pay consequential, special or punitive damages, or for economic loss or loss of profits.

Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together, or an entity owned by the Province of Ontario whose indemnity obligations, as contemplated by this Term Sheet, are in turn unconditionally guaranteed by the Province of Ontario.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.
Indemnity of the Province:	The Indemnitor will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee because of third party claims made against the Indemnitee by one or more of its specified creditors that result from any of the following: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act; (B) the Legislative Assembly of Ontario amending the Act or a Regulation made thereunder in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest.
Term:	An Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.

Satisfaction of an Indemnity:	The Indemnitor will have the option to satisfy its obligations under an Indemnity in respect of a funding obligation by: (x) assuming and paying when due (without acceleration) the regularly scheduled amounts due and payable in respect of the funding obligation during the term and to the extent of the applicable Financing Entity's contractual obligations thereunder; or (y) causing the acceleration of the funding obligation and paying the outstanding amount owing thereunder in full, including in the case of debt instruments issued by the applicable Financing Entity by causing the redemption of the debt instruments and paying an amount equal to the then outstanding principal amount thereof plus accrued and unpaid interest up to the date of payment (without any default, penalty, prepayment or make whole premium).
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Indemnity:	Under no circumstances shall the Indemnitor be obligated to indemnify any Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Undertakings regarding Certain Mismatches	
Addressing Mismatches	If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise expected to be available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy its related payment obligations and thereby address any Mismatch.

Possible Undertaking to Fund Mismatches	If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to address a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to address the Mismatch. Any such undertaking would be provided at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and, if given, would be on such terms, including appropriate compensation to the Province of Ontario, and be subject to such conditions (for example and without limitation, funding being conditional on the occurrence of a market disruption that results in the non-availability of capital markets term funding to effect a refinancing of the funding obligation) as the Minister of Energy and the Minister of Finance determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
Documentation	
Representations, Terms and Conditions:	Subject to approval of the Minister of Energy and the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Servicing Guarantor and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Servicing Guarantor or the Indemnitor, or any agent or representative of the Servicing Guarantor or the Indemnitor, in connection with the transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Confidentiality obligations of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

I'd suggest that we leave it in there for now, recognizing that we will likely have to modify it to recognize what market practice is, or drop it completely at the next iteration.

The optionality is important to us, but we recognize that we can't force a market to go in a direction that it doesn't want to.

I think that the likely outcome, in a scenario if the indemnity were to kick in, would be for us to do something which would enable the SPV to continue to make timely interest and principal payments, rather than accelerate the payment, but it would be good to leave the option for the acceleration in, so whomever is making those decisions at that time would have a choice. It seems unlikely to me that whomever from the Province is making that decision would be willing to have the potentially very expensive market-standard make whole clause, so we may have a stand-off here if OPG and their underwriters are unwilling to accept clause (y), but let's see.

Thanks,
Gadi

Subject: RE: Provincial Support Agreement | Meeting with OFA, OPCD, Energy, TD and Blakes

All,

I attach a revised draft of the indicative term sheet for the provincial support arrangement in clean and blackline. This draft includes one clarification to the section entitled “Satisfaction of a Servicing Guarantee”.

I have retained clause (y) in the Satisfaction of an Indemnity section for the time being, as I understand that this optionality is important to the OFA. That said, let us know if the OFA has any further comments or questions based on Mark’s email below.

Please let us know if you have any further comments, or if you are signed-off on this draft as soon as possible this afternoon, as I understand that the Department of Energy plans to send a revised draft to OPG before the close of business today.

Kind regards,
Adam

Subject: RE: Provincial Support Agreement | Meeting with OFA, OPCD, Energy, TD and Blakes

Hi all,

I know that the concept of an accelerated payment was discussed in yesterday's call and speaking with Steve this is the rationale for including clause (y) in the Satisfaction of an Indemnity section:

(y) causing the acceleration of the funding obligation and paying the outstanding amount owing thereunder in full, including in the case of debt instruments issued by the applicable Financing Entity by causing the redemption of the debt instruments and paying an amount equal to the then outstanding principal amount thereof plus accrued and unpaid interest up to the date of payment (without any default, penalty, prepayment or make whole premium).

However, we want to note that the ability to redeem the bonds at par (plus accrued) would be off market and could hinder the marketability of an offering. Happy to discuss further. Thanks,

ML

Thanks John, just to be clear what we determined at the meeting yesterday was to ensure that Energy was in fact comfortable with the OFA sharing the latest version of OPG's term sheet for the guarantee **including the comments and edits from Blake's**. These, while not substantially amending the term sheet does make it narrower.

Let us know

Thanks

Ken k

Hi Mike, Ken,

I had a call with Adrian Nalasco who is acting for Steen. He has indicated that along with Steen, Energy's Deputy is away so it is difficult for him to provide a formal go-ahead to us. I explained to him the time sensitivity and that we would have a discussion with OPG on an informal basis to get their feedback on the latest draft which MOF Legal and Energy Legal have drafted. I gave him a bit of a background that OPG has had back and forth with us on previous versions of the draft.

With these caveats, Adrian is comfortable with various members of the OFA having discussions with OPG counterparts on the latest draft support agreement.

Thanks,

John

Hi Steen,

I'm sending the attached revised draft, non-binding term sheet on behalf of various parts of the OFA that are working on the Provincial guarantee / support agreement to support the OPG financing entity.

As you may have been informed, the attached draft term sheet was drafted jointly by MOF Legal, Energy Legal and Blakes' and is somewhat narrower in scope of the guarantee/support than the version that was provided by OPG in mid-August.

To discuss, we would like to host a meeting tomorrow, if possible, including your team and Energy Legal, MOF Legal and GBED. Also, Capital Markets folks here at the OFA are looking to share the draft term sheet with their counterparts at OPG. Pls. advise if you would have any issue with the sharing of the draft term sheet.

If you could advise of your availability, I would be happy to coordinate on behalf of everyone here at the OFA.

Thanks,

John

John,

Together with our outside counsel at Blake's and Energy Legal we have revised the term sheet further.

The attached note, prepared by Energy Legal is a good summary of the issues and where things stand.

I think the next step is to have you and Ron discuss this draft, and prepare to meet with staff at the OFA and Energy once Gadi returns next week and has been briefed on the progress.

Please share as you think makes sense at the OFA, and let me know if you want to discuss further.

Best
Toby

Hi John

I was under the impression based on our last meeting with OPG and their advisors that the guarantee would be limited to interest and outstanding debt plus and service fees, is the latter what you are referring to in your email.

Thanks

Ken k

Hi Cindy, Mark,

Ron and Ken are both away this week so I'm sending this at Gadi's request. As you will recall from the implementation meeting this morning, FHP-related bond issues by OPG FE will require a Provincial support to make it financeable.

The attached note by MOF Legal and Energy Legal staff [still draft for discussion purpose] would provide you with a sense of where the term sheet discussions currently are. It is possible that OPG may require more support than envisioned in the attached draft, which would be based on factors such as financeability, etc.

Apologies for the request just before your vacation but could you let us know if OPCD would have any concerns?

Thanks,

John

The last term sheet I had was dated August 14. The term sheet you attached is narrower than that version. I haven't been involved in any calls on this matter since August 10 and on that date, I couldn't stay for the entire call. Given all that, I'm not much help on your questions as I haven't been privy to any discussion re: narrowing the terms. I did send comments on the Aug 14 term sheet to Scott Nelms who noted that those he flipped to OFA, so assuming you have them (I've attached them here just in case). I agree with the narrowing as I had concerns with some of the language in the August 14th document.

Yes, as you put it. Very simplistically – additional activation events other than the two currently in the draft – legislative and court decision. In OPG's draft, they also didn't have any materiality wording in there.

Subject: FW: Provincial Support Agreement update

Hi Cindy, Mark,

Ron and Ken are both away this week so I'm sending this at Gadi's request. As you will recall from the implementation meeting this morning, FHP-related bond issues by OPG FE will require a Provincial support to make it financeable.

The attached note by MOF Legal and Energy Legal staff [still draft for discussion purpose] would provide you with a sense of where the term sheet discussions currently are. It is possible that OPG may require more support than envisioned in the attached draft, which would be based on factors such as financeability, etc.

Apologies for the request just before your vacation but could you let us know if OPCD would have any concerns?

Thanks,

John

Subject: Provincial Support Agreement update

John,

Together with our outside counsel at Blake's and Energy Legal we have revised the term sheet further.

The attached note, prepared by Energy Legal is a good summary of the issues and where things stand.

I think the next step is to have you and Ron discuss this draft, and prepare to meet with staff at the OFA and Energy once Gadi returns next week and has been briefed on the progress.

Please share as you think makes sense at the OFA, and let me know if you want to discuss further.

Best
Toby

Confidential – Draft for Discussion Purposes Only
Draft: August 14, 2017

Provincial Protection and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act.*

Change in Law Guarantee	
Guarantor:	The Province of Ontario
Guarantee Activation Events:	Any of the following would constitute a Guarantee Activation Event: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act or any Regulation made thereunder; (B) the Legislative Assembly of Ontario causing to come into force any statute (including any amendment to the Act or a Regulation made thereunder), or causing to come into force or making any order-in-council or regulation, or causing to come into force any other discriminatory action (including by way of any order by the Ontario Energy Board), in any case, in a way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected; (C) the Legislative Assembly of Ontario directly or indirectly amending the Guarantee or any of the financing transaction agreements without the agreement of the Financing Entity; (D) a court of competent jurisdiction (i) declares any funding obligations of the Financing Entity to be invalid or unenforceable or (ii) in a final and non-appealable judgement determines that all or a portion of the Act is *ultra*

Commented [A1]: How is "on an equivalent basis" determined?

What if a regulation needs to be changed for something that has no impact on the ability for the financing entity to get repaid – is this considered a guarantee activation event? Does this scope need to be narrowed such that this only constitutes a guarantee activation event it if impacts the finance entity's ability to recoup its investment? I would think that the language in (B) that limits the scope of the change to something that impacts the Financing Entity should be included in (A)

Commented [A2]: What agreements are we referring to here – we need to identify them – are they only agreements that the Financing Entity is a party to?

	vires in a way that adversely affects the rights and interests of the Financing Entity, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its funding obligations on the same basis as before such judgement; or (E) there is a change in the organization, structure or operations of the IESO or a change in the electricity market structure or operations in any way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected **[NTD: Alternatively, with respect to the IESO servicing obligations, include the Servicing Guarantee language with respect to the IESO that was included in the last mark-up of the term sheet received from the Province.]**
Guarantee:	Upon the occurrence of a Guarantee Activation Event, the Guarantor shall immediately assume and pay when due (without acceleration) all of the obligations of the Financing Entity. The obligations of the Financing Entity include its funding obligations as well as any other obligation the Financing Entity has related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commissions
Term:	The Guarantee will continue for as long as the Financing Entity has any outstanding financing or other contractual obligations and until such obligations have all been paid in full or otherwise satisfied

Commented [A3]: The initial three lines of this sentence appears very broad – what if there is a change in the market structure such that electricity consumption declines substantially – is that covered here? What types of changes would be contemplated here?

Commented [A4]: Who makes this determination?

Approval Requirement:	The guarantee agreement containing the terms and conditions contemplated by this term sheet shall be entered into prior to the Financing Entity incurring its first funding obligation. The Province shall enter into the guarantee based on forms of program and series financing documents required for each financing transaction (e.g., form of supplemental indenture). As long as the financing transaction documents are generally consistent with the agreed upon form, the Province's specific approval for specific funding obligations incurred by the Financing Entity will not be required. Subsequent approval is only needed if the form of such documents are materially changed. For greater certainty, deal specific terms (such as tenor, pricing, etc) shall not be considered a change in the form of transaction and series documents
FIPPA:	The parties will acknowledge that the Guarantor will be bound by the Freedom of Information and Protection of Privacy Act (Ontario) and that any information provided to the Guarantor, or any agent or representative of the Guarantor in connection with the Guarantee may be subject to disclosure in accordance with the act or as otherwise required by law
Representations and Warranties:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Governing Law:	Province of Ontario

Commented [A5]: There is a lot of daylight between "generally consistent" and "materially changed" – the requirement for when approval is needed should be further clarified.

Warehousing Takeout Risk and Servicing (Commingling) Risk *Note – these items are provided for information purposes only as these risks were included in the previous version of the term sheet as items that the Dealers/OPG were looking for the Province for protection against. The current proposals with respect to these items is described below. These do not contain any requirement for the Province to directly backstop these risks.*	
Commingling Risk (applies to Warehouse as well as any Term transactions)	
Commingling Risk Mitigant:	For any LDC which is not investment grade rated by each of the rating agencies which are rating the funding obligations (the "Non-Investment Grade LDCs"), either: (A) The IESO must post a Letter of Credit (L/C), or deposit funds in a Commingling Reserve Account in a quantum equal to the Commingling Risk Amount; or (B) The IESO, for so long as it is rated investment grade by the rating agencies which are rating the funding obligations, will assume responsibility for commingling risk by the LDCs and will agree to remit to the Financing Entity any clean energy adjustment amounts collected by the LDC, regardless of whether the LDC remitted those amounts to the IESO for remittance to the Financing Entity
Commingling Risk Amount:	An amount equal to the sum of the expected Clean Energy Adjustment collections from the Non-Investment Grade LDCs over the next [45-60] days
Commingling Risk Amount Reset Date:	Each settlement date for the Financing Entity (monthly)
Beneficiary:	The beneficiary of the L/C or the Commingling Reserve Account would be the Financing Entity and the Indenture Trustee for the benefit of the creditors of the Financing Entity. The Financing Entity and/or the Indenture Trustee would have the ability to draw down the L/C or draw on the Commingling Reserve Account for any clean energy adjustment amounts expected to be received from the IESO but which were not received due to those funds not being remitted from an LDC to the IESO for that period
L/C Provider:	An entity rated at least A+ (or equivalent)
Approvals:	The approach is subject to approval from the IESO, by the rating agencies rating the funding obligations of the Financing Entity and the risk management areas of the banks providing the warehouse facilities

Commented [A6]: Is the reserve account still an option?

Warehouse Takeout Risk	
Commitment Period for Warehouse[1]:	Expected to be 12-24 months
Takeout for Warehouse:	Expected to be every 3-6 months
Warehouse Default Event:	One of the events of default for the warehouse will be the failure to repay the warehouse facility at the end of the commitment term
Consequences of Warehouse Default Event:	If the Warehouse Default Event[2] described above occurs, all amounts funded through the warehouse would become immediately due and payable, subject to the Warehouse Default Payment Cap, and Default Pricing will be charged on any amounts funded through the warehouse facility
Default Pricing:	Step up in pricing to [x] until the moratorium period ends and thereafter stepping-up in increments of [y] every six months until the warehouse facility is repaid
Warehouse Default Payment Cap:	For any given reference period following the occurrence of a Warehouse Default Event, the amount that shall be remitted to the Financing Entity for repayment of the warehouse facilities will be the sum of (x) the interest amount due on the warehouse facilities (which, for greater certainty will include any program fees) and (y) the lessor of: (a) The outstanding amount funded through the warehouse facilities; and (b) The maximum amount that can be charged for that period so that clean energy adjustments are equal to, but do not exceed, the fair allocation amount for such period.

[1] Please note that this is not intended to be an exhaustive list of terms for the warehouse facility, but rather is a summary of a few select terms that relate to the warehouse takeout risk.

[2] Note there may be other Warehouse Default Events beyond the takeout risk item described above. The consequences for a breach of these other Warehouse Default Events may be different than the one described above where the default is related to failure to takeout the warehouse facility by the end of the commitment period.

Approval Requirement:	Subject to approval by the risk management areas of the banks providing the warehouse facilities which will in part depend on receipt of information on the fair allocation curve and an understanding of how long the "tail risk" could be following a Warehouse Default Event

Fyi.

In case you're checking emails, I have a question for you…..from the implementation meeting this morning, I learned that Cindy will be away for 2 weeks after this week. Given Gadi's question below about checking OPCD on the accounting, should someone ask OPCD on the accounting aspect sooner rather than later vis-à-vis the support agreement? This is accounting so I am reluctant to step in.

Hi,

Pls. see attached note and the revised term sheet per MOF Legal, Energy Legal and Blake's. I believe the note is quite clear and self-explanatory. It was indicated at this morning's implementation meeting that things are moving along for September TB/MBC approval.

As suggested by MOF Legal, I am happy to coordinate a meeting for Wednesday when everyone (hopefully) is back and has had time to review.

Thanks,

John

Given the time sensitivity of this, in order to ensure that we make it to TB on the 26th, I'm comfortable with Mike not just having discussions with OPG, but sharing the draft with them, as long as you tell them that this hasn't yet been fully vetted by Energy. If there are show-stoppers for OPG, which I'm hoping there aren't, we really need to know about them this week.

Gadi

Hi Mike, Ken,

I had a call with Adrian Nalasco who is acting for Steen. He has indicated that along with Steen, Energy's Deputy is away so it is difficult for him to provide a formal go-ahead to us. I explained to him the time sensitivity and that we would have a discussion with OPG on an informal basis to get their feedback on the latest draft which MOF Legal and Energy Legal have drafted. I gave him a bit of a background that OPG has had back and forth with us on previous versions of the draft.

With these caveats, Adrian is comfortable with various members of the OFA having discussions with OPG counterparts on the latest draft support agreement.

Thanks,

John

Subject: FW: Provincial Support Agreement update

Hi Steen,

I'm sending the attached revised draft, non-binding term sheet on behalf of various parts of the OFA that are working on the Provincial guarantee / support agreement to support the OPG financing entity.

As you may have been informed, the attached draft term sheet was drafted jointly by MOF Legal, Energy Legal and Blakes' and is somewhat narrower in scope of the guarantee/support than the version that was provided by OPG in mid-August.

To discuss, we would like to host a meeting tomorrow, if possible, including your team and Energy Legal, MOF Legal and GBED. Also, Capital Markets folks here at the OFA are looking to share the draft term sheet with their counterparts at OPG. Pls. advise if you would have any issue with the sharing of the draft term sheet.

If you could advise of your availability, I would be happy to coordinate on behalf of everyone here at the OFA.

Thanks,

John

Subject: Provincial Support Agreement update

John,

Together with our outside counsel at Blake's and Energy Legal we have revised the term sheet further.

The attached note, prepared by Energy Legal is a good summary of the issues and where things stand.

I think the next step is to have you and Ron discuss this draft, and prepare to meet with staff at the OFA and Energy once Gadi returns next week and has been briefed on the progress.

Please share as you think makes sense at the OFA, and let me know if you want to discuss further.

Best
Toby

Yes, I agree that it would make sense to loop in Scott on this since I understand that he is also involved in this project and it may be that he would also be one of the Provincial attendees to attend the meeting with Blakes. Since I have not been involved in previous calls with Scott in this, it may be best if someone from the OFA contacts him on this.

Hi Malle,

It might be helpful to loop in Scott Nelms in advance via email, too, as he could provide some insights on Energy and OPG's perspectives, in advance of a meeting.

Ron

Subject: RE: Provincial Support Term Sheet

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

CONFIDENTIAL AND PRIVILEGED LEGAL ADVICE

ISSUES LIST – PROVINCIAL SUPPORT AGREEMENT DRAFT MAY 12, 2017

1. Guarantor will be the Minister of Energy and the Minister of Finance on behalf of the Province (see. 5(3) of proposed Fair Hydro Act, 2017).

2. Description of proposed beneficiaries of guarantee is very broad. Provides that beneficiary is Indenture trustee under master trust indenture on behalf of itself and all persons that have claims against a Financing Entity secured under the master trust indenture. Persons range from the Financial Services Manager (OPG) to holders of various types of debt and hedge counterparties. Need to clarify which obligations the Province is being requested to guarantee and under what various agreements to determine scope and limit of guarantee. Is there a term sheet for the proposed financing to be issued by the Financing Entity? Is there a request for a guarantee of payment on other back-up or ancillary borrowing and obligations other than those issued in the market? Is there a draft of the Master Trust Indenture?

3. Why does the term of the guarantee continue for one year after the obligations have been repaid?

4. Performance Guarantee – This is also a very broad guarantee of performance of the IESO and all electricity services providers in favour of the same broad group of beneficiaries. How can the Province ensure that these entities perform their obligations practically? Also the Province is to protect beneficiaries from any commingling risk. It is noted that in the event the performance guarantee is unenforceable against the Province, there would be a separate legal obligation in the provincial support agreement to indemnify beneficiaries for any losses. Would there be any trigger events applicable to the obligation to indemnify as there are for the payment guarantee. If not, is this an issue for accounting treatment purposes? Also, is there an overlap between the performance and payment guarantee? So long as the funding obligations are paid on time by the financing entity, is there a need for other guarantees from the Province? Note that the Province does have immunity from specific types of enforcement under the Proceedings against the Crown Act. Is there a sample term sheet for the Master Sale and Servicing Agreement? Which provisions of the proposed bill are being relied on for this – is it section 5(2)? section 33. There doesn't seem to be a mechanism in the Act to replace the IESO as servicer. Should the Guarantee specify that the Province can appoint a replacement servicer?

5. Payment Guarantee Event – Regarding (B) and (C), the interpretation of when the triggering event has occurred will be an issue – is there a way to make it more objective or how can this be handled if there is a dispute? Regarding (D), think that there is going to be more discussion of the need for this provision from a business perspective. However, is this assuming, that the Province is guaranteeing both long term and short

term funding obligations? Need to clarify when and which obligations the province will be guaranteeing?

6. Payment Guarantee – Again it will be necessary to clarify which obligations the province is guaranteeing to understand what the range of payments to be made are. Also, (y) does not seem acceptable to the Province from a business perspective.

7. Limits under Guarantee – The guarantee wording should be clear so that the Province is guaranteeing payment of certain debt or specific obligations only and the Province's liability should be capped. Province should not be exposed to the risk of any other types of damages or losses.

8. Priority of Payments – Until we know who the beneficiaries are and with respect to what obligations, it is difficult to comment on this.

9. Subrogation – Need to ensure that the Province has appropriate recovery rights and not sure that it is appropriate that all beneficiaries are paid in full before Province gets subrogation rights. Also there is no acceleration here and Province really pays on an ongoing basis so how should subrogation work in such a case.

10. Conditions Precedent – Need to know what they are proposed to be.

11. Representations – Need to know what they are proposed to be as Province does not typically provide representations in connection with guarantees it provides.

12. Confidentiality Obligations – Thought the guarantee is part of a public financing so wouldn't the terms all be known?

13. Legal Opinions – Content, who will be providing them and to whom would they be provided.

General Questions on proposed legislation and interaction with guarantee:

14. General review of relevant sections would be appreciated and how the provisions fit with the requirements of the financing. In particular, s. 5, 13, 19, 21, 22, 33, 41 par 7

Hi Ron,

I believe we had shared the attached with MOF Legal earlier….might be the best one still.

We are still looking for other versions.

Thanks,

John

Hi all,

Further to our meeting on Wednesday, Toby and I have now been in touch with Energy Legal regarding the term sheet and will be attending a meeting with counsel at Blakes next Wednesday morning.

Best,

Malle

Structure of the Global Adjustment Deferral Mechanism

Issue

The Province is working with Ontario Power Generation (OPG), the Ontario Energy Board (OEB), IESO, external accountants, and other agencies to develop a mechanism to defer the global adjustment (GA) payment as part of the recently announced Ontario Fair Hydro Plan. This note outlines current proposals for this mechanism.

Context

- Smoothing of GA costs over time would involve ratepayers paying only a portion of the GA cost in earlier years, while this shortfall would be made up by future rate payers paying more than the true cost of the GA in later years.
    - There will be a proposed cap of $2.242B on the annual additional cost over the GA to lessen the burden on ratepayers.

- The shortfall in GA payments in earlier years would represent deferred costs to ratepayers. However, the mechanism would still need to compensate power generators on an ongoing basis for the full cost of the GA and would therefore need to borrow and take on debt to make cash payments to power generators.
- Principal payments on debt would be mandatory, but there has been no clarification on whether or not interest payments will be capitalized (i.e., interest accumulates resulting in compounding) or if interest will be recovered from ratepayers on an on-going basis.
    - If interest payments are made by ratepayers on an on-going basis debt costs would be lower, however this would also have the effect of reducing ratepayer savings from the GA deferral mechanism. The commitment is for a 25% reduction on average for all residential customers, which would mean that the amount of principal needs to be larger to offset this effect.
- It has also been proposed that all administrative and other costs from the GA deferral would need to be collected from ratepayers immediately or recognized at the very least as a future benefit to the Province, adding to the costs passed on to ratepayers.

Structure (*refer to Exhibit A*)

- The deferred portion of the GA needs to be recognized as an asset – likely a regulatory asset – by the IESO, which gives the IESO the right to collect the deferred amount from ratepayers at a future date.
- This asset, in turn, would be sold to another party that would receive the revenues associated with this asset.
    - It is proposed that the IESO be required to recover the costs associated with this asset even after selling it.
    - To do this the IESO would need to sell the asset in order to settle its arrangements with generators, and ensure generators are not affected by the deferral.
        - Alternatively, the IESO could simply borrow funds (using the regulatory asset as collateral), but this poses risks for both consolidation on public accounts and credit ratings.
        - With respect to the credit rating risk, DBRS stated in a March 3, 2017 report that "*Provided the debt continues to be fully supported through the electricity rate base, DBRS will treat it as self-supported and exclude it from the calculation of tax-supported debt*".
- OPG is proposing to set up a special purpose vehicle, "OPG Trust", which would purchase the regulatory asset from the IESO.
    - The purchase would be funded by debt from the capital markets (51% of the deferred GA Cost), and OPG (49% of the deferred GA).
    - OPG would finance that 49% through debt from the capital markets (5%) and an equity injection from the Province (44%).

    - The debt would be set-up in tranches to ensure that the 51% of debt directly from the market would be senior, potentially mitigating the risk premium associated with high amounts of borrowing with an intangible, unique asset as collateral.
- There are several other considerations and requirements that would need to be attained in order for the mechanism to work, as detailed in the OPG White Paper sent to the Deputy Minister of Energy on February 27, 2017.

Equity Injection (*refer to Exhibit A & B*)

- The equity injection could lead to increasing, and then stabilizing dividend payouts in consistent with OPG's's risk profile and comparable business entities.
    - Principal and interest payments flowing from the ratepayers through the IESO and the Trust could be paid back to the Province.
    - This would increase steadily as ratepayers begin to pay back principal in about 10 years' time, eventually reaching a cap of $2.242B in principal and interest per year based on Energy's March estimates (based on the capitalized interest scenario).
    - The administrative costs and return for OPG/OPG Trust would also need to be collected by ratepayers, but the dividend payments would be net of these amounts and should still allow the Province to earn a substantial return.
    - Dividend payments could also allow OPG to eventually optimize its capital structure to the targeted or deemed 55%-45% debt to equity split, as dividends allow OPG to reduce its retained earnings thereby reducing equity.
- Recapitalization from the Province is preferable as there are no associated interest expenses or large principal payments that could affect OPG's credit rating.
- If debt financing was utilized, the change in the cost of borrowing could also impact OPG's rate applications for the return recovered from ratepayers through payment amounts, potentially offsetting ratepayer benefit of the GA deferral mechanism.
- The financing structure split between equity (44%) and debt (5% borrowed by OPG and 51% borrowed by OPG Trust) is roughly equivalent to the deemed capital structure of 55% debt and 45% equity for regulated distributors in Ontario.

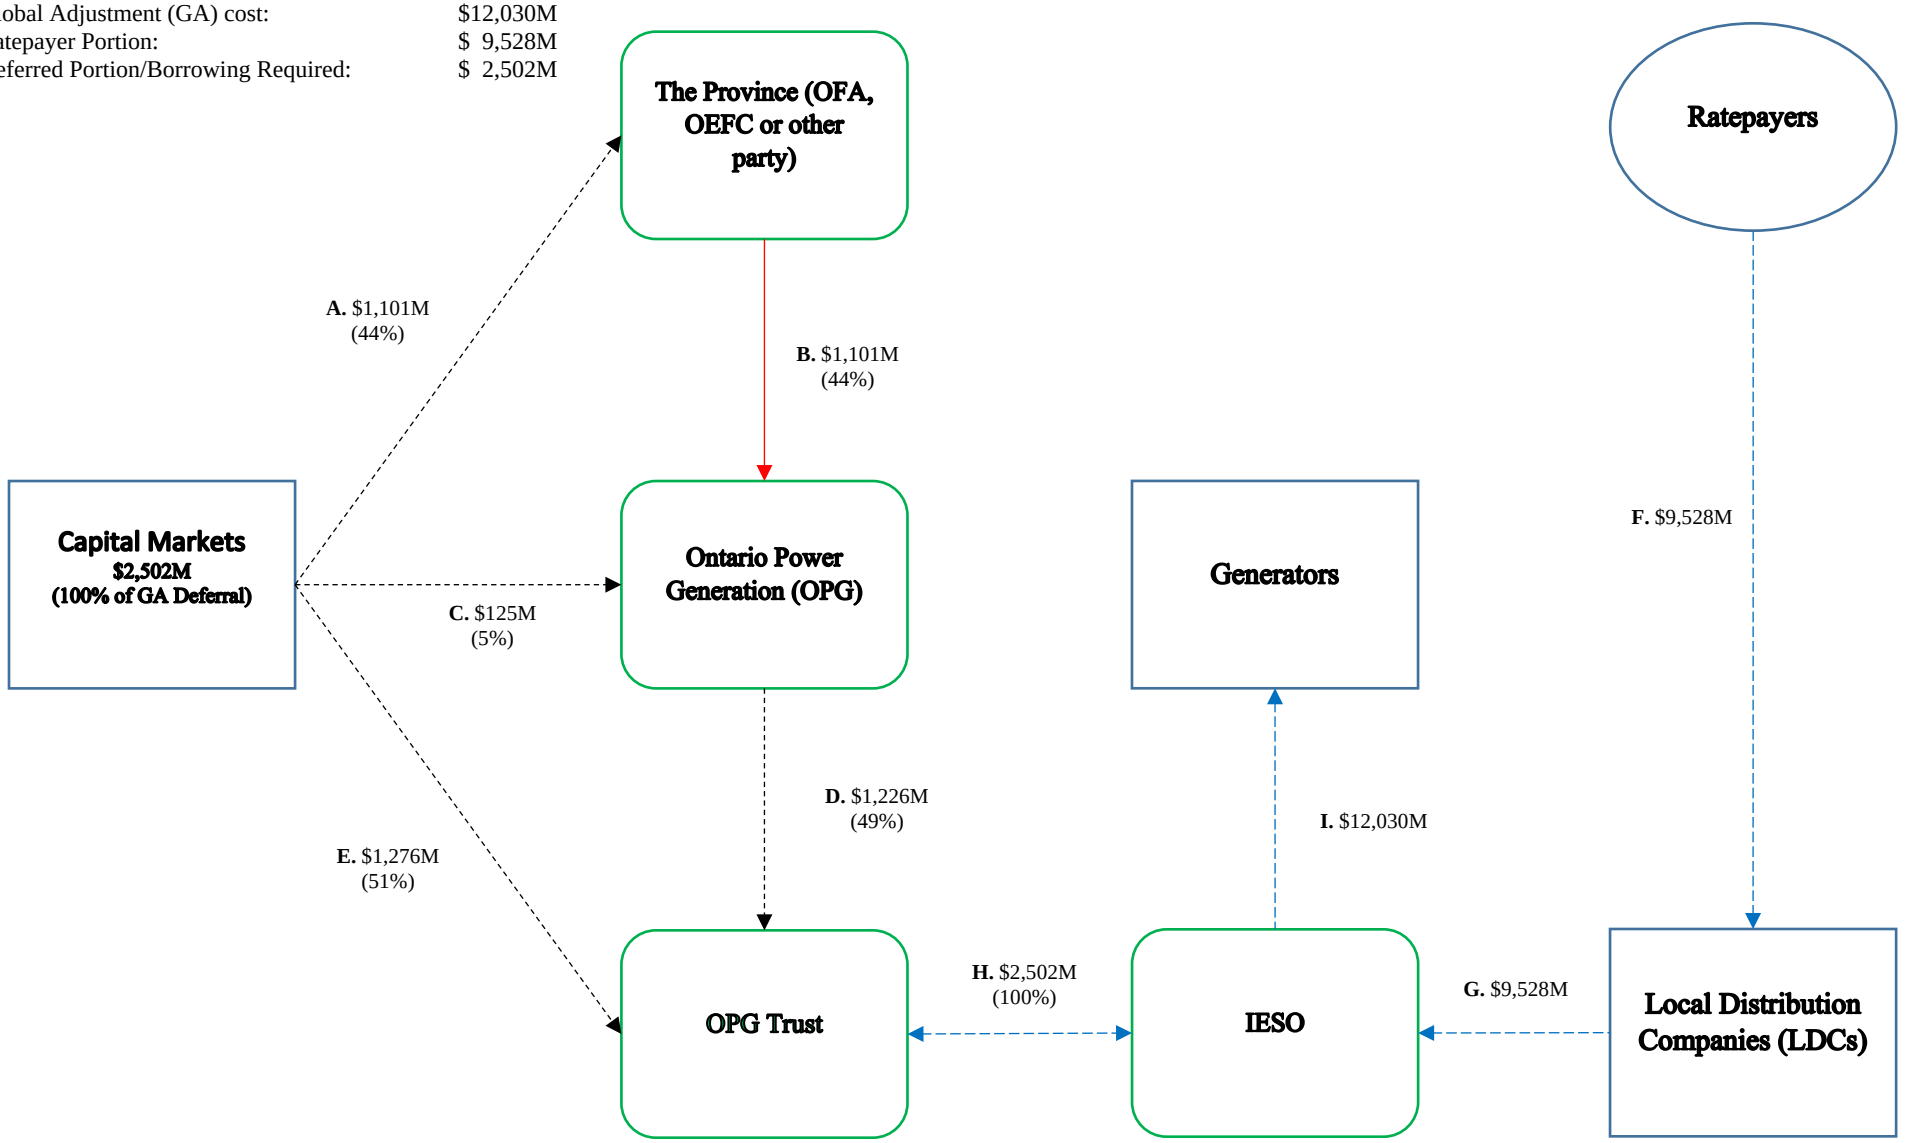
Collection of Interest Payments (*refer to Exhibit C*)

- There are different potential accounting treatments, depending on legislative and regulatory approval, that would impact the amount of borrowing and interest over the long term as well as the total fiscal impact.
    - **Option 1: Collect interest and administrative costs from ratepayers on an on-going basis:** Interest and the costs to finance/administer the GA deferral mechanism would be recovered from ratepayers along the way. This would allow cash and income to be recognized by OPG Trust equivalent to the total borrowing cost from the market (i.e., the interest on the 44% of the GA the Province borrowed from the market, the 5% of the GA OPG borrowed, and the 51% of the GA OPG Trust borrowed). Furthermore, some type of additional return for the risk premium could be made. Overall, there would be no fiscal cost, and less debt would build up over time due to the elimination of the compound effects on interest.
    - **Option 2: Collect interest costs associated with the senior debt**: There are variations on this concept which essentially proposes to only collect some of the interest costs from ratepayers, with the senior debt that OPG Trust borrows directly from the market of primary concern. This is "meeting halfway" between deferring all interest payments and collecting all interest payments from ratepayers immediately.

- Option 3: **Do not collect from ratepayers**. There is a fiscal impact equal to 100% of the interest on the total borrowings as an expense still needs to be recognized, even though cash interest has not been paid. There is also a compounding effect on interest.
- Option 4: **No collection from ratepayers but deferral of expense recognition (Same as Energy's analysis in its Cabinet Submission)**. For this option, there is no collection of interest payments from ratepayers, but OPG Trust is somehow allowed to defer the recognition of interest expense on its books and recognize as a regulatory asset, thus eliminating the fiscal impact.
    - If OPG Trust were allowed to recognize a regulatory asset, then it could defer the interest expense, instead recognizing it as an asset (similar to the idea of a prepaid expense).
    - Thus, OPG would recognize interest income from OPG Trust, but OPG Trust would not recognize an expense related to the amount owed to OPG and instead would increase the regulatory asset by the same amount.
    - The interest income earned by OPG for the 49% of the GA deferral it borrowed would offset the borrowing the Province made from the capital markets.
    - OPG Trust would also defer the recognition of the interest associated with the 51% of the GA deferral it borrowed from the market. The deferred amount would be recognized in a regulatory asset.
    - When OPG starts collecting principal and interest from ratepayers, it will recognize income, but will also amortize the regulatory asset at the same time, thus matching revenue and expenses with each other in the time period and potentially eliminating the fiscal impact.
    - Many factors, including the initial accounting treatment and the effect of consolidation, are significant barriers to the application of this approach.
    - **Alternatively, OPG Trust might be able to recognize income (with a receivable created to balance the transaction) to offset the interest expense without collecting from ratepayers**, i.e., it will be a cash transaction in the future (cash received offset by a decrease in the receivable; no effect on income statement).

Exhibit A; 2017-2018 Estimates for Balance Sheet Transactions

Global Adjustment (GA) cost:	$12,030M
Ratepayer Portion:	$ 9,528M
Deferred Portion/Borrowing Required:	$ 2,502M



Setting up the Trust

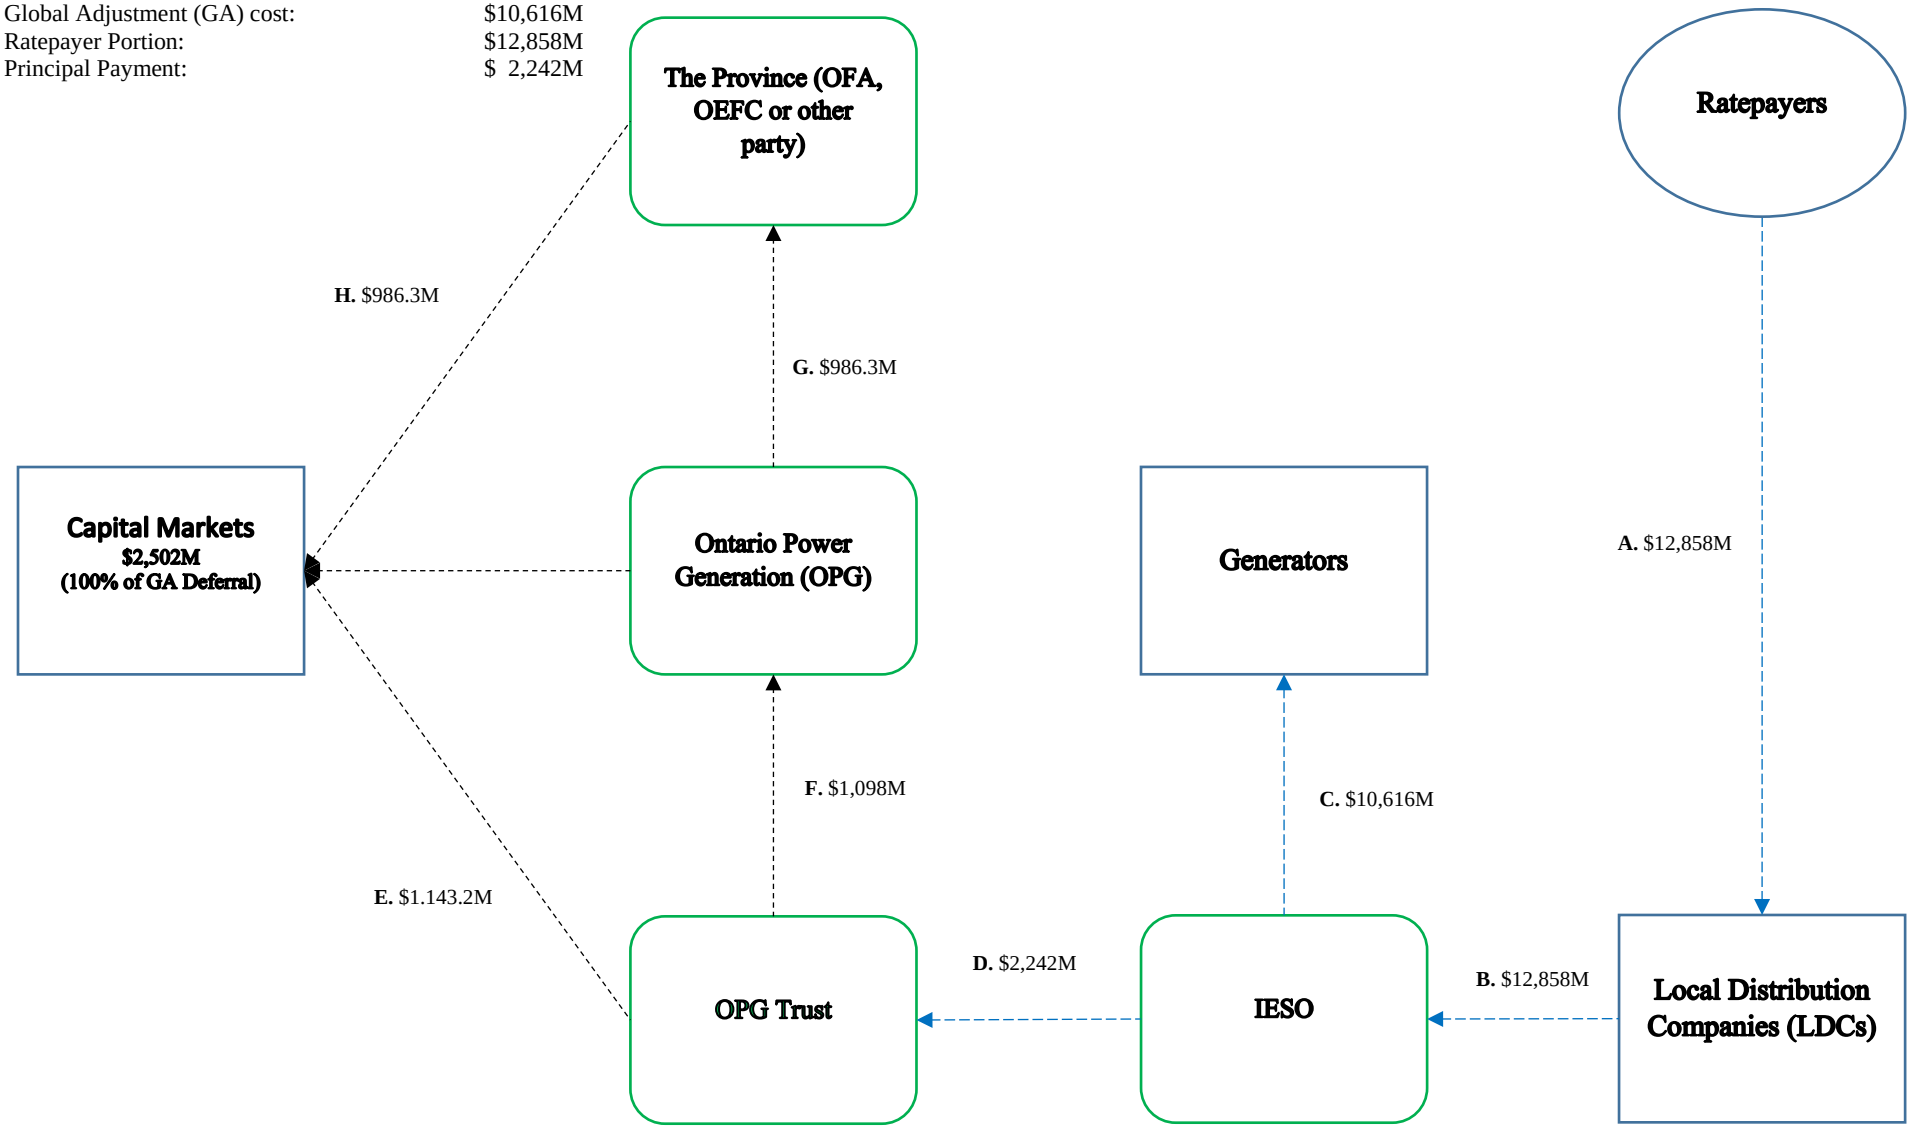
A. The Province borrows 44% of the deferred GA from the market.
B. The Province then funnels this amount to OPG through an equity injection.
C. OPG borrows 5% of the deferred GA from the market.
D. OPG lends an amount equal to the 5% and 44% from the market and the Province, respectively, to a separate legal entity called OPG Trust.
E. OPG Trust borrows 51% of the deferred GA from the market, ending up with 100% of the total $2.502M deferred GA in cash.

Deferral Mechanism

F. Ratepayers pay their portion of the GA to LDCs.
G. The LDCs remit this amount to IESO.
H. IESO, with the proper legislation and accounting treatment, is allowed to recognize a regulatory asset – the right to collect the deferred amount of $2,502M from ratepayers. It then sells this asset for cash to OPG Trust.
I. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA to Generators.

Exhibit B: 2028-2029 Estimates for Principal Payments

Global Adjustment (GA) cost:	$10,616M
Ratepayer Portion:	$12,858M
Principal Payment:	$ 2,242M



Collection of the GA

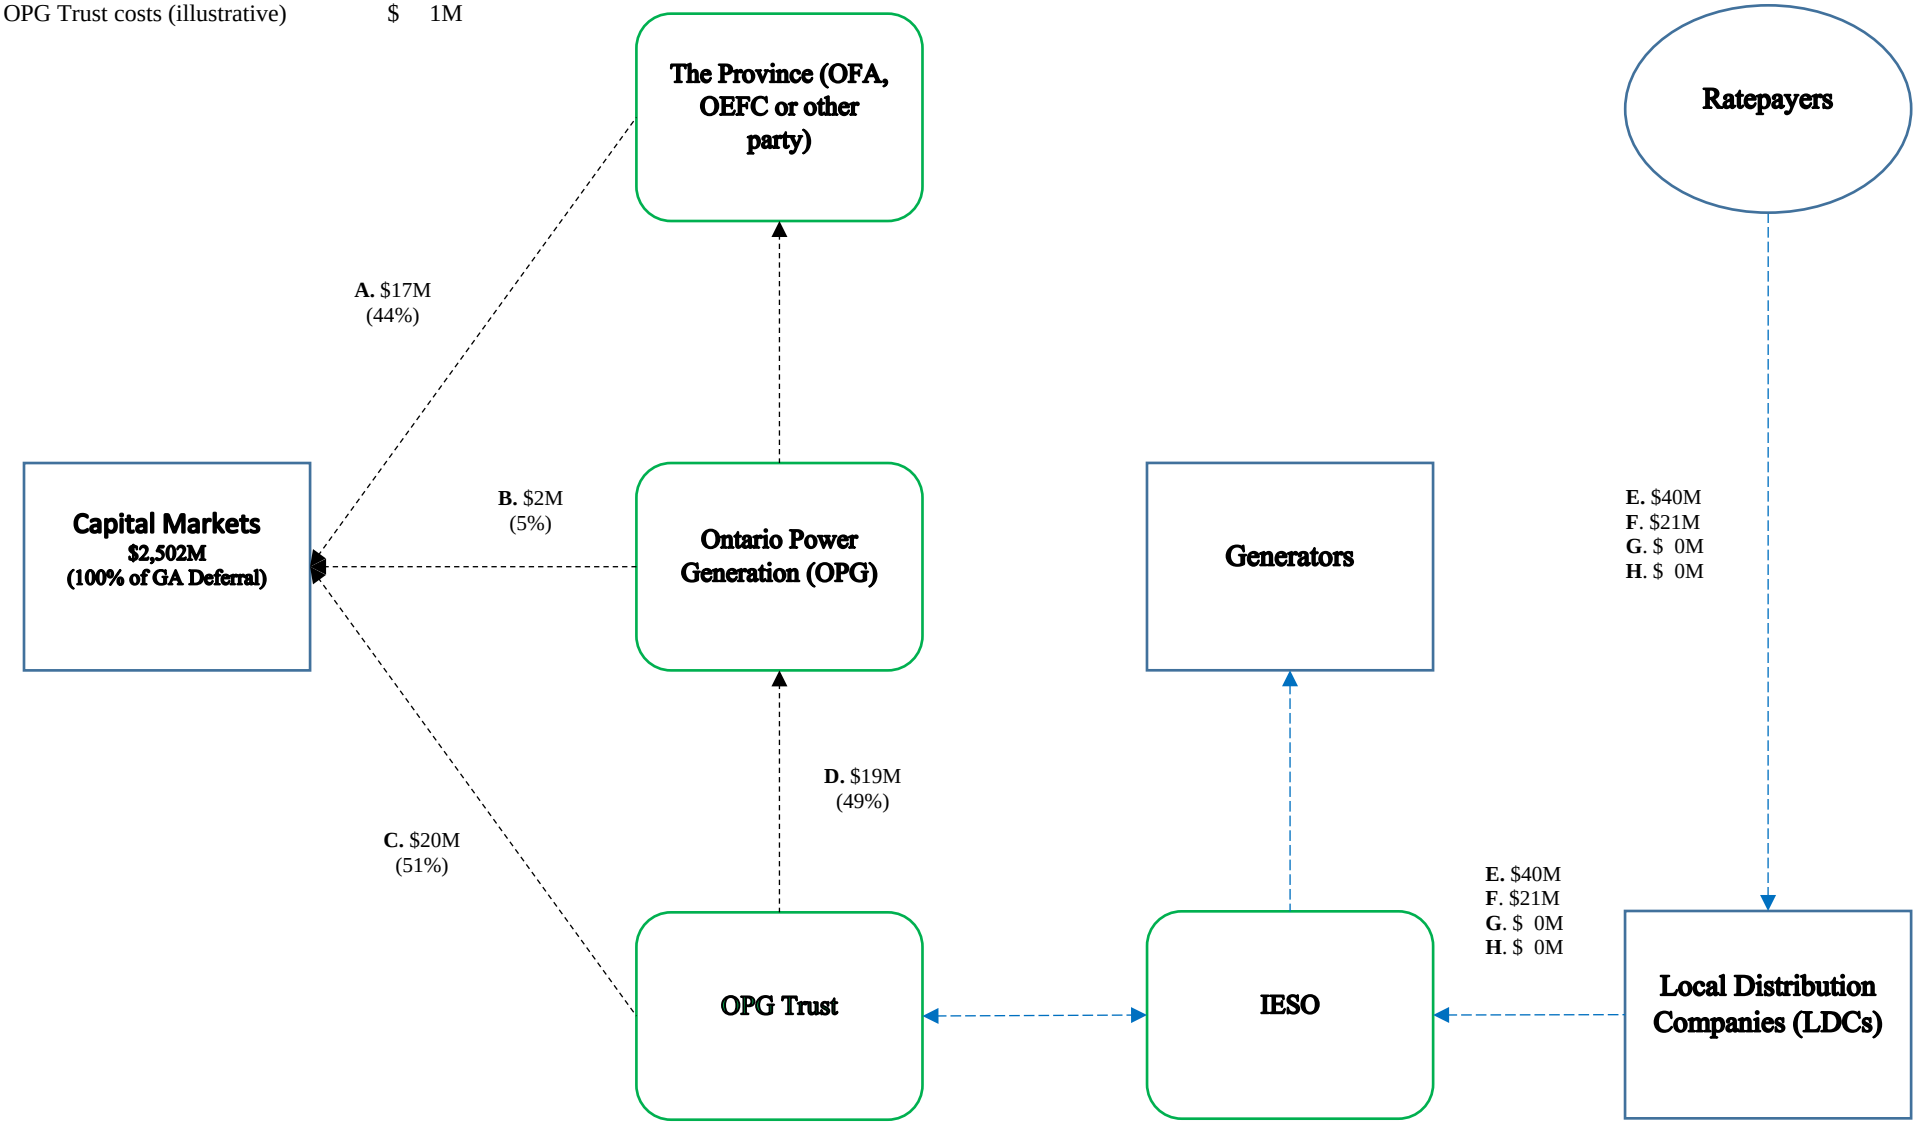
A. Ratepayers pay to LDCs the full cost of the GA plus an additional $2.242M that will be used to reduce the principal of the borrowing (or principal and interest if there is "interest on interest").
B. LDCs remit this amount to IESO.
C. IESO pays the full cost of the actual GA to generators.
D. IESO pays to OPG Trust the additional payment from the ratepayers over the actual GA cost. OPG Trust reduces the asset (for the right to collect GA deferral costs from ratepayers) by an equivalent amount.

Settlement of Principal.

E. OPG Trust pays off principal to the market. In this example, pays off 51%, but could pay more or less depending on various factors (e.g., subordinate debt, managing weighted average interest cost, etc.).
F. OPG Trust pays down principal related to the 49% of the GA Deferral it borrowed from OPG.
G. OPG could give a dividend to the Province equal in order to pay off the outstanding principal it borrowed from the market (44% of the total GA deferral cost)
H. The Province pays back principal to the market.

Exhibit C: 2017-2018 Estimates for Interest Recognition

Interest Recognized	$ 39M
OPG Trust costs (illustrative)	$ 1M



Recognition of Interest

A. The Province recognizes interest on the 44% of the deferred GA it borrowed from the market.

B. OPG recognizes interest on the 5% of the deferred GA it borrowed from the market.

C. OPG recognizes interest on the 51% of the deferred GA it borrowed from the market.

D. OPG Trust recognizes interest on the 49% of the GA it borrowed from OPG; OPG recognizes income for this transaction.

Options for Ratepayer collection

E. Option 1 – collect the entire interest amount from ratepayers plus the Trust administrative costs, thus offsetting the interest expense from total borrowing with the recognition of income. The end result is no fiscal impact.

F. Option 2 – only collect interest income for the 51% of deferred GA from the market and admin costs; OPG Trust would recognize income to offset the interest expense to the market but fiscal impact of 49% of the interest ($19M)

G. Option 3 – Do not collect from ratepayers – fiscal cost of 100% interest.

H. Option 4 – No collection from ratepayers, but OPG Trust is allowed to defer the recognition of interest expense on 100% of debt, leading to no fiscal impact.

Notes

- Assumptions based on Energy models and data, IESO forecasts, and CEFD validation models.

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Just a follow up to our call earlier, does it also make sense to invite Cindy Veinot provincial controller to the proposed meeting since accounting issues are also key.

Subject: RE: Provincial Support Term Sheet

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Subject: RE: Provincial Support Term Sheet

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature

given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Provincial Support Arrangement

Here are some questions to frame our discussion at 9 a.m. this morning, based on the May 12th version of the Term Sheet:

1. Should the Province's support covenant run in favour of the indenture trustee (for beneficiaries) or only the finance entity and be pledged? This may impact matters such as whether the Province is seen as a 'co-issuer' under US securities laws and perhaps the Province's accounting treatment.

2. Should the support covenant be given in respect of all potential claimants from the financing entit(y/ies), or only specified creditors? For example, should the 'subordinated notes' be given the full benefit of the support covenant?

3. Should the support covenant be given up-front in an open-ended, program-wide fashion, or be given in relation to individual transactions and specified creditors of the financing entity at the relevant time of transacting and only for the duration of the relevant underlying obligations?

4. Should the support covenant purport to extend to more than one financing entity?

5. Extending the arrangement to 1 year beyond the latest obligation (broadly construed) essentially means the support covenant will hang out there indefinitely – is this intended?

6. Is the scope of the "performance guarantee" (i.e., servicing, commingling; EV's and IESO) appropriate? Should we make clear that it would not extend to "seller" obligations arising under the MSSA? Can the Province commit to "perform or cause the performance" as a powers matter?

7. Consider the deletions of the "Performance Guarantee Event" concept. As marked up, the performance guarantee would not require any process to first pursue remedies against IESO.

8. If a "payment guarantee" is to be provided, it will raise issues for the Province, including accounting treatment and scope of the support undertaking. Has this sort of investigation been undertaken by the Province at this point?

9. Consider the overall scope of the "payment guarantee event" provision. Issues include the risk that an amendment of the Act or Regulation has a non-material, incidental impact on the timing of payment (i.e., the receipt of funds from an EV), which triggers an effective put at a premium. Another is that a lower court finding of *ultra vires* could trigger the obligation, rather than a "final, non-appealable decision".

10. Should the support arrangement extend to cover "invalidity" or "unenforceability" (see (C) under "Payment Guarantee Event") that arises for reasons other than the validity of the Act and Regulation (e.g., if the actual funding obligation, which the Province may not even be aware of, is impugned for an unrelated reason, such as entity governance or contracting issues)?

11. The "market disruption" provision (see (D) under "Payment Guarantee Event") needs considerable further thought and refinement (e.g., as proposed, the event is based on the ability to refinance the particular funding obligations, rather than "general market disruption"). Is the Province prepared to be a standby purchaser of any funding obligations in any market-based illiquidity scenario? Note that private market liquidity or "extendable note features" may be available at a cost. In any event, support from the Province of this type should probably only be addressed very specifically and at the time of the specific transaction and narrowly with respect to the obligations for which this sort of protection is specifically required. Note that depending on the maturities incurred under the financing plan, this could cause a major funding requirement for the Province.

12. The "stand-in" payment provisions contemplated in clause (x) under "Payment Guarantee" need to be better understood. Assuming that they result in the rating of any bonds being downgraded to the Province's then rating, should the Province have a redemption option in that scenario?

13. The "put at a premium" provisions contemplated in clause (y) under "Payment Guarantee" would need to be refined so that the entire structure (i.e., all related finding obligations, such as swaps, sub debt and liquidity commitments) would be 'unwound' in total, rather than only certain debt to avoid standing or perpetuating attendant obligations. Is the 101% pay-out always appropriate? If the Province is liable for payments under obligations, will it need certainty as to the underlying terms and conditions?

14. What is the consequence of the market disruption scenario described in (D) under "Payment Guarantee Event" – it doesn't seem to be covered under "Payment Guarantee"?

15. The postponement of subrogation rights is a problem. In effect, a payment to a senior ranking creditor would provide credit enhancement to all junior ranking obligations which may not have been the intended beneficiaries of the support arrangement (including service providers and sub debt). The general approach to subrogation needs to be considered at the time of incurrence of a funding obligation in relation to the particular scenario and circumstances.

16. "Notice", "Closing", "Governing Law" and other mechanics will need to be revised as required to the extent that the provision of support is intended to be transaction-specific, creditor-specific, etc.

17. To the extent that the support is given up-front, the Province will need to have the benefit of its own very specific condition precedents, including to approve each future transaction and finding obligation – would this disrupt the accounting treatment anticipated for OPG based on excessive control over financings?

18. Consider whether accepting or acknowledging "customary representations" and "customary confidentiality obligations" in this context makes sense. Customary for the Province?

19. Has anyone considered the Province's related governance requirements and related due diligence (e.g., the implications of a US offering under US securities laws). In the absence of a structure and contracts, how can the Province be assured that it is not

inadvertently becoming liable for unintended obligations, duties and liabilities (e.g., servicer buy-backs; "servicer advances"; entity-level tax payments; etc.)?

20. Has the Province's own accounting treatment for these been investigated? What limitations should be tabled at this stage?

21. Does the Province have concerns regarding potential for incongruences between the level of actual "independence" from the Province and public perception in relation to the OFHPA generally?

Hi Ron,

We will be at a position to share a draft SLA with Energy sometime later today. I have a question that I posed to Ken R. in that the draft refers to the Minister for even operational items and whether that was on purpose.

Would you like to take a look before it goes to Energy?

Subject: RE: Question - Provincial Support Agreemnt

John,

I have been in touch with Energy Legal, and they have been working on drafting. They are going back to the policy folks on their side, and trying to better set out what roles everyone will play in the process. If you haven't heard from them on this, maybe it makes sense for you to reach out to them (and Kaitlin).

I think that the roles and process needs to be set out before we can move the drafting forward.

I think it probably makes sense for your team to have a discussion with Kaitlin as well as policy staff at ENERGY to figure out what the process for making calculations and confirming monthly calculations should be. My sense is that ENERGY thinks that the OFA should be doing the analysis on a monthly basis, but I have no basis for making such a call. It is an ENERGY program, and the Minister of Energy will be making the share purchases, but I am not sure where the expertise or the role lies for the analysis should be, or what kinds of confirmations/analysis is even being done on a monthly basis. If you can work that out with Kaitlin/ENERGY, then we can move forward with the drafting.

Happy to discuss further.
Toby

Memorandum of Understanding
Relating to the
Fair Hydro Plan

Dated: XXXXXXX

Between:

Her Majesty the Queen in right of Ontario
as represented by the Minister of Energy (the "**Minister**")

And:

Ontario Financing Authority
an agency of the Province of Ontario (the "**OFA**")

Whereas:

1. The Government of Ontario enacted the *Ontario Fair Hydro Act, 2017* (the "Act") to implement its Fair Hydro Plan (the "FHP").

2. The Act and the regulations promulgated under the Act (the "Regulations") create certain assets related to the deferral of electricity charges (the "Assets"), which Assets will be acquired from the Independent Electricity System Operator ("IESO") by the Fair Hydro Trust, a special purpose financing entity established by OPG to implement the FHP

3. The Fair Hydro Trust will acquire the Assets monthly from the IESO and will finance the Assets in accordance with the financing plan, which includes both senior debt (minimum of 51%) from external sources and subordinated debt (up to 49%) from OPG.

4. The Minister has agreed to fund up to 44% of the total funding requirement for the Assets through equity injections in OPG and OPG has agreed to use the equity injections solely for funding the Fair Hydro Trust's subordinated debt (the "Equity Injection Plan").

5. For purposes of the Equity Injection Plan, OPG has amended its articles to create a new class of non-voting, redeemable shares (the "Class A Shares").

6. The Minister will subscribe for Class A Shares monthly.

7. Each month OPG will deliver to the Ministry a share subscription form (the "Share Subscription") setting out the amount of equity injection required (the "Subscription Payment") and the corresponding number of Class A Shares to be issued by OPG and subscribed by the Minister.

Commented [GH1]: Ministry of Energy or the Minister?

Commented [RT2]: Will the Class A Shares be book-based and issued by OPG's fiscal agent, Computershare, or are the shares physical and issued directly by OPG? Where will the shares be delivered – the Province's custodian, currently CIBC Mellon, or the OFA (if the shares are physical).Will the OFA hold the shares in a Provincial account at our custodian or in the OFA's vault if in physical format?

8. The Minister is required to pay the Subscription Payments out of amounts appropriated by the Legislature for that purpose ("Appropriated Amount") for the fiscal year in which the payment is made;

9. The Minister has advised the OFA that the Minister is required to make the Subscription Payments within [*] business days of the receipt by the Minister of the Share Subscription (the "Share Subscription Payment Date")

10. The Minister considers it advisable for the OFA to make the Subscription Payments on behalf of the Minister and the OFA has agreed to make the Subscription Payments on behalf of the Minister;

11. The Minister and the OFA wish to enter into this MOU to confirm their agreement regarding the terms on which the OFA will make the Subscription Payments.

Therefore:

The Minister and the OFA agree as follows:

1. Payment Authorization

(i) The Minister authorizes the OFA to make the Subscription Payments on behalf of the Minister and the OFA agrees to make the Payments on behalf of the Minister.

(ii) The Minister shall ensure that the certificate under section 11.4 of the *Financial Administration Act* (reproduced as Schedule A to this MOU) required for each of the Subscription Payments is obtained, and shall provide the OFA with a copy of such certificate.

(iii) It is agreed by the Minister and the OFA that the OFA is acting as an agent, on behalf of the Minister, for the purposes of

i. Transacting with the Ontario Shared Services "IFIS" system in order to access funds appropriated for the Minister in respect of the Fair Hydro Plan, and

ii. Making the required Subscription Payments on behalf of the Minister as further described in this MOU.

2. Payment Process

a) The Minister will take all necessary steps to provide the OFA with a good quality unapproved electronic copy of each Share Subscription, on the same day the Minister receives the Share Subscription from OPG to allow the OFA to begin the procedures for making the Subscription Payment.

b) The Minister will deliver to the OFA a good quality copy of each Share Subscription executed and approved for payment by **[insert appropriate MoE official]** - at least three business days before the Share Subscription Payment Date. Upon receipt of the executed and approved Share Subscription the OFA will make the Subscription Payment on behalf of the Minister, in the amount of the Share Subscription.

c) The OFA shall not be required to make any Subscription Payment on behalf of the Minister if the Minister has not delivered to the OFA an executed and approved Share Subscription as provided in paragraph b) above.

d) The Subscription Payments will be made from the Consolidated Revenue Fund and the amount of each Subscription Payment will be entered by the OFA via a journal entry into the Province's IFIS system under a pre-defined Minist~~er~~ry of Energy ~~-~~account immediately upon the completion of the Subscription Payment or shortly thereafter.

Commented [RT3]: Usually when the OFA makes a payment for a ministry, we book a debit entry to an Accounts Receivable Miscellaneous and the appropriate Ministry books a corresponding credit entry.

3. Reporting Requirements and Records

a) The OFA will deliver a notice by e-mail to the Minister's contact person to confirm the completion of each Subscription Payment in the amount of the Share Subscription.

b) The OFA will keep and maintain all records related to the Share Subscriptions for a period of seven (7) years.

c) The requirements under this section shall survive any termination of the MOU.

d) The Public Accounts, Volume 3 reporting related to the Subscription payments will be performed by the Minister.

4. Limited Role of the OFA

The OFA will only be responsible for making the Subscription Payments in accordance with section 2 and reporting and record keeping in accordance with section 3. For greater clarity, the OFA will not be responsible for auditing or otherwise verifying the correctness of the Share Subscriptions; monitoring the OPG's application of the Subscription Payments; monitoring the balance from time to time of the Appropriated Amount; or ensuring the Appropriated Amount is sufficient.

Commented [KK4]: I am just a little concerned by this, if we make a payment and there's insufficient appropriations there is a really significant issue. Hence we need to incorporate some control mechanism that ensures along with the Share subscription delivered to us there's some kind of assurance by MOE that sufficient funds exist within the relevant appropriation to cover the upcoming payment.

5. Review and Termination

a) The Minister and the OFA will review this MOU as necessary.

b) This MOU may be terminated by either party at any time, on 90 days' notice.

c) Upon termination of this MOU, provided the OFA has the power and authority to make such Subscription Payments the OFA will make Subscription Payments in respect of executed and approved Share Subscriptions delivered by the Minister to the OFA on or before the date of termination in accordance with subsection 2(c) of this MOU, but will not be obligated to make any further Subscription Payments on any executed and

approved Share Subscriptions delivered by the Minister to the OFA after the date of termination of this MOU. All provisions of this MOU relating to Subscription Payments made by OFA will continue to apply with respect to such Subscription Payments made by the OFA after the termination date, notwithstanding termination of this MOU.

d) The parties will cooperate to help to ensure a smooth transition of the payment function upon termination.

6. No Service Charges

The OFA will not charge the Minister for the OFA's services or for its disbursements or other expenses incurred under this MOU.

7. Contacts

a) Each party shall designate a member of its staff to be a contact person for the purposes of administering this MOU.

b) As of the date of this MOU the OFA's contact persons are:

Tel:
email:

Tel: email:

should also be sent to:

Tel: email: & email:

c) As of the date of this MOU the Minister's contact person is:

Tel:
email:

d) Either party may designate a different member of its staff as its contact person by providing notice to the other party in accordance with section 7.

8. Notice

a) Any notice under this MOU shall be in writing and shall be deemed given when delivered by hand or email, and addressed to the party's contact person.

b) In the case of the OFA, the addresses for notice are:

Hand Delivery:
Ontario Financing Authority
Suite 1400
1 Dundas St. W.
Attention: Ken Kandeepan, Chief Financial and Risk Officer
email: Ken.Kandeepan@ofina.on.ca

c) In the case of the Minister, the addresses for notice are:
Hand Delivery:
Ministry of Energy

9. Execution

The parties have executed this MOU, effective as of the date first above written.

Her Majesty the Queen in right of Ontario
as represented by the Minister of Energy

SCHEDULE A

Section 11.4, *Financial Administration Act*, R.S.O. 1990, c. F.12

11.4 (1) No payment shall be made out of the Consolidated Revenue Fund unless, in addition to any other voucher or certificate that may be required, a person referred to in subsection (2) certifies,

(a) in the case of a payment for the supply of goods or the rendering of services after the goods are delivered or the services are rendered, that the goods have been supplied or the services have been rendered and that,

(i) the payment is in accordance with the agreement, or

(ii) the amount of the payment is reasonable, if the amount of the payment is not specified in the agreement;

(b) in the case of a payment for the supply of goods or the rendering of services before the delivery of the goods or the supply of the services, that the payment is in accordance with the agreement; or

(c) in the case of a payment not described in clause (a) or (b), that the payee is eligible for or entitled to the payment. 2002, c. 8, Sched. B, s. 2.

Persons authorized to certify payments

(2) Only the following persons have authority to give a certificate under subsection (1):

1. A minister or deputy minister.
2. The Speaker of the Assembly.
3. The Auditor General.
4. The Chief Electoral Officer.
5. A person authorized by the Management Board of Cabinet.
6. A person authorized by a person referred to in any of paragraphs 1 to 5. 2002, c. 8, Sched. B, s. 2; 2004, c. 17, s. 32; 2007, c. 15, s. 40 (1).

Hi Ron,

We've received the following questions from CQSD and they'd like us to address Q's 1-3. Should I distribute to MOF legal (Malle?) for question 3? I'm not sure what sort of answer we would provide for the first two.

I've asked what the ultimate purpose of these questions are, but no response yet.

Thanks,
Matt

Subject: Questions

Hi Matt,

Can you confirm the following 1 thru 3. I'm working on 4 and 5. If you have any questions please let me know.
Thanks,
Anthony

1) What is the urgency for tracking the September 26th board date?
2) Do you know if OFA has engaged the DMO/MO and if they are in agreement with tracking this board date?
3) Do we know when legal will be signing off on the submission?
4) What are the expectations around engaging/seeking MOE Minister signoff/agreement?
5) Has TBS indicated whether or not a MO-to-MO reach out will be required since this is blowing the 3-week rule?

Can you confirm the following 1 thru 3. I'm working on 4 and 5. If you have any questions please let me know.

Thanks,

Anthony

1) What is the urgency for tracking the September 26th board date?
   The first bond issue by OPG Financing Entity is expected the fall timeframe (around October/November). Once the guarantee is in place, the Financing Entity will require finalization of documentations, undertake activities such as investor road shows, etc. As a result, the September timeline can be considered to be on FHP's critical path.

2) Do you know if OFA has engaged the DMO/MO and if they are in agreement with tracking this board date?
   OFA staff are of the understanding that DMO/MO fully support the timely implementation of all aspects of the FHP and are kept well informed of developments related to the implementation of the FHP, including this item.

3) Do we know when legal will be signing off on the submission?
   Yes, both MOF Legal and Energy Legal will be signing off on the submission, as legal staff are involved in reviewing the term sheet and as part of the normal sign-off process.

4) What are the expectations around engaging/seeking MOE Minister signoff/agreement?
   OFA staff understand that as contemplated under the Ontario Fair Hydro Plan Act, both Ministers would have to agree to the guarantee following an Order-in-Council. Energy staff are preparing to brief the Minister of Energy in the week of August 28, 2017.

5) Has TBS indicated whether or not a MO-to-MO reach out will be required since this is blowing the 3-week rule?
   While OFA staff are not aware of any discussions about the MO-to-Mo outreach to-date, it would be reasonable to assume that all MO's involved are aware of this item and the timeline involved.

Subject:	RE: Revised Version of Provincial Support Arrangements
Date:	Tuesday, June 20, 2017 11:40:52 AM

Hi all

I don't have any comments on the revised version, however, I do have a proposal that may address a number of the practical issues that were discussed yesterday, assuming the occurrence of an indemnification event.

OPG provides a guarantee to the Trust, somewhat similar to their initial draft, the Province provides OPG an indemnity against the aforementioned guarantee. Given that the current language refers to "each financing entity" perhaps that what we are doing right now, however, I am not very clear on that.

Feel free to shoot this down, I am also cc'ing Cindy since this approach may address some of the accounting concerns that may arise from the need for the Trust to be independent from the Prince yet be backstopped by a Provincial Protection and Assurance.

Thanks

Ken k

Subject: FW: Revised Version of Provincial Support Arrangements

Please see attached, for your review and comment, a revised draft that Stephen prepared based on our conversation yesterday. MOF Legal has no further comments on this draft.

I think that the two significant changes to note are:

1. The addition of the concept of "third party claims" as the driver of the indemnity section, meaning that the Indemnitee (which is a Financing Entity) can only bring a claim after a claim has been brought against them by a creditor.
2. The addition of the concept of conditions that would be required to step in in the event of funding mismatches, such as a market disruption event. As discussed yesterday, this provision is soft, so it is not clear what exactly this commits the Province to, but does give some comfort based on the language in this section.

Since there is a large group on this email, I think the best approach is to wait until noon for comments. If there are none by then, I will let Stephen and Energy know that we are ok with the draft, and Scott Nelms and whoever else needs to be involved with opening the discussions with OPG can use this version.

Hi. As a follow-up to our meeting earlier today, here is a revised version of the draft term sheet. The blackline shows changes from the June 14th version. Please let me know if you have any questions or concerns with the comments – including the deletion of the 'privilege' reference. Scott has the OFA's green light to share the draft term sheet with OPG. Please send along any final thoughts as soon as you can. The plan will be for Scott to send it out tomorrow morning. Thanks, Steve

Thanks Toby!

Hi Anna,

Based on the changes I would require an updated slide deck. We have another TBS analyst who would be taking this forward so would like to give him a copy of the submission once everyone is comfortable that the submission is stable. Still need to make sure that we are consistent with the request to TB/MBC and the minuting at the end.

Thanks,
Anthony

Subject: TB Submission for Change of Law Protection Agreement

Please find attached a markup of the TB submission, as well as a revised term sheet and OIC.

The term sheet is as we have discussed further with Blakes, and as revised by them to reflect our discussions. The document has been renamed to a “protection agreement” because the authority and the obligation is not necessarily an assumption of the obligations of a Financing Entity, and is rather the payment of such obligations. I have attached both the clean and blacklined versions.

The OIC draft is an update of the latest version that was circulated, with the notes to draft removed as there were no further comments.

We have marked up the TB submission to reflect the current status of the negotiation of the term sheet and subject to necessary approvals. We have deleted the attached term sheet from the markup so that the revised version can be inserted instead. We also think it makes sense to include the draft OIC in the TB materials.

Please let me know if you have any comments or questions.

Subject: TBMBC Submission Provincial Guarantee (OFA) 08162017.doc

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

OFA -- IESO CREDIT FACILITY ~~IES~~MINISTER OF FINANCE DIRECTIVE TO EXEMPT THE INTERCEPT PROVISION ("INTERCEPT EXEMPTION DIRECTIVE") REQUIRED UNDER THE OFA'S LENDING POLICY

BACKGROUND

The Independent Electricity System Operator ("IESO") requested a revolving credit facility ("the credit facility") in an amount of up to $2 billion from the Ontario Financing Authority ("OFA") to support its role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act"). In the same request, the IESO had requested a reduction to its existing credit facility from the current $975 million to $475 million.

On June 29, 2017, the OFA received ~~a~~ a l~~L~~ending d~~D~~irective from the Minister of Finance to accommodate the IESO's request and provide a revolving credit facility to the IESO in an amount of up to $2 billion (the "OFHP Credit Facility").

Pursuant to the OFA Lending Policy, the OFA is required to include an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis, unless otherwise directed by the Minister [or Treasury Board or Cabinet]. In accordance with section 23 of the *Capital Investment Plan Act, 1993* ("CIPA"), the intercept provision allows the OFA to deduct amounts equal to any amounts the public body fails to pay to the OFA under a loan agreement from money appropriated by the Legislature for payment to the public body.

Per the requirements of the OFA's Lending Policy, the OFA is returning to request a Minister's direction to exempt the requirement to include an ~~from the i~~Intercept p~~P~~rovision ~~both~~ in ~~its OFHP Credit Facility~~ the credit facility agreement with the IESO and the reduced $475 million credit facility ~~the new $2 billion credit facility to support the IESO's role in the Fair Hydro Plan and the reduced $475 million credit facility~~. [The existing $975 million credit facility is requested to be reduced to $475 million, in connection with the newly requested $2 billion credit facility.]

- ~~Note: The Intercept Provision under the OFA's Lending Policy for unsecured lending to a public body requires that, unless exempted by the Minister of Finance [or Treasury Board or Cabinet], the OFA put in place a provision whereby the OFA is entitled to deduct amounts equal to any amounts the public body fails to pay to the OFA under the loan, from money appropriated by the Legislature for payment to the public body.~~

RECOMMENDATION

- OFA staff recommend the Minister sign the attached Intercept Exemption Directive allowing the OFA to provide th~~ese~~ requested credit facilities~~y~~~~ies~~ to the IESO without the inclusion of an ~~an I~~intercept provision in the loan agreement~~under the OFA Lending Policy~~.

- The requested Intercept Exemption Directive would only apply to the two specified credit facilities.

CONSIDERATIONS

Commented [LS1]: After discussion with Ken Russell, we think the directive should be limited to the new credit facility agreement.

Commented [SK82R1]: I understand we are deciding to ensure both credit facilities are covered the Intercept Exemption Directive. Will revert language back accordingly.

Commented [JK3R1]: A business decision – which I am sure ADM/CEO would support

- ~~This The OFHP Credit Facility~~This Intercept Exemption Directive will enable the IESO to fulfil its commitments under the OFHP Act as the IESO will have to finance for a short or medium term period the funding shortfalls in the implementation of the ~~Fair Hydro Plan~~OFHP Act, as well as the continued implementation of the market support function for the IESO through the $475 million facility [to be amended from the current $975 million facility].

- ~~Under T~~the OFA Lending Policy provides the following requirement for unsecured loans to public bodies under CIPA~~, the following is provided for~~:

  ~~"~~Except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, and prior to the OFA making any loan to a public body, the OFA will [e]nsure that it has an appropriate intercept in place for the loan.~~"~~

- The ~~intercept in the~~ OFA Lending Policy also includes the following requirements in relation to the intercept provision:

  The public body and its responsible ministry are to agree that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts that the public body fails to pay to the OFA on account of indebtedness under its loan agreement with the OFA.

RATIONALE FOR EXEMPTION

- ~~An~~ Including an i~~I~~ntercept p~~P~~rovision in the ~~new OFHP Credit Facility~~ credit facilities agreement with the IESO would have no practical usefulness in the case of the IESO as it receives no operational funding from the Province of Ontario.

- While the IESO settlements system for the electricity sector may facilitate the flow of appropriations of the Ministry of Energy for energy-related programs such as the Ontario Rebate for Electricity Consumers (OREC), the Rural or Remote Rate Protection Program (RRRP), the Ontario Electricity Support Program (OESP) etc., these payments are for the benefit of various electricity consumers.

- Intercepting these program specific payments, under which the IESO may only be providing a conduit to local distribution companies under the IESO settlement system to provide benefits to ratepayers, in order to recover loan payments would not be in alignment of the intent of the OFA's Lending Policy.

MINISTER'S DIRECTIVE

- The Minister of Finance's Intercept Exemption Directive would authorize the OFA to exempt the two ~~new two revolving~~ credit facilities~~y~~~~ies~~ ~~agreement~~ with ~~to~~ the IESO [per the Minister's Directive signed on June 29, 2017] from inclusion of an intercept provision, as required by the OFA Lending Policy. ~~Intercept provision under the OFA Lending Policy.~~

Commented [LS4]: This is not a defined term.

Commented [LS5]: Is this even a possibility? I thought there were no funds to intercept.

Commented [SK86R5]: There are payments (appropriated to Energy from the legislature) made to the IESO to carry out price mitigation programs (eg. electricity support programs).

Just want to explain here the intent of the policy isn't to claw back/intercept payments specifically designed to assist electricity ratepayers for which the IESO is a conduit.

Commented [JK7R5]: To Lisa's question - I don't believe that is the intent of requiring an intercept provision.

- ~~[The Intercept Exemption Directive would also exempt any lending to the IESO from the OFA, previously authorized and/or subsequently amended, to be exempt from the Intercept Provision.]~~

Commented [SK88]: This is to ensure both the 2B and 475M credit facilities are covered.

Commented [LS9]: See earlier comment

Commented [SK810R9]: Bullet above modified to include both facilities.

Commented [JK11R9]: To proceed with the Intercept Exemption Directive for the two facilities only.

FISCAL IMPACT

- There is no expected incremental fiscal impact for the Province from providing an exemption from the intercept provision requirement of the OFA Lending Policy.
  - [The IESO is an entity consolidated to the Province and if there were any amounts to intercept, there would be no incremental fiscal impact of ~~not~~ having ~~an~~the ~~i~~Intercept Exemption ~~p~~Provision.]

Commented [RK12]: What about saying that as IESO is a consolidated entity, and if there were any amounts to intercept, there would be no incremental fiscal impact of not having an intercept provision?

BACKGROUND

The IESO

- The IESO is a not-for-profit corporate entity established in 1998 by the *Electricity Act, 1998*. It is governed by an independent Board of Directors and its Chair and Directors are appointed by the Province.
- The IESO has full statute-based authority for establishing, monitoring and enforcing reliability standards in the province. All the companies that make up the power system in Ontario must meet the IESO's standards.
- Its fees and licences to operate are set by the Ontario Energy Board and it operates independently of all other participants in the electricity market.
-
- The IESO is a public body for the purposes of CIPA.

Subject: TBMBC Submission Provincial Guarantee (OFA) 08162017.doc

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

OFA -- IESO ~~FAIR HYDRO PLAN~~ CREDIT FACILITIES~~Y~~
MINISTER OF FINANCE DIRECTIVE TO EXEMPT THE INTERCEPT PROVISION
("INTERCEPT EXEMPTION DIRECTIVE")
REQUIRED UNDER THE OFA'S LENDING POLICY

The Independent Electricity System Operator (IESO) requested a revolving credit facility ("the credit facility") in an amount of up to $2 billion from the Ontario Financing Authority ("OFA") to support its role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act"). In the same request, the IESO had requested a reduction to its existing credit facility from the current $975 million to $475 million.

On June 29, 2017, the OFA received a Lending Directive from the Minister of Finance to accommodate the IESO's request.

Per the requirements of the OFA's Lending Policy, the OFA is returning to request a Minister's direction to exempt from the Intercept Provision both the new $2 billion credit facility to support the IESO's role in the Fair Hydro Plan~~current~~ and the reduced $475 million ~~proposed IESO~~ credit facility~~ies from the Intercept Provision~~.

- Note: The Intercept Provision under the OFA's Lending Policy for unsecured lending to a public body requires that, unless exempted by the Minister of Finance [or Treasury Board or Cabinet], the OFA ~~to~~ put in place a provision whereby the OFA is entitled to deduct amounts equal to any amounts the public body fails to pay to the OFA under the loan, from money appropriated by the Legislature for payment to the public body.

RECOMMENDATION

- OFA staff recommend the Minister sign the Intercept Exemption Directive allowing the OFA to provide these credit facilities ~~exempt~~to the IESO without ~~from the~~an Intercept provision under~~of~~ the OFA Lending Policy.

CONSIDERATIONS

- This will enable the IESO fulfil commitments under the OFHP Act as the IESO will have to finance for a short ~~to~~or medium term period the funding shortfalls in the implementation of the Fair Hydro Plan.

~~Note: The Intercept Provision under the OFA's Lending Policy for unsecured lending to a public body requires that, unless exempted by the Minister of Finance [or Treasury Board or Cabinet], the OFA to put in place a provision whereby the OFA is entitled to deduct amounts equal to any amounts the public body fails to pay to the OFA under the loan from money appropriated by the Legislature for payment to the public body.~~

- ~~The~~An Intercept Provision would ha~~s~~ve no practical usefulness in the case of the IESO as it receives no operational funding from the Province. While the IESO settlements system for the electricity sector may facilitate the flow of ~~A~~appropriations of the Ministry of Energy ~~for payment to the IESO are for settlement of payments~~ for energy-related programs such as the Ontario Rebate for Electricity Consumers (OREC), the Rural or Remote Rate Protection Program (RRRP), the Ontario Electricity Support Program (OESP) etc., these payments are for the benefit of various electricity consumers. Intercepting these program specific payments, ~~merely~~

Formatted

Formatted: Font: Bold

Formatted

Formatted

~~facilitated by~~under which the IESO~~.~~ may only be providing a conduit to local distribution companies under the IESO settlement system to provide benefits to ratepayers, in order to recover loan payments would not be in alignment of the intent of the OFA's Lending Policy.

MINISTER'S DIRECTIVE

- The Minister of Finance's Intercept Exemption Directive would authorize the OFA to exempt the two revolving credit facilities to the IESO [per the Minister's Directive signed on June 29, 2017] from the Intercept ~~P~~provision ~~outlined in~~under the OFA Lending Policy ~~from the revolving credit facility to the IESO [per Directive signed on June 29, 2017]~~.

- [The Intercept Exemption Directive would also exempt any lending to the IESO from the OFA, previously authorized and/or subsequently amended, to be exempt from the Intercept Provision.]

FISCAL IMPACT

- There is no expected~~would be a relatively small but positive~~ incremental fiscal impact for the Province from providing an exemption from the intercept provision~~, as a result of the credit facility and the Intercept Exemption Directive is not anticipated to change this.~~
  - ~~The Province receives a small fiscal benefit by adding 25 basis points (i.e., 0.25%) to the Province's cost of funds provided to the IESO under the facility, which should more than offset any administrative cost impact on the OFA and Province.~~
  - ~~The actual amount is expected to be small, as the IESO is expected to make draws for short periods to bridge brief timing differences in cash flows.~~

BACKGROUND

The IESO

- The IESO is a not-for-profit corporate entity established in 1998 by the *Electricity Act, 1998*. It is governed by an independent Board of Directors and its Chair and Directors are appointed by the Province.
- The IESO has full statute-based authority for establishing, monitoring and enforcing reliability standards in the province. All the companies that make up the power system in Ontario must meet the IESO's standards.
- Its fees and licences to operate are set by the Ontario Energy Board and it operates independently of all other participants in the electricity market.

The OFA Lending Policy

- [Add some background bullets.]
- The OFA Lending Policy provides for….
-

Commented [SK81]: This is to ensure both the 2B and 475M credit facilities are covered.

Commented [RK2]: Agreed?

Commented [RK3]: What about saying that as IESO is a consolidated entity, and if there were any amounts to intercept, there would be no incremental fiscal impact of not having an intercept provision?

COMMERCIALLY SENSITIVE AND CONFIDENTIAL ADVICE TO MINISTER

DIRECTIVE

MINISTER OF FINANCE

LOANS TO THE INDEPENDENT ELECTRICITY SYSTEM OPERATOR

To: Ontario Financing Authority ("OFA")

Whereas:

Under the *Capital Investment Plan Act, 1993* ("CIPA"), the OFA provides financing to public bodies as directed by the Minister of Finance ("Minister").

The Independent Electricity System Operator ("IESO") is a public body for the purposes of CIPA.

Pursuant to a directive from the Minister dated June 29, 2017, the OFA was directed to provide a revolving credit facility to the IESO for the purposes of providing short to medium term financing related to the IESO's role in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Credit Facility").

Pursuant to the OFA Lending Policy, the OFA is required to include an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis, unless otherwise directed by the Minister, Treasury Board or Cabinet. The intercept provision would entitle the OFA to deduct money appropriated by the Legislature for payment to the IESO, if not specifically exempted by a direction from the Minister of Finance.

[As the IESO receives no funds~~ing~~ in the form of grants or transfer payments from the ~~Province of Ontario~~Ministry of Energy pursuant to its annual appropriation, there is no funding to which the intercept provision applies.]

[ALTERNATE TO PARAGRAPH ABOVE:

The Intercept Provision has no practical usefulness in the case of the IESO as it receives no operational funding from the Province. Appropriations of the Ministry of Energy for payment to the IESO are for settlement of payments for energy programs such as the Ontario Rebate for Electricity Consumers (OREC), the Rural or Remote Rate Protection Program (RRRP), the Ontario Electricity Support Program (OESP) etc. Intercepting these program specific payments merely facilitated by the IESO, in order to recover loan payments would not be in alignment of the intent of the OFA's Lending Policy.]

Therefore:

The OFA is not required to include an intercept provision in its OFHP Credit Facility agreement with the IESO, nor in any other existing unsecured loan agreements with the IESO.

Commented [LS1]: CEFD to review/confirm.

Commented [SK82]: Two related arguments for the Directive.

Suggest picking one and ensuring the one chosen is then copied over to the Briefing Note to ensure consistency.

Dated , 2017

Charles Sousa

Minister of Finance

DIRECTIVE

MINISTER OF FINANCE

LOANS TO THE INDEPENDENT ELECTRICITY SYSTEM OPERATOR

To: Ontario Financing Authority ("OFA")

Whereas:

Under the *Capital Investment Plan Act, 1993* ("CIPA"), the OFA provides financing to public bodies as directed by the Minister of Finance ("Minister").

The Independent Electricity System Operator ("IESO") is a public body for the purposes of CIPA.

Pursuant to a directive from the Minister dated June 29, 2017, the OFA was directed to provide a revolving credit facility to the IESO for the purposes of providing short to medium term financing related to the IESO's role in the implementation of the *Ontario Fair Hydro Plan Act, 2017* (the "OFHP Credit Facility").

Pursuant to the OFA Lending Policy, the OFA is required to include an intercept provision in respect of loans made by the OFA to public bodies on an unsecured basis, unless otherwise directed by the Minister, Treasury Board or Cabinet. The intercept provision applies to money appropriated by the Legislature from a public body.

As there is no money appropriated by the Legislature for the IESO, the intercept provision has no application for an OFA loan to the IESO.

Therefore:

The OFA is not required to include an intercept provision in its OFHP Credit Facility agreement with the IESO.

Thanks Lisa.

I think that in the new 4th paragraph, it should be “for”, not “from”.

Maybe it should say something like: Currently there is no money appropriated by the Legislature OR the Ministry of Energy has advised that there is no money appropriated and not expected to be… I am just trying to get at the source of certainty of that information which may be better explained in the accompanying briefing note.

Thanks.

Subject: RE: TBMBC Submission Provincial Guarantee (OFA) 08162017.doc

Hi Anna

Sorry I couldn't attend the Management meeting, I wanted to provide my comments and edits before I left, pls let me know if you have any questions. I would also hope that OPG will be able to provide a draft of the guarantee itself that can also be attached.

Finally, you should also reserve a space in the submission for comments from MOF Legal and Stephen Ashbourne.

Thanks

Ken k

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

I have incorporated Ken's comments into the correct template. If you haven't yet started editing the document sent yesterday, please use the attached. I've added some additional background detail that will require review.

If I could please ask for any comments asap that would be much appreciated. I'll be sending to OPCD, Energy and MOF early this afternoon for comment.

PROVINCIAL GUARANTEE TO OPG FINANCING ENTITY

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee to the OPG Financing Entity and its prospective debt holders, that under certain circumstances, the Province would assume the debt obligations of the Financing Entity. The provincial guarantee protects investors from an adverse change in law or inability to fund in capital markets.

This submission is to request that Treasury Board:

(a) Approve a provincial guarantee to the OPG Financing Entity under the terms set out in Appendix;

(b) Note the Minister of Finance will sign a Section 28, approving a contingent liability equal to the esti

3. SUMMARY OF FINANCIAL IMPLICATIONS

The following two tables provide a summary of the funding request for the Ministry, by standard account and by program area. Detailed financial information is provided in the Appendices.

$M (except FTEs)

Ministry Summary

4. BACKGROUND:

On March 2, 2017, the government announced Ontario's Fair Hydro Plan (OFHP), which would lower bills by 25% for a typical residential consumer, starting in the summer of 2017. It is built around the principle that costs incurred to move to a clean, reliable system creates benefits across generations, and costs that should be spread more fairly.

To this end, immediate rate relief is provided by spreading the cost of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years.

The IESO will create a regulatory asset approximately equal to the difference between collections from ratepayers and payment obligations to generators and conservation. Under the OFHP a Financing Entity will finance the shortfall in revenues not received from the ratepayers.

The *Ontario Fair Hydro Plan Act, 2017,* (the Act) which came into effect on June 1, 2017, enables the implementation of the OFHP. The Act provides for the IESO to sell the regulatory asset and the right to recover those deferred amounts from specified consumers in the future.

To purchase the regulatory asset from IESO, the Financing Entity must borrow from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against risk, the debt would not be financeable. OPG is therefore requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

The Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding

payments to service providers.

The guarantee would continue until all obligations of the Financing Entity are fully discharged.

The Ministry of Energy will be reporting back to TB/MBC on September

5. ADMINISTRATIVE IMPACTS:

6. RISKS:

If the guarantee is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be materially greater than it otherwise would be.

If the guarantee is approved, the Government of Ontario takes on a contingent liability. The amount of the liability will increase over the duration of the Fair Hydro Plan and peak at an estimated $24B to $26B. In the event the guarantee is triggered the Province's net debt will increase by an amount equal to the contingent liability at that point in time.

Likewise, the Province's interest payments will also increase by amount equal to the weighted average cost of the debt it has assumed under the guarantee. While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense will increase anywhere between $0.8B and $1.3B per annum.

It is important to note that if the guarantee is triggered for the Province to pay down the debt it assumes as well as minimize the fiscal impact from the associated IOD expense, the other provisions of the Fair Hydro Plan including the Clean Energy Adjustment need to continue. If not, the incremental IOD expense impacts the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. OPERATIONAL REQUIREMENTS:

8. COMMUNICATION PLAN

8. BUSINESS CASE:

11. REVENUE IMPACT:

12. PERFORMANCE MEASURES:

14. IMPLEMENTATION PLAN:

15. RECOMMENDATION

a) Approve a provincial guarantee to the OPG Financing Entity under the terms set out in Appendix;

b) Note the Minister of Finance will sign a Section 28, approving a contingent liability.

TREASURY BOARD / MANAGEMENT BOARD OF CABINET
REQUEST ASSESSMENT NOTE

Ministry:	Energy
Meeting Date:	September 12, 2017 (TBC)
Agenda Class:	
Last reviewed by: NA	**Tracking to:** Cabinet (September 13, 2017)

[

SUBMISSION TITLE:	Ontario Fair Hydro Plan Update and Provincial Guarantee

I. DECISION BEFORE THE BOARD

- [Energy item…Receive a report back…]
- Whether the Government of Ontario should provide a guarantee to the OPG Financing Entity and its prospective debt holders~~,~~ ~~providing~~ that under certain circumstances, the Province would assume the debt ~~funding~~ obligations of the Financing Entity.

Commented [JK1]: TBD - how Energy structures their submission.

Commented [JK2]: May want to make consistent throughout, i.e. debt or funding.

II. RECOMMENDATIONS:

• [Energy item… Receive a report back…]	*[Receive]*
• Provide a guarantee to the OPG Financing Entity under the terms set out in Appendix C	*Approve*

III. FINANCIAL SUMMARY

$ Millions	**2013-14**	**2014-15**	**2015-16**
Initiative cost requested	0.0	0.0	0.0
Initiative cost recommended	0.0	0.0	0.0
Recommended program base	0.0	0.0	0.0
Offset Recommended (Specify Ministry/Program)	0.0	0.0	0.0
Total Fiscal Impact	0.0	0.0	0.0

IV. KEY COMMENTS AND CONSIDERATIONS

[Energy item… report back…]

- To purchase the regulatory asset from IESO, the OPG Financing Entity ("Financing Entity") must borrow from the capital markets; however, OPG's financial advisors ~~investors~~ have indicated that without adequate protection against risk, the debt would not be financeable or be reflected in higher financing costs, to be passed on to the ratepayers.
- OPG is requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

- Certain events that ~~would~~ negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:
  - Decisions by the Legislative Assembly, i.e., repeal of the *Ontario Fair Hydro Plan Act, 2017*, or amendments or new legislation that adversely affect the Financing Entity;
  - A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
  - Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

- The Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

- The guarantee would continue until all obligations of the Financing Entity are fully discharged.

Risks:

- If the guarantee is not approved, the Financing Entity would either be ~~is unlikely to be~~ unable ~~able~~ to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be ~~materially~~ greater than it otherwise would be~~.~~

- ~~—~~If the guarantee is approved, the Government of Ontario takes on a contingent liability. ~~.~~The amount of the liability will increase over the duration of the Fair Hydro Plan and ~~, equal to the~~ peak at ~~accumulated debt,~~an estimated~~.~~ ~~at~~ about $24B to $26B in Energy's Cabinet Submission in March 2017. In the event the guarantee is triggered the Province's net debt will increase by an amount equal to the contingent liability at that point in time. ~~—, Likewise, t~~The Province's interest payments will also increase by amount equal to the weighted average cost of the debt it has assumed under the ~~.~~guarantee. While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense the worst case scenario would be the Province assuming the debt at its peak. ~~If so, IOD expense will increase anywhere between $0.8B and $1.3B per annum.~~ ~~and associated interest payments, estimated at [x].. Should the provincial guarantee be triggered by one of the events set out above, the fiscal impact to the Province would be [xxx].~~
- It is important to note that if the guarantee is triggered for the Province to pay down the debt it assumes as well as minimize the fiscal impact from the associated IOD expense, the other provisions of the Fair Hydro Plan including the Clean Energy Adjustment need to continue. If not, the incremental IOD expense impacts the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

Commented [KK3]: Carlos, Jim to review this sentence for accuracy.

Commented [JK4R3]: Suggest delete "materially".

Commented [KK5]: Ron's sensitivity analysis presents a peak that ranges between $24 to $26 billion. You might want to therefore, provide a range as opposed to a single number.

Commented [JK6]: Suggest delete - Rather avoid mentioning these estimates. If to leave it in, suggest the qualifier.

Commented [KK7]: Again taken from the sensitivity analysis provided by Ron.

Commented [JK8]: Suggest delete – the Province's interest cot would not likely be at the conservative rate estimate used by Energy at the time of their CabSub.

Commented [SK89]: Not sure what this means.

If the guarantee is triggered, does the Province just assume the debt rather than paying it down?

Commented [JK10R9]: Agreed that this bullet could be clarified

Date:		**Log number:**	
Branch / Division:			

APPENDIX A: PROPOSED MINUTE

i) Approve a provincial guarantee to the OPG Financing Entity under the terms set out in Appendix C.

ii) Note the Minister of Finance will sign a Section 28, approving a contingent liability [xxx]

DRAFT

FINANCIAL IMPACTS: CHANGES TO EXPENSE AND REVENUE					TABLE B1
		Fiscal Plan Basis			*Appropriations Basis*
$ Millions		**2013-14**	**2014-15**	**2015-16**	**2013-14**
Initiative cost recommended		0.0000	0.0000	0.0000	
Expense changes:					
Operating item	Oper	0.0000	0.0000	0.0000	0.0000
Capital item	Cap	0.0000	0.0000	0.0000	00000
Revenue changes:					
Revenue increase/offset		0.0000	0.0000	0.0000	
Revenue decrease		0.0000	0.0000	0.0000	
Total Fiscal Impact (draw from c-funds)		**0.0000**	**0.0000**	**0.0000**	**0.0000**

Commented [KK11]: Assuming Ron and staff are ok, you may want to use the numbers in the sensitivity analysis and provide a range in each instance.

Commented [SK812R11]: Would numbers be needed if the contingent liability is not yet exercised (eg. the sensitivity numbers above were on a worst case situation). I assume this table is for actual allocations for potential initiatives.

Unclear if other contingent liability requests have Fiscal Plan numbers assigned to them.

Commented [JK13R11]: Agree with Shajee.

DRAFT

APPENDIX C: SCHEDULES

Provincial Protection and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act.*

Change in Law Guarantee	
Guarantor:	The Province of Ontario
Guarantee Activation Events:	Any of the following would constitute a Guarantee Activation Event: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act or any Regulation made thereunder; (B) the Legislative Assembly of Ontario causing to come into force any statute (including any amendment to the Act or a Regulation made thereunder), or causing to come into force or making any order-in-council or regulation, or causing to come into force any other discriminatory action (including by way of any order by the Ontario Energy Board), in any case, in a way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected; (C) the Legislative Assembly of Ontario directly or indirectly amending the Guarantee or any of the financing transaction agreements without the agreement of the Financing Entity; (D) a court of competent jurisdiction (i) declares any funding obligations of the Financing Entity to be invalid or unenforceable or (ii) in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that adversely affects the rights and

DRAFT

	interests of the Financing Entity, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its funding obligations on the same basis as before such judgement; or (E) there is a change in the organization, structure or operations of the IESO or a change in the electricity market structure or operations in any way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected **[NTD: Alternatively, with respect to the IESO servicing obligations, include the Servicing Guarantee language with respect to the IESO that was included in the last mark-up of the term sheet received from the Province.]**
Guarantee:	Upon the occurrence of a Guarantee Activation Event, the Guarantor shall immediately assume and pay when due (without acceleration) all of the obligations of the Financing Entity. The obligations of the Financing Entity include its funding obligations as well as any other obligation the Financing Entity has related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commissions
Term:	The Guarantee will continue for as long as the Financing Entity has any outstanding financing or other contractual obligations and until such obligations have all been paid in full or otherwise satisfied

DRAFT

Approval Requirement:	The guarantee agreement containing the terms and conditions contemplated by this term sheet shall be entered into prior to the Financing Entity incurring its first funding obligation. The Province shall enter into the guarantee based on forms of program and series financing documents required for each financing transaction (e.g., form of supplemental indenture). As long as the financing transaction documents are generally consistent with the agreed upon form, the Province's specific approval for specific funding obligations incurred by the Financing Entity will not be required. Subsequent approval is only needed if the form of such documents are materially changed. For greater certainty, deal specific terms (such as tenor, pricing, etc) shall not be considered a change in the form of transaction and series documents
FIPPA:	The parties will acknowledge that the Guarantor will be bound by the Freedom of Information and Protection of Privacy Act (Ontario) and that any information provided to the Guarantor, or any agent or representative of the Guarantor in connection with the Guarantee may be subject to disclosure in accordance with the act or as otherwise required by law
Representations and Warranties:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Governing Law:	Province of Ontario

Thanks very much for these comments Ken.

Ron, would be very grateful if your staff could add the ranges from your sensitivity analysis to the financial tables.

And, Gadi has asked that we send this to Cindy for comment tomorrow, so if I could please ask for **comments by 10:00am tomorrow morning**, instead of noon, that would be much appreciated.

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

[Energy item… report back…]

- To purchase the regulatory asset from IESO, the OPG Financing Entity must borrow from the capital markets; however, OPG's financial advisors ~~investors~~ have indicated that without adequate protection against risk, the debt would not be financeable.
- OPG is requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

- Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:
  - Decisions by the Legislative Assembly, i.e., repeal of the *Ontario Fair Hydro Plan Act, 2017*, or amendments or new legislation that adversely affect the Financing Entity;
  - A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
  - Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

- The Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

- The guarantee would continue until all obligations of the Financing Entity are fully discharged.

Risks:

- If the guarantee is not approved, the Financing Entity would either be ~~is unlikely to be~~ unable ~~able~~ to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be materially greater than it otherwise would be .

- ~~If~~ If the guarantee is approved, the Government of Ontario takes on a contingent liability. The amount of the liability will increase over the duration of the Fair Hydro Plan and ~~, equal to the~~ peak at ~~accumulated debt,~~an estimated ~~at~~ $24B to $26B. In the event the guarantee is triggered the Province's net debt will increase by an amount equal to the contingent liability at that point in time. ~~,~~Likewise, the Province's interest payments will also increase by amount equal to the weighted average cost of the debt it has assumed under the ~~-~~guarantee. While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense will increase anywhere between $0.8B and $1.3B per annum. ~~and associated interest payments, estimated at [x].. Should the provincial guarantee be triggered by one of the events set out above, the fiscal impact to the Province would be [xxx].~~
- It is important to note that if the guarantee is triggered for the Province to pay down the debt it assumes as well as minimize the fiscal impact from the associated IOD expense, the other provisions of the Fair Hydro Plan including the Clean Energy Adjustment need to continue. If not, the incremental IOD expense impacts the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

Commented [KK1]: Carlos, Jim to review this sentence for accuracy.

Commented [KK2]: Ron's sensitivity analysis presents a peak that ranges between $24 to $26 billion. You might want to therefore, provide a range as opposed to a single number.

Commented [KK3]: Again taken from the sensitivity analysis provided by Ron.

DRAFT

APPENDIX C: SCHEDULES

Provincial Protection and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act.*

Change in Law Guarantee	
Guarantor:	The Province of Ontario
Guarantee Activation Events:	Any of the following would constitute a Guarantee Activation Event: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act or any Regulation made thereunder; (B) the Legislative Assembly of Ontario causing to come into force any statute (including any amendment to the Act or a Regulation made thereunder), or causing to come into force or making any order-in-council or regulation, or causing to come into force any other discriminatory action (including by way of any order by the Ontario Energy Board), in any case, in a way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected; (C) the Legislative Assembly of Ontario directly or indirectly amending the Guarantee or any of the financing transaction agreements without the agreement of the Financing Entity; (D) a court of competent jurisdiction (i) declares any funding obligations of the Financing Entity to be invalid or unenforceable or (ii) in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that adversely affects the rights and

DRAFT

	interests of the Financing Entity, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its funding obligations on the same basis as before such judgement; or (E) there is a change in the organization, structure or operations of the IESO or a change in the electricity market structure or operations in any way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected **[NTD: Alternatively, with respect to the IESO servicing obligations, include the Servicing Guarantee language with respect to the IESO that was included in the last mark-up of the term sheet received from the Province.]**
Guarantee:	Upon the occurrence of a Guarantee Activation Event, the Guarantor shall immediately assume and pay when due (without acceleration) all of the obligations of the Financing Entity. The obligations of the Financing Entity include its funding obligations as well as any other obligation the Financing Entity has related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commissions
Term:	The Guarantee will continue for as long as the Financing Entity has any outstanding financing or other contractual obligations and until such obligations have all been paid in full or otherwise satisfied

DRAFT

Approval Requirement:	The guarantee agreement containing the terms and conditions contemplated by this term sheet shall be entered into prior to the Financing Entity incurring its first funding obligation. The Province shall enter into the guarantee based on forms of program and series financing documents required for each financing transaction (e.g., form of supplemental indenture). As long as the financing transaction documents are generally consistent with the agreed upon form, the Province's specific approval for specific funding obligations incurred by the Financing Entity will not be required. Subsequent approval is only needed if the form of such documents are materially changed. For greater certainty, deal specific terms (such as tenor, pricing, etc) shall not be considered a change in the form of transaction and series documents
FIPPA:	The parties will acknowledge that the Guarantor will be bound by the Freedom of Information and Protection of Privacy Act (Ontario) and that any information provided to the Guarantor, or any agent or representative of the Guarantor in connection with the Guarantee may be subject to disclosure in accordance with the act or as otherwise required by law
Representations and Warranties:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Governing Law:	Province of Ontario

Subject: TBMBC Submission Provincial Guarantee (OFA) 08162017.doc

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

Cc: John Kim <John.Kim@ofina.on.ca>
Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Thank you both for weighing in on this, and Ron, for flagging that potential question from TBS. We'll be ready with an explanation if we do get pushed for an offset. I've asked CQSD to let me know who the TBS analyst is – they're likely more familiar with contingent liabilities than CQSD. Also, Ron, I haven't seen an assessment note yet, but I expect that TBS has the v7. draft circulated yesterday. I'll ask Anthony to confirm tomorrow.

Subject: Re: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Ken,

Agreed that the submission covers those points. The issue is if TB or TBS would want to identify a ministry as responsible for an offset, in that eventuality. As noted, given the magnitude and nature of the potential triggers, I would not be expecting TB to require an offset (which I read to be CQSD's implied concern on which ministry or ministries would be identified as needing to provide an offset in that eventuality).

Ron

From: Ken Kandeepan
Sent: September 12, 2017 1:06 PM
To: Ronald Kwan; Anna Strathy
Cc: John Kim
Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Ron

When you refer to offsets I guess you mean an offset to any fiscal impact that may arise from the crystallization of a liability. Note that the mere crystallization of a liability has no fiscal impact (only impacts net debt) unless its accompanied by an increase in expenses which is usually in the form of an increase to the Province's IOD.

The submission currently addresses this issue by pointing out that the invocation of the guarantee, or as it is now called, the assumption, will impact both net debt and IOD. The submission also goes

on to indicate that unless the CEA revenue stream diverts to the Province from the Financing Entity, upon assumption, there will be a fiscal impact from the incremental IOD.

The submission goes on to state that the net effect of the assumption sans the CEA (if that is will of the Government in power at that time) will be the taxpayer taking on a debt burden incurred for the benefit of the ratepayer, with very limited recourse for repayment.

Hope that satisfies your concern, I am meeting with Cindy next week Monday to ensure that both OPCD and the OFA are on the same page re the impact of the assumption.

Thanks

Subject: Re: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Anna,

Just a comment.

While I would not expect it in this case, given the size and what the trigger would be, TB sometimes requires submitting ministries to acknowledge finding offsets, should contingent liabilities crystallize.

So, not held by a particular ministry for accounting, but sometimes a Minuted point and ministry responsibility. As stated, though, I would not expect it in this case. Might be good to confirm with the relevant TBS analyst. (Who would that be, and has TBS started drafting an assessment note?)

Ron

Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Anna,

Here are the updates I'm requesting to the submission.

Pg 1 need to be consistent under points (a) and (b) should read always as Minister of Finance and Minister of Energy through the entire document.

Pg 5 Recommendation should read; The Ministry of Finance and Ministry of Energy requests that Treasury Board/Management Board of Cabinet: currently says Approve, I thought we were using "Authorize" same as pg. 1

Also for the minuting, as opposed to referencing an Appendix, we should say under the terms set out under the Change of Law Assumption Agreement, Indicative Term Sheet.

Questions, in the essence of time I will have a couple more questions later today… but,

Who is holding the contingent liability MOE or MOF ?

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a

Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Hi Anna,

Just a comment.

While I would not expect it in this case, given the size and what the trigger would be, TB sometimes requires submitting ministries to acknowledge finding offsets, should contingent liabilities crystallize.

So, not held by a particular ministry for accounting, but sometimes a Minuted point and ministry responsibility. As stated, though, I would not expect it in this case. Might be good to confirm with the relevant TBS analyst. (Who would that be, and has TBS started drafting an assessment note?)

Jonathan Tekle (CAB) <Jonathan.Tekle@ontario.ca>
Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Anna,

Here are the updates I'm requesting to the submission.

Pg 1 need to be consistent under points (a) and (b) should read always as Minister of Finance and Minister of Energy through the entire document.

Pg 5 Recommendation should read; The Ministry of Finance and Ministry of Energy requests that Treasury Board/Management Board of Cabinet: currently says Approve, I thought we were using "Authorize" same as pg. 1

Also for the minuting, as opposed to referencing an Appendix, we should say under the terms set out under the Change of Law Assumption Agreement, Indicative Term Sheet.

Questions, in the essence of time I will have a couple more questions later today… but,

Who is holding the contingent liability MOE or MOF ?

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a

final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Thank you both for weighing in on this, and Ron, for flagging that potential question from TBS. We'll be ready with an explanation if we do get pushed for an offset. I've asked CQSD to let me know who the TBS analyst is – they're likely more familiar with contingent liabilities than CQSD. Also, Ron, I haven't seen an assessment note yet, but I expect that TBS has the v7. draft circulated yesterday. I'll ask Anthony to confirm tomorrow.

Subject: Re: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Ken,

Agreed that the submission covers those points. The issue is if TB or TBS would want to identify a ministry as responsible for an offset, in that eventuality. As noted, given the magnitude and nature of the potential triggers, I would not be expecting TB to require an offset (which I read to be CQSD's implied concern on which ministry or ministries would be identified as needing to provide an offset in that eventuality).

Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Ron

When you refer to offsets I guess you mean an offset to any fiscal impact that may arise from the crystallization of a liability. Note that the mere crystallization of a liability has no fiscal impact (only impacts net debt) unless its accompanied by an increase in expenses which is usually in the form of an increase to the Province's IOD.

The submission currently addresses this issue by pointing out that the invocation of the guarantee, or as it is now called, the assumption, will impact both net debt and IOD. The submission also goes on to indicate that unless the CEA revenue stream diverts to the Province from the Financing Entity, upon assumption, there will be a fiscal impact from the incremental IOD.

The submission goes on to state that the net effect of the assumption sans the CEA (if that is will of the Government in power at that time) will be the taxpayer taking on a debt burden incurred for the benefit of the ratepayer, with very limited recourse for repayment.

Hope that satisfies your concern, I am meeting with Cindy next week Monday to ensure that both OPCD and the OFA are on the same page re the impact of the assumption.

Thanks

Ken k

Subject: Re: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Anna,

Just a comment.

While I would not expect it in this case, given the size and what the trigger would be, TB sometimes requires submitting ministries to acknowledge finding offsets, should contingent liabilities crystallize.

So, not held by a particular ministry for accounting, but sometimes a Minuted point and ministry responsibility. As stated, though, I would not expect it in this case. Might be good to confirm with the relevant TBS analyst. (Who would that be, and has TBS started drafting an assessment note?)

Ron

Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Anna,

Here are the updates I'm requesting to the submission.

Pg 1 need to be consistent under points (a) and (b) should read always as Minister of Finance and Minister of Energy through the entire document.

Pg 5 Recommendation should read; The Ministry of Finance and Ministry of Energy requests that Treasury Board/Management Board of Cabinet: currently says Approve, I thought we were using "Authorize" same as pg. 1

Also for the minuting, as opposed to referencing an Appendix, we should say under the terms set out under the Change of Law Assumption Agreement, Indicative Term Sheet.

Questions, in the essence of time I will have a couple more questions later today… but,

Who is holding the contingent liability MOE or MOF ?

Thanks,
Anthony

Subject: TB/MBC Submission on Assumption Agreement - CEO Approved

Good afternoon,

FYI, please find attached, the CEO-approved TB Submission for the Change of Law Assumption Agreement (no longer a "Support Agreement") tracking to TB/MBC for the Sep 26 meeting. This version incorporates input received from Energy.

We can confirm that both Ministers of Energy and Finance will be asked to sign the TB submission since both Ministers will recommend the OIC and both will sign the Assumption Agreement.

Please don't hesitate to contact me should you have any questions or comments. This version is tracking for CAO/DM/Minister approval in both Ministries.

Thanks, Anna

Subject: TB/MBC Submission on Assumption Agreement - CEO Approved

Good afternoon,

FYI, please find attached, the CEO-approved TB Submission for the Change of Law Assumption Agreement (no longer a "Support Agreement") tracking to TB/MBC for the Sep 26 meeting. This version incorporates input received from Energy.

We can confirm that both Ministers of Energy and Finance will be asked to sign the TB submission since both Ministers will recommend the OIC and both will sign the Assumption Agreement.

Please don't hesitate to contact me should you have any questions or comments. This version is tracking for CAO/DM/Minister approval in both Ministries.

Thanks, Anna

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a

Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Hi Ron

When you refer to offsets I guess you mean an offset to any fiscal impact that may arise from the crystallization of a liability. Note that the mere crystallization of a liability has no fiscal impact (only impacts net debt) unless its accompanied by an increase in expenses which is usually in the form of an increase to the Province's IOD.

The submission currently addresses this issue by pointing out that the invocation of the guarantee, or as it is now called, the assumption, will impact both net debt and IOD. The submission also goes on to indicate that unless the CEA revenue stream diverts to the Province from the Financing Entity, upon assumption, there will be a fiscal impact from the incremental IOD.

The submission goes on to state that the net effect of the assumption sans the CEA (if that is will of the Government in power at that time) will be the taxpayer taking on a debt burden incurred for the benefit of the ratepayer, with very limited recourse for repayment.

Hope that satisfies your concern, I am meeting with Cindy next week Monday to ensure that both OPCD and the OFA are on the same page re the impact of the assumption.

Thanks

Ken k

Subject: Re: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Anna,

Just a comment.

While I would not expect it in this case, given the size and what the trigger would be, TB sometimes requires submitting ministries to acknowledge finding offsets, should contingent liabilities crystallize.

So, not held by a particular ministry for accounting, but sometimes a Minuted point and ministry responsibility. As stated, though, I would not expect it in this case. Might be good to confirm with the relevant TBS analyst. (Who would that be, and has TBS started drafting an assessment note?)

Ron

Hi Anthony, will make those three updates you've requested. With respect to your question:

Contingent liabilities are not held by a particular ministry, rather they are presented in the Notes to the Consolidated Financial Statements in the Public Accounts of the Province as a contingent liability of the Province as a whole.

Thank you, Ken, for the wording.

Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Anna,

Here are the updates I'm requesting to the submission.

Pg 1 need to be consistent under points (a) and (b) should read always as Minister of Finance and Minister of Energy through the entire document.

Pg 5 Recommendation should read; The Ministry of Finance and Ministry of Energy requests that Treasury Board/Management Board of Cabinet: currently says Approve, I thought we were using "Authorize" same as pg. 1

Also for the minuting, as opposed to referencing an Appendix, we should say under the terms set out under the Change of Law Assumption Agreement, Indicative Term Sheet.

Questions, in the essence of time I will have a couple more questions later today… but,

Who is holding the contingent liability MOE or MOF ?

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Subject:	RE: TB/MBC Submission on Assumption Agreement - recommendations and questions
Date:	Tuesday, September 12, 2017 12:30:40 PM

Hi Anna,

Here are the updates I'm requesting to the submission.

Pg 1 need to be consistent under points (a) and (b) should read always as Minister of Finance and Minister of Energy through the entire document.

Pg 5 Recommendation should read; The Ministry of Finance and Ministry of Energy requests that Treasury Board/Management Board of Cabinet: currently says Approve, I thought we were using "Authorize" same as pg. 1

Also for the minuting, as opposed to referencing an Appendix, we should say under the terms set out under the Change of Law Assumption Agreement, Indicative Term Sheet.

Questions, in the essence of time I will have a couple more questions later today… but,

Who is holding the contingent liability MOE or MOF ?

Thanks,
Anthony

Subject: TB/MBC Submission on Assumption Agreement - CEO Approved

Good afternoon,

FYI, please find attached, the CEO-approved TB Submission for the Change of Law Assumption Agreement (no longer a "Support Agreement") tracking to TB/MBC for the Sep 26 meeting. This version incorporates input received from Energy.

We can confirm that both Ministers of Energy and Finance will be asked to sign the TB submission since both Ministers will recommend the OIC and both will sign the Assumption Agreement.

Please don't hesitate to contact me should you have any questions or comments. This version is tracking for CAO/DM/Minister approval in both Ministries.

Thanks, Anna

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the

agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Cc: John Kim <John.Kim@ofina.on.ca>
Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Thank you both for weighing in on this, and Ron, for flagging that potential question from TBS. We'll be ready with an explanation if we do get pushed for an offset. I've asked CQSD to let me know who the TBS analyst is – they're likely more familiar with contingent liabilities than CQSD. Also, Ron, I haven't seen an assessment note yet, but I expect that TBS has the v7. draft circulated yesterday. I'll ask Anthony to confirm tomorrow.

Subject: Re: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Ken,

Agreed that the submission covers those points. The issue is if TB or TBS would want to identify a ministry as responsible for an offset, in that eventuality. As noted, given the magnitude and nature of the potential triggers, I would not be expecting TB to require an offset (which I read to be CQSD's implied concern on which ministry or ministries would be identified as needing to provide an offset in that eventuality).

Ron

From: Ken Kandeepan
Sent: September 12, 2017 1:06 PM
To: Ronald Kwan; Anna Strathy
Cc: John Kim
Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Ron

When you refer to offsets I guess you mean an offset to any fiscal impact that may arise from the crystallization of a liability. Note that the mere crystallization of a liability has no fiscal impact (only impacts net debt) unless its accompanied by an increase in expenses which is usually in the form of an increase to the Province's IOD.

The submission currently addresses this issue by pointing out that the invocation of the guarantee, or as it is now called, the assumption, will impact both net debt and IOD. The submission also goes on to indicate that unless the CEA revenue stream diverts to the Province from the Financing Entity, upon assumption, there will be a fiscal impact from the incremental IOD.

The submission goes on to state that the net effect of the assumption sans the CEA (if that is will of the Government in power at that time) will be the taxpayer taking on a debt burden incurred for the benefit of the ratepayer, with very limited recourse for repayment.

Hope that satisfies your concern, I am meeting with Cindy next week Monday to ensure that both OPCD and the OFA are on the same page re the impact of the assumption.

Thanks

Ken k

Subject: Re: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Anna,

Just a comment.

While I would not expect it in this case, given the size and what the trigger would be, TB sometimes requires submitting ministries to acknowledge finding offsets, should contingent liabilities crystallize.

So, not held by a particular ministry for accounting, but sometimes a Minuted point and ministry responsibility. As stated, though, I would not expect it in this case. Might be good to confirm with the relevant TBS analyst. (Who would that be, and has TBS started drafting an assessment note?)

Ron

On Sep 12, 2017, at 12:34 PM, Anna Strathy <Anna.Strathy@ofina.on.ca> wrote:

> Hi Anthony, will make those three updates you've requested. With respect to your question:

Contingent liabilities are not held by a particular ministry, rather they are presented in the Notes to the Consolidated Financial Statements in the Public Accounts of the Province as a contingent liability of the Province as a whole.

Thank you, Ken, for the wording.

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two

weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Anna

Subject: TB/MBC Submission on Provincial Guarantee MOE role and sign-off

Hi Anna,

I have a few questions as well that could impact the answers you are asking .

Point 1. The submission as its stands is a request under an OIC under FHPA that resides under MOE. The request is for both Ministers points (a) and (b), the Minister from MOE would need to sign the submission, as far as I can see.

I have had no contact with MOE on this submission. There were discussions on how this submission would be brought forward with MOE earlier, the only outcome I am aware was that this would be an MOF led submission. The area within MOF that worked with MOE on this, should provide additional information in regards to point 1 (What has been agreed upon with MOE ?).

Point 2. The MOF DM and Minister briefing are already scheduled for next Tuesday September 12, 2017. We would require a sign-off by the Minister of Energy before the briefing, depending on the answer in point 1.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else

that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: TB/MBC Submission on Assumption Agreement - CEO Approved

Good afternoon,

FYI, please find attached, the CEO-approved TB Submission for the Change of Law Assumption Agreement (no longer a “Support Agreement”) tracking to TB/MBC for the Sep 26 meeting. This version incorporates input received from Energy.

We can confirm that both Ministers of Energy and Finance will be asked to sign the TB submission since both Ministers will recommend the OIC and both will sign the Assumption Agreement.

Please don't hesitate to contact me should you have any questions or comments. This version is tracking for CAO/DM/Minister approval in both Ministries.

Thanks, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but we are hoping to have your comments (even preliminary comments) by noon tomorrow. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Subject:	RE: Term Sheet - Provincial Support Agreement relating to the Fair Hydro Trust
Date:	Tuesday, April 25, 2017 10:01:02 AM

Hi Mike,

Would you like to have a call a bit later this morning, i.e. 11 or so to discuss the Support Agreement and any further information you may have obtained about it. After that we can follow up further with Energy Legal on it and maybe Blakes who is the province's outside counsel.

The range of beneficiaries as outlined in the draft term sheet is very broad. I would think that if the Province were to provide a financial guarantee it would be with respect to obligations arising under specific agreements, i.e. payment of principal interest on bonds, notes, credit facility and the guarantee would be specifically written in favour of the lenders, or the swap counterparties under a specific swap agreement or transaction. For example "credit enhancers" seems to be a pretty general term to be using as a "beneficiary" of a provincial guarantee. It's a bit difficult to provide comments on the guarantee scope when we are not familiar with the proposed transaction. Also, as noted we don't have experience with the Performance Guarantee aspect and how that would work.

Also, footnote 2 references a requirement that would be in regulations. We did note an unusual provision in the draft legislation which references the Province not taking any action that might impair the investment asset. I think this sort of provision is found in the U.S. state legislation authorizing the Duke Power and Long Island Power Authority transactions that are examples of similar transactions according to Energy.

Subject: Term Sheet - Provincial Support Agreement relating to the Fair Hydro Trust

Mike:

Further to our discussion last week, please find attached the draft term sheet relating to the Provincial Support. In this draft the Province will assume the obligations of the debt under certain conditions. The plan is to send this document to the Dealers for their input once we get comments or concurrence from your group. Stu Preston will coordinate the discussions with the Dealers on this issue from our side. Would it be yourself or someone else from your group addressing this issue from the OFA perspective? I expect there will be some back and forth on this issue and eventually rating agency input as well.

John

Hi Malle,

I had heard last week that there was no Energy weekly tomorrow. Perhaps there's another weekly referred to for one of the work streams?

At last week's Energy weekly, OPG distributed a "Gantt chart" that may be of interest.

Subject: RE: Updated Draft Provincial Support Discussion Document

Hi,

I just wanted to follow up on this and see if there is an appetite to discuss this amongst our smaller group at this point. Energy is briefing up on this draft and we probably should meet with them and our outside counsel at Blakes soon to come to a decision about how this draft will be communicated to the other parties to this transaction.

Subject: Updated Draft Provincial Support Discussion Document

Please find attached a markup of the proposal from OPG regarding the Provincial Support Agreeement.

This markup is the result of discussions between us at MOF Legal, lawyers from Energy Legal and the Province's external counsel at Blakes.

The changes are significant and we would like to get your feedback on our proposed approach. Perhaps we can have a discussion first with this group, and then a broader discussion with the Energy team and Stephen Ashbourne from Blakes.

Please let us know when you have had a chance to review and are available to discuss.

Subject: Re: material for tomorrow's meetings

Hi Boafoa,

We're still finalizing materials for tomorrow's meetings, incorporating edits from our MO. We should have something to share later today.

Just for clarity there will be two decks from Energy (one on Quebec and one on the LTEP price curve) and a one pager from the OFA/MOF on the Provincial Guarantee. We haven't seen a draft of the one pager yet.

Thanks,
Martin

PROVINCIAL GUARANTEE AND OTHER FINANCING ISSUES

ISSUE

To support the Fair Hydro Plan, OPG is requesting that the Government of Ontario provide a guarantee to the OPG Financing Entity and prospective debt holders such that the funding obligations of the Financing Entity will be met by the Province under certain circumstances.

TERMS OF THE GUARANTEE

Events that would activate the Provincial Guarantee:

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments that adversely affect the OPG Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

Guarantee:

- The Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers (i.e., trustees, auditors).
- The Provincial guarantee will continue until all obligations of the Financing Entity are fully discharged.

Recommendation:

- Pending review by MOF Legal, Energy Legal and external counsel (Blake's), recommend TB/MBC approve the terms of the Guarantee as set out in the term sheet and further detailed in the draft guarantee document to be provided by OPG.

OTHER FINANCING/ACCOUNTING RISKS TO BE RESOLVED

Commingling Risk:

- Refers to the risk associated with unrated/below investment grade Local Distribution Companies (LDCs) not remitting collections from ratepayers to the IESO.
- IESO to provide either a Letter of Credit or assume responsibility for this risk amounting to the expected Clean Energy Adjustment from these LDCs over the

next 45-60 days. OPG estimates the Letter of Credit to be approximately $50 million.
- IESO expressed concerns both from a mandate and accounting perspective on issuing either a Letter of Credit or assuming responsibility for the commingling risk.

Warehouse Takeout Risk:

- Refers to the risk associated with the Financing Entity unable to issue debt in order to pay down the short term financing provided by its banks.
- There may be potential costs to the ratepayer in the form of higher interest rates from the step–up pricing clause in the Financing Entity's agreement with the banks providing the short term financing.

NEXT STEPS

- MOF Legal, Energy Legal and external counsel (Blake's) to review term sheet and draft guarantee document
- OPG/IESO to consider outstanding financing/accounting issues
- TB/MBC decision on Provincial Guarantee (September TBC)

Hi Boafoa,

We're still finalizing materials for tomorrow's meetings, incorporating edits from our MO. We should have something to share later today.

Just for clarity there will be two decks from Energy (one on Quebec and one on the LTEP price curve) and a one pager from the OFA/MOF on the Provincial Guarantee. We haven't seen a draft of the one pager yet.

Thanks,
Martin

Subject: material for tomorrow's meetings

Good morning Hillary

Just want to confirm that we will receive material for distribution for tomorrow's energy related meetings. You will notice that the meeting time changed. These changes were requested by Andrew Bevan's office to accommodate his schedule. Thanks
Boafoa

Provincial Protection and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act.*

Change in Law Guarantee	
Guarantor:	The Province of Ontario
Guarantee Activation Events:	Any of the following would constitute a Guarantee Activation Event: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act or any Regulation made thereunder; (B) the Legislative Assembly of Ontario causing to come into force any statute (including any amendment to the Act or a Regulation made thereunder), or causing to come into force or making any order-in-council or regulation, or causing to come into force any other discriminatory action (including by way of any order by the Ontario Energy Board), in any case, in a way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected; (C) the Legislative Assembly of Ontario directly or indirectly amending the Guarantee or any of the financing transaction agreements without the agreement of the Financing Entity; (D) a court of competent jurisdiction (i) declares any funding obligations of the Financing Entity to be invalid or unenforceable or (ii) in a final and non-appealable

	judgement determines that all or a portion of the Act is *ultra vires* in a way that adversely affects the rights and interests of the Financing Entity, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its funding obligations on the same basis as before such judgement; or (E) there is a change in the organization, structure or operations of the IESO or a change in the electricity market structure or operations in any way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected **[NTD: Alternatively, with respect to the IESO servicing obligations, include the Servicing Guarantee language with respect to the IESO that was included in the last mark-up of the term sheet received from the Province.]**
Guarantee:	Upon the occurrence of a Guarantee Activation Event, the Guarantor shall immediately assume and pay when due (without acceleration) all of the obligations of the Financing Entity. The obligations of the Financing Entity include its funding obligations as well as any other obligation the Financing Entity has related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commissions
Term:	The Guarantee will continue for as long as the Financing Entity has any outstanding financing or other contractual obligations and until such obligations have all been paid in full or otherwise satisfied

Approval Requirement:	The guarantee agreement containing the terms and conditions contemplated by this term sheet shall be entered into prior to the Financing Entity incurring its first funding obligation. The Province shall enter into the guarantee based on forms of program and series financing documents required for each financing transaction (e.g., form of supplemental indenture). As long as the financing transaction documents are generally consistent with the agreed upon form, the Province's specific approval for specific funding obligations incurred by the Financing Entity will not be required. Subsequent approval is only needed if the form of such documents are materially changed. For greater certainty, deal specific terms (such as tenor, pricing, etc) shall not be considered a change in the form of transaction and series documents
FIPPA:	The parties will acknowledge that the Guarantor will be bound by the Freedom of Information and Protection of Privacy Act (Ontario) and that any information provided to the Guarantor, or any agent or representative of the Guarantor in connection with the Guarantee may be subject to disclosure in accordance with the act or as otherwise required by law
Representations and Warranties:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Governing Law:	Province of Ontario

Warehousing Takeout Risk and Servicing (Commingling) Risk *Note – these items are provided for information purposes only as these risks were included in the previous version of the term sheet as items that the Dealers/OPG were looking for the Province for protection against. The current proposals with respect to these items is described below. These do not contain any requirement for the Province to directly backstop these risks.*	
<u>Commingling Risk (applies to Warehouse as well as any Term transactions)</u>	
Commingling Risk Mitigant:	For any LDC which is not investment grade rated by each of the rating agencies which are rating the funding obligations (the "Non-Investment Grade LDCs"), either: (A) The IESO must post a Letter of Credit (L/C), or deposit funds in a Commingling Reserve Account in a quantum equal to the Commingling Risk Amount; or (B) The IESO, for so long as it is rated investment grade by the rating agencies which are rating the funding obligations, will assume responsibility for commingling risk by the LDCs and will agree to remit to the Financing Entity any clean energy adjustment amounts collected by the LDC, regardless of whether the LDC remitted those amounts to the IESO for remittance to the Financing Entity
Commingling Risk Amount:	An amount equal to the sum of the expected Clean Energy Adjustment collections from the Non-Investment Grade LDCs over the next [45-60] days
Commingling Risk Amount Reset Date:	Each settlement date for the Financing Entity (monthly)
Beneficiary:	The beneficiary of the L/C or the Commingling Reserve Account would be the Financing Entity and the Indenture Trustee for the benefit of the creditors of the Financing Entity. The Financing Entity and/or the Indenture Trustee would have the ability to draw down the L/C or draw on the Commingling Reserve Account for any clean energy adjustment amounts expected to be received from the IESO but which were not received due to those funds not being remitted from an LDC to the IESO for that period
L/C Provider:	An entity rated at least A+ (or equivalent)

Approvals:	The approach is subject to approval from the IESO, by the rating agencies rating the funding obligations of the Financing Entity and the risk management areas of the banks providing the warehouse facilities
Warehouse Takeout Risk	
Commitment Period for Warehouse[1]:	Expected to be 12-24 months
Takeout for Warehouse:	Expected to be every 3-6 months
Warehouse Default Event:	One of the events of default for the warehouse will be the failure to repay the warehouse facility at the end of the commitment term
Consequences of Warehouse Default Event:	If the Warehouse Default Event[2] described above occurs, all amounts funded through the warehouse would become immediately due and payable, subject to the Warehouse Default Payment Cap, and Default Pricing will be charged on any amounts funded through the warehouse facility
Default Pricing:	Step up in pricing to [x] until the moratorium period ends and thereafter stepping-up in increments of [y] every six months until the warehouse facility is repaid

[1] Please note that this is not intended to be an exhaustive list of terms for the warehouse facility, but rather is a summary of a few select terms that relate to the warehouse takeout risk.

[2] Note there may be other Warehouse Default Events beyond the takeout risk item described above. The consequences for a breach of these other Warehouse Default Events may be different than the one described above where the default is related to failure to takeout the warehouse facility by the end of the commitment period.

Warehouse Default Payment Cap:	For any given reference period following the occurrence of a Warehouse Default Event, the amount that shall be remitted to the Financing Entity for repayment of the warehouse facilities will be the sum of (x) the interest amount due on the warehouse facilities (which, for greater certainty will include any program fees) and (y) the lessor of: (a) The outstanding amount funded through the warehouse facilities; and (b) The maximum amount that can be charged for that period so that clean energy adjustments are equal to, but do not exceed, the fair allocation amount for such period.
Approval Requirement:	Subject to approval by the risk management areas of the banks providing the warehouse facilities which will in part depend on receipt of information on the fair allocation curve and an understanding of how long the "tail risk" could be following a Warehouse Default Event

Subject: Re: CEFD and MO Bi-weekly
Date: Friday, July 21, 2017 1:51:37 PM

Hi Scott,

Marianne asked about the status of the Provincial Support Agreement and if the Minister would need to be briefed and sign something during the summer.

Would you have time this afternoon to discuss the current status and timing.

Thanks,
Ron

I've been going on the assumption, pardon the slightly different use of that word, for the past few months that the Province immediately takes over the debt so that investors aren't at risk of a missed or delayed payment. If that's not possible under current legislation, we need TB to approve a solution that would be included in the Fall Budget Bill that allows us, and assures OPG, investors and the rating agencies, that they will continue to be paid if there is a triggering event, and that those payments will be on the same timelines as if there was no triggering event, unless I'm over interpreting what this means.

The purpose of having it in the term sheet is to identify this for OPG as an item which we may wish they include in their documentation with other parties to enable this option to be open. If this is happening in a change in law scenario the Province would likely give itself legislative authority to do this as part of the change in law, but we wanted to flag this now too so could we add "subject to obtaining the necessary authority" at the end of the paragraph beginning "In the event.." on p. 3. We haven't had a chance to fully analyze this at this point but think we should include this in the submission now.

Hi Gadi

We do have authority to provide a guarantee or indemnity which is a charge on the CRF so that the Province can pay when due to the investors. It is the part where the province actually replaces the financing entity more officially as the debtor ie the optional replacement part that requires some more analysis and whether that fits under the guarantee authority

Subject: Re: CEO Approved TB Submission for Change of Law Assumption Agreement

I don't think that I understand how this would work, and it strikes me as a very significant issue going to the heart of the value of what we had been calling a guarantee and have now rebranded as an assumption agreement.

How would investors get paid their principal and interest if we don't step in to take over the obligations in the case that the assumption agreement is triggered? I've been going on the assumption, pardon the slightly different use of that word, for the past few months that the Province immediately takes over the debt so that investors aren't at risk of a missed or delayed payment. If that's not possible under current legislation, we need TB to approve a solution that would be included in the Fall Budget Bill that allows us, and assures OPG, investors and the rating agencies, that they will continue to be paid if there is a triggering event, and that those payments will be on the same timelines as if there was no triggering event, unless I'm over interpreting what this means.

Thanks,
Gadi

Also, we had a further call with Blakes this afternoon regarding the optional replacement possibility and it is

possible that the Province might need some additional legal authority to directly assume the debt (as it may not be considered to be an indemnity or guarantee) but since this is optional for the Province, the Province could to obtain that authority in the future. The purpose of having it in the term sheet is to identify this for OPG as an item which we may wish they include in their documentation with other parties to enable this option to be open. If this is happening in a change in law scenario the Province would likely give itself legislative authority to do this as part of the change in law, but we wanted to flag this now too so could we add "subject to obtaining the necessary authority" at the end of the paragraph beginning "In the event.." on p. 3. Hi all,

Sorry about this, but I have a few comments on this version which I hope are not too late. I know that this is moving quickly.

2(a) Can we add the word "substantially" in this proposed minute? Also, as we know and was only discussed this morning, the term sheet doesn't include support for the sub debt yet. Should this be included into the version or should we await confirmation from OPCD.

2(b) The 2 last paragraphs should be deleted because the current OIC draft does not specify terms and conditions or a maximum liability as this will be left to the Ministers to determine.

p. 3 – second bullet point Should be "A court decision that declares the ability of the Financing Entity to receive amounts on its investment interest so it can pay its funding obligations to be invalid or unenforceable."

Same changes in Recommendation section.

Subject: RE: CEO Approved TB Submission for Change of Law Assumption Agreement

Hi all,

Sorry about this, but I have a few comments on this version which I hope are not too late. I know that this is moving quickly.

2(a) Can we add the word “substantially” in this proposed minute? Also, as we know and was only discussed this morning, the term sheet doesn’t include support for the sub debt yet. Should this be included into the version or should we await confirmation from OPCD.

2(b) The 2 last paragraphs should be deleted because the current OIC draft does not specify terms and conditions or a maximum liability as this will be left to the Ministers to determine.

p. 3 – second bullet point Should be “A court decision that declares the ability of the Financing Entity to receive amounts on its investment interest so it can pay its funding obligations to be invalid or unenforceable.”

Same changes in Recommendation section.

Anthony, Keley, Malle,

Please find attached, the CEO-approved TB Submission for the Assumption Agreement tracking to TB/MBC for the Sep 26 meeting. This version now incorporates input from Energy. I'm also attaching, for your briefing purposes, a deck (slightly revised from the one Keley prepared for the Minister of Energy's briefing two weeks ago).

Keley, could I ask you to please pass this version of the submission along to the Energy DMO for review?
Malle, we'll be looking for Legal sign-off tomorrow. Not sure if you or Michael will be signing off, but I'm happy to swing by 777 Bay at your convenience tomorrow with the approval package.
Anthony, I'll resend a scan with Legal sign-off once we have it.

Please don't hesitate to contact me should you have any questions.

Thanks, Anna

Anna Strathy

>
> How would investors get paid their principal and interest if we don't step in to take over the obligations in the case that the assumption agreement is triggered? I've been going on the assumption, pardon the slightly different use of that word, for the past few months that the Province immediately takes over the debt so that investors aren't at risk of a missed or delayed payment. If that's not possible under current legislation, we need TB to approve a solution that would be included in the Fall Budget Bill that allows us, and assures OPG, investors and the rating agencies, that they will continue to be paid if there is a triggering event, and that those payments will be on the same timelines as if there was no triggering event, unless I'm over interpreting what this means.

> Also, we had a further call with Blakes this afternoon regarding the optional replacement possibility and it is possible that the Province might need some additional legal authority to directly assume the debt (as it may not be considered to be an indemnity or guarantee) but since this is optional for the Province, the Province could to obtain that authority in the future. The purpose of having it in the term sheet is to identify this for OPG as an item which we may wish they include in their documentation with other parties to enable this option to be open. If this is happening in a change in law scenario the Province would likely give itself legislative authority to do this as part of the change in law, but we wanted to flag this now too so could we add "subject to obtaining the necessary authority" at the end of the paragraph beginning "In the event.." on p. 3. We haven't had a chance to fully analyze this at this point but think we should include this in the submission now.

Hi Matt,

Would you send me the revised deck and we can work on a slide.

That said, I believe the OIC requirement is in the draft TB submission that they seemed to have drawn on, and they should be very familiar with the requirements of the OFHP Act.

Ron

It would help remind the Minister of Energy that he'd be signing things too (presumably the OIC submission and the agreement(s) (and

what about the TB submission too?).

Also, I would suggest that the slide on the IESO and LC note that the proposal was from OPG and the IESO was going to review the proposal (unless Keley has now heard back from the IESO and the option is fine with them?).

Generally, then, it might be good to note the work-in-progress status.

And the next steps should include the requirement to go to LRC and Cabinet for the OIC too.

Also, is IGB planning on sharing this with MOF DMO, or Energy DMO, or both?

Hi Matt,

ENERGY has asked us to prepare a product for a Minister's briefing next week on the OFHP. They wanted a specific product on the Provincial Guarantee. Given the main OFA folks working on this file are on vacation, I've prepared the attached draft deck. I was hoping you could circulate this to folks internally for review and comment. We've been asked to provide a draft deck to the DMO tomorrow. Could you please aim to provide any OFA comments by end of day today.

Also, is there someone from the OFA who could attend next week's briefing to answer questions as required? Please let me know who that might be.

Thanks in advance,
Keley

Subject: Re: EXTERNAL – Provincial Guarantee for Fair Hydro Program
Date: Tuesday, April 18, 2017 11:13:14 AM

Thanks. Has TD seen this, or commented on it? The make whole provision, rather than just moving the outstanding bonds up to being provincial debt could be extremely expensive if the guarantee is triggered and exercised.

I assume the challenge to the rating is that we're not AAA, so the debt would be downgraded to our level, but this shows the flaw in the ratings methodology, because why would you want a guarantee from someone who is supposedly less credit worthy? This is definitely, in my mind, worth pushing back on.

Regards,
Gadi

Here is the initial view of the dealers on their ask. We can discuss further tomorrow. Maybe more efficient that we discuss prior to the group meeting in the afternoon

John

Subject: EXTERNAL – Provincial Guarantee for Fair Hydro Program

*** Exercise caution. This is an EXTERNAL email. DO NOT open attachments or click links from unknown senders or unexpected email. *** _____

Hey John, Ken,

Further to our discussion earlier today, please see the note below which outlines our collective views on the Provincial guarantee that would be required for the Fair Hydro Program. Happy to discuss further.

There are two types of “guarantees” that we are looking for from the Province in relation to this program on the basis that any debt issued under the Fair Hydro Program will be AAA-rated. In addition, the following is based on the understanding that the transition charges collected from prescribed consumers will begin upon the commencement of the program and will not be subject to any cap or restrictions.

The legislation must include a specific reference to the Province being required to provide a guarantee on debt repayment and servicing in certain circumstances.

The first is “Springing Guarantee”, which would be via a legal agreement put in place when establishing the program and would require the Province to step in and assume responsibility for paying all amounts that are or become due in respect of (i) any of the outstanding funding obligations; (ii) the operation and maintenance of the financing entity; and (iii) any other amounts due in relation to the program that have not yet been paid (collectively, the “Fair Hydro Program Costs”). This Springing Guarantee would kick in should any of the following happen:

(1) There is any change in the legislation or regulations that is, or could be, adverse to finance entity noteholders or the legislation is determined to be ultra vires. In this situation, the Springing Guarantee would require the immediate repayment of all Fair Hydro Program Costs (including any makewhole prepayment obligations).

(2) There is a market disruption (i.e. there is a period of time when capital markets term funding is not available to take out the warehouse facilities (bank facility or ABCP)). In this situation, either (i) we start to charge ratepayers for principal recovery via transition charges; or (ii) the Province must be responsible for the immediate repayment of those warehouse facilities.

The period of time that must lapse before this Springing Guarantee becomes applicable with respect to the warehouse facilities can be set to accommodate a short term dislocation in the term funding market (6-18 months). We would note that depending on the size of the warehouse facility, if there is no term takeout for an extended period of time, it is likely that the warehouse facilities will also quickly reach their credit limits and the province would likely have to fund any future shortfalls if they wished to continue the program.

To the extent that the Springing Guarantee does not require the Province to make the repayment contemplated under scenario (1), but simply requires the Province to repay the debt in accordance with its original repayment terms, this may adversely impact the rating of the Fair Hydro Program.

The second type of guarantee we are looking for from the province is a performance guarantee. This is not a credit guarantee. The performance guarantee would require the Province to stand behind certain obligations of the Servicer (initially IESO) in the program. This performance guarantee would be included as part of the Securitization documents for the program. It would, amongst other things, require the province to stand behind (including taking responsibility for helping remedy any breaches in) the representations, warranties, or covenants made by the servicer. It would also require the province to ensure that the servicer performs its servicing activities as set out in the securitization documents and if it does not, put in place an alternative servicer who would perform those servicing activities. The performance guarantee would also include standing behind any indemnities that may be owing by the servicer.

Hi John and John,

On another issue related to the guarantee, MOF Legal has asked again about being able to review this in the full context of the proposed draft set of legal documents that set out, e.g. what the bond or debt instruments to be issued by the Financing Entity would look like such as the Master Trust Indenture, etc.

Not sure if OPG might have provided earlier drafts, say to Ken, who is now on vacation. Would you be able to send the latest drafts, so that MOF Legal can review the OPG draft term sheet in context.

Thanks,
Ron

Hi John and John

One issue that I forgot to raise at the tele conference yesterday is the potential for the Province to purchase debt issued by the Financing Entity in the event of an impending warehouse default event coupled with the inability, for whatever reason, for the Entity to access the markets. Of course once, markets have stabilized the Province has the option to sell this note.

OPG was going to run this by E&Y to ascertain if such purchases impact the accounting treatment. Pls let us know.

Thanks and if you haven't already done so can you pls forward the revised term sheet to Energy Legal as well.

Thanks

Ken k

Hi John

Just to follow up on Andrew Maciel's commitment to provide us with a revised term sheet for the guarantee reflecting yesterday's discussion, I was wondering if that can be done EOD Monday. I had a chat with Gadi and given some upcoming internal meetings at senior levels it would be helpful to provide the revised guarantee in front of decision makers.

Thanks

Ken k

Hi all

I got comments back from Steve on the term sheet today. I haven't reviewed them yet and will send them to you on Monday. There seem to be a lot of significant issues and as noted previously we don't have copies of any of the draft documents so it makes it very difficult to provide, comments on the term sheet and TB submission.
Thanks

Malle

On Aug 17, 2017, at 9:23 AM, Hanslep, Malle (MOF) <Malle.Hanslep@ontario.ca<mailto:Malle.Hanslep@ontario.ca>> wrote:
Hi Ken,

Thanks for the additional information. I have already sent the draft to Energy Legal and will send it to Steve Ashbourne this morning.

Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.

- The last sentence in the opening italics that "the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate" has been deleted.

- It has been changed back to a guarantee from an indemnity.

- The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the "performance" guarantee is added into (E), i.e. IESO's role.

- Concept of "materiality" has been deleted for (B) and (D).

- A concept of "any other discriminatory action including OEB Orders has been introduced.

- The Guarantee wording includes the word "assume" as opposed to just "pay".

- Also, the guarantee has reverted to some of the very general wording that the Province is guarantee "all of the obligations of the Financing Entity" not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??

- Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?

- Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in

September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well.

Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

Malle

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.

The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in

IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.

Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.

Thanks

Ken k

Hi Malle,

I would not know f this has been passed on to Energy Legal; by OPG yet. Ken, would you know?

As you stated, last week's meeting was a business meeting, without Legal representatives from various sides, including not having Steve Ashbourne attend, so I wouldn't think he'd have reviewed this new version either -- Ken, your sense on that?

Ron

Hi Ken,

Thank you for passing on the draft. I should send this on to Energy Legal as well in case they have not received it yet. Do you know if Steve Ashbourne of Blakes has been reviewing the term sheet recently and been involved in discussions on this?

This is the first version of the term sheet that we have received since it was sent over to OPG on late June. After that there was a response from Torys dated June 30th with some high level comments on the revised term sheet and an internal Provincial call to discuss the Province's response. Subsequently there was a meeting of representatives of the Province and OPG on July 13th which Toby and also Tom McKinlay of Energy legal attended to discuss considerations regarding the guarantee. It looks like there have been some further discussions regarding the term sheet and understand that there may have been a meeting on the business side last week but MOF LSB was not asked to participate. In order to provide comments on this term sheet, it will be helpful for us to find out more about what the business discussions have been and what approach the Province wishes to take and also consult with Energy Legal and Blakes.

Is there a track changes version of this term sheet from June? Also, as I recall back in early July, we were going to ask OPG to provide to us some of the more detailed documents and drafts that would be associated with this guarantee such as the Master Trust Indenture, etc. Do you know if OPG has shared any of that with the Province?

Thanks.

Gadi, Ron and John

Pls see the attached revised guarantee and a short presentation on the salient points. It seems to include all of the revisions we requested, however, I will take another more detailed look. Ron and John one section particularly for your review, the Takeout Risk at the end of the Term Sheet indicates the link between the clean energy adjustment and the fair allocation amount as they impact the Takeout risk. I am not very clear about this so you may want to review this closely.

The request for the Letter of Credit still stands however, there is an alternative also provided we have to see tomorrow how comfortable IESO is with the latter.

Thanks

Here are my very high level preliminary comments on this. This appears to be a fresh document drafted by OPG and its counsel after the meeting in July and then further business discussion since then. There are no track changes in this document, but I compared it to the version the Province sent to OPG on June 22nd and there are quite a few differences.

- The last sentence in the opening italics that "the arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate" has been deleted.
- It has been changed back to a guarantee from an indemnity.
- The Guarantee Activation Events have been expanded to include 5 as it seems that it has been restructured so that some of what was previously in the "performance" guarantee is added into (E), i.e. IESO's role.
- Concept of "materiality" has been deleted for (B) and (D).
- A concept of "any other discriminatory action including OEB Orders has been introduced.
- The Guarantee wording includes the word "assume" as opposed to just "pay".
- Also, the guarantee has reverted to some of the very general wording that the Province is guarantee "all of the obligations of the Financing Entity" not just the debt obligations. These include any other obligation of the Financing Entity related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commission??
- Approval requirement has been changed so that Province does not have right to approve any specific guarantee of funding obligations or set of documents before the guarantee is applied as long as documents are consistent – but who decides?
- Also the second portion called Warehousing Takeout Risk and Servicing – it's mentioned that this is for information purposes only as these risk were included in previous versions – current proposals described here and it doesn't contain any requirement for the Province to directly backstop these risks. I would say perhaps similar risks might have been dealt with but this section looks new and I don't' understand what the Province's role is in providing these assurances. Legal would need more background on how this is supposed to work.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to

provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and meetings as well.

Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

The authority for the Province's guarantee is contained in s. 5(3) of the Fair Hydro Act, 2017 and requires an OIC to authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee/indemnity obligations associated with an investment interest. The LGIC may delegate to the Ministers to determine the terms and conditions of the guarantee and the maximum liability for the guarantee or may also specify this in the OIC. Given that it appears there will be multiple debt issuances as part of this financing program of the Financing Entity, we will have to determine how best to approach the drafting of the OIC and the guarantee in the context of this debt program. So far, we have not received any draft documents for the program such as the Master Trust Indenture, etc and as a result it is difficult to provide comments on the term sheet and in particular scope of the guarantee and how the province's approval of the terms and conditions might work in order to make the debt financing program of the Financing Entity work smoothly and effectively.

Is it possible to obtain drafts from OPG at this point. I believe that back in July on a call, it was mentioned that the next step was to ask for these drafts so that we can better understand how the proposed guarantee will fit with the proposed program documents. It's not possible to actually draft a guarantee without seeing these documents. Drafting provisions that contains "discriminatory action" type language can be difficult to ensure that there are no unforeseen consequences and that the Province's intent is captured.

It would also be helpful to find out a bit more about the timing as the briefing note mentions a TB decision in September to approve the guarantee. Is a TB submission being drafted as it would be helpful to see a draft of this as well.

I will pass on my general comments to Energy Legal and Steve as well. I understand that Scott's group is the business contact and I believe that there were Energy policy staff involved in some of the earlier calls and

meetings as well.

Perhaps it might be helpful to schedule a meeting for next week to discuss the various comments on this. If in the meantime, there is any more background or you are able to obtain draft agreements, this would be helpful.

Thanks.

Malle

Hi Malle

Sorry for the delay in responding to your questions. First can you pls share the revised term sheet with Steven Ashbourne for his comments. Secondly, following protocol I have requested OPG to forward the same document to Energy Legal who may then reach out to you for consolidated comments.

With regard to business decisions from the last version: OPG and their advisors have removed any obligation on the part of the Province to either accelerate payments on the outstanding debt or pay a 1% premium in case the guarantee is invoked. The debt guarantee is now palatable from the Province's perspective and subject to Legal review of not only the Term Sheet but the draft guarantee document once we receive same from OPG, we are recommending provincial approval.

The servicing guarantee has now been restated as an IESO obligation requiring the Operator to either provide an Letter of Credit or assume responsibility for any shortfalls in the CEA arising from lower than investment grade/Non rated LDCs failing to remit their collections, for whatever reason, once the CEA kicks in

IESO is not comfortable with this requirement and is regrouping internally to respond, OPG has also agreed to examine other potential solutions for this issue. I am attaching a summary sheet that you may find useful, that outlines the issues in the Term Sheet and our responses.

Pls note that I have expanded the cc's to this email since I will on vacation starting tomorrow to Labour Day.

Thanks

Ken k

Subject: RE: EXTERNAL – Revised Term Sheet & summary slides

Hi Ken,

Thank you for passing on the draft. I should send this on to Energy Legal as well in case they have not received it yet. Do you know if Steve Ashbourne of Blakes has been reviewing the term sheet recently and been involved in discussions on this?

This is the first version of the term sheet that we have received since it was sent over to OPG on late June. After that there was a response from Torys dated June 30th with some high level comments on the revised term sheet and an internal Provincial call to discuss the Province's response. Subsequently there was a meeting of representatives of the Province and OPG on July 13th which Toby and also Tom McKinlay of Energy legal attended to discuss

considerations regarding the guarantee. It looks like there have been some further discussions regarding the term sheet and understand that there may have been a meeting on the business side last week but MOF LSB was not asked to participate. In order to provide comments on this term sheet, it will be helpful for us to find out more about what the business discussions have been and what approach the Province wishes to take and also consult with Energy Legal and Blakes.

Is there a track changes version of this term sheet from June? Also, as I recall back in early July, we were going to ask OPG to provide to us some of the more detailed documents and drafts that would be associated with this guarantee such as the Master Trust Indenture, etc. Do you know if OPG has shared any of that with the Province?

Thanks.

Gadi, Ron and John

Pls see the attached revised guarantee and a short presentation on the salient points. It seems to include all of the revisions we requested, however, I will take another more detailed look. Ron and John one section particularly for your review, the Takeout Risk at the end of the Term Sheet indicates the link between the clean energy adjustment and the fair allocation amount as they impact the Takeout risk. I am not very clear about this so you may want to review this closely.

The request for the Letter of Credit still stands however, there is an alternative also provided we have to see tomorrow how comfortable IESO is with the latter.

Thanks

I suspect the "in sync" reference is to ensuring that the subsidiary documents are in accordance with the principles outlined in the Master Indenture document, which will be provided to the province for review and comments.

Hi John and John

One issue that I forgot to raise at the tele conference yesterday is the potential for the Province to purchase debt issued by the Financing Entity in the event of an impending warehouse default event coupled with the inability, for whatever reason, for the Entity to access the markets. Of course once, markets have stabilized the Province has the option to sell this note.

OPG was going to run this by E&Y to ascertain if such purchases impact the accounting treatment. Pls let us know.

Thanks and if you haven't already done so can you pls forward the revised term sheet to Energy Legal as well.

Thanks

Jim and Carlos, although we've been looking to Steve Ashbourne and MOF Legal to provide input for a more general guarantee which would be consistent with your and my view. Meeting taking place today. Steve Ashbourne doesn't like OPG's term sheet approach as it likely takes away our future flexibility which is likely right. So I guess we get back to OPG soon with our thoughts which should reduce the importance of the OPG term sheet. Nevertheless they will need some basic assumptions, especially on the performance component. So make wholes and puts should not be on the table.mike

I'm at a meeting with Energy and Steen came up to me quite concerned to say that the latest version they saw from OPG and Tories was for quite a broad guarantee, including a make whole provision. If that's the case, it doesn't sound like they've taken on our comments and our unwillingness to provide a make whole, or a put, or any structure that could expose to the Province to having to make a multi-billion dollar payment rather than just stepping having to step in to replace OPG's coupon and principal payment obligations when they come due.

Thanks, Malle. I think it would be very helpful for you and Toby to be on the call to, hopefully, prevent this discussion from going down unnecessary rabbit holes. My concern is that, to use a term that I often hear lawyers use in a different context, time is of the essence, and it's important that Torys isn't simply using this as an opportunity to extract even more billable hours from what has already been a very profitable file for them.

I had a discussion with OPG's CFO, Ken Hartwick this morning and he told me that they were satisfied with the term sheet, so I don't know why, if their client is satisfied, Torys feels the need to prolong this discussion. To meet the timelines to get this through both our ministries and then have the submission signed by the two DMs and Ministers in time to meet TB's deadlines, this has to be ready to go to CQSD by the end of the day tomorrow, so I don't want to enter into a new round of negotiations with Torys.

Thanks again, Malle. I really appreciate having you and Toby on our side.

Hi all,

Torys has invited Steve, MOF LSB and Energy LSB to a call tomorrow morning for the lawyers to go over the changes that were made to the term sheet so that they can better understand them. We think it would be helpful to discuss the wording with them directly so Toby and I propose to join the call unless there any concerns about it. It may be constructive for us to discuss the wording directly with Torys and then we would report back to you with on the call. We might also get a better idea of how the guarantee timing will fit in with the timing of the proposed debt issuances. Please let us know if you have any concerns about this.

Please find attached, for your review and comment, a draft OIC authorizing the Minister of Finance and the Minister of Energy to give a guarantee/indemnity under the Fair Hydro Plan Act.

This draft gives a lot of authority to the Ministers to determine the scope and content of the guarantee. It would be helpful to consider whether additional terms and conditions (including a maximum amount or other limitations) should be included.

In terms of timing, one thing that I didn't mention yesterday about my conversation with Ken H is that he told me that their timing is even tighter than ours. On their critical path, they feel that in order to get the financing done this calendar year, they have to re-engage with the rating agencies next week. A critical part of that re-engagement includes providing a draft version of the term sheet. That won't work if we're still negotiating it with them, so our runway for tinkering is done, and Torys is just going to have to accept that what we've provided is the best deal they're going to get.

Regards,
Gadi

No it wouldn't, but that is a good question. I have been assuming that the provincial support agreement would only apply to the 51% senior debt, but OPG just let me know that the subordinated debt will be quite a bit more expensive without a provincial support agreement. Roughly, they currently estimate that the senior debt will be priced 20-25 bps over the Province of Ontario. The subordinated they see about 100 bps back of the Senior if it has a provincial support agreement. They are now indicating, based on dealer feedback, that without a provincial support agreement, the subordinated will be about 100-200 bps more expensive if it doesn't have a provincial support agreement. Anyway, I don't think we should be expanding the support to the subordinated debt as this will greatly increase the Province's exposure. We may have to address ways to keep the subordinated more cost-effective. Thoughts appreciated.

Mike

OPG doesn't have a full financing plan at this time. I believe they are hoping to firm up numbers from Energy fairly shortly, before they meet the ratings agencies. They are currently thinking of issuing $300 to $500 million in late September/early October. Roughly $125 million of this will be to fund the subordinated (5% requirement on roughly

$2.5 billion of annual funding). The senior debt (the 51% that we are focussing on) is roughly planned for late November with roughly $400 million of issuance and then follow-up issuance on a fairly regular basis thereafter. Hope this is helpful.
Regards, Mike

Subject: Fair Hydro - Option for Province to Cure Default before Acceleration of Debt

Dear James,

During the discussions of the Provincial guarantee at a recent Thursday rate mitigation meeting, OPG raised the issue of potential acceleration of financing entity debt where the guarantee is not applicable. That would occur if there is an event of default (e.g. if the trust is not able to pay/service the debt) for a reason that doesn't trigger the guarantee (e.g. for a reason other than a change of the legislation).

When there is an acceleration, all of the principal amount becomes due and a large payment would need to be made by the financing entity to bondholders. If the acceleration occurs after the moratorium period, the amount payable to bondholders would be put through the Clean Energy Adjustment to specified consumers. That could result in a significant increase in consumer bills in a short period of time.

We understand that the Province may not want consumers to experience such a sharp bill increase. We discussed the Dealers whether the Province could be given the option to cure an event of default of a financing entity before it results in acceleration of debt. The Dealers were amenable to providing this option.

When we raised this possibility, the Province indicated it would like to have such an option, and asked us to put together a note describing the terms.

Please find attached a note describing the proposed terms of the option.

Let us know if you have any questions or comments, or if this should be directed to someone else.

a rational to make sure it stays on the agenda. If it doesn't make the Sept 26 meeting it would be bumped to October 17th, which is the next board meeting.

I'm not entirely sure what rational to give him. Could we make the case that the financing entity will need to go to market this calendar year, which essentially means November, making an October 17th meeting fairly late?

Subject: RE: For Review and Comment:
TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

<!--[if !supportLists]-->● <!--[endif]-->Good point I will make the change.

Are we taking out the term guarantee throughout the document?

<!--[if !supportLists]-->● <!--[endif]-->No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

<!--[if !supportLists]-->● <!--[endif]-->Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

<!--[if !supportLists]-->● <!--[endif]-->Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

<!--[if !supportLists]-->● <!--[endif]-->Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

<!--[if !supportLists]-->● <!--[endif]-->In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?

<!--[if !supportLists]-->● <!--[endif]-->Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

<!--[if !supportLists]-->● <!--[endif]-->Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

<!--[if !supportLists]-->● <!--[endif]-->I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna Strathy

<Matthew.Breadner@ofina.on.ca>
Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?

Thanks,
Matt Breadner on behalf of Anna Strathy

Hi Lindsay and Anthony,

I'll have another draft ready soon that

incorporates some feedback from MOF legal and the OFA, I plan on sharing it with the both of you for feedback before distributing again to the wider group. We have reached out to energy for feedback as well, I understand they're working on it, but in the meantime I plan on proceeding with sending out an updated version before that. And as Anthony stated, yes it is still very much in a draft form.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!
Lindsay

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a

communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be

incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Subject: FW: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Gadi,

CQSD is asking for a justification as to why we're pressuring to proceed with the Sept, 26 TB/MBC meeting.

Apparently a Minister to Minister reach out is required and as there are multiple submissions scheduled for that date Anthony says he'll need a rational to make sure it stays on the agenda. If it doesn't make the Sept 26 meeting it would be bumped to October 17th, which is the next board meeting.

I'm not entirely sure what rational to give him. Could we make the case that the financing entity will need to go to market this calendar year, which essentially means November, making an October th

17 meeting fairly late?

Thanks,
Matt

Hi Matt,

Who is the legal lead on it ? Need that info as well.

Also what is the rush to proceed to the Sept. 26 TB/MBC meeting ?

A MO to MO reach out is required and I need to support that with a rational.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

<!--[if !supportLists]-->● <!--[endif]-->Good point I will make the change.

Are we taking out the term guarantee throughout the document?

<!--[if !supportLists]-->● <!--[endif]-->No not everywhere. I'm trying to

be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

<!--[if !supportLists]-->● <!--

[endif]--
>Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt… MOF ? What process will be used to report it ? How often ?

<!--[if !supportLists]-->● <!--[endif]--
>Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

<!--[if !supportLists]-->● <!--[endif]-->Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

<!--[if !supportLists]-->● <!--[endif]-->In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?

<!--[if !supportLists]-->● <!--[endif]-->Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

<!--[if !supportLists]-->● <!--[endif]-->Still

waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

<!--[if !supportLists]-->● <!--[endif]-->I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna

Hi John.

I thought you had drafted responses to six earlier questions and that I had done a bit of a markup.

Wouldn't OPG say that October 17 plus the needed ratings finalization and marketing make it too tight to do a bond issue in November before the December slow down?

Ron

Hi Matt,

Who is the legal lead on it ? Need that info as well.

Also what is the rush to proceed to the Sept. 26 TB/MBC meeting ?

A MO to MO reach out is required and I need to support that with a rational.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should “Authorize”, maybe it’s not “Approve”

<!--[if !supportLists]-->● <!-[endif]-->Good point I will make the change.

Are we taking out the term guarantee throughout the document?

<!--[if !supportLists]-->● <!-[endif]-->No not everywhere. I’m trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We’re referring to the agreement as a “support agreement” which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I’d sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE’s previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

<!--[if !supportLists]-->● <!-[endif]-->Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ?

Interest on debt…MOF ? What process will be used to report it ? How often ?

<!--[if !supportLists]-->● <!--[endif]-->Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

<!--[if !supportLists]-->● <!--[endif]-->Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

<!--[if !supportLists]-->● <!--[endif]-->In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?

<!--[if !supportLists]-->● <!--[endif]-->Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

<!--[if !supportLists]-->● <!--[endif]-->Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

<!--[if !supportLists]-->● <!--[endif]-->I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!
Lindsay

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Subject: FW: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Gadi,

CQSD is asking for a justification as to why we're pressuring to proceed with the Sept, 26 TB/MBC meeting.

Apparently a Minister to Minister reach out is required and as there are multiple submissions scheduled for that date Anthony says he'll need a rational to make sure it stays on the agenda. If it doesn't make the Sept 26 meeting it would be bumped to October 17th, which is the next board meeting.

I'm not entirely sure what rational to give him. Could we make the case that the financing entity will need to go to market this calendar year, which essentially means November, making an October 17th meeting fairly late?

Thanks,
Matt

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks Lindsay. You make some great points. Energy should be made aware of this, but I don't have any contact info at this time.

Materials are still very much draft. I would keep the approach high level for now, as we receive more info. then things will be updated.

Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through

approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!
Lindsay

Subject: FW: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications

strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Anna

>
> Apparently a Minister to Minister reach out is required and as there are multiple submissions

scheduled for that date Anthony says he'll need a rational to make sure it stays on the agenda. If it doesn't make the Sept 26 meeting it would be bumped to October 17th, which is the next board meeting.

I'm not entirely sure what rational to give him. Could we make the case that the financing entity will need to go to market this calendar year, which essentially means November, making an October 17th meeting fairly late?

Thanks,
Matt

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

<!--[if !supportLists]-->● <!--[endif]-->Good point I will make the change.

Are we taking out the term guarantee throughout the document?

<!--[if !supportLists]-->● <!--[endif]-->No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

<!--[if !supportLists]-->● <!--[endif]-->Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

<!--[if !supportLists]-->● <!--[endif]-->Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will

impact when our DM and Minister would sign.

- <!--[if !supportLists]-->• <!--[endif]-->Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

- <!--[if !supportLists]-->• <!--[endif]-->In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?
- <!--[if !supportLists]-->• <!--[endif]-->Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

- <!--[if !supportLists]-->• <!--[endif]-->Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

- <!--[if !supportLists]-->• <!--[endif]-->I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should “Authorize”, maybe it’s not “Approve”

- <!--[if !supportLists]-->● <!--[endif]-->Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- <!--[if !supportLists]-->● <!--[endif]-->No not everywhere. I’m trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We’re referring to the agreement as a “support agreement” which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I’d sent you earlier, so pelase

refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

- Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

- Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

- Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

- In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?
- Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

- Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

- I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Hi Matt,

I'm going to review tomorrow morning and will provide feedback then.

You may want your Senior Management and Legal review one more time before sending out to a broader audience.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for

now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?

Thanks,
Matt Breadner on behalf of Anna Strathy

Hi Lindsay and Anthony,

I'll have another draft ready soon that incorporates some feedback from MOF legal and the OFA, I plan on sharing it with the both of you for feedback before distributing again to the wider group. We have reached out to energy for feedback as well, I understand they're working on it, but in the meantime I plan on proceeding with sending out an updated version before that. And as Anthony stated, yes it is still very much in a draft form.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi all,

Couple questions on this. I'm working on a tailored comms snapshot that will focus on messaging and strategic approach. As you mentioned this is still an early draft, can we expect to see another draft of this come through later? Also is the expectation that MO or CO will be looking at this? I ask because I would like to avoid sending comms materials through approvals more than once. If this is still being developed I can send you something high-level for now and then we can circle back later.

Also wondering if anyone from Energy is looking at this. They will have some KMs around the Fair Hydro Plan/issues mitigation that I would like to draw from so we don't mix messages. Let me know if you have been working with someone at Energy or if I should reach out.

I am still aiming to have something by the 31st but we are short-staffed right now so it may be a day or two later.

Thanks!
Lindsay

Subject: FW: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should “Authorize”, maybe it’s not “Approve”

- <!--[if !supportLists]--><!--[endif]-->Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- <!--[if !supportLists]--><!--[endif]-->No not everywhere. I’m trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We’re referring to the agreement as a “support agreement” which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared

to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

<!--[if !supportLists]-->● <!--[endif]-->Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

<!--[if !supportLists]-->● <!--[endif]-->Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

<!--[if !supportLists]-->● <!--[endif]-->Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

<!--[if !supportLists]-->● <!--[endif]-->In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?

<!--[if !supportLists]-->● <!--[endif]-->Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

<!--[if !supportLists]-->● <!--[endif]-->Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

<!--[if !supportLists]-->● <!--[endif]-->I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might

be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna Strathy

I still have the same questions as earlier ie. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

When would the numbers from Energy be finalized ? OPCD review as well ?

Still need the answer of the 5 questions I sent last week by

my Director.

We would need to share a copy soon with TBS as there is a large number of submissions moving forward for Sept. 26 TB/MBC date.

I pretty much agree with Legal points.

Thanks,
Anthony

You're right in your assumption, Matt, and the Deputy and Associate Deputy of TB are aware, and supportive, of our need to be on the 26th for exactly that reason, so I'm not sure why CQSD thinks our Minister would have to reach out to theirs. I'd be shocked if TB didn't make this a priority item for the 26th meeting, and didn't bump something else if the agenda is too packed..

We were actually originally intending to go to the first TB meeting in September, but Energy decided that we could wait until this meeting to line up with when they are going to TB for their FHP report back. It is absolutely essential that we make this meeting, or OPG may not be able to complete their initial financing for the Trust by calendar year-end (it's already tight) which, I understand, creates a potential accounting issue for the IESO if they still have the entire asset on their books at their year-end.

Thanks,
Gadi

Hi Matt,

Who is the legal lead on it ? Need that info as well.

Also what is the rush to proceed to the Sept. 26 TB/MBC meeting ?

A MO to MO reach out is required and I need to support that with a rational.

Thanks,
Anthony

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

- Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

- Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt… MOF ? What process will be used to report it ? How often ?

- Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

<!--[if !supportLists]-->• <!--[endif]-->Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

<!--[if !supportLists]-->• <!--[endif]-->In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?

<!--[if !supportLists]-->• <!--[endif]-->Regarding the chart showing loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

<!--[if !supportLists]-->• <!--[endif]-->Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

<!--[if !supportLists]-->• <!--[endif]-->I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Let me know what you think.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anthony and Lindsay,

Please find attached the latest draft of the TB submission, note we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

This version incorporates line edits made on our end, as well as by MOF legal. However it still contains several comments in the margins pertaining to issues that have not been resolved as of yet (hopefully on the next iteration). Lindsay, as you mentioned if you send something high level for now perhaps we can circle back later?

Anthony, Anna mentioned that you might want to provide thoughts on any new version before I distribute to the broader group, so I was wondering if you had any comments/concerns on this draft before we send something out for a second round?

Thanks,
Matt Breadner on behalf of Anna Strathy

Hi Lindsay,

Based on the recommendation of Anthony in our Corporate shop (copied), I'm sharing this early draft of a TB Submission for your review. You'll see from the attached email chain that the submission would create a contingent liability that would be disclosed to the public (but not booked/no fiscal impact) in Public Accounts. Anthony suggested that we include a communications strategy in the attached submission, given that the contingent liability will be made public. Could I ask for you expertise in crafting some messaging/strategy?

Thanks, Anna

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Hi John.

I thought you had drafted responses to six earlier questions and that I had done a bit of a markup.

Wouldn't OPG say that October 17 plus the needed ratings finalization and marketing make it too tight to do a bond issue in November before the December slow down?

Ron

Hi Gadi,

CQSD is asking for a justification as to why we're pressuring to proceed with the Sept, 26 TB/MBC meeting.

Apparently a Minister to Minister reach out is required and as there are multiple submissions scheduled for that date Anthony says he'll need a rational to make sure it stays on the agenda. If it doesn't make the Sept 26 meeting it would be bumped to October 17th, which is the next board meeting.

I'm not entirely sure what rational to give him. Could we make the case that the financing entity will need to go to market this calendar year, which essentially means November, making an October 17th meeting fairly late?

Thanks,
Matt

Thanks for the review Anthony,

In response to your questions:

TB/MBC should "Authorize", maybe it's not "Approve"

- Good point I will make the change.

Are we taking out the term guarantee throughout the document?

- No not everywhere. I'm trying to be consistent with a deck recently presented to the energy Minister on this topic (see attached). Essentially, We're referring to the agreement as a "support agreement" which *guarantees* the debt under certain conditions. However, I did update it ina few locations compared to the version I'd sent you earlier, so pelase refer to the file attached.

How does this request relate to MOE's previous submission(s) on Fair Hydro Plan ? Is it consistent ? What is MOE saying ?

- Hoping energy can follow up on this, maybe in the next round.

Where is the contingent liability going to reside ? Which Ministry ? Interest on debt…MOF ? What process will be used to report it ? How often ?

- Ultimately a question for OPCD, again still waiting on feedback.

Has it been determined that MOE Minister will sign the submission ? If so by when ? It will impact when our DM and Minister would sign.

- Not entirely sure, can follow up with energy on this.

I still have the same questions as earlier i.e. showing a diagram explaining the process, chart showing term of loan principal + interest. etc.

- In regards to the diagram, there is one in the attached power point presentation, will this be sufficient?
- Regarding the chart showing

loan principal and interest, some staff on our end are having a look at that.

When would the numbers from Energy be finalized ? OPCD review as well ?

<!--[if !supportLists]-->● <!--[endif]-->Still waiting on this information.

Still need the answer of the 5 questions I sent last week by my Director.

<!--[if !supportLists]-->● <!--[endif]-->I've passed them along, but can follow up regarding status.

I'd like to send this version around to the broader group if you think that would be appropriate. I understand your point that senior staff on our end should review first, but most of them are still away on vacation (Gadi, Ron, Ken) and it might be a good idea to keep the ball rolling in the meantime, since as you said we need to keep moving forward to the Sep 26th date.

Hi Malle,

Thank you for this. I've included my responses below in red, and seeking input/confirmation from others (Anthony/Keley/Jonathan) in highlighted text. I've been away the last two weeks so I apologize if any of my information below is out of date.

I'm also copying the broader group from the OFA here to keep everyone in the loop.

Thanks, Anna

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC

was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Anna

Hi Gadi,

I was thinking about the approach further and I think it would be best if I write to Len Hatzis (legal director at TBS) and Carolyn (so she is aware) first to let Len know the background that the DM of TBS is in favour of the Minister of Finance signing any required guarantee (although maybe he is well aware of this already) and also MOF/OFA view that we shouldn't exempt generally transactions under the new proposed Act from s. 28.
Then Len can let me know which TBS counsel are working on it as I think that it may be Nick and Paul but don't know for sure and don't know what their involvement on this file has been and I don't think I should send the email to TBS without letting Carolyn know.

Subject: RE: Guarantee

We have discussed this with the OFA, and we have endeavoured to provide a provision that we think should allow the financial guarantee being contemplated. Please let us know if you think it provides the necessary scope for what would be required to meet the Province's needs. We deleted the existing provision, although if you think that more general contractual authority is needed, something else could be considered. However, we don't think that it is appropriate to have a statutory appropriation for such general indemnity and guarantee provisions.

We would expect that the guarantee would be capped and only provide for the repayment of the principal and interest of the debt securities of the financial asset owner, and that would usually be done in the OIC.

We don't have any experience with performance guarantees. Is there a need for the Minister of Energy to require performance by the LDCs? We were also wondering if Blakes or another party involved in these discussions might have an example of what is being considered.

We also removed the exemption from s. 28 of the FAA. We have discussed this with OFA staff, and given the importance and breadth of this Act and Program, it doesn't seem appropriate to exempt the entire Act from s. 28 of the FAA.

Hi Carolyn,

Thanks for your email. Would it be possible to arrange a conference call today with yourself or your counsel most knowledgeable on this proposed securitization and transaction so that we can get an understanding of it and how it fits into any proposed authorizing legislation. Unfortunately we are not familiar with the proposed transaction although we have seen some general background information about the proposal. What role would a guarantee of investment dealers have in the transaction? We do have a copy of the legislation that we got via our clients at OFA and they were more engaged in the issue of a future proposed equity injection, but the most recent version that we have seen does not mention guarantees although there seems to be a very general contract authorization section. Of course, we have to generally think about s. 28 as well.

A call today to over the main elements of the proposed transaction and the legislation would be very helpful so that we can get back to Gadi.

Hi Michael & Malle – we will be sending you draft legislation to take a look at. Actual guarantees will follow later.

This relates to the government's Fair Hydro Plan and the promise to reduce rates by 25% by July. We are doing a sort of securitization, for which the legislation will provide a framework. We are contemplating provisions that allow "the Minister" to enter into agreements with respect to transactions contemplated by the legislation. Gadi and DM Angus are of the view that Minister should be MOF, as the agreements are likely to be guarantees to investment dealers. Indemnities for the boards of OPG and IESO will also be required, although we didn't talk about who would sign those.

Happy to answer your questions or walk you through the proposed bill.

Hi Carolyn,

Thanks for your email. Would it be possible to arrange a conference call today with yourself or your counsel most knowledgeable on this proposed securitization and transaction so that we can get an understanding of it and how it fits into any proposed authorizing legislation. Unfortunately we are not familiar with the proposed transaction although we have seen some general background information about the proposal. What role would a guarantee of investment dealers have in the transaction? We do have a copy of the legislation that we got via our clients at OFA and they were more engaged in the issue of a future proposed equity injection, but the most recent version that we have seen does not mention guarantees although there seems to be a very general contract authorization section. Of course, we have to generally think about s. 28 as well.

A call today to over the main elements of the proposed transaction and the legislation would be very helpful so that we can get back to Gadi.

Hi Michael & Malle – we will be sending you draft legislation to take a look at. Actual guarantees will follow later.

This relates to the government's Fair Hydro Plan and the promise to reduce rates by 25% by July. We are doing a sort of securitization, for which the legislation will provide a framework. We are contemplating provisions that allow "the Minister" to enter into agreements with respect to transactions contemplated by the legislation. Gadi and DM Angus are of the view that Minister should be MOF, as the agreements are likely to be guarantees to investment dealers. Indemnities for the boards of OPG and IESO will also be required, although we didn't talk about who would sign those.

Happy to answer your questions or walk you through the proposed bill.

Hi Carolyn,

Gadi Mayman gave us a heads up that you might be giving us a call about a proposed guarantee that the Minister of Finance may be required to sign in relation to the changes to the global adjustment.

We're happy to discuss this. This afternoon is busy but tomorrow afternoon may work.

Thanks!

Michael

Hi Gadi

I think that would be fine. I don't know who in particular at TBS legal might be looking at this although it might be Nick Smook and Paul Kaufman

Subject: RE: Guarantee

We have discussed this with the OFA, and we have endeavoured to provide a provision that we think should allow the financial guarantee being contemplated. Please let us know if you think it provides the necessary scope for what would be required to meet the Province's needs. We deleted the existing provision, although if you think that more general contractual authority is needed, something else could be considered. However, we don't think that it is appropriate to have a statutory appropriation for such general indemnity and guarantee provisions.

We would expect that the guarantee would be capped and only provide for the repayment of the principal and interest of the debt securities of the financial asset owner, and that would usually be done in the OIC.

We don't have any experience with performance guarantees. Is there a need for the Minister of Energy to require performance by the LDCs? We were also wondering if Blakes or another party involved in these discussions might have an example of what is being considered.

We also removed the exemption from s. 28 of the FAA. We have discussed this with OFA staff, and given the importance and breadth of this Act and Program, it doesn't seem appropriate to exempt the entire Act from s. 28 of the FAA.

Subject: FW: Guarantee

Hi Gadi, Anna,

We had a call with Carolyn Calwell and Paul Johnson at Energy Legal.

Please find attached a summary description of the guarantee for a number of obligations related to the proposed transaction that is being requested by OPG's investment dealers. There are 2 guarantees being requested: a guarantee of payment in certain situations as well as a performance guarantee. Although the Province has provided payment guarantees in the past, I am not aware of the Province provided guarantees of performance so this would be a new type of guarantee. We understand that these guarantees would have to be authorized by the proposed legislation so the wording of the authorizing sections needs to be worked on. Right now the section is very general and doesn't yet include the word "guarantee". Also there should be some wording around the type or scope of the guarantee or what it is in relation to. As well, I am assuming that payment under the guarantee would have to be a charge on the CRF in order to provide sufficient support. I am not sure whether the Province's liability under these guarantees can be capped. Also I understand there is a section in the proposed legislation indicating s. 28 FAA does not apply so this is something for us to consider too.

I understand that Tory's (OPG's counsel) is working on a first draft of the guarantee, but it does not appear that the scope of the guarantee would be settled before legislation is introduced.

I don't' know if you have seen the attached document previously. Who would you like us to speak to at the OFA about this proposal?

Thanks.

There are 2 guarantees being requested: a guarantee of payment in certain situations as well as a performance guarantee. Although the Province has provided payment guarantees in the past, I am not aware of the Province provided guarantees of performance so this would be a new type of guarantee. We understand that these guarantees would have to be authorized by the proposed legislation so the wording of the authorizing sections needs to be worked on. Right now the section is very general and doesn't yet include the word "guarantee". Also there should be some wording around the type or scope of the guarantee or what it is in relation to. As well, I am assuming that payment under the guarantee would have to be a charge on the CRF in order to provide sufficient support. I am not sure whether the Province's liability under these guarantees can be capped. Also I understand there is a section in the proposed legislation indicating s. 28 FAA does not apply so this is something for us to consider too.

I understand that Tory's (OPG's counsel) is working on a first draft of the guarantee, but it does not appear that the scope of the guarantee would be settled before legislation is introduced.

I don't' know if you have seen the attached document previously. Who would you like us to speak to at the OFA about this proposal?

Thanks.

Malle

Hi Carolyn,

Thanks for your email. Would it be possible to arrange a conference call today with yourself or your counsel most knowledgeable on this proposed securitization and transaction so that we can get an understanding of it and how it fits into any proposed authorizing legislation. Unfortunately we are not familiar with the proposed transaction although we have seen some general background information about the proposal. What role would a guarantee of investment dealers have in the transaction? We do have a copy of the legislation that we got via our clients at OFA and they were more engaged in the issue of a future proposed equity injection, but the most recent version that we have seen does not mention guarantees although there seems to be a very general contract authorization section. Of course, we have to generally think about s. 28 as well.

A call today to over the main elements of the proposed transaction and the legislation would be very helpful so that we can get back to Gadi.

Hi Michael & Malle – we will be sending you draft legislation to take a look at. Actual guarantees will follow later.

This relates to the government's Fair Hydro Plan and the promise to reduce rates by 25% by July. We are doing a sort of securitization, for which the legislation will provide a framework. We are contemplating provisions that allow "the Minister" to enter into agreements with respect to transactions contemplated by the legislation. Gadi and DM Angus are of the view that Minister should be MOF, as the agreements

are likely to be guarantees to investment dealers. Indemnities for the boards of OPG and IESO will also be required, although we didn't talk about who would sign those.

Happy to answer your questions or walk you through the proposed bill.

Hi Carolyn,

Gadi Mayman gave us a heads up that you might be giving us a call about a proposed guarantee that the Minister of Finance may be required to sign in relation to the changes to the global adjustment.

We're happy to discuss this. This afternoon is busy but tomorrow afternoon may work.

Thanks!

Michael

Hi Gadi,

I was thinking about the approach further and I think it would be best if I write to Len Hatzis (legal director at TBS) and Carolyn (so she is aware) first to let Len know the background that the DM of TBS is in favour of the Minister of Finance signing any required guarantee (although maybe he is well aware of this already) and also MOF/OFA view that we shouldn't exempt generally transactions under the new proposed Act from s. 28.
Then Len can let me know which TBS counsel are working on it as I think that it may be Nick and Paul but don't know for sure and don't know what their involvement on this file has been and I don't think I should send the email to TBS without letting Carolyn know.

Cc: Johnson, Paul (ENERGY/MEDEI/MRI)
Subject: RE: Guarantee

We have discussed this with the OFA, and we have endeavoured to provide a provision that we think should allow the financial guarantee being contemplated. Please let us know if you think it provides the necessary scope for what would be required to meet the Province's needs. We deleted the existing provision, although if you think that more general contractual authority is needed, something else could be considered. However, we don't think that it is appropriate to have a statutory appropriation for such general indemnity and guarantee provisions.

We would expect that the guarantee would be capped and only provide for the repayment of the principal and interest of the debt securities of the financial asset owner, and that would usually be done in the OIC.

We don't have any experience with performance guarantees. Is there a need for the Minister of Energy to require performance by the LDCs? We were also wondering if Blakes or another party involved in these discussions might have an example of what is being considered.

We also removed the exemption from s. 28 of the FAA. We have discussed this with OFA staff, and given the importance and breadth of this Act and Program, it doesn't seem appropriate to exempt the entire Act from s. 28 of the FAA.

Subject: RE: Nalcor: Request for Financing document

Hi Gadi,

This document is a newer one dated 2017 and is a request for financing. There are a number of schedules referenced in it (see the second page of the index) but the schedules are not attached. I wonder if it would be possible to obtain them as it would be very helpful to understanding the scope of the guarantee proposed in it. Schedule 1 is the Form of Canada Guarantee and there are some other schedules such as Form of Canada

Guarantee Opinion Letters etc.

The one I found was from an earlier transaction in 2012.

Thanks.

Malle

Hi Gadi,

Without spending too much time on it, I gather that the guarantee we have provided simply entails Canada talking over payment of the cashflows on the bonds (see sections 2.2-2.3). Hope this helps.

Nice talking to you.

Subject: OPG debt Guarantee

Hi Cindy, we all had to rush off to our next meetings following FPC, so we didn't get a chance to have a discussion about why a Provincial guarantee of all of OPG's debt related to the trust isn't a problem for the accounting treatment that we'd need to get to in order to make the GA smoothing plan work, while direct borrowing and on-lending from the Province is if it's greater than 49% of the total borrowing (actually 44% in their current model).

From a capital markets, investor and rating agency perspective, the guarantee is extremely likely to be lumped in with the rest of our debt, and would be considered just as much of a provincial obligation as guaranteed debt, particularly in this case where the reason that the guarantee is needed is because investors will demand it in order to protect themselves from legislative amendments by a future government. For that reason, it's hard to justify, from a capital markets or cost perspective, having OPG borrowing in its own name with a government guarantee, so is it possible to revisit the potential accounting treatment and determine whether, now that we've effectively moved to a guaranteed structure, we could just have the Province, through the OFA or OEFC, do all of the borrowing and on-lend to OPG?

Subject:	Re: Ontario Fair Hydro Plan
Date:	Wednesday, April 26, 2017 4:46:26 PM

I'm surprised on both, especially the second, as it was Energy's Chief of Staff that suggested that the two Ministers would be responsible for the guarantee. As for the first, there was a lengthy discussion on the s28, and Energy was basing their request for exemption on the Hydro One precedent, but the Deputy and Associate Deputy of TB and I rejected that argument given that Hydro One was a sale of shares, or the ownership of the company, while this plan will create debt that could become a liability of the Province.

I've added Dave in the DMO on to make sure I'm not overstepping here, but I think that we should push back very hard that the Ministry of Finance can't accept the exemption from s28 (and you could check with TB Legal Services as I think their direction from their Deputy would be the same).

Subject: Fw: Ontario Fair Hydro Plan

Please see attached the latest draft of the legislation. My understanding is that there is only room to make small tweaks based on the timeline right now.

Please note that Energy has not removed the exemption from section 28 in this draft. I am not sure if there has been any further discussion on that subject, but I think that if we want to push back on this issue it needs to be communicated as soon as possible.

Also, there is new language around the guarantee, but it does not contemplate the current plan to have both Ministers sign the guarantee. I have let Energy Legal know that this would make sense to change.

April 26, 2017

Hi, Toby. I am pleased to attach the most recent version of the draft legislation pertaining to the electricity rate reductions and intergenerational cost transfer.

Thanks for your help on all of this, and note that this version does not include amendments to EA ss.89 and 90 (PILS amendments). Those discussions are ongoing between MOF policy, OPG/Tory's and ENERGY is awaiting those discussions to close before finalizing the legislation on these matters.

Best regards,

James

I'm at a meeting with Carolyn and she confirmed that both of those changes will be in the next draft. The instructions were sent to Leg Council before yesterday's meeting where this was agreed to.

Hi Toby,

Thanks. I have not gone through the draft, but on the guarantee, to clarify, when you say there is new language around the guarantee, but that it does not contemplate both Ministers signing a guarantee, on a quick word search on "guarantee", it seems to say it would just be the Minister of Finance, not both ministers. That would seem okay from an MOF point of view.

Is that right?

Ron

Subject: Re: Ontario Fair Hydro Plan

I'm surprised on both, especially the second, as it was Energy's Chief of Staff that suggested that the two Ministers would be responsible for the guarantee. As for the first, there was a lengthy discussion on the s28, and Energy was basing their request for exemption on the Hydro One precedent, but the Deputy and Associate Deputy of TB and I rejected that argument given that Hydro One was a sale of shares, or the ownership of the company, while this plan will create debt that could become a liability of the Province.

I've added Dave in the DMO on to make sure I'm not overstepping here, but I think that we should push back very hard that the Ministry of Finance can't accept the exemption from s28 (and you could check with TB Legal Services as I think their direction from their Deputy would be the same).

Please see attached the latest draft of the legislation. My understanding is that there is only room to make small tweaks based on the timeline right now.

Please note that Energy has not removed the exemption from section 28 in this draft. I am not sure if there has been any further discussion on that subject, but I think that if we want to push back on this issue it needs to be communicated as soon as possible.

Also, there is new language around the guarantee, but it does not contemplate the current plan to have both Ministers sign the guarantee. I have let Energy Legal know that this would make sense to change.

Doesn't look like Cindy can make that time either, so there are too many people that should be involved in this discussion with OPG that can't make it. I'd suggest that we leave it in the hands of everyone who is going to be around next week, and then I can weigh in when I get back. I think you're all aware of the firm direction that I've left with the banks and OPG, without much room to move, even though I'm guessing the banks are going to try to come back with a structure that attempts to transfer as much risk on to us as possible.

> I had a call with Adrian Nalasco who is acting for Steen. He has indicated that along with Steen, Energy's Deputy is away so it is difficult for him to provide a formal go-ahead to us. I explained to him the time sensitivity and that we would have a discussion with OPG on an informal basis to get their feedback on the latest draft which

MOF Legal and Energy Legal have drafted. I gave him a bit of a background that OPG has had back and forth with us on previous versions of the draft.

With these caveats, Adrian is comfortable with various members of the OFA having discussions with OPG counterparts on the latest draft support agreement.

Thanks,

John

Hi Steen,

I'm sending the attached revised draft, non-binding term sheet on behalf of various parts of the OFA that are working on the Provincial guarantee / support agreement to support the OPG financing entity.

As you may have been informed, the attached draft term sheet was drafted jointly by MOF Legal, Energy Legal and Blakes' and is somewhat narrower in scope of the guarantee/support than the version that was provided by OPG in mid-August.

To discuss, we would like to host a meeting tomorrow, if possible, including your team and Energy Legal, MOF Legal and GBED. Also, Capital Markets folks here at the OFA are looking to share the draft term sheet with their counterparts at OPG. Pls. advise if you would have any issue with the sharing of the draft term sheet.

If you could advise of your availability, I would be happy to coordinate on behalf of everyone here at the OFA.

Thanks,

John

John,

Together with our outside counsel at Blake's and Energy Legal we have revised the term sheet further.

The attached note, prepared by Energy Legal is a good summary of the issues and where things stand.

I think the next step is to have you and Ron discuss this draft, and prepare to meet with staff at the OFA and Energy once Gadi returns next week and has been briefed on the progress.

Please share as you think makes sense at the OFA, and let me know if you want to discuss further.

Hi Cindy, Mark,

Ron and Ken are both away this week so I'm sending this at Gadi's request. As you will recall from the implementation meeting this morning, FHP-related bond issues by OPG FE will require a Provincial support to make it financeable.

The attached note by MOF Legal and Energy Legal staff [still draft for discussion purpose] would provide you with a sense of where the term sheet discussions currently are. It is possible that OPG may require more support than envisioned in the attached draft, which would be based on factors such as financeability, etc.

Apologies for the request just before your vacation but could you let us know if OPCD would have any concerns?

Thanks,

John

Ok thanks Cindy. We may have some follow up questions when you return. I understand from Sarah that we can direct questions to Mark in your absence. Have a good vacation.

> The last term sheet I had was dated August 14. The term sheet you attached is narrower than that version. I haven't been involved in any calls on this matter since August 10 and on that date, I couldn't stay for the entire call. Given all that, I'm not much help on your questions as I haven't been privy to any discussion re: narrowing the terms. I did send comments on the Aug 14 term sheet to Scott Nelms who noted that those he flipped to OFA, so assuming you have them (I've attached them here just in case). I agree with the narrowing as I had concerns with some of the language in the August 14th document.

Hi John –can you clarify what you mean by "more support" – more re: in scope of when the guarantee kicks in? If not, is there a section of the attachment that you are referring to?

Hi Cindy, Mark,

Ron and Ken are both away this week so I'm sending this at Gadi's request. As you will recall from the implementation meeting this morning, FHP-related bond issues by OPG FE will require a Provincial support to make it financeable.

The attached note by MOF Legal and Energy Legal staff [still draft for discussion purpose] would provide you with a sense of where the term sheet discussions currently are. It is possible that OPG may require more support than envisioned in the attached draft, which would be based on factors such as financeability, etc.

Apologies for the request just before your vacation but could you let us know if OPCD would have any concerns?

Thanks,

John

John,

Together with our outside counsel at Blake's and Energy Legal we have revised the term sheet further.

The attached note, prepared by Energy Legal is a good summary of the issues and where things stand.

I think the next step is to have you and Ron discuss this draft, and prepare to meet with staff at the OFA and Energy once Gadi returns next week and has been briefed on the progress.

Please share as you think makes sense at the OFA, and let me know if you want to discuss further.

Best

I agree that it makes sense to share it right away.

I just want to make sure that we are sharing the right version, which should be in the version that John shared yesterday afternoon and with "shared clean" in the file name.

Hi Mike, Ken,

I had a call with Adrian Nalasco who is acting for Steen. He has indicated that along with Steen, Energy's Deputy is away so it is difficult for him to provide a formal go-ahead to us. I explained to him the time sensitivity and that we would have a discussion with OPG on an informal basis to get their feedback on the latest draft which MOF Legal and Energy Legal have drafted. I gave him a bit of a background that OPG has had back and forth with us on previous versions of the draft.

With these caveats, Adrian is comfortable with various members of the OFA having discussions with OPG counterparts on the latest draft support agreement.

Thanks,

John

Hi Steen,

I'm sending the attached revised draft, non-binding term sheet on behalf of various parts of the OFA that are working on the Provincial guarantee / support agreement to support the OPG financing entity.

As you may have been informed, the attached draft term sheet was drafted jointly by MOF Legal, Energy Legal and Blakes' and is somewhat narrower in scope of the guarantee/support than the version that was provided by OPG in mid-August.

To discuss, we would like to host a meeting tomorrow, if possible, including your team and Energy Legal, MOF Legal and GBED. Also, Capital Markets folks here at the OFA are looking to share the draft term sheet with their counterparts at OPG. Pls. advise if you would have any issue with the sharing of the draft term sheet.

If you could advise of your availability, I would be happy to coordinate on behalf of everyone here at the OFA.

Thanks,

John

Hi all,

We had a very useful meeting with Blakes (Steven Ashbourne) and Energy Legal this morning. There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

At our meeting we discussed, that a useful next step would be to have another meeting with Provincial representatives and Blakes which would include yourselves from the OFA, Energy legal and Energy reps as well as the Provincial Controller and likely TD as well as the Province's financial advisor so that we can all discuss next steps and the best approach.

In the meantime, Toby and I can have an internal call to give you an update on our meeting this morning. Possibly at 3pm today if that works.

Thanks.

Malle

Hi Malle,

Thanks for the list.

Would it be helpful if the group met again to discuss?

When are you meeting with Energy Legal and Blakes?

Ron

Hi all,

We are also putting together an issues list for discussion with Energy Legal and Blakes and will share it with you as

well.

Is there any type of draft term sheet for the proposed financing transaction itself or the master sales and servicing agreement? Any general description of the proposed transaction would be helpful to us.

Thank you.

There are quite a few legal issues and concerns to discuss regarding this term sheet as it is overly broad. At this point in the development of the province's role in support, it seems that the development of this type of term sheet is premature given the uncertainties.

>
> Please find attached a markup of the TB submission, as well as a revised term sheet and OIC.
>
> The term sheet is as we have discussed further with Blakes, and as revised by them to reflect our discussions. The document has been renamed to a “protection agreement” because the authority and the obligation is not necessarily an assumption of the obligations of a Financing Entity, and is rather the payment of such obligations. I have attached both the clean and blacklined versions.

The OIC draft is an update of the latest version that was circulated, with the notes to draft removed as there were no further comments.

We have marked up the TB submission to reflect the current status of the negotiation of the term sheet and subject to necessary approvals. We have deleted the attached term sheet from the markup so that the revised version can be inserted instead. We also think it makes sense to include the draft OIC in the TB materials.

Please let me know if you have any comments or questions.

Hi Anna

Sorry I couldn't attend the Management meeting, I wanted to provide my comments and edits before I left, pls let me know if you have any questions. I would also hope that OPG will be able to provide a draft of the guarantee itself that can also be attached.

Finally, you should also reserve a space in the submission for comments from MOF Legal and Stephen Ashbourne.

Thanks

Ken k

Subject: TBMBC Submission Provincial Guarantee (OFA) 08162017.doc

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

OFA -- IESO ~~FAIR HYDRO PLAN~~ CREDIT FACILITIES~~Y~~
MINISTER OF FINANCE DIRECTIVE TO EXEMPT THE INTERCEPT PROVISION
("INTERCEPT EXEMPTION DIRECTIVE")
REQUIRED UNDER THE OFA'S LENDING POLICY

The Independent Electricity System Operator (IESO) requested a revolving credit facility ("the credit facility") in an amount of up to $2 billion from the Ontario Financing Authority ("OFA") to support its role in the implementation and participation under the *Ontario Fair Hydro Plan Act, 2017* ("OFHP Act"). In the same request, the IESO had requested a reduction to its existing credit facility from the current $975 million to $475 million.

On June 29, 2017, the OFA received a Lending Directive from the Minister of Finance to accommodate the IESO's request.

Per the requirements of the OFA's Lending Policy, the OFA is returning to request a Minister's direction to exempt from the Intercept Provision both the new $2 billion credit facility to support the IESO's role in the Fair Hydro Plan~~current~~ and the reduced $475 million ~~proposed IESO~~ credit facility~~ies from the Intercept Provision~~.

- Note: The Intercept Provision under the OFA's Lending Policy for unsecured lending to a public body requires that, unless exempted by the Minister of Finance [or Treasury Board or Cabinet], the OFA ~~to~~ put in place a provision whereby the OFA is entitled to deduct amounts equal to any amounts the public body fails to pay to the OFA under the loan, from money appropriated by the Legislature for payment to the public body.

RECOMMENDATION

- OFA staff recommend the Minister sign the Intercept Exemption Directive allowing the OFA to provide these credit facilities ~~exempt~~to the IESO without ~~from the~~an Intercept provision under~~of~~ the OFA Lending Policy.

CONSIDERATIONS

- This will enable the IESO fulfil commitments under the OFHP Act as the IESO will have to finance for a short ~~to~~or medium term period the funding shortfalls in the implementation of the Fair Hydro Plan.

  - ~~Note: The Intercept Provision under the OFA's Lending Policy for unsecured lending to a public body requires that, unless exempted by the Minister of Finance [or Treasury Board or Cabinet], the OFA to put in place a provision whereby the OFA is entitled to deduct amounts equal to any amounts the public body fails to pay to the OFA under the loan from money appropriated by the Legislature for payment to the public body.~~

- Under the OFA Lending Policy, the following is provided for:

  "Except where otherwise directed by the Minister of Finance, Treasury Board or Cabinet, and prior to the OFA making any loan to a public body, the OFA will [e]nsure that it has an appropriate intercept in place for the loan."

- The intercept in the OFA Lending Policy includes the following:

Formatted
Formatted: Font: Bold
Formatted
Formatted
Formatted: Normal, No bullets or numbering
Formatted: Font: (Default) Arial, 11 pt
Formatted: Indent: Left: 0.25", No bullets or numbering
Formatted: List Paragraph, Indent: Left: 0", Bulleted + Level: 1 + Aligned at: 0.5" + Indent at: 0.75"

- The public body and its responsible ministry are to agree that the Minister of Finance is entitled to deduct from money appropriated by the Legislature for payment to the public body amounts equal to any amounts that the public body fails to pay to the OFA on account of indebtedness under its loan agreement with the OFA.

- ~~The~~An Intercept Provision would ha~~s~~ve no practical usefulness in the case of the IESO as it receives no operational funding from the Province. While the IESO settlements system for the electricity sector may facilitate the flow of ~~A~~appropriations of the Ministry of Energy ~~for payment to the IESO are for settlement of payments~~ for energy-related programs such as the Ontario Rebate for Electricity Consumers (OREC), the Rural or Remote Rate Protection Program (RRRP), the Ontario Electricity Support Program (OESP) etc., these payments are for the benefit of various electricity consumers. Intercepting these program specific payments, ~~merely facilitated by~~under which the IESO~~,~~ may only be providing a conduit to local distribution companies under the IESO settlement system to provide benefits to ratepayers, in order to recover loan payments would not be in alignment of the intent of the OFA's Lending Policy.

MINISTER'S DIRECTIVE

- The Minister of Finance's Intercept Exemption Directive would authorize the OFA to exempt the two revolving credit facilities to the IESO [per the Minister's Directive signed on June 29, 2017] from the Intercept ~~P~~provision ~~outlined in~~under the OFA Lending Policy ~~from the revolving credit facility to the IESO [per Directive signed on June 29, 2017]~~.

- [The Intercept Exemption Directive would also exempt any lending to the IESO from the OFA, previously authorized and/or subsequently amended, to be exempt from the Intercept Provision.]

FISCAL IMPACT

- There is no expected~~would be a relatively small but positive~~ incremental fiscal impact for the Province from providing an exemption from the intercept provision.~~as a result of the credit facility and the Intercept Exemption Directive is not anticipated to change this.~~
  - ~~The Province receives a small fiscal benefit by adding 25 basis points (i.e., 0.25%) to the Province's cost of funds provided to the IESO under the facility, which should more than offset any administrative cost impact on the OFA and Province.~~
  - ~~The actual amount is expected to be small, as the IESO is expected to make draws for short periods to bridge brief timing differences in cash flows.~~

BACKGROUND

The IESO

- The IESO is a not-for-profit corporate entity established in 1998 by the *Electricity Act, 1998*. It is governed by an independent Board of Directors and its Chair and Directors are appointed by the Province.

COMMERCIALLY SENSITIVE AND CONFIDENTIAL ADVICE TO MINISTER

Formatted: Font: (Default) Arial, English (Canada)

Formatted: List Paragraph, Indent: Left: 0.5", Bulleted + Level: 2 + Aligned at: 1" + Indent at: 1.25"

Formatted: Font: (Default) Arial

Formatted: Font: 11 pt

Formatted: Indent: Left: 0.25", No bullets or numbering

Formatted

Commented [SK81]: This is to ensure both the 2B and 475M credit facilities are covered.

Commented [RK2]: Agreed?

Commented [RK3]: What about saying that as IESO is a consolidated entity, and if there were any amounts to intercept, there would be no incremental fiscal impact of not having an intercept provision?

Formatted: Underline

- The IESO has full statute-based authority for establishing, monitoring and enforcing reliability standards in the province. All the companies that make up the power system in Ontario must meet the IESO's standards.
- Its fees and licences to operate are set by the Ontario Energy Board and it operates independently of all other participants in the electricity market.

~~The OFA Lending Policy~~

~~[Add some background bullets.]~~
~~The OFA Lending Policy provides for….~~

I have incorporated Ken's comments into the correct template. If you haven't yet started editing the document sent yesterday, please use the attached. I've added some additional background detail that will require review.

If I could please ask for any comments asap that would be much appreciated. I'll be sending to OPCD, Energy and MOF early this afternoon for comment.

Hi Anna

Sorry I couldn't attend the Management meeting, I wanted to provide my comments and edits before I left, pls let me know if you have any questions. I would also hope that OPG will be able to provide a draft of the guarantee itself that can also be attached.

Finally, you should also reserve a space in the submission for comments from MOF Legal and Stephen Ashbourne.

Thanks

Ken k

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft

of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

PROVINCIAL GUARANTEE TO OPG FINANCING ENTITY

Commented [KR(1]: As discussed earlier, presumably the PG part would be part of the Energy TB submission; however, as the Act requires an OIC, should this be drafted in the OIC approval form instead?

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide a guarantee or guarantees to ~~the~~one or more OPG Financing Entit~~y~~ies established to perform under the Ontario Fair hydro Plan Act and such entity or entities~~its~~ prospective debt holders, that, under certain circumstances, the Province would assume the debt obligations of the Financing Entity. The provincial guarantee would protect~~s~~ investors from an adverse change in law or inability to fund in capital markets.

This submission is to request that Treasury Board:

(a) Approve that the Minister of Finance and Minister of Energy provide a provincial guarantee, as contemplated under the Ontario Fair Hydro Plan Act, to one or more~~the~~ OPG Financing Entities~~ty~~ under the terms set out in Appendix;

(b) Note that the ministry of Energy will also be submitting to the Minister of Finance a request ~~will sign~~for approval, under ~~a~~ Section 28 of the Financial Administration Act, contingent liabilities arising from the provision of the guarantee ~~approving a contingent liability equal to the esti~~

Commented [KR(2]: Might want to include in the submission the relevant excerpt from section 5 of the Act.

(3) The Lieutenant Governor in Council may by order,
(a) authorize the Minister and the Minister of Finance, acting together on behalf of the Province,
(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;
(b) specify terms and conditions that must be included in any guarantee or indemnity given by the Minister and the Minister of Finance; and
(c) specify a maximum liability for the guarantee or indemnity.

3. SUMMARY OF FINANCIAL IMPLICATIONS

The following two tables provide a summary of the funding request for the Ministry, by standard account and by program area. Detailed financial information is provided in the Appendices.

$M (except FTEs)

Ministry Summary					
PSAB *	**2006-07**	**2007-08**	**2008-09**	**2009-10**	**Total**
Salaries/Wages					
Employee Benefits					
Transportation & communication					
Services					
Supplies & Equipment					
Total					
Offset (enter as negative number)					
Total net of Offset					
Classified FTEs at March 31					
Unclassified FTEs at March 31					
* If cash implications differ from PSAB, please provide cash numbers in a separate table.					

$Million

Financial Implications by Program Area					
	2006-07	**2007-08**	**2008-09**	**2009-10**	**Total**
Division/Branch					
Division/Branch					
Total					

4. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP), which would lower bills by 25% for a typical residential consumer, starting in the summer of 2017. The OFHP includes the deferral of a portion of the Global Adjustment portion of the cost of electricity. The deferral~~It~~ is built around the principle that the costs incurred to put in place assets for generation and support conservation to move to a clean, reliable system, would last longer than there typical 20-year contract period and would be able to ~~creates~~provide benefits ~~across generations~~for future ratepayers, and that the costs ~~that~~ should be spread more fairly.

To this end, immediate rate relief to eligible ratepayers is provided by spreading the cost of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the Act), which came into effect on June 1, 2017, enables the implementation of the OFHP. The IESO ~~will~~is able to create a regulatory asset approximately equal to the difference between collections from current ratepayers and payment obligations to generators and conservation. The Act provides for the IESO to sell the regulatory asset and the right to recover those deferred amounts from specified consumers in the future Under the ~~OFHP~~Act, a Financing Entity will purchase the regulatory asset, effectively financeing the shortfall in ~~revenues~~current rates not received from the ratepayers.

~~The *Ontario Fair Hydro Plan Act, 2017,* (the Act), which came into effect on June 1, 2017, enables the implementation of the OFHP. The Act provides for the IESO to sell the regulatory asset and the right to recover those deferred amounts from specified consumers in the future~~.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against risk, the debt would not be financeable. OPG is, therefore, requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:

Commented [KR(3]: Might want to rephrase / reorder to when the Act was passed, and specify this is in relation to the GA refinancing portion of the OFHP. (Avoids the proposed type wording.

Commented [KR(4]: Might want to note that this estimate is being updated (and will be as part of Energy's overall report back, putatively.

Commented [KR(5]: You might want to tie into previous Energy submissions, including on the OFHP Act, that had already reported on the need for a PG and the Act then providing for the two Ministers to provide such a PG. There may even be a Minute to reference supporting the PG in concept, with the specifics to be approved via OIC and the Ministers.

- Decisions by the Legislative Assembly, i.e., repeal of the Ontario Fair Hydro Plan Act, 2017, or amendments or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
- Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

The Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

The guarantee would continue until all obligations of the Financing Entity are fully discharged.

The Ministry of Energy will be reporting back to TB/MBC on September xx.

5. ADMINISTRATIVE IMPACTS:

Commented [KR(6]: Are we going to say this will be managed by existing staff?

6. RISKS:

If the guarantee is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the guarantee is approved, the Government of Ontario takes on a contingent liability. The amount of the liability will increase over the duration of the Fair Hydro Plan and peak at an estimated [$24B to $26B (to be revised as Energy re-estimates)] of debt principal, along with associated interest payments.

In the event the guarantee is triggered, the Province's net debt will increase by an amount equal to the contingent liability at that point in time.

~~Likewise, t~~The Province's interest payments will also increase by amount equal to the weighted average cost of the debt it has assumed under the guarantee.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense ~~will~~may increase ~~anywhere~~ between [$0.8B and $1.3B] per annum, depending on the interest rate at which the Financing entity will be able to borrow at.

Commented [KR(7]: To be updated based on what Energy revises its estimates of the FHP curve and reports back on.

It is important to note that, if the guarantee is triggered, ~~for~~and the Province assumes the obligation to service and pay down the debt ~~it assumes~~, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the Act continue or not, in some form. ~~as well as minimize the fiscal impact from the associated IOD expense, the other provisions of the Fair Hydro Plan including~~If the payment streams from ratepayers in the Clean Energy Adjustment (CEA) ~~need to~~ continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if determined by a court not to be constitutional) and not replaced by another authorized charge~~. If not~~, the incremental IOD expense would impact~~s~~ the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. OPERATIONAL REQUIREMENTS:

8. COMMUNICATION PLAN

8. BUSINESS CASE:

11. REVENUE IMPACT:

12. PERFORMANCE MEASURES:

14. IMPLEMENTATION PLAN:

15. RECOMMENDATION

a) Approve a provincial guarantee to the OPG Financing Entity under the terms set out in Appendix;

b) Note the Minister of Finance will sign a Section 28, approving a contingent liability.

Commented [KR(8]: Recommend repositioning, as noted above.

Hi Anna,

Some suggestions, as discussed. It might be better to reframe this under a request for OIC approval.

I will commit that CEFD staff are available to provide further input into such a submission -- (thanks John, et al!).

I have incorporated Ken's comments into the correct template. If you haven't yet started editing the document sent yesterday, please use the attached. I've added some additional background detail that will require review.

If I could please ask for any comments asap that would be much appreciated. I'll be sending to OPCD, Energy and MOF early this afternoon for comment.

Hi Anna

Sorry I couldn't attend the Management meeting, I wanted to provide my comments and edits before I left, pls let me know if you have any questions. I would also hope that OPG will be able to provide a draft of the guarantee itself that can also be attached.

Finally, you should also reserve a space in the submission for comments from MOF Legal and Stephen Ashbourne.

Thanks

Ken k

Subject: TBMBC Submission Provincial Guarantee (OFA) 08162017.doc

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

Hi Anna,

Just a comment.

While I would not expect it in this case, given the size and what the trigger would be, TB sometimes requires submitting ministries to acknowledge finding offsets, should contingent liabilities crystallize.

So, not held by a particular ministry for accounting, but sometimes a Minuted point and ministry responsibility. As stated, though, I would not expect it in this case. Might be good to confirm with the relevant TBS analyst. (Who would that be, and has TBS started drafting an assessment note?)

Hi Anna,

Here are the updates I'm requesting to the submission.

Pg 1 need to be consistent under points (a) and (b) should read always as Minister of Finance and Minister of Energy through the entire document.

Pg 5 Recommendation should read; The Ministry of Finance and Ministry of Energy requests that Treasury Board/Management Board of Cabinet: currently says Approve, I thought we were using "Authorize" same as pg. 1

Also for the minuting, as opposed to referencing an Appendix, we should say under the terms set out under the Change of Law Assumption Agreement, Indicative Term Sheet.

Questions, in the essence of time I will have a couple more questions later today… but,

Who is holding the contingent liability MOE or MOF ?

Thanks,
Anthony

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Hi Ken,

Agreed that the submission covers those points. The issue is if TB or TBS would want to identify a ministry as responsible for an offset, in that eventuality. As noted, given the magnitude and nature of the potential triggers, I would not be expecting TB to require an offset (which I read to be CQSD's implied concern on which ministry or ministries would be identified as needing to provide an offset in that eventuality).

Ron

Subject: RE: TB/MBC Submission on Assumption Agreement - recommendations and questions

Hi Ron

When you refer to offsets I guess you mean an offset to any fiscal impact that may arise from the crystallization of a liability. Note that the mere crystallization of a liability has no fiscal impact (only impacts net debt) unless its accompanied by an increase in expenses which is usually in the form of an increase to the Province's IOD.

The submission currently addresses this issue by pointing out that the invocation of the guarantee, or as it is now called, the assumption, will impact both net debt and IOD. The submission also goes on to indicate that unless the CEA revenue stream diverts to the Province from the Financing Entity, upon assumption, there will be a fiscal impact from the incremental IOD.

The submission goes on to state that the net effect of the assumption sans the CEA (if that is will of the Government in power at that time) will be the taxpayer taking on a debt burden incurred for the benefit of the ratepayer, with very limited recourse for repayment.

Hope that satisfies your concern, I am meeting with Cindy next week Monday to ensure that both OPCD and the OFA are on the same page re the impact of the assumption.

Thanks

Ken k

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Anna

Anna Strathy
Special Policy Advisor to CEO

Subject:	TB Submission for Change of Law Protection Agreement
Date:	Tuesday, September 12, 2017 2:45:24 PM
Attachments:	TB20 Submission_Provincial Support Agreement_V7-MOF Legal Comments.docx 23148306-vpdf-Term Sheet - Provincial Support Agreement - May 12.pdf 23148306-v15-Term Sheet - Provincial Support Agreement - Sept. 12.docx OIC - FHP S.5 Draft September 12.doc

---

Please find attached a markup of the TB submission, as well as a revised term sheet and OIC.

The term sheet is as we have discussed further with Blakes, and as revised by them to reflect our discussions. The document has been renamed to a “protection agreement” because the authority and the obligation is not necessarily an assumption of the obligations of a Financing Entity, and is rather the payment of such obligations. I have attached both the clean and blacklined versions.

The OIC draft is an update of the latest version that was circulated, with the notes to draft removed as there were no further comments.

We have marked up the TB submission to reflect the current status of the negotiation of the term sheet and subject to necessary approvals. We have deleted the attached term sheet from the markup so that the revised version can be inserted instead. We also think it makes sense to include the draft OIC in the TB materials.

Please let me know if you have any comments or questions.

CHANGE OF LAW PROTECTION ~~ASSUMPTION~~ AGREEMENT

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide protection and assurance arrangements in respect of debts, obligations, securities or undertakings associated with investment interests acquired by one or more financing entities established by Ontario Power Generation Inc. pursuant to s. 22 of the Ontario Fair Hydro Plan Act, 2017 ("OPG Financing Entities"), that, under certain circumstances as set out in the ~~Change of Law Assumption Agreement ("assumption agreement"),~~proposed arrangements the Province would pay when due amounts in respect of the obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Authorize that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide a~~n assumption~~protection agreement, to be authorized by Order in Council under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities ~~under~~ substantially reflecting the terms set out in the Appendix and subject to such revisions that the two ministers acting together may determine;

(b) Recommend to Cabinet an Order in Council, to be made under subsection 5(3) of the *Ontario Fair Hydro Plan Act, 2017* that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

~~specify terms and conditions that must be included in any guarantee or indemnity given by the Minister of Energy and the Minister of Finance; and~~

~~specify a maximum liability for the guarantee or indemnity.~~

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP) to lower electricity bills by 25%, on average, for a typical residential consumer, and holding increases to the rate of inflation for four years. As part of OFHP, it was announced that a portion of the Global Adjustment (GA) would be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system). This would be achieved by spreading the cost of electricity investments so that they are shared proportionately by future consumers who cause a need for, or benefit from, the province's multi-billion dollar investments in electricity infrastructure.

To this end, immediate rate relief to eligible ratepayers is provided by deferring and spreading the cost recovery of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. The Ministry of Energy will report back to TB/MBC in fall 2017-18 with an update on out-year projections following analysis on rate applications before the Ontario Energy Board.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the "OFHPA"), which enables GA Refinancing, the Independent Electricity System Operator (IESO) will have a funding gap resulting from the reduction in amounts collected over four years. The legislation enables IESO to record the under-collection of GA in a variance account, and deems this under-collected amount to be a "Regulatory Asset". The OFHPA provides for the IESO to sell all or a portion of the regulatory asset; i.e., the right to recover those deferred amounts from specified consumers in the future. Under the OFHPA, a Financing Entity (i.e., an entity established or caused to be established by OPG as the Financial Services Manager under the OFHPA) will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative and judicial risk, the debt would not be financeable. OPG, therefore, has advised that the Government of Ontario provide a change of law ~~assumption~~protection agreement to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would ~~step in and assume~~pay the funding obligations of the Financing Entity.

OFA, the Ministry of Finance and external advisors – consistent with OPG advice – recommend limiting activation of the ~~assumption~~protection agreement to the following circumstances:

- Actions of the Legislative Assembly that undermine the financing arrangement, i.e., repeal or amendment of the OFHPA or new legislation that adversely affects ability of an ~~the~~OPG Financing Entity to receive amounts relating to its investments interest so that it can pay its funding obligations;
- A court decision that declares the ability of an OPG Financing Entity to receive amounts on its investment interest so it can pay its funding obligations to be invalid or unenforceable~~A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable~~; and
- [Changes to the organization, structure or operations of IESO or a change in the electricity market structure or operations that adversely affects the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations. *Note: this third ~~assumption~~protection event is not included in the current draft of the term sheet agreed to by Ministry of Finance staff; however, OPG is expected to continue to negotiate for its inclusion. It has been included in the TB submission, but may be removed once negotiations are complete, prior to TB/MBC consideration of this item on September 26, 2017*.]

In the event the ~~assumption~~protection agreement is triggered, the Province would be required to pay principal and interest on debt issued by the Financing Entity and other obligations of the Financing Entity as ~~it~~ they come~~s~~ due (without acceleration). The Province may also be required to pay other obligations which may include payments under derivatives agreements and to service providers.

In addition, the Province would also have the option to ~~assume~~ directly replace the OPG Financing Entity~~'s~~ with respect to its outstanding rights obligations and liabilities, but if the Province decided to do so additional authority would be required.~~.~~

The ~~assumption~~protection agreement would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Section 28 of the *Financial Administration Act (FAA), 1990* requires that the Minister of Finance's approval is obtained before a ministry seeks an Order in Council (OIC) ~~before a ministry~~to enter~~s~~ into a guarantee or indemnity that would increase the contingent liabilities of Ontario. In this case, the Minister of Finance,

together with the Minister of Energy, is recommending the OIC to Cabinet and will, acting together with the Minister of Energy, determine the terms and conditions of and execute the proposed guarantee/indemnity in accordance with the OIC, if approved.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

DRAFT

6. RISKS:

If the ~~assumption~~protection agreement is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the ~~assumption~~protection agreement is provided, the Province of Ontario takes on a contingent liability. The amount of the liability would increase over the duration of the OFHP and peak at an estimated $24B to $26B of debt (final cost forecasts TBC), including principal and accumulated interest.

In the event the ~~assumption~~protection agreement is triggered, the Province's net debt would be expected to increase by an amount equal to the contingent liability for the debt outstanding at that point in time. The Province's interest payments will also increase by the debt interest servicing of the debt payment obligations it ~~has assumed~~will be required to make under the ~~guarantee~~protection agreement. In addition there may be additional payments on derivatives agreements and for service providers that the Province will be required to make.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between $0.8B and $1.3B per annum (final cost forecasts TBC), depending on the interest rate at which the Financing Entity will be able to borrow at.

It is important to note that, if the ~~assumption~~protection agreement is triggered, and the Province ~~assumes~~ becomes responsible for the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the OFHPA continue or not, in some form. If the payment streams from ratepayers via the collection of the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if the OFHPA is repealed or is determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. COMMUNICATION PLAN

Key Messages

DRAFT

- Ontario's Fair Hydro Plan has resulted in the biggest electricity rate reduction in Ontario's history.
- We have heard from Ontarians across the province that the price of electricity has risen too quickly, which is why we moved forward with a plan to ensure the costs are shared more evenly over the years ahead.
- The government is following through on its commitment to balance the books as announced in its 2017 Budget, while continuing to make investments in priority areas such as electricity price relief.

Strategic Approach

- Low-profile, reactive and targeted to industry stakeholders and government employees as necessary. Reactive messaging contingent upon legislative changes only with back-pocket QAs to support as needed.
- Communications support will continue to be led by the Ministry of Energy.

8. RECOMMENDATION

(a) Approve that the Minister of Finance and Minister of Energy provide a ~~support~~ protection agreement, to be authorized by Order in Council under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities ~~as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under~~ substantially reflecting the terms set out in the Appendix and subject to such revisions that the two ministers acting together may determine;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity.~~;~~

~~specify terms and conditions that must be included in any guarantee or indemnity given by the Minister of Energy and the Minister of Finance; and~~

~~specify a maximum liability for the guarantee or indemnity.~~

~~Change of Law Assumption Agreement~~

~~Indicative Term Sheet~~

~~Ontario Fair Hydro Plan Act, 2017~~

*~~This indicative term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 (the "**Act**") and the regulations made thereunder (the "**Regulation**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate. This Term Sheet is not intended to create any obligations or be binding on the parties.~~*

~~Change of Law Assumption Agreement:~~	~~A Change of Law Assumption Agreement will be among the Obligor, a Financing Entity and an Indenture Trustee, acting for and on behalf of the Beneficiaries in accordance with a Trust Indenture.~~
~~Obligor:~~	~~The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.~~
~~Indenture Trustee:~~	~~An indenture trustee, acting for itself and on behalf of other persons entitled under an applicable Trust Indenture.~~
~~Beneficiaries:~~	~~The Indenture Trustee, acting for itself and on behalf of other persons entitled under Specified Claims.~~
~~Specified Claims:~~	~~Payment obligations of the Financing Entity that are secured under the Trust Indenture and that are approved as contemplated below under Obligor Approval.~~ ~~Specified Claims are expected to include principal and interest on senior debt obligations issued by the Financing Entity [and any other monetary obligations of the Financing Entity that rank ahead of or equally in priority of payment with the senior debt obligations of the Financing Entity pursuant to the Trust Indenture].~~
~~Assumption Events:~~	~~Any of the following would constitute an Assumption Event:~~ ~~(A) (1) the Legislature repeals (and does not replace on an equivalent basis) or amends the Act or any portion thereof;~~ ~~(2) the Legislature enacts or amends any other statute;~~ ~~(3) the Lieutenant Governor in Council repeals (and~~

	does not replace on an equivalent basis) the General Regulation made under the Act or any portion thereof; or (4) the Lieutenant Governor in Council, a minister of the Crown, an official of the government or a board or commission all the members of which are appointed by the Lieutenant Governor in Council makes or amends any "regulation" (as defined in Part III of the *Legislation Act, 2006*), in each case, that materially and adversely affects (a) the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims or (b) the Change of Law Assumption Agreement or any of the agreements under which Specified Claims arise without the agreement of the Indenture Trustee; or (B) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act or the Regulation is *ultra vires* in a way that materially and adversely affects the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims.
Obligation to Assume Specified Claims:	Upon the occurrence of an Assumption Event, the Indenture Trustee will have the right to require the Obligor to pay the amount of Specified Claims on behalf of the Financing Entity when they become due and payable (without acceleration). The exercise of such right by the Indenture Trustee in accordance with the Trust Indenture shall constitute the only remedy available under the Change of Law Assumption Agreement. Under no circumstances shall the Obligor be obligated to pay or indemnify a Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Subrogation:	Upon paying an amount to a Beneficiary in respect of a Specified Claim, the Obligor shall become entitled to all of the applicable Beneficiary's rights and interests under and in respect of the Specified Claim, including the security interest in each related investment interest and related property of the Financing Entity and the obligations of the Financing Entity owing under the agreements under which the Specified Claim arises. The Financing Entity may not change or consent to any change in such rights and interests without the Obligor's prior written consent.

Optional Replacement:	At any time following the exercise by the Indenture Trustee of its right to require the Obligor to pay Specified Claims when due and payable, the Obligor shall be entitled (but not obligated) to replace the Financing Entity as obligor and debtor and directly assume all of the Financing Entity's outstanding obligations and liabilities. The Financing Entity (including through the Financial Services Manager) will ensure that any obligation and liabilities undertaken or assumed by it will by their terms permit such a replacement and assumption (or, if applicable, satisfaction and termination) by the Obligor without additional cost or penalty and without any requirement for further consent, approval or agreement.
Term:	The Change of Law Assumption Agreement will continue for as long as any Specified Claim remains outstanding.
Obligor Approval:	The Change of Law Assumption Agreement will become effective in respect of a Specified Claim (including any modification) only after the Obligor has confirmed in writing that the Change of Law Assumption Agreement applies to such Specified Claim. The Change of Law Assumption Agreement will annex the applicable forms of program and series documents under which obligations of the Financing Entity may arise (e.g., including the form of trust indenture and series supplemental indenture) and set out the terms and conditions and process for obtaining the Obligor's approval and confirmation that the Change of Law Assumption Agreement will apply to Specified Claims. Such approval may be made conditional on such matters as may be specified by the Obligor, including a maximum amount applicable to Specified Claims. The Province's approval of the form of any IESO/Financing Entity transfer agreement and any amendments will also be required.
FIPPA:	The Change of Law Assumption Agreement will acknowledge that the Obligor will be bound by the *Freedom of Information and Protection of Privacy Act* (Ontario) and that any information provided to the Obligor, or any agent or representative of the Obligor in connection with the Change of Law Assumption Agreement, may be subject to disclosure in accordance with the act or as otherwise required by law.

~~**Representations and Warranties:**~~	~~To be determined by the Minister of Finance and Minister of Energy in negotiation with the Financing Entity.~~
~~**Confidentiality Obligations:**~~	~~To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Obligor and the Financing Entity.~~
~~**Governing Law:**~~	~~Province of Ontario.~~

Provincial Protections and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This indicative term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 (the "**Act**") and the regulations made thereunder (the "**Regulation**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate. This Term Sheet is not intended to create any obligations or be binding on the parties.*

Change of Law Protection Agreement:	A Change of Law Protection Agreement will be among the Obligor, a Financing Entity and an Indenture Trustee, acting for and on behalf of the Beneficiaries in accordance with a Trust Indenture.
Obligor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indenture Trustee:	An indenture trustee, acting for itself and on behalf of other persons entitled under an applicable Trust Indenture.
Beneficiaries:	The Indenture Trustee, acting for itself and on behalf of other persons entitled under Specified Claims.
Specified Claims:	Payment obligations of the Financing Entity that are secured under the Trust Indenture and that are approved as contemplated below under Obligor Approval.
Protection Events:	Any of the following would constitute a Protection Event: (A) (1) the Legislature repeals (and does not replace on an equivalent basis) or amends the Act or any portion thereof; (2) the Legislature enacts or amends any other statute; (3) the Lieutenant Governor in Council repeals (and does not replace on an equivalent basis) the General Regulation made under the Act or any portion thereof; or (4) the Lieutenant Governor in Council, a minister of the Crown, an official of the government or a board or commission all the members of which are

	appointed by the Lieutenant Governor in Council makes or amends any "regulation" (as defined in Part III of the *Legislation Act, 2006*), in each case, that materially and adversely affects (a) the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims, or (b) the Change of Law Protection Agreement or any of the agreements under which Specified Claims arise, other than if the Indenture Trustee has confirmed in writing that the affect under such agreements is otherwise acceptable; or (B) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act or the Regulation is *ultra vires* in a way that materially and adversely affects the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims.
Obligation to Pay Specified Claims:	Upon the occurrence of a Protection Event, the Indenture Trustee will have the right to require the Obligor to pay the Specified Claims owing by the Financing Entity when they become due and payable (without acceleration). The exercise of such right by the Indenture Trustee in accordance with the Trust Indenture shall constitute the only remedy available under the Change of Law Protection Agreement. Under no circumstances shall the Obligor be obligated to pay or indemnify a Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Subrogation:	Upon paying a Specified Claim to a Beneficiary, the Obligor as guarantor shall have rights of subrogation, including becoming entitled to all of the applicable Beneficiary's rights and interests under and in respect of the Specified Claim, including the security interest in each related investment interest and related property of the Financing Entity and the obligations of the Financing Entity owing under the agreements under which the Specified Claim arises. The Financing Entity may not change or consent to any change in such rights and interests without the Obligor's prior written consent.

Optional Replacement:	At any time following the exercise by the Indenture Trustee of its right to require the Obligor to pay Specified Claims when due and payable, the Obligor shall be entitled (but not obligated) to replace the Financing Entity as obligor and debtor and directly assume all of the Financing Entity's outstanding obligations and liabilities. The Financing Entity (including through the Financial Services Manager) will ensure that any obligation and liabilities undertaken or assumed by it will by their terms permit such a replacement and assumption (or, if applicable, satisfaction and termination) by the Obligor without additional cost or penalty and without any requirement for further consent, approval or agreement.
Term:	The Change of Law Protection Agreement will continue for as long as any Specified Claim remains outstanding.
Obligor Approval:	The Change of Law Protection Agreement will become effective in respect of a Specified Claim (including any modification) only after the Obligor has confirmed in writing that the Change of Law Protection Agreement applies to such Specified Claim. The Change of Law Protection Agreement will annex the applicable forms of program and series documents under which obligations of the Financing Entity may arise (e.g., including the form of trust indenture and series supplemental indenture) and set out the terms and conditions and process for obtaining the Obligor's approval and confirmation that the Change of Law Protection Agreement will apply to Specified Claims. Such approval may be made conditional on such matters as may be specified by the Obligor, including a maximum amount applicable to Specified Claims. The Province's approval of the form of any IESO/Financing Entity transfer agreement and any amendments will also be required.
FIPPA:	The Change of Law Protection Agreement will acknowledge that the Obligor will be bound by the *Freedom of Information and Protection of Privacy Act* (Ontario) and that any information provided to the Obligor, or any agent or representative of the Obligor in connection with the Change of Law Protection Agreement, may be subject to disclosure in accordance with the act or as otherwise required by law.
Representations and Warranties:	To be determined by the Minister of Finance and Minister of Energy in negotiation with the Financing Entity.

Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Obligor and the Financing Entity.
Governing Law:	Province of Ontario.

CONFIDENTIAL AND PRIVILEGED DRAFT – September 12, 2017

WHEREAS pursuant to subsection 5(3) of the *Ontario Fair Hydro Plan Act, 2017* (the "Act"), the Lieutenant Governor in Council may by order authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest as described under the Act;

AND WHEREAS pursuant to subsection 22(2) of the Act, Ontario Power Generation Inc. as financial services manager, may establish or cause to be established one or more financing entities (a "Financing Entity") that may incur funding obligations in connection with investment interests**;**

AND WHEREAS it is considered desirable to authorize the Minister of Energy and the Minister of Finance to agree to guarantee or indemnify debts, obligations, securities or undertakings of a Financing Entity associated with investment interests acquired by a Financing Entity;

NOW THEREFORE:

1. Pursuant to subsection 5(3) of the *Ontario Fair Hydro Plan Act, 2017*, the Minister of Energy and the Minister of Finance, acting together on behalf of Ontario, are authorized to enter into one or more agreements to guarantee or indemnify the debts, obligations securities or undertakings of a Financing Entity associated with investment interests acquired by a Financing Entity.

2. The Minister of Energy and the Minister of Finance, acting together on behalf of Ontario are authorized to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee and indemnity authorized under paragraph 1 of this Order.

Date:	Wednesday, August 16, 2017 1:48:48 PM
Attachments:	TBMBC Submission Provincial Guarantee (OFA) 08162017.doc

Good afternoon,

Please find attached, a draft TB Submission on the Provincial Guarantee, for your review and comment. The Ministry of Energy is expected to bring this submission forward, with a status update on the FHP and input from the OFA. While the TB meeting date is still TBD, Gadi asked that we draft of input to the submission before the end of the week (when Gadi, Ron, and Ken leave on vacation).

Note, this is not the correct template for a TB Submission (I am still waiting on the template from the Ministry), but this is a good proxy for the content that will be required. Furthermore, note, I have not addressed the warehouse or commingling risks, as we will leave those to Energy to resolve and include in the submission.

Your comments by tomorrow noon would be most appreciated so that I can provide to Gadi by eod tomorrow. Please use track changes. I will consolidate all input.

Thanks, Anna

TREASURY BOARD / MANAGEMENT BOARD OF CABINET
REQUEST ASSESSMENT NOTE

Ministry:	Energy
Meeting Date:	September 12, 2017 (TBC)
Agenda Class:	
Last reviewed by: NA	**Tracking to:** Cabinet (September 13, 2017)

[

SUBMISSION TITLE:	Ontario Fair Hydro Plan Update and Provincial Guarantee

I. DECISION BEFORE THE BOARD

- [Energy item…Receive a report back…]
- Whether the Government of Ontario should provide a guarantee to the OPG Financing Entity and its prospective debt holders, providing that under certain circumstances, the Province would assume the funding obligations of the Financing Entity.

II. RECOMMENDATIONS:

• [Energy item… Receive a report back…]	
• Provide a guarantee to the OPG Financing Entity under the terms set out in Appendix C	*Approve*

III. FINANCIAL SUMMARY

$ Millions	**2013-14**	**2014-15**	**2015-16**
Initiative cost requested	0.0	0.0	0.0
Initiative cost recommended	0.0	0.0	0.0
Recommended program base	0.0	0.0	0.0
Offset Recommended (Specify Ministry/Program)	0.0	0.0	0.0
Total Fiscal Impact	0.0	0.0	0.0

IV. KEY COMMENTS AND CONSIDERATIONS

[Energy item… report back…]

- To purchase the regulatory asset from IESO, the OPG Financing Entity must borrow from the capital markets; however, investors have indicated that without adequate protection against risk, the debt would not be financeable.

- OPG is requesting that the Government of Ontario provide a guarantee to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

- Certain events that would negatively impact holders of Fair Hydro Plan debt would activate the Provincial Guarantee:
  - Decisions by the Legislative Assembly, i.e., repeal of the *Ontario Fair Hydro Plan Act, 2017*, or amendments or new legislation that adversely affect the Financing Entity;
  - A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
  - Changes to the organization, structure or operations of IESO adversely impacting the Financing Entity.

- The Province would take over the obligations of the Financing Entity including principal and interest payments on debt issued to date and any outstanding payments to service providers.

- The guarantee would continue until all obligations of the Financing Entity are fully discharged.

Risks:

- If the guarantee is not approved, the Financing Entity is unlikely to be able to raise sufficient financing from capital markets to purchase the regulatory asset from IESO.

- If the guarantee is approved, the Government of Ontario takes on a contingent liability, equal to the peak accumulated debt, estimated at $24B, and associated interest payments, estimated at [x].. Should the provincial guarantee be triggered by one of the events set out above, the fiscal impact to the Province would be [xxx].

Change in Law Guarantee	
Guarantor:	The Province of Ontario
Guarantee Activation Events:	Any of the following would constitute a Guarantee Activation Event: (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act or any Regulation made thereunder; (B) the Legislative Assembly of Ontario causing to come into force any statute (including any amendment to the Act or a Regulation made thereunder), or causing to come into force or making any order-in-council or regulation, or causing to come into force any other discriminatory action (including by way of any order by the Ontario Energy Board), in any case, in a way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected; (C) the Legislative Assembly of Ontario directly or indirectly amending the Guarantee or any of the financing transaction agreements without the agreement of the Financing Entity; (D) a court of competent jurisdiction (i) declares any funding obligations of the Financing Entity to be invalid or unenforceable or (ii) in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that adversely affects the rights and

DRAFT

	interests of the Financing Entity, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its funding obligations on the same basis as before such judgement; or (E) there is a change in the organization, structure or operations of the IESO or a change in the electricity market structure or operations in any way that adversely affects the rights and interests of the Financing Entity under its investment interest, including, for greater certainty, in any manner that is reasonably expected to limit the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations on the same basis as before such amendment was effected **[NTD: Alternatively, with respect to the IESO servicing obligations, include the Servicing Guarantee language with respect to the IESO that was included in the last mark-up of the term sheet received from the Province.]**
Guarantee:	Upon the occurrence of a Guarantee Activation Event, the Guarantor shall immediately assume and pay when due (without acceleration) all of the obligations of the Financing Entity. The obligations of the Financing Entity include its funding obligations as well as any other obligation the Financing Entity has related to the Fair Hydro program such as payments to service providers (such as trustees, auditors, etc), rating agencies and any fees due to the securities commissions
Term:	The Guarantee will continue for as long as the Financing Entity has any outstanding financing or other contractual obligations and until such obligations have all been paid in full or otherwise satisfied

DRAFT

Approval Requirement:	The guarantee agreement containing the terms and conditions contemplated by this term sheet shall be entered into prior to the Financing Entity incurring its first funding obligation. The Province shall enter into the guarantee based on forms of program and series financing documents required for each financing transaction (e.g., form of supplemental indenture). As long as the financing transaction documents are generally consistent with the agreed upon form, the Province's specific approval for specific funding obligations incurred by the Financing Entity will not be required. Subsequent approval is only needed if the form of such documents are materially changed. For greater certainty, deal specific terms (such as tenor, pricing, etc) shall not be considered a change in the form of transaction and series documents
FIPPA:	The parties will acknowledge that the Guarantor will be bound by the Freedom of Information and Protection of Privacy Act (Ontario) and that any information provided to the Guarantor, or any agent or representative of the Guarantor in connection with the Guarantee may be subject to disclosure in accordance with the act or as otherwise required by law
Representations and Warranties:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Guarantor and the Financing Entity
Governing Law:	Province of Ontario

Subject:	TB/MBC Submission on Assumption Agreement - CEO Approved
Date:	Monday, September 11, 2017 5:04:47 PM
Attachments:	TB20 Submission_Provincial Support Agreement_V7.pdf

Good afternoon,

FYI, please find attached, the CEO-approved TB Submission for the Change of Law Assumption Agreement (no longer a "Support Agreement") tracking to TB/MBC for the Sep 26 meeting. This version incorporates input received from Energy.

We can confirm that both Ministers of Energy and Finance will be asked to sign the TB submission since both Ministers will recommend the OIC and both will sign the Assumption Agreement.

Please don't hesitate to contact me should you have any questions or comments. This version is tracking for CAO/DM/Minister approval in both Ministries.

Thanks, Anna

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

CHANGE OF LAW ASSUMPTION AGREEMENT

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide protection and assurance arrangements in respect of debts, obligations, securities or undertakings associated with investment interests acquired by one or more financing entities established by Ontario Power Generation Inc. pursuant to s. 22 of the Ontario Fair Hydro Plan Act, 2017 ("OPG Financing Entities"), that, under certain circumstances as set out in the Change of Law Assumption Agreement ("assumption agreement"), the Province would pay when due amounts in respect of the obligations of the Financing Entity.

This submission is to request that Treasury Board:

(a) Authorize that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide an assumption agreement, to be authorized by Order in Council under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend to Cabinet an Order in Council, to be made under subsection 5(3) of the *Ontario Fair Hydro Plan Act, 2017* that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister of Energy and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

DRAFT

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP) to lower electricity bills by 25%, on average, for a typical residential consumer, and holding increases to the rate of inflation for four years. As part of OFHP, it was announced that a portion of the Global Adjustment (GA) would be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system). This would be achieved by spreading the cost of electricity investments so that they are shared proportionately by future consumers who cause a need for, or benefit from, the province's multi-billion dollar investments in electricity infrastructure.

To this end, immediate rate relief to eligible ratepayers is provided by deferring and spreading the cost recovery of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. The Ministry of Energy will report back to TB/MBC in fall 2017-18 with an update on out-year projections following analysis on rate applications before the Ontario Energy Board.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the "OFHPA"), which enables GA Refinancing, the Independent Electricity System Operator (IESO) will have a funding gap resulting from the reduction in amounts collected over four years. The legislation enables IESO to record the under-collection of GA in a variance account, and deems this under-collected amount to be a "Regulatory Asset". The OFHPA provides for the IESO to sell all or a portion of the regulatory asset; i.e., the right to recover those deferred amounts from specified consumers in the future. Under the OFHPA, a Financing Entity (i.e., an entity established or caused to be established by OPG as the Financial Services Manager under the OFHPA) will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative and judicial risk, the debt would not be financeable. OPG, therefore, has advised that the Government of Ontario provide a change of law assumption agreement to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would step in and assume the funding obligations of the Financing Entity.

OFA, the Ministry of Finance and external advisors – consistent with OPG advice – recommend limiting activation of the assumption agreement to the following circumstances:

- Actions of the Legislative Assembly that undermine the financing arrangement, i.e., repeal or amendment of the OFHPA or new legislation that adversely affect the Financing Entity;
- A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable; and
- [Changes to the organization, structure or operations of IESO or a change in the electricity market structure or operations that adversely affects the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations. *Note: this third assumption event is not included in the current draft of the term sheet agreed to by Ministry of Finance staff; however, OPG is expected to continue to negotiate for its inclusion. It has been included in the TB submission, but may be removed once negotiations are complete, prior to TB/MBC consideration of this item on September 26, 2017*.]

In the event the assumption agreement is triggered, the Province would be required to pay principal and interest on debt issued by the Financing Entity and other obligations of the Financing Entity as it comes due (without acceleration). In addition, the Province would also have the option to assume the Financing Entity's outstanding obligations and liabilities.

The assumption agreement would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Section 28 of the *Financial Administration Act (FAA), 1990* requires that the Minister of Finance's approval is obtained before a ministry seeks an Order in Council (OIC) before a ministry enters into a guarantee or indemnity that would increase the contingent liabilities of Ontario. In this case, the Minister of Finance, together with the Minister of Energy, is recommending the OIC to Cabinet and will, acting together with the Minister of Energy, determine the terms and conditions of and execute the proposed guarantee/indemnity in accordance with the OIC, if approved.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the assumption agreement is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the assumption agreement is provided, the Province of Ontario takes on a contingent liability. The amount of the liability would increase over the duration of the OFHP and peak at an estimated $24B to $26B of debt (final cost forecasts TBC), including principal and accumulated interest.

In the event the assumption agreement is triggered, the Province's net debt would be expected to increase by an amount equal to the contingent liability for the debt outstanding at that point in time. The Province's interest payments will also increase by the debt interest servicing of the debt payment obligations it has assumed under the guarantee.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between $0.8B and $1.3B per annum (final cost forecasts TBC), depending on the interest rate at which the Financing Entity will be able to borrow at.

It is important to note that, if the assumption agreement is triggered, and the Province assumes the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the OFHPA continue or not, in some form. If the payment streams from ratepayers via the collection of the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if the OFHPA is repealed or is determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. COMMUNICATION PLAN

Key Messages

- Ontario's Fair Hydro Plan has resulted in the biggest electricity rate reduction in Ontario's history.

- We have heard from Ontarians across the province that the price of electricity has risen too quickly, which is why we moved forward with a plan to ensure the costs are shared more evenly over the years ahead.
- The government is following through on its commitment to balance the books as announced in its 2017 Budget, while continuing to make investments in priority areas such as electricity price relief.

Strategic Approach

- Low-profile, reactive and targeted to industry stakeholders and government employees as necessary. Reactive messaging contingent upon legislative changes only with back-pocket QAs to support as needed.
- Communications support will continue to be led by the Ministry of Energy.

8. RECOMMENDATION

(a) Approve that the Minister of Finance and Minister of Energy provide a support agreement, as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under the terms set out in Appendix;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister of Energy and the Minister of Finance, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity;

specify terms and conditions that must be included in any guarantee or indemnity given by the Minister of Energy and the Minister of Finance; and

specify a maximum liability for the guarantee or indemnity.

DRAFT

APPENDIX

Change of Law Assumption Agreement

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This indicative term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 (the "**Act**") and the regulations made thereunder (the "**Regulation**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate. This Term Sheet is not intended to create any obligations or be binding on the parties.*

Change of Law Assumption Agreement:	A Change of Law Assumption Agreement will be among the Obligor, a Financing Entity and an Indenture Trustee, acting for and on behalf of the Beneficiaries in accordance with a Trust Indenture.
Obligor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indenture Trustee:	An indenture trustee, acting for itself and on behalf of other persons entitled under an applicable Trust Indenture.
Beneficiaries:	The Indenture Trustee, acting for itself and on behalf of other persons entitled under Specified Claims.
Specified Claims:	Payment obligations of the Financing Entity that are secured under the Trust Indenture and that are approved as contemplated below under Obligor Approval. Specified Claims are expected to include principal and interest on senior debt obligations issued by the Financing Entity [and any other monetary obligations of the Financing Entity that rank ahead of or equally in priority of payment with the senior debt obligations of the Financing Entity pursuant to the Trust Indenture].
Assumption Events:	Any of the following would constitute an Assumption Event: (A) (1) the Legislature repeals (and does not replace on an equivalent basis) or amends the Act or any portion thereof; (2) the Legislature enacts or amends any other statute; (3) the Lieutenant Governor in Council repeals (and does not replace on an equivalent basis) the General

	Regulation made under the Act or any portion thereof; or (4) the Lieutenant Governor in Council, a minister of the Crown, an official of the government or a board or commission all the members of which are appointed by the Lieutenant Governor in Council makes or amends any "regulation" (as defined in Part III of the *Legislation Act, 2006*), in each case, that materially and adversely affects (a) the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims or (b) the Change of Law Assumption Agreement or any of the agreements under which Specified Claims arise without the agreement of the Indenture Trustee; or (B) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act or the Regulation is *ultra vires* in a way that materially and adversely affects the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims.
Obligation to Assume Specified Claims:	Upon the occurrence of an Assumption Event, the Indenture Trustee will have the right to require the Obligor to pay the amount of Specified Claims on behalf of the Financing Entity when they become due and payable (without acceleration). The exercise of such right by the Indenture Trustee in accordance with the Trust Indenture shall constitute the only remedy available under the Change of Law Assumption Agreement. Under no circumstances shall the Obligor be obligated to pay or indemnify a Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Subrogation:	Upon paying an amount to a Beneficiary in respect of a Specified Claim, the Obligor shall become entitled to all of the applicable Beneficiary's rights and interests under and in respect of the Specified Claim, including the security interest in each related investment interest and related property of the Financing Entity and the obligations of the Financing Entity owing under the agreements under which the Specified Claim arises. The Financing Entity may not change or consent to any change in such rights and interests without the Obligor's prior written consent.

Optional Replacement:	At any time following the exercise by the Indenture Trustee of its right to require the Obligor to pay Specified Claims when due and payable, the Obligor shall be entitled (but not obligated) to replace the Financing Entity as obligor and debtor and directly assume all of the Financing Entity's outstanding obligations and liabilities. The Financing Entity (including through the Financial Services Manager) will ensure that any obligation and liabilities undertaken or assumed by it will by their terms permit such a replacement and assumption (or, if applicable, satisfaction and termination) by the Obligor without additional cost or penalty and without any requirement for further consent, approval or agreement.
Term:	The Change of Law Assumption Agreement will continue for as long as any Specified Claim remains outstanding.
Obligor Approval:	The Change of Law Assumption Agreement will become effective in respect of a Specified Claim (including any modification) only after the Obligor has confirmed in writing that the Change of Law Assumption Agreement applies to such Specified Claim. The Change of Law Assumption Agreement will annex the applicable forms of program and series documents under which obligations of the Financing Entity may arise (e.g., including the form of trust indenture and series supplemental indenture) and set out the terms and conditions and process for obtaining the Obligor's approval and confirmation that the Change of Law Assumption Agreement will apply to Specified Claims. Such approval may be made conditional on such matters as may be specified by the Obligor, including a maximum amount applicable to Specified Claims. The Province's approval of the form of any IESO/Financing Entity transfer agreement and any amendments will also be required.
FIPPA:	The Change of Law Assumption Agreement will acknowledge that the Obligor will be bound by the *Freedom of Information and Protection of Privacy Act* (Ontario) and that any information provided to the Obligor, or any agent or representative of the Obligor in connection with the Change of Law Assumption Agreement, may be subject to disclosure in accordance with the act or as otherwise required by law.
Representations and Warranties:	To be determined by the Minister of Finance and Minister of Energy in negotiation with the Financing Entity.

Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Obligor and the Financing Entity.
Governing Law:	Province of Ontario.

Subject:	TB/MBC Submission on Provincial Guarantee MOE role and sign-off
Date:	Wednesday, September 06, 2017 12:42:36 PM

Hi Anna,

I have a few questions as well that could impact the answers you are asking .

Point 1. The submission as its stands is a request under an OIC under FHPA that resides under MOE. The request is for both Ministers points (a) and (b), the Minister from MOE would need to sign the submission, as far as I can see.

I have had no contact with MOE on this submission. There were discussions on how this submission would be brought forward with MOE earlier, the only outcome I am aware was that this would be an MOF led submission. The area within MOF that worked with MOE on this, should provide additional information in regards to point 1 (What has been agreed upon with MOE ?).

Point 2. The MOF DM and Minister briefing are already scheduled for next Tuesday September 12, 2017. We would require a sign-off by the Minister of Energy before the briefing, depending on the answer in point 1.

Thanks,
Anthony

Hi Malle,

Thank you for this. I've included my responses below in red, and seeking input/confirmation from others (Anthony/Keley/Jonathan) in highlighted text. I've been away the last two weeks so I

apologize if any of my information below is out of date.

I'm also copying the broader group from the OFA here to keep everyone in the loop.

Thanks, Anna

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Anna,

At our meeting yesterday there was some discussion of the content and timing of this TB submission. I am wondering whether you have received many comments and whether there is a revised version for review? The text of this August 31st version reflects in part the version of the term sheet that we received from OPG and the revised version that is going back to OPG (attached to John Kim's email yesterday) is a bit different so we may wish to make some updates. I am not sure how the timing of OPG's review of our revisions to the term sheet will work with the timing of the submission since it provides for a draft term sheet to be attached.

I have not received any further input to the version circulated on August 31st. Would you like to point out the necessary edits to the August 31st draft submission to align with the latest term sheet? As we move the submission through approvals, subsequent revisions to the term sheet will need to be highlighted to the TBS analyst (OFA will inform CQSD of these changes who will inform TBS analyst) to be incorporated into the TBS Assessment note. As Ron highlighted in our meeting yesterday, the TBS Assessment note is typically the only material presented to TB Members (as well as the Deputy, Associate Deputy) and it can be updated later in the process, even after the submission is signed off.

Also, I had a few questions regarding the process.

Will the TB20 Submission be submitted by the Minister of Finance only, although the "guarantee" itself must be provided by the Minister of Finance and Minister of Energy acting jointly?

That was my understanding. Asking Anthony/Keley to confirm.

When would the draft of the OIC be attached to the TB20 Submission?

I would think as soon as a draft is ready, it could be attached, and then replaced with a final, signed version.

Does the OIC have to go to LRC or is submitting it to TBC sufficient?

My impression is that TB/MBC would be sufficient, followed by Cabinet the next day. Asking Jonathan to confirm with CO.

Should the OIC be recommended by both Ministers?

That seems to be consistent with the recommendation in the current draft of the submission. Asking Anthony/Keley to confirm.

Section 28 approval and timing of section 28 approval:
Recommendation (c) references that the Ministry of Energy will be submitting a request for s. 28 approval to the Minister of Finance (not sure who drafted that part). Section 28 requires that a ministry obtain the approval of the Minister of Finance (or President of Treasury Board if within the President's area of responsibility for s. 28) before seeking the approval of the LGIC to provide a guarantee or indemnity. Generally, most guarantees we deal with are authorized under FAA s. 22 and the OIC is recommended to Cabinet by the Minister of Finance and the guarantee itself is signed by the Minister. As a result, there is an implied FAA s. 28 approval for this activity since it is the Minister himself who is recommending the OIC and signing the guarantee and therefore the Minister has impliedly also approved it under s. 28.

This particular OIC would authorize both Ministers to sign the guarantee, but since the Minister of Finance would recommend the OIC (either alone or together with the Minister of Energy) and then would also sign the guarantee together with the Minister of Energy, we have to consider whether this is sufficient for s. 28 or whether it would be better if a separate written approval under s. 28 was given. The section 28 issues has been noted by Torys (OPG's counsel in some previous correspondence) so it is important to deal with this clearly, especially since noteholders will be relying on the guarantee and Blakes will have to provide a legal opinion about the validity and enforceability of the guarantee. In cases where other ministries or agencies come forward seeking an OIC to authorize a guarantee or borrowing, the Minister of Finance will approve under s. 28 both the OIC and also the guarantee agreement I believe so we will have to look at the logistics of that.

I see. The point of recommendation (c) was to give our Minister comfort that TB/MBC was aware of the magnitude of this contingent liability before he approved a section 28. I'm inclined to think a separate written approval under s. 28 would be prudent (even if redundant). Is there anyone else that could weigh in on this? Or would you like to first confer with Energy's counsel?

I am sending this email to you since you are coordinating the submission. However please feel free to share it with others to get input. We are happy to discuss it too. Thanks.

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi All,

Please find attached the latest version of the TB submission, which includes some comments in the margins that still need to be addressed. Thanks to everyone who has provided edits so far. I'd like to reiterate that we're still tracking the Sept. 26 TB/MBC meeting, which means we'll have to brief our Minister next week in order to provide a final submission to TBS three weeks before the meeting.

As many of you may already know, we are now calling it a "Provincial Support Agreement" as opposed to "Provincial guarantee" as MOF legal advised this is not a true guarantee as the agreement would be contingent on certain events (whereas a guarantee would not).

Please provide further comments and edits as appropriate. We're looking to have program area and legal sign-off by Wed. Sept. 6.

Thanks,
Matt Breadner on behalf of Anna Strathy

Subject: RE: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Good afternoon,

We are now tracking the Provincial Guarantee to TB/MBC for September 26 as a Ministry of Finance item. We'll need to brief our Minister the first week of September in order to provide a final submission to TBS three weeks before the meeting. Thank you to those that have provided comments on the attached. Further comments and edits would be much appreciated.

I'll be away for the next two weeks, but Matt Breadner will be acting for me and will have access to my email. Matt will be consolidating your input and circulating revised drafts to this group. Please continue to route your comments through my email.

Thank you, Anna

Subject: For Review and Comment: TB/MBC Submission on Provincial Guarantee

Hi Cindy, Steen, Kelly (for Scott), and Malle,

Attached, for your review and comment, is a draft TB submission for the Provincial Guarantee.

This submission is somewhat premature, as there continue to be discussions about which Ministry might bring this forward (for instance, the Provincial Guarantee piece could be incorporated into a broader report back by the Ministry of Energy) and when this might go to TB/MBC (mid to late September); however, Gadi is on vacation for two weeks starting Monday, so we wanted to get a head start on something that could be moved forward in his absence.

I apologize for the tight timelines, but **we are hoping to have your comments (even preliminary comments) by noon tomorrow**. I expect that subsequent iterations of this submission and/or the TB Assessment Note will be circulated again for your input.

Please don't hesitate to contact me should you have any questions.

Subject: TB/MBC Submission on Assumption Agreement - CEO Approved

Good afternoon,

FYI, please find attached, the CEO-approved TB Submission for the Change of Law Assumption Agreement (no longer a “Support Agreement”) tracking to TB/MBC for the Sep 26 meeting. This version incorporates input received from Energy.

We can confirm that both Ministers of Energy and Finance will be asked to sign the TB submission

since both Ministers will recommend the OIC and both will sign the Assumption Agreement.

Please don't hesitate to contact me should you have any questions or comments. This version is tracking for CAO/DM/Minister approval in both Ministries.

Thanks, Anna

CHANGE OF LAW PROTECTION AGREEMENT

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide protection and assurance arrangements in respect of debts, obligations, securities or undertakings associated with investment interests acquired by one or more financing entities established by Ontario Power Generation Inc. pursuant to s. 22 of the *Ontario Fair Hydro Plan Act, 2017* ("OPG Financing Entities"), that, under certain circumstances as set out in the proposed arrangements the Province would pay when due amounts in respect of the obligations of the Financing Entity.

The Ministry of Finance and Ministry of Energy request that Treasury Board/Management Board of Cabinet:

(a) Authorize that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide a protection agreement, to be authorized by Order in Council under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities substantially reflecting the terms set out in the Provincial Protection and Assurances Indicative Term Sheet and subject to such revisions that the two ministers acting together may determine;

(b) Recommend to Cabinet an Order in Council, to be made under subsection 5(3) of the *Ontario Fair Hydro Plan Act, 2017* that authorizes the Minister of Finance and the Minister of Energy, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest; and

(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity.

DRAFT

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP) to lower electricity bills by 25%, on average, for a typical residential consumer, and holding increases to the rate of inflation for four years. As part of OFHP, it was announced that a portion of the Global Adjustment (GA) would be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system). This would be achieved by spreading the cost of electricity investments so that they are shared proportionately by future consumers who cause a need for, or benefit from, the province's multi-billion dollar investments in electricity infrastructure.

To this end, immediate rate relief to eligible ratepayers is provided by deferring and spreading the cost recovery of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. The Ministry of Energy will report back to TB/MBC in fall 2017-18 with an update on out-year projections following analysis on rate applications before the Ontario Energy Board.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the "OFHPA"), which enables GA Refinancing, the Independent Electricity System Operator (IESO) will have a funding gap resulting from the reduction in amounts collected over four years. The legislation enables IESO to record the under-collection of GA in a variance account, and deems this under-collected amount to be a "Regulatory Asset". The OFHPA provides for the IESO to sell all or a portion of the regulatory asset; i.e., the right to recover those deferred amounts from specified consumers in the future. Under the OFHPA, a Financing Entity (i.e., an entity established or caused to be established by OPG as the Financial Services Manager under the OFHPA) will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative and judicial risk, the debt would not be financeable. OPG, therefore, has advised that the Government of Ontario provide a change of law protection agreement to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would pay the funding obligations of the Financing Entity.

OFA, the Ministry of Finance and external advisors – consistent with OPG advice – recommend limiting activation of the protection agreement to the following circumstances:

- Actions of the Legislative Assembly that undermine the financing arrangement, i.e., repeal or amendment of the OFHPA or new legislation that adversely affects the ability of an OPG Financing Entity to receive amounts relating to its investments interest so that it can pay its funding obligations;
- A court decision that declares the ability of an OPG Financing Entity to receive amounts on its investment interest so it can pay its funding obligations to be invalid or unenforceable; and
- [Changes to the organization, structure or operations of IESO or a change in the electricity market structure or operations that adversely affects the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations. *Note: this third protection event is not included in the current draft of the term sheet agreed to by Ministry of Finance staff; however, OPG is expected to continue to negotiate for its inclusion. It has been included in the TB submission, but may be removed once negotiations are complete, prior to TB/MBC consideration of this item on September 26, 2017*.]

In the event the protection agreement is triggered, the Province would be required to pay principal and interest on debt issued by the Financing Entity and other obligations of the Financing Entity as they come due (without acceleration). The Province may also be required to pay other obligations which may include payments under derivatives agreements and to service providers.

In addition, the Province would also have the option to directly replace the OPG Financing Entity with respect to its outstanding rights obligations and liabilities, but if the Province decided to do so additional authority would be required.

The protection agreement would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Section 28 of the *Financial Administration Act (FAA), 1990* requires that the Minister of Finance's approval is obtained before a ministry seeks an Order in Council (OIC) to enter into a guarantee or indemnity that would increase the contingent liabilities of Ontario. In this case, the Minister of Finance, together with the Minister of Energy, is recommending the OIC to Cabinet and will, acting together with the Minister of Energy, determine the terms and conditions of and execute the proposed guarantee/indemnity in accordance with the OIC, if approved.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

6. RISKS:

If the protection agreement is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the protection agreement is provided, the Province takes on a contingent liability. The amount of the liability would increase over the duration of the OFHP and peak at an estimated $24B to $26B of debt (final cost forecasts TBC), including principal and accumulated interest.

In the event the protection agreement is triggered, the Province's net debt would be expected to increase by an amount equal to the contingent liability for the debt outstanding at that point in time. The Province's interest payments will also increase by the debt interest servicing of the debt payment obligations it will be required to make under the protection agreement. In addition there may be additional payments on derivatives agreements and for service providers that the Province will be required to make.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between $0.8B and $1.3B per annum (final cost forecasts TBC), depending on the interest rate at which the Financing Entity will be able to borrow at.

It is important to note that, if the protection agreement is triggered, and the Province becomes responsible for the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the OFHPA continue in some form, or not. If the payment streams from ratepayers via the collection of the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if the OFHPA is repealed or is determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. COMMUNICATION PLAN

Key Messages

- Ontario's Fair Hydro Plan has resulted in the biggest electricity rate reduction in Ontario's history.
- We have heard from Ontarians across the province that the price of electricity has risen too quickly, which is why we moved forward with a plan to ensure the costs are shared more evenly over the years ahead.
- The government is following through on its commitment to balance the books as announced in its 2017 Budget, while continuing to make investments in priority areas such as electricity price relief.

Strategic Approach

- Low-profile, reactive and targeted to industry stakeholders and government employees as necessary. Reactive messaging contingent upon legislative changes only with back-pocket QAs to support as needed.
- Communications support will continue to be led by the Ministry of Energy.

8. RECOMMENDATION

The Ministry of Finance and Ministry of Energy request that Treasury Board/Management Board of Cabinet:

(a) Authorize that the Minister of Finance and Minister of Energy provide a protection agreement, to be authorized by Order in Council under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities substantially reflecting the terms set out in the Provincial Protection and Assurances Indicative Term Sheet and subject to such revisions that the two ministers acting together may determine;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister of Finance and the Minister of Energy, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest; and
(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity.

APPENDIX

Provincial Protections and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This indicative term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 (the "**Act**") and the regulations made thereunder (the "**Regulation**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate. This Term Sheet is not intended to create any obligations or be binding on the parties.*

Change of Law Protection Agreement:	A Change of Law Protection Agreement will be among the Obligor, a Financing Entity and an Indenture Trustee, acting for and on behalf of the Beneficiaries in accordance with a Trust Indenture.
Obligor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indenture Trustee:	An indenture trustee, acting for itself and on behalf of other persons entitled under an applicable Trust Indenture.
Beneficiaries:	The Indenture Trustee, acting for itself and on behalf of other persons entitled under Specified Claims.
Specified Claims:	Payment obligations of the Financing Entity that are secured under the Trust Indenture and that are approved as contemplated below under Obligor Approval.
Protection Events:	Any of the following would constitute a Protection Event: (A) (1) the Legislature repeals (and does not replace on an equivalent basis) or amends the Act or any portion thereof; (2) the Legislature enacts or amends any other statute; (3) the Lieutenant Governor in Council repeals (and does not replace on an equivalent basis) the General Regulation made under the Act or any portion thereof; or (4) the Lieutenant Governor in Council, a minister of the Crown, an official of the government or a board or commission all the members of which are appointed by the Lieutenant Governor in Council

	makes or amends any "regulation" (as defined in Part III of the *Legislation Act, 2006*), in each case, that materially and adversely affects (a) the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims, or (b) the Change of Law Protection Agreement or any of the agreements under which Specified Claims arise, other than if the Indenture Trustee has confirmed in writing that the affect under such agreements is otherwise acceptable; or (B) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act or the Regulation is *ultra vires* in a way that materially and adversely affects the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims.
Obligation to Pay Specified Claims:	Upon the occurrence of a Protection Event, the Indenture Trustee will have the right to require the Obligor to pay the Specified Claims owing by the Financing Entity when they become due and payable (without acceleration). The exercise of such right by the Indenture Trustee in accordance with the Trust Indenture shall constitute the only remedy available under the Change of Law Protection Agreement. Under no circumstances shall the Obligor be obligated to pay or indemnify a Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Subrogation:	Upon paying a Specified Claim to a Beneficiary, the Obligor as guarantor shall have rights of subrogation, including becoming entitled to all of the applicable Beneficiary's rights and interests under and in respect of the Specified Claim, including the security interest in each related investment interest and related property of the Financing Entity and the obligations of the Financing Entity owing under the agreements under which the Specified Claim arises. The Financing Entity may not change or consent to any change in such rights and interests without the Obligor's prior written consent.

Optional Replacement:	At any time following the exercise by the Indenture Trustee of its right to require the Obligor to pay Specified Claims when due and payable, the Obligor shall be entitled (but not obligated) to replace the Financing Entity as obligor and debtor and directly assume all of the Financing Entity's outstanding obligations and liabilities. The Financing Entity (including through the Financial Services Manager) will ensure that any obligation and liabilities undertaken or assumed by it will by their terms permit such a replacement and assumption (or, if applicable, satisfaction and termination) by the Obligor without additional cost or penalty and without any requirement for further consent, approval or agreement.
Term:	The Change of Law Protection Agreement will continue for as long as any Specified Claim remains outstanding.
Obligor Approval:	The Change of Law Protection Agreement will become effective in respect of a Specified Claim (including any modification) only after the Obligor has confirmed in writing that the Change of Law Protection Agreement applies to such Specified Claim. The Change of Law Protection Agreement will annex the applicable forms of program and series documents under which obligations of the Financing Entity may arise (e.g., including the form of trust indenture and series supplemental indenture) and set out the terms and conditions and process for obtaining the Obligor's approval and confirmation that the Change of Law Protection Agreement will apply to Specified Claims. Such approval may be made conditional on such matters as may be specified by the Obligor, including a maximum amount applicable to Specified Claims. The Province's approval of the form of any IESO/Financing Entity transfer agreement and any amendments will also be required.
FIPPA:	The Change of Law Protection Agreement will acknowledge that the Obligor will be bound by the *Freedom of Information and Protection of Privacy Act* (Ontario) and that any information provided to the Obligor, or any agent or representative of the Obligor in connection with the Change of Law Protection Agreement, may be subject to disclosure in accordance with the act or as otherwise required by law.
Representations and Warranties:	To be determined by the Minister of Finance and Minister of Energy in negotiation with the Financing Entity.

Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Obligor and the Financing Entity.
Governing Law:	Province of Ontario.

CHANGE OF LAW PROTECTION ~~ASSUMPTION~~ AGREEMENT

1. PROGRAM/BRANCH: Ontario Financing Authority

2. SUMMARY OF REQUEST:

Provide protection and assurance arrangements ~~-~~in respect of debts, obligations, securities or undertakings associated with investment interests acquired by one or more financing entities established by Ontario Power Generation Inc. pursuant to s. 22 of the *Ontario Fair Hydro Plan Act, 2017* ("OPG Financing Entities"), that, under certain circumstances as set out in the ~~Change of Law Assumption Agreement ("assumption agreement"),~~proposed arrangements the Province would pay when due amounts in respect of the obligations of the Financing Entity.

The Ministry of Finance and Ministry of Energy request that Treasury Board/Management Board of Cabinet:~~This submission is to request that Treasury Board:~~

(a) Authorize that the Minister of Finance and Minister of Energy, on behalf of Ontario, provide a~~n assumption~~protection agreement, to be authorized by Order in Council ~~-~~under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities ~~under~~ substantially reflecting the terms set out in the ~~Appendix~~ Provincial Protection and Assurances Indicative Term Sheet and subject to such revisions that the two ministers acting together may determine;

(b) Recommend to Cabinet an Order in Council, to be made under subsection 5(3) of the *Ontario Fair Hydro Plan Act, 2017* that authorizes the Minister of ~~Energy~~ Finance and the Minister of ~~Finance~~Energy, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest~~;~~, and

(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity~~.~~;

~~specify terms and conditions that must be included in any guarantee or indemnity given by the Minister of Energy and the Minister of Finance; and~~

~~specify a maximum liability for the guarantee or indemnity.~~

DRAFT

3. BACKGROUND:

On March 2, 2017, the government announced its proposed Ontario's Fair Hydro Plan (OFHP) to lower electricity bills by 25%, on average, for a typical residential consumer, and holding increases to the rate of inflation for four years. As part of OFHP, it was announced that a portion of the Global Adjustment (GA) would be refinanced in order to fairly allocate costs across present and future generations of electricity consumers with respect to investments made to decarbonize (i.e., phase-out coal) and modernize Ontario's electricity system (i.e., build and maintain a reliable electricity system). This would be achieved by spreading the cost of electricity investments so that they are shared proportionately by future consumers who cause a need for, or benefit from, the province's multi-billion dollar investments in electricity infrastructure.

To this end, immediate rate relief to eligible ratepayers is provided by deferring and spreading the cost recovery of electricity investments over a longer period of time. Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction would be about $2.5 billion per year on average over the first ten years. The Ministry of Energy will report back to TB/MBC in fall 2017-18 with an update on out-year projections following analysis on rate applications before the Ontario Energy Board.

Under the *Ontario Fair Hydro Plan Act, 2017,* (the "OFHPA"), which enables GA Refinancing, the Independent Electricity System Operator (IESO) will have a funding gap resulting from the reduction in amounts collected over four years. The legislation enables IESO to record the under-collection of GA in a variance account, and deems this under-collected amount to be a "Regulatory Asset". The OFHPA provides for the IESO to sell all or a portion of the regulatory asset; i.e., the right to recover those deferred amounts from specified consumers in the future. Under the OFHPA, a Financing Entity (i.e., an entity established or caused to be established by OPG as the Financial Services Manager under the OFHPA) will purchase the regulatory asset, effectively financing the shortfall in current rates not received from the ratepayers.

To purchase the regulatory asset from IESO, the Financing Entity must borrow a portion of the funds (planned to be 51%, with other financing to come from OPG and, indirectly, the Province) from the capital markets; however, OPG's financial advisors have indicated that without adequate protection against legislative and judicial risk, the debt would not be financeable. OPG, therefore, has advised that the Government of Ontario provide a change of law ~~assumption~~protection agreement to the Financing Entity and prospective debt holders such that, under certain circumstances, the Province would ~~step-in and assume~~pay the funding obligations of the Financing Entity.

OFA, the Ministry of Finance and external advisors – consistent with OPG advice – recommend limiting activation of the ~~assumption~~protection agreement to the following circumstances:

- Actions of the Legislative Assembly that undermine the financing arrangement, i.e., repeal or amendment of the OFHPA or new legislation that adversely affects the ability of an ~~the~~OPG Financing Entity to receive amounts relating to its investments interest so that it can pay its funding obligations;
- A court decision that declares the ability of an OPG Financing Entity to receive amounts on its investment interest so it can pay its funding obligations to be invalid or unenforceable~~A court decision that declares any funding obligations of the Financing Entity to be invalid or unenforceable~~; and
- [Changes to the organization, structure or operations of IESO or a change in the electricity market structure or operations that adversely affects the ability of the Financing Entity to receive amounts on its investment interest such that it can pay its specified creditors, including making payments on its debt obligations. *Note: this third ~~assumption~~protection event is not included in the current draft of the term sheet agreed to by Ministry of Finance staff; however, OPG is expected to continue to negotiate for its inclusion. It has been included in the TB submission, but may be removed once negotiations are complete, prior to TB/MBC consideration of this item on September 26, 2017*.]

In the event the ~~assumption~~protection agreement is triggered, the Province would be required to pay principal and interest on debt issued by the Financing Entity and other obligations of the Financing Entity as ~~it~~ they come~~s~~ due (without acceleration). The Province may also be required to pay other obligations which may include payments under derivatives agreements and to service providers.

In addition, the Province would also have the option to ~~assume~~ directly replace the OPG Financing Entity~~'s~~ with respect to its outstanding rights obligations and liabilities, but if the Province decided to do so additional authority would be required.~~.~~

The ~~assumption~~protection agreement would continue until all guaranteed obligations of the Financing Entity are fully discharged.

Section 28 of the *Financial Administration Act (FAA), 1990* requires that the Minister of Finance's approval is obtained before a ministry seeks an Order in

Council (OIC) ~~before a ministry~~to enter~~s~~ into a guarantee or indemnity that would increase the contingent liabilities of Ontario. In this case, the Minister of Finance, together with the Minister of Energy, is recommending the OIC to Cabinet and will, acting together with the Minister of Energy, determine the terms and conditions of and execute the proposed guarantee/indemnity in accordance with the OIC, if approved.

5. ADMINISTRATIVE IMPACTS:

To be managed by existing staff.

DRAFT

6. RISKS:

If the ~~assumption~~protection agreement is not approved, the Financing Entity would either be unable to raise sufficient financing from capital markets to purchase the regulatory asset from IESO or the cost of the financing will be potentially materially greater than it otherwise would be.

If the ~~assumption~~protection agreement is provided, the Province ~~of Ontario~~ takes on a contingent liability. The amount of the liability would increase over the duration of the OFHP and peak at an estimated $24B to $26B of debt (final cost forecasts TBC), including principal and accumulated interest.

In the event the ~~assumption~~protection agreement is triggered, the Province's net debt would be expected to increase by an amount equal to the contingent liability for the debt outstanding at that point in time. The Province's interest payments will also increase by the debt interest servicing of the debt payment obligations it ~~has assumed~~will be required to make under the ~~guarantee~~protection agreement. In addition there may be additional payments on derivatives agreements and for service providers that the Province will be required to make.

While it is difficult to estimate the actual impact to the Province's interest on debt (IOD) expense, the worst case scenario would be the Province assuming the debt at its peak. If so, IOD expense may increase between $0.8B and $1.3B per annum (final cost forecasts TBC), depending on the interest rate at which the Financing Entity will be able to borrow at.

It is important to note that, if the ~~assumption~~protection agreement is triggered, and the Province ~~assumes~~ becomes responsible for the obligation to service and pay down the debt, that the magnitude of the fiscal impact (IOD expense) will depend on whether or not some portions of the OFHPA continue ~~or not,~~ in some form, or not. If the payment streams from ratepayers via the collection of the Clean Energy Adjustment (CEA) continue, this would offset the debt and interest payments; however, if the CEA is ended (e.g., if the OFHPA is repealed or is determined by a court not to be constitutional) and not replaced by another authorized charge, the incremental IOD expense would impact the Government's fiscal plan and likely takes away fiscal resources that can be otherwise used. Also, debt incurred to benefit the ratepayer becomes the responsibility of the taxpayer.

7. COMMUNICATION PLAN

Key Messages

- Ontario's Fair Hydro Plan has resulted in the biggest electricity rate reduction in Ontario's history.
- We have heard from Ontarians across the province that the price of electricity has risen too quickly, which is why we moved forward with a plan to ensure the costs are shared more evenly over the years ahead.
- The government is following through on its commitment to balance the books as announced in its 2017 Budget, while continuing to make investments in priority areas such as electricity price relief.

Strategic Approach

- Low-profile, reactive and targeted to industry stakeholders and government employees as necessary. Reactive messaging contingent upon legislative changes only with back-pocket QAs to support as needed.
- Communications support will continue to be led by the Ministry of Energy.

8. RECOMMENDATION

The Ministry of Finance and Ministry of Energy request that Treasury Board/Management Board of Cabinet:

(a) ~~Approve~~ Authorize that the Minister of Finance and Minister of Energy provide a ~~support~~ protection agreement, to be authorized by Order in Council ~~-~~under the *Ontario Fair Hydro Plan Act, 2017* in respect of the debts, obligations, securities and undertakings of one or more OPG Financing Entities ~~as contemplated under the *Ontario Fair Hydro Plan Act*, to one or more OPG Financing Entities under~~ substantially reflecting the terms set out in the ~~Appendix~~ Provincial Protection and Assurances Indicative Term Sheet and subject to such revisions that the two ministers acting together may determine;

(b) Recommend that Cabinet approve an Order in Council, in accordance with section 5 of the Ontario Fair Hydro Act, that authorizes the Minister of ~~Energy~~ Finance and the Minister of ~~Finance~~Energy, acting together on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest~~,~~; and

(ii) to determine terms and conditions of the guarantee or indemnity and the maximum liability for the guarantee or indemnity~~,~~.

DRAFT

~~specify terms and conditions that must be included in any guarantee or indemnity given by the Minister of Energy and the Minister of Finance; and~~

~~specify a maximum liability for the guarantee or indemnity.~~

~~A~~APPENDIX

Provincial Protections and Assurances

Indicative Term Sheet

Ontario Fair Hydro Plan Act, 2017

*This indicative term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 (the "**Act**") and the regulations made thereunder (the "**Regulation**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate. This Term Sheet is not intended to create any obligations or be binding on the parties.*

Change of Law Protection Agreement:	A Change of Law Protection Agreement will be among the Obligor, a Financing Entity and an Indenture Trustee, acting for and on behalf of the Beneficiaries in accordance with a Trust Indenture.
Obligor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indenture Trustee:	An indenture trustee, acting for itself and on behalf of other persons entitled under an applicable Trust Indenture.
Beneficiaries:	The Indenture Trustee, acting for itself and on behalf of other persons entitled under Specified Claims.
Specified Claims:	Payment obligations of the Financing Entity that are secured under the Trust Indenture and that are approved as contemplated below under Obligor Approval.
Protection Events:	Any of the following would constitute a Protection Event: (A) (1) the Legislature repeals (and does not replace on an equivalent basis) or amends the Act or any portion thereof; (2) the Legislature enacts or amends any other statute; (3) the Lieutenant Governor in Council repeals (and does not replace on an equivalent basis) the General Regulation made under the Act or any portion thereof; or (4) the Lieutenant Governor in Council, a minister of the Crown, an official of the government or a board or commission all the members of which are

	appointed by the Lieutenant Governor in Council makes or amends any "regulation" (as defined in Part III of the *Legislation Act, 2006*), in each case, that materially and adversely affects (a) the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims, or (b) the Change of Law Protection Agreement or any of the agreements under which Specified Claims arise, other than if the Indenture Trustee has confirmed in writing that the affect under such agreements is otherwise acceptable; or (B) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act or the Regulation is *ultra vires* in a way that materially and adversely affects the ability of the Financing Entity to receive amounts on its investment interest so that it can pay Specified Claims.
Obligation to Pay Specified Claims:	Upon the occurrence of a Protection Event, the Indenture Trustee will have the right to require the Obligor to pay the Specified Claims owing by the Financing Entity when they become due and payable (without acceleration). The exercise of such right by the Indenture Trustee in accordance with the Trust Indenture shall constitute the only remedy available under the Change of Law Protection Agreement. Under no circumstances shall the Obligor be obligated to pay or indemnify a Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits.
Subrogation:	Upon paying a Specified Claim to a Beneficiary, the Obligor as guarantor shall have rights of subrogation, including becoming entitled to all of the applicable Beneficiary's rights and interests under and in respect of the Specified Claim, including the security interest in each related investment interest and related property of the Financing Entity and the obligations of the Financing Entity owing under the agreements under which the Specified Claim arises. The Financing Entity may not change or consent to any change in such rights and interests without the Obligor's prior written consent.

Optional Replacement:	At any time following the exercise by the Indenture Trustee of its right to require the Obligor to pay Specified Claims when due and payable, the Obligor shall be entitled (but not obligated) to replace the Financing Entity as obligor and debtor and directly assume all of the Financing Entity's outstanding obligations and liabilities. The Financing Entity (including through the Financial Services Manager) will ensure that any obligation and liabilities undertaken or assumed by it will by their terms permit such a replacement and assumption (or, if applicable, satisfaction and termination) by the Obligor without additional cost or penalty and without any requirement for further consent, approval or agreement.
Term:	The Change of Law Protection Agreement will continue for as long as any Specified Claim remains outstanding.
Obligor Approval:	The Change of Law Protection Agreement will become effective in respect of a Specified Claim (including any modification) only after the Obligor has confirmed in writing that the Change of Law Protection Agreement applies to such Specified Claim. The Change of Law Protection Agreement will annex the applicable forms of program and series documents under which obligations of the Financing Entity may arise (e.g., including the form of trust indenture and series supplemental indenture) and set out the terms and conditions and process for obtaining the Obligor's approval and confirmation that the Change of Law Protection Agreement will apply to Specified Claims. Such approval may be made conditional on such matters as may be specified by the Obligor, including a maximum amount applicable to Specified Claims. The Province's approval of the form of any IESO/Financing Entity transfer agreement and any amendments will also be required.
FIPPA:	The Change of Law Protection Agreement will acknowledge that the Obligor will be bound by the *Freedom of Information and Protection of Privacy Act* (Ontario) and that any information provided to the Obligor, or any agent or representative of the Obligor in connection with the Change of Law Protection Agreement, may be subject to disclosure in accordance with the act or as otherwise required by law.
Representations and Warranties:	To be determined by the Minister of Finance and Minister of Energy in negotiation with the Financing Entity.

Confidentiality Obligations:	To be determined based on what would be customary and appropriate for similar types of arrangements and is acceptable to the Obligor and the Financing Entity.
Governing Law:	Province of Ontario.

---

Please find attached a markup of the proposal from OPG regarding the Provincial Support Agreeement.

This markup is the result of discussions between us at MOF Legal, lawyers from Energy Legal and the Province's external counsel at Blakes.

The changes are significant and we would like to get your feedback on our proposed approach. Perhaps we can have a discussion first with this group, and then a broader discussion with the Energy team and Stephen Ashbourne from Blakes.

Please let us know when you have had a chance to review and are available to discuss.

Provincial Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial protection and assurance arrangements contemplated in this Term Sheet will include such terms and conditions as the Minister of Energy and the Minister of Finance determine to be appropriate.*

Performance Guarantees	
Performance Guarantor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Performance Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and other persons having debt or other claims against the Financing Entity that are secured under a related trust indenture.

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

Performance Guarantee:	Pursuant to a Performance Guarantee, the Performance Guarantor will guarantee the performance, or cause the performance, of the obligations of IESO as servicer under the Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including servicing obligations undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. It is anticipated that such obligations will include matters related to the billing, collection and remittance of clean energy adjustments by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments with other amounts. In the event that the Performance Guarantee is held to be unenforceable against the Performance Guarantor, the Performance Guarantee will contemplate, in the alternative, a functionally equivalent direct covenant of the Performance Guarantor.
Term:	The Performance Guarantor's obligations under a Performance Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Performance Guarantee.
Approval Requirement:	The servicing obligations (including any amendments) to which the Performance Guarantee relates, together with the provisions of any Performance Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Performance Guarantee:	Under no circumstances shall the Performance Guarantor be obligated to pay special or punitive damages, or for loss of profits.
Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.

Indemnity of the Province:	The Province of Ontario will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee (including because of claims made against the Indemnitee by one or more of its specified creditors) that result from any of the following (each, an "**Indemnification Event**"): (A) the Legislative Assembly of Ontario repealing (and not replacing on an equivalent basis) the Act; (B) the Legislative Assembly of Ontario amending the Act or a Regulation made thereunder in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction in a final and non-appealable judgement determines that all or a portion of the Act is *ultra vires* in a way that materially and adversely affects the rights and interests of the Financing Entity under its investment interest.
Term:	The Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, the will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Indemnity:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or for loss of profits.
Undertakings regarding Certain Mismatches	
Avoidance of Mismatches	If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy all of its related payment obligations and thereby avoid any Mismatch.

Possible Undertaking to Fund Mismatches	If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to avoid a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to avoid the Mismatch. Any such undertaking may only be given at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and would be on such terms and conditions, including appropriate compensation to the Province of Ontario, as the Minister of Energy and the Minister of Finance determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
<u>Documentation</u>	
Representations, Terms and Conditions:	Subject to approval of the Minister of Energy and the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Performance Guarantor and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Performance Guarantor or the Indemnitor, or any agent or representative of the Performance Guarantor or the Indemnitor, in connection with the transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	Confidentiality obligations of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

Provincial ~~Support Agreement~~Protection and Assurances

Indicative Term Sheet[1]

Ontario Fair Hydro Plan Act, 2017

*This term sheet (the "**Term Sheet**") ~~is provided exclusively to the parties listed herein in connection with the draft~~relates to transactions contemplated to be undertaken under the Ontario Fair Hydro Plan Act, 2017 and the regulations to be made thereunder (the "**Act**"). This Term Sheet is to be held confidential. ~~Defined~~Unless otherwise specified, defined terms used herein have the meanings ascribed to them in the Act. The provincial ~~support agreement (the "**Provincial Support Agreement**") will contain the terms and conditions set out~~protection and assurance arrangements contemplated in this Term Sheet ~~in addition to such other representations, warranties, indemnities, and other~~will include such terms and conditions as the ~~Guarantor and the Beneficiaries (each as defined below) may reasonably require~~Minister of Energy and the Minister of Finance determine to be appropriate.*

Performance Guarantees	
Performance Guarantor:	~~Her Majesty the Queen in right~~The Province of Ontario, ~~as represented~~ by the Minister of Energy and the Minister of Finance acting together.
Beneficiaries:	~~The indenture trustee (together with its successors, the "**Indenture Trustee**") under the master trust indenture (the "**Master Trust Indenture**")~~Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over its rights and interests under a Performance Guarantee to its creditors and contractual counterparties, including any indenture trustee acting on behalf of itself and ~~all~~ other persons having debt or other claims against ~~a~~the Financing Entity that are secured under ~~the Master Trust Indenture (collectively, the "**Beneficiaries**") including, without limitation, holders of senior and subordinated notes, senior and subordinated lenders, hedge counterparties, credit enhancers, liquidity providers, the Financial Services Manager, the Indenture Trustee, the trustee of the Financing Entity if the Financing Entity is a trust, and any other administrator of the Financing Entity~~a related trust indenture.

[1] This draft term sheet is intended for discussion purposes only and does not represent a commitment of any party. Any agreement or undertaking of the Province contemplated in this term sheet may only be made either (a) with the approval of the Lieutenant Governor in Council as contemplated in subsection 5(2) of the Act or (b) under, and subject to, an order made by the Lieutenant Governor in Council as contemplated in subsection 5(3) of the Act.

~~**Term:**~~	~~The Guarantor's obligations under the Provincial Support Agreement will continue until **[one year]**[1] after all funding obligations (to be defined to include principal, interest, fees, hedge settlement and termination obligations and other related amounts) of all Financing Entities have been repaid.~~
Performance Guarantee:	~~Under the Master Sale and Servicing Agreement to be entered into by IESO and the Financing Entity, **[and OPG as Financial Services Manager]** ("**MSSA**"), IESO will have obligations both as a seller and as a servicer. Pursuant to a performance guarantee~~Pursuant to a Performance Guarantee, the Performance Guarantor will guarantee ~~in favour of the Beneficiaries to perform~~the performance, or cause the performance, of ~~(which may be by way of the appointment of a replacement servicer),~~ the obligations of IESO as servicer under the ~~MSSA and the~~ Act and under any agreement under which the applicable Financing Entity acquires an investment interest from IESO and IESO undertakes on-going obligations in respect of such investment interest, including ~~the obligations of any replacement servicer. The Guarantor will also guarantee the~~ servicing obligations ~~of the~~undertaken by IESO to enforce the performance by electricity vendors of their respective obligations under the Act. ~~The servicing~~It is anticipated that such obligations ~~covered~~ will include ~~all obligations~~matters related to the ~~collecting~~billing, collection and ~~remitting~~remittance of clean energy adjustments ~~and will protect the Beneficiaries from any risks arising from~~by IESO and electricity vendors, as the case may be, and regarding the commingling by IESO and electricity vendors of collections of clean energy adjustments ~~being commingled~~ with other amounts. In the event that the ~~performance guarantee~~Performance Guarantee is held to be unenforceable against the Performance Guarantor, the ~~Provincial Support Agreement~~Performance Guarantee will contemplate ~~a separate legal obligation by the Guarantor to indemnify the Beneficiaries for any losses that result~~, in the alternative, a functionally equivalent direct covenant of the Performance Guarantor.
Term:	The Performance Guarantor's obligations under a Performance Guarantee in respect of a Financing Entity will continue during the term of any obligation incurred by the Financing Entity that is or is intended to be secured by the Performance Guarantee.
Approval Requirement:	The servicing obligations (including any amendments) to which the Performance Guarantee relates, together with the provisions of

[1] ~~This mirrors the requirement expected to be in the Regulations under the Act not to wind up, dissolve or liquidate a Financing Entity until at least one year after all of its Funding Obligations have been repaid.~~

	any Performance Guarantee itself, will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under Performance Guarantee:	Under no circumstances shall the Performance Guarantor be obligated to pay special or punitive damages, or for loss of profits.
Indemnity	
Indemnitor:	The Province of Ontario, by the Minister of Energy and the Minister of Finance acting together.
Indemnitees:	Each Financing Entity that owns an investment interest from time to time. A Financing Entity may grant a security interest over the Indemnity to specified creditors, including to an indenture trustee under a trust indenture on behalf of itself and other persons having debt or other claims against the Financing Entity secured under the trust indenture.
~~Payment Guarantee Event~~Indemnity of the Province:	~~A Payment Guarantee Event will occur if~~The Province of Ontario will indemnify each Indemnitee for its costs, expenses and losses reasonably incurred by the Indemnitee (including because of claims made against the Indemnitee by one or more of its specified creditors) that result from any of the following (each, an "**Indemnification Event**"): (A) the Legislative Assembly of Ontario ~~repeals~~repealing (and not replacing on an equivalent basis) the Act; ~~or~~ (B) the Legislative Assembly of Ontario ~~amends~~amending the Act or a Regulation made thereunder ~~is amended~~ in a way that materially and adversely ~~impacts the ability of a Financing Entity to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such~~affects the rights and interests of the Financing Entity under its investment interest; or (C) a court of competent jurisdiction ~~(i)~~in a final and non-appealable judgement determines that all or a portion of the Act ~~to be~~is *ultra vires* in a way that materially and adversely ~~impacts~~affects the ~~ability~~rights and interests of ~~a~~the Financing Entity ~~to fully recover an investment interest in order to fully pay all funding obligations and other obligations incurred by such Financing Entity in respect of such investment interest or (ii) declares any funding obligations to be invalid or unenforceable; or~~ ~~(D) funding obligations are due and payable at a time when a market disruption (a period of [six months or more] when capital~~

	~~markets term funding is not available to effect refinancings of funding obligations) is occurring and, in the case of long term funding obligations only, a moratorium or limitation on the imposition and collection of clean energy adjustments to repay such funding obligations is in effect under the Act~~under its investment interest.
~~Payment Guarantee~~Term:	~~Upon the occurrence of a Payment Guarantee Event under clauses (A), (B) or (C) of the above definition:~~ ~~(x) the Guarantor shall assume and pay when due (without acceleration) all funding obligations and all other obligations of the Financing Entities to the Beneficiaries by paying all regularly scheduled amounts in respect thereof during the term of each Financing Entity's contractual obligation to such Beneficiaries; and~~ ~~(y) Beneficiaries holding funding obligations consisting of bonds [with a remaining term to maturity of greater than **one year**]~~ ~~shall have the option to put the bonds to the Financing Entity for a put price equal to 101% of the principal amount thereof plus accrued and unpaid interest. In connection with any put under this clause (y), the Guarantor shall guarantee payment of the put price and any related hedge breakage but shall not be responsible for any other default, penalty, prepayment or make whole amounts.~~ The Indemnity will continue during the term of any obligation incurred by a Financing Entity that is or is intended to be secured by the Indemnity.
Approval Requirement:	The terms and conditions of the obligations incurred by a Financing Entity that are secured or intended to be secured by an Indemnity, together with the provisions of any Indemnity itself, the will be subject to the approval of the Minister of Energy and the Minister of Finance acting together.
Limits under ~~Guarantees~~Indemnity:	Under no circumstances shall the Guarantor be obligated to indemnify any Beneficiary for special or punitive damages, or for loss of profits.
~~Priority of Payments:~~	~~The priority of the Beneficiaries to any payment made by the Guarantor under the Provincial Support Agreement shall be governed by the priority provisions in the Master Trust Indenture.~~
~~Subrogation:~~	~~Where the Guarantor has repaid all Beneficiaries in full, to the extent of such payments the Guarantor shall be subrogated in and to all the rights of recovery of the Beneficiaries in respect of their~~

	~~applicable indebtedness and obligations and the security granted by a Financing Entity to the Indenture Trustee. After repayment by the Guarantor of all indebtedness and obligations owing to the Beneficiaries, the Indenture Trustee will acknowledge and agree on behalf of the Beneficiaries that the Guarantor is entitled to exercise all of the rights, powers and privileges that the Beneficiaries have or may exercise in respect of the repaid indebtedness and obligations, all in accordance with the terms of the Master Trust Indenture. Prior to the repayment in full of the indebtedness and obligations owed to the Beneficiaries, the Guarantor shall have no rights of subrogation.~~
~~**Notice Requirements:**~~**Undertakings regarding Certain Mismatches**	~~The Indenture Trustee will be required to provide notice to the Guarantor of a Payment Guarantee Event and may in such notice demand payment or performance of the Guarantor's obligation under the Provincial Support Agreement, as applicable.~~
~~**Closing:**~~**Avoidance of Mismatches**	~~Date to be determined but no later than [■, 2017]. The Closing is the date on which the documents in respect of the MSSA, the Master Trust Indenture and all related documentation are executed and delivered~~If a Financing Entity proposes to incur one or more funding obligations that would require the Financing Entity to pay an aggregate amount during any reference period that would exceed the amount otherwise available to the Financing Entity during the reference period from its investment interests to pay such amounts (a "**Mismatch**"), the Financing Entity will, before incurring such funding obligations, undertake commercially reasonable efforts to arrange for commitments from highly creditworthy, market-based funding sources in accordance with the Financing Plan to enable it to satisfy all of its related payment obligations and thereby avoid any Mismatch.
~~**Reporting Requirements of a Financing Entity:**~~ **Possible Undertaking to Fund Mismatches**	~~The Guarantor will be entitled to receive all reports received by the Indenture Trustee under the Master Trust Indenture~~If a Financing Entity is unable to arrange for commitments from one or more highly creditworthy, market-based funding sources in accordance with the Financing Plan to avoid a Mismatch on commercially reasonable terms and conditions, the Minister of Energy and the Minister of Finance acting together may undertake on behalf of the Province of Ontario to provide funding commitments to the extent necessary to provide the Financing Entity with required funding to avoid the Mismatch. Any such undertaking may only be given at or before the incurrence of the funding obligation that would otherwise result in the Mismatch and would be on such terms and conditions, including appropriate compensation to the Province of Ontario, as the Minister of Energy and the Minister of Finance

	determine are reasonable and appropriate in the circumstances. The decision to provide such an undertaking will be in the sole discretion of the Minister of Energy and the Minister of Finance.
~~Conditions Precedent to Closing:~~Documentation	~~Conditions precedent to Closing shall be those conditions set out in the Master Trust Indenture.~~[2]
Representations, Terms and Conditions:	~~Customary representations~~Subject to approval of the Minister of Energy and ~~warranties of the Guarantor~~the Minister of Finance acting together.
FIPPA:	Acknowledgement that the Performance Guarantor ~~is~~and the Indemnitor will be bound by the *Freedom of Information and Protection of Privacy Act (Ontario)* and that any information provided to the Performance Guarantor or ~~its agents or representatives~~the Indemnitor, or any agent or representative of the Performance Guarantor or the Indemnitor, in connection with the ~~Transaction Documents~~transaction documents may be subject to disclosure in accordance with that act or as otherwise required by law.
Confidentiality Obligations:	~~Customary confidentiality~~Confidentiality obligations ~~to be negotiated and included. A Financing Entity and the Beneficiaries shall not, subject to applicable law, issue any press releases and other public announcements in respect of the Provincial Support Agreement without the prior written consent of the Guarantor~~of each Financing Entity and its assignees, representatives and agents as may be determined to be appropriate by the Minister of Energy and the Minister of Finance acting together.
Governing Law:	Province of Ontario.

[2] ~~Opinions on the validity and enforceability of Provincial Support Agreement will be required.~~

Hi Ron

Per our discussion see suggested revisions to the Provincial Agreement slides (now two slides 13 and 14). To address the remedy and limits.

Bruno

Ontario's Fair Hydro Plan

Corporate and Electricity Finance Division

DRAFT: June 28, 2017

Contents

- Overview: Ontario's Fair Hydro Plan
- Refinancing the Global Adjustment
- Outstanding Issues
  - Provincial Support Agreement
  - Indemnities to OPG and IESO
  - IESO Treasury Policy Amendments
  - Equity Injection
  - PILs Exemption
  - Performance Management Fees
- Appendix: GA Financing
  - GA Refinancing Structure
  - Equity Injection
  - IESO increased credit facility
  - GA Financing: Illustrative Net Debt Impacts
- Appendix: Background on Ontario's Electricity Market

Overview:
Ontario's Fair Hydro Plan

Overview:
The Ontario Fair Hydro Plan ("OFHP")

- On May 31, 2017, the government passed the Ontario Fair Hydro Act, 2017, to enable the implementation of the OFHP, which will lower electricity bills by 25 per cent on average for eligible residential customers. Eligible farms and small businesses will also receive benefits (essentially for those eligible for the Regulated Price Plan).
  - Implementation steps include a set of regulations under the Act brought forward by the Ministry of Energy for approval.
- The measures that make up the 25 per cent average reduction include
  - Refinancing a portion of the Global Adjustment (GA) to allocate fairly the costs of Ontario's contracts for electricity infrastructure investments over the expected lifecycle of the generation infrastructure assets.
    - The Global Adjustment recovers a portion of the commodity supply and conservation costs of electricity.
  - The Ontario Rebate for Electricity Consumers, for an amount equal to the provincial portion of the HST, which took effect on January 1, 2017.
  - Shifting funding of the Ontario Electricity Support Program (OESP) and Rural or Remote Rate Protection (RRRP) program from electricity ratepayers to the province.
- People with low incomes, those served by local distribution companies (LDCs) with the highest distribution costs, OESP recipients and On-Reserve First Nation households would benefit from even greater reductions to their electricity bills.

Overview:
The Ontario Fair Hydro Plan (cont'd)

- Other measures that make up the Fair Hydro Plan include
  - Expanding the Industrial Conservation Initiative (ICI) to include electricity consumers, in the manufacturing and certain other sectors including greenhouses, with an average monthly peak demand of greater than 500 kW and less than 1 MW.
  - Expanding the OESP, by providing 50 per cent more support in the form of monthly credits for people with low incomes and increasing eligibility, effective May 1, 2017.
  - Establishing an Affordability Fund that will be accessible to LDCs for customers who do not qualify for low-income conservation programs and who are unable to undertake energy efficiency improvements without financial assistance.
  - Providing on-reserve First Nations households with a 100 per cent credit of the delivery line on their monthly electricity bills.
  - Enhancing the Rural or Remote Rate Protection (RRRP) program to provide distribution charge relief to about 800,000 customers and shift costs from ratepayers to provincial revenues. This would include customers served by local distribution companies (LDCs) with the highest rates.
  - Improving energy sector efficiency and modernize the province's electricity market, building on the collaboration of the Independent Electricity System Operator (IESO) and the Ontario Energy Board (OEB).
- The government-funded measures (OESP, RRRP, on-reserve credits and the Affordability Fund) have been communicated to cost the government about $2.5 billion in the first three years (and would have an on-going annual cost to government). (Note: Actual amounts in the 2017 Budget fiscal plan is a little less, due to partial year implementation in 2017-18).

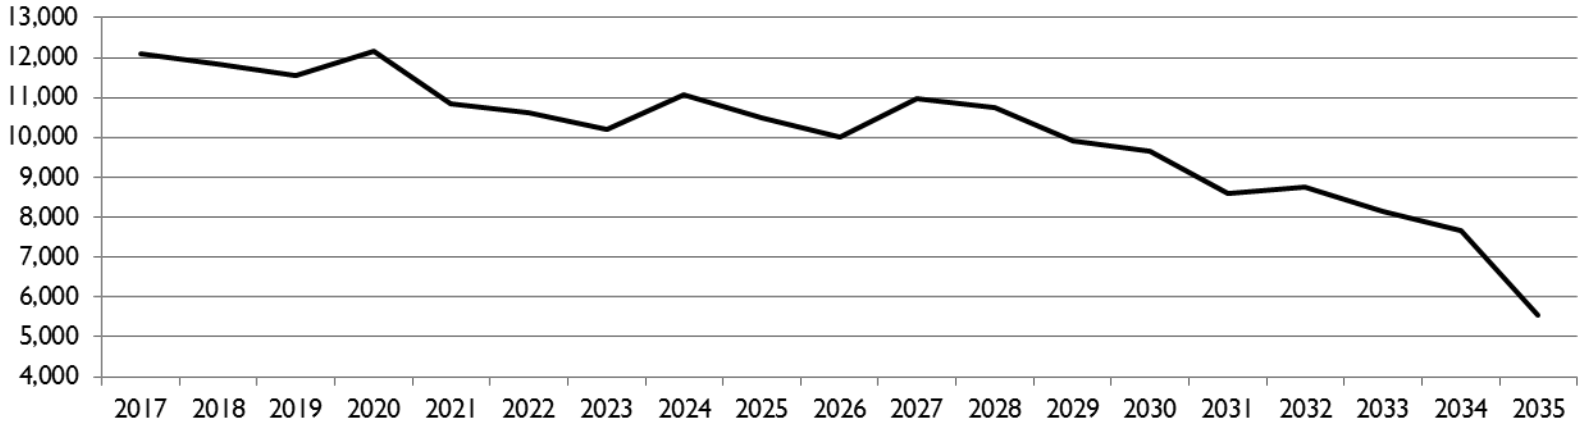
Refinancing the Global Adjustment

Refinancing the Global Adjustment

- Refinancing the Global Adjustment (GA) provides significant and immediate rate relief by spreading the cost of electricity investments over a longer period of time.
- Under forecasts provided by the Ministry of Energy at the time of the OFHP announcement in March, the immediate reduction (i.e., the financed portion) in the GA would be about $2.5 billion per year on average over the first ten years.
- This measure would share the associated costs more fairly. The illustrative chart below shows how Global Adjustment (GA) cost is front-end loaded and forecast to decline over time.

NOTE: Energy and IESO forecasts are subject to update, including as part of the Ministry of Energy's current Long-term Energy Plan update process.

Forecast Global Adjustment Cost (nominal $ million)



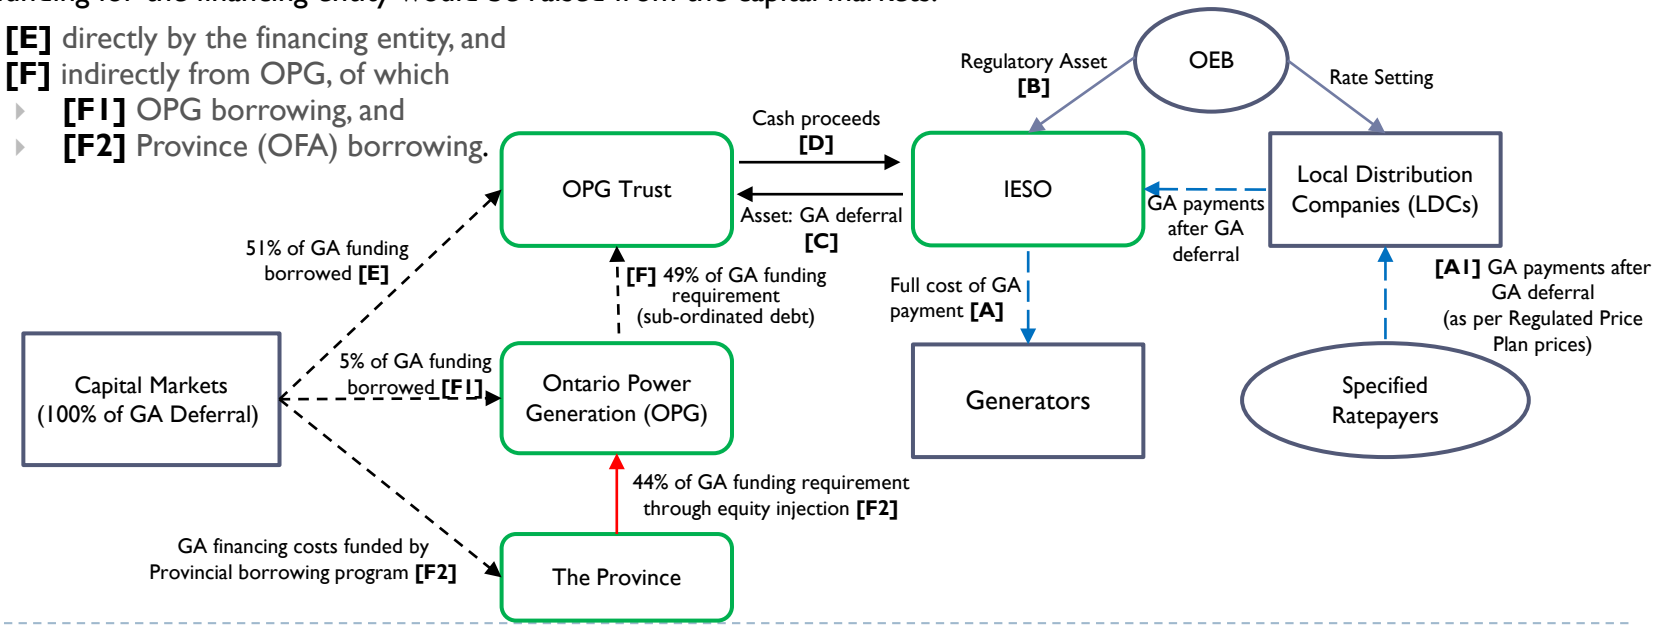
Source: IESO

Global Adjustment Financing: Policy Rationale

- The purpose of the Global Adjustment refinancing is to
  - Ensure that clean energy costs and clean energy benefits are fairly allocated among present and future specified consumers
  - Recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province, and
  - Align clean energy costs with clean energy benefits, in order to provide fairness for specified consumers over time.
- The majority of the province's electricity generators are under 20-year contracts. Many of these generators will be able to operate past their contract term.
- By recognizing that generation assets are expected to continue to provide benefit to future ratepayers, beyond the term of current contracts, future ratepayers are expected to be able to utilize these assets and reduce the need to finance the development of new generation assets.
- In the early years, a portion of the costs covered by the GA would be financed to reduce pressure on electricity ratepayers.
- In the later years, when some system costs are expected to be reduced due to continued operation of existing assets under 20-year contracts, the deferred amounts and cost of financing would be recovered from ratepayers through a "Clean Energy Adjustment".

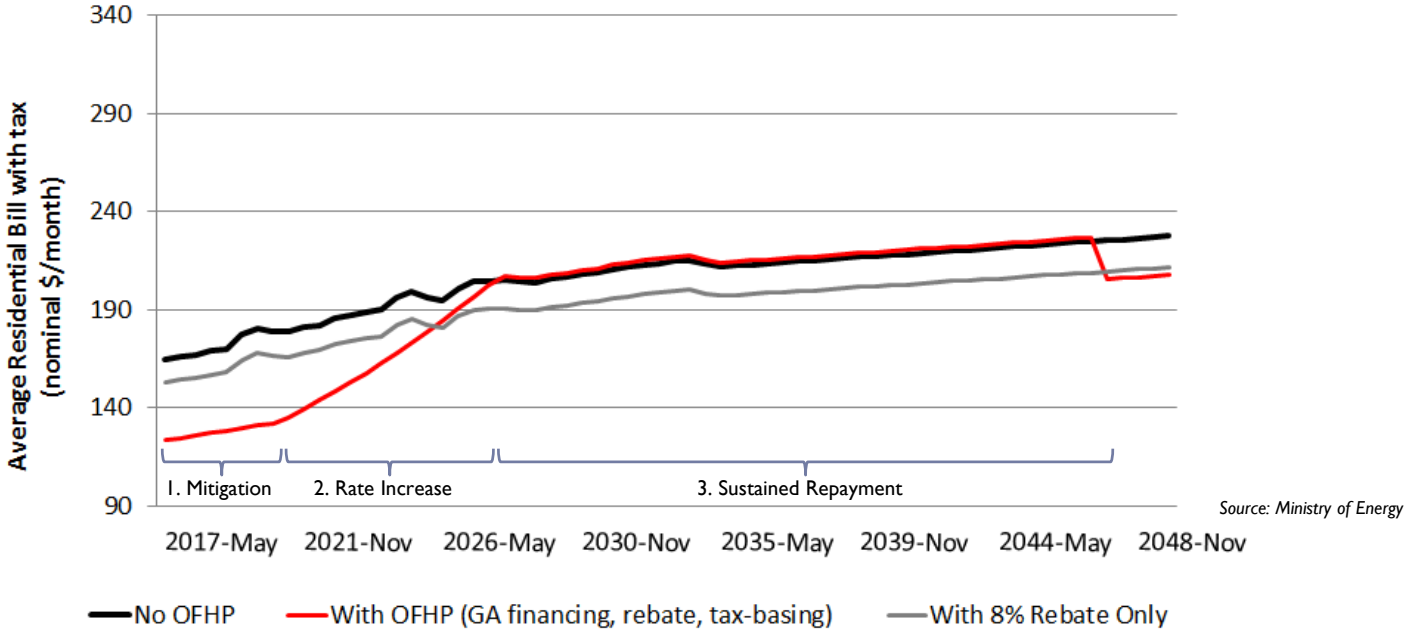
GA Financial Structure

- Through the OFHP, GA costs, including refinancing costs, will be recovered from ratepayers over a longer period of time.
  - The GA refinancing framework will be implemented through the IESO and Ontario Power Generation (OPG).
  - Under the OFHP, OPG would be able to establish a special purpose vehicle financing entities (e.g., OPG Trust) .
- **[A]** Under the OFHP, the IESO will continue to pay generators their contracted and regulated prices. **[A1]** However, LDC payments will be less, as Regulated Price Plan prices are set based on a portion of the GA deferred in order to support the initial 25% reduction (and subsequent adjustments).
- **[B]** The IESO will set up a deferral account, vis a vis a 'regulatory asset', with a right to recover the deferred costs and financing costs, as authorised by the OEB.
- **[C]** Under the Act, the Independent Electricity System Operator (IESO) would be able to sell the 'right to collect' deferred future revenue from ratepayers to the financing entity in return for cash proceeds **[D]**.
- The funding for the financing entity would be raised from the capital markets:
  - **[E]** directly by the financing entity, and
  - **[F]** indirectly from OPG, of which
    - **[F1]** OPG borrowing, and
    - **[F2]** Province (OFA) borrowing.



Global Adjustment Financing

- GA Financing structure and bill impacts can be thought of as having three phases (see illustrative chart below)



Source: Ministry of Energy

Phase 1: Mitigation

- 2017 residential bill 25% on average lower than original projection (pre-8% Ontario Rebate for Electricity Consumers).
- Increase in bill capped to 2% per year until 2021.

Phase 2: Rate Increase

- Residential bills continue lower than without the OFHP; however, not by 25% on average.
- Bill increases each year, limiting overall deferral and borrowing.
- Planned increases for the above purpose projected to end in 2028 when sustained repayment starts.

Phase 3: Sustained Repayment

- Bill higher than projection, excluding the GA deferral, until 2047 (estimated).
- Difference between with OFHP (red) and 8% rebate (grey) only represents recovery of deferred GA and financing.

Risks / Cost Sensitivities

Global Adjustment Refinancing Model Assumptions

- Projected Global Adjustment Refinancing costs are affected by actual system costs and consumption, and actual interest rates.
- Variances from these key assumptions could affect actual refinancing costs, etc.

- Interest rates
  - Higher/lower Interest rates would lead to higher/lower refinancing costs
  - For example, a 1.5 percentage point lower interest rate assumption, compared to an illustrative 5% case used by the Ministry of Energy, would halve estimated cumulative interest costs, from about $21 bn to $11 bn.

- Electricity demand
  - Lower/higher electricity demand due to fewer consumers or lower/higher consumption among some consumers would increase/decrease Clean Energy Adjustment costs for remaining consumers.

- System Costs
  - Ministry of Energy is developing the updated Long-term Energy Plan (LTEP), expected to be released in about summer 2017. The LTEP is expected to include measures to continue to reduce system costs.
  - Actual system costs are expected to also be affected by other factors, such as the Ontario Energy Board rate application process.

MOF-Related Outstanding Issues

Provincial Support Agreement
[Ministers' Approval Item: Pending]

- The OFHP Act, s. 5, outlines certain protections and assurances to be provided by the Province, including agreements to be entered into by the Ministers of Energy and Finance with persons under the Act. These include
  - guarantees of, or undertakings by the Province to provide assurances to those with claims against the Financing Entity (with respect to debts, obligations, securities or undertakings associated with an investment interest), and to support credit ratings, and to outline undertakings by the Financing Entity and possibly the Province for satisfying funding obligations.
  - This is separate from the indemnities proposed to be provided by the Ministry of Energy for OPG, IESO and respective directors, officers and employees with respect to their activities in implementing the Fair Hydro Plan.
- A proposed Provincial Support Agreement is currently under discussion among Ministry of Energy, Ministry of Finance, OFA, external legal consultants and OPG.

Provincial Support Agreement
[Ministers' Approval Item: Pending]

- There are three facets of the draft proposed Provincial Support Agreement currently under discussion. Each of these would require Agreement/approval of Ministers of Energy and Finance:
  1. Service Guarantee: Province to guarantee the performance of the IESO and electricity vendors under the Act including billing, collection and remittance of clean energy adjustments.
  2. Indemnity: Provided by Province for Financing Entity against third party claims as a result of government amending or repealing the Act or court rulings adversely affecting the rights and interest of the Financing Entity. Indemnity applies only to direct government actions and would not cover, for instance, OPG activities
  3. Avoidance of Mismatches: during a reference period, between Financing Entity funding obligations and amount available from investment interests: Outlines roles and expectations of Financing Entity to make efforts to arrange for commitments from market-based funding sources and, if unable to do so, possible Province funding commitments under terms and conditions, including appropriate compensation to the Province.
  - Under both the Service Guarantee and the Indemnity the Service Guarantor (the Province) will have the option to satisfy obligations by "stepping in) and paying when due regularly scheduled amounts. In both cases the Servicing Guarantor would not be obligated under any circumstances to pay consequential, special or punitive damages, or for economic loss or loss of profits.

- Note: Separation between the Province and OPG is necessary to maintain appropriate accounting treatment.

Indemnity
(For Minister's s.28 Approval)

- The Ministry of Energy is proposing to provide, on behalf of the Province, certain indemnities as requested by OPG and IESO, and is asking, pursuant to Section 28 of the *Financial Administration Act, 1990 (*FAA*)*, that the Minister of Finance approve this request.
  - OPG and IESO are requesting that the Province indemnify the corporations (OPG and subsidiaries, not including the financing entities, and IESO), respective directors, officers and employees with respect to their roles in implementing the Ontario Fair Hydro Plan (OHFP).
  - ENERGY notes that in the event that an indemnity claim does arise and a payment is required, the Ministry would be unlikely to be able to support these payments and would need to return to TB/MBC for an increase in its allocation.
- In implementing the OFHP, OPG and the IESO expect to carry out activities that fall outside the scope of their pre-OFHP typical business activities and corporate mandate. They believe that this creates the risk that such activities could be perceived as, or subject to claims that they are not being carried out in "good faith" or in the best interest of the corporation, thereby exposing OPG and/or the IESO to increased liability.
- OPG and IESO note that existing statutory protections do not preclude a party from bringing an action or other civil proceeding against the corporation's directors, officers or employees, causing them to incur costs in defending the claim.

Indemnity (cont'd)
(For Minister's s.28 Approval)

- Under the proposed Agreements, the Province would agree to indemnify and hold harmless the corporations and their respective directors, officers and employees from any claims, liabilities, costs or losses that might arise to the Protected Person as a result of their roles in carrying out activities related to the implementation of the ONFHP.

- The proposed Agreements note that under the Indemnities, a protected person would not be entitled to be indemnified in respect of losses for which coverage is provided elsewhere, including through insurance policies or existing statutory indemnities.

- Indemnity would not cover a protected person losses that are the result of such protected person's dishonesty, gross negligence or willful misconduct.

- The Agreement includes a waiver that restricts the Province's ability to bring any claims (other than those arising out of gross negligence and wilful misconduct) against the Protected Persons.

  - MENE believes the risk associated with providing this waiver is likely low given that it is unlikely that the Province would bring a claim against a Protected Person for acts they would be providing an indemnity to the Protected Person for.

Indemnity (cont'd)
(For Minister's s.28 Approval)

- Ministry of Finance staff recommend approval of the s.28 request.
  - Ministry of Energy indicates that the Indemnities have been requested by the companies, supporting the implementation of the OFHP.
  - The Ministry of Energy states that the risk of the Province providing the Indemnities is undeterminable and unquantifiable at this time, due to uncertainty around possible claims under the Indemnities. Ministry of Energy notes, however, that the risk is mitigated by the existence of statutory immunities under the *Electricity Act, 1998,* for IESO, and under the *OFHP Act, for OPG,* pre-existing protection for director, officers and employees under insurance and, the limitation of indemnity to claims arising from IESO's and OPG's respective roles in implementing the OFHP.

IESO Treasury Policy
(For Minister's Approval)

- As prescribed under Regulation 280/14 under the *Electricity Act, 1998,* the IESO is required to maintain investment, borrowing and financial management policies and procedures.

- As required under the Regulation, the IESO has submitted a revised IESO Treasury Policy for Minister of Finance approval.

- The revised IESO Treasury Policy incorporates the following two changes:
  1. Permit borrowings to ensure funding of any amounts resulting from or required under the *Ontario Fair Hydro Plan Act, 2017*.
  2. Increase counterparty exposure to Schedule A Canadian Banks from the current $420million to $500 million, an increase of $80 million exposure per counterparty.
     - This ensures that the IESO has flexibility to efficiently manage its cash accounts as evolving business requires IESO to manage higher cash flows and seek appropriate short-term investments.

- OFA staff have reviewed and have no concerns with the requested changes.

Equity Injection – Key Proposed Terms

OFA to Support under a Service Level Agreement

The terms for the Equity Injection are set out in the Fair Hydro Plan – Master Subscription Agreement Term Sheet.

- The Province agrees to inject 44% of total funding of GA asset by way of equity subscription in OPG, which amount OPG in turn will invest in the Fair Hydro Trust as subordinated debt (**Equity Injection Plan**)
- Ministry of Energy (as Shareholder) will seek appropriation on an annual basis through PRRT for the amounts requested by OPG for its equity requirements. OPG will provide forecasts of its equity requirements for the upcoming three years in its business plan submission.
- OPG agrees use the equity subscription amounts solely for funding the Fair Hydro Trust's subordinated debt requirements as part of the Fair Hydro Plan
- OPG will amend articles of incorporation to create an additional class of shares – Class A Shares – which will be non-voting and redeemable at OPG's option.
  - OPG will issue Class A Shares to the Province monthly at a value per share equal to book value, as determined from OPG's last approved quarterly financial statements
  - OPG will have the right to repay equity subordinated to the Province, through exercise of its right to redeem the Class A Shares, as principal repayment of the debt is made commencing in 2027
- Ministry of Energy and OFA would, as proposed, have a service level agreement in place providing authority for OFA to provide cash management services to facilitate share purchases on an ongoing basis on behalf of the Ministry of Energy, subject to the approved PRRT amount and 44% share.

Performance Management Fees

- OPG will be providing all required services to the Trust as part of the OFHP, including planning, strategy, financing, deal execution etc.
- The legislation (s. 19.3) allows OPG to establish and charge a management fee for those services in accordance with the regulations, which are currently in development.
- There are two components to the model proposed by OPG:
  - Base fee: the structure will allow OPG to earn a commercial fee, an accounting consolidation requirement, with periodic OEB review of the commercial basis of that fee. OEB and OPG are in discussions in order to develop a model that satisfies the accounting requirements and is consistent with OEB's processes.
  - Performance management fee: OPG has the ability to gain or lose depending on the actual financing cost relative to a benchmark, which would be shared equally between ratepayers and OPG. Gain/loss is capped at 1% of annual incremental issuance amount.
- MOF (OFA) and Ministry of Energy are currently reviewing OPG's performance management fee proposal. [who approves?]

Payment in Lieu of Taxes Exemption
(Minister's Approval Item: Minister's Reg.)

- Request from OPG – and supported by ENERGY is a PILs exemption for the income arising from the OPG financing vehicle/OPG as a consequence of the Fair Hydro Plan.
  - With no PILs exemption, ratepayers will bear the cost of PILs through the rate base.
  - OPG has sought a broad comprehensive PILs exemption for a variety of potential financing structures including corporations, trusts or partnerships.

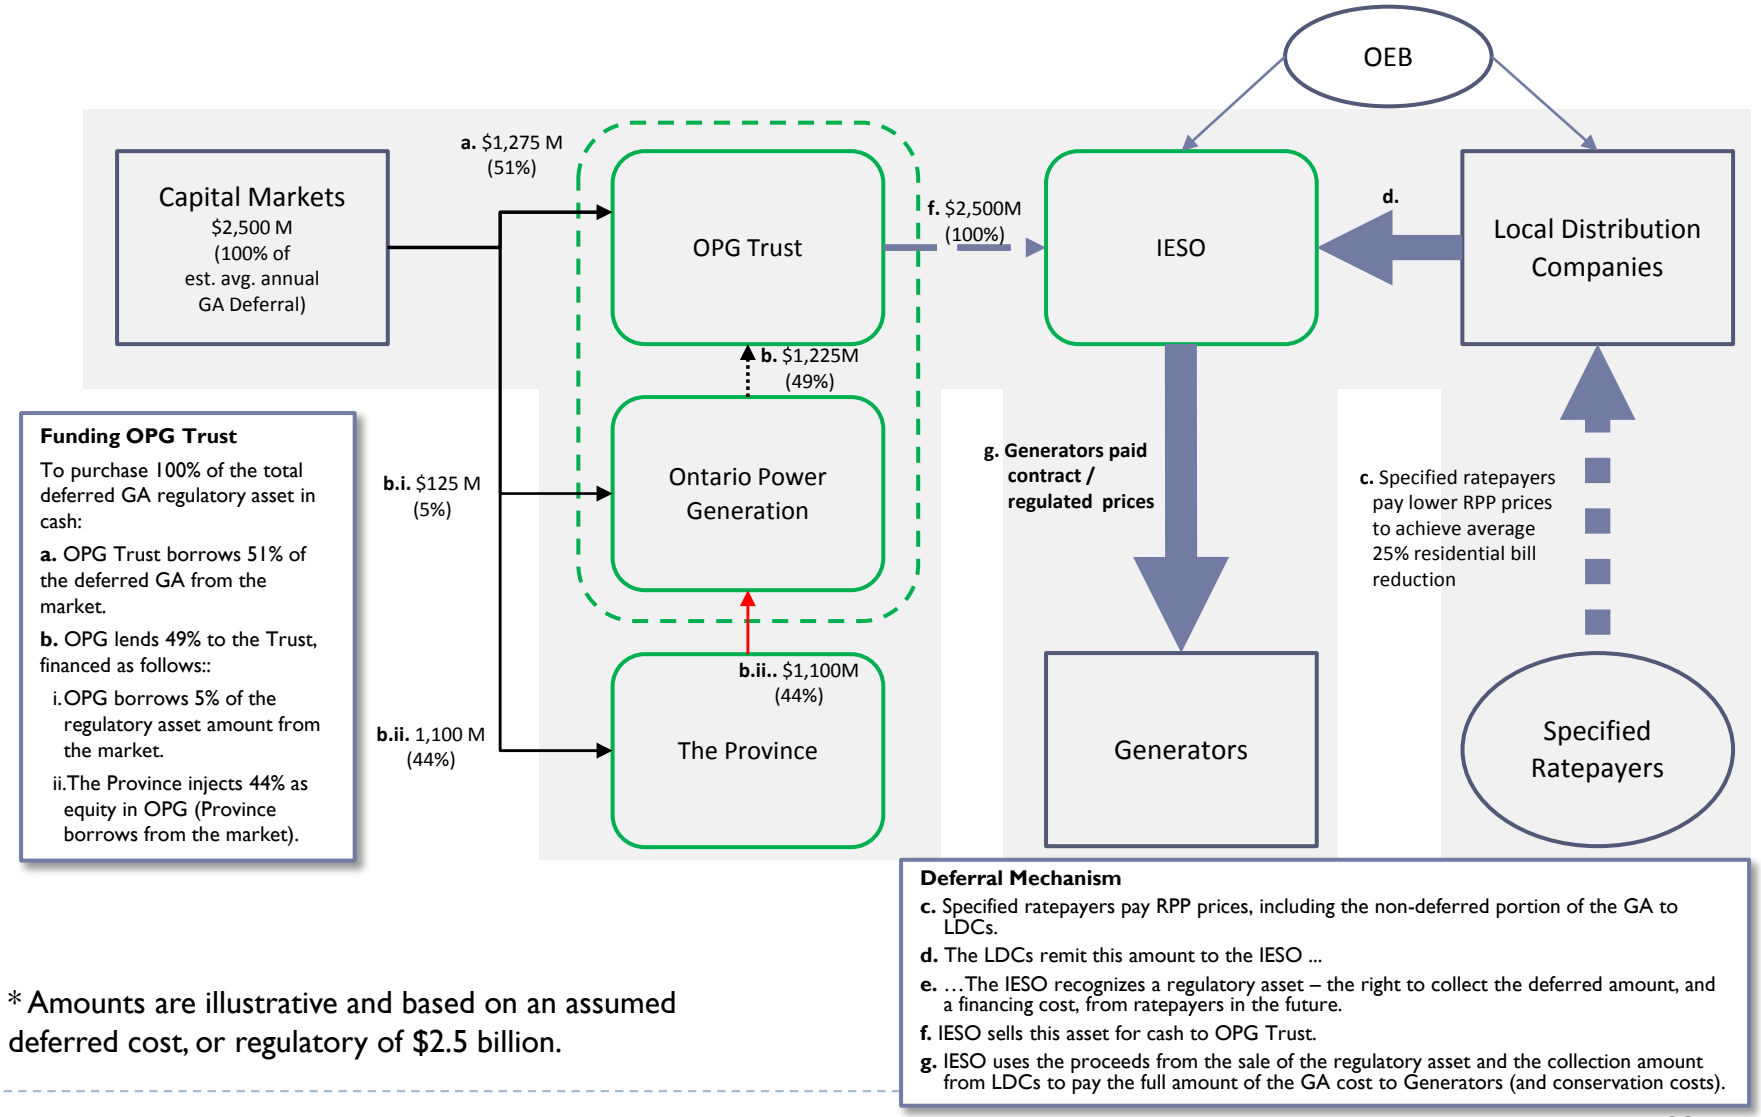
- The PILs regulations under the Electricity Act are under the purview of the Minister of Finance.

- TPD recommends [TBC] a regulatory exemption for each specific financing entity structure, once the structure is determined. A blanket exemption would create significant risks to provincial revenue and require a number of complex conditions to minimize the potential for precedents and tax avoidance.

- TPD proposes bringing forward for approval the required regulation(s) once OPG advises on each specific financing entity structure and any anticipated future structures or changes to the structure.
  - OPG has raised questions on the timeliness of response for a new regulation, as OPG special purpose vehicles for financing may be put together quickly to respond to different markets and market conditions

Appendix: GA Financial Flows & MOF / OFA Roles

GA Financing Structure: Illustrative Fund Flows* - Mitigation Phase



Funding OPG Trust

To purchase 100% of the total deferred GA regulatory asset in cash:

a. OPG Trust borrows 51% of the deferred GA from the market.

b. OPG lends 49% to the Trust, financed as follows::

i. OPG borrows 5% of the regulatory asset amount from the market.

ii. The Province injects 44% as equity in OPG (Province borrows from the market).

Deferral Mechanism

c. Specified ratepayers pay RPP prices, including the non-deferred portion of the GA to LDCs.

d. The LDCs remit this amount to the IESO ...

e. …The IESO recognizes a regulatory asset – the right to collect the deferred amount, and a financing cost, from ratepayers in the future.

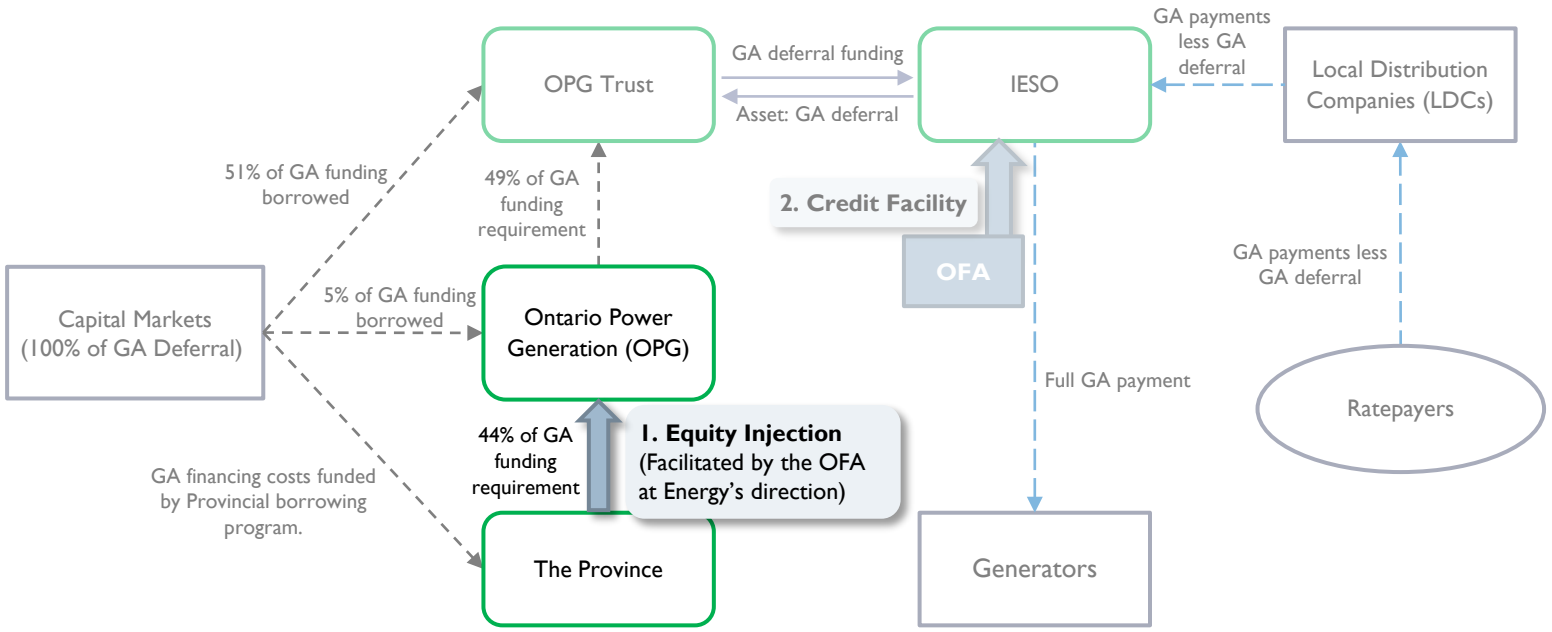
f. IESO sells this asset for cash to OPG Trust.

g. IESO uses the proceeds from the sale of the regulatory asset and the collection amount from LDCs to pay the full amount of the GA cost to Generators (and conservation costs).

* Amounts are illustrative and based on an assumed deferred cost, or regulatory of $2.5 billion.

Equity Injection

- The 2017 Budget includes in the Ministry of Energy Estimates an investment operating asset of $1.1 bn related to the Province's equity injection to OPG. OPG would provide financing to the Trust through sub-ordinated debt, as part of the OPG Trust financing to regularly purchase IESO's regulatory asset through 2017-18.
- The structure would
  - increase gross debt of the Province (to finance the equity injection in OPG),
  - increase net investment in OPG (so no net debt impact),
  - increase interest on debt related to that external debt, which
  - on consolidation into Public Accounts, would be offset by increased earnings of OPG from sub-debt interest revenue.



GA Financing: Illustrative Net Debt Impacts

Province of Ontario - Consolidated Statement of Financial Position

As at March 31, 2016 ($ Millions)		**GA Financing Impacts Est. Average Annual**
Liabilities		
Accounts Payable and Accrued Liabilities (Schedule 5)	19,361	
Debt (Note 2)	327,413	**1,100**
Other Long-Term Financing (Note 4)	14,145	
Deferred Revenue and Capital Contributions (Note 5)	10,779	
Pensions and Other Employee Future Benefits (Note 6)	12,107	
Other Liabilities (Note 7)	4,905	
	388,710	
Financial Assets		
Cash and Cash Equivalents	13,600	
Investments (Note 8)	21,765	
Accounts Receivable (Schedule 6)	11,059	
Loans Receivable (Schedule 7)	11,545	
Other Assets	1,936	
Investment in Government Business Enterprises (Schedule 9)	23,572	**1,100**
	83,477	
Net Debt	(305,233)	**0**
Non-Financial Assets		
Tangible Capital Assets (Note 9)	102,536	
Accumulated Deficit	(202,697)	

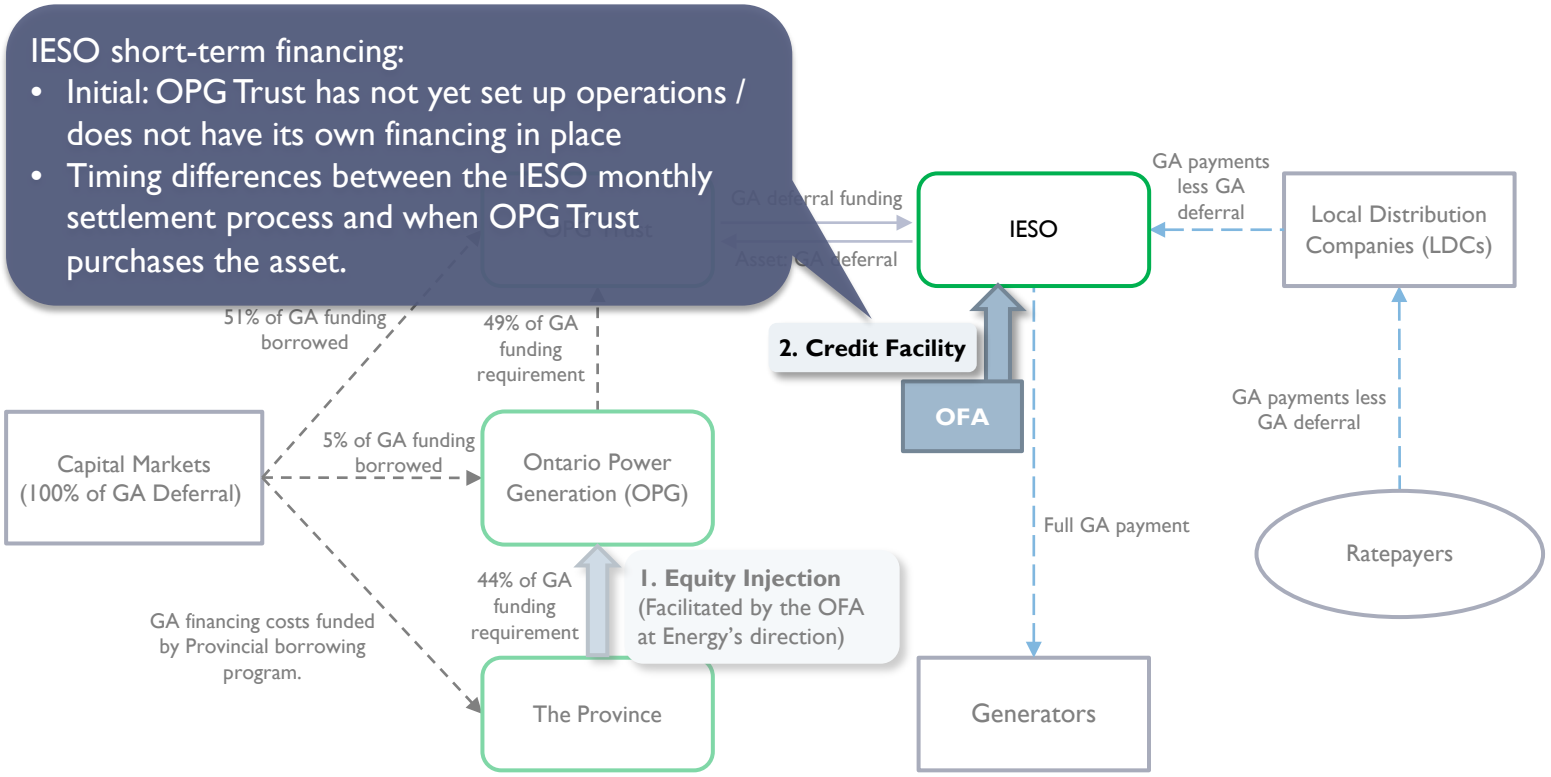
- Increased borrowing required to fund equity injections.
- Provincial debt will increase.

- Equity injections increase investment in OPG

- Offsetting impacts lead to zero net debt impact

OFA/IESO Credit Facility

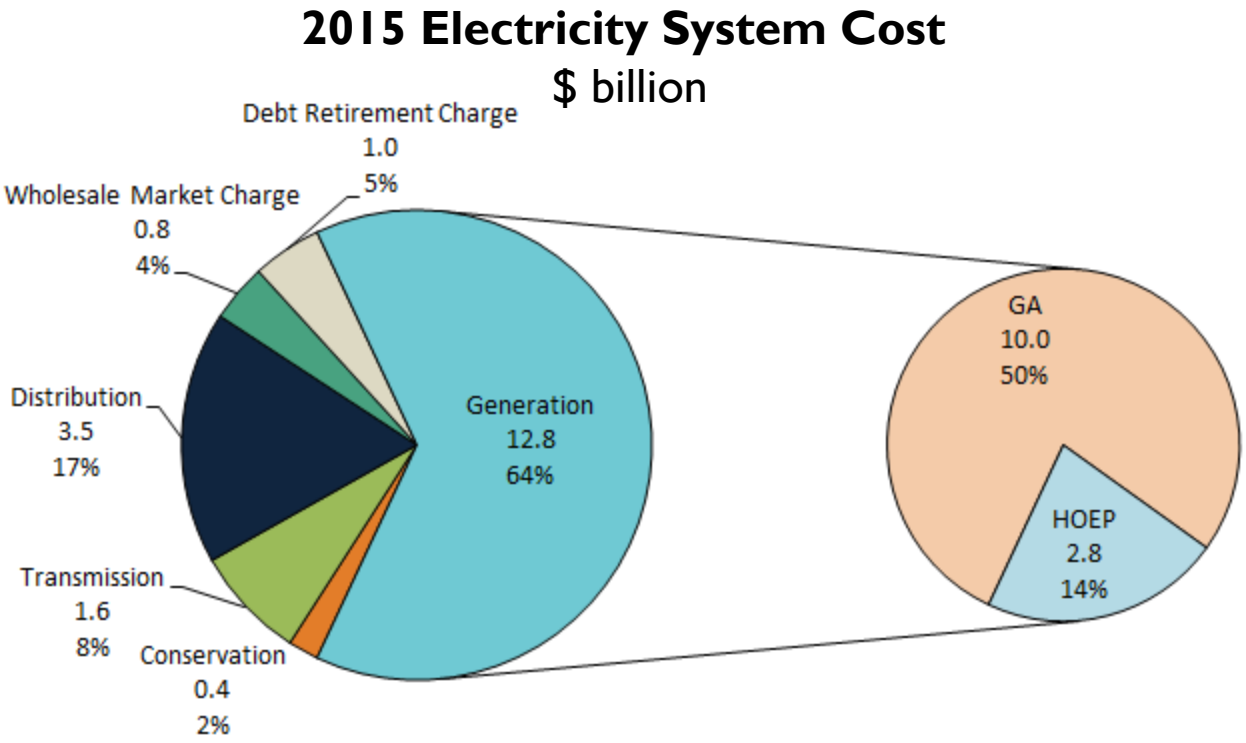
- The Fair Hydro Act, 2017 provides for the IESO to sell the right to recover those deferred amounts of the global adjustment from specified consumers in the future (the "regulatory asset").
- It is anticipated that the regulatory asset would be purchased by the financing entity to be established by OPG ("OPG Trust"). The cash received would be used by the IESO to fund the current Global Adjustment deferral shortfall.



Appendix: Background

Context: Ontario's Electricity Market

- In 2015, generation accounted for 64% of total electricity system costs. Total system costs in 2015 were $20 billion.



DEFINITIONS:

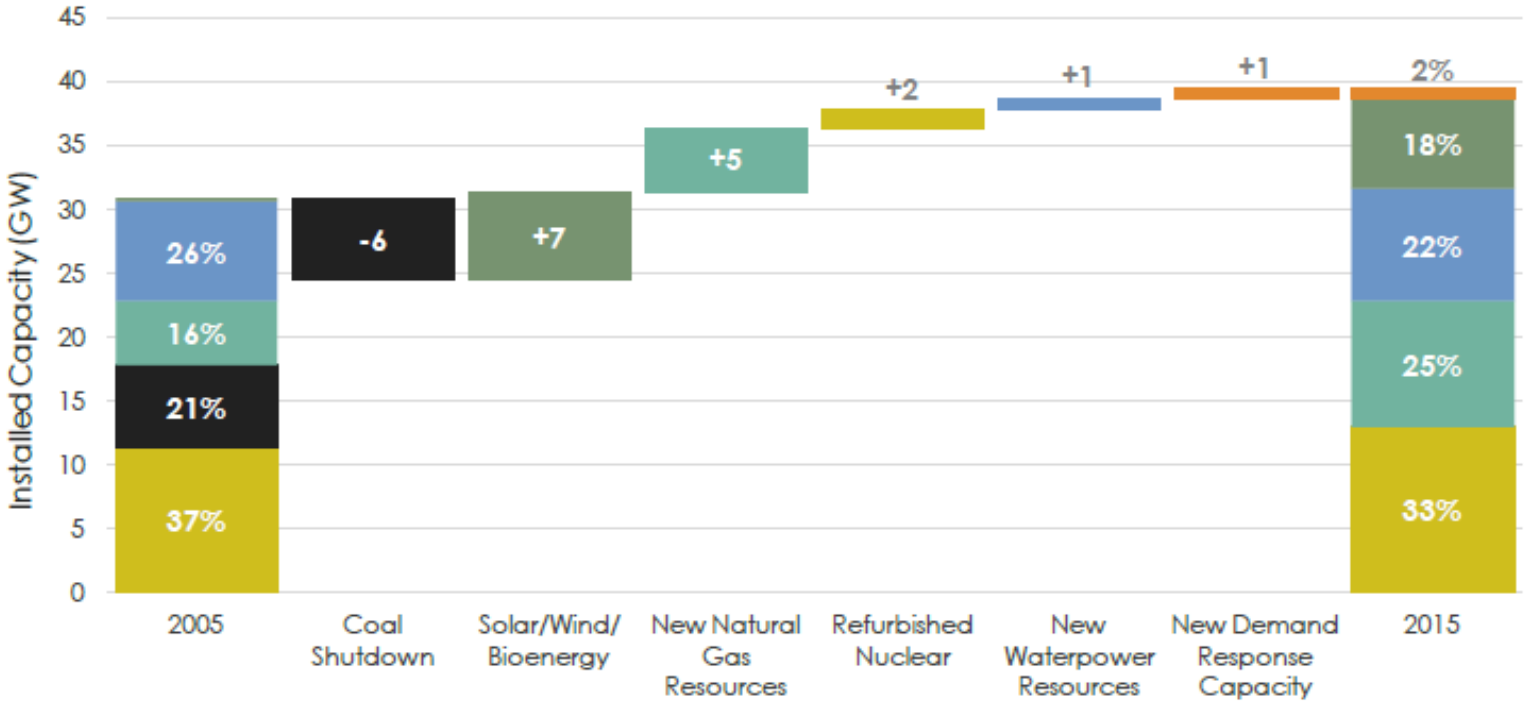
GA: The "Global Adjustment" accounts for differences between the market price of electricity and the rates paid to regulated and contracted generators and for conservations programs. The GA is collected from all electricity rates payers in Ontario

HOEP: Hourly Ontario Electricity Price.

Source: IESO

Context: Significant Change in Supply Mix

- Between 2005 and 2015, government invested more than $50 billion in the electricity system, including $35 billion in electricity generation to restore reliability, replace coal and meet environmental objectives.
  - Electricity costs are increasing as necessary investments are made to decarbonize and modernize the province's electricity infrastructure.



Source: IESO

Context: Electricity Prices Have Increased

- Since 2010, electricity prices have increased at a rate higher than the Consumer Price Index (CPI).
