External - Draft 5 Annotated (Blks DS) GOV2016.146.e05 (April 3 2017).pdf

A proposal to create Legislation.

Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

ELECTRICITY ACT, 1998

1. (1) Section 1 of the *Electricity Act, 1998* would be amended by adding the following clause:

[Note: GGRA provisions have been removed for now. Please confirm if they should be re-inserted.]

(2) Clause 1 (f) of the Act would be struck out and the following substituted:

(f) to protect the interests of consumers with respect to the adequacy, reliability and quality of electricity service;

(f.1) to protect the interests of consumers with respect to the prices they pay for electricity, including protection of those interests through the Hydro financing initiative;

[Note: Since the Hydro financing initiative is a defined term and is clearly required to be implemented under the new substantive provisions of the Act, I'm still not sure why this needs to be addressed in the purpose clause. However, I have included a purpose provision as per your instructions.]

Article 1 – Purpose

The proposed new legislation will likely include a large number of provisions intended to support the "financeability" of the structure. As a result, it may make sense for (LSB is exploring the potential) the Bill to create a new stand-alone energy statute, much like the *Green Energy and Green Economy Act, 2009* created the *Green Energy Act, 2009*.

The new legislation would have a purpose clause that explains the objective of intergenerational fairness. This would be useful for the markets to see, and may

Confidential Draft

help support the validity of the legislation from a constitutional law perspective (charge vs. tax)

x. Subsection 2 (1) of the Act would be amended by adding the following definitions:

"Financing Entity" means the trust established by Ontario Power Generation Inc. under clause XX (a) or the entity prescribed for the purposes of clause XX (b); ("French")

"hydro financing initiative" means those policies of the Government of Ontario related to its decision to ensure costs to Ontario electricity consumers are allocated fairly over time, taking into account the useful life of new sources of and technologies for electricity; ("French")

[Note: I have applied the precedent of the "smart metering initiative" as per your instructions. Just want to reiterate my concern that the reference to government policies is really vague (which initiative/ policies? At which point in time?) and I think this could cause lots of confusion, particularly if the policies evolve over time. It could also have unintended consequences.]

[Note: To consider -- by describing the initiative as we have in the above definition, we are potentially linking the deferred amount to amounts that would otherwise be paid for by consumers as part of the GA. If the deferred amounts are not all about "the useful life of new sources and technologies" then the description of the initiative should likely be broadened. (For example, if some of the deferred amount may be used to cover high wholesale prices, one could argue that the initiative is NOT about allocating costs fairly over time… it's just about pushing the cost increase to future consumers without considering what is "fair" across the generations.]

Article 2 - Definitions

The new legislation will include many new defined terms. One important term will be "Funding Shortfall" (or equivalent wording). This will be the net reduction in cash flows to IESO as a result of the reallocation of a portion of the Global Adjustment to later periods of time. Currently, the "Funding Shortfall" would be limited to the Global Adjustment attributable to the procurement contracts, but this is a question that still has to be settled.

Another important defined term that is worth noting is "Replacement Event". This is an event under which the market would want to replace a person who has responsibility to take essential actions under the program (including LDCs, IESO and OPG), like invoicing and collecting amounts.

Confidential Draft

The triggering events are likely to include insolvency and breach of duty/obligation.

Another key defined term is "Transition Charge". This is the amount that will be calculated and applied to the "deferral consumers", based on the amounts of payments due under funding obligations incurred to cover the funding shortfall (i.e., what we have until now been calling "deferral repayments").

Another important defined term will be "Treasury Plan". This will be the written plan prepared by OPG relating to the sale of the "regulatory asset(s)" to the OPG Financing Entity (sometimes previously referred to as the "Financing Trust") and the debt issued by the OPG Financing Entity to the markets.

Another defined term will be "True-up Amount". This is a key provision for the market. It allows for a catch-up for estimate/actual adjustments and to address consumer non-payment credit losses.

A further defined term will be "Undertaking of the Province". This will be a promise by the Government not to impair the program. This will be expected by the market, even though it will be understood that there may be issues for investors to enforce the promise, or get damages if there is a breach.

x. (1) Subsection 6 (1) of the Act would be amended by adding the following clauses:

(q.1) to enter into agreements or arrangements with the Financing Entity;

(q.2) to engage in activities related to making payments to and receiving payments from the Financing Entity under Part V.2, as required under this Act, and to engage in related settlement activities;

Note: Is some of this covered already by clause (i)? Could we address this by expanding upon clause (i)? Trying to understand whether there is any potential overlap.]

(q.3) to engage in activities related to the [sale/disposition/conveyance/assignment] of the [right/regulatory asset] created under section XX, which activities may include,

[Note: As discussed, please confirm terminology.]

(i) incurring liabilities in relation to the [right/asset];

Confidential Draft

(ii) [selling/assigning/disposing of?] the [right/asset] to the Financing Entity;

(iii) assigning [the right/asset] to third parties;

[Note: I don't understand (iii) -- I thought the rights to the asset were being assigned to the trust and nobody else?]

(q.4) acting as a recovery agent for the Financing Entity in relation to [the right/asset];

x. (1) Subsections 25.33 (1) and (2) of the Act would be repealed and the following substituted [TBD].

[Note: As per our telephone discussion today (March 27), there seems to be ongoing debate about the policy direction:

1. Do you want to amend the GAM so that the money received from the FE and the money recovered by the FE are part of the initial GA calculation?

2. Do you want to leave the GAM section as is and add a requirement (in a new section) for the IESO to conduct additional adjustments for a subset of the payments referred to in s. 25.33? This second adjustment would be engaged in after the existing GAM is calculated. So it would be a further adjustment of what has already been adjusted under the GAM.

Until this fundamental question is answered, we would be removing the proposed amendments to s. 25.33.]

OPTION 2:

Deferral adjustments, 25.33 amounts.

25.33.2 (0.1) For the purposes of this section and sections 25.34 and 25.35,

(a) "authorized entity" means **[the hydro financing trust established by Ontario Power Generation Inc. for the sole purpose of financing the recovery of the balance in the deferral account, or]** such **[other]** entity as may be prescribed by regulation;

(b) "deferral account" means the deferral account established under section 25.34;

(c) "deferral amount" means the amount recorded in the deferral account for each month during the deferral and recovery period;

(d) "deferral and recovery period" means the period from May 1, 2017 to April 30, 2047;

(e) "deferral consumer" means a consumer who is a member of a class of consumers prescribed by the regulations for the purposes of sections 25.34 and 25.35;

Confidential Draft

[NTD: This will be set out in a new subection 4(3) of O. Reg. 95/05 and will reflect OREC-eligible consumers other than non-grid connected customers of IPAs (who would not pay a GA charge anyway). Note that this is not quite the same as "RPP-eligible" consumers.]

(f) "electricity supply cost" means the amount calculated according to the formula:

(A + B + C + D) - E

where,

A is the amounts paid by the IESO to generators, the Financial Corporation and distributors, whether the amounts are determined under the market rules or under section 78.1, 78.2 or 78.5 of the *Ontario Energy Board Act, 1998,*

B is the amounts paid by the IESO to entities with whom the IESO has a procurement contract, as determined under the procurement contract,

[NTD: A and B use exactly the same wording as is set out in (a) and (b) of the existing ss. 25.33(1).]

C is

[NTD: C is the "net new" costs associated with the GA deferral. These are costs that the IESO will record in the GA deferral account established under s. 25.34, and that the IESO (or its assignee) will subsequently recover. These costs consist of the interest and financing-related admin costs associated with the GA deferral (which costs will be flowed through from the hydro financing trust to the IESO). These costs do not include the principal amount deferred and recovered, since that is already captured as part of A and B.

The "net new" costs in C will be recoverable solely from a newly prescribed class of consumers - deferral consumers (i.e. those consumers who will benefit from the GA deferral). The rules for the recovery of these costs will be part of a new subsection 4(3) of the RPP Regulation.]

D is any other amounts that may be prescribed by regulation,

[NTD: Paragraph D would give us flexibility to add new cost categories by reg. if/as needed now or later.]

[GGRA-related amendments are removed for the time-being]

and

E is any other amounts that may be prescribed by regulation;

[NTD: Paragraph E would give us flexibility to add new cost categories by reg.

Question for leg counsel: If in the future HOEP were to exceed contract prices and/or regulated rates, presumably the formula would still work (i.e. in such case the amounts for A and B would simply be negative amounts)?] *[ntd-LSB: IESO appears to agree with that idea, based on our shared appreciation of how EA s.25.33 works today.]*

(f) "reduction period" means the period commencing May 1, 2017 and ending April 30, 2018;

(g) "RPP Regulation" means Ontario Regulation 95/05 (Classes of Consumers and Determination of Rates).

Electricity pricing adjustments

Adjustments by IESO

(1) The IESO shall, through its billing and settlement systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of market participants in Ontario as are prescribed by regulation, reflect the electricity supply cost.

Adjustments by distributors and retailers

(2) Distributors and retailers shall, through their billing systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of consumers in Ontario as are prescribed by regulation, reflect the electricity supply cost.

[NTD: There will be two "classes of consumers in Ontario that are prescribed" for the purposes of RPP-"plus" deferral – the EA regulation that "prescribes" these two classes will refer to (or be aligned with) the two classes as described in the RPP Regulation. 1) The first class are the deferral consumers (see definition above), and 2) the second class (or defined base consumer) will be the "proxy" Toronto Hydro consumer whose bill will only be allowed to increase year-over-year according to rules prescribed in a new s. 6.1 of the RPP Regulation.]

Variance accounts

(3) The IESO shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by it under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation. *[ntd-DAN: I left "this section"*

even though this provision is part of a new s.25.33.2 – did you want "this section" to refer to "section 25.33"? If so, then we'd add this to the list we've started referencing proposed new s.25.34 and s.25.35. Consider.]

[Drafting note: We can prescribe the different variance accounts that must be maintained, and the different amounts that must be tracked and accounted for, by the IESO. Among other things, the IESO will presumably need to establish variance accounts related to the GA deferral and payback, to take into account timing and other differences. Any financing costs associated with these variance accounts (over and above the financing costs passed through to the IESO by the authorized entity (the hydro financing trust) would be subject to Board scrutiny.]

Same, distributors and retailers

(4) Distributors and retailers shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by them under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation.

x. The Act would be amended by adding the following sections:

Deferral account

25.34 (1) The IESO shall establish a deferral account to record, for each month during the reduction period and the deferral and recovery period, the difference between,

(a) the amounts that would be payable by deferral consumers in respect of the electricity supply cost for the month under section 6.1 of the RPP Regulation; and

(b) the amounts payable by deferral consumers in respect of the electricity supply cost for the month under section 6.2 of the RPP Regulation.

[NTD: IESO to confirm whether the differences between (a) and (b) would be recorded monthly.

Explanatory note: The Board will determine a rate under a new s. 6.1 of the RPP Regulation that will essentially follow the same process the Board uses to establish the RPP rate, except that it will establish a rate for the deferral consumers (which is a slightly broader class than RPP consumers). The Board will also determine a "proxy" rate for the deferral consumers, calculated according to a different set of rules set out in a new s. 6.2 of the RPP Regulation. The rules in s. 6.2 will establish the "proxy" rate for a "proxy" Toronto Hydro customer consuming an average of 750 kWh/mth, to achieve an all-in tax-included total bill amount reduction of approximately 17% (the bill reduction for GA deferral + 8% OREC will result in an all-in bill reduction for May 1, 2017 – April 30, 2018 of 25% over the May 1, 2016 – April 30, 2017 period). There will be

additional rules dealing with bill increases and full repayment of the GA deferral by April 30, 2047.]

Note that because we refer to the new provisions in the RPP Regulation, we will need to amend that regulation *before* the introduction of the proposed legislative amendments. Drafting of the proposed RPP Regulation amendments is underway.

Do we need to create a parallel provision requiring distributors and retailers to establish deferral accounts as well?]

(2) The IESO shall record interest on the balance of the deferral account at a rate or rates reflecting the costs incurred by the IESO, or by any assignee under section 25.35, to finance the amounts recorded in the deferral account.

(3) The IESO shall also record in the deferral account the costs incurred by the IESO to finance the amounts recorded in the deferral account.

[NTD: This is a placeholder for what we will need here. The concept is that ss. (2) and (3) will ultimately apply to the interest and admin costs incurred by the hydro financing trust (assignee of the right of recovery under s. 25.35) in providing funds to the IESO to finance the GA deferral. Those interest costs and admin costs will be fully recoverable through section 25.35, subject to Board scrutiny presumably limited to verifying the calculations. This is not intended to address interest and costs incurred by the IESO and recorded in the variance accounts established under ss. 25.33(5).]

Recovery of GA deferral amounts

25.35 (1) The IESO shall have the right to fully recover the balance recorded in the deferral account. **[The Board shall authorize?]** recovery of the balance from the deferral consumers over the deferral recovery period in accordance with the prescribed rules.

[NTD: What role should the Board play in determining the amounts recovered each year (within the smoothing parameters that are prescribed)? For e.g., could the Board set rates such that the year-over-year increase in the proxy Toronto Hydro customer's all-in bill was less than the maximum permitted under the prescribed rules?

The prescribed rules will be set out in the new s. 6.2 of the RPP Regulation, which will determine how much the "proxy" Toronto Hydro customer's monthly average bill can increase year-over-year (after the reduction period). Basically, for the first four years after the reduction period, the increase will be limited to CPI. For the balance of the deferral and recovery period, the increases will be limited to 10%, with an overarching requirement that the deferral amounts be fully repaid by April 30, 2047.]

Assignment of right of recovery

(2) The IESO shall have the right to assign**[, in whole or in part?,]** to **[one or more?]** authorized entities, the IESO's rights under subsection (1).

[NTD: This is largely a placeholder for what needs to be addressed here. We will need to determine how to characterize this transaction. For e.g., will it be an outright assignment? Will it be a series of assignments? Should it be characterized as a "sale"? How will this transaction be implemented – e.g. by way of a contract between the IESO and the Trust? We will need the input of external counsel and others to ensure that it adequately supports the contemplated financings.]

Payments to assignee

(3) In the event of an assignment to an authorized entity under subsection (2), the IESO shall, through its billing and settlement systems, make payments to the authorized entity of the full amounts paid to the IESO in respect of the rights assigned.

[NTD: This is largely a placeholder for what needs to be addressed here. Iin addition to requiring IESO to make payments to the authorized entity, do we need to include explicit provisions giving the assignee the right to recover the amounts in the deferral account that are covered by the assignment?

We will need provisions dealing with billing and payment as between the authorized entity and IESO. We will also have to decide whether the interest and admin costs incurred by the authorized entity will simply be passed through to IESO, or whether the authorized entity (or OPG) will have an opportunity to keep any profits made on financing activities (swaps, etc.) by establishing some sort of "reference rate" that IESO would have to pay (and that might be different than the rate(s) the authorized entity would have to pay). A middle ground that could be considered would be to cap the amount of profits the authorized entity (or OPG) could make.

Along similar lines, the amounts charged by OPG to the authorized entity to provide admin services should be subject to Board review (e.g. for reasonableness). This would not jeopardize the ability of the authorized entity to recover all of its costs (since it would affect the amounts OPG could recover from the authorized entity).

We also need to contemplate a provision that if there is a change of law by the Government of Ontario that materially adversely affects the ability of the authorized entity to fully recover the assigned deferral account amounts, then repayment of those amounts will be accelerated and become immediately due and payable.]

x. The Act would be amended by adding the following provisions after s.29:

Transition Charges -- Ratepayer Obligation to Pay a Transition Charge

s.29.0.1 (1) Each consumer in the class of ratepayers to which this program applies (previously referred to as the "deferral consumers") will have a direct statutory obligation to the OPG Financing Entity to pay its share of the deferral repayments (principal, interest, financing costs).

Indebtedness of Ratepayers –
(2) This will be a debt owed by the consumer directly to the OPG Financing Entity. If it is not paid, the OPG Financing Entity can sue the consumer directly through the agreed procedures. This is identifying an explicit and identifiable revenue stream for the comfort of investors.

Separate tracking - distributors,
(3) This debt is separate from the debt owed by the consumer to its LDC, although the LDC will be the collection agent.

No set-off, etc. *[see similar provision at EA s.29.0.3(2)]*
(4) This debt cannot be netted out against any amount owed by the LDC to the consumer (e.g. year-end credit to consumer on equal monthly billing).

Allocation of Ratepayer Payments
(5) If a consumer pays less than its total invoiced amount, the payment will be allocated pro rata between the deferral repayment and the amounts owing to the LDC.

Transition Charges are Irrevocable

(6). This is intended to prohibit any reversal of amounts that must be paid to meet the terms and conditions of the funding obligations to be incurred under the program.

> **The deferral repayments are due regardless of whether a financing obligation incurred under the treasury plan is consistent with government policy at the time a related payment obligation arises.**
>
> **If the Fair Allocation Plan is amended after a funding obligation is properly incurred, any inconsistency in the payment profile will not impair the existing funding obligation or the pass-through of related payment amounts as Transition Charges.**

Anti-avoidance; No-by-pass

Confidential Draft

(7) The idea here tracks the U.S. transactions, which say that the obligation of a consumer to pay Transition Charges cannot be "by-passed". If a consumer leaves the grid, he or she will still be obligated. See the highlighted text in the definition of "Ratepayer" for a sense of how this may be accomplished.

> **This concept is a key to a rated market financing and will need to be developed further.**
>
> **For example, self-generating customers could be charged a flat fee (for example, equal to the amount that would be payable by the "representative" Toronto Hydro customer that underpins the current government policy on the 25% or some other basis.)**

Distributor, agent for Financing Entity,
s.29.0.2(1) LDC is agent for the OPG Financing Entity. LDC must invoice the deferral consumer the deferral repayment amount - referable to the items described in "Finance Amount" (i.e., an amount already borrowed).

IESO - Calculation of the Period Transition Charge

(2) IESO will calculate the total amount of deferral financing that will be repayable in an applicable [e.g. 6 month] period.

(3) IESO will then determine the deferral repayments due from deferral consumers based on a prescribed methodology for allocating payments to individual deferral consumers.

Notice of Transition Charges, IESO to distributors

(4) IESO will then inform each LDC of the amount of the deferral repayments to be included in the invoices issued to each deferral consumer in the LDC's service territory.

Adjustments *[ntd: Consider – Deferral repayment amount final]*

(5) Deferral consumers cannot challenge the amount of the deferral repayment showing on their invoice unless there is a substantial calculation error.

Successors of Electricity Distributors –
(6) Any successor of an LDC will be bound by the same obligations as the original LDC re: billing and collecting deferral repayments.

Confidential Draft

Successors of IESO –

(7) Any successor of the IESO will be bound by the same obligations as the original IES re: billing and collecting deferral repayments from distributors *[ntd-LSB: what about from consumers?].*

Appointment of an Alternative Invoicing Agent *[NTD – this provision may be moved closer to the powers/authorities of the OPG financing entity.]*

(8) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect deferral repayments. The LDC must sign whatever agreements and assignments are needed to enable the replacement agent to collect the deferral repayments from the LDC's deferral consumers.

Regulatory Asset Owner has Standing

(9) The OPG Financing Entity (or investors through their security) will be able to sue LDCs for failing to properly calculate or invoice the financing repayments.

29.0.3 Collections and Remittances [Collecting and Remitting Deferral Repayments]

(1) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC or the IESO, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect and remit deferral repayments. The LDC (or IESO, as applicable) must sign whatever agreements and assignments are needed to enable the replacement agent to collect and remit the deferral repayments. "Replacement Events" are necessary to investors to safeguard against a person holding money in a distressed circumstance.

No Set-off, etc. *[see similar provision at EA s.29.0.1(3)]*

(2) The deferral repayments cannot be netted out against any amounts owed by the party responsible for collecting those repayments.

Sequestration.

(3) If any LDC or the IESO fails to remit deferral repayments, the OPG Financing Entity can get a court to order the LDC (or IESO, as applicable) to require them do so.

Confidential Draft

x. Subsection 53.1 (1) of the Act would be repealed and the following substituted:

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, the following:

[Note: I know that the words "in addition to any other objects" appears in the current provision, but it seems very odd. This suggests that the objects are unlimited, which doesn't seem to be the intention but I could be wrong.]

1. Owning and operating generation facilities.

2. Establishing, operating and supervising the activities of entities for the purposes of supporting and promoting the government's hydro financing initiative.

3. Providing financial and other support to the IESO in its activities in relation to the hydro financing initiative.

4. Engaging in such financing, borrowing, lending and related activities and transactions to support the IESO with short-term or long-term financing.

5. Providing equity, not exceeding the prescribed amount, to support the financing capacity of the Financing Entity.

Subsidiaries

(1.1) Ontario Power Generation Inc. may create one or more subsidiaries in order to more efficiently conduct its activities or achieve its objects.

x. Section 53.2 of the Act would be repealed and the following substituted:

Rights of the Minister[1]

53.2 (1) The Minister, on behalf of Her Majesty in right of Ontario, may acquire, hold, dispose of and otherwise deal with securities or debt obligations of, or any other interest in, Ontario Power Generation Inc. or any of its subsidiaries.

Confidential Draft

[1] FLS - this provision is based on s. 49 of the Act

Agreements

(2) The Minister, on behalf of Her Majesty in right of Ontario, may enter into any agreement or arrangement that the Minister considers necessary or incidental to the exercise of a power under subsection (1).

x. The Act would be amended by adding the following Part:

PART V.2
HYDRO FINANCING INITIATIVE

FAIR HYDRO FINANCING PLAN

Establishment and adoption of the Fair Allocation Plan

A. 1 (1) The Minister of Energy [may/shall] establish a "fair allocation plan"

(a) The purpose of the plan is generally to try and reallocate the portion of GA attributable to the procurement contracts over the anticipated useful life of the generation assets under those contracts.

- **This is the intergenerational funding of the Green Generation Initiaitves.**
- **One policy question is whether the amounts deferred and the period over which the deferred amounts are repaid are to be limited to the portion of GA attributable to the procurement contracts and to the anticipated useful life of the [renewable] generation assets under those contracts.**

- From a constitutional validity perspective (and hence a financeability perspective) these limits are very important.

-Financial/economic modelling to verify this link is required.

Principles and Parameters,

(2) Based on this initial description (which is only illustrative to advance the initial stakeholder discussion), the Minister would determine the details of the "fair allocation plan", but must take into consideration the following principles:

- **The deferred GA costs should be spread over a period not exceeding the anticipated remaining useful life of the generation assets under the procurement contracts**
- **The plan should specify the length of the "reference periods", to identify which deferral consumers are responsible for which deferral repayments**

Confidential Draft

- **The share of the deferral repayments to be allocated to deferral consumers in each "reference period" should reflect a reasonable assessment of the remaining anticipated useful life of the generation assets under procurement contracts and perhaps to the benefits received by those deferral consumers from the procurement contracts (e.g. transition off coal)]**

- **No deferral consumer group should bear an unreasonably disproportionate share of the deferral repayments. That could be limited to a maximum amount, determined on a formula basis, if it makes sense tot he stakeholders**

- **In making the allocations, real (i.e. inflation-adjusted) dollars should be usedThe fair allocation plan is made using forward-looking information and projections.**

- **If, after the fact, the Minister determines that a Ratepayer Group paid more than would otherwise would have been the case had the projections for such period been accurate or other considerations come to light, adjustments to the plan could be made.**

Attribution Methodology

(3) The program will need to define how deferral consumers will be allocated an appropriate share of aggregate adjustment amount.

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

(4) Consideration will be needed regarding the level of review and confirmation of the plan is needed or appropriate. For example, should the scope of review be limited to calculations only? If there is a need for review, then consideration will be needed as to who will be the reviewer and under what authority, etc.

THE TREASURY PLAN

Power to Prepare and Implement the Treasury Plan –

A.2 (1) The "Treasury Plan" will be prepared by OPG. It must follow the requirements set out in this Part. Accounting considerations will need to be factored into this delegation, as well as the degree of province input initially and on an on-

Confidential Draft

going basis. [Note for leg counsel: We will need to create the necessary sub-delegation authority]

Required Terms and Conditions of the Treasury Plan

(2) The Treasury Plan will establish the basis for OPG making funding decisions, which will need to align with the Fair Allocation Plan.

Power to Review and Approve the Treasury Plan

(3) The Minister may designate one or more persons to review, and require changes to the Treasury Plan. (This review could also be given to the Minister.) *[NTD-: Assumin no role for OEB – confirm. Any role for MOF/OFA here?]*

Obligation to Apply IESO Remittances,

(4) OPG will need to ensure that pass-through amounts, transferred to it as agent for the OPG Financing Entity, are only used to repay the debt and related costs.

Non-Recourse,

(5) The Treasury Plan will provide that the investors and other contracting parties will not have recourse to the IESO, LDCs, agents, the OEB or the Province, except where such parties fail to comply with applicable law. This may be modified in the contracts under which a financing arises.

NOTE: The documentation creating the Funding Obligations must expressly state that such obligations are not guaranteed by the Province.

NOTE: See IESO/Stikeman's language for "Regulatory Asset" above.

Incurrences are Binding,

(6) A failure to implement the Treasury Plan will not impair the pass-through of the deferral amounts or the validity of an otherwise valid funding obligation.

- **NOTE: Separate from the legislative provisions, we will also be preparing a very rough sketch of some of the items that might be included in the Treasury Plan direction.**
- **The sketch will be for illustration purposes only and will be for use in discussions with stakeholders including OPG and IESO.**

Crown bound, actions prohibited,

A.3 (1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – *[NTD: alternative* - Crown bound, prohibition against discriminatory action.

Confidential Draft

(2) The Province will be prohibited from taking or permitting any action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or collections.

Undertaking and Agreement

(3) Under this Undertaking, the Province will agree for the benefit the OPG Financing Entity that it will not impair the value of the Regulatory Asset or the Transition Charges imposed under this Part. This "pledge" is in line with market expectations. Enforcement issues arise in this sort of undertaking, which will be assessed by the market and rating agencies based on the likelihood that a failure by the Province would lead to a successful damages claim. Unlike in the U.S., the law regarding such a claim is uncertain. Nevertheless, we expect that this sort of Undertaking will be requested in the legislation itself (i.e., requiring an act of the legislature to disavow – which is a higher bar than simply walking away from a contractual undertaking.

[Note: TBD where to place this Part within the Act and how to structure this Part. Temporary number (e.g. A1, A2, A3 etc.) has been used for now.]

FINANCING ENTITY

Financing Entity, established or prescribed

A1. (1) For the purpose of accomplishing the hydro financing initiative, the Minister may,

(a) direct Ontario Power Generation Inc. to establish and operate a trust; or

(b) direct Ontario Power Generation Inc. to [oversee? Administer?] an entity prescribed by the regulations.

[Note: Would the direction of the Minister include any additional instructions re timing etc.?]

Duty of Ontario Power Generation Inc.

(2) Ontario Power Generation Inc. shall comply with the direction of the Minister.

[Note: Once OPG takes action under A1 in accordance with the Minister's direction, what happens if at some point in the future, the Minister wants a different entity to take over the role of the FE? Is this a concern that needs to be addressed?]

Confidential Draft

Object of Financing Entity

A2. (1) The object of the Financing Entity is to finance the amounts required to accomplish the hydro financing initiative.

[Note: We are imposing several obligations on the Financing Entity (FE). As a practical matter, how will these obligations be enforced? Who will be responsible for meeting these obligations? (e.g. would there be directors or officers of the trust?). Or will the OPG be responsible for meeting these obligations as the body that establishes/manages the trust or oversees the designated entity?]

Activities

(2) To achieve the object, the Financing Entity shall engage in the following activities:

[Note: Just want to confirm that this should be "shall" and not "may".]

1. Borrowing funds from the Financial Corporation or from such other persons or entities [as may be prescribed?].

2. Investing funds.

3. Making payments and loans to the IESO or such other entity as may be prescribed in accordance with the regulations [or an order of the Board].

[Note: I think it would be best to specify whether the rules would be set out in a reg or in a Board order to avoid confusion.]

[Note: Should the "loans" language be removed, since you noted that the IESO is not "borrowing" from the FE?]

4. Receiving payments from the IESO or such other person or entity as may be prescribed in accordance with the regulations.

5. Issuing securities or debt ***[in the manner prescribed?].***

6. Engaging in any activities, including entering into such transactions, agreements or arrangements as may be prescribed and in accordance with the regulations.

Board review of expenditures, etc.

A3. (1) The Financing Entity shall, at least 60 days after the end of each fiscal year, submit its expenditures relating to its operations for the fiscal year including the expenses it has charged to Ontario Power Generation Inc. or the IESO, or that it has been charged by the Financial Corporation, in relation to those operations, to the Board for review.

Confidential Draft

[Note: The list of items that have to be reported on could be more prescriptive (e.g. specifying specific amounts to be set out) or it could also allow for the Board to specify what it wants to see in the report. Let me know if you'd like to adjust the wording of the requirement.]

Board recommendations, etc.

(2) The Board may review the expenditures and charges referred to in subsection (1) and make recommendations to the Financing Entity as are appropriate in order to ensure the most efficient operation and management of the Financing Entity in order to protect consumers.

[Note: Rather than saying "in order to protect consumers", should this say "in order to achieve the object of the FE"? Or perhaps this could just be deleted altogether with no need for replacement language.]

Deemed assets, entity,

A4. Despite any other provision of this Act or the *Business Corporations Act*, the assets and liabilities which are resident in and form part of the property of the Financing Entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries for any purpose.

[Note: You posed a question about excluding an OPG subsidiary from this rule. Please instruct.]

OBTAINING FINANCING

[Note: It will be important to read all of the provisions that follow against the provisions in the existing Act, to ensure there is no overlap/confusion being created due to potential interactions between existing authority and new authority. The drafting focus so far has just been to get the relevant substantive provisions into the draft without evaluating how they fit into the broader scheme of the Act.]

Ontario Power Generation Inc. to obtain financing

A5. (1) The IESO may direct Ontario Power Generation Inc. to cause the Financing Entity to engage in any of the following activities in order to accomplish the hydro financing initiative:

[Note: As a practical matter, how would OPG "cause the FE" to do these things? How is this different from "directing"?]

1. Financing, borrowing or lending to provide the IESO with short-term or long-term financing.

2. [Purchasing/receiving/obtaining the right created under section XX] and making any payments to the IESO that relate to the IESO's activities in support of the hydro financing initiative.

Confidential Draft

[Note: Not sure if the regulated assets would always be "purchased" or if other terminology might be needed. Please advise.]

3. Collecting from the IESO amounts that the IESO is required to pay in relation to its activities in support of the hydro financing initiative.

4. Assigning its [the IESO's?] rights to all or part of the regulatory assets established under section XXXX.

[Note: What is para. 4 about? If this is about forcing OPG to make the FE do things, then does this belong in the list? I thought that it was only the IESO that would be assigning the rights to the FE]

5. Such other activities as may be prescribed.

Same

(2) Ontario Power Generation Inc. shall comply with a direction under subsection (1) within the time specified in the direction [and any prescribed rules?].

IESO to enter into transactions

A6. (1) The IESO shall, in order to support the achievement of the hydro financing initiative, enter into transactions with the Financing Entity or any other entity for such amounts as are necessary to support the hydro financing initiative.

[Note: My understanding is that the need for "or any other entity" stems from the need to allow for the IESO to obtain temporary financing in the immediate term, before it is able to access the FE. Do you want to narrow this so that the IESO is only authorized to do this before the FE is up and running? Or do you want to keep it available on an ongoing basis?]

Same

(2) In entering into transactions under subsection (1), the IESO shall comply with the regulations.

RIGHT OF RECOVERY [CREATION OF REGULATORY ASSET]

[Note re the following provisions:
I found a provision dealing with the concept of "regulatory asset" in Bill 210 from 2002 (see s. 79.13 of the OEBA). It deems certain things to be regulatory assets but does not say much more. On the phone, you noted that the term "regulatory asset" does not have any legal meaning on its own but is just an accounting term that has been used to describe the statutorily created right of recovery. However, you also said that there may be a need to use this term in order to convey the intended meaning from an accounting perspective.

Confidential Draft

In order to ensure that the drafting captures the policy intent, please answer/address the following questions:

1. Should we be creating a statutory right of recovery or deeming certain amounts to be a regulatory asset? [NTD-LSB: Yes. The term "Regulatory Asset" has currency in commercial law (parliance) and since much of what we're doing is to support a securitization model, the term should remain for now. Further, the term "regulatory asset" was consistently referred to in the documents provided to ENERGY LSB by Blakes. Further, IESO/Stikemans offered up alternative language for the creation of a "regulatory asset" (as an intangible asset of sorts). You said you'd consult on whether the regulatory asset terminology is important to flag in the Bill.

2. You said you're not sure whether or not the Act will require the IESO to sell/assign the right. Please instruct. If it is optional for the IESO to sell/assign, then it seems that the right could in theory remain with the IESO (unless you are saying that the statute can just create the right of the FE to recover without any need for the right to be assigned/sold by the IESO… in which case please explain why we need to deal with the sale/assignment at all). Please clarify.

3. I'm assuming that if we are creating a right, then the right must be held by someone (e.g. the IESO) before it can be assigned/sold? So should the right be created in the Act for the IESO (e.g. the IESO has a right to recover the amounts from distributors and prescribed consumers) since the IESO would then sell/assign/transfer the right to the FE? The FE must also have the right to recover from the IESO itself, so that creates an extra complication.

4. Should there be some indication of when the right of recovery/regulatory assets will no longer continue to exist (e.g. once all of the amounts have been paid?). I notice that your instructions below about the debt indicate that the debt is no longer owing once the amounts are paid, but do we need to indicate that the regulatory asset also ceases to exist at that point?

Right of recovery created

A7. A right to recover the following amounts in full from the IESO, distributors and prescribed consumers is created.

1. The [deferred amount].

2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.

[Note: How will the Board be approving these costs? Is this related to the expenditure report submitted to the Board? That provision dealing with Board expenditures doesn't refer to any approval taking place… just a review and recommendations.]

Confidential Draft

[Note: Need to mention expenditures?]

3. Other amounts as may be prescribed or as may be approved by the Board.

Note: Are you going to be saying anything about how the interest will be calculated?

Sale [and/or?] assignment of [right? Regulatory assets?]

A8. (1) The IESO [may? Shall?], in accordance with the regulations, sell [and/or?] convey to the Financing Entity the right to recovery created established under section A7 on such terms and conditions as are provided for by the Financing Entity.

[Note: Your instructions include the terms "sell", "assign" and "convey" -- which are correct?]

[Note: Your instructions suggested that something other than the "regulatory assets" may need to be assigned to the FE. Are you referring to the "warehousing" liabilities assumed by the IESO in the early days? What else would need to be assigned? Could these items be listed above in A7 or is there a reason why they need to be kept separate?]

Sale deemed final

(2) The sale and conveyance referred to in subsection (1) is deemed to be final for all purposes.

[Note: What is this intended to achieve? Is this based on precedent language that has been interpreted to have the desired effect?]

Debts

(3) For greater certainty, the [amounts to which the FE has a right of recovery] are debts owing by the IESO, distributors and prescribed consumers to the Financial Entity until the amounts have been fully paid and fully discharged.

[Note: Why is subs. (3) necessary? Isn't it inherent in the sale of the regulatory assets that the FE would have acquired the future right to collect these amounts? Perhaps it is unclear that the amount can be collected from not just the IESO but from others down the chain. But isn't that what the "right of recovery" section above is meant to cover?]

[Note: I haven't checked to see how other similar provisions dealing with debts are drafted. Not sure we need the "for greater certainty" and also not sure what the distinction is between "fully paid" and "fully discharged". This provision will need further consideration. You also noted that you may want to specify who determines when all obligations have been satisfied.]

IESO to recover amounts

A9. The IESO shall recover the amounts set out in section A7 from distributors and prescribed consumers, in accordance with […]:

Note: how are the requirements that would determine recovery for this subsection meant to interact with the GAM reg?

Confidential Draft

[Note: The following two subsections are placeholders. You noted that *the provision is going to have to evolve to deal with consumers who exit the grid (disconnect) completely either because they leave the province or they decide to generate their own electricity and completely disconnect. You also want to be able to prescribe* methods of ensuring that the amounts required cannot be "by-passed". I'll need to understand what is meant by "by-passed".]

Distributors liable

(x) The IESO and distributors are entitled to compensation for any shortfall in relation to the amounts the IESO must pay to generators, the Financial Corporation or other persons including prescribed persons, under section 25.33 resulting from the IESO's activities under the hydro financing initiative.

Consumers liable

(X) Prescribed consumers are required to contribute towards the amount of any compensation referred to in subsection (4) in accordance with the amounts and methods prescribed by the regulations and such amounts shall not be by-passed.

USE OF FUNDS TO REDUCE ELECTRICITY BILLS

[Note: Depending on how things land with s. 25.33, this might be a place to explain how the transactions between the IESO and the FE translate into reduction in the electricity bills of RPP consumers. Regulations could specify how the IESO would ensure that the short-term rate reductions that flow from the FE amounts are only received by the targeted class of consumers and that this same class of consumers is the only class responsible for the repayment of FE funds in the long-term.]

ALTERNATIVE LANGUAGE – REGULATORY ASSET -- PROPOSED BY IESO (STIKEMANS)

Regulatory Asset Created

A7. (1) There is hereby created and conferred upon the IESO a "Regulatory Asset" consisting of the right to recover, in addition to the amounts otherwise recoverable, in accordance with the Regulations, the aggregate of the following amounts [from distributors and] prescribed consumers. **[Quare: do we regard the Regulatory Asset as a single asset in a variable amount or as different assets arising on each deferral]:**

1. The [deferred amount, including interest accrued thereon].
2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.
3. Other amounts as may be prescribed or as may be approved by the Board.

Confidential Draft

(2) The Regulatory Asset created by (1), shall constitute, for all purposes, a property right, shall be transferable by the IESO in accordance with Section A8, and shall constitute an intangible in which a security interest can be created for purposes of the *Personal Property Security Act*.

Election to Transfer Regulatory Asset

A8. (1) The IESO shall, from time to time, in accordance with the Regulations, elect to transfer to the Financing Entity all or any portion of the Regulatory Asset, on such terms and conditions as IESO may determine.

(2) Upon any election by the IESO pursuant to (1), the Financing Entity shall pay to the IESO in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, an amount, not less than the Deferred Amount, determined in accordance with the Regulations.

(3) Upon any election by the IESO pursuant to (1), the Financing Entity shall become the person entitled to the benefit of the Regulatory Asset, or the portion thereof in respect of which the election was made, free and clear of any adverse claim (other than any such claim created by the Financing Entity) and shall be entitled to exercise all of the rights and remedies conferred by or arising in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the IESO shall cease to have any rights (except as provided in Section A9) to or in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, all as if the Regulatory Asset, or the portion thereof in respect of which the election was made, had originally been conferred upon the Financing Entity and not the IESO.

(4) Upon any election by the IESO pursuant to (1), the IESO shall have no further rights or obligations in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the Regulatory Asset, or the portion thereof in respect of which the election was made, shall not form part of the assets and liabilities of IESO for any purpose.

(5) The LG in Council may adopt regulations providing for the circumstances in which IESO shall make the election or elections provided for in (1).

Financing Entity may Grant Security Interest

A9. (1) The Financing Entity may, at any time after an election referred to in Section A8(1), create a security interest in favour of any person in all or any portion of the Regulatory Asset subject to such election, all on such terms and conditions as the Financing Entity may determine.

(2) Except as provided for in Regulations adopted pursuant to (3), *The Personal Property Security Act* shall apply to any security interest created pursuant to (1), except that the rights of the secured party on default shall be limited to receiving the amounts collected in respect of the Regulatory Asset, or the portion thereof subject to the security interest, as and when collected by the IESO in accordance with A10.

Confidential Draft

(3) The LG in Council may adopt regulations providing for the terms on which the security interest provided for in (1) can be created and perfected and for the priority of any such security interest.

IESO to Collect Amounts in Respect of the Regulatory Asset

A10. Subsequent to any election pursuant to Section A8, the IESO shall, as agent on behalf of the Financing Entity and any secured party, use reasonable efforts to collect the amounts owing in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and shall promptly pay over to the Financing Entity or the secured party the amounts collected.

--------*END OF IESO/BLAKES ALTERNATIVE LANGUAGE FOR REG. ASSET ---*

------- *BLAKES VERSION OF LANGUAGE FOR REGULATORY ASSET*

The Regulatory Asset, Composition,

A7(1) The "regulatory asset" consists of the following:

- **present and future statutory obligation of:**
  - **deferral consumers - to make all deferral repayments (including interest and late payment fees)**
  - **LDCs - to invoice the deferral consumers for the deferral repayments and to remit the amounts collected to the IESO**
  - **IESO - to receive and remit the deferral repayments from LDCs to the OPG Financing Entity**
- **All deferral repayment amounts collected**
- **All amounts in LDC or IESO deferral payment bank accounts**

Validity of Dispositions

(2) This section is reinforcing by statute the "sale" of the asset to the Financing Entity. This has been an important feature of the legislation in other jurisdictions in similar circumstances. Specifically, it says that "Dispositions" of the Regulatory Asset are "true sales", and not subject to challenge. This is an essential requirement for a securitization transaction. This provision identifies possible grounds for a challenge that a sale took place and indicates that those events do not affect the validity of the sale.

Deemed Perfection and Priority of Dispositions

Confidential Draft

(3) This is reinforcing the automatic nature of the "sale" of the asset. It Provides for a clean sale to the OPG Financing Entity, free and clear of encumbrances (i.e., no specific need to "perfect" the sale.

Validity of Pledges,
(4) Statutory override permitting the OPG Financing Entity to give a security interest in the "regulatory asset" to investors.

> **This would give the investors (through an indenture) the right to enforce collection of the deferral repayments to pay off amounts owed by the OPG Financing Entity to the investors upon certain defaults by the OPG Financing Entity under an indenture.**

Deemed Perfection and Priority of Pledges
(5) This is reinforcing that a commercial pledge given by OPG Financing Entity is valid and will have priority without specific "perfection". The result is that a pledge of the Regulatory Asset as security in accordance with the Treasury Plan will be given priority to other claims. The Pledge includes proceeds from the Regulatory Asset and is not affected by comingling or the ordinary requirement to file a financing statement under the PPSA.

Enforcement of Property Rights –

(6) The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5. ***[ntd-: NOT an annotation – pulled directly from Blakes' document.]***

Collective Action Required –
(7) This anticipates that the Regulatory Asset will be structured as a variable interest that can be divided between IESO (until it sells) and one or more OPG Financing Entitys. The likely format will be a co-ownership agreement, that will allow for different owners to have a fractional undivided ownership interest in the Regulatory Asset. Those will entitle the owners to a specified share of the cash flows, which will correspond to their finance payment obligations. This will allow for future financing flexibility.

MISCELLANEOUS

Fair Hydro Financing Plan, miscellaneous,

A.8 (1) Consideration will be given to whether any additional 'miscellaneous' provisions are needed (and expected by the market) to support the financing of this

Confidential Draft

structure. Some of these provisions are not typical in legislation, and so will need further consideration (in consultation with leg counsel).

Regulations

114(1.5) The LGIC may make regulations to implement the Fair Hydro Financing Initiative

-(a) The power to implement the program (and to set out some of the details of the program) through regulations is important. Decisions remain to be made (once the drafting is a little further advanced) about what provisions/details need to appear in the proposed legislation, and what provisions/details can be set out in regulations.

Confidential Draft

ONTARIO ENERGY BOARD ACT, 1998

x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [hydro financing initiative].

[Note: Would need to link with definition in the EA or else spell out the definition here - TBD.]

x. Section 27.1 of the Act would be amended by adding the following paragraph:

Hearings

(1.1) A directive may specify whether the Board is to hold a hearing, the circumstances under which a hearing may or may not be held and, if a hearing is to be held, the type of hearing to be held and the time within which it must be held.

The underlined is what makes this different from the other provisions in the Act that basically have the same wording. There are already a number of places in the Act where you have this type of hearings provision re directives (e.g., s. 27.2 (7)). If you basically want the same authority in each instance, then the wording should be consistent in each case. There are already some discrepancies between the current provisions (e.g., s. 27.2

(7) talks about types of hearings, whereas s. 28 (2) doesn't). Differences in wording will typically be presumed to be differences in meaning. So, the question is what you're intending to authorize in each case, and whether differences are intended. If you want the same thing everywhere, it should all be worded the same. Let me know.

[Note: Waiting for confirmation whether amendments to s. 78.7 are needed. Please advise.]

x. Section 78 of the Act would be amended by adding the following subsection after subsection (3.0.5):

Rates, fair hydro financing initiative activities -IESO, OPG, distributors, etc.
(3.0.6) The OEB would not be precluded from taking into account the performance of duties under this Part by any entity regulated by the OEB, including fees received by such entity in excess of the incremental costs of the provision of such services.

x. Section 79.16 (3) of the Act would be repealed and the following substituted:

Adjustment to eliminate variances

(3) In determining rates under clause (1) (b), the Board shall take into account balances in variance accounts established under section 25.33 of the *Electricity Act, 1998* and, subject to section X of that Act, make adjustments with a view to eliminating those balances within 12 months or such shorter time periods as the Minister may direct.
[Note: Please let me know what section the highlighted portion is supposed to refer to… is it the provision that says the IESO has the 30 year period to pay off the amount in the variance account for the hydro financing initiative? I wonder if this is confusing and whether the amendment to subs. (3) above works… it almost seems unnecessary to say that the Board has to "take into account" this balance, given that we are setting up a bunch of very specific rules about what has to be done by various entities in order to eliminate this amount. What would the Board be expected to do with information about this variance account? For consideration.]

PART VII.3

COMPLIANCE – FAIR HYDRO FINANCING INITIATIVE

Right of the [OEB] to Inspect Books and Records,
113 (1) OEB may be given the power to investigate compliance with the legislation and the power to examine books and records, etc.

Power to Investigate Compliance and Impose Regulatory Sanctions

Confidential Draft

(2) This legislation will not limit the OEB's power to investigate compliance or prevent or preclude the OEB's power to impose sanctions. The OEB can investigate compliance with this part and to impose regulatory sanctions for non-compliance.

Limitation, Board,

(2.1) The OEB cannot, however, take any action to affect the irrevocability of the Transition Charges or the Undertaking of the Province.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Confidential Draft

External - Draft 5 Annotated (Blks DS) GOV2016.146.e05 (April 3 2017).pdf

A proposal to create Legislation.

Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

ELECTRICITY ACT, 1998

1. (1) Section 1 of the *Electricity Act, 1998* would be amended by adding the following clause:

[Note: GGRA provisions have been removed for now. Please confirm if they should be re-inserted.]

(2) Clause 1 (f) of the Act would be struck out and the following substituted:

(f) to protect the interests of consumers with respect to the adequacy, reliability and quality of electricity service;

(f.1) to protect the interests of consumers with respect to the prices they pay for electricity, including protection of those interests through the Hydro financing initiative;

[Note: Since the Hydro financing initiative is a defined term and is clearly required to be implemented under the new substantive provisions of the Act, I'm still not sure why this needs to be addressed in the purpose clause. However, I have included a purpose provision as per your instructions.]

Article 1 – Purpose

The proposed new legislation will likely include a large number of provisions intended to support the "financeability" of the structure. As a result, it may make sense for (LSB is exploring the potential) the Bill to create a new stand-alone energy statute, much like the *Green Energy and Green Economy Act, 2009* created the *Green Energy Act, 2009*.

The new legislation would have a purpose clause that explains the objective of intergenerational fairness. This would be useful for the markets to see, and may

Confidential Draft

help support the validity of the legislation from a constitutional law perspective (charge vs. tax)

x. Subsection 2 (1) of the Act would be amended by adding the following definitions:

"Financing Entity" means the trust established by Ontario Power Generation Inc. under clause XX (a) or the entity prescribed for the purposes of clause XX (b); ("French")

"hydro financing initiative" means those policies of the Government of Ontario related to its decision to ensure costs to Ontario electricity consumers are allocated fairly over time, taking into account the useful life of new sources of and technologies for electricity; ("French")

[Note: I have applied the precedent of the "smart metering initiative" as per your instructions. Just want to reiterate my concern that the reference to government policies is really vague (which initiative/ policies? At which point in time?) and I think this could cause lots of confusion, particularly if the policies evolve over time. It could also have unintended consequences.]

[Note: To consider -- by describing the initiative as we have in the above definition, we are potentially linking the deferred amount to amounts that would otherwise be paid for by consumers as part of the GA. If the deferred amounts are not all about "the useful life of new sources and technologies" then the description of the initiative should likely be broadened. (For example, if some of the deferred amount may be used to cover high wholesale prices, one could argue that the initiative is NOT about allocating costs fairly over time… it's just about pushing the cost increase to future consumers without considering what is "fair" across the generations.]

Article 2 - Definitions

The new legislation will include many new defined terms. One important term will be "Funding Shortfall" (or equivalent wording). This will be the net reduction in cash flows to IESO as a result of the reallocation of a portion of the Global Adjustment to later periods of time. Currently, the "Funding Shortfall" would be limited to the Global Adjustment attributable to the procurement contracts, but this is a question that still has to be settled.

Another important defined term that is worth noting is "Replacement Event". This is an event under which the market would want to replace a person who has responsibility to take essential actions under the program (including LDCs, IESO and OPG), like invoicing and collecting amounts.

Confidential Draft

The triggering events are likely to include insolvency and breach of duty/obligation.

Another key defined term is "Transition Charge". This is the amount that will be calculated and applied to the "deferral consumers", based on the amounts of payments due under funding obligations incurred to cover the funding shortfall (i.e., what we have until now been calling "deferral repayments").

Another important defined term will be "Treasury Plan". This will be the written plan prepared by OPG relating to the sale of the "regulatory asset(s)" to the OPG Financing Entity (sometimes previously referred to as the "Financing Trust") and the debt issued by the OPG Financing Entity to the markets.

Another defined term will be "True-up Amount". This is a key provision for the market. It allows for a catch-up for estimate/actual adjustments and to address consumer non-payment credit losses.

A further defined term will be "Undertaking of the Province". This will be a promise by the Government not to impair the program. This will be expected by the market, even though it will be understood that there may be issues for investors to enforce the promise, or get damages if there is a breach.

x. (1) Subsection 6 (1) of the Act would be amended by adding the following clauses:

(q.1) to enter into agreements or arrangements with the Financing Entity;

(q.2) to engage in activities related to making payments to and receiving payments from the Financing Entity under Part V.2, as required under this Act, and to engage in related settlement activities;

Note: Is some of this covered already by clause (i)? Could we address this by expanding upon clause (i)? Trying to understand whether there is any potential overlap.]

(q.3) to engage in activities related to the [sale/disposition/conveyance/assignment] of the [right/regulatory asset] created under section XX, which activities may include,

[Note: As discussed, please confirm terminology.]

(i) incurring liabilities in relation to the [right/asset];

Confidential Draft

(ii) [selling/assigning/disposing of?] the [right/asset] to the Financing Entity;

(iii) assigning [the right/asset] to third parties;

[Note: I don't understand (iii) -- I thought the rights to the asset were being assigned to the trust and nobody else?]

(q.4) acting as a recovery agent for the Financing Entity in relation to [the right/asset];

x. (1) Subsections 25.33 (1) and (2) of the Act would be repealed and the following substituted [TBD].

[Note: As per our telephone discussion today (March 27), there seems to be ongoing debate about the policy direction:

1. Do you want to amend the GAM so that the money received from the FE and the money recovered by the FE are part of the initial GA calculation?

2. Do you want to leave the GAM section as is and add a requirement (in a new section) for the IESO to conduct additional adjustments for a subset of the payments referred to in s. 25.33? This second adjustment would be engaged in after the existing GAM is calculated. So it would be a further adjustment of what has already been adjusted under the GAM.

Until this fundamental question is answered, we would be removing the proposed amendments to s. 25.33.]

OPTION 2:

Deferral adjustments, 25.33 amounts.

25.33.2 (0.1) For the purposes of this section and sections 25.34 and 25.35,

(a) "authorized entity" means **[the hydro financing trust established by Ontario Power Generation Inc. for the sole purpose of financing the recovery of the balance in the deferral account, or]** such **[other]** entity as may be prescribed by regulation;

(b) "deferral account" means the deferral account established under section 25.34;

(c) "deferral amount" means the amount recorded in the deferral account for each month during the deferral and recovery period;

(d) "deferral and recovery period" means the period from May 1, 2017 to April 30, 2047;

(e) "deferral consumer" means a consumer who is a member of a class of consumers prescribed by the regulations for the purposes of sections 25.34 and 25.35;

Confidential Draft

[NTD: This will be set out in a new subection 4(3) of O. Reg. 95/05 and will reflect OREC-eligible consumers other than non-grid connected customers of IPAs (who would not pay a GA charge anyway). Note that this is not quite the same as "RPP-eligible" consumers.]

(f) "electricity supply cost" means the amount calculated according to the formula:

(A + B + C + D) - E

where,

A is the amounts paid by the IESO to generators, the Financial Corporation and distributors, whether the amounts are determined under the market rules or under section 78.1, 78.2 or 78.5 of the *Ontario Energy Board Act, 1998,*

B is the amounts paid by the IESO to entities with whom the IESO has a procurement contract, as determined under the procurement contract,

[NTD: A and B use exactly the same wording as is set out in (a) and (b) of the existing ss. 25.33(1).]

C is

[NTD: C is the "net new" costs associated with the GA deferral. These are costs that the IESO will record in the GA deferral account established under s. 25.34, and that the IESO (or its assignee) will subsequently recover. These costs consist of the interest and financing-related admin costs associated with the GA deferral (which costs will be flowed through from the hydro financing trust to the IESO). These costs do not include the principal amount deferred and recovered, since that is already captured as part of A and B.

The "net new" costs in C will be recoverable solely from a newly prescribed class of consumers - deferral consumers (i.e. those consumers who will benefit from the GA deferral). The rules for the recovery of these costs will be part of a new subsection 4(3) of the RPP Regulation.]

D is any other amounts that may be prescribed by regulation,

[NTD: Paragraph D would give us flexibility to add new cost categories by reg. if/as needed now or later.]

[GGRA-related amendments are removed for the time-being]

and

E is any other amounts that may be prescribed by regulation;

[NTD: Paragraph E would give us flexibility to add new cost categories by reg.

Question for leg counsel: If in the future HOEP were to exceed contract prices and/or regulated rates, presumably the formula would still work (i.e. in such case the amounts for A and B would simply be negative amounts)?] *[ntd-LSB: IESO appears to agree with that idea, based on our shared appreciation of how EA s.25.33 works today.]*

(f) "reduction period" means the period commencing May 1, 2017 and ending April 30, 2018;

(g) "RPP Regulation" means Ontario Regulation 95/05 (Classes of Consumers and Determination of Rates).

Electricity pricing adjustments

Adjustments by IESO

(1) The IESO shall, through its billing and settlement systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of market participants in Ontario as are prescribed by regulation, reflect the electricity supply cost.

Adjustments by distributors and retailers

(2) Distributors and retailers shall, through their billing systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of consumers in Ontario as are prescribed by regulation, reflect the electricity supply cost.

[NTD: There will be two "classes of consumers in Ontario that are prescribed" for the purposes of RPP-"plus" deferral – the EA regulation that "prescribes" these two classes will refer to (or be aligned with) the two classes as described in the RPP Regulation. 1) The first class are the deferral consumers (see definition above), and 2) the second class (or defined base consumer) will be the "proxy" Toronto Hydro consumer whose bill will only be allowed to increase year-over-year according to rules prescribed in a new s. 6.1 of the RPP Regulation.]

Variance accounts

(3) The IESO shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by it under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation. *[ntd-DAN: I left "this section"*

even though this provision is part of a new s.25.33.2 – did you want "this section" to refer to "section 25.33"? If so, then we'd add this to the list we've started referencing proposed new s.25.34 and s.25.35. Consider.]

[Drafting note: We can prescribe the different variance accounts that must be maintained, and the different amounts that must be tracked and accounted for, by the IESO. Among other things, the IESO will presumably need to establish variance accounts related to the GA deferral and payback, to take into account timing and other differences. Any financing costs associated with these variance accounts (over and above the financing costs passed through to the IESO by the authorized entity (the hydro financing trust) would be subject to Board scrutiny.]

Same, distributors and retailers

(4) Distributors and retailers shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by them under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation.

x. The Act would be amended by adding the following sections:

Deferral account

25.34 (1) The IESO shall establish a deferral account to record, for each month during the reduction period and the deferral and recovery period, the difference between,

(a) the amounts that would be payable by deferral consumers in respect of the electricity supply cost for the month under section 6.1 of the RPP Regulation; and

(b) the amounts payable by deferral consumers in respect of the electricity supply cost for the month under section 6.2 of the RPP Regulation.

[NTD: IESO to confirm whether the differences between (a) and (b) would be recorded monthly.

Explanatory note: The Board will determine a rate under a new s. 6.1 of the RPP Regulation that will essentially follow the same process the Board uses to establish the RPP rate, except that it will establish a rate for the deferral consumers (which is a slightly broader class than RPP consumers). The Board will also determine a "proxy" rate for the deferral consumers, calculated according to a different set of rules set out in a new s. 6.2 of the RPP Regulation. The rules in s. 6.2 will establish the "proxy" rate for a "proxy" Toronto Hydro customer consuming an average of 750 kWh/mth, to achieve an all-in tax-included total bill amount reduction of approximately 17% (the bill reduction for GA deferral + 8% OREC will result in an all-in bill reduction for May 1, 2017 – April 30, 2018 of 25% over the May 1, 2016 – April 30, 2017 period). There will be

additional rules dealing with bill increases and full repayment of the GA deferral by April 30, 2047.]

Note that because we refer to the new provisions in the RPP Regulation, we will need to amend that regulation *before* the introduction of the proposed legislative amendments. Drafting of the proposed RPP Regulation amendments is underway.

Do we need to create a parallel provision requiring distributors and retailers to establish deferral accounts as well?]

(2) The IESO shall record interest on the balance of the deferral account at a rate or rates reflecting the costs incurred by the IESO, or by any assignee under section 25.35, to finance the amounts recorded in the deferral account.

(3) The IESO shall also record in the deferral account the costs incurred by the IESO to finance the amounts recorded in the deferral account.

[NTD: This is a placeholder for what we will need here. The concept is that ss. (2) and (3) will ultimately apply to the interest and admin costs incurred by the hydro financing trust (assignee of the right of recovery under s. 25.35) in providing funds to the IESO to finance the GA deferral. Those interest costs and admin costs will be fully recoverable through section 25.35, subject to Board scrutiny presumably limited to verifying the calculations. This is not intended to address interest and costs incurred by the IESO and recorded in the variance accounts established under ss. 25.33(5).]

Recovery of GA deferral amounts

25.35 (1) The IESO shall have the right to fully recover the balance recorded in the deferral account. **[The Board shall authorize?]** recovery of the balance from the deferral consumers over the deferral recovery period in accordance with the prescribed rules.

[NTD: What role should the Board play in determining the amounts recovered each year (within the smoothing parameters that are prescribed)? For e.g., could the Board set rates such that the year-over-year increase in the proxy Toronto Hydro customer's all-in bill was less than the maximum permitted under the prescribed rules?

The prescribed rules will be set out in the new s. 6.2 of the RPP Regulation, which will determine how much the "proxy" Toronto Hydro customer's monthly average bill can increase year-over-year (after the reduction period). Basically, for the first four years after the reduction period, the increase will be limited to CPI. For the balance of the deferral and recovery period, the increases will be limited to 10%, with an overarching requirement that the deferral amounts be fully repaid by April 30, 2047.]

Assignment of right of recovery

(2) The IESO shall have the right to assign**[, in whole or in part?,]** to **[one or more?]** authorized entities, the IESO's rights under subsection (1).

[NTD: This is largely a placeholder for what needs to be addressed here. We will need to determine how to characterize this transaction. For e.g., will it be an outright assignment? Will it be a series of assignments? Should it be characterized as a "sale"? How will this transaction be implemented – e.g. by way of a contract between the IESO and the Trust? We will need the input of external counsel and others to ensure that it adequately supports the contemplated financings.]

Payments to assignee

(3) In the event of an assignment to an authorized entity under subsection (2), the IESO shall, through its billing and settlement systems, make payments to the authorized entity of the full amounts paid to the IESO in respect of the rights assigned.

[NTD: This is largely a placeholder for what needs to be addressed here. Iin addition to requiring IESO to make payments to the authorized entity, do we need to include explicit provisions giving the assignee the right to recover the amounts in the deferral account that are covered by the assignment?

We will need provisions dealing with billing and payment as between the authorized entity and IESO. We will also have to decide whether the interest and admin costs incurred by the authorized entity will simply be passed through to IESO, or whether the authorized entity (or OPG) will have an opportunity to keep any profits made on financing activities (swaps, etc.) by establishing some sort of "reference rate" that IESO would have to pay (and that might be different than the rate(s) the authorized entity would have to pay). A middle ground that could be considered would be to cap the amount of profits the authorized entity (or OPG) could make.

Along similar lines, the amounts charged by OPG to the authorized entity to provide admin services should be subject to Board review (e.g. for reasonableness). This would not jeopardize the ability of the authorized entity to recover all of its costs (since it would affect the amounts OPG could recover from the authorized entity).

We also need to contemplate a provision that if there is a change of law by the Government of Ontario that materially adversely affects the ability of the authorized entity to fully recover the assigned deferral account amounts, then repayment of those amounts will be accelerated and become immediately due and payable.]

x. The Act would be amended by adding the following provisions after s.29:

Transition Charges -- Ratepayer Obligation to Pay a Transition Charge

s.29.0.1 (1) Each consumer in the class of ratepayers to which this program applies (previously referred to as the "deferral consumers") will have a direct statutory obligation to the OPG Financing Entity to pay its share of the deferral repayments (principal, interest, financing costs).

Indebtedness of Ratepayers –
(2) This will be a debt owed by the consumer directly to the OPG Financing Entity. If it is not paid, the OPG Financing Entity can sue the consumer directly through the agreed procedures. This is identifying an explicit and identifiable revenue stream for the comfort of investors.

Separate tracking - distributors,
(3) This debt is separate from the debt owed by the consumer to its LDC, although the LDC will be the collection agent.

No set-off, etc. *[see similar provision at EA s.29.0.3(2)]*
(4) This debt cannot be netted out against any amount owed by the LDC to the consumer (e.g. year-end credit to consumer on equal monthly billing).

Allocation of Ratepayer Payments
(5) If a consumer pays less than its total invoiced amount, the payment will be allocated pro rata between the deferral repayment and the amounts owing to the LDC.

Transition Charges are Irrevocable

(6). This is intended to prohibit any reversal of amounts that must be paid to meet the terms and conditions of the funding obligations to be incurred under the program.

> **The deferral repayments are due regardless of whether a financing obligation incurred under the treasury plan is consistent with government policy at the time a related payment obligation arises.**
>
> **If the Fair Allocation Plan is amended after a funding obligation is properly incurred, any inconsistency in the payment profile will not impair the existing funding obligation or the pass-through of related payment amounts as Transition Charges.**

Anti-avoidance; No-by-pass

Confidential Draft

(7) The idea here tracks the U.S. transactions, which say that the obligation of a consumer to pay Transition Charges cannot be "by-passed". If a consumer leaves the grid, he or she will still be obligated. See the highlighted text in the definition of "Ratepayer" for a sense of how this may be accomplished.

> **This concept is a key to a rated market financing and will need to be developed further.**
>
> **For example, self-generating customers could be charged a flat fee (for example, equal to the amount that would be payable by the "representative" Toronto Hydro customer that underpins the current government policy on the 25% or some other basis.)**

Distributor, agent for Financing Entity,
s.29.0.2(1) LDC is agent for the OPG Financing Entity. LDC must invoice the deferral consumer the deferral repayment amount - referable to the items described in "Finance Amount" (i.e., an amount already borrowed).

IESO - Calculation of the Period Transition Charge

(2) IESO will calculate the total amount of deferral financing that will be repayable in an applicable [e.g. 6 month] period.

(3) IESO will then determine the deferral repayments due from deferral consumers based on a prescribed methodology for allocating payments to individual deferral consumers.

Notice of Transition Charges, IESO to distributors

(4) IESO will then inform each LDC of the amount of the deferral repayments to be included in the invoices issued to each deferral consumer in the LDC's service territory.

Adjustments *[ntd: Consider – Deferral repayment amount final]*

(5) Deferral consumers cannot challenge the amount of the deferral repayment showing on their invoice unless there is a substantial calculation error.

Successors of Electricity Distributors –
(6) Any successor of an LDC will be bound by the same obligations as the original LDC re: billing and collecting deferral repayments.

Confidential Draft

Successors of IESO –

(7) Any successor of the IESO will be bound by the same obligations as the original IES re: billing and collecting deferral repayments from distributors *[ntd-LSB: what about from consumers?].*

Appointment of an Alternative Invoicing Agent *[NTD – this provision may be moved closer to the powers/authorities of the OPG financing entity.]*

(8) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect deferral repayments. The LDC must sign whatever agreements and assignments are needed to enable the replacement agent to collect the deferral repayments from the LDC's deferral consumers.

Regulatory Asset Owner has Standing

(9) The OPG Financing Entity (or investors through their security) will be able to sue LDCs for failing to properly calculate or invoice the financing repayments.

29.0.3 Collections and Remittances [Collecting and Remitting Deferral Repayments]

(1) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC or the IESO, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect and remit deferral repayments. The LDC (or IESO, as applicable) must sign whatever agreements and assignments are needed to enable the replacement agent to collect and remit the deferral repayments. "Replacement Events" are necessary to investors to safeguard against a person holding money in a distressed circumstance.

No Set-off, etc. *[see similar provision at EA s.29.0.1(3)]*

(2) The deferral repayments cannot be netted out against any amounts owed by the party responsible for collecting those repayments.

Sequestration.

(3) If any LDC or the IESO fails to remit deferral repayments, the OPG Financing Entity can get a court to order the LDC (or IESO, as applicable) to require them do so.

Confidential Draft

x. Subsection 53.1 (1) of the Act would be repealed and the following substituted:

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, the following:

[Note: I know that the words "in addition to any other objects" appears in the current provision, but it seems very odd. This suggests that the objects are unlimited, which doesn't seem to be the intention but I could be wrong.]

1. Owning and operating generation facilities.

2. Establishing, operating and supervising the activities of entities for the purposes of supporting and promoting the government's hydro financing initiative.

3. Providing financial and other support to the IESO in its activities in relation to the hydro financing initiative.

4. Engaging in such financing, borrowing, lending and related activities and transactions to support the IESO with short-term or long-term financing.

5. Providing equity, not exceeding the prescribed amount, to support the financing capacity of the Financing Entity.

Subsidiaries

(1.1) Ontario Power Generation Inc. may create one or more subsidiaries in order to more efficiently conduct its activities or achieve its objects.

x. Section 53.2 of the Act would be repealed and the following substituted:

Rights of the Minister[1]

53.2 (1) The Minister, on behalf of Her Majesty in right of Ontario, may acquire, hold, dispose of and otherwise deal with securities or debt obligations of, or any other interest in, Ontario Power Generation Inc. or any of its subsidiaries.

Confidential Draft

[1] FLS - this provision is based on s. 49 of the Act

Agreements

(2) The Minister, on behalf of Her Majesty in right of Ontario, may enter into any agreement or arrangement that the Minister considers necessary or incidental to the exercise of a power under subsection (1).

x. The Act would be amended by adding the following Part:

PART V.2
HYDRO FINANCING INITIATIVE

FAIR HYDRO FINANCING PLAN

Establishment and adoption of the Fair Allocation Plan

A. 1 (1) The Minister of Energy [may/shall] establish a "fair allocation plan"

(a) The purpose of the plan is generally to try and reallocate the portion of GA attributable to the procurement contracts over the anticipated useful life of the generation assets under those contracts.

- **This is the intergenerational funding of the Green Generation Initiaitves.**
- **One policy question is whether the amounts deferred and the period over which the deferred amounts are repaid are to be limited to the portion of GA attributable to the procurement contracts and to the anticipated useful life of the [renewable] generation assets under those contracts.**

- From a constitutional validity perspective (and hence a financeability perspective) these limits are very important.

-Financial/economic modelling to verify this link is required.

Principles and Parameters,

(2) Based on this initial description (which is only illustrative to advance the initial stakeholder discussion), the Minister would determine the details of the "fair allocation plan", but must take into consideration the following principles:

- **The deferred GA costs should be spread over a period not exceeding the anticipated remaining useful life of the generation assets under the procurement contracts**
- **The plan should specify the length of the "reference periods", to identify which deferral consumers are responsible for which deferral repayments**

Confidential Draft

- **The share of the deferral repayments to be allocated to deferral consumers in each "reference period" should reflect a reasonable assessment of the remaining anticipated useful life of the generation assets under procurement contracts and perhaps to the benefits received by those deferral consumers from the procurement contracts (e.g. transition off coal)]**

- **No deferral consumer group should bear an unreasonably disproportionate share of the deferral repayments. That could be limited to a maximum amount, determined on a formula basis, if it makes sense tot he stakeholders**

- **In making the allocations, real (i.e. inflation-adjusted) dollars should be usedThe fair allocation plan is made using forward-looking information and projections.**

- **If, after the fact, the Minister determines that a Ratepayer Group paid more than would otherwise would have been the case had the projections for such period been accurate or other considerations come to light, adjustments to the plan could be made.**

Attribution Methodology

(3) The program will need to define how deferral consumers will be allocated an appropriate share of aggregate adjustment amount.

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

(4) Consideration will be needed regarding the level of review and confirmation of the plan is needed or appropriate. For example, should the scope of review be limited to calculations only? If there is a need for review, then consideration will be needed as to who will be the reviewer and under what authority, etc.

THE TREASURY PLAN

Power to Prepare and Implement the Treasury Plan –

A.2 (1) The "Treasury Plan" will be prepared by OPG. It must follow the requirements set out in this Part. Accounting considerations will need to be factored into this delegation, as well as the degree of province input initially and on an on-

Confidential Draft

going basis. [Note for leg counsel: We will need to create the necessary sub-delegation authority]

Required Terms and Conditions of the Treasury Plan

(2) The Treasury Plan will establish the basis for OPG making funding decisions, which will need to align with the Fair Allocation Plan.

Power to Review and Approve the Treasury Plan

(3) The Minister may designate one or more persons to review, and require changes to the Treasury Plan. (This review could also be given to the Minister.) *[NTD-: Assumin no role for OEB – confirm. Any role for MOF/OFA here?]*

Obligation to Apply IESO Remittances,

(4) OPG will need to ensure that pass-through amounts, transferred to it as agent for the OPG Financing Entity, are only used to repay the debt and related costs.

Non-Recourse,

(5) The Treasury Plan will provide that the investors and other contracting parties will not have recourse to the IESO, LDCs, agents, the OEB or the Province, except where such parties fail to comply with applicable law. This may be modified in the contracts under which a financing arises.

NOTE: The documentation creating the Funding Obligations must expressly state that such obligations are not guaranteed by the Province.

NOTE: See IESO/Stikeman's language for "Regulatory Asset" above.

Incurrences are Binding,

(6) A failure to implement the Treasury Plan will not impair the pass-through of the deferral amounts or the validity of an otherwise valid funding obligation.

- **NOTE: Separate from the legislative provisions, we will also be preparing a very rough sketch of some of the items that might be included in the Treasury Plan direction.**
- **The sketch will be for illustration purposes only and will be for use in discussions with stakeholders including OPG and IESO.**

Crown bound, actions prohibited,

A.3 (1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – *[NTD: alternative* - Crown bound, prohibition against discriminatory action.

Confidential Draft

(2) The Province will be prohibited from taking or permitting any action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or collections.

Undertaking and Agreement

(3) Under this Undertaking, the Province will agree for the benefit the OPG Financing Entity that it will not impair the value of the Regulatory Asset or the Transition Charges imposed under this Part. This "pledge" is in line with market expectations. Enforcement issues arise in this sort of undertaking, which will be assessed by the market and rating agencies based on the likelihood that a failure by the Province would lead to a successful damages claim. Unlike in the U.S., the law regarding such a claim is uncertain. Nevertheless, we expect that this sort of Undertaking will be requested in the legislation itself (i.e., requiring an act of the legislature to disavow – which is a higher bar than simply walking away from a contractual undertaking.

[Note: TBD where to place this Part within the Act and how to structure this Part. Temporary number (e.g. A1, A2, A3 etc.) has been used for now.]

FINANCING ENTITY

Financing Entity, established or prescribed

A1. (1) For the purpose of accomplishing the hydro financing initiative, the Minister may,

(a) direct Ontario Power Generation Inc. to establish and operate a trust; or

(b) direct Ontario Power Generation Inc. to [oversee? Administer?] an entity prescribed by the regulations.

[Note: Would the direction of the Minister include any additional instructions re timing etc.?]

Duty of Ontario Power Generation Inc.

(2) Ontario Power Generation Inc. shall comply with the direction of the Minister.

[Note: Once OPG takes action under A1 in accordance with the Minister's direction, what happens if at some point in the future, the Minister wants a different entity to take over the role of the FE? Is this a concern that needs to be addressed?]

Confidential Draft

Object of Financing Entity

A2. (1) The object of the Financing Entity is to finance the amounts required to accomplish the hydro financing initiative.

[Note: We are imposing several obligations on the Financing Entity (FE). As a practical matter, how will these obligations be enforced? Who will be responsible for meeting these obligations? (e.g. would there be directors or officers of the trust?). Or will the OPG be responsible for meeting these obligations as the body that establishes/manages the trust or oversees the designated entity?]

Activities

(2) To achieve the object, the Financing Entity shall engage in the following activities:

[Note: Just want to confirm that this should be "shall" and not "may".]

1. Borrowing funds from the Financial Corporation or from such other persons or entities [as may be prescribed?].

2. Investing funds.

3. Making payments and loans to the IESO or such other entity as may be prescribed in accordance with the regulations [or an order of the Board].

[Note: I think it would be best to specify whether the rules would be set out in a reg or in a Board order to avoid confusion.]

[Note: Should the "loans" language be removed, since you noted that the IESO is not "borrowing" from the FE?]

4. Receiving payments from the IESO or such other person or entity as may be prescribed in accordance with the regulations.

5. Issuing securities or debt ***[in the manner prescribed?].***

6. Engaging in any activities, including entering into such transactions, agreements or arrangements as may be prescribed and in accordance with the regulations.

Board review of expenditures, etc.

A3. (1) The Financing Entity shall, at least 60 days after the end of each fiscal year, submit its expenditures relating to its operations for the fiscal year including the expenses it has charged to Ontario Power Generation Inc. or the IESO, or that it has been charged by the Financial Corporation, in relation to those operations, to the Board for review.

Confidential Draft

[Note: The list of items that have to be reported on could be more prescriptive (e.g. specifying specific amounts to be set out) or it could also allow for the Board to specify what it wants to see in the report. Let me know if you'd like to adjust the wording of the requirement.]

Board recommendations, etc.

(2) The Board may review the expenditures and charges referred to in subsection (1) and make recommendations to the Financing Entity as are appropriate in order to ensure the most efficient operation and management of the Financing Entity in order to protect consumers.

[Note: Rather than saying "in order to protect consumers", should this say "in order to achieve the object of the FE"? Or perhaps this could just be deleted altogether with no need for replacement language.]

Deemed assets, entity,

A4. Despite any other provision of this Act or the *Business Corporations Act*, the assets and liabilities which are resident in and form part of the property of the Financing Entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries for any purpose.

[Note: You posed a question about excluding an OPG subsidiary from this rule. Please instruct.]

OBTAINING FINANCING

[Note: It will be important to read all of the provisions that follow against the provisions in the existing Act, to ensure there is no overlap/confusion being created due to potential interactions between existing authority and new authority. The drafting focus so far has just been to get the relevant substantive provisions into the draft without evaluating how they fit into the broader scheme of the Act.]

Ontario Power Generation Inc. to obtain financing

A5. (1) The IESO may direct Ontario Power Generation Inc. to cause the Financing Entity to engage in any of the following activities in order to accomplish the hydro financing initiative:

[Note: As a practical matter, how would OPG "cause the FE" to do these things? How is this different from "directing"?]

1. Financing, borrowing or lending to provide the IESO with short-term or long-term financing.

2. [Purchasing/receiving/obtaining the right created under section XX] and making any payments to the IESO that relate to the IESO's activities in support of the hydro financing initiative.

Confidential Draft

[Note: Not sure if the regulated assets would always be "purchased" or if other terminology might be needed. Please advise.]

3. Collecting from the IESO amounts that the IESO is required to pay in relation to its activities in support of the hydro financing initiative.

4. Assigning its [the IESO's?] rights to all or part of the regulatory assets established under section XXXX.

[Note: What is para. 4 about? If this is about forcing OPG to make the FE do things, then does this belong in the list? I thought that it was only the IESO that would be assigning the rights to the FE]

5. Such other activities as may be prescribed.

Same

(2) Ontario Power Generation Inc. shall comply with a direction under subsection (1) within the time specified in the direction [and any prescribed rules?].

IESO to enter into transactions

A6. (1) The IESO shall, in order to support the achievement of the hydro financing initiative, enter into transactions with the Financing Entity or any other entity for such amounts as are necessary to support the hydro financing initiative.

[Note: My understanding is that the need for "or any other entity" stems from the need to allow for the IESO to obtain temporary financing in the immediate term, before it is able to access the FE. Do you want to narrow this so that the IESO is only authorized to do this before the FE is up and running? Or do you want to keep it available on an ongoing basis?]

Same

(2) In entering into transactions under subsection (1), the IESO shall comply with the regulations.

RIGHT OF RECOVERY [CREATION OF REGULATORY ASSET]

[Note re the following provisions:
I found a provision dealing with the concept of "regulatory asset" in Bill 210 from 2002 (see s. 79.13 of the OEBA). It deems certain things to be regulatory assets but does not say much more. On the phone, you noted that the term "regulatory asset" does not have any legal meaning on its own but is just an accounting term that has been used to describe the statutorily created right of recovery. However, you also said that there may be a need to use this term in order to convey the intended meaning from an accounting perspective.

Confidential Draft

In order to ensure that the drafting captures the policy intent, please answer/address the following questions:

1. Should we be creating a statutory right of recovery or deeming certain amounts to be a regulatory asset? [NTD-LSB: Yes. The term "Regulatory Asset" has currency in commercial law (parliance) and since much of what we're doing is to support a securitization model, the term should remain for now. Further, the term "regulatory asset" was consistently referred to in the documents provided to ENERGY LSB by Blakes. Further, IESO/Stikemans offered up alternative language for the creation of a "regulatory asset" (as an intangible asset of sorts). You said you'd consult on whether the regulatory asset terminology is important to flag in the Bill.

2. You said you're not sure whether or not the Act will require the IESO to sell/assign the right. Please instruct. If it is optional for the IESO to sell/assign, then it seems that the right could in theory remain with the IESO (unless you are saying that the statute can just create the right of the FE to recover without any need for the right to be assigned/sold by the IESO… in which case please explain why we need to deal with the sale/assignment at all). Please clarify.

3. I'm assuming that if we are creating a right, then the right must be held by someone (e.g. the IESO) before it can be assigned/sold? So should the right be created in the Act for the IESO (e.g. the IESO has a right to recover the amounts from distributors and prescribed consumers) since the IESO would then sell/assign/transfer the right to the FE? The FE must also have the right to recover from the IESO itself, so that creates an extra complication.

4. Should there be some indication of when the right of recovery/regulatory assets will no longer continue to exist (e.g. once all of the amounts have been paid?). I notice that your instructions below about the debt indicate that the debt is no longer owing once the amounts are paid, but do we need to indicate that the regulatory asset also ceases to exist at that point?

Right of recovery created

A7. A right to recover the following amounts in full from the IESO, distributors and prescribed consumers is created.

1. The [deferred amount].

2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.

[Note: How will the Board be approving these costs? Is this related to the expenditure report submitted to the Board? That provision dealing with Board expenditures doesn't refer to any approval taking place… just a review and recommendations.]

Confidential Draft

[Note: Need to mention expenditures?]

3. Other amounts as may be prescribed or as may be approved by the Board.

Note: Are you going to be saying anything about how the interest will be calculated?

Sale [and/or?] assignment of [right? Regulatory assets?]

A8. (1) The IESO [may? Shall?], in accordance with the regulations, sell [and/or?] convey to the Financing Entity the right to recovery created established under section A7 on such terms and conditions as are provided for by the Financing Entity.

[Note: Your instructions include the terms "sell", "assign" and "convey" -- which are correct?]

[Note: Your instructions suggested that something other than the "regulatory assets" may need to be assigned to the FE. Are you referring to the "warehousing" liabilities assumed by the IESO in the early days? What else would need to be assigned? Could these items be listed above in A7 or is there a reason why they need to be kept separate?]

Sale deemed final

(2) The sale and conveyance referred to in subsection (1) is deemed to be final for all purposes.

[Note: What is this intended to achieve? Is this based on precedent language that has been interpreted to have the desired effect?]

Debts

(3) For greater certainty, the [amounts to which the FE has a right of recovery] are debts owing by the IESO, distributors and prescribed consumers to the Financial Entity until the amounts have been fully paid and fully discharged.

[Note: Why is subs. (3) necessary? Isn't it inherent in the sale of the regulatory assets that the FE would have acquired the future right to collect these amounts? Perhaps it is unclear that the amount can be collected from not just the IESO but from others down the chain. But isn't that what the "right of recovery" section above is meant to cover?]

[Note: I haven't checked to see how other similar provisions dealing with debts are drafted. Not sure we need the "for greater certainty" and also not sure what the distinction is between "fully paid" and "fully discharged". This provision will need further consideration. You also noted that you may want to specify who determines when all obligations have been satisfied.]

IESO to recover amounts

A9. The IESO shall recover the amounts set out in section A7 from distributors and prescribed consumers, in accordance with […]:

Note: how are the requirements that would determine recovery for this subsection meant to interact with the GAM reg?

Confidential Draft

[Note: The following two subsections are placeholders. You noted that *the provision is going to have to evolve to deal with consumers who exit the grid (disconnect) completely either because they leave the province or they decide to generate their own electricity and completely disconnect. You also want to be able to prescribe* methods of ensuring that the amounts required cannot be "by-passed". I'll need to understand what is meant by "by-passed".]

Distributors liable

(x) The IESO and distributors are entitled to compensation for any shortfall in relation to the amounts the IESO must pay to generators, the Financial Corporation or other persons including prescribed persons, under section 25.33 resulting from the IESO's activities under the hydro financing initiative.

Consumers liable

(X) Prescribed consumers are required to contribute towards the amount of any compensation referred to in subsection (4) in accordance with the amounts and methods prescribed by the regulations and such amounts shall not be by-passed.

USE OF FUNDS TO REDUCE ELECTRICITY BILLS

[Note: Depending on how things land with s. 25.33, this might be a place to explain how the transactions between the IESO and the FE translate into reduction in the electricity bills of RPP consumers. Regulations could specify how the IESO would ensure that the short-term rate reductions that flow from the FE amounts are only received by the targeted class of consumers and that this same class of consumers is the only class responsible for the repayment of FE funds in the long-term.]

ALTERNATIVE LANGUAGE – REGULATORY ASSET -- PROPOSED BY IESO (STIKEMANS)

Regulatory Asset Created

A7. (1) There is hereby created and conferred upon the IESO a "Regulatory Asset" consisting of the right to recover, in addition to the amounts otherwise recoverable, in accordance with the Regulations, the aggregate of the following amounts [from distributors and] prescribed consumers. **[Quare: do we regard the Regulatory Asset as a single asset in a variable amount or as different assets arising on each deferral]:**

1. The [deferred amount, including interest accrued thereon].
2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.
3. Other amounts as may be prescribed or as may be approved by the Board.

Confidential Draft

(2) The Regulatory Asset created by (1), shall constitute, for all purposes, a property right, shall be transferable by the IESO in accordance with Section A8, and shall constitute an intangible in which a security interest can be created for purposes of the *Personal Property Security Act*.

Election to Transfer Regulatory Asset

A8. (1) The IESO shall, from time to time, in accordance with the Regulations, elect to transfer to the Financing Entity all or any portion of the Regulatory Asset, on such terms and conditions as IESO may determine.

(2) Upon any election by the IESO pursuant to (1), the Financing Entity shall pay to the IESO in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, an amount, not less than the Deferred Amount, determined in accordance with the Regulations.

(3) Upon any election by the IESO pursuant to (1), the Financing Entity shall become the person entitled to the benefit of the Regulatory Asset, or the portion thereof in respect of which the election was made, free and clear of any adverse claim (other than any such claim created by the Financing Entity) and shall be entitled to exercise all of the rights and remedies conferred by or arising in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the IESO shall cease to have any rights (except as provided in Section A9) to or in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, all as if the Regulatory Asset, or the portion thereof in respect of which the election was made, had originally been conferred upon the Financing Entity and not the IESO.

(4) Upon any election by the IESO pursuant to (1), the IESO shall have no further rights or obligations in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the Regulatory Asset, or the portion thereof in respect of which the election was made, shall not form part of the assets and liabilities of IESO for any purpose.

(5) The LG in Council may adopt regulations providing for the circumstances in which IESO shall make the election or elections provided for in (1).

Financing Entity may Grant Security Interest

A9. (1) The Financing Entity may, at any time after an election referred to in Section A8(1), create a security interest in favour of any person in all or any portion of the Regulatory Asset subject to such election, all on such terms and conditions as the Financing Entity may determine.

(2) Except as provided for in Regulations adopted pursuant to (3), *The Personal Property Security Act* shall apply to any security interest created pursuant to (1), except that the rights of the secured party on default shall be limited to receiving the amounts collected in respect of the Regulatory Asset, or the portion thereof subject to the security interest, as and when collected by the IESO in accordance with A10.

Confidential Draft

(3) The LG in Council may adopt regulations providing for the terms on which the security interest provided for in (1) can be created and perfected and for the priority of any such security interest.

IESO to Collect Amounts in Respect of the Regulatory Asset

A10. Subsequent to any election pursuant to Section A8, the IESO shall, as agent on behalf of the Financing Entity and any secured party, use reasonable efforts to collect the amounts owing in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and shall promptly pay over to the Financing Entity or the secured party the amounts collected.

--------*END OF IESO/BLAKES ALTERNATIVE LANGUAGE FOR REG. ASSET ---*

------- *BLAKES VERSION OF LANGUAGE FOR REGULATORY ASSET*

The Regulatory Asset, Composition,

A7(1) The "regulatory asset" consists of the following:

- **present and future statutory obligation of:**
  - **deferral consumers - to make all deferral repayments (including interest and late payment fees)**
  - **LDCs - to invoice the deferral consumers for the deferral repayments and to remit the amounts collected to the IESO**
  - **IESO - to receive and remit the deferral repayments from LDCs to the OPG Financing Entity**
- **All deferral repayment amounts collected**
- **All amounts in LDC or IESO deferral payment bank accounts**

Validity of Dispositions

(2) This section is reinforcing by statute the "sale" of the asset to the Financing Entity. This has been an important feature of the legislation in other jurisdictions in similar circumstances. Specifically, it says that "Dispositions" of the Regulatory Asset are "true sales", and not subject to challenge. This is an essential requirement for a securitization transaction. This provision identifies possible grounds for a challenge that a sale took place and indicates that those events do not affect the validity of the sale.

Deemed Perfection and Priority of Dispositions

Confidential Draft

(3) This is reinforcing the automatic nature of the "sale" of the asset. It Provides for a clean sale to the OPG Financing Entity, free and clear of encumbrances (i.e., no specific need to "perfect" the sale.

Validity of Pledges,
(4) Statutory override permitting the OPG Financing Entity to give a security interest in the "regulatory asset" to investors.

> **This would give the investors (through an indenture) the right to enforce collection of the deferral repayments to pay off amounts owed by the OPG Financing Entity to the investors upon certain defaults by the OPG Financing Entity under an indenture.**

Deemed Perfection and Priority of Pledges
(5) This is reinforcing that a commercial pledge given by OPG Financing Entity is valid and will have priority without specific "perfection". The result is that a pledge of the Regulatory Asset as security in accordance with the Treasury Plan will be given priority to other claims. The Pledge includes proceeds from the Regulatory Asset and is not affected by comingling or the ordinary requirement to file a financing statement under the PPSA.

Enforcement of Property Rights –

(6) The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5. ***[ntd-: NOT an annotation – pulled directly from Blakes' document.]***

Collective Action Required –
(7) This anticipates that the Regulatory Asset will be structured as a variable interest that can be divided between IESO (until it sells) and one or more OPG Financing Entitys. The likely format will be a co-ownership agreement, that will allow for different owners to have a fractional undivided ownership interest in the Regulatory Asset. Those will entitle the owners to a specified share of the cash flows, which will correspond to their finance payment obligations. This will allow for future financing flexibility.

MISCELLANEOUS

Fair Hydro Financing Plan, miscellaneous,

A.8 (1) Consideration will be given to whether any additional 'miscellaneous' provisions are needed (and expected by the market) to support the financing of this

Confidential Draft

structure. Some of these provisions are not typical in legislation, and so will need further consideration (in consultation with leg counsel).

Regulations

114(1.5) The LGIC may make regulations to implement the Fair Hydro Financing Initiative

-(a) The power to implement the program (and to set out some of the details of the program) through regulations is important. Decisions remain to be made (once the drafting is a little further advanced) about what provisions/details need to appear in the proposed legislation, and what provisions/details can be set out in regulations.

Confidential Draft

ONTARIO ENERGY BOARD ACT, 1998

x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [hydro financing initiative].

[Note: Would need to link with definition in the EA or else spell out the definition here - TBD.]

x. Section 27.1 of the Act would be amended by adding the following paragraph:

Hearings

(1.1) A directive may specify whether the Board is to hold a hearing, the circumstances under which a hearing may or may not be held and, if a hearing is to be held, the type of hearing to be held and the time within which it must be held.

The underlined is what makes this different from the other provisions in the Act that basically have the same wording. There are already a number of places in the Act where you have this type of hearings provision re directives (e.g., s. 27.2 (7)). If you basically want the same authority in each instance, then the wording should be consistent in each case. There are already some discrepancies between the current provisions (e.g., s. 27.2

(7) talks about types of hearings, whereas s. 28 (2) doesn't). Differences in wording will typically be presumed to be differences in meaning. So, the question is what you're intending to authorize in each case, and whether differences are intended. If you want the same thing everywhere, it should all be worded the same. Let me know.

[Note: Waiting for confirmation whether amendments to s. 78.7 are needed. Please advise.]

x. Section 78 of the Act would be amended by adding the following subsection after subsection (3.0.5):

Rates, fair hydro financing initiative activities -IESO, OPG, distributors, etc.
(3.0.6) The OEB would not be precluded from taking into account the performance of duties under this Part by any entity regulated by the OEB, including fees received by such entity in excess of the incremental costs of the provision of such services.

x. Section 79.16 (3) of the Act would be repealed and the following substituted:

Adjustment to eliminate variances

(3) In determining rates under clause (1) (b), the Board shall take into account balances in variance accounts established under section 25.33 of the *Electricity Act, 1998* and, subject to section X of that Act, make adjustments with a view to eliminating those balances within 12 months or such shorter time periods as the Minister may direct.
[Note: Please let me know what section the highlighted portion is supposed to refer to… is it the provision that says the IESO has the 30 year period to pay off the amount in the variance account for the hydro financing initiative? I wonder if this is confusing and whether the amendment to subs. (3) above works… it almost seems unnecessary to say that the Board has to "take into account" this balance, given that we are setting up a bunch of very specific rules about what has to be done by various entities in order to eliminate this amount. What would the Board be expected to do with information about this variance account? For consideration.]

PART VII.3

COMPLIANCE – FAIR HYDRO FINANCING INITIATIVE

Right of the [OEB] to Inspect Books and Records,
113 (1) OEB may be given the power to investigate compliance with the legislation and the power to examine books and records, etc.

Power to Investigate Compliance and Impose Regulatory Sanctions

Confidential Draft

(2) This legislation will not limit the OEB's power to investigate compliance or prevent or preclude the OEB's power to impose sanctions. The OEB can investigate compliance with this part and to impose regulatory sanctions for non-compliance.

Limitation, Board,

(2.1) The OEB cannot, however, take any action to affect the irrevocability of the Transition Charges or the Undertaking of the Province.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Confidential Draft

External - Draft 5 Annotated (Blks DS) GOV2016.146.e05 (April 3 2017).pdf

A proposal to create Legislation.

Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

ELECTRICITY ACT, 1998

1. (1) Section 1 of the *Electricity Act, 1998* would be amended by adding the following clause:

[Note: GGRA provisions have been removed for now. Please confirm if they should be re-inserted.]

(2) Clause 1 (f) of the Act would be struck out and the following substituted:

(f) to protect the interests of consumers with respect to the adequacy, reliability and quality of electricity service;

(f.1) to protect the interests of consumers with respect to the prices they pay for electricity, including protection of those interests through the Hydro financing initiative;

[Note: Since the Hydro financing initiative is a defined term and is clearly required to be implemented under the new substantive provisions of the Act, I'm still not sure why this needs to be addressed in the purpose clause. However, I have included a purpose provision as per your instructions.]

Article 1 – Purpose

The proposed new legislation will likely include a large number of provisions intended to support the "financeability" of the structure. As a result, it may make sense for (LSB is exploring the potential) the Bill to create a new stand-alone energy statute, much like the *Green Energy and Green Economy Act, 2009* created the *Green Energy Act, 2009*.

The new legislation would have a purpose clause that explains the objective of intergenerational fairness. This would be useful for the markets to see, and may

Confidential Draft

help support the validity of the legislation from a constitutional law perspective (charge vs. tax)

x. Subsection 2 (1) of the Act would be amended by adding the following definitions:

"Financing Entity" means the trust established by Ontario Power Generation Inc. under clause XX (a) or the entity prescribed for the purposes of clause XX (b); ("French")

"hydro financing initiative" means those policies of the Government of Ontario related to its decision to ensure costs to Ontario electricity consumers are allocated fairly over time, taking into account the useful life of new sources of and technologies for electricity; ("French")

[Note: I have applied the precedent of the "smart metering initiative" as per your instructions. Just want to reiterate my concern that the reference to government policies is really vague (which initiative/ policies? At which point in time?) and I think this could cause lots of confusion, particularly if the policies evolve over time. It could also have unintended consequences.]

[Note: To consider -- by describing the initiative as we have in the above definition, we are potentially linking the deferred amount to amounts that would otherwise be paid for by consumers as part of the GA. If the deferred amounts are not all about "the useful life of new sources and technologies" then the description of the initiative should likely be broadened. (For example, if some of the deferred amount may be used to cover high wholesale prices, one could argue that the initiative is NOT about allocating costs fairly over time… it's just about pushing the cost increase to future consumers without considering what is "fair" across the generations.]

Article 2 - Definitions

The new legislation will include many new defined terms. One important term will be "Funding Shortfall" (or equivalent wording). This will be the net reduction in cash flows to IESO as a result of the reallocation of a portion of the Global Adjustment to later periods of time. Currently, the "Funding Shortfall" would be limited to the Global Adjustment attributable to the procurement contracts, but this is a question that still has to be settled.

Another important defined term that is worth noting is "Replacement Event". This is an event under which the market would want to replace a person who has responsibility to take essential actions under the program (including LDCs, IESO and OPG), like invoicing and collecting amounts.

Confidential Draft

The triggering events are likely to include insolvency and breach of duty/obligation.

Another key defined term is "Transition Charge". This is the amount that will be calculated and applied to the "deferral consumers", based on the amounts of payments due under funding obligations incurred to cover the funding shortfall (i.e., what we have until now been calling "deferral repayments").

Another important defined term will be "Treasury Plan". This will be the written plan prepared by OPG relating to the sale of the "regulatory asset(s)" to the OPG Financing Entity (sometimes previously referred to as the "Financing Trust") and the debt issued by the OPG Financing Entity to the markets.

Another defined term will be "True-up Amount". This is a key provision for the market. It allows for a catch-up for estimate/actual adjustments and to address consumer non-payment credit losses.

A further defined term will be "Undertaking of the Province". This will be a promise by the Government not to impair the program. This will be expected by the market, even though it will be understood that there may be issues for investors to enforce the promise, or get damages if there is a breach.

x. (1) Subsection 6 (1) of the Act would be amended by adding the following clauses:

(q.1) to enter into agreements or arrangements with the Financing Entity;

(q.2) to engage in activities related to making payments to and receiving payments from the Financing Entity under Part V.2, as required under this Act, and to engage in related settlement activities;

Note: Is some of this covered already by clause (i)? Could we address this by expanding upon clause (i)? Trying to understand whether there is any potential overlap.]

(q.3) to engage in activities related to the [sale/disposition/conveyance/assignment] of the [right/regulatory asset] created under section XX, which activities may include,

[Note: As discussed, please confirm terminology.]

(i) incurring liabilities in relation to the [right/asset];

Confidential Draft

(ii) [selling/assigning/disposing of?] the [right/asset] to the Financing Entity;

(iii) assigning [the right/asset] to third parties;

[Note: I don't understand (iii) -- I thought the rights to the asset were being assigned to the trust and nobody else?]

(q.4) acting as a recovery agent for the Financing Entity in relation to [the right/asset];

x. (1) Subsections 25.33 (1) and (2) of the Act would be repealed and the following substituted [TBD].

[Note: As per our telephone discussion today (March 27), there seems to be ongoing debate about the policy direction:

1. Do you want to amend the GAM so that the money received from the FE and the money recovered by the FE are part of the initial GA calculation?

2. Do you want to leave the GAM section as is and add a requirement (in a new section) for the IESO to conduct additional adjustments for a subset of the payments referred to in s. 25.33? This second adjustment would be engaged in after the existing GAM is calculated. So it would be a further adjustment of what has already been adjusted under the GAM.

Until this fundamental question is answered, we would be removing the proposed amendments to s. 25.33.]

OPTION 2:

Deferral adjustments, 25.33 amounts.

25.33.2 (0.1) For the purposes of this section and sections 25.34 and 25.35,

(a) "authorized entity" means **[the hydro financing trust established by Ontario Power Generation Inc. for the sole purpose of financing the recovery of the balance in the deferral account, or]** such **[other]** entity as may be prescribed by regulation;

(b) "deferral account" means the deferral account established under section 25.34;

(c) "deferral amount" means the amount recorded in the deferral account for each month during the deferral and recovery period;

(d) "deferral and recovery period" means the period from May 1, 2017 to April 30, 2047;

(e) "deferral consumer" means a consumer who is a member of a class of consumers prescribed by the regulations for the purposes of sections 25.34 and 25.35;

Confidential Draft

[NTD: This will be set out in a new subection 4(3) of O. Reg. 95/05 and will reflect OREC-eligible consumers other than non-grid connected customers of IPAs (who would not pay a GA charge anyway). Note that this is not quite the same as "RPP-eligible" consumers.]

(f) "electricity supply cost" means the amount calculated according to the formula:

(A + B + C + D) - E

where,

A is the amounts paid by the IESO to generators, the Financial Corporation and distributors, whether the amounts are determined under the market rules or under section 78.1, 78.2 or 78.5 of the *Ontario Energy Board Act, 1998,*

B is the amounts paid by the IESO to entities with whom the IESO has a procurement contract, as determined under the procurement contract,

[NTD: A and B use exactly the same wording as is set out in (a) and (b) of the existing ss. 25.33(1).]

C is

[NTD: C is the "net new" costs associated with the GA deferral. These are costs that the IESO will record in the GA deferral account established under s. 25.34, and that the IESO (or its assignee) will subsequently recover. These costs consist of the interest and financing-related admin costs associated with the GA deferral (which costs will be flowed through from the hydro financing trust to the IESO). These costs do not include the principal amount deferred and recovered, since that is already captured as part of A and B.

The "net new" costs in C will be recoverable solely from a newly prescribed class of consumers - deferral consumers (i.e. those consumers who will benefit from the GA deferral). The rules for the recovery of these costs will be part of a new subsection 4(3) of the RPP Regulation.]

D is any other amounts that may be prescribed by regulation,

[NTD: Paragraph D would give us flexibility to add new cost categories by reg. if/as needed now or later.]

[GGRA-related amendments are removed for the time-being]

and

E is any other amounts that may be prescribed by regulation;

[NTD: Paragraph E would give us flexibility to add new cost categories by reg.

Question for leg counsel: If in the future HOEP were to exceed contract prices and/or regulated rates, presumably the formula would still work (i.e. in such case the amounts for A and B would simply be negative amounts)?] *[ntd-LSB: IESO appears to agree with that idea, based on our shared appreciation of how EA s.25.33 works today.]*

(f) "reduction period" means the period commencing May 1, 2017 and ending April 30, 2018;

(g) "RPP Regulation" means Ontario Regulation 95/05 (Classes of Consumers and Determination of Rates).

Electricity pricing adjustments

Adjustments by IESO

(1) The IESO shall, through its billing and settlement systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of market participants in Ontario as are prescribed by regulation, reflect the electricity supply cost.

Adjustments by distributors and retailers

(2) Distributors and retailers shall, through their billing systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of consumers in Ontario as are prescribed by regulation, reflect the electricity supply cost.

[NTD: There will be two "classes of consumers in Ontario that are prescribed" for the purposes of RPP-"plus" deferral – the EA regulation that "prescribes" these two classes will refer to (or be aligned with) the two classes as described in the RPP Regulation. 1) The first class are the deferral consumers (see definition above), and 2) the second class (or defined base consumer) will be the "proxy" Toronto Hydro consumer whose bill will only be allowed to increase year-over-year according to rules prescribed in a new s. 6.1 of the RPP Regulation.]

Variance accounts

(3) The IESO shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by it under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation. *[ntd-DAN: I left "this section"*

even though this provision is part of a new s.25.33.2 – did you want "this section" to refer to "section 25.33"? If so, then we'd add this to the list we've started referencing proposed new s.25.34 and s.25.35. Consider.]

[Drafting note: We can prescribe the different variance accounts that must be maintained, and the different amounts that must be tracked and accounted for, by the IESO. Among other things, the IESO will presumably need to establish variance accounts related to the GA deferral and payback, to take into account timing and other differences. Any financing costs associated with these variance accounts (over and above the financing costs passed through to the IESO by the authorized entity (the hydro financing trust) would be subject to Board scrutiny.]

Same, distributors and retailers

(4) Distributors and retailers shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by them under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation.

x. The Act would be amended by adding the following sections:

Deferral account

25.34 (1) The IESO shall establish a deferral account to record, for each month during the reduction period and the deferral and recovery period, the difference between,

(a) the amounts that would be payable by deferral consumers in respect of the electricity supply cost for the month under section 6.1 of the RPP Regulation; and

(b) the amounts payable by deferral consumers in respect of the electricity supply cost for the month under section 6.2 of the RPP Regulation.

[NTD: IESO to confirm whether the differences between (a) and (b) would be recorded monthly.

Explanatory note: The Board will determine a rate under a new s. 6.1 of the RPP Regulation that will essentially follow the same process the Board uses to establish the RPP rate, except that it will establish a rate for the deferral consumers (which is a slightly broader class than RPP consumers). The Board will also determine a "proxy" rate for the deferral consumers, calculated according to a different set of rules set out in a new s. 6.2 of the RPP Regulation. The rules in s. 6.2 will establish the "proxy" rate for a "proxy" Toronto Hydro customer consuming an average of 750 kWh/mth, to achieve an all-in tax-included total bill amount reduction of approximately 17% (the bill reduction for GA deferral + 8% OREC will result in an all-in bill reduction for May 1, 2017 – April 30, 2018 of 25% over the May 1, 2016 – April 30, 2017 period). There will be

additional rules dealing with bill increases and full repayment of the GA deferral by April 30, 2047.]

Note that because we refer to the new provisions in the RPP Regulation, we will need to amend that regulation *before* the introduction of the proposed legislative amendments. Drafting of the proposed RPP Regulation amendments is underway.

Do we need to create a parallel provision requiring distributors and retailers to establish deferral accounts as well?]

(2) The IESO shall record interest on the balance of the deferral account at a rate or rates reflecting the costs incurred by the IESO, or by any assignee under section 25.35, to finance the amounts recorded in the deferral account.

(3) The IESO shall also record in the deferral account the costs incurred by the IESO to finance the amounts recorded in the deferral account.

[NTD: This is a placeholder for what we will need here. The concept is that ss. (2) and (3) will ultimately apply to the interest and admin costs incurred by the hydro financing trust (assignee of the right of recovery under s. 25.35) in providing funds to the IESO to finance the GA deferral. Those interest costs and admin costs will be fully recoverable through section 25.35, subject to Board scrutiny presumably limited to verifying the calculations. This is not intended to address interest and costs incurred by the IESO and recorded in the variance accounts established under ss. 25.33(5).]

Recovery of GA deferral amounts

25.35 (1) The IESO shall have the right to fully recover the balance recorded in the deferral account. **[The Board shall authorize?]** recovery of the balance from the deferral consumers over the deferral recovery period in accordance with the prescribed rules.

[NTD: What role should the Board play in determining the amounts recovered each year (within the smoothing parameters that are prescribed)? For e.g., could the Board set rates such that the year-over-year increase in the proxy Toronto Hydro customer's all-in bill was less than the maximum permitted under the prescribed rules?

The prescribed rules will be set out in the new s. 6.2 of the RPP Regulation, which will determine how much the "proxy" Toronto Hydro customer's monthly average bill can increase year-over-year (after the reduction period). Basically, for the first four years after the reduction period, the increase will be limited to CPI. For the balance of the deferral and recovery period, the increases will be limited to 10%, with an overarching requirement that the deferral amounts be fully repaid by April 30, 2047.]

Assignment of right of recovery

(2) The IESO shall have the right to assign**[, in whole or in part?,]** to **[one or more?]** authorized entities, the IESO's rights under subsection (1).

[NTD: This is largely a placeholder for what needs to be addressed here. We will need to determine how to characterize this transaction. For e.g., will it be an outright assignment? Will it be a series of assignments? Should it be characterized as a "sale"? How will this transaction be implemented – e.g. by way of a contract between the IESO and the Trust? We will need the input of external counsel and others to ensure that it adequately supports the contemplated financings.]

Payments to assignee

(3) In the event of an assignment to an authorized entity under subsection (2), the IESO shall, through its billing and settlement systems, make payments to the authorized entity of the full amounts paid to the IESO in respect of the rights assigned.

[NTD: This is largely a placeholder for what needs to be addressed here. Iin addition to requiring IESO to make payments to the authorized entity, do we need to include explicit provisions giving the assignee the right to recover the amounts in the deferral account that are covered by the assignment?

We will need provisions dealing with billing and payment as between the authorized entity and IESO. We will also have to decide whether the interest and admin costs incurred by the authorized entity will simply be passed through to IESO, or whether the authorized entity (or OPG) will have an opportunity to keep any profits made on financing activities (swaps, etc.) by establishing some sort of "reference rate" that IESO would have to pay (and that might be different than the rate(s) the authorized entity would have to pay). A middle ground that could be considered would be to cap the amount of profits the authorized entity (or OPG) could make.

Along similar lines, the amounts charged by OPG to the authorized entity to provide admin services should be subject to Board review (e.g. for reasonableness). This would not jeopardize the ability of the authorized entity to recover all of its costs (since it would affect the amounts OPG could recover from the authorized entity).

We also need to contemplate a provision that if there is a change of law by the Government of Ontario that materially adversely affects the ability of the authorized entity to fully recover the assigned deferral account amounts, then repayment of those amounts will be accelerated and become immediately due and payable.]

x. The Act would be amended by adding the following provisions after s.29:

Transition Charges -- Ratepayer Obligation to Pay a Transition Charge

s.29.0.1 (1) Each consumer in the class of ratepayers to which this program applies (previously referred to as the "deferral consumers") will have a direct statutory obligation to the OPG Financing Entity to pay its share of the deferral repayments (principal, interest, financing costs).

Indebtedness of Ratepayers –
(2) This will be a debt owed by the consumer directly to the OPG Financing Entity. If it is not paid, the OPG Financing Entity can sue the consumer directly through the agreed procedures. This is identifying an explicit and identifiable revenue stream for the comfort of investors.

Separate tracking - distributors,
(3) This debt is separate from the debt owed by the consumer to its LDC, although the LDC will be the collection agent.

No set-off, etc. *[see similar provision at EA s.29.0.3(2)]*
(4) This debt cannot be netted out against any amount owed by the LDC to the consumer (e.g. year-end credit to consumer on equal monthly billing).

Allocation of Ratepayer Payments
(5) If a consumer pays less than its total invoiced amount, the payment will be allocated pro rata between the deferral repayment and the amounts owing to the LDC.

Transition Charges are Irrevocable

(6). This is intended to prohibit any reversal of amounts that must be paid to meet the terms and conditions of the funding obligations to be incurred under the program.

> **The deferral repayments are due regardless of whether a financing obligation incurred under the treasury plan is consistent with government policy at the time a related payment obligation arises.**
>
> **If the Fair Allocation Plan is amended after a funding obligation is properly incurred, any inconsistency in the payment profile will not impair the existing funding obligation or the pass-through of related payment amounts as Transition Charges.**

Anti-avoidance; No-by-pass

Confidential Draft

(7) The idea here tracks the U.S. transactions, which say that the obligation of a consumer to pay Transition Charges cannot be "by-passed". If a consumer leaves the grid, he or she will still be obligated. See the highlighted text in the definition of "Ratepayer" for a sense of how this may be accomplished.

> **This concept is a key to a rated market financing and will need to be developed further.**
>
> **For example, self-generating customers could be charged a flat fee (for example, equal to the amount that would be payable by the "representative" Toronto Hydro customer that underpins the current government policy on the 25% or some other basis.)**

Distributor, agent for Financing Entity,
s.29.0.2(1) LDC is agent for the OPG Financing Entity. LDC must invoice the deferral consumer the deferral repayment amount - referable to the items described in "Finance Amount" (i.e., an amount already borrowed).

IESO - Calculation of the Period Transition Charge

(2) IESO will calculate the total amount of deferral financing that will be repayable in an applicable [e.g. 6 month] period.

(3) IESO will then determine the deferral repayments due from deferral consumers based on a prescribed methodology for allocating payments to individual deferral consumers.

Notice of Transition Charges, IESO to distributors

(4) IESO will then inform each LDC of the amount of the deferral repayments to be included in the invoices issued to each deferral consumer in the LDC's service territory.

Adjustments *[ntd: Consider – Deferral repayment amount final]*

(5) Deferral consumers cannot challenge the amount of the deferral repayment showing on their invoice unless there is a substantial calculation error.

Successors of Electricity Distributors –
(6) Any successor of an LDC will be bound by the same obligations as the original LDC re: billing and collecting deferral repayments.

Confidential Draft

Successors of IESO –

(7) Any successor of the IESO will be bound by the same obligations as the original IES re: billing and collecting deferral repayments from distributors *[ntd-LSB: what about from consumers?].*

Appointment of an Alternative Invoicing Agent *[NTD – this provision may be moved closer to the powers/authorities of the OPG financing entity.]*

(8) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect deferral repayments. The LDC must sign whatever agreements and assignments are needed to enable the replacement agent to collect the deferral repayments from the LDC's deferral consumers.

Regulatory Asset Owner has Standing

(9) The OPG Financing Entity (or investors through their security) will be able to sue LDCs for failing to properly calculate or invoice the financing repayments.

29.0.3 Collections and Remittances [Collecting and Remitting Deferral Repayments]

(1) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC or the IESO, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect and remit deferral repayments. The LDC (or IESO, as applicable) must sign whatever agreements and assignments are needed to enable the replacement agent to collect and remit the deferral repayments. "Replacement Events" are necessary to investors to safeguard against a person holding money in a distressed circumstance.

No Set-off, etc. *[see similar provision at EA s.29.0.1(3)]*

(2) The deferral repayments cannot be netted out against any amounts owed by the party responsible for collecting those repayments.

Sequestration.

(3) If any LDC or the IESO fails to remit deferral repayments, the OPG Financing Entity can get a court to order the LDC (or IESO, as applicable) to require them do so.

Confidential Draft

x. Subsection 53.1 (1) of the Act would be repealed and the following substituted:

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, the following:

[Note: I know that the words "in addition to any other objects" appears in the current provision, but it seems very odd. This suggests that the objects are unlimited, which doesn't seem to be the intention but I could be wrong.]

1. Owning and operating generation facilities.

2. Establishing, operating and supervising the activities of entities for the purposes of supporting and promoting the government's hydro financing initiative.

3. Providing financial and other support to the IESO in its activities in relation to the hydro financing initiative.

4. Engaging in such financing, borrowing, lending and related activities and transactions to support the IESO with short-term or long-term financing.

5. Providing equity, not exceeding the prescribed amount, to support the financing capacity of the Financing Entity.

Subsidiaries

(1.1) Ontario Power Generation Inc. may create one or more subsidiaries in order to more efficiently conduct its activities or achieve its objects.

x. Section 53.2 of the Act would be repealed and the following substituted:

Rights of the Minister[1]

53.2 (1) The Minister, on behalf of Her Majesty in right of Ontario, may acquire, hold, dispose of and otherwise deal with securities or debt obligations of, or any other interest in, Ontario Power Generation Inc. or any of its subsidiaries.

Confidential Draft

[1] FLS - this provision is based on s. 49 of the Act

Agreements

(2) The Minister, on behalf of Her Majesty in right of Ontario, may enter into any agreement or arrangement that the Minister considers necessary or incidental to the exercise of a power under subsection (1).

x. The Act would be amended by adding the following Part:

PART V.2
HYDRO FINANCING INITIATIVE

FAIR HYDRO FINANCING PLAN

Establishment and adoption of the Fair Allocation Plan

A. 1 (1) The Minister of Energy [may/shall] establish a "fair allocation plan"

(a) The purpose of the plan is generally to try and reallocate the portion of GA attributable to the procurement contracts over the anticipated useful life of the generation assets under those contracts.

- **This is the intergenerational funding of the Green Generation Initiaitves.**
- **One policy question is whether the amounts deferred and the period over which the deferred amounts are repaid are to be limited to the portion of GA attributable to the procurement contracts and to the anticipated useful life of the [renewable] generation assets under those contracts.**

- From a constitutional validity perspective (and hence a financeability perspective) these limits are very important.

-Financial/economic modelling to verify this link is required.

Principles and Parameters,

(2) Based on this initial description (which is only illustrative to advance the initial stakeholder discussion), the Minister would determine the details of the "fair allocation plan", but must take into consideration the following principles:

- **The deferred GA costs should be spread over a period not exceeding the anticipated remaining useful life of the generation assets under the procurement contracts**
- **The plan should specify the length of the "reference periods", to identify which deferral consumers are responsible for which deferral repayments**

Confidential Draft

- **The share of the deferral repayments to be allocated to deferral consumers in each "reference period" should reflect a reasonable assessment of the remaining anticipated useful life of the generation assets under procurement contracts and perhaps to the benefits received by those deferral consumers from the procurement contracts (e.g. transition off coal)]**

- **No deferral consumer group should bear an unreasonably disproportionate share of the deferral repayments. That could be limited to a maximum amount, determined on a formula basis, if it makes sense tot he stakeholders**

- **In making the allocations, real (i.e. inflation-adjusted) dollars should be usedThe fair allocation plan is made using forward-looking information and projections.**

- **If, after the fact, the Minister determines that a Ratepayer Group paid more than would otherwise would have been the case had the projections for such period been accurate or other considerations come to light, adjustments to the plan could be made.**

Attribution Methodology

(3) The program will need to define how deferral consumers will be allocated an appropriate share of aggregate adjustment amount.

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

(4) Consideration will be needed regarding the level of review and confirmation of the plan is needed or appropriate. For example, should the scope of review be limited to calculations only? If there is a need for review, then consideration will be needed as to who will be the reviewer and under what authority, etc.

THE TREASURY PLAN

Power to Prepare and Implement the Treasury Plan –

A.2 (1) The "Treasury Plan" will be prepared by OPG. It must follow the requirements set out in this Part. Accounting considerations will need to be factored into this delegation, as well as the degree of province input initially and on an on-

Confidential Draft

going basis. [Note for leg counsel: We will need to create the necessary sub-delegation authority]

Required Terms and Conditions of the Treasury Plan

(2) The Treasury Plan will establish the basis for OPG making funding decisions, which will need to align with the Fair Allocation Plan.

Power to Review and Approve the Treasury Plan

(3) The Minister may designate one or more persons to review, and require changes to the Treasury Plan. (This review could also be given to the Minister.) *[NTD-: Assumin no role for OEB – confirm. Any role for MOF/OFA here?]*

Obligation to Apply IESO Remittances,

(4) OPG will need to ensure that pass-through amounts, transferred to it as agent for the OPG Financing Entity, are only used to repay the debt and related costs.

Non-Recourse,

(5) The Treasury Plan will provide that the investors and other contracting parties will not have recourse to the IESO, LDCs, agents, the OEB or the Province, except where such parties fail to comply with applicable law. This may be modified in the contracts under which a financing arises.

NOTE: The documentation creating the Funding Obligations must expressly state that such obligations are not guaranteed by the Province.

NOTE: See IESO/Stikeman's language for "Regulatory Asset" above.

Incurrences are Binding,

(6) A failure to implement the Treasury Plan will not impair the pass-through of the deferral amounts or the validity of an otherwise valid funding obligation.

- **NOTE: Separate from the legislative provisions, we will also be preparing a very rough sketch of some of the items that might be included in the Treasury Plan direction.**
- **The sketch will be for illustration purposes only and will be for use in discussions with stakeholders including OPG and IESO.**

Crown bound, actions prohibited,

A.3 (1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – *[NTD: alternative* - Crown bound, prohibition against discriminatory action.

Confidential Draft

(2) The Province will be prohibited from taking or permitting any action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or collections.

Undertaking and Agreement

(3) Under this Undertaking, the Province will agree for the benefit the OPG Financing Entity that it will not impair the value of the Regulatory Asset or the Transition Charges imposed under this Part. This "pledge" is in line with market expectations. Enforcement issues arise in this sort of undertaking, which will be assessed by the market and rating agencies based on the likelihood that a failure by the Province would lead to a successful damages claim. Unlike in the U.S., the law regarding such a claim is uncertain. Nevertheless, we expect that this sort of Undertaking will be requested in the legislation itself (i.e., requiring an act of the legislature to disavow – which is a higher bar than simply walking away from a contractual undertaking.

[Note: TBD where to place this Part within the Act and how to structure this Part. Temporary number (e.g. A1, A2, A3 etc.) has been used for now.]

FINANCING ENTITY

Financing Entity, established or prescribed

A1. (1) For the purpose of accomplishing the hydro financing initiative, the Minister may,

(a) direct Ontario Power Generation Inc. to establish and operate a trust; or

(b) direct Ontario Power Generation Inc. to [oversee? Administer?] an entity prescribed by the regulations.

[Note: Would the direction of the Minister include any additional instructions re timing etc.?]

Duty of Ontario Power Generation Inc.

(2) Ontario Power Generation Inc. shall comply with the direction of the Minister.

[Note: Once OPG takes action under A1 in accordance with the Minister's direction, what happens if at some point in the future, the Minister wants a different entity to take over the role of the FE? Is this a concern that needs to be addressed?]

Confidential Draft

Object of Financing Entity

A2. (1) The object of the Financing Entity is to finance the amounts required to accomplish the hydro financing initiative.

[Note: We are imposing several obligations on the Financing Entity (FE). As a practical matter, how will these obligations be enforced? Who will be responsible for meeting these obligations? (e.g. would there be directors or officers of the trust?). Or will the OPG be responsible for meeting these obligations as the body that establishes/manages the trust or oversees the designated entity?]

Activities

(2) To achieve the object, the Financing Entity shall engage in the following activities:

[Note: Just want to confirm that this should be "shall" and not "may".]

1. Borrowing funds from the Financial Corporation or from such other persons or entities [as may be prescribed?].

2. Investing funds.

3. Making payments and loans to the IESO or such other entity as may be prescribed in accordance with the regulations [or an order of the Board].

[Note: I think it would be best to specify whether the rules would be set out in a reg or in a Board order to avoid confusion.]

[Note: Should the "loans" language be removed, since you noted that the IESO is not "borrowing" from the FE?]

4. Receiving payments from the IESO or such other person or entity as may be prescribed in accordance with the regulations.

5. Issuing securities or debt ***[in the manner prescribed?].***

6. Engaging in any activities, including entering into such transactions, agreements or arrangements as may be prescribed and in accordance with the regulations.

Board review of expenditures, etc.

A3. (1) The Financing Entity shall, at least 60 days after the end of each fiscal year, submit its expenditures relating to its operations for the fiscal year including the expenses it has charged to Ontario Power Generation Inc. or the IESO, or that it has been charged by the Financial Corporation, in relation to those operations, to the Board for review.

Confidential Draft

[Note: The list of items that have to be reported on could be more prescriptive (e.g. specifying specific amounts to be set out) or it could also allow for the Board to specify what it wants to see in the report. Let me know if you'd like to adjust the wording of the requirement.]

Board recommendations, etc.

(2) The Board may review the expenditures and charges referred to in subsection (1) and make recommendations to the Financing Entity as are appropriate in order to ensure the most efficient operation and management of the Financing Entity in order to protect consumers.

[Note: Rather than saying "in order to protect consumers", should this say "in order to achieve the object of the FE"? Or perhaps this could just be deleted altogether with no need for replacement language.]

Deemed assets, entity,

A4. Despite any other provision of this Act or the *Business Corporations Act*, the assets and liabilities which are resident in and form part of the property of the Financing Entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries for any purpose.

[Note: You posed a question about excluding an OPG subsidiary from this rule. Please instruct.]

OBTAINING FINANCING

[Note: It will be important to read all of the provisions that follow against the provisions in the existing Act, to ensure there is no overlap/confusion being created due to potential interactions between existing authority and new authority. The drafting focus so far has just been to get the relevant substantive provisions into the draft without evaluating how they fit into the broader scheme of the Act.]

Ontario Power Generation Inc. to obtain financing

A5. (1) The IESO may direct Ontario Power Generation Inc. to cause the Financing Entity to engage in any of the following activities in order to accomplish the hydro financing initiative:

[Note: As a practical matter, how would OPG "cause the FE" to do these things? How is this different from "directing"?]

1. Financing, borrowing or lending to provide the IESO with short-term or long-term financing.

2. [Purchasing/receiving/obtaining the right created under section XX] and making any payments to the IESO that relate to the IESO's activities in support of the hydro financing initiative.

Confidential Draft

[Note: Not sure if the regulated assets would always be "purchased" or if other terminology might be needed. Please advise.]

3. Collecting from the IESO amounts that the IESO is required to pay in relation to its activities in support of the hydro financing initiative.

4. Assigning its [the IESO's?] rights to all or part of the regulatory assets established under section XXXX.

[Note: What is para. 4 about? If this is about forcing OPG to make the FE do things, then does this belong in the list? I thought that it was only the IESO that would be assigning the rights to the FE]

5. Such other activities as may be prescribed.

Same

(2) Ontario Power Generation Inc. shall comply with a direction under subsection (1) within the time specified in the direction [and any prescribed rules?].

IESO to enter into transactions

A6. (1) The IESO shall, in order to support the achievement of the hydro financing initiative, enter into transactions with the Financing Entity or any other entity for such amounts as are necessary to support the hydro financing initiative.

[Note: My understanding is that the need for "or any other entity" stems from the need to allow for the IESO to obtain temporary financing in the immediate term, before it is able to access the FE. Do you want to narrow this so that the IESO is only authorized to do this before the FE is up and running? Or do you want to keep it available on an ongoing basis?]

Same

(2) In entering into transactions under subsection (1), the IESO shall comply with the regulations.

RIGHT OF RECOVERY [CREATION OF REGULATORY ASSET]

[Note re the following provisions:
I found a provision dealing with the concept of "regulatory asset" in Bill 210 from 2002 (see s. 79.13 of the OEBA). It deems certain things to be regulatory assets but does not say much more. On the phone, you noted that the term "regulatory asset" does not have any legal meaning on its own but is just an accounting term that has been used to describe the statutorily created right of recovery. However, you also said that there may be a need to use this term in order to convey the intended meaning from an accounting perspective.

Confidential Draft

In order to ensure that the drafting captures the policy intent, please answer/address the following questions:

1. Should we be creating a statutory right of recovery or deeming certain amounts to be a regulatory asset? [NTD-LSB: Yes. The term "Regulatory Asset" has currency in commercial law (parliance) and since much of what we're doing is to support a securitization model, the term should remain for now. Further, the term "regulatory asset" was consistently referred to in the documents provided to ENERGY LSB by Blakes. Further, IESO/Stikemans offered up alternative language for the creation of a "regulatory asset" (as an intangible asset of sorts). You said you'd consult on whether the regulatory asset terminology is important to flag in the Bill.

2. You said you're not sure whether or not the Act will require the IESO to sell/assign the right. Please instruct. If it is optional for the IESO to sell/assign, then it seems that the right could in theory remain with the IESO (unless you are saying that the statute can just create the right of the FE to recover without any need for the right to be assigned/sold by the IESO… in which case please explain why we need to deal with the sale/assignment at all). Please clarify.

3. I'm assuming that if we are creating a right, then the right must be held by someone (e.g. the IESO) before it can be assigned/sold? So should the right be created in the Act for the IESO (e.g. the IESO has a right to recover the amounts from distributors and prescribed consumers) since the IESO would then sell/assign/transfer the right to the FE? The FE must also have the right to recover from the IESO itself, so that creates an extra complication.

4. Should there be some indication of when the right of recovery/regulatory assets will no longer continue to exist (e.g. once all of the amounts have been paid?). I notice that your instructions below about the debt indicate that the debt is no longer owing once the amounts are paid, but do we need to indicate that the regulatory asset also ceases to exist at that point?

Right of recovery created

A7. A right to recover the following amounts in full from the IESO, distributors and prescribed consumers is created.

1. The [deferred amount].

2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.

[Note: How will the Board be approving these costs? Is this related to the expenditure report submitted to the Board? That provision dealing with Board expenditures doesn't refer to any approval taking place… just a review and recommendations.]

Confidential Draft

[Note: Need to mention expenditures?]

3. Other amounts as may be prescribed or as may be approved by the Board.

Note: Are you going to be saying anything about how the interest will be calculated?

Sale [and/or?] assignment of [right? Regulatory assets?]

A8. (1) The IESO [may? Shall?], in accordance with the regulations, sell [and/or?] convey to the Financing Entity the right to recovery created established under section A7 on such terms and conditions as are provided for by the Financing Entity.

[Note: Your instructions include the terms "sell", "assign" and "convey" -- which are correct?]

[Note: Your instructions suggested that something other than the "regulatory assets" may need to be assigned to the FE. Are you referring to the "warehousing" liabilities assumed by the IESO in the early days? What else would need to be assigned? Could these items be listed above in A7 or is there a reason why they need to be kept separate?]

Sale deemed final

(2) The sale and conveyance referred to in subsection (1) is deemed to be final for all purposes.

[Note: What is this intended to achieve? Is this based on precedent language that has been interpreted to have the desired effect?]

Debts

(3) For greater certainty, the [amounts to which the FE has a right of recovery] are debts owing by the IESO, distributors and prescribed consumers to the Financial Entity until the amounts have been fully paid and fully discharged.

[Note: Why is subs. (3) necessary? Isn't it inherent in the sale of the regulatory assets that the FE would have acquired the future right to collect these amounts? Perhaps it is unclear that the amount can be collected from not just the IESO but from others down the chain. But isn't that what the "right of recovery" section above is meant to cover?]

[Note: I haven't checked to see how other similar provisions dealing with debts are drafted. Not sure we need the "for greater certainty" and also not sure what the distinction is between "fully paid" and "fully discharged". This provision will need further consideration. You also noted that you may want to specify who determines when all obligations have been satisfied.]

IESO to recover amounts

A9. The IESO shall recover the amounts set out in section A7 from distributors and prescribed consumers, in accordance with […]:

Note: how are the requirements that would determine recovery for this subsection meant to interact with the GAM reg?

Confidential Draft

[Note: The following two subsections are placeholders. You noted that *the provision is going to have to evolve to deal with consumers who exit the grid (disconnect) completely either because they leave the province or they decide to generate their own electricity and completely disconnect. You also want to be able to prescribe* methods of ensuring that the amounts required cannot be "by-passed". I'll need to understand what is meant by "by-passed".]

Distributors liable

(x) The IESO and distributors are entitled to compensation for any shortfall in relation to the amounts the IESO must pay to generators, the Financial Corporation or other persons including prescribed persons, under section 25.33 resulting from the IESO's activities under the hydro financing initiative.

Consumers liable

(X) Prescribed consumers are required to contribute towards the amount of any compensation referred to in subsection (4) in accordance with the amounts and methods prescribed by the regulations and such amounts shall not be by-passed.

USE OF FUNDS TO REDUCE ELECTRICITY BILLS

[Note: Depending on how things land with s. 25.33, this might be a place to explain how the transactions between the IESO and the FE translate into reduction in the electricity bills of RPP consumers. Regulations could specify how the IESO would ensure that the short-term rate reductions that flow from the FE amounts are only received by the targeted class of consumers and that this same class of consumers is the only class responsible for the repayment of FE funds in the long-term.]

ALTERNATIVE LANGUAGE – REGULATORY ASSET -- PROPOSED BY IESO (STIKEMANS)

Regulatory Asset Created

A7. (1) There is hereby created and conferred upon the IESO a "Regulatory Asset" consisting of the right to recover, in addition to the amounts otherwise recoverable, in accordance with the Regulations, the aggregate of the following amounts [from distributors and] prescribed consumers. **[Quare: do we regard the Regulatory Asset as a single asset in a variable amount or as different assets arising on each deferral]:**

1. The [deferred amount, including interest accrued thereon].
2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.
3. Other amounts as may be prescribed or as may be approved by the Board.

Confidential Draft

(2) The Regulatory Asset created by (1), shall constitute, for all purposes, a property right, shall be transferable by the IESO in accordance with Section A8, and shall constitute an intangible in which a security interest can be created for purposes of the *Personal Property Security Act*.

Election to Transfer Regulatory Asset

A8. (1) The IESO shall, from time to time, in accordance with the Regulations, elect to transfer to the Financing Entity all or any portion of the Regulatory Asset, on such terms and conditions as IESO may determine.

(2) Upon any election by the IESO pursuant to (1), the Financing Entity shall pay to the IESO in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, an amount, not less than the Deferred Amount, determined in accordance with the Regulations.

(3) Upon any election by the IESO pursuant to (1), the Financing Entity shall become the person entitled to the benefit of the Regulatory Asset, or the portion thereof in respect of which the election was made, free and clear of any adverse claim (other than any such claim created by the Financing Entity) and shall be entitled to exercise all of the rights and remedies conferred by or arising in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the IESO shall cease to have any rights (except as provided in Section A9) to or in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, all as if the Regulatory Asset, or the portion thereof in respect of which the election was made, had originally been conferred upon the Financing Entity and not the IESO.

(4) Upon any election by the IESO pursuant to (1), the IESO shall have no further rights or obligations in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the Regulatory Asset, or the portion thereof in respect of which the election was made, shall not form part of the assets and liabilities of IESO for any purpose.

(5) The LG in Council may adopt regulations providing for the circumstances in which IESO shall make the election or elections provided for in (1).

Financing Entity may Grant Security Interest

A9. (1) The Financing Entity may, at any time after an election referred to in Section A8(1), create a security interest in favour of any person in all or any portion of the Regulatory Asset subject to such election, all on such terms and conditions as the Financing Entity may determine.

(2) Except as provided for in Regulations adopted pursuant to (3), *The Personal Property Security Act* shall apply to any security interest created pursuant to (1), except that the rights of the secured party on default shall be limited to receiving the amounts collected in respect of the Regulatory Asset, or the portion thereof subject to the security interest, as and when collected by the IESO in accordance with A10.

Confidential Draft

(3) The LG in Council may adopt regulations providing for the terms on which the security interest provided for in (1) can be created and perfected and for the priority of any such security interest.

IESO to Collect Amounts in Respect of the Regulatory Asset

A10. Subsequent to any election pursuant to Section A8, the IESO shall, as agent on behalf of the Financing Entity and any secured party, use reasonable efforts to collect the amounts owing in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and shall promptly pay over to the Financing Entity or the secured party the amounts collected.

--------*END OF IESO/BLAKES ALTERNATIVE LANGUAGE FOR REG. ASSET ---*

------- *BLAKES VERSION OF LANGUAGE FOR REGULATORY ASSET*

The Regulatory Asset, Composition,

A7(1) The "regulatory asset" consists of the following:

- **present and future statutory obligation of:**
  - **deferral consumers - to make all deferral repayments (including interest and late payment fees)**
  - **LDCs - to invoice the deferral consumers for the deferral repayments and to remit the amounts collected to the IESO**
  - **IESO - to receive and remit the deferral repayments from LDCs to the OPG Financing Entity**
- **All deferral repayment amounts collected**
- **All amounts in LDC or IESO deferral payment bank accounts**

Validity of Dispositions

(2) This section is reinforcing by statute the "sale" of the asset to the Financing Entity. This has been an important feature of the legislation in other jurisdictions in similar circumstances. Specifically, it says that "Dispositions" of the Regulatory Asset are "true sales", and not subject to challenge. This is an essential requirement for a securitization transaction. This provision identifies possible grounds for a challenge that a sale took place and indicates that those events do not affect the validity of the sale.

Deemed Perfection and Priority of Dispositions

Confidential Draft

(3) This is reinforcing the automatic nature of the "sale" of the asset. It Provides for a clean sale to the OPG Financing Entity, free and clear of encumbrances (i.e., no specific need to "perfect" the sale.

Validity of Pledges,
(4) Statutory override permitting the OPG Financing Entity to give a security interest in the "regulatory asset" to investors.

> **This would give the investors (through an indenture) the right to enforce collection of the deferral repayments to pay off amounts owed by the OPG Financing Entity to the investors upon certain defaults by the OPG Financing Entity under an indenture.**

Deemed Perfection and Priority of Pledges
(5) This is reinforcing that a commercial pledge given by OPG Financing Entity is valid and will have priority without specific "perfection". The result is that a pledge of the Regulatory Asset as security in accordance with the Treasury Plan will be given priority to other claims. The Pledge includes proceeds from the Regulatory Asset and is not affected by comingling or the ordinary requirement to file a financing statement under the PPSA.

Enforcement of Property Rights –

(6) The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5. ***[ntd-: NOT an annotation – pulled directly from Blakes' document.]***

Collective Action Required –
(7) This anticipates that the Regulatory Asset will be structured as a variable interest that can be divided between IESO (until it sells) and one or more OPG Financing Entitys. The likely format will be a co-ownership agreement, that will allow for different owners to have a fractional undivided ownership interest in the Regulatory Asset. Those will entitle the owners to a specified share of the cash flows, which will correspond to their finance payment obligations. This will allow for future financing flexibility.

MISCELLANEOUS

Fair Hydro Financing Plan, miscellaneous,

A.8 (1) Consideration will be given to whether any additional 'miscellaneous' provisions are needed (and expected by the market) to support the financing of this

Confidential Draft

structure. Some of these provisions are not typical in legislation, and so will need further consideration (in consultation with leg counsel).

Regulations

114(1.5) The LGIC may make regulations to implement the Fair Hydro Financing Initiative

-(a) The power to implement the program (and to set out some of the details of the program) through regulations is important. Decisions remain to be made (once the drafting is a little further advanced) about what provisions/details need to appear in the proposed legislation, and what provisions/details can be set out in regulations.

Confidential Draft

ONTARIO ENERGY BOARD ACT, 1998

x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [hydro financing initiative].

[Note: Would need to link with definition in the EA or else spell out the definition here - TBD.]

x. Section 27.1 of the Act would be amended by adding the following paragraph:

Hearings

(1.1) A directive may specify whether the Board is to hold a hearing, the circumstances under which a hearing may or may not be held and, if a hearing is to be held, the type of hearing to be held and the time within which it must be held.

The underlined is what makes this different from the other provisions in the Act that basically have the same wording. There are already a number of places in the Act where you have this type of hearings provision re directives (e.g., s. 27.2 (7)). If you basically want the same authority in each instance, then the wording should be consistent in each case. There are already some discrepancies between the current provisions (e.g., s. 27.2

(7) talks about types of hearings, whereas s. 28 (2) doesn't). Differences in wording will typically be presumed to be differences in meaning. So, the question is what you're intending to authorize in each case, and whether differences are intended. If you want the same thing everywhere, it should all be worded the same. Let me know.

[Note: Waiting for confirmation whether amendments to s. 78.7 are needed. Please advise.]

x. Section 78 of the Act would be amended by adding the following subsection after subsection (3.0.5):

Rates, fair hydro financing initiative activities -IESO, OPG, distributors, etc.
(3.0.6) The OEB would not be precluded from taking into account the performance of duties under this Part by any entity regulated by the OEB, including fees received by such entity in excess of the incremental costs of the provision of such services.

x. Section 79.16 (3) of the Act would be repealed and the following substituted:

Adjustment to eliminate variances

(3) In determining rates under clause (1) (b), the Board shall take into account balances in variance accounts established under section 25.33 of the *Electricity Act, 1998* and, subject to section X of that Act, make adjustments with a view to eliminating those balances within 12 months or such shorter time periods as the Minister may direct.
[Note: Please let me know what section the highlighted portion is supposed to refer to… is it the provision that says the IESO has the 30 year period to pay off the amount in the variance account for the hydro financing initiative? I wonder if this is confusing and whether the amendment to subs. (3) above works… it almost seems unnecessary to say that the Board has to "take into account" this balance, given that we are setting up a bunch of very specific rules about what has to be done by various entities in order to eliminate this amount. What would the Board be expected to do with information about this variance account? For consideration.]

PART VII.3

COMPLIANCE – FAIR HYDRO FINANCING INITIATIVE

Right of the [OEB] to Inspect Books and Records,
113 (1) OEB may be given the power to investigate compliance with the legislation and the power to examine books and records, etc.

Power to Investigate Compliance and Impose Regulatory Sanctions

Confidential Draft

(2) This legislation will not limit the OEB's power to investigate compliance or prevent or preclude the OEB's power to impose sanctions. The OEB can investigate compliance with this part and to impose regulatory sanctions for non-compliance.

Limitation, Board,

(2.1) The OEB cannot, however, take any action to affect the irrevocability of the Transition Charges or the Undertaking of the Province.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Confidential Draft

Memo Outline V1np_cv.pdf

(introduce policy rational, including role of OPG in debt markets and exercising discretion w.r.t. participation)

Introduction

Introduce policy rational -

Describe current state – cash expenditures recovered in current rates (current structure provides for a variance account that is settled within 12 months – so not immediate aka monthly but not long-term)

Describe the objective of the FEP – lower current cost to ratepayers by deferring the recovery of cash expenditures to future periods (for energy already consumed by ratepayers).

Commented [VC(1]: Let's use FHP – Fair Hydro Plan

Objective

Assess the impact of the FEP on the financial statements of the GRE.

Basis of Accounting

GRE – PSAS

OGOs – line-by-line consolidation – PSAS

GBEs – modified equity accounting – IFRS

Analysis (in general, IESO first, then standalone trust, then trust in GRE)

IESO is OGO (as at Dec/16), so impact on IESO will flow through to GRE (entity may change to GBE in future)

Describe role of IESO - market settlement mechanism

Describe initial impact of FEP on IESO – creates funding shortfall (for costs already incurred on energy already consumed by ratepayers)

IESO has concluded it can recognize the shortfall as a RRA (ref to GAAP hierarchy – relevance of US GAAP)

Describe general concept of RRA

IESO is an OGO – must follow PSAS in GRE

Discuss pros and cons of RRA recognition under PSAS

Show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

I think we should include in this section some commentary on the fact that the Province's statements are currently impacted by RRA – through OPG and H1 (and that IFRS14 implies ref to USGAAP). Using RRA in IESO is not introducing a new concept into the financial statements of the Province if the substance of the RRA in IESO is similar to the substance of the RRAs in the two GBEs. One question to consider is whether there is substance to using a different accounting treatment in a commercial entity vs. a non-commercial entity. If OPG took on the role of settling the market, should we get a different answer (e.g. could have structured in a different way)

Commented [NP2]: RRA doesn't require consideration of commercial vs. non-commercial but rather that a portion of the business be rate regulated (and RRA can be created through legislation despite the AG's position)

Discuss need for funding of shortfall and proposed plan (sale of right to trust)

IESO has concluded that details of transaction would support sale treatment.

Discuss pros and cons of sale treatment

Assuming sale treatment, show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

Impact of trust on GRE will depend on two things: (i) who controls the trust, and (ii) how transaction is reported in trust.

Assume, to start, that trust will apply IFRS (for province's CFS, OPG and H1 will be reflected on an IFRS basis, even though both entities will continue to report on a US GAAP basis)

OPG has concluded that trust will recognize intangible asset as a result of the purchase transaction.

Discuss pros and cons of sale treatment and recognition of intangible asset. – not sure what is going to be discussed here – what's the argument not to recognize an intangible asset in the stand-alone f/s of OPG?

Analysis of whether OPG taking on this role impacts is status as a GBE

Show JEs

OPG has concluded they control the trust (discretionary decision) and, therefore, will consolidate.

Commented [VC(3]: Nadine – not sure what you mean by discretionary?

As GBE, OPG is included in GRE using modified equity. Therefore, net assets of trust are included in GRE (investment in GBE).

Provide support for non-Provincial control of Trust and d~~D~~iscuss pros and cons of control (include consideration as to whether Province could control if OPG doesn't).

Discuss 3020 issue if IESO cannot recognize RRA

Show comparison of JEs under both scenarios (modified equity via OPG vs. direct consolidation by GRE + sub-topics of RRA vs. no RRA).

Consider:

- Reference to OEB?
- Definition of an asset (at provincial level, not to be funded through tax base; ref to FAO's comments on mis-match of revenues and expenses as would be the case if RR accounting wasn't accepted – IASB discussions ongoing and recognizing the merits of RRA; see also OPG/Tory's docs.)
- Reference to PSAS consolidation requirements (no requirement for independence and no elimination of assets/liabs of consolidated orgs upon consolidation just because province controls OEB)
- Impacts if OPG no longer controls the trust
- Impacts if regulatory charge is challenged as unconstitutional and the government legislates the charge as a tax
- What is the impact of 3rd party financing provided on the strength of the ability to collect from future ratepayers (assuming the guarantee is narrowing defined)?
- There are indemnities being provided by the province to IESO and OPG – how do these impact the analysis? (Impact on Provincial control of Trust and/or sale of assets by IESO?)
- The AG issued a statement on May 24 at the Committee Hearings -- should address those views. We should have Hansard of the Q&As by the end of the week as well, which we should consider.
- The FAO issued their report this week – not sure there is anything in that document that we need to address in this memo.
- What triggers would cause reassessment of the accounting.

Memo Outline V1.pdf

Introduction

Describe current state – cash expenditures recovered in current rates

Describe the objective of the FEP – lower current cost to ratepayers by deferring the recovery of cash expenditures to future periods.

Objective

Assess the impact of the FEP on the financial statements of the GRE.

Basis of Accounting

GRE – PSAS

OGOs – line-by-line consolidation – PSAS

GBEs – modified equity accounting – IFRS

Analysis (in general, IESO first, then standalone trust, then trust in GRE)

IESO is OGO, so impact on IESO will flow through to GRE

Describe role of IESO - market settlement mechanism

Describe initial impact of FEP on IESO – creates funding shortfall

IESO has concluded it can recognize the shortfall as a RRA

Describe general concept of RRA

IESO is an OGO – must follow PSAS in GRE

Discuss pros and cons of RRA recognition under PSAS

Show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

Discuss need for funding of shortfall and proposed plan (sale of right to trust)

IESO has concluded that details of transaction would support sale treatment.

Discuss pros and cons of sale treatment

Assuming sale treatment, show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

Impact of trust on GRE will depend on two things: (i) who controls the trust, and (ii) how transaction is reported in trust.

Assume, to start, that trust will apply IFRS

OPG has concluded that trust will recognize intangible asset as a result of the purchase transaction.

Discuss pros and cons of sale treatment and recognition of intangible asset.

Show JEs

OPG has concluded they control the trust and, therefore, will consolidate.

As GBE, OPG is included in GRE using modified equity. Therefore, net assets of trust are included in GRE (investment in GBE).

Discuss pros and cons of control (include consideration as to whether Province could control if OPG doesn't).

Discuss 3020 issue if IESO cannot recognize RRA

Show comparison of JEs under both scenarios (modified equity via OPG vs. direct consolidation by GRE + sub-topics of RRA vs. no RRA).

Ontario Power Generation Inc.
700 University Avenue
Toronto, ON
M5G 1X6

Attention: Mr. Carlton Mathias, Law Division

Dear Mr. Mathias:

Re: The Legal Basis of OPG's Regulatory Deferral and Variance Accounts

You have asked us to consider the legal basis of Ontario Power Generation Inc.'s ("OPG's") regulatory deferral and variance accounts in order to assist you in determining whether they are recognizable as "assets" and "liabilities" for financial reporting purposes under International Financial Reporting Standards ("IFRS").

In considering this issue, you have asked us to consider whether deferral and variance account balances are recoverable in a hypothetical circumstance where OPG ceases operations and does not have any energy output from its prescribed facilities. You have also asked us to consider how OPG can be assured that the amounts representing OPG's approved deferral and variance account balances will actually be paid to OPG, as well as whether OPG's ability to collect these amounts is dependent upon the renewal of the licence of the Independent Electricity System Operator.

I. CONCLUSIONS

OPG's deferral and variance accounts are established either by regulation or by orders of the Ontario Energy Board (the "OEB") through the proper exercise of its jurisdiction as the administrative tribunal responsible for regulating the electricity industry in Ontario. The establishing of such an account pursuant to regulation or the granting of approval by the OEB to establish such an account confers upon OPG a right to record amounts in the account and to account for the amounts recorded on the basis that they have been prudently incurred. Courts have found that prudence is deemed to exist until such time as the OEB (in its discretion), at a later date, values or assesses the balance of that account and determines that the recorded balance is wholly recoverable or that certain of the recorded amounts have in fact not been prudently incurred and are not recoverable.

Given that OPG's recovery or payment of the amounts recorded in its deferral and variance accounts, and subsequently disposed of by the OEB, are part of the calculation of OPG's payment amounts under section 78.1 of the *Ontario Energy Board Act, 1998* (the "OEB Act"), OPG is entitled to have recorded amounts assessed and to recover those amounts pursuant to

the OEB's order. Correspondingly, the OEB, as a matter of law, is obligated to establish OPG's payment amounts in accordance with the rules prescribed by the regulations in accordance with the just and reasonable standard (as applicable). In doing so, the OEB must assess the balances in the previously established accounts for prudence and accuracy and issue a Decision and Order on their disposition.

For certain of OPG's deferral and variance accounts, the legal origins of which are found in Ontario Regulation 53/05 ("O. Reg. 53/05"), under the OEB Act, the OEB does not have jurisdiction over whether the account may be established. For at least two of these accounts, the OEB also does not have jurisdiction to undertake a prudence review to determine if any recorded amounts should be excluded.

Once the OEB has approved the balance of an account for recovery, with or without undertaking a prudence review (as applicable), the specific amount or balance that OPG will be allowed to recover will have been determined. The subsequent issuance by the OEB of a payment amounts order will establish the mechanism by which such specific approved amounts will be recovered and remitted to OPG.

Commented [OPCD1]: Amounts do not have to be billed in order to be reported as assets.

The OEB's review and approval of the balance in a deferral or variance account is a process for determining the quantum and timing for the payment to or from OPG in respect of that account, which will be reflected in a Decision and Order of the OEB. As indicated, OPG's legal right to record amounts in an account and to account for the amounts recorded on the basis that they have been prudently incurred, subject to the OEB in its discretion subsequently determining otherwise, is established through the authorization of the account by the OEB or pursuant to regulation. OPG's right to recover prudently incurred amounts therefore arises as and when such amounts are recorded in an approved account, in accordance with the parameters established by the OEB or by regulation for that account, subject to the OEB's subsequent prudence review to assess the value of the account.

In the circumstance where OPG ceases operations and does not have any energy output from its prescribed facilities, it is our opinion that the OEB would have the jurisdiction and the obligation to establish a rate or payment amount that would allow OPG to recover or obligate OPG to disburse prudent amounts recorded in a deferral or variance account. Such a rate or payment amount would not have to be based on dollars per unit of electricity output from the prescribed facilities. This is no different than under normal operating circumstances.

The OEB has broad jurisdiction in setting payment amounts for OPG and it would not be reasonable for the legislature to have given the OEB the legislative power to authorize the establishment of accounts without also giving the OEB the power to dispose of the amounts recorded in such accounts, including in circumstances where there is no future output. Moreover, to interpret the applicable legislation in a manner that only allows for payment amounts on a volumetric basis is in our view unreasonable because it would not be consistent with the rules of statutory interpretation.

Commented [OPCD2]: Not dependent on future consumption

Pursuant to Section 78.1 of the OEB Act, the IESO is required to make such payments to OPG in accordance with orders from the OEB. By statute, the IESO is established as a corporation, the business of which, by legislation, is to be carried out without the purpose of gain or profit. As such, all money it collects must be used for the purpose of fulfilling its obligations in respect of the IESO-administered market and the IESO-controlled grid. These purposes include the making of payments to OPG in accordance with orders of the OEB under Section 78.1. Moreover, by entering into participation agreements, the IESO and market participants such as OPG agree to be contractually bound by the Market Rules. To remain revenue neutral,

consistent with its not-for-profit status, under the Market Rules, if any market participant fails to make a payment, including in respect of amounts associated with OPG's deferral and variance accounts, then the IESO has various remedies available to ensure it can collect the funds it needs to make the payments it is required to make to OPG and other generators.

In the context of the legislative scheme governing Ontario's electricity system, the IESO's licence is not the only aspect that gives authority to or imposes obligations on the IESO. In fact, the IESO has various statutory obligations which exist independently of the IESO's licence and are not undertaken by the IESO as a condition of the licence. The IESO's obligation to pay the payment amounts to OPG as a prescribed generator under Subsections 78.1(1) and 78.1(2)(b) is a legal obligation that is independent of the IESO's licensing requirements. Likewise, the OEB has a statutory obligation under Section 78.1 of the OEB Act to set payment amounts in accordance with the applicable regulation and the just and reasonable standard (as applicable) and, although the recovery of the OEB-approved payment in accordance with its order is fulfilled by the IESO under Subsections 78.1(1) and 78.1(2)(b), the OEB's obligation to set such payment amounts is legally independent of the existence of the IESO's licence. If the licence ceases to exist, then the obligations of the IESO and the OEB under Section 78.1 would remain. For the OEB to fulfill its obligation to set payment amounts in accordance with the regulation and the just and reasonable standard, there is a need for there to be an effective mechanism in place that enables OPG to actually receive its payment amounts. Accordingly, the OEB would only be able to cancel or refuse to renew the IESO's licence (a) if it could find that doing so would be in the public interest, and (b) if it is able to meet its statutory obligations, including its obligations in respect of setting just and reasonable payment amounts that provide for a fair return to OPG. In making such a licensing decision, the OEB would also have to consider that the IESO's obligations under Section 78.1 exist independent of and are outside the scope of the licence from the OEB.

II. BACKGROUND

A. Regulatory Assets and International Financial Reporting Standards

The OEB sets the requirements that regulated utilities in Ontario must meet for *regulatory* accounting, reporting and filing purposes. The Canadian Accounting Standards Board and other standard-setting bodies set the accounting principles required for *financial* reporting. Regulated utilities have separate obligations to adhere to both regulatory accounting and financial accounting requirements. The Canadian Accounting Standards Board has required that Canadian Generally Accepted Accounting Principles ("CGAAP") for publicly accountable enterprises transition to IFRS. Although this transition is generally effective January 1, 2011, a one year deferral in implementation of IFRS is available to eligible rate-regulated enterprises. It is our understanding that OPG is eligible for and has elected to apply this one-year deferral.

The transition to IFRS has raised a variety of issues and concerns for the OEB and rate-regulated utilities in Ontario, as well as for economic regulators and utilities in other Canadian jurisdictions. One significant concern relates to the recognition of regulatory assets and liabilities. As will be described further below, regulatory assets and liabilities arise from positive or negative balances, respectively, in deferral or variance accounts.

It is our understanding that, under CGAAP for publicly accountable enterprises in effect prior to IFRS conversion, regulated entities are permitted to record regulatory assets and liabilities either pursuant to specific guidance issued by the Canadian Accounting Standards Board or as a result of their ability to refer to the specific guidance issued by the Financial Accounting Standards Board in the United States (e.g., Codification Topic 980, *Accounting for the Effects of*

Certain Types of Regulation, formerly Financial Accounting Standards No. 71). Under IFRS, there is no specific guidance related to accounting for the effects of rate regulation. As a result, we further understand that the recognition of regulatory assets and liabilities for financial reporting purposes continues to be the subject of discussion and debate among affected utilities, accounting firms and the International Accounting Standards Board ("IASB").

The application of the recognition criteria under IFRS to amounts that are currently being reported by OPG and other regulated utilities as regulatory assets and liabilities under CGAAP is a matter that is strictly for the consideration of accounting experts. However, it is against this background that the balance of this memorandum considers the legal rights and obligations of OPG to recover from or disburse to ratepayers the balances in its deferral and variance accounts under current conditions, as well as in circumstances where OPG ceases operations and does not have any energy output from its prescribed facilities.

III. LEGISLATIVE FRAMEWORK

A. Jurisdiction of the OEB

In Ontario, the OEB is established under the OEB Act as an administrative tribunal responsible for the regulation and supervision of the natural gas and electricity industries. The OEB derives its powers from the Ontario Legislature primarily under the OEB Act and the *Electricity Act, 1998* (the "Electricity Act"), including regulations thereunder, and is further governed by the *Statutory Powers Procedures Act* ("SPPA"). In addition to its legislative sources of power, jurisdiction for the OEB arises from the doctrine of jurisdiction by necessary implication, under which the powers conferred by an enabling statute are construed to include not only those powers that are expressly granted but also, by implication, all powers which are practically necessary for the accomplishment of the object intended to be secured by the statutory regime.[1]

B. Setting Rates and Payment Amounts

The OEB's jurisdiction to set rates or payment amounts arises from Section 36 of the OEB Act in respect of gas transmission, distribution and storage rates, from Section 78 of the OEB Act in respect of electricity transmission and distribution rates and, of particular relevance to OPG, from Section 78.1 of the OEB Act in respect of payment amounts for prescribed electricity generation. Section 78.1 states (emphasis added):

> **Payments to prescribed generator**
>
> **78.1** (1) The IESO shall make payments to a generator prescribed by the regulations, or to the OPA on behalf of a generator prescribed by the regulations, with respect to output that is generated by a unit at a generation facility prescribed by the regulations.
>
> **Payment amount**
>
> (2) Each payment referred to in subsection (1) shall be the amount determined,
>
> (a) in accordance with the regulations to the extent the payment relates to a period that is on or after the day this section comes into force and before the later of,

[1] David M. Brown, *Energy Regulation in Ontario*, Chapter. 2 "OEB Structure, Powers and Jurisdiction" at para 2:30:30; Ruth Sullivan, *Sullivan on the Construction of Statutes* (5th ed.), LexisNexis Canada Inc, 2008 at p. 184.

(i) the day prescribed for the purposes of this subsection, and

(ii) the effective date of the Board's first order in respect of the generator; and

(b) in accordance with the order of the Board then in effect to the extent the payment relates to a period that is on or after the later of,

(i) the day prescribed for the purposes of this subsection, and

(ii) the effective date of the Board's first order under this section in respect of the generator.

OPA may act as settlement agent

(3) The OPA may act as a settlement agent to settle amounts payable to a generator under this section.

Board orders

(4) The Board shall make an order under this section in accordance with the rules prescribed by the regulations and may include in the order conditions, classifications or practices, including rules respecting the calculation of the amount of the payment.

Fixing other prices

(5) The Board may fix such other payment amounts as it finds to be just and reasonable,

(a) on an application for an order under this section, if the Board is not satisfied that the amount applied for is just and reasonable; or

(b) at any other time, if the Board is not satisfied that the current payment amount is just and reasonable.

Burden of proof

(6) Subject to subsection (7), the burden of proof is on the applicant in an application made under this section.

Order

(7) If the Board on its own motion or at the request of the Minister commences a proceeding to determine whether an amount that the Board may approve or fix under this section is just and reasonable,

(a) the burden of establishing that the amount is just and reasonable is on the generator; and

(b) the Board shall make an order approving or fixing an amount that is just and reasonable.

Application

(8) Subsections (4), (5) and (7) apply only on and after the day prescribed by the regulations for the purposes of subsection (2).

For purposes of Subsection 78.1(1), Section 1 of O. Reg. 53/05 establishes that OPG is a "prescribed generator" and Section 2 of O. Reg. 53/05 establishes that the "prescribed generation facilities" are comprised of the five hydroelectric generating stations in OPG's Niagara Plant Group, the R. H. Saunders hydroelectric generating station, the Pickering 'A' and 'B' Nuclear Generating Stations and the Darlington Nuclear Generating Station.

Subsection 78.1(2)(b) requires that each such payment made to OPG by the IESO shall be in accordance with the order of the OEB then in effect. The OEB is required under Subsection 78.1(4) to make such orders in accordance with the rules prescribed by the regulations, most importantly O. Reg. 53/05, and, in discharging its responsibility, include in such orders conditions, classifications or practices, including in respect of the calculation of the payment amount. As part of this jurisdiction, the OEB has the ability to authorize variance and deferral accounts as part of the OEB's rate setting powers.

Under Subsection 78.1(5) the OEB may fix such other payment amounts (i.e. payment amounts other than those arising from Subsection 78.1(4)) as it finds to be just and reasonable in circumstances where either the payment amount applied for is not just and reasonable, or if it finds the current payment amount to be unjust and unreasonable. In either circumstance, where the OEB establishes such other payment amounts, these other payment amounts must be established in accordance with the just and reasonable standard. This is consistent with the setting of rates under Sections 36 and 78 of the OEB Act, where the OEB's determination of payment amounts is on the basis of the "just and reasonable" standard. The Supreme Court of Canada has described just and reasonable rates as "rates, which, under the circumstances, would be fair to the consumer on the one hand, and which, on the other hand, would secure to the company a fair return for the capital invested."[2] These two components of the just and reasonable standard - that rates be fair to the consumer and yield fair compensation to the utility and its owner - are also embodied in the OEB's objects regarding the regulation of electricity, namely through its objectives of protecting consumer interests and facilitating a financially viable electricity industry.[3]

Fair compensation to the utility is comprised of two elements: (1) the right to recover all prudently incurred costs, and (2) the right to a fair return on invested capital. With respect to prudently incurred costs, the Ontario Divisional Court has held that a utility has a right to recover its prudently incurred costs, as follows:

> Essentially, a utility is entitled to recover its prudently incurred costs . . . Expenditures are deemed to be prudent, in the absence of some evidence suggesting the contrary. However, costs that are found to be dishonestly incurred, or which are negligent or wasteful losses, are excluded from the legitimate operating costs of the utility in determining rates that may be charged. The examination of whether an expenditure was prudent must be based on the particular circumstances at the time the decision to incur those costs was made. That is so even if in hindsight it is obvious the decision was a bad one.[4]

---

[2] *Northwestern Utilities Ltd. v. Edmonton (City), Board of Public Utility Commissioners of Alberta*, [1929] 2 D.L.R. 4, [1929] S.C.R. 186 at p. 192-193.

[3] OEB Act, s. 1(1).

[4] *Enbridge Gas Distribution Inc. v. Ontario Energy Board* (2005), 75 O.R. (3d) 72 (Div. Ct.); rev'd on other grounds, (2006), 41 Admin L.R. (4th) 69.

It is clear that this presumption of prudence applies in circumstances where the OEB is carrying out an after-the-fact prudence review, such as would be the case for a review that is undertaken for the purpose of determining whether to allow recovery of amounts previously recorded in a deferral or variance account.[5]

With respect to the right to a fair return, the Supreme Court of Canada explains that "by a fair return (it) is meant that the company will be allowed as large a return on the capital invested in its enterprise (which will be net to the company) as it would receive if it were investing the same amount in other securities possessing an attractiveness, stability and certainty equal to that of the company's enterprise."[6] Allowing a utility to earn a fair return has been regarded as essential to the preservation of the financial integrity of a utility, which is of mutual concern to the utility and its customers.[7]

C. Variance and Deferral Accounts

Variance and deferral accounts are tools that the OEB uses to deal with uncertainty, including circumstances that are difficult to forecast and that may be beyond the control of the regulated utility. The use of these accounts protects the interests not only of utilities, but also the interests of ratepayers. Once the deferral or variance accounts are established, either by regulation or OEB order, the amounts recorded in the accounts must be assessed for prudence by the OEB (to the extent the OEB has jurisdiction to do so) and the resulting approved amounts must be paid to or by OPG as the amounts are a part of OPG's just and reasonable payment amounts, as explained above.

A "variance account" may be used to track underestimates or overestimates of specific costs or revenues so as to enable the amount of the variance to be disposed of, normally through higher or lower payment amounts established by the OEB in the future. For example, recognizing the uncertainties associated with fluctuating world uranium prices and with a view to protecting OPG and ratepayers, the OEB approved OPG's request in EB-2007-0905 to establish a variance account to capture the differences between forecast and actual nuclear fuel expenses. In this way, if OPG's actual fuel costs proved to be higher than its forecasted costs then OPG would be entitled in the future to receive the shortfall from ratepayers, provided that the shortfall was a result of prudent actions by OPG and has been accurately recorded in the account. Alternatively, if OPG's actual fuel costs proved to be lower than its forecasted costs, then OPG would have over-recovered and would be required by the OEB to disburse such amounts back to ratepayers, subject to the review for prudence and accuracy.

A "deferral account" may be used, for example, to track specific costs incurred by a utility with respect to a project or circumstance until a future date, after which the costs recorded in the account are subject to prudence review by the OEB before the utility will be allowed to begin recovering those costs from ratepayers. For example, O. Reg. 53/05 authorized OPG to establish a deferral account to record non-capital costs associated with a large nuclear project that involved the return-to-service of certain nuclear generating units. The regulation further

---

[5] Ontario Energy Board, *Decision With Reasons - Application by Ontario Power Generation Inc. for Payment Amounts for Prescribed Facilities for 2011 and 2012 (EB-2010-0008)*, March 10, 2011 at p. 19.

[6] *Supra* note 2 at p. 193.

[7] *Union Gas Ltd. v. Ontario (Energy Board)* (1983), 1 D.L.R. (4th) 698 (Ont. Div. Ct.) at p. 711, as cited in Brown, *supra* note 6 at 2:40:10.

required that the OEB ensure OPG recover the balance in the account over a certain period of time, which the OEB determined in EB-2007-0905.

The nature of the rights that arise from the authorization of a deferral or variance account by the OEB or under O. Reg. 53/05 are discussed in the analysis section, below. For accounts that have already been authorized, as part of the OEB's rate-setting function and its powers with respect to variance and deferral accounts, the OEB will periodically[8] review a utility's variance and deferral accounts to ensure that the balances reflect amounts that are prudent and have been accurately recorded. Based on such review, the OEB makes a determination as to how much of the recorded balance the utility will recover (or repay) and the period over which such amount shall be recovered (or repaid). This determination will be made by way of a Decision from the OEB. In the normal course (i.e. where the accounts are reviewed in the context of a rate or payment amount application), the utility will then be required to file a draft payment amounts order or draft rate order, which is reviewed by the OEB. Once the final payment amounts order or rate order is approved by the OEB, the IESO will be required to implement the order by paying OPG in accordance with the order.

Where the balance recorded in a variance or deferral account is in a debit position and the OEB has accepted that balance as reflecting costs prudently incurred and accurately recorded, this will be referred to as a "regulatory asset" and will represent the specific amount that the utility will have a right to recover in such manner as is ordered by the OEB. Similarly, where the balance recorded in a variance or deferral account is in a credit position and the OEB has accepted that balance as reflecting costs prudently incurred and accurately recorded, this will be referred to as a "regulatory liability" and will represent the specific amount that the utility will have an obligation to disburse in such manner as is ordered by the OEB.

For the analysis in Section IV below, it is important to set out in some detail the legal origins of OPG's variance and deferral accounts.

Transitional Accounts

Under O. Reg. 53/05, OPG was required to establish five variance accounts and three deferral accounts in the years prior to OPG's first application to the OEB for determination of payment amounts under Section 78.1 of the OEB Act (the "Transitional Accounts"). OPG recorded amounts in the Transitional Accounts *up to* the effective date of the OEB's first payment amounts order, which was April 1, 2008. The OEB considered the balances accrued in the Transitional Accounts during the course of hearing OPG's first application under Section 78.1 (EB-2007-0905) and determined the amount for each account, recorded up to December 31, 2007, that OPG would be able to recover or would be obligated to repay.[9] The OEB allowed recovery or obligated repayment of these amounts over periods of approximately two, three or four years, depending on the account.

---

[8] While normally this will be in the context of a rate or payment amount application, OPG could apply to have the OEB undertake such a review at any time through a separate proceeding. Similarly, the OEB has the right to undertake such a review at any time on its own motion. See s. 78.1(5) of the *OEB Act*.

[9] Amounts recorded in the Transitional Accounts between January 1, 2007 and March 31, 2008 were considered in EB-2010-0008.

Mandated Continuing Accounts

Under O. Reg. 53/05, OPG was also required to establish one variance account and two deferral accounts which were to be substantially the same as three of the Transition Accounts, but which were for purposes of capturing certain costs incurred *on and after* the effective date of the OEB's first order under Section 78.1 (the "Mandated Continuing Accounts"). OPG continues to be required under O. Reg. 53/05 to keep and track amounts in each of these Mandated Continuing Accounts. The Mandated Continuing Accounts are:

- Section 5(4) - Pickering 'A' Return to Service Deferral Account
- Section 5.2 - Nuclear Liability Deferral Account
- Section 5.4 - Nuclear Development Variance Account

Board Ordered Continuing Accounts

In addition to the Mandated Continuing Accounts, in EB-2007-0905 OPG requested that the OEB authorize the continuation on and after the effective date of the OEB's first order under Section 78.1 of three variance accounts that had been required under O. Reg. 53/05, but for which the regulation did not mandate their continuation beyond the effective date of the OEB's first order (the "Board Ordered Continuing Accounts"). The Board accepted OPG's proposal for the Board Ordered Continuing Accounts, which are:

- Hydroelectric Water Conditions Variance Account
- Ancillary Services Net Revenue Variance Account
- Capacity Refurbishment Variance Account[10]

Board Ordered Accounts

Although not expressly mandated by O. Reg. 53/05, the Board determined in its Decision in EB-2007-0905 that it was necessary to give effect to certain provisions of O. Reg. 53/05 that continue to apply on and after the effective date of the OEB's first order. As a result, the OEB authorized OPG to establish the:

- Bruce Lease Net Revenues Variance Account

Another category of accounts arising from the Board's first order under Section 78.1 are new accounts that had not been required at any time under O. Reg. 53/05, but which OPG requested and the OEB approved of in its Decision in EB-2007-0905 (the "Board Ordered Accounts"). In addition to the account above, included in this category are the following variance accounts also approved by the Board:

- Nuclear Fuel Cost Variance Account

[10] Though not expressly required under O. Reg 53/05, the Board found that the Capacity Refurbishment Variance Account is implicitly required due to the obligation in s. 6(2)4 of the regulation. See *Infra* note 13 at pp. 122-123.

- Income and Other Taxes Variance Account
- Hydroelectric Interim Period Shortfall Variance Account
- Nuclear Interim Period Shortfall Variance Account

During a related proceeding (EB-2009-0038) arising from EB-2007-0905, the Board also approved the following:

- Tax Loss Variance Account

In EB-2009-0174, a proceeding dealing with the manner of calculating entries into the deferral and variance accounts after December 31, 2009 until the effective date of the next payment amounts order for OPG, the OEB also established two additional accounts:

- Hydroelectric Deferral and Variance Over/Under Recovery Variance Account
- Nuclear Deferral and Variance Over/Under Recovery Variance Account

In EB-2010-0008, OPG applied for new payment amounts for the 2011 to 2012 period. In its Decision with Reasons dated March 10, 2011, the OEB approved the continuation of existing hydroelectric accounts, nuclear accounts and accounts common to both the regulated hydroelectric and nuclear businesses as proposed by OPG, as well as two new hydroelectric accounts.[11] OPG's accounts for 2011 and 2012 are therefore as follows:

- Existing Common Accounts:
  - Ancillary Services Net Revenue Variance Account
  - Income and Other Taxes Variance Account
  - Tax Loss Variance Account
- Existing Hydroelectric Accounts:
  - Hydroelectric Water Conditions Variance Account
  - Hydroelectric Deferral and Variance Over/Under Recovery Variance Account
- Existing Nuclear Accounts:
  - Nuclear Liability Deferral Account (Section 5.2)
  - Nuclear Development Variance Account (Section 5.4)

[11] *Supra* Note 5 at pp. 128-142. On March 30, 2011 OPG filed a Notice of Motion to review and vary the Decision and Order, in which OPG requested the establishment of a Pension and Other Post Employment Benefits Cost Variance Account. The Motion proceeding is in progress.

- Capacity Refurbishment Variance Account
- Nuclear Fuel Cost Variance Account
- Bruce Lease Net Revenues Variance Account
- Nuclear Deferral and Variance Over/Under Recovery Variance Account

- Existing Accounts to be Continued for Recording of Amortization and Interest Amounts Only and to be Closed Upon Balances Being Recovered:
  - Hydroelectric Interim Period Shortfall Variance Account
  - Pickering 'A' Return to Service Deferral Account (Section 5(4))
  - Transmission Outages and Restrictions Variance Account
  - Nuclear Interim Period Shortfall Variance Account
- New Hydroelectric Accounts:
  - Surplus Baseload Generation (Hydroelectric)
  - Hydroelectric Incentive Mechanism

IV. ANALYSIS

A. Legal Basis for OPG's Regulatory Deferral and Variance Accounts

The legal basis for OPG's regulatory deferral and variance accounts must be considered in the context of the regulatory cycle that OPG is subject to as a rate-regulated utility, as described below.

As with other rate-regulated entities, OPG may apply to the OEB or the OEB may require OPG to apply for new payment amounts from time to time. The OEB then holds an adversarial hearing to consider the application, during which the application is subject to rigorous review and scrutiny by OEB staff members, intervening parties and the OEB panel itself. After considering the evidence and arguments presented, the OEB panel issues a Decision setting out the panel's findings with respect to each of the aspects of the application, including the various requests for cost recovery that normally comprise such an application. The Decision will also set out the OEB panel's determinations with respect to any proposed new deferral or variance accounts, the continuation of existing accounts, and the specific amounts that may be recovered with respect to the balances previously recorded in the existing accounts.

With respect to any new deferral or variance accounts that an applicant *proposes* to establish, the panel of the OEB will make a determination as to whether the applicant shall be permitted to establish such accounts and record amounts in that account. Based on OEB practice, this will generally depend upon whether the OEB is persuaded that the proposed account satisfies the criteria of causation, materiality, management inability to control and prudence. In this context, "causation" refers to the requirement that the amounts to be recorded in the proposed account must be outside of the basis upon which rates will derived for the applicable period;

"materiality" refers to the requirement that the amounts expected to be recorded in the proposed account will significantly influence the operation of the regulated business; "management inability to control" refers to the requirement that there be uncertainty associated with the amounts that are expected to be recorded in the account and, due to this uncertainty such amounts are not easily predictable and not easily controlled by the utility's management; and "prudence" refers to the need for the amounts recorded to have been prudently incurred.

If approval to establish a new account is granted by the OEB, then the utility will be obligated to accurately record relevant amounts in the account for the applicable period with the presumption that the balance of the account is accurately recorded and prudently incurred, such that it will be recoverable, subject to review by the Board for the purpose of verifying the presumption. The OEB will then need to conduct a prudence review that will normally, but not necessarily, take place in the course of reviewing a subsequent application for new payment amounts or rates by the utility.

With respect to each *existing* deferral and variance account, the panel will make findings as to whether the amounts recorded in the account have been accurately recorded and whether they are prudent. Based on these findings, the panel will determine how much the utility will recover from or return to ratepayers in respect of each account. The amounts recoverable from deferral and variance accounts may be recovered through one or more separate rate riders or through such other means as the Board approves. The rate mechanism for recovery of amounts from ratepayers or for repayment of amounts to ratepayers, as set out by the OEB, does not alter or limit OPG's right to receive or obligation to disburse prudent and accurately recorded amounts in the accounts.

The prudence review would apply the established regulatory principles referred to earlier, namely, that:

- Amounts will be deemed to be prudent in the absence of reasonable grounds to suggest the contrary;
- Costs that are found to have been dishonestly incurred, or which are negligent or wasteful losses, may be excluded from recovery; and
- The examination of prudence must be carried out without the benefit of hindsight (i.e. based on the particular circumstances at the time the decision to incur those costs was made).

1. Deferral and Variance Account Balances Pending OEB Review

OPG's legal rights in respect of its deferral and variance accounts must be considered in respect of the forgoing.

The circumstance of OPG having account balances pending OEB review arises where pursuant to an Order in a prior proceeding before the OEB, or under O. Reg. 53/05, OPG has been authorized to establish and record amounts in a deferral or variance account, either for a particular period or until such time as the OEB orders otherwise, but the period has not expired or there has not been a subsequent OEB order. While OPG will have recorded amounts in the account during that period of time, the OEB will not yet have reviewed the balances in the accounts to determine if they reflect accurately recorded and prudent amounts. The critical issue in this scenario relates to the nature of the rights conferred on OPG by the granting of

approval to establish a deferral or variance account. Where the Board authorizes OPG to establish such an account or if the account is established by regulation, OPG will have acquired a right to record amounts in such an account. These amounts, when recorded, will reflect costs that have been incurred or revenue earned by OPG for the benefit of ratepayers.

Pursuant to established principles governing the Board's obligation to review the prudence of recorded expenditures prior to allowing for their recovery, as discussed above, the expenditures recorded in the account are deemed to have been prudently incurred in the absence of reasonable grounds to suggest the contrary. As such, in our view, the granting of approval to establish a deferral or variance account confers upon OPG a legal right to record amounts in the account and to account for the amounts recorded on the basis that they have been prudently incurred. Courts have found that prudence is deemed to exist until such time as the OEB (in its discretion) may, at a later date, value or assess the balance of that account and determine that the recorded balance is wholly recoverable or that certain of the recorded amounts have in fact not been prudently incurred and are not recoverable. This subsequent assessment of prudence by the Board will therefore only have the effect of confirming or altering the specific amount that shall be recovered or that must be repaid by OPG in respect of the account. The prudence review will not affect the right to record amounts or the recovery of prudently incurred amounts.

We note that any amounts recorded in approved deferral and variance accounts must ultimately be disposed of by the OEB, whether done pursuant to an application brought to the OEB or by the OEB on its own motion. This arises from the OEB's obligation to set just and reasonable rates and payment amounts.[12]

While the focus of discussion in this section has thus far been on the rights associated with deferral and variance accounts that have been established through orders of the OEB, it is important to recognize the specific rights associated with each of OPG's accounts that arise by operation of O. Reg. 53/05.

The Mandated Continuing Accounts are clearly different from the rest of OPG's accounts because, rather than having been established on the basis of an order issued by the Board, OPG is required under O. Reg. 53/05 to have established and to maintain from the effective date of the OEB's first order under Section 78.1 of the OEB Act each of the three Mandated Continuing Accounts. OPG thereby acquired its rights resulting from the establishment of these accounts by way of regulation. As such, the OEB has no discretion with respect to the continuation of these accounts.

Moreover, for two of the Mandated Continuing Accounts, it appears that the OEB has no jurisdiction to undertake prudence reviews. These accounts - the Pickering 'A' Return to Service Deferral Account and the Nuclear Liability Deferral Account - are established on the same basis as accounts for which the OEB determined in EB-2007-0905 that it has no discretion to evaluate prudence.[13]

For the Pickering 'A' Return to Service Deferral Account, paragraph 6(2) 3 of O. Reg. 53/05 requires the OEB to ensure that OPG recovers the balance recorded in the deferral account established under subsection 5(4), which requires OPG to establish a deferral account that

---

[12] *Dow Chemical Canada Inc. v. Union Gas Ltd.* (1982), 141 D.L.R. (3d) 641 at pp. 658-9 (Ont. H.C.J.), affirmed 150 D.L.R. (3d) 267 (C.A.).

[13] Ontario Energy Board, *Decision With Reasons - Application by Ontario Power Generation Inc. for Payment Amounts for Prescribed Facilities (EB-2007-0905)*, November 3, 2008 at p. 9.

records certain costs associated with the planned return to service of all units at the Pickering 'A' Nuclear Generating Station. Subsection 5(4) gave rise to a Transitional Account, as well as a Mandated Continuing Account.[14] For the Nuclear Liability Deferral Account, paragraph 6(2)7 of O. Reg. 53/05 requires the OEB to ensure that OPG recovers the balances recorded in the deferral accounts established under subsections 5.1(1) and 5.2(1). These subsections each require OPG to establish a deferral account to record the revenue requirement impacts of changes in its nuclear decommissioning liability, however 5.1(1) applies to the period prior to the OEB's first order and is therefore a Transitional Account while 5.2(1) applies to the period following the OEB's first order and is therefore a Mandated Continuing Account.[15] Based on the OEB's findings in EB-2007-0905 that it had no discretion to evaluate prudence with respect to the Transitional Accounts under subsections 5(4) and 5.1(1), it appears that the Board would similarly have no discretion to evaluate prudence with respect to the Mandated Continuing Accounts established under subsections 5(4) and 5.2(1) of O. Reg. 53/05.

For the Capacity Refurbishment Variance Account, which is a Board Ordered Continuing Account, the OEB notes in its Decision in EB-2007-0905 that this account is required in light of the obligation imposed on the Board by paragraph 6(2)4 of O. Reg. 53/05.[16] Under 6(2)4, the Board is required to ensure that OPG recovers the amounts recorded in this account. If such amounts were within project budgets approved by OPG's Board of Directors prior to the Board's first order under Section 78.1 but where such costs were actually incurred and recorded in the account subsequent to the Board's first order, then it appears based on a reading of 6(2)4 that an argument could be made that the OEB would have no jurisdiction to evaluate prudence. However, if the amounts were not approved by OPG's Board of Directors prior to the first order of the Board, then this argument would not be available.

Finally, special consideration should be given to the Bruce Lease Net Revenues Variance Account. As noted earlier, this account was not expressly mandated by O. Reg. 53/05 but in its Decision the Board determined that it was necessary for OPG to establish this account in order to give effect to certain provisions of O. Reg. 53/05.[17] In particular, the Board directed OPG to establish this account in order to give effect to paragraphs 6(2)9 and 6(2)10 of the regulation. Paragraph 6(2)9 requires the OEB to ensure that OPG recovers all of the costs it incurs with respect to the Bruce Nuclear Generating Stations. Paragraph 6(2)10 provides that if OPG's revenues earned from the Bruce Nuclear Generating Stations exceed OPG's costs in respect of those stations, then the excess shall be applied to reduce OPG's revenue requirement for purposes of the payment amounts under Section 78.1(1) of the OEB Act. Based on its findings in EB-2007-0905, it seems that the Board will be obligated to require that OPG maintain this account for so long as it leases the Bruce Nuclear Generating Stations. In addition, based on paragraph 6(2)9, which does not expressly require the OEB to undertake a prudence review, it appears that an argument could be made that the OEB does not have jurisdiction to carry out a prudence review of costs recorded in this account.

In summary, OPG acquires rights, as described above, in connection with its deferral and variance accounts, either from O. Reg. 53/05 or from the granting of approval by the OEB to establish such accounts. For some of the accounts established under O. Reg. 53/05, it appears that the OEB has no discretion with respect to their continuation. Moreover, for certain of the

[14] Ibid at p. 122.

[15] Ibid.

[16] Ibid at p. 123.

[17] Ibid at p. 112.

accounts established under O. Reg. 53/05, as discussed, the OEB has no jurisdiction to evaluate the prudence of recorded amounts.

2. Deferral and Variance Account Balances Approved for Incorporation into Payment Amounts

In the scenario being considered here, OPG has in a prior proceeding or by way of O. Reg. 53/05 been authorized to establish a deferral or variance account. OPG has recorded amounts in the account over the applicable period and it has applied to the OEB, as part of a comprehensive application to determine new payment amounts for its regulated facilities or through a separate proceeding, to dispose of the balance of that account as of a particular date. The OEB has reviewed the balance of the account to ensure that it reflects amounts that are prudent and accurately recorded. Based on its review, the OEB has determined a specific amount as being the balance of the account and has also given approval for OPG to recover that amount over a particular period.

Further to the rights conferred upon OPG on being authorized to establish the account, as described in the previous section, in this scenario, as a result of the OEB having carried out the prudency review (where it has the jurisdiction to do so) and issued its Decision, the specific balance for the account that OPG will be allowed to recover will have been established. Based upon the law set out above, OPG will have a legal right to recover (or legal obligation to repay) that balance, pursuant to a payment amounts order issued by the OEB and the IESO will be required to recover the balance and remit it to OPG (or recover the balance from OPG and repay it to consumers) in accordance with the OEB's order.

B. Regulatory Assets in the Absence of Future Services

As noted, you have asked us to consider whether deferral and variance account balances are recoverable (or payable) in a circumstance where OPG ceases operations and does not have any energy output from its prescribed facilities. Our consideration of this issue is set out below.

It is our opinion based on the analysis below, that the OEB has both the obligation and the jurisdiction to establish a rate or payment amount that would allow OPG to recover prudently incurred and accurately recorded amounts recorded in a deferral or variance account notwithstanding that OPG produces no output. The OEB's obligations with respect to reviewing and disposing of the balances recorded in the accounts are not altered by the fact that there is no future output, as the amounts recorded in the accounts are part of the OEB's determination of "just and reasonable" rates or payment amounts.

A circumstance where there is no output would imply that the current volumetric rate through which OPG recovers costs (dollars per MWh produced) would not permit recovery of costs. As a result, an alternative rate formulation with a fixed charge or a volumetric rate recoverable from energy consumed, rather than produced, would have to be implemented to recover costs prudently incurred, including amounts recorded in variance and deferral accounts. Therefore, the question is whether the OEB can establish a rate or payment amount that is not based on dollars per output and would permit recovery of deferral or variance account balances.

As noted above, whether an expenditure is prudent must be based on the particular circumstances at the time the decision to incur the cost was made.[18] As deferral and variance

[18] *Supra* note 4.

account balances reflect costs previously incurred or revenues previously earned, it is reasonable to conclude that, based upon a set of facts, once these costs or revenues have been found to be prudent by the OEB, then they will remain prudent and recoverable irrespective of the lack of future output. Likewise, for amounts recorded in a deferral or variance account established by the OEB or under O. Reg. 53/05, but not yet assessed as to whether they are prudent, the amounts recorded are presumed at law to have resulted from prudent actions, unless shown to be otherwise. As discussed above, the Board has the obligation to establish just and reasonable rates, which includes the establishment of deferral and variance accounts and their subsequent disposition. If the Board has the power to direct the segregation of expenditures pending a rate application, it must by necessary implication have the power to direct the applicant to deal with the amounts so separated in a future rate application. Courts have found that:

> It cannot reasonably be presumed that the legislature intended to so truncate the Board's jurisdiction so as to allow it to accomplish only a partial result, with no power to finalize and complete a regulatory order. When legislation attempts to create a comprehensive regulatory framework, the tribunal must have the powers which by practical necessity and necessary implication flow from the regulatory authority explicitly conferred upon it.[19]

The OEB has both the jurisdiction and the obligation to establish a rate or payment amount that allows OPG to recover such prudently incurred amounts in the event that there is no output by OPG's prescribed facilities. The OEB also has jurisdiction to set payment amounts on a non-volumetric basis. Based on Subsections 78.1(4) and (5) of the OEB Act, as well as from section 6(1) of O. Reg. 53/05, the OEB has broad jurisdiction in the setting of payment amounts for OPG's regulated facilities, including the power to set payment amounts on a non-volumetric basis so long as such amounts are consistent with the just and reasonable standard. These provisions are as follows:

- Section 78.1(4) provides that "the Board shall make an order under this section in accordance with the rules prescribed by the regulations and may include in the order conditions, classifications or practices, including rules respecting the calculation of the amount of the payment. (emphasis added)

- Section 78.1(5) provides that "the Board may fix such other payment amounts as it finds to be just and reasonable, (a) on an application for an order under this section, if the Board is not satisfied that the amount applied for is just and reasonable; or (b) at any other time, if the Board is not satisfied that the current payment amount is just and reasonable. (emphasis added)

- Section 6(1) of O. Reg. 53/05 states that "Subject to subsection (2), the Board may establish the form, methodology, assumptions and calculations used in making an order that determines payment amounts for the purpose of section 78.1 of the Act." (emphasis added)

Therefore, based on the foregoing, the OEB's obligations are twofold. First, the legislature has imposed on the OEB an obligation - pursuant to section 78.1(4) - when making a payment amount order for OPG to follow the rules prescribed by the regulations. Second, the legislature has imposed on the OEB an obligation - pursuant to section 78.1(5)(a) - to set just and reasonable payment amounts in respect of amounts that do not arise from section 78.1(4). More specifically, under section 78.1(4), the OEB is required to make its payment amount order for

[19] *Supra* note 12.

OPG in accordance with the provisions set out in O. Reg. 53/05. To the extent that there are payment amounts associated with the prescribed facilities but which are outside the scope of O. Reg. 53/05, pursuant to section 78.1(5) the OEB is permitted to establish such other payments so long as those other payment amounts are found to be just and reasonable. The OEB will have the opportunity to establish such other just and reasonable payment amounts either on an application for an order under section 78.1 or at any other time on the OEB's own motion.

Various utilities in Ontario have from time to time levied OEB-approved fixed charges. The OEB has jurisdiction to establish a rate or payment amount permitting the recovery by OPG of a fixed charge if the charge is just and reasonable.

Under the legislative scheme the OEB has jurisdiction to establish the rate or payment amount pursuant to Section 78.1 of the OEB Act. The IESO has the obligation to pay that rate or payment amount to OPG and is subject to the OEB's authority to set the payment amount. Subsection 78.1(2) provides as follows:

> Each payment referred to in Subsection (1) shall be the amount determined, ...
>
> (b) In accordance with the order of the Board then in effect to the extent that payment relates to a period that is on or after the later of,
>
> (i) the date prescribed for the purposes of this subsection, and
>
> (ii) the effective date of the Board's first order under this section in respect of the generator." (emphasis added)

The reference to subsection (1) in Subsection 78.1(2) is in regard to the provision which states:

> The IESO shall make payments to a generator prescribed by the regulations... with respect to output that is generated by a unit at a generation facility prescribed by the regulations. (emphasis added)

We note that Subsection 78.1(1) makes reference to payments to a generator "with respect to output that is generated." However, this language does not imply that the rate or payment amount is to be limited to a volumetric payment on the basis of dollars per MWh produced.

The modern principle of statutory interpretation states that "the words of an act are to be read in their entire context, in their grammatical and ordinary sense harmoniously with the scheme of the act, the object of the act and the intention of parliament."[20] On this basis, in regard to the judicial interpretation of the words "with respect to" found in Subsection 78.1(1), these words have been interpreted to have a similar meaning as terms such as "in relation to", "with reference to" or "in connection with".[21] In *Markevich v. Canada*, Major J. of the Supreme Court of Canada wrote:

> The words "in respect of" have been held by this Court to be words of the broadest scope that convey some link between two subject matters. See *Nowegijick v. The Queen*, [1983] 1 S.C.R. 29, at p. 39, per Dickson J. (as he then was):

---

[20] Elmer A. Driedger, *The Construction of Statutes* (Toronto: Butterworths, 1974) , at p. 67, as cited in Sullivan, *Supra* note 1 at p. 1.

[21] *Skelly v. Assist Realty Ltd.*, (1991), 16 C.H.R.R. D/1 at D/6, 92 C.L.L.C. 17, 014 (B.C. Human Rights Council).

> The words "in respect of" are, in my opinion, words of the widest possible scope. They import such meanings as "in relation to", "with reference to" or "in connection with". The phrase "in respect of" is probably the widest of any expression intended to convey some connection between two related subject matters.[22]

As a result, a court would likely interpret Subsection 78.1(1) to mean that the IESO must make payments to OPG that have some connection with output that is generated by the units at OPG's regulated facilities. Payment amounts related to deferral and variance accounts recovered during periods where there are no outputs fit within this interpretation as those balances reflect or have some connection with past output from the prescribed facilities.

In addition, this interpretation is consistent with the presumption, in the interpretation of statutes, against internal conflict. Sullivan in her authoritative text states:

> The parts are presumed to fit together logically to form a rational, internally consistent framework; and because the framework has a purpose, the parts are also presumed to work together dynamically, each contributing something toward accomplishing the intended goal. This presumption is the basis for analyzing legislative schemes, which is often the most persuasive form of analysis. The presumption of coherence is also expressed as a presumption against internal conflict. It is presumed that the body of legislation enacted by a legislature does not contain contradictions or inconsistencies . . .[23]

It is internally consistent to interpret the legislative scheme of Section 78.1 as imposing upon the OEB the obligation to set rates or payment amounts in the manner described above, including the obligation to authorize the recovery of deferral and variance account balances, with full and broad powers to do so and imposing upon the IESO the responsibility for paying to OPG the payment amounts prescribed by the Board's order. In the circumstance where there is no output from the prescribed facilities, such a payment amount could reflect a fixed charge or some other form of charge not on a volumetric basis for the output of the prescribed facilities so as to allow for the recovery of OPG's deferral and variance account balances.

C. Recovery of Approved Balances

Once the OEB has approved recovery of an account balance, the specific amount OPG will be entitled to recover through payment amounts is approved by the OEB. As noted, the IESO's obligation to pay that rate or payment amount to OPG is subject to the OEB's authority to set the payment amount. In this context, you have asked us to consider how OPG can be assured that the IESO will actually collect and pay those amounts to OPG. In this regard, we will consider the legal requirement for the IESO to collect the amounts on behalf of OPG and whether the IESO has effective mechanisms in place to ensure its ability to collect those amounts in full.

1. Powers and Duties of the IESO

The IESO is established under Part II of the *Electricity Act, 1998* (the "*Electricity Act*") as a corporation without share capital.[24] The business and affairs of the IESO are required by

---

[22] [2003] S.C.J. No. 8, [2003] 1 S.C.R. 94 (S.C.C.).

[23] Sullivan, *Supra* note 1 at 223.

[24] *Electricity Act, 1998*, S.O. 1998, c. 15, Sched. A, Subsection 4(1).

legislation to be carried out without the purpose of gain and any profits must be used by the IESO for the purpose of carrying out its objects.[25] Among other things, the IESO's statutory objects include the exercise of the powers and the performance of the duties assigned to it under the *Electricity Act*, the Market Rules and it's licence.[26]

In accordance with its objects, under the *Electricity Act*, the IESO may make rules governing the IESO controlled-grid. Such rules may include provisions, among other things, authorizing and governing the making of orders by the IESO, including orders imposing financial penalties on electricity market participants, authorizing a person to participate in the IESO-administered market, or terminating, suspending or restricting a person's rights to participate in the IESO-administered markets.[27] The rules made by the IESO under Section 32 of the *Electricity Act* are the *Market Rules for the Ontario Electricity Market* or, more commonly, the "Market Rules".[28]

With respect to the IESO's obligations under Section 5(1) of the *Electricity Act* to exercise the powers and perform the duties assigned to it under it's licence, this refers to the licence that the IESO is required to obtain and hold from the OEB in order to operate the market established by the Market Rules.[29] The IESO's current system operator licence took effect on July 31, 2008 and is currently valid until July 30, 2013.[30] By issuing the licence, the OEB authorizes the IESO to direct the operation of the transmission system in accordance with the Market Rules, applicable agreements and subject to the conditions set out in the licence.[31] The licence also authorizes the IESO to operate the IESO-administered markets and to do such things as may be permitted by the Market Rules or required to be done by the IESO to further the establishment and operation of the market.[32] Under the licence, the IESO is required to comply with all applicable provisions of the Market Rules.[33]

Consistent with its status as a not-for-profit corporation, the IESO fulfills its statutory mandate by acting as a clearinghouse to settle the flows of money between persons that are authorized to participate in the IESO-administered electricity market. To understand the flows of money in the market, it is first helpful to understand at a very basic level the flow of electricity in the market. Put simply, electricity generators provide electricity to the IESO-controlled grid. This electricity generally flows from generating stations, along transmission lines operated by transmitters, and then either to loads, such as large industrial facilities, that are directly connected to the transmission system or to distribution systems operated by local distribution companies that deliver the electricity to residential customers, small businesses and other end-users.

With respect to the flow of money in the market, distributors are responsible for collecting payments from their customers based on quantities of electricity consumed, together with any

[32] *Ibid* at Section 3.2.

[33] *Ibid* at Section 7.1.

other charges that are required to be collected.[34] The IESO then receives these amounts from distributors, as well as amounts from directly connected loads. From these sources of incoming payments, the IESO is then required to ensure that distributors and transmitters receive the amounts that they are approved to receive pursuant to rates set by the OEB. The IESO must also ensure that generators are paid the amounts that they are entitled to be paid for the injection of electricity into the IESO-controlled grid.. This includes generators under contract with the OPA or Ontario Electricity Financial Corporation ("OEFC"), as well generators, namely OPG, whose payment amounts are established by order of the OEB pursuant to Section 78.1 of the OEB Act. Other than keeping the amounts that the IESO is permitted to keep in accordance with its own rate order from the OEB, which amounts cover the IESO's internal operating costs, the IESO is required to remain not-for-profit: all amounts that it receives from market participants must be paid out to such other market participants who have regulatory or contractual rights to receive payments from those collected amounts.

2. The Market Rules

The Market Rule requirements that apply to persons seeking authorization to participate in the Ontario electricity market are key to the IESO's ability to collect amounts and remit payment to OPG. In accordance with the Market Rules, no person shall participate in the IESO-administered markets unless that person has been authorized by the IESO to do so.[35] Moreover, no person shall be authorized by the IESO to be a market participant unless the IESO is satisfied:

- that the person agrees to be bound by the Market Rules by executing a participation agreement,[36]
- that the person will satisfy the prudential support requirements of Appendix 2.3 of the Market Rules and any other financial requirements set forth in the Market Rules applicable to all market participants,[37] and
- that the person holds a licence from the Ontario Energy Board permitting them to, among other things, own or operate a distribution system or a transmission system, or permitting them to generate electricity for sale through the IESO-administered market, to retail electricity, to purchase electricity through the IESO-administered market, or to sell electricity through the IESO-administered market.[38]

Once satisfied that the application for participation is complete, the IESO may authorize the applicant to participate in the IESO-administered market, but only if the applicant files an executed participation agreement in such form as established by the IESO.[39] Under the participation agreement, the IESO and the market participant agree, among other things, to be

---

[34] Distributor rights and powers with respect to collection are governed by the *Distribution System Code* and the *Retail Settlement Code*, discussion of which is beyond the scope of this letter.

[35] *Market Rules*, Chapter 2, Section 1.2.1.

[36] *Ibid* at Section 1.2.2.3.

[37] *Ibid* at Section 1.2.2.2.

[38] *Ibid* at Section 1.2.2.4.

[39] *Ibid* at Section 3.1.5.2.

bound by and to comply with the Market Rules.[40] The IESO's established form of participation agreement, which is published as part of the Market Rules, provides as follows:

> **Article 3 - Compliance with Market Rules**
>
> 3.1 **Applicant Compliance:** The Applicant hereby agrees to be bound by and to comply with all of the provisions of the market rules so far as they are applicable to the Applicant once it has been authorized by the IESO as a market participant.
>
> 3.2 **IESO Compliance:** The IESO hereby agrees to be bound by and to comply with all of the provisions of the market rules so far as they are applicable to the IESO.[41]

By virtue of Article 3, the Market Rules are effectively incorporated by reference into and therefore form part of the participation agreement. Indeed, as noted in the recitals set out in the participation agreement, "the market rules contemplate that the market rules will have the effect of a contract between each market participant and the IESO by virtue of the execution of a participation agreement."[42] As an authorized market participant, OPG has entered into a participation agreement with the IESO under which each party has agreed to be bound by and to comply with the Market Rules insofar as they are applicable to one another. Accordingly, by means of the participation agreement, the IESO is contractually obligated to pay OPG the amounts that OPG has a right to receive and, furthermore, to collect such amounts in accordance with the Market Rules in order to meet its payment obligations to OPG. Under this contractual relationship, in the event of non-payment, there would be remedies available to OPG pursuant to the dispute resolution mechanisms under the Market Rules, through the Ontario Energy Board and through the Courts.

In addition to making such authorization conditional on the filing of an executed participation agreement, the IESO's authorization is conditional upon the person satisfying the prudential support requirements set out in the Market Rules.[43]

Prudential support is financial security to cover financial obligations that a market participant might owe to the market in the event the market participant is unable to pay. Each market participant is required to meet its obligation under the Market Rules to provide and to maintain prudential support by providing to the IESO, and maintaining with the IESO, prudential support in an amount determined in accordance with the Market Rules.[44] The amount of prudential support that must be provided will reflect the market participant's maximum net exposure, less any allowable reductions, as calculated in accordance with Chapter 2 of the Market Rules.[45]

If a market participant does not make a payment in full when due, where such payment is required under the Market Rules, this will be an event of default under the Market Rules.[46]

---

[40] *Ibid*. See also Market Rules, Chapter 11 (Definitions), "participation agreement".

[41] IESO, *Participation Agreement*, Issue 14.0, June 2, 2010.

[42] *Ibid*. at Recital 'D'.

[43] *Market Rules*, Chapter 2, Section 1.2.2.2.

[44] *Ibid*. at Section 5.7.1.

[45] See Section 5.3 re calculation of maximum net exposure and Section 5.8 re allowable reductions.

[46] *Market Rules*, Chapter 3, Section 6.3.1.1.

Where such an event of default has been committed by a market participant, the IESO has the right to issue a notice of intent to suspend the market participant unless it remedies the default within the specified period and to immediately draw upon part or all of the market participant's prudential support for any amount owing to the IESO.[47] The market participant may remedy the event of default by satisfying any outstanding financial or other obligations giving rise to the event of default and by satisfying the IESO that the circumstances which constituted the event of default no longer exist.[48] If the market participant has not remedied the event of default within the applicable period or due to persistent breaches of the Market Rules, the IESO may issue a suspension order to the market participant, rendering them ineligible to trade or enter into any transactions in the IESO-administered markets or to cause or permit electricity to be conveyed into, through our out of the IESO-controlled grid.[49]

Where the IESO has issued a suspension order to a defaulting market participant, the IESO has the right to issue a notice of default levy and to take any steps that it has not already taken to realize any prudential support held in respect of that defaulting market participant.[50] The IESO then has the ability to impose one or more default levies on non-defaulting market participants.[51] This power to impose a default levy provides the IESO with the right to recover from all non-defaulting market participants any amounts owing to the IESO and that have not been paid in full by the defaulting market participant, along with any costs and expenses reasonably incurred by the IESO to investigate the default and to realize any prudential support and to implement the default levy.[52]

The IESO, therefore, does not assume any debt in the circumstances of a market participant defaulting on a payment. Rather, the IESO will first try to recover the full amount of the default, along with related costs and expenses, by realizing on the prudential support provided by the defaulting market participant. To the extent that there are any further amounts owing to the IESO, the IESO will then issue a default levy in order to recover such further amounts from all non-defaulting market participants. If the IESO is subsequently able to recover further amounts from the defaulting market participant, then such amounts will be allocated back to those non-defaulting market participants on whom the default levy was previously imposed.[53] In short, the Market Rules ensure that the IESO remains revenue neutral, while ensuring its ability to make all payments that it is required to make, including payments to generators such as OPG.

Also worth noting is Section 5.4 of the participation agreement, which establishes the ongoing liability of market participants as follows:

> 5.4 **Ongoing Liability:** Notwithstanding the provisions of section 5.2 or 5.3 above, if the Applicant becomes a terminated market participant or otherwise ceases to be a market participant, as the case may be, the Applicant shall remain subject to and liable for all of its obligations and liabilities as a market participant which were incurred or arose under the market rules prior to the date on which the termination order was issued or the date on

> which it otherwise ceased to be a market participant, as the case may be, regardless of the date on which any claim relating thereto may be made.

Pursuant to Section 78.1 of the OEB Act, the IESO is required to make such payments to OPG in accordance with orders from the OEB. By statute, the IESO is established as a corporation, the business of which, by legislation, is to be carried out without the purpose of gain or profit. As such, all money it collects must be used for the purpose of fulfilling its obligations in respect of the IESO-administered market and the IESO-controlled grid. These purposes include the making of payments to OPG in accordance with orders of the OEB under Section 78.1. Moreover, by entering into participation agreements, the IESO and market participants such as OPG agree to be contractually bound by the Market Rules. To remain revenue neutral, consistent with its not-for-profit status, under the Market Rules, if any market participant fails to make a payment, including in respect of amounts associated with OPG's deferral and variance accounts, then the IESO has various remedies available to ensure it can collect the funds it needs to make the payments it is required to make to OPG and other generators.

3. Significance of IESO's Licence

You have asked us to consider whether OPG's ability to collect amounts recorded in its deferral and variance accounts, pursuant to an order by the OEB under Section 78.1 of the OEB Act, is dependent upon the renewal of the IESO's licence. It is our conclusion that the IESO's obligation to pay the payment amounts to OPG as a prescribed generator under Subsections 78.1(1) and 78.1(2)(b) is a legal obligation that is independent of the IESO's licensing requirements.

As noted, the IESO currently holds an electricity system operator licence (EI-2008-0096), which took effect on July 31, 2008 and is valid until July 30, 2013. The OEB may extend the term of this licence pursuant to section 5.1 of the licence. For the five-year period prior to the effective date of its current licence, the IESO held a similar licence (EI-2003-0088) from the OEB. The requirement to hold such a licence arises from Section 57 of the OEB Act, which states, among other things, that "no . . . person shall, unless licensed to do so under this Part, . . . (g) direct the operation of transmission systems in Ontario; (or) (h) operate the market established by the market rules."[54]

By issuing the licence, the OEB licenses the IESO to:

> direct the operation of the transmission system(s) in accordance with Agreements and the Market Rules, subject to the conditions set out in this Licence (and)
>
> operate the IESO administered markets and to do such things as may be permitted by the Market Rules or required to be done by the Licensee in furtherance of the establishment and operation of the market(s) to be administered by the Licensee, subject to the conditions set out in this Licence.[55]

The licence also requires the IESO to comply with all applicable Market Rules.[56]

---

[54] *Ontario Energy Board Act*, Subsections 57(g) and (h).

[55] *Independent Electricity System Operator Licence* (EI-2008-0096), Section 3.

[56] *Ibid*. at Section 4.

It is important to place the IESO's licence in context. In the context of the legislative scheme governing Ontario's electricity system, the IESO's licence is not the only aspect that gives authority to or imposes obligations on the IESO. In fact, the IESO has various statutory obligations which exist independently of the IESO's licence and are not undertaken by the IESO as a condition of the licence.

As noted, Subsection 78.1(1) imposes on the IESO the obligation "to make payments to a generator prescribed by regulations" and Subsection 78.1(2)(b) requires that such payment be in accordance with the order of the OEB. These provisions are significant since, based upon the wording of these provisions: (1) the IESO's obligation to pay the prescribed generator, OPG, is not subject to the IESO's licences; and (2) the IESO's obligation to pay is subject to the OEB order, which must discharge the OEB's obligation to set payment amounts in accordance with the regulations and the just and reasonable standard (as applicable).

As noted above, the licence and the requirement to obtain a licence is limited in its scope to the direction of the operation of the transmission system and the operation of the market established by the market rules. Pursuant to the market rules, the IESO and market participants are bound to those market rules by way of a contractual arrangement, which is established by the participation agreement that is signed by the IESO and all market participants. The IESO's obligations under section 78.1(1) and section 78.1(2)(b) are not governed by the market rules or the contractual arrangement underlying the market rules. Therefore, one can reasonably conclude that the IESO's obligations under section 78.1(1) and section 78.1(2)(b) exist independent of the licence from the OEB. If the licence ceased to exist, the obligations of the IESO and those of the OEB under Section 78.1 would remain.

Similar to the obligation on the IESO under Section 78.1 of the OEB Act, the legislative scheme also establishes obligations for the IESO to make payments under Sections 78.2 to 78.5 of the OEB Act:

- Under 78.2, the IESO is required to make payments to the Ontario Electricity Financial Corporation (OEFC) with respect to electricity supply contracts that the OEFC has with generators.

- Under 78.3, the IESO is required to make payments to the OPA with respect to electricity output generated by units at facilities in respect of which the OPA has entered into procurement contracts.

- Under 78.4, the IESO is required to make payments to the OPA with respect to amounts payable to entities with whom the OPA has entered into procurement contracts for electricity generation capacity.

- Under 78.5, the IESO is required to make payments to distributors or the OPA with respect to amounts approved by the OEB for conservation and demand management programs.

In each of these circumstances, the obligation on the IESO is established by legislation and is independent of any obligations that might otherwise be imposed on the IESO under a licence issued by the OEB.

The IESO also has a number of rights, powers and obligations under Parts II.2 and III of the *Electricity Act* in respect of the electricity markets and the management of supply, capacity and demand. One such obligation, which is of particular significance, is the requirement under

Section 25.33 of the *Electricity Act* for the IESO, through its billing and settlement systems, to make adjustments in accordance with regulations to ensure that, over time, payments by classes of market participants in Ontario that are prescribed by regulation reflect amounts paid, in accordance with the regulations, to generators, distributors, the OPA and the OEFC, whether the amounts are determined under the Market Rules or under Sections 78.1 to 78.5 of the OEB Act. The adjustments that the IESO is required to make under this provision, which are further described in O. Reg. 429/04, are known as the "Global Adjustment".

The administration of the Global Adjustment is a critical function established by legislation as it results in the collection and payment of amounts which are based on the difference between the total of all market payments for electricity consumed in the province and the total of all rates and payment amounts to which generators under contract with the OPA and regulated generators are entitled. For OPG, the Global Adjustment ensures that the IESO determines, collects and then pays to OPG the differences between the market price for generation from its prescribed facilities and the regulated rates established by the OEB under Section 78.1 for the prescribed facilities. The IESO's obligation to perform the Global Adjustment is imposed by legislation and is detailed in the regulations thereunder. This obligation is legally independent of any obligations that might otherwise be imposed on the IESO under a licence issued by the OEB.

A decision by the OEB to renew or terminate the IESO licence must be considered within the limits of OEB's jurisdiction. The framework within which the OEB is empowered to make decisions was recently summarized by the Ontario Court of Appeal in *Toronto Hydro-Electric System Ltd. v. Ontario (Energy Board)*, as follows:

> The analysis must begin with the legislation that establishes the OEB and gives the OEB its powers. The OEB's objectives in respect of electricity are stated in s. 1 of the *Ontario Energy Board Act*, 1998, S.O. 1998, c. 15, Sch. B (the "Act"):
>
> > *Boards objectives, electricity*
> >
> > *1.(1) The Board, in carrying out its responsibilities under this or any other Act in relation to electricity, shall be guided by the following objectives:*
> >
> > *1. To protect the interests of customers with respect to prices and the adequacy, reliability and quality of electricity service.*
> >
> > *2. To promote economic efficiency and cost effectiveness in the generation, transmission, distribution, sale and demand management of electricity and to facilitate the maintenance of a financially viable electricity industry.*
>
> In short, the OEB is to balance the interests of ratepayers in terms of prices and service while at the same time ensuring a financially viable electricity industry that is both economically efficient and cost effective.[57] (emphasis added)

With respect to the circumstances where a decision of a tribunal, such as the OEB, will be found to be outside of its jurisdiction and therefore invalid, the court goes on to state:

---

[57] *Toronto Hydro-Electric System Ltd. v. Ontario (Energy Board)*, 99 O.R. (3d) 481, Ont. C.A., Apr. 20, 2010 (leave to appeal to SCC denied, Dec. 2, 2010) at paras 12 to 14.

> Courts should hesitate to analyze the decisions of specialized tribunals through the lens of jurisdiction unless it is clear that the tribunal exceeded its statutory powers by entering into an area of inquiry outside of what the legislature intended. If the decision of a specialized tribunal aims to achieve a valid statutory purpose, and the enabling statute includes a broad grant of open-ended power to achieve that purpose, the matter should be considered within the jurisdiction of the tribunal. ...In contrast, where a tribunal is pursuing an illegitimate objective, or is engaging in actions that clearly defy the limits of its statutory authority, then a reviewing court may properly declare its decisions to be *ultra vires* (i.e. beyond its power or authority).[58] (emphasis added)

Based on the foregoing, it is clear that the OEB is required to make decisions, including licensing decisions, in accordance with its mandate to protect the public interest as set out in Section 1(1) of the OEB Act. Statutory objectives imposed on a tribunal, such as those listed in Section 1(1) of the OEB Act, limit the extent of the tribunal's discretion in making decisions, as delegated by the Legislature, and the tribunal has no power to make a decision outside of the limits of the discretion granted to it.[59] Any attempt to do so will, upon review by a court, be deemed *ultra vires* and declared invalid.[60] The OEB's public interest mandate includes the need to protect the interests of ratepayers, as well as to ensure the maintenance of a financially viable electricity industry. To the extent that the OEB makes a decision that is inconsistent with these statutorily mandated objectives, a reviewing court would, therefore, be likely to declare such decision to be invalid on the basis that the OEB acted outside of its jurisdiction in making the decision. The OEB cannot arbitrarily decide to cancel the IESO's licence or to not renew the IESO's licence. Rather, the OEB must make licensing decisions in accordance with its public interest mandate.[61]

In exercising its licensing powers, the OEB's discretion is constrained by the need to fulfill its statutory public interest mandate in conjunction with its obligation to set just and reasonable rates and payment amounts. Under Section 78.1, the OEB is obligated to make payment amount orders in accordance with the regulation and in accordance with the just and reasonable standard (as applicable) in connection with OPG's prescribed facilities. The obligations are not conditional upon the OEB issuing or renewing the IESO's licence. Although the obligation under Subsections 78.1(1) and 78.1(2)(b) is legally independent from the IESO's licence, if the licence is terminated or not renewed, then the obligation under Subsections 78.1(1) and 78.1(2)(b) would continue. However, from a practical perspective, without a valid licence the IESO would not be in a position to carry out the settlement function for the market under the market rules by flowing funds between customers or end-users and generators. Since the underlying obligations in Section 78.1 (and other statutory provisions set out above) are not eliminated as a consequence of licence termination, this appears to be an impractical result.

The OEB has an obligation to act and make decisions in accordance with its public interest mandate, which includes an obligation to establish just and reasonable payment amounts for OPG under Section 78.1. As discussed earlier in this letter, the Supreme Court of Canada has described just and reasonable rates as "rates, which, under the circumstances, would be fair to the consumer on the one hand, and which, on the other hand, would secure to the company a fair return for the capital invested."[62] Fair compensation to a utility is comprised of the right to recover all prudently incurred costs, and the right to a fair return on invested capital. As noted,

---

[58] *Ibid*. at para 24 (parenthesis and emphasis added).

[59] See D. Jones and A. de Villars, *Principles of Administrative Law* (5th ed.), Carswell, 2009 at p. 93-94.

[60] *Ibid*. at 94.

[61] *Toronto Hydro-Electric System Ltd. v. Ontario (Energy Board), Supra* note 58.

[62] *Supra* note 2.

allowing a utility to earn a fair return has been regarded by the courts as being essential to the preservation of the financial integrity of a utility, which is of mutual concern to the utility and its customers.[63] Accordingly, in the context of its public interest mandate, which includes the objective of facilitating the maintenance of a financially viable electricity industry and establishing just and reasonable rates and payment amounts, it is necessary for there to be an effective mechanism in place that enables OPG to actually receive its payment amounts pursuant to orders of the OEB under Section 78.1.

It would be incumbent on the OEB to consider these significant implications in the course of exercising its licensing authority in accordance with the public interest and its purposes and objects under Section 1 of the OEB Act. A decision to the contrary would be beyond its jurisdiction and could be rendered null and void by a reviewing court.[64]

Accordingly, the OEB would only be able to cancel or refuse to renew the IESO's licence (a) if it could find that doing so would be in the public interest, and (b) if it is able to meet its statutory obligations, including its obligations in respect of setting just and reasonable payment amounts that provide for a fair return to OPG. In exercising its licensing powers, the OEB would also have to consider that, as discussed, the IESO's obligations under Section 78.1 exist independent of and are outside the scope of the licence from the OEB.

D. Reliance

This opinion is given exclusively in connection with the consideration by OPG, as well as OPG's accounting advisors and auditors, of the appropriate treatment of OPG's regulatory deferral and variance accounts for financial reporting purposes under IFRS and for no other purpose. This opinion is addressed to and is solely for the benefit of OPG and may not be relied upon by any other person including, but not limited to, OPG's accounting advisors and auditors.

We trust the forgoing is satisfactory.

Yours truly,

Torys LLP

Control Assessment_Affordability Fund new format mar 26F Draft.pdf

Accounting Analysis of Affordability Fund Trust

ISSUE

Would the proposed Affordability Fund Trust (the Affordability Fund) be consolidated under Public Sector Accounting Board (PSAB) standards in the Province's consolidated financial statements?

RECOMMENDATION

Based on the terms and conditions of the executed Trust Declaration and the Transfer Payment Agreement, the Affordability Fund should be classified as a Trust under Administration of Hydro One and therefore not consolidated as part of the government reporting entity.

Commented [m1]: I believe it should be a trust under H1's administration.

To further confirm the economic substance of the relationship between the Province and the Trust, OPCD also assessed relevant terms and conditions of the Trust Declaration and Transfer Payment Agreement in accordance with the control criteria in PS1300 and found that the overall preponderance of evidence indicated that the Trust is not controlled by the government. The results of the detailed analysis is in Appendix I which conclude that only two of PSAB's criteria of control are met, reflecting the Province's ability to (i) establish the mandate of the organization and (ii) the restricting the organization's investments.

With regards to the first criteria, although the Province established the Affordability Fund, it does not have the ability to amend the mandate of the Trust but has a protective right over the amendments.

Regarding the second control criteria noted, the government established the Affordability Fund to support the Ministry of Energy's rate reduction program. While the Trust documents restrict the nature of investments in which the Trust can invest to maintain liquidity and stewardship over the funds, it does not weigh heavily on the control assessment.

BACKGROUND

The Ministry of Energy plans to transfer $100M before year-end to a recently formed, limited purpose Trust to establish a new Affordability Fund that will provide energy efficiency measures to electricity customers. Specifically, the Affordability Fund will provide assistance to customers who do not qualify for existing low income conservation programs (e.g. the existing Home Assistance Program (HAP) delivered by LDCs under the Conservation First Framework) and who have difficulty paying their electricity bills.

Commented [m2]: Should this be past tense?

The Affordability Fund is intended to be available for distributions to beneficiaries who would be identified based on recommendations from LDCs based on principles and indicative eligible measures listed in Annex A of the Declaration of Trust. Beneficiaries could include customers in frequent arrears or facing disconnection. Priority is expected to be given to homes which are primarily heated by electricity.

In order to provide funding to the Trust, the Ministry of Energy entered into a Transfer Payment Agreement (TPA) with the Trustee of the Trust (Computershare). Computershare will in the near future be replaced by an independent Board of Trustees which will be appointed based on the advice of an independent Advisory Committee. The Ministry of Energy expects to flow the approved funding ($100M) to the Trust account established by Computershare on March XX _, 2017.

Commented [m3]: Is it done already?

Formatted: Highlight

Commented [m4]: Inser the date.

The Replacement Board of Trustees (to replace the Original Trustee, Computershare) is expected to be comprised of:

- [six] residents of Ontario who have expressed that they are willing to act as members of the Board of Trustees and who, individually and collectively, satisfy the following criteria (collectively, the "Selection Factors"):

  a) each member demonstrates an understanding of the electricity sector including the electricity distribution sector;
  b) each member demonstrates an expertise in conservation and low income programs;
  c) three of the identified individuals will be representatives from separate electricity distributors, two individuals will be representatives from separate social services agencies and one individual member, who will be a non-voting member, will be an employee or representative of the Government of Ontario; and
  d) it is expected that representation by the Government of Ontario will be non-controlling.

In accordance with the Trust Declaration, the Trust has engaged with Hydro One to provide administrative services and has the discretion to engage with other entities as service providers to assist with administering the Trust. It is expected that the Trust would consider using administrative services agreements to clearly document services and expectations in delegating its authority. The Trust would distribute funds to identified customers of LDCs across the province (including Hydro One's distribution division) at the discretion of the Trustees, based primarily on the recommendations of the applicable LDCs.

The Declaration of Trust confers broad powers and discretion to the Trustee, to act in the best interest of the beneficiaries. The Trustees are expected to conduct themselves in good faith and have regard to guiding principles set out in the Declaration of Trust (and indicated by the Province in the TPA) in exercising their duties under the Trust Declaration and TPA in distributing funds to LDCs for the benefit of beneficiaries across the province.

The Trust Declaration will be subject to further modification by the Trustee, subject to the Province's protective right under the TPA to consent, where such consent is not to be unreasonably withheld or delayed. The input and involvement of LDCs across the province is anticipated and integral to the success of the Trust in meeting its purpose. The **Principles,** to be considered in the exercise of its discretion**,** are set out in both the Trust Declaration and the TPA.

In addition, a **Permitted Delegation Annex** forms part of the Declaration of Trust, which refers to an expectation that the Trust would rely on participating LDCs to assist with achieving the purpose of the Trust, including an expectation to (a) appoint, employ or retain Implementation Agents for the purpose of discharging its duties and obligations under the Declaration; and (b) enter into, perform, enforce and amend implementation agreements.

Without limiting the Trustee's discretion to negotiate and settle the terms and conditions of the above-mentioned implementation agreements, the Permitted Delegation Annex also outlines certain expected components for the Trust to consider for inclusion in the implementation agreements, recognizing that the ultimate agreements would be subject to negotiation between the Trust and individual Electricity Distributors and the acceptance and agreement of the applicable Electricity Distributor counterparty. The Annex is subject to the Trustee's overall discretion and the Trustees are not bound to use the guidance provided.

DRAFT

ACCOUNTING ANALYSIS

In accordance with PS1300, the Affordability Fund can be considered a trust under administration and should therefore be excluded from the government reporting entity (ref. PS 1300.40). Exclusion from the government entity is appropriate where there is a legal trust, as with the Affordability Fund, as the property transferred by the Ministry of Energy is conveyed to the Trustee (Computershare) to be administered as directed by the Trust Declaration. The Original Trustee, and subsequently the Replacement Trustee Board hold title to the property for the benefit of the beneficiaries.

Under the terms of the Trust Declaration, the Trust fulfills its fiduciary duty and the Province retains no unilateral authority to change the conditions set out in the Trust Declaration. Under PS1300, the assets and activities of Trusts under Administration would therefore be excluded from the government's consolidated financial statements.

Both the Trust Declaration and the Transfer Payment Agreement clearly, and consistently convey the ability of the Trust to act independently in exercising its discretion over entering into agreements with Implementation Agents, funding allocation decisions, and design of eligible measures. The extent to which the government can influence the decisions or activities of the Trust is restricted by the Principles Annex, the suggestions on elements of the administrative/implementation agreements that the Trust is expected to enter into with LDCs, and suggested considerations for eligible measures which might be covered by the program. In none of the documents is the Trust mandated to adopt the government's suggestions.

Formatted: Highlight

Control is defined as the ability of one party to govern the financial and operating policies of the other party. According to PS1300, financial and operating policies are principles and practices that determine how an organization conducts its activities which can impact the achievement of its mission and mandate. While the government has established the Trust's fundamental purpose, it has not restricted or limited the ability of the Trustees to make future decisions. Furthermore, the Trust has been established for the benefit of electricity customers. The government does not expect to derive a financial or non-financial benefit from the Trust, nor is the government exposed to the risk of any loss from the Trust.

A number of report-backs requirements are included in the Transfer Payment Agreement which are consistent with OPCD's Trust Guidance, and guidance on One-Time Transfers. In addition, the TPA includes certain audit rights and protective similar to those included in other transfer payment agreements. For example, the government will require the Trust to submit reports for information purposes on the nature and extent of its funding activities, and allow for audits at the discretion of the Province, to provide assurance that the funds have been used for the purposes intended. In accordance with PS1300, such reports are not considered evidence of control because the government's interest in the Trust extends to ensuring that that the Trust is achieving success in satisfying its fiduciary duty and achieving the purposes of the Trust which is to help the most vulnerable electricity customers.

In addition to considering PSAB guidance for Trusts under Administration, OPCD also undertook an assessment of government control over the Trust under PSAB's
"indicators of control". In addition to its legal form as a Trust, OPCD considered the economic substance of the relationship between the government and the Trust. Relevant aspects and implications of the relationship were considered in determining whether or not the government controls the Trust. OPCD's Trust Guidance and One-Time Transfer Guidance developed in conjunction with the Office of the Auditor General are also attached as Appendices.

There are a total of 11 PSAB prescribed control indicators that provide evidence of control: 4 persuasive indicators of control and 7 other control indicators. It is the preponderance of evidence that would be considered in assessing whether a government controls an organization.

The following governing documents were reviewed in support of the analysis of the Province's control over the Affordability Fund Trust:

1. Trust Declaration, including related schedules
2. Transfer Payment Agreement
3. PSAB 1300 (esp. PS1300.40-.46)
4. OPCD Trust Guidance
5. OPCD Guidance on One-Time Transfers

Both the TPA and the Trust Declaration clearly reflect the government's intention not to interfere with the unfettered discretion of the Trustees in exercising their fiduciary duties on behalf of the beneficiaries. In particular, Schedule A, Section 1.1(g) (Interpretations) of the TPA includes the following:

it is intended that the transfer of the Funds to the Recipient will be a transfer made to a trust that is not controlled by the Province (as the term "control" is used in *Government Reporting Entity* at paragraphs PS 1300.07-.24), and so if a term or condition of the Agreement is determined to conflict with the requirements applicable to the Province recording the transfers to the Recipient of Funds contemplated hereunder as an expense incurred by the Province on the date of the transfer of Funds under the Agreement otherwise in connection with activities undertaken by the Province with such a non-controlled trust, then such term or condition shall be given a meaning and shall have an effect insofar as it is possible to interpret such term or condition in a manner that eliminates such conflict while preserving the other provisions of the Agreement and furthering the Purpose.

Appendix I shows the detailed analysis of the Affordability Fund Trust based on a consideration of the of the PSAB indicators of control.

DRAFT

APPENDIX I

Affordability Fund Trust
Indicators of Control Analysis
DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
Primary (more persuasive) indicators (CICA PS 1300.18):		
i. Government has the power to unilaterally appoint or remove a majority of the members of the governing body of the organization	• Original Trustee (Computershare) is the governing body of the Trust until the Replacement Board of Trustees is selected. As at March 31st, Trustee will hold funds transferred and government will not have power to remove Original Trustee nor have access to the funds transferred. • The government does not control the Original Trustee or the Advisory Committee, and will not control the Replacement Board of Trustees.	X
ii. Government has ongoing access to the assets of the organization, has the ability to direct the ongoing use of those assets, or has ongoing responsibility for losses	• The government does not have an on-going access to assets transferred to the Trust, and any future access will only be through protective clauses (termination/default for material breach). • At the Final Distribution Date, any excess funds will be distributed to a non-controlled Residual Beneficiary in accordance with clause 3.3 of the Trust Declaration. • The government does not have any exposure to losses. **Trust Declaration (sec. 4.2 extracts)** ***(c)Power to Own, Hold and Manage.*** Subject to section 4.2(d), the Trustee shall have the power to own, hold and manage the Assets in such manner as the Trustee, in its sole and absolute discretion, may consider appropriate or advisable. ***(e)Power to Dispose of Assets.*** The Trustee shall have the power to sell, convey, assign, transfer, exchange and in any other manner dispose of the Assets or any part or parts thereof free and clear of any and all trusts established under this Declaration, by public or private sale, for cash or on credit, with or without advertisement, and subject to such restrictions, stipulations, agreements and reservations as the Trustee in its sole and absolute discretion may consider appropriate or advisable, and to execute and deliver and perform any agreement, deed, conveyance, transfer or other document or instrument in connection with the foregoing. ***(o)Title to Assets.*** The Trustee shall have the power to cause all or any part of the Assets to be held by or registered, in its sole and absolute discretion, in the name of any Person.	X

DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
3. Government holds the majority of the voting shares or a "golden share" that confers the power to govern the financial and operating policies of the organization	"**Declaration of Trust**" means the declaration of trust made as of March 23, 2017, under which the Affordability Fund Trust was established, as such declaration of trust may be amended, restated, supplemented or otherwise modified from time to time with the consent of the Province in accordance with Section 20.2 (see below). **20.2 Declaration of Trust.** The Recipient covenants that it shall not amend, restate or terminate the Declaration of Trust without obtaining the written consent of the Province in respect of same, such consent not to be unreasonably withheld or delayed. **Note: The right of the Province to consent is a protective right only.** **Trust Declaration:** **6.1Amendments** Subject to the requirements of the Transfer Payment Agreement, the Trustee shall have the power in its sole and absolute discretion from time to time without the approval of any Beneficiary or any court to amend, vary, supplement, replace or restate this Declaration in its entirety or any portion thereof; provided, however that it is expected that any amendment shall be consistent with the intent of the principles set forth in the Principles Annex and with the intended scope and effect of the permitted delegations and activities of any Implementation Agent pursuant to the Permitted Delegations Annex. Without in any way limiting the foregoing, any such amendments, variations, supplements, replacements or restatements **Principles Annex (In Trust Declaration):** The Trustee shall have regard to, but shall not be specifically bound by, the following principles in applying its discretion in relation to the administration of the Trust: Schedule A of the Declaration to which it refers lists 'Indicative Eligible Measures' for consideration by the Trustees. In addition, the Permitted Delegation Annex includes non-mandatory elements for consideration by the Trustees in the Implementation Agreements that the Trust may choose to enter into with LDCs (without limiting the Trustee's discretion to negotiate and settle the terms and conditions of such agreements). **Governance in the TPA.** The Recipient covenants that it will develop and maintain in writing until the Agreement is no longer in effect: a) decision-making mechanisms and procedures to enable the Recipient to hold, invest, manage, apply and distribute the Funds in accordance with the Declaration of Trust in	X

DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
	furtherance of the Purpose; and b) procedures to enable the preparation and delivery of all Reports required pursuant to Article 7.0. Section 5.8, Rules and Procedures of the Trust Declaration provides further expectations which are typical of a Trust and which do not reflect control by the Province.	
4. Government has the unilateral power to dissolve the organization and thereby access its assets and become responsible for its obligations	Only after the Final Distribution Date or in the event of default will the government have any power or rights in relation to the remaining funds in the Trust. Specific extracts are included below which demonstrate that the province would not have unilateral power to dissolve the organization and access its assets during the normal course of the Trust's existence. With regards to the control criteria's suggestion of dissolving the organization and accessing assets, it should be noted that there are expected to be no assets at the end of the Trust's existence that could be returned back to the Province. The termination of the Trust at the end of the program and following the Final Distribution Date will be an administrative undertaking by the Trustees. The only circumstance that assets might return to the province is contingent and under protective clauses (termination/default) which are not indicative of a unilateral right available to the Province to dissolve the Trust. **<u>Trust Declaration</u>** **7.1 Duration** Subject to sections 7.2 and 7.3, the Trust will continue in full force and effect so long as there are any Assets and until all of the debts, liabilities and obligations of the Trust have been paid and satisfied in full. **7.2 Termination and Distribution of Assets** The Trustee shall terminate the Trust and wind up its affairs as soon as practicable after the Final Distribution Date. In connection with the termination of the Trust, the Trustee shall identify the Residual Beneficiaries and distribute or cause to be distributed the remaining Assets, in cash or in kind or partly in each, to the Residual Beneficiaries, in each case in accordance with section 3.3. Despite the foregoing, the Trust will only be terminated and wound up after the Trustee, in its sole and absolute discretion, determines that all debts, liabilities and obligations of the Trust have been paid or otherwise adequately provided for and satisfied and upon receipt of such releases, indemnities and discharges as the Trustee, relying on the opinion of counsel, deems necessary for the protection of the Beneficiaries and for its own protection. **7.3 Distribution of Assets on Final Distribution Date**	X

DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
	If the Trust holds Assets on the Final Distribution Date, the Trustee shall pay or provide reserves for the payment, and otherwise shall satisfy, all debts, liabilities and obligations of the Trust and shall provide or arrange to provide such investigations, audits, releases, indemnities and discharges as the Trustee, relying on the opinion of counsel, deems necessary for the protection of the Beneficiaries and for its own protection. Thereafter, any remaining Assets shall be paid to the Residual Beneficiaries in accordance with section 3.3. **TPA References** **11 EVENT OF DEFAULT, CORRECTIVE ACTION AND TERMINATION FOR DEFAULT** **11.1 Events of Default.** An Event of Default will occur if: a) the Recipient fails to perform or observe any covenant in this Agreement and such failure has and continues to have a material adverse effect on the Province and remains unremedied during any Notice period applicable under section 11.2 after the earlier of (i) actual knowledge thereof by the Recipient, or (ii) receipt by the Recipient of Notice thereof from the Province; b) any representation or warranty made by the Recipient in the Agreement shall prove to have been incorrect in any material respect when made or deemed made, and, if capable of remedy, continues to be incorrect in any material respect during any Notice period applicable under section 11.2 after the earlier to occur of (i) the actual knowledge thereof by the Recipient or (ii) receipt by the Recipient of Notice thereof from the Province; c) it is determined that the Recipient has breached its Standard of Care (within the meaning given in and context of the Declaration of Trust) in discharging its material duties under the Declaration of Trust, with the result that all or a significant part of the Funds have not been or are not being applied in furtherance of the Purpose or are being applied in a manner that is directly contrary or without regard to the Purpose, and, if such breach is capable of remedy, it continues and remains unremedied during any Notice Period applicable under section 11.2 after the earlier of (i) actual knowledge thereof by the Recipient, or (ii) receipt by the Recipient of Notice thereof from the Province; d) an insolvency event shall have occurred and be continuing with respect to the Recipient. **11.2 Consequences of Events of Default and Corrective Action.** If an Event of Default occurs, the Province may, at any time, take one or more of the following actions: (a) provide the Recipient with Notice allowing the Recipient an opportunity to remedy the Event of	

DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
	Default during a specified Notice Period; (b) seek an order of specific performance, including an order that the Recipient pursue its available remedies against third parties; (c) require, by Notice of demand, that the Recipient transfer to the Province (without any need for compensation, indemnity or consideration to the Recipient or any Beneficiary or other third party) any and all Assets remaining in the possession or under the control of the Recipient that can reasonably be traced or attributed to the Funds after first providing for the completion and performance by the Recipient of any unperformed contractual obligations of the Recipient undertaken in compliance with the Declaration of Trust on or prior to transfer; and (d) terminate the Agreement, including immediately, without liability, penalty or costs to the Province upon giving Notice to the Recipient. The transfer of Funds in accordance with the Agreement is made by the Province with the expressed intention and reservation that the transferred Funds shall be returned to the Province and the entitlements of the Recipient in remaining Funds shall thereby be revoked with reversion thereof to the Province in the circumstances contemplated in Section 11.2(c). **11.3 Opportunity to Remedy.** If, in accordance with section 11.2, the Province provides the Recipient with an opportunity to remedy the Event of Default, the Province will provide Notice to the Recipient of: (a) the particulars of the Event of Default; and (b) the length of time within which the Recipient may cure such Event of Default without the Province pursuing any other remedy (the "Notice Period"). No right to access assets following Final Date of Distribution: **Declaration of Trust** 3.3Distributions to Residual Beneficiaries Prior to the Final Distribution Date, the Trustee shall identify the Residual Beneficiary, or if more than one the Residual Beneficiaries and their respective allocations, by consulting with and having regard to the recommendations of the Ontario Energy Board, based on those charitable organizations which provide support services for Low Income Energy Assistance Program Emergency Financial Assistance (LEAP EFA) and the Ontario Electricity Support Program (OESP) or other charities that OEB may identify as relating	

DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
	to the Purpose. Following the Final Distribution Date, the Trustee shall, subject to compliance with section 7.3 and completion of a final audit, distribute all remaining Assets (including capital or income) to the Residual Beneficiaries, in each case in the amounts and to the extent determined by the Trustee in its discretion hereunder (having consulted with and having had regard to the recommendations of the Ontario Energy Board as aforesaid) and to the exclusion of the other Beneficiaries.	
5. Provide significant input into the appointment of members of the governing body of the organization by appointing a majority of those members from a list of nominees provided by others or being otherwise involved in the appointment or removal of a significant number of members	The Original Trustee will establish the Trust and will not be controlled by the Province. In accordance with the Trust Declaration and the TPA, the government will not control the Original Trustee, and will not have a controlling interest in either the Advisory Committee nor the Replacement Trustee Board. The process for Replacement of the Original Trustee by the Replacement Board of Trustees is described in section 5.7 of the Trust Declaration. Although the Original Trustee (Computershare) may have been selected by the Province, and the Advisory Committee members were listed on the Trust Declaration, neither the Original Trustee nor the Advisory Committee will be controlled by the Province. It is relevant to note that PSAB also provides the following guidance with regards to government involvement in appointing governing bodies: PS1300.20 For each indicator that applies in a particular circumstance, the degree of government influence would determine its importance as evidence of control. In weighing the evidence, it would be necessary to consider the indicators collectively as well as individually. For example, where an organization is governed by a publicly elected board, this is not necessarily, in and of itself, sufficient evidence to conclude that the government does not control the organization. Similarly, where a government appoints a majority of the members of the governing body of an organization, this is not necessarily, in and of itself, sufficient evidence that the government controls the organization.	X
6. Appoint or remove the CEO or other key personnel	Right does not exist. N/A	X
7. Establish or amend the mission or mandate of the organization	Through an agreement with the Trustee (Computershare), it is the entity as settlor and as Trustee which has established the trust. Once established, the Province's Role, under section 4.4 of the TPA is limited to providing funds to the Trust. For greater clarity, the Province's role under the Agreement is limited to providing Funds to the Trust and the Province is not responsible for carrying out or overseeing the terms of the Declaration of Trust.	✓

DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
8. Approve the business plans or budgets for the organization and require amendments, either on a net or line-by-line basis	Right does not exist. No intention or documentation demonstrating that province would manage/influence the Trust on a line by line basis. **TPA 4.4 Province's Role Limited to Providing Funds.** For greater clarity, the Province's role under the Agreement is limited to providing Funds to the Recipient and the Province is not responsible for carrying out or overseeing the terms of the Declaration of Trust.	X
9. Establish borrowing or investment limits or restrict the organization's investments	Trust Declaration, Section 1.1 Definitions (j) "***Eligible Investments***" means (i) a deposit receipt, note, certificate or instrument issued, guaranteed or endorsed by a bank listed in Schedule I to the *Bank Act* (Canada), which provides that the principal and any interest shall be fully paid no later than one year after the day the investment was made, or (ii) a deposit account at a bank listed in Schedule I to the *Bank Act* (Canada). ***4.2*** (a) ***Power to Own, Hold and Manage.*** Subject to section 4.2(d), the Trustee shall have the power to own, hold and manage the Assets in such manner as the Trustee, in its sole and absolute discretion, may consider appropriate or advisable. (b) ***Power to Invest in Eligible Investments.*** The Trustee shall have the power to invest the Assets only in Eligible Investments, and to change such Eligible Investments at any time and from time to time, all as the Trustee, in its sole and absolute discretion, may consider appropriate or advisable, but always having regard to the Trustee's expectations regarding the timing of payments to be made to the Beneficiaries hereunder. If an investment of Assets in Eligible Investments would not be authorized under the applicable trust laws of Ontario, the Trustee shall nevertheless be permitted to make an investment of the Assets in such Eligible Investments. The Trustee will have no liability for the diminution in the value of any investment in Eligible Investments made hereunder. *Although some restrictions, given the need for liquidity for the funds and envisioned short term nature of the program, it is unlikely that the Trust would have contemplated investing the funds in any different types of instruments as designated in the Trust docs.*	✓
10. Restrict the revenue-generating capacity of the organization, notably the sources of revenue	There are no revenue generating restrictions in the Trust documents; however, there are references indicating that the Funds are expected to be used for not for profit purposes. It should also be noted that the nature of a Trust is not to generate revenue or make a profit, but to fulfil a fiduciary duty on behalf of the beneficiaries. No explicit restriction mentioned in the Trust Declaration or TPA related to other activities of the trust; however,	X

DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
	expectation that funds provided by the province will not be used for profitable purposes by the LDCs.	
11. Establish or amend the policies that the organization uses to manage, such as those relating to accounting, personnel, compensation, collective bargaining or deployment of resources	The Trust Declaration and the TPA are not intended to interfere with the discretion of the Trust to establish or amend its own financial and operating policies. However, the Province does provide non-compulsory Principles which are expected to be considered by the Trustee in executing its administration of the Trust. In addition to the guiding Principles, the Trust Declaration includes a Permitted Delegation Annex, which provides that the Trustee will be permitted, and is expected to seek to delegate its powers and duties to LDCs. These sections are descriptions of matters that would typically be expected in an Implementation Agreement (without limiting the discretion of the trustee to negotiate and settle the terms and conditions of such agreements). **Section 4.2 of the Declaration lists the Enumerated Powers of the Declaration, including:** The Trustee shall have the following specific powers and authorities: a) *Transfer Payment Agreement.* b) *Contracts and Undertakings.* c) *Power to Own, Hold and Manage. .* d) *Power to Invest in Eligible Investments.* e) *Power to Dispose of Assets.* f) *Power to Apply Assets and Proceeds to Make Distributions to Beneficiaries.* g) *Power to Delegate and to Appoint Agents, etc.* h) *Power to Operate Accounts.* i) *Power to Collect, etc.* j) *Power to Obtain Insurance.* k) *Power to Pay Trustee's Fees.* l) *Power to Pay Taxes.* m) *Power to Appoint Auditors.* n) *Form of Accounts.* o) *Title to Assets.* p) *Delegation of Discretion.* q) *Additional Powers.* None of the above noted powers are restrictive or suggest that the government is controlling the activities of the Trust. The TPA Extract includes the following reference which does not conflict the non-controlled nature of the Trust and/or are consistent with OPCD's guidance on One-Time Transfer Payments or Trust Guidance reviewed previously with the Office of the Auditor General: 4.2 The Trustee is expected to conduct its activities in a manner that complies in all material respects with the Transfer Payment Agreement, including to:	X

DRAFT

INDICATORS OF CONTROL	EVIDENCE OF CONTROL	CONTROL EXISTS?
	i. act prudently and in furtherance of the Purpose; ii. report not less frequently than annually the results of its activities for information purposes to the Province in connection with the Program; iii. comply with the Province's request for any independent verification or audit if determined to be necessary or appropriate by the Province; iv. return Assets that have not been distributed if it is determined that the Trustee has breached its Standard of Care in discharging its material duties under the Declaration, and has not cured such material breach despite having been given a reasonable opportunity by the Province to do so in light of the circumstances of such material breach, with the result that all or a significant part of the Assets have not been or are not being applied and distributed in furtherance of the Purpose or are being applied and distributed in a manner that is directly contrary or without regard to the Purpose. **5.0 RECIPIENT'S ACQUISITION OF GOODS OR SERVICES, AND DISPOSAL OF ASSETS (TPA)** **5.1 Acquisition.** If the Recipient acquires goods, services, or both with or by applying the proceeds of the Funds, it is expected to do so through a process that promotes the best value for money and to take reasonable steps to ensure that its Administrative Services Agents and Implementation Agents also follow a process that promotes the best value for money when acquiring goods and services with or by applying the proceeds of the Funds. **Both the TPA and the Trust Declaration include a PRINCIPLES ANNEX** The Trustee is expected to have regard to the Principles, but shall not be specifically bound by the principles in applying its discretion in relation to the administration of the Trust.	

DRAFT

Appendix II

Extract from PS1300

TRUSTS UNDER ADMINISTRATION

.40 *Trusts administered by a government or government organization should be excluded from the government reporting entity.* [JUNE 1996]

.41 Trusts are defined as property that has been conveyed or assigned to a trustee to be administered as directed by agreement or statute. In a trust relationship, the trustee holds title to property for the benefit of, and stands in a fiduciary relationship to, the beneficiary.

.42 To meet the definition in paragraph PS 1300.41, the property conveyed or assigned to the government or government organization acting as a trustee, must be provided to fulfill a particular objective of the donor of the property conveyed or assigned. The government or government organization would merely administer the terms and conditions embodied in the agreement and has no unilateral authority to change the conditions set out in the trust indenture. For this reason, the assets and activities of the trust are excluded from the government's reporting entity.

.43 A government or government organization acts as trustee when it administers trusts on behalf of the beneficiaries specified in the agreement or statute. As trustee, the government is accountable to third parties for the use and disposition of trust assets and for the funds derived from those trust activities. Trust assets are not owned by the Crown in right of Canada, a province or territory, or by a local government, and should not be included in the government reporting entity.

.44 *Government financial statements should disclose, in a note or schedule, a description of trusts under administration by a government or government organization, and a summary of trust balances.* [JUNE 1996]

.45 To acknowledge and report on the magnitude of trusts administered by a government or government organization, a note or schedule to government financial statements would describe the trust assets under administration and would set out a summary of trust balances.

.46 Often the term "trusts" is applied to assets earmarked as a result of a government policy decision when no trust liability exists. Such assets are special funds that comprise part of the government reporting entity and would be consolidated.

DRAFT

Appendix III

ACCOUNTING CONSIDERATIONS FOR GOVERNMENT-FUNDED TRUSTS

DRAFT

Purpose:

The purpose of this guidance is to explore accounting-related considerations related to government-funded trusts which are established by the government to fund a specific purpose or activity. This guidance deals specifically with the difference between controlled and non-controlled trusts, the introduction of accountability provisions which can now be reflected in trust agreements, and key timing considerations for trusts contemplated towards year-end. It is important that these factors be taken into account when establishing a trust, in order to achieve the intended fiscal impact and appropriate accountability over the use of public funds.

Introduction:

Trusts are usually established by way of trust declaration or trust agreement, and are one of several means by which the government can direct funding to support key policy initiatives. Simply stated, trustees hold title to property for the benefit of, and stand in a fiduciary relationship to the beneficiaries. Trustees are accountable to third parties (beneficiaries) for the use and disposition of trust assets and for the funds derived from those trust activities. The trust itself is not a separate legal entity. The trustees carry out the activities of the trust in the name of the trustees.

Generally, direct year-end transfers are the preferred alternative over trusts where the province wants to retain ultimate decision-making authority regarding amounts to be transferred to recipients. Direct transfers are more appropriate where the identity of eligible transfer payment recipients is known and the amounts to be transferred to each recipient can be or has been determined.

Year-end transfers to a trust might be considered where the province desires to delegate to third parties ultimate decision-making authority regarding allocation of amounts amongst eligible beneficiaries.

A trust must be valid for legal purposes in order to be recognized for accounting purposes. Key requirements for a trust to be valid include: an intention to create a trust ('certainty of intention'), certainty of subject-matter of the trust ("certainty of subject matter") and the objects of the trust must be certain ('certainty of objects"). There are generally two different types of trust, a trust in which the objects are the "beneficiaries" and trust in which the objects are a "purpose" (e.g. for charitable purposes). Where a trust is under serious consideration, it is imperative that ministries seek legal advice to ensure that the contemplated trust will be valid.

Trustees are obligated to follow the terms of the trust declaration or trust agreement which will usually detail the powers and duties of the trustees including the number of trustees and how decisions will be made by the trustees.

Controlled versus Non-Controlled Government-Funded Trusts

From an accounting perspective, it is important to distinguish whether the design and governance of a particular trust results in the trust being controlled by the Province for accounting purposes. Control stems from the nature of the relationship between the government and the trust. Financial and operating policies are principles that determine how an organization conducts its activities. The ability to govern these policies is an important element of government control.

The means by which a trust is established, the government's representation among the trustees, the government's involvement in the trust's governance processes and ability to impact trustee discretion in decision-making are but some of the factors to be considered in assessing whether a trust is 'controlled' or 'not controlled' by the government.

In establishing a trust, it is important to achieve the intended relationship between the province and the trust in order to achieve the intended fiscal impact.

Non-Controlled Trusts:

Where trusts are not controlled by the Province, they are excluded from the government reporting entity. For non-controlled trusts, the following accounting would apply to trust funding:

- Where funds provided to the "trust" are unconditional, the Province would record a transfer payment expense for any transfers approved in the current period (and flowed by finalization of public accounts).

- Where funds provided to the "trust" are conditional (i.e. upon the trust completing some specific task or result), the Province would initially record funding to the trust as a prepaid expense until the conditions are met at which time the Province would record a transfer payment expense, with the corresponding credit to prepaid expense. This may occur over a number of fiscal years.

In determining whether a trust is controlled, there are a variety of ways that a government might be perceived to be governing the financial and operating policies of a trust. These include:
- Eliminating or significantly limiting the ability of the trustees to make future decisions
- Directing the financial and operating policies of the trust
- Overruling, modifying or vetoing the financial and operating policies established by the trust.

Specific factors that should be considered in establishing a non-controlled trust include:
- Government representation in the trustees (should be in a minority position), and non-government trustees should be nominated by non-government sources
- Government influence over day-to-day trust governance and trustee discretion to make decisions (e.g. selection of eligibility criteria, selection of recipients).
- degree of influence over how funds are disbursed (i.e. the Declaration of Trust can provide general guidelines but not be overly prescriptive)
- the government's power to unilaterally appoint or remove the majority of trustees
- the government's on-going access to the trust's assets, or right to direct decisions regarding the flow of those assets to specific beneficiaries
- the government's unilateral power to dissolve the trust, except under specified circumstances as stipulated by the trust agreement (i.e. corrective action)
- the government's ability to establish or amend the policies used by the trust to manage accounting, personnel, deployment of resources, etc.

In some cases, it may be advantageous for ministries to provide administrative support to trusts. In these cases it is important that the extent of such support is not so pervasive as to influence or direct the day-to-day financial or operating policies of the trust, otherwise the trust will be deemed controlled and will be subject to consolidation in the government reporting entity.

Controlled Trusts:

If the Province controls the trust (for example, through its power to appoint a majority of the trustees on the board of trustees), the Province would be deemed to have control of the trust, resulting in the trust being accounted for in the same manner as other organizations controlled by the province (i.e. on a consolidated basis). As a result, the Province's contribution to the trust would not be expensed when it is transferred, but rather over time as the funds are disbursed to trust beneficiaries.

DRAFT

Accountability Related Considerations:

The Auditor General has confirmed that the new accountability provisions developed for one-time transfers can also be applied to trusts without impacting the expense treatment of any transfers to non-controlled trusts.

These new accountability provisions will enable the government and the Legislature to:

- obtain assurance that a trust is spending public funds prudently and for the purposes intended and to take corrective action if it is not;
- ensure ministerial accountability to the Legislative Assembly for the trust's activities; and
- ensure that the province is able to take corrective action where warranted and as stipulated under terms of the trust agreement.

It should also be noted that the Auditor General's Act now allows the Province's Legislative Auditor to conduct special audits of any person or organization receiving transfers from the government, including trusts.

To enhance accountability controls over government transfers to non-controlled trusts, Ministries can consider incorporating some or all of the following accountability provisions as part of their trust agreement/declaration without impacting the accounting treatment of the trust.

The inclusion of any of these provisions should not result in a trust being assessed as 'controlled'. Note that the key determinant in identifying appropriate provisions for any individual trust is a ministry's assessment of the **risk** associated with a particular trust, as per the Transfer Payment Directive.

1. **Description of intended use of trust funds**;
    - specific purpose(s) for which the funds are to be used;
    - description of intended recipients and related eligibility criteria*; and,
    - the nature of eligible expenditures relevant to the transfers.

    *Note: avoid *overly prescriptive* eligibility criteria which would effectively eliminate or significantly limit the trustees' discretion to make funding decisions.

2. **Requirement for information**
    - Information to be provided by the trust at a future date (e.g. requirement for trustees to advise the government of trustee-developed performance criteria, and provide annual assessments against those criteria)

3. **Report-back requirement for Public Accountability**
    - information to be provided by the trust at a future date with respect to the stewardship and payment of transfer funds (e.g. audited financial statements, audited list of recipients and amounts funded).

4. **Right to independent verification/audit**
    - The Province reserves the right to audit any transfer payment recipients. The trust agreement should make reference to this fact.

5. **Right to take corrective action**
    - Where stipulated under the trust agreement, the Province reserves the right to re-direct unused funds where results of a trust assessment (where required by the trust agreement) indicate original purpose of the trust is not being achieved, or if there remain unused funds at the end of the trust term.
    - Province may also reserve the right to extend the term of the trust agreement, where funds remain at the end of the trust period.

To qualify for in-year expense treatment, the non-controlled trusts must satisfy the following:

DRAFT

- the decision to establish the trust must have been approved by Treasury Board/Management Board of Cabinet and ratified by Cabinet by March 31st;
- the ministry providing the transfer must have approved appropriations and spending authority by March 31st;
- Trustees must have been identified and signed the trust declaration or agreement to establish a valid trust by March 31st ;
- the trust must be set up and ready to receive funds, and a nominal amount transferred to the trust by March 31s;t ; and,
- the government should have communicated publicly (e.g. in the Budget document) the pending or final establishment of the trust.

In addition, all remaining funds beyond those initially transferred at March 31st should be transferred to the trust by June 30th.

DRAFT

Trusts
Questions and Answers on Trust Guidance

Question: *Where a trust is announced in the Budget document, must the trust be established by March 31st, or could such a trust be established shortly thereafter without impacting the expensing of transfers to the trust in 2007-08?*

Answer: *A trust would have to be established prior to the end of a fiscal period in order to satisfy the recognition criteria for government transfers. If the intended recipient for a government transfer does not exist at March 31st, the province cannot record a payable owing to it under existing accounting standards.*

Question*: Does the transfer of funds to a non-controlled trust need to occur by March 31st or before the date of Public Accounts finalization?*

Answer: *Consistent with the new requirements for one-time transfers, as long as the trust is established by March 31st, the transfer is authorized and a reasonable estimate of the amount can be made, cash payments can be made after year-end.*

Question: *Can beneficiaries of a non-controlled trust include consolidated entities provided that the ultimate selection of recipients is at the discretion of the Trustees?*

Answer: *Any amounts provided to a trust which are in turn be provided to an organization inside the government reporting entity should not be expensed at the time of the transfer to the trust. Any amount that is flowed to a trust with the intention of subsequently flowing the funds to a consolidated entity should not be recorded as an expense to the government.*

Question: *Can a Ministry provide administrative support to a trust without compromising the non-controlled status of the trust?*

Answer: *The government can provide administrative support as long as the extent of government administrative support is <u>not so pervasive</u> so that the government is in substance establishing and managing the trust's policies in the areas of accounting, personnel, compensation, collective bargaining or deployment of resources. Where such administrative support is assessed as pervasive, it could impair the trust's non-controlled trust and the trust will be consolidated onto the province's financial statements.*

Can the following clauses appear in a trust agreement for a non-controlled trust to ensure adequate accountability over public funds without impacting the expense treatment of such trusts?

Question*: Specific description of purpose of the trust (possibly including nominal allocation among various objectives)*
Answer: Yes.

Question: *Can the trust agreement include a specific description of the intended groups of beneficiaries and detailed eligibility criteria.*

Answer: *Specificity should be applied cautiously, so as not to limit the discretion of the trustees in their subsequent grant making processes. For the trust to be considered 'not controlled' it should not be seen as 'establishing the trust's fundamental purpose and eliminating or significantly limiting the ability of the trust to make future decisions by predetermining the financial and operating policies of the trust.*

DRAFT

Question: *Can trustees stipulate that funding is to be provided to beneficiaries on a cost-sharing basis?*
Answer: *Yes.*

Question: *Can the trust agreement include a requirement for a trust to report back to the province on trustee-established performance criteria and results, audit of financial statements, audited recipients and amounts, confirmation that trustees communicated to beneficiaries the intended purpose of the funding, etc.*
Answer: *Yes.*

Question*: Requirement for Trust to publicly post communications on existence, availability of funds, eligibility criteria, recipients and amounts granted to each recipient.*
Answer: *Yes*

Question: *Inclusion of a 'suggested' drawdown schedule over a period of years, with discretion left to Trustees as to actual results.*
Answer: *The inclusion of a drawdown schedule is not suggested for one-time, up-front transfers.*

Question: *Trust agreement can suggest accountability provisions which might be attached by Trustees to beneficiary payments (e.g. specific purpose of funding, requirement for report-back, right to audit, corrective actions).*
Answer: *Yes*

Question: *Trust agreement to reserve the province's right to re-direct any unspent funds to specified parties (e.g. non-consolidated entities or another non-controlled trust) at the end of the trust term, or alternatively to extend the term of the trust where unspent funds remain.*
Answer: *Yes*

Question*: Can the trust agreement include the requirement for evaluations of the trust at certain times (e.g. years 3, 7, 10 of the trust agreement), with the right for the government to decide either to terminate the trust (corrective action) based on the results of the assessment, or extend the trust beyond the initial term as per the agreement.*
Answer: *Yes.*

Question: *Trust agreement can require Trustees to request as part of the funding process that beneficiaries acknowledge receipt of government funding in their public communications on specific projects.*
Answer: *Yes.*

DRAFT

Appendix IV

ACCOUNTING TREATMENT FOR ONE-TIME TRANSFERS WITH ENHANCED ACCOUNTABILITY PROVISIONS

Purpose:

The purpose of this guidance is to identify the nature of the accountability provisions which may be associated with one-time transfer payments that qualify for immediate expense treatment in the current period.

Definition of One-time transfers:

One-time transfers are defined as lump-sum operating or capital transfers that

- are not advancing currently planned future transfer payments under an existing on-going program, or
- are not identified as being intended to be spent in specified future periods or over a specified period of time.

Background:

Transfer payments are a means by which the government works with third parties to deliver public services. Transfer payment recipients must be held responsible by the government to deliver the provincially-funded services and be accountable for the funds they receive. Consistent with the *Transfer Payment Accountability Directive, August, 2007*, a risk-based approach is to be followed in designing the appropriate accountability and reporting mechanisms for specific funding agreements.

The current *PSAB Handbook Section 3410, Government Transfers requires that a government transfer should be recognized by a transferring government as an expense in the period the transfer is authorized and all eligibility criteria have been met by the recipient.*

To recognize a liability and expense as at year-end:

- the government must create a valid expectation of the recipient by year-end, leaving the government little or no discretion to avoid but to settle its obligation;
- no significant, contingent actions should be outstanding which if unfulfilled by year end might cause the transfer not to occur.

It is understood that the intention of negotiating a transfer payment agreement following the government's commitment to the recipient is to work out the administrative details of the arrangement, not to change any key elements of the government's commitment. As such, any correspondence which indicates that funds will not be flowed until a TPA is signed should make clear that the nature of additional details to be negotiated is logistical and administrative in nature (bank account info, reporting requirements, etc.)

The government should not suggest or direct the recipients to use the funding for future periods.

DRAFT

To enhance accountability controls over one-time transfers accountability provisions one through five below are required for one-time transfers.

1. **Description of intended use of one-time transfer funds**;
   - specific purpose(s) for which the funds are to be used; and,
   - the nature of eligible expenditures relevant to the transfers.

2. **Report-back requirement for Public Accountability**
   - Periodic reporting on the use of transfer funds, service deliverables, outputs or outcomes achieved.

3. **Right to independent verification/audit**
   - at the discretion of the Province to verify/audit information submitted by the recipient is complete and accurate, and that funds were used for purposes intended.

4. **Right to recover funds (corrective action)**
   - If the funds were not used, or will not be used, for the intended purpose(s), specified services were not delivered, or intended outputs were not achieved, the Province has the right at a future date to recover funds transferred.

5. **Requirement for information** (*this item optional*)
   - information to be provided by the recipient at a future date with respect to the use of transfer funds, service deliverables, outputs or outcomes achieved.

To qualify for in-year expense treatment, the transfers must satisfy the following:

- be approved by Treasury Board / Management Board of Cabinet and then ratified by Cabinet by March 31st;
- the ministry providing the transfer must have approved appropriations and spending authority by March 31st;
- the recipients must be eligible to receive the grant by March 31st (i.e. eligibility criteria have been met prior to March 31st), and the intent to make the transfer payment must be communicated to the recipients by March 31st;
- In addition, funding details including accountability provisions must be communicated to the recipients, and the transfer payments must be made to the recipients prior to the finalization of the Public Accounts (currently June 30th);
- Where funds are flowed to recipients by March 31st, all eligibility criteria are assumed met for accounting purposes[1], and all amounts flowed are recorded as an expense, even where conditions might exist which remain unmet at March 31st.

[1] PS 3410, Government Transfers, states that "no matter how a transfer term is identified in legislation, regulations, by-laws or a transfer agreement (i.e., as an eligibility criterion or a stipulation), the crucial characteristic that distinguishes the substance of these two types of transfer terms is when they are required to be or are met by a recipient. If a term is required to be and is met before the transfer is provided, it is an eligibility criterion for the purposes of this Section. If a transfer term is met after the transfer is provided, it is a stipulation for the purposes of this Section".

All,

As you know by now, the OEB believes that they should not be involved with the approval process of the regulatory asset.

In the absence of regulatory accounting, PSAB requires that the energy purchased (the unrecognized regulatory asset) be expensed immediately.

If the sale contract would be set-up in a way that the unrecognized asset is sold to the OPG Trust on a daily basis, then an offsetting revenue would be recorded.

As IESO is an agent for the market participants, IESO is showing the market transactions in the income statement on a net basis.

Therefore, no impact on the income statement and the sale would be recorded as a receivable from the OPG Trust.

The accounting treatment in the IESO's books should not impact the nature of the asset purchased by the OPG Trust, as I believe it would still be considered an intangible asset.

The new accounting approach would:

- not require the approval of the OEB;
- not require IESO to adopt regulatory accounting under PSAB; and
- permit the legislation to be as tight as possible for the right to collect the intangible asset; and
- not require the consolidation of the market books.

I would appreciate your comments on the proposed approach above.

Ps: Is this the magic that Andrew was expecting!

Hi Kim.

The attached internal (OPA) memo is somewhat dated, but reflects the relevance of RRA to the entity's books prior to the merger. From my perspective, the memo reflects some important messages that could be useful references in relation to the IESO's activities and accounting choices that best reflect the substance of the entity's activities and meet user needs.

OPA Accounting Treatment for Regulatory Based.pdf

Memorandum

To: File
Date: March 22, 2012
Re: Accounting Treatment for OPA Charges, Other Financial Assets and Other Financial Liabilities

---

1. **Charges – Overview**

"Charges" are amounts incurred by the OPA to recover amounts paid or payable by the OPA to another person with respect to electricity.

The OPA has a legislated responsibility to record the transactions flowing through the global adjustment mechanism. The global adjustment and settlement accounts have been created for this purpose. The global adjustment and settlement accounts record charges that flow between the OPA and the IESO. The account flows include the amounts paid and received for: Demand Response 2 (DR2), Demand Response 3 (DR3), non-utility generation (NUG), regulated nuclear generation balancing amount (nuclear) and regulated hydro electric generation balancing amount (hydro). These accounts are settled simultaneously by the IESO. The account also records the amounts paid and received for OPA contracts (standard offer, generation and conservation/demand management, Feed-In Tariff and hydroelectric contract initiatives) which the OPA settles on a monthly basis with the IESO.

The DR3, NUG, nuclear, hydro, and OPA contract balances are offset in the global adjustment account eliminating the need for a flow of funds between the IESO and the OPA. The OPA records the effect of the transactions to meet its legislated responsibility. The OPA's generation contracts are estimated each month and settled on the actual amount owing in the following month. This gives rise to timing differences. The settlement dates can cross calendar months, creating a monthly balance in the account. Differences created from timing or settlement dates are reclassified into accounts receivable at month end.

The OPA is entitled under legislation to recover eligible charge amounts, as per section 25.2 (3) of the Electricity Act:
(3) For greater certainty, the OPA may, subject to the regulations, establish and impose charges to recover from consumers its costs and payments under procurement contracts.

1.1 Accounting Treatment for OPA Contract and Conservation Charges

Charges are currently recorded as accounts receivable from the IESO in the OPA's financial statements, as they represent current assets that are recoverable within 1 year. Specifically, charges represent financial assets, as per **PS.S.1000.40** below and are only recorded as receivable once they have been incurred by the OPA. Under legislation, the OPA has a contractual right to receive cash from another party (in this case the IESO via the Global

Adjustment Mechanism) with respect to amounts incurred for eligible charge amounts. This concept is consistent with criteria (c) of the definition below:

*.**40*** *A financial asset is any asset that is:*

(a) cash;
(b) a realizable asset that is convertible to cash;
(c) a contractual right to receive cash or another financial asset from another party;
(d) a contractual right to exchange financial instruments with another party under conditions that are potentially favourable to the government;
(e) an equity instrument of another entity;
(f) an investment in a government business enterprise or government business partnership;
(g) a financial claim on an outside organization or individual; or
(h) an inventory or item for sale that meets the criteria in FINANCIAL STATEMENT PRESENTATION, paragraph **Error! Hyperlink reference not valid.***. [Former paragraph* **Error! Hyperlink reference not valid.** *retained in Archived Pronouncements]*

Amounts Payable

Amounts payable arise for OPA contract charges when the value of HOEP exceeds the value of the suppliers' contract price. In this case, the charges would become an OPA liability to the market in the form of charges payable to the IESO (which, in turn, must be returned to the market via the Global Adjustment). Such charges payable to the market meet the criteria for recognition as a liability, as outlined below:

PS.3200.03

Liabilities should be recognized in the financial statements when:

(a) there is an appropriate basis of measurement; and

(b) a reasonable estimate can be made of the amount involved. [SEPT. 2004]

---

2. Other financial assets and liabilities

Other financial assets and liabilities are made up of retailer settlement amounts, government procurements and regulated price plan variance amounts.

2.1 Other Financial Assets - Retailer Settlements and Government Procurements - Overview

Legislative provisions ensure that electricity retailers are made whole by the OPA for contracts with low-volume and designated consumers that were entered into before prices were frozen by legislation effective November 11, 2002. The OPA and retailers settling any differences between the HOEP and the contract price for each contract meet these provisions. When HOEP is greater than the contract price, the OPA receives payments from the retailers and records a financial liability. When HOEP is less than the contract price, the OPA pays the retailer and records a financial asset. The OPA tracks these variances in the retailer contract settlement deferral accounts. The retailer contract discount settlement account captures the funds related to the retailer incentives existing at the creation of the RPP. The retailer incentives captured are

held in a separate deferral account for settlement concurrent with the retailer settlement deferral accounts.

The OPA began amortizing these costs over the period of 2009-2011 to reflect the recovery of these amounts through its annual usage rate approved by the OEB. As at December 31, 2011, the balances of the retailer settlements are nil and have been recovered in full.

The OPA reimburses the government for costs incurred for electricity procurement and records the costs as a financial asset. Any subsequent balances are included in future revenue requirement submissions. The OPA began amortizing the government procurement costs in 2009 on a straight-line basis, and as at December 31, 2011, the balance to recover for these costs is nil.

2.2 Accounting Treatment – Retailer Settlements and Government Procurements

Under PSAS, retailer settlements and government procurements are treated as other financial assets in the OPA's financial statements. As they are normally not recovered within one year, they are categorized as non-current assets. As per **PS.S.1000**, retailer settlement and government procurement balances qualify as financial assets as per criteria (c) below:

> ***.40*** *A financial asset is any asset that is:*
>
> *(i) cash;*
> *(j) a realizable asset that is convertible to cash;*
> *(k) a contractual right to receive cash or another financial asset from another party;*
> *(l) a contractual right to exchange financial instruments with another party under conditions that are potentially favourable to the government;*
> *(m) an equity instrument of another entity;*
> *(n) an investment in a government business enterprise or government business partnership;*
> *(o) a financial claim on an outside organization or individual; or*
> *(p) an inventory or item for sale that meets the criteria in FINANCIAL STATEMENT PRESENTATION, paragraph* **Error! Hyperlink reference not valid.***. [Former paragraph* **Error! Hyperlink reference not valid.** *retained in Archived Pronouncements]*

The OPA is required to carry the balance related to retailer settlement variances between the HOEP and contract price, as per legislation. The OPA is also entitled to recover these balances through legislative provisions, which represent a contractual right to receive cash or another financial asset from another party, as per criteria (c) above. Where retailer settlements fall into a liability balance, they would be categorized as other financial liabilities, as they would meet the criteria for recognition of a liability, as outlined in section 3.1 below.

3. Other Financial Liabilities – Regulated Price Plan (RPP) Variance - Overview

While prices for RPP consumers are set every six months by the OEB based upon a forecast of the cost of power over the next year, it is likely that there will be a difference between the actual and forecast cost of supplying electricity to all RPP consumers. When the hourly Ontario

energy price (HOEP) is greater than the RPP, the OPA pays the excess amount and records a financial asset as the electricity market funds paid are receivable from the market. When the HOEP is less than the RPP, the OPA receives the difference and records a financial liability as the funds received will be returned to the market. The OPA tracks this variance in the RPP variance account.

3.1 Accounting Treatment – RPP

RPP variance amounts are recorded by the OPA as other financial liabilities in the financial statements, as they meet the liability criteria outlined below:

PS. S.1000

.45 *Liabilities have three essential characteristics:*

(a) they embody a duty or responsibility to others, leaving a government little or no discretion to avoid settlement of the obligation;

(b) the duty or responsibility to others entails settlement by future transfer or use of assets, provision of goods or services, or other form of economic settlement at a specified or determinable date, on occurrence of a specified event, or on demand; and

(c) the transactions or events obligating the government have already occurred.

Under legislation, the OPA is required to fund RPP variances where the HOEP is less than the RPP, which implies a duty or responsibility that the OPA has little to no discretion to avoid, as per criteria (a). For instances where the HOEP exceeds the RPP rate, the OPA would record a financial asset, as this circumstance would meet the criterion of **PS.S.1000.40** (financial asset), outlined in section 2.2 above.

External Auditor Approval of Accounting Treatment

The accounting treatment of OPA charges, retailer settlement, government procurement and RPP balances has been consistent since the OPA's inception and is approved by the OPA's external auditors on an annual basis. Based on governing legislation, the external auditors agree that these balances represent true assets and liabilities to the OPA. The signed auditors' report, along with the OPA's audited annual financial statements, can be found on the OPA website in the MD&A section of the OPA annual report.

Hi Kim.

Cindy has asked that I follow up regarding a comment made by the AG in a meeting last week. With regards to the IESO's recent decision to adopt rate regulated accounting, the AG said that a set of IESO f/s had presented to the IESO Board on March 21st which did not reflect rate regulated accounting even though IESO management and the external auditors would have known about the impending accounting and the anticipated adoption of rate regulated accounting to follow shortly thereafter.

Can you please confirm the accuracy of the AG's statement.

Thanks in advance.

Nadine

Francisco/Darren,

Please find attached our questions regarding the proposed BH transaction. We'd like a call tomorrow to discuss. Please advise what time would work best for you, and if you have details to respond to the attached questions, it would be great to receive them in advance of our call.

Thanks.

Nadine

Policy Summary - sale of Hydro One Brampton (.pdf

OPCD Accounting Summary – Accounting for the Sale of Hydro One Brampton by the Province (DRAFT)

Issue

The Province is selling Hydro One Brampton (H1 Brampton) to a merged entity consisting of three local distribution companies (PowerStream, Enersource and Horizon) effective February 28, 2017. The sale of H1 Brampton is to be through a sale of shares.

This paper addresses the accounting for the sale of H1 Brampton by the Province.

Background

Brampton Distribution Holdco Inc. is classified by the Province as a government business enterprise (GBE). The Province therefore accounts for H1 Brampton by the modified equity method in accordance with INVESTMENTS IN GOVERNMENT BUSINESS ENTERPRISES, Section PS 3070.

The carrying value of Brampton Distribution Holdco Inc. in the Province's financial statements at March 31, 2016 is $471 million. [Was any purchase premium or fair value increment recorded in accordance with paragraph .07 of 3070 on acquisition of H1 Brampton]

Section PS 3070 paragraph .40[1] addresses the sale of a GBE. Paragraph .07[2] addresses accounting for a GBE following the modified equity method.

Analysis

Commented [KJ(1]: Confirm date

Commented [KJ(2]: Confirm nature of deal

Commented [KJ(3]: Understand structure of Holdco and H1 Brampton and why structured as such

Commented [KJ(4]: Any – would result in adjustment to carrying value of GBE by the Province

[1] **SALE OF ALL OR PART OF AN INVESTMENT IN A GOVERNMENT BUSINESS ENTERPRISE**

.40 *When all or part of a government's investment in a government business enterprise is sold, for the purposes of calculating a gain or loss on the sale of an investment, the cost of the portion of the total investment sold should be calculated on the basis of the carrying value of the investment at the date of sale.* [APRIL 2000]

[2] **Investment in a government business enterprise**

.07 The investment in a government business enterprise, as reflected in government financial statements under the modified equity method, includes the cost of the government's investment in the government business enterprise, calculated in accordance with paragraphs PS 3070.10-.11, and, subsequent to the date when the use of the modified equity method first became appropriate, also includes adjustments for:

(a) the government's proportionate share of the earnings of the government business enterprise after discontinued operations and extraordinary items of the government business enterprise;

(b) the government's proportionate share of dividends paid or payable by the government business enterprise;

(c) the government's proportionate share of prior period adjustments (i.e., a change in an accounting policy or a correction of an error relating to prior period financial statements), capital transactions, accumulated other comprehensive income and cumulative foreign currency translation adjustments of the government business enterprise;

(d) the accumulated amortization of any purchase premium and/or fair value increments on depreciable assets related to an acquired government business enterprise;

(e) the elimination of any unrealized inter-organizational gains and losses on assets remaining within the government reporting entity at the financial statement date;

(f) any gains or losses arising on inter-organizational bond holdings; and

(g) any impairments in the value of the purchase price discrepancy component of a government's investment in an acquired government business enterprise recognized by the government since acquisition.

OPCD Accounting Summary – Accounting for the Sale of Hydro One Brampton by the Province (DRAFT)

In accordance with paragraph .40, the carrying value of H1 Brampton needs to be calculated at February 28, 2017 for purposes of recording the sale on the Province's financial statements.

Carrying value of H1 Brampton @ March 31, 2016	$471 million
Add: Province's share of the earnings of H1 Brampton for the period March 31, 2016 to February 28, 2017	$x
Less: Province's share of dividends paid by H1 Brampton for the period March 31, 2016 to February 28, 2017	($45 million)
Carrying value of H1 Brampton @ February 28, 2017	$xx

In the Share Purchase Agreement, the purchasers agreed on a total payment amount of $607M, subject to closing adjustments. The total payment amount of $607M also includes any payments-in-lieu of taxes (PILs) that result from the sale. The PILs have been estimated at $80M, but this was communicated as an illustrative estimate and remains subject to change.

As the sale of H1 Brampton is to parties outside the government reporting entity (for the Province), any gain/loss is therefore to be realized by the Province.

The gain on sale of H1 Brampton to be recorded in fiscal 2016/17 by the Province is as follows:

Proceeds from sale of H1 Brampton @ February 28, 2017	$607 million
Less: Carrying value of H1 Brampton @ February 28, 2017	$xx
Less: PILs	
Gain on sale of H1 Brampton by the Province	$x

Holdco will capitalize existing debt owed to Holdco
Exchange debt for equity
At March 31, 2017, will the Province have any balances or relation with H1 Brampton?

Commented [KJ(5]: Need earnings of H1 Brampton ytd

Commented [KJ(6]: Confirm amount

Commented [KJ(7]: Need explanation of nature

Commented [KJ(8]: Confirm amount

Commented [KJ(9]: Depending on its nature

Commented [KJ(10]: Explanation – impact on Province's accounting

Commented [KJ(11]: Explanation – impact on Province's accounting

Commented [KJ(12]: Confirm – is it an outward sale?

OPCD Accounting Summary – Accounting for the Sale of Hydro One Brampton by the Province (DRAFT)

Points of clarification regarding the sale of Hydro One Brampton

Structure

1) Please explain the structure of Brampton Distribution HoldCo Inc. (HoldCo) and Hydro One Brampton (H1 Brampton).
a) Why is H1 Brampton held by the Province through a holding company?
b) Holdco owns 100% of the shares of H1 Brampton?
c) Are there other holdings of Holdco?
d) What transactions occur between Holdco and H1 Brampton?

Pre-closing transactions

1) Please explain "The HoldCo will capitalize the existing debt amount owed to the HoldCo, such that Hydro One Brampton will be sold debt-free. HoldCo will receive the equivalent value in common shares of Hydro One Brampton."

Sale information

1) Please confirm the February 28, 2017 sale date
2) Please confirm the final selling price after the closing adjustments are known – how do we know the proceeds represent fair value for H1 Brampton?
3) Please confirm Holdco is selling 100% of the shares of H1 Brampton to Alectra, a nonrelated party to the Province
4) We will need the earnings of H1 Brampton and Holdco for the period April 1, 2016 to February 28, 2017 (the date of sale) to calculate the carrying value of Holdco for the Province at the time of sale
5) We will need to know the amount of dividends paid/payable to the Province by H1 Brampton for the period April 1, 2016 to February 28, 2017 (the date of sale) – is the $45.4 m estimate the special dividend?
6) It is indicated the $607 million proceeds include PILS that result from the sale in the amount of approximately $80 million. Please explain
7) Please confirm whether Holdco will retain any balances with/interest in H1 Brampton after the sale
8) What will exist in the Holdco after the sale of H1 Brampton?

Province’s CFS reporting for the FHP.pdf

Subject: Your assistance please

Hi Kim.

I'm currently working on a paper on the Province's CFS reporting for the FHP. It would be helpful if you could help to complete/expand on the extract below as it relates to various activities of the IESO.

Thanks in advance. Have a wonderful weekend.

Nadine

p.s. I know how much you like to read on the weekend, so I thought I'd attach a copy of a CICA research study undertaken some years back. Although IESO isn't a GBE (i.e. not profit oriented), the fact that is does not receive transfers from the government (so is self-sustaining) and has reasonable expectations that it will recover its costs through future rates, might from a user's perspective lend itself to a reasonable conclusion that it should follow the same accounting treatment that the task force recommended for GBEs. Just my own opinion.

Details of IESO's Rate Regulated Activities:

1. IESO is rate regulated by the OEB in accordance with the Electricity Act, 1998 and the Ontario Energy Board ("OEB") Act, 1998 but currently does not recognize the economic impacts of rate regulation in its general purpose financial statements.

2. Various aspects of the IESO's business subject to rate regulation include:

1. In accordance with XXX, the OEB's function in IESO's operations is to approve a rate to meet IESO's projected revenue requirement to recover its operational costs incurred in association with their responsibility to maintain the reliability of the IESO-controlled grid and to provide settlement services for balances due/from generators, transmitters, and market participants.

2. Smart Meter database – per XXX, the IESO is able to recover costs for maintaining the reliability of the IESO-controlled grid and providing settlement services for balances due/from generators, transmitters, and market participants. (confirm that the OEB approves the deferral of the recovery of these expenses. i.e. confirm that the OEB rate order regarding Smart Meter Charges (effective from May 1, 2013 to Oct. 31, 2018) constitutes support for reporting a rate regulated asset under ASC 980.

3. Pensions - XXX

4. GA cost - in accordance with the Electricity Act, 1998 and the OEB Act, 1998, the IESO has approved variance accounts to record all amounts payable or receivable by it in connection with the amounts paid to generators, the Financial Corporation, distributors and to entities with whom the IESO has a procurement contract. (i.e. costs incurred in the past will be fully recovered through future rates).

Note that the Market Accounts track the point in time balances of due to/due from generators, transmitters and market participants for market transactions. They are not rate regulated balances for the IESO, but are rather reported as they represent activities of the entity with 3rd parties to which the IESO is a counterparty and should therefore be reported on the entity's books to support transparency and accountability in reporting.

Financial Reporting by Rate-regulated Enterpri.pdf

FINANCIAL REPORTING BY RATE-REGULATED ENTERPRISES

FOREWORD

Rate-regulated industries are core sectors of the Canadian economy. They have a common characteristic in that they provide services that are considered essential to the public. Most rate-regulated enterprises are required to maintain their accounting records in accordance with uniform systems of accounts prescribed by regulatory agencies. This accounting has not always agreed with GAAP as applied to business enterprises in general.

Some maintain that exceptions for rate-regulated enterprises should be permitted. Otherwise, the orderly markets and trading of a rate-regulated enterprise's securities might be seriously disrupted, which could adversely affect the enterprise's ability to maintain and expand its service capability on an economically sound basis. It has also been argued that any refusal to permit rate-regulated enterprises to defer costs for accounting and reporting purposes that are deferred for rate-making purposes might jeopardize the opportunity to recover similar types of costs through revenues established in future rate proceedings. Others have maintained that permitting rate-regulated enterprises to depart from GAAP as applied to other business enterprises when preparing general purpose financial statements — other than in strictly limited circumstances — undermines the credibility of standard setting. They note that regulatory agencies are often inextricably involved in the political process and are subject to short-term pressures. There is the danger that accounting practices might be managed to hide from users of financial statements adverse impacts on an enterprise. The validity of the concerns expressed by both groups needed to be examined.

Exceptions for rate-regulated enterprises from the accounting followed by other types of business enterprises have been advocated for many years. A bulletin issued by the CICA's Accounting and Auditing Research Committee in September 1967 noted that "the general principles of income measurement should be the same in regulated industries as they are in other enterprises, and that the income tax allocation basis should have equal relevance. However, the Committee recognizes that there may be rare cases where compliance with the recommendations of this Bulletin would be inappropriate for the purpose of achieving a proper matching of costs and revenues." Since that time, Canadian accounting standards have permitted the occasional additional exception for rate-regulated enterprises.

It looked as if the tide might be turning when the Accounting Standards Board issued an Exposure Draft on "Income Taxes" in March 1996. The Exposure Draft proposed that rate-regulated enterprises should record future tax liabilities or assets the same way as other

business enterprises do. It stated that "a regulator ... cannot relieve an enterprise of a liability or asset that was not created by the regulator. ... It is appropriate to recognize an asset or liability for amounts that may be recovered or payable under the ... rate formula. That asset or liability is a temporary difference for which a future income tax liability or future income tax asset would be recognized."

Concerns expressed by rate-regulated enterprises persuaded the Accounting Standards Board to back off from this position, at least temporarily. The final standard, issued in December 1997, indicated that "pending further study of accounting for rate regulated enterprises as a whole, rate regulated enterprises are not required to record future income taxes for temporary differences that arise from assets and liabilities relating to their rate regulated activities to the extent that these future income taxes will be included in the rates charged to customers in the future and will be recoverable at that time ..."

In the late 1990s, accounting by public sector rate-regulated enterprises was also raising some concerns for the CICA Public Sector Accounting Board. One of the key issues related to the essential characteristics of a rate-regulated enterprise, in particular, the required degree of independence of the enterprise being regulated from the rate-setting body.

These concerns led to a proposal being presented, for consideration by both the CICA's Accounting Standards Board and its Public Sector Accounting Board, for a project on financial reporting by rate-regulated enterprises, culminating in the publication of a Research Report.

The objective of this project was to address accounting and reporting issues pertinent to rate-regulated enterprises and to propose what specific guidance the Accounting Standards Board (and possibly the Public Sector Accounting Board) should provide to meet the special needs of such enterprises and the users of their general purpose financial reports. Under its terms of reference, the Study Group set up to undertake this project was asked to consider:

1. What constitutes a rate-regulated enterprise for financial reporting purposes? Is the definition in *CICA Handbook – Accounting* paragraph 3465.09 sufficiently clear, or how should it be amended?
2. What criteria must an enterprise meet to be considered rate regulated?
3. What is the nature of rate regulation and to what degree must it be independent of the enterprises being regulated?
4. Should rate regulation over private sector enterprises be distinguished from rate regulation over public sector enterprises? If so, what are the distinguishing criteria?
5. Does rate regulation introduce an economic dimension in some circumstances that should affect what constitutes "generally accepted accounting principles" (GAAP) for the enterprises being regulated?

6. Can accounting prescribed by rate-regulating authorities be considered, in and of itself, GAAP for rate-regulated enterprises and, if so, to what extent?
7. In setting accounting standards, should the Accounting Standards Board focus on rate-regulated enterprises *per se*, or on rate-regulated activities?
8. Are there any differences among the various types of rate-regulated enterprises or regulatory frameworks that would have an impact on the extent to which GAAP, as set out in the *CICA Handbook – Accounting*, should apply?
9. Assuming that the Recommendations in the *CICA Handbook – Accounting* generally apply to rate-regulated enterprises, are any exemptions needed because of their "special circumstances"? What other changes, if any, need to be made?
10. What additional guidance is needed relating to specific accounting and reporting issues encountered by rate-regulated enterprises?
11. What other information specific to the nature of rate-regulated enterprises should be included in general purpose financial statements or elsewhere?

The CICA expresses its appreciation to John Browne, chair, and the members of the Study Group for undertaking this project, and to J. Paul-Émile Roy, Principal, Research Studies, for providing technical support to the Study Group and for drafting the report under the Study Group's direction. Thanks are also expressed to those who assisted the Study Group by providing comments on a draft of the Research Report.

EXECUTIVE OVERVIEW

Rate-regulated enterprises are a significant part of the Canadian economy. They include, for example, multi-billion-dollar electric utilities and natural gas pipeline companies, and encompass both the private sector and the public sector. The form of regulation can vary from regulation that is based on the cost of providing services to regulation that is based on performance. For telecommunications companies, much of the industry has been deregulated and now operates in a competitive marketplace. For others, such as the electric utilities, the process of deregulation is just beginning.

In light of the changing regulatory environment, the continued relevance of "special" accounting for rate regulation is currently the subject of considerable debate. There are differing views on whether the impact of rate regulation should be reported. Some feel that it results in artificial income smoothing. Others, including the Study Group, are of the opinion that rate regulation can have a direct bearing on the enterprise's economic resources and that this should be reflected in the financial statements. There are also differing views on the appropriate accounting approach. What constitutes generally accepted accounting principles (GAAP) for rate-regulated enterprises and how the *CICA Handbook – Accounting* requirements should be applied to them need to be clearly established. To provide that guidance, the Accounting Standards Board and the Public Sector Accounting Board are jointly sponsoring this research project:

- to address accounting and reporting issues pertinent to rate-regulated enterprises; and
- to suggest the steps that the two boards should take to meet the special needs of such enterprises and the users of their general purpose financial statements.

To provide much-needed guidance to preparers, practitioners and users, this Report proposes that the Accounting Standards Board issue a new *Handbook* Section on accounting for the effects of rate regulation. The new Section would replace the current *Handbook* material. In addition, it would establish general principles for assessing, in a particular situation, whether, and, if so, the degree to which, rate regulation has an economic impact that should be recognized and how it should be reported in general purpose financial statements. In this regard, it is anticipated that the discussion of general principles and differential accounting treatments set out in this Report will provide a useful reference source.

Because the economic benefits and obligations created by rate regulation are similar for many private and public sector enterprises, the consensus of the Study Group is that the general purpose financial statements of rate-regulated enterprises in the public sector should be prepared on a basis consistent with that of rate-regulated enterprises in the private sector. Accordingly, the Public Sector Accounting Board should specifically recognize in *CICA Public Sector Accounting Handbook* that certain public sector entities should apply, where applicable, the accounting recommendations for rate-regulated enterprises contained in the *CICA Handbook – Accounting*. One of the ten members of the Study Group, however, strongly feels that different criteria are needed for a public sector enterprise to qualify as rate regulated for financial reporting purposes. In his opinion, there is usually no "independent third party regulator" because the government normally controls both the affected enterprise and the regulatory agency.

SUMMARY OF CONCLUSIONS

This Research Report addresses 12 primary issues and a multitude of secondary issues. The following outlines, on a chapter-by-chapter basis, the primary issues and the conclusions reached

by the Study Group that undertook this project. 1(1) Support for those conclusions is provided in the relevant chapters, along with an analysis of any alternative views on the issues.

CHAPTER 1

Issue 1 — Is accounting for the effects of rate regulation still a relevant issue?

Accounting for the effects of rate regulation in the general purpose financial statements of rate-regulated enterprises is an important issue and will remain so for the foreseeable future.

CHAPTER 2

Issue 2 — What is rate regulation?

Under rate regulation, an enterprise's rates are established by, or are subject to approval by, a regulator. There are a number of basic regulatory processes and methodologies and, within each, there can be different applications that vary with the regulator, the entity being regulated and the circumstances faced.

CHAPTER 3

Issue 3 — What is the appropriate accounting approach?

Different approaches have been suggested for accounting for rate regulation. The approach adopted should be based on a framework that recognizes the economic impacts of rate regulation, identifies the financial reporting concepts that should guide the recognition of those impacts to the extent that they exist, and considers existing practice in both Canada and the US.

CHAPTER 4

Issue 4 — What is the current financial reporting environment?

Accounting pronouncements and practices in Canada recognize that, in certain circumstances, rate regulation can affect what should be reported in the financial statements. In the United States, accounting pronouncements also recognize the effects of rate regulation. They establish a comprehensive framework for reporting the economic impact of rate regulation and provide detailed guidance to rate-regulated enterprises. In the United Kingdom, accounting pronouncements do not address the effects of rate regulation. Nonetheless, there is increasing interest in developing a conceptual framework for accounting by regulated industries. Accounting standards that were issued by the International Accounting Standards Committee (IASC) do not address the effects of rate regulation.

Issue 5 — What further guidance should be provided?

General guidance on accounting for the effects of rate regulation should be issued as a new Section in the *CICA Handbook – Accounting*. The new Section would replace the material currently contained in the *Handbook* relating to rate-regulated enterprises and would provide

any additional guidance that is considered necessary. It would set out general principles to provide a "framework" for applying GAAP to rate-regulated enterprises within the boundaries established by "Financial Statement Concepts," Section 1000. The general principles would provide the basis for assessing, in a particular situation, whether rate regulation has an economic impact that should be reported and, if so, how it should be reported in general purpose financial statements.

CHAPTER 5

Issue 6 — Can regulatory authorities establish GAAP?

Regulatory authorities cannot establish GAAP. The Recommendations in the *CICA Handbook – Accounting* constitute GAAP. Although the actions of regulators may affect rates and the resulting economic impact may affect what should be reported in accordance with GAAP, this does not give them the right to determine how that economic impact should be reported in general purpose financial statements.

Issue 7 — Can rate regulation have an economic impact?

Regardless of the rate-setting process or methodology used, from an economic perspective, rate regulation can have a direct bearing on the economic resources, obligations and performance of a rate-regulated enterprise. It can influence rates that, combined with market conditions, can have an economic impact on current and future revenues and cash flows, thereby affecting future economic benefits and obligations.

Issue 8 — Should the effects of rate regulation be reported in general purpose financial statements?

The economic benefits and obligations created by rate regulation and resulting from past transactions or events, and the changes in these amounts, meet the definition of a financial statement element set out in "Financial Statement Concepts," Section 1000 of the *CICA Handbook – Accounting*. Where they also meet the recognition criteria set out in Section 1000, those elements should be reported in the general purpose financial statements of a rate-regulated enterprise as assets, liabilities, revenues, expenses, gains and losses.

CHAPTER 6

Issue 9 — What is a rate-regulated enterprise?

The *CICA Handbook – Accounting* establishes the criteria that must be met if an enterprise is to be considered "rate regulated" for financial reporting purposes. The criteria for qualifying as a "rate-regulated enterprise" in Canada are essentially the same as those in the United States. To eliminate minor differences with US accounting standards, the *Handbook* definition should be amended to conform to the wording used in SFAS 71. For rate regulation to have an impact on what should be reported in accordance with GAAP, it is not a prerequisite for the entire

operations of the enterprise to be subject to rate regulation; it is only necessary that a subset of the enterprise's operations be subject to rate regulation. Consequently, where only some of an enterprise's operations are rate regulated, the financial statements would reflect the economic impact of rate regulation on only that portion of operations. This approach is consistent with current practice and with US GAAP.

CHAPTER 7

Issue 10 — What general principles should be used by rate-regulated enterprises?

Rate-regulated enterprises should use the following general principles when preparing general purpose financial statements in accordance with GAAP:

Application

1. The economic impact of rate regulation should be reflected in the general purpose financial statements of an enterprise that has regulated operations that meet all of the following criteria:
    - The enterprise's rates for regulated services or products provided to its customers are established by, or are subject to approval by, an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.
    - The regulated rates are designed to recover the specific enterprise's costs of providing the regulated services or products, including a fair return on investment.
    - In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the enterprise's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs.
2. If some of an enterprise's operations are regulated and meet the above criteria, the financial statements should reflect the economic impact of rate regulation on only that portion of operations.
3. When an enterprise that has regulated operations no longer meets the criteria set out in Principle 1, it should discontinue reflecting the economic impact of rate regulation and reflect the effects of discontinuation in its general purpose financial statements.

Recognition of Regulatory Assets and Liabilities

4. Rate-regulated enterprises should recognize a regulatory asset in their financial statements, when all of the following conditions are met:
    - Rate regulation creates an economic benefit in the form of increased future

revenues as a result of a past transaction or event.

- It is probable that the enterprise's regulator will set future rates sufficient to provide the economic benefit.
- Future rates sufficient to provide additional revenue at least equal to the economic benefit will be chargeable and collectible from customers.
- There is an appropriate basis for measuring the asset and a reasonable estimate can be made of the amount involved.

5. A regulatory asset should be valued at the lower of the expected economic benefit and the cost incurred to acquire the economic benefit.
6. Where the economic benefit is increased and the increase meets all of the conditions in Principle 4, or a portion of the economic benefit that previously did not meet all of the conditions in Principle 4 now meets those conditions, the value of the regulatory asset should be increased by the related amount.
7. Where all or a portion of a regulatory asset no longer meets the conditions in Principle 4, the value of the regulatory asset should be reduced by the related amount.
8. Rate-regulated enterprises should recognize a regulatory liability in their financial statements when all of the following conditions are met:
   - Rate regulation creates an economic obligation in the form of decreased future revenues, or payments to customers, as a result of a past transaction or event.
   - It is probable that the enterprise's regulator will set rates sufficient to reduce revenues by the amount of the liability or require payments to customers equal to the liability.
   - There is an appropriate basis for measuring the liability and a reasonable estimate can be made of the amount involved.
9. Where the economic obligation is increased, or a portion of the economic obligation that previously did not meet all of the conditions in Principle 8 now meets the conditions, the value of the regulatory liability should be increased by the related amount.
10. Where all or a portion of a regulatory liability no longer meets the conditions in Principle 8, the value of the regulatory liability should be reduced by the related amount.

Recognition of Revenues, Expenses, Gains and Losses

11. The financial statements of rate-regulated enterprises should report the changes in

regulatory assets and liabilities as revenues, expenses, gains or losses.

Presentation and disclosure

12. Notes to the general purpose financial statements of rate-regulated enterprises should disclose:

    - that the enterprise (or certain of its operations) is rate regulated for financial reporting purposes or, alternatively, that the enterprise was rate regulated in the prior period, but no longer meets the established criteria for a rate-regulated enterprise;
    - the regulator(s) and the jurisdiction(s) covered (even if the enterprise no longer qualifies as rate regulated);
    - that the financial statements are prepared in accordance with Canadian GAAP.

13. Notes to the general purpose financial statements of rate-regulated enterprises should disclose how rate regulation affects the reported values of individual assets and liabilities on a going-forward basis.

CHAPTER 8

Issue 11 — Do the General Principles apply to the public sector?

With respect to the scope of public sector activities that may be considered "rate regulated" for financial reporting purposes, the consensus of the Study Group is that the application of General Principle 1 should be limited to government business enterprises (GBEs) that meet all the criteria for qualifying as a rate-regulated enterprise. In this regard, *CICA Public Sector Accounting Handbook* Recommendations should specifically recognize that only GBEs that qualify as rate-regulated enterprises for financial reporting purposes should apply the accounting recommendations for rate-regulated enterprises contained in the *CICA Handbook – Accounting*. One Study Group member, however, feels strongly that in order for a GBE to qualify as a rate-regulated enterprise for financial reporting purposes, the regulatory agency must be independent of both the GBE and government. The consensus of the Study Group is that the General Principles regarding application, recognition, presentation and disclosure apply equally to all GBEs that meet the criteria in General Principle 1, since the economic benefits and obligations created by rate regulation are similar for many private and public sector enterprises. Therefore, the general purpose financial statements of rate-regulated enterprises in both the public and private sectors should be prepared on a consistent basis. One member would support this position only in the unlikely event that the regulatory agency is independent of both the GBE and the government.

CHAPTER 9

Issue 12 — What additional guidance is needed for specific accounting and reporting

issues encountered by rate-regulated enterprises?

While detailed guidance for recognizing the economic impact of rate regulation on the financial reporting of rate-regulated enterprises is not essential, additional guidance would help avoid any misunderstanding and, at the same time, illustrate how the general principles should be applied in practice. Accordingly, this chapter addresses specific issues that are considered of interest to the regulatory community. Emphasis is given to areas that may have a material impact on general purpose financial statements. Consideration is also given to circumstances that may indicate the need to discontinue accounting for the effects of rate regulation.

Chapter 1

INTRODUCTION

"Rate regulation" is imposed by a government, which creates legislation setting up a regulatory authority and gives it jurisdiction to approve the rates of specific enterprises or categories of enterprises.

OUTLINE OF THE REPORT

The objective of this Research Report is to address accounting and reporting issues pertinent to rate-regulated enterprises and to propose what specific guidance should be provided to meet the special needs of such enterprises and the users of their general purpose financial statements. The terms of reference for this project are set out in the Foreword to this Report.

Chapter 1 provides an overview of the financial reporting environment in which rate-regulated enterprises operate. Chapter 2 examines the nature of rate regulation. Chapter 3 considers the differing viewpoints on accounting by rate-regulated enterprises that have been proposed and explains the approach the Study Group considers the most appropriate and the reasons for its decision. Chapter 4 then reviews accounting standards and financial reporting practices in Canada and elsewhere, and assesses what further accounting guidance should be provided.

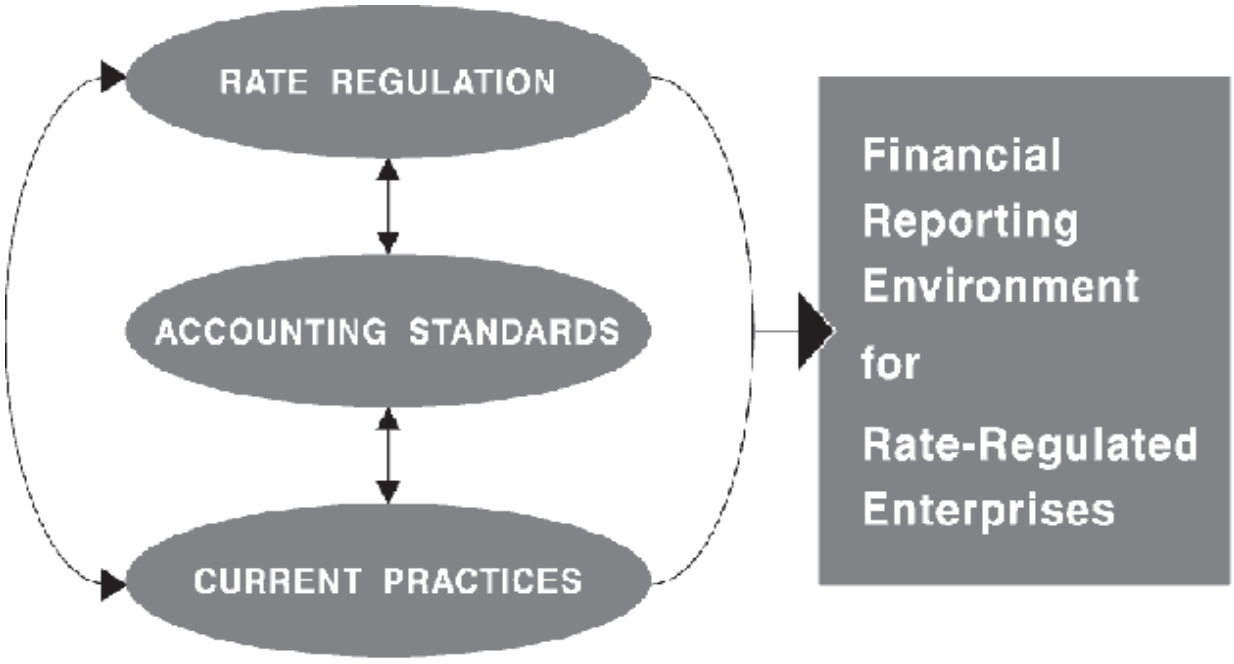
Using the financial reporting environment as the foundation, Chapter 5 discusses whether regulatory authorities can establish GAAP, the relationship of rate regulation to accounting, and the circumstances under which the effects of rate regulation should be reported in general purpose financial statements. Chapter 6 examines the criteria an enterprise must meet to qualify as rate-regulated for financial reporting purposes. Chapter 7 proposes general principles for financial reporting by rate-regulated enterprises in the private sector and Chapter 8 assesses whether those general principles should also be applied to rate-regulated enterprises in the public sector. Chapter 9 illustrates how the general principles can be applied to specific accounting and financial reporting issues.

Several appendices supplement the discussions contained in this Research Report. Appendix A compares the conceptual frameworks in Canada and the United States. Appendix B presents the results of a survey of current disclosure practices by industry and is supplemented by Appendix C, which presents selected illustrative financial statement disclosures. Appendix D reports on a survey of public sector practices. Appendix E provides an overview of rate regulation in the electric power industry. A glossary of terms and a selected bibliography are also included.

FINANCIAL REPORTING ENVIRONMENT

To address accounting and reporting issues pertinent to rate-regulated enterprises, it is important to understand the financial reporting environment in which they operate. Exhibit 1.1 depicts that environment as having three components: rate regulation, accounting standards and current reporting practices. Each of the components interacts significantly with the others. For example, rate regulation can impose requirements that affect accounting and financial reporting. In turn, this will be reflected in the reporting practices of rate-regulated enterprises. The following provides an overview of the three components (they are discussed further in Chapters 2, 3 and 4).

Exhibit 1.1



Rate Regulation

"Rate regulation" is the restriction in the setting of prices that can be charged to customers for services or products. From an economic perspective, rate regulation can have a direct bearing on

the economic resources, obligations and performance of a rate-regulated enterprise. Traditionally, rate regulation has been imposed on essential public services where competition was considered inadequate to protect customers; for example, electric utilities, gas distribution utilities, pipelines, telecommunication companies and transportation companies. In some of these industries, there has been a trend to increasing competition and the removal of rate regulation or movement from cost-based to performance-based rate regulation. This raises questions about whether accounting for the effects of rate regulation will continue to be a significant issue, whether separate accounting standards are warranted for rate-regulated enterprises, and whether such standards should apply equally to the private and pubic sectors. 1(2)

Accounting Standards

Accounting standards and current practices in Canada recognize that, in certain circumstances, rate regulation can affect the future economic benefits and obligations that should be reported in the financial statements. In fact, the *CICA Handbook – Accounting* establishes the criteria that an enterprise must meet to be considered "rate regulated" for financial reporting purposes. 2(3) Unlike the situation under US standards, however, there are relatively few situations where the guidance provided in the *CICA Handbook – Accounting* is specifically directed at rate-regulated enterprises. Consequently, the practice of looking to US standards for guidance has developed. 3(4)

Generally Accepted Accounting Principles

In July 2001, the Accounting Standards Board (AcSB) issued an exposure draft on "Generally Accepted Accounting Principles," a proposed new *Handbook* Section that will describe what constitutes GAAP and its sources. These sources are divided into three levels — Board pronouncements (Level 1), Board authorized pronouncements (Level 2) and other sources of GAAP (Level 3). This proposed new Section addresses the relative status and authority of *Handbook – Accounting* italicized Recommendations, non-italicized paragraphs and appendices, Accounting Guidelines (Level 1), Abstracts of Issues Discussed by the Emerging Issues Committee, board-authorized implementation guidance (Level 2), and other sources of GAAP, such as US (FASB) Financial Accounting Standards and International Accounting Standards, prevalent practice, generally or within a particular industry, and Canadian research reports and studies (Level 3). It includes explanatory paragraphs to help a reader understand where to look fr guidance, especially when the *Handbook* is silent.

The AcSB therefore proposes removing the existing coverage of generally accepted accounting principles in paragraphs .59 and .60 of "Financial Statement Concepts," *Handbook* Section 1000. In light of the clearer definition of GAAP, the AcSB also proposes removing paragraph 1000.61 and paragraph .06 of "General Standards of Financial Statement Presentation," *Handbook* Section 1500, which deal with a departure from *Handbook* Recommendations, and to revise *Handbook* Section 1500, primarily to update the requirements and clarify that anything

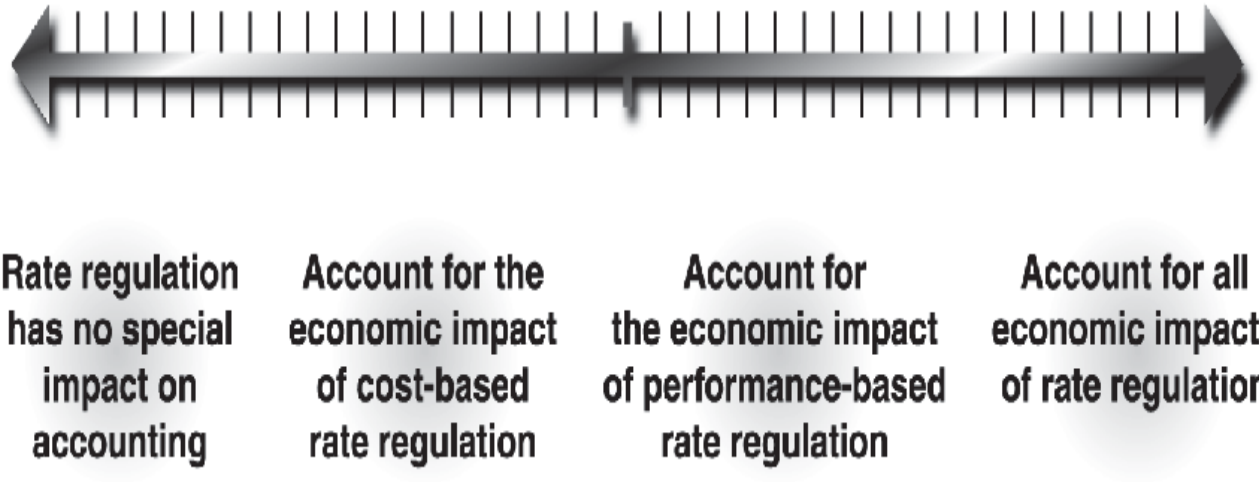
required by GAAP must be incorporated in the financial statements, which includes notes and supporting schedules.

WHY IS GUIDANCE NEEDED?

Widely diverging views have been expressed on the need for the differential treatment in the application of GAAP to rate-regulated enterprises. Exhibit 1.2 outlines the major views as a continuum, with the mileposts reflecting some common points. To keep pace with the new forms of rate regulation, practice is evolving. What is considered to be current practice is approximated by the mid point on the continuum.

Exhibit 1.2

VIEWS ON THE NEED FOR DIFFERENTIAL TREATMENT



There is no special impact of rate regulation for which to account

According to this view, rate regulation does not have an economic impact that should be reported in the financial statements. Those holding this view maintain that accounting for any perceived impact of rate regulation distorts the financial statements and may result in artificial income smoothing.

Account for the economic impact of cost-based regulation

According to this view, there are economic impacts of rate regulation that should be reported in financial statements, but only where rates are cost based. Those holding this view maintain that this is consistent with existing Canadian and US accounting standards that encompass the reporting of economic benefits (regulatory assets) and economic obligations (regulatory

liabilities) by rate-regulated enterprises. They would prefer to maintain the status quo. In other words, entities meeting the definition of "rate-regulated enterprise" in various sections of the Handbook would normally report regulatory assets and liabilities resulting from cost-based rate regulation.

Account for the economic impact of performance-based regulation

This view is similar to the one above, except that it would also encompass the impacts of performance-based regulation. Those holding this view maintain that, in many cases, performance-based regulation is essentially cost-based.

Account for all economic impacts of rate regulation

According to this view, if the actions of a regulator have an economic impact on an enterprise, that economic impact should be reflected in the general purpose financial statements, regardless of the method of regulation employed. Those holding this view maintain that the rate-setting process can affect future revenues and, thereby, create future economic benefits and obligations.

Survey of Canadian Rate-regulated Enterprises and Canadian Practice

Given the alternative views regarding the need for the differential treatment in the application of GAAP to rate-regulated enterprises and to investigate the extent to which rate-regulated enterprises are still prevalent, the following work was undertaken:

- a survey of 25 rate-regulated enterprises across Canada providing hydro-electric, natural gas transmission and distribution, and telecommunications services; 4(5)
- a discussion group meeting of 10 individuals (six from rate-regulated enterprises, one regulator, one consultant to rate-regulated enterprises, an academic and a legislative auditor).

The August 1999 survey posed the question: "Is accounting for rate-regulated enterprises still a relevant issue in light of deregulation or incentive-based regulation?" In the opinion of those responding to the survey (there was a 40% response rate, that is, 10 responses), **the issue of accounting for rate-regulated enterprises is still very relevant**. The lack of response from representatives in the telecommunications industry indicates, however, that it may no longer be a relevant issue in that particular industry because deregulation is occurring.

The discussion group, which met in October 1999, unanimously agreed that **accounting for rate-regulated enterprises is still a relevant issue**. When industry representatives were asked whether they would be concerned if the exceptions for rate-regulated enterprises were removed from the *Handbook*, they indicated that such removal would be a significant issue for their

enterprises.

As part of the above-noted survey, a second question was asked: "What are the significant accounting issues in your enterprise?" Survey respondents identified several significant issues: the definition of rate-regulated enterprises (or activities); the use of accrual versus cash basis of accounting; comparability and consistency of information reported by rate-regulated enterprises; and variations in the application of GAAP. With respect to the need for guidance, they identified a number of significant concerns about accounting for fixed / capital assets, income taxes, intercompany gains and losses, employee future benefits, foreign exchange and financial instruments.

At the above-noted discussion group meeting, all those present confirmed the significance of the accounting concerns raised in the survey. They felt that a research project would be extremely useful for anyone involved with accounting for rate-regulated enterprises, including the enterprises themselves, regulators, auditors, academics and those providing consulting services to such enterprises. Such a project would consider whether the differential treatment provided in the *Handbook* is still relevant and also provide guidance on how the accounting recommendations in the *Handbook* should be applied to rate-regulated enterprises.

While there is a move to allowing competition and relying on competitive forces to replace rate regulation, the prevailing view is that there will continue to be natural monopolies that require rate regulation, at least for the foreseeable future. Monopolies that will continue to be subject to rate regulation represent a significant portion of the Canadian economy. For example, electric transmission and distribution in Québec have an investment base in the range of $23 billion. It was noted that rate regulation has traditionally been, and will continue to be, a necessary instrument for governments to ensure "just and reasonable rates" where effective competition does not exist.

With respect to deregulation, it was observed that:

- Only specific business activities or services of a utility are being deregulated.
- Even with deregulation in some sectors, many monopolies still exist.
- The utilities industry in Canada is facing different forms of regulation as opposed to deregulation.

With respect to incentive-based regulation, it was observed that:

- Incentive-based regulation retains most elements of cost-based regulation and cost recovery from the customer.
- Incentive-based regulation is a variation of cost-of-service regulation, which allows an entity to earn more than its allowed rate of return if it is able to reduce its costs, but increases the risk that it will earn less than its allowed rate of return if it is unable to

manage its costs.

- Accounting issues that are relevant under regulation are still present in incentive-based regulation.

In summary, guidance is needed on accounting for rate-regulated enterprises because:

- Regulation has an impact on what a regulated enterprise reports in its financial statements because rate regulation can create assets and liabilities, and can affect an enterprise's cash flows and what should be reported in accordance with GAAP.
- There is no clear distinction between accounting principles used for rate-setting purposes (sometimes referred to as "regulatory accounting principles" or "RAP") and generally accepted accounting principles or "GAAP".
- There is little specific guidance in Canada on accounting by regulated enterprises, and what is available is somewhat dated.

Other Steps Taken by the Study Group in the Preparation of This Report

In addition to the survey of Canadian rate-regulated enterprises and practice referred to above, other steps taken during the preparation of this report were as follows:

- Reviewing Canadian and US accounting standards and other accounting literature on this subject.
- Monitoring any developments in the United Kingdom on this subject.
- Holding informal discussions with staff at the US Governmental Accounting Standards Board (GASB) regarding US standards and practice on this subject (particularly as they relate to US public sector rate-regulated enterprises).
- Having one of the Study Group members present its preliminary findings at the 2000 conference of legislative auditors.
- Distributing an "associates draft" to colleagues of Study Group members and other interested parties for their comment. The Study Group distributed 34 copies of the draft and received and analyzed 19 responses. Those who responded included rate-regulated enterprises' staff and their auditors, other representatives from public accounting firms, legislative auditors, provincial comptrollers, and consultants in the area of rate regulation.
- Undertaking a survey of federal, provincial and territorial comptrollers regarding current financial reporting practices of public sector rate-regulated enterprises within their jurisdiction. Excerpts from their responses are set out in Appendix D.

CONCLUSION

This chapter states the objective of this research project and sets out an outline of the report. It assesses whether accounting for the effects of rate regulation is still a relevant issue and whether there is a need for guidance.

In the Study Group's view, 5(6) accounting for the effects of rate regulation in the general purpose financial statements of rate-regulated enterprises is an important issue and will remain so for the foreseeable future.

Chapter 2

RATE REGULATION IN CANADA

Rate regulation can have a direct bearing on the economic resources and performance of a rate-regulated enterprise. There are a number of basic methodologies and applications that vary with the regulator, the entity being regulated and the circumstances faced.

INTRODUCTION

Chapter 1 of this Research Report concluded that accounting for the effects of rate regulation in the general purpose financial statements of rate-regulated enterprises is an important issue and will remain so for the foreseeable future. Furthermore, more specific guidance is needed on the application of GAAP to rate-regulated enterprises to meet the needs of both preparers and users of their general purpose financial statements.

Developing appropriate guidance requires a sound understanding of the financial reporting environment in which rate-regulated enterprises currently operate. As noted in Chapter 1 (Exhibit 1.1), that environment encompasses rate regulation, accounting standards and current reporting practices. In this chapter, the Study Group examines the first of these components. It defines "rate regulation" and explains the basic rate-setting processes and methodologies being used in Canada.

RATE REGULATION — WHAT IT IS AND HOW IT OPERATES

Rate regulation is the restriction in the setting of prices that can be charged to customers for services or products. Under rate regulation, an enterprise's rates are established by, or are subject to approval by, a regulator.

The goal of rate regulation is to set "just and reasonable rates." Generally, rate regulation is imposed where an enterprise has a monopoly or a dominant market position that gives it excessive market power. In such situations, there is a lack of effective competition to constrain

the prices that the enterprise can charge. To compensate, governments impose rate regulation.

In most cases, governments impose rate regulation by creating legislation setting up a regulatory authority and giving it jurisdiction to approve the rates of specific enterprises or categories of enterprises (for example, electric distribution utilities). Enterprises falling within the jurisdiction of the regulatory authority are not allowed to charge prices other than those approved by the regulatory authority.

In Canada, both the federal and provincial governments have created regulatory authorities. Whether an enterprise is subject to federal or provincial authority depends on whether its activities are deemed to fall under federal or provincial jurisdiction. For example, telecommunications fall under federal jurisdiction. Telecommunications enterprises that are subject to rate regulation are within the jurisdiction of the Canadian Radio-television Telecommunications Commission (CRTC), which was created under federal legislation. Electric power distribution falls under provincial legislation. Electric distribution utilities subject to rate regulation are within the jurisdiction of provincial regulators, such as the Alberta Energy and Utilities Board. 1(7)

The norm is for a government to create a separate regulatory authority. A government may regulate rates through other means, however, such as empowering the governing body of government-owned utilities to set rates in accordance with a statute. For example, prior to the restructuring of the Ontario electric power industry, the board of directors of Ontario Hydro was given statutory authority to set rates for the utility that would allow it to recover the costs of providing services to customers. 2(8)

In the past, rate regulation tended to be applied to an entire organization. With acquisitions, diversification and deregulation, rate regulation may be applied to only a portion of an organization's operations. In some cases, an organization may have both regulated and non-regulated operations, and the regulated operations may be subject to the authority of different regulators.

There is no universal method of rate regulation. The rate-setting process and the application of that process can vary from one jurisdiction to another. Within a jurisdiction, it can vary from one enterprise to another. In addition, rate regulation is constantly evolving.

Rate-setting Processes

Traditionally, regulatory authorities have convened public hearings to review the rate applications of large utilities. After the utility prepares a submission setting out its proposed rates, and the support for those rates, the regulatory authority may decide to hold a hearing. Usually, three to five members of the regulatory authority form a panel to preside over these proceedings. Prior to the public hearing, the regulatory authority and other interested parties, called "interveners," submit written questions, to which the regulated enterprise must respond.

The questions deal with clarification of the regulated enterprise's submission.

Interveners may also make a submission and, where they do so, they must also respond to written questions from the regulated enterprise, the regulatory authority and other interveners. At the public hearing, any individual who has made a submission on behalf of the regulated enterprise must submit to cross-examination under oath by lawyers representing interveners or, in the case of submissions on behalf of an intervener, lawyers representing the regulated enterprise or other interveners. In some cases, the witnesses may be cross-examined by the members of the regulatory panel. After the hearing is completed, the members of the panel make a decision based on the submissions, the response to the written questions and the testimony given at the public hearing.

As an alternative to a public hearing, a regulatory authority may have a "paper hearing." This is similar to the above process, except that there is no hearing. The regulated enterprise and interveners make written submissions, submit written questions and provide written responses. Based on this written documentation, the regulatory authority makes a decision.

There is currently a trend to negotiated settlements. The regulated enterprise and representatives of its customers negotiate allowed rates, or at least issues that affect the determination of allowed rates. Issues that cannot be settled by negotiation go to the regulator for resolution. Also, the regulator must approve any settlement.

The negotiation process is intended to be more informal and less adversarial than the normal regulatory process. It is expected to be less costly and offers the opportunity for better settlements. In the hearing process, the regulated enterprise and other interested parties put their position to the regulator, who then renders a decision based on the evidence presented. With a negotiated settlement, the regulated enterprise can negotiate rates with the other interested parties, which offers the opportunity for a settlement that is preferred by all parties.

Rate-setting Methodologies

The legislation empowering a regulatory authority usually provides little direction on how rates are to be established, except that the rates must be "just and reasonable" or a similar general statement. Usually, regulatory authorities have significant discretion in deciding the regulatory methodology that will be used in setting allowed rates and how that methodology will be applied.

There are a number of basic regulatory methodologies and, for each, there can be applications that vary with the regulator, the entity being regulated and the circumstances faced. In some cases, a specific rate must be charged; in other cases, a maximum limit is set on the rates.

In the past, the primary regulatory methodology for the major utilities was "cost-of-service" regulation, also referred to as "return-on-rate-base" regulation. Under this approach, rates are set to give the utility the opportunity to recover its costs of providing service plus a fair return.

In recent years, however, there has been a trend to performance-based regulatory methodologies, such as price-cap regulation. With price-cap regulation, initial rates often reflect the cost of service, but are allowed to increase, or are required to decrease, in accordance with a formula over time.

The following provides a brief description of the most common rate-setting methodologies:

- cost of service / return-on-rate base;
- price cap;
- revenue cap;
- hybrid price cap / cost of service;
- benchmarking.

Cost of Service / Return-on-Rate Base

Under cost-of-service regulation, the rates are set to provide a rate-regulated enterprise the opportunity to recover its costs and earn a return on its investment. The regulator establishes the revenues required to cover the expected cost of providing the regulated service, including a fair return on the investment in the regulated operations. This amount is called the "revenue requirement." The regulator then sets rates that will provide the enterprise with a reasonable opportunity to recover its revenue requirement. Exhibit 2.1 shows the equation that is frequently used to determine the revenue requirement.

Exhibit 2.1

DETERMINING THE REVENUE REQUIREMENT

Operating, Maintenance and Administrative Costs (OM&A Costs)

+

Allowed return on investment (rate base)

=

Revenue Requirement

OM&A costs include all office and field operating costs, various taxes, including income taxes, and depreciation. This component of the cost of service is merely a sum of the costs for the period, usually one year. The allowed return is intended to cover interest expense and provide a fair return on equity. It is equal to the allowed rate of return times the investment in

regulated operations, which is referred to as the "rate base." The allowed return reflects the cost of debt and a return on equity. The cost of debt is based on the actual debt outstanding plus the forecast cost of any proposed debt issues for the year. The return on equity is based on what investors require on non-regulated investments of similar risk. Exhibit 2.2 presents a simplified example of the allowed return calculation.

Rates may be set for a short period, such as a year, or may be set until changed. In the latter case, the enterprise seeks new rates when existing rates will not allow it to recover its costs and earn a fair return. Alternatively, the regulator may seek a rate review when allowed rates are considered excessive. As a result, a regulated enterprise's actual return is usually close to its allowed return.

Exhibit 2.2

ALLOWED RETURN CALCULATION

	Amount	Ratio		Cost Rate		Cost
Component	($ millions)					
Long-term debt		70%	X	10%	=	7.0%
Common equity			X	15%	=	4.5%
	200					**11.5%**
Rate Base	**200**					

In this example, the rate-regulated enterprise would have a deemed or actual common equity ratio of 30%, an allowed rate of return on common equity of 15%, and a rate of return on rate base of 11.5%.

Using the example above, if actual revenues and costs equal forecast costs (including a fair return), the following would be the financial statement results:

If the rate base is $200 million, then net income would be:
$200 million x 30% x 15% = $9 million

Interest expense would be:
$200 million x 70% x 10% = $14 million

If OM&A costs are $60 million, then revenues would be:
$60 million + $9 million + $14 million = $83 million

The return on rate base would be:
$200 million x 11.5% = $23 million (or $9 million + $14 million)

With cost-of-service regulation, there is a direct link between the costs that an enterprise is

expected to incur and its expected revenue — rates are set to allow the enterprise to recover its expected costs. Although regulators may follow GAAP in determining the amount of any specific cost to be included in the cost of service, it is not always the case. Regulatory authorities may decide that additional considerations are appropriate in setting "just and reasonable" rates, for example:

- *Cost deferral*
  Where certain specific costs are subject to material variation, are difficult to predict and are largely outside the control of management, a regulator may require a regulated enterprise to place the difference between the expected and actual amount of those costs in a deferral account. The amount in the deferral account may then be used to increase or decrease the future revenue requirement. This results in a portion of the costs (or cost savings) of one period being included in the revenue requirement of another. In some cases, deferral balances may be refunded or recovered in a lump sum and the revenue requirement is not adjusted.
- *Rate smoothing*
  To avoid rate fluctuations or to smooth out an increase in rates, a regulator may defer costs (or cost savings) with the deferred amount to be reflected in future rates.
- *Cost disallowance*
  Where a regulator decides that a cost was not prudently incurred, it may disallow all or part of the cost, thereby reducing (or eliminating) any future recovery of that cost.

In most cases, where a regulator decides to defer the recovery of a cost, it is assumed that the regulated enterprise will recover that cost. With rates set below what would be recoverable in an unregulated market, the enterprise can usually collect any increase in rates required to recover the deferred cost.

Price Cap

With price-cap regulation, prices are capped, with the capped rates changing each period in accordance with a formula. In its simplest form, rates are allowed to increase by a percentage amount equal to the rate of inflation less a productivity factor. Where the measure of productivity is greater than the rate of inflation, rates must be decreased.

Increase in allowed rates = Inflation – Productivity

The formula may include provision for what is sometimes referred to as a "Z" or exogenous factor. This is an adjustment for costs or cost savings not covered by the basic formula. Generally, amounts covered by the "Z" factor must be material and outside the control of

management. A common example is an unexpected change in income tax rates. If income tax rates increase, the rates of the rate-regulated enterprise are allowed to increase beyond what would be allowed by the formula to cover the increase in this cost. The "Z" factor recognizes the difficulty in developing a simple formula that will deal with all economic and other events.

The price-cap methodology may contain deferral accounts. As noted above under cost-of-service regulation, these accounts deal with specific costs that vary significantly, are difficult to predict or are largely outside the control of management. Differences between the expected and actual level of the costs are placed in a deferral account and recovered through an increase in future rates or used to reduce future rates.

With price-cap regulation, there are usually periodic reviews of the formula to ensure that the resulting rates are just and reasonable. These reviews are undertaken every three to six years. The reviews may result in an adjustment to the base rates and/or the formula for increasing (decreasing) rates. In some cases, the formula may have an "off ramp" that will allow for an early review under specific conditions. As with the "Z" factor, the "off ramp" recognizes that a simple formula cannot deal with all possible situations.

It has been argued that price-cap regulation breaks the link between rates and costs; rate increases are based on the price-cap formula and not on changes in the costs of the regulated enterprise. There is rarely a complete break, however, between rates and costs. For example:

- Initial rates will often reflect the cost of service.
- The price cap formula is usually intended to reflect reasonably expected changes in costs.
- In the periodic reviews, rates will often be evaluated against the cost of service.
- The "Z" factor allows for changes in rates to reflect costs, or cost savings, not covered by the price-cap formula.
- Deferral accounts result in an adjustment in rates to reflect differences between the expected and actual level of specific costs.

Revenue Cap

Revenue-cap regulation is essentially the same as price-cap regulation, except that revenues are capped rather than rates (that is, revenues are allowed to increase at a rate equal to inflation less productivity). With price-cap regulation, prices are regulated and total revenues will fluctuate with changes in demand. With revenue-cap regulation, total revenues are regulated and prices will fluctuate with changes in demand. For example, with price-cap regulation, an increase in demand will result in an increase in total revenues whereas, with revenue-cap regulation, rates would fall.

Revenue-cap regulation is applied where costs are essentially fixed. In some cases, the formula may require an adjustment factor to deal with the expected changes in variable costs in response to expected changes in demand. As with price-cap regulation, there is usually not a complete break between rates and costs.

Hybrid — Price Cap / Cost of Service

The hybrid methodology is a modification of the price-cap and cost-of-service methodologies. Rates are set in accordance with a price-cap formula. At the end of the year, the actual return on equity is compared to the allowed return on equity. A portion of earnings in excess of that allowed must be returned to customers through a reduction in future rates. In some cases, a portion of any earnings below those allowed is shared with customers through an increase in future rates. The hybrid methodology increases the link between allowed rates and costs, since a portion of cost savings (and in some cases, cost overages) are passed on to customers through adjustments to future rates.

Benchmarking

With benchmarking, rates are based on prices, or costs, of other organizations. They may be the prices of non-regulated enterprises or regulated enterprises. The use of benchmarking is limited by the difficulty in finding comparable enterprises and situations against which to benchmark rates. Also, the prices against which rates are benchmarked may not be just and reasonable.

The use of rates charged by other regulated enterprises poses additional problems. In effect, the regulator grants rate-setting authority over the enterprise to the regulator of the enterprises against which rates are benchmarked. With benchmarking there is a break between rates and costs, at least the costs of the regulated enterprise.

CONCLUSION

In this chapter, the Study Group defines what is meant by "rate regulation," and discusses the various processes and methodologies that may be used.

Under rate regulation, an enterprise's rates are established by, or are subject to approval by, a regulator. There are a number of basic regulatory processes and methodologies and, within each, there can be different applications that vary with the regulator, the entity being regulated and the circumstances faced.

Chapter 3

ACCOUNTING FOR RATE REGULATION

Views differ on whether, and, if so, the extent to which, differential accounting by rate-regulated enterprises should be permitted. This chapter considers those differing views and sets out the Study Group's view on the approach that should be taken.

INTRODUCTION

Chapter 1 noted that there were differing views on the need for differential treatment in the application of GAAP to rate-regulated enterprises. The major views were set out as a continuum in Exhibit 1.2. As a related issue, there are also differing views on the approaches that should be taken with respect to accounting by such enterprises. This chapter examines some of those approaches.

APPROACHES TO ACCOUNTING FOR RATE REGULATION

Approaches that could be taken with respect to accounting for rate-regulation include the following.

No Differential Treatment

Under this approach, rate-regulated enterprises would be required to follow GAAP as prescribed for other types of business enterprises. No differential treatment would be permitted.

Those supporting this viewpoint believe that the action of a regulator does not, in itself, provide compelling support for altering the timing of recognition of costs and revenues from that otherwise expected under GAAP. As far as they are concerned, no true economic difference exists between regulated and non-regulated enterprises, only a different source for how prices are determined.

In their opinion, it is questionable whether the financial statements, and in particular, the income statement, would truly reflect the operations for a particular period, since certain costs and revenues would not be recognized in the period in which they were incurred or earned. Any changes in rates made by the regulator to permit the recovery or return of such deferred amounts are, in their opinion, properly reflected in subsequent periods in which the revenues are actually received. It is noted that "the goal of accrual accounting for a business enterprise is to account in the periods in which they occur for the effects of transactions and other events and circumstances, to the extent that those financial effects are recognizable and measurable." 1(9) By permitting such transactions, events and circumstances to be reflected in a period in which they do not occur does not reflect the goal of accrual accounting.

Accounting for Rate Regulation Strictly Limited to Those Differences Specifically

Permitted

Under this approach, rate-regulated enterprises would follow GAAP tailored to their particular economic circumstances only where this is expressly permitted by the Accounting Standards Board (AcSB) or the CICA's Emerging Issues Committee (EIC).

Those who support this viewpoint maintain that the *Handbook* already provides comprehensive accounting standards for rate-regulated enterprises. The situations where differential accounting can be applied should be strictly limited to those where such a differential treatment is specifically permitted by an accounting standard in the *Handbook* or by an *Abstract* issued by the EIC. In their opinion, there are few fundamental differences between regulated business enterprises and non-regulated business enterprises. These differences can best be dealt with from a financial reporting point of view on a specific basis when determined necessary as part of the formal accounting standard-setting process.

Current industry practice goes beyond what would be permitted under this approach.

Canada-US GAAP Harmonization

Under this approach, the accounting standards followed by Canadian rate-regulated enterprises would be conformed to those issued by the US FASB.

The AcSB has, for the past few years, been working with major foreign standards-setting bodies toward the convergence of accounting standards. The goal of convergence is to develop a single set of internationally accepted accounting standards. Recognizing that international harmonization will take some years and that Canada's most important foreign market is the United States, the AcSB has also been working on a more accelerated basis to eliminate the major differences between Canadian and US GAAP.

In line with the AcSB's focus on harmonization, some maintain that US standards provide a useful basis for developing Canadian guidance on accounting for rate-regulated enterprises. They note that the US has already codified in standards (such as Statement of Financial Accounting Standards (SFAS) 71, 90 and 101) more principles related to accounting for regulated operations and, therefore, there is no need to re-invent the wheel — US standards should be adopted *verbatim*. Those holding this view maintain that the different business conditions and environment do not warrant a "made-in-Canada" solution.

It was also suggested that, in light of the AcSB's focus on harmonization, the project might review Canadian and US GAAP as it relates to rate-regulated enterprises. In this regard, an evaluation of similarities and differences could provide the basis for adopting US GAAP, except where the different economic environment dictated alternative accounting standards.

Codify Current Canadian Practice

Under this approach, GAAP for rate-regulated enterprises would be governed by current Canadian practice, which has evolved through application of existing *Handbook* sections, industry practice and US GAAP.

Those supporting this viewpoint have noted that a body of GAAP has already been established for rate-regulated enterprises through practices currently followed by such enterprises. In their opinion, these practices are compatible with the provisions of specific *Handbook* sections and reflect the economic impact of rate regulation. Appendix B to this Research Report presents the results of a survey of accounting and financial statement disclosure practices. It shows that almost all financial statements of rate-regulated enterprises recognize the impact of rate regulation and indicate that they are currently being prepared in accordance with GAAP. This suggests that the fundamental issue to be addressed in this Research Report is not **whether**, but **how** GAAP should apply to rate-regulated enterprises.

Current Canadian practice also recognizes the different economic environments in Canada and the US. For example, in the United States, income taxes are accounted for according to the liability method. When a rate-regulated enterprise recovers income taxes on a taxes payable basis, US GAAP permits a corresponding regulatory asset to be recorded, if appropriate. This results in an income statement that reflects the taxes payable charge and a balance sheet grossed up to record both the future taxes and the regulatory asset. This is of little consequence in the United States because balance sheet credits such as future taxes do not attract capital taxes. In Canada, however, future income taxes need not be recorded to the extent that they will be included in rates charged to customers in the future. If the US practice had been prescribed, rate-regulated enterprises would have been subjected to capital taxes.

It was suggested by those who support this approach that this Research Report project might review and codify existing Canadian practices, and then explain that the differential treatment in the application of GAAP merely reflect the economic consequences of the regulator's actions. Such consequences arise because the regulator may use a basis other than GAAP to measure the costs that are to be included in rates.

GAAP Followed by Rate-regulated Enterprises should be Governed by the Economic Impact of Rate Regulation

Under this approach, accounting standards would be included in the *Handbook* to explicitly recognize the economic impact of rate regulation.

Those who support this approach maintain that the consequences of the rate-setting process often create future economic benefits and obligations, which meet the criteria for the recording of assets and liabilities as set out in "Financial Statement Concepts," *Handbook* Section 1000. They maintain that any action of a rate regulator that has an economic impact on a rate-regulated enterprise should be reflected in the financial statements. In their opinion, an

approach that permits no differences from GAAP followed by other business enterprises clearly does not recognize that the actions of a rate regulator often have an economic impact on the enterprise. This is, in their opinion, contrary to the basic accounting concepts set out in Section 1000. They do not agree that this approach is contrary to the requirements of the *Handbook*. In their opinion, it is, in fact, the approach required by Section 1000. Further, the *Handbook* specifically acknowledges that "no rule of genera application can be phrased to suit all circumstances or combination of circumstances that may arise." 2(10) The fact that the application of GAAP, in some situations, may be different simply reflects that statement.

APPROACH TO THE PROJECT

After concluding that guidance is needed on accounting for rate-regulated enterprises and considering the different approaches referred to above, the Study Group decided that a comprehensive foundation is called for. Having considered how rate regulation works (see Chapter 2), it was considered important to look at what current standards require and how the issues are being addressed in current practice in both Canada and the US (see Chapter 4); and what further accounting guidance should be provided in accordance with the mandate set out in the terms of reference for this project (see Chapter 5).

The Study Group also decided that it was essential to review the basic financial statement concepts set out in *Handbook* Section 1000 and the related FASB Concepts Statements in the US to determine whether differential treatment by rate-regulated enterprises is conceptually sound (see Chapter 5 and Appendix A). After all, according to Section 1000, it is expected that the financial statement concepts will be used by preparers of financial statements and accounting practitioners in exercising their professional judgment as to the application of GAAP and in establishing accounting policies in areas in which accounting principles are developing.

With that foundation, general principles could be developed for application to specific accounting issues and appropriate accounting guidance provided to rate-regulated enterprises in both the private sector and the public sector (see Chapters 6 to 9). Without that foundation, it might be very difficult to determine (much less justify) whether and how the impact of rate regulation should be reported under GAAP.

CONCLUSION

This chapter sets out and analyzes some of the approaches that have been suggested for accounting by rate-regulated enterprises. It also sets out the Study Group's views on the approach that should be undertaken. This approach is based on a framework that recognizes the economic impacts of rate regulation, identifies the financial reporting concepts that should guide the recognition of those impacts to the extent that they exist, and considers existing practice in both Canada and the US.

Chapter 4

ACCOUNTING STANDARDS AND FINANCIAL REPORTING PRACTICES

Rate regulation imposes requirements that can have an impact on accounting and financial reporting. In turn, this can have a direct bearing on the current reporting practices of rate-regulated enterprises.

INTRODUCTION

As previously noted, developing appropriate guidance on accounting for the effects of rate regulation requires a sound understanding of the financial reporting environment in which rate-regulated enterprises currently operate. In Chapter 2, the Study Group examined the first component of that environment — rate regulation. In Chapter 3, various approaches that could be taken with regard to accounting by rate-regulated enterprises were considered.

This chapter examines the second and third component of the financial reporting environment depicted in Chapter 1 (Exhibit 1.1) — accounting standards and current financial reporting practices. The first component, "rate regulation" was considered in Chapter 2. The primary focus of this chapter is on standards and practices in Canada and the United States, but the current situation in the United Kingdom is also considered.

ACCOUNTING STANDARDS AND FINANCIAL REPORTING PRACTICES

Canadian accounting pronouncements and practices recognize that, in certain circumstances, rate regulation can affect what should be reported in the financial statements. Accounting standards and practices in the United States also recognize the effects of rate regulation and provide considerable guidance to rate-regulated enterprises. In the United Kingdom, although accounting pronouncements do not address the effects of rate regulation, there is considerable interest in developing a conceptual framework for accounting by regulated industries. Accounting standards that were issued by the International Accounting Standards Committee (IASC) do not address the effects of rate regulation.

Standards and Practices in Canada

In Canada, the *Handbook* establishes the criteria an enterprise must meet in order to be considered "rate regulated" for financial reporting purposes. When those criteria are met, the *Handbook* provides for differential treatment in the application of accounting standards to such

enterprises.

"Income Taxes," *Handbook* Section 3465, paragraph .09, defines a rate-regulated enterprise as:

> an enterprise which meets all of the following criteria:
>
> (i) the rates for regulated services or products provided to customers are established by or are subject to approval by a regulator or a governing body empowered by statute or contract to establish rates to be charged for services or products;
>
> (ii) the regulated rates are designed to recover the cost of providing the services or products; and
>
> (iii) it is reasonable to assume that rates set at levels that will recover the cost can be charged to and collected from customers in view of the demand for the services or products and the level of direct and indirect competition. This criterion requires consideration of expected changes in levels of demand or competition during the recovery period for amounts recorded as recoverable under the rate formula.

The definition of rate-regulated property, plant and equipment in "Property, Plant and Equipment," *Handbook* Section 3061, paragraph .10, is the same, with the exception that, in the last sentence, "for amounts recorded as recoverable under the rate formula" is replaced by "for any capitalized costs."

The following differential treatment in the application of accounting standards to rate regulated enterprises is currently permitted or required in the *Handbook*:

1. "Consolidated Financial Statements," *Handbook* Section 1600, "Intercompany Gains and Losses," states:

   > Where a parent or subsidiary manufactures or constructs facilities for a regulated public utility in the consolidated group, any intercompany gain or loss is deemed to have been realized to the extent that the transfer price on such facilities is recognized for rate-making purposes by a government regulatory body (paragraph 1600.29).

2. "Property, Plant and Equipment," *Handbook* Section 3061, states:

   > For an item of rate-regulated property, plant and equipment, the cost includes the directly attributable allowance for funds used during construction allowed by the regulator (paragraph 3061.23).
   >
   > In determining the net recoverable amount of an item of rate-regulated property, plant and equipment, the enterprise considers the extent to which rates will provide for the recovery of the cost of the asset (paragraph 3061.46).

> For rate-regulated operations, the regulator may require the difference between net carrying amount and the proceeds on disposal of an item of property, plant and equipment to be considered in the determination of future rates charged to customers. In such circumstances the difference is deferred, provided there is reasonable assurance that: (a) any excess of net carrying amount over proceeds on disposal will be recovered through future rates; or (b) any excess of proceeds on disposal over net carrying amount will serve to reduce future rates (paragraph 3061.53).

3. "Income Taxes," *Handbook* Section 3465, states:

> *A rate regulated enterprise need not recognize future income taxes in accordance with the Recommendations of this Section to the extent that future income taxes are expected to be included in the approved rate charged to customers in the future and are expected to be recovered from future customers. If future income taxes are not recognized in accordance with the Recommendations of this Section, the rate regulated enterprise should disclose the following, in addition to the information to be disclosed in accordance with paragraphs 3465.91 and 3465.92:*
>
> *(a) the reason why future income tax liabilities and future income tax assets have not been recognized; and*
>
> *(b) the amount of future income tax liabilities, future income tax assets and future income tax expense that have not been recognized. (paragraph 3465.102)*

Pending further study of accounting for rate regulated enterprises as a whole, rate regulated enterprises are not required to record future income taxes for temporary differences that arise from assets and liabilities relating to their rate regulated activities to the extent that these future income taxes will be included in the rates charged to customers in the future and will be recoverable at that time as set out in paragraph 3465.102. (paragraph 3465.103)

Future income taxes would be recognized in accordance with the remainder of this Section to the extent that future income taxes are not expected to be included in the rates charged to customers in the future. In addition, a rate regulated enterprise that chooses to recognize future income taxes despite the expectation that they will be included in the rates charged to customers in the future would recognize all future income tax liabilities and future income tax assets in accordance with the requirements of this Section. (paragraph 3465.104)

4. "Interest Capitalized," *Handbook* Section 3850, states:

> This Section does not apply to interest capitalized by rate regulated enterprises as part of an allowance for funds used during construction when such enterprises disclose the allowance for funds used during construction in the period. (paragraph 3850.02)

In addition to the above-noted definition and differential treatment, the *Handbook* makes reference to "public utilities" in one other instance — "Segment Disclosures," Section 1701.

Paragraph 1701.18 discusses the aggregation criteria for reportable segments and states:

> Operating segments often exhibit similar long-term financial performance if they have similar economic characteristics. ... Two or more operating segments may be aggregated into a single operating segment if aggregation is consistent with the objective and basic principles of this Section, if the segments have similar economic characteristics, and if the segments are similar in each of the following areas:
>
> - The nature of the products and services.
> - The nature of the production processes.
> - The type or class of customer for their products and services.
> - The methods used to distribute their products or provide their services.
> - If applicable, the nature of the regulatory environment (for example, banking, insurance, or **public utilities**). (emphasis added)

With regard to accounting and reporting practices in Canada, Chapter 1 noted that a 1999 cross-industry survey identified several accounting issues that were significant for rate-regulated enterprises. In view of the large number of issues identified, and to assess the current state of accounting and financial reporting by rate-regulated enterprises, the Study Group undertook a survey of current practices in corporate annual reports. The survey spanned the years 1999 and 2000 and covered 25 rate-regulated enterprises in four sectors: electric, natural gas distribution, natural gas transmission and telecommunications. Appendix B to this Research Report presents the findings. It shows that, for the most part, the survey companies disclosed in notes to the financial statements:

- the names of the regulatory authority or authorities;
- accounting requirements prescribed for regulatory purposes;
- pertinent information on specific issues related to the economic impact of rate-regulation, for example, on income taxes and capital assets; and

- that general purpose financial statements are prepared in accordance with GAAP.

Standards and Practices in the United States

Principles to recognize the economic impact of rate regulation have been applied to US rate-regulated enterprises since at least 1962, when they were authorized by an addendum to *Accounting for the "Investment Credit,"* AICPA Accounting Principles Board Opinion 2. In 1982, *Accounting for the Effects of Certain Types of Regulation*, Statement of Financial Accounting Standards (SFAS) 71, formalized many of those principles, and also modified some of them.

Since its issuance, SFAS 71 has been the principal authoritative source of guidance on accounting and financial reporting requirements for rate-regulated enterprises in the United States. In addition, several other Statements have been issued over the years to provide guidance on specific topics. 1(11) These and other "authoritative pronouncements" issued by the FASB, its Emerging Issues Task Force (EITF), the AICPA and the staff of the Securities and Exchange Commission (SEC) are listed in Exhibit 4.1. For SFAS 71 and some of the more significant Statements, a brief commentary on their application to rate-regulated enterprises is provided below.

SFAS 71 provides guidance on preparing general purpose financial statements for most public utilities. Certain other companies with regulated operations that meet specified criteria are also covered. Although the business activities of utility companies are essentially the same as those of other companies that manufacture products or provide services, their regulated status creates operational and accounting situations that are peculiar to regulated companies. In this regard, SFAS 71 refers to the "economic dimension" that regulation brings to utilities and the need for accounting to reflect that dimension. In general, the type of regulation covered by SFAS 71 requires allowed rates (prices) to be set at levels intended to recover the estimated costs of providing regulated products or services, including the cost of capital.

According to SFAS 71, recovery of certain costs may be provided either before or after the costs are incurred. If regulation provides assurance that incurred costs will be recovered in the future, companies are required to capitalize those costs. If current recovery is provided for costs expected to be incurred in the future, companies are required to recognize a liability equal to the amount received.

A significant conclusion reached in SFAS 71 is that rate regulators can determine the timing of recovery of costs through rates and, therefore, can affect the value of assets and liabilities recognized in accordance with GAAP. Specifically, rate actions of a regulator can provide reasonable assurance of the existence of an asset and can also reduce or eliminate the value of an asset. Furthermore, rate actions of a regulator can impose a liability on a regulated enterprise. A regulator, however, cannot eliminate a liability that it did not impose.

Exhibit 4.1

ACCOUNTING GUIDANCE IN THE UNITED STATES THAT SPECIFICALLY RELATES TO RATE-REGULATED ENTERPRISES

FASB — Statements of Financial Accounting Standards (SFAS)

- SFAS No. 71, Accounting for the Effects of Certain Types of Regulation
- SFAS No. 90, Regulated Enterprises — Accounting for Abandonments and Disallowances of Plant Costs
- SFAS No. 92, Regulated Enterprises — Accounting for Phase-in Plans
- SFAS No. 98, Accounting for Leases (Application, Specific Aspects, Sale-Leaseback Transactions by Regulated Enterprises, paragraphs 58 & 59)
- SFAS No. 101, Regulated Enterprises — Accounting for the Discontinuation of Application of FASB Statement No. 71
- SFAS No. 109, Accounting for Income Taxes, paragraphs 57 & 58 (also, Basis for Conclusions, paragraph 125 and Application, Specific Aspects, paragraphs 252-255)
- SFAS No. 142, Goodwill and Other Intangible Assets (Amendments to Existing Pronouncements, Appendix D, item D8)
- SFAS 143, Accounting for Asset Retirement Obligations, paragraphs 19-21 (also, Basis for Conclusions, paragraphs B67-B73)
- SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets (Basis for Conclusions, paragraphs B59-B61)
- FASB Technical Bulletin No. 87-2, Computation of a Loss on an Abandonment

Emerging Issues Task Force (EITF)

- EITF Issue 91-6, Revenue Recognition of Long-Term Power Sales Contracts
- EITF Issue 92-7, Accounting by Rate-Regulated Utilities for the Effects of Certain Alternative Revenue Programs
- EITF Issue 92-12, Accounting for OPEB Costs by Rate Regulated Enterprises
- EITF Issue 93-4, Accounting for Regulatory Assets
- EITF Issue 96-17, Revenue Recognition under Long-Term Power Sales Contracts That Contain Both Fixed and Variable Pricing Terms
- EITF Issue 97-4, Deregulation of the Pricing of Electricity — Issues Related to the

Application of FASB Statements No. 71 and 101

Securities and Exchange Commission, Staff Accounting Bulletins (SEC SAB)

SAB 92 Accounting and Disclosures Relating to Loss Contingencies

- Topic 10-A, Financing by Electric Utility Companies Through Use of Construction Intermediaries
- Topic 10-B, Estimated Future Costs Related to Spent Nuclear Fuel and Nuclear Electric Generating Plants
- Topic 10-C, Jointly Owned Electric Utility Plants
- Topic 10-D, Long-Term Contracts for Purchase of Electric Power
- Topic 10-E, Classification of Charges for Abandonments and Disallowances
- Topic 10-F, Presentation of Liabilities for Environmental Costs

SFAS 71, paragraph 5, establishes three criteria for determining whether an entity is covered by the Statement:

- An enterprise's rates for regulated services must be established by or subject to approval by an independent third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers. 2(12)
- The regulated rates must be designed to recover the specific enterprise's costs of providing the regulated services or products.
- In view of the demand for the regulated services or products and the level of competition, it must be reasonable to assume that rates set at levels that will recover the enterprise's costs can be charged to and collected from customers.

Regulated Enterprises — Accounting for the Discontinuation of Application of FASB Statement No. 71, SFAS 101, requires that an enterprise whose operations cease to meet the specified criteria should discontinue application of SFAS 71. Generally, that discontinuation would be reported by eliminating from the rate-regulated enterprise's financial statements the effects of rate regulation. The carrying amounts of plant, equipment and inventory measured and reported pursuant to SFAS 71 should not be adjusted, however, unless those assets are impaired, in which case the carrying amounts of those assets should be reduced to reflect that impairment. The net effect of the adjustments should be included in income for the period of discontinuance and classified as an extraordinary item.

Regulated Enterprises — Accounting for Abandonments and Disallowances of Plant Costs, SFAS 90, acknowledges that regulators may partially or totally disallow construction costs from rate base and/or cost of service recovery. SFAS 90 states that, when it becomes probable that

certain plant costs will be disallowed for rate-making purposes, and a reasonable estimate of the amount of the disallowance can be made, that amount should be recognized as a loss. Because of the increased cost of construction and lower demand than originally expected, US electric utilities abandoned plants under construction in the 1980s and, in many cases, regulators disallowed all or a portion of the costs. SFAS 90 requires that the cost of an asset should be removed from construction work in progress or utility plant in service when it becomes probable that the asset will be abandoned. To the extent that the cost of the asset will be recovered in future rates, a separate new asset is recorded. The value of the new asset is dependent upon the amount of return on investment, if any, that the regulator allows on the abandoned plant and the length of the recovery period. This amount is equivalent to the present value of the future revenues expected to be provided to recover the allowable cost of the abandoned plant. The recorded amount of the asset is adjusted as necessary if new information indicates that the estimates used to record the asset have changed and that adjustment is recognized in income as a loss or gain.

Regulated Enterprises — Accounting for Phase-in Plans, SFAS 92, noted that, at the time the Statement was issued in 1987, the cost of some plant construction had been significantly greater than in prior years. To moderate the initial rate increase when a newly completed plant went into service, some regulators had adopted phase-in plans. SFAS 92 applies to the construction of new plants. It defines a phase-in plan as any method of cost recovery for rate-making purposes that defers expense recognition beyond the period such costs would be charged to expense under GAAP applicable to enterprises in general. It essentially eliminated the recognition of phase-in plans for financial reporting purposes.

Some utilities enter into sale and leaseback transactions related to recently completed plants. SFAS 71 requires that the timing of expense recognition and the related amortization of a capital lease obligation and asset be modified to conform to the rate treatment of the lease payment. This generally results in a smaller amortization of the capital lease asset in the earlier years of a lease for a utility than would be recorded by a non-regulated enterprise. As a result, when a utility enters into a capital lease for a newly completed plant that is treated as an operating lease for rate-making purposes, the lease is considered a phase-in plan. For costs to be deferred under the plan, the SFAS 92 criteria must be met. Additionally, if the regulator has not allowed a return on the leased asset or the deferred amounts, this would be considered a disallowance and would be accounted for in accordance with the provisions of SFAS 90.

Accounting for Leases: Sale-Leaseback, Transactions Involving Real Estate, Sales-Type Leases of Real Estate, Definition of the Lease Term, and Initial Direct Costs of Direct Financing Leases, SFAS 98, effectively prohibits recognition of a sale in many sale-leaseback transactions. This is particularly true for nuclear power plants, in which the lessee / utility's continuing responsibility for nuclear decommissioning costs would prohibit sale recognition.

Accounting for Asset Retirement Obligations, SFAS 143, 3(13) applies to all entities and to

legal obligations associated with the retirement of a tangible long-lived asset. If a reasonable estimate can be made, an entity must recognize the fair value of a liability for an asset retirement obligation in the period in which the obligation is incurred. If a reasonable estimate of fair value cannot be made at that time, the liability is to be recognized as soon as a reasonable estimate of fair value can be made. An asset in the same amount will also be established and subsequently allocated to expense using a systematic and rational method over its useful life. SFAS 143 acknowledges that, for rate-regulated enterprises, there may be a difference in the timing of the recognition of period costs for financial reporting and for rate-making purposes, and that it may be necessary to recognize a regulatory asset or liability with respect to such timing difference.

Accounting for the Impairment or Disposal of Long-Lived Assets, SFAS 144, applies to all enterprises, including rate-regulated enterprises. In most cases, rate-regulated enterprises currently operating under traditional cost of service rate-making principles and, therefore, continuing to meet the applicability provisions of SFAS 71 would also comply with SFAS 144. Paragraph 7 of this Statement requires that "an impairment loss shall be recognized only if the carrying amount of a long-lived asset (asset group) is not recoverable [that is, it exceeds the sum of the undiscounted cash flows expected to result from its use and eventual disposition] and exceeds its fair value." Rate-regulated enterprises are therefore required to charge a regulatory asset to earnings when and if recovery is no longer probable.

In summary, a number of authoritative pronouncements issued by the FASB in the US provide detailed guidance to regulated enterprises. They recognize that the economic impact of rate regulation should be reported in the general purpose financial statements of such enterprises. To qualify as a rate-regulated enterprise in the US, such enterprises must meet the criteria set out in SFAS 71.

Standards and Practices in the United Kingdom

In the United Kingdom, there are no specific accounting standards or guidelines for reflecting the effects of rate regulation on financial reporting. In other words, rate-regulated enterprises are obliged to follow the same accounting principles as non-rate-regulated enterprises in preparing their general purpose financial statements. In addition, they must prepare regulatory statements according to the requirements of the relevant regulatory authority. Often, regulatory accounting requirements vary significantly from GAAP for preparing general purpose financial statements.

"How does the existence of industry regulators with price-setting powers affect accounting practices in the telecommunications, gas, airports, electricity and water industries in the United Kingdom?" "What is distinctive about accounting for regulated industries?" These and other pertinent questions were addressed in the 1994 UK report, *Accounting for Regulation in UK Utilities*. 4(14) The principal issues identified in the report included the impact of privatization, the relative lack of conventions and standards surrounding current cost accounting and the

special significance of accounts for price-setting purposes.

The report's principal research findings included the following:

- Regulatory accounting requirements vary significantly between the regulated industries.
- In addition to the regulatory or supplementary accounts prepared by the regulated companies, the regulators appear to keep their own sets of books which seem, at least in some instances, to unravel the effects of certain accounting choices made by the companies.
- Companies have used their discretion in accounting matters immediately before and after privatization to change some of their accounting policies and practices. In certain cases, particularly where there have been changes in asset lives and the basis for charging depreciation, the primary motivation was to bring policies more in line with those of other private sector companies.
- The difference in approach can be attributed to the different regulatory structures in the various industries, the different degree of media and public interest in them and the particular circumstances experienced by the industries during the period covered by the research.

The report recommended that:

- Regulatory standards should be issued by a body under the joint auspices of the Accounting Standards Board (ASB) and the industry regulators or by a body established by the regulators, in which case the standards should be approved by the ASB.
- There should be industry representation on the standard-setting body.
- Regulatory accounts should be brought within the aegis of the Financial Reporting Review Panel.

With regard to the lack of consistency in regulatory accounting, it has been observed that: 5(15)

- Although the regulator may be able to obtain consistent information from businesses by way of specific information requests, this source is not open to other stakeholders who must rely on published information. Informed comment on issues is difficult if regulated industries are not required to publish information in a consistent manner or if key values such as the regulatory asset base are not published at all.
- Accounting for regulation needs to be given a higher policy profile and be seen as an important part of the normal regulatory process, based on a comprehensive accounting framework. Accounting for regulation is important because regulation is designed to

achieve certain objectives. These regulatory objectives need to be clearly stated to, first, achieve a firm basis for public understanding and consent to the regulatory system as a whole and, second, to provide a framework for judging the performance of both regulators and regulated companies.

- Regulated entities in the UK support the preparation of Statements of Recommended Practice (SORPs) which may be developed for specialized industries, such as the regulated sector. The Accounting Standards Board (ASB) in the UK has recognized the requirement for accounting guidance for such specialized industries. For incidences where they have not developed such guidance, the SORP mechanism provides a means for an independent organization to develop specialized accounting guidance that carries a form of ASB endorsement. A SORP cannot override an accounting standard in the UK. The ASB has issued a policy for the development of SORPs, a fundamental feature being that the ASB will recognize bodies for the purpose of issuing SORPs. ASB-recognized bodies must, as a condition of recognition, agree to abide by the ASB's code of practice in producing SORPs. Furthermore, SORPs issued by ASB-recognized bodies will include a negative assurance statement from the ASB. As of January 2001, no SORPs had been issue for the various rate-regulated sectors in the UK.

In summary, there continues to be considerable interest and discussion in the UK about the need to develop a conceptual framework for accounting by regulated industries. It is viewed that, without a framework, the process of regulation will continue to be discretionary, rather than publicly accountable.

WHAT FURTHER GUIDANCE SHOULD BE PROVIDED?

By comparison to the United States, Canadian standards specifically address only a few issues. Consequently, the current reporting practices of Canadian rate-regulated enterprises may vary. Further, rate regulation is evolving rapidly (refer to the analysis in Chapter 2), and additional guidance is being sought on what constitutes GAAP for rate-regulated enterprises and how the *Handbook* requirements should be interpreted by them.

In this regard, the terms of reference for this project ask the Study Group to consider the following question: "Assuming that the Recommendations in the *Handbook* generally apply to rate-regulated enterprises, is differential treatment needed, due to their special circumstances?" The Study Group is of the opinion that rate regulation can influence rates that, combined with market conditions (demand and competition), can have an economic impact on current and future revenues and cash flows, thereby affecting assets (future economic benefits) and liabilities (future obligations). This is discussed further in Chapter 5. Accordingly, the potential economic impact of rate regulation warrants recognition in the general purpose financial statements of rate-regulated enterprises in accordance with GAAP.

In the Study Group's opinion, more guidance is needed, therefore, on the application of GAAP to the unique economic circumstances of rate-regulated enterprises. In this respect, the terms of reference call for the Study Group to suggest what type of guidance the CICA Accounting Standards Board should provide to meet the special needs of rate-regulated enterprises and the users of their general purpose financial statements.

In response to the terms of reference, the Study Group discussed various ways of providing such guidance, including:

- supplementary material to accompany applicable Sections of the *Handbook*;
- new accounting standard(s) with or without removing current differential treatment;
- one or more accounting guidelines; and/or
- making reference only to this CICA research report, when it is published.

The Study Group is of the opinion that general guidance on accounting for the effects of rate regulation should be issued as a new Section to the *Handbook*. The new Section would replace the material currently contained in the *Handbook*, including all of the differential treatments in the application of Accounting Recommendations that are identified in this chapter of the Research Report.

There are a number of reasons why a new *Handbook* Section is the preferred approach to proving guidance. First, accounting standards set out in a *Handbook* Section are at the top of the GAAP hierarchy and, therefore, are the most authoritative source for the exercise of professional judgment. Second, it is automatically subject to due process through exposure drafts for changes to accounting standards. Third, a conceptual framework is necessary to apply GAAP to rate-regulated activities. Fourth, such an approach is consistent with that taken in other situations, for example, insurance companies — a separate *Handbook* Section that deals only with the differential accounting treatments. Fifth, it would ensure that the AcSB considers consequential amendments whenever it is issuing or revising another standard.

In addition, following the traditional approach in developing accounting and reporting standards for rate-regulated enterprises could provide several benefits:

- It could help to minimize the possibility of Canada / US GAAP differences.
- It could facilitate comprehensive consideration, in one place, of issues facing rate-regulated enterprises.
- It could provide a means for disseminating detailed guidance, as needed, to financial statement preparers, auditors and users.

With respect to the nature of the guidance to be included in the new *Handbook* Section, the Study Group reviewed the financial statement concepts and general standards of financial

statement presentation that underlie the development of accounting standards in Canada. 6(16) It also compared the conceptual accounting frameworks of Canada and the United States (refer to Appendix A to this Research Report). Because of the similarities in the conceptual frameworks of Canada and the United States, accounting standards in the United States also provide a useful source of reference for developing Canadian guidance on financial reporting by rate-regulated enterprises.

CONCLUSION

In this chapter, the Study Group completes its review of the current financial reporting environment within which rate-regulated enterprises operate. In the Study Group's view, accounting pronouncements in Canada recognize that, in certain circumstances, rate regulation can affect what should be reported in the financial statements. In the United States, accounting pronouncements also recognize the effects of rate regulation. They establish a comprehensive framework for reporting the economic impact of rate regulation and provide detailed guidance to rate-regulated enterprises. In the United Kingdom, accounting pronouncements do not address the effects of rate regulation. Nonetheless, there is increasing interest in developing a conceptual framework for accounting by regulated industries. Accounting standards that were issued by the International Accounting Standards Committee (IASC) do not address the effects of rate regulation.

The Study Group is of the opinion that general guidance on accounting for the effects of rate regulation should be issued as a new Section in the *Handbook*. The new Section would replace the material currently contained in the *Handbook* relating to rate-regulated enterprises and would provide any additional guidance that is considered necessary.

With respect to the nature of the guidance to be included in the new *Handbook* Section, the Study Group is of the opinion that general principles should be established to provide a "framework" for applying GAAP to rate-regulated enterprises within the boundaries established by "Financial Statement Concepts," *Handbook* Section 1000. It is anticipated that the general principles will provide the basis for assessing, in a particular situation, whether rate regulation has an economic impact that should be reported and, if so, how it should be reported in general purpose financial statements.

Chapter 5

RATE REGULATION AND FINANCIAL REPORTING

The manner in which rate regulation is applied, not its mere existence, is the pervasive economic factor that supports any modification in the application of generally accepted

accounting principles.

INTRODUCTION

Chapter 2 of this Research Report reviewed the nature of rate regulation and how it operates in Canada. Chapter 4 noted that accounting pronouncements in Canada implicitly recognize that, in certain circumstances, rate regulation can affect what should be reported in the financial statements. In this regard, the Study Group proposed that a new Section be included in the *CICA Handbook – Accounting* to provide guidance on reporting the economic impact of rate regulation in financial statements.

The potential for rate regulation to create economic benefits and obligations raises two questions. Can regulatory authorities establish GAAP? Should the economic impact of rate regulation be reflected in the general purpose financial statements of rate-regulated enterprises and, if so, how? In this chapter, the Study Group addresses these and other interrelated matters.

RATE REGULATION AND ACCOUNTING PRINCIPLES

As previously noted in Chapter 1, the distinction between RAP (regulatory accounting principles used for rate-making purposes) and GAAP (generally accepted accounting principles set out in the *Handbook* for preparing general purpose financial statements) needs to be clarified. Accordingly, this chapter begins with brief explanations of RAP and GAAP and then considers whether regulatory authorities can establish GAAP.

Regulatory Accounting Principles

Regulatory authorities often prescribe the accounting principles and procedures that a regulated enterprise must follow for regulatory purposes. In some cases, they develop a detailed uniform system of accounts, while in other cases they make specific rulings dealing with specific costs as the need arises. These accounting principles and procedures are developed to support the calculation of allowed rates and to assist the regulatory authority in reviewing the periodic data submitted by the regulated enterprises. 1(17)

In most cases, the majority of the accounting principles and procedures prescribed by regulatory authorities are consistent with GAAP. The objective of regulatory reports differs, however, from the objective of general purpose financial statements. The key difference is that the regulatory reports are usually intended to support rate regulation.

For rate-making purposes, a regulatory agency may exclude certain of the regulated enterprise's costs. Excluded items typically arise from activities that are not subject to regulation or from projects or activities that the agency does not believe should be recoverable from customers through the rates they pay. On the other hand, a regulatory agency may include certain types of costs, but in different periods than they would be reflected in the general purpose financial

statements of non-regulated businesses. In addition, as discussed in Chapter 2, a regulatory agency may include "return on equity" as part of "costs" for rate-making purposes.

Generally Accepted Accounting Principles (GAAP) 2(18)

GAAP is the term used to describe the basis on which financial statements are normally prepared. GAAP encompasses the conventions, rules and procedures necessary to define accepted accounting practices at a particular time. Pronouncements of the Accounting Standards Board, as set out in the *Handbook*, are the primary source of GAAP. When a matter is not covered by a Board pronouncement, the most relevant "other source of GAAP" referred to in the *Handbook* would be consulted.

Unless the basis of accounting used to prepare general purpose financial statements falls within the range of acceptable choices set out in the *Handbook*, it is unlikely to constitute GAAP.

CAN REGULATORY AUTHORITIES ESTABLISH GAAP?

As noted in Chapter 1, this research project is concerned solely with the effects of rate making on the application of GAAP to general purpose financial statements. In this regard, a key issue raised in the terms of reference is: "Can accounting prescribed by rate-regulating authorities be considered, in and of itself, GAAP for rate-regulated enterprises and, if so, to what extent?" In other words, can regulatory accounting principles (RAP) be considered "generally accepted" for purposes of financial reporting by rate-regulated enterprises?

The Study Group acknowledges that, for regulatory reporting purposes, the regulators have the authority to prescribe accounting principles for the enterprises they regulate. As is clearly indicated in the *Handbook*, however, such principles do not constitute GAAP. They are intended to support the calculation of allowed rates and to assist the regulatory authority in reviewing the periodic data submitted by the regulated enterprises. They are not intended to meet the objectives of general purpose financial statements.

Accounting for the Effects of Certain Types of Regulation, SFAS 71, paragraph 52, indicates that respondents to a Discussion Memorandum on this subject expressed the view that, "unless an accounting order indicates the way a cost will be handled for rate-making purposes, it causes no economic effects that would justify deviation from the generally accepted accounting principles applicable to business enterprises in general. The mere issuance of an accounting order not tied to rate treatment does not change an enterprise's economic resources or obligations. In other words, the economic effect of regulatory decisions — not the mere existence of regulation — is the pervasive factor that determines the application of generally accepted accounting principles." Paragraph 54 of that SFAS indicates that "the Board concluded that regulatory-prescribed accounting should not be generally accepted *per se*, but rather that the Board should specify how generally accepted accounting principles apply in the regulatory

environment."

It has been argued that it would be onerous to require a regulated enterprise to maintain records necessary to prepare financial reports on two bases: one for the regulatory authority and another for the public. In the Study Group's experience, however, differences that exist currently between regulatory accounting principles and GAAP usually are not extensive in number, and adjustments to reconcile any differences should be simple to determine and apply.

In the Study Group's view, regulatory authorities cannot establish GAAP. Under statutory authority, the standards set out in the *Handbook* constitute GAAP. Although the actions of the regulator may affect rates, and the resulting economic impact may affect what should be reported in accordance with GAAP, this does not give regulatory authorities the authority to determine what should be considered in and of itself GAAP for financial reporting purposes by rate-regulated enterprises.

SHOULD THE IMPACT OF RATE REGULATION BE REPORTED?

There are differing viewpoints on whether the impact of rate regulation should be reported.

Impact of Rate Regulation should not be Reported

As noted in Chapter 3, there is a viewpoint that reporting the impact of rate regulation distorts the financial statements and may result in artificial income smoothing. There is also a concern that, in some situations, rate regulators are effectively transferring wealth to existing customers from future customers who are thereby required to absorb, through increased rates, costs incurred in a previous period. For example, rate regulators have, for rate-setting purposes, often prescribed that income taxes should be accounted for on the taxes payable basis. By failing to recognize a future liability for taxable temporary differences, as defined in "Income Taxes," *Handbook* Section 3465, paragraph .09, net income for the related periods is, in the opinion of those who express this concern, not properly reported. While rate regulators unquestionably have the authority to take such action for the purposes of setting rates, it should not be reflected in general purpose financial statements. Employee future benefits is another instance where, for rate-setting purposes, many regulators have required such benefits to be accounted for on a pay-as-you-go basis, whereas accounting standards require them to be accounted for in the period that gives rise to the benefit.

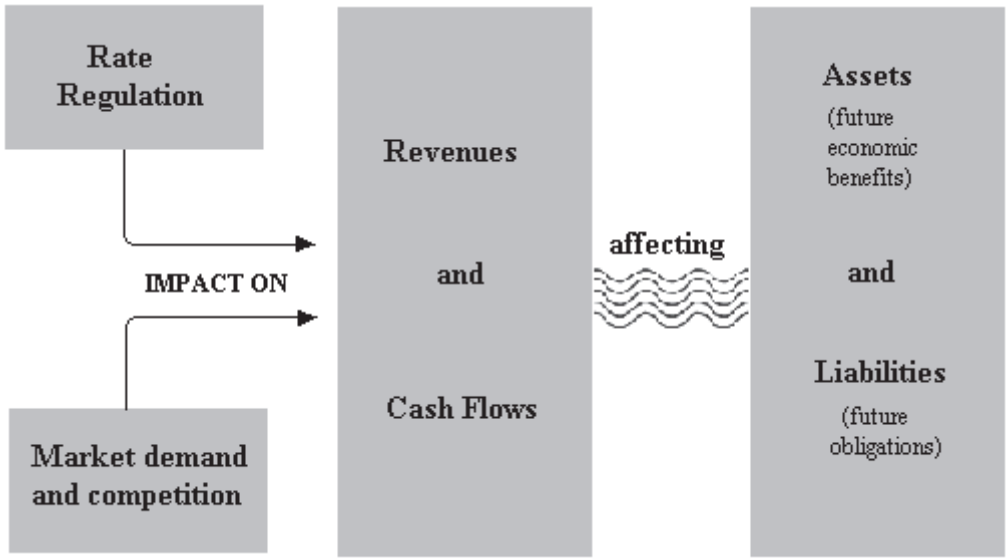
Impact of Rate Regulation should be Reported

The Study Group maintains, however, that, by restricting prices, rate regulation can affect the amount and timing of a rate-regulated enterprise's revenues. Within a period, the economic impact may be related to both current rates and future rates.

Exhibit 5.1 shows that rate regulation, when combined with market conditions (market demand

and competition), can have an economic impact on the revenues and cash flows of an enterprise, thereby affecting assets (future economic benefits) and liabilities (future obligations).

Exhibit 5.1



By changing future rates as a result of transactions or events in the current (or prior) period, rate regulation can create economic benefits and obligations. The benefits would be in the form of higher allowed rates and, therefore, higher revenues and cash flows. The obligations would be in the form of lower allowed rates and, therefore, lower revenues and cash flows. For example:

- A regulator employing cost-of-service regulation may decide that a cost that would normally be expensed in the current period will be deferred and included in the calculation of a future revenue requirement. Therefore, as a result of incurring the cost, the enterprise can expect to have an increase in future rates and an increase in future revenues and cash flows approximately equal to the amount of the deferred cost.
- A regulator may require that an enterprise share with its customers any earnings above a specified threshold. The sharing would be accomplished through a reduction in future rates. Therefore, as a result of having earnings above the threshold in the current period, the enterprise will be required to reduce rates and, therefore, cash flow, in a future period or periods.

A regulator cannot, however, eliminate a liability that it did not create, such as a liability to an enterprise's bondholders.

For rate regulation to have an economic impact, it must be effective, that is, it must restrict rates from what they would be in the absence of rate regulation.

- In the case of an economic benefit, future allowed rates sufficient to provide additional revenue equal to the benefit must be chargeable and collectible from customers. Otherwise, there is no economic benefit. Where market conditions or other factors restrict the rates that an enterprise can charge and collect from customers, the economic benefit would be limited to the additional revenues collectible from customers.
- In the case of an economic obligation, future allowed rates without the reduction to accommodate the obligation must be chargeable and collectible from customers. Where this condition is not met, a reduction in future allowed rates will not reduce revenues and, consequently, will have no economic impact. Therefore, from an economic perspective, where market conditions or other factors restrict the ability of an enterprise to charge and collect rates from customers, the economic obligation would be limited to the reduction in revenues collectible from customers.

Consequently, in the Study Group's opinion, there is no distortion or artificial smoothing where the economic benefits and obligations meet the definition of a financial statement element. On the contrary, a failure to report the economic benefits and obligations would distort the financial statements, at least in those cases where the recognition criteria are met.

Financial Statement Elements

"Financial Statement Concepts," *Handbook* Section 1000, paragraph .25, states that the "elements of financial statements are the basic categories of items portrayed therein in order to meet the objective of financial statements." 3(19) In defining the objective of financial statements, paragraph 1000.15, states that they provide information about:

- an entity's economic resources, obligations and equity / net assets;
- changes in an entity's economic resources, obligations and equity / net assets; and
- the economic performance of the entity.

Paragraph 1000.25 states that "there are two types of elements: those that describe the economic resources, obligations and equity / net assets at a point in time, and those that describe changes in economic resources, obligations and equity / net assets over a period of time. Notes to the financial statements ... are not considered to be an element." *Assets* and *liabilities*, *equity*, *income* and *revenues*, *expenses*, *gains* and *losses*, and *performance* (profit or *earnings*) are identified as the elements of financial statements.

Elements at a point in time — assets and liabilities

Paragraph 1000.29, defines *assets* as "economic resources controlled by an entity as a result of past transactions or events and from which future economic benefits may be obtained." In

situations where a regulator allows an amount to be recovered through an increase in future rates as a result of a past transaction or event, the expectation of receiving that amount will meet the definition of an asset. The increase in rates represents an economic benefit in the form of higher revenues and cash flows. For example, if a regulator permits a cost that would normally be expensed in the period to be recovered in future rates, the rate-regulated enterprise will have an asset once it has incurred the cost. This is based on the assumption that future rates will be increased to provide additional revenues in an amount equal to the asset and that those higher rates will be recoverable from customers.

Paragraph 1000.32 defines *liabilities* as "obligations of an entity arising from past transactions or events, the settlement of which may result in the transfer or use of assets, provision of services or other yielding of economic benefits in the future." In situations where a regulator requires a decrease in future rates as a result of a past transaction or event, the resulting amount will meet the definition of a liability. The reduction in revenue represents the yielding of an economic benefit. For example, if a regulator requires that a portion of excess income be returned to customers through a decrease in future rates, the rate-regulated enterprise would have a liability once the excess income is earned. This is based on the assumption that future rates will be decreased to reduce revenues by an amount equal to the liability and that the rates (without the reduction) would be recoverable from customers.

Elements over a period of time — revenues, expenses, gains and losses

Section 1000 defines revenues, expenses, gains and losses as follows:

> *Revenues* are increases in economic resources, either by way of inflows or enhancements of assets or reductions of liabilities, resulting from the ordinary activities of an entity. Revenues of entities normally arise from the sale of goods, the rendering of services or the use by others of entity resources yielding rent, interest, royalties or dividends. (paragraph 1000.37)
>
> *Expenses* are decreases in economic resources, either by way of outflows or reductions of assets or incurrences of liabilities, resulting from an entity's ordinary revenue generating or service delivery activities. (paragraph 1000.38)
>
> *Gains* are increases in equity / net assets from peripheral or incidental transactions and events affecting an entity and from all other transactions, events and circumstances affecting the entity except those that result from revenues or equity / net assets contributions. (paragraph 1000.39)
>
> *Losses* are decreases in equity / net assets from peripheral or incidental

> transactions and events affecting an entity and from all other transactions, events and circumstances affecting the entity except those that result from expenses or distributions of equity / net assets. (paragraph 1000.40)

The Study Group is of the opinion that, if an economic benefit or obligation resulting from rate regulation meets the definition of an asset or liability, the **change** in the economic benefit or obligation would meet the definition of one of the elements that describes changes in economic resources, obligations and equity / net assets over a period of time. In this regard, revenues, expenses, gains and losses reflect the changes in the assets and liabilities of a rate-regulated enterprise, other than those that result from equity or net asset contributions. Furthermore, if an economic resource or obligation meets the definition of a financial statement element, the economic impact should be reported to meet the above-noted objective of financial statements.

Recognition Criteria

Paragraph 1000.41 states that "recognition is the process of including an item in the financial statements of an entity. Recognition consists of the addition of the amount involved into statement totals together with a narrative description of the item ... in a statement." It does not mean disclosure in the notes to the financial statements.

According to paragraph 1000.44, two criteria must be met before a financial statement element is recognized:

(a) the item has an appropriate basis of measurement and a reasonable estimate can be made of the amount involved; and

(b) for items involving obtaining or giving up future economic benefits, it is probable that such benefits will be obtained or given up.

The economic benefits and obligations created by rate regulation will, in most cases, meet the first criterion. Regulatory authorities generally provide clear direction as to the amount of an economic benefit or obligation, or the formula for determining the amount. For example, where recovery of a cost is deferred to a future period, the regulator will often state the specific amount that is being deferred.

In most cases, the second criterion will also be met. Regulatory authorities are usually consistent in their treatment of a rate-regulated enterprise. Generally, the decisions and past actions of a regulatory authority are a good indicator of what it will allow in the future. For example, if a regulator states that a cost will be deferred, it is highly probable that it will allow an increase in future rates to provide sufficient additional revenues to cover that cost. In addition, where a regulator allows an increase in rates to provide additional revenues, it is likely that the enterprise will be able to charge and collect those rates from customers. Similarly, where a regulator

requires a decrease in rates to reduce revenues by a given amount, it is likely that the enterprise will have a reduction in revenues approximately equal to that amount. 4(20)

As explained in Chapter 2, what a rate-regulated enterprise is allowed to collect from customers (allowed revenues) is usually very close to what it actually collects (actual revenues). Because rate regulation is imposed to restrict rates where a rate-regulated enterprise has excessive market power, the enterprise can usually increase rates up to the amount allowed by the regulator. This assumption would not be valid where market conditions require rates below what the regulator allows. Where market conditions can effectively restrict rates, enterprises may be freed from rate regulation in those markets; if maintained, rate regulation would be ineffective.

In summary, the Study Group is of the opinion that the economic benefits and obligations created by rate regulation and resulting from past transactions or events, and the changes in these amounts, meet the definition of a financial statement element as set out in *Handbook* Section 1000. Where they also meet the recognition criteria set out in that Section, those elements should be reported in the general purpose financial statements of a rate-regulated enterprise as assets, liabilities, revenues, expenses, gains and losses.

As previously noted, the *Handbook* specifies two criteria that must be met before an element is recognized in the financial statements. Nevertheless, some would argue that economic benefits and obligations created by rate regulation should not be recognized in general purpose financial statements unless there is also a contractual commitment associated with them.

According to paragraph 1000.31, it is not essential that access to a benefit be legally enforceable for a resource to be an asset, provided an entity can control the benefit through other means. In the Study Group's view, an enterprise will have adequate control over the use of an economic benefit where it is probable that the regulatory authority will allow an increase in future rates sufficient to provide additional revenue at least equal to the benefit and it is probable that those rates will be recoverable from customers.

In discussing the characteristics of a liability, paragraph 1000.34 states that:

> Liabilities do not have to be legally enforceable provided that they otherwise meet the definition of liabilities; they can be based on equitable or constructive obligations. ... A constructive obligation is one that can be inferred from the facts in a particular situation as opposed to a contractually based obligation. 5(21)

The Study Group is of the opinion that a constructive obligation will exist where it is probable that a regulatory authority will require a reduction in future rates so as to reduce revenues by an amount equal to the obligation and it is probable that, without the reduction, rates would be recoverable from customers.

The Study Group also notes that contractual commitments are not required in recognizing other

assets and liabilities reported in the financial statements. For example:

- The *Handbook* states that the value of an item of property, plant and equipment should be written down by the amount that its carrying value exceeds its net recoverable amount (paragraph 3061.38). In most cases, the net recoverable amount will be represented by future revenues, yet there is no requirement that there be a contractual commitment associated with those future revenues, or even an identification of the customers who will provide those revenues.
- The *Handbook* requires recognition of a future tax liability ("Income Taxes" *Handbook* Section 3465, paragraph .22) even though there is no legal liability to pay the taxes at the time they are recognized. The liability is based on an expectation of what the tax legislation will be at some future date.

CONCLUSION

In this chapter, the Study Group examines the relationship between rate regulation and financial reporting. It considers whether regulatory authorities can establish GAAP for rate-regulated enterprises and whether the effects of rate regulation should be reported in the general purpose financial statements of rate-regulated enterprises.

The Study Group is of the opinion that regulatory authorities cannot establish GAAP. Although the actions of the regulator may affect rates, and the resulting economic impact may affect what should be reported in accordance with GAAP, this does not give them the right to determine how that economic impact should be reported in general purpose financial statements.

Regardless of the rate-setting process or methodology used, it is the opinion of the Study Group that, from an economic perspective, rate regulation can have a direct bearing on the economic resources, obligations and performance of a rate-regulated enterprise. It can influence rates that, combined with market conditions, can have an economic impact on current and future revenues and cash flows, thereby affecting future economic benefits and obligations.

In the Study Group's view, the economic benefits and obligations created by rate regulation and resulting from past transactions or events, and the changes in these amounts, meet the definition of a financial statement element set out in *Handbook* Section 1000. Where they also meet the recognition criteria set out in that Section, those elements should be reported in the general purpose financial statements of a rate-regulated enterprise as assets, liabilities, revenues, expenses, gains and losses.

Chapter 6

DEFINING A RATE-REGULATED ENTERPRISE

FOR FINANCIAL REPORTING PURPOSES

To qualify as a "rate-regulated enterprise" for financial reporting purposes, an organization must be subject to a rate-setting authority, the rates must be based on the costs of service and the rates must be collectible from customers.

INTRODUCTION

In Chapter 5, the Study Group concluded that the effects of rate regulation should be reported in the financial statements of a rate-regulated enterprise. But what constitutes a "rate-regulated enterprise for financial reporting purposes" (hereafter referred to as just "rate-regulated enterprise")? As part of the terms of reference for this research project, the Study Group was asked to consider the following:

- Is the definition in the *CICA Handbook – Accounting* ("Income Taxes," *Handbook* Section 3465 paragraph .09) sufficiently clear, or how should it be amended?
- What criteria must be met for an enterprise to be considered rate regulated?
- In setting accounting standards, should the Accounting Standards Board focus on rate-regulated enterprises *per se*, or on rate-regulated activities? 1(22)

In addressing these questions, the Study Group started with the existing definition of a rate-regulated enterprise in the *Handbook*. Where this definition is met, the *Handbook* currently provides for limited differential treatment in the application of accounting standards. Because of the similarities in both the conceptual frameworks and the economic environments of Canada and the United States, the Study Group concluded that accounting standards in the US provide a useful source of reference for developing Canadian guidance on financial reporting by rate-regulated enterprises. 2(23) Therefore, the Study Group also took into consideration what constitutes a rate-regulated enterprise under US GAAP and whether the existing definitions in Canadian and US accounting standards should be considered as synonymous.

It is important to note that meeting the definition of a rate-regulated enterprise is just the first step in regarding whether an enterprise is entitled to apply differential treatment in the application of accounting standards for recognizing the economic effects of rate regulation. Under the approach proposed by the Study Group, a rate-regulated enterprise must still meet the conditions embodied in the General Principles set out in Chapter 7 of this Research Report for recognizing assets, liabilities and the change in assets and liabilities as a result of rate regulation.

WHAT IS A RATE-REGULATED ENTERPRISE?

The *Handbook* and *Accounting for the Effects of Certain Types of Regulation*, SFAS 71, provide guidance, in Canada and the US respectively, for the preparation of general purpose

financial statements by rate-regulated enterprises. As a first step in applying that guidance, an enterprise has to meet established criteria.

Meeting the criteria, however, does not necessarily mean that the rate-making process will have an economic impact that should be reported in the enterprise's financial statements. According to the *Handbook* (paragraph 3465.09), a rate-regulated enterprise is an enterprise that meets all of the following criteria [emphasis added]:

- The rates for regulated services or products provided to customers are established by or are **subject to approval by a regulator or a governing body** empowered by statute or contract to establish rates to be charged for services or products. (Criterion 1)
- The regulated rates are **designed to recover the cost** of providing the services or products. (Criterion 2)
- It is reasonable to assume that rates set at levels that will recover the cost **can be charged to and collected from customers** in view of the demand for the services or products and the level of direct and indirect competition. This criterion requires consideration of expected changes in levels of demand or competition during the recovery period for amounts recorded as recoverable under the rate formula. (Criterion 3)

Similarly, SFAS 71 states, in paragraph 5, that it applies to general purpose external financial statements of an enterprise that has regulated operations that meet all of the following criteria [emphasis added]:

- The enterprise's rates for regulated services or products provided to its customers are established by or are **subject to approval by an independent, third-party regulator or by its own governing board** empowered by statute or contract to establish rates that bind customers. (Criterion 1)
- The regulated rates are **designed to recover** the specific enterprise's **costs** of providing the regulated services or products. (Criterion 2)
- In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the enterprise's costs **can be charged to and collected from customers**. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs. (Criterion 3)

Under both definitions, an enterprise must meet all three criteria (and continue to meet them) to qualify as a rate-regulated enterprise for financial reporting purposes. The added emphasis highlights that an enterprise would qualify as a rate-regulated enterprise only if all three conditions are met, namely, it is subject to a rate-setting authority; the objective of rate

regulation is to recover the costs of providing services; **and** the rates are recoverable from customers. At any point in time, if an enterprise fails to meet all three criteria, it would no longer apply the accounting recommendations applicable to rate-regulated enterprises. 3(24)

The following analysis explains, compares and discusses the application of the above-noted criteria to private sector enterprises (Chapter 8 considers the application of the criteria to public sector enterprises). On the basis of that analysis, it is the opinion of the Study Group that the *Handbook* adequately sets out the criteria that an enterprise must meet to be considered rate regulated. Although the specific wording may differ somewhat, the definition in SFAS 71 should be accepted as synonymous with the definition in the *Handbook*. To eliminate any potential differences with US accounting standards, the Study Group concluded that, in its opinion, the *Handbook* definition should be amended to conform to the wording used in SFAS 71.

Rate-setting Authority

As noted in Chapter 2, rate regulation is the restriction in the setting of prices that can be charged to customers for services or products. It is possible, however, that an enterprise may decide to impose restrictions on its own rates. Such self-regulation would raise questions about whether the restrictions would remain in force and, therefore, whether the rate-making process will have an economic impact. Accordingly, the Study Group is of the opinion that the definition of a rate-regulated enterprise should be limited to enterprises where rate regulation is imposed on them by an outside party, or in those rare situations where a governing body is empowered by statute or contract to establish the enterprise's rates. An enterprise whose management unilaterally imposes restrictions on its own rates, without being required to do so by contract or statute, would, therefore, not qualify.

With respect to specific wording differences between Canada and the US, a question was raised about the need to include the words "independent" and "third-party" as qualifiers of the term "regulator." It was noted that independence increases the assurance that economic benefits and obligations created by rate regulation actually exist.

It is the opinion of the Study Group that, for the most part, private sector rate-regulated enterprises in Canada are subject to rate regulation by an independent regulatory authority. In other words, there is a distinct and separate relationship between the rate regulator and the owners of a rate-regulated enterprise. In the private sector, there are a few situations where the governing body of the rate-regulated enterprise has been given the authority by statute or contract to establish rates to be charged for services or products. 4(25)

It must be noted, however, that, to qualify as a rate-regulated enterprise, an enterprise would also have to meet the second and third criteria of the definitions. 5(26) Issues relating to these two criteria are considered in the following paragraphs.

Cost-based Rates

At first glance, the above-noted definitions of a rate-regulated enterprise would seem to cover various types of rate regulation. 6(27) This is, however, not the case. The type of regulation covered by the *Handbook* and SFAS 71 requires that rates be designed to recover the expected costs of providing regulated services or products. To meet this criterion, it would appear that rates *must* be cost based (in light of the changing regulatory environment, this issue is further examined in a later section of this chapter).

With cost-based rates, there is a direct link between cost and revenues (assuming rates are chargeable and collectible from customers). The allowed rates must be set so that, based on forecasted volumes and costs as determined in the regulatory process, revenues will equal costs, including a fair return on investment. 7(28)

An alternative view is that the cost-based requirement should be removed from the definition of a rate-regulated enterprise. According to this view, the impact of rate regulation should be reflected in general purpose financial statements if the conditions set out in *Handbook* Section 1000 are met. In particular, it should be sufficient that rate regulation produces economic benefits or obligations as a result of past transactions or events and that the related amounts meet the recognition criteria, regardless of the regulatory methodology employed. At present, there is nothing in Section 1000 that requires rates to be cost based. Of course, consistent with historical cost accounting, the recognition of any asset would be limited to the cost of acquiring the asset.

As an example, in a case where rates are not cost based, a regulatory authority may allow an increase in rates over a three-year period if the rate-regulated enterprise undertakes a customer education program in the current period. The expected increase in future revenues associated with the rate increase would represent an economic benefit resulting from a past transaction. The enterprise would, therefore, record an asset once it completes the education program and becomes entitled to the increase in future revenues. The asset would be recorded at the lesser of the expected increase in future revenues and the cost of the education program incurred by the rate-regulated enterprise to acquire the additional future revenues. The asset would be amortized over the period in which the associated additional revenues are earned.

Another example is where a rate-regulated enterprise fails to meet certain quality of service standards and the regulatory authority imposes a penalty in the form of a reduction in future rates. Regardless of the method of rate regulation (cost of service, benchmark or any other method), as long as it is reasonable that there will be a decrease in future revenues as a result of the failure to meet the standards in the current or past period, the regulated enterprise would record a liability. This is because the reduction in future rates would represent a yielding of future economic benefits that the regulated enterprise cannot avoid and that resulted from a past event; that is, failure to meet the quality of service standards. 8(29)

The Study Group is of the opinion that, to meet the definition of a rate-regulated enterprise,

rates should cover the costs of providing services, including a fair return. This requirement ensures a link between rates and costs. The link between rates and costs is important because it provides the basis for deferral accounting and differential treatment in the application of accounting standards. In addition:

- It establishes a point of reference, inherited from the cost-based regulation history of rate-regulated enterprises.
- It follows the economics of cost-of-service rate regulation whereby (1) revenues = costs + return and (2) to the extent certain actual costs differ from forecast costs, they are deferred if allowed by the regulator.
- Under the matching principle, there must be a direct cause and effect relationship between revenues and costs.
- Without this link, it may not be possible to establish that an economic benefit or obligation has been created as a result of a past transaction or event, or to measure the amount of that benefit or obligation.
- It is consistent with current practice and with US accounting standards.

After considerable debate, the Study Group decided to take a broad perspective on what constitutes cost-based rates because the traditional cost-of-service form of regulation is increasingly being replaced by performance-based methods of regulation. With cost-of-service regulation, rates are set on the basis of expected costs, but are reviewed on a frequent basis, so that actual revenues are usually very close to the expected cost of service on which the rates are based. With the new methods of regulation, the link between the regulated enterprise's allowed rates and its specific costs may not be as direct. Many of these new methods, however, are in several respects fundamentally cost based.

Price-cap regulation is one of the new forms of performance-based regulation (rate-setting methodologies are discussed in Chapter 2). Under this approach, rates are set for a period of three to six years and allowed to increase each year on the basis of a formula that is independent of the regulated enterprise's actual costs. In most cases, there is still an indirect link between costs and rates. For example, initial rates are often based on the cost of service (which includes a fair return). The price-cap formula is usually intended to provide the regulated enterprise with a reasonable opportunity to cover its cost of service. Every three to six years, there is a review of the pricing formula, which often includes an evaluation of rates against the cost of service. The formula may allow for the recovery of costs not covered by the basic formula. For example, where a regulated enterprise incurs unusual costs outside the control of management, it may seek approval from the regulatory authority to recover the costs in future rates.

The Study Group is of the opinion that the definition of a rate-regulated enterprise should encompass enterprises whose regulated rates are set to reflect the reasonably expected costs of

providing regulated service. It believes that most types of rate regulation would meet this criterion, including certain types of performance-based and incentive-based regulation. As a result, in its opinion, the definition should not be limited to any particular methodology for approval or fixing of rates. The only requirement should be that the methodology adopted by the regulator produces allowed rates so that, based on expected volumes and costs as recognized in the regulatory process, revenues will equal costs, including a fair return on investment.

Recoverability of Costs of Providing Service

The third criterion in the above-noted definitions states that it must be reasonable to assume that rates set to recover the costs of providing service can be charged to and collected from customers. This criterion requires consideration of expected changes in levels of demand or competition during the recovery period.

Where market conditions do not permit an enterprise to charge and collect the rates allowed under regulation, rate regulation will not be effective in restricting the setting of rates. The Study Group is of the opinion that, in such situations, rate regulation will not have an economic impact because it will not affect future revenues and cash flows. Whether an enterprise is subject to effective regulation may change over time because of changing levels of demand and competition. For example, in the case of long-distance telephone services, competition has resulted in prices that are lower than the rates allowed by regulatory authorities. As a result, regulated rates may no longer be collectible from customers. Accordingly, many telecommunications enterprises (such as Bell Canada) now fail to meet the definition of a rate-regulated enterprise and, for financial reporting purposes, they have discontinued accounting for the effects of rate regulation. Assessing the recoverability of rates requires judgment because many of the factors that determine whether regulation is effective change gradually over time as a result of deregulation initiatives, regulatory philosophy, competition and customer demand.

In the Study Group's view, to create an economic benefit, rate regulation must result in an increase in the future revenues that will be collected from customers; to create an economic obligation, rate regulation must result in a decrease in future revenues collected from customers. Therefore, if rate regulation is to affect what is reported in financial statements, it must be likely that rates designed to recover the cost of providing regulated services or products can be charged to and collected from customers.

SHOULD THE FOCUS BE ON ENTERPRISES OR OPERATIONS?

In applying the definition of a rate-regulated enterprise, questions may arise as to whether the three criteria must apply to the entire organization or to just a portion of its operations. The Study Group observed that the existing definitions of a rate-regulated enterprise have not required that the entire enterprise be subject to rate regulation; an explicit statement, however,

would be helpful. In the United States, for example, SFAS 71 specifically states, in paragraph 6, that: "If some of an enterprise's operations are regulated and meet the criteria of paragraph 5, this Statement shall be applied to only that portion of the enterprise's operations."

The Study Group also observed that, with mergers, acquisitions and industry restructuring, part of an enterprise's operations may be opened to competition and deregulated. As a result, it is becoming increasingly common for only parts of a business to be subject to rate regulation or for different parts of a business to be subject to different forms of rate regulation. Even where an entire business is subject to the same rate regulation, it may face different market conditions so that the third criterion in the above-noted definitions will be met for only a portion of its operation.

In the Study Group's view, for rate regulation to have an impact on what should be reported in accordance with GAAP, it is only necessary that a subset of the enterprise's operations be subject to rate regulation. If some of an enterprise's activities are rate regulated, the financial statements should reflect the economic impact on only that portion of operations.

FULL OR PARTIAL COST-BASED RATES?

In applying the second criterion of the definition of a rate-regulated enterprise, situations may arise where only a portion of an enterprise's rates are cost based, that is, a portion of allowed rates is based on certain specific costs of providing service, while the remainder is derived from some other basis.

This issue would become significant if a tight definition of cost-based regulation were employed that excluded performance-based regulation. For example, a gas distribution utility may be regulated under a price-cap formula that includes a deferral of gas price variances. Differences in the cost of gas from a predetermined level are deferred and collected, or rebated, to customers through an adjustment to future rates. Other than the deferral account, it may be deemed that rates are not cost based.

According to one view, to the extent that a portion of the rates is cost based, there could be an economic impact in that future rates could be affected by past transactions or events resulting in future economic benefits or obligations. Also, there would be a direct link between certain specific costs and future rates. Therefore, an enterprise would be deemed to have met the second criterion if a portion of its rates is cost based. Of course, it would recognize regulatory assets and liabilities only where they relate to the cost-based portion of the rates.

An alternative view is that the full amount of the rates must be cost based for an enterprise to meet the definition of a rate-regulated enterprise and recognize any impacts of rate regulation.

The Study Group did not reach a conclusion on this issue.

CONCLUSION

The *Handbook* establishes the criteria that an enterprise must meet to be considered rate regulated for financial reporting purposes. As part of the terms of reference for this research project, the Study Group was asked to reconsider what constitutes a rate-regulated enterprise and whether the definition in *Handbook* should be amended. In other words: "What criteria must be met for an enterprise to be considered rate regulated?" and "Should the focus be on rate-regulated enterprises, *per se*, or on rate-regulated activities?"

In addressing these questions, the Study Group took into consideration the guidance provided in US accounting standards. After considerable discussion and debate, the Study Group concluded that the criteria for qualifying as a rate-regulated enterprise in Canada are essentially the same as those in the US. To eliminate minor differences with US accounting standards, the Study Group concluded that the *Handbook* definition should be amended to conform to the wording used in SFAS 71.

The Study Group also concluded that, for rate regulation to have an impact on what should be reported in accordance with GAAP, it is not a prerequisite for the entire operations of the enterprise to be subject to rate regulation; it is only necessary that a subset of the enterprise's operations be subject to rate regulation. Consequently, where only some of an enterprise's operations are rate regulated, the financial statements would reflect the economic impact of rate regulation on only that portion of operations. This approach is consistent with current practice and with US GAAP.

Chapter 7

GENERAL PRINCIPLES FOR ACCOUNTING AND FINANCIAL REPORTING

General principles provide useful guidance for assessing, in a particular situation, whether rate regulation has an economic impact that should be reported and, if so, how it should be reported in general purpose financial statements.

INTRODUCTION

In Chapter 4, the Study Group proposed that a new Section should be included in the *CICA Handbook – Accounting* to provide guidance on reporting the economic impact of rate regulation in the financial statements. This chapter focuses on general principles that would apply to situations where an enterprise recognizes the impact of rate regulation, and provides the basis on which accounting standards on specific issues, such as those outlined in Chapter 9, should be developed. It is important to establish general principles because it is difficult to

envisage every situation where rate regulation can have an impact on what should be reported in accordance with GAAP or to prescribe the accounting for a specific issue that will be appropriate for all regulatory methodologies in all situations. Also, to cover every situation would require a large number of specific principles that would either be essentially the same or conceptually inconsistent.

In this chapter, the Study Group proposes general principles that specify which enterprises should report the economic impact of rate regulation in their general purpose financial statements, and when assets and liabilities that result from rate regulation, and any changes in them, should be recognized in those financial statements. These principles flow, for the most part, from the Study Group's conclusions in the previous chapters of this Research Report. A question arises, however, about what information should be disclosed in the notes to the financial statements. In response, the Study Group proposes general principles for presentation and disclosure, and provides guidance for applying those principles.

The following provides a four-step framework for applying GAAP to rate-regulated enterprises using the general principles proposed in this chapter:

1. Determine whether the enterprise is rate regulated for financial reporting purposes.
2. Determine the conditions under which assets and liabilities that result from rate regulation should be recognized in the financial statements.
3. Determine the conditions under which changes in the assets and liabilities that result from rate regulation should be recognized in the financial statements.
4. Determine what information should be disclosed in the notes to the financial statements.

IS THE ENTERPRISE RATE REGULATED?

In Chapter 6, the Study Group concluded that the criteria for qualifying as a rate-regulated enterprise for financial reporting purposes are essentially the same in Canada and the US. Accordingly, the *Handbook* definition should be amended to conform to the wording used in *Accounting for the Effects of Certain Types of Regulation*, SFAS 71.

The following general application principles emanate from the analysis in Chapter 6:

Application

1. The economic impact of rate regulation should be reflected in the general purpose financial statements of an enterprise that has regulated operations that meet all of the following criteria:
    - The enterprise's rates for regulated services or products provided to its customers are established by, or are subject to approval by, an independent, third-party

regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.

- The regulated rates are designed to recover the specific enterprise's costs of providing the regulated services or products, including a fair return on investment.
- In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the enterprise's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs.

2. If some of an enterprise's operations are regulated and meet the above criteria, the financial statements should reflect the economic impact of rate regulation on only that portion of operations.
3. When an enterprise that has regulated operations no longer meets the criteria set out in Principle 1, it should discontinue reflecting the economic impact of rate regulation and reflect the effects of discontinuation in its general purpose financial statements.

WHEN SHOULD REGULATORY ASSETS AND LIABILITIES BE RECOGNIZED?

In Chapter 5, the Study Group concluded that the economic benefits and obligations created by rate regulation should be reported in the financial statements as assets and liabilities provided that they meet the recognition criteria set out in "Financial Statement Concepts." *Handbook* Section 1000.

Recognition (as defined in Chapter 5) is the process of incorporating an item in the financial statements of an entity. As noted in the *Handbook*, it consists of the amount and a narrative description of the item, with the amount being included in a financial statement total. Recognition cannot be substituted with notes, disclosure or other similar types of information.

The general criteria for recognition are that there be a reliable and relevant basis of **measurement** and that a **reasonable estimate** can be made. Also, the item must meet the definition of an element of financial statements. Even so, recognition is subject to a cost-benefit constraint 1(30) and a materiality 2(31) threshold.

The following general recognition principles emanate from the analysis in Chapter 5. In the Study Group's view, these principles provide a solid foundation for determining when the economic impact of rate regulation should be recognized in the general purpose financial statements of a rate-regulated enterprise.

Recognition of Regulatory Assets and Liabilities

4. Rate-regulated enterprises should recognize a regulatory asset in their financial statements, when all of the following conditions are met:
    - Rate regulation creates an economic benefit in the form of increased future revenues as a result of a past transaction or event.
    - It is probable that the enterprise's regulator will set future rates sufficient to provide the economic benefit.
    - Future rates sufficient to provide additional revenue at least equal to the economic benefit will be chargeable and collectible from customers.
    - There is an appropriate basis for measuring the asset and a reasonable estimate can be made of the amount involved.
5. A regulatory asset should be valued at the lower of the expected economic benefit and the cost incurred to acquire the economic benefit.
6. Where the economic benefit is increased and the increase meets all of the conditions in Principle 4, or a portion of the economic benefit that previously did not meet all of the conditions in Principle 4 now meets those conditions, the value of the regulatory asset should be increased by the related amount.
7. Where all or a portion of a regulatory asset no longer meets the conditions in Principle 4, the value of the regulatory asset should be reduced by the related amount.
8. Rate-regulated enterprises should recognize a regulatory liability in their financial statements, when all of the following conditions are met:
    - Rate regulation creates an economic obligation in the form of decreased future revenues, or payments to customers, as a result of a past transaction or event.
    - It is probable that the enterprise's regulator will set rates sufficient to reduce revenues by the amount of the liability or require payments to customers equal to the liability.
    - There is an appropriate basis for measuring the liability and a reasonable estimate can be made of the amount involved.
9. Where the economic obligation is increased, or a portion of the economic obligation that previously did not meet all of the conditions in Principle 8 now meets the conditions, the value of the regulatory liability should be increased by the related amount.
10. Where all or a portion of a regulatory liability no longer meets the conditions in Principle 8, the value of the regulatory liability should be reduced by the related

amount.

WHEN SHOULD CHANGES IN REGULATORY ASSETS AND LIABILITIES BE RECOGNIZED?

In Chapter 5, the Study Group concluded that the changes in the economic benefits and obligations created by rate regulation should be reported in the financial statements as revenues, expenses, gains and losses provided that they meet the recognition criteria set out in the *Handbook* Section 1000.

The following general recognition principle emanates from the analysis in Chapter 5.

Recognition of Revenues, Expenses, Gains and Losses

11. The financial statements of rate-regulated enterprises should report the changes in regulatory assets and liabilities as revenues, expenses, gains or losses. 3(32)

WHAT INFORMATION SHOULD BE DISCLOSED IN NOTES TO FINANCIAL STATEMENTS?

In addition to reviewing the financial statement concepts set out in *Handbook* Section 1000, the Study Group also considered financial statement disclosure requirements. In this regard, the Study Group believes that rate-regulated enterprises should provide in their general purpose financial statements any information required for fair presentation of financial position, results of operations, or cash flows in accordance with GAAP. Furthermore, where the basis of valuation of assets is not self-evident, the basis should be explicitly stated.

With respect to disclosure in the notes and supporting schedules, the Study Group assessed the information needs of users of general purpose financial statements. 4(33) It also assessed the current reporting practices of rate-regulated enterprises. 5(34) Because rate regulation will usually limit the revenue-generating ability of an enterprise, and this can result in the creation of economic benefits and obligations, the Study Group is of the opinion that rate regulation is an important consideration for users in evaluating the economic performance of an enterprise.

Furthermore, the economic benefits and obligations created by rate regulation, and the consequential changes in assets and liabilities, can be material. Most enterprises are not subject to rate regulation, however, and even among rate-regulated enterprises the materiality of the economic impact can vary significantly. Therefore, the Study Group is of the opinion that financial statement users should be given information about the extent to which rate regulation has affected the financial position of an enterprise.

In the Study Group's view, the following general presentation and disclosure principles provide a solid foundation for determining what information about rate regulation and its economic effects

should be disclosed in the financial statements of a rate-regulated enterprise.

Presentation and Disclosure

12. Notes to the general purpose financial statements of rate-regulated enterprises should disclose:

    - that the enterprise (or certain of its operations) is rate regulated for financial reporting purposes or, alternatively, that the enterprise was rate regulated in the prior period, but no longer meets the established criteria for a rate-regulated enterprise;
    - the regulator(s) and the jurisdiction(s) covered (even if the enterprise no longer qualifies as rate regulated);
    - that the financial statements are prepared in accordance with Canadian GAAP.

13. Notes to the general purpose financial statements of rate-regulated enterprises should disclose how rate regulation affects the reported values of individual assets and liabilities on a going-forward basis.

Appendix C presents several examples drawn from current practice that illustrate the types of disclosure encompassed by Principle 12. With regard to Principle 13, Exhibit 7.1 provides an example that illustrates one way to disclose the effects of rate regulation on the reported values of assets and liabilities. Alternatively, for specific financial statement items, the impact of rate regulation may be disclosed in individual notes to the financial statements.

CONCLUSION

The objective of this Research Report is to address accounting and reporting issues pertinent to rate-regulated enterprises and to propose what specific guidance should be provided to meet the special needs of such enterprises and the users of their general purpose financial statements. In Chapter 4, the Study Group proposed that a new Section be included in the *Handbook* to provide guidance on reporting the economic impact of rate regulation in the financial statements. It is the opinion of the Study Group that guidance on accounting and reporting by rate-regulated enterprises should focus on general principles that would apply to the reporting of all economic effects of rate regulation rather than on specific principles that would apply to narrowly defined issues, such as income taxes and foreign currency translation.

In this chapter, the Study Group proposes 13 general principles for applying GAAP to rate-regulated enterprises. The principles provide a basis for determining whether an enterprise is rate regulated for financial reporting purposes, the conditions under which assets and liabilities that result from rate regulation should be recognized in the financial statements, the conditions under which changes in the assets and liabilities that result from rate regulation should be

recognized in the financial statements, and what information should be disclosed in the notes to the financial statements.

The general principles set out in this chapter cover three areas: application, recognition, and presentation and disclosure. They take into consideration the current requirements and guidance set out in the *CICA Handbook – Accounting*, the current practices of rate-regulated enterprises in Canada and the authoritative pronouncements issued in the United States.

Exhibit 7.1

DISCLOSING THE EFFECTS OF RATE REGULATION ON THE REPORTED VALUES OF ASSETS AND LIABILITIES

Note X — Regulatory Assets and Liabilities

The economic impact of rate regulation is reported in these financial statements. Regulatory assets represent future revenues associated with certain costs that will be recovered from customers in future periods through the rate-making process. Regulatory liabilities represent future reductions or limitations of increases in revenues associated with amounts that are to be refunded to customers through the rate-making process.

Regulatory assets and liabilities reflected in the financial statements as at December 31, 2001 relate to the following (in thousands):

	Reported	Disclosed In Notes
Future Income Taxes	$ xx,xxx	$ xx,xxx
Debt Financing Costs	x,xxx	
Environmental Costs	x,xxx	x,xxx
Postretirement Benefit Costs	x,xxx	x,xxx
Foreign Exchange	xxx	
Net Regulatory Asset (Liability)	**$ xx,xxx**	**$ xx,xxx**

At December 31, 2001, $xxx,xxx of reported regulatory assets and all regulatory liabilities are scheduled or expected to be recovered through rates charged or refunded to customers over periods ranging from 5 to 25 years. We intend to request recovery of the remaining regulatory assets in a general rate case filing expected in 2002. For additional information regarding future income taxes, debt financing costs, environmental costs, postretirement benefit costs, and related risks and uncertainties, refer to notes 3, 5, 7, 9 and 12 respectively.

Chapter 8

APPLYING GENERAL PRINCIPLES TO THE

PUBLIC SECTOR

Are the economic benefits and obligations created by rate regulation similar for both private and public sector rate-regulated enterprises? If so, are there any reasons why their general purpose financial statements should not be prepared on a consistent basis?

INTRODUCTION

In Chapter 7, the Study Group proposed General Principles for rate-regulated enterprises in the private sector to use when preparing their general purpose financial statements in accordance with GAAP. The General Principles cover three areas: application, recognition, and presentation and disclosure. In this chapter, the Study Group assesses the appropriateness of those principles for certain public sector enterprises.

At the outset, it must be acknowledged that the public sector environment is distinctly different from the private sector environment. Recognizing these differences, the CICA Public Sector Accounting Board (PSAB) was created to develop accounting standards for the public sector. Therefore, in assessing whether the General Principles should apply to the public sector, the Study Group discussed the characteristics of various types of government organizations and looked to the *CICA Public Sector Accounting Handbook* to identify whether certain government organizations are required to follow the private sector accounting standards set out in the *CICA Handbook – Accounting*. For additional guidance, it also considered public sector accounting standards established by the Governmental Accounting Standards Board (GASB) in the US.

After identifying which government organizations are required to follow the *Handbook – Accounting*, the Study Group debated at length whether, and to what extent, the criteria set out in General Principle 1 should apply. In other words, should the criteria for qualifying as a rate-regulated enterprise be the same for public sector enterprises as for private sector enterprises? Because governments own public sector enterprises and also establish the basis of rate regulation, the need for an "independent" rate-setting authority was given particular scrutiny. It also considered whether the other General Principles regarding application, recognition, presentation and disclosure should apply equally to all enterprises that meet General Principle 1. In other words, is rate regulation sufficiently similar in the public and private sectors to apply rate-regulated accounting rules in a consistent manner for both sectors? 1(35)

AUTHORITATIVE PRONOUNCEMENTS IN CANADA AND THE UNITED STATES

For purposes of applying PSAB's Recommendations, "public sector" refers to federal, provincial, territorial and local governments, government organizations, government partnerships, and school boards. "Government organizations" are organizations that are accountable for the administration of their financial affairs and resources either to a minister of

the government or directly to the legislature or local government council, and are owned or controlled by the government. Government organizations are included in the reporting entity. 2(36)

The *Public Sector Accounting Handbook* notes that government organizations include government business enterprises (GBEs) 3(37) and government business-type organizations. 4(38) For purposes of their financial reporting, such organizations should adhere to the Recommendations in *Handbook – Accounting* unless otherwise directed to specific Accounting Recommendations of PSAB. 5(39)

In the United States, the Governmental Accounting Standards Board (GASB) establishes financial reporting standards for state and local governments, including states, cities, towns, villages and special-purpose governments, such as school districts and public utilities. Governmental accounting systems in the US are organized and operated on a fund basis. 6(40) Fund financial statements are used to report detailed information about governmental, fiduciary and proprietary funds.

Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting, GASB Statement 20, paragraph 2, states that "business-type accounting and financial reporting for state and local governmental entities has generally been defined by pronouncements of the Financial Accounting Standards Board (FASB), Accounting Principles Board (APB) Opinions and Accounting Research Bulletins (ARBs) of the Committee on Accounting Procedure." Statement 20 notes (in paragraphs 6 and 7) that proprietary activities **should** apply the pronouncements of the FASB, APB and ARB issued on or before November 30, 1989. They may also apply **all** FASB Statements and Interpretations issued after November 30, 1989, **except** for those that conflict with GASB pronouncements.

It is noteworthy that GASB Statement No. 20 indicates (in paragraph 9) that "*Accounting for the Effects of Certain Types of Regulation*, SFAS 71, does not specifically exclude state and local governmental entities from its scope, nor does it preclude its application to governmental entities." GASB Statement 20 notes that the FASB modified paragraph 5(a) of SFAS 71 to permit application by governmental utilities with rates set subject to a statute or contract. SFAS 71 and related pronouncements may be applied to proprietary activities that meet the criteria of those pronouncements for reporting as regulated enterprises.

GASB Statement 34, *Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments*, notes that GAAP for enterprise funds are those applicable to similar businesses in the private sector. Statement 34 takes a further step, however, by emphasizing (in footnote 12) that "The provisions of FASB Statement No. 71, *Accounting for the Effects of Certain Types of Regulation*, only apply to governments that have *qualifying* enterprise funds." 7(41)

RATE REGULATION AND THE PUBLIC SECTOR

In the "Introduction" to this chapter, the question was raised as to whether rate regulation is sufficiently similar in the public and private sectors to warrant consistent accounting rules for both sectors. There are differing views on this matter, centring on the following two key issues: independence of the rate regulator from the enterprise being regulated; and the types of government organizations that would qualify as rate-regulated enterprises under the definitions set out in Chapter 6 of this Research Report. These differing views are discussed in the remaining sections of this chapter.

NEED FOR AN INDEPENDENT REGULATOR

Required Criteria

General Principle 1 states that the economic impact of rate regulation should be reported in the general purpose financial statements of an enterprise that has regulated operations that meet all of the following criteria:

- The enterprise's rates for regulated services or products provided to its customers are established by, or are subject to approval by, an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.
- The regulated rates are designed to recover the specific enterprise's costs of providing the regulated services or products.
- In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the enterprise's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs.

All three criteria must be met for either a private sector enterprise or a public sector enterprise to be considered a "rate-regulated enterprise" for financial reporting purposes and, therefore, to be able to account for the economic effects of rate regulation. Meeting the criteria, however, does not automatically mean that the rate-making process will have an economic impact that should be reported in the enterprise's financial statements through the recognition of a regulatory asset or a regulatory liability. Before that can happen, the fact that the rate-making decision will have an economic impact must be clearly demonstrated.

Independence is a Prerequisite 8(42)

There is a view that, with respect to rate regulation in the public sector, there is usually no

"independent, third-party regulator" because the government controls both the enterprise and the regulatory agency. Those who hold this view argue that, unless the regulator is independent, the enterprise cannot be considered as rate regulated for financial reporting purposes. As a result, different criteria are needed if a public sector enterprise is to qualify as rate regulated for financial reporting purposes.

In considering whether different criteria are needed for the public sector, the proponents of this view observed that, as noted in the section on "Scope of Application," set out below, most government enterprises have governing boards and almost all are given the legislative power to set the rates they charge for their services and products. 9(43) They maintain that, in the public sector environment, the uncertainty arising from regular elections, different political party ideologies and occasional minority governments makes it difficult to recognize the economic impact of rate decisions that are other than short term. Further, regular elections and balanced budget legislation may mean that governments face additional pressures to "manage" financial results. In addition, because the decisions of regulators are not necessarily consistent from jurisdiction to jurisdiction, it is, in their opinion, more difficult for legislators and the public to compare the financial results of rate-regulated enterprises in the public sector. A government may also have an incentive to use the regulatory process to create assets and liabilities. For example, it may wish to contain the rates charged by a public sector utility without affecting its financial results. If the government uses the modified equity method of accounting for the utility, any reduction in profitability would flow through to the owning government, possibly turning a surplus into a deficit.

Those who support this view acknowledge that although, other things being equal, it would be highly desirable for accounting for rate regulation in the public sector to be consistent with accounting for rate regulation in the private sector, this is an issue of such significance that such a result is highly unlikely. Whereas, in the vast majority of cases, there is independent third-party rate regulation in the private sector, in that the regulators are independent of both the regulated enterprise and its owners, such is usually not the case for rate-regulated enterprises in the public sector. If the accounting by public sector rate-regulated enterprises is to be consistent with that in the private sector, this same standard or benchmark must apply equally to the public sector. In most cases, however, this is simply not possible.

Proponents of this view also maintain that, in the private sector, the regulator is not accountable for the financial performance of the regulated enterprise. This independence ensures that the regulator can balance and protect the interests of both the investors in the regulated enterprise and the consumer. It allows the regulator to make rate decisions that require the benefits and obligations arising from those decisions to flow through to both the regulated enterprise and the consumer. It is this authority and independence that provide the rigour to allow differential accounting for rate decisions. Without this authority and independence, there is a potential for the differential treatment for rate-regulated enterprises to be used to "manage" financial results. Further, there is insufficient assurance that the economic benefits or obligations of rate decisions

will occur. Furthermore, allowing a self-governing board to "manage" its performance by creating, amending or deleting regulatory assets and liabilities may place that board in a conflict of interest position.

Finally, the proponents of this view note that many private sector rate-regulated enterprises have market mechanisms to provide additional checks and balances that do not exist in the public sector. For example, the shares and or debt of many private sector utilities are publicly traded, bringing the discipline of securities commission accounting and disclosure requirements into play, requirements that may be more onerous than Canadian GAAP. These types of external influences do not usually exist for public rate-regulated enterprises. 10(44) The best way to protect the public interest is to require a regulator to be independent.

Independence *per se* is Not the Key Factor 11(45)

Others are of the opinion that the key issue is not the independence of the regulator *per se*, but the credibility of the regulatory process, in particular, whether it is likely that the regulator will allow or require the future changes in regulated rates necessary to justify the recognition of regulatory assets and liabilities. For example, without independence, it is possible that a regulator may indicate that a cost will be deferred so that a regulatory asset can be recognized, even though there is no intention to allow for a future recovery of the deferred cost. At some future date, the regulator might then reverse that decision, with the result that the deferred cost will have to be written off and income reduced in that future period. In such a situation, there is a trade-off between two risks:

- the risk that an enterprise may recognize regulatory assets and liabilities that do not exist; and
- the risk that an enterprise may fail to recognize regulatory assets and liabilities that do exist.

It is noted that it is not uncommon in other areas of financial accounting for professional judgment to be exercised in determining whether assets or liabilities exist and the values at which they should be reported.

Those who support this view recognize that, in the public sector, it is rare to have a totally independent regulator because the same government that owns the regulated enterprise has legislative responsibility for the regulator. Occasionally, the governing board of the enterprise is empowered by statute or contract to set rates and is, in effect, the regulator. Consequently, if total independence were required, virtually all public sector enterprises would be precluded from qualifying as rate-regulated enterprises for financial reporting purposes.

The possibility that a government may unduly influence the rate-setting process for social or political reasons is acknowledged. 12(46) Nonetheless, this should not be a financial reporting issue as long as real economic benefits and obligations are created by rate regulation. For

example, in the case of a deferred cost, a regulatory asset should be recognized when there are additional future revenues sufficient to recover the amount deferred, regardless of the reason for deferring the cost.

The role of financial reporting is to report on the economic resources and obligations of an enterprise, not to second-guess the motivation that led to the creation of those economic resources and obligations. Furthermore, a government's decisions should not be confused with rate-setting interference. For example, a government, as owner, could instruct the enterprise not to recover a certain cost, thereby creating a loss. Such a loss would be a loss under GAAP because it is created by reducing anticipated future cash flows, not by rate regulation.

With regards to differences in regulatory decisions between jurisdictions, this also happens with private sector rate-regulated enterprises. More important, failing to report the economic impact of differences in regulatory decisions will not enhance comparability, but make it more difficult.

Alternative Scenarios

In addressing the issue of independence, the Study Group debated three alternative scenarios. First, the regulator is an independent third party. Second, the regulator is not an independent third party but operates at arm's length from the management of the enterprise. Third, the governing body of an enterprise is empowered by statute or contract to establish rates.

The regulator is an independent third party

In Chapter 6, the Study Group noted that, for the most part, private sector rate-regulated enterprises in Canada are subject to rate regulation by independent regulatory authorities. This distinct and separate relationship between the rate regulator and the owners of a rate-regulated enterprise establishes the credibility of the regulatory process and justifies the recognition of regulatory assets and liabilities as long as it is likely that the regulator will allow or require the future changes in regulated rates. The same applies to a GBE that is subject to rate regulation by an independent regulatory authority. 13. For example, the Saskatchewan Telecommunications Holding Corporation (SaskTel), a provincial Crown corporation, has an independent third-party regulator, the CRTC, which has been established under federal legislation.13

The regulator is not an independent third party but operates at arm's length from the management of the enterprise

Although independent regulators are the norm in the private sector, this is generally not the case in the public sector. Usually, the same government that owns a rate-regulated enterprise also establishes the regulatory authority for that enterprise and is responsible for the legislation under which the regulator operates. Partly to assist in dealing with this issue, the Study Group undertook a survey of federal provincial and territorial comptrollers. Survey

participants were asked whether their rate-regulated enterprises would continue to meet the first criterion if rates had to be established by an independent, third-party regulator. Most respondents said that, in their jurisdiction, rates were independently established because the regulator was operating at arm's length from the management of the enterprise (survey excerpts are provided in Appendix D to this Research Report). 14(47)

After considerable debate, the consensus of the Study Group 15(48) was that, as long as the regulator is operating at arm's length from the management of the regulated enterprise, the regulator need not be a completely independent third party. In such situations, there is sufficient assurance that the regulatory process is credible and there would be a significant reduction in the risk that the regulator would make decisions so as to "manage" the reported performance of the regulated enterprise. As a result, the risk of recognizing regulatory assets and liabilities that do not exist is outweighed by the risk of failing to recognize regulatory assets and liabilities that do exist. As noted below under "Required Disclosures," the Study Group believes that there should be disclosure of any actual or perceived lack of independence.

When there is no independent third-party regulator, professional judgment would be required to assess the credibility of the regulatory process. In this respect, the following conditions and circumstances merit consideration, either individually or in combination, when assessing whether the regulator is operating at arm's length from the management of the rate-regulated enterprise:

- Is the regulator a separate organization from the regulated enterprise?
- Is the regulator staffed by personnel who are neither employees nor directors of the regulated enterprise?
- Is there a public hearing process with opportunity for interested parties to participate?
- Does the regulator provide justification for its decisions?
- Are the decisions of the regulator public documents?
- Is there a well-defined plan in place for the deferral of costs and/or a history of recovering the related revenues?

If it is evident that the regulator is not operating at arm's length, the regulated enterprise would not meet the required criteria, and could not, therefore, apply the differential treatment for accounting for rate regulation.

A governing body is empowered by statute or contract to establish rates

In some cases, the governing boards of GBEs have been empowered by statute or contract to set rates for the enterprise. For example, in Nova Scotia, two rate-regulated entities are

reported in the Province's summary financial statements, Halifax-Dartmouth Bridge Commission and Highway 104 Western Alignment Corporation. The toll rates of the Halifax-Dartmouth Bridge Commission are subject to approval of the Nova Scotia Utility and Review Board. The toll rates of Highway 104 are set in the agreement with the bondholders and agreed to by the corporation and the Province, but are not regulated by an independent third party, such as the Nova Scotia Utility and Review Board (survey excerpts are provided in Appendix D to this Research Report).

In such circumstances, the regulatory requirements for the setting of rates comes from the statute or contract, and this is in line with the first criterion. It must be emphasized, however, that to meet the definition of a rate-regulated enterprise, the enterprise would still have to meet the other two criteria: rates must be designed to cover the costs of providing service and rates necessary to cover the costs of service will be chargeable and collectible from customers.

Also, meeting the definition of a rate-regulated enterprise does not necessarily mean that rate regulation would have an economic impact that should be recognized in the financial statements. What it does mean is that the rate-regulated enterprise would then apply the General Principles set out in Chapter 7. For example, consistent with General Principle 4, it would recognize a regulatory asset where the following conditions are met, but only if all four conditions are met:

- Rate regulation (in the form of the board setting rates under its statute) creates an economic benefit in the form of increased future revenues as a result of a past transaction or event.
- It is probable that the enterprise's regulator (that is, the board) will set future rates sufficient to provide the economic benefit.
- Future rates sufficient to provide additional revenue at least equal to the economic benefit will be chargeable and collectible from customers.
- There is an appropriate basis for measuring the asset and a reasonable estimate can be made of the amount involved.

Concern regarding the credibility of the regulatory process

One member of the Study Group has expressed concern about the credibility of the regulatory process in the second and third scenarios. In his opinion, if the regulator is not operating at arm's length from the owner of the rate-regulated enterprise, it is irrelevant whether or not the regulator is operating at arm's length from the management of the enterprise. For each jurisdiction, there is only one government and rate-regulated enterprises are part of that government. The government chooses when to carry out its activities through departments, agencies, rate-regulated enterprises or other government business enterprises,

but it controls all of them. Further, recommendations allowing a self-governing board to "manage" its performance by inappropriately creating rate-regulated assets and liabilities may place that board in a conflict-of interest-position. He also indicated that, in his opinion, the majority of statutes provide little guidance on how the rates are to be determined.

The Study Group discussed these issues at length and has addressed them above.

Required Disclosures

In Chapter 7, the Study Group concluded that the notes to the general purpose financial statements of private sector rate-regulated enterprises should disclose the regulator(s) and the jurisdiction(s) covered, even if the enterprise no longer qualifies as rate regulated (see General Principle 12 regarding presentation and disclosure). If a GBE's rates are governed by a statute or contract, this should also be disclosed in the notes.

Furthermore, if there is a perception that the regulator is not independent, the enterprise should provide note disclosure of its relationship with the regulator in accordance with *CICA Handbook – Accounting* Section 3840, "Related Party Transactions." Section 3840 establishes measurement and disclosure standards for related party transactions in the financial statements of profit-oriented enterprises.

In the Study Group's view, information about the related parties of a public sector rate-regulated enterprise is of significance to financial statement users. Related parties exist when one party has the ability to exercise, directly or indirectly, control, joint control or significant influence over the other. Two or more parties are related when they are subject to common control, joint control or common significant influence. The degree of influence that one party may exert on another is a major factor in determining whether they are related. In some cases, the degree of influence may be so remote that they need not be considered related. An explanation of how significant influence, joint control or control is exercised between the reporting enterprise and a related party clarifies the nature of their relationship.

SCOPE OF APPLICATION

With respect to the scope of application, some feel that the criteria set out in Section 3465 of the *Handbook – Accounting* for qualifying as a rate-regulated enterprise are too broad because they could apply to many government organizations. For financial reporting purposes, any government organization that is required to follow the *Handbook – Accounting*, or that chooses to do so, could, in their opinion, potentially qualify for such treatment, if it meets the *Handbook – Accounting* criteria. In addressing this concern, the Study Group compared authoritative pronouncements promulgated by the Public Sector Accounting Board (PSAB) 16(49) and the US Governmental Accounting Standards Board (GASB).

Government Business Enterprises (GBEs)

A GBE is different from other types of government organizations. As its principal activity, a GBE sells goods and services to individuals and organizations outside the government reporting entity 17(50) Public Sector Accounting Handbook, "Financial Reporting Entity," paragraph PS1300.07) and its revenues are to a large degree received from outside sources. In the case of government business-type organizations, 18(51) the goods and services are not sold primarily to individual and organizations outside the government and/or it cannot, in the normal course of its business, maintain its operations and meet its liabilities from revenues received from sources outside the government reporting entity. Since revenues adequate to maintain the organization are not derived from third parties, rate regulation does not apply to these government business-type organizations.

By inference, although it is not specifically stated in the *Public Sector Accounting Handbook*, except for GBEs, rate regulation does not apply to the public sector. To determine whether a government organization is a GBE, several factors should be considered:

- the enterprise's history of maintaining its operations and meeting its liabilities;
- whether the enterprise would continue to maintain its operations and meet its liabilities without relying on sales to, or subsidies from, the government reporting entity;
- past, present and future economic conditions within which the enterprise operates; and
- whether the enterprise has realistic and specific plans that show how it expects to maintain its operations and meet its liabilities in the future.

The *Public Sector Accounting Handbook* makes no specific reference to the types of GBEs that should apply the accounting standards set out in the *Handbook – Accounting*. Nonetheless, "Financial Reporting Entity," Section PS1300, paragraph .27, emphasizes that, because a GBE carries on a business, its financial statements should be prepared on the same basis as those of a private sector business. This basis is most appropriate for measuring the government's investment in the organization and the impact it has on the government's financial position and results. This would seem to imply that there should be consistency in application between public and private rate-regulated enterprises unless there are some good reasons for the contrary.

One Study Group member has noted that there are many GBEs in Canada, and that their business covers a broad range of activities, including casino gaming, lotteries, liquor boards, banking, insurance, housing, etc., as well as publicly owned utilities. In common with most public sector boards, most GBE boards are given the legislative authority to set the rates they charge for their products or services. Also, by definition, GBEs are self-sustaining. Therefore, they fully recover their costs. Accordingly, in his opinion, many GBEs would meet the definition of a rate-regulated enterprise and would be entitled to apply the differential treatment for accounting for rate regulation. In his opinion, the public will therefore have great difficulty in

understanding why such GBEs are considered rate regulated and why they are allowed to use this differential treatment.

The other nine members of the Study Group question the validity of this argument. In their opinion, there are relatively few GBEs in the public sector that meet the criteria set out in the definition of a rate-regulated enterprise.

The preceding discussion and analysis of public sector pronouncements suggests that General Principle 1 should apply only to GBEs. To assess the feasibility of this approach, in the survey of federal, provincial and territorial comptrollers referred to above, participants were asked the following questions:

- In your jurisdiction, what entities that are included in the federal or provincial government's summary financial statements currently follow GAAP for rate-regulated enterprises as set out in the *Handbook – Accounting*?
- The Study Group is proposing to limit application of the above-noted definition of a "rate-regulated enterprise" to "government business enterprises." In your jurisdiction, would this eliminate any of the entities currently following GAAP for rate-regulated enterprises?
- Is it important that the general purpose financial statements of rate-regulated enterprises in the public sector be prepared on a basis consistent with that in the private sector?

In response, survey participants reported that relatively few rate-regulated enterprises form part of the government reporting entity. Most of these enterprises are electric power utilities and all are GBEs. 19(52) They also felt that it is important that the general purpose financial statements of GBEs be prepared on a basis consistent with that of rate-regulated enterprises in the private sector (survey excerpts are provided in Appendix D of this Research Report).

In the Study Group's view, the application of General Principle 1 should be limited to GBEs that meet the criteria for qualifying as a rate-regulated enterprise. This would include having rates designed to cover the enterprise's cost of providing service, that is, rates set so that, based on expected demand and costs as recognized in the regulatory process, revenues will equal the costs of providing service. In line with existing practice, the Study Group is of the opinion that the *Public Sector Accounting Handbook* Recommendations should specifically recognize that only GBEs may qualify for the differential treatment afforded to rate-regulated enterprises by the *Handbook – Accounting*.

CONCLUSION

In this chapter, the Study Group assessed whether the General Principles set out in Chapter 7 are appropriate for the public sector. After examining the public sector environment in both

Canada and the United States, it considered the need for an independent rate-setting authority and the criteria in General Principle 1, as they relate to the scope of public sector activities that may be considered rate regulated for financial reporting purposes. As part of its assessment, the Study Group considered whether the other General Principles regarding application, recognition, presentation and disclosure should apply equally to all enterprises that meet General Principle 1.

With respect to the scope of public sector activities that may be considered "rate regulated" for financial reporting purposes, the consensus of the Study Group is that the application of General Principle 1 should be limited to government business enterprises that meet the criteria for qualifying as a rate-regulated enterprise. This is consistent with the authoritative pronouncements and current practices in both Canada and the United States. In this regard, *Public Sector Accounting Handbook* Recommendations should specifically recognize that, in the public sector, only GBEs are entitled to qualify as rate-regulated enterprises for financial reporting purposes. For GBEs that do qualify, the accounting recommendations for rate-regulated enterprises contained in the *Handbook – Accounting* should be applied. One Study Group member, however, feels strongly that, for a GBE to qualify as a rate-regulated enterprise for financial reporting purposes, the regulatory agency must be independent of both the GBE and government.

Regarding the need for an independent rate-setting authority, nine of the ten Study Group members are of the view that the first criterion in the definition of a rate-regulated enterprise should remain unchanged: the enterprise's rates for regulated services or products provided to its customers should be established by, or subject to approval by, an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers. Also, complete independence of the regulator from a public sector enterprise is not required as long as the regulator operates at arm's length from the enterprise. In this respect, guidance is provided on assessing whether the regulator is operating at arm's length and the credibility of the regulatory process.

Should the other General Principles regarding application, recognition, presentation and disclosure apply equally to all enterprises that meet the criteria in General Principle 1? The Study Group consensus is that the economic benefits and obligations created by rate regulation are similar for many private and public sector enterprises. Therefore, the general purpose financial statements of rate-regulated enterprises in both the public and private sectors should be prepared on a consistent basis. One member, however, would support this position only if the regulatory agency is independent of both the GBE and the government.

Chapter 9

APPLYING GENERAL PRINCIPLES TO SPECIFIC

ISSUES

Detailed guidance is not essential to recognize the economic impact of rate regulation on the financial reporting of rate-regulated enterprises, but it would help avoid any misunderstanding and, at the same time, illustrate how general principles should be applied in practice.

INTRODUCTION

As noted in Chapter 1, the Study Group determined that it would be prudent to review the financial statement concepts set out in "Financial Statement Concepts," *CICA Handbook – Accounting* Section 1000. In this regard, it has concluded that the current accounting and financial reporting practices of rate-regulated enterprises fall well within that conceptual framework. Furthermore, a differential treatment based on the General Principles presented in Chapter 7 is considered appropriate for rate-regulated enterprises. To supplement those principles, the project terms of reference call for the Study Group to consider, "What additional guidance is needed relating to specific accounting and reporting issues encountered by rate-regulated enterprises?"

In this chapter, the Study Group elaborates on the General Principles and provides guidance on their application to specific issues. The specific issues covered in this chapter are capital assets (including interest capitalized), income taxes and inter-company gains and losses. Also included are other areas significant to rate-regulated enterprises, such as the accounting treatment of employee future benefits. For each of these matters, consideration is given as to when assets or liabilities (and changes in them) that result from rate regulation should be recognized in the financial statements (refer to General Principles 4 to 11) and what information should be disclosed in the notes to the financial statements (refer to General Principles 12 and 13).

Several broad issues of particular relevance to rate-regulated enterprises are also addressed in this chapter: (1) application of general principles; (2) recoverability of assets created by rate regulation; and (3) discontinuation of accounting for the economic impact of rate regulation (refer to General Principle 3).

APPLICATION OF GENERAL PRINCIPLES

GAAP in both Canada and the US encompasses reflecting economic benefits (assets) and economic obligations (liabilities) in the balance sheet, and including changes in such benefits and obligations in the income statement. Although applying GAAP to the general purpose financial statements of rate-regulated enterprises works the same way, in the Study Group's opinion, there is an additional consideration — recognizing regulatory assets and liabilities that result from rate-regulation.

Application of the General Principles would result in a rate-regulated enterprise following all of

the standards in the *Handbook*, the same as a non-regulated enterprise would. In addition, a rate-regulated enterprise would recognize the economic impact of rate regulation where that recognition is consistent with the General Principles. This is consistent with the approach usually taken by rate-regulated enterprises in the US.

In applying the General Principles to specific issues, the economic impact of rate regulation is identified; that is, the economic benefit that exceeds the amount that would otherwise be recognized as an asset, or the economic obligation that exceeds the amount that would otherwise be recognized as a liability. This impact is then recognized as a regulatory asset or a regulatory liability to the extent that the General Principles are met. For example, if a regulator allows for the future recovery of costs that would normally be expensed in the current period, the costs would be capitalized if General Principle 4 were met.

In some cases, a regulator may use the cash method (pay-as-you-go) to determine the amount of expenses that are to be recoverable through allowed rates. For example, with regard to accounting for income taxes, many rate-regulated enterprises follow the taxes payable or flow through method, where that method is prescribed by the regulator, and do not follow the method normally required by GAAP, the liability method. Pending further study, the Accounting Standards Board specifically permits the use of the taxes payable or flow-through method in Canada. If this were not the case, and a Canadian rate-regulated enterprise had to record its full tax liability, and also recorded a regulatory asset equal to the expected amount of future income taxes that would be recoverable in future rates, there would be a significant increase in capital taxes and large corporation taxes payable.

In the US, rate-regulated enterprises always use the liability method in preparing their financial statements, even when the regulator prescribes the taxes payable or flow-through method. They record future income tax assets or liabilities on the balance sheet and they also set up a corresponding regulatory asset or liability. The net effect is that income is presented on a taxes payable basis.

Some maintain that there should be an exception to the strict application of the General Principles where a regulator applies the cash method (or some other prescribed method) for determining certain costs to be included in the cost of service. Either the regulatory asset should be netted against the associated liability (or the regulatory liability should be netted against the associated asset) or the rate-regulated enterprise should continue to apply the cash method (or some other prescribed method) of accounting to these specific costs. With either alternative, the end result is that reported income would be the same as if the General Principles were applied.

Although both assets and liabilities would be lower, this impact could be disclosed in the notes to the financial statements, consistent with current practice. More importantly, the base against which capital taxes and large corporation taxes are applied would be reduced, resulting in significant tax savings for the ratepayers or the shareholders of the rate-regulated enterprise. Of the two approaches, those favouring such exceptions prefer the cash method (or some other

prescribed method), as opposed to the netting method, with appropriate note disclosure on the netting of assets and liabilities.

Those who argue for strict application of the General Principles believe that tax regulations should not govern the accounting treatment for rate-regulated enterprises. They also note that, unless specifically sanctioned by the *Handbook*, disclosure in the notes to the financial statements *per se* is not a substitute for proper accounting. Likewise, the netting (or offsetting) of GAAP assets / liabilities with regulatory assets / liabilities does not meet GAAP requirements. Under the General Principles set out in Chapter 7, GAAP methods should be applied to all assets and liabilities reported on the balance sheet, and separate regulatory assets and liabilities should be reported, as appropriate, to reflect the economic impact of rate regulation. 1(53)

Those who argue for exceptions maintain that financial reporting must not only strive for conceptual purity, but must also deal with practical realities. With disclosure in the notes to the financial statements, consistent with current practice, strict adherence to the General Principles, in their opinion, would not significantly improve the quality or transparency of financial reporting by rate-regulated enterprises. It would, however, needlessly increase the tax burden, and that burden would be passed on to customers as part of the cost of service. Or, if the regulator did not allow that cost to be recovered in future rates, that burden would be passed on to shareholders.

There is a difference of opinion in the Study Group on this issue. Some believe that there should be a strict adherence to the General Principles set out in Chapter 7, whereas others are of the view that the differential treatment currently permitted in "Income Taxes," *Handbook* Section 3465, which is also current practice among Canadian rate-regulated enterprises, should continue.

For each issue addressed in this chapter, the accounting treatment that would result from strict application of the General Principles is presented. In light of the above-noted differing views, the practical accounting treatment is also described for the issues where regulators use the cash method to determine the amount of expenses to be included in rates.

RECOVERABILITY OF ASSETS CREATED BY RATE REGULATION

General Principle 4 sets out the conditions for recognizing a regulatory asset in the financial statements. To recognize a regulatory asset, it must be likely that the regulator will change future rates by an amount sufficient to provide an economic benefit. This requires an ongoing assessment of the likelihood of recovery of regulatory assets subsequent to their initial recognition.

With respect to the ongoing recognition of regulatory assets, the following hierarchy of evidence may be helpful in establishing the likelihood of future recovery:

- The enterprise has an order from its regulator that addresses and allows the recovery

of the specific incurred cost.

- The regulator has treated the specific incurred cost as an allowable cost-of-service item in prior regulatory filings of the enterprise.
- The same regulator has treated the specific incurred cost as an allowable cost in connection with another enterprise's filing. Also, it is the regulator's general policy to allow recovery of this incurred cost.
- The regulator has included a similar incurred cost as an allowable cost in prior regulatory filings of the enterprise.
- The same regulator has treated a similar incurred cost as an allowable cost in connection with another enterprise's filing. Also, it is the regulator's general policy to allow the recovery of this incurred cost.
- The enterprise has obtained an "accounting order" or comparable form of communication from the regulator agreeing with the enterprise's proposed accounting for the specific incurred cost, even though such orders often include a qualifier that the letter guidance is not authoritative for rate-making purposes. In a few jurisdictions, such accounting orders may provide the same degree of assurance as a specific rate order. The level of assurance provided by accounting orders must be assessed on a commission-by- commission basis, with particular focus on legal authority, who signs the accounting order, and historical regulatory practices.
- A significant majority of other regulatory authorities has treated a specific incurred cost (or similar incurred cost) as an allowable cost and the enterprise's regulator has not disallowed that cost.
- Representation letters stating that it is likely that the cost will be allowable in future rates are obtained from outside legal counsel with substantive involvement, informed in-house legal counsel and management.

Furthermore, it must be anticipated that the enterprise will request the future recovery no later than that enterprise's next rate case. As well, a determination must be made that the rates, established at levels that would recover the costs, including a fair return on investment, can be charged to and collected from customers.

SPECIFIC ISSUES ADDRESSED IN THE *CICA HANDBOOK – ACCOUNTING*

The following analyses provide guidance for applying the General Principles for rate-regulated enterprises to specific matters covered in the *Handbook*, including the differential treatment for property, plant and equipment, income taxes, and inter-company gains and losses. Guidance is

also provided on employee future benefits, foreign currency translation and financial instruments, although differential treatment is not specifically provided in the *Handbook*.

Property, Plant and Equipment

As noted in Chapter 1, accounting for fixed / capital assets (property, plant and equipment) is a significant issue for the natural gas sector and the hydro-electric industry. In a rate-regulated environment, pertinent considerations include: cost and amortization; allowance for funds used during construction (AFUDC); disallowances; future removal and site restoration costs; and disposal of items of property, plant and equipment. The following analyses cover each of these considerations.

Cost and amortization

Accounting Issue

Current accounting standards for profit-oriented enterprises require that property, plant and equipment be recorded at cost and that amortization be recognized in a rational and systematic manner appropriate to the nature of the item of property, plant and equipment with a limited life and its use by the enterprise. The accounting issue is whether a rate-regulated enterprise should record a regulatory asset or liability for the amount by which depreciation for regulatory purposes is different from the amount acceptable under normal GAAP methods.

Accounting Requirements in Canada

"Property, plant and equipment," *Handbook* Section 3061, paragraph .10, states that:

> Rate-regulated property, plant and equipment are items of property, plant and equipment held for use in operations meeting all of the following criteria: 2(54)
>
> (a) the rates for regulated services or products provided to customers are established by or are subject to approval by a regulator or a governing body empowered by statute or contract to establish rates to be charged for services or products;
>
> (b) the regulated rates are designed to recover the cost of providing the services or products; and
>
> (c) it is reasonable to assume that rates set at levels that will recover the cost can be charged to and collected from customers in view of the demand for the services or products and the level of direct and indirect competition. This criterion requires consideration of expected changes in levels of demand or competition during the recovery period for any capitalized costs.

Where the amount by which depreciation for regulatory purposes differs from the amount acceptable under normal GAAP methods, a regulatory asset or liability should be recognized if the related asset meets the *Handbook* definition of rate-regulated property, plant and equipment and the pertinent recognition criteria (General Principles 4 to 7). In assessing the amount of depreciation acceptable under GAAP, professional judgment should be used in choosing the method that allows amortization to be recognized in a rational and systematic manner appropriate to the nature of the item of property, plant and equipment. The amortization method and estimates of the life and useful life of an item of property, plant and equipment should be reviewed on a regular basis (see *Handbook* paragraph 3061.33).

In addition, rate-regulated enterprises should determine the extent to which their regulatory depreciation methods differ from normal GAAP methods and lives and, if the differences are significant, disclose them in the notes to the financial statements (General Principle 13). 3(55)

Allowance for funds used during construction (AFUDC)

Accounting Issue

Current accounting standards for profit-oriented enterprises allow for the capitalization of certain carrying costs, such as interest costs, that are directly attributable to an acquisition, construction or development activity. Often, regulators set the allowance for funds used during construction on the basis of the regulated enterprise's weighted average cost of capital, which would normally exceed the amount otherwise allowed under GAAP because it includes a cost-of-equity component. The accounting issue is whether a rate-regulated enterprise should be allowed to capitalize an allowance for funds used during construction which exceeds the amount otherwise allowed under GAAP, if that is the method used for rate-making purposes.

Accounting Requirements in Canada and the US

Handbook Section 3061, paragraph .23, states that:

> The cost of an item of property, plant and equipment that is acquired, constructed, or developed over time includes carrying costs directly attributable to the acquisition, construction, or development activity such as interest costs when the enterprise's accounting policy is to capitalize interest costs. For an item of rate-regulated property, plant and equipment, the cost includes the directly attributable allowance for funds used during construction allowed by the regulator.

In the United States, *Accounting for the Effects of Certain Types of Regulation*, SFAS 71, paragraph 15, notes that:

> In some cases, a regulator requires an enterprise subject to its authority to capitalize, as part of the cost of plant and equipment, the cost of financing construction as financed partially by borrowings and partially by equity. A computed interest cost and a designated cost of equity funds are capitalized, and net income for the current period is increased by a corresponding amount. After the construction is completed, the resulting capitalized cost is the basis for depreciation and unrecovered investment for rate-making purposes. In such cases, the amounts capitalized for rate-making purposes as part of the cost of acquiring the assets shall be capitalized for financial reporting purposes instead of the amount of interest that would be capitalized in accordance with FASB Statement No. 34, *Capitalization of Interest Cost*. The income statement shall include an item of other income, a reduction of interest expense, or both, in a manner that indicates the basis for the amount capitalized. 4(56)

Application of General Principles

For regulatory purposes, a regulator may require a rate-regulated enterprise to capitalize an allowance for the funds used during construction (AFUDC) at a rate that assumes the project is financed by debt and shareholders' equity. After the construction is completed, the resulting capitalized cost is the basis for depreciation and unrecovered investment for rate-making purposes. As a result, the rate-regulated enterprise recovers the total cost of the plant, including the AFUDC, through depreciation charges that are part of the cost of service to be recovered from customers over the estimated life of the plant.

The full amount of the AFUDC should be capitalized as a regulatory asset if its subsequent depreciation / amortization is likely to be included in allowable costs for rate-making purposes (General Principle 4). The AFUDC is normally divided into two components: the interest component, or the allowance for borrowed funds, and the equity component, or the allowance for equity funds. In addition, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, how rate regulation affects the reported values of property, plant and equipment on a going-forward basis. They should also provide pertinent information on the AFUDC, as appropriate (General Principle 13). 5(57)

Disallowances

Accounting Issue

The accounting issue is whether a disallowance should be deducted from the reported cost of the plant, and a loss reported, when it becomes likely that part of the cost will be disallowed

for rate-making purposes.

Accounting Requirements in Canada and the US

In Canada, there are no specific accounting pronouncements that address the issue of disallowances of plant costs of rate-regulated enterprises. It is encompassed, however, by "write downs" in *Handbook* Section 3061, which states that:

> *When the net carrying amount of an item of property, plant and equipment, less related accumulated provision for future removal and site restoration costs and future income taxes, exceeds the net recoverable amount, the excess should be charged to income.* (paragraph .38)
>
> In determining the net recoverable amount of an item of rate-regulated property, plant and equipment, the enterprise considers the extent to which rates will provide for the recovery of the cost of the asset. (paragraph .46)

In the United States, *Regulated Enterprises — Accounting for Abandonments and Disallowances of Plant Costs*, SFAS 90, paragraph 7, states that:

> When it becomes probable that part of the cost of a recently completed plant will be disallowed for rate-making purposes and a reasonable estimate of the amount of the disallowance can be made, the estimated amount of the probable disallowance should be deducted from the reported cost of the plant and recognized as a loss.

According to SFAS 90, if the probable disallowance results from a cap on the plant's cost for rate-making purposes, the loss should be recognized as soon as it becomes probable that the cap will be exceeded. This calculation should be based on the expected total cost of the plant, including all AFUDC and other overheads that would normally be applied. The excess of this amount over the cap should be discounted to present value using the AFUDC rate. (In other words, the future AFUDC is removed from the expected total plant cost.) This discounted amount should be written off as a loss. If part of the cost is explicitly, but indirectly, disallowed (for example, by an explicit disallowance of return on investment on a portion of the plant), an equivalent amount of cost shall be deducted from the reported cost of the plant and recognized as a loss. Calculation of this amount requires use of the best available information. For instance, if the regulator specifies the equivalent amount of the plants cost that is being disallowed, then that amount should probably be used as the loss. Otherwise, it may be necessary to estimate and use the present value of future cash flows that have been disallowed.

Application of General Principles

When it becomes likely that part of the cost of a plant will be disallowed for rate-making purposes, and a reasonable estimate of the amount of the disallowance can be made, the estimated amount of the disallowance should be deducted from the reported cost of the plant and reported as a loss. When the regulator allows the cost, but reduces or eliminates the return, the recovery of the cost should be discounted and the difference between the discounted amount and the cost of the asset should be written down to that discounted amount. This annual cost must be subtracted from the cash flows to establish the amount available to cover the capital cost, which is what discounting does.

In addition, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, pertinent information on disallowances, as appropriate (General Principle 13). 6(58)

Future removal and site restoration costs

Accounting Issue

Current accounting standards for profit-oriented enterprises require that a provision be made for future removal and site restoration costs in a rational and systematic manner by charges to income. The accounting issue is whether a rate-regulated enterprise should recognize a regulatory asset or liability when the regulator requires that a different method be followed. For example, the regulator may specify that future rates will provide for the recovery of costs when they are paid.

Accounting Requirements in Canada and the US

Handbook Section 3061 states that:

> *When reasonably determinable, provisions should be made for future removal and site restoration costs, net of expected recoveries, in a rational and systematic manner by charges to income.* (paragraph .35)
>
> Future removal and site restoration costs include costs, net of expected recoveries, for dismantling and abandoning a property. Provisions are needed to accrue the liability for future removal and site restoration costs, when the likelihood of their incurrence is established as a result of environmental law, contract, or because the enterprise has established a policy to restore a site, and when such costs can be reasonably determined. Provisions are recorded as liabilities and are not classified with accumulated amortization. (paragraph .36)
>
> When future removal and site restoration costs cannot be reasonably

determined, a contingent liability may exist. (paragraph .37)

In the US, *Environmental Remediation Liabilities*, AICPA Statement of Position (SOP) 96-1, requires an accrual for environmental clean-up or remediation liabilities. That is, a loss must be accrued by a charge to income if it is both probable and can be reasonably estimated. If the loss is a range, the "reasonably estimated" criterion is met. If no value in the range is more likely than any other, the minimum amount should be accrued. SOP 96-1 also includes benchmarks to aid in the determination of when environmental remediation liabilities should be recognized in accordance with *Accounting for Contingencies*, SFAS 5. *Loss Contingencies Assumed in a Business Combination*, Staff Accounting Bulletin (SAB) 92, sets out the SEC staff position that environmental costs meeting the criteria of SFAS 71, paragraph 9, should be recognized on the balance sheet as a regulatory asset and should not be offset against the liability. *Accounting for Asset Retirement Obligations*, SFAS143, requires the recognition (at fair value) of a liability where there is a legal obligation associated with future removal and site restoration costs. An asset in the same amount will also be established and subsequently allocated to expense using a systematic and rational method over its useful life. SFAS 143 also acknowledges that, for rate-regulated enterprises, there may be a difference in timing for financial reporting and rate-making purposes, and that a regulatory asset or liability may have to be recognized. 7(59)

Application of General Principles

When reasonably determinable, provisions should be made for future removal and site restoration costs in a rational and systematic manner by charges to income. In addition, a regulatory asset would be recorded (General Principles 4 to 7) in those cases where the regulator decides that future rates will provide for the recovery of such costs. When future removal and site restoration costs cannot be reasonably determined, a contingent liability may exist and this should be disclosed in the notes to financial statements (General Principle 13). 8(60)

As discussed earlier in the chapter, it must be acknowledged that some are opposed to the strict application of the General Principles because it would result in an increase in large corporations taxes and capital taxes payable by rate-regulated enterprises, an amount that would generally be passed on to shareholders or customers, depending on whether or not the regulator allows the increased cost to be included in the cost of service. They maintain that, where regulators use the cash method (or some other prescribed method) to determine the amount of expenses to be included in rates, future removal and site restoration costs would be recognized in the period when they are recovered through the regulatory process.

Disposal of capital assets

Accounting Issue

Current accounting standards for profit-oriented enterprises require that the difference between the net proceeds on disposal and the net carrying amount be charged to income in the period when the net carrying amount of an item of property, plant and equipment exceeds the net recoverable amount. The accounting issue is whether a rate-regulated enterprise should be allowed to record a regulatory asset equivalent to the deferral of such differences, if that is the method used for rate-making purposes.

Accounting Requirements in Canada and the US

Handbook Section 3061 states that:

> On disposal of an item of property, plant and equipment, whether by sale, destruction, loss, abandonment or expropriation, the difference between the net proceeds on disposal and the net carrying amount is recognized in income in the period unless there are other aspects of the transaction that would prevent recognition. For example, a sale-leaseback transaction accounted for in accordance with LEASES, Section 3065; and certain transactions more appropriately accounted for as financing arrangements or as cost recoveries. (paragraph .52)
>
> For rate-regulated operations, the regulator may require the difference between net carrying amount and the proceeds on disposal of an item of property, plant and equipment to be considered in the determination of future rates charged to customers. In such circumstances the difference is deferred, provided there is reasonable assurance that:
>
> (a) any excess of net carrying amount over proceeds on disposal will be recovered through future rates; or
>
> (b) any excess of proceeds on disposal over net carrying amount will serve to reduce future rates. (paragraph .53)

In the US, when it becomes probable that a rate-regulated enterprise will abandon an operating asset or an asset under construction, SFAS 90 requires that the cost of the asset be removed from work in progress or plant-in-service. The enterprise would determine the likely recovery of the total costs to be provided from future rates, as permitted by the rate regulator. Only the amounts probable of recovery may be deferred; the remainder is recognized as a loss. *Reasonable Estimation of the Amount of a Loss*, FASB Interpretation 14, provides guidance on estimating the amount of a loss, and *Computation of a Loss on an Abandonment*, Technical Bulletin 87-2, provides guidance on computing the loss.

If the rate regulator permits the enterprise to recover the costs of an abandoned plant over a period of time, the enterprise must consider whether it will be allowed to earn a return on the investment. If it is likely that recovery of cost plus a full return will be granted, SFAS 90

requires that the costs be reported as a separate new asset and amortized in the same manner as used for rate-making purposes. Often the rate regulator does not allow the enterprise to earn a return on its investment in abandoned plant. If no return or a partial return is allowed, only the present value of the future revenues expected to be provided is reported as a separate new asset. Any excess of the total cost of the abandonment over the present value of the estimated future revenues is recorded as a loss.

In the US, *Estimated Future Costs Related to Spent Nuclear Fuel and Nuclear Electric Generating Plants*, SAB Topic 10-B, provides guidance on what disclosures should be made concerning the estimated future costs to decommission nuclear generating plants. The SEC requires that the financial statement notes disclose the estimated costs of dismantling or decontaminating nuclear generating plants and whether provision for these costs is being made in current operations and recognized in rates. If such expected costs are not being provided for currently, utilities should disclose any difference between current and expected future costs and the potential impact on the financial statements or future operations.

Application of General Principles

Losses would generally be reported by rate-regulated enterprises in the period when it becomes probable that they would not be recovered from customers (General Principle 11). Nonetheless, a regulatory asset should be recorded for losses on disposals and write-downs of rate-regulated assets if the regulator permits these losses to be recovered from future rates (General Principles 4 to 7). 9(61) In addition, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, pertinent information on disposal of items of property, plant and equipment, as appropriate (General Principle 13). 10(62)

Income Taxes

Accounting Issue

Current accounting standards require that profit-oriented enterprises report the expected income tax liability associated with the income that they have recognized, whether or not those taxes are currently payable. The taxes paid in the period, plus the change in the tax liability, are reported as income tax expense. This results in future income taxes being recognized in the period that the associated income is recognized. In many cases, however, the rates of regulated enterprises are based on the flow-through method, whereby the taxes recovered in rates equal the taxes currently payable as a result of the income earned in the period. Generally, it is expected that the future income taxes will become recoverable through allowed rates once they become payable. The accounting issue is whether a rate-regulated enterprise should recognize the economic benefit associated with the expectation that it will collect future income taxes through future allowed rates.

Accounting Requirements in Canada and the US

"Income Taxes," *Handbook* Section 3465, establishes standards for the recognition, measurement, presentation and disclosure of income and refundable taxes in an enterprise's financial statements, with limited application for certain rate-regulated enterprises. Section 3465 replaced the concept of **timing differences** with the concept of **temporary differences**. In addition, it replaced deferred tax debits and credits with future income tax assets and future income tax liabilities. 11(63)

Handbook Section 3465 states that:

> *A rate regulated enterprise need not recognize future income taxes in accordance with the Recommendations of this Section to the extent that future income taxes are expected to be included in the approved rate charged to customers in the future and are expected to be recovered from future customers. If future income taxes are not recognized in accordance with the Recommendations of this Section, the rate regulated enterprise should disclose the following, in addition to the information to be disclosed in accordance with paragraphs 3465.91 and 3465.92:*
>
> *(a) the reason why future income tax liabilities and future income tax assets have not been recognized; and*
>
> *(b) the amount of future income tax liabilities, future income tax assets and future income tax expense that have not been recognized. (paragraph .102)*

Pending further study of accounting for rate regulated enterprises as a whole, rate regulated enterprises are not required to record future income taxes for temporary differences that arise from assets and liabilities relating to their rate regulated activities to the extent that these future income taxes will be included in the rates charged to customers in the future and will be recoverable at that time as set out in paragraph 3465.102. (paragraph .103)

Future income taxes would be recognized in accordance with the remainder of this Section to the extent that future income taxes are not expected to be included in the rates charged to customers in the future. In addition, a rate regulated enterprise that chooses to recognize future income taxes despite the expectation that they will be included in the rates charged to customers in the future would recognize all future income tax liabilities and future income tax assets in accordance with the requirements of this Section. (paragraph .104)

In the US, when it was originally issued, SFAS 71, paragraph 18, noted that:

> Items of revenue and expense are sometimes taxable or deductible in periods other than the periods in which those items are recognized for

> financial reporting purposes. In some cases, a regulator does not include the income tax effect of certain transactions in allowable costs in the period in which the transactions are reported but includes income taxes related to those transactions in allowable costs in the period in which the taxes become payable. In such cases, if it is probable that income taxes payable in future years because of net reversal of timing differences will be recovered through rates based on taxes payable at that time, the enterprise shall record neither the deferred income taxes that result from those timing differences nor the related asset (the probable future benefits that will result from payment of the taxes). However, the enterprise shall disclose the cumulative net amount of income tax timing differences for which deferred income taxes have not been provided. That disclosure supplements the requirements of paragraph 63 of Opinion 11 for disclosure of operating loss carryforwards, significant amounts of other unused deductions or credits, and reasons for significant variations in the customary relationships between income tax expense and pretax accounting income. Except as provided in this paragraph, regulated enterprises shall apply the requirements of Opinion 11.

This, however, was replaced by the following when *Accounting for Income Taxes*, SFAS 109 was issued:

> A deferred tax liability or asset shall be recognized for the deferred tax consequences of temporary differences in accordance with FASB Statement No. 109, Accounting For Income Taxes (SFAS 109 paragraph 288 (v))

Historically, most public utilities used the flow-through method of accounting for certain temporary differences. Under this method, income tax expense was recognized on the basis of taxes paid or payable. A small number of differences were accorded deferred tax treatment (commonly called normalization, from a regulatory standpoint), primarily because of tax regulations. Normalization generally results in higher operating expenses for utilities and, therefore, higher revenue requirements. SFAS 71 allowed flow-through accounting to be used for financial reporting if certain criteria were met.

With the required adoption of SFAS 109, utilities changed the way deferred taxes are calculated and use the liability method to record deferred taxes on temporary differences, regardless of their regulatory treatment. In addition, the definition of temporary differences encompasses the equity component of the AFUDC, which utilities historically recorded on a net-of-tax basis. SFAS 109 prohibits recording of net-of-tax amounts and requires that those amounts be grossed up. Many regulators may continue to require flow-through accounting

for income taxes for rate-making purposes. If flow-through accounting is prescribed by the regulator and deferred taxes not currently provided under that method meet the recovery criteria set forth in SFAS 71, the differences between the flow-through method and the liability method would be recorded as regulatory assets or liabilities on the balance sheet. In determining the amount of deferred taxes to be established, SFAS 109 focuses on the probable future revenue to be recovered through rates. SFAS 109 recognizes that the future revenues will include recovery of the tax expense generated on the revenues as well as the deferred tax liability. The tax-on-tax item is recorded as a regulatory asset on the balance sheet, with the offset to the deferred tax liability.

Application of General Principles

Profit-oriented enterprises are required to report the expected income tax liability associated with the income that they have recognized, whether or not those taxes are currently payable. The taxes paid in the period plus the change in the tax liability are reported as income tax expense. This results in future income taxes being recognized in the period that the associated income is recognized. In many cases, however, the rates of regulated enterprises are based on the flow-through method, whereby the taxes recovered in rates are set equal to the taxes currently payable as a result of the income earned in the period. Generally, it is expected that the future income taxes will become recoverable through allowed rates once they become payable.

Application of the General Principles set out in Chapter 7 would result in financial reporting similar to what is required in the US. A rate-regulated enterprise should follow the Recommendations in *Handbook* Section 3465, whether or not rates are based on the flow-through method. That means that the enterprise would report a liability equal to the expected income taxes payable on the income recognized in the current period. Where it is likely that any amount of future income taxes (not necessarily the full amount of future income taxes) would be included in the calculation of future allowed rates, and those rates would be chargeable and collectible from customers, such amounts would be recognized as a regulatory asset. The income tax expense recognized in the period would then be reduced or increased by the change in this regulatory asset (General Principles 4 to 7).

As discussed earlier in this chapter, some are opposed to the strict application of the General Principles because it would result in an increase in large corporations taxes and capital taxes payable by rate-regulated enterprises, an amount that would generally be passed on to shareholders or customers, depending on whether or not the regulator allows the increased cost to be included in the cost of service. They maintain that the current approach used in practice and permitted by the *Handbook* should continue to be used; that is, where rates are based on the flow-through method, this method should also be allowed for financial reporting purposes, with appropriate disclosure in the notes to the financial statements.

In addition, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, the economic impact of rate-regulation on income taxes on a going-forward basis (General Principle 13). Such disclosures, as required by *Handbook* Section 3465, paragraphs .91, .92 and .102, would be cross-referenced to pertinent information provided in other notes. 12(64)

Intercompany Gains and Losses

Accounting Issue

Current accounting standards for profit-oriented enterprises require that intercompany gains or losses be eliminated in preparing a consolidated income statement. The accounting issue is whether a rate-regulated enterprise should be allowed to realize intercompany gains and losses to the extent that the transfer price is recognized for rate-making purposes.

Accounting Requirements in Canada and the US

"Consolidated Financial Statements," *Handbook* Section 1600, deals with the preparation of consolidated financial statements. To the extent that transactions between the parent and its subsidiaries (intercompany transactions) result in intercompany gains or losses, such gains or losses normally would be eliminated in preparing a consolidated income statement. With regard to rate-regulated enterprises, however, *Handbook* Section 1600, paragraph .29, states that:

> Where a parent or subsidiary manufactures or constructs facilities for a regulated public utility in the consolidated group, any intercompany gain or loss is deemed to have been realized to the extent that the transfer price on such facilities is recognized for rate-making purposes by a government regulatory body.

In the United States, SFAS 71, paragraphs 16 and 17, note that:

> Profit on sales to regulated affiliates shall not be eliminated in general-purpose financial statements if both of the following criteria are met:
>
> (a) the sales price is reasonable.
>
> (b) it is probable that, through the rate-making process, future revenue approximately equal to the sales price will result from the regulated affiliate's use of the products.
>
> The sales price usually shall be considered reasonable if the price is accepted or not challenged by the regulator that governs the regulated affiliate. Otherwise, reasonableness shall be considered in light of the circumstances. For example, reasonableness might be judged by the

return on investment earned by the manufacturing or construction operations or by a comparison of the transfer prices with prices available from other sources.

Application of General Principles

It is important for rate-regulated enterprises to consider whether regulatory agencies will permit any intercompany gains or losses to be included in future rates. Applying the General Principles set out in Chapter 7 (in particular General Principle 11), such enterprises would not eliminate intercompany profits on sales to regulated affiliates if it is likely that, through the rate-making process, future revenues in amounts approximately equal to the intercompany transfer price will be provided. That revenue would result from inclusion of the intercompany profits in the amount used by the regulator as allowable costs for purposes of depreciation and return on investment.

In such cases, a regulated enterprise should recognize profits on sales to a regulated affiliate to the extent that the profits are included in allowable costs in the rate-making process because the profits are validated by the rate actions of the regulator. The regulator's acceptance of the transfer price provides evidence of recoverability. For rate-making purposes, the intercompany profits would be included in the depreciation used as an allowable cost, and the undepreciated amount would be included in the investment on which a return is provided as an allowable cost.

Employee Future Benefits

In an August 1999 survey of rate-regulated enterprises (discussed in Chapter 1), respondents stated that there should be some consideration given to ensuring that accounting requirements — such as "Employee Future Benefits," *Handbook* Section 3461 — do not negatively affect customer rates or investor return.

Accounting Issue

Current accounting standards for profit-oriented enterprises require that an entity recognize the cost of retirement benefits and certain post-employment benefits over the periods in which employees render services to the entity in return for the benefits. The accounting issue is whether a rate-regulated enterprise should recognize a regulatory asset or liability when the regulator requires that the pay-as-you-go (cash method) or some other prescribed method be used to determine rates. For example, the regulator may specify that future rates will provide for the recovery of costs when they are paid or the regulator may specify that costs will be recovered prior to the period in which they would normally be expensed.

Accounting Requirements in Canada and the US

Canadian Accounting and Assurance Reference Service (CAARS)

Handbook Section 3461 establishes standards for the recognition, measurement and disclosure of the cost of employee future benefits, including pension and other retirement benefits, post-employment benefits, compensated absences and termination benefits. Generally, an entity must recognize the cost of retirement benefits and certain post-employment benefits over the periods in which employees render services to the entity in return for the benefits. Other post-employment benefits are recognized when the event that obligates the entity occurs. The standard is in harmonization with the US standard on this subject.

In the US, SFAS 71, paragraph 48, notes that *Accounting for Compensated Absences*, SFAS 43, "specifies criteria for accrual of a liability for employees' compensation for future absences. For rate-making purposes, compensation for employees' absences may be included in allowable costs when the compensation is paid." According to SFAS 71, paragraph 49:

> the liability, if any, would be accrued in accordance with SFAS 43 because rate actions of the regulator cannot eliminate obligations that were not imposed by the regulator. ... By including the accrued compensation in future allowable costs on an as-paid basis, the regulator provides reasonable assurance of the existence of an asset. The asset is the probable future benefit (increased revenue) that will result from the regulatory treatment of the subsequent payment of the liability ... . Accordingly, the enterprise also would record the asset that results from the regulator's actions.

In *Accounting for OPEB Costs by Rate Regulated Enterprises*, EITF Issue 92-12, the task force reached consensus on several issues. For plans providing postretirement benefits other than pensions (OPEB plans), the task force ched a consensus that a regulatory asset related to costs covered by *Employers' Accounting for Postretirement Benefits Other Than Pensions*, SFAS 106:

> should not be recorded if the regulator continues to include OPEB costs in rates on a pay-as-you-go basis. ... For a continuing plan a rate-regulated enterprise should recognize a regulatory asset for the difference between SFAS 106 costs and OPEB costs included in the enterprise's rates if the enterprise (1) determines that it is probable that future revenue in an amount at least equal to the deferred cost (regulatory asset) will be recovered in rates, and (2) meets *all* of the [specified] criteria.

The task force also reached a consensus that:

> a rate-regulated enterprise should disclose in its financial statements a description of the regulatory treatment of OPEB costs, the status of any

> pending regulatory action, the amount of any SFAS 106 costs deferred as a regulatory asset at the balance sheet date, and the period over which the deferred amounts are expected to be recovered in rates.

In addition, the task force concluded in *Accounting for Regulatory Assets*, EITF Issue 93-4, that if a rate-regulated entity initially fails to meet the regulatory asset recognition requirements of the consensus developed in EITF Issue 92-12, but meets those requirements in a subsequent period, a regulatory asset for the cumulative difference between SFAS 106 costs and OPEB costs included in rates since the date of adoption of SFAS 106 should be recognized in the period the requirements are met.

Application of General Principles

Following a strict application of the General Principles, a rate-regulated enterprise should recognize the cost of retirement benefits and certain post-employment benefits over the periods in which employees render services to the entity in return for the benefits in accordance with *Handbook* Section 3461. In addition, the difference between the net periodic pension cost, as recognized in accordance with GAAP, and the amounts of pension cost considered for rate-making purposes would be recognized as a regulatory asset or a regulatory liability (General Principles 4 to 10). The actions of the regulator do not affect the recognition of pension liabilities or assets; what they do is create a regulatory asset or liability in addition to the pension liability or asset. The same applies to the recognition of other postemployment benefits costs and liabilities. In addition, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, the economic impact o rate-regulation on employee future benefits on a going-forward basis (General Principle 13). Such disclosures, as required by *Handbook* Section 3461, paragraphs .150 to .163 should be cross-referenced to pertinent information provided in other notes. 13(65)

As discussed earlier in this chapter, some are opposed to the strict application of the General Principles because it would result in an increase in large corporations taxes and capital taxes payable by rate-regulated enterprises, an amount that would generally be passed on to shareholders or customers, depending on whether or not the regulator allows the increased cost to be included in the cost of service. They maintain that, where regulators use the pay-as-you-go (cash method) or some other prescribed method to determine the amount of expenses to be included in rates, the costs of employee future benefits would be recognized in the period when they are recovered through the regulatory process. In addition, the notes to the financial statements would disclose the liability relating to the employee future benefits and the expectation of recovery thereof.

Foreign Currency Translation

According to the August 1999 survey of rate-regulated enterprises (discussed in Chapter 1),

respondents stated that there should be some consideration given to ensuring that accounting requirements in "Foreign Currency Translation," *Handbook* Section 1650, and proposed changes in those requirements do not negatively affect customer rates or investor return.

Accounting Issue

Current accounting standards for profit-oriented enterprises require that exchange gains and losses on long-term monetary items be included immediately in income. The accounting issue is whether a rate-regulated enterprise should recognize a regulatory asset for exchange gains and losses on long-term monetary items that are deferred and amortized or recovered in rates when realized for rate-making purposes.

Accounting Requirements in Canada and the US

According to *Handbook* Section 1650, exchange gains and losses arising on translation or settlement of a foreign currency transaction (except those that are (1) related to certain intercompany transactions or (2) transactions designated as, and effective as, economic hedges of net investments and foreign currency commitments) should be included in the determination of net income for the current period. The Canadian standard is in harmonization with the US standard on this subject. 14(66)

In the US, foreign currency transaction gains and losses should be included in the determination of income for the period in which the exchange rate changes except those that are (1) related to certain intercompany transactions, (2) certain amounts related to a derivative instrument that is a cash flow hedge of a forecasted foreign-currency-denominated transaction or a forecasted intercompany foreign-currency-denominated transaction, and (3) an intercompany balance for which settlement is not planned or anticipated in the foreseeable future and that is considered to be part of the net investment in a foreign operation (refer to *Foreign Currency Translation*, SFAS 52, *Accounting for Derivative Instruments and Hedging Activities*, SFAS 133, and *Accounting for Certain Derivative Instruments and Certain Hedging Activities: an amendment of FASB Statement No. 133*, SFAS 138).

Application of General Principles

A rate-regulated enterprise should include exchange gains and losses on long-term monetary items in the determination of net income in accordance with the requirements of *Handbook* Section 1650. A regulatory asset or a regulatory liability, however, would be recognized if such gains and losses are deferred and amortized or recovered when realized for rate-making purposes (General Principles 4 to 10). In addition, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, the economic impact of rate-regulation on exchange gains and losses on a going-forward basis (General Principle 13).

As discussed earlier in this chapter, some are opposed to the strict application of the General

Principles because it would result in an increase in large corporations taxes and capital taxes payable by rate-regulated enterprises, an amount that would generally be passed on to shareholders or customers, depending on whether or not the regulator allows the increased cost to be included in the cost of service. They maintain that, where regulators use the cash method, or some other prescribed method, to determine the amount of gains and losses to be included in rates, foreign exchange gains and losses would be recognized in the period when they are included in rates, and appropriate disclosure would be provided in the notes to the financial statements.

Financial Instruments

According to the August 1999 survey of rate-regulated enterprises (discussed in Chapter 1), respondents stated that there should be some consideration given to ensuring that accounting requirements in "Financial Instruments," *Handbook* Section 3860, and proposed changes in those requirements, do not negatively affect customer rates or investor return.

Proposal for a comprehensive fair value model

In January 2001, the Canadian Accounting Standards Board and accounting standard setters in nine other international jurisdictions, including the US and IASC, issued an "Invitation to Comment" on proposals for a comprehensive fair value model to account for financial instruments and similar items. The proposals differ from *Accounting for Derivative Instruments and Hedging Activities*, SFAS 133, and *Financial Instruments: Recognition and Measurement*, IAS 39 (the principal two existing accounting standards on the subject), but they build on the same general principles, while avoiding much of the complexity of the interim steps in those standards. The Accounting Standards Board believes that existing Canadian accounting standards for recognition and measurement of financial instruments are inadequate and that the *status quo* cannot continue.

Application of General Principles

If accounting standards were to be issued by the Accounting Standards Board with regard to applying a "fair value" model to financial instruments, such standards would apply to rate-regulated enterprises. In their case, however, a regulatory asset or a regulatory liability would be recognized when the increase or decrease in "fair value" is deferred and amortized for rate-making purposes (General Principles 4 to 10). In addition, rate-regulated enterprises would disclose, in the notes to the general purpose financial statements, the economic impact of rate-regulation on financial instruments on a going-forward basis (General Principle 13).

As discussed earlier in this chapter, some are opposed to the strict application of the General Principles because it would result in an increase in large corporations taxes and capital taxes payable by rate-regulated enterprises, an amount that would generally be passed on to

shareholders or customers, depending on whether or not the regulator allows the increased cost to be included in the cost of service. They maintain that, where regulators use the cash method to determine the gains and losses to be included in rates, the increase or decrease in the "fair value" of financial instruments would be recognized in the period when they are included in rates, and appropriate disclosure would be provided in the notes to the financial statements.

SPECIFIC ISSUES ADDRESSED IN THE UNITED STATES

A brief commentary on the following specific issues covered in SFAS 71 is set out below with a view to providing useful guidance and to serve as the basis for eliminating significant differences in GAAP between Canada and the United States:

- intangible assets;
- accounting changes;
- recovery of costs without return on investment;
- early extinguishment of debt;
- contingencies;
- leases;
- revenue collected subject to refund;
- refunds to customers;
- alternative revenue programs.

Intangible Assets

In Canada, accounting by rate-regulated enterprises for intangible assets is governed by "Goodwill and Other Intangible Assets," *Handbook* Section 3062, which states that an intangible asset should be initially recognized and measured at cost, and amortized over its useful life, unless that life is determined to be indefinite, in which case it will not be amortized until its life is determined to be finite. Intangible assets should be reviewed or tested periodically for impairment. 15(67)

The United States, in *Goodwill and Other Intangible Assets*, SFAS 142, has similar requirements. SFAS 71, paragraph 29, has been amended to note that SFAS 142 states that goodwill shall not be amortized and shall be tested for impairment in accordance with that Statement. Paragraph 29 also notes that, for rate-making purposes, a regulator may permit an enterprise to amortize purchased goodwill over a specified period. In other cases, a regulator may direct an enterprise not to amortize goodwill or to write off that goodwill.

According to SFAS 71, paragraph 30 (as amended):

> if the regulator permits all or a portion of goodwill to be amortized over a specific time period as an allowable cost for rate-making purposes, the regulator's action provides reasonable assurance of the existence of a regulatory asset. ... That regulatory asset would then be amortized for financial reporting purposes over the period during which it will be allowed for rate-making purposes. Otherwise, goodwill shall not be amortized and shall be accounted for in accordance with SFAS 142.

Rate-regulated enterprises should recognize a regulatory asset in their financial statements in accordance with General Principles 4 to 7, to the extent that the amount to be recovered in future rates (ignoring return on the intangible asset) exceeds the amount that would be capitalized by a non-regulated enterprise. Professional judgment should be used in choosing the method that allows amortization to be recognized in a rational and systematic manner appropriate to the nature of the intangible asset. The amortization method should be reviewed on a regular basis. Furthermore, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, how rate regulation affects the reported values of intangible assets on a going-forward basis (General Principle 13). Rate-regulated enterprises should determine the extent to which their regulatory amortization methods differ from normal GAAP methods and lives and, if the differences are significant, consider disclosing them in the financial statements.

Accounting Changes

"Accounting Changes," *Handbook* Section 1506, establishes standards for the accounting treatment of a change in accounting policy as well as a change in an accounting estimate and a correction of an error relating to prior period financial statements and prior period adjustments.

It is important to note that the appropriate treatment of accounting changes depends not only on the nature of the change, but also on its treatment as prescribed by the regulator. In interpreting GAAP requirements for rate-regulated enterprises, reference is often made to SFAS 71 for guidance. SFAS 71, paragraph 32, offers the following clarification regarding the treatment of accounting changes by a regulated enterprise:

> If a regulated enterprise changes accounting methods and the change does not affect costs that are allowable for rate-making purposes, the regulated enterprise would apply the change in the same manner as would an unregulated enterprise. ... If a regulated enterprise changes accounting methods and the change affects allowable costs for rate-making purposes, the change generally would be implemented in the way that it is implemented for regulatory purposes.

As a result, if a change in accounting policy does not affect costs allowable for rate-making purposes, the rate-regulated enterprise should account for the change in accordance with the Recommendations in *Handbook* Section 1506 (that is, using retroactive restatement, except in specific circumstances). Capitalization of leases with no income statement effect is an example of that type of change.

If a change in accounting policy affects allowable costs for rate-making purposes, however, the change generally would be implemented in the way that it is implemented for regulatory purposes. 16(68) A change in the method of accounting for research and development costs, either from a policy of capitalization and amortization to one of charging those costs to expense as incurred or *vice versa*, is an example of that type of change.

Recovery of Costs without Return on Investment

In Canada, no specific accounting pronouncements address the issue of accounting by rate-regulated enterprises for the recovery of costs without return on investment. In the United States, however, SFAS 71, paragraph 33, states that, "in some cases, a regulator may approve rates that are intended to recover an incurred cost over an extended period without a return on the unrecovered cost during the recovery period." According to SFAS 71, paragraph 34, "the regulator's action provides reasonable assurance of the existence of an asset. ... Accordingly, the regulated enterprise would capitalize the cost and amortize it over the period during which it will be allowed for rate-making purposes. That cost would not be recorded at discounted present value."

If material, appropriate disclosures as specified in SFAS 71, paragraph 20, would be provided, as follows:

> In some cases, a regulator may permit an enterprise to include a cost that would be charged to expense by an unregulated enterprise as an allowable cost over a period of time by amortizing that cost for rate-making purposes, but the regulator does not include the unrecovered amount in the rate base. That procedure does not provide a return on investment during the recovery period. If recovery of such major costs is provided without a return on investment during the recovery period, the enterprise should disclose the remaining amounts of such assets and the remaining recovery period applicable to them.

An expenditure should be recognized as an asset if it meets the *Handbook* definition of a rate-regulated capital asset and the pertinent recognition criteria (General Principles 4 to 7). The regulated enterprise would capitalize an incurred cost and amortize it over the period during which it will be allowed for rate-making purposes. That cost would not be recorded at discounted present value because it will be recovered without a return on investment. Furthermore, rate-regulated enterprises should disclose, in the notes to the general purpose

financial statements, how rate regulation affects the reported values of capital assets on a going-forward basis (General Principle 13).

Early Extinguishment of Debt

In Canada, no specific accounting pronouncements address the issue of accounting for the early extinguishment of debt. In the United States, however, SFAS 71, paragraphs 35-37, note that *Early Extinguishment of Debt*, AICPA Accounting Principles Board Opinion 26, "requires recognition in income of a gain or loss on an early extinguishment of debt in the period in which the debt is extinguished. For rate-making purposes, the difference between the enterprise's net carrying amount of the extinguished debt and the reacquisition price may be amortized as an adjustment of interest expense over some future period."

According to SFAS 71, paragraphs 36 and 37:

> If the debt is reacquired for an amount in excess of the enterprise's net carrying amount, the regulator's decision to increase future rates by amortizing the difference for rate-making purposes provides reasonable assurance of the existence of an asset. ... Accordingly, the regulated enterprise would capitalize the excess cost and amortize it over the period during which it will be allowed for rate-making purposes.
>
> If the debt is reacquired for an amount that is less than the enterprise's net carrying amount, the regulator's decision to reduce future rates by amortizing the difference for rate-making purposes imposes a liability on the regulated enterprise. ... Accordingly, the enterprise would record the difference as a liability and amortize it over the period during which permitted rates will be reduced.

With regard to accounting for the early extinguishment of debt, the difference between the rate-regulated enterprise's net carrying amount of the extinguished debt and the reacquisition price should be recognized as a regulatory asset or liability (depending on the nature of that difference) in accordance with General Principles 4 and 8, respectively, provided it is treated as such for rate-making purposes. 17(69) Furthermore, rate-regulated enterprises should disclose in the notes to the general purpose financial statements, how rate regulation affects the reported values of debt on a going-forward basis (General Principle 13).

Contingencies

In Canada, accounting for contingencies is governed by "Contingencies," *Handbook* Section 3290.

In the United States, SFAS 71, states that:

> [*Accounting for Contingencies*, SFAS 5] specifies criteria for recording estimated losses from loss contingencies. A regulator may direct a regulated enterprise to include an amount for a contingency in allowable costs for rate-making purposes even though the amount does not meet the criteria of SFAS 5 for recording. For example, a regulator may direct a regulated enterprise to include an amount for repairs of expected future uninsured storm damage. (paragraph 38)
>
> If the regulator requires the enterprise to remain accountable for any amounts charged pursuant to such rates and not yet expended for the intended purpose, the resulting increased charges to customers create a liability ... . If a cost to repair storm damage is not subsequently incurred, the increased charges will have to be refunded to customers through future rate reductions. Accordingly, the regulated enterprise would recognize the amounts charged pursuant to such rates as liabilities rather than as revenues. If a cost to repair storm damage is subsequently incurred, the enterprise would charge that cost to expense and reduce the liabilities at that time by recognizing income in amounts equal to the cost. (paragraph 39)

With regard to accounting for estimated losses from loss contingencies, the increased charges to customers create a liability if the conditions set out in General Principle 8 are met. Furthermore, rate-regulated enterprises should disclose in the notes to the general purpose financial statements how rate regulation affects the reported contingencies on a going-forward basis (General Principle 13).

Leases

In Canada, accounting for leases is governed by "Leases," *Handbook* Section 3065. The survey of current practices referred to in Chapter 3 and reported in Appendix B, indicates that five of 25 survey companies provided information on leases in the notes to the financial statements.

In the United States, SFAS 71, paragraph 40, notes that:

> [*Accounting for Leases*, SFAS 13] ... specifies criteria for classification of leases and the method of accounting for each type of lease. For rate-making purposes, a lease may be treated as an operating lease even though the lease would be classified as a capital lease under the criteria of Statement 13. In effect, the amount of the lease payment is included in allowable costs as rental expense in the period it covers. (paragraph 40)
>
> For financial reporting purposes, the classification of the lease is not

> affected by the regulator's actions. The regulator cannot eliminate an obligation that was not imposed by the regulator ... . Also, by including the lease payments as allowable costs, the regulator sets rates that will provide revenue approximately equal to the combined amount of the capitalized leased asset and interest on the lease obligation over the term of the lease and, thus, provides reasonable assurance of the existence of an asset ... . Accordingly, regulated enterprises would classify leases in accordance with Statement 13 ... . (paragraph 41)
>
> The nature of the expense elements related to a capitalized lease (amortization of the leased asset and interest on the lease obligation) is not changed by the regulator's action; however, the timing of expense recognition related to the lease would be modified to conform to the rate treatment. Thus, amortization of the leased asset would be modified so that the total of interest on the lease obligation and amortization of the leased asset would equal the rental expense that was allowed for rate-making purposes. (paragraph 42)
>
> The Board notes that generally accepted accounting principles do not require interest expense or amortization of leased assets to be classified as separate items in an income statement. For example, the amounts of amortization of capitalized leased nuclear fuel and interest on the related lease obligation could be combined with other costs and displayed as "fuel cost." However, the disclosure of total interest cost incurred, required by [*Capitalization of Interest Cost*], Statement 34, would include the interest on that lease obligation; and the disclosure of the total amortization charge, required by Statement 13, would include amortization of that leased asset. (paragraph 43)

With regard to accounting for leases, the classification of the lease is not affected by the regulator's actions. The regulator cannot eliminate an obligation that was not imposed by the regulator. Nonetheless, the timing of expense recognition related to the lease would be modified to conform to the rate treatment and related regulatory asset or liability recognized in the financial statements if the conditions set out in General Principles 4 or 8, respectively, are met. Furthermore, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, how rate regulation affects the reported values of leases on a going-forward basis (General Principle 13).

As discussed earlier in this chapter, some are opposed to the strict application of the General Principles because it would result in an increase in large corporations taxes and capital taxes payable by rate-regulated enterprises, an amount that would generally be passed on to shareholders or customers, depending on whether or not the regulator allows the increased cost

to be included in the cost of service. They maintain that, where regulators use the cash method, expenses related to the lease would be recognized in the period when they are included in rates and appropriate disclosure would be provided in the notes to the financial statements.

Revenue Collected Subject to Refund

In Canada, no specific accounting pronouncements address the issue of accounting by rate-regulated enterprises for revenue collected subject to refund. In the United States, however, SFAS 71 (paragraph 44) notes that, "in some cases, a regulated enterprise is permitted to bill requested rate increases before the regulator has ruled on the request." In other words, regulated enterprises are granted temporary rate increases by a regulatory authority, subject to the condition that all or a portion of the additional revenues may be refundable to customers. If the rates finally authorized are lower than the temporary rates, usually the utility is required to refund the excess revenues.

According to SFAS 71, paragraph 45, the provisions of *Accounting for Contingencies*, SFAS 5, determine whether a provision for estimated refunds should be accrued for this loss contingency. Generally, a regulated enterprise records a liability to refund revenues previously collected from customers when it is probable that a refund will be due and the amount of the refund is reasonably determinable. In practice, these conditions are often met only when the regulator issues an order for a refund. In some circumstances, however, the conditions of SFAS 5 may be met before a formal rate order is issued. SFAS 71 does not permit refunds to be recognized as prior-period adjustments. Instead, refunds must be recognized in the accounting period in which the requirements of SFAS 5 are met. The enterprise must disclose the effect of the refund on net income of the current year and indicate the years when the refunded revenue was recognized.

With regard to accounting for revenue collected subject to refund, a regulatory liability should be recognized in the financial statements if the conditions set out in General Principle 8 are met. Furthermore, rate-regulated enterprises should disclose, in the notes to the general purpose financial statements, how rate regulation affects the reported values of liabilities on a going-forward basis (General Principle 13).

Refunds to Customers

In Canada, no specific accounting pronouncements address the issue of accounting by rate-regulated enterprises for refunds to customers. In the United States, however, SFAS 71, paragraph 46, notes that *Prior Period Adjustments*, SFAS 16, "limits prior period adjustments (other than those that result from reporting accounting changes) to corrections of errors, and adjustments related to prior interim periods of the current fiscal year."

According to SFAS 71, paragraph 47, "in accordance with Statement 16, estimated refunds that were not previously accrued would be charged to income in the first period in which they meet the criteria for accrual (paragraph 8, Statement 5). If the amounts are material, the disclosures

specified in paragraph 19 of [SFAS 71] would be furnished." That is, for refunds that are recognized in a period other than the period in which the related revenue was recognized and that have a material effect on net income, the enterprise should disclose the effect on net income and indicate the years in which the related revenue was recognized. Such effect may be disclosed by including it, net of related income taxes, as a line item in the income statement. It should not be presented as an extraordinary item.

With regard to accounting for refunds to customers, a regulatory liability should be recognized in the financial statements if the conditions set out in General Principle 8 are met. Furthermore, rate-regulated enterprises should disclose in the notes to the general purpose financial statements, how rate regulation affects the reported values of such liabilities on a going-forward basis (General Principle 13).

Alternative Revenue Programs

In Canada, no specific accounting pronouncements address the issue of accounting by rate-regulated enterprises for alternative revenue programs. In the United States, *Accounting by Rate-Regulated Utilities for the Effects of Certain Alternative Revenue Programs*, EITF Issue 92-7, the consensus of the task force was that once specified events occur that permit billing of additional revenues due to weather abnormalities or to compensate the utility for demand-side management initiatives or reward the utility for achieving certain objectives, the regulated utility should recognize the additional revenues if all of the following conditions are met:

1. The program is established by an order from the utility's regulatory commission that allows for automatic adjustment of future rates. Verification of the adjustment to future rates by the regulator would not preclude the adjustment from being considered automatic.
2. The amount of additional revenues for the period is objectively determinable and is probable of recovery.
3. The additional revenues will be collected within 24 months following the end of the annual period in which they are recognized.

With regard to accounting for alternative revenue programs, a regulatory asset should be recognized in the financial statements if the conditions set out in General Principle 4 are met.

DISCONTINUING ACCOUNTING FOR THE EFFECTS OF RATE REGULATION

General Principle 3 states: "When an enterprise that has regulated operations no longer meets the criteria set out in Principle 1, it should discontinue reporting the economic impact of rate regulation and reflect the effects of discontinuation in its general purpose financial statements."

Whether a rate-regulated enterprise is in the private sector or the public sector, it must be mindful of circumstances that may indicate the need to discontinue accounting for the effects of rate regulation.

In Canada, no specific accounting pronouncements address the issue of discontinuation of accounting for the economic impact of rate regulation. 18(70) In the United States, the FASB issued *Regulated Enterprises — Accounting for the Discontinuation of Application of FASB Statement No. 71*, SFAS 101, in 1988. SFAS 101 specifies that an entity that ceases to meet the criteria for application of SFAS 71 should report that event in its general purpose financial statements.

It is possible for an enterprise to continue to be regulated (and meet the first criterion) and not be able to meet one or both of the other two criteria (cover the costs of providing services through the established rates and recover those costs from customers). As a result, the enterprise would continue to have its rates established by the regulator and would follow regulatory requirements, but would not be able to recognize the impact of the regulator's actions in its general purpose external financial statements.

Changing regulatory practices and alternative forms of rate regulation may raise questions about an enterprise's ability to continue to meet the second criterion. When a regulator departs from the traditional rate-making model, the regulated enterprise must assess whether the new rate regulation is designed to recover the costs of providing the regulated services or products. In this respect, General Principle 3 calls for an ongoing assessment of the likelihood of recovery of regulatory assets subsequent to their initial recognition. At each balance sheet date, management should ensure that sufficient evidence exists to support a recorded regulatory asset. Evidence should be available to demonstrate that the costs in question continually meet the "probable" criteria for creating and continuing to record regulatory assets.

Reporting the Effects of Discontinuation

When an enterprise discontinues accounting for the economic impact of rate regulation, it should eliminate from its balance sheet the effects of any actions of regulators that had been recognized as assets and liabilities, but would not have been recognized as such by business enterprises in general. In accordance with GAAP, the carrying amounts of plant, equipment and inventory would not be adjusted, however, unless their value is impaired. Similarly, an example of a legal liability that would not be written off is an obligation for rate refunds to be distributed to customers based on past sales.

The net income effect of these adjustments would be recognized in the period in which discontinuation occurs. It would be reported as an extraordinary item because it is not in the normal course of operations. As well, the notes to general purpose financial statements would disclose pertinent information regarding the discontinuation of accounting for the effects of rate regulation (refer to General Principle 12 and 13 regarding note disclosures).

Application to Separable Portions of a Business

General Principle 2 states: "If some of an enterprise's operations are regulated and meet the above criteria, the financial statements should reflect the economic impact of rate regulation on only that portion of operations." Accordingly, the discontinuation would be applied to a separable portion of operations within a jurisdiction if the enterprise can establish that its other operations within the jurisdiction continue to meet the established criteria.

This is consistent with the approach taken in the United States, where SFAS 71 applies to separable portions of a regulated enterprise's operations (paragraph 6). SFAS 101 also applies to separable portions of operations, such as a customer class or a functional group of assets within a jurisdiction. In *Deregulation of the Pricing of Electricity — Issues Related to the Application of FASB Statements No. 71 and 101*, Issue 97-4, the EITF considered when an enterprise should cease applying SFAS 71 to a separable portion of its business whose pricing is being deregulated. The consensus was that the appropriate time is when the enterprise can reasonably determine how the transition plan will affect the portion of the business being deregulated. The related regulatory assets and liabilities should be evaluated on the basis of the source of the cash flows that will realize or settle them. SEC staff requires assurance that such regulatory assets have been specifically provided for *via* he collection of regulated cash flows.

CONCLUSION

Chapter 7 of this Research Report sets out General Principles for accounting and financial reporting by rate-regulated enterprises. While detailed guidance is not essential to recognize the economic impact of rate regulation on the financial reporting of rate-regulated enterprises, in the Study Group's opinion additional guidance would help avoid any misunderstanding and, at the same time, illustrate how the general principles should be applied in practice.

Accordingly, this chapter provides specific guidance on accounting issues that are considered of interest to the regulatory community, with emphasis given to those areas that may have a material impact on general purpose financial statements. Also addressed are general considerations with respect to the recording of regulatory assets and liabilities, demonstrating the ongoing recoverability of assets created by rate regulation, and recognizing when it is time to discontinue accounting for the effects of rate regulation.

Appendix A

CONCEPTUAL FRAMEWORKS OF CANADA AND THE UNITED STATES

The accounting standards boards of Canada and the United States have issued conceptual framework statements to create a basis for the development and application of accounting standards. Although the frameworks vary significantly in structure and detail, there are few fundamental differences between them.

The Canadian framework, "Financial Statement Concepts," is set out in Section 1000 of the *CICA Handbook – Accounting*. The US framework is set out in separate, but interrelated, FASB Concepts Statements — *Objectives of Financial Reporting by Business Enterprises, Qualitative Characteristics of Accounting Information, Elements of Financial Statements, Objectives of Financial Reporting by Nonbusiness Organizations, Recognition and Measurement in Financial Statements of Business Enterprises*, and *Using Cash Flow Information and Present Value in Accounting Measurements.*

The Canadian and US frameworks specifically state that the concepts do not, in themselves, establish standards or generally accepted accounting principles but are the tools for solving accounting and reporting problems and for developing standards. In this regard, the Canadian framework notes that the concepts are "to be used by preparers of financial statements and accounting practitioners in exercising their professional judgment as to the application of generally accepted accounting principles and in establishing accounting policies in areas in which accounting principles are developing." 1(71)

The frameworks in the two countries indicate that their purpose is to present concepts that are relevant to the preparation and presentation of financial statements. The Canadian framework applies to general purpose **financial statements**, whereas the US framework applies to general purpose **financial reporting**. Both frameworks identify what is normally included in a set of financial statements: a balance sheet (a statement of financial position), an income statement, a statement of retained earnings (a statement of changes in stockholders' equity) and a statement of changes in financial position (a cash flow statement). The frameworks limit the items recognized in the financial statements to those based on past transactions and events. They also note that the information provided often results from approximate, rather than exact, measures. The US framework further notes that financial reporting is only one source of information needed by users to make economic decisions.

Objective and Users of Financial Statements

In Canada and the United States, the conceptual frameworks state that the objective of **financial statements** is to provide information to users about an entity's financial position and results of operations. 2(72) They emphasize providing information that is useful in making investment, credit and other decisions and in assessing management stewardship.

Specifically, *CICA Handbook – Accounting* Section 1000, "Financial Statement Concepts," states (in paragraph 1000.15) that:

> The objective of financial statements is to communicate information that is useful ... in making ... resource allocation decisions and/or assessing management stewardship. Consequently, financial statements provide information about:
>
> (a) an entity's economic resources, obligations and equity / net assets;
>
> (b) changes in an entity's economic resources, obligations and equity / net assets; and
>
> (c) the economic performance of the entity.

In the United States, FASB Concepts Statement 1, *Objectives of Financial Reporting by Business Enterprises*, sets out objectives and concepts for use in developing standards of financial accounting and reporting. The discussion begins with a broad focus on information that is useful in investment and credit decisions (paragraph 34). It then narrows that focus to investors' and creditors' primary interest in the prospects for receiving cash from their investments in, or loans to, business enterprises and the relation of those prospects to an enterprise's cash flow prospects (paragraph 37). Finally, the discussion focuses on information about the economic resources of an enterprise, the claims to those resources, and the effects of transactions, events and circumstances that change resources and claims to those resources (paragraph 40).

According to FASB Concepts Statement 1, financial reporting should provide the following:

- information about an enterprise's economic resources, obligations, and owners' equity;
- information about an enterprise's performance and earnings;
- information about an enterprise's liquidity, solvency and funds flows;
- information about management's stewardship and performance;
- management's explanations and interpretations.

In both countries, the focus is on users and their information needs. In Canada, the users of general purpose financial statements include those identified in the *CICA Handbook – Accounting* (paragraph 1000.09 lists investors, creditors and their advisers) and in the *CICA Public Sector Accounting Handbook* (PS 1400.09 lists the public, legislators, investors and analysts). Although investors (shareholders) and creditors are considered to be the primary users, it is stated that other users will find the information in financial statements generally useful.

Investors and creditors of profit oriented enterprises are interested, for the purpose of making resource allocation decisions, in predicting the ability of the entity to earn income and generate cash flows in the future to meet its obligations and to generate a return on investment. Investors and creditors also require information about how the management of an entity has discharged its

stewardship responsibility to those who have provided resources to the entity.

FASB Concepts Statement 1 identifies the following potential users of financial information: "owners, lenders, suppliers, potential investors and creditors, employees, management, directors, customers, financial analysts and advisors, brokers, underwriters, stock exchanges, lawyers, economists, taxing authorities, regulatory authorities, legislators, financial press and reporting agencies, labour unions, trade associations, business researchers, teachers and students, and the public" (paragraph 24). Except for management, and to some extent directors, these potential users are "external users" and the focus is on the external aspect of financial reporting.

Among external users, taxing and regulatory agencies have statutory authority to require specific information needed to fulfill their functions. Similarly, some present or potential investors and creditors may be able to require an enterprise to provide specified information as a condition to entering into a particular transaction. This Research Report is concerned primarily with the needs of external users who lack the authority to prescribe the financial information they want from an enterprise and, therefore, must use the information that management communicates to them. This does not mean that regulatory agencies are not users, in the sense of having a legitimate interest in the general purpose financial reporting of enterprises they regulate. Inasmuch as they can prescribe the financial information they require, however, they do not have the same reliance on general purpose financial statements as external users who lack that authority.

Certain government-owned and operated rate-regulated enterprises are equivalent to private-sector businesses. In fact, some may consider them to be business enterprises and regard contributors, customers and citizens as the equivalent of investors in those enterprises. Furthermore, many of those enterprises sell bonds to the public and, hence, have at least some investors in the usual sense of the word; all of those enterprises have creditors.

Qualities and Characteristics of Useful Information

The qualities and characteristics that make information useful for decision making are the criteria for selecting preferable accounting choices from among available alternatives. Both conceptual frameworks refer to *understandability, relevance, reliability, predictive and feedback value, materiality, representational faithfulness, neutrality, conservatism (prudence), completeness, comparability, consistency, timeliness, the benefit versus cost constraint*, and *verifiability* as qualities and characteristics that have an impact on the usefulness of information provided in the financial statements. The emphasis given to some of those qualities and characteristics varies between the two countries, and there are some minor differences in the definition or interpretation of some of those listed.

For example, the US framework sets out a hierarchy that distinguishes between primary and other accounting qualities. It notes, however, that the hierarchy is an exploratory device, whose purpose is to clarify certain relationships rather than assign relative weights or importance to

specific qualities. The Canadian framework notes four principal characteristics (understandability, relevance, reliability and comparability) and identifies other qualities that have an impact on these principal characteristics. It notes that, in practice, a trade-off between qualitative characteristics often is necessary.

The Canadian framework also refers to *substance over form* as a characteristic of financial information, whereby transactions are accounted for and presented in a manner that conveys their substance rather than necessarily their legal form. The US framework notes that this is rather a vague idea that defies precise definition. It considers that *representational faithfulness* leaves no room for accounting representations that subordinate substance to form. Furthermore, the US framework stresses that accounting standards cannot be phrased in such a way that their application can suit all circumstances; therefore, judgmental choices must be made.

Underlying Assumptions

Two basic underlying assumptions are noted in the frameworks: the *accrual basis* and *going concern*. The *accrual basis* recognizes the effect of transactions and other events and circumstances in the period in which they occur, regardless of whether there has been a receipt or payment of cash or its equivalent. The frameworks note that accrual accounting also encompasses *deferrals* (cash payments and receipts that occur prior to fulfilling the criteria for recognition of expense or revenue). *Going concern* relates to the assumption that an entity will continue in operation for the foreseeable future and will be able to realize assets and discharge liabilities in the normal course of operations, unless there is evidence to the contrary.

Elements of Financial Statements

CICA Handbook – Accounting Section 1000 (paragraph 1000.25) states that:

> Elements of financial statements are the basic categories of items portrayed therein in order to meet the objective of financial statements. There are two types of elements: those that describe the economic resources, obligations and equity / net assets of an entity at a point in time, and those that describe changes in economic resources, obligations and equity / net assets over a period of time. Notes to the financial statements ... are not considered to be an element.

Both frameworks identify *assets* and *liabilities*, *equity, income (revenues)* and *expenses, gains* and *losses*, and *performance (profit* or *earnings)* as the elements of financial statements. Although the wording differs somewhat, the various elements may generally be described as follows:

- *Assets* are the economic resources obtained or controlled by an entity as a result of past transactions or events, from which future benefits may be obtained (see *CICA*

Handbook – Accounting paragraph 1000.29).

- *Liabilities* are obligations arising from past transactions and events that may result in future sacrifices of economic benefits through transfer or use of assets or provision of services to other entities (see *CICA Handbook – Accounting* paragraph 1000.32).
- *Equity* is the residual (ownership) interest in the assets of an entity after deducting its liabilities (see *CICA Handbook – Accounting* paragraph 1000.35). 3(73)
- *Income (revenues)* refers to increases in economic resources, by way of inflows or enhancement of assets, or reductions of liabilities, resulting from the ordinary activities of an entity (see *CICA Handbook – Accounting* paragraph 1000.37). 4(74)
- *Expenses* refer to decreases in economic resources, by way of outflows or reduction of assets, or incurrences of liabilities, resulting from the ordinary activities of an entity (see *CICA Handbook – Accounting* paragraph 1000.38). 5(75)
- *Gains* are increases in equity resulting from peripheral or incidental transactions and events of an entity, and from other events, transactions and circumstances affecting the entity, except those resulting from revenues or investments by owners (see *CICA Handbook – Accounting* paragraph 1000.39).
- *Losses* are decreases in equity resulting from peripheral or incidental transactions and events of an entity, and from other events, transactions and circumstances affecting the entity, except those resulting from expenses or distributions to owners (see *CICA Handbook – Accounting* paragraph 1000.40).
- *Performance (profit or earnings)* is a measure of the residual amount after expenses and losses are deducted from revenues and gains during a period.

In addition, the US framework defines "other comprehensive income" as the change in equity from all transactions and other events other than transactions with owners and distinguishes it from earnings in that certain classes of gains and losses are included in comprehensive income that are excluded from earnings.

Recognition and Measurement

Recognition is defined as the process of incorporating an item in the financial statements of an entity. It consists of the amount and a narrative description of the item, with the amount being included in a financial statement total. *Recognition* cannot be substituted with notes, disclosure or other similar types of information.

The general criteria for recognition noted in both frameworks are that there is a reliable and relevant basis of measurement and that a reasonable estimate can be made. The US framework specifically states that the item must meet the definition of an element of financial statements and

that recognition is subject to a cost-benefit constraint 6(76) and a materiality 7(77) threshold. These are implied in other parts of the Canadian framework.

The criteria for recognition of *revenues, expenses, gains* and *losses* are covered in both frameworks. Again, the wording differs, but the criteria generally are as follows:

- *Revenues* are recognized when performance is completed. The Canadian framework also refers to reasonable assurance regarding measurement and collectibility.
- *Expenses* are recognized when an expenditure does not have a future economic benefit.
- *Gains* are recognized when realized. The US framework also permits recognition when realizable.
- *Losses* are recognized when a previously recognized asset does not have a future economic benefit. The US framework also refers to the situation in which a liability has been incurred or increased without associated economic benefits.

Measurement is the process of determining the amount at which an item is recognized in the financial statements. There are a number of bases on which an amount can be measured, but financial statements are prepared primarily using the *historical cost* basis of measurement, whereby transactions and events are recognized in financial statements at the amount of cash or cash equivalents paid or received or the fair value ascribed to them when they took place.

Other bases of measurement include: current cost — United States; current market value — US; net realizable (settlement) value — US; present (or discounted) value of future cash flows — Canada and US; realizable value — Canada; and replacement cost — Canada. These measurement alternatives can be used in limited circumstances only. Although some of these alternatives are not specifically mentioned in the conceptual frameworks, they are being used in Canada and the United States.

Both frameworks mention the financial capital maintenance concept in the preparation of financial statements, stipulating that capital maintenance should be measured in nominal terms. The concept of capital maintenance affects measurement because income in an economic sense exists only after the capital of an enterprise has been maintained. Therefore, income is the increase or decrease in the amount of capital at the end of the period over the amount at the beginning of the period, excluding the effects of capital contributions and distributions.

Appendix B

SURVEY OF FINANCIAL STATEMENT DISCLOSURES BY INDUSTRY

Chapter 4 of the Research Report provides an analysis of the current state of accounting and financial reporting by rate-regulated enterprises in Canada. To supplement that analysis, this Appendix presents the results of a survey of financial statement disclosures in corporate annual reports for 1999 or 2000. The survey covers 25 regulated enterprises in four industries — electric, natural gas distribution and transmission, telecommunications and transportation. A list of the survey companies is provided below followed by a schedule of disclosures provided in their general purpose financial statements.

Electric enterprises	**Year**
1. British Columbia Hydro and Power Authority	2000
2. Canadian Utilities Limited	2000
3. Emera Inc.	2000
4. Epcor Utilities Inc.	2000
5. Hydro One Inc.	1999
6. Hydro Québec	2000
7. New Brunswick Power Corporation	2000
8. Newfoundland and Labrador Hydro	1999
9. Newfoundland Power Inc.	2000
10. Saskatchewan Power Corporation	2000

Natural gas distribution and transmission enterprises	**Year**
11. ATCO Ltd.	2000
12. BC Gas Utility Ltd.	2000
13. Enbridge Inc.	2000
14. Pacific Northern Gas Ltd.	2000
15. The Consumers' Gas Company Ltd.	2000
16. TransCanada Pipelines Limited	2000
17. Westcoast Energy Inc.	2000

Telecommunications enterprises	**Year**
18. Aliant Inc.	2000
19. Bell Canada	2000
20. Manitoba Telecom Services Inc.	2000
21. Saskatchewan Telecommunications Holding Corporation	1999
22. Télébec ltée	2000

23. Telus Corporation	2000

Transportation enterprises	**Year**
24. NAV Canada	2000
25. Halifax-Dartmouth Bridge Commission	2000

RATE-REGULATED ENTERPRISES IN CANADA

Survey of Disclosures in Notes to Financial Statements

Appendix C

ILLUSTRATIVE FINANCIAL STATEMENT DISCLOSURES

This appendix provides examples of disclosures presented in the notes to the general purpose financial statements of selected rate-regulated enterprises. The examples are drawn from the published annual reports of survey companies listed in Appendix B to this Research Report.

The examples are intended to reflect current practices in Canada. Variations may be necessary to meet the requirements of differing circumstances and other typical reporting situations that are not represented in these examples.

Regulator / Impact of Rate Regulation

Appendix D

SURVEY OF PUBLIC SECTOR PRACTICES

With regards to the public sector in Canada, the Study Group is proposing that the application of General Principle 1 should be limited to "government business enterprises." General Principle 1 defines a "rate-regulated enterprise" as an enterprise (i.e., a separate legal entity) that has regulated operations meeting all of the following criteria:

- The enterprise's rates for regulated services or products provided to its customers are established by, or are subject to approval by, an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.
- The regulated rates are designed to recover the specific enterprise's costs of providing the regulated services or products.
- In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the enterprise's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs.

To assess the feasibility of this proposal, the Study Group undertook a survey of the current financial reporting practices of the federal and provincial governments in Canada. Survey participants were asked the following questions:

- In your jurisdiction, what entities that are included in the federal or provincial government's summary financial statements currently follow GAAP for rate-regulated enterprises as set out in the *CICA Handbook*?
- Do the entities that currently following GAAP for rate-regulated enterprises meet all of the criteria set out in the above-noted definition of a "rate-regulated enterprise?" Which entities do not have rates established by, or subject to approval by, an

independent, third party regulator?

- The Study Group is proposing to limit application of the criteria for qualifying as a "rate-regulated enterprise" to "government business enterprises" because their financial statements should be prepared on the same basis as private sector businesses (refer to Public Sector Handbook, paragraph PS 1300.27). In your jurisdiction, would this eliminate any of the entities currently following GAAP for rate-regulated enterprises?
- Is it important that the general purpose financial statements of rate-regulated enterprises in the public sector be prepared on a basis consistent with that in the private sector?

The following excerpts are drawn from the responses to the survey.

Government of Canada

None of the organizations within the Government of Canada reporting entity fit the definition of a rate-regulated enterprise.

British Columbia

In addition to British Columbia Hydro and Power Authority (BC Hydro), there are several other organizations that meet the definition of rate-regulated, but do not follow GAAP for rate-regulated enterprises. If a new set of guidelines / recommendations come out for rate-regulated enterprises, some of these organizations or their auditors may determine that they should be following rate-regulated GAAP. We note that the definition of rate-regulated is not just that rates be established by an independent, third-party regulator, but that they may be established by the organization's own governing board.

Any accounting treatment determined to be appropriate for rate-regulated enterprises should be applicable to both private sector and public sector enterprises alike. It is important that the general purpose financial statements for rate-regulated enterprises in the public sector be prepared on a basis consistent with that of rate-regulated enterprises in the private sector.

Alberta

The Alberta Government does not have any rate-regulated enterprises that form part of the reporting entity. In general, we agree that the financial statements of rate-regulated enterprises in the public sector should be consistent with those in the private sector.

Saskatchewan

Saskatchewan's largest Crown corporations, SaskEnergy Incorporated (SaskEnergy), Saskatchewan Power Corporation (SPC), and Saskatchewan Telecommunications Holding

Corporation (SaskTel), follow rate-regulated GAAP. All three of the Crown corporations meet the definition of a government business enterprise.

SaskTel is regulated by the Canadian Radio-television and Telecommunications Commission (CRTC). It does not appear that SaskTel would meet the second or third criterion of the proposed definition, as local telephone access is subsidized and, therefore, the rates would not recover the enterprises's costs for that service. As a result, SaskTel would not be considered rate-regulated by the proposed definition. It is likely that this will affect all phone companies regulated by CRTC.

SaskEnergy and SPC's rates are subject to review by the Saskatchewan Rate Review Panel. The rates are then subject to approval by the Crown's Board of Directors, the Crown Investments Corporation's Board and, ultimately, Saskatchewan Cabinet. This rate-approval process meets the proposed definition as the Boards and Cabinet are empowered by statue or policy to establish rates that bind customers. Therefore, SaskEnergy and SPC would be considered rate-regulated. However, this might be an issue of further debate in Saskatchewan. In order to be consistent and comparable to other companies in the same industry, it is important that Crown corporations are allowed to follow rate-regulated accounting.

The main focus of developing financial reporting policies for rate-regulated enterprises is to ensure companies in the same industry have comparable reporting practices. If an accounting treatment is accepted by industry, it should be accepted by all similar companies regardless of who owns the company (i.e., government versus private sector). Therefore, it is important for similar organizations to follow similar accounting policies, whether they are public or private.

Ontario

In the past, Ontario Hydro was the only Crown agency to prepare its general purpose financial statements in accordance with GAAP for rate-regulated enterprises. Prior to the electricity restructuring, the activities of Ontario Hydro were not reflected in the Province's books as the Province had no access to the "retained earnings" of the agency under the Power Corporations Act. With the restructuring, the Province now includes in its accounts, on a modified equity basis, the activities of HYDRO1 and Ontario Power Generation. HYDRO1 meets the definition of a "rate-regulated enterprise" for financial reporting purposes as its rates are established by the Ontario Energy Board (an agency of the Crown whose members are appointed by OIC but operate independently of these enterprises and the government), their rates are designed to recover the costs of providing the regulated services or products, and it is reasonable to assume that their rates can be charged to and collected from customers.

New Brunswick

In New Brunswick, NB Power is the only organization in the government reporting entity that uses rate-regulated accounting. NB Power meets the definition of a rate-regulated enterprise. By

legislation, it has the authority to increase rates by up to 3% in any year on its own — subject to interest coverage rate limits. Any increase outside of this must be approved by the Public Utilities Board, which acts independently but is appointed by government. 1(78) NB Power is a government business enterprise (GBE) so, if rate-regulated enterprises have to be GBEs, it will not have an impact on us. It is important for public sector and private sector rate-regulated operations to be accounted for on a consistent basis.

Nova Scotia

Nova Scotia has two rate-regulated entities that are reported in the Province's summary financial statements, Halifax-Dartmouth Bridge Commission and Highway 104 Western Alignment Corporation. Both of these entities prepare their statements according to GAAP. They are Government Business Enterprises. Therefore, their results are included in the Province's summary statements using the modified equity basis. The toll rates of the Halifax-Dartmouth Bridge Commission are subject to approval of the Nova Scotia Utility and Review Board. The toll rates of Highway 104 are set in the agreement with the bondholders and agreed to by the corporation and the Province, but are not regulated by an independent third party, such as the Nova Scotia Utility and Review Board. We agree that rate-regulated enterprises in the public sector should be prepared on a basis consistent with those of the private sector to accommodate the needs and expectations of other users of their financial statements.

Northwest Territories and Nunavut

The GNWT includes the financial statements of the NWT Power Corporation. The assets of this entity are shared by the Government of the NWT and the Government of Nunavut. The NWT Power Corporation was established after the GNWT purchased the Northern Canada Power Commission and is still trying to align rate structure / revenue requirements with the associated costs within the various rate zones. In addition, the GNWT also provides a direct subsidy to residential and commercial consumers in all rate zones outside Yellowknife. This unique situation would prevent us from meeting all the criteria until we complete realignment of revenues to costs. General Rate Applications are submitted and approved by an independent Public Utilities Board. Limiting application to "government business enterprises" would not prevent NWT Power Corporation from qualifying as a rate-regulated enterprise.

Appendix E

RATE REGULATION IN THE ELECTRIC POWER INDUSTRY

Public utilities are often described as businesses so affected with the public interest that they

must be regulated by government regarding entry into and exit from the market, rate charges to customers, rate of return allowed to owners, and for the requirement to serve all customers within their area of operation. 1(79) With very few exceptions, rate regulation has been imposed on both publicly-owned and privately-owned utilities, or example, in the electric power industry.

Development of the electric power industry in Canada involved a mix of politics, economics, geography and technology. In the early 20th century, demand for electric power was being met by many isolated electric generating plants, both thermal and hydro. Because of the sophisticated technology and significant capital investment, the electric utilities evolved quickly into monopolies. With the growing importance of electricity as a basic need for commerce, industry and domestic life, and the apparent economies offered by large-scale integrated systems, there was a need to make some fundamental choices. Were essential services to be provided by private enterprise or publicly-owned utility? How, and to what extent, were they to be regulated? Depending on such factors as political will, population density and vested interests, intervention by way of government regulation came at different times and in different ways in each province and territory. This is illustrated, in part, by developments in Québec and Ontario.

In Québec, much of the electric power industry was under private control. In 1918, only 20 of the 119 power plants were owned and operated by municipalities. In 1940, five private companies supplied 90 per cent of the power. Largely in response to growing consumer dissatisfaction over high rates, the Québec Hydro-Electric Commission (Hydro-Québec) was created in 1944. It was to supply power to municipalities and commercial enterprises at the lowest possible rate and to generate, transmit and distribute electricity throughout the province. In 1963, a political decision was made to nationalize existing utilities and Hydro-Québec quickly acquired most privately-owned suppliers. By 1984, it had become one of the 10 largest public utilities in North America.

Unlike Québec, most of Ontario's early 20th century history is dominated by a publicly-owned utility. Many municipalities and boards of trade in southern Ontario felt that cheap power was essential to economic growth. In response to public pressure, the Hydro-Electric Power Commission of Ontario (Ontario Hydro) was incorporated in 1905. Ontario Hydro was given the legal authority to control the rates charged for electricity and the right to generate and distribute electrical energy. As a wholesaler of power to municipalities, it also controlled the rates they charged. By 1930, Ontario Hydro was supplying electric power to 550 communities. Despite massive expansion, it needed more power. Additional input came from nuclear-powered thermal generating plants, developed in conjunction with Atomic Energy of Canada Limited.

In Canada, the provinces have jurisdiction over property and, therefore, the electric power industry could not be regulated on a national level. Each province reacted differently to a technology that demanded the creation of a monopoly. As provincial and interprovincial integration became necessary to achieve maximum efficiency through diversification of load and supply, regulation became more important, and the distinction between private and public

utilities became blurred. Today, a variety of approaches continue to exist, with some provinces dominated by a public utility (for example, Ontario and Québec), some having mixed private and public utilities (for example, Alberta and Newfoundland), and one province dominated by a private utility (Prince Edward Island).

Of the major electric utilities in Canada today, eight are provincially owned, seven are investor owned, four are privately-owned and two are territorial Crown corporations. In addition, there are a number of municipally owned utilities, particularly in Ontario. Pubic sector enterprises and private sector enterprises each represent about half of the 21 major electric utilities. According to the Statistics Canada publication *Electric Power Generation, Transmission and Distribution 1998*, however, public utilities generate about 83% of the power in Canada and private utilities about 17%. 2(80) Public utilities account for 90% of the total net fixed assets of $124 billion and about 95% of the total long-term debt of $91 billion. In addition, the account for 87% of the total annual operating revenues of approximately $40 billion.

In contrast to the Canadian environment, where there are a few, relatively large rate-regulated enterprises (e.g., hydro utilities) owned by the provincial governments, the US environment is characterized by many, relatively small rate-regulated enterprises of state and local governments. According to the American Public Power Association's *2000 Annual Directory and Statistical Report*, there are 3,170 electric utilities in the United States. Of these, 2,009 (63%) are publicly owned utilities, 239 (8%) are investor owned utilities, 912 (29%) are cooperatives and 10 (less than 1%) are federal power agencies.

There is no connection, however, between the type of ownership and the capacity to serve the ultimate customers. Although investor-owned utilities comprise only 8% of the total number of utilities, they generate approximately 75% of the power and service approximately 75% of the ultimate customers (1998 revenues exceeded $168 billion). On the other hand, publicly-owned utilities comprise 63% of the total number of utilities, but they generate only 12% of the power and service less than 15% of the ultimate customers (1998 revenues were $30 billion).

In summary, there are relatively few publicly-owned electric power utilities in Canada, but they generate the majority of the total power. This contrasts sharply with the situation in the United States which has many publicly-owned electric power utilities, but they generate only a small fraction of the total power. Nevertheless, both public and private sector utilities are similar in that they carry on a business and prepare their general purpose financial statements in accordance with GAAP for private sector enterprises. This similarity is highlighted by a move in recent years towards unbundling services provided by electric utilities, leading to more and more deregulated or market-oriented rates for the generation services, with transmission and distribution rates remaining regulated.

GLOSSARY

The following terms are used in the Research Report or are commonly used in the regulatory community and may be useful to the reader. Terms in bold within definitions are separately defined in the Glossary. 1(81)

Allowance for funds used during construction (AFUDC)

AFUDC is the amount that a **rate-regulated enterprise** is allowed to earn to recover its cost of financing assets under construction. It is equal to the average cost of the construction work in process, times a financing rate, which is usually equal to the enterprise's **cost of capital** rate. AFUDC is included in the cost of the related assets and recovered in future periods through the depreciation charge. AFUDC is similar to "Interest During Construction" for unregulated industries, except that the **cost of equity** capital is normally taken into account.

Allowed rate of return

The rate of return a regulated enterprise is allowed the opportunity to earn. When applied to the **rate base**, the allowed rate of return provides an amount equal to the forecast cost of financing the investment required for regulated operations. The financing costs include both the **cost of debt** and the **cost of equity**.

Argument

A submission to a regulatory authority at the end of a hearing that summarizes a party's position. Argument may be presented on behalf of the regulated enterprise, each intervenor and, in some cases, the regulator's staff. Argument is usually presented by the party's counsel and draws on the evidence presented in the hearing and legal precedent. At the regulator's discretion, arguments may be presented either orally or in writing, though written submissions are more common.

Avoidable cost

A cost that would be avoided if the cost object did not exist. Avoidable costs will generally be the same as the direct and variable indirect costs.

Capital asset pricing model

A method for estimating the **cost of equity** in which that cost equals a risk-free rate plus a risk premium. The yield on government bonds is usually used as the risk-free rate. The risk premium is equal to the market risk premium times a "Beta" factor, the Beta factor being a measure of the enterprise's risk in relation to the market.

Capital structure

The manner in which an enterprise is financed, which usually includes debt, equity and deferred income tax credits.

Cash working capital

Cash working capital is the investment required by the difference in time between when

cash operating expenses are paid and when the cash to cover the expenses is eventually recovered from customers.

Comparable earnings method

A method for estimating the **cost of equity**. The cost of equity is determined based on the realized return on investments of similar risk to that of the regulated enterprise.

Construction work in process (CWIP)

CWIP refers to the capital assets under construction by a regulated enterprise for its future use. It may or may not be included in the regulated enterprise's **rate base**.

Cost-based pricing

A basis for determining how the **cost of service** will be recovered through individual rates. Rates for each type of service are set to reflect the cost of providing the service.

Cost object

Whatever is being costed, such as a product or service, activity, operating division, etc.

Cost of capital

The cost of financing the **rate base**. It is equal to the weighted average cost of each component in the capital structure. The weight for each component equals the percentage of the total capital structure represented by the component.

Cost of debt

The costs associated with debt financing, including interest payments, plus amortization of issuance expense, any purchase discount / premium and any foreign-exchange losses / gains.

Cost of equity

The cost to equity investors of investing their funds in a regulated enterprise. In regulatory proceedings, it is generally determined in relation to what could be earned on investments of similar risk in unregulated companies.

Cost of service

The total cost of providing service, including operating and maintenance expenses, depreciation, amortization, taxes and cost of capital. The cost of service is also referred to as "**revenue requirements**."

Cost of service study

A study to determine the **cost of service** by class of service and/or customer. These studies are used to help determine how the **revenue requirements** are to be allocated among the rates for the various services / customers.

Cross-subsidization

Increasing the rates for one service or class of customers so that the rates for another

service or class of customers can be reduced below cost.

Current cost

The cost of acquiring an asset or service at current prices.

Deemed capital structure

A capital structure used for rate-making purposes that differs from an enterprise's actual **capital structure**. A regulator may deem a capital structure for an enterprise when it considers its actual capital structure inappropriate.

Deferral account

An account that records the deferral of a cost or revenue until a future date. A deferred asset account records a cost that would normally be expensed and recovered in the current period, but is to be expensed or recovered in a future period. A deferred liability account records an amount recovered in the current period to cover costs of providing service in a future period.

Direct cost

A cost incurred for one specific cost object.

Discounted cash flow method

The discounted cash flow method is one of the methods used for estimating the **cost of equity** using market data. Using this method, the cost of equity is equal to the expected dividend yield (the expected dividend divided by current share price), plus the expected dividend growth rate.

Embedded cost

See "**Historical cost**."

Financial viability

Ability to meet financial obligations.

Fixed cost

A cost that doesn't vary with the provision of a cost object (which would be the same whether or not the cost object existed).

Historical cost

The amount originally paid for assets and services.

Incentive regulation

A form of **rate regulation** where the regulated enterprise has financial incentives to improve its efficiency or achieve other goals. Incentives can include financial rewards for exceeding targets and financial penalties for failing to achieve them. Incentive rate regulation is also referred to as "**performance-based regulation**."

Indirect cost

A cost incurred for two or more cost objects.

Interest coverage

A measure of an enterprise's ability to meet interest charges, this is income available to cover interest charges, divided by interest charges. Income to cover interest charges equals net income plus interest charges and income tax expense.

Information requests

Questions posed to those who provide evidence in a hearing. Information requests and their responses are made prior to the hearing, in writing, and become evidence in the hearing. Information requests are also referred to as "**interrogatories**."

Interrogatories

See "**Information requests**."

Lead-lag study

A lead-lag study is used for estimating **cash working capital**. It is an analysis of the average number of days between the time payment is made for operating expenditures and the time the amounts are collected from customers to recover these costs. The resulting time delay is divided by the number of days in the year, then multiplied by the estimated amount of cash operating expenses to determine the amount of necessary cash working capital.

Negotiated settlement

An agreement between a regulated enterprise and its customers (or their representatives) dealing with allowed rates or an issue that affects their determination. Generally, negotiated settlements must be approved by the regulator.

Non-avoidable cost

A cost that would not be avoided if the cost object did not exist. Non-avoidable costs are generally the same as fixed indirect costs.

Performance-based regulation

See "**Incentive regulation**."

Price-cap regulation

A form of **rate regulation** where the focus is on the prices that can be charged. Limits are set on initial prices and a formula is put in place to allow for future increases in the maximum prices that can be charged.

Purchase premium

An amount paid for assets, or an entire enterprise, in excess of original cost, less depreciation.

Rate-regulated enterprise

For financial reporting purposes, a "rate-regulated" enterprise is an organization which has regulated operations that meet all of the following criteria:

- The enterprise's rates for regulated services or products provided to its customers are established by, or are subject to approval by, an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.
- The regulated rates are designed to recover the specific enterprise's costs of providing the regulated services or products.
- In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the enterprise's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs.

Rate base

The amount of investment in regulated operations on which a regulated enterprise is allowed to earn a return. It usually consists of the depreciated value of the plant in service required for regulated operations, plus an allowance for working capital and deferred assets.

Rate regulation

The restriction in the setting of prices that can be charged to customers for services or products. Under rate regulation, an enterprise's rates are established by, or are subject to approval by, a regulator.

Rates

The prices at which regulated services are provided.

Rebuttal evidence

Evidence submitted in a hearing in response to evidence provided by another party. Such evidence may address only the evidence that has been submitted by the other party, not a new area.

Reply argument

A submission to a regulatory body addressing another party's argument. A reply argument may address only the other party's previously submitted argument, not a new area.

Return on rate base regulation

A form of **rate regulation** where the focus is on the allowed earnings, in particular the allowed return per dollar of investment (rate base). Under this form of rate regulation, total revenue requirements are set equal to the expected cost of providing service. This expected cost is equal to the operating costs, plus an allowed return where that return is

set equal to the allowed rate base times the allowed rate of return.

Revenue requirements
See "**Cost of service**."

Risk premium method
A method for estimating the **cost of equity** using market data. The cost of equity is determined as the sum of the yield on a debt security (usually the yield on government bonds or the enterprise's bonds), plus an estimate of the equity risk premium (i.e., the required return on the enterprise's equity over the required return on the debt security).

Social contract regulation
A form of **rate regulation** whereby allowed rates are the result of an agreement between the regulated enterprise and the regulatory authority. It is an imprecise form of regulation since it can be argued that almost any form of rate regulation qualifies as social contract regulation.

Test period
The operating period selected to evaluate the **cost of service** and whether proposed rates are adequate to cover costs without providing an excess return. Although the test period is usually a prospective 12-month period, other periods, including historical periods, have been used.

Value-of-service pricing
A basis for determining how the **cost of service** will be recovered through individual rates that reflects the perceived value of the services without regard to the cost of providing them.

Working capital
For regulatory purposes, working capital represents the investment required to finance inventory, plus **cash working capital**.

Endnotes

1 (Popup - Popup)

1. Where the Research Report presents the views, opinions or conclusions of the Study Group, it refers to the majority of the members and not necessarily to the entire Study Group.

2 (Popup - Popup)

1. The questions were initially raised in May 1999 when the Accounting Standards Board (AcSB) reviewed a draft project proposal on accounting for rate-regulated enterprises. In addition, the Public Sector Accounting Board (PSAB) raised questions about the application to public sector enterprises (see Chapter 8).

3 (Popup - Popup)

2. Chapter 6 examines the criteria that an enterprise must meet to qualify as a rate-regulated enterprise for financial reporting purposes. In short, the rates must be subject to regulation, they must be designed to recover the costs of providing service, and they must be chargeable and collectible from customers.

4 (Popup - Popup)

3. As noted in Chapter 3, there are differing views on the extent to which specific guidance for rate-regulated enterprises should be provided.

5 (Popup - Popup)

4. The survey was undertaken, on the CICA's behalf, by Peggy Coady, Memorial University of Newfoundland.

6 (Popup - Popup)

5. Where the Research Report presents the views, opinions or conclusions of the Study Group, it refers to the majority of the members and not necessarily to the entire Study Group.

7 (Popup - Popup)

1. Appendix E to this Research Report provides a brief overview of rate regulation in the electric power industry in Canada.

8 (Popup - Popup)

2. Circumstances may differ between the public sector and the private sector. Issues of particular relevance to rate-regulated enterprises in the public sector — such as the independence of the regulator and self-regulation — are addressed in Chapter 8 of this Research Report.

9 (Popup - Popup)

1. Statement of Financial Concepts, No. 3, paragraph 85, Financial Accounting Standards Board. A similar view is expressed in "Financial Statement Concepts," *CICA Handbook – Accounting*, paragraph 1000.46.

10 (Popup - Popup)

2. *CICA Handbook – Accounting*, paragraph 1500.06; Exposure Draft "Generally Accepted Accounting Principles" (July 2001), paragraph 19.

11 (Popup - Popup)

1. It is important to understand that Statements issued subsequent to SFAS 71 may amend, interpret, supplement or otherwise affect the provisions of that Statement.

12 (Popup - Popup)

2. It should also be noted that SFAS 71, "Basis for Conclusions," paragraph 64 indicates that this criterion was specifically modified by the Board so as not to preclude application by government-owned utilities with rates set by their own governing board.

13 (Popup - Popup)

3. SFAS 143 is effective for fiscal years commencing after June 15, 2002, although earlier application is encouraged.

14 (Popup - Popup)

4. *Accounting for Regulation in UK Utilities* (London: The Research Board of The Institute of Chartered Accountants in England and Wales, 1994).

15 (Popup - Popup)

5. The observations were drawn from papers presented at a conference, "Accounting for Regulation – A Comparative Assessment," sponsored by the Centre for the Study of Regulated Industries (CRI) of the University of Bath, that took place at the London School of Economics on September 23, 1999. The papers are titled "Reconciling Generally Accepted Accounting Practice (GAAP) and Regulatory Accounts – The Lessons of Reporting in GAS," by M. Duthie; "A

Comprehensive Accounting Model For Regulation," by P. Vass, and "Statements of Recommended Practice (SORPs) – Role and Rules for Development," by Andrew Lennard, Assistant Technical Director, UK ASB.

16 (Popup - Popup)

6. Refer to "Financial Statement Concepts, " *Handbook* Section 1000, and "General Standards of Financial Statement Presentation," *Handbook* Section 1500. As stated in paragraph 1000.02, Section 1000 is to be used in establishing accounting policies in areas in which accounting principles are developing.

17 (Popup - Popup)

1. The rate-setting processes and methodologies are discussed in Chapter 2 of this Research Report.

18 (Popup - Popup)

2. As noted in Chapter 1, in July 2001, the Accounting Standards Board issued an Exposure Draft of a proposed new *Handbook* Section on "Generally Accepted Accounting Principles." The material in this Section is based on that Exposure Draft. Reference should therefore be made to the new *Handbook* Section once it is issued.

19 (Popup - Popup)

3. Financial statement concepts are discussed in Appendix A of this Research Report.

20 (Popup - Popup)

4. "Contingencies," *Handbook* Section 3290, paragraph .06, states that the uncertainty relating to the occurrence of a future event can be expressed by a range of probabilities that provide a basis for establishing the appropriate accounting treatment. The three main areas of this range are likely, unlikely and not determinable.

21 (Popup - Popup)

5. For a liability to be recognized, however, it must be probable that an outflow of resources embodying economic benefits will be required to settle the obligation (paragraph 1000.44). This effectively disqualifies the recognition of most equitable obligations and some constructive obligations.

22 (Popup - Popup)

Canadian Accounting and Assurance Reference Service (CAARS)

1. Note that some enterprises carry on both rate-regulated and non-rate-regulated activities.

23 (Popup - Popup)

2. See Appendix A of this Research Report for a comparison of the conceptual frameworks in Canada and the US.

24 (Popup - Popup)

3. As noted later in this chapter, only a subset of an enterprise's operations may be subject to rate regulation. For example, the transmission and distribution activities in the electric power industry may be subject to rate regulation but the power-generating activities may not (see Appendix E for an overview of rate regulation in the electric power industry).

25 (Popup - Popup)

4. For example, NAV Canada is given the exclusive right to provide certain services under the 1996 *Civil Air Navigation Services Commercialization Act* and is empowered by the *Act* to set and collect user charges for air navigation services.

26 (Popup - Popup)

5. Circumstances may differ in the public sector, however, and issues of particular relevance to rate-regulated enterprises in the public sector — such as the independence of the regulator and self-regulation — merit further consideration. These are addressed separately in Chapter 8 of this Research Report.

27 (Popup - Popup)

6. In Chapter 2, it was noted that there are a number of basic regulatory methodologies and, within each basic methodology, there can be different applications that vary with the regulatory authority.

28 (Popup - Popup)

7. Rate regulators usually consider a fair return on investment to be a cost recoverable through rates.

29 (Popup - Popup)

8. Refer to the definition of a liability, *CICA Handbook – Accounting*, paragraph 1000.32.

30 (Popup - Popup)

1. With regard to the "benefit versus cost" constraint, the Study Group maintains that the benefits expected to arise from providing information in financial statements should exceed the cost of doing so. This constraint is also a consideration in the preparation of financial statements in accordance with GAAP (for example, in considering disclosure of information beyond that required by the standards). The benefits and costs may accrue to different parties and, therefore, the evaluation of the nature and amount of benefits and costs is substantially a judgmental process.

31 (Popup - Popup)

2. Materiality is the term used to describe the significance of financial statement information to decision makers. An item of information, or an aggregate of items, is material if it is probable that its omission or misstatement would influence or change a decision. Materiality is a matter of professional judgment in the particular circumstances.

32 (Popup - Popup)

3. It is assumed that any change in regulatory assets or liabilities would not be associated with a gain or loss as a result of a contribution or distribution of equity / net assets.

33 (Popup - Popup)

4. Appendix A compares the conceptual accounting frameworks of Canada and the United States, including users and their general information needs.

34 (Popup - Popup)

5. Appendix B summarizes the disclosure practices of 25 rate-regulated enterprises.

35 (Popup - Popup)

1. In this regard, the terms of reference for this project ask the Study Group to consider the following:

- Should rate regulation over private sector enterprises be distinguished from rate regulation over public sector enterprises? If so, what are the distinguishing criteria?
- What is the nature of rate regulation and to what degree must it be independent of the enterprises being regulated?

36 (Popup - Popup)

2. *PSAB Handbook*, "Introduction to Public Sector Accounting Recommendations," paragraphs

.03 and .04.

37 (Popup - Popup)

3. A government business has all the following characteristics:
(a) it is a separate legal entity with the power to contract in its own name and that can sue and be sued;
(b) it has been delegated the financial and operational authority to carry on a business;
(c) it sells goods and services to individuals and organizations outside of the government reporting entity as its principal activity; and
(d) it can, in the normal course of operations, maintain its operations and meet its liabilities from revenues received from sources outside of the government reporting entity.
(PSAB Handbook, PS 1300.21)

38 (Popup - Popup)

4. A government business-type organization has all of the following characteristics:
(a) it is a separate legal entity with the power to contract in its own name and that can sue and be sued;
(b) it has been delegated the financial and operational authority to carry on a business; and
(c) it sells goods and services to individuals and organizations as its principal activity. (PSAB Handbook, Introduction .10)

39 (Popup - Popup)

5. Appendix 2 of the "Introduction to Public Sector Accounting Recommendations" states that government organizations should adhere to "Solid Waste Landfill Closure and Post-Closure Liability, *PSAB Handbook* PS 3270, regarding accounting for solid waste landfill closure and post-closure liability, and "Government Assistance — application of *CICA Handbook* Section 3800," *PSAB Handbook* PS 3800, regarding accounting for government assistance.

40 (Popup - Popup)

6. A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on

specific activities or attaining certain objectives in accordance with special regulations, restrictions or limitations.

41 (Popup - Popup)

7. Statement No. 34 (paragraph 67) notes that enterprise funds are those whose principal revenue sources are from activities for which a fee is charged to external users for goods and services. Activities are *required* to be reported as enterprise funds if any one of the following criteria is met:

- The activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges of the activity.
- Laws or regulatons require that the activity's costs of providing services, including capital costs (such as depreciation or debt service), be recovered with fees and charges, rather than with taxes or similar revenues.
- The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs (such as depreciation or debt service).

42 (Popup - Popup)

8. This viewpoint is strongly supported by one member of the Study Group, who is a legislative auditor.

43 (Popup - Popup)

9. It should be noted, however, that the first criterion is just one of three criteria for meeting the definition of a rate-regulated enterprise and that all three criteria must be met. Also, meeting the definition of a rate-regulated enterprise does not necessarily mean that the enterprise would recognize any regulatory assets or liabilities. It means that, if there is an economic impact, the enterprise would be entitled to apply the principles for recognizing regulatory assets and liabilities.

44 (Popup - Popup)

10. Some public sector rate-regulated enterprises, however, do have publicly traded debt.

45 (Popup - Popup)

11. This viewpoint is supported by nine of the ten Study Group members.

46 (Popup - Popup)

12. For example, rates may be set to maintain essential services, to effect economies of scale and/or to prevent discriminatory pricing.

47 (Popup - Popup)

14. The Ontario Energy Board and the New Brunswick Public Utilities Board were cited as examples of regulators that operate at arm's length from both the government and the enterprises that they regulate.

48 (Popup - Popup)

15. One of the ten members expressly stated that he did not agree with the other members on this issue.

49 (Popup - Popup)

16. The CICA has authorized the Public Sector Accounting Board to issue Recommendations and guidance with respect to matters of accounting in the public sector.

50 (Popup - Popup)

17. A government reporting entity comprises the organizations that are accountable for the administration of their financial affairs and resources either to a minister of the government or directly to the legislature, or local government council, and are owned or controlled by the government. (*Public Sector Accounting Handbook*,"Financial Reporting Entity," paragraph PS1300.07)

51 (Popup - Popup)

18. See footnote 4 for a definition of this type of organization.

52 (Popup - Popup)

19. For an overview of rate regulation in the electric power industry, see Appendix E to this Research Report.

53 (Popup - Popup)

1. This complements the Accounting Standards Board initiative to harmonize Canada / US GAAP (see Chapter 3).

54 (Popup - Popup)

2. The criteria set out in the definition of rate-regulated property, plant and equipment is essentially the same as the definition of a rate-regulated enterprise in Handbook Section 3465, paragraph .09.

55 (Popup - Popup)

3. The survey of current practices presented in Appendix B shows that all 25 survey companies disclosed, in the significant accounting policies note, the basis of valuation of property, plant and equipment (items of rate-regulated property, plant and equipment were valued at cost) and the basis of depreciation. Additional disclosures in other notes included the depreciation rate(s) and expense for the period (23 companies), accumulated depreciation (25 companies) and net book value (15 companies).

56 (Popup - Popup)

4. SFAS 90 adds a restriction that the AFUDC may be capitalized only if its subsequent inclusion in allowable costs for rate-making purposes is probable. It further limits capitalization of the AFUDC to that recorded during construction or as part of a qualifying phase-in plan.

57 (Popup - Popup)

5. The survey of current practices presented in Appendix B shows that 20 of 25 survey companies disclosed, in the significant accounting policies note, the accounting treatment of the AFUDC. Of these, 16 companies provided additional information on construction work in progress and four provided additional information on the AFUDC in other notes to the financial statements.

58 (Popup - Popup)

6. The survey of current practices showed that none of the survey companies reported disallowances.

59 (Popup - Popup)

7. SFAS 143 is effective for fiscal years commencing after June 15, 2002, although earlier application is encouraged.

60 (Popup - Popup)

8. The survey of current practices presented in Appendix B shows that 15 of 25 survey companies provided information on site restoration and future removal costs in the significant accounting policies note to the financial statements. Seven companies provided additional disclosures on environmental costs in other notes.

61 (Popup - Popup)

9. In practice, losses on disposal are applied to accumulated depreciation unless they are considered extraordinary.

62 (Popup - Popup)

10. The survey of current practices presented in Appendix B shows that 19 of 25 survey companies provided information regarding the treatment of gains or losses on disposal of fixed / capital assets in the significant accounting policies note to the financial statements. Two companies provided additional disclosures on write-offs and three companies provided additional disclosures on decommissioning of capital assets.

63 (Popup - Popup)

11. Since 1992, *Accounting For Income Taxes*, SFAS 109, has required the use of the future income tax asset / liability approach in dealing with interperiod income tax allocation.

64 (Popup - Popup)

12. The survey of current practices presented in Appendix B shows that 18 of 25 survey companies disclosed information on income taxes in the significant accounting policies note to the financial statements (some were exempt from paying income taxes). Twenty-two companies provided additional information disclosures in other notes to the financial statements.

65 (Popup - Popup)

13. According to the survey of current practices presented in Appendix B, 21 of 25 survey companies provided information on pensions and 19 companies provided information on other postemployment benefits in the signification accounting policies note to the financial statements. As well, 24 companies disclosed additional information in other notes to the financial statements.

66 (Popup - Popup)

14. Prior to the new standard being approved in July 2001, exchange gains or losses related to a foreign currency monetary item with a fixed or ascertainable life extending beyond the end of the following fiscal year were required to be deferred and amortized over the remaining life of the monetary item.

67 (Popup - Popup)

15. This new standard is effective for years commencing on or after January 1, 2002, with earlier

adoption permitted in certain circumstances.

68 (Popup - Popup)

16. The survey of current practices presented in Appendix B shows that five if the 25 survey companies disclosed information in the notes to the financial statements about accounting changes such as future income taxes and employee future benefits.

69 (Popup - Popup)

17. This assumes that the enterprise is required to amortize the difference for regulatory purposes and, if it were not regulated, it would have to recognize the difference in the period that the debt was extinguished.

70 (Popup - Popup)

18. Nonetheless, many telecommunications companies have ceased to apply accounting for the economic impact of rate regulation for external reporting. The notes to the general purpose financial statements of such companies disclose that they are still subject to rate regulation and are required to maintain regulatory records.

71 (Popup - Popup)

1. Refer to *CICA Handbook – Accounting*, paragraph 1000.02.

72 (Popup - Popup)

2. Two 1991 CICA publications, *Information to be Included in the Annual Report to Shareholders* (Chapters 2 and 3) and Interim Financial Reporting: A Continuous Process (Chapter 2) discuss the objectives of financial reporting, assess the uses of annual and interim reports and identify users and their information needs.

73 (Popup - Popup)

3. While equity of a profit oriented enterprise in total is a residual, it includes specific categories of items, for example, types of share capital, contributed surplus and retained earnings.

74 (Popup - Popup)

4. Revenues of entities normally arise from the sale of goods, the rendering of services or the use by others of entity resources yielding rent, interest, royalties or dividends.

75 (Popup - Popup)

Canadian Accounting and Assurance Reference Service (CAARS)

5. *CICA Handbook – Accounting* (paragraphs 1000.50 and 1000.51) state that expenses that are not linked with specific revenues are related to a period on the basis of transactions or events occurring in that period or by allocation. Expenses that are linked to revenue generating activities in a cause and effect relationship are normally matched with the revenue in the accounting period in which the revenue is recognized.

76 (Popup - Popup)

6. With regard to the "benefit versus cost" constraint, the benefits expected to arise from providing information in financial statements should exceed the cost of doing so. This constraint is also a consideration in the preparation of financial statements in accordance with GAAP (for example, in considering disclosure of information beyond that required by the standards). The benefits and costs may accrue to different parties and, therefore, the evaluation of the nature and amount of benefits and costs is substantially a judgmental process.

77 (Popup - Popup)

7. Materiality is the term used to describe the significance of financial statement information to decision makers. An item of information, or an aggregate of items, is material if it is probable that its omission or misstatement would influence or change a decision. Materiality is a matter of professional judgment in the particular circumstances.

78 (Popup - Popup)

1. All rates are, however, subject to approval by Cabinet.

79 (Popup - Popup)

1. Businesses engaged in the production and distribution of electricity, the distribution of natural gas, the distribution of water, telecommunications (particularly telephone service), and pipelines (gas, oil and commodities) are generally considered public utilities. In earlier times, railways, grain elevators, ferries and privately owned bridges were also considered public utilities. In the future, highways may be considered public utilities, especially if governments are contractually obligated to take ownership after an elapsed period of time under private ownership.

80 (Popup - Popup)

2. Statistics Canada compiles data on the supply and disposition of electric energy by approximately 200 producers in Canada. It publishes reports on those statistics in addition to the financial and operating statistics of the major electric utilities.

81 (Popup - Popup)

Canadian Accounting and Assurance Reference Service (CAARS)

1. The terms and definitions used in this Glossary were drawn primarily from *Basics of Canadian Rate Regulation*, John Browne and Charles Perron (Toronto, Deloitte & Touche, 1997), and *Introduction to Public Utility Accounting* (Washington, DC, American Gas Association / Edison Electric Institute, 1992).

Public Accounts Technical Briefing 2016-17_Aug 30_430pm.ppt.pdf

---

Hi Kim -- as discussed earlier today, attached is a draft of a briefing deck on Public Accounts should a decision be made to go ahead with one. Could you please review the IESO content ASAP and get back to me with any edits (EOD tomorrow)? I will let you know when I hear of a final decision one way or the other. Please do not circulate any further at this point given the go/no go decision has not been made.

Thanks,

Cindy

Public Accounts Technical Briefing 2016-17_Aug.pdf

2016-17 Public Accounts

Technical Briefing

September 7, 2017

Purpose of today's briefing

1. Provide an overview of the results for fiscal 2016-17
2. Provide an overview of the issues on which the Auditor General has qualified her opinion as well as the Province's professional staff's interpretation of Public Sector Accounting Standards on these issues.
    a. Pension accounting
    b. Change in accounting for the market accounts of Independent Electricity System Operator (IESO)
3. Provide an overview of the issues raised by the Auditor General in the Other Matters section of her opinion as well as the Province's professional staff's view on these issues.

Ontario

Preparation of the Financial Statements

- The consolidated financial statements are prepared by the Government of Ontario in accordance with the accounting principles for governments recommended by the Public Sector Accounting Board (PSAB).
- PSAB independently establishes accounting standards for the public sector in Canada.
- The objective of PSAB standards is to meet the needs of users of financial statements by providing the information needed for accountability and decision making.
- PSAB standards specify how transactions and other events are to be recognized, measured, presented and disclosed in a public sector entity's financial statements.
- PSAB recognizes that their standards cannot address every potential situation, and that it may be necessary to refer to other sources of guidance.

Summary 2016-17 Results

2016-17 Actual Results					
$ Billions	**2016-17 Budget[1]**	**2016-17 Actual**	**2015-16 Actual[2]**	**Change from Budget**	**% Change**
Revenues	138.5	**140.7**	136.1	2.2	1.6%
Expenses	141.8	**141.7**	139.7	0.1	-0.1%
Reserve	1.0	**-**	-	(1.0)	
Annual Deficit	(4.3)	**(1.0)**	(3.5)	3.3	-76.7%
Net Debt		**(301.6)**	(295.4)		
Accumulated Deficit		**(193.5)**	(192.0)		

[1] 2016-17 Budget has been restated for BPS line-by-line reporting (no change to deficit)
[2] 2015-16 Actual has been restated to reverse the impact of regulated accounting for pensions

Ontario

Accounting for Jointly Sponsored Pension Plans

- Ontario Public Service Employee's Union Pension Plan (OPSEUPP) and Ontario Teachers' Pension Plan (OTPP) are jointly sponsored pension plans (JSPPs) where the Government of Ontario is a co-sponsor.
- The plans are funded on a 50/50 basis, co-managed by the sponsors, and decisions regarding benefits and contributions require negotiation and agreement between them.
- Since 2001-02, the Province's share of pension assets reflected on the audited consolidated financial statements of the Province has been based on a policy considered to be appropriate and consistent with PSAB standards related to accounting for retirement benefits, which have not changed since their inception in 2001.
- Under PSAB standards, an asset arises when the government's total contributions to a plan, including interest earned thereon, are greater than the pension expense recognized since the start of the plan.

Auditor General's Qualification on Pension Accounting

- The Auditor General qualified her opinion on the 2016-17 consolidated financial statements regarding the Province's accounting for the net pension assets of OTPP and OPSEUPP.
- The Auditor General's position is that a full valuation allowance should have been recorded in 2016-17 (and prior years) to reduce the net pension assets of OTPP and OPSEUPP to NIL.
- The Auditor General states that the Government does not have the unilateral right to use this asset because its ability to reduce future minimum contributions or withdraw any pension plan surplus is subject to agreement with the respective pension plan's joint sponsors.
- The Auditor General notes that Canadian Public Sector Accounting Standards require the Government to record a valuation allowance against this asset.

CONFIDENTIAL - For Internal
Discussion Purposes Only

Impact of Auditor General's Qualification on Pension Accounting

($ Millions)	Province's Interpretation of PSAB standards	Impact of Auditor General Interpretation	Auditor General's Interpretation
Consolidated Statement of Operations			
Total Expenses	141,725	1,444	143,169
Annual Deficit	(991)	(1,444)	(2,435)
Consolidated Statement of Financial Position			
Net Pension Asset / (Liability)	11,033	(12,429)	(1,396)
Total Debt	333,102	0	333,102
Net Debt	(301,648)	(12,429)	(314,077)
Accumulated Deficit	(193,510)	(12,429)	(205,939)

CONFIDENTIAL - For Internal Discussion Purposes Only

Province's Position – Pension Accounting

- Based on professional staff's interpretation of PSAB standards, the government believes that pension assets for OPSEUPP and OTPP should be reported in order to fairly present the Province's financial position.
- The professional staff does not agree with the Auditor General's interpretation of PSAB standards that the Province must have a unilateral right to reduce contributions in order to record an asset.
- The Province has shared control over the pension plan and the existing agreements in place between the sponsors support the recognition of the pension asset.
- The professional staff does not believe that the Government has the right to withdraw any surplus from the plan, and has supported the value of the pension asset by assuming this right.
- The Province has recorded the pension assets for OTPP and OPSEUPP in its 2016-17 consolidated financial statements and has restated the 2015-16 consolidated financial statements to recognize the pension assets.

CONFIDENTIAL - For Internal Discussion Purposes Only

Province's Position – Pension Accounting

- The professional staff's interpretation of PSAB standards is supported by its own research and analysis as well as:
  - The report of the Pension Asset Expert Advisory Panel (https://www.ontario.ca/page/pension-asset-expert-advisory-panel-report) released on February 13, 2017 stating that the Government should record an asset for its share of the surplus reported in the accounting valuations for each plan and that no valuation allowance is required.
  - An opinion from Deloitte LLP on OTPP, a summary of which is included in Appendix A, supporting the ability to recognize a pension asset in the absence of having a unilateral right to reduce contributions to the plan.
  - Analysis completed by Ernst & Young LLP as to whether any valuation allowance is required to be recorded for OTPP or OPSEUPP as of March 31, 2017. Ernst & Young LLP confirmed no valuation allowance was required for either plan.

- On June 12, 2017, the co-sponsors of OTPP (Ontario Teachers Federation and the Government) announced a 1.1% reduction in contributions effective January 1, 2018

CONFIDENTIAL - For Internal Discussion Purposes Only

Independent Electricity System Operator and Market Accounts

- Independent Electricity System Operator (IESO) is a not-for-profit, non-taxable corporation established pursuant to Part II of the *Electricity Act, 1998*.
- IESO prepares its financial statements in accordance with PSAB standards.
- IESO's financial statements are audited by KPMG LLP, who issued an unqualified opinion on the December 31, 2016 financial statements.
- One of IESO's roles is to settle the market accounts, which are the amounts due to the entities who provide electricity to the market (e.g. power generators) and due from those who consume electricity (e.g. local distribution companies on behalf of their consumers).
- In 2016, IESO changed the accounting for the market accounts, recognizing the amounts to be settled as assets and liabilities, equal in amount. In prior years, these amounts were not reflected in the financial statements of IESO.
- IESO made the change to better reflect the amounts due to and from the market participants.

CONFIDENTIAL - For Internal Discussion Purposes Only

Independent Electricity System Operator and Market Accounts

- Additional background on IESO:
  - On January 1, 2015, IESO was amalgamated with Ontario Power Authority (OPA) and continued as IESO.
  - Prior to the amalgamation, OPA prepared its financial statements in accordance with PSAB standards.
  - OPA's last financial statements prior to amalgamation were audited by KPMG LLP, who issued an unqualified opinion on the December 31, 2014 financial statements.
  - OPA's audited financial statements included a segment of the market accounts. The inclusion of a segment of the market accounts was not raised as an issue by the Auditor General in her report to management or in her Annual Report.
  - OPA's audited financial statements also referred to the use of rate-regulated accounting. The use of rate-regulated accounting was not raised as an issued by the Auditor General in her report to management or in her Annual Report.

CONFIDENTIAL - For Internal
Discussion Purposes Only

Auditor General's Qualification on IESO Market Accounts

- The Auditor General qualified her opinion on the 2016-17 consolidated financial statements regarding the change in Independent Electricity System Operator's accounting for the "market accounts".
- The "market accounts" are amounts owed to entities that generate electricity (e.g. power generators) and amounts due from entities that consume electricity (e.g. local distribution companies on behalf of their consumers).
- The Auditor General's position is that the market accounts are not assets and liabilities of the Province.
- The Auditor General notes that the Government has no access or discretion to use the market account assets for their own benefit, nor does the Government have an obligation to settle the market account liabilities in the event of default by market participants.

CONFIDENTIAL - For Internal
Discussion Purposes Only

Impact of Auditor General's Qualification on IESO's Market Accounts

($ Millions)	Province's interpretation of PSAB standards	Auditor General Adjustment	Auditor General's Interpretation
Consolidated Statement of Operations			
Annual Deficit	(991)	0	(991)
Consolidated Statement of Financial Position			
Total Financial Assets	93,782	(1,652)	92,130
Total Liabilities	395,430	(1,652)	393,778
Total Debt	327,413	0	327,413
Net Debt	(301,648)	0	(301,648)
Accumulated Deficit	(193,510)	0	(193,510)

CONFIDENTIAL - For Internal Discussion Purposes Only

Province's Position – Market Accounts

- Based on professional staff's interpretation of PSAB standards, the government believes that reporting the IESO's market accounts in the consolidated financial statements of Province is more transparent accounting.
- The IESO is a party to the contracts with each market participant, and each market participant either owes an amount to the IESO or is owed an amount from the IESO.
- The amounts due from the market participants meet the definition of an asset and the amounts due to the market participants meet the definition of a liability under PSAB standards.
- The IESO reviewed the accounting for eight other independent system operators in North America, and all but one recognize market accounts in the financial statements.
- IESO management, their Audit Committee, their Board of Directors, their external auditor and the Office of the Provincial Controller support the change in accounting.

CONFIDENTIAL - For Internal
Discussion Purposes Only

Auditor General Opinion – Other Matters

- In the Other Matters section of the Auditor General's Opinion, the Auditor General notes:
  - IESO adopted rate-regulated accounting during the year,
  - Rate-regulated accounting is not permitted by Canadian public sector accounting standards,
  - The opinion is not modified for the use of rate-regulated accounting in 2016-17 because the adoption of rate-regulated accounting did not have a material impact on the financial statements,
  - The Ontario Fair Hydro Plan Act, 2017 and its related regulations legislate accounting, which is not in accordance with Canadian public sector accounting standards, and which may cause the financial statements to be materially misstated in the future, and
  - The Financial Statement Discussion and Analysis does not discuss pension accounting and market accounts using her interpretation of PSAB standards on these matters.

CONFIDENTIAL - For Internal
Discussion Purposes Only

Province's use of Rate-Regulated Accounting

- The use of rate-regulated accounting by organizations controlled and included in the financial statements of the Province is not new
- Ontario Power Generation, Hydro One and Hydro One Brampton Hydro Networks Inc. all apply rate-regulated accounting in preparing their financial statements
  - These entities are included in the province's financial statements based on International Financial Reporting Standards
  - The results of these entities are included with those of the Province on a one-line basis
- Prior to its amalgamation with IESO in 2015, the Ontario Power Authority also referenced the use of rate-regulated accounting in its financial statements
  - Ontario Power Authority prepared its financial statements in accordance with Public Sector Accounting Standards
  - Ontario Power Authority was fully consolidated with the statements of the Province

CONFIDENTIAL - For Internal Discussion Purposes Only

Rate-Regulated Accounting Basics

- If the rates an entity is able to charge to its customers are set by another party (i.e. a regulator), provided specified criteria are met, rate-regulated accounting permits the entity to defer costs that would otherwise be expensed to the period that the related revenue is charged to customers
- Typical example:
  - A storm causes unexpected maintenance expenses of $100 million
  - The regulator (e.g. Ontario Energy Board) permits the utility to recover these costs from consumers through increased rates over five years as opposed to the year the costs are incurred by the utility
  - The utility has a rate-regulated asset of $100 million when the costs are incurred and expenses these amounts over five years (for example, $20 million per year)
  - In the absence of rate-regulated accounting, the full $100 million would be recorded as an expense in the year incurred

CONFIDENTIAL - For Internal
Discussion Purposes Only

Rate-Regulated Accounting -- IESO

- IESO's adoption of rate-regulated accounting resulted in recognition of rate regulated assets for:
  - Unrecovered smart metering expenses -- $21.6 million
  - Unrecovered PSAB transition items related to pension and post employment benefits -- $43.4 million
- Smart metering – IESO incurred operating and capital costs related to its role as the Smart Metering Entity, which it recovers through fees from users of smart meters in Ontario, with the fees set by the Ontario Energy Board (OEB)
- Pension and post-employment benefits – IESO accounts for its pension and post-employment benefits on an accrual basis, but the OEB only permits the entity to recover for these expenses on a cash basis

CONFIDENTIAL - For Internal
Discussion Purposes Only

Rate-Regulated Accounting and Public Sector Accounting Standards

- Public Sector Accounting Standards (PSAS) are silent on the use of rate-regulated accounting
- PSAS acknowledges that it does not provide guidance on all possible transitions and notes that it is necessary to refer to other sources of guidance:
  - *No rule of general application can be phrased to suit all circumstances or combinations of circumstances that may arise. As a result, matters may arise that are not specifically addressed in the primary sources of GAAP. It is necessary to refer to other sources when the primary sources do not deal with the accounting and reporting in financial statements of transactions or events that a public sector reporting entity encounters, or when additional guidance is needed to apply a primary source to specific circumstances.*
- The following accounting frameworks provide for the use of rate-regulated accounting:
  - International Financial Reporting Standards
  - Financial Accounting Standards Board
  - Government Accounting Standards Board
  - Accounting Standards for Private Enterprises
- IESO management, IESO's Audit Committee, IESO's Board of Directors, IESO's external auditor, and the Office of the Provincial Controller all support the use of rate-regulated accounting by IESO

CONFIDENTIAL - For Internal Discussion Purposes Only

Fair Hydro Plan Legislation and Related Regulations

- Ontario Fair Hydro Plan Act, 2017 (the "Act") and its related regulations establish a framework under which costs and benefits associated with Ontario's clean energy initiative are to be allocated among present and future consumers of electricity
- The Act and its related regulations enable a current reduction in electricity rates for certain classes of customers and the framework for the current reductions to be repaid in the future
- The Act and its related regulations do not prescribe the accounting to be followed
- The Province prepares its financial statements in accordance with Public Sector Accounting Standards and the transactions resulting from the enactment of the Act and its related regulations will be reported in accordance with Public Sector Accounting Standards

CONFIDENTIAL - For Internal Discussion Purposes Only

Appendix A – Deloitte summary of accounting opinion issued re: pension accounting

Deloitte was engaged to provide a report ("Deloitte Report") on the application of accounting standards by the Ontario Treasury Board Secretariat. Our report, which was issued on October 2, 2016, was prepared under professional standards for such reports set out by CPA Canada.

The subject of this report was the application of Public Sector Accounting Standards (PSAS), as established by CPA Canada, in the recognition of a pension asset in the Province of Ontario's financial statements. Pension accounting is subject to professional judgement and interpretation, and involves significant accounting estimates. The Deloitte Report focused on a specific aspect of this complex area as it relates to the Province of Ontario's accounting for the Ontario Teachers' Pension Plan (OTPP).

OTPP is a pension plan that is jointly sponsored by the Ontario government (or the Province) and the Ontario Teachers' Federation (OTF). Based on the Province's application of PSAS, OTPP is in a plan surplus position. We accepted this aspect of the Province's application of PSAS as a matter of fact in developing our report.

The Deloitte Report addressed the question of whether it was possible to record a pension asset related to the plan surplus in the Province's financial statements, given that the plan is jointly sponsored. We concluded that, based on the information provided to us by the Province and our professional judgement, that it was permissible under PSAS to record a pension plan asset, even though the Province's ability to benefit from any plan surplus, through future contribution reductions for example, would need to be negotiated with and agreed between the Province and OTF.

It is to be noted that even if a pension asset is recorded, PSAS would also require that consideration should be given to limiting the recorded amount of this pension asset to an amount that would be less than the calculated amount of the pension surplus. The Deloitte Report did not express a view on whether any limit to the recorded amount of the asset is needed in the case of the Province's accounting for the pension asset related to OTPP. Therefore, our report did not express a view on the amount of the pension asset that should be recorded in the Province's financial statements as at March 31, 2016 or at any other date.

Hi Kim

Please see attached for updated IESO slides for tomorrow. Based on the meeting earlier, we've reduced into 2 slides + speaking points.

Happy to take have proposed edits for either the slides or the speaking points.

Pw to follow

Thanks,

Sarah

Public Accounts Technical Briefing 201617_v8_.pdf

Accounting for Independent Electricity System Operator (IESO) Market Accounts

- Independent Electricity System Operator (IESO) is a corporation established pursuant to Part II of the *Electricity Act, 1998*, and prepares its financial statements in accordance with PSAB standards.
- KPMG LLP audits IESO's financial statements and issued an unqualified opinion on the December 31, 2016 financial statements.
- IESO administers a $17 billion annual market reflecting the amounts *due to* entities that provide electricity to the market (e.g. power generators) and *due from* entities who consume electricity (e.g. local distribution companies on behalf of their consumers). IESO is a party to these agreements with the market participants.
- In 2016, IESO changed the accounting for the market accounts, recognizing these amounts due from and due to the market participants as assets and liabilities respectively.
- This change has no impact to the province's annual deficit, net debt or accumulated deficit.
- The Ontario Power Authority (which was merged with the IESO on January 1, 2015) included similar accounts in its financial statements, and received an unqualified opinion by its external auditor, KPMG LLP. The financial statements of the Province were not qualified by the Office of the Auditor General as a result of including these accounts.

CONFIDENTIAL - For Internal
Discussion Purposes Only

Accounting for IESO Market Accounts

- The IESO is a party to agreements with each market participant, and each market participant either owes an amount to the IESO or is owed an amount from the IESO. For example:
  - Ontario Power Generation has a receivable from IESO recorded on its financial statements related to power generated, and historically, IESO did not have a payable recorded to Ontario Power Generation – now it does
  - Hydro One has a payable to IESO recorded on its financial statements related to power purchases, and historically, IESO did not have a receivable recorded from Hydro One – now it does
- The amounts due from market participants meet the definition of an asset and the amounts due to market participants meet the definition of a liability under PSAB standards.
- In connection with this change, the accounting for eight other independent system operators in North America were reviewed, and all but one recognize market accounts in the financial statements.
- IESO management, their Audit Committee, their Board of Directors, their external auditor and the Office of the Provincial Controller support the change in accounting as being more transparent.
- A qualified opinion was issued by the Office of the Auditor General on the 2016-17 consolidated financial statements regarding the change in Independent Electricity System Operator's accounting for the "market accounts".

Subject: Quick Question
Date: August 9, 2017 11:27:00 AM

Hi Kim and Susan – do you have a summary of the interactions with the AG on the FHP – specifically, I'm looking for the date the cabinet submission from March 1 was provided to the AG.

Thanks,

Cindy

5.0 Acquisition. If the Recipient acquires goods, services, or both with or by applying the proceeds

of the Funds, it is expected to do so through a process that promotes the best value for money

and to take reasonable steps to ensure that its Administrative Services Agents and

Implementation Agents also follow a process that promotes the best value for money when

acquiring goods and services with or by applying the proceeds of the Funds. In this regard, it is

expected that the Recipient will have regard the following procurement principles:

(a) ***Accountability*** - Procurement is conducted in a manner that is well-informed and

reflects rules of good governance

and decision-making.

(b) ***Geographic Neutrality and Reciprocal Non-Discrimination***Procurement

should not differentiate between competing goods, services, or suppliers based on their

geographic origin or location.

(c) ***Responsible Management*** - Procurement of goods and services should

be responsibly, efficiently and effectively managed and should observe the highest standard of ethics, avoiding conflict of

interest.

(d) ***Value for Money*** - Procurement processes should apply a value for money evaluation that

takes into account price as well as other costs and benefits, including life cycle costs and

relevant non-price attributes such as quality.

(e) ***Vendor Access, Transparency, and Fairness*** - Procurement is conducted in a fair and

transparent manner, offering all qualified suppliers equal treatment and open access to

compete for the opportunity to supply goods and services.

Michel,

I had thought that the language has change to reflect expectations, but just noticed these terms being used in the delegations annex. I think I have to flag to Stephen?

1. Under section 4.2(g) of the Declaration, the Trustee has the power to: (a) appoint, employ or retain Implementation Agents for the purpose of discharging its duties and obligations under the Declaration; and (b) enter into, perform, enforce and amend Implementation Agreements.

2. In accordance with section 4.2(g) of the Declaration, consistent with the principles set forth in the Principles Annex, the Trustee or its agent will seek to enter into one or more Implementation Agreements with individual Electricity Distributors under which the Electricity Distributors will act as Implementation Agents to the Trustee. In this manner, the Trustee will delegate certain of its powers and duties to the Electricity Distributors.

Here is what I am running by opg – any thoughts on approach before I do that? Need more detail on opg accounting or leave for another discussion ? Thx

Would it be the IESO or would it be OPG that would ultimately go to the Ontario Energy Board to recover these costs?

As per the legislation, OPG provides the clean energy adjustment recoverable for a specific period to the OEB who establishes the rate for specified consumers.

If it is the IESO, my understanding is the OFHPA creates the deferral and variance account that enables the IESO to recover costs from future rates. If it is OPG, would they already have a deferral and variance account to house these costs until it is recovered? Or does the legislation apply to OPG as well?

Parts of the legislation do apply to OPG. The IESO has the original right to recover from future rates. This creates the regulatory asset, like the fair hydro predecessor – RPP or . The IESO right to recover and any obligations will be transferred to the financing entity. While the financing entity is better able to speak to their accounting than I am, my understanding is they will have a variance account which will be consolidated into OPG and then the provincial books.

Finally, when it comes time to recover those costs, would it go through the OEB prudence review or is that not necessary as a result of the OFHPA legislation?

The OFHPA legislation covers the OEB oversight. Note – can we be more specific here?

---

Hi Kim.

The attached internal (OPA) memo is somewhat dated, but reflects the relevance of RRA to the entity's books prior to the merger. From my perspective, the memo reflects some important messages that could be useful references in relation to the IESO's activities and accounting choices that best reflect the substance of the entity's activities and meet user needs.

Re: Accounting Treatment for OPA Charges, Other Financial Assets and Other Financial Liabilities

---

1. **Charges – Overview**

"Charges" are amounts incurred by the OPA to recover amounts paid or payable by the OPA to another person with respect to electricity.

The OPA has a legislated responsibility to record the transactions flowing through the global adjustment mechanism. The global adjustment and settlement accounts have been created for this purpose. The global adjustment and settlement accounts record charges that flow between the OPA and the IESO. The account flows include the amounts paid and received for: Demand Response 2 (DR2), Demand Response 3 (DR3), non-utility generation (NUG), regulated nuclear generation balancing amount (nuclear) and regulated hydro electric generation balancing amount (hydro). These accounts are settled simultaneously by the IESO. The account also records the amounts paid and received for OPA contracts (standard offer, generation and conservation/demand management, Feed-In Tariff and hydroelectric contract initiatives) which the OPA settles on a monthly basis with the IESO.

The DR3, NUG, nuclear, hydro, and OPA contract balances are offset in the global adjustment account eliminating the need for a flow of funds between the IESO and the OPA. The OPA records the effect of the transactions to meet its legislated responsibility. The OPA's generation contracts are estimated each month and settled on the actual amount owing in the following month. This gives rise to timing differences. The settlement dates can cross calendar months, creating a monthly balance in the account. Differences created from timing or settlement dates are reclassified into accounts receivable at month end.

The OPA is entitled under legislation to recover eligible charge amounts, as per section 25.2 (3) of the Electricity Act:
(3) For greater certainty, the OPA may, subject to the regulations, establish and impose charges to recover from consumers its costs and payments under procurement contracts.

1.1 Accounting Treatment for OPA Contract and Conservation Charges

Charges are currently recorded as accounts receivable from the IESO in the OPA's financial statements, as they represent current assets that are recoverable within 1 year. Specifically, charges represent financial assets, as per **PS.S.1000.40** below and are only recorded as receivable once they have been incurred by the OPA. Under legislation, the OPA has a contractual right to receive cash from another party (in this case the IESO via the Global

Adjustment Mechanism) with respect to amounts incurred for eligible charge amounts. This concept is consistent with criteria (c) of the definition below:

*.**40*** *A financial asset is any asset that is:*

(a) cash;
(b) a realizable asset that is convertible to cash;
(c) a contractual right to receive cash or another financial asset from another party;
(d) a contractual right to exchange financial instruments with another party under conditions that are potentially favourable to the government;
(e) an equity instrument of another entity;
(f) an investment in a government business enterprise or government business partnership;
(g) a financial claim on an outside organization or individual; or
(h) an inventory or item for sale that meets the criteria in FINANCIAL STATEMENT PRESENTATION, paragraph **Error! Hyperlink reference not valid.***. [Former paragraph* **Error! Hyperlink reference not valid.** *retained in Archived Pronouncements]*

Amounts Payable

Amounts payable arise for OPA contract charges when the value of HOEP exceeds the value of the suppliers' contract price. In this case, the charges would become an OPA liability to the market in the form of charges payable to the IESO (which, in turn, must be returned to the market via the Global Adjustment). Such charges payable to the market meet the criteria for recognition as a liability, as outlined below:

PS.3200.03

Liabilities should be recognized in the financial statements when:

(a) there is an appropriate basis of measurement; and

(b) a reasonable estimate can be made of the amount involved. [SEPT. 2004]

---

2. Other financial assets and liabilities

Other financial assets and liabilities are made up of retailer settlement amounts, government procurements and regulated price plan variance amounts.

2.1 Other Financial Assets - Retailer Settlements and Government Procurements - Overview

Legislative provisions ensure that electricity retailers are made whole by the OPA for contracts with low-volume and designated consumers that were entered into before prices were frozen by legislation effective November 11, 2002. The OPA and retailers settling any differences between the HOEP and the contract price for each contract meet these provisions. When HOEP is greater than the contract price, the OPA receives payments from the retailers and records a financial liability. When HOEP is less than the contract price, the OPA pays the retailer and records a financial asset. The OPA tracks these variances in the retailer contract settlement deferral accounts. The retailer contract discount settlement account captures the funds related to the retailer incentives existing at the creation of the RPP. The retailer incentives captured are

held in a separate deferral account for settlement concurrent with the retailer settlement deferral accounts.

The OPA began amortizing these costs over the period of 2009-2011 to reflect the recovery of these amounts through its annual usage rate approved by the OEB. As at December 31, 2011, the balances of the retailer settlements are nil and have been recovered in full.

The OPA reimburses the government for costs incurred for electricity procurement and records the costs as a financial asset. Any subsequent balances are included in future revenue requirement submissions. The OPA began amortizing the government procurement costs in 2009 on a straight-line basis, and as at December 31, 2011, the balance to recover for these costs is nil.

2.2 Accounting Treatment – Retailer Settlements and Government Procurements

Under PSAS, retailer settlements and government procurements are treated as other financial assets in the OPA's financial statements. As they are normally not recovered within one year, they are categorized as non-current assets. As per **PS.S.1000**, retailer settlement and government procurement balances qualify as financial assets as per criteria (c) below:

> ***.40*** *A financial asset is any asset that is:*
>
> *(i) cash;*
> *(j) a realizable asset that is convertible to cash;*
> *(k) a contractual right to receive cash or another financial asset from another party;*
> *(l) a contractual right to exchange financial instruments with another party under conditions that are potentially favourable to the government;*
> *(m) an equity instrument of another entity;*
> *(n) an investment in a government business enterprise or government business partnership;*
> *(o) a financial claim on an outside organization or individual; or*
> *(p) an inventory or item for sale that meets the criteria in FINANCIAL STATEMENT PRESENTATION, paragraph* **Error! Hyperlink reference not valid.***. [Former paragraph* **Error! Hyperlink reference not valid.** *retained in Archived Pronouncements]*

The OPA is required to carry the balance related to retailer settlement variances between the HOEP and contract price, as per legislation. The OPA is also entitled to recover these balances through legislative provisions, which represent a contractual right to receive cash or another financial asset from another party, as per criteria (c) above. Where retailer settlements fall into a liability balance, they would be categorized as other financial liabilities, as they would meet the criteria for recognition of a liability, as outlined in section 3.1 below.

3. Other Financial Liabilities – Regulated Price Plan (RPP) Variance - Overview

While prices for RPP consumers are set every six months by the OEB based upon a forecast of the cost of power over the next year, it is likely that there will be a difference between the actual and forecast cost of supplying electricity to all RPP consumers. When the hourly Ontario

energy price (HOEP) is greater than the RPP, the OPA pays the excess amount and records a financial asset as the electricity market funds paid are receivable from the market. When the HOEP is less than the RPP, the OPA receives the difference and records a financial liability as the funds received will be returned to the market. The OPA tracks this variance in the RPP variance account.

3.1 Accounting Treatment – RPP

RPP variance amounts are recorded by the OPA as other financial liabilities in the financial statements, as they meet the liability criteria outlined below:

PS. S.1000

.45 *Liabilities have three essential characteristics:*

(a) they embody a duty or responsibility to others, leaving a government little or no discretion to avoid settlement of the obligation;

(b) the duty or responsibility to others entails settlement by future transfer or use of assets, provision of goods or services, or other form of economic settlement at a specified or determinable date, on occurrence of a specified event, or on demand; and

(c) the transactions or events obligating the government have already occurred.

Under legislation, the OPA is required to fund RPP variances where the HOEP is less than the RPP, which implies a duty or responsibility that the OPA has little to no discretion to avoid, as per criteria (a). For instances where the HOEP exceeds the RPP rate, the OPA would record a financial asset, as this circumstance would meet the criterion of **PS.S.1000.40** (financial asset), outlined in section 2.2 above.

External Auditor Approval of Accounting Treatment

The accounting treatment of OPA charges, retailer settlement, government procurement and RPP balances has been consistent since the OPA's inception and is approved by the OPA's external auditors on an annual basis. Based on governing legislation, the external auditors agree that these balances represent true assets and liabilities to the OPA. The signed auditors' report, along with the OPA's audited annual financial statements, can be found on the OPA website in the MD&A section of the OPA annual report.

Ian,

I have included below an email from the KPMG Manager on the OPA account. Note that she has confirmed that what the OPA had titled as 'regulatory' assets and liabilities are assets and liabilities per handbook definitions.

Hi Bonny,

Confirmed with Kevin – the answer is yes. They represent assets/liabilities under reporting framework that OPA currently reports under and that they will transition to. We moved away from the category of regulatory assets/liabilities last year so as to not confuse with similar titled assets in other entities where the circumstances may differ.

Regards,

Sandra

Terry

Nadine gave me the answer about your auditor being Ok with Rate regulated Assets and liabilities but we wanted to determine under what basis. Are they calling these an intangible under NFP accounting or something else?

When we consolidate NFP government organizations we eliminate intangibles because

PSAB pure (without the 4400 section) doesn't allow them currently

Thanks in advance for the info

OPCD Accounting Paper GA Refinancing V1 May 16.pdf

GA Refinancing

OPCD Accounting Paper DRAFT Outline:

Purpose:

The purpose of this document is to summarize the preliminary views of the Office of the Provincial Controller in accounting for the Global Adjustment Deferral Account on the Province's consolidated financial reports.

Background:

- Provincial CFS –
    - prepared on PSAS basis, focus on fair and transparent reporting of the economic substance of government's activities and financial position.
    - RRA represent economic inflows and outflows (Appendix: 'what is RRA – recognized under different GAAPS, reference to CICA Research Project, IASB Project – no requirement for Independence of Regulator, different types of RRA – leg and those subject to prudence).
    - Application of GAAP Hierarchy where accounting standards do not specifically address a type of transaction
    - PSAS conceptual framework under review; accounting standards subject to change; analysis based on current accounting standards and currently available information.
    - PSAS definition of Asset

- Key entities:
    - Ministry of Energy – establishes legislation, provide provincial guarantee, etc.
    - IESO – Nature of IESO, types of RRA
    - OPG- Nature of OPG, types of RRA (O.Reg 53/05 legislated assets as well as assets subject to prudence review)
    - OEB - The OEB has broad jurisdiction as the administrative tribunal responsible for regulating the electricity industry in Ontario. It has jurisdiction to set payment amounts for regulated entities which has been conveyed by the legislature under which the OEB authorizes the establishment of accounts as well as the power to dispose of the amounts recorded in such accounts. (Again, confirm that Independence not required under accounting standards)

- Classification of entities –
    - IESO (OGO-NFPO, not GBE but no funding received from the Province)
    - OPG
    - OEB (OGO)

- Legal opinion – consider requesting for OPG and IESO assets to reflect recoverability (to justify accounting for assets on Province's books)

- Intro to Fair Hydro Plan:

Intro to FHP:

On March 2, 2017, the Province of Ontario (the Province) announced Ontario's Fair Hydro Plan (the Plan) aimed at reducing electricity bills by 25 percent on average for all residential consumers in the province. As part of the Plan, the Province has proposed financing a portion of the Global Adjustment costs over a longer time period for Regulated Price Plan eligible customers (e.g., residential, farm, small businesses).

Why structured this way

DRAFT

- The nature of the recoverable is an asset, but to be reported as a regulatory asset, OPG would have had to have incurred the cost itself. Since the costs would not have been incurred directly by OPG, the proposed structure will allow it to record an intangible on its books through consolidation of the Trust, coincidental with the adoption of rate regulated accounting by the IESO under which it will appropriately reflect the deferred amounts, prior to sale to OPG, as regulatory assets.
- Insert support for reporting GA financing costs as a RRA by the IESO (does not have to be related to interest capitalized on a capital asset to be a RRA
- Insert commentary confirming that activities of generators do not have to be regulated in order for the IESO to recover their costs under RPP, or for any deferred portion thereof to be considered part of a RRA.

IESO

As of January 1, 2016, the IESO changed its accounting policy to recognize the economic impacts of rate regulation and now applies guidance from US GAAP Topic 980, *Regulated Operations,* as PSAS does not have any guidance for entities with rate-regulated activities.

- Specific parts of the IESO's activities which are subject to rate regulation include (smart meters, IESO's operating cost, GA costs which are recoverable through RPP, and pension related costs. **(IESO details to follow)**

IESO concluded that it met the requirements of PS2120.02, which allows them to reflect the impacts of rate regulation, as it is considered that the change of accounting policy in its 2016 financial statements resulted in a more appropriate presentation of transactions in the financial statements. The change was made to better reflect the economic substance of certain types of expenses that may not be directly recovered through the normal revenue requirement model.

The regulatory framework in Ontario relating to the generation and sale of electricity will be significantly impacted by the proposed Act. Currently, a substantial amount of the energy purchased from the generators is collected by IESO from the local distribution companies through the customer billing, with the remaining being recovered through variance accounts over a period of 12 months maximum. As mentioned above, the effect of the proposed Act is to defer the collection of a total estimated amount of $28 billion (plus interest) of energy purchased from the generators over a period of 30 years.

The proposed Act will not permit IESO to collect the funding shortfall before May 1, 2021 and the recovery process will be established through regulations, similar therefore to those accounts of OPG's which are also rate regulated and established through regulations under O.Reg. 53/05. As such, the OEB has no discretion with respect to the continuation of these accounts and has no discretion to evaluate prudence.

The IESO has assessed that despite the long-term deferred recovery plan, the uncollected energy costs should qualify for deferral as a regulatory asset under the proposed legislation as they would continue to meet the criteria applied by IESO in regards to its financial reporting (ASC 980):

(a) It is probable that future revenue in an amount at least equal to the capitalized cost will result from inclusion of that cost in allowable costs for rate-making purposes.

(b) Based on available evidence, the future revenue will be provided to permit recovery of the previously incurred cost rather than to provide for expected levels of similar future costs. If the revenue will be provided through an automatic rate-adjustment clause, this criterion requires that the regulator's intent clearly be to permit recovery of the previously incurred cost.

Deferred recovery plans are plans adopted by regulators or legislations in response to significant increases in costs (e.g. purchased power costs). These plans typically provide for rates to remain fixed or increase moderately with a variance account mechanism to capture costs in excess of the level allowed in current rates. A regulated utility subject to such plans is required to consider whether it continues to meet the criteria that allow it to use the guidance for regulated operations of Topic 980, especially criteria ASC 980-10-15-2 (b).

The proposed plan for the recovery of purchase power costs over a 30 year period is considered a deferred recovery plan as the rates for the first four years will remain fixed and subsequently the rates will increase moderately with a variance account to capture energy costs in excess of the level allowed in current rates.

(a) The entity's rates for regulated services or products provided to its customers are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.

(b) The regulated rates are designed to recover the specific entity's costs of providing the regulated services or products.

(c) In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the entity's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs."

(d) IESO management has concluded that the IESO can recognize a regulatory asset related to the variance account created by the proposed Act.

The variance account created by the proposed Act is subject to rate regulation by the OEB and the variance account will be established with the right to collect funds against the variance amount in the future. In these circumstances, the IESO is able to establish a regulated asset. The IESO financial statements are prepared in accordance with Canadian public sector accounting standards. Although PSAB does not provide specific guidance on rate regulated accounting, it does allow for guidance to be followed from other accounting frameworks. IESO has applied guidance from United States Generally Accepted Accounting Principles (US GAAP) Topic 980, Regulated Operations in its accounting policies.

IESO management has concluded that the OPG Trust to be established would not be controlled by the IESO and therefore is not subject to consolidation by the IESO. Based on the 11 indicators of control as defined in Section PS 1300 *Government Reporting Entity*, there is no evidence of control by the IESO for the OPG Trust either collectively or individually. The IESO will not have the power to govern the Trust, nor have ongoing access to Trust's assets. The IESO will also not have any voting shares or future rights to the Trust nor the power to dissolve the Trust. Without control, the Trust is not subject to consolidation within the IESO financial statements.

Sale of the Regulatory Asset to OPG (Transfer)

(1) The IESO may from time to time, in accordance with this Act and the regulations, transfer a specified portion of the regulatory asset to a financing entity in accordance with this section.

(2) An agreement between the IESO and a financing entity in relation to the transfer of a specified portion of the regulatory asset shall provide for consideration of a payment by the financing entity to the IESO in an amount equal to the amount of the specified portion.

(3) Upon receipt by the IESO of the payment by the financing entity,

(a) the balance in the variance account shall be reduced by the amount of the payment;

(b) the regulatory asset shall be adjusted accordingly;

(c) the financing entity shall acquire a corresponding investment interest; and

(d) the IESO shall retain no further right, title or interest in the corresponding investment interest.

Although ASC 980-20-40 states that

"Derecognition Section provides guidance on determining whether and when an entity should remove an item from the financial statements. For example, the entity would derecognize an asset because it no longer has rights to the asset or it would derecognize a liability because it no longer has any obligation."

In the absence of clear guidance for the derecognition of regulatory asset under ASC 980, guidance from PSAS should be analyzed for the criteria for the derecognition of assets.

It should also be noted that PSASs provide limited guidance on derecognition of non-financial assets and liabilities. Section 3430 *Restructuring transactions,* which is applicable for fiscal years on or after April 1, 2018 with early application permitted, has guidance for the derecognition of assets and liabilities.

- Paragraph 21 states that individual assets and liabilities transferred in a restructuring transaction should be derecognized by the transferor if they no longer meet the definitions of assets and liabilities and applicable recognition criteria at the restructuring date.
- As stated in paragraph 24, when a transferor continues to be involved in the individual assets and/or liabilities it transferred to a recipient subsequent to the restructuring date, it would assess the nature and extent of its continued involvement against the definitions of assets and liabilities and applicable recognition criteria to evaluate whether derecognition of the asset and liability transferred would be appropriate and whether its continued involvement gives rise to a new asset or new liability that needs to be recognized.

Recognizing the proposed transaction is not a restructuring transaction, Section 3430, which has recently been issued by PSAB, provides current thinking in the application for the recognition and derecognition of assets and liabilities which is consistent with derecognition guidance in other aspects of GAAP. Accordingly, the analysis as to whether the regulatory asset transferred to the OPG Trust can be derecognized is based on the guidance in paragraph 21.

DRAFT

OPG

The design of the GA Financing Plan includes OPG administering the financing associated with the Plan based on OPG's participation in the market and regulatory knowledge. and the foreseen accounting for financing activities on OPG's financial statements (i.e. consolidation of the Trust). Having exercised discretion over the decision to participate in the Fair Hydro Plan, OPG will establish a Financing Entity Trust (the Trust) to finance and administer the Global Adjustment costs through a mixture of external financing and an equity injection from the Ontario Financing Authority. It is expected that OPG will control the Trust for accounting purposes and that its financial position and results will be consolidated within OPG's consolidated financial statements. For purposes of the Province's consolidated financial statements, the intangible assets reported on the books of OPG would be reflected on the CFS under PSAS through modified equity consolidation of OPG.

As the sole unit holder of the Trust, OPG will exercise discretion over all decisions over the activities of the Trust. For example, OPG is expected to have the ability to OPG will have the power to establish operating and capital budgets of the Trust, and to make decisions about the financing alternatives, duration, and the strategy to minimize financing costs, with no veto right by the Province. While the Province maybe involved in the Board of Trustees, OPG is expected to have the majority vote to support its controlling position.

Once drafted, the related Regulations, Trust documents and various agreements are expected to confirm the expectation that OPG will have significant variability and exposure from the activities of the Trust relative to the rate of return that OPG would recognize from its role as the Financial Services Manager of the Trust. The performance fee will be meaningful and allow OPG to make decisions that will significantly impact its returns.

The purpose of the Trust is to allow OPG to earn a return on the Intangible Asset from the IESO by effectively managing financing to earn a spread, earn management fees, and earn interest fees. For the reasons noted above, OPG has control over the decisions to be made about the relevant activities. It is expected that OPG will have both power over the Trust (i.e. as a Principal, not an agent), exposure or rights to the variable returns from the Trust, and the ability to use its power to affect OPG's returns from its involvement with the Trust. OPG is expected to have the ability to use its power over the relevant activities of the Trust to affect its returns from its involvement with the Trust through the variable fee component. The performance fee will be meaningful and allow OPG to make decisions that will significantly impact its returns. Neither the OEB nor any other party can discretionally reduce the management fee or performance fee except due to a calculation error. The approval by the Ontario Energy Board of the Financial Services Manager (i.e. OPG's) fees as described in *Part IV – Implementation - Section 14.4 Same, Board Approval* will not allow them to change or limit the management fee structure, but only ensure that it is prudent by ensuring it is calculated in accordance with the Regulations.

Relevant activities:

The relevant activities of the Trust are:

- To evaluate and make decisions on financing alternatives, duration, and the strategy to minimize financing costs.
- To effectively manage funding obtained through the capital markets and be able to make or lose any spread from financing
- To provide funding to the IESO in return for an interest in a future cash flow stream
- To obtain funding through the capital markets and other vehicles available to OPG to be able to provide the IESO funding.
- To make capital and funding decisions required to meet the Fair Allocation Plan objectives as set out in Legislation
- To finance the requirements associated with the short-fall amount
- To raise debt, pay bond debt holders, and determine capacity for the Trust to raise additional financing

OPG has the ability to direct the relevant activities of the Trust. OPG can amend the Financing Plan at any time, without approval from the Minister. Further, if the Minister of Energy chooses not to continue with OPG's current Financing Plan, OPG can withdraw its Financing Plan, without impacting the existing debt and related intangible assets that is already in the Trust. The Province would just appoint a new party to participate in future securitizations and OPG would continue to manage the debt that already exists in the Trust. If future financing transactions are with a different SPV, a separate consolidation analysis would be prepared at that time as to which party if any would consolidate the SPV.

The indemnification provided to the Trust by the Minister of Finance on behalf of the Province as described in *Part I – General - Section 5.3 Guarantee, indemnification Protection and assurances* will be subject to terms and conditions in a separate Provincial support agreement. The guarantee is expected to be in place only in the event of a Payment Guarantee Event, such as if the Legislative Assembly of Ontario repeals the Fair Hydro Act or amends the Act in a way that adversely impacts the ability of the Trust to fully recover an intangible asset in order to pay the obligations of the Trust.

At the Provincial level, cash flow from the Trust's intangible asset will include interest income that is equal to the interest expense charged by the debt providers. Interest expense on the debt will be recovered through rates charged to ratepayer commencing with the recovery period.

The Regulations are expected to provide further details related to the 'Fair Allocation Plan' which will be based on high level Principles and Parameters of the Plan, including the attribution methodology. The Legislation or Regulation determines the following principles:

- 25% Reduction (June 1, 2017) where the average bill will reduce by 25% including HST and social programs
- Inflation Period (November 2017 – April 2022) where bill increases are capped at inflation
- Straight-line Increase Period (May 2022 – April 2027) where bills increased at a straight-line rate (i.e., 8% per year) which is set so that borrowing will not exceed the Trust's capacity.
- Amortization Period (May 2027 – April 2047) where debt built up over the previous periods is repaid by ratepayers.

OPG will determine the manner in which the intangible asset, once purchased from the IESO will be collected and the period of collection. The recoverability of the existing intangible assets cannot be impacted by the Province. Although the Province may determine the Principles and Parameters around the 'Fair Allocation Plan', it does not impact the activities of the Trust once OPG has purchased the intangible asset.

- OPG's plan for managing the assets of the Trust will be dictated through a 'Financing Plan'.
- The Financial Services Manager (i.e. the Trust) shall provide the Financing Plan to the Minister. The Financing Plan is expected to follow Principles as stipulated in the Legislation which indicate that the assumptions must be reasonable and that the Trust has the power to determine what is reasonable and cost-effective. The Trust makes all the decisions in determining the relevant activities as listed above.
- OPG can amend the Financing Plan at any time without the approval of the Minister.
- The 'Fair Allocation Amount' ("FAA") is the amount of the deferral for the reference period and includes finance amounts. The current Legislation dictates that the Minister of Energy is to calculate the FAA.

This does not impact OPG's relevant activities in the Trust as OPG's variable returns are based on financing decisions which are not dictated by the FAA. OPG can choose to accept or reject the purchase of the intangible asset which is based on the Fair Allocation Amount.

(INSERT ANALYSIS SUPPORTING NON-CONTROL OF THE TRUST BY THE PROVINCE, despite guarantee)

Understanding of the transition of asset from RRA in IESO to Intangible Asset in OPG, including interest/admin charge component and any possible impact on Public Accounts.

- Consider also performance metrics for OPG, and potential balance of RRA on IESO books at year-end.

**Potential impact of 3070 and 3420 on transactions if no RRA (EY)

- ** Potential impact if OPG no longer controls the Trust (replaced as Financial Services Manager)

The Minister of Energy will have the ability to replace the Financial Services Manager (OPG) if there is a failure to perform. There will be a bifurcation of roles where the Province could not remove OPG as manager/administrator with respect to the existing debt placed by the Trust, but could remove OPG's responsibility/right to prepare the Financing Plan going forward. The ability for the Minister of Energy to remove OPG as the Financial Services Manager should not impact the recoverability of existing intangible assets and the IESO is required to continue to make cash payments for interest to the Trust for the existing

debt. Principal repayments on existing debt will continue to be repaid by ratepayers to the Trust in accordance with the terms of the issued debt.

.

** Impact if GA deferral deemed an unconstitutional tax at some point during the deferral/recovery period. (EY- OPG EY)

GA Refinancing

OPCD Accounting Paper DRAFT Outline:

Purpose:

The purpose of this document is to summarize the preliminary views of the Office of the Provincial Controller in accounting for the Global Adjustment Deferral Account on the Province's consolidated financial reports.

Background:

- Provincial CFS –
    - prepared on PSAS basis, focus on fair and transparent reporting of the economic substance of government's activities and financial position.
    - RRA represent economic inflows and outflows (Appendix: 'what is RRA – recognized under different GAAPS, reference to CICA Research Project, IASB Project – no requirement for Independence of Regulator, different types of RRA – leg and those subject to prudence).
    - Application of GAAP Hierarchy where accounting standards do not specifically address a type of transaction
    - PSAS conceptual framework under review; accounting standards subject to change; analysis based on current accounting standards and currently available information.
    - PSAS definition of Asset

- Key entities:
    - Ministry of Energy – establishes legislation, provide provincial guarantee, etc.
    - IESO – Nature of IESO, types of RRA
    - OPG- Nature of OPG, types of RRA (O.Reg 53/05 legislated assets as well as assets subject to prudence review)
    - OEB - The OEB has broad jurisdiction as the administrative tribunal responsible for regulating the electricity industry in Ontario. It has jurisdiction to set payment amounts for regulated entities which has been conveyed by the legislature under which the OEB authorizes the establishment of accounts as well as the power to dispose of the amounts recorded in such accounts. (Again, confirm that Independence not required under accounting standards)

- Classification of entities –
    - IESO (OGO-NFPO, not GBE but no funding received from the Province)
    - OPG
    - OEB (OGO)

- Legal opinion – consider requesting for OPG and IESO assets to reflect recoverability (to justify accounting for assets on Province's books)

- Intro to Fair Hydro Plan:

Intro to FHP:

On March 2, 2017, the Province of Ontario (the Province) announced Ontario's Fair Hydro Plan (the Plan) aimed at reducing electricity bills by 25 percent on average for all residential consumers in the province. As part of the Plan, the Province has proposed financing a portion of the Global Adjustment costs over a longer time period for Regulated Price Plan eligible customers (e.g., residential, farm, small businesses).

Why structured this way

DRAFT

- The nature of the recoverable is an asset, but to be reported as a regulatory asset, OPG would have had to have incurred the cost itself. Since the costs would not have been incurred directly by OPG, the proposed structure will allow it to record an intangible on its books through consolidation of the Trust, coincidental with the adoption of rate regulated accounting by the IESO under which it will appropriately reflect the deferred amounts, prior to sale to OPG, as regulatory assets.
- Insert support for reporting GA financing costs as a RRA by the IESO (does not have to be related to interest capitalized on a capital asset to be a RRA
- Insert commentary confirming that activities of generators do not have to be regulated in order for the IESO to recover their costs under RPP, or for any deferred portion thereof to be considered part of a RRA.

IESO

As of January 1, 2016, the IESO changed its accounting policy to recognize the economic impacts of rate regulation and now applies guidance from US GAAP Topic 980, *Regulated Operations,* as PSAS does not have any guidance for entities with rate-regulated activities.

- Specific parts of the IESO's activities which are subject to rate regulation include (smart meters, IESO's operating cost, GA costs which are recoverable through RPP, and pension related costs. **(IESO details to follow)**

IESO concluded that it met the requirements of PS2120.02, which allows them to reflect the impacts of rate regulation, as it is considered that the change of accounting policy in its 2016 financial statements resulted in a more appropriate presentation of transactions in the financial statements. The change was made to better reflect the economic substance of certain types of expenses that may not be directly recovered through the normal revenue requirement model.

The regulatory framework in Ontario relating to the generation and sale of electricity will be significantly impacted by the proposed Act. Currently, a substantial amount of the energy purchased from the generators is collected by IESO from the local distribution companies through the customer billing, with the remaining being recovered through variance accounts over a period of 12 months maximum. As mentioned above, the effect of the proposed Act is to defer the collection of a total estimated amount of $28 billion (plus interest) of energy purchased from the generators over a period of 30 years.

The proposed Act will not permit IESO to collect the funding shortfall before May 1, 2021 and the recovery process will be established through regulations, similar therefore to those accounts of OPG's which are also rate regulated and established through regulations under O.Reg. 53/05. As such, the OEB has no discretion with respect to the continuation of these accounts and has no discretion to evaluate prudence.

The IESO has assessed that despite the long-term deferred recovery plan, the uncollected energy costs should qualify for deferral as a regulatory asset under the proposed legislation as they would continue to meet the criteria applied by IESO in regards to its financial reporting (ASC 980):

(a) It is probable that future revenue in an amount at least equal to the capitalized cost will result from inclusion of that cost in allowable costs for rate-making purposes.

(b) Based on available evidence, the future revenue will be provided to permit recovery of the previously incurred cost rather than to provide for expected levels of similar future costs. If the revenue will be provided through an automatic rate-adjustment clause, this criterion requires that the regulator's intent clearly be to permit recovery of the previously incurred cost.

Deferred recovery plans are plans adopted by regulators or legislations in response to significant increases in costs (e.g. purchased power costs). These plans typically provide for rates to remain fixed or increase moderately with a variance account mechanism to capture costs in excess of the level allowed in current rates. A regulated utility subject to such plans is required to consider whether it continues to meet the criteria that allow it to use the guidance for regulated operations of Topic 980, especially criteria ASC 980-10-15-2 (b).

The proposed plan for the recovery of purchase power costs over a 30 year period is considered a deferred recovery plan as the rates for the first four years will remain fixed and subsequently the rates will increase moderately with a variance account to capture energy costs in excess of the level allowed in current rates.

(a) The entity's rates for regulated services or products provided to its customers are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.

(b) The regulated rates are designed to recover the specific entity's costs of providing the regulated services or products.

(c) In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the entity's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs."

(d) IESO management has concluded that the IESO can recognize a regulatory asset related to the variance account created by the proposed Act.

The variance account created by the proposed Act is subject to rate regulation by the OEB and the variance account will be established with the right to collect funds against the variance amount in the future. In these circumstances, the IESO is able to establish a regulated asset. The IESO financial statements are prepared in accordance with Canadian public sector accounting standards. Although PSAB does not provide specific guidance on rate regulated accounting, it does allow for guidance to be followed from other accounting frameworks. IESO has applied guidance from United States Generally Accepted Accounting Principles (US GAAP) Topic 980, Regulated Operations in its accounting policies.

IESO management has concluded that the OPG Trust to be established would not be controlled by the IESO and therefore is not subject to consolidation by the IESO. Based on the 11 indicators of control as defined in Section PS 1300 *Government Reporting Entity*, there is no evidence of control by the IESO for the OPG Trust either collectively or individually. The IESO will not have the power to govern the Trust, nor have ongoing access to Trust's assets. The IESO will also not have any voting shares or future rights to the Trust nor the power to dissolve the Trust. Without control, the Trust is not subject to consolidation within the IESO financial statements.

Sale of the Regulatory Asset to OPG (Transfer)

(1) The IESO may from time to time, in accordance with this Act and the regulations, transfer a specified portion of the regulatory asset to a financing entity in accordance with this section.

(2) An agreement between the IESO and a financing entity in relation to the transfer of a specified portion of the regulatory asset shall provide for consideration of a payment by the financing entity to the IESO in an amount equal to the amount of the specified portion.

(3) Upon receipt by the IESO of the payment by the financing entity,

(a) the balance in the variance account shall be reduced by the amount of the payment;

(b) the regulatory asset shall be adjusted accordingly;

(c) the financing entity shall acquire a corresponding investment interest; and

(d) the IESO shall retain no further right, title or interest in the corresponding investment interest.

Although ASC 980-20-40 states that

"Derecognition Section provides guidance on determining whether and when an entity should remove an item from the financial statements. For example, the entity would derecognize an asset because it no longer has rights to the asset or it would derecognize a liability because it no longer has any obligation."

In the absence of clear guidance for the derecognition of regulatory asset under ASC 980, guidance from PSAS should be analyzed for the criteria for the derecognition of assets.

It should also be noted that PSASs provide limited guidance on derecognition of non-financial assets and liabilities. Section 3430 *Restructuring transactions,* which is applicable for fiscal years on or after April 1, 2018 with early application permitted, has guidance for the derecognition of assets and liabilities.

- Paragraph 21 states that individual assets and liabilities transferred in a restructuring transaction should be derecognized by the transferor if they no longer meet the definitions of assets and liabilities and applicable recognition criteria at the restructuring date.
- As stated in paragraph 24, when a transferor continues to be involved in the individual assets and/or liabilities it transferred to a recipient subsequent to the restructuring date, it would assess the nature and extent of its continued involvement against the definitions of assets and liabilities and applicable recognition criteria to evaluate whether derecognition of the asset and liability transferred would be appropriate and whether its continued involvement gives rise to a new asset or new liability that needs to be recognized.

Recognizing the proposed transaction is not a restructuring transaction, Section 3430, which has recently been issued by PSAB, provides current thinking in the application for the recognition and derecognition of assets and liabilities which is consistent with derecognition guidance in other aspects of GAAP. Accordingly, the analysis as to whether the regulatory asset transferred to the OPG Trust can be derecognized is based on the guidance in paragraph 21.

DRAFT

OPG

The design of the GA Financing Plan includes OPG administering the financing associated with the Plan based on OPG's participation in the market and regulatory knowledge. and the foreseen accounting for financing activities on OPG's financial statements (i.e. consolidation of the Trust). Having exercised discretion over the decision to participate in the Fair Hydro Plan, OPG will establish a Financing Entity Trust (the Trust) to finance and administer the Global Adjustment costs through a mixture of external financing and an equity injection from the Ontario Financing Authority. It is expected that OPG will control the Trust for accounting purposes and that its financial position and results will be consolidated within OPG's consolidated financial statements. For purposes of the Province's consolidated financial statements, the intangible assets reported on the books of OPG would be reflected on the CFS under PSAS through modified equity consolidation of OPG.

As the sole unit holder of the Trust, OPG will exercise discretion over all decisions over the activities of the Trust. For example, OPG is expected to have the ability to OPG will have the power to establish operating and capital budgets of the Trust, and to make decisions about the financing alternatives, duration, and the strategy to minimize financing costs, with no veto right by the Province. While the Province maybe involved in the Board of Trustees, OPG is expected to have the majority vote to support its controlling position.

Once drafted, the related Regulations, Trust documents and various agreements are expected to confirm the expectation that OPG will have significant variability and exposure from the activities of the Trust relative to the rate of return that OPG would recognize from its role as the Financial Services Manager of the Trust. The performance fee will be meaningful and allow OPG to make decisions that will significantly impact its returns.

The purpose of the Trust is to allow OPG to earn a return on the Intangible Asset from the IESO by effectively managing financing to earn a spread, earn management fees, and earn interest fees. For the reasons noted above, OPG has control over the decisions to be made about the relevant activities. It is expected that OPG will have both power over the Trust (i.e. as a Principal, not an agent), exposure or rights to the variable returns from the Trust, and the ability to use its power to affect OPG's returns from its involvement with the Trust. OPG is expected to have the ability to use its power over the relevant activities of the Trust to affect its returns from its involvement with the Trust through the variable fee component. The performance fee will be meaningful and allow OPG to make decisions that will significantly impact its returns. Neither the OEB nor any other party can discretionally reduce the management fee or performance fee except due to a calculation error. The approval by the Ontario Energy Board of the Financial Services Manager (i.e. OPG's) fees as described in *Part IV – Implementation - Section 14.4 Same, Board Approval* will not allow them to change or limit the management fee structure, but only ensure that it is prudent by ensuring it is calculated in accordance with the Regulations.

Relevant activities:

The relevant activities of the Trust are:

- To evaluate and make decisions on financing alternatives, duration, and the strategy to minimize financing costs.
- To effectively manage funding obtained through the capital markets and be able to make or lose any spread from financing
- To provide funding to the IESO in return for an interest in a future cash flow stream
- To obtain funding through the capital markets and other vehicles available to OPG to be able to provide the IESO funding.
- To make capital and funding decisions required to meet the Fair Allocation Plan objectives as set out in Legislation
- To finance the requirements associated with the short-fall amount
- To raise debt, pay bond debt holders, and determine capacity for the Trust to raise additional financing

OPG has the ability to direct the relevant activities of the Trust. OPG can amend the Financing Plan at any time, without approval from the Minister. Further, if the Minister of Energy chooses not to continue with OPG's current Financing Plan, OPG can withdraw its Financing Plan, without impacting the existing debt and related intangible assets that is already in the Trust. The Province would just appoint a new party to participate in future securitizations and OPG would continue to manage the debt that already exists in the Trust. If future financing transactions are with a different SPV, a separate consolidation analysis would be prepared at that time as to which party if any would consolidate the SPV.

The indemnification provided to the Trust by the Minister of Finance on behalf of the Province as described in *Part I – General - Section 5.3 Guarantee, indemnification Protection and assurances* will be subject to terms and conditions in a separate Provincial support agreement. The guarantee is expected to be in place only in the event of a Payment Guarantee Event, such as if the Legislative Assembly of Ontario repeals the Fair Hydro Act or amends the Act in a way that adversely impacts the ability of the Trust to fully recover an intangible asset in order to pay the obligations of the Trust.

At the Provincial level, cash flow from the Trust's intangible asset will include interest income that is equal to the interest expense charged by the debt providers. Interest expense on the debt will be recovered through rates charged to ratepayer commencing with the recovery period.

The Regulations are expected to provide further details related to the 'Fair Allocation Plan' which will be based on high level Principles and Parameters of the Plan, including the attribution methodology. The Legislation or Regulation determines the following principles:

- 25% Reduction (June 1, 2017) where the average bill will reduce by 25% including HST and social programs
- Inflation Period (November 2017 – April 2022) where bill increases are capped at inflation
- Straight-line Increase Period (May 2022 – April 2027) where bills increased at a straight-line rate (i.e., 8% per year) which is set so that borrowing will not exceed the Trust's capacity.
- Amortization Period (May 2027 – April 2047) where debt built up over the previous periods is repaid by ratepayers.

OPG will determine the manner in which the intangible asset, once purchased from the IESO will be collected and the period of collection. The recoverability of the existing intangible assets cannot be impacted by the Province. Although the Province may determine the Principles and Parameters around the 'Fair Allocation Plan', it does not impact the activities of the Trust once OPG has purchased the intangible asset.

- OPG's plan for managing the assets of the Trust will be dictated through a 'Financing Plan'.
- The Financial Services Manager (i.e. the Trust) shall provide the Financing Plan to the Minister. The Financing Plan is expected to follow Principles as stipulated in the Legislation which indicate that the assumptions must be reasonable and that the Trust has the power to determine what is reasonable and cost-effective. The Trust makes all the decisions in determining the relevant activities as listed above.
- OPG can amend the Financing Plan at any time without the approval of the Minister.
- The 'Fair Allocation Amount' ("FAA") is the amount of the deferral for the reference period and includes finance amounts. The current Legislation dictates that the Minister of Energy is to calculate the FAA.

This does not impact OPG's relevant activities in the Trust as OPG's variable returns are based on financing decisions which are not dictated by the FAA. OPG can choose to accept or reject the purchase of the intangible asset which is based on the Fair Allocation Amount.

(INSERT ANALYSIS SUPPORTING NON-CONTROL OF THE TRUST BY THE PROVINCE, despite guarantee)

Understanding of the transition of asset from RRA in IESO to Intangible Asset in OPG, including interest/admin charge component and any possible impact on Public Accounts.

- Consider also performance metrics for OPG, and potential balance of RRA on IESO books at year-end.

**Potential impact of 3070 and 3420 on transactions if no RRA (EY)

- ** Potential impact if OPG no longer controls the Trust (replaced as Financial Services Manager)

The Minister of Energy will have the ability to replace the Financial Services Manager (OPG) if there is a failure to perform. There will be a bifurcation of roles where the Province could not remove OPG as manager/administrator with respect to the existing debt placed by the Trust, but could remove OPG's responsibility/right to prepare the Financing Plan going forward. The ability for the Minister of Energy to remove OPG as the Financial Services Manager should not impact the recoverability of existing intangible assets and the IESO is required to continue to make cash payments for interest to the Trust for the existing

debt. Principal repayments on existing debt will continue to be repaid by ratepayers to the Trust in accordance with the terms of the issued debt.

.

** Impact if GA deferral deemed an unconstitutional tax at some point during the deferral/recovery period. (EY- OPG EY)

GA Refinancing

OPCD Accounting Paper DRAFT Outline:

Purpose:

The purpose of this document is to summarize the preliminary views of the Office of the Provincial Controller in accounting for the Global Adjustment Deferral Account on the Province's consolidated financial reports.

Background:

- Provincial CFS –
    - prepared on PSAS basis, focus on fair and transparent reporting of the economic substance of government's activities and financial position.
    - RRA represent economic inflows and outflows (Appendix: 'what is RRA – recognized under different GAAPS, reference to CICA Research Project, IASB Project – no requirement for Independence of Regulator, different types of RRA – leg and those subject to prudence).
    - Application of GAAP Hierarchy where accounting standards do not specifically address a type of transaction
    - PSAS conceptual framework under review; accounting standards subject to change; analysis based on current accounting standards and currently available information.
    - PSAS definition of Asset

- Key entities:
    - Ministry of Energy – establishes legislation, provide provincial guarantee, etc.
    - IESO – Nature of IESO, types of RRA
    - OPG- Nature of OPG, types of RRA (O.Reg 53/05 legislated assets as well as assets subject to prudence review)
    - OEB - The OEB has broad jurisdiction as the administrative tribunal responsible for regulating the electricity industry in Ontario. It has jurisdiction to set payment amounts for regulated entities which has been conveyed by the legislature under which the OEB authorizes the establishment of accounts as well as the power to dispose of the amounts recorded in such accounts. (Again, confirm that Independence not required under accounting standards)

- Classification of entities –
    - IESO (OGO-NFPO, not GBE but no funding received from the Province)
    - OPG
    - OEB (OGO)

- Legal opinion – consider requesting for OPG and IESO assets to reflect recoverability (to justify accounting for assets on Province's books)

- Intro to Fair Hydro Plan:

Intro to FHP:

On March 2, 2017, the Province of Ontario (the Province) announced Ontario's Fair Hydro Plan (the Plan) aimed at reducing electricity bills by 25 percent on average for all residential consumers in the province. As part of the Plan, the Province has proposed financing a portion of the Global Adjustment costs over a longer time period for Regulated Price Plan eligible customers (e.g., residential, farm, small businesses).

Why structured this way

DRAFT

- The nature of the recoverable is an asset, but to be reported as a regulatory asset, OPG would have had to have incurred the cost itself. Since the costs would not have been incurred directly by OPG, the proposed structure will allow it to record an intangible on its books through consolidation of the Trust, coincidental with the adoption of rate regulated accounting by the IESO under which it will appropriately reflect the deferred amounts, prior to sale to OPG, as regulatory assets.
- Insert support for reporting GA financing costs as a RRA by the IESO (does not have to be related to interest capitalized on a capital asset to be a RRA
- Insert commentary confirming that activities of generators do not have to be regulated in order for the IESO to recover their costs under RPP, or for any deferred portion thereof to be considered part of a RRA.

IESO

As of January 1, 2016, the IESO changed its accounting policy to recognize the economic impacts of rate regulation and now applies guidance from US GAAP Topic 980, *Regulated Operations,* as PSAS does not have any guidance for entities with rate-regulated activities.

- Specific parts of the IESO's activities which are subject to rate regulation include (smart meters, IESO's operating cost, GA costs which are recoverable through RPP, and pension related costs. **(IESO details to follow)**

IESO concluded that it met the requirements of PS2120.02, which allows them to reflect the impacts of rate regulation, as it is considered that the change of accounting policy in its 2016 financial statements resulted in a more appropriate presentation of transactions in the financial statements. The change was made to better reflect the economic substance of certain types of expenses that may not be directly recovered through the normal revenue requirement model.

The regulatory framework in Ontario relating to the generation and sale of electricity will be significantly impacted by the proposed Act. Currently, a substantial amount of the energy purchased from the generators is collected by IESO from the local distribution companies through the customer billing, with the remaining being recovered through variance accounts over a period of 12 months maximum. As mentioned above, the effect of the proposed Act is to defer the collection of a total estimated amount of $28 billion (plus interest) of energy purchased from the generators over a period of 30 years.

The proposed Act will not permit IESO to collect the funding shortfall before May 1, 2021 and the recovery process will be established through regulations, similar therefore to those accounts of OPG's which are also rate regulated and established through regulations under O.Reg. 53/05. As such, the OEB has no discretion with respect to the continuation of these accounts and has no discretion to evaluate prudence.

The IESO has assessed that despite the long-term deferred recovery plan, the uncollected energy costs should qualify for deferral as a regulatory asset under the proposed legislation as they would continue to meet the criteria applied by IESO in regards to its financial reporting (ASC 980):

(a) It is probable that future revenue in an amount at least equal to the capitalized cost will result from inclusion of that cost in allowable costs for rate-making purposes.

(b) Based on available evidence, the future revenue will be provided to permit recovery of the previously incurred cost rather than to provide for expected levels of similar future costs. If the revenue will be provided through an automatic rate-adjustment clause, this criterion requires that the regulator's intent clearly be to permit recovery of the previously incurred cost.

Deferred recovery plans are plans adopted by regulators or legislations in response to significant increases in costs (e.g. purchased power costs). These plans typically provide for rates to remain fixed or increase moderately with a variance account mechanism to capture costs in excess of the level allowed in current rates. A regulated utility subject to such plans is required to consider whether it continues to meet the criteria that allow it to use the guidance for regulated operations of Topic 980, especially criteria ASC 980-10-15-2 (b).

The proposed plan for the recovery of purchase power costs over a 30 year period is considered a deferred recovery plan as the rates for the first four years will remain fixed and subsequently the rates will increase moderately with a variance account to capture energy costs in excess of the level allowed in current rates.

(a) The entity's rates for regulated services or products provided to its customers are established by or are subject to approval by an independent, third-party regulator or by its own governing board empowered by statute or contract to establish rates that bind customers.

(b) The regulated rates are designed to recover the specific entity's costs of providing the regulated services or products.

(c) In view of the demand for the regulated services or products and the level of competition, direct and indirect, it is reasonable to assume that rates set at levels that will recover the entity's costs can be charged to and collected from customers. This criterion requires consideration of anticipated changes in levels of demand or competition during the recovery period for any capitalized costs."

(d) IESO management has concluded that the IESO can recognize a regulatory asset related to the variance account created by the proposed Act.

The variance account created by the proposed Act is subject to rate regulation by the OEB and the variance account will be established with the right to collect funds against the variance amount in the future. In these circumstances, the IESO is able to establish a regulated asset. The IESO financial statements are prepared in accordance with Canadian public sector accounting standards. Although PSAB does not provide specific guidance on rate regulated accounting, it does allow for guidance to be followed from other accounting frameworks. IESO has applied guidance from United States Generally Accepted Accounting Principles (US GAAP) Topic 980, Regulated Operations in its accounting policies.

IESO management has concluded that the OPG Trust to be established would not be controlled by the IESO and therefore is not subject to consolidation by the IESO. Based on the 11 indicators of control as defined in Section PS 1300 *Government Reporting Entity*, there is no evidence of control by the IESO for the OPG Trust either collectively or individually. The IESO will not have the power to govern the Trust, nor have ongoing access to Trust's assets. The IESO will also not have any voting shares or future rights to the Trust nor the power to dissolve the Trust. Without control, the Trust is not subject to consolidation within the IESO financial statements.

Sale of the Regulatory Asset to OPG (Transfer)

(1) The IESO may from time to time, in accordance with this Act and the regulations, transfer a specified portion of the regulatory asset to a financing entity in accordance with this section.

(2) An agreement between the IESO and a financing entity in relation to the transfer of a specified portion of the regulatory asset shall provide for consideration of a payment by the financing entity to the IESO in an amount equal to the amount of the specified portion.

(3) Upon receipt by the IESO of the payment by the financing entity,

(a) the balance in the variance account shall be reduced by the amount of the payment;

(b) the regulatory asset shall be adjusted accordingly;

(c) the financing entity shall acquire a corresponding investment interest; and

(d) the IESO shall retain no further right, title or interest in the corresponding investment interest.

Although ASC 980-20-40 states that

"Derecognition Section provides guidance on determining whether and when an entity should remove an item from the financial statements. For example, the entity would derecognize an asset because it no longer has rights to the asset or it would derecognize a liability because it no longer has any obligation."

In the absence of clear guidance for the derecognition of regulatory asset under ASC 980, guidance from PSAS should be analyzed for the criteria for the derecognition of assets.

It should also be noted that PSASs provide limited guidance on derecognition of non-financial assets and liabilities. Section 3430 *Restructuring transactions,* which is applicable for fiscal years on or after April 1, 2018 with early application permitted, has guidance for the derecognition of assets and liabilities.

- Paragraph 21 states that individual assets and liabilities transferred in a restructuring transaction should be derecognized by the transferor if they no longer meet the definitions of assets and liabilities and applicable recognition criteria at the restructuring date.
- As stated in paragraph 24, when a transferor continues to be involved in the individual assets and/or liabilities it transferred to a recipient subsequent to the restructuring date, it would assess the nature and extent of its continued involvement against the definitions of assets and liabilities and applicable recognition criteria to evaluate whether derecognition of the asset and liability transferred would be appropriate and whether its continued involvement gives rise to a new asset or new liability that needs to be recognized.

Recognizing the proposed transaction is not a restructuring transaction, Section 3430, which has recently been issued by PSAB, provides current thinking in the application for the recognition and derecognition of assets and liabilities which is consistent with derecognition guidance in other aspects of GAAP. Accordingly, the analysis as to whether the regulatory asset transferred to the OPG Trust can be derecognized is based on the guidance in paragraph 21.

DRAFT

OPG

The design of the GA Financing Plan includes OPG administering the financing associated with the Plan based on OPG's participation in the market and regulatory knowledge. and the foreseen accounting for financing activities on OPG's financial statements (i.e. consolidation of the Trust). Having exercised discretion over the decision to participate in the Fair Hydro Plan, OPG will establish a Financing Entity Trust (the Trust) to finance and administer the Global Adjustment costs through a mixture of external financing and an equity injection from the Ontario Financing Authority. It is expected that OPG will control the Trust for accounting purposes and that its financial position and results will be consolidated within OPG's consolidated financial statements. For purposes of the Province's consolidated financial statements, the intangible assets reported on the books of OPG would be reflected on the CFS under PSAS through modified equity consolidation of OPG.

As the sole unit holder of the Trust, OPG will exercise discretion over all decisions over the activities of the Trust. For example, OPG is expected to have the ability to OPG will have the power to establish operating and capital budgets of the Trust, and to make decisions about the financing alternatives, duration, and the strategy to minimize financing costs, with no veto right by the Province. While the Province maybe involved in the Board of Trustees, OPG is expected to have the majority vote to support its controlling position.

Once drafted, the related Regulations, Trust documents and various agreements are expected to confirm the expectation that OPG will have significant variability and exposure from the activities of the Trust relative to the rate of return that OPG would recognize from its role as the Financial Services Manager of the Trust. The performance fee will be meaningful and allow OPG to make decisions that will significantly impact its returns.

The purpose of the Trust is to allow OPG to earn a return on the Intangible Asset from the IESO by effectively managing financing to earn a spread, earn management fees, and earn interest fees. For the reasons noted above, OPG has control over the decisions to be made about the relevant activities. It is expected that OPG will have both power over the Trust (i.e. as a Principal, not an agent), exposure or rights to the variable returns from the Trust, and the ability to use its power to affect OPG's returns from its involvement with the Trust. OPG is expected to have the ability to use its power over the relevant activities of the Trust to affect its returns from its involvement with the Trust through the variable fee component. The performance fee will be meaningful and allow OPG to make decisions that will significantly impact its returns. Neither the OEB nor any other party can discretionally reduce the management fee or performance fee except due to a calculation error. The approval by the Ontario Energy Board of the Financial Services Manager (i.e. OPG's) fees as described in *Part IV – Implementation - Section 14.4 Same, Board Approval* will not allow them to change or limit the management fee structure, but only ensure that it is prudent by ensuring it is calculated in accordance with the Regulations.

Relevant activities:

The relevant activities of the Trust are:

- To evaluate and make decisions on financing alternatives, duration, and the strategy to minimize financing costs.
- To effectively manage funding obtained through the capital markets and be able to make or lose any spread from financing
- To provide funding to the IESO in return for an interest in a future cash flow stream
- To obtain funding through the capital markets and other vehicles available to OPG to be able to provide the IESO funding.
- To make capital and funding decisions required to meet the Fair Allocation Plan objectives as set out in Legislation
- To finance the requirements associated with the short-fall amount
- To raise debt, pay bond debt holders, and determine capacity for the Trust to raise additional financing

OPG has the ability to direct the relevant activities of the Trust. OPG can amend the Financing Plan at any time, without approval from the Minister. Further, if the Minister of Energy chooses not to continue with OPG's current Financing Plan, OPG can withdraw its Financing Plan, without impacting the existing debt and related intangible assets that is already in the Trust. The Province would just appoint a new party to participate in future securitizations and OPG would continue to manage the debt that already exists in the Trust. If future financing transactions are with a different SPV, a separate consolidation analysis would be prepared at that time as to which party if any would consolidate the SPV.

The indemnification provided to the Trust by the Minister of Finance on behalf of the Province as described in *Part I – General - Section 5.3 Guarantee, indemnification Protection and assurances* will be subject to terms and conditions in a separate Provincial support agreement. The guarantee is expected to be in place only in the event of a Payment Guarantee Event, such as if the Legislative Assembly of Ontario repeals the Fair Hydro Act or amends the Act in a way that adversely impacts the ability of the Trust to fully recover an intangible asset in order to pay the obligations of the Trust.

At the Provincial level, cash flow from the Trust's intangible asset will include interest income that is equal to the interest expense charged by the debt providers. Interest expense on the debt will be recovered through rates charged to ratepayer commencing with the recovery period.

The Regulations are expected to provide further details related to the 'Fair Allocation Plan' which will be based on high level Principles and Parameters of the Plan, including the attribution methodology. The Legislation or Regulation determines the following principles:

- 25% Reduction (June 1, 2017) where the average bill will reduce by 25% including HST and social programs
- Inflation Period (November 2017 – April 2022) where bill increases are capped at inflation
- Straight-line Increase Period (May 2022 – April 2027) where bills increased at a straight-line rate (i.e., 8% per year) which is set so that borrowing will not exceed the Trust's capacity.
- Amortization Period (May 2027 – April 2047) where debt built up over the previous periods is repaid by ratepayers.

OPG will determine the manner in which the intangible asset, once purchased from the IESO will be collected and the period of collection. The recoverability of the existing intangible assets cannot be impacted by the Province. Although the Province may determine the Principles and Parameters around the 'Fair Allocation Plan', it does not impact the activities of the Trust once OPG has purchased the intangible asset.

- OPG's plan for managing the assets of the Trust will be dictated through a 'Financing Plan'.
- The Financial Services Manager (i.e. the Trust) shall provide the Financing Plan to the Minister. The Financing Plan is expected to follow Principles as stipulated in the Legislation which indicate that the assumptions must be reasonable and that the Trust has the power to determine what is reasonable and cost-effective. The Trust makes all the decisions in determining the relevant activities as listed above.
- OPG can amend the Financing Plan at any time without the approval of the Minister.
- The 'Fair Allocation Amount' ("FAA") is the amount of the deferral for the reference period and includes finance amounts. The current Legislation dictates that the Minister of Energy is to calculate the FAA.

This does not impact OPG's relevant activities in the Trust as OPG's variable returns are based on financing decisions which are not dictated by the FAA. OPG can choose to accept or reject the purchase of the intangible asset which is based on the Fair Allocation Amount.

(INSERT ANALYSIS SUPPORTING NON-CONTROL OF THE TRUST BY THE PROVINCE, despite guarantee)

Understanding of the transition of asset from RRA in IESO to Intangible Asset in OPG, including interest/admin charge component and any possible impact on Public Accounts.

- Consider also performance metrics for OPG, and potential balance of RRA on IESO books at year-end.

**Potential impact of 3070 and 3420 on transactions if no RRA (EY)

- ** Potential impact if OPG no longer controls the Trust (replaced as Financial Services Manager)

The Minister of Energy will have the ability to replace the Financial Services Manager (OPG) if there is a failure to perform. There will be a bifurcation of roles where the Province could not remove OPG as manager/administrator with respect to the existing debt placed by the Trust, but could remove OPG's responsibility/right to prepare the Financing Plan going forward. The ability for the Minister of Energy to remove OPG as the Financial Services Manager should not impact the recoverability of existing intangible assets and the IESO is required to continue to make cash payments for interest to the Trust for the existing

debt. Principal repayments on existing debt will continue to be repaid by ratepayers to the Trust in accordance with the terms of the issued debt.

.

** Impact if GA deferral deemed an unconstitutional tax at some point during the deferral/recovery period. (EY- OPG EY)

List of (proposed) Appendices:

- 'What is RRA – recognized under different GAAPS, reference to CICA Research Project, IASB Project – no requirement for Independence of Regulator, different types of RRA – leg and those subject to prudence).
- PSAS references to GAAP Hierarchy, with accompanying narrative explaining how applicable (IESO)
- PSAS references:
  - Consolidation of OGOs, GBEs
  - Definition of Asset
- Entities – extracts on IESO, OPG, IEB
- Extracts/summary of draft legislation
- Legal opinions(?)
- IESO accounting paper
- OPG accounting paper
- Accounting entries
- Illustration of fiscal impacts if accounted for as RRA vs. period cost with future recovery

Nadine,

I hope this email finds you well. Many thanks for the comments. Michel and our accounting policy team have been working through the comments and we have included initial responses to each of the points raised.

The team have also pulled together a few background documents:

- a summary of the accounting requirements on the treatment of changes in ownership interests, and

- a memo summarizing the control guidance under US GAAP and IFRS from Accounting literature

We'd be happy to arrange a session to walk you and the team through our thinking behind the analysis in detail if you or the team thought that appropriate?

As you noted we are also producing an updated set of forecast numbers based on the discussions on Monday and the revised assumptions.

Please let us know how you want to proceed and we're obviously happy to work around your schedule.

Cheers,

Simon

Hi Alan,

Attached is OPCD's input to the scenarios presented earlier this week. Please feel free to contact us if you have any questions. I understand that KPMG is undertaking additional analysis to consider fiscal implications taking into account IFRS based reporting of the scenarios for purposes of the Public Accounts. As the attached analysis illustrates, the differences between US GAAP and IFRS can vary significantly based especially on the different interpretations of 'control' for accounting purposes.

We've also referenced considerations related to the OEB and impact on future value under other potential future scenarios (i.e. associated with a possible rate decrease).

Regards,

Nadine

Hi Michel.

Can you please review the attached draft deck that Bharat and I compiled based on our recent discussion with OPG. We thought that this deck might be a good focus of discussion for this Wednesday's discussion.

Please advise of your availability for a call on Monday morning to discuss.

Also, with regards to the PAC work, can you please send a copy of your firm's research on voting patterns that supported your control analysis. We would like to make reference to the research in our upcoming discussions with the AG.

Thanks so much and have a great weekend.

Nadine

OPG -IFRS Analysisto MP.pdf

Office of the Provincial Controller Division

Draft Slide Deck

OPG- Preliminary IFRS14 Analysis and Impact on the Province's Consolidated Financial Statements

Confidential – For Internal Discussion Purposes

Background

- OPG is regulated based on US GAAP and is directed by the Province to report on US GAAP.
- To date, the Province had consolidated OPG on a Canadian GAAP basis in accordance with AcSB's extension for the deferral of the mandatory IFRS changeover date for entities with qualifying rate-regulated activities which ends on January 1, 2015.
- Since AcSB has not extended the deferral period, the AG may argue that the results of the entity must consolidated in accordance with IFRS or IFRS 14(the IASB's interim standard which grandfathers Regulatory Accounting for first time adopters) as of January 1, 2015.
- For GBEs with a different reporting year-end, the Province's accounting policy is to reflect the change in the subsequent reporting period. Therefore, for the 2014-15 Public Accounts, the Province would consolidate OPG's results using CGAAP for the full 12 month period.
- The AG has asked for comparative IFRSvs.CGAAP analysis be provided for Q1 2015 to assess the impact on the Province's Public Accounts. Note that she has requested that it be done to the entity's level of materiality.
- OPG is preparing comparative analysis reflecting 9 months CGAAP results and 3 months IFRS14 results (including transitional b/s adjustments) as at January 1, 2015 to meet the AG's request.

Preliminary IFRS Analysis

- OPG identified that the following items would impact opening equity (transitional b/s impact) in first year as well as net income on a go forward basis:
  - Pension and Other Post Retirement Benefits
  - Paragraph 122 adjustments (IAS 19 Pensions)
  - Nuclear Asset Retirement Obligations

- In addition, if the Province adopts IFRS based reporting for OPG (and H1) future IFRS changes with potential impact would also include:
  - IFRS 14 rate regulated accounting (RRA) may be eliminated if the IASB decides against RRA in the future
  - Financial Instruments – IFRS 9
  - Lease Accounting
  - Revenue Accounting

Preliminary IFRS Analysis – Pension & OPRB

$ Millions	CGAAP	CGAAP to US GAAP	US GAAP to IFRS 14	IFRS	Comment
Balance-sheet					
Pension/OPEB (Liability) Asset	(1,900)	(4,900)	(4,900)	TBD	US GAAP requires *funded status be reported (significantly* unfunded).
Regulatory (Liability) Asset		4,300	4,300		
Transitional Impact before Tax – AOCI		(600)	(600)		Non-regulated business portion of the pension and OPRB impact. After tax would be roughly 450.

Note: Province does not recognize AOCI on the CFS. For the 2014/15 audit, it would be reflected in SUDs because it is a non-ONFA related adjustment for non-realized gains/losses (B/S only as Jan1/15) impacting Net Debt.

Preliminary IFRS Analysis – Paragraph 122 (Pension)

$ Millions	CGAAP	CGAAP to US GAAP	US GAAP to IFRS 14	IFRS	Comment
Balance-sheet					
Pension/OPEB (Liability) Asset – IAS 19	-	-	1,100	TBD	
Pension/OPEB (Liability) Asset – IFRS 14	-	-	(50)		
Paragraph 122 Adjustments	-	-	(1,050)		No net Impact- just re-classes from one equity account to another equity account

Note: Under paragraph 122 (see below) OPG is allow to reclassify OCI to the retained earning to eliminate mismatch in equity. No impact on the Province's balance sheet (as we pick up Net Assets.)

IAS-19 paragraph 122: Re-measurements of the net defined benefit liability/(asset) recognised in other comprehensive income shall not be reclassified to profit or loss in a subsequent period. However, the entity may transfer those amounts recognised in other comprehensive income within equity.

Preliminary IFRS Analysis – Nuclear ARO

$ Millions	Bruce facility 5% Discount	Prescribed facility (OPG) 5% Discount (vs. current US GAAP 5.4%)	Bruce facility 4.5% Discount	Prescribed facility (OPG) 4.5% Discount
Balance-sheet Dr/(Cr)				
Nuclear Asset Retirement Obligation (IFRS)	400	(830)	(700)	(2,200)
Asset Retirement Cost US GAAP (PP&E) * why US GAAP?	(100)	(90)	100	300
Retain Earnings (Opening Adjustments)	300	740	(600)	1,900
Offset by Reg. Asset/(Liability)	(300)	NA	600	NA
Net ARO Transitional Impact to opening balance sheet	-	740 (EY likely to agree)	-	1,900

Prescribed facility: OPG does not recover accretion expense or seg fund earnings related to PN or DN. Since those two components are not part of the costs that are eligible for recovery by the OEB, a change in the discount rate that impacts those two components are, by definition, not recoverable and therefore not eligible for IFRS 14 offset. Even though the facilities themselves are regulated, these costs are not. They are treated no differently than unregulated costs in general. (RATES WOULD BE UPDATED AT NEXT ONFA UPDATE IN 2016 AND CHANGE WOULD IMPACT OPG's RESULTS IN 2016 – LIKELY IN THE PROVINCE's 2016/17 CFS.)

Bruce facility: The Bruce method produces no profit (return) for OPG to compensate against risk but does cover OPG for all accounting based costs of nuclear liabilities for the Bruce assets
THERFORE – Variance account basis of accounting allowed. We even have an OEB authorized Bruce Lease Variance Account to book to.

Annual Surplus/Deficit Impact

3 key risks:

1. Impact of changes in discount rates on pension, OPRB and ARO which are not recoverable (i.e. Pickering and Darlington) through rates
2. ARO valuation methodology (would be updated and impact at each ONFA update)
3. Future IFRS Changes:
   - IFRS rate regulated accounting adoption (IFRS 14 permanency uncertainty)
   - Other uncertainty on IFRS changes to lease accounting, financial instruments and revenue standards

Additional considerations

- Cost of maintaining 2 sets of books (running detailed models of ARO calculations on variable cost methodology) and updates to discount rates
- OEB to continue to regulate based on US GAAP. No user need for IFRS based statements
- Cost of consulting with external auditors and advisors
- Internal staff time and attention
- Unlikely that the AG would accept FV adjustment defence for discount rate changes or OCI under paragraph122
- OEFC calculation of Electricity Sector Dedicated Income will be impacted

Fiscal Risk- IFRS current discount rate

- Pension/OPRB: B/S approx. NET $600M increase in liability; I/S uncertain treatment of para 122 adjustment under PSAB (according to Province's policy as a FV adjustment (OCI related) this might possibly be eliminated on consolidation. Start at OPG US income ($73M) reverse unrealized component of $178M which will still end up on the Province's b/s and impact Net Debt.
- IFRS requires the ARO be valued using a current discount rate at period end.
- Calculations have been performed using a rate of 4.5% and 5% based on a 15 year and 20 year rolling average of a 30 year provincial bond (using 10 or 15 years of historical rates and 5 of forecasted rates).
- This compares to a weighted average historical rate for US GAAP of 5.4%.
- Rates would be updated at ONFA update time (2016). Full impact reportable in year of change (OPG to ESTIMATE impact on 2016), unless can argue that this is a FV related change and OPCD could possibly eliminate.

Fiscal Risk- Change in Valuation

- Future changes in ARO such as change in useful life of Bruce or Prescribed facility would have a more significant impact under IFRS because of the ARO valuation methodology which treats step up costs as variable vs. fixed.
- Change in accretion rate would also impact Province's fiscal plans in future years (accretion not recoverable through rates therefore no IFRS14 protection).

Fiscal Risk – elimination of IFRS14

- IASB decision on permanently introducing rate regulated accounting not expected until 2017 at earliest
- If IASB decides against, then impact for OPG's results (for purposes of CFS consolidation) would be:
  1. Elimination of some of OPG's rate regulated balances (net impact: XXX as at Dec. 31/2014)

     Net Debt increase:
  2. Volatility in annual surplus/deficit: calculate based on 2014 example

OPG GBE Analysis.rtf

Attachment 1: OPG as GBE analysis Mar1.docx

Michel,

Further to our discussion earlier today following Cabinet, please find attached a preliminary analysis of OPG as a GBE. Can you please review and advise w.r.t. your understanding of the envisioned structure and legislation. We'd also be interested in any additional points that you think we should include for a more fulsome analysis. We'd like to share this analysis with John and Alec tomorrow. We'll look forward to your feedback.

Thanks in advance.

Nadine

OPG as GBE analysis Mar1.pdf

Ontario Power Generation Inc.

Section 4 - Summary of Evaluation for Government Business Enterprises (PS 1300)	Criteria Applies Yes/No	
	Status Quo	**Post – Global Adjustment Considerations**
(A) It is a separate legal entity with the power to contract in its own name and that can sue and be sued	Yes. • OPG was incorporated on December 1, 1998 pursuant to the Business Corporations Act (Ontario) (Note 1); • Wholly owned by the Province of Ontario (Note 1); • A corporation has the capacity and the rights, powers and privileges of a natural person. R.S.O. 1990, c. B.16, s. 15; and • OPG is subject to various claims, legal actions and investigations that arise in the normal course of business and can enter contracts in its own name (Note 15, 18, 6).	**Yes** OPG would remain a separate legal entity, and through proposed amendments to the Electricity Act would have expanded powers to engage in establishing the GAM Trust/SPV if OPG's Board of Directors evaluated the opportunity as an attractive business initiative. Trust would also be legislated the power to enter into contracts and transactions with the IESO, OPG and external parties.

(B) It has been delegated the financial and operational authority to carry on a business	Yes. • A corporation has the capacity and the rights, powers and privileges of a natural person. R.S.O. 1990, c. B.16, s. 15; • OPG's Board of Directors is made up of individuals with substantial expertise and has established a number of committees to focus on areas critical to the success of the Company; and • The Board exercises its independent supervision over management, who manages the affairs of corporation to achieve its operational and financial goals (http://www.opg.com/about/management/Pages/management.aspx).	Yes Through legislative changes to the Electricity Act, the Trust/SPV would be delegated the authority to hold the right to charge customers (of LDCs) for the benefit of debt holders and/or investors.

(C) It sells goods and services to individuals and organizations outside of the government reporting entity as its principal activity; and	Yes. • OPG is Ontario's largest energy provider. At Dec. 31, 2015, OPG generating portfolio had an in-service capacity of 17,055 megawatts (MW) (2015 Annual Report); • OPG produces almost half of the electricity used by Ontario homes, schools, hospitals and businesses (http://www.opg.com/about/Pages/about.aspx.); • OPG receives regulated prices for electricity generated from most of its hydroelectric facilities and all of the nuclear facilities that it operates (2015 Annual Report); and • OPG earns revenue from five business segments: nuclear generation, nuclear waste management, Hydroelectric, contracted generation portfolio and services, trading and other non-generation (Note 16).	**Yes.** **OPG's <u>principal</u>, active business activity would remain electricity generation; however, it is acknowledged that the level of debt associated with the GAM Trust/SPV may exceed OPG's debt associated with its primary business activity.** The controlled SPV structure would be used to hold the right to charge customers (of LDCs) for the benefit of debt holders/investors. **With regards to OPG's loan to the Trust/SPV, it is expected that OPG** shall, through its ownership of the most subordinated liability, be able to capture and retain the pricing difference between cost of financing and benchmark for interest on the restructured asset, or any residual risk of restructured asset. The targeted return of the subordinated liability should be reflective of the underlying risks and compensate holders for active management that would be required. The benefit of the structure is intended to provide a service to ratepayers who are individuals and organizations outside of the government reporting entity.

(D) It can, in the normal course of its operations, maintain its operations and meet its liabilities from revenues received from sources outside of the government reporting entity.	Yes. OPG has reported positive financial results, does not receive transfers from the Province of Ontario and has demonstrated its ability of maintaining its operations and meeting its liabilities without relying on the Province of Ontario.	Yes. Liabilities of the Trust/SPV will be funded through a combination of both debt from OPG as well as external financing, the latter of which will exceed 50%. Legislation would allow for recovery of interest, carrying and administrative costs, so that the Trust/SPV is able to sufficiently cover any ongoing costs through future recoveries through LDC billings. (Sources of future economic inflows is outside of the government reporting entity). In order to preserve the Trust's ability to recover deferred costs, and to mitigate risks for external and OPG debt, the right to recover will be irrevocable and, if amended by future governments, debt holders would have the right of action against the government to recover the amount outstanding including interest, fees, expenses and any damages resulting from the amendment.
Conclusion <u>Status Quo</u> OPG meets all the four characteristics and therefore qualifies as a GBE.		<u>Post-GA Implementation</u> assuming the legislation works, we will have a view that OPG can fund its operations between the external market and the OFA

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Fair Hydro Act (April 15 2017) Consultationv4.pdf

This confidential draft document is provided for discussion purposes only. It should not be construed as representing a position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

Confidential Draft

A proposal to create Legislation.

Intergenerational Fairness in Hydro Rates Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Notes re this draft:
- all numbering of provisions will need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix including renewable energy, and to removing barriers to and promoting opportunities for renewable energy projects.

The Government of Ontario has established a regulatory and contractual framework related to the generation and sale of electricity to ensure significant investment in decarbonizing and modernizing the generation of electrical energy and the production therefrom.

Given the long-term benefits that future generations of Ontarians will receive from many of these investments, it is appropriate and fair to raise money in respect of these generating facilities in a manner that allocates the costs of and benefits from these investments fairly among present and future consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

CONTENTS

PART I
GENERAL

1. Interpretation
2. Purpose
3. Crown bound
4. Protection and guarantee of scheme

PART II
FAIR ADJUSTMENT PERIOD

5. Application of Part
6. Determination of rates, first twelve months
7. Determination of rates, on and after May 1, 2018

PART III
CLEAN ENERGY ADJUSTMENT PERIOD

8. Application of Part
9. Specified consumers to pay clean energy adjustment
10. Irrevocability of clean energy adjustment
11. Determination of clean energy adjustment
12. IESO to invoice electricity vendors
13. Electricity vendor to apply rate
14. Pro rating of payments
15. Electricity vendor, account

PART IV
FAIR ALLOCATION PLAN AND FINANCING PLAN
FAIR ALLOCATION PLAN

8. Minister to prepare plan
8.0.1 Amounts to be allocated
8.2 Compliance

FINANCING PLAN

11. Financial Services Manager to prepare plan
11.1 Compliance with Plan
12. Contents of plan

PART V
THE REGULATORY ASSET [AND INVESTMENT ASSET]

Confidential Draft

22. Regulatory asset established
22.1 Recording of IESO funding shortfall in books
22.2 IESO funding shortfall
23. Transfer of regulatory asset
23.1 Investment asset
24. Transfer of investment asset
26. Administration of investment asset
27. Investment asset owner may grant pledge
28. Collective action required
29. Exercise of rights

PART VI
MISCELLANEOUS

34. Appointment of agent, invoicing or collection
35.1 Not Crown agent
35.2 Sequestration
37. Successors
37.1 Choice of law
38. Conflict
39. No further approvals, etc.
97. Immunity
98. References in marketing materials and offering documents
99. Non-application, Financial Administration Act, s. 28
100. Regulations

PART VII
AMENDMENTS TO OTHER ACTS
ELECTRICITY ACT, 1998
AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

PART VII
COMMENCEMENT AND SHORT TITLE

103. Commencement
104. Short title
Schedule 1 Method for determining amount of clean energy adjustment for reference period

PART I
GENERAL

Interpretation
Definitions

1. (1) In this Act,

"clean energy adjustment" means…

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in renewable energy projects [which use cleaner sources of energy],

(b) removing barriers to and promoting opportunities for renewable energy projects, and

(c) promoting a green economy [including conservation and demand management]; ("French")

Confidential Draft

"electricity vendor"[1] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"Fair Allocation Plan" means a plan prepared under section X; ("French")

"Financial Services Manager" means Ontario Power Generation Inc. or such other entity as may be prescribed; ("French")

"Financing Plan" means a plan prepared under section X; ("French")

"funding obligation" means a payment obligation incurred by or on behalf of the regulatory asset owner or an investment asset owner under section x; ("French")

"holiday" means [O. Reg. 95/05 definition];] ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"investment asset" means all or part of the regulatory asset that is deemed to be an investment asset under section x; ("French")

"invoice amount" means the sum of the following amounts:

1. The commodity price of the electricity used during the invoice period.

2. The rates and charges set out in the applicable rate order issued by the Ontario Energy Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

3. Any adjustment required under section 25.33 of the *Electricity Act, 1998*.

4. The amount of any harmonized sales tax payable under Part IX of the *Excise Tax Act* (Canada); ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

[1] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

Confidential Draft

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a), or such shorter period as may be set out in a Fair Allocation Plan; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of the owner of an investment asset by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the regulatory asset established under section X or, if any part of that regulatory asset has been transferred under this Act, the portion of the regulatory asset that is not deemed to be an investment asset; ("French")

[NOTE: CURRENT PROPOSAL IS THAT THE REGULATORY ASSET WILL REPRESENT THE RIGHT OF RECOVERY. UPON A TRANSFER OF AN INVESTMENT INTEREST, THE QUANTUM OF THE RIGHT OF RECOVERY FOR THE REGULATORY ASSET WILL BE REDUCED. THE TRANSFER OF AN INVESTMENT INTEREST WILL RESULT IN IESO RELINQISHING ANY INTEREST IN THE TRANSFERRED INVESTMENT INTEREST, AND WILL RESULT IN THE TRANSFEREE ACQUIRING THE RIGHT OF RECOVERY OF AN INTEREST IN THE CLEAN ENERGY ADJUSTMENTS DETERMINED BY REFERENCE TO FINANCE AMOUNTS INCURRED BY OR ON BEHALF OF THE TRANSFEREE.]

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity, receives an invoice in respect of the account and meets the criteria set out in subsection (2); or

Confidential Draft

(b) such other person as may be prescribed ("French")

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French")

"transfer" means an assignment, conveyance, disposition or sale; ("French")

"weekday means [O. Reg. 95/05 definition]; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Confidential Draft

Invoice amount, exclusions

(2) For the purposes of the definition of "invoice amount" in subsection (1), an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Ontario Energy Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

    i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

    ii. A charge labelled as a "specific service charge" or "retail service charge".

    iii. A rate rider.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer,

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the Act;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Confidential Draft

Intention of the Legislature[2]

(5) For greater certainty, all of the provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same

(6) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect a funding obligation that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

2. (1) The purposes of this Act are,[3]

(a) to ensure that the costs of the clean energy initiative are fairly distributed among specified customers over time;

(b) to recognize the long-term benefits of the clean energy initiative that accrue over time and will continue to benefit present and future electricity consumers in the Province;

(c) to promote the use of clean energy sources and technologies, including low carbon, alternative energy sources and renewable energy sources, in a manner consistent with the policies of the Government of Ontario;

(d) to promote economic efficiency and sustainability in the generation, transmission, distribution and sale of electricity;

(e) to facilitate the maintenance of a financially viable electricity industry, including by raising money in respect of sites and facilities in the Province for the generation of electrical energy and the production therefrom;[4] and

(f) to protect the interests of consumers with respect to prices and the adequacy, reliability and quality of electricity service.

Crown bound

3. This Act binds the Crown.

[2] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*
[3] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.
[4] FLS - as per the note in the Preamble on this language, please see 92A (4) of the *Constitution Act, 1867.*

Confidential Draft

Protection and guarantee of scheme
Prohibition

4. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may enter into agreements for the purposes of guaranteeing that compensation will be paid to an investment asset owner for losses suffered as a result of,

(a) a contravention of subsection (1);

(b) a change in law that would adversely affect the rights under this Act of an owner of an investment asset;

(c) approval by the Lieutenant Governor in Council of a Fair Allocation Plan, or an amendment to a Fair Allocation Plan, that fails to recognize the principles set out in section x; or

(d) a final determination by a court of final jurisdiction rendering invalid or ineffective all or any of the provisions of this Act.[5]

IESO obligations

(5) If the IESO fails to carry out its obligations under this Act for any reason, including because the IESO is dissolved or restructured or because it becomes insolvent, the Government of Ontario shall carry out those obligations or ensure they are carried out by another appropriate entity.

[5] Note to translator: See s. 9 of the Public Authorities Protection Act.

Confidential Draft

PART II
FAIR ADJUSTMENT PERIOD

Application of Part

5. This Part applies in respect of the five year period beginning on May 1, 2017 and ending on April 30, 2022.

[NOTE: THIS IS A ROUGH ADAPTATION OF THE "FAIR ADJUSTMENT" CONCEPT. FOR YEARS 2 TO 5, THE LGIC WILL PASS A REGULATION TO LIMIT THE INCREASE TO REDUCED HYDRO BILLS TO REFLECT A FURTHER "FAIR ADJUSTMENT". THE SUM OF ALL FAIR ADJUSTMENTS WILL CORRESPOND TO THE SUM (TIME VALUE ADJUSTED) OF THE PAYMENTS BY PAST RATEPAYERS OF MORE THAN THEIR FAIR SHARE OF THE GREEN COSTS (I.E., AS A RESULT OF THE EXISTING AMORTIZATION RATE OF GREEN COSTS THROUGH THE GA CALCULATION). THE VALUE OF THOSE PAST OVER-PAYMENTS WILL BE A LIMIT ON THE TOTAL AMOUNT OF FAIR ADJUSTMENTS. THE CONCEPT IS MORE FLEXIBILE THAN THE SUGGESTION HERE, WHICH RELATES ONLY TO THE FIRST 5 YEARS – ALTHOUGH THAT IS CERTAINLY THE CURRENT FOCUS. THE IDEA FOR NOW IS THAT THE ACT WILL REDUCE HYDRO BILLS FOR THE FIRST YEAR, AND EACH OF THE FOLLOWING 4 YEARS BY REGULATION – IN AGGREGATE EQUAL TO THE PAST OVER-CHARGES. TO ENSURE THAT THE INCURRENCE OF FUNDING OBLIGATIONS AND CORRESPONDING FINANCE AMOUNTS DO NOT CONFLICT WITH THE FAIR ADJUSTMENT (AND REDUCED HYDRO RATES), THERE WILL BE A MORATORIUM ON CLEAN ENERGY ADJUSTMENTS DURING THE FIRST 5 YEARS (ON BOTH IESO CHARGE THROUGH RECOVERIES AND IN RESPECT OF FINANCE AMOUNTS PAYABLE DURING THESE FIRST 5 YEARS – PROVIDED THAT IF THE LGIC DOES NOT ULTIMATELY DETERMINE THAT A FAIR ADJUSTMENT WILL APPLY IN A YEAR, THE BALANCE, UNDER THE FAP, WILL BE RECOVERABLE BY WAY OF A PASS-THROUGH OF FINANCE AMOUNTS /IESO RECOVERIES. THE IDEA WILL BE THAT THE LGIC WILL DETERMINE THE AMOUNT OF A FAIR ADJUSTMENT PRIOR TO THE RELEVANT PERIOD TO WHICH IT APPLIES. NOTE THAT THE PAST-OVERPAYMENTS WILL BE FACTORED INTO THE FAP ON A GO FORWARD BASIS, IN ADDITION TO THE CONTINUING GREEN COSTS – AND AMORTIZED OVER THE LONGER PERIOD. THE FOLLOWING PROVISION ADDRESSES ONLY THE FIRST YEAR OF THE FAIR ADJUSTMENT.]

Determination of rates, first twelve months

6. (1) The Ontario Energy Board shall determine the rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 in the following manner:

1. Determine the average rate payable by a representative consumer by applying the method set out in subsection (2).

2. Determine the average monthly invoice amount that would be payable by a representative consumer under the rate determined under paragraph 1.

3. Determine the amount that is [# tbc] per cent less than the monthly invoice amount determined under paragraph 2.

4. Determine the average rate payable by a representative consumer that would result in the monthly invoice amount mentioned in paragraph 3 for a representative consumer.

[Note: Query whether 79.16 of the OEBA should be replaced to clearly state that the price-setting work that the OEB does under the RPP is authorized and that the work it must do to accommodate the Fair Adjustments is also authorized going forward.]

Determination of baseline, average rate

(2) For the purposes of paragraph 1 of subsection (1), the follow method applies:[6]

1. The Board shall determine rates in a manner that is consistent with the Standard Supply Service Code issued by the Board.

2. In determining the rates, the Board shall forecast the cost of electricity to be consumed by the consumers to whom the rates apply, taking into consideration adjustments required under section 25.33 of the *Electricity Act, 1998* and shall ensure that the rates reflect those costs.

3. The Board shall set an off-peak period associated with the regulated price referred to as RPEMOFF in section 3.4 of the "Standard Supply Service Code for Electricity Distributors" issued by the Board,

    i. that begins no later than 7 p.m. on every weekday and ends,

        A. no earlier than 7 a.m. on the next day if the next day is a weekday, or

        B. no earlier than 12 a.m. on the next day if the next day is Saturday, Sunday or a holiday, and

[6] FLS: Please see section 6 of O. Reg. 95/05 (a bilingual reg).

Confidential Draft

ii. that begins no later than 12 a.m. on every Saturday, Sunday and holiday and ends no earlier than,

A. 12 a.m. on the next day, if the next day is Saturday, Sunday or a holiday, or

B. 7 a.m. on the next day if the next day is a weekday.

Determination of rates, on and after May 1, 2018

7. On and after May 1, 2018, the Board shall determine the rate for electricity payable by a specified consumer in the following manner:

1. Determine the rate by applying the steps set out in section 6.

2. Adjust the rate determined under paragraph 1 for inflation in accordance with the regulations.

PART III
CLEAN ENERGY ADJUSTMENT PERIOD

Application of Part

8x. This Part applies in respect of the period beginning on May 1, 2022 and ending on April 30, 2047.

[NOTE: CONSISTENT WITH THE EARLIER NOTE, THE MORATORIUM IS LIFTED IF THE LGIC DETERMINES THAT NO FAIR ADJUSTMENT WILL APPLY, IN WHICH CASE CEAs WILL APPLY DURING THE FIRST 5 YEARS. THE DIVISION OF TIME CONTEMPLATED IN THIS DRAFT IS MORE INFLEXIBLE THAN WE HAVE ENVISIONED]

Specified consumers to pay clean energy adjustment

9x. (1) Subject to subsection (1.1), upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

[NOTE: MODIFY TO REFLECT THAT THE PAYMENT IS MADE TO AN EV, AS AGENT FOR THE INVESTMENT ASSET OWNERS]

Limitation

(1.1) No clean energy adjustment is payable by a specified consumer on a day before May 1, 2022. [NOTE: MODIFY TO REFLECT EARLIER NOTES]

Confidential Draft

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether payment of the amounts is inconsistent with the Fair Allocation Plan applicable at the time when the payment is due;

(b) whether the payments relate to funding obligations that were incurred in a manner that did not comply with the Financing Plan; and [NOTE: UNDER CONSIDERATION. SEEMS OVERBROAD]

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to the investment asset owners in respect of their respective interests in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise. [NOTE: ENFORCEMENT WILL BE LIMITED UNDER THE ACT, SO THAT INVESTMENT ASSET OWNERS CAN'T SERVE NOTICES ON RATEPAYERS DIRECTLY, OTHER THAN THROUGH A SPECIFIED AGENT AND PROCESS – SEE BELOW]

Irrevocability of clean energy adjustment

10x. (1) Any clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is an error in calculations made by the electricity vendor.

Determination of clean energy adjustment

11x. (1) The Ontario Energy Board shall apply the method set out in Schedule 1 to determine the amount of the clean energy adjustment payable on a monthly basis by each electricity vendor on behalf of the electricity vendor's specified consumers. . [NOTE: THE AMOUNTS WILL BE CALCULATED AS FOLLOWS: (1) FSM (FOR ALL IAOs) WILL INFORM OEB OF PERIOD FINANCE AMOUNTS FOR THE REFERENCE PERIOD (IE ESTIMATE OF FAs PLUS PAST TRUE UP ALLOCATION) (2) OEB WILL ATTRIBUTE THAT AGGREGATE AMOUNT

Confidential Draft

BASED ON RPP-LIKE RATE DETERMINATION FOR CUSTOMERS OF THE RELEVANT CLASSES (3) OEB WILL TELL EVs THE RATES APPLICABLE TO THEIR CUSTOMERS, SO THAT THE FULL AMOUNT IN (1) IS RECOVERED (BASED ON EXPECTED COLLECTION RATES AND NONE PAYMENTS)]

True up amount

(2) The Ontario Energy Board may adjust the amount determined under Schedule 1 from time to time to address the any difference between the amount of the clean energy adjustment payable in respect of the reference period and the amount of the clean energy adjustment collected as of the date of the determination. [NOTE: THIS IS ONLY A PARTIAL DESCRIPTION OF THE TRUE UP. SEE EARLIER DRAFTING INSTRUCTION FOR SUGGESTED APPROACH – I.E., DESCRIBE BROADLY THE NATURE OF THE CALCULATION AND THEN SPECIFY THE CALCULATION IN A DETAILED CALCULATION TO BE INCLUDED IN A REGULATION]

Same, regulations

(3) The Lieutenant Governor in Council may make regulations governing the calculation under subsection (2) and how the amount is to be applied to the clean energy adjustment.

Communication to electricity vendors

(4) The Ontario Energy Board shall communicate to each electricity vendor information relating to the clean energy adjustment to be allocated by the electricity vendor to each specified consumer in respect of a reference period. [NOTE: WE ARE NOT SURE THERE IS A ROLE FOR IESO. WE THOUGHT THE PERIOD FINANCE AMOUNTS WOULD BE FORWARED BY FSM TO OEB DIRECTLY]

IESO to invoice electricity vendors

12x. (2) The IESO shall issue an invoice to each electricity vendor for the clean energy adjustments in accordance with the regulations.

IESO to collect

(3) The IESO shall, as an agent of the investment asset owner, make reasonably diligent efforts to collect clean energy adjustments from electricity vendors.

Collection account

(3.1) The IESO shall establish an account in which to record its collection of the following:

1. Amounts remitted from accounts established under section 31.

2. Payments made by specified consumers directly to the IESO as electricity vendor, in respect of clean energy adjustments.

Confidential Draft

Deposit

(4) The IESO shall promptly deposit all amounts received in respect of clean energy adjustments into the account established under subsection (3.1). [NOTE: CONSIDER FEASIBILITY OF DAILY SEGREGATION/ REMITTANCES]

Same, held in trust

(2) The amounts collected are deemed to be held in trust for the investment asset owner.

IESO to remit

(5) The IESO shall remit amounts received in respect of clean energy adjustments to or for the benefit of the regulatory asset owner in accordance with the regulations.

Electricity vendor to apply rate

13x. (1) Each electricity vendor shall [in accordance with the regulations?] determine the proportionate share of clean energy adjustments payable on a monthly basis by each of its specified consumers.

Electricity vendor to invoice specified consumers

(2) The electricity vendor shall issue an invoice to each specified consumer for the applicable amount of clean energy adjustments in accordance with the regulations.

Electricity vendor to collect

(3) Each electricity vendor shall, as an agent of the IESO, make reasonably diligent efforts to collect clean energy adjustments from specified consumers.

Pro rating of payments

14x. (1) This section applies if,

(a) an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices; and

(b) the amount paid is less than the total amount payable.

Same

(2) The electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices.

Deposit

(3) The electricity vendor shall deposit the portion of the payment allocated to clean energy adjustments into the account established under X.

Confidential Draft

Electricity vendor, account

15x. (1) Each electricity vendor shall establish and maintain an account into which the electricity vendor deposits or receives only the following:

1. Payments by specified consumers in respect of clean energy adjustments.

2. Portions of payments by specified consumers that are allocated to clean energy adjustments under subsection 30 (2).

3. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Held in trust

(2) The amounts required to be deposited or received into the account are deemed to be held in trust for the investment asset owner.

Remittance to IESO

(5) The electricity vendor shall remit amounts received in respect of clean energy adjustments to the IESO for the benefit of the investment asset owner in accordance with the regulations.

Payment re regulatory asset

(x) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the applicable Fair Allocation Plan, the difference is payable to the IESO by the specified consumers.

[NOTE: REQUIRES FURTHER CONSIDERATION.]

PART IV
FAIR ALLOCATION PLAN AND FINANCING PLAN

Fair Allocation Plan

Minister to prepare plan

8. (1) In order to fairly measure and allocate amounts described in section 8.0.1 as of a specified day among specified consumers for the purposes of this Act, the Minister shall prepare and provide to the Lieutenant Governor in Council a written plan entitled the Fair Allocation Plan to take effect on the specified day.

Amendments to the plan

(2) Subject to the approval of the Lieutenant Governor in Council, the Minister may amend the Fair Allocation Plan from time to time, as the Minister considers appropriate, having regard to the requirements of this Act.

Confidential Draft

Effective date

(3) The Fair Allocation Plan or an amendment to the plan takes effect on the day that the plan or the amendment, as the case may be, is approved by the Lieutenant Governor in Council.

Publication

(4) The Minister shall ensure that the Fair Allocation Plan and any amendments to the plan are made available to the public in a manner that the Minister considers appropriate.

Amounts to be allocated

8.0.1 The amounts referred to in subsection 8 (1) are, in relation to a specified day,

[NOTE: THE IDEA IS THAT THE EXPECTED FUTURE GREEN COSTS WILL BE INCLUDED AS COSTS, AND RATHER THAN AMORTIZING THEM BASED ON THE TERMS OF THE POWER CONTRACTS, THE COSTS WILL BE AMORTIZED AND PASSED THROUGH BASED ON A MORE ACCURATE AMORTIZATION SCHEDULE TIED MORE TO THE COSTS AND BENEFITS OF THE GREEN PLAN OVER THE NEXT 30 YEARS. IN ADDITION, TO THE EXTENT THAT THERE HAVE BEEN OVER-CHARGES (BASED ON THE SHORT AMORTIZATION OF GREEN COSTS) SINCE 2005, THOSE OVERAGES WILL BE ADDED TO THE AMOUNT OF THE FAP COSTS TO BE AMORTIZED OVER THE FUTURE – I.E., THE FUTURE GENERATIONS WOULD HAVE BENEFITED FROM AN ARTIFICALLY LOW SHARE OF THE COSTS SINCE THE RATEPAYERS FOR 2005 – 2017 PAID TOO MUCH, SO WE SHOULD BE ABLE TO ADD THOSE TO THE FUTURE GROUPS AND RECOGNIZE A FAIR ADJUSTMENT FOR CURRENT RATEPAYERS]

(a) the costs incurred by the IESO before that day or expected to be incurred by the IESO on or after that day in relation to,

(i) payments made or expected to be made under section 78.1 of the *Ontario Energy Board Act, 1998*, other than payments made under contracts with Bruce Power L.P or Bruce Power A. L.P. or their successors or assigns, and

(ii) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*; and

(b) such other costs, benefits or amounts as may be prescribed, in respect of the clean energy initiative, made or received before that day or expected to be incurred on or after that day. (“French”)

C.C.R.E. Draft

Principles

8.1 In preparing the Fair Allocation Plan or any amendments to the plan, the Minister shall have regard to the following principles:

1. The amounts should not be allocated in respect of any period of time after April 30, 2047.

1.1 At no time should the Fair Allocation Plan impair any investment asset, outstanding funding obligation or clean energy adjustment.

2. The share of the amounts allocated to specified consumers who receive an invoice in respect of a reference period should be proportionate to a reasonable assessment of the benefits derived by those consumers during that reference period.

3. The specified consumers to whom an invoice is issued during a reference period should not bear an unreasonably disproportionate share of the amounts allocated.

4. Adjustments should be made over time if the Minister is of the opinion that specified consumers have paid more than is reasonably proportionate.

5. Allocation of amounts should be determined for each reference period.

6. A reasonable estimate of the rate of inflation should be applied [in accordance with the regulations?].

Compliance

8.2 The IESO and the Financial Services Manager shall not, at any time, exceed the limits set out in the applicable Fair Allocation Plan.

[NOTE: THIS IS TOO STRONG. THE IDEA IS THAT IESO'S RIGHT OF RECOVERY WILL BE LIMITED IN A REFERENCE PERIOD BY THE FAP AMOUNT FOR THE PERIOD, MINUS THE FINANCE AMOUNTS FOR THE PERIOD. IN THIS WAY, THE IESO WILL BE ENTITLED TO PASS-THROUGH RECOVERIES IN A WAY THAT AFFECTS THE HYDRO BILLS OF EACH REFERENCE PERIOD RATEPAYERS IN A WAY THAT TRACKS THE FAP. SIMILARLY, IF IESO HAS TRANSFERRED ITS RECOVERY RIGHTS TO A IAO, THEN THE RELATED CEAs FOR THAT IAO WILL BE INSIDE THE FAP – AGAIN, SO THAT THE RATEPAYERS OF THAT PERIOD DO NOT BEAR A DISPROPORTIONATE BURDEN FOR THOSE COSTS. THESE CONCEPTS ARE REFLECTED IN THE MECHANICS DEALING WITH IESO RECOVERIES AND PASSING THROUGH CEAs, AND SO THIS SECTION CAN PROBABLY BE REMOVED]

fidential Draft

FINANCING PLAN

Financial Services Manager to prepare plan

11. (1) The Financial Services Manager shall prepare and provide to the Minister a plan entitled the Financing Plan for the purpose of ensuring that decisions made under this Act are cost-effective and consistent with the Fair Allocation Plan.

Amendments to approved plan

(2) The financial services manager may propose amendments to the Financing Plan at any time.

[NOTE: THE FINANCING PLAN IS SUPPOSED TO BE FLEXIBLE, UNLIKE THE FAP. FORMAL AMENDMENTS WOULD MAKE THIS TOO RIGID. THE FSM SHOULD KEEP RECORDS OF THE FP OVERTIME, SO THAT FUNDING DECISIONS CAN BE DETERMINED BASED ON THE PRINCIPLES AND THERE IS A MEASURE OF ACCOUNTABILITY FOR THE FSM, INSOFAR AS THE RECORD-KEEPING WILL ALLOW THE MINISTER TO DO A PERIODIC CHECK TO MAKE SURE THAT FUNDING OBLIGATIONS WERE INCURRED IN MATERIAL CONFORMITY WITH THE FSM'S EVOLVING FP. THE CONCEPT OF THE FP IS TO CREATE DISCIPLINE, THOUGHFULNESS AND SOME MEASURE OF ACCOUNTABILITY FOR FSM IN MAKING FINDING DECISIONS.]

Compliance with Plan

11.1 The Financial Services Manager shall comply with the Financing Plan.

[NOTE: PROBABLY TOO RIGID A STATEMENT – SEE ABOVE. ALSO, OPG SEEMS TO HAVE ACCOUNTING ISSUES WITH THIS SORT OF MANDATORY DIRECTION – NEED TO CONFIRM]

Contents of plan

12. (1) The Financing Plan shall be prepared in accordance with the regulations and shall include such matters as may be prescribed, which may include the following:

1. A description of one or more transfers that may be made in respect of the regulatory asset established under Part **.

2. A description of the basis upon which funding obligations may be incurred in a manner that is consistent with the applicable Fair Allocation Plan.

3. A description of the funding obligations mentioned in paragraph 2, which may include the following:

    i. Indebtedness.

Confidential – Draft

ii. Payment obligations arising under or in respect of derivatives.

iii. Payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies.

iv. Refinancing an existing funding obligation by applying the net proceeds obtained by incurring other funding obligations.

[NOTE: PRINCIPLES AND PARAMETERS ARE UNDER CONSIDERATION AND WILL BE INCLUDED IN THE REGULATION.]

Limitation

(1.1) The Financing Plan shall not provide for the payment of the clean energy adjustment by specified consumers before May 1, 2022. [NOTE: WOULD PREFER TO SAY (1) NO CEAs IN THE FIRST 5 YEARS UNTIL, FOR A YEAR, THE LGIC CONFIRMS THAT THERE WILL NOT BE A FAIR ADJUSTMENT FOR THAT YEAR. SEE MECHANICS, ABOVE.]

Special purpose financing entities

(2) If the Financial Services Manager is a prescribed entity, the Financing Plan may, in accordance with the regulations, provide for the establishment by that entity of one or more special purpose financing entities that may incur funding obligations.

[Note: I understand that OPG doesn't need authority to establish a SPV beyond existing OPG authority under the EA, but do you still want something like subs. (2) for an entity other than OPG? It almost makes it look like OPG is not authorized to do so, since the provision singles out prescribed entities. Need to consider further]

[NOTE: THIS CONCEPT SHOULD BE MOVED TO THE REGULATION]

Limit on liquidation, etc. of [special purpose funding entities]

(3) The Financing Plan shall not provide for a [special purpose funding entity] tbe be liquidated, dissolved or voluntarily wound-up until at least one year after all of the funding obligations the entity has incurred have been satisfied. [NOTE: MOVE TO THE REGULATION]

Prohibition

(3) The Financing Plan shall not provide for funding obligations to be incurred with any recourse to any assets of the electricity vendors, the IESO, the Ontario Energy Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation.

Confidential – Draft for discussion purposes only

Funding obligations unaffected by amendment to Fair Allocation Plan

(4) No change to a funding obligation shall result from an amendment to the Fair Allocation Plan that is made after the funding obligation has been incurred.

[Note: Consider Article 8 (9) entitled "incurrences are binding" -- I believe we have already stated in the Part dealing with the regulatory asset that the rights are enforceable etc. even if charges have been imposed in a manner that does not follow the Financing Plan. Is more drafting required?]

PART V
THE REGULATORY ASSET [AND INVESTMENT ASSET]

Regulatory asset established

22. (1) The IESO has property rights and interests, which together constitute a regulatory asset, in the recovery of the IESO funding shortfall.

[Note to draft - Is it sufficient to say "*property rights and interests in the recovery of the IESO funding shortfall"?* Does that convey the right to enforce other parties' obligations that would allow for the shortfall to be recovered by the IESO?]

Limitation

(1.1) The right to recover the IESO funding shortfall under subsection (1) is subject to the following limits:

1. The amount recovered in respect of a reference period may not exceed the amount by which the [fair allocation] in respect of a reference period exceeds the amount of the clean energy adjustment for the reference period. [NOTE: CONSIDER IF THIS SHOULD BE A MAXIMUM OR A MANDATORY FLOW-THROUGH. IF THE IESO RECOVERIES PLUS CEAs FOR A PERIOD ARE LESS THAN THE FAIR ALLOCATION FOR A PERIOD, THEN THE RATEPAYERS OF THE PERIOD WILL BENEFIT FROM A LESSER SHARE OF THE COSTS THAN WOULD BE INDICATED BY THE FAP]
2. No part of the funding shortfall shall be recovered before May 1, 2022. [NOTE: TOO RIGID. SEE CONCEPT OF FAIR ADJUSTMENT, ABOVE]

Same

(2) The establishment of the regulatory asset is not affected by any failure to impose, attribute, invoice, accrue or collect the clean energy adjustment.

Recording of IESO funding shortfall in books

22.1 (1) Subject to the approval by order of the Ontario Energy Board, the IESO shall record the IESO funding shortfall from time to time in its books. [NOTE: THIS SHOULD ALSO INCLUDE ADJUSTMENTS WHEN THERE IS A TRANSFER OR RECOVERY – I.E., THE REGULATORY ASSET AMOUNT RECORDED SHOULD BE REDUCED]

Confidential Draft

Order

(2) The Ontario Energy Board may, in accordance with the regulations, by order specify how the IESO funding shortfall must be recorded.

Recording in books determinative

(3) A recording in its books is determinative of the amount of IESO funding shortfall at the time of the recording.

IESO funding shortfall

22.2 (1) The IESO shall determine the IESO funding shortfall for each month in a reference period by calculating the difference between the following amounts:

1. The sum of all invoice amounts issued to specified consumers for the month.

2. The sum of all invoice amounts that would have been issued to specified consumers for the month if paragraphs 1 and 2 of section 7.2 did not apply.

[Note: Should the value of any consideration received as part of a transfer be reflected in this section?]

Same

(2) The determination under subsection (1) shall be made based on the amount of electricity actually used by specified consumers during the reference period.

[NOTE: FUNDING SHORTFALL DESCRIPTION MAY ALSO RELFECT ADJUSTMENT BASED ON ESTIMATE TO ACTUAL FROM EARLIER MONTH]

Transfer of regulatory asset

23. (1) The IESO may transfer the regulatory asset in accordance with the Financing Plan.

Consideration

(2) The IESO may receive consideration for the transfer of the regulatory asset, subject to the following rules:

1. The prospective owner of the investment asset to be acquired through the transfer shall pay to the IESO an amount equal to all or part of the IESO funding shortfall. [NOTE: INVESTMENT ASSET TO BE BASED ON FACE VALUE SO THAT THE IESO RECOVERY IS DOLLAR-FOR-DOLLAR. THIS MEANS THAT ACCRUALS WILL BE NEEDED FOR INITIAL PERIOD, RATHER THAN THE TRUST BUYING INVESTMENT INTERESTS AT A DISCOUNT AND HOLDING BACK ISSUE PROCEEDS TO FUND THOSE AMOUNTS.]

Confidential Draft

2. Upon receipt of the payment, the IESO shall record the payment as a reduction of the AGGREGATE IESO funding shortfall in its books.

3. Upon receipt of the payment, the IESO shall have no continuing right or interest in, or maintain any right to recover all or any part of the transferred regulatory asset.

Investment asset

Regulatory asset deemed to be investment asset upon transfer

23.1 Upon transfer of the regulatory asset or a portion of the regulatory asset, the regulatory asset or portion is deemed to be an investment asset and is vested in the investment asset owner.

[NOTE: DEEMING LANGUAGE TO ADDRESS TRANSFER AND CONVEYANCE IS UNDER CONSIDERATION.]

[NOTE: THE ASSET TRANSFERRED BY IESO WILL BE A RIGHT OF RECOVERY, BY REFERENCE TO CEAs. THE ASSET ACQUIRED WILL BE AN "INVESTMENT INTEREST", BEING A SHARE (THE TERMS AND ENTITLEMENTS OF WHICH WILL BE DETERMINED UNDER A COLLECTIVE RIGHTS AGREEMENT) OF THE RIGHTS AND RELATED PROCEEDS FROM THE RIGHT TO BILL, ETC., CEAs. THE SUM OF ALL INVESTMENT INTERESTS WILL BE THE "INVESTMENT ASSET".]

Same

(2) An investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication:

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any amounts that all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

Confidential Draft

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Same

(3) An investment asset is not affected by failure to impose, attribute, invoice, accrue or collect the clean energy adjustment.

No set off, etc.

(4) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, the IESO, an agent of the investment asset owner or an owner of distribution system assets in the Province; [NOTE: IF THE MECHANICS FOR CASH FLOWS ADOPT THE PRE-EXISTING METHODS AND TERMS AMONG IESO, LDCs AND RATEPAYERS, THIS PROVISION WILL NEED TO RECOGNIZE THAT THOSE TERMS WILL PREVAIL AND NOT BE AFFECTED BY THE NEUTERING OF SET-OFF, ETC.]

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); [NOTE: CONSIDER IN CONTEXT OF FEDERAL BANKRUPTCY POWERS]

(c) by any affiliate or successor of a person mentioned in clause (a).

Transfer of investment asset

24. The investment asset owner may transfer all or a portion of its rights and interests in an investment asset to any other investment asset owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Confidential Draft

Validity of transfer

25. (1) A transfer of a regulatory asset or an investment asset under this Act that is expressed to be a sale or an absolute assignment is a valid and enforceable sale and absolute assignment of the regulatory asset or investment asset, as the case may be, and confers upon the owner of the investment asset acquired a valid property right and interest in, to and under the applicable investment asset in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall or an investment asset owner's right, title and interest in, to and under an investment asset, as applicable (or relevant portion thereof), and not merely as a pledge thereof, and upon such absolute transfer the transferor shall retain no right, title or interest in regulatory asset or the investment asset (or relevant portion thereof) subject to the transfer, including all rights to recover the IESO funding shortfall or the investment asset arising after such transfer. [NOTE: ADDRESSES POSSIBLE RECHARACTERIZATION CONSIDERATIONS. MARKET WILL EXPECT TO SEE THIS GIVEN SECURITIZATION CONCEPTS IN PLAY.]

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset or an investment asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the owner of the investment asset shall have priority over any liens in favour of such other persons.

Administration of investment asset

26. (1) The Financial Services Manager shall administer an investment asset on behalf of the owner of the investment asset. [NOTE: TO BE ELABORATED]

Review of costs

(2) The Ontario Energy Board shall review the administrative costs of the Financial Services Manager. [NOTE: TO BE ELABORATED]

Confidential Draft

Investment asset owner may grant pledge

27. (1) The owner of an investment asset may grant a pledge to or in favour of a person in, to and over all or a specified portion of its right, title and interest in, to and under the investment asset in connection with any funding obligation.

Types of pledge

(2) A pledge may be a lien, mortgage, charge, right of set-off or security interest.

Validity

(3) The pledge may be made to secure a funding obligation and when granted shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the person to whom the pledge is granted a valid security interest in, to and in respect of the investment asset in accordance with the terms of the pledge.

[Note: Additional content relating to the PPSA has not yet been addressed in any detail. Please review all subsections that contain the (x) below and advise what is needed. Some of this content was already covered by some of the numbered subsections in this draft.]

Perfection and priority of pledges

(x) For purposes of the *Personal Property Security Act*, the regulatory asset shall be intangible personal property and any pledge made by the owner of an investment asset in respect of a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Same

(x) All provisions of the *Personal Property Security Act* shall apply to the regulatory asset on the basis that it is intangible personal property, except to the extent otherwise provided in this section.

Same

(x) All proceeds of a related [Investment Interest?] that are subject to the pledge that are received by the owner of the investment asset shall immediately be subject to the pledge, and the security interest in the proceeds shall be perfected pursuant to the *Personal Property Security Act.*

Same

(x) A pledge perfected under the *Personal Property Security Act* shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the [Investment Interest?] subject to the pledge unless the pledgee has otherwise agreed in writing.

Confidential Draft

Same

(x) A pledgee shall have a perfected security interest in a related investment interest, including the owner of the investment asset's rights and interests in and to [the clean energy adjustment?] or other related proceeds in respect of the investment interest and that are deposited in any [which account?] or other account of any [Electricity Distributor, IESO, Alternative Servicer or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds].

Proceeds

(8) All proceeds of the investment asset that are subject to the pledge and that are received by the investment asset owner shall immediately be subject to the pledge and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(9) The pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment asset subject to the Pledge, subject to the written consent of the person to whom the pledge has been granted.

Same

(10) The person to whom the pledge has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person who may have commingled such revenues or other proceeds with other funds.

Collective action required

28. If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: It seems that successors may need to be addressed here. Also Pledgees have not yet been addressed in this draft.]

Exercise of rights

29. The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset shall be exercised in accordance with section [xx].

Confidential Draft

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

34. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

35.1 For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

35.2 [Note: Still to be drafted:
If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect clean energy adjustments, defaults on any required remittance of Clean energy adjustment Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Clean energy adjustment Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Clean energy adjustments, as applicable.]

Successors

37. [Note: Articles 4 (6) and (7) and Articles 5 (7) and (8) are rules about successors to distributors and the IESO being bound by specific requirements. Still to be drafted.]

Choice of law

37.1 The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

38. The provisions of this Act [and the regulations?] apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or PLEDGE,

Confidential – Draft for discussion purposes only

No further approvals, etc.

39. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan or in relation to the establishment of the Fair Allocation Plan.

Immunity

97x. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

98x. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under this section unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[7]

99x. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

100x. The Lieutenant Governor in Council may make regulations,

(b) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

[Note: reg-making powers to be dealt with in subsequent draft]

Confidential Draft

[7] FLS - see s. 51 of the Electricity Act, 1998

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

(q.1) to enter into agreements or arrangements with [any special purpose financing entities established under (name of new Fair Hydro Act?)];

(q.2) to engage in activities related to making payments to and receiving payments from [any special purpose financing entities established under (name of new Fair Hydro Act?)], as required under that Act, and to engage in related settlement activities;

(q.3) to engage in activities related to the transfer of the regulatory asset created under [(name of new Fair Hydro Act?)], which activities may include,

(i) incurring liabilities in relation to the regulatory asset

(ii) transferring the regulatory asset to [any special purpose financing entities established under (name of new Fair Hydro Act?)];

(iii) transferring the regulatory asset to third parties;

(q.4) acting as a recovery agent under the [(name of new Fair Hydro Act?)];

201x. Subsection 53.1 (1) of the Act would be repealed and the following substituted:

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, the following:

1. Owning and operating generation facilities.

2. Establishing, operating and supervising the activities of [any special purpose financing entities established under (name of new Fair Hydro Act?)].

[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

Confidential Draft

3. Providing financial and other support to the IESO in its activities under the [name of new Fair Hydro Act?].

4. Engaging in such financing, borrowing, lending and related activities and transactions to support the IESO with short-term or long-term financing.

5. Providing equity, not exceeding the prescribed amount, to support the financing capacity [any special purpose financing entities established under (name of new Fair Hydro Act?)].

[Note: Still to draft:
-for the new Fair Hydro Bill: *if OPG is the Financial Services Manager, it shall be required to provide an accounting of the amounts it charges the trust for the financing entity to the OEB 60 days in advance of the commencement of the fiscal year for the OPG trust/special purpose vehicle*]

Subsidiaries

(1.1) Ontario Power Generation Inc. may create one or more subsidiaries in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under [new Act].

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under [new Act].

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

Confidential Draft

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 71 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1) - instructions on pp. 8-9 of Rider instructions rec'd April 14th]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Confidential Draft

SCHEDULE 1
METHOD FOR DETERMINING AMOUNT OF CLEAN ENERGY ADJUSTMENT FOR REFERENCE PERIOD

[NOTE: CEAs WILL BE DETERMINED BASED ON AN ESTIMATE OF COSTS AND REPAYMENTS FOR AN UPCOMING PERIOD, AND BE TRUED UP TO ACTUAL COSTS AND REPYAMENTS IN THE NEXT FOLLOWING PERIOD. THESE MECHANICS CAN BE SEEN IN THE SUMMARY DOCUMENT – "PERIOD FINANCE AMOUNTS" AND SECONDARY DEFINITIONS. THIS FORMULAIC APPROACH IS PREFERRED TO ESTABLISH A SUM CERTAIN OF THE DEBT REPRESENTED BY THE CEAs, ONCE BILLED. IT MAY BE USEFUL TO CREATE A DEFINITION TO ENCOMPASS ALL CEAs FOR A PERIOD, SINCE A CEA IS THE AMOUNT BILLED TO A PARTICULAR CUSTOMER]

1. The amount of the clean energy adjustment for a reference period shall be determined by calculating the sum of the following:

1. The sum of all payments made by owners of an investment asset [during the reference period?] to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

[Note: Para. 1 is the definition of "repayment" from the Blakes doc. However, that definition include bracketed text that says: (*including making Finance Reserve Deposits).* I don't understand this because (1) Finance Reserve Deposit is listed as a separate line item in the definition of "finance amount" (see para. 4 below). In order to avoid duplication, can we exclude "finance reserve deposits" from para. 1?]

[NOTE THAT SHOULD LIMIT CONCEPT OF RESERVE DEPOSITS AS INCURRENCES IF IT WOULD MEAN THAT THE PROCEEDS FROM A TRANSFER WOULD BE REDUCED FROM FACE VALUE WITH THE RESULT THAT IESO WOULD BE TRANSFERRING IAs AT A DISCOUNT]

2. The sum of all funding costs for the reference period, as determined under section 2 to this Schedule.

3. The sum of all amounts payable by or on behalf of owners of investment assets to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

Confidential – Draft for discussion purposes only

[Note: Para. 3 is the definition of "redemption amount" from the Blakes doc.]
[Note: What is meant by "make-whole" -- need some assistance in order to translate this term accurately. Do you have any examples of bilingual legislation where this term has been used?]

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable by owners of investment assets for the reference period that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

[Note: Para. 5 is based on the definition of "additional funding charges".]

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

1. Calculate the aggregate of all interest and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of owners of investment assets during the reference period in respect of all funding obligations, including the following:

    i. Standby commitment fees or charges paid to any lender.

    ii. Credit enhancement fees or charges paid to any credit enhancer.

    iii. Liquidity fees or charges paid to any liquidity provider.

    iv. Payments, including termination payments, made under derivatives.

    v. Deposits made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a funding obligation.

2. Calculate the aggregate of all amounts received by or on behalf of the owners of investment assets during the reference period in respect of a funding obligation, including reimbursement of any amounts referred to in subparagraphs 1 i to v.

[Note: Para. 2 is the definition of "finance receipts" in the Blakes doc.]

Confidential Draft

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

[Note: This section is a modification of the definitions provided in the Blakes document for "Finance Reserve Deposits" and "Finance Reserve Withdrawals". The proposed definition of "FR deposit" involved a subtraction of the "FR withdrawal" so the term 'deposit' was not really descriptive of a pure deposit but rather the balance.]

1. Calculate the sum of all amounts deposited [to what account?] during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn from the account during the reference period from deposits previously made [e.g. during a previous reference period?] as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

EXCERPTS FROM THE ELECTRICITY ACT AND ONTARIO ENERGY BOARD ACT

RELATED TO CONSEQUENTIAL AMENDMENTS

Electricity Act, 1998

Purposes of *Electricity Act, 1998*

1. The purposes of this Act include the following:

(a) to ensure the adequacy, safety, sustainability and reliability of electricity supply in Ontario through responsible planning and management of electricity resources, supply and demand;

(a.1) to establish a mechanism for energy planning;

(b) to encourage electricity conservation and the efficient use of electricity in a manner consistent with the policies of the Government of Ontario;

(c) to facilitate load management in a manner consistent with the policies of the Government of Ontario;

(d) to promote the use of cleaner energy sources and technologies, including alternative energy sources and renewable energy sources, in a manner consistent with the policies of the Government of Ontario;

(e) to provide generators, retailers, market participants and consumers with non-discriminatory access to transmission and distribution systems in Ontario;

(f) to protect the interests of consumers with respect to prices and the adequacy, reliability and quality of electricity service;

(g) to promote economic efficiency and sustainability in the generation, transmission, distribution and sale of electricity;

(g.1) to facilitate the alteration of ownership structures of publicly-owned corporations that transmit, distribute or retail electricity;

(g.2) to facilitate the disposition, in whole or in part, of the Crown's interest in corporations that transmit, distribute or retail electricity, and to make the proceeds of any such disposition available to be appropriated for any Government of Ontario purpose;

(h) to ensure that Ontario Hydro's debt is repaid in a prudent manner and that the burden of debt repayment is fairly distributed;

(i) to facilitate the maintenance of a financially viable electricity industry; and

(j) to protect corridor land so that it remains available for uses that benefit the public, while recognizing the primacy of transmission uses. 2004, c. 23, Sched. A, s. 1; 2014, c. 7, Sched. 7, s. 1; 2015, c. 20, Sched. 9, s. 1; 2016, c. 10, Sched. 2, s. 1.

Objects of the IESO

6 (1) The objects of the IESO are,

(a) to exercise the powers and perform the duties assigned to it under this Act, the regulations, directions, the market rules and its licence;

(b) to enter into agreements with transmitters to give it authority to direct the operation of their transmission systems;

(c) to direct the operation and maintain the reliability of the IESO-controlled grid to promote the purposes of this Act;

(d) to participate in the development by any standards authority of criteria and standards relating to the reliability of the integrated power system;

(e) to establish and enforce criteria and standards relating to the reliability of the integrated power system;

(f) to work with the responsible authorities outside of Ontario to co-ordinate the IESO's activities with the activities of those authorities;

(g) to operate the IESO-administered markets to promote the purposes of this Act;

(h) to engage in activities related to contracting for the procurement of electricity supply, electricity capacity, electricity storage, transmission systems or any part of such systems and conservation resources;

(i) to engage in activities related to settlements, payments under a contract entered into under the authority of this Act and payments provided for under this Act or the *Ontario Energy Board Act, 1998*;

(j) to engage in activities in support of the goal of ensuring adequate, reliable and secure electricity supply and resources in Ontario;

(k) to forecast electricity demand and the adequacy and reliability of electricity resources for Ontario for the short term, medium term and long term;

(l) to conduct independent planning for electricity generation, demand management, conservation and transmission;

(m) to engage in activities to facilitate the diversification of sources of electricity supply by promoting the use of cleaner energy sources and technologies, including alternative energy sources and renewable energy sources;

(n) to engage in activities in support of system-wide goals for the amount of electricity to be produced from different energy sources;

(o) to engage in activities that facilitate load management;

(p) to engage in activities that promote electricity conservation and the efficient use of electricity;

(q) to assist the Board by facilitating stability in rates for certain types of consumers;

(r) to collect and make public information relating to the short term, medium term and long term electricity needs of Ontario and the adequacy and reliability of the integrated power system to meet those needs; and

(s) to engage in such other objects as may be prescribed by the regulations. 2014, c. 7, Sched. 7, s. 3 (1); 2016, c. 10, Sched. 2, s. 3.

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, owning and operating generation facilities. 2002, c. 1, Sched. A, s. 11.

Status

(2) Ontario Power Generation Inc. and its subsidiaries are not agents of Her Majesty for any purpose, despite the *Crown Agency Act*. 2002, c. 1, Sched. A, s. 11.

Rights of the Minister

53.2 The Minister, on behalf of Her Majesty in right of Ontario, may acquire and hold shares of Ontario Power Generation Inc. 2002, c. 1, Sched. A, s. 11.

Corporations to hold shares

53.3 (1) The Lieutenant Governor in Council may cause corporations to be incorporated under the *Business Corporations Act* for the purpose of acquiring and holding shares in Ontario Power Generation Inc. 2002, c. 1, Sched. A, s. 11.

Same

(2) Shares in a corporation incorporated pursuant to subsection (1) may be acquired and held in the name of Her Majesty in right of Ontario by a member of the Executive Council designated by the Lieutenant Governor in Council. 2002, c. 1, Sched. A, s. 11.

Crown agent

(3) A corporation incorporated pursuant to subsection (1) is an agent of Her Majesty for all purposes. 2002, c. 1, Sched. A, s. 11.

Dividends paid to Crown agent

(4) If an agent of Her Majesty in right of Ontario is paid dividends in respect of shares of Ontario Power Generation Inc., the agent shall pay the dividends to the Financial Corporation, less any amount that it considers is required to pay obligations it has assumed under clause 122 (1) (a). 2002, c. 1, Sched. A, s. 11.

Reporting requirements

53.4 (1) Ontario Power Generation Inc. shall, within 90 days after the end of every fiscal year, submit to the Minister an annual report on its affairs during that fiscal year, signed by the chair of the board of directors. 2002, c. 1, Sched. A, s. 11.

Same

(2) The Minister shall submit the annual report to the Lieutenant Governor in Council and shall then table the report in the Assembly. 2002, c. 1, Sched. A, s. 11.

Same

(3) Ontario Power Generation Inc. may give its annual report to other persons before the Minister complies with subsection (2). 2002, c. 1, Sched. A, s. 11.

Additional reports and information

(4) Ontario Power Generation Inc. shall give such other reports and information to the Minister of Finance or to the Minister as each of them may require from time to time. 2002, c. 1, Sched. A, s. 11.

Residual power of the Crown

53.5 Nothing in this Part restricts the powers of Her Majesty in right of Ontario or any member of the Executive Council at common law or under any Act, whether as a shareholder or otherwise. 2002, c. 1, Sched. A, s. 11.

[. . .]

Payments in lieu of federal corporate tax

89 (1) If Hydro One Inc., a subsidiary of Hydro One Inc., Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. is exempt under subsection 149 (1) of the *Income Tax Act* (Canada) from the payment of tax under that Act, it shall pay to the Financial Corporation in respect of each taxation year an amount equal to the amount of the tax that it would be liable to pay under that Act if it were a corporation to which that subsection did not apply. 1998, c. 15, Sched. A, s. 89 (1); 2002, c. 1, Sched. A, s. 15 (1); 2007, c. 7, Sched. 12, s. 2.

Corridor land

(1.1) The amount payable under subsection (1) by a person or entity from whom corridor land is transferred by section 114.2 shall be determined, for the taxation year in which the transfer occurs and for subsequent taxation years, as if the transfer did not occur. 2002, c. 1, Sched. A, s. 15 (2).

Payments to Minister of Finance

(2) After Part V is repealed under section 84.1, all payments required by this section shall be paid to the Minister of Finance, instead of to the Financial Corporation. 1998, c. 15, Sched. A, s. 89 (2); 2000, c. 42, s. 31.

Commencement of new taxation year

(3) A corporation that is required to make payments under this section shall be deemed, for the purposes of this section, to commence a new taxation year on the day this section comes into force.

Payments in lieu of provincial corporate tax

90 (1) If Hydro One Inc., a subsidiary of Hydro One Inc., Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. is exempt under subsection 57 (1) of the *Corporations Tax Act* from the payment of tax under that Act for a taxation year that ends before January 1, 2009, it shall pay to the Financial Corporation in respect of each taxation year ending before that day an amount equal to the total amount of tax that it would be liable to pay under Parts II, II.1 and III of that Act for that year if it were a corporation to which that subsection did not apply. 2007, c. 7, Sched. 12, s. 3 (3).

Same

(1.0.1) If Hydro One Inc., a subsidiary of Hydro One Inc., Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. is exempt under subsection 27 (2) of the *Taxation Act, 2007* from the payment of tax under that Act for a taxation year that ends after December 31, 2008, it shall pay to the Financial Corporation in respect of each taxation year ending after that day an amount equal to the total amount of tax that it would be liable to pay under Divisions B, C and E of Part III of that Act for the taxation year if it were a corporation to which that subsection did not apply. 2007, c. 7, Sched. 12, s. 3 (3).

Corridor land

(1.1) The amount payable under subsection (1) by a person or entity from whom corridor land is transferred by section 114.2 shall be determined, for the taxation year in which the transfer occurs and for subsequent taxation years, as if the transfer did not occur. 2002, c. 1, Sched. A, s. 16 (2).

Payments to Minister of Finance

(2) After Part V is repealed under section 84.1, all payments required by this section shall be paid to the Minister of Finance, instead of to the Financial Corporation. 1998, c. 15, Sched. A, s. 90 (2); 2000, c. 42, s. 32.

Commencement of new taxation year

(3) A corporation that is required to make payments under this section shall be deemed, for the purposes of this section, to commence a new taxation year on the day this section comes into force. 1998, c. 15, Sched. A, s. 90 (3).

Ontario Energy Board Act, 1998

1 (1) The Board, in carrying out its responsibilities under this or any other Act in relation to electricity, shall be guided by the following objectives:

1. To protect the interests of consumers with respect to prices and the adequacy, reliability and quality of electricity service.

1.1 To promote the education of consumers.

2. To promote economic efficiency and cost effectiveness in the generation, transmission, distribution, sale and demand management of electricity and to facilitate the maintenance of a financially viable electricity industry.

3. To promote electricity conservation and demand management in a manner consistent with the policies of the Government of Ontario, including having regard to the consumer's economic circumstances.

4. To facilitate the implementation of a smart grid in Ontario.

5. To promote the use and generation of electricity from renewable energy sources in a manner consistent with the policies of the Government of Ontario, including the timely expansion or reinforcement of transmission systems and distribution systems to accommodate the connection of renewable energy generation facilities. 2004, c. 23, Sched. B, s. 1; 2009, c. 12, Sched. D, s. 1; 2015, c. 29, s. 7.

Licence conditions

70 (1) A licence under this Part may prescribe the conditions under which a person may engage in an activity set out in section 57 and a licence may also contain such other conditions as are appropriate having regard to the objectives of the Board and the purposes of the *Electricity Act, 1998*. 1998, c. 15, Sched. B, s. 70 (1).

Approvals, etc., with or without holding hearing

(1.1) The Board may, with or without a hearing, grant an approval, consent or make a determination that may be required for any of the matters provided for in a licensee's licence. 2009, c. 12, Sched. D, s. 10.

Examples of conditions

(2) The conditions of a licence may include provisions,

(a) specifying the period of time during which the licence will be in effect;

(b) requiring the licensee to provide, in the manner and form determined by the Board, such information as the Board may require;

(c) requiring the licensee to enter into agreements with other persons on specified terms (including terms for a specified duration) approved by the Board relating to its trading or operations or for the connection to or use of any lines or plant owned or operated by the licensee or the other party to the agreement;

(d) governing the conduct of the licensee, including the conduct of,

(i) a transmitter or distributor as that conduct relates to its affiliates,

(ii) a distributor as that conduct relates to a retailer,

(ii.1) a distributor or suite meter provider as such conduct relates to,

(A) the disconnection of the supply of electricity to a consumer, including the manner in which and the time within which the disconnection takes place or is to take place, and with respect to a low-volume consumer, periods during which the disconnection may not take place,

(B) the manner, timing and form in which the notice under subsection 31 (2) of the *Electricity Act, 1998* is to be provided to the consumer, and

(C) subject to the regulations, the manner and circumstances in which security is to be provided or not to be provided by a consumer to a distributor or suite meter provider, including,

(1) the interest rate to be applied to amounts held on deposit and payable by the distributor or suite meter provider to the consumer for the amounts,

(2) the manner and time or times by which the amounts held on deposit may or must be paid or set-off against amounts otherwise due or payable by the consumer,

(3) the circumstances in which security need not be provided or in which specific arrangements in respect of security may or must be provided by the distributor or suite meter provider to the consumer, and

(4) such other matters as the Board may determine in respect of security deposits,

(iii) a retailer, and

(iv) a generator, retailer or person licensed to engage in an activity described in clause 57 (f) or an affiliate of that person as that conduct relates to the abuse or possible abuse of market power;

(d.1) governing conditions relating to any matter prescribed by regulation in respect of retailers of electricity in relation to the retailing of electricity, subject to any regulations made under this Act;

(e) specifying methods or techniques to be applied in determining the licensee's rates;

(f) requiring the licensee to maintain specified accounting records, prepare accounts according to specified principles and maintain organizational units or separate accounts for separate businesses in order to prohibit subsidies between separate businesses;

(g) specifying performance standards, targets and criteria;

(h) specifying connection or retailing obligations to enable reasonable demands for electricity to be met;

(i) specifying information reporting requirements relating to the source of electricity and emissions caused by the generation of electricity;

(j) requiring the licensee to expand or reinforce its transmission or distribution system in accordance with market rules in such a manner as the IESO or the Board may determine;

(k) requiring the licensee to enter into an agreement with the IESO that gives the IESO the authority to direct operations of the licensee's transmission system;

(l) REPEALED: 2016, c. 10, Sched. 2, s. 15.

(m) requiring licensees, where a directive has been issued under section 28.2, to implement such steps or such processes as the Board or the directive requires in order to address risks or liabilities associated with customer billing and payment cycles in respect of the cost of electricity at the retail and at the wholesale levels and risks or liabilities associated with non-payment or default by a consumer or retailer. 1998, c. 15, Sched. B, s. 70 (2); 2003, c. 3, s. 47 (1); 2004, c. 23, Sched. B, s. 11 (1-3); 2010, c. 8, s. 38 (10, 11); 2016, c. 10, Sched. 2, s. 15; 2017, c. 1, s. 2 (1).

Deemed conditions of licences, transmitters and distributors

(2.1) Every licence issued to a transmitter or distributor shall be deemed to contain the following conditions:

1. The licensee is required to provide, in accordance with such rules as may be prescribed by regulation and in the manner mandated by the market rules or by the Board, priority connection access to its transmission system or distribution system for renewable energy generation facilities that meet the requirements prescribed by regulation made under subsection 26 (1.1) of the *Electricity Act, 1998*.
2. The licensee is required to prepare plans, in the manner and at the times mandated by the Board or as prescribed by regulation and to file them with the Board for approval for,

i. the expansion or reinforcement of the licensee's transmission system or distribution system to accommodate the connection of renewable energy generation facilities, and

ii. the development and implementation of the smart grid in relation to the licensee's transmission system or distribution system.

3. The licensee is required, in accordance with a plan referred to in paragraph 2 that has been approved by the Board or in such other manner and at such other times as mandated by the Board or prescribed by regulation,

i. to expand or reinforce its transmission system or distribution system to accommodate the connection of renewable energy generation facilities, and

ii. to make investments for the development and implementation of the smart grid in relation to the licensee's transmission system or distribution system. 2009, c. 12, Sched. D, s. 10.

Deemed condition of licences, unit sub-meter provider, *Ontario Clean Energy Benefit Act, 2010*

(2.2) Every licence issued to a unit sub-meter provider is deemed to contain the condition that the unit sub-meter provider is required to comply with the *Ontario Clean Energy Benefit Act, 2010* and the regulations made under it. 2010, c. 26, Sched. 13, s. 17 (2).

Deemed condition of licences, unit sub-meter provider, *Ontario Rebate for Electricity Consumers Act, 2016*

(2.3) Every licence issued to a unit sub-meter provider is deemed to contain the condition that the unit sub-meter provider is required to comply with the *Ontario Rebate for Electricity Consumers Act, 2016* and the regulations made under it. 2016, c. 19, s. 17 (2).

TOR_2528-#23107566-v13-_Fair_Hydro_Act_.pdf

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act"

Article 1 – Purpose

The Province has and continues to encourage the construction and development of facilities for the long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer, feed in tariff and other similar programs (the "Green Generation Initiative"). The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will continue to benefit present and future electricity consumers in the Province.

The out-of-market costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment").

The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province under the Green Generation Initiative. These amounts paid by the IESO arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with revenue certainty, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. It has been determined that the useful lives of many of the assets developed under the Green Generation Initiative will be in excess of the respective terms of their respective procurement contracts.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective terms of the applicable procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to Regulated Consumers (as defined in Article 2) should be more closely aligned with the benefits that such Regulated Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on general principles and parameters that establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative equitably across present and future Regulated Consumers (the "Fair Allocation Plan").

If the Fair Allocation Plan determines that the equitable allocation of the costs associated with the Green Generation Initiative to the Regulated Consumers of a particular time period should be reduced below the amount that currently would be charged based on the Green Costs Adjustment, then the amount payable by such Regulated Consumers and in turn available to IESO will, in the aggregate, be less than the amount payable by the IESO to the generators in respect of such period. In this case, IESO will need to obtain funding from another source to cover such a shortfall. If a funding obligation is incurred to cover such a shortfall during any period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs incurred will become payable in future periods. In order for IESO to obtain a reliable and committed source

of cash flows to enable IESO to repay such funding amounts when they become due and payable, this Act imposes irrevocable and non-bypassable financial obligations on Regulated Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts. The right and interest in and to collect such financial obligations will take the form of the Regulatory Asset contemplated in this Act, which will constitute property rights and interests. Interests in the Regulatory Asset may be sold and absolutely assigned by IESO to one or more financing entities, which in turn will finance their acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf of such financing entities by a financial services manager under the Financing Plan contemplated in this Act.

The purpose of this Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Regulated Consumers on an equitable and cost effective basis.

Article 2 – Definitions

In this Act:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition other than as security.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Financial Services Manager whose records shall be determinative for the purposes of this Act except to the extent of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by or on behalf of any Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including without limitation such amounts as may be prescribed.
>
> "Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.
>
> "Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to Regulated Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Finance Charges for a Reference Period to Regulated Consumers.

"Collected Amount Adjustment" means, in respect of a True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the Financial Services Manager, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period and minus [(c) the amounts by which amounts remitted by Electricity Distributors pursuant to Section 5(4) exceeded the corresponding amount of Transition Charges Actually paid by Regulated Consumers.][2]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee), each Pledgee, and the Financial Services Manager that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.

"Delegate" means any of the following person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act: ●[3].

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition (or, in the case of the IESO Funding Shortfall, a release by IESO of its right to recover such amount in order to enable an Absolute Assignee to recover such amount) of (a) IESO's right to recover all or any portion of an IESO Funding Shortfall or (b) an Investment Interest, in each case to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which IESO or an Absolute Assignee effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means a rate regulated distributor licensed under Part V of the *Ontario Energy Board Act, 1998*, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to Servicer or if applicable the Alternative Collection Agent in accordance with Section 5(3), including the proceeds of any enforcement action undertaken by the

---

[1] This allocation may be volumetric or some combination of a flat amount and a volumetric charge. Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

[2] This is intended to pick up adjustments based on actual collection experience, changes in the Regulated Consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc. The actual calculation needs work.

[3] Placeholder for delegation once deterermined.

Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.[4]

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, by an Alternative Collection Agent), by the Servicer or by a Retailer, in each case to a Regulated Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to such Electricity Distributor's distribution system and in respect of applicable Transition Charges to be charged to the Regulated Consumer under this Act.

"Estimate" means (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Financial Services Manager; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to Regulated Consumers, the estimated value (in current dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Act except to the extent of a manifest calculation error.

"Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to Regulated Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to Regulated Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, for a Reference Period, the sum (without duplication) of the following amounts that are or become payable during the Reference Period in respect of any Absolute Assignee: (a) Repayments; (b) Net Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

---

[4] Suggestion is that LDCs remit based on estimates and then true-up, based on current arrangements for remittances by LDCs to IESO. *

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financial Services Manager" means OPG or, following any Replacement Event involving OPG, such other person who may be appointed as the financial services manager of the Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[5]

"Financing Entity" means any entity established in accordance with the Financing Plan to be an Absolute Assignee and that is managed by the Financial Services Manager.[6]

"Financing Plan" means the written plan prepared by the Financial Services Manager in accordance with Article 9, as the same may be amended, amended and restated or terminated by the Financial Services Manager in accordance with Article 9 from time to time.

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including each obligation to pay: principal, interest, premiums and other financing charge payments; pass-through payments; payment obligations arising under or in respect of derivatives; payment obligations owing to service providers, Financial Services Managers, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all Additional Funding Charges) incurred by or on behalf of the Absolute Assignee under the Financing Plan, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.

"Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

"Global Adjustment" has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" has the meaning given in Article 1.

---

[5] There must only be one Financial Services Manager.

[6] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act.

"IESO" means the Independent Electricity System Operator created pursuant to Part II of the *Electricity Act, 1998*.

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO , during the month pursuant to section • of the *Electricity Act* in respect of Regulated Consumers. **[NTD: IESO indicates that it likely does not work to express in regards to "amounts payable by the LDCs" because settlement between the IESO and LDCs entails payments by LDCs to the IESO and then credits/debits by the IESO to LDCs to reflect RPP shortfalls/overages.]**

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month.To the extent reasonably necessary to give effect to this Act, or any transaction contemplated hereby, IESO shall calculate the IESO Funding Shortfall for any month taking into account information provided by the Electricity Distributors and (i) such calculation shall be binding for all purposes; and (ii) any demonstrated inaccuracy in the calculation for any month (including any such resulting from inaccuracies in the information provided by Electricity Distributors) shall be accounted for by adjusting the IESO Funding Shortfall for a subsequent month.

"IESO Recovery" means each amount received by IESO in accordance with its right to recover IESO Funding Shortfalls pursuant to section 25.33 of the Electricity Act and Ontario Regulation 430/04, as amended, and "IESO Recoveries" means, collectively, all such amounts received by IESO.[7]

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Regulatory Interest Amount" means, on a day, (a) the sum of all IESO Funding Shortfalls incurred prior to the day, minus (b) the net proceeds received by IESO from or on behalf of each Absolute Assignee as consideration for the Disposition of each Investment Interest paid to IESO by or on behalf of such Absolute Assignee prior to the day, and minus (c) the IESO Recoveries received by IESO prior to the day.

---

[7] IESO will be entitled to record the IESO Funding Shortfall amount in a variance account. The OEB will eliminate and dispose of the variance account balance as part of the RPP adjustment process under the OEB Act , with an applicable OEB accounting order. See Article 8 for corresponding adjustments based on Dispositions. These will need to be tied together.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Finance Amounts due and payable by all Absolute Assignees in respect of the month.

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"Net Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest, scheduled principal and other periodic finance charges accruing due and becoming payable or paid by or on behalf of any Absolute Assignee during the Reference Period in respect of its Funding Obligations, including such amounts as may be prescribed, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of the Funding Obligations referred to in (a), and such other or different amounts as may be prescribed.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount (b) the True-Up Amount in respect of the applicable True-Up Period and (c) [an adjustment amount as may be prescribed to account for estimated collection shortfalls and collection delays in respect of amounts under (a) and (b).]

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Investment Interest.

"Pledgee" means a person to whom an Absolute Assignee grants a Pledge.

"Program End Date" means •, [2047].

"Province" means the Province of Ontario.

"Redemption Amount" means the amount payable by or on behalf of an Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional

amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the Measurement Date to (and including) October 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Absolute Assignee by applying the net proceeds obtained by the Absolute Assignee incurring one or more other Funding Obligations.

"Regulated Consumer" means consumers of electricity in the Province [as prescribed][8].

"Regulated Consumer Group" means, in relation to a Reference Period, the Regulated Consumers who receive Electricity Invoices during the Reference Period.

"Regulatory Asset" means the property rights and interests described in Section 6(1), which collectively is comprised of each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; and (b) for the Servicer, any bank account into which Servicer deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each Absolute Assignee, as owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Rights" means, with respect to a Regulatory Asset Owner's Investment Interest, all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Investment Interest.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to Servicer or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in accordance with any Funding Obligation, then the business day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the Absolute Assignee under a Funding Obligation.

---

[8] To be included in the legislation once settled.

"Repayment" means a payment by an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

["Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.]

"Servicer" means IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last business day of any month].

"Transition Charge" means, the amount recoverable from a Regulated Consumer in respect of a Reference Period[9], being the Period Finance Charge as allocated to such Regulated Consumer in accordance with Article 4(3) on a monthly basis. **[Note that this allocation will be based on the OEB process for determining the volumetric rate as part of the RPP process (see s. 4(2)). The OEB will determine volumetric rate based on forecast consumption, number of consumers, etc. to recover the Period Finance Charges.]**

"Transition Charge Collection" means any amount received **[or deemed by this Act to have been received]** upon the collection of a Transition Charge paid by or on behalf of a Regulated Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Financial Services Manager equal to (a) the Actual Finance Amount for such related True-Up Period, minus (b) the Estimate of the Finance Amount for the related True-Up Period, plus (c) the Collected Amount Adjustment for such related True-Up Period.[10]

---

[9] Note that Transition Charges will be calculated by reference to Funding Obligations and Finance Amounts incurred under the Financing Plan. The directive will be that no payment obligations will be incurred for payment before 2022, to accommodate the "Fair Adjustment".

[10] True-up calculation is under consideration. In this summary, a calculated true-up amount is contemplated to be included in the Period Finance Amount calculation, in order to achieve a sum certain and actionable debt. The suggestion is that the true-up mechanism be based generally on a calculation process to be described in the Regulation, which would require Transition Charges to be reviewed and adjusted semi-annually (or more frequently) to ensure the expected recovery of amounts sufficient to timely provide all payments in respect of Finance Amounts. It has been proposed that the scope of the true-up will exclude any 'leakage' at the Financing Entity Level (e.g., entity-level tax; litigation; losses) but will include shortfalls that are currently socialized through the LDC/IESO system. Note that the proposal

"True-Up Period" means, in relation to a Reference Period, the immediately preceding Reference Period.[11]

"Undertaking of Her Majesty in right of Ontario" means the undertaking of Her Majesty in right of Ontario given under Section 11(2).[12]

Article 3 – Transition Charges

(1) **Regulated Consumer Obligation to Pay a Transition Charge** – Each Regulated Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such Regulated Consumer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Regulated Consumers** – Until paid, a Transition Charge charged to a Regulated Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the Regulated Consumer to the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset. Such indebtedness shall constitute a single and separate[13] debt obligation owing by the Regulated Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Regulated Consumer under the Electricity Invoice or otherwise.[14]

(3) **No Set-Off or Reduction** – A Regulated Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Regulated Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) **Allocation of Regulated Consumer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Regulated Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

---

to include a section detailing the true-up mechanism (Oslers 3(6) has not been included here since the outcome of the calculation is already built into the Period Finance Amount concept.

[11] Timing of calculation under consideration, given that amount will need to be reflected in customer invoices.

[12] Under consideration.

[13] Determine if this is critical for rating and markets. Logistics under consideration.

[14] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consider if it is helpful to integrate the existing regulatory scheme for invoicing and collections (regarding RPP) in the legislation.

(5) Transition Charges are Irrevocable – The Transition Charges arising under or in respect of Funding Obligations (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 9(3)) are deemed to be irrevocable, final and effective without any further action, except to the extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period regardless of whether the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, and regardless of whether the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) True-Up of Transition Charges – [See True-Up Amount].

Article 4 – Invoicing of Transition Charges

(1) Inclusion of Transition Charges in Electricity Invoices – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a Regulated Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice[15] issued by the Electricity Distributor or if applicable by the Alternative Servicer to the Regulated Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable Regulated Consumer.

(2) Calculation of the Period Finance Charge – Not later than [35] days prior to the first day of a Reference Period, each Absolute Assignee (or the Financial Services Manager on its behalf) shall provide the OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. Not later than one month prior to the first day of a Reference Period, the Financial Services Manager on behalf of each Absolute Assignee shall calculate the Period Finance Charge applicable to the Reference Period having regard to such amounts specified by the Servicer, which calculations, information and amounts shall be determinative, except to the extent of manifest calculation error or misstatement.

(3) Basis for Attributing Transition Charges – Not later than 25 days prior to the first day of a Reference Period, the OEB shall determine a [Fair Hydro Recovery Rate] (on a volumetric basis) on which Electricity Distributors will attribute Transition Charges to consumers under 4(4).

(4) Notice of Transition Charges – Not later than 20 days prior to the first day of a Reference Period, the OEB shall inform each Electricity Distributor and if applicable any

---

[15] Intention is to include bills issued to eligible consumers served by unit sub-metering providers, retailers and the IESO – not just distributors and to address the inclusion of Transition Charges in the paperwork from the IESO to the LDC in a manner that is consistent with the current process of how the IESO bills LDCs.

Alternative Servicer of the [Fair Hydro Recovery Rate] to be applied by the Electiricy Distributor to attribute Transition Charges to each Regulated Consumer who is served by the Electricity Distributor for inclusion in the Electricity Invoices to be issued to the Regulated Consumers.

(5) **Adjustments** – The amount of any Transition Charge charged to a Regulated Consumer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, except to the extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, IESO shall perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4. Any Electricity Distributor that is replaced under this Section 4(7) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to IESO and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit IESO or a person designated by IESO to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(8) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to Regulated Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

(9) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Servicer to ensure that Transition Charges are properly charged to Regulated Consumers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Servicer, undertake commercially reasonable efforts to collect amounts owing by Regulated Consumers in respect of Transition Charges charged to such Regulated Consumers in Electricity Invoices issued by the

Electricity Distributor or if applicable such Alternative Collection Agent, all in accordance with the Regulations. [16]

(2) **Segregation of Transition Charge Collections** – If prescribed, an Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from Regulated Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.[17] Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners or a Pledgee.[18]

(3) **Electricity Distributor Remittances** – On each applicable Remittance Date, an Electricity Distributor shall remit all [Transition Charge Collections received by it from Regulated Consumers] [amounts invoiced to it by the IESO on account of Transition Charges][19] in respect of the related Reference Period to or to the account of Servicer or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – Servicer or if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, accept and undertake commercially reasonable efforts to collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from Regulated Consumers that pay their Electricity Invoices directly to IESO, all in accordance with the Regulations.

(5) **Segregation of Electricity Distributor Remittances** – Servicer and if applicable the Alternative Collection Agent shall promptly segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, Servicer or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners or any Pledgee.

(6) **Servicer Remittances** – On each Settlement Date[20], Servicer shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Absolute Assignees an amount equal to the Investment Remittance for the related month.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to

---

[16] Note that the obligation to collect and remit the Transition Charge will be included as a deemed condition of license for electricity distributors (and retailers and unit sub-metering providers).]

[17] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.

[18] Consider whether there is a more efficient way to treat collections through the existing LDC/IESO processes. Intention is to provide scope in the Regulations.

[19] Dealer suggestion under consideration. Impact on LDCs and parallel commercial arrangements to be assessed.

[20] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO Successors** – IESO Successors shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[21], then such person shall, if requested by the Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to Regulated Consumers connected to such person's distribution system assets; (b) allocate partial payments by Regulated Consumers as provided in this Act; (c) exercise all enforcement rights of the Absolute Assignees for the benefit of an Absolute Assignee; and (d) remit any Transition Charge Collections to the Absolute Assignees or Pledgees, as applicable, each in accordance with its Investment Interest.

(10) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, Servicer, the Alternative Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Regulated Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5, or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

(11) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Regulated Consumer, any Electricity Distributor, Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[22]

(12) **Sequestration** – If any Electricity Distributor, Servicer, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of

---

[21] This is in anticipation of a possible future restructuring of the distribution system.

[22] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a Regulated Consumer reduces its payment of Transition Charges, despite this language. Same for Electricity Distributor Remittances and IESO Remittances.

Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the Absolute Assignees or Pledgees, shall (i) order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Absolute Assignees, each with respect to its Investment Interest, and the Pledgees as applicable and (ii) appoint a receiver to take control of the amounts sequestered.[23]

(13) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to Servicer, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset[24]

(1) **Composition** – The Regulatory Asset shall constitute a current and irrevocable property right and interest consisting, collectively, of the following rights and interests (without duplication):

a. the right of a Regulatory Asset Owner to record its Investment Interest in its accounts;

b. the right to impose, bill, invoice, collect and receive Transition Charges from Regulated Consumers, including the right to determine the amount of Transition Charges in accordance with this Act;

c. the right to enforce the obligations and indebtedness of each Regulated Consumer to pay the Transition Charges charged to the Regulated Consumer from time to time in accordance with Article 3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices; the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of Servicer or if applicable the Alternative

---

[23] Consider adding or substituting this provision for a right to appoint a receiver.

[24] It is anticipated that Investment Interests will only be sold to Financing Entities controlled by OPG. Sales will occur on a negotiated basis, and deal-specific covenants will be included in transaction documents – to supplement these arrangements.

Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5;

e. the right to enforce the duties and obligations of Servicer and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 5;

f. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

g. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

h. all Related Rights; and

i. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred. The Regulatory Asset shall continue to exist until all Funding Obligations have been paid in full.

(2) **Validity of Dispositions** – A Disposition by IESO of its right to recover all or any part of the IESO Funding Shortfall to an Absolute Assignee, or a Disposition of all or any part of an Investment Interest by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under IESO's right to recover the IESO Funding Shortfall or the Investment Interest, as applicable (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of IESO's right to recover the IESO Funding Shortfall or an Absolute Assignee's right, title and interest in, to and under an Investment Interest, as applicable (or relevant portion thereof), and not merely as a Pledge thereof, and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in IESO's right to recover the IESO Funding Shortfall or the

Investment Interest (or relevant portion thereof) subject to the Disposition, including all rights to recover the IESO Funding Shortfall or under the Investment Interest arising after such Disposition.

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the IESO or transferring Regulatory Asset Owner, as applicable, and all other persons who have claims of any kind (whether in tort, contract or otherwise) against IESO or the transferring Regulatory Asset Owner, as the case may be, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – A Pledge by an Absolute Assignee may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the related Investment Interest in accordance with the terms of the Pledge. No consent of, or notice to, any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation shall, subject to the terms thereof, give rise to a security interest in respect of which the PPSA applies, and may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected pursuant to the PPSA.[25] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. A Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. All provisions of the PPSA shall apply to the Regulatory Asset on the basis that it is intangible personal property, except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner or Pledgee to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

---

[25] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's rights and interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective and coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.

Article 7 – Establishment of the Fair Allocation Plan[26]

(1) **Adoption of the Fair Allocation Plan** – The Delegate may, by written declaration, designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Act, except if amended, amended and restated or terminated by a further written declaration made by the Delegate in compliance with [the Regulations]**.**

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Future Fair Share of Green Transition Benefits across present and future Regulated Consumers on a basis that the Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters:

1. Future Fair Share of Green Transition Benefits should be allocated over the period ending on the Program End Date.

2. The Fair Allocation Plan should specify the Reference Periods for the purpose of identifying applicable Regulated Consumer Groups and allocating Future Fair Share of Green Transition Benefits among them on a relative basis over time.

3. The share of Future Fair Share of Green Transition Benefits allocable to a particular Regulated Consumer in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to such Regulated Consumer over such Reference Period, other than in exceptional circumstances.

4. The share of Future Fair Share of Green Transition Benefits to be allocated to a Regulated Consumer Group and any future Regulated Consumer Group at a particular time should not exceed the Estimated Future Green Transition

---

26 The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current procurement contracts and not invest in extending service lives to secure further procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

Benefits, measured in respect of the Reference Periods following such particular time and to the Program End Date.

5. No future Regulated Consumer Group should be allocated an unreasonably disproportionate share of Estimated Future Green Transition Benefits. Except in exceptional circumstances or in the case of any reallocation of an Over-Assessed Amount as contemplated in 7, below, the Future Fair Share of Green Transition Benefits to be allocated under a Fair Allocation Plan to any future Regulated Consumer Group should have regard to *[Insert formula if a year-over-year maximum amount is determined to be appropriate]*.

6. The time value of money should be reflected in the Fair Allocation Plan, in order to equate the relative values of the nominal allocations of Future Fair Share of Green Transition Benefits, calculated in current dollars, to future Regulated Consumer Groups over time.

7. To the extent there has been an Over-Assessed Amount, the Fair Allocation Plan may determine that an adjustment should fairly be made to rebate Regulated Consumers for such an amount, by reducing the costs otherwise attributable under the Act to such Regulated Consumers. The relative costs of the Green Generation Initiative are reflected under the Act by the attribution of Transition Charges to such Consumer Groups, based on the Financing Plan seeking to track the allocations of benefits under the Fair Allocation Plan. Accordingly, the Maximum Transition Charge Amount determined for one or more Regulated Consumer Groups having regard to the Fair Allocation Plan otherwise applicable may be appropriately reduced to recognize the effect of the Over-Assessed Amount. In such a case, a determination to reduce the Maximum Transition Charge Amount applicable for certain related Reference Periods should have regard to the principle that the corresponding rebate should be extended to benefit the Consumer Group or Consumer Groups in closest proximity to the Legislative Implementation Date.

(3) Attribution Methodology – The Fair Allocation Plan shall specify the Attribution Methodology for the purposes of allocating the Period Finance Charges across the Regulated Consumers. The Attribution Methodology shall result in an attribution of such Transition Charges that is considered by the Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation; provided that the Attribution Methodology shall not be used to limit the recovery of Transition Charges.

(4) Amendments of the Fair Allocation Plan – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation, (b) comply with any restrictions or limitations specified with respect thereto in any Funding

Obligation, and (c) not impair any Regulatory Asset, outstanding Funding Obligations or any Transition Charges.[27]

Article 8 – The IESO Funding Shortfall

(1) Recording of IESO Funding Shortfall – Subject to 8(3), IESO will record any IESO Funding Shortfall [in its books] [in a variance account established in accordance with section 25.33 of the Electricity Act / Ontario Regulation 430/04, as amended].

(2) Adjustments – IESO will record it [its books][its variance account] all adjustments to the IESO Regulatory Asset Amount from time to time. Such books of account shall be determinative with respect to the amount of IESO's related regulatory asset.

(3) Limitation on Additions – Subject to 8(3), IESO shall not record additions to the IESO Regulatory Asset Amount in respect of IESO Funding Shortfalls (a) if such additions are restricted by the terms of any Disposition Document or the Collective Action Agreement, or (b) on or after •, 2017.

(4) Dispositions – IESO may effect a Disposition of its right to recover all or any part of the IESO Regulatory Asset Amount to an Absolute Assignee if (a) the Absolute Assignee has or will concurrently become bound by the Collective Rights Agreement; (b) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; and (c) the Financial Services Manager confirms in writing that the Disposition complies with any restrictions or limitations specified with respect thereto in any documents evidencing the Funding Obligations and is permitted under the Financing Plan.

(5) No Continuing Interest in any Investment Interest – IESO shall have no continuing right or interest in, or maintain any right to recover all or any part of, any IESO Regulatory Asset Amount that is subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party.

(6) IESO Recoveries – IESO shall, in respect of a month, be entitled to receive from IESO Remittances on a related Settlement Date the amount (if any) of any IESO Recoveries.

Article 9 – The Financing Plan

(1) Power to Prepare, Implement and Amend the Financing Plan – The Financial Services Manager shall be authorized to prepare, implement and amend a financing plan [for the Financing Entities] and propose the adoption of such financing plan as the Financing Plan for the purposes of this Act. [The Financial Services Manager shall have the right to withdraw its financing plan as the Financing Plan at any time if it determines that implementing the Financing Plan in such manner would not be in the best interests of a Financing Entity.]

[27] It is anticipated that the terms of any rated financing will restrict further issuances pending a RAC in relation to any changes to the FAP.

(2) Principles and Parameters of the Financing Plan – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions, having regard to the principles and parameters set forth in Schedule 3.

(3) OEB Approval – [Any Additional Funding Charge payable to the Financial Services Manager in respect of services provided by the Financial Services Manager (other than third party costs) shall be subject to review and approval by the OEB.][28]

(4) Review of Financing Plan – The [OEB shall undertake an annual review of the records maintained by the Financial Services Manager for the purpose of confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan.] [29]

(5) Replacement of the Financial Services Manager – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the Financial Services Manager shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services Manager under the Financing Plan. If the Financial Services Manager is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services Manager. [Any replacement financial services manager must comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations.]

(6) Obligation to Apply IESO Remittances – The Financial Services Manager shall ensure that amounts transferred to it [under Article 5, as agent for and on behalf of the Absolute Assignees], or otherwise in respect of or as proceeds from an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose.

(7) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, any Alternative Collection Agent, the Financial Services Manager, the OEB or Her Majesty in right of Ontario, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount.

(8) Incurrences are Binding – Each Disposition made to or by an Absolute Assignee, all amounts payable or becoming due and payable by or on behalf of an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation and each Pledge entered into by an Absolute Assignee, shall be valid and binding, including in determining the amount of related Transition Charges, notwithstanding any defect in the manner of incurrence or any inconsistency with the Fair Allocation Plan or the Financing Plan.

---

[28] Under consideration.

[29] Under consideration.

[Article 10 – Compliance Matters[30]

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Act, the OEB shall have the right, jurisdiction, power and authority to examine the books and records of *[Insert names if any]*.

(2) [OPG's Rate Settings – When setting other rates for or in respect of OPG, the OEB shall not take into account (a) the administrative or servicing fees charged by OPG as Financial Services Manager [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services]; (b) the cost consequences to OPG of being the Financial Services Manager; or (c) the consequence of OPG consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.][31]

Article 11 – Undertaking of the Her Majesty in right of Ontario[32]

(1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – Her Majesty in right of Ontario shall not in any way take or permit (including by any agency or administrative body) any action to reduce, impair, postpone or terminate the obligation of Regulated Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly, including through the introduction of any bill or the passing of any legislation or regulation having such effect. The amount of Transition Charges determined under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by Her Majesty in right of Ontario (including by any agency or administrative body), including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(2) Undertaking and Agreement – Her Majesty in right of Ontario shall not:

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

---

[30] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article and any potential role for the Auditor General is still under consideration.

[31] As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as Financial Services Manager of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role.

[32] Under consideration, including the dealers' request for (1) a "servicer guarantee" (2) a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes and (3) in the event of a market disruption that renders it impossible to refinance debt when required (or where financing of amounts required to service the debt is not available because of a market disruption where the Financing Entity was relying on such further issuance of debt until the recovery is set to begin to fund interest), a covenant by the Province to step in and payout the debt or to recover the debt from ratepayers as it becomes due, notwithstanding the intended Fair Adjustment.

(b) except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the Absolute Assignees or any Pledgee from time to time;

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment, amendment and restatement or termination would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder, or would not otherwise comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, an IESO Successor shall immediately be established by Her Majesty in right of Ontario to perform such obligations.

(4) **Compensation for Failure** – Absolute Assignees shall be compensated by Her Majesty in right of Ontario for any losses suffered by them as a result of any failure by Her Majesty in right of Ontario to comply with its undertakings and agreements in this Article 11.[33]

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid.

(6) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Her Majesty in right of Ontario, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 12 – Regulations

Regulations may be made under this Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

[33] Requested by Dealers. For discussion.

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 13- Miscellaneous[34]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Act shall be required with respect to the actions to be taken in compliance with this Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Act, if any provision of this Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Act that is taken by

---

[34] OPG would like the specific amendments related to OPG to be included in the Bill.]

any person who is or may become obligated or have duties that arise under this Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Act are intended to be severable and that the Legislature would have enacted this Act even if any Article, Section, paragraph or subparagraph of this Act held to be unconstitutional or invalid had not been included in this Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles and Parameters for Establishing the Financing Plan

The following principles and parameters provide a guideline as to what a Financing Plan should address:

(1) in respect of each Reference Period, make reference to the allocations of Future Fair Share of Green Transition Benefits to each Reference Group contemplated by the Fair Allocation Plan;

(2) estimate IESO Funding Shortfalls for each Reference Period;

(3) consider alternative funding arrangements suitable to fund the estimated IESO Funding Shortfalls, including short term and/or long term Funding Obligations;

(4) consider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that payments made for a Reference Period reasonably correspond to the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

(5) if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Regulated Consumers under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(6) reflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical Regulated Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation);

(7) require the Financial Services Manager, for and on behalf of each Regulatory Asset Owner, to use [diligent efforts to manage Finance Amounts to be borne by Ratepayers];

(8) include a proposal regarding the compensation of the Financial Services Manager that reflects market terms and conditions; and

(9) [require that the Financial Services Manager report annually to the Ministry of Energy on the operation of the Financing Plan including, in particular, with respect to the amount and terms of the Funding Obligations incurred and the sufficiency of such Funding Obligations for the purpose of funding the estimated Funding Shortfalls in accordance with the Fair Allocation Plan.]

(10) incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Absolute Assignees will require committed access to short term liquidity to cover estimated IESO Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Financial Services Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations should not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Financial Services Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Financial Services Agent shall cause the applicable Absolute Assignee to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Financial Services Agent will select counterparties under any transaction to be entered into by an Absolute Assignee, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Financial Services Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Financial Services Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(11) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the IESO Funding Shortfalls from time to time on a basis that is consistent with the allocations of Future Fair Share of Green Transition Benefits to applicable Reference Groups under the Fair Allocation Plan;

(12) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(13) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Financial Services Agent and other agents and service providers to the Absolute Assignees may be determined, allocated and paid;

(14) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(15) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(16) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(17) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(18) the basis upon which any Disposition may be made or effected by an Absolute Assignee, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(19) describe the requirements applicable to any special purchase entity that will purchase an Investment Interest, including proposed capitalization, governance, and restrictions on their powers and activities; and

(20) the basis on which any Pledge may be given or effected.

[NTD: E&Y will need to see the guidelines of the Fair Allocation Plan set in reference to parameters that will allow it to establish a modeling curve]

- [**Inflation period**: (between November 2017 – and April 2022) bill increases need to be capped at inflation (assumed at 2% for modeling purposes)]

- [**Transition Period**: (May 2022- April 2027) bills increased at a consistent rate which is set so that the borrowing will not exceed the Trust's capacity, which is determined by the Finance Service Manager]

- [**Amortization Period**: (May 2027-April 2047) equitable distribution of Finance Amount among Regulated Consumers]

TOR_2528-#23107566-vpdf-_Fair_Hydro_Act_.pdf

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act"

Article 1 – Purpose

The Province has and continues to encourage the construction and development of facilities for the long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer, feed in tariff and other similar programs (the "Green Generation Initiative"). The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will continue to benefit present and future electricity consumers in the Province.

The ~~imputed~~out-of-market costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment"). ~~The Global Adjustment is included as a charge billed to electricity consumers in their monthly electricity invoices.~~

The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province under the Green Generation Initiative~~, which may be higher than prevailing market price for electricity. These differences~~. These amounts paid by the IESO arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with ~~long-term price~~revenue certainty ~~for electricity~~, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. ~~In general, whenever amounts payable under these procurement contracts exceed the market price for electricity, the Green Costs Adjustment passes through the amount of such differences as part of the monthly charge to electricity consumers. Such amount then becomes available to IESO to meet its obligations under the procurement contracts.~~ It has been determined that the useful lives of many of the assets ~~encouraged by~~developed under the Green Generation Initiative will be ~~well~~ in excess of the respective terms of ~~the related~~their respective procurement contracts~~, and in many cases may extend over more than one generation of electricity consumers~~.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective ~~durations~~terms of the applicable procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to ~~Retail~~Regulated Consumers (as defined in Article 2) should be more closely aligned with the benefits that such ~~Retail~~Regulated Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on general principles and parameters that establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative equitably across present and future ~~Retail~~Regulated Consumers (the "Fair Allocation Plan").

If the Fair Allocation Plan determines that the equitable allocation of the costs associated with the Green Generation Initiative to the ~~Retail~~Regulated Consumers of a particular time period

should be reduced below the amount that currently would be charged based on the Green Costs Adjustment, then the amount payable by such ~~Retail~~Regulated Consumers and in turn available to IESO will, in the aggregate, be less than the amount payable by the IESO to the generators in respect of such period. In this case, IESO will need to obtain funding from another source to cover such a shortfall. If a funding obligation is incurred ~~by IESO~~ to cover such a shortfall during ~~one~~any period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs incurred will become payable in ~~one or more~~ future periods. In order for IESO to obtain a reliable and committed source of cash flows to enable IESO to repay such funding amounts when they become due and payable, this Act imposes irrevocable and non-bypassable financial obligations on ~~Retail~~Regulated Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts. The right and interest in and to collect such financial obligations will take the form of the Regulatory Asset contemplated in this Act, which will constitute property rights and interests. Interests in the Regulatory Asset may be sold and absolutely assigned by IESO to one or more financing entities, which in turn will finance their acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf of such financing entities by a financial services ~~agent~~manager under the Financing Plan contemplated in this Act. ~~The Financing Plan will seek to reasonably match the payment obligations arising under such funding obligations, to be borne by the future Retail Consumers of the period in which such payment obligations become due, with the benefits of the Green Generation Initiative allocated to such future Retail Consumers under the Fair Allocation Plan.~~

The purpose of this Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future ~~Retail~~Regulated Consumers on an equitable and cost effective basis.

Article 2 ~~-~~ = Definitions

In this Act:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition other than as security.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Financial Services ~~Agent~~Manager whose records shall be determinative for the purposes of this Act except to the extent of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period ~~in respect of an Absolute Assignee,~~ the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by or on behalf of ~~the~~any Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including ~~(without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Financial Services Agent on behalf of, the~~

~~Absolute Assignee under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Absolute Assignee or incurred by on behalf of the Absolute Assignee under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Financial Services Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Absolute Assignee; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager or director fees of a Financing Entity; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (o) any rating agency fees; and (p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith by the Financial Services Agent for recovery and payment under the Financing Plan~~without limitation such amounts as may be prescribed.

~~"Allocation Factor" means, in respect of a Retail Consumer for a Reference Period, the number (expressed as a percentage) determined in respect of the Retail Consumer by the OEB based on the application of the Attribution Methodology in respect of the Reference Period.[1]~~

"Alternative ~~Collection Agent~~Servicer" means a person appointed under Section ~~5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owners."Alternative Servicer" means a person appointed under Section~~ 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.

"Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to ~~Retail~~Regulated Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"~~[2]~~[1] means the methodology specified in the Fair Allocation Plan for allocating the Period ~~Transition~~Finance Charges for a Reference Period to ~~individual Retail~~Regulated Consumers~~ of the applicable Retail Consumer Group based on its Allocation Factor~~.

"Collected Amount Adjustment" means, in respect of a True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the Financial Services ~~Agent~~Manager, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period~~.[3]~~ and minus [(c) the amounts by which amounts remitted by Electricity

~~[1] Confirm that this will be based on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those may be identified and caught by the True-Up.~~

~~[2]~~[1] This allocation may be volumetric or some combination of a flat amount and a volumetric charge. Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

Distributors pursuant to Section 5(4) exceeded the corresponding amount of Transition Charges Actually paid by Regulated Consumers.][2]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) ~~and~~, each Pledgee, and the Financial Services Manager that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.[4]

"Delegate" means ~~the~~any of the following person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act; ●[3].

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition ~~of an Investment Interest~~(or, in the case of the IESO Funding Shortfall, a release by IESO of its right to recover such amount in order to enable an Absolute Assignee to recover such amount) of (a) IESO's right to recover all or any portion of an IESO Funding Shortfall or (b) an Investment Interest, in each case to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which ~~a Regulatory Asset Owner~~IESO or an Absolute Assignee effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means~~, in respect of a Service Area, the~~ a rate regulated distributor licensed under Part V of the *Ontario Energy Board Act, ~~1998~~* ~~in respect of such Service Area,~~*1998*, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to ~~IESO~~Servicer or if applicable the Alternative Collection Agent in accordance with Section 5(3), including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.[4]

"Electricity Invoice" means an invoice issued by ~~any of a~~an Electricity Distributor (or in its stead, by an Alternative ~~Servicer~~Collection Agent), by the Servicer or by a Retailer, in each case to a ~~Retail~~Regulated Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to ~~a distribution network in the~~such Electricity Distributor's ~~designated Service Area~~distribution system and in respect of applicable Transition Charges to be charged to the ~~Retail~~Regulated Consumer under this Act.

[32] This ~~would~~is intended to pick up adjustments based on actual collection experience, changes in the ~~retail consumer~~Regulated Consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc. The actual calculation needs work.

[4] ~~Consider adding the Financial Services Agent and the Servicer as parties.~~

[3] Placeholder for delegation once deterermined.

[4] Suggestion is that LDCs remit based on estimates and then true-up, based on current arrangements for remittances by LDCs to IESO. *

"Estimate" means (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Financial Services ~~Agent~~Manager; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to ~~any Retail Consumer Group~~Regulated Consumers, the estimated value (in current dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Act except to the extent of a manifest calculation error.

"Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to ~~Retail~~Regulated Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to ~~Retail~~Regulated Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, for a Reference Period ~~in respect of an Absolute Assignee~~, the sum (without duplication) of the following amounts that are or become payable during the Reference Period in respect of ~~the~~any Absolute Assignee: (a) Repayments; (b) Net Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financial Services ~~Agent~~Manager" means OPG or, following any Replacement Event involving OPG, such other person ~~or persons~~ who may be appointed as the ~~Financial Services Agent~~financial services manager of the Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[5]

[5] ~~Discuss whether to accommodate multiple~~There must only be one Financial Services ~~Agents. MOE to consider~~Manager.

"Financing Entity" means ~~an~~any entity established in accordance with the Financing Plan to ~~acquire all or an interest in the Regulatory Asset as~~be an Absolute Assignee and ~~to enter into Funding Obligations to finance such acquisition under the Financing Plan~~that is managed by the Financial Services Manager.[6]

"Financing Plan" means the written plan prepared by the Financial Services ~~Agent on behalf of each Absolute Assignee in compliance with Article 9 to set forth the basis upon which, among other things: (a) any Disposition may be made to, financed by or effected by an Absolute Assignee; (b) any Funding Obligations may be incurred by an Absolute Assignee, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) any Finance Reserve Withdrawals may be made; (i) the establishment and operation of any Financing Entity may be effected; and (j) the cash flows arising from time to time or otherwise derived from an Investment Interest may otherwise be applied,~~Manager in accordance with Article 9, as the same may be amended, amended and restated or terminated by the Financial Services ~~Agent~~Manager in ~~compliance~~accordance with Article 9 from time to time.

~~"Funding Costs" means, for a Reference Period in respect of an Absolute Assignee, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Absolute Assignee during the Reference Period in respect of its Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to its Funding Obligations, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Absolute Assignee under derivatives and any Finance Reserve Withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to the payment of the Funding Costs payable in respect of a Funding Obligation for the Reference Period.~~

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including each obligation to pay: principal, interest, premiums and other financing charge payments; pass-through payments; payment obligations arising under

[6] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act.

or in respect of derivatives; payment obligations owing to service providers, Financial Services ~~Agents~~Managers, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all Additional Funding Charges) incurred by or on behalf of the Absolute Assignee under the Financing Plan, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.

"Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

~~"Generator" means a generator of electricity that is subject to the *Electricity Act, 1998*.~~

"Global Adjustment" has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO" means the Independent Electricity System Operator created pursuant to Part II of the *Electricity Act, 1998*.

~~"IESO Available Amount" means, for a Reference Period, the lesser of (a) the amount (if any) by which (i) the Maximum Transition Charge Amount for the Reference Period, exceeds (ii) Period Finance Amount for the Reference Period, and (b) the IESO Retained Interest Amount as of the [35th] day prior to the first day of a Reference Period plus any IESO Financing Costs that are due and payable and remain unpaid as of the [35th] day prior to the first day of a Reference Period.~~

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO , during the month pursuant to section • of the *Electricity Act*~~.~~ in respect of Regulated Consumers. **[NTD: IESO indicates that it likely does not work to express in regards to "amounts payable by the LDCs" because settlement between the IESO and LDCs entails payments by LDCs to the IESO and then credits/debits by the IESO to LDCs to reflect RPP shortfalls/overages.]**

~~"IESO Financing Costs" means, for a Reference Period, the financing costs (if any) incurred by IESO pursuant to Section 8(4) in order to finance its ownership of the IESO Retained Interest during the Reference Period.~~

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month[7]~~; provided that if the amount of any such shortfall is determined to have been based on incomplete information, variances or estimates that were inaccurate, an adjustment shall be made in determining the amount~~

[7] ~~This has been recast to recognize that the shortfall in the first 4.5 years could exceed the entire GA amount. A more refined approach to describing the concept may be considered.~~

~~of any subsequent shortfall for the month in which the inaccuracy is identified. .~~To the extent reasonably necessary to give effect to this Act, or any transaction contemplated hereby, IESO shall calculate the IESO Funding Shortfall for any month taking into account information provided by the Electricity Distributors and (i) such calculation shall be binding for all purposes; and (ii) any demonstrated inaccuracy in the calculation for any month (including any such resulting from inaccuracies in the information provided by Electricity Distributors) shall be accounted for by adjusting the IESO Funding Shortfall for a subsequent month.

"IESO Recovery" means each amount ~~remitted to IESO (including~~received by IESO ~~retaining such amount) in respect of the IESO Retained Interest pursuant to Section 5(6)(b)~~in accordance with its right to recover IESO Funding Shortfalls pursuant to section 25.33 of the Electricity Act and Ontario Regulation 430/04, as amended, and "IESO Recoveries" means, collectively, all such amounts received by IESO.[7]

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO ~~Retained Interest" means IESO's right, title and ownership interest (if any) in, to and under the Regulatory Asset, which shall exclude each Investment Interest."IESO Retained~~Regulatory Interest Amount" means, on a day, (a) the sum of all IESO Funding Shortfalls incurred prior to the day, ~~plus (b) the sum of all IESO Funding Costs incurred prior to the day in accordance with Section 8(4), minus (c~~minus (b) the net proceeds received by IESO from or on behalf of each Absolute Assignee as consideration for the Disposition of each Investment Interest paid to IESO by or on behalf of such Absolute Assignee prior to the day, and minus (~~d~~c) the IESO Recoveries received by IESO prior to the day.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition~~, which ownership interest may include (without limitation) ownership of a specified portion on a divided basis of the assets comprising the Regulatory Asset and ownership of an undivided ownership interest in the Regulatory Asset, in each case as may be described in the applicable Disposition Document~~.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Finance Amounts due and payable by all Absolute Assignees in respect of the month.

[7] IESO will be entitled to record the IESO Funding Shortfall amount in a variance account. The OEB will eliminate and dispose of the variance account balance as part of the RPP adjustment process under the OEB Act , with an applicable OEB accounting order. See Article 8 for corresponding adjustments based on Dispositions. These will need to be tied together.

~~"Maximum IESO Recovery" means, for a month, the amount (if any) by which (a) the IESO Remittances for the month, exceed (b) the sum of all Finance Amounts that are due and payable by Absolute Assignees in respect of the month.~~

~~"Maximum Transition Charge Amount" means, for a Reference Period, (a) the aggregate amount of Future Fair Share of Green Transition Benefits that are allocable to the applicable Retail Consumer Group in accordance with the Fair Allocation Plan, divided by (b) the applicable Reference Period Length.~~

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"Net Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest, scheduled principal and other periodic finance charges accruing due and becoming payable or paid by or on behalf of any Absolute Assignee during the Reference Period in respect of its Funding Obligations, including such amounts as may be prescribed, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of the Funding Obligations referred to in (a), and such other or different amounts as may be prescribed.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount ~~and~~ (b) the True-Up Amount in respect of the ~~immediately preceding Reference Period. "Period Transition Charges" means, for a Reference Period, the sum of (a) the Period Finance Charges for the Reference Period and (b) the IESO Available Amount for the Reference Period.~~ applicable True-Up Period and (c) [an adjustment amount as may be prescribed to account for estimated collection shortfalls and collection delays in respect of amounts under (a) and (b).]

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Investment Interest.

"Pledgee" means a person to whom an Absolute Assignee grants a Pledge.

"Program End Date" means •, [2047].

"Province" means the Province of Ontario.

"Redemption Amount" means the amount payable by or on behalf of an Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional

amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the Measurement Date to (and including) ~~June~~October 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

~~"Reference Period Length" means, for a Reference Period, the number of months in the Reference Period.~~

"Refinancing" means, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Absolute Assignee by applying the net proceeds obtained by the Absolute Assignee incurring one or more other Funding Obligations.

"Regulated Consumer" means consumers of electricity in the Province [as prescribed][8].

"Regulated Consumer Group" means, in relation to a Reference Period, the Regulated Consumers who receive Electricity Invoices during the Reference Period.

"Regulatory Asset" means the property rights and interests described in Section 6(1), which collectively is comprised of ~~the IESO Retained Interest and~~ each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; and (b) for the Servicer, any bank account into which ~~IESO deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent~~Servicer deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means ~~each of (a) IESO, as owner of (and to the extent of) the IESO Retained Interest and (b)~~ each Absolute Assignee, as owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively ~~IESO and~~ each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Rights" means, with respect to a Regulatory Asset Owner's Investment Interest, all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such ~~Regulatory Asset~~Investment Interest.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to ~~IESO~~Servicer or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in accordance with any Funding Obligation, then the ~~Business Day~~business day preceding each Settlement Date.

[8] To be included in the legislation once settled.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the Absolute Assignee under a Funding Obligation.

"Repayment" means a payment by an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

~~"Retail Consumer" means:~~

~~(a) present and future consumers of electricity in the Province who are (i) consumers designated under section 79.16 of[, and O.Reg 95/05 under,] the *Ontario Energy Board Act, 1998*, or (ii) hold or are deemed to hold an "eligible account" under the *Ontario Rebate for Electricity Consumers Act, 2016*, other than any such consumer who has a contract with a Retailer who uses Retailer Consolidated Billing; and~~

~~(b) present and future Retailers who use Retailer Consolidated Billing,~~

~~and each case includes all such consumers and Retailers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.~~

~~"Retail Consumer Group" means, in relation to a Reference Period, the Retail Consumers who receive Electricity Invoices during the Reference Period.~~

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

[["Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.]]

~~"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is licensed to distribute electricity in accordance with the *Electricity Act, 1998*.~~

"Servicer" means IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last ~~Business Day~~business day of any month].

"Transition Charge" means, ~~for a Retail~~the amount recoverable from a Regulated Consumer in respect of a Reference Period~~, (a) the Period Transition Charge, (b) multiplied by its Allocation Factor in respect of the Reference Period, divided by (c) the~~

~~applicable Reference Period Length.~~[9], being the Period Finance Charge as allocated to such Regulated Consumer in accordance with Article 4(3) on a monthly basis. **[Note that this allocation will be based on the OEB process for determining the volumetric rate as part of the RPP process (see s. 4(2)). The OEB will determine volumetric rate based on forecast consumption, number of consumers, etc. to recover the Period Finance Charges.]**

"Transition Charge Collection" means any amount received **[or deemed by this Act to have been received]** upon the collection of a Transition Charge paid by or on behalf of a ~~Retail~~Regulated Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Financial Services ~~Agent~~Manager equal to (a) the Actual Finance Amount for such related True-Up Period, minus (b) the Estimate of the Finance Amount for the related True-Up Period, ~~minus (b) the Actual Finance Amount for such related True-Up Period,~~ plus (c) the Collected Amount Adjustment for such related True-Up Period.[10]

"True-Up Period" means, in relation to a Reference Period, the ~~period from and including the [30th] day~~ immediately preceding ~~the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the~~ Reference Period.[11]

"Undertaking of ~~the Lieutenant Governor in Council~~Her Majesty in right of Ontario" means the undertaking of ~~the Lieutenant Governor in Council~~Her Majesty in right of Ontario given under Section 11(2).[12]

Article 3 – Transition Charges

(1) **~~Retail~~Regulated Consumer Obligation to Pay a Transition Charge** – Each ~~Retail~~Regulated Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such ~~Retail~~Regulated Consumer by its Electricity Distributor

[9] Note that Transition Charges will be calculated by reference to Funding Obligations and Finance Amounts incurred under the Financing Plan. The directive will be that no payment obligations will be incurred for payment before 2022, to accommodate the "Fair Adjustment".

[10] True-up calculation is under consideration. In this summary, a calculated true-up amount is contemplated to be included in the Period Finance Amount calculation, in order to achieve a sum certain and actionable debt. The suggestion is that the true-up mechanism be based generally on a calculation process to be described in the Regulation, which would require Transition Charges to be reviewed and adjusted semi-annually (or more frequently) to ensure the expected recovery of amounts sufficient to timely provide all payments in respect of Finance Amounts. It has been proposed that the scope of the true-up will exclude any 'leakage' at the Financing Entity Level (e.g., entity-level tax; litigation; losses) but will include shortfalls that are currently socialized through the LDC/IESO system. Note that the proposal to include a section detailing the true-up mechanism (Oslers 3(6) has not been included here since the outcome of the calculation is already built into the Period Finance Amount concept.

[11] Timing of calculation under consideration, given that amount will need to be reflected in customer invoices.

[12] Under consideration.

or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) Indebtedness of ~~Retail~~Regulated Consumers – Until paid, a Transition Charge charged to a ~~Retail~~Regulated Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the ~~Retail~~Regulated Consumer to the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset. Such indebtedness shall constitute a single and separate[~~8~~13] debt obligation owing by the ~~Retail~~Regulated Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the ~~Retail~~Regulated Consumer under the Electricity Invoice or otherwise.[~~9~~14]

(3) No Set-Off or Reduction – A ~~Retail~~Regulated Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such ~~Retail~~Regulated Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) Allocation of ~~Retail~~Regulated Consumer Payments – If an Electricity Distributor receives a payment made by or on behalf of a ~~Retail~~Regulated Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) Transition Charges are Irrevocable – The Transition Charges arising under or in respect of Funding Obligations ~~incurred under the Financing Plan~~ (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 9(3)) are deemed to be irrevocable, final and effective without any further action, except to the extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period regardless of whether ~~or not~~ the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, and regardless of whether ~~or not~~ the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) True-Up of Transition Charges – [See True-Up Amount].

Article 4 – Invoicing of Transition Charges

[~~8~~13] Determine if this is critical for rating and markets. Logistics under consideration.

[~~9~~14] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consider if it is helpful to integrate the existing regulatory scheme for invoicing and collections (regarding RPP) in the legislation.

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a ~~Retail~~Regulated Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice[15] issued by the Electricity Distributor or if applicable by the Alternative Servicer to the ~~Retail~~Regulated Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable ~~Retail~~Regulated Consumer.

(2) **Calculation of the Period ~~Transition~~Finance Charge** – Not later than [35] days prior to the first day of a Reference Period, each Absolute Assignee (or the Financial Services ~~Agent~~Manager on its behalf) shall provide the OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period~~. [35] days prior to the first day of a Reference Period, IESO or Successor IESO if applicable shall specify the IESO Retained Interest Amount and any IESO Financing Costs that are due and payable and remain unpaid on such day~~. Not later than one month prior to the first day of a Reference Period, the ~~OEB~~Financial Services Manager on behalf of each Absolute Assignee shall calculate the Period ~~Transition~~Finance Charge applicable to the Reference Period ~~based on the calculations and information set forth in such written notices received from the Absolute Assignees and based on~~having regard to such amounts specified by ~~IESO or Successor IESO~~the Servicer, which calculations, information and amounts shall be determinative, except to the extent of manifest calculation error or misstatement.

(3) **~~Calculation and Attribution of~~Basis for Attributing Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the OEB shall ~~apply the Attribution Methodology to determine the Allocation Factor for each Retail Consumer of the applicable Retail Consumer Group~~determine a [Fair Hydro Recovery Rate] (on a volumetric basis) on which Electricity Distributors will attribute Transition Charges to consumers under 4(4).

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the OEB shall inform each Electricity Distributor and if applicable any Alternative Servicer of the [Fair Hydro Recovery Rate] to be applied by the Electricy Distributor to attribute Transition Charges to ~~be specified~~each Regulated Consumer who is served by the Electricity Distributor for inclusion in the Electricity Invoices to be issued to ~~each Retail Consumer of the applicable Retail Consumer Group who has a billing address in the Electricity Distributor's Service Area.~~the Regulated Consumers.

(5) **Adjustments** – The amount of any Transition Charge charged to a ~~Retail~~Regulated Consumer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, except to the extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

[15] Intention is to include bills issued to eligible consumers served by unit sub-metering providers, retailers and the IESO – not just distributors and to address the inclusion of Transition Charges in the paperwork from the IESO to the LDC in a manner that is consistent with the current process of how the IESO bills LDCs.

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

~~(7)~~ ~~**IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.~~

(7) ~~(8)~~ **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, ~~the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to~~IESO shall perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article ~~4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor.~~ 4. Any Electricity Distributor that is replaced under this Section 4(~~8~~7) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to ~~the Alternative Servicer~~IESO and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit ~~the Alternative Servicer~~IESO or a person designated by IESO to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(8) ~~(9)~~ **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to ~~Retail~~Regulated Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

(9) ~~(10)~~ **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(10) ~~(11)~~ **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Servicer to ensure that Transition Charges are properly charged to ~~Retail~~Regulated Consumers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the ~~Regulatory Asset Owners~~Servicer, undertake ~~[diligent]~~[commercially reasonable~~]~~[10] efforts to collect amounts owing by ~~Retail~~Regulated Consumers in respect of Transition Charges charged to such ~~Retail~~Regulated

~~[10] Mirror collection "standard of care" under applicable legislation.~~

Consumers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent~~.~~, all in accordance with the Regulations. [16]

(2) **Segregation of Transition Charge Collections** – ~~An~~If prescribed, an Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from ~~Retail~~Regulated Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.~~11~~[17] Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners~~.~~ or a Pledgee.[18]

(3) **Electricity Distributor Remittances** – On each applicable Remittance Date, an Electricity Distributor shall remit all [Transition Charge Collections received by it from ~~Retail~~Regulated Consumers] [amounts invoiced to it by the IESO on account of Transition Charges][19] in respect of the related Reference Period to or to the account of ~~IESO~~Servicer or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – ~~IESO~~Servicer or if applicable any Alternative ~~Collection Agent~~Servicer shall, as an agent of the Regulatory Asset Owners, accept and undertake ~~[diligent]~~[commercially reasonable~~]~~ efforts to ~~accept and~~ collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from ~~Retail~~Regulated Consumers that pay their Electricity Invoices directly to IESO, all in accordance with the Regulations.~~12~~

(5) **Segregation of Electricity Distributor Remittances** – ~~IESO~~Servicer and if applicable the Alternative Collection Agent shall promptly segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, ~~IESO~~Servicer or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners or any Pledgee.

(6) **~~IESO~~Servicer Remittances** – On each Settlement Date~~13~~[20], ~~IESO and if applicable the Alternative Collection Agent~~Servicer shall remit all amounts on deposit in its Regulatory Asset Account ~~(a) first,~~ to or to the account of the Absolute Assignees an amount equal to the Investment Remittance for the related month~~ and (b) second, to IESO (including by IESO retaining such amount) an amount equal to the lesser of (i) the Maximum IESO Recovery for the related month and (ii) the IESO Retained Interest Amount as of the Settlement Date~~.

[16] Note that the obligation to collect and remit the Transition Charge will be included as a deemed condition of license for electricity distributors (and retailers and unit sub-metering providers).]

~~11~~[17] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.

[18] Consider whether there is a more efficient way to treat collections through the existing LDC/IESO processes. Intention is to provide scope in the Regulations.

[19] Dealer suggestion under consideration. Impact on LDCs and parallel commercial arrangements to be assessed.

~~12 Consider building this obligation into a deemed condition of licence for the IESO.~~

~~13~~[20] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO ~~Successor~~Successors** – IESO ~~Successor~~Successors shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province~~14~~[21], then such person shall, if requested by the Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to ~~Retail~~Regulated Consumers ~~in its applicable service area, including all consumers~~ connected to ~~the electricity~~such person's distribution system assets ~~and taking electric delivery service located within such service area~~; (b) allocate partial payments by ~~Retail~~Regulated Consumers as provided in this Act; (c) exercise all enforcement rights of the Absolute Assignees for the benefit of an Absolute Assignee; and (d) remit any Transition Charge Collections to the Absolute Assignees or Pledgees, as applicable, each in accordance with its Investment Interest.

(10) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, ~~IESO~~Servicer, the Alternative Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from ~~Retail~~Regulated Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article ~~5.~~5, or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

~~(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final~~

~~14~~[21] This is in anticipation of a possible future restructuring of the distribution system.

~~effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Absolute Assignees.~~

(11) ~~(12)~~ **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any ~~Retail~~Regulated Consumer, any Electricity Distributor, ~~IESO~~Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, ~~IESO~~Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[~~15~~22]

(12) ~~(13)~~ **Sequestration** – If any Electricity Distributor, ~~IESO~~Servicer, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the Absolute Assignees or Pledgees, shall (i) order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Absolute Assignees, each with respect to its Investment Interest, and the Pledgees as applicable~~.~~[~~16~~] and (ii) appoint a receiver to take control of the amounts sequestered.[23]

(13) ~~(14)~~ **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to ~~IESO~~Servicer, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset[24]

(1) **Composition** – The Regulatory Asset shall constitute a current and irrevocable property right and interest consisting, collectively, of the following rights and interests (without duplication):

a. the right of ~~IESO (i)~~a Regulatory Asset Owner to record its ~~IESO Retained~~Investment Interest in its accounts~~ in accordance with Section 8(1), having a stated amount from time to time equal to the IESO Retained Interest Amount; and (ii) to receive IESO Recoveries from time to time in accordance with Section 5(6)(b)~~;

[~~15~~22] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a ~~Retail~~Regulated Consumer reduces its payment of Transition Charges, despite this language. Same for Electricity Distributor Remittances and IESO Remittances.

[~~16~~23] Consider adding or substituting this provision for a right to appoint a receiver.

[24] It is anticipated that Investment Interests will only be sold to Financing Entities controlled by OPG. Sales will occur on a negotiated basis, and deal-specific covenants will be included in transaction documents – to supplement these arrangements.

b. the right to impose, bill, invoice, collect and receive Transition Charges from ~~Retail~~Regulated Consumers, including the right to determine the amount of Transition Charges in accordance with this Act;

c. the right to enforce the obligations and indebtedness of each ~~Retail~~Regulated Consumer to pay the Transition Charges charged to the ~~Retail~~Regulated Consumer from time to time in accordance with Article 3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices; the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

~~**d.** the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;~~

d. ~~**e.**~~ the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of ~~IESO~~Servicer or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5;

e. ~~**f.**~~ the right to enforce the duties and obligations of ~~IESO~~Servicer and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 5;

f. ~~**g.**~~ the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

g. ~~**h.**~~ all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

h. ~~**i.**~~ all Related Rights; and

i. ~~**j.**~~ all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and

notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred. The Regulatory Asset shall continue to exist until all Funding Obligations have been paid in full.

(2) **Validity of Dispositions** – ~~Despite any limitations or restrictions on a~~A Disposition ~~that may arise by contract or by operation of any applicable law of the Province or any consent requirement applicable to a Disposition that may arise by operation of any applicable law of the Province, a Disposition by~~by IESO of its right to recover all or any part of the IESO Funding Shortfall to an Absolute Assignee ~~made under the Financing Plan~~, or a Disposition of all or any part of an Investment Interest by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under ~~the applicable~~IESO's right to recover the IESO Funding Shortfall or the Investment Interest, as applicable (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of ~~the Regulatory Asset Owner's applicable~~IESO's right to recover the IESO Funding Shortfall or an Absolute Assignee's right, title~~,~~ and interest in, to and under ~~the Regulatory Asset~~an Investment Interest, as applicable (or relevant portion thereof), and not merely as a Pledge thereof, and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in IESO's right to recover the IESO Funding Shortfall or the Investment Interest (or relevant portion thereof) subject to the Disposition, including all rights to recover the IESO Funding Shortfall or under the Investment Interest arising after such Disposition.

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the IESO or transferring Regulatory Asset Owner, as applicable, and all other persons who have claims of any kind (whether in tort, contract or otherwise) against IESO or the transferring Regulatory Asset Owner, as the case may be, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – ~~Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province or any consent requirement applicable to a Pledge that may arise by operation of any applicable law of the Province, a~~A Pledge by an Absolute Assignee may be made to secure any ~~related~~ Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the related Investment Interest in accordance with the terms of the Pledge. ~~Other than as required by the Financing Plan, no~~No consent of, or notice to, any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation shall, subject to the terms thereof, give rise to a security interest in respect of which the PPSA applies, and may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected pursuant to the PPSA.[17][25] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. ~~Subject to the terms of the Collective Action Agreement, a~~A Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. All provisions of the PPSA shall apply to the Regulatory Asset on the basis that it is intangible personal property, except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner or Pledgee to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document~~, in each case under the Financing Plan~~. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's rights and interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective and coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.

Article 7 – Establishment of the Fair Allocation Plan[18][26]

(1) Adoption of the Fair Allocation Plan – The Delegate may, ~~[~~by written declaration,~~]~~ designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair

[17][25] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

[18][26] The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current procurement contracts and not invest in extending service lives to secure further procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Act, except if amended, amended and restated or terminated by a further written declaration made by the Delegate in compliance with ~~Section 7(4).~~[the Regulations].

(2) Principles and Parameters – A Fair Allocation Plan shall seek to allocate Future Fair Share of Green Transition Benefits across present and future ~~Retail Consumer Groups~~Regulated Consumers on a basis that the Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters:

1. Future Fair Share of Green Transition Benefits should be allocated over the period ending on the Program End Date.

2. The Fair Allocation Plan should specify the Reference Periods for the purpose of identifying applicable ~~Retail~~Regulated Consumer Groups and allocating Future Fair Share of Green Transition Benefits among them on a relative basis over time.

3. The share of Future Fair Share of Green Transition Benefits allocable to a particular ~~Retail~~Regulated Consumer ~~Group~~ in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to ~~the Retail~~such Regulated Consumer ~~Group~~ over such Reference Period~~.~~, other than in exceptional circumstances.

4. The share of Future Fair Share of Green Transition Benefits to be allocated to a ~~Retail~~Regulated Consumer Group and any future ~~Retail~~Regulated Consumer Group at a particular time should not exceed the Estimated Future Green Transition Benefits, measured in respect of the Reference Periods following such particular time and to the Program End Date.

5. No future ~~Retail~~Regulated Consumer Group should be allocated an unreasonably disproportionate share of Estimated Future Green Transition Benefits. Except in exceptional circumstances or in the case of any reallocation of an Over-Assessed Amount as contemplated in 7, below, the Future Fair Share of Green Transition Benefits to be allocated under a Fair Allocation Plan to any future ~~Retail~~Regulated Consumer Group should have regard to *[Insert formula if a year-over-year maximum amount is determined to be appropriate]*.

6. The time value of money should be reflected in the Fair Allocation Plan, in order to equate the relative values of the nominal allocations of Future Fair Share of Green Transition Benefits, calculated in current dollars, to future ~~Retail~~Regulated Consumer Groups over time.

7. To the extent there has been an Over-Assessed Amount, the Fair Allocation Plan may determine that an adjustment should fairly be made to rebate ~~Retail~~Regulated Consumers for such an amount, by reducing the costs otherwise attributable under the Act to such ~~Retail~~Regulated Consumers. The relative costs of the Green Generation Initiative are reflected under the Act by the attribution of Transition Charges to such Consumer Groups, based on the Financing Plan seeking to track the allocations of benefits under the Fair

Allocation Plan. Accordingly, the Maximum Transition Charge Amount determined for one or more ~~Retail~~Regulated Consumer Groups having regard to the Fair Allocation Plan otherwise applicable may be appropriately reduced to recognize the effect of the Over-Assessed Amount. In such a case, a determination to reduce the Maximum Transition Charge Amount applicable for certain related Reference Periods should have regard to the principle that the corresponding rebate should be extended to benefit the Consumer Group or Consumer Groups in closest proximity to the Legislative Implementation Date.

(3) Attribution Methodology – The Fair Allocation Plan shall specify the Attribution Methodology for the purposes of allocating the Period ~~Transition~~Finance Charges across the ~~Retail~~Regulated Consumers~~ of a particular Retail Consumer Group~~. The Attribution Methodology shall result in an attribution of such Transition Charges that is considered by the Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation; provided that the Attribution Methodology shall not be used to limit the recovery of Transition Charges.

(4) Amendments of the Fair Allocation Plan – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation~~ and~~, (b) comply with any restrictions or limitations specified with respect thereto in any Funding Obligation~~.~~, and (c) not impair any Regulatory Asset, outstanding Funding Obligations or any Transition Charges.[27]

Article 8 – The IESO ~~Retained Interest~~Funding Shortfall

(1) Recording of IESO Funding Shortfall – Subject to 8(3), IESO will record any IESO Funding Shortfall [in its books] [in a variance account established in accordance with section 25.33 of the Electricity Act / Ontario Regulation 430/04, as amended].

(2) ~~(1) Maintain Books of Account~~ ~~– IESO may maintain books of account to record the IESO Retained Interest~~**Adjustments** – IESO will record it [its books][its variance account] all adjustments to the IESO Regulatory Asset Amount ~~and all adjustments thereto~~ from time to time. Such books of account shall be determinative with respect to the amount of IESO's related regulatory asset.

(3) ~~(2)~~ Limitation on Additions – Subject to 8(3), IESO shall not record additions to the IESO ~~Retained Interest~~ Regulatory Asset Amount in respect of IESO Funding Shortfalls (a) if such additions are restricted by the terms of any Disposition Document or the Collective Action Agreement, or (b) on or after •, 2017.

(4) ~~(3)~~ Dispositions – IESO may effect a Disposition of its right to recover all or any part of the IESO Regulatory Asset Amount to an Absolute Assignee if (a) the Absolute Assignee has or will concurrently become bound by the Collective Rights Agreement; (b) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; and (c) the Financial Services ~~Agent~~Manager confirms in writing that the Disposition complies with any restrictions or limitations specified with respect thereto in any documents evidencing the Funding Obligations and is permitted under the Financing

[27] It is anticipated that the terms of any rated financing will restrict further issuances pending a RAC in relation to any changes to the FAP.

Plan~~; and (d) the net proceeds payable to IESO from the sale of the related Investment Interest would not exceed the IESO Retained Interest Amount immediately before the time of such Disposition~~.

(5) ~~(4)~~ **No Continuing Interest in any Investment Interest** – IESO shall have no continuing right or interest in ~~any Investment Interest~~, or maintain any right to recover all or any part of, any IESO Regulatory Asset Amount that is subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party ~~and IESO shall not assert any such right or interest or take or omit to take any action to exercise or enforce its rights or interests under the IESO Retained Interest if such action or omission would impede or obstruct the rights of any Absolute Assignee or a Pledgee to enforce its rights and interests in any Investment Interest, except if IESO is expressly permitted to take or omit to take such action, respectively, under the related Disposition Document or the Collective Rights Agreement~~.

~~(5) **IESO Financing Costs** – IESO shall be entitled in good faith to incur reasonable financing costs (including interest and other reasonable financing charges) reflecting market terms and conditions and which are payable in arrears, in order to finance its ownership of the IESO Retained Interest from time to time.~~

(6) IESO Recoveries – IESO shall, in respect of a month, be entitled to receive from IESO Remittances on a related Settlement Date the amount (if any) ~~available to~~of any IESO ~~under Section 5(6)(b)~~Recoveries.

Article 9 – The Financing Plan

(1) Power to Prepare, Implement and Amend the Financing Plan – The Financial Services ~~Agent~~Manager shall be authorized to prepare, implement and amend a financing plan [for the Financing ~~Plan. If the Financial Services Agent is unwilling or unable to prepare~~Entities] and propose the adoption of such financing plan as the Financing Plan~~, the Delegate may by written declaration designate one or more other persons who shall be authorized to prepare, implement and amend the Financing Plan.~~ for the purposes of this Act. [The Financial Services Manager shall have the right to withdraw its financing plan as the Financing Plan at any time if it determines that implementing the Financing Plan in such manner would not be in the best interests of a Financing Entity.]

(2) ~~Terms~~Principles and ~~Conditions~~Parameters of the Financing Plan – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions~~. The Financing Plan shall have~~, having regard to the principles and parameters set forth in Schedule ~~3 and such other conditions and requirements as may be specified in a written declaration of the Delegate or in accordance with the Regulation.~~3.

(3) OEB Approval – [Any Additional Funding Charge payable to ~~or for the benefit of~~the Financial Services Manager in respect of services provided by the Financial Services ~~Agent~~Manager (other than third party costs) shall be subject to review and approval by the OEB.][28]

(4) ~~OEB~~ Review of Financing Plan – The [OEB ~~[~~shall~~]~~ undertake an annual review of the records maintained by the Financial Services ~~Agent~~Manager for the purpose of

[28] Under consideration.

confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan.][29]

(5) Replacement of the ~~Administrative Agent~~Financial Services Manager – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the ~~Administrative Agent~~Financial Services Manager shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services ~~Agent~~Manager under the Financing Plan. If the Financial Services ~~Agent~~Manager is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services~~.~~ Manager. [Any replacement financial services manager must comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations.]

(6) Obligation to Apply IESO Remittances – The Financial Services ~~Agent~~Manager shall ensure that amounts transferred to it [under Article 5, as agent for and on behalf of the Absolute Assignees], or otherwise in respect of or as proceeds from an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose.

(7) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, any Alternative Collection Agent, the Financial Services ~~Agent~~Manager, the OEB~~, the Province or the Lieutenant Governor in Council~~ or Her Majesty in right of Ontario, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount. ~~[All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]~~

(8) Incurrences are Binding – ~~Notwithstanding anything to the contrary in this Act, each~~Each Disposition made to or by an Absolute Assignee ~~and~~, all amounts payable or becoming due and payable by or on behalf of an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation and each Pledge entered into by an Absolute Assignee, shall be valid and binding ~~for the purposes of this Act~~, including in determining the amount of related Transition Charges, ~~despite~~notwithstanding any ~~impairment or defect resulting from such failure~~defect in the manner of incurrence or any inconsistency with the Fair Allocation Plan or the Financing Plan.

[Article 10 – Compliance Matters~~19~~30

[29] Under consideration.

~~19~~30 As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article and any potential role for the Auditor General is still under consideration.

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Act, the OEB shall have the right, jurisdiction, power and authority to examine the books and records of *[Insert names if any]*.

(2) [OPG's Rate Settings – When setting other rates for or in respect of OPG, the OEB shall not take into account (a) the administrative or servicing fees charged by OPG as Financial Services ~~Agent~~Manager [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services]; (b) the cost consequences to OPG of being the Financial Services ~~Agent~~Manager; or (c) the consequence of OPG consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.]~~20~~31

Article 11 – Undertaking of the ~~Lieutenant Governor in Council~~[21]Her Majesty in right of Ontario[32]

(1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – ~~The [Lieutenant Governor in Council]~~Her Majesty in right of Ontario shall not in any way take or permit (including by any agency or administrative body) any action to reduce, impair, postpone or terminate the obligation of ~~Retail~~Regulated Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly, including through the introduction of any bill or the passing of any legislation or regulation having such effect. The amount of Transition Charges determined under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by ~~the Lieutenant Governor in Council~~Her Majesty in right of Ontario (including by any agency or administrative body), including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(2) Undertaking and Agreement – ~~The [Lieutenant Governor in Council]~~Her Majesty in right of Ontario shall not:

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

(b) except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the Absolute Assignees or any Pledgee from time to time;

~~20~~31 As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as ~~Administrative Agent~~Financial Services Manager of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role.

~~21~~32 Under consideration, including the dealers' request for (1) a "servicer guarantee" ~~and~~(2) a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes and (3) in the event of a market disruption that renders it impossible to refinance debt when required (or where financing of amounts required to service the debt is not available because of a market disruption where the Financing Entity was relying on such further issuance of debt until the recovery is set to begin to fund interest), a covenant by the Province to step in and payout the debt or to recover the debt from ratepayers as it becomes due, notwithstanding the intended Fair Adjustment.

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment , amendment and restatement or termination would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder, or would not otherwise comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, an IESO Successor ~~IESO~~ shall immediately be established by Her Majesty in right of Ontario to perform such obligations.

(4) **Compensation for Failure** – Absolute Assignees shall be compensated by Her Majesty in right of Ontario for any losses suffered by them as a result of any failure by ~~the Lieutenant Governor in Council~~Her Majesty in right of Ontario to comply with its undertakings and agreements in this Article ~~11.[22]~~11.[33]

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid.

(6) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the ~~Lieutenant Governor in Council~~Her Majesty in right of Ontario, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 12 – Regulations

Regulations may be made under this Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

[22][33] Requested by ~~Torys~~Dealers. For discussion.

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 13- Miscellaneous[2334]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Act shall be required with respect to the actions to be taken in compliance with this Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Act, if any provision of this Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Act that is taken by any person who is or may become obligated or have duties that arise under this Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Act are intended to be severable and that the Legislature would have enacted this Act even if any Article,

[2334] OPG would like the specific amendments related to OPG to be included in the Bill.]

Section, paragraph or subparagraph of this Act held to be unconstitutional or invalid had not been included in this Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3[24]

Principles and Parameters for Establishing the Financing Plan

The following principles and parameters provide a guideline as to what a Financing Plan should address:

(1) in respect of each Reference Period, make reference to the allocations of Future Fair Share of Green Transition Benefits to each Reference Group contemplated by the Fair Allocation Plan;

(2) estimate IESO Funding Shortfalls for each Reference Period;

(3) consider alternative funding arrangements suitable to fund the estimated IESO Funding Shortfalls, including short term and/or long term Funding Obligations;

(4) ~~(9)~~ consider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that payments made for a Reference Period reasonably correspond to the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

(5) ~~(4)~~ if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable ~~Retail Consumer Group~~Regulated Consumers under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(6) ~~(5)~~ reflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical ~~Retail~~Regulated Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation ~~having regard to the application of the Allocation Methodology~~);

(7) require the Financial Services Manager, for and on behalf of each Regulatory Asset Owner, to use [diligent efforts to manage Finance Amounts to be borne by Ratepayers];

(8) include a proposal regarding the compensation of the Financial Services Manager that reflects market terms and conditions; and

(9) [require that the Financial Services Manager report annually to the Ministry of Energy on the operation of the Financing Plan including, in particular, with respect to the amount and terms of the Funding Obligations incurred and the sufficiency of such Funding

[24] ~~Awaiting input from Torys based on OPG mark-up of Financing Plan sections.~~

Obligations for the purpose of funding the estimated Funding Shortfalls in accordance with the Fair Allocation Plan.]

(10) ~~**(6)**~~ incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Absolute Assignees will require committed access to short term liquidity to cover estimated IESO Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Financial Services Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations should not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Financial Services Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Financial Services Agent shall cause the applicable Absolute Assignee to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Financial Services Agent will select counterparties under any transaction to be entered into by an Absolute Assignee, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Financial Services Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Financial Services Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(11) ~~(7)~~ the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the IESO Funding Shortfalls from time to time on a basis that is consistent with the allocations of Future Fair Share of Green Transition Benefits to applicable Reference Groups under the Fair Allocation Plan;

(12) ~~(8)~~ the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(13) ~~(9)~~ the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Financial Services Agent and other agents and service providers to the Absolute Assignees may be determined, allocated and paid;

(14) ~~(10)~~ the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(15) ~~(11)~~ the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(16) ~~(12)~~ the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(17) ~~(13)~~ the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(18) ~~(14)~~ the basis upon which any Disposition may be made or effected by an Absolute Assignee, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(19) ~~(15)~~ describe the requirements applicable to any special purchase entity that will purchase an Investment Interest, including proposed capitalization, governance, and restrictions on their powers and activities; and

(20) ~~(16)~~ the basis on which any Pledge may be given or effected.

[NTD: E&Y will need to see the guidelines of the Fair Allocation Plan set in reference to parameters that will allow it to establish a modeling curve]

- [**Inflation period**: (between November 2017 – and April 2022) bill increases need to be capped at inflation (assumed at 2% for modeling purposes)]
- [**Transition Period**: (May 2022- April 2027) bills increased at a consistent rate which is set so that the borrowing will not exceed the Trust's capacity, which is determined by the Finance Service Manager]
- [**Amortization Period**: (May 2027-April 2047) equitable distribution of Finance Amount among Regulated Consumers]

Hi Everyone,

This will be a meeting to discuss the Ontario Fair Hydro Plan (OFHP).

The meeting will be held at Blakes and the main contact on site will be Lindsay Dicks (416-863-4347 or Lindsay.Dicks@blakes.com). Please inform Lindsay if there will be additional people attending from your group because she will need to pass this information along to their security desk.

Please only forward this invitation to your respective teams if their participation is necessary for the facilitation of this meeting, as the boardroom has limited capacity.

Any materials available for this meeting will be provided in a future update.

Given that this meeting follows a holiday, if you are unable to attend in person or prefer to do so from your own office, please use the following conference call information:

Toll-free dial-in number: 1-866-633-1033
Local dial-in number: 416-212-8013
Conference ID: 3164921#

If there are any additional scheduling needs or updates, please contact Joseph Pau (416-326-1018 or Joseph.Pau@ontario.ca).

Thanks,

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Fair Hydro Act (April 15 2017) Consultationv4.pdf

This confidential draft document is provided for discussion purposes only. It should not be construed as representing a position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

Confidential Draft

A proposal to create Legislation.

Intergenerational Fairness in Hydro Rates Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Notes re this draft:
- all numbering of provisions will need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix including renewable energy, and to removing barriers to and promoting opportunities for renewable energy projects.

The Government of Ontario has established a regulatory and contractual framework related to the generation and sale of electricity to ensure significant investment in decarbonizing and modernizing the generation of electrical energy and the production therefrom.

Given the long-term benefits that future generations of Ontarians will receive from many of these investments, it is appropriate and fair to raise money in respect of these generating facilities in a manner that allocates the costs of and benefits from these investments fairly among present and future consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

CONTENTS

PART I
GENERAL

1. Interpretation
2. Purpose
3. Crown bound
4. Protection and guarantee of scheme

PART II
FAIR ADJUSTMENT PERIOD

5. Application of Part
6. Determination of rates, first twelve months
7. Determination of rates, on and after May 1, 2018

PART III
CLEAN ENERGY ADJUSTMENT PERIOD

8. Application of Part
9. Specified consumers to pay clean energy adjustment
10. Irrevocability of clean energy adjustment
11. Determination of clean energy adjustment
12. IESO to invoice electricity vendors
13. Electricity vendor to apply rate
14. Pro rating of payments
15. Electricity vendor, account

PART IV
FAIR ALLOCATION PLAN AND FINANCING PLAN
FAIR ALLOCATION PLAN

8. Minister to prepare plan
8.0.1 Amounts to be allocated
8.2 Compliance

FINANCING PLAN

11. Financial Services Manager to prepare plan
11.1 Compliance with Plan
12. Contents of plan

PART V
THE REGULATORY ASSET [AND INVESTMENT ASSET]

Confidential Draft

22. Regulatory asset established
22.1 Recording of IESO funding shortfall in books
22.2 IESO funding shortfall
23. Transfer of regulatory asset
23.1 Investment asset
24. Transfer of investment asset
26. Administration of investment asset
27. Investment asset owner may grant pledge
28. Collective action required
29. Exercise of rights

PART VI
MISCELLANEOUS

34. Appointment of agent, invoicing or collection
35.1 Not Crown agent
35.2 Sequestration
37. Successors
37.1 Choice of law
38. Conflict
39. No further approvals, etc.
97. Immunity
98. References in marketing materials and offering documents
99. Non-application, Financial Administration Act, s. 28
100. Regulations

PART VII
AMENDMENTS TO OTHER ACTS
ELECTRICITY ACT, 1998
AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

PART VII
COMMENCEMENT AND SHORT TITLE

103. Commencement
104. Short title
Schedule 1 Method for determining amount of clean energy adjustment for reference period

PART I
GENERAL

Interpretation
Definitions

1. (1) In this Act,

"clean energy adjustment" means…

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in renewable energy projects [which use cleaner sources of energy],

(b) removing barriers to and promoting opportunities for renewable energy projects, and

(c) promoting a green economy [including conservation and demand management]; ("French")

Confidential Draft

"electricity vendor"[1] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"Fair Allocation Plan" means a plan prepared under section X; ("French")

"Financial Services Manager" means Ontario Power Generation Inc. or such other entity as may be prescribed; ("French")

"Financing Plan" means a plan prepared under section X; ("French")

"funding obligation" means a payment obligation incurred by or on behalf of the regulatory asset owner or an investment asset owner under section x; ("French")

"holiday" means [O. Reg. 95/05 definition];] ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"investment asset" means all or part of the regulatory asset that is deemed to be an investment asset under section x; ("French")

"invoice amount" means the sum of the following amounts:

1. The commodity price of the electricity used during the invoice period.

2. The rates and charges set out in the applicable rate order issued by the Ontario Energy Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

3. Any adjustment required under section 25.33 of the *Electricity Act, 1998*.

4. The amount of any harmonized sales tax payable under Part IX of the *Excise Tax Act* (Canada); ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

[1] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

Confidential Draft

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a), or such shorter period as may be set out in a Fair Allocation Plan; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of the owner of an investment asset by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the regulatory asset established under section X or, if any part of that regulatory asset has been transferred under this Act, the portion of the regulatory asset that is not deemed to be an investment asset; ("French")

[NOTE: CURRENT PROPOSAL IS THAT THE REGULATORY ASSET WILL REPRESENT THE RIGHT OF RECOVERY. UPON A TRANSFER OF AN INVESTMENT INTEREST, THE QUANTUM OF THE RIGHT OF RECOVERY FOR THE REGULATORY ASSET WILL BE REDUCED. THE TRANSFER OF AN INVESTMENT INTEREST WILL RESULT IN IESO RELINQISHING ANY INTEREST IN THE TRANSFERRED INVESTMENT INTEREST, AND WILL RESULT IN THE TRANSFEREE ACQUIRING THE RIGHT OF RECOVERY OF AN INTEREST IN THE CLEAN ENERGY ADJUSTMENTS DETERMINED BY REFERENCE TO FINANCE AMOUNTS INCURRED BY OR ON BEHALF OF THE TRANSFEREE.]

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity, receives an invoice in respect of the account and meets the criteria set out in subsection (2); or

Confidential Draft

(b) such other person as may be prescribed ("French")

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French")

"transfer" means an assignment, conveyance, disposition or sale; ("French")

"weekday means [O. Reg. 95/05 definition]; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Confidential Draft

Invoice amount, exclusions

(2) For the purposes of the definition of "invoice amount" in subsection (1), an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Ontario Energy Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

    i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

    ii. A charge labelled as a "specific service charge" or "retail service charge".

    iii. A rate rider.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer,

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the Act;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Confidential Draft

Intention of the Legislature[2]

(5) For greater certainty, all of the provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same

(6) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect a funding obligation that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

2. (1) The purposes of this Act are,[3]

(a) to ensure that the costs of the clean energy initiative are fairly distributed among specified customers over time;

(b) to recognize the long-term benefits of the clean energy initiative that accrue over time and will continue to benefit present and future electricity consumers in the Province;

(c) to promote the use of clean energy sources and technologies, including low carbon, alternative energy sources and renewable energy sources, in a manner consistent with the policies of the Government of Ontario;

(d) to promote economic efficiency and sustainability in the generation, transmission, distribution and sale of electricity;

(e) to facilitate the maintenance of a financially viable electricity industry, including by raising money in respect of sites and facilities in the Province for the generation of electrical energy and the production therefrom;[4] and

(f) to protect the interests of consumers with respect to prices and the adequacy, reliability and quality of electricity service.

Crown bound

3. This Act binds the Crown.

[2] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*
[3] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.
[4] FLS - as per the note in the Preamble on this language, please see 92A (4) of the *Constitution Act, 1867.*

Confidential Draft

Protection and guarantee of scheme
Prohibition

4. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may enter into agreements for the purposes of guaranteeing that compensation will be paid to an investment asset owner for losses suffered as a result of,

(a) a contravention of subsection (1);

(b) a change in law that would adversely affect the rights under this Act of an owner of an investment asset;

(c) approval by the Lieutenant Governor in Council of a Fair Allocation Plan, or an amendment to a Fair Allocation Plan, that fails to recognize the principles set out in section x; or

(d) a final determination by a court of final jurisdiction rendering invalid or ineffective all or any of the provisions of this Act.[5]

IESO obligations

(5) If the IESO fails to carry out its obligations under this Act for any reason, including because the IESO is dissolved or restructured or because it becomes insolvent, the Government of Ontario shall carry out those obligations or ensure they are carried out by another appropriate entity.

[5] Note to translator: See s. 9 of the Public Authorities Protection Act.

Confidential Draft

PART II
FAIR ADJUSTMENT PERIOD

Application of Part

5. This Part applies in respect of the five year period beginning on May 1, 2017 and ending on April 30, 2022.

[NOTE: THIS IS A ROUGH ADAPTATION OF THE "FAIR ADJUSTMENT" CONCEPT. FOR YEARS 2 TO 5, THE LGIC WILL PASS A REGULATION TO LIMIT THE INCREASE TO REDUCED HYDRO BILLS TO REFLECT A FURTHER "FAIR ADJUSTMENT". THE SUM OF ALL FAIR ADJUSTMENTS WILL CORRESPOND TO THE SUM (TIME VALUE ADJUSTED) OF THE PAYMENTS BY PAST RATEPAYERS OF MORE THAN THEIR FAIR SHARE OF THE GREEN COSTS (I.E., AS A RESULT OF THE EXISTING AMORTIZATION RATE OF GREEN COSTS THROUGH THE GA CALCULATION). THE VALUE OF THOSE PAST OVER-PAYMENTS WILL BE A LIMIT ON THE TOTAL AMOUNT OF FAIR ADJUSTMENTS. THE CONCEPT IS MORE FLEXIBILE THAN THE SUGGESTION HERE, WHICH RELATES ONLY TO THE FIRST 5 YEARS – ALTHOUGH THAT IS CERTAINLY THE CURRENT FOCUS. THE IDEA FOR NOW IS THAT THE ACT WILL REDUCE HYDRO BILLS FOR THE FIRST YEAR, AND EACH OF THE FOLLOWING 4 YEARS BY REGULATION – IN AGGREGATE EQUAL TO THE PAST OVER-CHARGES. TO ENSURE THAT THE INCURRENCE OF FUNDING OBLIGATIONS AND CORRESPONDING FINANCE AMOUNTS DO NOT CONFLICT WITH THE FAIR ADJUSTMENT (AND REDUCED HYDRO RATES), THERE WILL BE A MORATORIUM ON CLEAN ENERGY ADJUSTMENTS DURING THE FIRST 5 YEARS (ON BOTH IESO CHARGE THROUGH RECOVERIES AND IN RESPECT OF FINANCE AMOUNTS PAYABLE DURING THESE FIRST 5 YEARS – PROVIDED THAT IF THE LGIC DOES NOT ULTIMATELY DETERMINE THAT A FAIR ADJUSTMENT WILL APPLY IN A YEAR, THE BALANCE, UNDER THE FAP, WILL BE RECOVERABLE BY WAY OF A PASS-THROUGH OF FINANCE AMOUNTS /IESO RECOVERIES. THE IDEA WILL BE THAT THE LGIC WILL DETERMINE THE AMOUNT OF A FAIR ADJUSTMENT PRIOR TO THE RELEVANT PERIOD TO WHICH IT APPLIES. NOTE THAT THE PAST-OVERPAYMENTS WILL BE FACTORED INTO THE FAP ON A GO FORWARD BASIS, IN ADDITION TO THE CONTINUING GREEN COSTS – AND AMORTIZED OVER THE LONGER PERIOD. THE FOLLOWING PROVISION ADDRESSES ONLY THE FIRST YEAR OF THE FAIR ADJUSTMENT.]

Determination of rates, first twelve months

6. (1) The Ontario Energy Board shall determine the rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 in the following manner:

1. Determine the average rate payable by a representative consumer by applying the method set out in subsection (2).

2. Determine the average monthly invoice amount that would be payable by a representative consumer under the rate determined under paragraph 1.

3. Determine the amount that is [# tbc] per cent less than the monthly invoice amount determined under paragraph 2.

4. Determine the average rate payable by a representative consumer that would result in the monthly invoice amount mentioned in paragraph 3 for a representative consumer.

[Note: Query whether 79.16 of the OEBA should be replaced to clearly state that the price-setting work that the OEB does under the RPP is authorized and that the work it must do to accommodate the Fair Adjustments is also authorized going forward.]

Determination of baseline, average rate

(2) For the purposes of paragraph 1 of subsection (1), the follow method applies:[6]

1. The Board shall determine rates in a manner that is consistent with the Standard Supply Service Code issued by the Board.

2. In determining the rates, the Board shall forecast the cost of electricity to be consumed by the consumers to whom the rates apply, taking into consideration adjustments required under section 25.33 of the *Electricity Act, 1998* and shall ensure that the rates reflect those costs.

3. The Board shall set an off-peak period associated with the regulated price referred to as RPEMOFF in section 3.4 of the "Standard Supply Service Code for Electricity Distributors" issued by the Board,

    i. that begins no later than 7 p.m. on every weekday and ends,

        A. no earlier than 7 a.m. on the next day if the next day is a weekday, or

        B. no earlier than 12 a.m. on the next day if the next day is Saturday, Sunday or a holiday, and

[6] FLS: Please see section 6 of O. Reg. 95/05 (a bilingual reg).

Confidential Draft

ii. that begins no later than 12 a.m. on every Saturday, Sunday and holiday and ends no earlier than,

A. 12 a.m. on the next day, if the next day is Saturday, Sunday or a holiday, or

B. 7 a.m. on the next day if the next day is a weekday.

Determination of rates, on and after May 1, 2018

7. On and after May 1, 2018, the Board shall determine the rate for electricity payable by a specified consumer in the following manner:

1. Determine the rate by applying the steps set out in section 6.

2. Adjust the rate determined under paragraph 1 for inflation in accordance with the regulations.

PART III
CLEAN ENERGY ADJUSTMENT PERIOD

Application of Part

8x. This Part applies in respect of the period beginning on May 1, 2022 and ending on April 30, 2047.

[NOTE: CONSISTENT WITH THE EARLIER NOTE, THE MORATORIUM IS LIFTED IF THE LGIC DETERMINES THAT NO FAIR ADJUSTMENT WILL APPLY, IN WHICH CASE CEAs WILL APPLY DURING THE FIRST 5 YEARS. THE DIVISION OF TIME CONTEMPLATED IN THIS DRAFT IS MORE INFLEXIBLE THAN WE HAVE ENVISIONED]

Specified consumers to pay clean energy adjustment

9x. (1) Subject to subsection (1.1), upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

[NOTE: MODIFY TO REFLECT THAT THE PAYMENT IS MADE TO AN EV, AS AGENT FOR THE INVESTMENT ASSET OWNERS]

Limitation

(1.1) No clean energy adjustment is payable by a specified consumer on a day before May 1, 2022. [NOTE: MODIFY TO REFLECT EARLIER NOTES]

Confidential Draft

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether payment of the amounts is inconsistent with the Fair Allocation Plan applicable at the time when the payment is due;

(b) whether the payments relate to funding obligations that were incurred in a manner that did not comply with the Financing Plan; and [NOTE: UNDER CONSIDERATION. SEEMS OVERBROAD]

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to the investment asset owners in respect of their respective interests in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise. [NOTE: ENFORCEMENT WILL BE LIMITED UNDER THE ACT, SO THAT INVESTMENT ASSET OWNERS CAN'T SERVE NOTICES ON RATEPAYERS DIRECTLY, OTHER THAN THROUGH A SPECIFIED AGENT AND PROCESS – SEE BELOW]

Irrevocability of clean energy adjustment

10x. (1) Any clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is an error in calculations made by the electricity vendor.

Determination of clean energy adjustment

11x. (1) The Ontario Energy Board shall apply the method set out in Schedule 1 to determine the amount of the clean energy adjustment payable on a monthly basis by each electricity vendor on behalf of the electricity vendor's specified consumers. . [NOTE: THE AMOUNTS WILL BE CALCULATED AS FOLLOWS: (1) FSM (FOR ALL IAOs) WILL INFORM OEB OF PERIOD FINANCE AMOUNTS FOR THE REFERENCE PERIOD (IE ESTIMATE OF FAs PLUS PAST TRUE UP ALLOCATION) (2) OEB WILL ATTRIBUTE THAT AGGREGATE AMOUNT

Confidential Draft

BASED ON RPP-LIKE RATE DETERMINATION FOR CUSTOMERS OF THE RELEVANT CLASSES (3) OEB WILL TELL EVs THE RATES APPLICABLE TO THEIR CUSTOMERS, SO THAT THE FULL AMOUNT IN (1) IS RECOVERED (BASED ON EXPECTED COLLECTION RATES AND NONE PAYMENTS)]

True up amount

(2) The Ontario Energy Board may adjust the amount determined under Schedule 1 from time to time to address the any difference between the amount of the clean energy adjustment payable in respect of the reference period and the amount of the clean energy adjustment collected as of the date of the determination. [NOTE: THIS IS ONLY A PARTIAL DESCRIPTION OF THE TRUE UP. SEE EARLIER DRAFTING INSTRUCTION FOR SUGGESTED APPROACH – I.E., DESCRIBE BROADLY THE NATURE OF THE CALCULATION AND THEN SPECIFY THE CALCULATION IN A DETAILED CALCULATION TO BE INCLUDED IN A REGULATION]

Same, regulations

(3) The Lieutenant Governor in Council may make regulations governing the calculation under subsection (2) and how the amount is to be applied to the clean energy adjustment.

Communication to electricity vendors

(4) The Ontario Energy Board shall communicate to each electricity vendor information relating to the clean energy adjustment to be allocated by the electricity vendor to each specified consumer in respect of a reference period. [NOTE: WE ARE NOT SURE THERE IS A ROLE FOR IESO. WE THOUGHT THE PERIOD FINANCE AMOUNTS WOULD BE FORWARED BY FSM TO OEB DIRECTLY]

IESO to invoice electricity vendors

12x. (2) The IESO shall issue an invoice to each electricity vendor for the clean energy adjustments in accordance with the regulations.

IESO to collect

(3) The IESO shall, as an agent of the investment asset owner, make reasonably diligent efforts to collect clean energy adjustments from electricity vendors.

Collection account

(3.1) The IESO shall establish an account in which to record its collection of the following:

1. Amounts remitted from accounts established under section 31.

2. Payments made by specified consumers directly to the IESO as electricity vendor, in respect of clean energy adjustments.

Confidential Draft

Deposit

(4) The IESO shall promptly deposit all amounts received in respect of clean energy adjustments into the account established under subsection (3.1). [NOTE: CONSIDER FEASIBILITY OF DAILY SEGREGATION/ REMITTANCES]

Same, held in trust

(2) The amounts collected are deemed to be held in trust for the investment asset owner.

IESO to remit

(5) The IESO shall remit amounts received in respect of clean energy adjustments to or for the benefit of the regulatory asset owner in accordance with the regulations.

Electricity vendor to apply rate

13x. (1) Each electricity vendor shall [in accordance with the regulations?] determine the proportionate share of clean energy adjustments payable on a monthly basis by each of its specified consumers.

Electricity vendor to invoice specified consumers

(2) The electricity vendor shall issue an invoice to each specified consumer for the applicable amount of clean energy adjustments in accordance with the regulations.

Electricity vendor to collect

(3) Each electricity vendor shall, as an agent of the IESO, make reasonably diligent efforts to collect clean energy adjustments from specified consumers.

Pro rating of payments

14x. (1) This section applies if,

(a) an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices; and

(b) the amount paid is less than the total amount payable.

Same

(2) The electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices.

Deposit

(3) The electricity vendor shall deposit the portion of the payment allocated to clean energy adjustments into the account established under X.

Confidential Draft

Electricity vendor, account

15x. (1) Each electricity vendor shall establish and maintain an account into which the electricity vendor deposits or receives only the following:

1. Payments by specified consumers in respect of clean energy adjustments.

2. Portions of payments by specified consumers that are allocated to clean energy adjustments under subsection 30 (2).

3. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Held in trust

(2) The amounts required to be deposited or received into the account are deemed to be held in trust for the investment asset owner.

Remittance to IESO

(5) The electricity vendor shall remit amounts received in respect of clean energy adjustments to the IESO for the benefit of the investment asset owner in accordance with the regulations.

Payment re regulatory asset

(x) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the applicable Fair Allocation Plan, the difference is payable to the IESO by the specified consumers.

[NOTE: REQUIRES FURTHER CONSIDERATION.]

PART IV
FAIR ALLOCATION PLAN AND FINANCING PLAN

Fair Allocation Plan

Minister to prepare plan

8. (1) In order to fairly measure and allocate amounts described in section 8.0.1 as of a specified day among specified consumers for the purposes of this Act, the Minister shall prepare and provide to the Lieutenant Governor in Council a written plan entitled the Fair Allocation Plan to take effect on the specified day.

Amendments to the plan

(2) Subject to the approval of the Lieutenant Governor in Council, the Minister may amend the Fair Allocation Plan from time to time, as the Minister considers appropriate, having regard to the requirements of this Act.

Confidential Draft

Effective date

(3) The Fair Allocation Plan or an amendment to the plan takes effect on the day that the plan or the amendment, as the case may be, is approved by the Lieutenant Governor in Council.

Publication

(4) The Minister shall ensure that the Fair Allocation Plan and any amendments to the plan are made available to the public in a manner that the Minister considers appropriate.

Amounts to be allocated

8.0.1 The amounts referred to in subsection 8 (1) are, in relation to a specified day,

[NOTE: THE IDEA IS THAT THE EXPECTED FUTURE GREEN COSTS WILL BE INCLUDED AS COSTS, AND RATHER THAN AMORTIZING THEM BASED ON THE TERMS OF THE POWER CONTRACTS, THE COSTS WILL BE AMORTIZED AND PASSED THROUGH BASED ON A MORE ACCURATE AMORTIZATION SCHEDULE TIED MORE TO THE COSTS AND BENEFITS OF THE GREEN PLAN OVER THE NEXT 30 YEARS. IN ADDITION, TO THE EXTENT THAT THERE HAVE BEEN OVER-CHARGES (BASED ON THE SHORT AMORTIZATION OF GREEN COSTS) SINCE 2005, THOSE OVERAGES WILL BE ADDED TO THE AMOUNT OF THE FAP COSTS TO BE AMORTIZED OVER THE FUTURE – I.E., THE FUTURE GENERATIONS WOULD HAVE BENEFITED FROM AN ARTIFICALLY LOW SHARE OF THE COSTS SINCE THE RATEPAYERS FOR 2005 – 2017 PAID TOO MUCH, SO WE SHOULD BE ABLE TO ADD THOSE TO THE FUTURE GROUPS AND RECOGNIZE A FAIR ADJUSTMENT FOR CURRENT RATEPAYERS]

(a) the costs incurred by the IESO before that day or expected to be incurred by the IESO on or after that day in relation to,

(i) payments made or expected to be made under section 78.1 of the *Ontario Energy Board Act, 1998*, other than payments made under contracts with Bruce Power L.P or Bruce Power A. L.P. or their successors or assigns, and

(ii) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*; and

(b) such other costs, benefits or amounts as may be prescribed, in respect of the clean energy initiative, made or received before that day or expected to be incurred on or after that day. (“French”)

C.C.R.E. Draft

Principles

8.1 In preparing the Fair Allocation Plan or any amendments to the plan, the Minister shall have regard to the following principles:

1. The amounts should not be allocated in respect of any period of time after April 30, 2047.

1.1 At no time should the Fair Allocation Plan impair any investment asset, outstanding funding obligation or clean energy adjustment.

2. The share of the amounts allocated to specified consumers who receive an invoice in respect of a reference period should be proportionate to a reasonable assessment of the benefits derived by those consumers during that reference period.

3. The specified consumers to whom an invoice is issued during a reference period should not bear an unreasonably disproportionate share of the amounts allocated.

4. Adjustments should be made over time if the Minister is of the opinion that specified consumers have paid more than is reasonably proportionate.

5. Allocation of amounts should be determined for each reference period.

6. A reasonable estimate of the rate of inflation should be applied [in accordance with the regulations?].

Compliance

8.2 The IESO and the Financial Services Manager shall not, at any time, exceed the limits set out in the applicable Fair Allocation Plan.

[NOTE: THIS IS TOO STRONG. THE IDEA IS THAT IESO'S RIGHT OF RECOVERY WILL BE LIMITED IN A REFERENCE PERIOD BY THE FAP AMOUNT FOR THE PERIOD, MINUS THE FINANCE AMOUNTS FOR THE PERIOD. IN THIS WAY, THE IESO WILL BE ENTITLED TO PASS-THROUGH RECOVERIES IN A WAY THAT AFFECTS THE HYDRO BILLS OF EACH REFERENCE PERIOD RATEPAYERS IN A WAY THAT TRACKS THE FAP. SIMILARLY, IF IESO HAS TRANSFERRED ITS RECOVERY RIGHTS TO A IAO, THEN THE RELATED CEAs FOR THAT IAO WILL BE INSIDE THE FAP – AGAIN, SO THAT THE RATEPAYERS OF THAT PERIOD DO NOT BEAR A DISPROPORTIONATE BURDEN FOR THOSE COSTS. THESE CONCEPTS ARE REFLECTED IN THE MECHANICS DEALING WITH IESO RECOVERIES AND PASSING THROUGH CEAs, AND SO THIS SECTION CAN PROBABLY BE REMOVED]

fidential Draft

FINANCING PLAN

Financial Services Manager to prepare plan

11. (1) The Financial Services Manager shall prepare and provide to the Minister a plan entitled the Financing Plan for the purpose of ensuring that decisions made under this Act are cost-effective and consistent with the Fair Allocation Plan.

Amendments to approved plan

(2) The financial services manager may propose amendments to the Financing Plan at any time.

[NOTE: THE FINANCING PLAN IS SUPPOSED TO BE FLEXIBLE, UNLIKE THE FAP. FORMAL AMENDMENTS WOULD MAKE THIS TOO RIGID. THE FSM SHOULD KEEP RECORDS OF THE FP OVERTIME, SO THAT FUNDING DECISIONS CAN BE DETERMINED BASED ON THE PRINCIPLES AND THERE IS A MEASURE OF ACCOUNTABILITY FOR THE FSM, INSOFAR AS THE RECORD-KEEPING WILL ALLOW THE MINISTER TO DO A PERIODIC CHECK TO MAKE SURE THAT FUNDING OBLIGATIONS WERE INCURRED IN MATERIAL CONFORMITY WITH THE FSM'S EVOLVING FP. THE CONCEPT OF THE FP IS TO CREATE DISCIPLINE, THOUGHFULNESS AND SOME MEASURE OF ACCOUNTABILITY FOR FSM IN MAKING FINDING DECISIONS.]

Compliance with Plan

11.1 The Financial Services Manager shall comply with the Financing Plan.

[NOTE: PROBABLY TOO RIGID A STATEMENT – SEE ABOVE. ALSO, OPG SEEMS TO HAVE ACCOUNTING ISSUES WITH THIS SORT OF MANDATORY DIRECTION – NEED TO CONFIRM]

Contents of plan

12. (1) The Financing Plan shall be prepared in accordance with the regulations and shall include such matters as may be prescribed, which may include the following:

1. A description of one or more transfers that may be made in respect of the regulatory asset established under Part **.

2. A description of the basis upon which funding obligations may be incurred in a manner that is consistent with the applicable Fair Allocation Plan.

3. A description of the funding obligations mentioned in paragraph 2, which may include the following:

    i. Indebtedness.

Confidential – Draft

ii. Payment obligations arising under or in respect of derivatives.

iii. Payment obligations owing to service providers, administrative agents, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies.

iv. Refinancing an existing funding obligation by applying the net proceeds obtained by incurring other funding obligations.

[NOTE: PRINCIPLES AND PARAMETERS ARE UNDER CONSIDERATION AND WILL BE INCLUDED IN THE REGULATION.]

Limitation

(1.1) The Financing Plan shall not provide for the payment of the clean energy adjustment by specified consumers before May 1, 2022. [NOTE: WOULD PREFER TO SAY (1) NO CEAs IN THE FIRST 5 YEARS UNTIL, FOR A YEAR, THE LGIC CONFIRMS THAT THERE WILL NOT BE A FAIR ADJUSTMENT FOR THAT YEAR. SEE MECHANICS, ABOVE.]

Special purpose financing entities

(2) If the Financial Services Manager is a prescribed entity, the Financing Plan may, in accordance with the regulations, provide for the establishment by that entity of one or more special purpose financing entities that may incur funding obligations.

[Note: I understand that OPG doesn't need authority to establish a SPV beyond existing OPG authority under the EA, but do you still want something like subs. (2) for an entity other than OPG? It almost makes it look like OPG is not authorized to do so, since the provision singles out prescribed entities. Need to consider further]

[NOTE: THIS CONCEPT SHOULD BE MOVED TO THE REGULATION]

Limit on liquidation, etc. of [special purpose funding entities]

(3) The Financing Plan shall not provide for a [special purpose funding entity] tbe be liquidated, dissolved or voluntarily wound-up until at least one year after all of the funding obligations the entity has incurred have been satisfied. [NOTE: MOVE TO THE REGULATION]

Prohibition

(3) The Financing Plan shall not provide for funding obligations to be incurred with any recourse to any assets of the electricity vendors, the IESO, the Ontario Energy Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation.

Confidential – Draft for discussion purposes only

Funding obligations unaffected by amendment to Fair Allocation Plan

(4) No change to a funding obligation shall result from an amendment to the Fair Allocation Plan that is made after the funding obligation has been incurred.

[Note: Consider Article 8 (9) entitled "incurrences are binding" -- I believe we have already stated in the Part dealing with the regulatory asset that the rights are enforceable etc. even if charges have been imposed in a manner that does not follow the Financing Plan. Is more drafting required?]

PART V
THE REGULATORY ASSET [AND INVESTMENT ASSET]

Regulatory asset established

22. (1) The IESO has property rights and interests, which together constitute a regulatory asset, in the recovery of the IESO funding shortfall.

[Note to draft - Is it sufficient to say "*property rights and interests in the recovery of the IESO funding shortfall"?* Does that convey the right to enforce other parties' obligations that would allow for the shortfall to be recovered by the IESO?]

Limitation

(1.1) The right to recover the IESO funding shortfall under subsection (1) is subject to the following limits:

1. The amount recovered in respect of a reference period may not exceed the amount by which the [fair allocation] in respect of a reference period exceeds the amount of the clean energy adjustment for the reference period. [NOTE: CONSIDER IF THIS SHOULD BE A MAXIMUM OR A MANDATORY FLOW-THROUGH. IF THE IESO RECOVERIES PLUS CEAs FOR A PERIOD ARE LESS THAN THE FAIR ALLOCATION FOR A PERIOD, THEN THE RATEPAYERS OF THE PERIOD WILL BENEFIT FROM A LESSER SHARE OF THE COSTS THAN WOULD BE INDICATED BY THE FAP]
2. No part of the funding shortfall shall be recovered before May 1, 2022. [NOTE: TOO RIGID. SEE CONCEPT OF FAIR ADJUSTMENT, ABOVE]

Same

(2) The establishment of the regulatory asset is not affected by any failure to impose, attribute, invoice, accrue or collect the clean energy adjustment.

Recording of IESO funding shortfall in books

22.1 (1) Subject to the approval by order of the Ontario Energy Board, the IESO shall record the IESO funding shortfall from time to time in its books. [NOTE: THIS SHOULD ALSO INCLUDE ADJUSTMENTS WHEN THERE IS A TRANSFER OR RECOVERY – I.E., THE REGULATORY ASSET AMOUNT RECORDED SHOULD BE REDUCED]

Confidential Draft

Order

(2) The Ontario Energy Board may, in accordance with the regulations, by order specify how the IESO funding shortfall must be recorded.

Recording in books determinative

(3) A recording in its books is determinative of the amount of IESO funding shortfall at the time of the recording.

IESO funding shortfall

22.2 (1) The IESO shall determine the IESO funding shortfall for each month in a reference period by calculating the difference between the following amounts:

1. The sum of all invoice amounts issued to specified consumers for the month.

2. The sum of all invoice amounts that would have been issued to specified consumers for the month if paragraphs 1 and 2 of section 7.2 did not apply.

[Note: Should the value of any consideration received as part of a transfer be reflected in this section?]

Same

(2) The determination under subsection (1) shall be made based on the amount of electricity actually used by specified consumers during the reference period.

[NOTE: FUNDING SHORTFALL DESCRIPTION MAY ALSO RELFECT ADJUSTMENT BASED ON ESTIMATE TO ACTUAL FROM EARLIER MONTH]

Transfer of regulatory asset

23. (1) The IESO may transfer the regulatory asset in accordance with the Financing Plan.

Consideration

(2) The IESO may receive consideration for the transfer of the regulatory asset, subject to the following rules:

1. The prospective owner of the investment asset to be acquired through the transfer shall pay to the IESO an amount equal to all or part of the IESO funding shortfall. [NOTE: INVESTMENT ASSET TO BE BASED ON FACE VALUE SO THAT THE IESO RECOVERY IS DOLLAR-FOR-DOLLAR. THIS MEANS THAT ACCRUALS WILL BE NEEDED FOR INITIAL PERIOD, RATHER THAN THE TRUST BUYING INVESTMENT INTERESTS AT A DISCOUNT AND HOLDING BACK ISSUE PROCEEDS TO FUND THOSE AMOUNTS.]

Confidential Draft

2. Upon receipt of the payment, the IESO shall record the payment as a reduction of the AGGREGATE IESO funding shortfall in its books.

3. Upon receipt of the payment, the IESO shall have no continuing right or interest in, or maintain any right to recover all or any part of the transferred regulatory asset.

Investment asset

Regulatory asset deemed to be investment asset upon transfer

23.1 Upon transfer of the regulatory asset or a portion of the regulatory asset, the regulatory asset or portion is deemed to be an investment asset and is vested in the investment asset owner.

[NOTE: DEEMING LANGUAGE TO ADDRESS TRANSFER AND CONVEYANCE IS UNDER CONSIDERATION.]

[NOTE: THE ASSET TRANSFERRED BY IESO WILL BE A RIGHT OF RECOVERY, BY REFERENCE TO CEAs. THE ASSET ACQUIRED WILL BE AN "INVESTMENT INTEREST", BEING A SHARE (THE TERMS AND ENTITLEMENTS OF WHICH WILL BE DETERMINED UNDER A COLLECTIVE RIGHTS AGREEMENT) OF THE RIGHTS AND RELATED PROCEEDS FROM THE RIGHT TO BILL, ETC., CEAs. THE SUM OF ALL INVESTMENT INTERESTS WILL BE THE "INVESTMENT ASSET".]

Same

(2) An investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication:

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any amounts that all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

Confidential Draft

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Same

(3) An investment asset is not affected by failure to impose, attribute, invoice, accrue or collect the clean energy adjustment.

No set off, etc.

(4) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, the IESO, an agent of the investment asset owner or an owner of distribution system assets in the Province; [NOTE: IF THE MECHANICS FOR CASH FLOWS ADOPT THE PRE-EXISTING METHODS AND TERMS AMONG IESO, LDCs AND RATEPAYERS, THIS PROVISION WILL NEED TO RECOGNIZE THAT THOSE TERMS WILL PREVAIL AND NOT BE AFFECTED BY THE NEUTERING OF SET-OFF, ETC.]

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); [NOTE: CONSIDER IN CONTEXT OF FEDERAL BANKRUPTCY POWERS]

(c) by any affiliate or successor of a person mentioned in clause (a).

Transfer of investment asset

24. The investment asset owner may transfer all or a portion of its rights and interests in an investment asset to any other investment asset owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Confidential Draft

Validity of transfer

25. (1) A transfer of a regulatory asset or an investment asset under this Act that is expressed to be a sale or an absolute assignment is a valid and enforceable sale and absolute assignment of the regulatory asset or investment asset, as the case may be, and confers upon the owner of the investment asset acquired a valid property right and interest in, to and under the applicable investment asset in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall or an investment asset owner's right, title and interest in, to and under an investment asset, as applicable (or relevant portion thereof), and not merely as a pledge thereof, and upon such absolute transfer the transferor shall retain no right, title or interest in regulatory asset or the investment asset (or relevant portion thereof) subject to the transfer, including all rights to recover the IESO funding shortfall or the investment asset arising after such transfer. [NOTE: ADDRESSES POSSIBLE RECHARACTERIZATION CONSIDERATIONS. MARKET WILL EXPECT TO SEE THIS GIVEN SECURITIZATION CONCEPTS IN PLAY.]

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset or an investment asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the owner of the investment asset shall have priority over any liens in favour of such other persons.

Administration of investment asset

26. (1) The Financial Services Manager shall administer an investment asset on behalf of the owner of the investment asset. [NOTE: TO BE ELABORATED]

Review of costs

(2) The Ontario Energy Board shall review the administrative costs of the Financial Services Manager. [NOTE: TO BE ELABORATED]

Confidential Draft

Investment asset owner may grant pledge

27. (1) The owner of an investment asset may grant a pledge to or in favour of a person in, to and over all or a specified portion of its right, title and interest in, to and under the investment asset in connection with any funding obligation.

Types of pledge

(2) A pledge may be a lien, mortgage, charge, right of set-off or security interest.

Validity

(3) The pledge may be made to secure a funding obligation and when granted shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the person to whom the pledge is granted a valid security interest in, to and in respect of the investment asset in accordance with the terms of the pledge.

[Note: Additional content relating to the PPSA has not yet been addressed in any detail. Please review all subsections that contain the (x) below and advise what is needed. Some of this content was already covered by some of the numbered subsections in this draft.]

Perfection and priority of pledges

(x) For purposes of the *Personal Property Security Act*, the regulatory asset shall be intangible personal property and any pledge made by the owner of an investment asset in respect of a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Same

(x) All provisions of the *Personal Property Security Act* shall apply to the regulatory asset on the basis that it is intangible personal property, except to the extent otherwise provided in this section.

Same

(x) All proceeds of a related [Investment Interest?] that are subject to the pledge that are received by the owner of the investment asset shall immediately be subject to the pledge, and the security interest in the proceeds shall be perfected pursuant to the *Personal Property Security Act.*

Same

(x) A pledge perfected under the *Personal Property Security Act* shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the [Investment Interest?] subject to the pledge unless the pledgee has otherwise agreed in writing.

Confidential Draft

Same

(x) A pledgee shall have a perfected security interest in a related investment interest, including the owner of the investment asset's rights and interests in and to [the clean energy adjustment?] or other related proceeds in respect of the investment interest and that are deposited in any [which account?] or other account of any [Electricity Distributor, IESO, Alternative Servicer or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds].

Proceeds

(8) All proceeds of the investment asset that are subject to the pledge and that are received by the investment asset owner shall immediately be subject to the pledge and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(9) The pledge shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment asset subject to the Pledge, subject to the written consent of the person to whom the pledge has been granted.

Same

(10) The person to whom the pledge has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person who may have commingled such revenues or other proceeds with other funds.

Collective action required

28. If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: It seems that successors may need to be addressed here. Also Pledgees have not yet been addressed in this draft.]

Exercise of rights

29. The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset shall be exercised in accordance with section [xx].

Confidential Draft

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

34. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

35.1 For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

35.2 [Note: Still to be drafted:
If any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect clean energy adjustments, defaults on any required remittance of Clean energy adjustment Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by a Regulatory Asset Owner or Pledgee and without limiting any other remedies available to the applying party, shall order the sequestration and payment of the Clean energy adjustment Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Regulatory Asset Owner or Pledgee.] [Such order shall remain in full force and effect notwithstanding any bankruptcy, reorganization, or other insolvency proceedings with respect to any Electricity Distributor, IESO, Alternative Collection Agent or any owner of distribution system assets in the Province or other person or entity authorized to collect Clean energy adjustments, as applicable.]

Successors

37. [Note: Articles 4 (6) and (7) and Articles 5 (7) and (8) are rules about successors to distributors and the IESO being bound by specific requirements. Still to be drafted.]

Choice of law

37.1 The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

38. The provisions of this Act [and the regulations?] apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or PLEDGE,

Confidential – Draft for discussion purposes only

No further approvals, etc.

39. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan or in relation to the establishment of the Fair Allocation Plan.

Immunity

97x. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

98x. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under this section unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[7]

99x. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

100x. The Lieutenant Governor in Council may make regulations,

(b) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

[Note: reg-making powers to be dealt with in subsequent draft]

Confidential Draft

[7] FLS - see s. 51 of the Electricity Act, 1998

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

(q.1) to enter into agreements or arrangements with [any special purpose financing entities established under (name of new Fair Hydro Act?)];

(q.2) to engage in activities related to making payments to and receiving payments from [any special purpose financing entities established under (name of new Fair Hydro Act?)], as required under that Act, and to engage in related settlement activities;

(q.3) to engage in activities related to the transfer of the regulatory asset created under [(name of new Fair Hydro Act?)], which activities may include,

(i) incurring liabilities in relation to the regulatory asset

(ii) transferring the regulatory asset to [any special purpose financing entities established under (name of new Fair Hydro Act?)];

(iii) transferring the regulatory asset to third parties;

(q.4) acting as a recovery agent under the [(name of new Fair Hydro Act?)];

201x. Subsection 53.1 (1) of the Act would be repealed and the following substituted:

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, the following:

1. Owning and operating generation facilities.

2. Establishing, operating and supervising the activities of [any special purpose financing entities established under (name of new Fair Hydro Act?)].

[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

Confidential Draft

3. Providing financial and other support to the IESO in its activities under the [name of new Fair Hydro Act?].

4. Engaging in such financing, borrowing, lending and related activities and transactions to support the IESO with short-term or long-term financing.

5. Providing equity, not exceeding the prescribed amount, to support the financing capacity [any special purpose financing entities established under (name of new Fair Hydro Act?)].

[Note: Still to draft:
-for the new Fair Hydro Bill: *if OPG is the Financial Services Manager, it shall be required to provide an accounting of the amounts it charges the trust for the financing entity to the OEB 60 days in advance of the commencement of the fiscal year for the OPG trust/special purpose vehicle*]

Subsidiaries

(1.1) Ontario Power Generation Inc. may create one or more subsidiaries in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under [new Act].

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under [new Act].

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

Confidential Draft

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 71 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1) - instructions on pp. 8-9 of Rider instructions rec'd April 14th]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Confidential Draft

SCHEDULE 1
METHOD FOR DETERMINING AMOUNT OF CLEAN ENERGY ADJUSTMENT FOR REFERENCE PERIOD

[NOTE: CEAs WILL BE DETERMINED BASED ON AN ESTIMATE OF COSTS AND REPAYMENTS FOR AN UPCOMING PERIOD, AND BE TRUED UP TO ACTUAL COSTS AND REPYAMENTS IN THE NEXT FOLLOWING PERIOD. THESE MECHANICS CAN BE SEEN IN THE SUMMARY DOCUMENT – "PERIOD FINANCE AMOUNTS" AND SECONDARY DEFINITIONS. THIS FORMULAIC APPROACH IS PREFERRED TO ESTABLISH A SUM CERTAIN OF THE DEBT REPRESENTED BY THE CEAs, ONCE BILLED. IT MAY BE USEFUL TO CREATE A DEFINITION TO ENCOMPASS ALL CEAs FOR A PERIOD, SINCE A CEA IS THE AMOUNT BILLED TO A PARTICULAR CUSTOMER]

1. The amount of the clean energy adjustment for a reference period shall be determined by calculating the sum of the following:

1. The sum of all payments made by owners of an investment asset [during the reference period?] to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

[Note: Para. 1 is the definition of "repayment" from the Blakes doc. However, that definition include bracketed text that says: (*including making Finance Reserve Deposits).* I don't understand this because (1) Finance Reserve Deposit is listed as a separate line item in the definition of "finance amount" (see para. 4 below). In order to avoid duplication, can we exclude "finance reserve deposits" from para. 1?]

[NOTE THAT SHOULD LIMIT CONCEPT OF RESERVE DEPOSITS AS INCURRENCES IF IT WOULD MEAN THAT THE PROCEEDS FROM A TRANSFER WOULD BE REDUCED FROM FACE VALUE WITH THE RESULT THAT IESO WOULD BE TRANSFERRING IAs AT A DISCOUNT]

2. The sum of all funding costs for the reference period, as determined under section 2 to this Schedule.

3. The sum of all amounts payable by or on behalf of owners of investment assets to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

Confidential – Draft for discussion purposes only

[Note: Para. 3 is the definition of "redemption amount" from the Blakes doc.]
[Note: What is meant by "make-whole" -- need some assistance in order to translate this term accurately. Do you have any examples of bilingual legislation where this term has been used?]

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable by owners of investment assets for the reference period that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

[Note: Para. 5 is based on the definition of "additional funding charges".]

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

1. Calculate the aggregate of all interest and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of owners of investment assets during the reference period in respect of all funding obligations, including the following:

    i. Standby commitment fees or charges paid to any lender.

    ii. Credit enhancement fees or charges paid to any credit enhancer.

    iii. Liquidity fees or charges paid to any liquidity provider.

    iv. Payments, including termination payments, made under derivatives.

    v. Deposits made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to a funding obligation.

2. Calculate the aggregate of all amounts received by or on behalf of the owners of investment assets during the reference period in respect of a funding obligation, including reimbursement of any amounts referred to in subparagraphs 1 i to v.

[Note: Para. 2 is the definition of "finance receipts" in the Blakes doc.]

Confidential Draft

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

[Note: This section is a modification of the definitions provided in the Blakes document for "Finance Reserve Deposits" and "Finance Reserve Withdrawals". The proposed definition of "FR deposit" involved a subtraction of the "FR withdrawal" so the term 'deposit' was not really descriptive of a pure deposit but rather the balance.]

1. Calculate the sum of all amounts deposited [to what account?] during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn from the account during the reference period from deposits previously made [e.g. during a previous reference period?] as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

EXCERPTS FROM THE ELECTRICITY ACT AND ONTARIO ENERGY BOARD ACT

RELATED TO CONSEQUENTIAL AMENDMENTS

Electricity Act, 1998

Purposes of *Electricity Act, 1998*

1. The purposes of this Act include the following:

(a) to ensure the adequacy, safety, sustainability and reliability of electricity supply in Ontario through responsible planning and management of electricity resources, supply and demand;

(a.1) to establish a mechanism for energy planning;

(b) to encourage electricity conservation and the efficient use of electricity in a manner consistent with the policies of the Government of Ontario;

(c) to facilitate load management in a manner consistent with the policies of the Government of Ontario;

(d) to promote the use of cleaner energy sources and technologies, including alternative energy sources and renewable energy sources, in a manner consistent with the policies of the Government of Ontario;

(e) to provide generators, retailers, market participants and consumers with non-discriminatory access to transmission and distribution systems in Ontario;

(f) to protect the interests of consumers with respect to prices and the adequacy, reliability and quality of electricity service;

(g) to promote economic efficiency and sustainability in the generation, transmission, distribution and sale of electricity;

(g.1) to facilitate the alteration of ownership structures of publicly-owned corporations that transmit, distribute or retail electricity;

(g.2) to facilitate the disposition, in whole or in part, of the Crown's interest in corporations that transmit, distribute or retail electricity, and to make the proceeds of any such disposition available to be appropriated for any Government of Ontario purpose;

(h) to ensure that Ontario Hydro's debt is repaid in a prudent manner and that the burden of debt repayment is fairly distributed;

(i) to facilitate the maintenance of a financially viable electricity industry; and

(j) to protect corridor land so that it remains available for uses that benefit the public, while recognizing the primacy of transmission uses. 2004, c. 23, Sched. A, s. 1; 2014, c. 7, Sched. 7, s. 1; 2015, c. 20, Sched. 9, s. 1; 2016, c. 10, Sched. 2, s. 1.

Objects of the IESO

6 (1) The objects of the IESO are,

(a) to exercise the powers and perform the duties assigned to it under this Act, the regulations, directions, the market rules and its licence;

(b) to enter into agreements with transmitters to give it authority to direct the operation of their transmission systems;

(c) to direct the operation and maintain the reliability of the IESO-controlled grid to promote the purposes of this Act;

(d) to participate in the development by any standards authority of criteria and standards relating to the reliability of the integrated power system;

(e) to establish and enforce criteria and standards relating to the reliability of the integrated power system;

(f) to work with the responsible authorities outside of Ontario to co-ordinate the IESO's activities with the activities of those authorities;

(g) to operate the IESO-administered markets to promote the purposes of this Act;

(h) to engage in activities related to contracting for the procurement of electricity supply, electricity capacity, electricity storage, transmission systems or any part of such systems and conservation resources;

(i) to engage in activities related to settlements, payments under a contract entered into under the authority of this Act and payments provided for under this Act or the *Ontario Energy Board Act, 1998*;

(j) to engage in activities in support of the goal of ensuring adequate, reliable and secure electricity supply and resources in Ontario;

(k) to forecast electricity demand and the adequacy and reliability of electricity resources for Ontario for the short term, medium term and long term;

(l) to conduct independent planning for electricity generation, demand management, conservation and transmission;

(m) to engage in activities to facilitate the diversification of sources of electricity supply by promoting the use of cleaner energy sources and technologies, including alternative energy sources and renewable energy sources;

(n) to engage in activities in support of system-wide goals for the amount of electricity to be produced from different energy sources;

(o) to engage in activities that facilitate load management;

(p) to engage in activities that promote electricity conservation and the efficient use of electricity;

(q) to assist the Board by facilitating stability in rates for certain types of consumers;

(r) to collect and make public information relating to the short term, medium term and long term electricity needs of Ontario and the adequacy and reliability of the integrated power system to meet those needs; and

(s) to engage in such other objects as may be prescribed by the regulations. 2014, c. 7, Sched. 7, s. 3 (1); 2016, c. 10, Sched. 2, s. 3.

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, owning and operating generation facilities. 2002, c. 1, Sched. A, s. 11.

Status

(2) Ontario Power Generation Inc. and its subsidiaries are not agents of Her Majesty for any purpose, despite the *Crown Agency Act*. 2002, c. 1, Sched. A, s. 11.

Rights of the Minister

53.2 The Minister, on behalf of Her Majesty in right of Ontario, may acquire and hold shares of Ontario Power Generation Inc. 2002, c. 1, Sched. A, s. 11.

Corporations to hold shares

53.3 (1) The Lieutenant Governor in Council may cause corporations to be incorporated under the *Business Corporations Act* for the purpose of acquiring and holding shares in Ontario Power Generation Inc. 2002, c. 1, Sched. A, s. 11.

Same

(2) Shares in a corporation incorporated pursuant to subsection (1) may be acquired and held in the name of Her Majesty in right of Ontario by a member of the Executive Council designated by the Lieutenant Governor in Council. 2002, c. 1, Sched. A, s. 11.

Crown agent

(3) A corporation incorporated pursuant to subsection (1) is an agent of Her Majesty for all purposes. 2002, c. 1, Sched. A, s. 11.

Dividends paid to Crown agent

(4) If an agent of Her Majesty in right of Ontario is paid dividends in respect of shares of Ontario Power Generation Inc., the agent shall pay the dividends to the Financial Corporation, less any amount that it considers is required to pay obligations it has assumed under clause 122 (1) (a). 2002, c. 1, Sched. A, s. 11.

Reporting requirements

53.4 (1) Ontario Power Generation Inc. shall, within 90 days after the end of every fiscal year, submit to the Minister an annual report on its affairs during that fiscal year, signed by the chair of the board of directors. 2002, c. 1, Sched. A, s. 11.

Same

(2) The Minister shall submit the annual report to the Lieutenant Governor in Council and shall then table the report in the Assembly. 2002, c. 1, Sched. A, s. 11.

Same

(3) Ontario Power Generation Inc. may give its annual report to other persons before the Minister complies with subsection (2). 2002, c. 1, Sched. A, s. 11.

Additional reports and information

(4) Ontario Power Generation Inc. shall give such other reports and information to the Minister of Finance or to the Minister as each of them may require from time to time. 2002, c. 1, Sched. A, s. 11.

Residual power of the Crown

53.5 Nothing in this Part restricts the powers of Her Majesty in right of Ontario or any member of the Executive Council at common law or under any Act, whether as a shareholder or otherwise. 2002, c. 1, Sched. A, s. 11.

[. . .]

Payments in lieu of federal corporate tax

89 (1) If Hydro One Inc., a subsidiary of Hydro One Inc., Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. is exempt under subsection 149 (1) of the *Income Tax Act* (Canada) from the payment of tax under that Act, it shall pay to the Financial Corporation in respect of each taxation year an amount equal to the amount of the tax that it would be liable to pay under that Act if it were a corporation to which that subsection did not apply. 1998, c. 15, Sched. A, s. 89 (1); 2002, c. 1, Sched. A, s. 15 (1); 2007, c. 7, Sched. 12, s. 2.

Corridor land

(1.1) The amount payable under subsection (1) by a person or entity from whom corridor land is transferred by section 114.2 shall be determined, for the taxation year in which the transfer occurs and for subsequent taxation years, as if the transfer did not occur. 2002, c. 1, Sched. A, s. 15 (2).

Payments to Minister of Finance

(2) After Part V is repealed under section 84.1, all payments required by this section shall be paid to the Minister of Finance, instead of to the Financial Corporation. 1998, c. 15, Sched. A, s. 89 (2); 2000, c. 42, s. 31.

Commencement of new taxation year

(3) A corporation that is required to make payments under this section shall be deemed, for the purposes of this section, to commence a new taxation year on the day this section comes into force.

Payments in lieu of provincial corporate tax

90 (1) If Hydro One Inc., a subsidiary of Hydro One Inc., Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. is exempt under subsection 57 (1) of the *Corporations Tax Act* from the payment of tax under that Act for a taxation year that ends before January 1, 2009, it shall pay to the Financial Corporation in respect of each taxation year ending before that day an amount equal to the total amount of tax that it would be liable to pay under Parts II, II.1 and III of that Act for that year if it were a corporation to which that subsection did not apply. 2007, c. 7, Sched. 12, s. 3 (3).

Same

(1.0.1) If Hydro One Inc., a subsidiary of Hydro One Inc., Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. is exempt under subsection 27 (2) of the *Taxation Act, 2007* from the payment of tax under that Act for a taxation year that ends after December 31, 2008, it shall pay to the Financial Corporation in respect of each taxation year ending after that day an amount equal to the total amount of tax that it would be liable to pay under Divisions B, C and E of Part III of that Act for the taxation year if it were a corporation to which that subsection did not apply. 2007, c. 7, Sched. 12, s. 3 (3).

Corridor land

(1.1) The amount payable under subsection (1) by a person or entity from whom corridor land is transferred by section 114.2 shall be determined, for the taxation year in which the transfer occurs and for subsequent taxation years, as if the transfer did not occur. 2002, c. 1, Sched. A, s. 16 (2).

Payments to Minister of Finance

(2) After Part V is repealed under section 84.1, all payments required by this section shall be paid to the Minister of Finance, instead of to the Financial Corporation. 1998, c. 15, Sched. A, s. 90 (2); 2000, c. 42, s. 32.

Commencement of new taxation year

(3) A corporation that is required to make payments under this section shall be deemed, for the purposes of this section, to commence a new taxation year on the day this section comes into force. 1998, c. 15, Sched. A, s. 90 (3).

Ontario Energy Board Act, 1998

1 (1) The Board, in carrying out its responsibilities under this or any other Act in relation to electricity, shall be guided by the following objectives:

1. To protect the interests of consumers with respect to prices and the adequacy, reliability and quality of electricity service.

1.1 To promote the education of consumers.

2. To promote economic efficiency and cost effectiveness in the generation, transmission, distribution, sale and demand management of electricity and to facilitate the maintenance of a financially viable electricity industry.

3. To promote electricity conservation and demand management in a manner consistent with the policies of the Government of Ontario, including having regard to the consumer's economic circumstances.

4. To facilitate the implementation of a smart grid in Ontario.

5. To promote the use and generation of electricity from renewable energy sources in a manner consistent with the policies of the Government of Ontario, including the timely expansion or reinforcement of transmission systems and distribution systems to accommodate the connection of renewable energy generation facilities. 2004, c. 23, Sched. B, s. 1; 2009, c. 12, Sched. D, s. 1; 2015, c. 29, s. 7.

Licence conditions

70 (1) A licence under this Part may prescribe the conditions under which a person may engage in an activity set out in section 57 and a licence may also contain such other conditions as are appropriate having regard to the objectives of the Board and the purposes of the *Electricity Act, 1998*. 1998, c. 15, Sched. B, s. 70 (1).

Approvals, etc., with or without holding hearing

(1.1) The Board may, with or without a hearing, grant an approval, consent or make a determination that may be required for any of the matters provided for in a licensee's licence. 2009, c. 12, Sched. D, s. 10.

Examples of conditions

(2) The conditions of a licence may include provisions,

(a) specifying the period of time during which the licence will be in effect;

(b) requiring the licensee to provide, in the manner and form determined by the Board, such information as the Board may require;

(c) requiring the licensee to enter into agreements with other persons on specified terms (including terms for a specified duration) approved by the Board relating to its trading or operations or for the connection to or use of any lines or plant owned or operated by the licensee or the other party to the agreement;

(d) governing the conduct of the licensee, including the conduct of,

(i) a transmitter or distributor as that conduct relates to its affiliates,

(ii) a distributor as that conduct relates to a retailer,

(ii.1) a distributor or suite meter provider as such conduct relates to,

(A) the disconnection of the supply of electricity to a consumer, including the manner in which and the time within which the disconnection takes place or is to take place, and with respect to a low-volume consumer, periods during which the disconnection may not take place,

(B) the manner, timing and form in which the notice under subsection 31 (2) of the *Electricity Act, 1998* is to be provided to the consumer, and

(C) subject to the regulations, the manner and circumstances in which security is to be provided or not to be provided by a consumer to a distributor or suite meter provider, including,

(1) the interest rate to be applied to amounts held on deposit and payable by the distributor or suite meter provider to the consumer for the amounts,

(2) the manner and time or times by which the amounts held on deposit may or must be paid or set-off against amounts otherwise due or payable by the consumer,

(3) the circumstances in which security need not be provided or in which specific arrangements in respect of security may or must be provided by the distributor or suite meter provider to the consumer, and

(4) such other matters as the Board may determine in respect of security deposits,

(iii) a retailer, and

(iv) a generator, retailer or person licensed to engage in an activity described in clause 57 (f) or an affiliate of that person as that conduct relates to the abuse or possible abuse of market power;

(d.1) governing conditions relating to any matter prescribed by regulation in respect of retailers of electricity in relation to the retailing of electricity, subject to any regulations made under this Act;

(e) specifying methods or techniques to be applied in determining the licensee's rates;

(f) requiring the licensee to maintain specified accounting records, prepare accounts according to specified principles and maintain organizational units or separate accounts for separate businesses in order to prohibit subsidies between separate businesses;

(g) specifying performance standards, targets and criteria;

(h) specifying connection or retailing obligations to enable reasonable demands for electricity to be met;

(i) specifying information reporting requirements relating to the source of electricity and emissions caused by the generation of electricity;

(j) requiring the licensee to expand or reinforce its transmission or distribution system in accordance with market rules in such a manner as the IESO or the Board may determine;

(k) requiring the licensee to enter into an agreement with the IESO that gives the IESO the authority to direct operations of the licensee's transmission system;

(l) REPEALED: 2016, c. 10, Sched. 2, s. 15.

(m) requiring licensees, where a directive has been issued under section 28.2, to implement such steps or such processes as the Board or the directive requires in order to address risks or liabilities associated with customer billing and payment cycles in respect of the cost of electricity at the retail and at the wholesale levels and risks or liabilities associated with non-payment or default by a consumer or retailer. 1998, c. 15, Sched. B, s. 70 (2); 2003, c. 3, s. 47 (1); 2004, c. 23, Sched. B, s. 11 (1-3); 2010, c. 8, s. 38 (10, 11); 2016, c. 10, Sched. 2, s. 15; 2017, c. 1, s. 2 (1).

Deemed conditions of licences, transmitters and distributors

(2.1) Every licence issued to a transmitter or distributor shall be deemed to contain the following conditions:

1. The licensee is required to provide, in accordance with such rules as may be prescribed by regulation and in the manner mandated by the market rules or by the Board, priority connection access to its transmission system or distribution system for renewable energy generation facilities that meet the requirements prescribed by regulation made under subsection 26 (1.1) of the *Electricity Act, 1998*.
2. The licensee is required to prepare plans, in the manner and at the times mandated by the Board or as prescribed by regulation and to file them with the Board for approval for,

i. the expansion or reinforcement of the licensee's transmission system or distribution system to accommodate the connection of renewable energy generation facilities, and

ii. the development and implementation of the smart grid in relation to the licensee's transmission system or distribution system.

3. The licensee is required, in accordance with a plan referred to in paragraph 2 that has been approved by the Board or in such other manner and at such other times as mandated by the Board or prescribed by regulation,

i. to expand or reinforce its transmission system or distribution system to accommodate the connection of renewable energy generation facilities, and

ii. to make investments for the development and implementation of the smart grid in relation to the licensee's transmission system or distribution system. 2009, c. 12, Sched. D, s. 10.

Deemed condition of licences, unit sub-meter provider, *Ontario Clean Energy Benefit Act, 2010*

(2.2) Every licence issued to a unit sub-meter provider is deemed to contain the condition that the unit sub-meter provider is required to comply with the *Ontario Clean Energy Benefit Act, 2010* and the regulations made under it. 2010, c. 26, Sched. 13, s. 17 (2).

Deemed condition of licences, unit sub-meter provider, *Ontario Rebate for Electricity Consumers Act, 2016*

(2.3) Every licence issued to a unit sub-meter provider is deemed to contain the condition that the unit sub-meter provider is required to comply with the *Ontario Rebate for Electricity Consumers Act, 2016* and the regulations made under it. 2016, c. 19, s. 17 (2).

TOR_2528-#23107566-v13-_Fair_Hydro_Act_.pdf

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act"

Article 1 – Purpose

The Province has and continues to encourage the construction and development of facilities for the long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer, feed in tariff and other similar programs (the "Green Generation Initiative"). The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will continue to benefit present and future electricity consumers in the Province.

The out-of-market costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment").

The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province under the Green Generation Initiative. These amounts paid by the IESO arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with revenue certainty, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. It has been determined that the useful lives of many of the assets developed under the Green Generation Initiative will be in excess of the respective terms of their respective procurement contracts.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective terms of the applicable procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to Regulated Consumers (as defined in Article 2) should be more closely aligned with the benefits that such Regulated Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on general principles and parameters that establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative equitably across present and future Regulated Consumers (the "Fair Allocation Plan").

If the Fair Allocation Plan determines that the equitable allocation of the costs associated with the Green Generation Initiative to the Regulated Consumers of a particular time period should be reduced below the amount that currently would be charged based on the Green Costs Adjustment, then the amount payable by such Regulated Consumers and in turn available to IESO will, in the aggregate, be less than the amount payable by the IESO to the generators in respect of such period. In this case, IESO will need to obtain funding from another source to cover such a shortfall. If a funding obligation is incurred to cover such a shortfall during any period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs incurred will become payable in future periods. In order for IESO to obtain a reliable and committed source

of cash flows to enable IESO to repay such funding amounts when they become due and payable, this Act imposes irrevocable and non-bypassable financial obligations on Regulated Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts. The right and interest in and to collect such financial obligations will take the form of the Regulatory Asset contemplated in this Act, which will constitute property rights and interests. Interests in the Regulatory Asset may be sold and absolutely assigned by IESO to one or more financing entities, which in turn will finance their acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf of such financing entities by a financial services manager under the Financing Plan contemplated in this Act.

The purpose of this Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future Regulated Consumers on an equitable and cost effective basis.

Article 2 – Definitions

In this Act:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition other than as security.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Financial Services Manager whose records shall be determinative for the purposes of this Act except to the extent of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by or on behalf of any Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including without limitation such amounts as may be prescribed.
>
> "Alternative Servicer" means a person appointed under Section 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.
>
> "Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to Regulated Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"[1] means the methodology specified in the Fair Allocation Plan for allocating the Period Finance Charges for a Reference Period to Regulated Consumers.

"Collected Amount Adjustment" means, in respect of a True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the Financial Services Manager, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period and minus [(c) the amounts by which amounts remitted by Electricity Distributors pursuant to Section 5(4) exceeded the corresponding amount of Transition Charges Actually paid by Regulated Consumers.][2]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee), each Pledgee, and the Financial Services Manager that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.

"Delegate" means any of the following person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act: ●[3].

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition (or, in the case of the IESO Funding Shortfall, a release by IESO of its right to recover such amount in order to enable an Absolute Assignee to recover such amount) of (a) IESO's right to recover all or any portion of an IESO Funding Shortfall or (b) an Investment Interest, in each case to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which IESO or an Absolute Assignee effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means a rate regulated distributor licensed under Part V of the *Ontario Energy Board Act, 1998*, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to Servicer or if applicable the Alternative Collection Agent in accordance with Section 5(3), including the proceeds of any enforcement action undertaken by the

---

[1] This allocation may be volumetric or some combination of a flat amount and a volumetric charge. Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

[2] This is intended to pick up adjustments based on actual collection experience, changes in the Regulated Consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc. The actual calculation needs work.

[3] Placeholder for delegation once deterermined.

Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.[4]

"Electricity Invoice" means an invoice issued by an Electricity Distributor (or in its stead, by an Alternative Collection Agent), by the Servicer or by a Retailer, in each case to a Regulated Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to such Electricity Distributor's distribution system and in respect of applicable Transition Charges to be charged to the Regulated Consumer under this Act.

"Estimate" means (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Financial Services Manager; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to Regulated Consumers, the estimated value (in current dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Act except to the extent of a manifest calculation error.

"Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to Regulated Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to Regulated Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, for a Reference Period, the sum (without duplication) of the following amounts that are or become payable during the Reference Period in respect of any Absolute Assignee: (a) Repayments; (b) Net Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

---

[4] Suggestion is that LDCs remit based on estimates and then true-up, based on current arrangements for remittances by LDCs to IESO. *

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financial Services Manager" means OPG or, following any Replacement Event involving OPG, such other person who may be appointed as the financial services manager of the Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[5]

"Financing Entity" means any entity established in accordance with the Financing Plan to be an Absolute Assignee and that is managed by the Financial Services Manager.[6]

"Financing Plan" means the written plan prepared by the Financial Services Manager in accordance with Article 9, as the same may be amended, amended and restated or terminated by the Financial Services Manager in accordance with Article 9 from time to time.

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including each obligation to pay: principal, interest, premiums and other financing charge payments; pass-through payments; payment obligations arising under or in respect of derivatives; payment obligations owing to service providers, Financial Services Managers, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all Additional Funding Charges) incurred by or on behalf of the Absolute Assignee under the Financing Plan, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.

"Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

"Global Adjustment" has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" has the meaning given in Article 1.

---

[5] There must only be one Financial Services Manager.

[6] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act.

"IESO" means the Independent Electricity System Operator created pursuant to Part II of the *Electricity Act, 1998*.

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO , during the month pursuant to section • of the *Electricity Act* in respect of Regulated Consumers. **[NTD: IESO indicates that it likely does not work to express in regards to "amounts payable by the LDCs" because settlement between the IESO and LDCs entails payments by LDCs to the IESO and then credits/debits by the IESO to LDCs to reflect RPP shortfalls/overages.]**

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month.To the extent reasonably necessary to give effect to this Act, or any transaction contemplated hereby, IESO shall calculate the IESO Funding Shortfall for any month taking into account information provided by the Electricity Distributors and (i) such calculation shall be binding for all purposes; and (ii) any demonstrated inaccuracy in the calculation for any month (including any such resulting from inaccuracies in the information provided by Electricity Distributors) shall be accounted for by adjusting the IESO Funding Shortfall for a subsequent month.

"IESO Recovery" means each amount received by IESO in accordance with its right to recover IESO Funding Shortfalls pursuant to section 25.33 of the Electricity Act and Ontario Regulation 430/04, as amended, and "IESO Recoveries" means, collectively, all such amounts received by IESO.[7]

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO Regulatory Interest Amount" means, on a day, (a) the sum of all IESO Funding Shortfalls incurred prior to the day, minus (b) the net proceeds received by IESO from or on behalf of each Absolute Assignee as consideration for the Disposition of each Investment Interest paid to IESO by or on behalf of such Absolute Assignee prior to the day, and minus (c) the IESO Recoveries received by IESO prior to the day.

---

[7] IESO will be entitled to record the IESO Funding Shortfall amount in a variance account. The OEB will eliminate and dispose of the variance account balance as part of the RPP adjustment process under the OEB Act , with an applicable OEB accounting order. See Article 8 for corresponding adjustments based on Dispositions. These will need to be tied together.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Finance Amounts due and payable by all Absolute Assignees in respect of the month.

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"Net Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest, scheduled principal and other periodic finance charges accruing due and becoming payable or paid by or on behalf of any Absolute Assignee during the Reference Period in respect of its Funding Obligations, including such amounts as may be prescribed, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of the Funding Obligations referred to in (a), and such other or different amounts as may be prescribed.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount (b) the True-Up Amount in respect of the applicable True-Up Period and (c) [an adjustment amount as may be prescribed to account for estimated collection shortfalls and collection delays in respect of amounts under (a) and (b).]

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Investment Interest.

"Pledgee" means a person to whom an Absolute Assignee grants a Pledge.

"Program End Date" means •, [2047].

"Province" means the Province of Ontario.

"Redemption Amount" means the amount payable by or on behalf of an Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional

amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the Measurement Date to (and including) October 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

"Refinancing" means, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Absolute Assignee by applying the net proceeds obtained by the Absolute Assignee incurring one or more other Funding Obligations.

"Regulated Consumer" means consumers of electricity in the Province [as prescribed][8].

"Regulated Consumer Group" means, in relation to a Reference Period, the Regulated Consumers who receive Electricity Invoices during the Reference Period.

"Regulatory Asset" means the property rights and interests described in Section 6(1), which collectively is comprised of each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; and (b) for the Servicer, any bank account into which Servicer deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means each Absolute Assignee, as owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Rights" means, with respect to a Regulatory Asset Owner's Investment Interest, all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such Investment Interest.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to Servicer or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in accordance with any Funding Obligation, then the business day preceding each Settlement Date.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the Absolute Assignee under a Funding Obligation.

---

[8] To be included in the legislation once settled.

"Repayment" means a payment by an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

["Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.]

"Servicer" means IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last business day of any month].

"Transition Charge" means, the amount recoverable from a Regulated Consumer in respect of a Reference Period[9], being the Period Finance Charge as allocated to such Regulated Consumer in accordance with Article 4(3) on a monthly basis. **[Note that this allocation will be based on the OEB process for determining the volumetric rate as part of the RPP process (see s. 4(2)). The OEB will determine volumetric rate based on forecast consumption, number of consumers, etc. to recover the Period Finance Charges.]**

"Transition Charge Collection" means any amount received **[or deemed by this Act to have been received]** upon the collection of a Transition Charge paid by or on behalf of a Regulated Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Financial Services Manager equal to (a) the Actual Finance Amount for such related True-Up Period, minus (b) the Estimate of the Finance Amount for the related True-Up Period, plus (c) the Collected Amount Adjustment for such related True-Up Period.[10]

---

[9] Note that Transition Charges will be calculated by reference to Funding Obligations and Finance Amounts incurred under the Financing Plan. The directive will be that no payment obligations will be incurred for payment before 2022, to accommodate the "Fair Adjustment".

[10] True-up calculation is under consideration. In this summary, a calculated true-up amount is contemplated to be included in the Period Finance Amount calculation, in order to achieve a sum certain and actionable debt. The suggestion is that the true-up mechanism be based generally on a calculation process to be described in the Regulation, which would require Transition Charges to be reviewed and adjusted semi-annually (or more frequently) to ensure the expected recovery of amounts sufficient to timely provide all payments in respect of Finance Amounts. It has been proposed that the scope of the true-up will exclude any 'leakage' at the Financing Entity Level (e.g., entity-level tax; litigation; losses) but will include shortfalls that are currently socialized through the LDC/IESO system. Note that the proposal

"True-Up Period" means, in relation to a Reference Period, the immediately preceding Reference Period.[11]

"Undertaking of Her Majesty in right of Ontario" means the undertaking of Her Majesty in right of Ontario given under Section 11(2).[12]

Article 3 – Transition Charges

(1) **Regulated Consumer Obligation to Pay a Transition Charge** – Each Regulated Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such Regulated Consumer by its Electricity Distributor or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) **Indebtedness of Regulated Consumers** – Until paid, a Transition Charge charged to a Regulated Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the Regulated Consumer to the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset. Such indebtedness shall constitute a single and separate[13] debt obligation owing by the Regulated Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the Regulated Consumer under the Electricity Invoice or otherwise.[14]

(3) **No Set-Off or Reduction** – A Regulated Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such Regulated Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) **Allocation of Regulated Consumer Payments** – If an Electricity Distributor receives a payment made by or on behalf of a Regulated Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

---

to include a section detailing the true-up mechanism (Oslers 3(6) has not been included here since the outcome of the calculation is already built into the Period Finance Amount concept.

[11] Timing of calculation under consideration, given that amount will need to be reflected in customer invoices.

[12] Under consideration.

[13] Determine if this is critical for rating and markets. Logistics under consideration.

[14] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consider if it is helpful to integrate the existing regulatory scheme for invoicing and collections (regarding RPP) in the legislation.

(5) Transition Charges are Irrevocable – The Transition Charges arising under or in respect of Funding Obligations (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 9(3)) are deemed to be irrevocable, final and effective without any further action, except to the extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period regardless of whether the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, and regardless of whether the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) True-Up of Transition Charges – [See True-Up Amount].

Article 4 – Invoicing of Transition Charges

(1) Inclusion of Transition Charges in Electricity Invoices – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a Regulated Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice[15] issued by the Electricity Distributor or if applicable by the Alternative Servicer to the Regulated Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable Regulated Consumer.

(2) Calculation of the Period Finance Charge – Not later than [35] days prior to the first day of a Reference Period, each Absolute Assignee (or the Financial Services Manager on its behalf) shall provide the OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period. Not later than one month prior to the first day of a Reference Period, the Financial Services Manager on behalf of each Absolute Assignee shall calculate the Period Finance Charge applicable to the Reference Period having regard to such amounts specified by the Servicer, which calculations, information and amounts shall be determinative, except to the extent of manifest calculation error or misstatement.

(3) Basis for Attributing Transition Charges – Not later than 25 days prior to the first day of a Reference Period, the OEB shall determine a [Fair Hydro Recovery Rate] (on a volumetric basis) on which Electricity Distributors will attribute Transition Charges to consumers under 4(4).

(4) Notice of Transition Charges – Not later than 20 days prior to the first day of a Reference Period, the OEB shall inform each Electricity Distributor and if applicable any

---

[15] Intention is to include bills issued to eligible consumers served by unit sub-metering providers, retailers and the IESO – not just distributors and to address the inclusion of Transition Charges in the paperwork from the IESO to the LDC in a manner that is consistent with the current process of how the IESO bills LDCs.

Alternative Servicer of the [Fair Hydro Recovery Rate] to be applied by the Electiricy Distributor to attribute Transition Charges to each Regulated Consumer who is served by the Electricity Distributor for inclusion in the Electricity Invoices to be issued to the Regulated Consumers.

(5) **Adjustments** – The amount of any Transition Charge charged to a Regulated Consumer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, except to the extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

(7) **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, IESO shall perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article 4. Any Electricity Distributor that is replaced under this Section 4(7) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to IESO and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit IESO or a person designated by IESO to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(8) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to Regulated Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

(9) **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(10) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Servicer to ensure that Transition Charges are properly charged to Regulated Consumers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the Servicer, undertake commercially reasonable efforts to collect amounts owing by Regulated Consumers in respect of Transition Charges charged to such Regulated Consumers in Electricity Invoices issued by the

Electricity Distributor or if applicable such Alternative Collection Agent, all in accordance with the Regulations. [16]

(2) **Segregation of Transition Charge Collections** – If prescribed, an Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from Regulated Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.[17] Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners or a Pledgee.[18]

(3) **Electricity Distributor Remittances** – On each applicable Remittance Date, an Electricity Distributor shall remit all [Transition Charge Collections received by it from Regulated Consumers] [amounts invoiced to it by the IESO on account of Transition Charges][19] in respect of the related Reference Period to or to the account of Servicer or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – Servicer or if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, accept and undertake commercially reasonable efforts to collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from Regulated Consumers that pay their Electricity Invoices directly to IESO, all in accordance with the Regulations.

(5) **Segregation of Electricity Distributor Remittances** – Servicer and if applicable the Alternative Collection Agent shall promptly segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, Servicer or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners or any Pledgee.

(6) **Servicer Remittances** – On each Settlement Date[20], Servicer shall remit all amounts on deposit in its Regulatory Asset Account to or to the account of the Absolute Assignees an amount equal to the Investment Remittance for the related month.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to

---

[16] Note that the obligation to collect and remit the Transition Charge will be included as a deemed condition of license for electricity distributors (and retailers and unit sub-metering providers).]

[17] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.

[18] Consider whether there is a more efficient way to treat collections through the existing LDC/IESO processes. Intention is to provide scope in the Regulations.

[19] Dealer suggestion under consideration. Impact on LDCs and parallel commercial arrangements to be assessed.

[20] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO Successors** – IESO Successors shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province[21], then such person shall, if requested by the Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to Regulated Consumers connected to such person's distribution system assets; (b) allocate partial payments by Regulated Consumers as provided in this Act; (c) exercise all enforcement rights of the Absolute Assignees for the benefit of an Absolute Assignee; and (d) remit any Transition Charge Collections to the Absolute Assignees or Pledgees, as applicable, each in accordance with its Investment Interest.

(10) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, Servicer, the Alternative Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from Regulated Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article 5, or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

(11) **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any Regulated Consumer, any Electricity Distributor, Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[22]

(12) **Sequestration** – If any Electricity Distributor, Servicer, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of

---

[21] This is in anticipation of a possible future restructuring of the distribution system.

[22] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a Regulated Consumer reduces its payment of Transition Charges, despite this language. Same for Electricity Distributor Remittances and IESO Remittances.

Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the Absolute Assignees or Pledgees, shall (i) order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Absolute Assignees, each with respect to its Investment Interest, and the Pledgees as applicable and (ii) appoint a receiver to take control of the amounts sequestered.[23]

(13) **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to Servicer, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset[24]

(1) **Composition** – The Regulatory Asset shall constitute a current and irrevocable property right and interest consisting, collectively, of the following rights and interests (without duplication):

a. the right of a Regulatory Asset Owner to record its Investment Interest in its accounts;

b. the right to impose, bill, invoice, collect and receive Transition Charges from Regulated Consumers, including the right to determine the amount of Transition Charges in accordance with this Act;

c. the right to enforce the obligations and indebtedness of each Regulated Consumer to pay the Transition Charges charged to the Regulated Consumer from time to time in accordance with Article 3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices; the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

d. the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of Servicer or if applicable the Alternative

---

[23] Consider adding or substituting this provision for a right to appoint a receiver.

[24] It is anticipated that Investment Interests will only be sold to Financing Entities controlled by OPG. Sales will occur on a negotiated basis, and deal-specific covenants will be included in transaction documents – to supplement these arrangements.

Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5;

e. the right to enforce the duties and obligations of Servicer and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 5;

f. the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

g. all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

h. all Related Rights; and

i. all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred. The Regulatory Asset shall continue to exist until all Funding Obligations have been paid in full.

(2) **Validity of Dispositions** – A Disposition by IESO of its right to recover all or any part of the IESO Funding Shortfall to an Absolute Assignee, or a Disposition of all or any part of an Investment Interest by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under IESO's right to recover the IESO Funding Shortfall or the Investment Interest, as applicable (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of IESO's right to recover the IESO Funding Shortfall or an Absolute Assignee's right, title and interest in, to and under an Investment Interest, as applicable (or relevant portion thereof), and not merely as a Pledge thereof, and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in IESO's right to recover the IESO Funding Shortfall or the

Investment Interest (or relevant portion thereof) subject to the Disposition, including all rights to recover the IESO Funding Shortfall or under the Investment Interest arising after such Disposition.

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the IESO or transferring Regulatory Asset Owner, as applicable, and all other persons who have claims of any kind (whether in tort, contract or otherwise) against IESO or the transferring Regulatory Asset Owner, as the case may be, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – A Pledge by an Absolute Assignee may be made to secure any Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the related Investment Interest in accordance with the terms of the Pledge. No consent of, or notice to, any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation shall, subject to the terms thereof, give rise to a security interest in respect of which the PPSA applies, and may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected pursuant to the PPSA.[25] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. A Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. All provisions of the PPSA shall apply to the Regulatory Asset on the basis that it is intangible personal property, except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner or Pledgee to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

---

[25] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's rights and interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective and coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.

Article 7 – Establishment of the Fair Allocation Plan[26]

(1) **Adoption of the Fair Allocation Plan** – The Delegate may, by written declaration, designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Act, except if amended, amended and restated or terminated by a further written declaration made by the Delegate in compliance with [the Regulations]**.**

(2) **Principles and Parameters** – A Fair Allocation Plan shall seek to allocate Future Fair Share of Green Transition Benefits across present and future Regulated Consumers on a basis that the Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters:

1. Future Fair Share of Green Transition Benefits should be allocated over the period ending on the Program End Date.

2. The Fair Allocation Plan should specify the Reference Periods for the purpose of identifying applicable Regulated Consumer Groups and allocating Future Fair Share of Green Transition Benefits among them on a relative basis over time.

3. The share of Future Fair Share of Green Transition Benefits allocable to a particular Regulated Consumer in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to such Regulated Consumer over such Reference Period, other than in exceptional circumstances.

4. The share of Future Fair Share of Green Transition Benefits to be allocated to a Regulated Consumer Group and any future Regulated Consumer Group at a particular time should not exceed the Estimated Future Green Transition

---

26 The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current procurement contracts and not invest in extending service lives to secure further procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

Benefits, measured in respect of the Reference Periods following such particular time and to the Program End Date.

5. No future Regulated Consumer Group should be allocated an unreasonably disproportionate share of Estimated Future Green Transition Benefits. Except in exceptional circumstances or in the case of any reallocation of an Over-Assessed Amount as contemplated in 7, below, the Future Fair Share of Green Transition Benefits to be allocated under a Fair Allocation Plan to any future Regulated Consumer Group should have regard to *[Insert formula if a year-over-year maximum amount is determined to be appropriate]*.

6. The time value of money should be reflected in the Fair Allocation Plan, in order to equate the relative values of the nominal allocations of Future Fair Share of Green Transition Benefits, calculated in current dollars, to future Regulated Consumer Groups over time.

7. To the extent there has been an Over-Assessed Amount, the Fair Allocation Plan may determine that an adjustment should fairly be made to rebate Regulated Consumers for such an amount, by reducing the costs otherwise attributable under the Act to such Regulated Consumers. The relative costs of the Green Generation Initiative are reflected under the Act by the attribution of Transition Charges to such Consumer Groups, based on the Financing Plan seeking to track the allocations of benefits under the Fair Allocation Plan. Accordingly, the Maximum Transition Charge Amount determined for one or more Regulated Consumer Groups having regard to the Fair Allocation Plan otherwise applicable may be appropriately reduced to recognize the effect of the Over-Assessed Amount. In such a case, a determination to reduce the Maximum Transition Charge Amount applicable for certain related Reference Periods should have regard to the principle that the corresponding rebate should be extended to benefit the Consumer Group or Consumer Groups in closest proximity to the Legislative Implementation Date.

(3) Attribution Methodology – The Fair Allocation Plan shall specify the Attribution Methodology for the purposes of allocating the Period Finance Charges across the Regulated Consumers. The Attribution Methodology shall result in an attribution of such Transition Charges that is considered by the Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation; provided that the Attribution Methodology shall not be used to limit the recovery of Transition Charges.

(4) Amendments of the Fair Allocation Plan – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation, (b) comply with any restrictions or limitations specified with respect thereto in any Funding

Obligation, and (c) not impair any Regulatory Asset, outstanding Funding Obligations or any Transition Charges.[27]

Article 8 – The IESO Funding Shortfall

(1) Recording of IESO Funding Shortfall – Subject to 8(3), IESO will record any IESO Funding Shortfall [in its books] [in a variance account established in accordance with section 25.33 of the Electricity Act / Ontario Regulation 430/04, as amended].

(2) Adjustments – IESO will record it [its books][its variance account] all adjustments to the IESO Regulatory Asset Amount from time to time. Such books of account shall be determinative with respect to the amount of IESO's related regulatory asset.

(3) Limitation on Additions – Subject to 8(3), IESO shall not record additions to the IESO Regulatory Asset Amount in respect of IESO Funding Shortfalls (a) if such additions are restricted by the terms of any Disposition Document or the Collective Action Agreement, or (b) on or after •, 2017.

(4) Dispositions – IESO may effect a Disposition of its right to recover all or any part of the IESO Regulatory Asset Amount to an Absolute Assignee if (a) the Absolute Assignee has or will concurrently become bound by the Collective Rights Agreement; (b) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; and (c) the Financial Services Manager confirms in writing that the Disposition complies with any restrictions or limitations specified with respect thereto in any documents evidencing the Funding Obligations and is permitted under the Financing Plan.

(5) No Continuing Interest in any Investment Interest – IESO shall have no continuing right or interest in, or maintain any right to recover all or any part of, any IESO Regulatory Asset Amount that is subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party.

(6) IESO Recoveries – IESO shall, in respect of a month, be entitled to receive from IESO Remittances on a related Settlement Date the amount (if any) of any IESO Recoveries.

Article 9 – The Financing Plan

(1) Power to Prepare, Implement and Amend the Financing Plan – The Financial Services Manager shall be authorized to prepare, implement and amend a financing plan [for the Financing Entities] and propose the adoption of such financing plan as the Financing Plan for the purposes of this Act. [The Financial Services Manager shall have the right to withdraw its financing plan as the Financing Plan at any time if it determines that implementing the Financing Plan in such manner would not be in the best interests of a Financing Entity.]

[27] It is anticipated that the terms of any rated financing will restrict further issuances pending a RAC in relation to any changes to the FAP.

(2) Principles and Parameters of the Financing Plan – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions, having regard to the principles and parameters set forth in Schedule 3.

(3) OEB Approval – [Any Additional Funding Charge payable to the Financial Services Manager in respect of services provided by the Financial Services Manager (other than third party costs) shall be subject to review and approval by the OEB.][28]

(4) Review of Financing Plan – The [OEB shall undertake an annual review of the records maintained by the Financial Services Manager for the purpose of confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan.] [29]

(5) Replacement of the Financial Services Manager – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the Financial Services Manager shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services Manager under the Financing Plan. If the Financial Services Manager is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services Manager. [Any replacement financial services manager must comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations.]

(6) Obligation to Apply IESO Remittances – The Financial Services Manager shall ensure that amounts transferred to it [under Article 5, as agent for and on behalf of the Absolute Assignees], or otherwise in respect of or as proceeds from an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose.

(7) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, any Alternative Collection Agent, the Financial Services Manager, the OEB or Her Majesty in right of Ontario, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount.

(8) Incurrences are Binding – Each Disposition made to or by an Absolute Assignee, all amounts payable or becoming due and payable by or on behalf of an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation and each Pledge entered into by an Absolute Assignee, shall be valid and binding, including in determining the amount of related Transition Charges, notwithstanding any defect in the manner of incurrence or any inconsistency with the Fair Allocation Plan or the Financing Plan.

---

[28] Under consideration.

[29] Under consideration.

[Article 10 – Compliance Matters[30]

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Act, the OEB shall have the right, jurisdiction, power and authority to examine the books and records of *[Insert names if any]*.

(2) [OPG's Rate Settings – When setting other rates for or in respect of OPG, the OEB shall not take into account (a) the administrative or servicing fees charged by OPG as Financial Services Manager [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services]; (b) the cost consequences to OPG of being the Financial Services Manager; or (c) the consequence of OPG consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.][31]

Article 11 – Undertaking of the Her Majesty in right of Ontario[32]

(1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – Her Majesty in right of Ontario shall not in any way take or permit (including by any agency or administrative body) any action to reduce, impair, postpone or terminate the obligation of Regulated Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly, including through the introduction of any bill or the passing of any legislation or regulation having such effect. The amount of Transition Charges determined under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by Her Majesty in right of Ontario (including by any agency or administrative body), including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(2) Undertaking and Agreement – Her Majesty in right of Ontario shall not:

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

---

[30] As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article and any potential role for the Auditor General is still under consideration.

[31] As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as Financial Services Manager of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role.

[32] Under consideration, including the dealers' request for (1) a "servicer guarantee" (2) a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes and (3) in the event of a market disruption that renders it impossible to refinance debt when required (or where financing of amounts required to service the debt is not available because of a market disruption where the Financing Entity was relying on such further issuance of debt until the recovery is set to begin to fund interest), a covenant by the Province to step in and payout the debt or to recover the debt from ratepayers as it becomes due, notwithstanding the intended Fair Adjustment.

(b) except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the Absolute Assignees or any Pledgee from time to time;

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment, amendment and restatement or termination would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder, or would not otherwise comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, an IESO Successor shall immediately be established by Her Majesty in right of Ontario to perform such obligations.

(4) **Compensation for Failure** – Absolute Assignees shall be compensated by Her Majesty in right of Ontario for any losses suffered by them as a result of any failure by Her Majesty in right of Ontario to comply with its undertakings and agreements in this Article 11.[33]

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid.

(6) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the Her Majesty in right of Ontario, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 12 – Regulations

Regulations may be made under this Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

[33] Requested by Dealers. For discussion.

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 13- Miscellaneous[34]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Act shall be required with respect to the actions to be taken in compliance with this Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Act, if any provision of this Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Act that is taken by

---

[34] OPG would like the specific amendments related to OPG to be included in the Bill.]

any person who is or may become obligated or have duties that arise under this Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Act are intended to be severable and that the Legislature would have enacted this Act even if any Article, Section, paragraph or subparagraph of this Act held to be unconstitutional or invalid had not been included in this Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3

Principles and Parameters for Establishing the Financing Plan

The following principles and parameters provide a guideline as to what a Financing Plan should address:

(1) in respect of each Reference Period, make reference to the allocations of Future Fair Share of Green Transition Benefits to each Reference Group contemplated by the Fair Allocation Plan;

(2) estimate IESO Funding Shortfalls for each Reference Period;

(3) consider alternative funding arrangements suitable to fund the estimated IESO Funding Shortfalls, including short term and/or long term Funding Obligations;

(4) consider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that payments made for a Reference Period reasonably correspond to the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

(5) if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable Regulated Consumers under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(6) reflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical Regulated Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation);

(7) require the Financial Services Manager, for and on behalf of each Regulatory Asset Owner, to use [diligent efforts to manage Finance Amounts to be borne by Ratepayers];

(8) include a proposal regarding the compensation of the Financial Services Manager that reflects market terms and conditions; and

(9) [require that the Financial Services Manager report annually to the Ministry of Energy on the operation of the Financing Plan including, in particular, with respect to the amount and terms of the Funding Obligations incurred and the sufficiency of such Funding Obligations for the purpose of funding the estimated Funding Shortfalls in accordance with the Fair Allocation Plan.]

(10) incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Absolute Assignees will require committed access to short term liquidity to cover estimated IESO Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Financial Services Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations should not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Financial Services Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Financial Services Agent shall cause the applicable Absolute Assignee to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Financial Services Agent will select counterparties under any transaction to be entered into by an Absolute Assignee, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Financial Services Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Financial Services Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(11) the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the IESO Funding Shortfalls from time to time on a basis that is consistent with the allocations of Future Fair Share of Green Transition Benefits to applicable Reference Groups under the Fair Allocation Plan;

(12) the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(13) the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Financial Services Agent and other agents and service providers to the Absolute Assignees may be determined, allocated and paid;

(14) the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(15) the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(16) the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(17) the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(18) the basis upon which any Disposition may be made or effected by an Absolute Assignee, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(19) describe the requirements applicable to any special purchase entity that will purchase an Investment Interest, including proposed capitalization, governance, and restrictions on their powers and activities; and

(20) the basis on which any Pledge may be given or effected.

[NTD: E&Y will need to see the guidelines of the Fair Allocation Plan set in reference to parameters that will allow it to establish a modeling curve]

- [**Inflation period**: (between November 2017 – and April 2022) bill increases need to be capped at inflation (assumed at 2% for modeling purposes)]

- [**Transition Period**: (May 2022- April 2027) bills increased at a consistent rate which is set so that the borrowing will not exceed the Trust's capacity, which is determined by the Finance Service Manager]

- [**Amortization Period**: (May 2027-April 2047) equitable distribution of Finance Amount among Regulated Consumers]

TOR_2528-#23107566-vpdf-_Fair_Hydro_Act_.pdf

CONFIDENTIAL AND PRIVILEGED

Preliminary Draft for Discussion Purposes Only

"Fair Hydro Act"

Article 1 – Purpose

The Province has and continues to encourage the construction and development of facilities for the long-term operation and generation of electricity in the Province using sustainable, lower carbon-based technologies such as new gas-fired generation, renewable facilities, energy from waste and biomass, including under the Province's various procurement, standard offer, feed in tariff and other similar programs (the "Green Generation Initiative"). The long-term benefits of the Green Generation Initiative accrue over time and have benefited and will continue to benefit present and future electricity consumers in the Province.

The ~~imputed~~out-of-market costs of the Green Generation Initiative are currently passed through to electricity consumers by way of a monthly adjustment amount (the "Green Costs Adjustment"), which in turn forms part of the overall adjustment calculated by the Independent Electricity System Operator ("IESO") pursuant to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* (the "Global Adjustment"). ~~The Global Adjustment is included as a charge billed to electricity consumers in their monthly electricity invoices.~~

The Green Costs Adjustment is currently determined each month by reference to the amounts paid by IESO to the generators of electricity in the Province under the Green Generation Initiative~~, which may be higher than prevailing market price for electricity. These differences~~. These amounts paid by the IESO arise because IESO has entered into long-term procurement contracts with such generators in order to provide them with ~~long-term price~~revenue certainty ~~for electricity~~, and in turn to encourage the generators to develop technologies and to construct and develop facilities consistent with the Green Generation Initiative. ~~In general, whenever amounts payable under these procurement contracts exceed the market price for electricity, the Green Costs Adjustment passes through the amount of such differences as part of the monthly charge to electricity consumers. Such amount then becomes available to IESO to meet its obligations under the procurement contracts.~~ It has been determined that the useful lives of many of the assets ~~encouraged by~~developed under the Green Generation Initiative will be ~~well~~ in excess of the respective terms of ~~the related~~their respective procurement contracts~~, and in many cases may extend over more than one generation of electricity consumers~~.

Since the benefits to past, present and future electricity consumers from the Green Generation Initiative will not necessarily coincide with the costs currently attributed through the Green Costs Adjustment, based on the respective ~~durations~~terms of the applicable procurement contracts, it has been determined that the rate at which the costs associated with the Green Generation Initiative should be passed through to ~~Retail~~Regulated Consumers (as defined in Article 2) should be more closely aligned with the benefits that such ~~Retail~~Regulated Consumers have derived and are expected to derive from the Green Generation Initiative over time. This realignment will be based on general principles and parameters that establish a reasonable basis for measuring and allocating the relative costs and benefits of the Green Generation Initiative equitably across present and future ~~Retail~~Regulated Consumers (the "Fair Allocation Plan").

If the Fair Allocation Plan determines that the equitable allocation of the costs associated with the Green Generation Initiative to the ~~Retail~~Regulated Consumers of a particular time period

should be reduced below the amount that currently would be charged based on the Green Costs Adjustment, then the amount payable by such ~~Retail~~Regulated Consumers and in turn available to IESO will, in the aggregate, be less than the amount payable by the IESO to the generators in respect of such period. In this case, IESO will need to obtain funding from another source to cover such a shortfall. If a funding obligation is incurred ~~by IESO~~ to cover such a shortfall during ~~one~~any period, the repayment of such funding obligation will be required in a future period, and any related repayments, finance costs, hedging costs and other transaction costs incurred will become payable in ~~one or more~~ future periods. In order for IESO to obtain a reliable and committed source of cash flows to enable IESO to repay such funding amounts when they become due and payable, this Act imposes irrevocable and non-bypassable financial obligations on ~~Retail~~Regulated Consumers to pay amounts incurred in respect of such funding obligations when they become due and payable and establishes a right to invoice and collect such amounts. The right and interest in and to collect such financial obligations will take the form of the Regulatory Asset contemplated in this Act, which will constitute property rights and interests. Interests in the Regulatory Asset may be sold and absolutely assigned by IESO to one or more financing entities, which in turn will finance their acquired interests by incurring funding obligations. The incurrence and payment of such funding obligations will be administered on behalf of such financing entities by a financial services ~~agent~~manager under the Financing Plan contemplated in this Act. ~~The Financing Plan will seek to reasonably match the payment obligations arising under such funding obligations, to be borne by the future Retail Consumers of the period in which such payment obligations become due, with the benefits of the Green Generation Initiative allocated to such future Retail Consumers under the Fair Allocation Plan.~~

The purpose of this Act is to establish the basis upon which intergenerational fairness can be achieved by charging the costs and benefits of the Green Generation Initiative to present and future ~~Retail~~Regulated Consumers on an equitable and cost effective basis.

Article 2 ~~-~~ = Definitions

In this Act:

> "Absolute Assignee" means a person to whom a Regulatory Asset Owner effects a Disposition other than as security.
>
> "Actual" means, in relation to costs, expenses or payments in respect of Funding Obligations during a Reference Period, the actual amount of such costs, expenses or payments paid or made (net of any Finance Reserve Withdrawals applied to pay such amounts), which amounts shall be recorded by the Financial Services ~~Agent~~Manager whose records shall be determinative for the purposes of this Act except to the extent of a manifest calculation error.
>
> "Additional Funding Charges" means, for a Reference Period ~~in respect of an Absolute Assignee,~~ the fees, charges, expenses, costs, indemnities, reimbursements and other amounts (including any applicable tax amounts) that are or become payable by or on behalf of ~~the~~any Absolute Assignee during the Reference Period and that were incurred or committed to directly or indirectly by the Absolute Assignee in connection with the incurrence of Funding Obligations under the Financing Plan (whether at the time of such incurrence or over the term of the Funding Obligation and whether directly or indirectly), including ~~(without duplication and without limitation): (a) any payment required under an ancillary agreement entered into by, or by the Financial Services Agent on behalf of, the~~

~~Absolute Assignee under the Financing Plan; (b) any federal, provincial or local taxes, payments in lieu of taxes, franchise fees or license fees imposed on the Absolute Assignee or incurred by on behalf of the Absolute Assignee under any obligation to pay tax gross-up amounts to counterparties under Funding Obligations; (c) any amounts payable to the Financial Services Agent, including amounts payable to its advisors and outside counsel; (d) any amounts incurred to prepare, confirm, amend and implement the Financing Plan; (e) any amounts payable to any Alternative Collection Agent or Alternative Servicer, including amounts payable to each's advisors and outside counsel; (f) any amounts incurred to make the calculations, determinations or confirmations to be made by or on behalf of the Absolute Assignee; (g) any servicing fees and expenses; (h) any trustee fees and expenses; (i) any legal fees, expenses and disbursements; (j) any accounting fees and expenses; (k) any administrative fees and expenses; (l) any manager or director fees of a Financing Entity; (m) any registration fees and expenses; (n) any placement fees, underwriting fees, fees and related issuing expenses; (o) any rating agency fees; and (p) any other related fees, charges, expenses, costs, indemnities, reimbursements and other amounts that are approved in good faith by the Financial Services Agent for recovery and payment under the Financing Plan~~without limitation such amounts as may be prescribed.

~~"Allocation Factor" means, in respect of a Retail Consumer for a Reference Period, the number (expressed as a percentage) determined in respect of the Retail Consumer by the OEB based on the application of the Attribution Methodology in respect of the Reference Period.[1]~~

"Alternative ~~Collection Agent~~Servicer" means a person appointed under Section ~~5(11) and in compliance with the requirements set out in Schedule 2 to assume the collection activities and activities of any Electricity Distributor or IESO under Article 5, as agent for and on behalf of the Regulatory Asset Owners."Alternative Servicer" means a person appointed under Section~~ 4(8) to assume the obligations of the Servicer under Article 4, as agent for and on behalf of the Regulatory Asset Owners.

"Assessed Past Green Transition Costs" means, in respect of a Measurement Date, the aggregate of the imputed costs of the Green Generation Initiative (expressed as an equivalent to current dollars), as reflected in the calculation of the Green Costs Adjustment, which have been charged to ~~Retail~~Regulated Customers through the Global Adjustment on or prior to the Measurement Date.

"Attribution Methodology"~~[2]~~[1] means the methodology specified in the Fair Allocation Plan for allocating the Period ~~Transition~~Finance Charges for a Reference Period to ~~individual Retail~~Regulated Consumers~~ of the applicable Retail Consumer Group based on its Allocation Factor~~.

"Collected Amount Adjustment" means, in respect of a True-Up Period, the amount (which may be a negative amount) calculated by the Servicer or the Financial Services ~~Agent~~Manager, as applicable, equal to (a) the Estimate of the Finance Amount for the True-Up Period, minus (b) the sum of all Transition Charge Collections for the True-Up Period~~.[3]~~ and minus [(c) the amounts by which amounts remitted by Electricity

~~[1] Confirm that this will be based on forecast volumes of demand (like RPP). To the extent amounts do not get recovered due to differences between forecast and actual, those may be identified and caught by the True-Up.~~

~~[2]~~[1] This allocation may be volumetric or some combination of a flat amount and a volumetric charge. Further discussion is required. H&W has raised a concern regarding possible adverse changes after the fact and rating agency considerations. Consider whether hard-coding in the legislation makes sense.

Distributors pursuant to Section 5(4) exceeded the corresponding amount of Transition Charges Actually paid by Regulated Consumers.][2]

"Collective Rights Agreement" means an agreement among all of the Regulatory Asset Owners (including each Absolute Assignee) ~~and~~, each Pledgee, and the Financial Services Manager that governs the enforcement of their respective rights and interests in, to and under the Regulatory Asset on a coordinated and collective basis.[4]

"Delegate" means ~~the~~any of the following person or persons designated in writing from time to time by the Minister of Energy to undertake the actions and perform the responsibilities ascribed to the "Delegate" under this Act; ●[3].

"Disposition" means an assignment, transfer, conveyance, sale, contribution, set-over, exchange or other disposition ~~of an Investment Interest~~(or, in the case of the IESO Funding Shortfall, a release by IESO of its right to recover such amount in order to enable an Absolute Assignee to recover such amount) of (a) IESO's right to recover all or any portion of an IESO Funding Shortfall or (b) an Investment Interest, in each case to an Absolute Assignee pursuant to a Disposition Document.

"Disposition Document" means the agreement, deed, conveyance, instrument or other document under which ~~a Regulatory Asset Owner~~IESO or an Absolute Assignee effects a Disposition to an Absolute Assignee.

"Electricity Distributor" means~~, in respect of a Service Area, the~~ a rate regulated distributor licensed under Part V of the *Ontario Energy Board Act, ~~1998~~* ~~in respect of such Service Area,~~*1998*, together with and its successors.

"Electricity Distributor Remittances" means, for an Electricity Distributor on a Remittance Date, all Transition Charge Collections received or deemed to be received by the Electricity Distributor prior to the Remittance Date and that have not otherwise been remitted to ~~IESO~~Servicer or if applicable the Alternative Collection Agent in accordance with Section 5(3), including the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5.[4]

"Electricity Invoice" means an invoice issued by ~~any of a~~an Electricity Distributor (or in its stead, by an Alternative ~~Servicer~~Collection Agent), by the Servicer or by a Retailer, in each case to a ~~Retail~~Regulated Consumer that is served by the Electricity Distributor's distribution system in respect of electricity charges, including the cost of electricity, delivery and regulatory charges and related services and amounts incurred, assessed or charged in respect of connectivity to ~~a distribution network in the~~such Electricity Distributor's ~~designated Service Area~~distribution system and in respect of applicable Transition Charges to be charged to the ~~Retail~~Regulated Consumer under this Act.

[32] This ~~would~~is intended to pick up adjustments based on actual collection experience, changes in the ~~retail consumer~~Regulated Consumer base, changes in the actual costs (versus earlier estimates) included in the Transition Charge calculation, etc. The actual calculation needs work.

[4] ~~Consider adding the Financial Services Agent and the Servicer as parties.~~

[3] Placeholder for delegation once deterermined.

[4] Suggestion is that LDCs remit based on estimates and then true-up, based on current arrangements for remittances by LDCs to IESO. *

"Estimate" means (a) in relation to costs, expenses or payments in respect of Funding Obligations or any Finance Amount for a Reference Period, the estimated amount of such costs, expenses or payments determined by the Financial Services ~~Agent~~Manager; and (b) in relation to an assessment of the benefits of the Green Generation Initiative to ~~any Retail Consumer Group~~Regulated Consumers, the estimated value (in current dollars) of such benefits determined by the Delegate, in each case having regard to the applicable principles and parameters set out in Schedule 1, which estimated amounts shall be determinative as the applicable estimate for the purposes of this Act except to the extent of a manifest calculation error.

"Estimated Future Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that are expected to accrue to ~~Retail~~Regulated Consumers from the establishment and implementation of the Green Generation Initiative during the period from the Measurement Date to the Program-End Date.

"Estimated Past Green Transition Benefits" means, in respect of a Measurement Date, the Estimate set forth in the Fair Allocation Plan prepared in accordance with Article 7 of the aggregate value (measured in current dollars) of the benefits that have accrued to ~~Retail~~Regulated Consumers from the establishment and implementation of the Green Generation Initiative up to and including the Measurement Date.

"Fair Allocation Plan" has the meaning given in Article 1.

"Finance Amount" means, for a Reference Period ~~in respect of an Absolute Assignee~~, the sum (without duplication) of the following amounts that are or become payable during the Reference Period in respect of ~~the~~any Absolute Assignee: (a) Repayments; (b) Net Funding Costs; (c) Redemption Amounts; (d) Finance Reserve Deposits; and (e) Additional Funding Charges.

"Finance Reserve Deposits" means, for a Reference Period, the amount by which (a) deposits made or to be made during the Reference Period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of Funding Obligations or for related contingencies specified in the Financing Plan, exceed (b) any Finance Reserve Withdrawals.

"Finance Reserve Withdrawals" means, for a Reference Period, the amount withdrawn during the Reference Period from deposits previously made to pre-fund, collateralize, over-collateralize or establish reserves for the payment of Funding Obligations or to pay amounts in respect of related contingencies that had been specified in the Financing Plan.

"Financial Services ~~Agent~~Manager" means OPG or, following any Replacement Event involving OPG, such other person ~~or persons~~ who may be appointed as the ~~Financial Services Agent~~financial services manager of the Absolute Assignees under the Financing Plan in compliance with the requirements set out in Schedule 2.[5]

[5] ~~Discuss whether to accommodate multiple~~There must only be one Financial Services ~~Agents. MOE to consider~~Manager.

"Financing Entity" means ~~an~~any entity established in accordance with the Financing Plan to ~~acquire all or an interest in the Regulatory Asset as~~be an Absolute Assignee and ~~to enter into Funding Obligations to finance such acquisition under the Financing Plan~~that is managed by the Financial Services Manager.[6]

"Financing Plan" means the written plan prepared by the Financial Services ~~Agent on behalf of each Absolute Assignee in compliance with Article 9 to set forth the basis upon which, among other things: (a) any Disposition may be made to, financed by or effected by an Absolute Assignee; (b) any Funding Obligations may be incurred by an Absolute Assignee, including any Refinancing; (c) any Pledge may be given or effected; (d) any Funding Obligations may be redeemed, prepaid, repurchased, amended or otherwise effected; (e) any obligations for Additional Funding Charges may be incurred and paid; (f) any Repayments, Funding Costs and Redemption Amounts may be paid or provided for; (g) any Finance Reserve Deposits may be made; (h) any Finance Reserve Withdrawals may be made; (i) the establishment and operation of any Financing Entity may be effected; and (j) the cash flows arising from time to time or otherwise derived from an Investment Interest may otherwise be applied,~~Manager in accordance with Article 9, as the same may be amended, amended and restated or terminated by the Financial Services ~~Agent~~Manager in ~~compliance~~accordance with Article 9 from time to time.

~~"Funding Costs" means, for a Reference Period in respect of an Absolute Assignee, the amount by which (a) the aggregate of all interest and other periodic finance charges accruing due and becoming payable or paid by or on behalf of the Absolute Assignee during the Reference Period in respect of its Funding Obligations, including any standby commitment fees or charges paid to any lender, credit enhancement fees or charges paid to any credit enhancer, liquidity fees or charges paid to any liquidity provider, amounts (including any termination payments) paid under derivatives and any deposit amount made or required to fund or replenish a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to its Funding Obligations, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of a Funding Obligation, including from any reimbursement of standby commitment fees or charges paid by a lender, any reimbursement of credit enhancement fees or charges paid by any credit enhancer, any reimbursement of liquidity fees or charges paid by any liquidity provider, any amounts (including any termination payments) paid to the Absolute Assignee under derivatives and any Finance Reserve Withdrawal made or required to be made from a debt service reserve account or other account established under any indenture, ancillary agreement or other financing document relating to the payment of the Funding Costs payable in respect of a Funding Obligation for the Reference Period.~~

"Funding Obligation" means, in respect of an Absolute Assignee, each payment obligation (including each obligation to pay: principal, interest, premiums and other financing charge payments; pass-through payments; payment obligations arising under

[6] MOE to confirm that the legislation will provide that any Financing Entity that is a wholly-owned subsidiary of OPG (1) would not be subject to Part VI of the *Electricity Act* (Ontario) and (2) in the case of any Financing Entity that is a trust, any income of such trust (for purposes of the *Income Tax Act* (Canada) or the *Taxation Act, 2007* Ontario)) which is paid or made payable to OPG or a wholly-owned subsidiary of OPG as a beneficiary of such trust will not be taken into account in calculating the amount of a payment required to be made by OPG (or such subsidiary) by section 89 or 90 of the Electricity Act.

or in respect of derivatives; payment obligations owing to service providers, Financial Services ~~Agents~~Managers, finance entity intermediaries, capital markets intermediaries, advisors, lenders, credit enhancement providers, liquidity providers, disbursement counterparties, regulatory agencies and rating agencies; and all Additional Funding Charges) incurred by or on behalf of the Absolute Assignee under the Financing Plan, including any Refinancing of another such payment obligation incurred by or on behalf of such Absolute Assignee.

"Future Fair Share of Green Transition Benefits" means, in respect of a Measurement Date, the sum of (a) the Over-Assessed Amount; and (b) the Estimated Future Green Transition Benefits, in each case as of the Measurement Date.

~~"Generator" means a generator of electricity that is subject to the *Electricity Act, 1998*.~~

"Global Adjustment" has the meaning given in Article 1.

"Green Costs Adjustment" has the meaning given in Article 1.

"Green Generation Initiative" has the meaning given in Article 1.

"IESO" means the Independent Electricity System Operator created pursuant to Part II of the *Electricity Act, 1998*.

~~"IESO Available Amount" means, for a Reference Period, the lesser of (a) the amount (if any) by which (i) the Maximum Transition Charge Amount for the Reference Period, exceeds (ii) Period Finance Amount for the Reference Period, and (b) the IESO Retained Interest Amount as of the [35th] day prior to the first day of a Reference Period plus any IESO Financing Costs that are due and payable and remain unpaid as of the [35th] day prior to the first day of a Reference Period.~~

"IESO Electricity Distribution Receipts" means, for a month, the sum of all amounts payable by Electricity Distributors to IESO , during the month pursuant to section • of the *Electricity Act*~~.~~ in respect of Regulated Consumers. **[NTD: IESO indicates that it likely does not work to express in regards to "amounts payable by the LDCs" because settlement between the IESO and LDCs entails payments by LDCs to the IESO and then credits/debits by the IESO to LDCs to reflect RPP shortfalls/overages.]**

~~"IESO Financing Costs" means, for a Reference Period, the financing costs (if any) incurred by IESO pursuant to Section 8(4) in order to finance its ownership of the IESO Retained Interest during the Reference Period.~~

"IESO Funding Shortfall" means, for a month, the amount, if any, by which (a) the IESO Electricity Distribution Receipts that would be payable to IESO for the month if determined without regard to this Act and without regard to the changes made to section 25.33 of, and O.Reg. 429/4 under, the *Electricity Act* with respect to the Global Adjustment concurrently with this Act, exceeds (b) the IESO Electricity Distribution Receipts payable to IESO for the month[7]~~; provided that if the amount of any such shortfall is determined to have been based on incomplete information, variances or estimates that were inaccurate, an adjustment shall be made in determining the amount~~

[7] ~~This has been recast to recognize that the shortfall in the first 4.5 years could exceed the entire GA amount. A more refined approach to describing the concept may be considered.~~

~~of any subsequent shortfall for the month in which the inaccuracy is identified. .~~To the extent reasonably necessary to give effect to this Act, or any transaction contemplated hereby, IESO shall calculate the IESO Funding Shortfall for any month taking into account information provided by the Electricity Distributors and (i) such calculation shall be binding for all purposes; and (ii) any demonstrated inaccuracy in the calculation for any month (including any such resulting from inaccuracies in the information provided by Electricity Distributors) shall be accounted for by adjusting the IESO Funding Shortfall for a subsequent month.

"IESO Recovery" means each amount ~~remitted to IESO (including~~received by IESO ~~retaining such amount) in respect of the IESO Retained Interest pursuant to Section 5(6)(b)~~in accordance with its right to recover IESO Funding Shortfalls pursuant to section 25.33 of the Electricity Act and Ontario Regulation 430/04, as amended, and "IESO Recoveries" means, collectively, all such amounts received by IESO.[7]

"IESO Remittances" means, for a Settlement Date, all Electricity Distributor Remittances received by IESO or if applicable the Alternative Collection Agent prior to the Settlement Date and that have not otherwise been remitted to the Regulatory Asset Owners (each with respect to its Regulatory Asset) in accordance with Section 5(6), including the proceeds of any enforcement action undertaken by IESO or if applicable the Alternative Collection Agent to recover payment of amounts payable by Electricity Distributors to IESO in accordance with Article 5.

"IESO ~~Retained Interest" means IESO's right, title and ownership interest (if any) in, to and under the Regulatory Asset, which shall exclude each Investment Interest."IESO Retained~~Regulatory Interest Amount" means, on a day, (a) the sum of all IESO Funding Shortfalls incurred prior to the day, ~~plus (b) the sum of all IESO Funding Costs incurred prior to the day in accordance with Section 8(4), minus (c~~minus (b) the net proceeds received by IESO from or on behalf of each Absolute Assignee as consideration for the Disposition of each Investment Interest paid to IESO by or on behalf of such Absolute Assignee prior to the day, and minus (~~d~~c) the IESO Recoveries received by IESO prior to the day.

"IESO Successor" means the entity appointed by the Province to succeed to the rights and obligations of IESO as the entity responsible for managing the Province's electricity system.

"Investment Interest" means an ownership interest in, to or under the Regulatory Asset that is acquired by an Absolute Assignee pursuant to a Disposition~~, which ownership interest may include (without limitation) ownership of a specified portion on a divided basis of the assets comprising the Regulatory Asset and ownership of an undivided ownership interest in the Regulatory Asset, in each case as may be described in the applicable Disposition Document~~.

"Investment Remittance" means, for a month, the lesser of (a) the aggregate amount of all IESO Remittances for the month, and (b) the sum of the Finance Amounts due and payable by all Absolute Assignees in respect of the month.

[7] IESO will be entitled to record the IESO Funding Shortfall amount in a variance account. The OEB will eliminate and dispose of the variance account balance as part of the RPP adjustment process under the OEB Act , with an applicable OEB accounting order. See Article 8 for corresponding adjustments based on Dispositions. These will need to be tied together.

~~"Maximum IESO Recovery" means, for a month, the amount (if any) by which (a) the IESO Remittances for the month, exceed (b) the sum of all Finance Amounts that are due and payable by Absolute Assignees in respect of the month.~~

~~"Maximum Transition Charge Amount" means, for a Reference Period, (a) the aggregate amount of Future Fair Share of Green Transition Benefits that are allocable to the applicable Retail Consumer Group in accordance with the Fair Allocation Plan, divided by (b) the applicable Reference Period Length.~~

"Measurement Date" means [Insert relevant date around the Legislation Implementation Date] and any other date specified as such under the Fair Allocation Plan.

"Net Funding Costs" means, for a Reference Period, the amount by which (a) the aggregate of all interest, scheduled principal and other periodic finance charges accruing due and becoming payable or paid by or on behalf of any Absolute Assignee during the Reference Period in respect of its Funding Obligations, including such amounts as may be prescribed, exceeds (b) the aggregate of all amounts received by or on behalf of the Absolute Assignee during the Reference Period in respect of the Funding Obligations referred to in (a), and such other or different amounts as may be prescribed.

"OEB" means the Ontario Energy Board, together with its successors.

"OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998, together with its successors.

"Over-Assessed Amount" means, in respect of a Measurement Date, the amount (if any) by which (a) the Assessed Past Green Transition Costs, exceeds (b) the Estimated Past Green Transition Benefits, each as determined as of the Measurement Date.

"Period Finance Charges" means, for a Reference Period, the sum of (a) the Estimate of the Finance Amount ~~and~~ (b) the True-Up Amount in respect of the ~~immediately preceding Reference Period. "Period Transition Charges" means, for a Reference Period, the sum of (a) the Period Finance Charges for the Reference Period and (b) the IESO Available Amount for the Reference Period.~~ applicable True-Up Period and (c) [an adjustment amount as may be prescribed to account for estimated collection shortfalls and collection delays in respect of amounts under (a) and (b).]

"Pledge" means, in respect of an Investment Interest of an Absolute Assignee, a lien, mortgage, charge or security interest granted to or in favour of a Pledgee by the Absolute Assignee in, to and over all or a specified portion (including a specified portion on a divided basis or by way of an undivided interest) of the Investment Interest.

"Pledgee" means a person to whom an Absolute Assignee grants a Pledge.

"Program End Date" means •, [2047].

"Province" means the Province of Ontario.

"Redemption Amount" means the amount payable by or on behalf of an Absolute Assignee to redeem, prepay or repurchase a Funding Obligation incurred by or on behalf of the Absolute Assignee, including any premium, make-whole or other additional

amount becoming payable under the Funding Obligation to give effect to such redemption, prepayment or repurchase.

"Reference Period" means (a) the period from (and including) the Measurement Date to (and including) ~~June~~October 30, 2017, (b) each six month period commencing [May 1st and November 1st] thereafter and (c) any other period specified as such in the Fair Allocation Plan.

~~"Reference Period Length" means, for a Reference Period, the number of months in the Reference Period.~~

"Refinancing" means, in respect of a Funding Obligation incurred by or on behalf of an Absolute Assignee, that the Funding Obligation is repaid or repurchased for cancellation by or on behalf of the Absolute Assignee by applying the net proceeds obtained by the Absolute Assignee incurring one or more other Funding Obligations.

"Regulated Consumer" means consumers of electricity in the Province [as prescribed][8].

"Regulated Consumer Group" means, in relation to a Reference Period, the Regulated Consumers who receive Electricity Invoices during the Reference Period.

"Regulatory Asset" means the property rights and interests described in Section 6(1), which collectively is comprised of ~~the IESO Retained Interest and~~ each Investment Interest.

"Regulatory Asset Account" means (a) for an Electricity Distributor, any bank account into which the Electricity Distributor deposits or receives Transition Charge Collections; and (b) for the Servicer, any bank account into which ~~IESO deposits or receives Transition Charges, Electricity Distributor Remittances or IESO Remittances; and (c) if applicable, for the Alternative Collection Agent, any bank account into which the Alternative Collection Agent~~Servicer deposits or receives Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances.

"Regulatory Asset Owner" means ~~each of (a) IESO, as owner of (and to the extent of) the IESO Retained Interest and (b)~~ each Absolute Assignee, as owner of its Investment Interest or Investment Interests, and "Regulatory Asset Owners" means collectively ~~IESO and~~ each such Absolute Assignee, who together own the entirety of the Regulatory Asset and are required to exercise their individual rights of ownership in accordance with Section 6(7).

"Related Rights" means, with respect to a Regulatory Asset Owner's Investment Interest, all rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise such ~~Regulatory Asset~~Investment Interest.

"Remittance Date" means, in respect of an Electricity Distributor, each day on which it is required to remit Electricity Distribution Remittances to ~~IESO~~Servicer or if applicable the Alternative Collection Agent as specified in accordance with any Funding Obligation or, if no such day is specified in accordance with any Funding Obligation, then the ~~Business Day~~business day preceding each Settlement Date.

[8] To be included in the legislation once settled.

"Repayment Obligation" means an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase (including by making a related Finance Reserve Deposit) of, all or a portion of the amount advanced to the Absolute Assignee under a Funding Obligation.

"Repayment" means a payment by an Absolute Assignee made to satisfy a Repayment Obligation, other than to the extent that the payment is made by applying the proceeds of a Refinancing or from Finance Reserve Withdrawals.

"Replacement Event" means any event specified as such in a Funding Obligation.

~~"Retail Consumer" means:~~

~~(a) present and future consumers of electricity in the Province who are (i) consumers designated under section 79.16 of[, and O.Reg 95/05 under,] the *Ontario Energy Board Act, 1998*, or (ii) hold or are deemed to hold an "eligible account" under the *Ontario Rebate for Electricity Consumers Act, 2016*, other than any such consumer who has a contract with a Retailer who uses Retailer Consolidated Billing; and~~

~~(b) present and future Retailers who use Retailer Consolidated Billing,~~

~~and each case includes all such consumers and Retailers who are connected, directly or indirectly and whether a customer of an Electricity Distributor or not, to the transmission and distribution system assets located in the Province and who are taking electric delivery service within the Province, whether or not such retail consumers produce their own electricity or purchase electric generation services from a provider of electric generation services other than the owner of the Province's transmission and distribution system assets and whether or not the transmission and distribution system assets continue to be owned or operated by Electricity Distributors or operated by IESO.~~

~~"Retail Consumer Group" means, in relation to a Reference Period, the Retail Consumers who receive Electricity Invoices during the Reference Period.~~

"Retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity.

[["Retailer Consolidated Billing" has the same meaning as in the *Retail Settlement Code* issued by the Ontario Energy Board.]]

~~"Service Area" means, in respect of an Electricity Distributor, the geographic area or region in which it is licensed to distribute electricity in accordance with the *Electricity Act, 1998*.~~

"Servicer" means IESO or IESO Successor, as agent for and on behalf of the Regulatory Asset Owners, for the purposes set forth in Article 4.

"Settlement Date" means the [last ~~Business Day~~business day of any month].

"Transition Charge" means, ~~for a Retail~~the amount recoverable from a Regulated Consumer in respect of a Reference Period~~, (a) the Period Transition Charge, (b) multiplied by its Allocation Factor in respect of the Reference Period, divided by (c) the~~

~~applicable Reference Period Length.~~[9], being the Period Finance Charge as allocated to such Regulated Consumer in accordance with Article 4(3) on a monthly basis. **[Note that this allocation will be based on the OEB process for determining the volumetric rate as part of the RPP process (see s. 4(2)). The OEB will determine volumetric rate based on forecast consumption, number of consumers, etc. to recover the Period Finance Charges.]**

"Transition Charge Collection" means any amount received **[or deemed by this Act to have been received]** upon the collection of a Transition Charge paid by or on behalf of a ~~Retail~~Regulated Consumer, including any proceeds arising from the exercise and enforcement of any related rights and interests under or in respect of the Regulatory Asset.

"True-Up Amount" means, in respect of a Reference Period, the amount (which may be a negative amount) calculated by the Financial Services ~~Agent~~Manager equal to (a) the Actual Finance Amount for such related True-Up Period, minus (b) the Estimate of the Finance Amount for the related True-Up Period, ~~minus (b) the Actual Finance Amount for such related True-Up Period,~~ plus (c) the Collected Amount Adjustment for such related True-Up Period.[10]

"True-Up Period" means, in relation to a Reference Period, the ~~period from and including the [30th] day~~ immediately preceding ~~the first day of the Reference Period, to but excluding the [30th] day immediately preceding the last day of the~~ Reference Period.[11]

"Undertaking of ~~the Lieutenant Governor in Council~~Her Majesty in right of Ontario" means the undertaking of ~~the Lieutenant Governor in Council~~Her Majesty in right of Ontario given under Section 11(2).[12]

Article 3 – Transition Charges

(1) **~~Retail~~Regulated Consumer Obligation to Pay a Transition Charge** – Each ~~Retail~~Regulated Consumer shall pay each Transition Charge charged to it in any Electricity Invoice issued to such ~~Retail~~Regulated Consumer by its Electricity Distributor

[9] Note that Transition Charges will be calculated by reference to Funding Obligations and Finance Amounts incurred under the Financing Plan. The directive will be that no payment obligations will be incurred for payment before 2022, to accommodate the "Fair Adjustment".

[10] True-up calculation is under consideration. In this summary, a calculated true-up amount is contemplated to be included in the Period Finance Amount calculation, in order to achieve a sum certain and actionable debt. The suggestion is that the true-up mechanism be based generally on a calculation process to be described in the Regulation, which would require Transition Charges to be reviewed and adjusted semi-annually (or more frequently) to ensure the expected recovery of amounts sufficient to timely provide all payments in respect of Finance Amounts. It has been proposed that the scope of the true-up will exclude any 'leakage' at the Financing Entity Level (e.g., entity-level tax; litigation; losses) but will include shortfalls that are currently socialized through the LDC/IESO system. Note that the proposal to include a section detailing the true-up mechanism (Oslers 3(6) has not been included here since the outcome of the calculation is already built into the Period Finance Amount concept.

[11] Timing of calculation under consideration, given that amount will need to be reflected in customer invoices.

[12] Under consideration.

or by an Alternative Servicer under Section 4(1), in each case on the terms of payment specified in the related Electricity Invoice.

(2) Indebtedness of ~~Retail~~Regulated Consumers – Until paid, a Transition Charge charged to a ~~Retail~~Regulated Consumer in an Electricity Invoice shall, together with any applicable late payment fees and finance charges arising under the terms of the Electricity Invoice with respect to such Transition Charge, constitute non-bypassable indebtedness of the ~~Retail~~Regulated Consumer to the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset. Such indebtedness shall constitute a single and separate[~~8~~13] debt obligation owing by the ~~Retail~~Regulated Consumer, which subject to Article 5 may be enforced independently from any other payment obligation or indebtedness owing by the ~~Retail~~Regulated Consumer under the Electricity Invoice or otherwise.[~~9~~14]

(3) No Set-Off or Reduction – A ~~Retail~~Regulated Consumer may not set-off or reduce (by counterclaim, defense or otherwise) the amount payable by it in respect of any Transition Charge, including any set-off against or in respect of any amount owing or becoming payable to such ~~Retail~~Regulated Consumer by its Electricity Distributor, any Regulatory Asset Owner or any other person.

(4) Allocation of ~~Retail~~Regulated Consumer Payments – If an Electricity Distributor receives a payment made by or on behalf of a ~~Retail~~Regulated Consumer in respect of amounts due and payable under one or more Electricity Invoices that is less than the total amount payable thereunder, such payment shall be allocated on a *pro rata* basis to the payment of related Transition Charges and other invoiced amounts and the amount so allocated as a payment of related Transition Charges shall be deemed to constitute a Transition Charge Collection.

(5) Transition Charges are Irrevocable – The Transition Charges arising under or in respect of Funding Obligations ~~incurred under the Financing Plan~~ (including any adjustments based on modifications to such Funding Obligations made in compliance with the Financing Plan or as a result of amendments to the Financing Plan made in accordance with Section 9(3)) are deemed to be irrevocable, final and effective without any further action, except to the extent of manifest calculation error. For greater certainty, a Transition Charge may include Finance Amounts for a Reference Period regardless of whether ~~or not~~ the payment of such Finance Amounts are inconsistent with the Fair Allocation Plan applicable at the time such payments are due and payable, and regardless of whether ~~or not~~ the related Funding Obligation was properly incurred under the Financing Plan. In no case shall a Funding Obligation incurred under the Financing Plan be affected by a subsequent amendment to the Fair Allocation Plan.

(6) True-Up of Transition Charges – [See True-Up Amount].

Article 4 – Invoicing of Transition Charges

[~~8~~13] Determine if this is critical for rating and markets. Logistics under consideration.

[~~9~~14] Torys has also suggested that deemed conditions of licenses for distributors, retailers and unit sub-metering providers, could be included as conditions, to require them to collect and remit amounts in accordance with this legislation. Consider if it is helpful to integrate the existing regulatory scheme for invoicing and collections (regarding RPP) in the legislation.

(1) **Inclusion of Transition Charges in Electricity Invoices** – Each Electricity Distributor and if applicable any Alternative Servicer shall, as an agent of the Regulatory Asset Owners, specify the Transition Charge to be charged to a ~~Retail~~Regulated Consumer pursuant to Section 4(4) in respect of a related Reference Period in each Electricity Invoice[15] issued by the Electricity Distributor or if applicable by the Alternative Servicer to the ~~Retail~~Regulated Consumer in respect of such Reference Period. Upon the inclusion of a Transition Charge in an Electricity Invoice, the obligation to pay such amount shall be binding on the applicable ~~Retail~~Regulated Consumer.

(2) **Calculation of the Period ~~Transition~~Finance Charge** – Not later than [35] days prior to the first day of a Reference Period, each Absolute Assignee (or the Financial Services ~~Agent~~Manager on its behalf) shall provide the OEB with written notice of each Estimate of a Finance Amount payable by it or on its behalf in respect of the Reference Period~~. [35] days prior to the first day of a Reference Period, IESO or Successor IESO if applicable shall specify the IESO Retained Interest Amount and any IESO Financing Costs that are due and payable and remain unpaid on such day~~. Not later than one month prior to the first day of a Reference Period, the ~~OEB~~Financial Services Manager on behalf of each Absolute Assignee shall calculate the Period ~~Transition~~Finance Charge applicable to the Reference Period ~~based on the calculations and information set forth in such written notices received from the Absolute Assignees and based on~~having regard to such amounts specified by ~~IESO or Successor IESO~~the Servicer, which calculations, information and amounts shall be determinative, except to the extent of manifest calculation error or misstatement.

(3) **~~Calculation and Attribution of~~Basis for Attributing Transition Charges** – Not later than 25 days prior to the first day of a Reference Period, the OEB shall ~~apply the Attribution Methodology to determine the Allocation Factor for each Retail Consumer of the applicable Retail Consumer Group~~determine a [Fair Hydro Recovery Rate] (on a volumetric basis) on which Electricity Distributors will attribute Transition Charges to consumers under 4(4).

(4) **Notice of Transition Charges** – Not later than 20 days prior to the first day of a Reference Period, the OEB shall inform each Electricity Distributor and if applicable any Alternative Servicer of the [Fair Hydro Recovery Rate] to be applied by the Electricy Distributor to attribute Transition Charges to ~~be specified~~each Regulated Consumer who is served by the Electricity Distributor for inclusion in the Electricity Invoices to be issued to ~~each Retail Consumer of the applicable Retail Consumer Group who has a billing address in the Electricity Distributor's Service Area.~~the Regulated Consumers.

(5) **Adjustments** – The amount of any Transition Charge charged to a ~~Retail~~Regulated Consumer and specified as such in an Electricity Invoice shall be determinative of the amount of indebtedness created thereby and owing in respect of such Transition Charge, except to the extent of any manifest calculation error.

(6) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 4 in the same manner and to

[15] Intention is to include bills issued to eligible consumers served by unit sub-metering providers, retailers and the IESO – not just distributors and to address the inclusion of Transition Charges in the paperwork from the IESO to the LDC in a manner that is consistent with the current process of how the IESO bills LDCs.

the same extent as such Electricity Distributor, including the obligation under Article 4 to impose, attribute, charge, bill and invoice the Transition Charges.

~~(7)~~ ~~**IESO Successor** – Any IESO Successor shall be bound by the requirements of Article 4 and shall perform and satisfy all duties and obligations of IESO under Article 4 in the same manner and to the same extent as IESO, including the obligation to calculate and provide notice of Transition Charges.~~

(7) ~~(8)~~ **Appointment of an Alternative Servicer** – If a Replacement Event occurs in respect of any Electricity Distributor, ~~the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Servicer to~~IESO shall perform some or all of the obligations and duties required to be undertaken by such Electricity Distributor under this Article ~~4, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Servicer shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor.~~ 4. Any Electricity Distributor that is replaced under this Section 4(~~8~~7) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in the performance of such obligations and duties to ~~the Alternative Servicer~~IESO and shall take such further actions, including the execution of instruments, necessary to give full and final effect to such transfer and to permit ~~the Alternative Servicer~~IESO or a person designated by IESO to perform such obligations and duties on behalf of the Regulatory Asset Owners.

(8) ~~(9)~~ **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, IESO, the Servicer, Alternative Servicer or any other person who may be authorized to issue Electricity Invoices to ~~Retail~~Regulated Consumers for a failure to impose, attribute, charge, bill or invoice Transition Charges or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

(9) ~~(10)~~ **No Set-Off or Reduction –** No Servicer or Electricity Distributor may set off or reduce (by counterclaim, defence or otherwise) the amount payable by it pursuant to this Article 4.

(10) ~~(11)~~ **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to IESO, any Electricity Distributor or any Alternative Servicer to ensure that Transition Charges are properly charged to ~~Retail~~Regulated Consumers and specified as such in Electricity Invoices.

Article 5 – Collections and Remittances

(1) **Duty to Collect as Agent** – Electricity Distributors or if applicable any Alternative Collection Agent shall, as an agent of the ~~Regulatory Asset Owners~~Servicer, undertake ~~[diligent]~~[commercially reasonable~~]~~[10] efforts to collect amounts owing by ~~Retail~~Regulated Consumers in respect of Transition Charges charged to such ~~Retail~~Regulated

~~[10] Mirror collection "standard of care" under applicable legislation.~~

Consumers in Electricity Invoices issued by the Electricity Distributor or if applicable such Alternative Collection Agent~~.~~, all in accordance with the Regulations. [16]

(2) **Segregation of Transition Charge Collections** – ~~An~~If prescribed, an Electricity Distributor or if applicable any Alternative Collection Agent shall promptly segregate Transition Charge Collections from other payments received by it from ~~Retail~~Regulated Consumers and deposit such Transition Charge Collections into its Regulatory Asset Account.~~11~~[17] Prior to and following a deposit of Transition Charge Collections having been made into its Regulatory Asset Account, the Electricity Distributor or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners~~.~~ or a Pledgee.[18]

(3) **Electricity Distributor Remittances** – On each applicable Remittance Date, an Electricity Distributor shall remit all [Transition Charge Collections received by it from ~~Retail~~Regulated Consumers] [amounts invoiced to it by the IESO on account of Transition Charges][19] in respect of the related Reference Period to or to the account of ~~IESO~~Servicer or if applicable the Alternative Collection Agent.

(4) **Duty to Collect Electricity Distributor Remittances** – ~~IESO~~Servicer or if applicable any Alternative ~~Collection Agent~~Servicer shall, as an agent of the Regulatory Asset Owners, accept and undertake ~~[diligent]~~[commercially reasonable~~]~~ efforts to ~~accept and~~ collect Electricity Distributor Remittances from Electricity Distributors and Transition Charge Collections from ~~Retail~~Regulated Consumers that pay their Electricity Invoices directly to IESO, all in accordance with the Regulations.~~12~~

(5) **Segregation of Electricity Distributor Remittances** – ~~IESO~~Servicer and if applicable the Alternative Collection Agent shall promptly segregate Electricity Distributor Remittances from other payments received or held by it and deposit such Electricity Distributor Remittances into its Regulatory Asset Account. Prior to and following a deposit of Electricity Distributor Remittances having been made into its Regulatory Asset Account, ~~IESO~~Servicer or if applicable any Alternative Collection Agent shall hold such amounts in trust for the Regulatory Asset Owners or any Pledgee.

(6) **~~IESO~~Servicer Remittances** – On each Settlement Date~~13~~[20], ~~IESO and if applicable the Alternative Collection Agent~~Servicer shall remit all amounts on deposit in its Regulatory Asset Account ~~(a) first,~~ to or to the account of the Absolute Assignees an amount equal to the Investment Remittance for the related month~~ and (b) second, to IESO (including by IESO retaining such amount) an amount equal to the lesser of (i) the Maximum IESO Recovery for the related month and (ii) the IESO Retained Interest Amount as of the Settlement Date~~.

[16] Note that the obligation to collect and remit the Transition Charge will be included as a deemed condition of license for electricity distributors (and retailers and unit sub-metering providers).]

~~11~~[17] Consider trying to attach to existing LDC credit enhancements and provide parallel coverage for customer losses.

[18] Consider whether there is a more efficient way to treat collections through the existing LDC/IESO processes. Intention is to provide scope in the Regulations.

[19] Dealer suggestion under consideration. Impact on LDCs and parallel commercial arrangements to be assessed.

~~12 Consider building this obligation into a deemed condition of licence for the IESO.~~

~~13~~[20] Consider frequency of remittances in light of rating requirements. US rating agencies favour daily remittances.

(7) **Successors of Electricity Distributors** – Any successor of an Electricity Distributor shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of such Electricity Distributor under Article 5 in the same manner and to the same extent as such Electricity Distributor, including the obligation under Article 5 to collect Transition Charges and make remittances of Electricity Distributor Remittances.

(8) **IESO ~~Successor~~Successors** – IESO ~~Successor~~Successors shall be bound by the requirements of Article 5 and shall perform and satisfy all duties and obligations of IESO under Article 5 in the same manner and to the same extent as IESO, including the obligation to collect Transition Charge Collections, Electricity Distributor Remittances and to remit IESO Remittances.

(9) **Owners of Distribution Assets** - If any person other than an Electricity Distributor acquires distribution system assets in the Province or invoices or collects electricity distribution rates in the Province~~14~~[21], then such person shall, if requested by the Absolute Assignees, be obligated to act diligently to (a) facilitate the invoicing and collection of any Transition Charges applicable to ~~Retail~~Regulated Consumers ~~in its applicable service area, including all consumers~~ connected to ~~the electricity~~such person's distribution system assets ~~and taking electric delivery service located within such service area~~; (b) allocate partial payments by ~~Retail~~Regulated Consumers as provided in this Act; (c) exercise all enforcement rights of the Absolute Assignees for the benefit of an Absolute Assignee; and (d) remit any Transition Charge Collections to the Absolute Assignees or Pledgees, as applicable, each in accordance with its Investment Interest.

(10) **Absolute Assignees have Standing** – The Absolute Assignees, acting together in accordance with the Collective Action Agreement, may bring actions against any Electricity Distributor, ~~IESO~~Servicer, the Alternative Collection Agent, any owner of electricity distribution system assets in the Province or any other person who may be authorized to collect electricity distribution and use charges from ~~Retail~~Regulated Consumers for a failure to collect Transition Charges, remit or collect Electricity Distributor Remittances or remit IESO Remittances, as and to the extent applicable under Article ~~5.~~5, or to otherwise comply with this Act. Any court of the Province shall have jurisdiction over any actions brought before it by the Absolute Assignees in relation to any such failure and may make any interim or final order it thinks fit in this regard.

~~(11) **Appointment of an Alternative Collection Agent** – If a Replacement Event occurs in respect of any Electricity Distributor or IESO, the Absolute Assignees shall, in accordance with the Collective Rights Agreement, be permitted, by an instrument in writing, to appoint an Alternative Collection Agent to perform some or all of the collection, segregation and remittance obligations otherwise required to be undertaken by such Electricity Distributor or IESO, as applicable, under Article 5, as and to the extent specified in such appointment. Upon acceptance of such appointment, the Alternative Collection Agent shall become obligated to perform such assumed obligations in replacement of such Electricity Distributor or IESO, as applicable. Any Electricity Distributor or IESO, as applicable, that is replaced under this Section 5(11) shall promptly transfer all rights, powers, privileges and property interests in its possession or within its control in, to and over the Regulatory Asset, including its Regulatory Asset Account, to the Alternative Collection Agent and shall take such further actions, including the execution of instruments, necessary to give full and final~~

~~14~~[21] This is in anticipation of a possible future restructuring of the distribution system.

~~effect to such transfer and to permit the Alternative Collection Agent to enforce the Regulatory Asset on behalf of the Absolute Assignees.~~

(11) ~~(12)~~ **No Set-off, etc.** - The Regulatory Asset, including rights in Transition Charges, Transition Charge Collections, and the interests of a Regulatory Asset Owner, an Absolute Assignee and a Pledgee therein, may not be setoff or reduced (including by counterclaim, surcharge or defense) by any ~~Retail~~Regulated Consumer, any Electricity Distributor, ~~IESO~~Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or in connection with any default, bankruptcy, reorganization or other insolvency proceeding of any Electricity Distributor, ~~IESO~~Servicer, Alternative Collection Agent or any owner of distribution system assets in the Province, any affiliate or successor thereof or any other entity or otherwise.[~~15~~22]

(12) ~~(13)~~ **Sequestration** – If any Electricity Distributor, ~~IESO~~Servicer, the Alternative Collection Agent or any owner of distribution system assets in the Province or any other person or entity authorized to collect Transition Charges, defaults on any required remittance of Transition Charge Collections, Electricity Distribution Remittances or IESO Remittances under Article 5, any court in the Province, upon application by and of the Absolute Assignees acting collectively under the Collective Action Agreement and without limiting any other remedies otherwise available to the Absolute Assignees or Pledgees, shall (i) order the sequestration and payment of the Transition Charge Collections, Electricity Distribution Remittances and IESO Remittances, as applicable, for the benefit of the Absolute Assignees, each with respect to its Investment Interest, and the Pledgees as applicable~~.~~[~~16~~] and (ii) appoint a receiver to take control of the amounts sequestered.[23]

(13) ~~(14)~~ **Regulations** – Regulations may be enacted for the purpose of specifying further rights, powers, privileges, duties and obligations that shall apply to ~~IESO~~Servicer, any Electricity Distributor or any Alternative Collection Agent to ensure that rights, interests, entitlements, benefits and proceeds in, to, under and from the Regulatory Asset are of fully realized by some or all of the Absolute Assignees and Pledgees.

Article 6 – The Regulatory Asset[24]

(1) **Composition** – The Regulatory Asset shall constitute a current and irrevocable property right and interest consisting, collectively, of the following rights and interests (without duplication):

a. the right of ~~IESO (i)~~a Regulatory Asset Owner to record its ~~IESO Retained~~Investment Interest in its accounts~~ in accordance with Section 8(1), having a stated amount from time to time equal to the IESO Retained Interest Amount; and (ii) to receive IESO Recoveries from time to time in accordance with Section 5(6)(b)~~;

[~~15~~22] Consider whether it makes sense to create a "deemed collection" payment obligation on Electricity Distributors to the extent a ~~Retail~~Regulated Consumer reduces its payment of Transition Charges, despite this language. Same for Electricity Distributor Remittances and IESO Remittances.

[~~16~~23] Consider adding or substituting this provision for a right to appoint a receiver.

[24] It is anticipated that Investment Interests will only be sold to Financing Entities controlled by OPG. Sales will occur on a negotiated basis, and deal-specific covenants will be included in transaction documents – to supplement these arrangements.

b. the right to impose, bill, invoice, collect and receive Transition Charges from ~~Retail~~Regulated Consumers, including the right to determine the amount of Transition Charges in accordance with this Act;

c. the right to enforce the obligations and indebtedness of each ~~Retail~~Regulated Consumer to pay the Transition Charges charged to the ~~Retail~~Regulated Consumer from time to time in accordance with Article 3, together with all related late payment fees or interest charges arising in respect thereof under the related Electricity Invoices; the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;

~~**d.** the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Servicer to impose, attribute, charge, bill and invoice the Transition Charges in accordance with Article 4;~~

d. ~~**e.**~~ the right to enforce the duties and obligations of each Electricity Distributor and if applicable the Alternative Collection Agent to collect, receive and remit amounts received by it in respect of Transition Charges as Electricity Distributor Remittances to or to the account of ~~IESO~~Servicer or if applicable the Alternative Collection Agent in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by the Electricity Distributor or if applicable the Alternative Collection Agent to recover payment of Transition Charges in accordance with Article 5;

e. ~~**f.**~~ the right to enforce the duties and obligations of ~~IESO~~Servicer and if applicable the Alternative Collection Agent to collect and receive Electricity Distributor Remittances and to remit IESO Remittances to or to the accounts of the Regulatory Asset Owners, each with respect to its respective interest in the Regulatory Asset, in each case in accordance with Article 5, including all collections and the proceeds of any enforcement action undertaken by it to recover payment of Electricity Distributor Remittances in accordance with Article 5;

f. ~~**g.**~~ the right to receive and collect all Transition Charge Collections, all Electricity Distributor Remittances and all IESO Remittances in accordance with Article 5;

g. ~~**h.**~~ all rights and entitlements under each Regulatory Asset Account and all amounts on deposit in any such Regulatory Asset Account;

h. ~~**i.**~~ all Related Rights; and

i. ~~**j.**~~ all revenue, collections, claims, payments, money and proceeds of or derived from the rights described in (a) through (i), regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

A Regulatory Asset and the property rights and interests therein shall exist whether or not Transition Charges have been imposed, charged, invoiced, accrued or collected and

notwithstanding that the imposition, attribution, invoicing and collection of Transition Charges will depend on further actions that may not have occurred. The Regulatory Asset shall continue to exist until all Funding Obligations have been paid in full.

(2) **Validity of Dispositions** – ~~Despite any limitations or restrictions on a~~A Disposition ~~that may arise by contract or by operation of any applicable law of the Province or any consent requirement applicable to a Disposition that may arise by operation of any applicable law of the Province, a Disposition by~~by IESO of its right to recover all or any part of the IESO Funding Shortfall to an Absolute Assignee ~~made under the Financing Plan~~, or a Disposition of all or any part of an Investment Interest by one Absolute Assignee to another Absolute Assignee made under the Financing Plan, shall be permitted and when made shall be valid and enforceable in accordance with the terms of the related Disposition Document and shall be effective to confer upon the Absolute Assignee thereof a valid property right and interest in, to and under ~~the applicable~~IESO's right to recover the IESO Funding Shortfall or the Investment Interest, as applicable (or relevant portion thereof) in accordance with the terms of such Disposition, provided that the parties to the applicable Disposition Document have expressly stated therein that such Disposition is a sale or other absolute transfer. Without limiting the foregoing, any Disposition that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as a true sale and absolute transfer of ~~the Regulatory Asset Owner's applicable~~IESO's right to recover the IESO Funding Shortfall or an Absolute Assignee's right, title~~,~~ and interest in, to and under ~~the Regulatory Asset~~an Investment Interest, as applicable (or relevant portion thereof), and not merely as a Pledge thereof, and upon such Disposition the assigner or seller under the applicable Disposition Document shall retain no right, title or interest in IESO's right to recover the IESO Funding Shortfall or the Investment Interest (or relevant portion thereof) subject to the Disposition, including all rights to recover the IESO Funding Shortfall or under the Investment Interest arising after such Disposition.

(3) **Perfection and Priority of Dispositions** – Any Disposition of an interest in a Regulatory Asset shall be vested, valid, binding and perfected from the time when such Disposition is made. Such Disposition shall be perfected, vested, valid and binding as against the IESO or transferring Regulatory Asset Owner, as applicable, and all other persons who have claims of any kind (whether in tort, contract or otherwise) against IESO or the transferring Regulatory Asset Owner, as the case may be, irrespective of whether such persons have notice of the Disposition and the property rights and interests acquired by the Absolute Assignee under such Disposition shall be free and clear of any liens in favour of such other persons.

(4) **Validity of Pledges** – ~~Despite any limitations or restriction on a Pledge that may arise by contract or by operation of any applicable law of the Province or any consent requirement applicable to a Pledge that may arise by operation of any applicable law of the Province, a~~A Pledge by an Absolute Assignee may be made to secure any ~~related~~ Funding Obligation and when made shall be valid and enforceable in accordance with its terms and shall be effective to confer upon the Pledgee a valid security interest in, to and in respect of the related Investment Interest in accordance with the terms of the Pledge. ~~Other than as required by the Financing Plan, no~~No consent of, or notice to, any person shall be required to give effect to a Pledge made to secure any Funding Obligation.

(5) **Perfection and Priority of Pledges** - For purposes of the *Personal Property Security Act* (the "PPSA"), the Regulatory Asset shall be intangible personal property and any Pledge made by an Absolute Assignee in respect of a Funding Obligation shall, subject to the terms thereof, give rise to a security interest in respect of which the PPSA applies, and may be perfected by filing a financing statement under the PPSA on that basis. All proceeds of a related Investment Interest that are subject to such a Pledge that are received by the Absolute Assignee shall immediately be subject to the such Pledge, and the security interest in such proceeds shall be perfected pursuant to the PPSA.[17][25] A Pledge perfected under the PPSA shall be a continuously perfected security interest and shall have priority over any other lien or security interest, created by operation of law or otherwise, that may attach to the property rights and interests in the Investment Interest subject to the Pledge unless the Pledgee has otherwise agreed in writing. ~~Subject to the terms of the Collective Action Agreement, a~~A Pledgee shall have a perfected security interest in a related Investment Interest, including the Absolute Assignee's rights and interests in and to Transition Charge Collections or other related proceeds in respect of the Investment Interest and that are deposited in any Regulatory Asset Account or other account of any Electricity Distributor, IESO, Alternative Collection Agent or other person who may have commingled such Transition Charge Collections or such other proceeds with other funds. All provisions of the PPSA shall apply to the Regulatory Asset on the basis that it is intangible personal property, except to the extent otherwise provided in this Section 6(5).

(6) **Enforcement of Property Rights** – The rights of any Regulatory Asset Owner or Pledgee to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5.

(7) **Owners of a Specified Portion of the Regulatory Asset** – A Regulatory Asset Owner may effect a Disposition to an Absolute Assignee of a specified portion of its rights and interests in the Regulatory Asset, including by way of a Disposition of a divided or an undivided interest therein as specified in a related Disposition Document~~, in each case under the Financing Plan~~. In no circumstance may the specified portions of the rights and interests in the Regulatory Asset owned by all Regulatory Asset Owners be greater than all of the rights and interests that comprise the Regulatory Asset in the aggregate.

(8) **Collective Action Required** – If a Regulatory Asset Owner's rights and interests in the Regulatory Asset comprises less than the entire property right and interest constituted by the Regulatory Asset, such Regulatory Asset Owner shall only enforce such right and interest on a collective and coordinated basis with each other Regulatory Asset Owner in accordance with the Collective Rights Agreement.

Article 7 – Establishment of the Fair Allocation Plan[18][26]

(1) Adoption of the Fair Allocation Plan – The Delegate may, ~~[~~by written declaration,~~]~~ designate and adopt a Fair Allocation Plan in compliance with Article 7. The Fair

[17][25] Consider whether to simply leave this and have a financing statement be filed under the PPSA. This would normalize the security interest and reduce any adverse suggestion that security would not otherwise arise.

[18][26] The idea is that the Fair Allocation Plan will be set once at the outset based on the principles and parameters described here, all as applied based on information available and the reasonable expectations and discretion of the delegate at such time. If the expectations are not fulfilled (e.g., generators may choose to retire their facilities at the end of their current procurement contracts and not invest in extending service lives to secure further procurement contracts), the Fair Allocation Plan will be unaffected, unless it is specifically amended (assuming amendments will be permitted by the legislation).

Allocation Plan so designated and adopted shall be the Fair Allocation Plan for all purposes of this Act, except if amended, amended and restated or terminated by a further written declaration made by the Delegate in compliance with ~~Section 7(4).~~[the Regulations].

(2) Principles and Parameters – A Fair Allocation Plan shall seek to allocate Future Fair Share of Green Transition Benefits across present and future ~~Retail Consumer Groups~~Regulated Consumers on a basis that the Delegate, in its sole and absolute discretion, determines to be equitable, having regard to the following principles and parameters:

1. Future Fair Share of Green Transition Benefits should be allocated over the period ending on the Program End Date.

2. The Fair Allocation Plan should specify the Reference Periods for the purpose of identifying applicable ~~Retail~~Regulated Consumer Groups and allocating Future Fair Share of Green Transition Benefits among them on a relative basis over time.

3. The share of Future Fair Share of Green Transition Benefits allocable to a particular ~~Retail~~Regulated Consumer ~~Group~~ in respect of a Reference Period should be proportionate to a reasonable assessment of the benefits of the Green Generation Initiative to ~~the Retail~~such Regulated Consumer ~~Group~~ over such Reference Period~~.~~, other than in exceptional circumstances.

4. The share of Future Fair Share of Green Transition Benefits to be allocated to a ~~Retail~~Regulated Consumer Group and any future ~~Retail~~Regulated Consumer Group at a particular time should not exceed the Estimated Future Green Transition Benefits, measured in respect of the Reference Periods following such particular time and to the Program End Date.

5. No future ~~Retail~~Regulated Consumer Group should be allocated an unreasonably disproportionate share of Estimated Future Green Transition Benefits. Except in exceptional circumstances or in the case of any reallocation of an Over-Assessed Amount as contemplated in 7, below, the Future Fair Share of Green Transition Benefits to be allocated under a Fair Allocation Plan to any future ~~Retail~~Regulated Consumer Group should have regard to *[Insert formula if a year-over-year maximum amount is determined to be appropriate]*.

6. The time value of money should be reflected in the Fair Allocation Plan, in order to equate the relative values of the nominal allocations of Future Fair Share of Green Transition Benefits, calculated in current dollars, to future ~~Retail~~Regulated Consumer Groups over time.

7. To the extent there has been an Over-Assessed Amount, the Fair Allocation Plan may determine that an adjustment should fairly be made to rebate ~~Retail~~Regulated Consumers for such an amount, by reducing the costs otherwise attributable under the Act to such ~~Retail~~Regulated Consumers. The relative costs of the Green Generation Initiative are reflected under the Act by the attribution of Transition Charges to such Consumer Groups, based on the Financing Plan seeking to track the allocations of benefits under the Fair

Allocation Plan. Accordingly, the Maximum Transition Charge Amount determined for one or more ~~Retail~~Regulated Consumer Groups having regard to the Fair Allocation Plan otherwise applicable may be appropriately reduced to recognize the effect of the Over-Assessed Amount. In such a case, a determination to reduce the Maximum Transition Charge Amount applicable for certain related Reference Periods should have regard to the principle that the corresponding rebate should be extended to benefit the Consumer Group or Consumer Groups in closest proximity to the Legislative Implementation Date.

(3) Attribution Methodology – The Fair Allocation Plan shall specify the Attribution Methodology for the purposes of allocating the Period ~~Transition~~Finance Charges across the ~~Retail~~Regulated Consumers~~ of a particular Retail Consumer Group~~. The Attribution Methodology shall result in an attribution of such Transition Charges that is considered by the Delegate to be equitable, and may have regard to such principles and parameters as may be further set forth in a Regulation; provided that the Attribution Methodology shall not be used to limit the recovery of Transition Charges.

(4) Amendments of the Fair Allocation Plan – The Fair Allocation Plan may be amended, amended and restated or terminated by the Delegate, provided that such amendment, amendment and restatement or termination shall (a) not be inconsistent with the principles and parameters set forth in (2) or (3), above, or the Regulation~~ and~~, (b) comply with any restrictions or limitations specified with respect thereto in any Funding Obligation~~.~~, and (c) not impair any Regulatory Asset, outstanding Funding Obligations or any Transition Charges.[27]

Article 8 – The IESO ~~Retained Interest~~Funding Shortfall

(1) Recording of IESO Funding Shortfall – Subject to 8(3), IESO will record any IESO Funding Shortfall [in its books] [in a variance account established in accordance with section 25.33 of the Electricity Act / Ontario Regulation 430/04, as amended].

(2) ~~(1) Maintain Books of Account~~ ~~– IESO may maintain books of account to record the IESO Retained Interest~~**Adjustments** – IESO will record it [its books][its variance account] all adjustments to the IESO Regulatory Asset Amount ~~and all adjustments thereto~~ from time to time. Such books of account shall be determinative with respect to the amount of IESO's related regulatory asset.

(3) ~~(2)~~ Limitation on Additions – Subject to 8(3), IESO shall not record additions to the IESO ~~Retained Interest~~ Regulatory Asset Amount in respect of IESO Funding Shortfalls (a) if such additions are restricted by the terms of any Disposition Document or the Collective Action Agreement, or (b) on or after •, 2017.

(4) ~~(3)~~ Dispositions – IESO may effect a Disposition of its right to recover all or any part of the IESO Regulatory Asset Amount to an Absolute Assignee if (a) the Absolute Assignee has or will concurrently become bound by the Collective Rights Agreement; (b) the Disposition is effected pursuant to a Disposition Agreement duly executed by IESO; and (c) the Financial Services ~~Agent~~Manager confirms in writing that the Disposition complies with any restrictions or limitations specified with respect thereto in any documents evidencing the Funding Obligations and is permitted under the Financing

[27] It is anticipated that the terms of any rated financing will restrict further issuances pending a RAC in relation to any changes to the FAP.

Plan~~; and (d) the net proceeds payable to IESO from the sale of the related Investment Interest would not exceed the IESO Retained Interest Amount immediately before the time of such Disposition~~.

(5) ~~(4)~~ **No Continuing Interest in any Investment Interest** – IESO shall have no continuing right or interest in ~~any Investment Interest~~, or maintain any right to recover all or any part of, any IESO Regulatory Asset Amount that is subject to a Disposition effected by IESO under a Disposition Document to which IESO is a party ~~and IESO shall not assert any such right or interest or take or omit to take any action to exercise or enforce its rights or interests under the IESO Retained Interest if such action or omission would impede or obstruct the rights of any Absolute Assignee or a Pledgee to enforce its rights and interests in any Investment Interest, except if IESO is expressly permitted to take or omit to take such action, respectively, under the related Disposition Document or the Collective Rights Agreement~~.

~~(5) **IESO Financing Costs** – IESO shall be entitled in good faith to incur reasonable financing costs (including interest and other reasonable financing charges) reflecting market terms and conditions and which are payable in arrears, in order to finance its ownership of the IESO Retained Interest from time to time.~~

(6) IESO Recoveries – IESO shall, in respect of a month, be entitled to receive from IESO Remittances on a related Settlement Date the amount (if any) ~~available to~~of any IESO ~~under Section 5(6)(b)~~Recoveries.

Article 9 – The Financing Plan

(1) Power to Prepare, Implement and Amend the Financing Plan – The Financial Services ~~Agent~~Manager shall be authorized to prepare, implement and amend a financing plan [for the Financing ~~Plan. If the Financial Services Agent is unwilling or unable to prepare~~Entities] and propose the adoption of such financing plan as the Financing Plan~~, the Delegate may by written declaration designate one or more other persons who shall be authorized to prepare, implement and amend the Financing Plan.~~ for the purposes of this Act. [The Financial Services Manager shall have the right to withdraw its financing plan as the Financing Plan at any time if it determines that implementing the Financing Plan in such manner would not be in the best interests of a Financing Entity.]

(2) ~~Terms~~Principles and ~~Conditions~~Parameters of the Financing Plan – The Financing Plan shall establish the basis for each Absolute Assignee's funding decisions~~. The Financing Plan shall have~~, having regard to the principles and parameters set forth in Schedule ~~3 and such other conditions and requirements as may be specified in a written declaration of the Delegate or in accordance with the Regulation.~~3.

(3) OEB Approval – [Any Additional Funding Charge payable to ~~or for the benefit of~~the Financial Services Manager in respect of services provided by the Financial Services ~~Agent~~Manager (other than third party costs) shall be subject to review and approval by the OEB.][28]

(4) ~~OEB~~ Review of Financing Plan – The [OEB ~~[~~shall~~]~~ undertake an annual review of the records maintained by the Financial Services ~~Agent~~Manager for the purpose of

[28] Under consideration.

confirming that the Funding Obligations incurred and the Finance Amounts paid by or on behalf of the Absolute Assignees were incurred and paid, respectively, in material conformity with the Financing Plan.][29]

(5) Replacement of the ~~Administrative Agent~~Financial Services Manager – If the OEB identifies deficiencies or makes recommendations in its review under Section 9(4), the ~~Administrative Agent~~Financial Services Manager shall take reasonable measures to remedy such deficiencies if remediable, and shall in any event have regard to the recommendations of the OEB in relation to further actions undertaken by the Financial Services ~~Agent~~Manager under the Financing Plan. If the Financial Services ~~Agent~~Manager is unwilling or unable to reflect such recommendations in relation to such further actions, the Delegate may by written declaration designate one or more other persons who shall thereafter become the Financial Services~~.~~ Manager. [Any replacement financial services manager must comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations.]

(6) Obligation to Apply IESO Remittances – The Financial Services ~~Agent~~Manager shall ensure that amounts transferred to it [under Article 5, as agent for and on behalf of the Absolute Assignees], or otherwise in respect of or as proceeds from an applicable Investment Interest shall only be applied or used to pay related Finance Amounts when they are due and payable and for no other purpose.

(7) Non-Recourse – The Financing Plan shall be implemented so that Funding Obligations incurred shall be without recourse to or to any assets of the Electricity Distributors, IESO, any Alternative Servicer, any Alternative Collection Agent, the Financial Services ~~Agent~~Manager, the OEB~~, the Province or the Lieutenant Governor in Council~~ or Her Majesty in right of Ontario, other than if and to the extent that such persons or entities are liable for the performance of obligations or duties arising under this Act or expressly agree to become liable pursuant to any Funding Obligation or obligation in relation to a Finance Amount. ~~[All Funding Obligations shall contain a statement to the following effect: "Neither the full faith and credit nor the taxing power of the Province of Ontario is pledged to the payment of the principal of, or interest on, this [obligation].]~~

(8) Incurrences are Binding – ~~Notwithstanding anything to the contrary in this Act, each~~Each Disposition made to or by an Absolute Assignee ~~and~~, all amounts payable or becoming due and payable by or on behalf of an Absolute Assignee under or in connection with any obligation purporting to be a Funding Obligation and each Pledge entered into by an Absolute Assignee, shall be valid and binding ~~for the purposes of this Act~~, including in determining the amount of related Transition Charges, ~~despite~~notwithstanding any ~~impairment or defect resulting from such failure~~defect in the manner of incurrence or any inconsistency with the Fair Allocation Plan or the Financing Plan.

[Article 10 – Compliance Matters~~19~~30

[29] Under consideration.

~~19~~30 As noted above, the outcome of any regulatory action undertaken by the OEB will not affect Funding Obligations that have been incurred under the Financing Plan. This Article and any potential role for the Auditor General is still under consideration.

(1) Right of the [OEB] to Inspect Books and Records - For the purpose of investigating compliance with the provisions of this Act, the OEB shall have the right, jurisdiction, power and authority to examine the books and records of *[Insert names if any]*.

(2) [OPG's Rate Settings – When setting other rates for or in respect of OPG, the OEB shall not take into account (a) the administrative or servicing fees charged by OPG as Financial Services ~~Agent~~Manager [in excess of the actual incremental costs incurred by such person of providing administrative or servicing services]; (b) the cost consequences to OPG of being the Financial Services ~~Agent~~Manager; or (c) the consequence of OPG consolidating the assets and liabilities of any Financing Entity for OPG's accounting purposes, in each case in setting any regulated payment amounts for OPG.]~~20~~31

Article 11 – Undertaking of the ~~Lieutenant Governor in Council~~[21]Her Majesty in right of Ontario[32]

(1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – ~~The [Lieutenant Governor in Council]~~Her Majesty in right of Ontario shall not in any way take or permit (including by any agency or administrative body) any action to reduce, impair, postpone or terminate the obligation of ~~Retail~~Regulated Consumers to pay Transition Charges or to impair the Regulatory Asset or the collection or recovery of Transition Charge Collections, Electricity Distributor Remittances or IESO Remittances, either directly or indirectly, including through the introduction of any bill or the passing of any legislation or regulation having such effect. The amount of Transition Charges determined under this Act shall not be subject in any way to reduction, impairment, postponement or termination as a result of any action taken or failure by ~~the Lieutenant Governor in Council~~Her Majesty in right of Ontario (including by any agency or administrative body), including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(2) Undertaking and Agreement – ~~The [Lieutenant Governor in Council]~~Her Majesty in right of Ontario shall not:

(a) in any way take or permit any action that limits, alters or impairs the value of any Investment Interest;

(b) except as required by the estimates and adjustments made in determining the True-up Amount, reduce, alter or impair Transition Charges that are imposed, billed, invoiced, collected and remitted for the benefit of the Absolute Assignees or any Pledgee from time to time;

~~20~~31 As an alternative to this provision, consider clarifying under s. 78.1(4) of the OEB Act (which currently gives the OEB discretion in setting payment amounts subject to O. Reg. 53/05) that the OEB in setting OPG payment amounts for prescribed generation shall not consider OPG's role as ~~Administrative Agent~~Financial Services Manager of any Financing Entities associated with the Fair Hydro initiative, perhaps with the exception of any operating fees that may be received by OPG for performing that role.

~~21~~32 Under consideration, including the dealers' request for (1) a "servicer guarantee" ~~and~~(2) a "contractual guarantee" to address a "Change of Law" or if all or a portion of the legislation is *ultra vires*, requiring (at the lenders option), the Province to pay principal and interest on the outstanding debt until maturity or payout the entire debt including any make-wholes and (3) in the event of a market disruption that renders it impossible to refinance debt when required (or where financing of amounts required to service the debt is not available because of a market disruption where the Financing Entity was relying on such further issuance of debt until the recovery is set to begin to fund interest), a covenant by the Province to step in and payout the debt or to recover the debt from ratepayers as it becomes due, notwithstanding the intended Fair Adjustment.

(c) permit the amendment, amendment and restatement or termination of the Fair Allocation Plan if such amendment , amendment and restatement or termination would adversely affect the validity or enforceability of any Funding Obligation or the rights of an Absolute Assignee or Pledgee thereunder, or would not otherwise comply with the restrictions and limitations specified in the documents evidencing the Funding Obligations,

in each case including through the introduction of any bill or the passing of any legislation or regulation having such effect.

(3) **Successor IESO** – If IESO is restructured, dissolved or becomes insolvent or is otherwise incapable of performing its obligations under this Act, an IESO Successor ~~IESO~~ shall immediately be established by Her Majesty in right of Ontario to perform such obligations.

(4) **Compensation for Failure** – Absolute Assignees shall be compensated by Her Majesty in right of Ontario for any losses suffered by them as a result of any failure by ~~the Lieutenant Governor in Council~~Her Majesty in right of Ontario to comply with its undertakings and agreements in this Article ~~11.[22]~~11.[33]

(5) **No Wind-up of Financing Entity**. No Financing Entity may be voluntarily wound up, liquidated or dissolved until one year after all of its Funding Obligations are repaid.

(6) **References to the Undertaking and Agreement** – Any non-confidential reference to the Undertaking of the ~~Lieutenant Governor in Council~~Her Majesty in right of Ontario, including in marketing materials and other documentation authorized for use by the Administrative in connection with any Funding Obligation, may be made provided that [*Add conditions to protect the Province*].

Article 12 – Regulations

Regulations may be made under this Act for the purposes described in Sections •,•,• and • and may be promulgated for any of the following purposes:

(a) to set standards and measures regarding the commercially reasonable requirements of the Province associated with an Absolute Assignee incurring Funding Obligations or becoming obligated to pay any Finance Amount, including to establish guidelines regarding all-in funding costs; permitted Additional Funding Charges; required maturities and redemption and termination rights of Funding Obligations; liquidity requirements, in each case to a Financing Plan that is consistent in its effect with the Fair Allocation Plan;

(b) to establish and empower one or more regulated entities to undertake decision-making activities with respect to this Act;

(c) to set out reasonable requirements regarding the appointment or retention of advisors, agents, service providers, contract counterparties, including in relation to 'market terms and conditions' parameters;

[22][33] Requested by ~~Torys~~Dealers. For discussion.

(d) to provide for audit and compliance standards applicable to those persons who are or may become obligated or have duties that arise under this Act [or under any Funding Obligation];

(e) to provide for any pre-vetting and approval requirements in relation to any incurrence by an Absolute Assignee of any Funding Obligation or obligation to pay any Finance Amount; and

(f) to provide for appeal and due process considerations in connection with the establishment, adoption, implementation and review of the Fair Allocation Plan or the Financing Plan.

Article 13- Miscellaneous[2334]

(1) **Choice of law** – The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the Regulatory Asset, any Transition Charge or the Undertaking of the Province shall be the laws of the Province.

(2) **Conflict of law** – In the event of conflict between this Act and any other law of the Province regarding the attachment, assignment or perfection, or the effect of perfection, or priority of any Disposition or Pledge, this Act shall govern to the extent of the conflict.

(3) **No further acts or approvals required** - Notwithstanding any provisions of any law of the Province to the contrary, no approvals, notices or authorizations other than those specified in this Act shall be required with respect to the actions to be taken in compliance with this Act, including under the Financing Plan or in relation to the establishment of the Fair Allocation Plan, and the transactions and contracts authorized in or contemplated by this Act or the Financing Plan, including the incurrence of any Funding Obligation, any Disposition, any Pledge or in the payment and performance of any attendant or incidental contract and any related expenses incurred to facilitate the preparation and implementation of the Financing Plan.

(4) **Effect of invalidity after the Incurrence of any Funding Obligation** - Effective on the date that a Funding Obligation is incurred under this Act, if any provision of this Act is held to be invalid or is invalidated, superseded, replaced, repealed or expires for any reason, that occurrence shall not affect any action allowed under this Act that is taken by any person who is or may become obligated or have duties that arise under this Act and any such action shall remain in full force and effect.

(5) **Severability** - If any Article, Section, paragraph or subparagraph of this Act or the application thereof to any person, circumstance or transaction is held by a court of competent jurisdiction to be unconstitutional or invalid, the unconstitutionality or invalidity shall not affect the constitutionality or validity of any other Article, Section, paragraph or subparagraph of this act or its application or validity to any person, circumstance or transaction, including the irrevocability of Transition Charges, the validity of the Regulatory Asset, the incurrence of any Funding Obligation, any Disposition, any Pledge, or the collection and recovery of Transition Charge Collections. To these ends, the Legislature hereby declares that the provisions of this Act are intended to be severable and that the Legislature would have enacted this Act even if any Article,

[2334] OPG would like the specific amendments related to OPG to be included in the Bill.]

Section, paragraph or subparagraph of this Act held to be unconstitutional or invalid had not been included in this Act.

Schedule 1

Guidelines for Estimates

[To be considered.]

Schedule 2

Requirements Applicable to Alternative Invoicing Agent/ Alternative Collection Agent

[To be considered.]

Schedule 3[24]

Principles and Parameters for Establishing the Financing Plan

The following principles and parameters provide a guideline as to what a Financing Plan should address:

(1) in respect of each Reference Period, make reference to the allocations of Future Fair Share of Green Transition Benefits to each Reference Group contemplated by the Fair Allocation Plan;

(2) estimate IESO Funding Shortfalls for each Reference Period;

(3) consider alternative funding arrangements suitable to fund the estimated IESO Funding Shortfalls, including short term and/or long term Funding Obligations;

(4) ~~(9)~~ consider quantities, maturities, payment obligations, prepayment or redemption rights and such other features of Funding Obligations so that payments made for a Reference Period reasonably correspond to the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

(5) ~~(4)~~ if the anticipated amount of any Repayment (together with payments of other Finance Amounts) to be made in respect of a Reference Period would materially exceed the allocation of the costs and benefits of the Green Generation Initiative to the applicable ~~Retail Consumer Group~~Regulated Consumers under the then current Fair Allocation Plan, diligent efforts should be made to determine whether a Refinancing or deferral of such Repayment may be reasonably and cost-effectively effected based on then prevailing market terms, conditions an circumstances;

(6) ~~(5)~~ reflect the assumptions and requirements specified in any contemplated Funding Obligation (e.g., any limit on the maximum amount of Transition Charges charged to a hypothetical ~~Retail~~Regulated Consumer relative to his or her monthly electricity bill, as prescribed by any rating agency that ascribes its credit rating to or in respect of the Funding Obligation ~~having regard to the application of the Allocation Methodology~~);

(7) require the Financial Services Manager, for and on behalf of each Regulatory Asset Owner, to use [diligent efforts to manage Finance Amounts to be borne by Ratepayers];

(8) include a proposal regarding the compensation of the Financial Services Manager that reflects market terms and conditions; and

(9) [require that the Financial Services Manager report annually to the Ministry of Energy on the operation of the Financing Plan including, in particular, with respect to the amount and terms of the Funding Obligations incurred and the sufficiency of such Funding

[24] ~~Awaiting input from Torys based on OPG mark-up of Financing Plan sections.~~

Obligations for the purpose of funding the estimated Funding Shortfalls in accordance with the Fair Allocation Plan.]

(10) ~~**(6)**~~ incur Funding Obligations from time to time on the best terms available at such time for a financing transaction of the size and type contemplated, and having regarding to the following parameters:

a. whether the Absolute Assignees will require committed access to short term liquidity to cover estimated IESO Funding Shortfalls prior to incurring fixed term Funding Obligations, and the amount and repayment terms of any such required liquidity; provided that any Repayment required to be made under the terms of such short-term liquidity would not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

b. the basis upon which the Financial Services Agent will select the term to maturity of any other Funding Obligations; provided that any Repayments required to be made under the terms of such Funding Obligations should not obligate an Absolute Assignee to repay an amount in relation to a Reference Period that would have the effect of the Financing Plan permitting incurrences of Funding Obligations payable in such Reference Period that would exceed the allocations of Future Fair Share of Green Transition Benefits to the applicable Reference Group under the Fair Allocation Plan;

c. the basis upon which the interest rates applicable to such Funding Obligations would be determined;

d. the reference capital or finance market in which such Funding Obligation would be incurred, including markets outside of Canada if considered by the Financial Services Agent to be appropriate in the circumstances;

e. the currency of payments under such Funding Obligations and, if the Funding Obligations are denominated in a currency other than Canadian dollars, the basis upon which the Financial Services Agent shall cause the applicable Absolute Assignee to enter into hedging transactions to mitigate currency risk, including acceptable minimum and maximum coverage levels, having regard to the availability of related derivatives having notional amounts corresponding to the repayment and maturity profile of such Funding Obligations;

f. the basis upon which the Financial Services Agent will select counterparties under any transaction to be entered into by an Absolute Assignee, including any paying agent, servicer, cash manager, liquidity provider, hedge counterparty, account bank, lender, note trustee, security trustee, paying agent, registrar/transfer agent, financial services agent, arranger or manager;

g. the basis upon which the Financial Services Agent will manage counterparty risk, including by providing for maximum counterparty exposure limits having regard to concentration, credit and other identified risks with respect to individual counterparties or countries;

h. the basis upon which the Financial Services Agent will negotiate and settle Finance Amounts, including the amount of any Redemption Amounts, Finance Reserve Deposits and Additional Funding Charges;

(11) ~~(7)~~ the basis upon which Funding Obligations may be redeemed, prepaid, repurchased or otherwise affected, having regard for the need to minimize debt service charges and other Funding Costs, and the need to maintain a stable funding platform to finance the IESO Funding Shortfalls from time to time on a basis that is consistent with the allocations of Future Fair Share of Green Transition Benefits to applicable Reference Groups under the Fair Allocation Plan;

(12) ~~(8)~~ the basis upon which any Repayments, Funding Costs and Redemption Amounts will be paid, including any defeasance, sinking fund or through other reserves or liquidity facilities;

(13) ~~(9)~~ the basis upon which fees, charges, expenses, costs, indemnities, reimbursements and other amounts payable to or for the benefit of the Financial Services Agent and other agents and service providers to the Absolute Assignees may be determined, allocated and paid;

(14) ~~(10)~~ the timing and basis upon which Finance Reserve Deposits and Finance Reserve Withdrawals may be made;

(15) ~~(11)~~ the basis upon which any obligations for any other Additional Funding Charges may be incurred and paid;

(16) ~~(12)~~ the basis upon which the cash flows arising from time to time or otherwise derived from the Regulatory Asset may otherwise be applied, including in relation to any counterparty enforcement and realization scenario;

(17) ~~(13)~~ the transmittal to [the IESO] of information related to the amounts to be included in the determination of the Period Transition Charge for a Reference Period;

(18) ~~(14)~~ the basis upon which any Disposition may be made or effected by an Absolute Assignee, including parameters for determining the purchase price for the interest in the Regulatory Asset that is the subject matter of such Disposition, and any consents and releases that may be usefully obtained in connection with such Disposition;

(19) ~~(15)~~ describe the requirements applicable to any special purchase entity that will purchase an Investment Interest, including proposed capitalization, governance, and restrictions on their powers and activities; and

(20) ~~(16)~~ the basis on which any Pledge may be given or effected.

[NTD: E&Y will need to see the guidelines of the Fair Allocation Plan set in reference to parameters that will allow it to establish a modeling curve]

- [**Inflation period**: (between November 2017 – and April 2022) bill increases need to be capped at inflation (assumed at 2% for modeling purposes)]
- [**Transition Period**: (May 2022- April 2027) bills increased at a consistent rate which is set so that the borrowing will not exceed the Trust's capacity, which is determined by the Finance Service Manager]
- [**Amortization Period**: (May 2027-April 2047) equitable distribution of Finance Amount among Regulated Consumers]

Hi Lee Anne,

Not sure if you've seen this already, but I've included a link to the recently released Long Term Energy Plan. Chapter 1 will be of the most interest.

https://www.ontario.ca/document/2017-long-term-energy-plan

Cheers,
Mark

Potential discussion with FAO (request for availability confirmation - May 17, after 2 pm).rtf

Kim/Michel,

I understand that a call/meeting is being contemplated for tomorrow afternoon with staff from the FAO to discuss accounting for the FHP. The primary purpose for the meeting is to help the FAO staff to better understand the accounting elements of the GA Refinancing structure to help them as they finalize a report on the topic.

I have been asked to confirm your availability for a 1 hour meeting/call tomorrow afternoon after 2 pm.

Thanks in advance.

Nadine

QUESTIONS_ RFS Complex Accounting Services - RFS Number TBS-OTB-OPCD-16.rtf

From: Foster, Rob A [RAFoster@kpmg.ca]
To: Virani, Shyrose (TBS) [Shyrose.Virani@ontario.ca]
CC: Picard, Michel [mpicard@kpmg.ca]
Subject: QUESTIONS: RFS Complex Accounting Services - RFS Number TBS-OTB-OPCD-16
Date: Wednesday, August 03, 2016 14:38:05

Shyrose,

On behalf of Michel Picard, Lead Partner, please find attached our questions regarding **RFS number TBS-OTB-OPCD-16**.

1. Can you provide clarification on the following wording. On page 22 of the RFS where there is mention of "One (1) Senior **Accountant** shall provide 250 working days…" in all other instances the reference is to a "Senior **Advisor**". Should we use "Advisor" going forward?

2. With respect to pricing, the pricing schedule to the RFP specifically notes the following: "One (1) Senior Accountant shall provide 250 working days of effort over the term of the agreement. The consultant shall provide all deliverable as described in Section 1.5 Client Requirements." Elsewhere in the tender the Province requests a team of resources.

Could the Province please clarify how the Pricing schedule should be completed, and if a team of resources is provided, how the 250 days should be allocated?

3. Section 1.3, Background Information, specifies with respect to qualifications and experience of Vendor personnel to undertake the specified deliverables, that the Province requires:

A professional accounting license with knowledge and experience with in providing advice to large public sector organizations related to:

a. Public Sector Accounting Board (PSAB) and government not-for-profit (GNFP) standards for accounting and financial reporting as established by the Canadian Institute of Chartered Accountants
b. International Public Sector Accounting Standards Board (IPSASB) standards
c. International Financial Reporting Standards (IFRS) and US GAAP, including their application to public sector organizations (GBEs and OGOs).

Could the Province please clarify if this knowledge and experience is to be evaluated for each team member resource, or at the firm level?

Thank you,

Rob

Question re_ PS 3420.rtf

From: Petsche, Nadine (TBS) []
To: Suzie Gignac (suzie.r.gignac@ca.ey.com) [suzie.r.gignac@ca.ey.com]; LeeAnne.Probert@ca.ey.com [LeeAnne.Probert@ca.ey.com]
CC: Blake Langill (blake.w.langill@ca.ey.com) [blake.w.langill@ca.ey.com]; Veinot, Cindy (TBS) [Cindy.Veinot@ontario.ca]
Subject: Question re: PS 3420
Date: Monday, April 17, 2017 19:28:07

Suzie/Lee Anne,

For our next call, we would appreciate your thoughts on the potential application of PS 3420, Inter-entity Transactions, to the transaction envisioned between the IESO and OPG. As you know, the discussion continues to focus on rate-regulated accounting for IESO and recognition of an intangible asset for OPG; however, we thought it would be prudent to consider other relevant accounting standards and their potential impact on the overall accounting treatment on the Province's CFS.

Thanks.

Nadine

Subject: RE: Questions

Hi Bailey,

Hope all is well ... the calculations outlined below are consistent with what we are carrying/forecasting. On the latter question, the answer is yes, the 53.55% should be referenced as common shares.

Hope this helps. Let me know if you want to have a check-in around mid-January to discuss any outstanding items and confirm a timeframe to bring this home.

Much appreciated ... happy holidays!
Mark

Cc: Picard, Michel
Subject: RE: Questions

Hi Mark

Thanks very much for sharing this additional information for our H1 analysis. I just wanted to clarify the document that you provided which outlined the percentage of share ownership for the Province in H1. Based on our calculations, we estimate the Province's ownership interest at 47.3% at March 31st 2018 after distributions for the long term incentive plan, the

Power Workers Union, and potential distributions to First Nation's from the Province's holdings. We have made a number of assumptions for 2019 regarding incentive plan distributions, which would bring the ownership percentage to 42.2%. Does this match your understanding of the Province's position, or are there alternative assumptions we should reflect? The document "Institutional Share Ownership and 3Q17 Buyers/Sellers" references the top 20 institutional investors as having a 53.55% of the shares. Should this be read as 53.55% of total publically owned common shares?

[cid:image001.png@01D38967.B6CB4D10]

Many thanks

Bailey

From: Picard, Michel [mailto:mpicard@kpmg.ca]
Sent: October 11, 2017 3:25 PM
To: Veinot, Cindy (TBS)
Cc: Church, Bailey J
Subject: Questions

Hi Cindy,

Subsequent to our call of last Thursday, we have the following questions for you.

Questions to be asked of H1 by the Province

1. KPMG would like to obtain a listing of major Hydro One common shareholders. Could investor relations please provide a listing of the top 20 common shareholders? See attached.
2. What process is followed by investor relations to verify that no investor other than the Province of Ontario accumulates a common share position in excess of 10%? Hydro One does not track ownership levels

Questions for the Province

3. During our Thursday meeting we had discussed the question of when voting rights would be granted on common shares provided to First Nations. First Nations in Ontario will obtain up to 15 million common shares directly from the Province's existing share ownership, subject to an agreement in principle pending ratification by affected First Nations. We understand that the share purchases will be financed by loans from the Province, for which the underlying Hydro One shares will serve as collateral. We would like to clarify if the First Nations receive full voting rights on the common shares at the time of transfer, or only upon repayment of the loan from the Province.

Voting rights are immediate, and are not linked to repayment of the loan.

4. Are there any further documents which support the Province's role in establishing the mission of Hydro One prior to the IPO, beyond what is established in the Electricity Act? What do the constating documents include?

We have attached the articles of incorporation and bylaws. Torys has advised that OBCA corporations do not typically include a mission statement in these documents however in Hydro One's case, the Governance Agreement includes key provisions regarding how the company is governed and is relevant. As well, the initial board of directors (which sets strategy and continues to have the same composition today) was appointed by the Province.

Torys has also dug up some previous notes that were developed at the time of the IPO to advise on accounting/consolidation/control in case its helpful, and are happy to help if there's any follow ups on these items.

Best regards,

Subject: RE: Questions

Hi Bailey,

Hope all is well ... the calculations outlined below are consistent with what we are carrying/forecasting. On the latter question, the answer is yes, the 53.55% should be referenced as common shares.

Hope this helps. Let me know if you want to have a check-in around mid-January to discuss any outstanding items and confirm a timeframe to bring this home.

Much appreciated ... happy holidays!
Mark

Subject: RE: Questions

Hi Mark

Thanks very much for sharing this additional information for our H1 analysis. I just wanted to clarify the document that you provided which outlined the percentage of share ownership for the Province in H1. Based on our calculations, we estimate the Province's ownership interest at 47.3% at March 31st 2018 after distributions for the long term incentive plan, the Power Workers Union, and potential distributions to First Nation's from the Province's holdings. We have made a number of

assumptions for 2019 regarding incentive plan distributions, which would bring the ownership percentage to 42.2%. Does this match your understanding of the Province's position, or are there alternative assumptions we should reflect? The document "Institutional Share Ownership and 3Q17 Buyers/Sellers" references the top 20 institutional investors as having a 53.55% of the shares. Should this be read as 53.55% of total publically owned common shares?

[cid:image001.png@01D38967.B6CB4D10]

Many thanks

Bailey

To: Veinot, Cindy (TBS)
Cc: Church, Bailey J
Subject: Questions

Hi Cindy,

Subsequent to our call of last Thursday, we have the following questions for you.

Questions to be asked of H1 by the Province

1. KPMG would like to obtain a listing of major Hydro One common shareholders. Could investor relations please provide a listing of the top 20 common shareholders? See attached.
2. What process is followed by investor relations to verify that no investor other than the Province of Ontario accumulates a common share position in excess of 10%? Hydro One does not track ownership levels

Questions for the Province

3. During our Thursday meeting we had discussed the question of when voting rights would be granted on common shares provided to First Nations. First Nations in Ontario will obtain up to 15 million common shares directly from the Province's existing share ownership, subject to an agreement in principle pending ratification by affected First Nations. We understand that the share purchases will be financed by loans from the Province, for which the underlying Hydro One shares will serve as collateral. We would like to clarify if the First Nations receive full voting rights on the common shares at the time of transfer, or only upon repayment of the loan from the Province.

Voting rights are immediate, and are not linked to repayment of the loan.

4. Are there any further documents which support the Province's role in establishing the mission of Hydro One prior to the IPO, beyond what is established in the Electricity Act? What do the constating documents include?

We have attached the articles of incorporation and bylaws. Torys has advised that OBCA corporations do not typically include a mission statement in these documents however in Hydro One's case, the Governance Agreement includes key provisions regarding how the company is governed and is relevant. As well, the initial board of directors (which sets strategy and continues to have the same composition today) was appointed by the Province.

Torys has also dug up some previous notes that were developed at the time of the IPO to advise on accounting/consolidation/control in case its helpful, and are happy to help if there's any follow ups on these items.

Best regards,

Michel Picard, CPA, CA

Stephen,

I am attaching our revised version of the draft legislation, together with a blackline against the last version that you circulated to this group. It is being circulated to OPG at the same time as everyone else and so remains subject to their comments. Also, this draft reflects input that we received from the Dealers and their counsel although they too will be receiving our revised draft without having seen an earlier version.

Subject: "Fair" Legislation (Discussion Draft)

Thanks for your comments, Michael. The attached version picks up many of your, Peter's and H&W's comments. In some cases it defers consideration, pending dealer input (such as your suggestion of tracking individual, standalone Regulatory Assets per transaction; delinking the investors from the LDCs, in favour of having IESO be the main servicer; and deleting some of the US precedent language). The regulatory input included in your mark-up was particularly helpful, although not easily dealt with tonight without the Province's input, so many of those points have simply been brought forward with additional footnotes for now. The manner and extent of delegations (primarily the Financing Plan and the Fair Allocation Plan), the nature of OEB review and regulatory

actions, the scope of the undertaking and other similar issues, are still under consideration by MOE. Your comments to the effect that nothing can affect a funding obligation once incurred were referenced, as I think that is a pervasive and correct idea. The ultimate location of provisions (Part of the Electricity Act; new Act; Regulations) is still under consideration – for now it's all in this document to facilitate this group review. Finally, there are a number of "validity" type points, which arose in your mark-up and which we are still thinking about. We can discuss those further in the morning. Steve

Subject: Torys Comments on Blakes Draft Legislation

All,

I am attaching our comments on the last version of the draft legislation sent to us by Blakes. Both a clean and blacklined version are attached.

This is being distributed to OPG at the same time as everyone else and so remains subject to their comments as this is very much a work in process.

We also just received comments from Hunton & Williams but in the interests of time we have not been able to include those in our mark up, but expect to be in a position to raise any of their big issues at our meeting tomorrow. Also, I will send their comments separately to Blakes.

Regards,

Michael K. Feldman

psab response_.rtf

From: Kim Marshall [Kim.Marshall@ieso.ca]
To: Veinot, Cindy (TBS) [Cindy.Veinot@ontario.ca]
Subject: psab response?
Date: Thursday, November 30, 2017 09:04:37

Here is what I am running by opg – any thoughts on approach before I do that? Need more detail on opg accounting or leave for another discussion ? Thx

Would it be the IESO or would it be OPG that would ultimately go to the Ontario Energy Board to recover these costs?

As per the legislation, OPG provides the clean energy adjustment recoverable for a specific period to the OEB who establishes the rate for specified consumers.

If it is the IESO, my understanding is the OFHPA creates the deferral and variance account that enables the IESO to recover costs from future rates. If it is OPG, would they already have a deferral and variance account to house these costs until it is recovered? Or does the legislation apply to OPG as well?

Parts of the legislation do apply to OPG. The IESO has the original right to recover from future rates. This creates the regulatory asset, like the fair hydro predecessor – RPP or . The IESO right to recover and any obligations will be transferred to the financing entity. While the financing entity is better able to speak to their accounting than I am, my understanding is they will have a variance account which will be consolidated into OPG and then the provincial books.

Finally, when it comes time to recover those costs, would it go through the OEB prudence review or is that not necessary as a result of the OFHPA legislation?

The OFHPA legislation covers the OEB oversight. Note – can we be more specific here?

Michel,

Cindy has asked me to enquire/confirm the accounting treatment for the deferred amount in the event that a portion of the deferred amount might be assessed as being an ‘unconstitutional tax’ under Eurig.

I thought that it should not have an impact, as long as the total deferred amount would be recovered through future rates, the fiscal impact should be as envisioned?

Thanks in advance.

Nadine

Hi Nadine,

I have received the updated time for the call. I have a conflict, but either Blake or Suzie will be able to listen in. I would like to chat for a few minutes. I have a call that ends around 4PM. Can I try you then?

Regards,

Lee Anne

Blake,

Just wanted to let you know that there's a third item that we would appreciated your firm's feedback on. It is quite time sensitive and we would like to share our preliminary analysis. Please advise as to process. Shall I send our draft analysis to Suzie directly?

Also, just a reminder to send the engagement template when you get a chance.

Regards,

Nadine

Subject: RE: EXTERNAL – Delivery of Reference Documentation to Province

Thanks for the update, Malle.

I'm not sure how this materiality discussion will relate to the Province commenting on the OM. The base form of the OM was not envisioned as of December 20th, and so it is unclear to me that the material effect discussion is relevant for that purpose.

I have been expecting that the Province would be quite involved in the production of the OM, and not just for information purposes.

To illustrate the sorts of items I would anticipate being relevant to the Province in reviewing the OM, I attach a partial mark-up of the Nov 17th OM (the only one we ever saw) to show how (among other things) the narratives included at that time were not aligned with the legislation. The partial mark-up is a comparison to the version circulated by Alena that included James Rehob's comments. Also, as you know, the Change of Law terms were substantially settled after November 17th, and so those portions of the OM will also be quite different.

Generally, the sorts of things I think the Province may be concerned about in reviewing the OM will include:

(a) ensuring that the description of the Protection Agreement is accurate and does not overstate the Province's obligations,

(b) ensuring that the limitations contemplated in s. 40 of OFHPA and s.19 of the General Regulation have been observed,

(c) eliminating any implied/moral undertakings by the Province to bondholders,

(d) scrutinizing any "risk factors", particularly as they might relate to the context in which Protection Events may arise,

(e) confirming any disclosures regarding the Province's (Ministers') roles, including in setting the "fair allocation amount", accepting the "Financing Plan" provided to the Minister of Energy, etc.,

(f) ensuring that any description of the Crown, Crown immunity, the OFHPA, the regulations made under it, the OIC, the authority of the LGIC, the provisions of the Electricity Act and related regulations and processes, the Financing Plan, the electricity market regulatory infrastructure and other relevant legal principles and contexts are all properly and accurately described (recognizing the risk that any statement may be attributed to the Province based on its close proximity to the program, and could become consequential in any future legal process that seeks to interpret the statute),

(g) scrutinizing disclosures that could later become evidence in any legal proceeding that would challenge the validity of the OFHPA and related laws,

(h) confirming any "electricity market" disclosures that could impact on underlying considerations, such as the potential for and impact of off-grid migration and by-pass risks, and

(i) the propriety of disclosures regarding matters that could impact on the pricing or rating of the issued bonds.

(This list was previously included in my November 22nd due diligence note to the Province's lawyer team.)

In addition, the Province will need to confirm how James Rehob's earlier comments have been reflected in the OM.

Given all this and the offering timing described by Torys, I think it makes sense to insist on getting the OM now and confirming with OPG that the Province will be taking a careful look at the document, which will take some time (at least 5 business days), and so that could impact the overall timing.

I will be tied up from 930 to 1030, but then free until 1145.

Regards, Steve

Subject: FW: EXTERNAL – Delivery of Reference Documentation to Province

As you know prior to the warehouse closing we were sent informally drafts of the reference documents as they developed. Since Dec 20th we have received no further drafts of these documents. I don't understand whether it is OPG's plan that they send final transactions documents today (10 days before) and then the Province has the right to object based on the parameters of "material effect" as defined in the Process Agreement. A draft of the investor presentation was circulated to the Province and some comments were being collected yesterday by Energy and the OFA.

""“Material Effect” means a material adverse effect on the obligations or the rights of the Province under the Limited Guarantee, the Change of Law Protection Agreement or this Agreement that relates to, and in each case, differs in any material respect from the terms or conditions applicable to any other Transaction Document that forms part of the Reference Documentation at the relevant time, the following: (i) the timing of or circumstances under which related payments would or may become due or accrue (including as a result of any default, acceleration, termination, wind-up, liquidation or realization) that, in each case, is inconsistent with the Fair Allocation Amount; (ii) the appointment, obligations or duties of OPG as the Manager; (iii) the existence, powers or authority of the Financing Entity or the Financing Entity Trustee; (iv) the obligations of the Indenture Trustee to or in respect of the Province as a Specified Creditor; (v) the payment provisions and associated priorities set forth in the Trust Indenture; (vi) compliance by the FSM with the then applicable Financing Plan; (vii) compliance by the FSM or the Financing Entity with the Act or the General Regulation; or (viii) the Province’s rights of subrogation or assignment (including pursuant to Sections 1.05, 2.01 or 5.01 of the Change of Law Protection Agreement) or its interests as a subrogee or an assignee, that would arise as a result of performing the Limited Guarantee in respect of the applicable Primary Obligation."

Subject: RE: EXTERNAL – Delivery of Reference Documentation to Province

Hi Malle, Alena and Toby, Happy New Year to all of you. John forwarded the email below and attached and asked that I connect with you and provide an update. I have included the business folks on this email to make sure we are all on the same page. As John notes below, we had been working towards being in a position to commence marketing for the term deal on January 15th but if marketing is pushed to January 22 or later, then a waiver of the 10 business day requirement should not be necessary. I will let our respective clients advise us on that point and we can come back to the logistics/process for obtaining a waiver should we need one.

We are planning on delivering the following additional reference documentation to the Province tomorrow:

(1) Supplemental Indenture for the Series 2018-1 Term Notes

(2) Supplemental Indenture for the Series 2018-1 Subordinated Term Notes

(3) Supplemental Indenture for the Series 2018-1 Junior Subordinated Term Notes

(4) Agency Agreement

(5) Offering Memorandum (including the investor presentation attached as an exhibit to the OM)

(6) Term Sheet supplementing the Offering Memorandum

As you may recall, under the change of law process agreement, all deliveries are required to be made by mail, fax or delivered by hand to each of the Ministers and Deputy Ministers of the MOF and the MOE. To comply with the agreement, we plan on hand delivering the above documents to each of the Ministers and Deputy Ministers tomorrow. We can also email all of these documents to all of you and anyone else you would like us to send these to (in addition to Scott Thompson, Gadi Mayman, Anna Strathy, David McLean, Jonathan Tekle, Mike Manning and Ken Kandeepan -- as requested in Ken's email below). I believe that earlier drafts of all of the term supplemental indentures and the agency agreement were previously circulated to you -- for ease of reference, please let us know if it would be helpful for us to include blacklines to the last versions we sent to you in the email.

Let us know if you agree with the above approach, and feel free to reach out if you have any questions or would like to discuss.

Malle, you had also asked about delivery of the documents from the warehouse closing -- closing books are in progress and we expect to have those ready for circulation next week. Again, in order to comply with the change of law process agreement, the electronic closing books will be delivered to the Ministers and Deputy Ministers of each of the MOF and MOE, but we are happy to also send a copy to others on your instruction.

Thanks,

Rima

Subject: RE: EXTERNAL – RE: Waiver Process

Ken/Steen:

We are operating under the assumption that it was the Province desire to execute the term deal as early as possible in 2018 which would involve a launch on the 15th. If the preference is now to adhere to the 10 business day requirement and not waive it we are happy to do so and commence marketing later in the month on the 22nd.

Please advise and we will adjust the work plan accordingly.

John

Subject: EXTERNAL – RE: Waiver Process

*** Exercise caution. This is an EXTERNAL email. DO NOT open attachments or click links from unknown senders or unexpected email. ***

Hi John

I spoke to our DM's office and Scott's email is Scott.Thompson@ontario.ca, As required by the Process Agreement between the Province and OPG, pls forward the documents pertaining to the upcoming term deal by email to Scott with a cc to the following:

Gadi Mayman, Anna Strathy, David McLean (cc'ed above), Jonathan Tekle (also cc'ed above), Mike and myself.

Given that the Process Agreement requires OPG to also provide the same documents to MOE, I am cc'ing Steen and Tim so that they can inform their DM's Office as well.

With regard to the waiver, pls see Malle's comments below, it would also be useful if OPG were to provide a rationale as to why waiving the 10 business days requirement which may allow for term debt issuance in mid-January by the Trust is more beneficial than issuance either later in the same month or early February.

Thanks

Ken k

Subject: Re: Waiver Process

It would be very helpful if OPG and Torys could provide to us a timetable and schedule for delivery of reference documents that are being prepared and when do we expect to get them and when is the proposed issuance. On that basis we can review the timing and determine whether a waiver will be necessary and if it is how it might be processed. Unfortunately we haven't received any updates or draft documents since the closing of the warehouse deal. Also is there a plan for distributing to the Province the documents from the warehouse closing?

Thanks

Malle

Thanks, didn't realize that all waivers have to be signed by the respective ministers, which as you know is difficult on an operational basis.

I am cc'ing our legal counsel to see if they have any suggestions.

Ken:

Given the importance of the Protection agreement and the desire to follow it to the "letter" ……see Torys comments below. Have you made provisions on the Province side to operationalize the delegation of waivers and amendments to facilitate the request. If not then the debt issuance date will get pushed out by the full 10 days.

Please advise.

Subject: RE: EXTERNAL – RE: Diligence Questions

I should add that the waiver of the 10 BD requirement needs to be executed in writing by the Province (which means we will need signatures from each Minister). Will that be achievable? If not, perhaps we can proceed on the basis of an email waiver with the waiver signed by the Ministers to follow as soon as possible. Sorry but it is going to be a pain in the butt navigating through this agreement … hopefully the Province will realize that and agree to make some amendments!

Subject: RE: EXTERNAL – RE: Diligence Questions

OK. I assume the DM of Finance will sign off on behalf of the Minister of Finance. But what about the Minister of Energy? The agreement requires notices to both Ministers on behalf of the Province and I recall on the warehouse closing, we had to wait for a representative from each Ministry to sign off.

Hi all,

These revisions were sent out by Steve last evening. Please review to ensure all the comments at the meeting yesterday were captured. Also, please review s. 4.01 in particular as based on discussions with Steve last evening the language was modified a bit to change it so the Province may disagree with the amount for the protection agreement maximum proposed by OPG on reasons related to the inconsistencies or

inaccuracies as opposed to agreeing as opposed to confirming agreement. Please let us know if you have comments on this. Thanks.

Subject: Change of Law Protection Agreement and Change of Law Process Agreement

Rima, Krista, Nina and Michael,

Here are drafts of the Change of Law Protection Agreement and Change of Law Process Agreement. Please note that while various people at the Province have provided considerable thought and input into these drafts, they remain subject to on-going review, comment and consideration (including where indicated in the drafts) by the Province, and of course remain subject to ultimate consideration and approval by the Ministers. This circulation is for discussion purposes only. Please feel free to circulate these drafts to OPG, E&Y, Osler and the Dealers, reflecting that understanding.

We propose that a consolidated mark-up be prepared that reflects all of the issues that you or those others may have, and ideally reflects input from the rating agencies. Once that mark-up is available, we propose that a meeting of interested parties be held to resolve any outstanding issues.

In the meantime, please feel free to call Malle, Toby, Tom, Alena or me if you have questions or concerns.

Regards, Steve

Hi Ken,

Yes this is one of the issues, i.e. where the obligation to provide notice and information to the province would be found. However, we reviewed the master trust indenture further last night. There are some other issues as well as under the trust indenture s. 11.01 the Issuer and the Indenture Trustee have the ability to make a number of types of amendments without the consent of specified creditors including to add to the covenants of the Issuer or to surrender any right or power conferred upon the Issuer for the benefit of debtholders and also to enable the Issuer to file a registration statement for the offering of securities in the U.S. etc.. S. 11.02 provides for the making of a range of amendments with consent of debtholders. This is why Blakes specified these sections in their email to Torys as not all amendments are sent to the specified creditors. I think it would be worthwhile to have a further internal call with Blakes later this morning so that we have a full understanding of the implications of this issue.

If the Province is paying under the limited guarantee in the protection agreement, the Province would be paying in accordance with the terms and conditions of the agreements and obligations that the financing entity has entered into. If the Province determines that it is appropriate to directly assume the debt and obligations and obtains authority and approvals to do so and elects its option to do so, then upon direct assumption of the debt and derivatives, there would an opportunity for the terms be varied to be under the Province's ISDA's.

Thanks,

Malle

Subject: RE: Change of Law Protection Agreement and Change of Law Process Agreement

Hi Malle

As per our discussion last evening, I understood that the compromise position re the amendments issue was for the Province to be designated as a “specified creditor” thus be informed of any amendments 10 business days prior. The sticking point, as I understand it was our preference that these requirements be part of the Indenture Trust agreement while Tory’s/Osler suggested that it be part of the Protection Agreement.

So the question is if we accept the Tory’s/Osler position does the Province’s risk increase materially, if not then we can proceed with their suggestion, especially since the Trustee is a party to the Protection Agreement.

I don’t believe there any accounting implication from either approach though leave that to Cindy and Mark.

Steve also raises the issue of other Program Agreements presumably referring to agreements for derivatives. I am not too fussed about these, since any derivative arrangement that we will be taking on if the Protection Agreement comes into force will be under our ISDA. Maybe Mike may have something to add to this.

Thanks

Ken k

Subject: RE: Change of Law Protection Agreement and Change of Law Process Agreement

Please find enclosed revised drafts of the Change of Law Protection Agreement and the Change of Law Process Agreement. I have also enclosed redlines to the drafts which Stephen circulated on November 2nd. The revised drafts and comments contained in these two agreements are a consolidation of comments from Osler and Torys. Please note that we have not had an opportunity to discuss all of the revisions and comments contained in these revised drafts with OPG and the Dealers and therefore, are subject to any further comments which the Dealers and OPG may have.

The initial drafts of these two agreement have not been provided to the rating agencies for their review and therefore, further revisions may be required following their review and comment once drafts have been provided to them to review.

Subject: Change of Law Protection Agreement and Change of Law Process Agreement

Rima, Krista, Nina and Michael,

Here are drafts of the Change of Law Protection Agreement and Change of Law Process Agreement. Please note that while various people at the Province have provided considerable thought and input into these drafts, they remain subject to

on-going review, comment and consideration (including where indicated in the drafts) by the Province, and of course remain subject to ultimate consideration and approval by the Ministers. This circulation is for discussion purposes only. Please feel free to circulate these drafts to OPG, E&Y, Osler and the Dealers, reflecting that understanding.

We propose that a consolidated mark-up be prepared that reflects all of the issues that you or those others may have, and ideally reflects input from the rating agencies. Once that mark-up is available, we propose that a meeting of interested parties be held to resolve any outstanding issues.

In the meantime, please feel free to call Malle, Toby, Tom, Alena or me if you have questions or concerns.

Regards, Steve

RE_ Consent.rtf

From: ASHBOURNE, STEPHEN [STEPHEN.ASHBOURNE@blakes.com]
To: Petsche, Nadine (TBS) [Nadine.Petsche@ontario.ca]
CC: PRESTAGE, JA [JA.PRESTAGE@blakes.com]
Subject: RE: Consent
Date: Wednesday, March 22, 2017 14:45:03

Nadine,

I believe the provision you are looking at in the TPA is saying that references in the TPA to the DoT are to the form of DoT approved by the Province in accordance with 20.2.

If the DoT were to be amended without the Province's consent (i.e., which is not to be unreasonably withheld, operating by reference to 20.2), then the reference to the DoT in the TPA would mean the DoT without that amendment.

Does that clarify the point for you?

Stephen,
Michel and I have been going back and forth on the remaining TPA definition wording for the Trust Declaration. Please see his suggestion below. I would agree, for consistency purposes (with 20.2), that it should be revised. Hope you agree. Nadine

I believe the definition of trust in the TPA should be amended either to delete "with the consent of the Province" or to include "not to be unreasonably withheld or delayed."

Hi Kim.
I was thinking that it might be useful to invite Shannon (from E&Y) to participate on the call as well. In addition, if Lee Anne has additional questions on how the market books work, it might be helpful to give her the contact info for the team that reviews the internal controls for the market books?
Thanks in advance.
Nadine

Subject: Fw: Discussion Items for IESO Call

Good morning.
We had suggested that EY list some of their questions in advance of today's call (see below). I personally think however, that we first need to establish a common understanding of RRA (eg. Clarity of accounting guidance wrt governing board, independence, different types of RRAs), and perhaps address some of EY's questions/confusion following their read of the AG's recent comments/postings and how they might relate (or not) to the IESO's situation.
Just forwarding these Q's as an info item. Talk soon, N

Subject: Discussion Items for IESO Call

Hi Nadine,

Below is a list of the items I would like to discuss on our call with the IESO.

Please let me know if you have any questions/concerns with the list.

Regards,
Lee Anne

IESO Financial Statements

Current supply cost variance account

· Where is this recorded on the 2016 balance sheet (Amounts due to/from market participants?)

· Why is this not a regulatory asset? Is it considered to be a financial asset?

· There are similarities between this variance account and the new FHP variance account, but FHP variance account is going to be accounted for a regulatory asset. What is driving different treatment?

Market accounts

· Can we walk through the entries that are booked as part of the settlement process (timing and DRs/CRs)

· What are 'Other liabilities' (Note 3)

Market Administration/Settlement

Confirm/correct the following:

Price consumers pay comprised of:

· Electricity price:

o Electricity commodity price (HOEP)

o Transmission price

o Distribution price

· Global Adjustment

IESO only settles the electricity commodity price component and the related portion of the Global Adjustment

Supply of electricity comes from:

1. OPG (rate set by OEB)

2. Non-utility generators (rate set by contract – contracts held by OEFC)

3. Generation facilities under contract with IESO (rate set by contract)

4. Imports (paid HOEP)

Are there are other suppliers that are paid HOEP?

Portion of Global Adjustment determined by IESO driven by variances relating to #1, #2, #3 above

What is the nature of the contracts IESO enters into?
Participation agreements

· IESO enters into participation agreements with all market participants (buyers and sellers)

· Participation agreements bind IESO and counterparty to follow market rules

· Participation agreement would be the only contract IESO enters into with #1, #2, #4 above
Supply contracts

· Since IESO does not buy and sell electricity, what is the contract for? (IESO paying for commitment that the counterparty will supply electricity into the IESO grid?)

· Does the IESO negotiate the terms of these contracts?

Buyers of electricity from IESO grid are comprised of:

· LDCs

· Large consumers

The electricity commodity price paid by all buyers is HOEP.
IESO determines HOEP.
Although IESO determines HOEP, IESO is not really determining rates charged to buyers because total price is a bundle of electricity at HOEP plus/minus Global Adjustment and OEB mandates that bundle must (over time) equal cost.

Subject: RE: EXTERNAL – Comments on Provincial Protection and Assurances Term Sheet - Fair Hydro

Hi all,

Are there any other draft agreements that are available for review by the Province that would provide more precision respecting the context in which this provincial support is to operate. For example, the Master Sales and Servicing Agreement? Torys' comment mentions the "MTSA" – which agreement is this? Is there a draft trust indenture? Torys also asks about what is meant by the "Approval Requirement" and it is difficult to answer these questions without having a fuller picture of the various agreements.

Thank you.

Good suggestion from Gadi – we should probably touch base internally in advance of meeting with OPG. I wonder if we could try for a quick 30 min phone call either tomorrow or Friday.

I will reach out to OPG to set something up for next week.

Hi,

Please see the following comments from OPG / Torys on the guarantees.

I wonder if we are now at a point we should suggest sitting down with OPG on this perhaps early next week.

Thanks,

Scott

Scott:

Further to our discussion on the outstanding issues, please find below the comments from the Dealers on the “Markup” of the Provincial Protection and Assurance term sheet.

As noted below, the next step should be to get the appropriate parties from the Province to sit down with the dealers and OPG to go over the points and agree on a basis to move forward.

We should try to do that sometime next week. Let us know what times work on the Province side and we will coordinate with the Dealers & counsels.

*** Exercise caution. This is an EXTERNAL email. DO NOT open attachments or click links from unknown senders or unexpected email. ***

John/Les/Ken,

Please find below an issues list on the Province’s comments on the Provincial Protection and Assurances Term Sheet (formerly the Provincial Support Agreement). This list reflects input from the dealers, Oslers and Torys. Please let us know if you have any additional comments or questions. If not, will you be reaching out to the

Province to schedule a meeting next week (with the dealers, OPG, the Province and their counsels) to discuss these points? The dealers and their counsel don't see value in exchanging further drafts of the term sheet until they have had an opportunity to meet with the Province. We agree with this approach and are happy to assist in coordinating a meeting for next week. It would also be helpful to hear the Province's rationale and concerns for making some of these changes. Please let us know.

Many thanks,

Nina

1. The Servicing Guarantee:

(a) It is written in favour of only the financing entity. However, in the MTSA, we are asking for covenants directly in favour of Indenture Trustee. The Indenture Trustee/specified creditors should have the direct benefit of the guarantee rather than relying on an indirect security interest in the servicing guarantee.

(b) It should be clarified that the servicing obligations of the electricity vendors are covered.

(c) If the guarantee is unenforceable, we should fall back to an indemnity, not a "functionally equivalent direct covenant" which is an uncertain concept.

(d) We don't want an exclusion for economic loss. That may cover whatever losses the specified creditors do suffer.

2. Change of Law.

(a) This should be written as a guarantee not an indemnity.

(b) It should be directly in favour of the Indenture Trustee/specified creditors and it should cover all the "finance amount" and not just funding obligations.

(c) We do not want the guarantee to be provided by another entity which is in turn guaranteed by Ontario. It should come directly from Ontario.

(d) There should be no "materiality" threshold for a claim. If obligations are not paid in full, then there should be a claim.

(e) The choice to assume or accelerate should be at the option of the holders, not the guarantor.

(f) If accelerated, then the 1% premium should be payable. This is a voluntary termination by the Province.

3. Undertaking Regarding Mismatches (market disruption)

(a) At best this structure defers the discussion of protection for a market disruption. At worst, it is impractical that take-out financing needs to be arranged in advance of each warehouse financing. We should rely on a definition of market disruption.

4. Approvals.

(a) Province to clarify what is contemplated under the heading “Approval Requirement”. Is Province proposing to approve any obligation incurred by the Financing Entity?

(b) Approval under Section 28 of the *Financial Administration Act* to be attained (in case the OFHPA is declared void in its entirety).

MASTER TRANSFER AND SERVICING AGREEMENT

THIS AGREEMENT made as of ■, 2017.

BETWEEN:

[FINANCING ENTITY], a trust formed under the laws of the Province of Ontario

(the "**Issuer**")

- and -

INDEPENDENT ELECTRICITY SYSTEM OPERATOR, a statutory corporation without share capital amalgamated under the laws of the Province of Ontario

(the "**Transferor**" in its capacity as transferor, the "**Servicer**", in its capacity as servicer, and the "**IESO**" in its capacity as both Transferor and Servicer)

- acknowledged and accepted by -

[INDENTURE TRUSTEE], a trust company existing under the laws of Canada and duly authorized to carry on the business of a trust company in all of the provinces and territories of Canada, as indenture trustee

(the "**Indenture Trustee**")

WHEREAS the Government of Ontario has enacted the *Ontario Fair Hydro Act, 2017* (the "**Act**") for the purpose of, among other things, ensuring that clean energy costs and clean energy benefits (each as defined in the Act) are fairly allocated among present and future Specified Consumers;

AND WHEREAS, under the Act, the IESO is required to establish and maintain the Fair Hydro Variance Account, and has the right under the Act and the Regulations to record certain amounts in the Fair Hydro Variance Account and recover the balance from time to time of the Fair Hydro Variance Account from Specified Consumers (such right, the "**Regulatory Asset**");

AND WHEREAS the IESO may from time to time, in accordance with the Act, Transfer a specified portion of the Regulatory Asset to the Issuer on a fully-serviced basis and such Transfer shall result in (i) a reduction in the balance in the Fair Hydro Variance Account, (ii) the corresponding adjustment of the Regulatory Asset, and (iii) the acquisition by the Issuer of an Investment Interest corresponding to the specified portion of the Regulatory Asset;

AND WHEREAS the Issuer may finance the acquisition from the IESO, from time to time, of an Investment Interest through the incurrence of Funding Obligations under the Indenture;

AND WHEREAS the Issuer will grant a security interest over all of the Issuer Investment Interest to and in favour of the Indenture Trustee on behalf of all Specified Creditors;

AND WHEREAS in connection with its ownership of the Issuer Investment Interest and in order to collect the associated Clean Energy Adjustments in accordance with the Act, the Issuer desires to engage the Servicer to carry out the services described herein and the Servicer desires to be so engaged;

NOW THEREFORE in consideration of the foregoing and the mutual covenants and agreements contained herein (the receipt and adequacy of which are hereby acknowledged), the parties hereto agree as follows:

ARTICLE 1
INTERPRETATION

1.1 Definitions

In this Agreement, the following terms have the following meanings:

"**Act**" has the meaning ascribed thereto in the recitals;

"**Administrative Agent**" means OPG, in its capacity as administrative agent of the Issuer;

"**Administrative Services Agreement**" means the administrative services agreement dated ■, 2017 between the Administrative Agent and the Issuer concerning the reimbursement of certain costs incurred by the Administrative Agent in connection with the administration of the Issuer;

"**Affiliate**" means, with respect to any specified Person, any other Person controlling or controlled by or under common control with such specified Person. For the purposes of this definition, "**control**" when used with respect to any specified Person means the power to direct the management and policies of such specified Person, directly or indirectly, whether through the ownership of voting securities, by contract or otherwise, and the terms "**controlling**" and "**controlled**" have meanings correlative to the foregoing;

"**Agreement**" means this master transfer and servicing agreement, as amended, supplemented, modified, restated or replaced from time to time, and the expressions "herein", "hereof", "hereto", "hereunder" and similar expressions refer to this Agreement and not to any Article, Section, paragraph, subparagraph or clause hereof;

"**Billing Period**" means a calendar month in which the Clean Energy Adjustment is billed to Specified Consumers;

"**Board**" means the Ontario Energy Board, a statutory corporation without share capital continued under the *Ontario Energy Board Act, 1998*, S.O., 1998;

"**Business Day**" means any day other than a Saturday, a Sunday or a day on which banking institutions in Toronto, Ontario are, or the office of the Indenture Trustee is, authorized or obligated by law, regulation or executive order to be closed;

"**CEA Consumer Invoice Amounts**" means amounts invoiced by an Electricity Vendor to Specified Consumers in respect of the Clean Energy Adjustment based on the rates established by the Board;

"**Clean Energy Adjustment**" has the meaning ascribed to the term "clean energy adjustment" in the Act;

"**Closing Date**" means the date on which a Transfer is completed as specified in the applicable Transfer Notice;

"**Co-Owner Agreement**" means any agreement between, *inter alia*, the Issuer and any other owner or owners of an Investment Interest as contemplated by subsection 29(5) of the Act;

"**Co-Owner Implementation Date**" means the date, if any, upon which the Issuer Investment Interest ceases to be the only Investment Interest outstanding representing the full Investment Asset;

"**Collection Account**" has the meaning ascribed thereto in Section **[8.02(a)]**[1] of the Indenture;

"**Corporate Trust Office**" means the office of the Indenture Trustee at which, at any particular time, its corporate trust business shall be administered, which office as of the date hereof is located at ■; Telephone: ■; Email: ■, or at such other address as the Indenture Trustee may designate from time to time by notice to the Specified Creditors and the Issuer, or the principal corporate trust office of any successor trustee designated by like notice;

"**Daily Remittance Event**" means ■ **[NTD: Definition to be tied to the loss of investment grade ratings of the IESO]**;

"**Declaration of Trust**" means the declaration of trust made as of ■, 2017 under which the Issuer was established, as may be supplemented, amended, replaced or amended and restated from time to time;

"**Electricity Act**" means the *Electricity Act, 1998*, SO, 1998;

"**Electricity Vendor**" has the meaning ascribed to the term "electricity vendor" in the Act;

"**Electricity Vendor CEA Collections**" means payments actually received by Electricity Vendors from Specified Consumers in respect of Clean Energy Adjustments;

"**Eligible Deposit Account**" means an account in Canada with an Eligible Institution;

1 All cross-references to the Indenture to be conformed to the final version of the Indenture.

"**Eligible Institution**" means:

(a) at any time before the Co-Owner Implementation Date, an "Eligible Institution" as defined in the Indenture; and

(b) at any time on or after the Co-Owner Implementation Date, an "Eligible Institution" as defined in the applicable Co-Owner Agreement;

"**Fair Hydro Variance Account**" means the variance account established by the IESO pursuant to subsection 24(1) of the Act;

"**Finance Reserve Deposit**" has the meaning ascribed to the term "finance reserve deposit" in the Regulations;

"**Financing Entity**" has the meaning ascribed to the term "financing entity" in the Act;

"**Financing Entity Expenses**" has the meaning ascribed to the term "financing entity expense" in the Regulations;

"**Funding Cost**" has the meaning ascribed to the term "funding cost" in the Regulations;

"**Funding Obligation**" has the meaning ascribed to the term "funding obligation" in the Act;

"**Funding Rebate**" has the meaning ascribed thereto in Section 3.4(b);

"**Governmental Authority**" means any nation or government, any federal, state, provincial, local or other political subdivision thereof and any court, administrative agency or other instrumentality or entity exercising executive, legislative, judicial, regulatory or administrative functions of government;

"**IESO**" or "**Independent Electricity System Operator**" means the Independent Electricity System Operator, a statutory corporation without share capital established by the Electricity Act;

"**IESO Deferral**", at any time, means the amount determined by the IESO under subsection 23(1) of the Act and sections 15 and 16 of the Regulations and recorded by the IESO under subsection 24(1) of the Act in the Fair Hydro Variance Account at such time;

"**IESO Disclosure**" has the meaning ascribed thereto in Section 5.7;

"**IESO Segregated Account**" means the account established under Section 3.3(a);

"**Indemnified Losses**" has the meaning ascribed thereto in Section 6.1(a);

"**Indemnified Party**" has the meaning ascribed thereto in Section 6.1(a);

"**Indenture**" means the master trust indenture dated ■, 2017 between the Indenture Trustee and the Issuer;

"**Indenture Trustee**" means ■, a trust company existing under the laws of Canada and duly authorized to carry on the business of a trust company in all of the provinces and territories of Canada, as indenture trustee for the benefit of Specified Creditors, or any successor thereto, under the Indenture;

"**Insolvency Event**" means, with respect to a specified Person, the specified Person admits the inability of such specified Person to pay its liabilities generally as they become due or makes a general assignment for the benefit of the creditors of such specified Person or otherwise acknowledges the insolvency of such specified Person or any proceeding shall be instituted by or against such specified Person seeking to adjudicate it a bankrupt or insolvent or seeking liquidation, winding up, dissolution, reorganization, arrangement, adjustment, protection, relief or composition of its debts under any law relating to bankruptcy, insolvency, reorganization, moratorium or relief of debtors or seeking the entry of an order for relief by the appointment of a receiver, trustee or other similar official for such specified Person or for any substantial part of its property and if such proceeding has been instituted against such specified Person either such proceeding has not been stayed or dismissed within **[45]** days or any of the actions sought in such proceeding (including the entry of an order for relief or the appointment of a receiver) are granted in whole or in part, or if a receiver is privately appointed in respect of such specified Person or of the property of such specified Person or any substantial part thereof;

"**Investment Asset**" has the meaning ascribed to the term "investment asset" in the Act;

"**Investment Interest**" has the meaning ascribed to the term "investment interest" in the Act;

"**Issuer**" means ■, a trust formed under the laws of the Province of Ontario;

"**Issuer Funding Obligations**" means the Funding Obligations of the Issuer;

"**Issuer Investment Interest**" means, initially, the Investment Interest acquired by the Issuer pursuant to the first Transfer completed under this Agreement and, upon the completion of each Transfer thereafter, the cumulative Investment Interest acquired by the Issuer;

"**Issuer Share**" means:

(a) at any time before the Co-Owner Implementation Date, 100%; and

(b) at any time on or after the Co-Owner Implementation Date, the percentage determined in accordance with the applicable Co-Owner Agreement;

"**Issuer Trustee**" means, at any time, the Person who is, in accordance with the Declaration of Trust, the trustee of the Issuer at such time;

"**Lien**" means a security interest, lien, mortgage, charge, pledge, claim or encumbrance of any kind;

"**Management Agreement**" means the management agreement dated ■, 2017 between the Manager and the Issuer;

"**Manager**" means OPG, in its capacity as manager of the Issuer, and any successor appointed in accordance with the Management Agreement;

"**Minister**" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of the Act under the *Executive Council Act*;

"**Monthly Funding Expenses**" has the meaning ascribed thereto in Section 3.4(a);

"**Monthly Funding Rebate Statement**" has the meaning ascribed thereto in Section 3.4(a);

"**Monthly Report**" has the meaning ascribed thereto in Section 3.3(e);

"**Officer's Certificate**" means a certificate signed by a Responsible Officer of the Issuer under the circumstances described in, and otherwise complying with, the applicable requirements of Section **[10.01]** of the Indenture, and delivered to the Indenture Trustee;

"**OPG**" means Ontario Power Generation Inc., a corporation established under the laws of the Province of Ontario;

"**Opinion of Counsel**" means one or more written opinions of counsel, who may, except as otherwise expressly provided in the Program Agreements, be employees of or counsel to the party providing such opinion of counsel, which counsel shall be reasonably acceptable to the party receiving such opinion of counsel, and shall be in form and substance reasonably acceptable to such party;

"**Outstanding Amount**" means the aggregate principal amount of all Funding Obligations outstanding at the date of determination;

"**Permitted Successor**" means any successor to the IESO under the Act, whether pursuant to any bankruptcy, reorganization or other insolvency proceeding or pursuant to any merger, conversion, acquisition, sale or transfer, by operation of law, as a result of any restructuring, or otherwise, but only to the extent such successor is approved by the Minister;

"**Person**" means any individual, corporation, limited liability company, estate, partnership, joint venture, association, joint stock company, trust (including any beneficiary thereof), unincorporated organization or Governmental Authority;

"**Proceeding**" means any suit in equity, action at law or other judicial or administrative proceeding;

"**Program Agreements**" means the Indenture, each Supplemental Indenture, the Declaration of Trust, the Management Agreement, the Administrative Services Agreement, this Agreement, each Transfer Notice, any Co-Owner Agreements, the Provincial Protection and Assurances Agreement and any hedging agreements, credit enhancement agreements, loan agreements and underwriting or agency agreements in effect at such time and all other documents and certificates delivered in connection therewith;

"**Provincial Protection and Assurances Agreement**" means the Provincial Protection and Assurances Agreement dated as of ■, 2017 between **[Her Majesty the Queen in Right of Ontario, as represented by the Minister, the Indenture Trustee and the Issuer][NTD: Subject to finalization of agreement]**;

"**Purchase Price**" has the meaning ascribed thereto in Section 2.1(a);

"**Rating Agency**" has the meaning ascribed thereto in the Indenture;

"**Rating Agency Condition**" has the meaning ascribed thereto in the Indenture;

"**Records**" has the meaning ascribed thereto in Section 7.1;

"**Reference Period**" has the meaning ascribed to the term "reference period" in the Act;

"**Regulations**" means Ontario Regulation 206/17: General, together with any other regulations promulgated under the Act;

"**Regulatory Asset**" has the meaning ascribed thereto in the recitals;

"**Released Parties**" has the meaning ascribed thereto in Section 6.1(e);

"**Remittance Date**" means, in respect of each Billing Period, the **[3rd]**[2] Servicer Business Day following the last day of each Billing Period;

"**Requirement of Law**" means any foreign, Canadian federal, provincial or local laws, statutes, regulations, rules, codes or ordinances enacted, adopted, issued or promulgated by any Governmental Authority or common law;

"**Responsible Officer**" means, with respect to: (a) the Issuer, any authorized director or officer of the Manager; (b) the Servicer, any authorized director or officer of the IESO; (c) a Successor Servicer, any authorized director or officer of the Successor Servicer; and (d) the Indenture Trustee, any officer within the Corporate Trust Office of such trustee (including the President, any Vice President, any Assistant Vice President, any Secretary, any Assistant Treasurer or any other officer of the Indenture Trustee customarily performing functions similar to those performed by persons who at the time shall be such officers, respectively, and that has direct responsibility for the administration of the Indenture and also, with respect to a particular matter, any other officer to whom such matter is referred to because of such officer's knowledge and familiarity with the particular subject);

"**Servicer**" means the Independent Electricity System Operator, as Servicer under this Agreement, or any Successor Servicer to the extent permitted under this Agreement;

2 Based on the monthly payment cycle charts prepared by OPG.

"**Servicer Business Day**" means any day other than a Saturday, a Sunday or a day on which banking institutions in Toronto, Ontario are authorized or obligated by law, regulation or executive order to be closed, on which the Servicer maintains normal office hours and conducts business;

"**Servicer CEA Collections**" has the meaning ascribed thereto in Section 3.2(a)(ii);

"**Servicer Default**" has the meaning ascribed thereto in Section 7.1;

"**Specified Consumer**" has the meaning ascribed to the term "specified consumer" in the Act;

"**Specified Creditors**" has the meaning ascribed thereto in the Indenture;

"**Successor Servicer**" has the meaning ascribed thereto in Section **[3.07(e)]** of the Indenture;

"**Supplemental Indenture**" means an indenture supplemental to the Indenture that authorizes the incurrence of Funding Obligations;

"**Tax Liability**" has the meaning ascribed to the term "tax liability" in the Regulations;

"**Tax Refund**" has the meaning ascribed to the term "tax refund" in the Regulations;

"**Termination Event**" has the meaning ascribed thereto in Section 3.11;

"**Termination Notice**" has the meaning ascribed thereto in Section 7.1;

"**Transfer**" has the meaning ascribed to the term "transfer" in the Act, and "**Transferred**" has a corresponding meaning;

"**Transfer Notice**" means a Transfer Notice in respect of a Transfer substantially in the form of Exhibit A to this Agreement and delivered pursuant to Section 2.1(a) of this Agreement; and

"**Transferor**" means the Independent Electricity System Operator, as transferor under this Agreement;

1.2 Sections and Headings[3]

The table of contents does not form part of this Agreement. The division of this Agreement into Articles and Sections and the insertion of headings are for convenience of reference only and will not affect the construction or interpretation of this Agreement. Unless something in the subject matter or context is inconsistent therewith, references herein to Articles and Sections are to Articles and Sections of this Agreement.

1.3 Extended Meanings

(a) Words importing the singular number only will include the plural and vice versa and words importing the masculine gender will include the feminine and neuter genders and vice versa. A reference to any agreement, instrument or declaration

3 Torys to conform boilerplate provisions, as applicable, across all transaction documents.

means such agreement, instrument or declaration as the same may be amended, supplemented, modified, restated or replaced from time to time.

(b) The term "**including**" means "including without limitation", and other forms of the verb "**include**" have correlative meanings.

(c) All references to any Person shall include such Person's permitted successors and assigns, and any reference to a Person in a particular capacity excludes such Person in other capacities.

(d) Unless otherwise stated, in the computation of a period of time from a specified date to a later specified date, the word "**from**" means "**from and including**" and each of the words "**to**" and "**until**" means "**to but excluding**".

(e) The words "**hereof**", "**herein**" and "**hereunder**" and words of similar import when used in this Agreement shall refer to this Agreement as a whole and not to any particular provision of this Agreement, unless otherwise specified. References to Articles, Sections, Appendices and Exhibits in this Agreement are references to Articles, Sections, Appendices and Exhibits in or to this Agreement unless otherwise specified.

(f) References to any law, rule, regulation or order of a Governmental Authority shall include such law, rule, regulation or order as from time to time in effect, including any amendment, modification, codification, replacement or reenactment thereof or any substitution therefor.

(g) The word "**will**" shall be construed to have the same meaning and effect as the word "**shall**". The word "**or**" is not exclusive.

ARTICLE 2
TRANSFER OF SPECIFIED PORTIONS OF THE REGULATORY ASSET

2.1 Transfer Notices and Agreement to Transfer a Specified Portion of the Regulatory Asset

(a) The Transferor may, no more frequently than monthly and no later than the 8th Business Day of each calendar month, provide to the Issuer a Transfer Notice executed by the Transferor and setting out (i) the specified portion of the Regulatory Asset that the Transferor desires to Transfer to the Issuer, (ii) the consideration to be paid to the Transferor by the Issuer for the Transfer (the "**Purchase Price**") which shall be equal to the amount of the specified portion of the Regulatory Asset that the Transferor proposes to Transfer to the Issuer, (iii) the Closing Date to effect such transfer which shall be the 10th Business Day following delivery of the Transfer Notice, or such other date as may be agreed upon by the Transferor and the Issuer, and (iv) such other information as required in the form of Transfer Notice attached as Exhibit A hereto.

(b) **[The Issuer shall use commercially reasonable efforts to provide reasonable notice to the Transferor if the Issuer has reasonable cause to believe that it will not accept a Transfer Notice sent by the Transferor or that the conditions precedent in Sections 2.2(b)(i), (v), (vi), (vii), (viii) and (vii) will not be satisfied on the relevant Closing Date.][NTD: Subject to review by OPG.]**

(c) On or before the 2nd Business Day following receipt of a Transfer Notice, the Issuer shall have the right, but not the obligation, to accept the Transferor's offer to Transfer the portion of the Regulatory Asset subject to the Transfer Notice by executing and returning such Transfer Notice to the Transferor. Upon acceptance by the Issuer of the Transfer Notice, there shall be a binding agreement for IESO to Transfer the specified portion of the Regulatory Asset and for the Issuer to pay the Purchase Price, subject to satisfaction of all conditions precedent in Section 2.2.

(d) In consideration and as an inducement for the Issuer to acquire the Investment Interest at the Purchase Price, the Transferor shall, concurrently with each such Transfer and in accordance with Section 3.4, agree to pay to the Issuer all Monthly Funding Expenses that are incurred by or on behalf of the Issuer in connection with each applicable Transfer in respect of each calendar month in which there are no Clean Energy Adjustments billed to Specified Consumers.

(e) Provided that all conditions precedent set out in Section 2.2 have been satisfied on or prior to the applicable Closing Date, on the applicable Closing Date, the Issuer shall deliver or cause to be delivered to the Transferor, by wire transfer in immediately available funds, an amount in Canadian dollars equal to the Purchase Price set forth in the applicable Transfer Notice.

(f) Upon receipt by the Transferor of the payment referred to in Section 2.1(e):

(i) the Transferor shall reduce the balance of the Fair Hydro Variance Account by an amount equal to the Purchase Price and, as a consequence, the Regulatory Asset shall be adjusted accordingly; and

(ii) the corresponding Investment Interest shall immediately vest in the Issuer, free and clear of any adverse claim, and in accordance with section 27(1) of the Act, shall constitute a valid and enforceable absolute assignment, conveyance and sale of the corresponding Investment Interest to the Issuer.

(g) Any Transfer of a specified portion of the Regulatory Asset by the Transferor pursuant to this Agreement shall constitute a valid and enforceable absolute assignment, conveyance and sale of the corresponding Investment Interest to the Issuer, shall be treated as a true sale and not as a pledge of or secured transaction relating to the Transferor's right, title, and interest in, to, and under the specified portion of the Regulatory Asset. After giving effect to a Transfer contemplated hereby, the Transferor shall have no right, title or interest in, to or under the corresponding Investment Interest because (i) it has Transferred all of its right, title and interest in and to the corresponding specified portion of the Regulatory Asset

to the Issuer, (ii) as provided in the Act, all right, title and interest to the corresponding Investment Interest shall be vested in the Issuer, (iii) as provided in the Act, such Transfer is perfected, vested, valid and binding as against the Transferor and all other Persons who may have claims of any kind against the Transferor, regardless of whether the Persons who have claims have received notice of the Transfer, and (iv) the property rights and interests acquired by the Issuer shall be free and clear of any Liens arising through the IESO.

2.2 Conditions Precedent to each Transfer of a Specified Portion of the Regulatory Asset

(a) The obligation of the Issuer to pay the Purchase Price related to the initial Transfer of a specified portion of the Regulatory Asset shall be subject to the satisfaction by the Transferor, or waiver by the Issuer and the Indenture Trustee, of the following condition:

(i) the Issuer and the Indenture Trustee shall have received from the Transferor the following documents, in form and substance satisfactory to each of the Issuer and the Indenture Trustee:

(A) a certificate of an officer of the IESO, dated the initial Closing Date certifying (1) that attached thereto is a true and complete copy of the by-laws of the IESO, each as in effect on the date of such certificate, (2) that attached thereto is a true and complete copy of a resolution adopted by the IESO's board of directors authorizing the execution, delivery and performance of this Agreement and the Program Agreements to which the IESO is party, and that such resolution has not been modified, rescinded or amended and is in full force and effect, and (3) as to the incumbency and true specimen signature of each of the IESO officers executing this Agreement or any of the Program Agreements to which the IESO is party; and

(B) reports showing the results of searches conducted against the IESO under applicable personal property security registers in the Province of Ontario together with executed copies of all discharges or releases of prior security interests relating to the Regulatory Asset subject to the Transfer; provided that the IESO may establish that any particular registration does not affect the Regulatory Asset by delivering a letter or acknowledgment signed by the applicable secured party.

(b) The obligation of the Issuer to pay the Purchase Price related to each Transfer of a specified portion of the Regulatory Asset (including the initial Transfer) shall be subject to the satisfaction or waiver by the Issuer and the Indenture Trustee of each of the following conditions:

(i) as of the applicable Closing Date, all Program Agreements shall have been entered into on terms and conditions satisfactory to the Issuer and the Indenture Trustee and shall be in full force and effect as of such Closing Date;

(ii) as of the applicable Closing Date, no Insolvency Event in respect of the Transferor shall have occurred and the Transferor is not insolvent and will not have been made insolvent by such Transfer and the Transferor is not aware of any pending insolvency with respect to itself;

(iii) as of the applicable Closing Date, (A) the representations and warranties of the IESO in this Agreement must be true and correct with the same force and effect as if made on that date (except to the extent they relate to an earlier date), (B) no breach of any covenant or agreement of the IESO contained in this Agreement shall have occurred and not been waived, and (C) no Servicer Default shall have occurred and not been waived;

(iv) on or prior to the applicable Closing Date, the Transferor shall have taken all action required to provide for the Transfer, upon payment of the Purchase Price, of the specified portion of the Regulatory Asset as set forth in the applicable Transfer Notice on the Closing Date, free and clear of all Liens other than Liens created by the Issuer pursuant to the Program Agreements;

(v) the Transferor shall have delivered to the Indenture Trustee and the Issuer an Officer's Certificate confirming the satisfaction of each condition precedent specified in Sections 2.2(b)(i), (ii), (iii) and (iv);

(vi) the Transferor shall have delivered to the Indenture Trustee, the Rating Agencies and the Issuer any Opinions of Counsel reasonably required by them **[NTD: Scope of opinions required to be confirmed by the Dealers and their counsel]**;

(vii) as of the applicable Closing Date, (A) the Issuer shall have sufficient funds available to pay the Purchase Price as set forth in the applicable Transfer Notice, (B) all conditions to any incurrence of Funding Obligations intended to provide such funds set forth in the Indenture (and any applicable Supplemental Indenture) or other instrument shall have been satisfied or waived, (C) the Rating Agency Condition in respect of the issuance of the Funding Obligations funding the payment of the Purchase Price shall have been satisfied, and (D) the Funding Obligation required to fund the payment of the Purchase Price shall have been issued at the same time as, or prior to, the Transfer; and

(viii) after giving effect to the Transfer, each of the Fair Hydro Variance Account and the Regulatory Asset will have a balance or amount, as applicable, equal to or greater than zero.

ARTICLE 3
ROLE OF THE SERVICER

3.1 Designation of Servicer

Each Transfer of a specified portion of the Regulatory Asset shall be made on the basis that the related Issuer Investment Interest shall be fully serviced by the Servicer, and the IESO or any Permitted Successor of the IESO that is the Servicer shall not be entitled to receive any further compensation from the Issuer or the Indenture Trustee for its services in connection therewith. The Servicer acknowledges the responsibility of the Servicer for servicing the related Issuer Investment Interest corresponding to the specified portion of the Regulatory Asset Transferred by the Transferor under this Agreement and hereby agrees to perform the duties and obligations of the Servicer pursuant to the terms hereof at no additional cost to the Issuer.

3.2 Duties of Servicer Generally

(a) The Servicer shall:

(i) issue settlement statements to Electricity Vendors that include amounts in respect of the Clean Energy Adjustment as prescribed by the Act and the Regulations;

(ii) receive from Electricity Vendors amounts in respect of Electricity Vendor CEA Collections including payments made directly to the IESO as an Electricity Vendor (such amounts received being "**Servicer CEA Collections**");

(iii) hold and remit Servicer CEA Collections in accordance with Section 3.3;

(iv) receive information from Electricity Vendors in respect of CEA Consumer Invoice Amounts and Electricity Vendor CEA Collections and such other information as the IESO may reasonably request for the purposes of determining the IESO Deferral or such further information as may be required;

(v) determine and record the IESO Deferral for each month and make any necessary corrections thereto in accordance with the Act and the Regulations;

(vi) forecast electricity demand by Specified Consumers for Reference Periods;

(vii) provide information to the Board in respect of forecast electricity demand or any other information the Board may require from the Servicer to facilitate the Board's determination of the rates at which Specified Consumers are to be invoiced so as to enable full recovery of the Clean Energy Adjustment in respect of any Reference Period;

(viii) respond to inquiries by Electricity Vendors, the Board or any other Governmental Authority with respect to the Clean Energy Adjustment;

(ix) investigate and handle delinquencies by Electricity Vendors regarding Servicer CEA Collections (and furnish reports with respect to such delinquencies to the Issuer);

(x) process and deposit Servicer CEA Collections and make periodic remittances to the Issuer in accordance with Section 3.3;

(xi) furnish periodic and current reports to the Issuer, the Board, the Indenture Trustee and the Rating Agencies, as may reasonably be required by the Issuer;

(xii) take all necessary action in connection with Funding Rebates as set forth herein; and

(xiii) perform such other duties as may be reasonably required from time to time to be performed by it.

(b) Without limiting the generality of Section 3.2(a), in furtherance of the foregoing, the Servicer hereby agrees that it shall also have, and shall comply with, the duties and responsibilities relating to data acquisition, consumption and settlement statement calculation, settlement, collections, posting, payment processing and remittance with reasonable care and in material compliance with each applicable Requirement of Law, including the Act and the Regulations, using the same degree of care and diligence that the Servicer exercises with respect to similar assets for its own account and, if applicable, for others.

(c) Notwithstanding anything to the contrary in this Agreement, the duties of the Servicer set forth in this Agreement shall be qualified and limited in their entirety by the Act, the Regulations, all applicable laws and the rules and regulations promulgated thereunder as in effect at the time such duties are to be performed.

3.3 Remittances

(a) The Servicer shall establish an Eligible Deposit Account (the "**IESO Segregated Account**") bearing a designation clearly indicating that the funds deposited therein are held in trust for the benefit of the owners of Investment Interests. If at any time the IESO Segregated Account ceases to be an Eligible Deposit Account, the Servicer shall within 30 days establish a new IESO Segregated Account as an Eligible Deposit Account and shall transfer any cash and/or any investments held in the former account to such new account and make all future deposits to such new account.

(b) The Servicer shall deposit all Servicer CEA Collections into the IESO Segregated Account promptly following receipt by the Servicer and, in any event, within two Servicer Business Days of receipt by the Servicer and such Servicer CEA

Collections shall remain in the IESO Segregated Account until remitted in accordance with Section 3.3(d).

(c) The IESO agrees and acknowledges that it holds all Servicer CEA Collections and any other proceeds in respect of the Clean Energy Adjustment received by it in trust for the benefit of the Issuer, any other owner of Investment Interests, the Indenture Trustee and the Specified Creditors and that all such amounts will be remitted by the Servicer in accordance with this Section 3.3 without any surcharge, fee, offset, charge or other deduction. The IESO further agrees not to make any claim to reduce its obligation to remit all Servicer CEA Collections received by it in accordance with this Agreement.

(d) Absent the occurrence of a Daily Remittance Event, the Issuer Share of Servicer CEA Collections received by the Servicer during a Billing Period and any interest earned thereon shall be remitted by the Servicer to the Collection Account no later than the Remittance Date immediately following such Billing Period. Following the occurrence of a Daily Remittance Event, the Issuer Share of all Servicer CEA Collections on deposit in the IESO Segregated Account and any interest earned thereon shall be remitted by the Servicer to the Collection Account on each Servicer Business Day.

(e) On or before the **[2nd]** Servicer Business Day following the end of each Billing Period, the Servicer shall prepare and deliver to the Issuer, the Indenture Trustee and the Rating Agencies a written report substantially in the form of Exhibit B (a "**Monthly Report**").

3.4 Funding Rebates

(a) On or before the **[4th]** Servicer Business Day following the end of each calendar month in which no Clean Energy Adjustment is billed to Specified Consumers, the Issuer shall prepare and deliver to the IESO a written statement substantially in the form of Exhibit C (a "**Monthly Funding Rebate Statement**") setting out the aggregate amount of all (i) Funding Costs, (ii) Finance Reserve Deposits, (iii) Financing Entity Expenses, and (iv) Tax Liabilities (net of Tax Refunds), that were incurred by or on behalf of the Issuer during the previous calendar month ("**Monthly Funding Expenses**").

(b) On or before the **[10th]** Servicer Business Day following receipt by the IESO of the Monthly Funding Rebate Statement, the IESO shall deliver or cause to be delivered to the Issuer, by wire transfer in immediately available funds, an amount in Canadian dollars equal to the Monthly Funding Expenses set forth in the applicable Monthly Funding Rebate Statement (the "**Funding Rebate**").

(c) Concurrent with the payment by the IESO to the Issuer of any Funding Rebate as required under Section 3.4(b), the IESO shall increase the balance of the Fair Hydro Variance Account by an amount equal to the Funding Rebate and, as a consequence, the Regulatory Asset shall be adjusted accordingly.

[NTD: It may be necessary to have IESO pay an additional nominal Funding Rebate (i.e. $10) each time a Regulatory Asset is Transferred – for tax reasons.]

3.5 Reporting Functions

(a) Notification of Laws and Regulations. The Servicer shall promptly notify the Issuer in writing of any Requirement of Law hereafter adopted or announced or the occurrence of any other event or circumstance that has a material adverse effect on the Servicer's ability to perform its duties and obligations under this Agreement.

(b) Other Information. Upon the reasonable request of the Issuer, the Indenture Trustee or any Rating Agency, the Servicer shall provide to the Issuer, the Indenture Trustee or such Rating Agency, as the case may be, any public financial information in respect of the Servicer, or any material information regarding the Investment Interest or the Regulatory Asset to the extent it is reasonably available to the Servicer, as may be reasonably necessary and permitted by law to enable the Issuer, the Indenture Trustee or the Rating Agencies to monitor the performance by the Servicer of its duties and obligations hereunder. In addition, the Servicer shall provide the Issuer and the Indenture Trustee, within a reasonable time after written request therefor, any information available to the Servicer or reasonably obtainable by it that is necessary to calculate the Clean Energy Adjustment.

3.6 Servicing and Maintenance Standards

The Servicer shall monitor payments and impose collection policies on Electricity Vendors with respect to Electricity Vendor CEA Collections. On behalf of the Issuer, the Servicer shall: (a) manage, service, administer, collect and receive Servicer CEA Collections with reasonable care and in material compliance with each applicable Requirement of Law, including the Act and the Regulations, using the same degree of care and diligence that the Servicer exercises with respect to the collection of other amounts from Electricity Vendors for its own account and, if applicable, for others; (b) follow standards, policies and procedures in performing its duties as Servicer that are customary for an electricity market operator and administrator that regularly performs settlement functions; (c) use all reasonable efforts, consistent with its customary servicing procedures, to receive and hold Servicer CEA Collections in trust for the benefit of the Issuer; (d) comply with each Requirement of Law, including all regulations and guidelines, applicable to and binding on it relating to its duties hereunder; and (e) provide all information to the Board as required by the Act and the Regulations. The Servicer shall follow such customary and usual practices and procedures as it shall deem necessary or advisable in its servicing of all or any portion of the Investment Asset and the Issuer Investment Interest, which may include, at the direction of the Issuer, the taking of legal action, at the Issuer's expense but subject to the priority of payments set forth in **[Section 8.02(e)]** of the Indenture. In no event shall the Issuer Investment Interest be set off at any time by the IESO or any Permitted Successor thereof in connection with any default by such Person or otherwise.

3.7 Binding Effect of Servicing Obligations

The obligations to continue to provide services and to receive and account for Servicer CEA Collections and related amounts will be binding upon the Servicer and any Permitted Successor so long as the Servicer CEA Collections have not been fully received and posted. Any Person (a) into which the Servicer may be merged, converted or amalgamated and that is a Permitted Successor, (b) that may result from any merger, conversion or amalgamation to which the Servicer shall be a party and that is a Permitted Successor, (c) that may succeed to the properties and assets of the Servicer substantially as a whole and that is a Permitted Successor, or (d) that otherwise is a Permitted Successor, which Person in any of the foregoing cases executes an agreement of assumption to perform all of the obligations of the Servicer hereunder, shall be the successor to the Servicer under this Agreement without further act on the part of any of the parties to this Agreement; provided, however, that (i) immediately after giving effect to such transaction, no representation or warranty made pursuant to Section 4.1 shall have been breached and no Servicer Default and no event that, after notice or lapse of time, or both, would become a Servicer Default shall have occurred and be continuing, (ii) the Servicer shall have delivered to the Issuer and the Indenture Trustee an Officer's Certificate and an Opinion of Counsel from external counsel stating that such consolidation, conversion, merger or succession and such agreement of assumption complies with this Section 3.7 and that all conditions precedent, if any, provided for in this Agreement relating to such transaction have been complied with, and (iii) the Servicer shall have given to the Issuer prior written notice of such transaction. When any Person that is a Permitted Successor acquires the properties and assets of the Servicer substantially as a whole or otherwise becomes the successor, by merger, conversion, consolidation, sale, transfer, lease or otherwise, to all or substantially all the assets of the Servicer in accordance with the terms of this Section 3.7, then, upon satisfaction of all of the other conditions of this Section 3.7, the preceding Servicer shall automatically and without further notice be released from all of its obligations hereunder (except for responsibilities for its actions prior to such release).

3.8 Limitation on Liability of Servicer and Others

(a) Except as otherwise provided under this Agreement, including Section 6.1, neither the Servicer nor any of the directors, officers, employees or agents of the Servicer shall be liable to the Issuer or any other Person for any action taken or for refraining from the taking of any action pursuant to this Agreement or for good faith errors in judgment; provided, however, that this provision shall not protect the Servicer or any such Person against any liability that would otherwise be imposed by reason of negligence, recklessness or willful misconduct in the performance of duties or by reason of reckless disregard of obligations and duties under this Agreement. The Servicer and any director, officer, employee or agent of the Servicer may rely in good faith on the advice of counsel or on any document of any kind, *prima facie* properly executed and submitted by any Person, respecting any matters arising under this Agreement.

(b) Except as provided in this Agreement, the Servicer shall not be under any obligation to appear in, prosecute or defend any legal action relating to the Issuer Investment Interest that is not directly related to one of the Servicer's enumerated duties in this Agreement or related to its obligation to pay indemnification, and that in its

reasonable opinion may cause it to incur any expense or liability; provided, however, that the Servicer will, at the direction of the Issuer, in respect of any Proceeding, undertake any action that is not specifically identified in this Agreement as a duty of the Servicer but that the Issuer reasonably determines is necessary or desirable in order to protect the rights and duties of the Issuer or the Indenture Trustee under this Agreement and the interests of Specified Creditors under the Indenture.

3.9 The IESO Not to Resign as Servicer

Subject to the provisions of Section 3.7, the IESO shall not resign from the obligations and duties imposed on it as Servicer under this Agreement except upon a determination that the performance of its duties under this Agreement shall no longer be permissible under applicable Requirements of Law. Notice of any such determination permitting the resignation of the IESO as Servicer shall be communicated to the Issuer, the Indenture Trustee and each Rating Agency at the earliest practicable time (and, if such communication is not in writing, shall be confirmed in writing at the earliest practicable time), and any such determination shall be evidenced by an Opinion of Counsel to such effect delivered to the Issuer, the Indenture Trustee and each Rating Agency concurrently with or promptly after such notice. No such resignation shall become effective until a Successor Servicer that is a Permitted Successor has assumed the servicing obligations and duties hereunder of the Servicer in accordance with Section 7.2.

3.10 Appointments

(a) Subject to Section 3.10(b), the Servicer may at any time appoint any Person to perform all or any portion of its obligations as Servicer hereunder; provided, however, that the Rating Agency Condition shall have been satisfied in connection therewith; and provided, further, that the Servicer shall remain obligated and be liable under this Agreement for the servicing and administering of the Issuer Investment Interest in accordance with the provisions hereof without diminution of such obligation and liability by virtue of the appointment of such Person and to the same extent and under the same terms and conditions as if the Servicer alone were servicing and administering the Investment Interest. The fees and expenses of any such Person shall be as agreed between the Servicer and such Person from time to time, and none of the Issuer, the Indenture Trustee, Specified Creditors or any other Person shall have any responsibility therefor or right or claim thereto. Any such appointment shall not constitute a resignation of the Servicer under Section 3.9.

(b) The following matters shall be performed by the Electricity Vendors in accordance with the Act and shall not be considered an "appointment" for purposes of Section 3.10(a): (i) invoicing Specified Consumers in respect of the Clean Energy Adjustment and ancillary matters related thereto; (ii) collection from Specified Consumers of payments in respect of such invoices and remittance of such payments to the Servicer; and (iii) reporting to the Servicer the total CEA Consumer Invoice Amounts invoiced by such Electricity Vendor to its Specified Consumers in respect of the Clean Energy Adjustment, the total Electricity Vendor CEA Collections received by such Electricity Vendor and such other information the

IESO may reasonably request for the purposes of determining the IESO Deferral or such further information as may be required. The Servicer shall not be responsible or liable for the performance by Electricity Vendors of their duties and responsibilities under the Act or the Regulations or in respect of the matters set out in this Section 3.10(b).

3.11 Effective Period and Termination

The Servicer's appointment as Servicer under this Agreement shall become effective as of the execution hereof and shall continue in full force and effect until the earlier of (a) the effective date of resignation of the Servicer in accordance with the provisions of this Agreement, (b) termination of all of the rights and obligations of the Servicer under Article 7, and (c) the date on which all Issuer Funding Obligations have been paid in full and all CEA Consumer Invoice Amounts have been received or written off (in each case, a "**Termination Event**"). The appointment of the Servicer as servicer under this Agreement shall be terminated effective as of the date of the Termination Event.

ARTICLE 4
REPRESENTATIONS AND WARRANTIES OF THE IESO

4.1 Representations and Warranties

Subject to Section 4.3, the IESO makes the following representations and warranties as of the date hereof and as of each applicable Closing Date, and the IESO acknowledges that the Issuer and the Indenture Trustee will rely thereon in paying the Purchase Price related to Transfers of specified portions of the Regulatory Asset, and the Issuer has relied thereon in entering into this Agreement relating to the servicing of the corresponding Investment Interests.

(a) Organization and Good Standing. The IESO is a statutory corporation amalgamated under the laws of the Province of Ontario, with requisite power and authority to own its properties, to conduct its business as such properties are currently owned and such business is presently conducted by it, and to execute, deliver and carry out the terms of this Agreement, including, for greater certainty, acting as Servicer in accordance with this Agreement.

(b) Due Qualification. The IESO has obtained all necessary licences and approvals, in all jurisdictions in which the ownership or lease of property or the conduct of its business (including acting as Servicer under this Agreement) shall require such licences or approvals, except where the failure to so qualify or obtain such licences and approvals would not be reasonably likely to have a material adverse effect on the IESO's business, operations, assets, revenues or properties, the Regulatory Asset, the servicing of related Investment Interests, the Issuer or the repayment when due of the Funding Obligations.

(c) Power and Authority. The IESO has the requisite power and authority to execute and deliver this Agreement and to carry out its terms. The IESO has full corporate

power and authority to hold the Regulatory Asset and to Transfer specified portions of the Regulatory Asset to the Issuer and the IESO has duly authorized such Transfer to the Issuer by all necessary action. The execution, delivery and performance of all obligations under this Agreement have been duly authorized by all necessary action on the part of the IESO under all applicable laws.

(d) Binding Obligation. This Agreement constitutes a legal, valid and binding obligation of the IESO, enforceable against the IESO in accordance with its terms, subject to bankruptcy, receivership, insolvency, reorganization, moratorium or other laws affecting creditors' rights generally from time to time in effect and to general principles of equity (including concepts of materiality, reasonableness, good faith and fair dealing).

(e) No Violation. The consummation of the transactions contemplated by this Agreement and the fulfillment of the terms hereof by the IESO do not conflict with, result in any breach of any of the terms and provisions of, or constitute (with or without notice or lapse of time, or both) a default under, the IESO's by-laws, or any indenture, or other material agreement or instrument to which the IESO is a party or by which it is bound, result in the creation or imposition of any Lien upon any of the IESO's properties pursuant to the terms of any such indenture, agreement or other instrument or violate any existing law or any order, rule or regulation applicable to the IESO issued by any Governmental Authority having jurisdiction over the IESO or its properties.

(f) No Proceedings. There are no Proceedings or, to the IESO's knowledge, investigations pending or Proceedings threatened, before any Governmental Authority having jurisdiction over the IESO or its properties: (a) asserting the invalidity of this Agreement or the Act, (b) seeking to prevent the consummation of any of the transactions contemplated by this Agreement or the Act, or (c) seeking a determination or ruling that could reasonably be expected to materially and adversely affect the performance by the IESO of its obligations under, or the validity or enforceability of, this Agreement or the Act.

(g) Approvals. No approvals, authorizations, consents, orders or other actions or filings with any Governmental Authority are required for the IESO to execute, deliver and perform its obligations under this Agreement except those which have previously been obtained or made.

(h) Information.

(i) At the date hereof and as of each applicable Closing Date, all written information, as amended or supplemented from time to time, provided by the Transferor to the Issuer with respect to the Regulatory Asset is true and correct in all material respects and does not omit any material facts.

(ii) Each report and certificate delivered in connection with any filing made or information provided to the Board by the IESO in connection with the Act,

including on behalf of the Issuer with respect to Clean Energy Adjustments, will constitute a representation and warranty by the IESO that each such report or certificate, as the case may be, is true and correct in all material respects; provided, however, that, to the extent any such report or certificate is based in part upon or contains assumptions, forecasts or other predictions of future events, the representation and warranty of the IESO with respect thereto will be limited to the representation and warranty that such assumptions, forecasts or other predictions of future events are reasonable based upon historical performance (and facts known to the IESO on the date such report or certificate is delivered).

(i) The Transfer. On the applicable Closing Date, the specified portion of the Regulatory Asset as set forth in the applicable Transfer Notice shall be validly Transferred to the Issuer and the IESO will have no right, title or interest in the related Investment Interest and the related Investment Interest shall not form part of the estate of the IESO in the event of an Insolvency Event in respect of the IESO.

(j) No Transfer. Except pursuant to any Co-Owner Agreement, no portion of the Regulatory Asset has been sold, transferred, assigned, pledged or otherwise conveyed by the IESO to any Person other than the Issuer or the Indenture Trustee, and, to the IESO's knowledge (after due inquiry), no security agreement, financing statement or equivalent security or lien instrument listing the IESO as debtor covering all or a portion of the Regulatory Asset (or the corresponding Investment Interest upon the Transfer thereof) is on file or of record in any jurisdiction, except such as may have been filed or recorded in favour of the Issuer or the Indenture Trustee in connection with the Program Agreements.

(k) Title. The IESO is the sole owner of the specified portion of the Regulatory Asset that is to be Transferred to the Issuer on the applicable Closing Date, free and clear of all Liens.

(l) Tax Liens. After due inquiry, the IESO is not aware of any judgment or tax lien filing against the IESO.

(m) Solvency. On the date hereof and after giving effect to each Transfer, the IESO:

(i) is solvent and expects to remain solvent;

(ii) reasonably believes that it will be able to pay its debts as they come due; and

(iii) is able to pay its debts as they mature and does not intend to incur, or believes that it will not incur, indebtedness that it will not be able to repay at its maturity.

(n) No Court Order. There is no order by any court that seeks to enjoin the performance of any obligations of the IESO under the Act or this Agreement.

4.2 Survival

The representations and warranties set forth in Section 4.1 shall survive the execution and delivery of this Agreement, each Transfer of an Investment Interest to the Issuer and the pledge thereof to the Indenture Trustee pursuant to the Indenture and may not be waived by any party hereto except pursuant to a written agreement executed in accordance with Section 8.1 and as to which the Rating Agency Condition has been satisfied.

4.3 Limitations on Representations and Warranties

Notwithstanding anything in this Agreement to the contrary, the IESO makes no representation or warranty that the Issuer's Share of Servicer CEA Collections will be sufficient to satisfy in full the Issuer's Funding Obligations.

ARTICLE 5
COVENANTS OF THE IESO

5.1 Existence

Subject to Section 3.9, so long as any Funding Obligations are outstanding, the IESO (a) will keep in full force and effect its existence and remain validly existing under the laws of the Province of Ontario, and (b) will obtain and preserve its qualifications to do business in each jurisdiction in which such qualification is or will be necessary to protect the validity and enforceability of this Agreement and each other instrument or agreement to which the IESO is a party necessary for the proper administration of this Agreement and the transactions contemplated hereby.

5.2 No Liens

Except for (a) the Transfers under this Agreement to the Issuer or any Lien for the benefit of the Specified Creditors or the Indenture Trustee, and (b) following the Co-Owner Implementation Date, Transfers to other Financing Entities who enter into a Co-Owner Agreement with the Issuer and Liens granted in connection therewith to Persons advancing Funding Obligations to such other Financing Entities, the IESO will not sell, pledge, assign or transfer to any other Person, or grant, create, incur, assume or suffer to exist any Lien on, any portion of the Regulatory Asset, whether existing as of the applicable Closing Date or thereafter created, or any interest therein. The IESO will not at any time assert any Lien against or with respect to the Issuer Investment Interest, and will defend the right, title and interest of the Issuer and of the Indenture Trustee, on behalf of the Specified Creditors, in, to and under the Issuer Investment Interest against all claims of third parties claiming through or under the Transferor.

5.3 Notice of Liens

The IESO shall notify the Issuer and the Indenture Trustee promptly after becoming aware of any Lien on any portion of the Regulatory Asset, other than the Transfers hereunder and any Lien pursuant to the Program Agreements.

5.4 Compliance with Law

The IESO will comply with all Requirements of Law applicable to, and binding upon, the IESO or relating to the Regulatory Asset. the Investment Asset or Investment Interests, except to the extent that failure to so comply would not materially adversely affect the Issuer's, the Indenture Trustee's or the Specified Creditors' interests in the Issuer Investment Interest under any of the Program Agreements, the value of the Issuer Investment Interest, the timing or amount of Clean Energy Adjustments payable by Specified Consumers or the IESO's performance of its obligations under this Agreement; provided, however, that the foregoing is not intended to, and shall not, impose any liability on the IESO for non-compliance with any Requirement of Law that the IESO is contesting in good faith in accordance with its customary standards and procedures.

5.5 Covenants Related to the Investment Interest

(a) So long as any Issuer Funding Obligations are outstanding, the IESO shall treat the Issuer Investment Interest as the Issuer's property for all purposes.

(b) Except for passive investments held for employee benefit purposes, the IESO shall not at any time become a holder of Issuer Funding Obligations other than Funding Rebates.

(c) The IESO shall disclose the effects of all transactions between the IESO and the Issuer in accordance with generally accepted accounting principles (for government entities).

(d) The IESO agrees that upon completion of a Transfer, the IESO shall reduce the balance in the Fair Hydro Variance Account by the Purchase Price and will adjust the Regulatory Asset accordingly.

(e) (i) in all Proceedings relating directly or indirectly to the Issuer Investment Interest, the IESO shall affirmatively certify and confirm that it has Transferred all of its rights and interests in and to the specified portion of the Regulatory Asset giving rise to the Issuer Investment Interest, (ii) the IESO shall not make any statement or reference in respect of the Issuer Investment Interest that is inconsistent with the ownership interest of the Issuer, (iii) the IESO shall not take any action in respect of the Issuer Investment Interest except solely in its capacity as the Servicer thereof pursuant to this Agreement, and (iv) the IESO shall not sell any portion of the Regulatory Asset pursuant to the Act to any other Person unless a Co-Owner Agreement has been entered into and the Rating Agency Condition has been satisfied with respect thereto.

5.6 Non-petition Covenants

Notwithstanding any prior termination of this Agreement or the Indenture, the IESO shall not, prior to the date that is one year plus one day after termination of the Indenture and the payment in full of all Issuer Funding Obligations and any other amounts owed under the Indenture, petition or otherwise invoke the process of any Governmental Authority for the purpose

of commencing or sustaining a Proceeding against the Issuer under any Canadian bankruptcy, insolvency or similar law, appointing a receiver, liquidator, assignee, trustee, custodian, sequestrator or other similar official or any substantial part of the property of the Issuer.

5.7 Disclosure

The IESO shall provide all information regarding the IESO, the IESO Deferral, the Regulatory Asset or the services provided by the Servicer hereunder (collectively, the "**IESO Disclosure**") as may be reasonably requested by the Issuer for inclusion in any offering document of the Issuer from time to time, including but not limited to offering memoranda, prospectuses, registration statements and continuous disclosure documents and represents that all such information is, at the respective dates of delivery to the Issuer, true and correct, contains no misrepresentation and constitutes full, true and plain disclosure of all material facts relating to the IESO Disclosure.

5.8 Further Assurances

Upon the request of the Issuer, the IESO shall execute and deliver such further instruments and do such further acts as may reasonably be necessary to carry out the provisions and purposes of this Agreement.

5.9 Co-Owner Agreements

The IESO shall not continue as or become a party to any purchase and sale agreement or similar arrangement (other than this Agreement) under which it sells all or any portion of the Regulatory Asset unless (i) the Rating Agency Condition shall have been satisfied, (ii) the Indenture Trustee, the Transferor and the other parties to such additional arrangement shall have entered into a Co-Owner Agreement in connection therewith, and (iii) the terms of the documentation evidencing such purchase and sale arrangement or similar arrangement shall expressly exclude the Issuer Investment Interest (including the Issuer Share of any Servicer CEA Collections) from any receivables, rights or other assets pledged or sold under such arrangement and unless the purchaser under such arrangement is a Financing Entity.

5.10 Access to Certain Records and Information Regarding Investment Interest

The IESO shall provide to the Issuer and the Indenture Trustee access to all records relating to the IESO Deferral, the Fair Hydro Variance Account, the IESO Segregated Account and Servicer CEA Collections, as is reasonably required for the Issuer and the Indenture Trustee to confirm compliance by the IESO with its obligations under this Agreement and any other Program Agreements to which the IESO is a party. Access shall be afforded without charge, but only upon reasonable request and during normal business hours at the offices of the IESO. Nothing in this Section 5.10 shall affect the obligation of the IESO to comply with any Requirement of Law prohibiting disclosure of information, and the failure of the IESO to provide access to such information as a result of such obligation shall not constitute a breach of this Section 5.10.

5.11 Maintenance of Operations

Subject to Section 3.7, the IESO agrees to continue, unless prevented by circumstances beyond its control, to operate as the electricity system operator in the Province of Ontario in order to provide service so long as it is acting as the Servicer under this Agreement.

ARTICLE 6
IESO INDEMNITIES

6.1 Liability of the IESO; Indemnities

(a) The IESO shall indemnify the Issuer, the Indenture Trustee (for itself and for the benefit of the Specified Creditors), the Manager, the Administrative Agent and each of their respective trustees, officers, directors, employees and agents (each, an "**Indemnified Party**"), for, and defend and hold harmless each such Person from and against, any and all liabilities, obligations, losses, damages, payments and claims, and reasonable costs or expenses, of any kind whatsoever (collectively, "**Indemnified Losses**") imposed on, incurred by or asserted against any such Person as a result of (i) the failure of the IESO to perform its covenants and other obligations under this Agreement, any Co-Owner Agreement and any other Program Agreement to which the IESO is a party; (ii) the IESO's breach of any of its representations or warranties under this Agreement, any Co-Owner Agreement and any other Program Agreement to which the IESO is a party; and (iii) any litigation and related expenses relating to the IESO's status and obligations as Servicer (other than any Proceeding the IESO is required to institute under this Agreement), except to the extent of Indemnified Losses resulting from the willful misconduct, bad faith or gross negligence of such Person seeking indemnification hereunder; provided that, in each case, the IESO shall not be required to indemnify an Indemnified Party for any amount paid or payable by such Indemnified Party in the settlement of any Proceeding or investigation without the written consent of the IESO, which consent shall not be unreasonably withheld. Promptly after receipt by an Indemnified Party of notice (or, in the case of the Indenture Trustee, receipt of notice by a Responsible Officer only) of the commencement of any Proceeding or investigation, such Indemnified Party shall, if a claim in respect thereof is to be made against the IESO under this Section 6.1(a), notify the IESO in writing of the commencement thereof. Failure by an Indemnified Party to so notify the IESO shall relieve the IESO from the obligation to indemnify and hold harmless such Indemnified Party under this Section 6.1(a) only to the extent that the IESO suffers actual prejudice as a result of such failure. With respect to any Proceeding or investigation brought by a third party for which indemnification may be sought under this Section 6.1(a), the IESO shall be entitled to conduct and control, at its expense and with counsel of its choosing that is reasonably satisfactory to such Indemnified Party, the defence of any such Proceeding or investigation (in which case the IESO shall not thereafter be responsible for the fees and expenses of any separate counsel retained by the Indemnified Party except as set forth below); provided, that the Indemnified Party shall have the right to participate in such

Proceeding or investigation through counsel chosen by it and at its own expense. Notwithstanding the IESO's election to assume the defence of any Proceeding or investigation, the Indemnified Party shall have the right to employ separate counsel, and the IESO shall bear the reasonable fees, costs and expenses of such separate counsel, if (i) the defendants in any such action include both the Indemnified Party and the IESO and the Indemnified Party shall have reasonably concluded that there may be legal defences available to it that are different from or additional to those available to the IESO, (ii) the IESO shall not have employed counsel reasonably satisfactory to the Indemnified Party to represent the Indemnified Party within a reasonable time after notice of the institution of such action, (iii) the IESO shall authorize the Indemnified Party to employ separate counsel at the expense of the IESO, or (iv) in the case of the Indenture Trustee, such action exposes the Indenture Trustee to a material risk of criminal liability or forfeiture or a Servicer Default has occurred and is continuing. Notwithstanding the foregoing, the IESO shall not be obligated to pay for the fees, costs and expenses of more than one separate counsel for the Indemnified Parties other than one local counsel, if appropriate. The IESO will not, without the prior written consent of the Indemnified Party, settle or compromise or consent to the entry of any judgment with respect to any pending or threatened claim or Proceeding in respect of which indemnification may be sought under this Section 6.1(a) (whether or not the Indemnified Party is an actual or potential party to such claim or action) unless such settlement, compromise or consent includes an unconditional release of the Indemnified Party from all liability arising out of such claim or Proceeding.

(b) For purposes of Section 6.1(a), in the event of the termination of the rights and obligations of the IESO (or any successor thereto pursuant to Section 3.7) as Servicer pursuant to Section 7.1, or a resignation by such Servicer pursuant to this Agreement, the IESO shall be deemed to be the Servicer pending appointment of a Successor Servicer pursuant to Section 7.2.

(c) Indemnification under Section 6.1(a) shall include reasonable out-of-pocket fees and expenses of investigation and litigation (including reasonable legal fees and expenses), except as otherwise expressly provided in this Agreement.

(d) Indemnification under this Section 6.1 shall survive any repeal of, modification of, or supplement to, or judicial invalidation of, the Act and shall survive the resignation or removal of the Indenture Trustee or the termination of this Agreement and will rank *pari passu* with other general, unsecured obligations of the IESO. Other than provided in the preceding sentence, the IESO shall not indemnify any party under this Section 6.1 for any changes in law after the date hereof, whether such changes in law are effected by means of any legislative enactment or any final and non-appealable judicial decision.

(e) Except to the extent expressly provided in this Agreement (including the payment of the Purchase Price), the IESO hereby releases and discharges the Issuer and the Indenture Trustee, and each of their respective trustees, officers, directors and agents (collectively, the "**Released Parties**"), from any and all actions, claims and

demands whatsoever, whenever arising, which the IESO, in its capacity as Servicer or otherwise, shall or may have against any such Person relating to the Investment Interest or the IESO's activities with respect thereto, other than any actions, claims and demands arising out of the willful misconduct, bad faith or gross negligence of the Released Parties.

ARTICLE 7
SERVICER DEFAULT

7.1 Servicer Default

If any one or more of the following events (each, a "**Servicer Default**") shall occur and be continuing:

(a) any failure by the Servicer to remit to the Collection Account on behalf of the Issuer any required remittance that shall continue unremedied for a period of **[two/three][NTD: Rating Agencies will expect 2-3 days]** Business Days after written notice of such failure is received by the Servicer from the Issuer (with a copy to the Indenture Trustee) or the Indenture Trustee or after discovery of such failure by a Responsible Officer of the Servicer;

(b) any failure on the part of the Servicer or, so long as the Servicer is the IESO, any failure on the part of the IESO, as the case may be, duly to observe or to perform in any respect any covenants or agreements of the Servicer or the IESO, as the case may be, set forth in this Agreement (other than as provided in Section 7.1(a)) or any other Program Agreement to which it is a party, which failure shall (i) materially and adversely affect the rights of the Specified Creditors and (ii) continue unremedied for a period of 30 days after the date on which (A) written notice of such failure, requiring the same to be remedied, shall have been given to the Servicer or the IESO, as the case may be, by the Issuer (with a copy to the Indenture Trustee) or to the Servicer or the IESO, as the case may be, by the Indenture Trustee or (B) such failure is discovered by a Responsible Officer of the Servicer;

(c) any representation or warranty made by the Servicer in this Agreement, any other Program Agreement or in any Monthly Report, shall prove to have been incorrect when made, which has a material adverse effect on the Issuer, the Indenture Trustee or any other Specified Creditor and which remains unremedied for a period of 30 days after the date on which (i) written notice thereof, requiring the same to be remedied, shall have been delivered to the Servicer (with a copy to the Indenture Trustee) by the Issuer or the Indenture Trustee or (ii) such failure is discovered by a Responsible Officer of the Servicer;

(d) an Insolvency Event occurs with respect to the Servicer or the IESO;

(e) any additional "Servicer Default" as specified in any Co-Owner Agreement occurs; or

(f) the termination or withdrawal of the "Servicing Guarantee" under the Provincial Protection and Assurances Agreement. **[NTD: Subject to finalization of the Provincial Protection and Assurances Agreement.]**

then, and in each and every case, the Indenture Trustee shall, upon the instruction of the Specified Creditors evidencing a majority of the Outstanding Amount of the Issuer's Funding Obligations, subject to the terms of any Co-Owner Agreement, by notice then given in writing to the Servicer (and to the Indenture Trustee if given by the Specified Creditors) (a "**Termination Notice**"), terminate all the rights and obligations (other than the obligations set forth in Section 6.1 and the obligation under Section 7.2 to continue performing its functions as Servicer until a Successor Servicer is appointed) of the Servicer under this Agreement and under the Co-Owner Agreement. In addition, upon a Servicer Default described in Section 7.1(a), the Specified Creditors and the Indenture Trustee (or any of their representatives) shall be entitled to apply to a court of appropriate jurisdiction for an order for sequestration and payment of revenues arising with respect to the Investment Interest. On or after the receipt by the Servicer of a Termination Notice, all authority and power of the Servicer under this Agreement, whether with respect to the Investment Interest, the Clean Energy Adjustments or otherwise, shall, without further action, pass to and be vested in such Successor Servicer as may be appointed under Section 7.2; and, without limitation, the Indenture Trustee is hereby authorized and empowered to execute and deliver, on behalf of the predecessor Servicer, as attorney-in-fact or otherwise, any and all documents and other instruments, and to do or accomplish all other acts or things necessary or appropriate to effect the purposes of such Termination Notice, whether to complete the transfer of all documents and records related to the Regulatory Asset, the IESO Deferral, the Fair Hydro Variance Account and related documents or records, or otherwise (the "**Records**"). The predecessor Servicer shall cooperate with the Successor Servicer, the Issuer and the Indenture Trustee in effecting the termination of the responsibilities and rights of the predecessor Servicer under this Agreement, including the transfer to the Successor Servicer for administration by it of all Records and all cash amounts that shall at the time be held by the predecessor Servicer for remittance, or shall thereafter be received by it with respect to the Investment Interest or the Clean Energy Adjustment. As soon as practicable after receipt by the Servicer of such Termination Notice, the Servicer shall deliver the Records to the Successor Servicer. If a Successor Servicer has been appointed as a result of a Servicer Default, all reasonable costs and expenses (including reasonable legal fees and expenses) incurred in connection with transferring the Records to the Successor Servicer and amending this Agreement and any Co-Owner Agreement to reflect such succession as Servicer pursuant to this Section 7.1 shall be paid by the predecessor Servicer upon presentation of reasonable documentation of such costs and expenses. Termination of the IESO as Servicer shall not terminate the IESO's rights or obligations under this Agreement (except rights thereunder deriving from its rights as the Servicer hereunder).

7.2 Appointment of Successor Servicer

(a) Upon the Servicer's receipt of a Termination Notice pursuant to Section 7.1 or the Servicer's resignation or removal in accordance with the terms of this Agreement, the predecessor Servicer shall continue to perform its functions as Servicer under this Agreement, until a Successor Servicer shall have assumed in writing the obligations of the Servicer hereunder as described below. In the event of the Servicer's removal or resignation hereunder, the Indenture Trustee may, and at the

written direction and with the consent of the Specified Creditors evidencing a majority of the Outstanding Amount of the Issuer's Funding Obligations shall, but subject to the provisions of the applicable Co-Owner Agreement, appoint a Successor Servicer with the Issuer's prior written consent thereto (which consent shall not be unreasonably withheld), and the Successor Servicer shall accept its appointment by a written assumption in form reasonably acceptable to the Issuer. If, within 30 days after the delivery of the Termination Notice, a Successor Servicer shall not have been appointed, the Indenture Trustee may, at the direction of Specified Creditors evidencing a majority of the Outstanding Amount of the Issuer's Funding Obligations, petition a court of competent jurisdiction to appoint a Successor Servicer under this Agreement. A Person shall qualify as a Successor Servicer only if (i) such Person is permitted under the Act to perform the duties of the Servicer, (ii) the Rating Agency Condition shall have been satisfied with respect to such appointment, (iii) such Person enters into a master transfer and servicing agreement with the Issuer having substantially the same provisions as this Agreement and (iv) such Person agrees to perform the obligations of the Servicer under any Co-Owner Agreement. In no event shall the Indenture Trustee be liable for its appointment of a Successor Servicer. The Indenture Trustee's expenses incurred under this Section 7.2(a) shall be at the sole expense of the Issuer and payable from the Collection Account as provided in **[Section 8.02]** of the Indenture.

(b) Upon appointment, the Successor Servicer shall be the successor in all respects to the predecessor Servicer and shall be subject to all the responsibilities, duties and liabilities arising thereafter placed on the predecessor Servicer and shall be entitled to all the rights granted to the predecessor Servicer by the terms and provisions of this Agreement.

7.3 Waiver of Past Defaults

The Indenture Trustee, with the written consent of Specified Creditors evidencing a majority of the Outstanding Amount of the Issuer's Funding Obligations, may waive in writing any default by the Servicer in the performance of its obligations hereunder and its consequences, except a default in making any required deposits to the Collection Account in accordance with this Agreement. Upon any such waiver of a past default, such default shall cease to exist, and any Servicer Default arising therefrom shall be deemed to have been remedied for every purpose of this Agreement. No such waiver shall extend to any subsequent or other default or impair any right consequent thereto.

7.4 Notice of Servicer Default

The Servicer shall deliver to the Issuer, the Manager, the Indenture Trustee and the Rating Agencies promptly after having obtained knowledge thereof, but in no event later than five Business Days thereafter, written notice of any event that, with the giving of notice or lapse of time, or both, would become a Servicer Default under Section 7.1.

7.5 Cooperation with Successor Servicer

The Servicer covenants and agrees with the Issuer that it will, on an ongoing basis, cooperate with the Successor Servicer and provide whatever information is, and take whatever actions are, reasonably necessary to assist the Successor Servicer in performing its obligations hereunder.

ARTICLE 8
MISCELLANEOUS

8.1 Amendment

(a) This Agreement may be amended in writing by the IESO and the Issuer with (i) the prior written consent of the Indenture Trustee, and (ii) the satisfaction of the Rating Agency Condition. Promptly after the execution of any such amendment or consent, the Issuer shall furnish copies of such amendment or consent to each of the Rating Agencies.

(b) Prior to the execution of any amendment to this Agreement, the Issuer and the Indenture Trustee shall be entitled to receive and rely upon an Opinion of Counsel, which counsel may be an employee of or counsel to the Issuer or the IESO and which shall be reasonably satisfactory to the Indenture Trustee, or, in the Indenture Trustee's sole judgment, external counsel of the IESO stating that the execution of such amendment is authorized and permitted by this Agreement and that all conditions precedent provided for in this Agreement relating to such amendment have been complied with. The Issuer and the Indenture Trustee may, but shall not be obligated to, enter into any such amendment that affects their own rights, duties, indemnities or immunities under this Agreement or otherwise.

8.2 Notices

Any notice, report or other communication given hereunder shall be in writing and shall be effective (a) upon receipt when sent through the mails, registered or certified mail, return receipt requested, postage prepaid, with such receipt to be effective the date of delivery indicated on the return receipt, (b) upon receipt when sent by an overnight courier, (c) on the date personally delivered to an authorized officer of the party to which sent, or (d) on the date transmitted by electronic transmission with a confirmation of receipt in all cases, addressed as follows:

(a) in the case of the IESO, in its capacity as Transferor or Servicer:

Independent Electricity System Operator
[Address]

Attention: ■
Email: ■

(b) in the case of the Issuer or the Manager (on behalf of the Issuer):

[Financing Entity]
c/o Ontario Power Generation Inc., as Manager
700 University Avenue
Toronto, Ontario
M5G 1X6

Attention: ■
Email: ■

(c) in the case of the Indenture Trustee:

■
[Address]

Attention: ■
Email: ■

Each party hereto may, by notice given in accordance herewith to the other party or parties hereto, designate any further or different address to which subsequent notices, reports and other communications shall be sent. Any notice, report or communication required to be given by the IESO hereunder to a Rating Agency shall be given to the address provided by the Issuer from time to time.

8.3 Assignment

Notwithstanding anything to the contrary contained herein, except as provided in the provisions of this Agreement concerning the resignation of the Servicer, this Agreement may not be assigned by the IESO.

8.4 Limitations on Rights of Third Parties

The provisions of this Agreement are solely for the benefit of the IESO, the Issuer and, to the extent provided herein or in the other Program Agreements, the Indenture Trustee (for its own benefit and for the benefit of the Specified Creditors) and the other Persons expressly referred to herein, and such Persons shall have the right to enforce the relevant provisions of this Agreement. Nothing in this Agreement, whether express or implied, shall be construed to give to any other Person any legal or equitable right, remedy or claim in the Issuer Investment Interest or under or in respect of this Agreement or any covenants, conditions or provisions contained herein.

8.5 Severability

Any provision of this Agreement that is prohibited or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such prohibition or unenforceability without invalidating the remainder of such provision (if any) or the remaining provisions hereof (unless such construction shall be unreasonable), and any such prohibition or unenforceability in any jurisdiction shall not invalidate or render unenforceable such provision in any other jurisdiction.

8.6 Separate Counterparts; Electronic Delivery

This Agreement may be executed by the parties hereto in separate counterparts, each of which when so executed and delivered shall be an original, but all such counterparts shall together constitute but one and the same instrument. Delivery of an executed signature page to this Agreement by a party by electronic transmission will be as effective as delivery of a manually executed copy of this Agreement by such party.

8.7 Governing Law

This Agreement shall be construed in accordance with the laws of the Province of Ontario and the federal laws of Canada applicable therein, and each party to this Agreement attorns to the non-exclusive jurisdiction of the courts of the Province of Ontario.

8.8 Assignment to Indenture Trustee

The IESO hereby acknowledges and consents to any mortgage, pledge, assignment and grant of a security interest by the Issuer to the Indenture Trustee pursuant to the Indenture for the benefit of the Specified Creditors of all right, title and interest of the Issuer in, to and under this Agreement, the Investment Interest and the proceeds thereof and the assignment of any or all of the Issuer's rights hereunder to the Indenture Trustee for the benefit of the Specified Creditors. In no event shall the Indenture Trustee have any liability for the representations, warranties, covenants, agreements or other obligations of the Issuer hereunder or in any of the certificates delivered pursuant hereto, as to all of which any recourse shall be had solely to the assets of the Issuer subject to the availability of funds therefor under Section **[8.02]** of the Indenture.

8.9 Limitation of Liability of Indenture Trustee

It is expressly understood and agreed by the parties hereto that this Agreement is executed and delivered by the Indenture Trustee, not individually or personally but solely as Indenture Trustee on behalf of the Specified Creditors, in the exercise of the powers and authority conferred and vested in it. The Indenture Trustee in acting hereunder is entitled to all rights, benefits, protections, immunities and indemnities accorded to it under the Indenture.

8.10 Limitation of Liability of the Issuer Trustee

(a) It is expressly understood and agreed by the parties hereto that the Issuer Trustee is acting solely in its capacity as trustee of the Issuer, and not in any other capacity. The Issuer solely shall be responsible for the performance of the Issuer's obligations hereunder and the assets of the Issuer solely shall be subject to levy or execution in satisfaction of such obligations.

(b) The Issuer Trustee will not be subject to any liability whatsoever, in tort, in contract or otherwise, in connection with the Issuer's property or the Issuer's activities, to the Issuer's beneficiaries or to any other Person, for any action taken or permitted by the Issuer Trustee to be taken, or the Issuer Trustee's failure to compel in any way any former or acting Issuer Trustee to redress any breach of trust with respect to the execution of the duties of its office or in respect of the Issuer's property or

the Issuer's activities, provided that the foregoing limitation will not apply in respect of action or failure to act arising from or in connection with dishonesty, bad faith, willful misconduct, gross negligence or reckless disregard of a duty by the Issuer Trustee. The Issuer Trustee, in doing anything or permitting anything to be done in respect of the execution of the duties of its office or in respect of the Issuer's property or the Issuer's activities, is, and will be conclusively deemed to be, acting as trustee of the Issuer and not in any other capacity. Except as to the extent provided in this Section 8.10, the Issuer Trustee will not be subject to any liability for any debts, liabilities, obligations, claims, demands, judgments, costs, charges or expenses against or with respect to the Issuer, arising out of anything done or permitted by it to be done or its failure to take any action in respect of the execution of the duties of its office or for or in respect of the Issuer's property or the Issuer's activities and resort will be had solely to the Issuer's property for the payment or performance thereof. No property or assets of the Issuer Trustee owned in its personal capacity will be subject to levy, execution or other enforcement procedure with regard to any obligation under this Agreement.

(c) The holders of the units of the Issuer will not be subject to any liability whatsoever, in tort, in contract or otherwise, in connection with the Issuer's property or the Issuer's activities, to the Issuer's beneficiaries or to any other Person, for any action taken or permitted by it to be taken. The holders of the units of the Issuer will not be subject to any liability for any debts, liabilities, obligations, claims, demands, judgments, costs, charges or expenses against or with respect to the Issuer, arising out of anything done or permitted by it to be done or its failure to take any action in respect of the execution of the duties of its office or for or in respect of the Issuer's property or the Issuer's activities and resort will be had solely to the Issuer's property for the payment or performance thereof. No property or assets of the holders of the units of the Issuer owned in their personal capacity will be subject to levy, execution or other enforcement procedure with regard to any obligation under this Agreement.

8.11 Waivers

Any term or provision of this Agreement may be waived, or the time for its performance may be extended, by the party or parties entitled to the benefit thereof; provided, however, that no such waiver delivered by the Issuer shall be effective unless the Indenture Trustee has given its prior written consent thereto. Any such waiver shall be validly and sufficiently authorized for the purposes of this Agreement if, as to any party, it is authorized in writing by an authorized representative of such party, with prompt written notice of any such waiver to be provided to the Rating Agencies. The failure of any party hereto to enforce at any time any provision of this Agreement shall not be construed to be a waiver of such provision, nor in any way to affect the validity of this Agreement or any part hereof or the right of any party thereafter to enforce each and every such provision. No waiver of any breach of this Agreement shall be held to constitute a waiver of any other or subsequent breach.

8.12 Indenture Trustee Actions

In acting hereunder, the Indenture Trustee shall have the rights, protections and immunities granted to it under the Indenture.

8.13 Issuer Trustee

In acting hereunder, the Issuer Trustee shall have the rights, protections and immunities granted to it under the Declaration of Trust.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed by their respective officers as of the day and year first above written.

TRANSFER NOTICE

TO: **[FINANCING ENTITY]**
c/o Ontario Power Generation Inc., as Manager
700 University Avenue
Toronto, Ontario
M5G 1X6

Attention: ■
Email: ■

This Transfer Notice is delivered to you pursuant to Section 2.1 of a master transfer and servicing agreement made as of ■, 2017 (as the same may be amended, restated, supplemented or otherwise modified from time to time, the "**Master Transfer and Servicing Agreement**") between **[FINANCING ENTITY]**, a trust formed under the laws of the Province of Ontario (the "**Issuer**"), and the **INDEPENDENT ELECTRICITY SYSTEM OPERATOR** ("**Transferor**" in its capacity as transferor, "**Servicer**", in its capacity as servicer, and "**IESO**" in its capacity as both Transferor and Servicer), a statutory corporation without share capital amalgamated under the laws of the Province of Ontario, and acknowledged and accepted by **[INDENTURE TRUSTEE]**, a trust company existing under the laws of Canada and duly authorized to carry on the business of a trust company in all of the provinces and territories of Canada, as indenture trustee (the "**Indenture Trustee**"). All capitalized terms used but not otherwise defined herein shall have the respective meanings ascribed to such terms in the Master Transfer and Servicing Agreement.

The Transferor hereby gives notice to the Issuer of its desire to transfer to the Issuer on the Closing Date set out below, on a fully serviced basis, the specified portion of the Regulatory Asset set out below, all in accordance with the terms and conditions of the Master Transfer and Servicing Agreement. In consideration for (i) the Transferor's Transfer to the Issuer of the specified portion of the Regulatory Asset set out below, on a fully serviced basis, **[and (ii) the Transferor's agreement to pay to the Issuer all (a) Funding Costs, (b) Finance Reserve Deposits, (c) Financing Entity Expenses, and (d) Tax Liabilities (net of Tax Refunds) that are incurred by the Issuer in connection with such Transfer,]**[4] the Issuer shall deliver or cause to be delivered to the Transferor on the Closing Date set out below, by wire transfer in immediately available funds, an amount in Canadian dollars equal to the Purchase Price set out below.

Upon receipt by the Transferor of the Purchase Price on the Closing Date, (i) the Transferor shall reduce the balance of the Fair Hydro Variance Account by an amount equal to the Purchase Price and the Regulatory Asset shall be adjusted accordingly; and (ii) the corresponding Investment Interest shall immediately vest in the Issuer, free and clear of any adverse claim, and

4 Funding Rebate language to be included in Transfer Notice only when Clean Energy Adjustment is not being charged.

shall constitute a valid and enforceable absolute assignment, conveyance and sale of the corresponding Investment Interest.

Specified portion of Regulatory Asset: $■

Purchase Price: $■

Closing Date: ■

The Transferor hereby represents, warrants and confirms that:

(i) each of the representations and warranties on the part of the Transferor contained in the Master Transfer and Servicing Agreement are true and correct in all respects on the date hereof as if made on the date hereof;

(ii) the Transferor is not in breach of any of its covenants in the Master Transfer and Servicing Agreement; and

(iii) as of the date hereof, each condition precedent that must be satisfied by the Transferor under Section 2.2 of the Master Transfer and Servicing Agreement is capable of being satisfied prior to Closing Date.

The closing shall take place at ■ (Toronto time) on the Closing Date referred to above at the offices of ■, except as may be otherwise mutually agreed.

DATED this ■ day of ■, 20■.

Good suggestion from Gadi – we should probably touch base internally in advance of meeting with OPG. I wonder if we could try for a quick 30 min phone call either tomorrow or Friday.

I will reach out to OPG to set something up for next week.

Hi,

Please see the following comments from OPG / Torys on the guarantees.

I wonder if we are now at a point we should suggest sitting down with OPG on this perhaps early next week.

Thanks,

Scott

Scott:

Further to our discussion on the outstanding issues, please find below the comments from the Dealers on the “Markup” of the Provincial Protection and Assurance term sheet.

As noted below, the next step should be to get the appropriate parties from the Province to sit down with the dealers and OPG to go over the points and agree on a basis to move forward.

We should try to do that sometime next week. Let us know what times work on the Province side and we will coordinate with the Dealers & counsels.

John

Subject: EXTERNAL – Comments on Provincial Protection and Assurances Term Sheet - Fair Hydro

*** Exercise caution. This is an EXTERNAL email. DO NOT open attachments or click links from unknown senders or unexpected email. ***

John/Les/Ken,

Please find below an issues list on the Province's comments on the Provincial Protection and Assurances Term Sheet (formerly the Provincial Support Agreement). This list reflects input from the dealers, Oslers and Torys. Please let us know if you have any additional comments or questions. If not, will you be reaching out to the Province to schedule a meeting next week (with the dealers, OPG, the Province and their counsels) to discuss these points? The dealers and their counsel don't see value in exchanging further drafts of the term sheet until they have had an opportunity to meet with the Province. We agree with this approach and are happy to assist in coordinating a meeting for next week. It would also be helpful to hear the Province's rationale and concerns for making some of these changes. Please let us know.

Many thanks,

Nina

1. The Servicing Guarantee:

(a) It is written in favour of only the financing entity. However, in the MTSA, we are asking for covenants directly in favour of Indenture Trustee. The Indenture Trustee/specified creditors should have the direct benefit of the guarantee rather than relying on an indirect security interest in the servicing guarantee.

(b) It should be clarified that the servicing obligations of the electricity vendors are covered.

(c) If the guarantee is unenforceable, we should fall back to an indemnity, not a "functionally equivalent direct covenant" which is an uncertain concept.

(d) We don't want an exclusion for economic loss. That may cover whatever losses the specified creditors do suffer.

2. Change of Law.

(a) This should be written as a guarantee not an indemnity.

(b) It should be directly in favour of the Indenture Trustee/specified creditors and it should cover all the "finance amount" and not just funding obligations.

(c) We do not want the guarantee to be provided by another entity which is in turn guaranteed by Ontario. It should come directly from Ontario.

(d) There should be no "materiality" threshold for a claim. If obligations are not paid in full, then there should be a claim.

(e) The choice to assume or accelerate should be at the option of the holders, not the guarantor.

(f) If accelerated, then the 1% premium should be payable. This is a voluntary termination by the Province.

3. Undertaking Regarding Mismatches (market disruption)

(a) At best this structure defers the discussion of protection for a market disruption. At worst, it is impractical that take-out financing needs to be arranged in advance of each warehouse financing. We should rely on a definition of market disruption.

4. Approvals.

(a) Province to clarify what is contemplated under the heading “Approval Requirement”. Is Province proposing to approve any obligation incurred by the Financing Entity?

(b) Approval under Section 28 of the *Financial Administration Act* to be attained (in case the OFHPA is declared void in its entirety).

Subject: RE: EXTERNAL – Comments on Provincial Protection and Assurances Term Sheet - Fair Hydro
Date: Monday, July 10, 2017 11:26:07

Hi Cindy, Nadine – would 12-1:30pm on Wednesday work for you?

Thanks,

Kaitlin

Good suggestion from Gadi – we should probably touch base internally in advance of meeting with OPG. I wonder if we could try for a quick 30 min phone call either tomorrow or Friday.

I will reach out to OPG to set something up for next week.

Hi,

Please see the following comments from OPG / Torys on the guarantees.

I wonder if we are now at a point we should suggest sitting down with OPG on this perhaps early next week.

Thanks,

Scott

Scott:

Further to our discussion on the outstanding issues, please find below the comments from the Dealers on the “Markup” of the Provincial Protection and Assurance term sheet.

As noted below, the next step should be to get the appropriate parties from the Province to sit down with the dealers and OPG to go over the points and agree on a basis to move forward.

We should try to do that sometime next week. Let us know what times work on the Province side and we will coordinate with the Dealers & counsels.

*** Exercise caution. This is an EXTERNAL email. DO NOT open attachments or click links from unknown senders or unexpected email. ***

John/Les/Ken,

Please find below an issues list on the Province's comments on the Provincial Protection and Assurances Term Sheet (formerly the Provincial Support Agreement). This list reflects input from the dealers, Oslers and Torys. Please let us know if you have any additional comments or questions. If not, will you be reaching out to the Province to schedule a meeting next week (with the dealers, OPG, the Province and their counsels) to discuss these points? The dealers and their counsel don't see value in exchanging further drafts of the term sheet until they have had an opportunity to meet with the Province. We agree with this approach and are happy to assist in coordinating a meeting for next week. It would also be helpful to hear the Province's rationale and concerns for making some of these changes. Please let us know.

Many thanks,

Nina

1. The Servicing Guarantee:

(a) It is written in favour of only the financing entity. However, in the MTSA, we are asking for covenants directly in favour of Indenture Trustee. The Indenture Trustee/specified creditors should have the direct benefit of the guarantee rather than relying on an indirect security interest in the servicing guarantee.

(b) It should be clarified that the servicing obligations of the electricity vendors are covered.

(c) If the guarantee is unenforceable, we should fall back to an indemnity, not a "functionally equivalent direct covenant" which is an uncertain concept.

(d) We don't want an exclusion for economic loss. That may cover whatever losses the specified creditors do suffer.

2. Change of Law.

(a) This should be written as a guarantee not an indemnity.

(b) It should be directly in favour of the Indenture Trustee/specified creditors and it should cover all the "finance amount" and not just funding obligations.

(c) We do not want the guarantee to be provided by another entity which is in turn guaranteed by Ontario. It should come directly from Ontario.

(d) There should be no "materiality" threshold for a claim. If obligations are not paid in full, then there should be a claim.

(e) The choice to assume or accelerate should be at the option of the holders, not the guarantor.

(f) If accelerated, then the 1% premium should be payable. This is a voluntary termination by the Province.

3. Undertaking Regarding Mismatches (market disruption)

(a) At best this structure defers the discussion of protection for a market disruption. At worst, it is impractical that take-out financing needs to be arranged in advance of each warehouse financing. We should rely on a definition of market disruption.

4. Approvals.

(a) Province to clarify what is contemplated under the heading “Approval Requirement”. Is Province proposing to approve any obligation incurred by the Financing Entity?

(b) Approval under Section 28 of the *Financial Administration Act* to be attained (in case the OFHPA is declared void in its entirety).

Market participants.pdf

From:	Veinot, Cindy (TBS)
To:	Susan Nicholson; Kim Marshall
Cc:	Donaldson, Mark (TBS); Hosick, Sarah (TBS)
Subject:	Market participants
Date:	August 31, 2017 12:34:00 PM

Hi Susan and Kim – do you have a list of the market participants divided by producers and users that you could share with us. I've included the following in a deck re: the market accounts and wanted to have a few other entity names to reference. I don't need a complete list, so even 5 of the largest on each side would be great. Today if possible.

Thanks,

Cindy

Slide content

§ The IESO is a party to the contracts with each market participant, and each market participant either owes an amount to the IESO or is owed an amount from the IESO.

§ For example:

- Ontario Power Generation has a receivable from IESO recorded on its financial statements related to power generated, and historically, IESO did not have a payable recorded to Ontario Power Generation – now it does

- Hydro One has a payable to IESO recorded on its financial statements related to power purchases, and historically, IESO did not have a receivable recorded from Hydro One – now it does

A proposal to create Legislation.

Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

ELECTRICITY ACT, 1998

1. (1) Section 1 of the *Electricity Act, 1998* would be amended by adding the following clause:

[Note: GGRA provisions have been removed for now. Please confirm if they should be re-inserted.]

(2) Clause 1 (f) of the Act would be struck out and the following substituted:

(f) to protect the interests of consumers with respect to the adequacy, reliability and quality of electricity service;

(f.1) to protect the interests of consumers with respect to the prices they pay for electricity, including protection of those interests through the Hydro financing initiative;

[Note: Since the Hydro financing initiative is a defined term and is clearly required to be implemented under the new substantive provisions of the Act, I'm still not sure why this needs to be addressed in the purpose clause. However, I have included a purpose provision as per your instructions.]

Article 1 – Purpose

The proposed new legislation will likely include a large number of provisions intended to support the "financeability" of the structure. As a result, it may make sense for (LSB is exploring the potential) the Bill to create a new stand-alone energy statute, much like the *Green Energy and Green Economy Act, 2009* created the *Green Energy Act, 2009*.

The new legislation would have a purpose clause that explains the objective of intergenerational fairness. This would be useful for the markets to see, and may

Confidential Draft

help support the validity of the legislation from a constitutional law perspective (charge vs. tax)

x. Subsection 2 (1) of the Act would be amended by adding the following definitions:

"Financing Entity" means the trust established by Ontario Power Generation Inc. under clause XX (a) or the entity prescribed for the purposes of clause XX (b); ("French")

"hydro financing initiative" means those policies of the Government of Ontario related to its decision to ensure costs to Ontario electricity consumers are allocated fairly over time, taking into account the useful life of new sources of and technologies for electricity; ("French")

[Note: I have applied the precedent of the "smart metering initiative" as per your instructions. Just want to reiterate my concern that the reference to government policies is really vague (which initiative/ policies? At which point in time?) and I think this could cause lots of confusion, particularly if the policies evolve over time. It could also have unintended consequences.]

[Note: To consider -- by describing the initiative as we have in the above definition, we are potentially linking the deferred amount to amounts that would otherwise be paid for by consumers as part of the GA. If the deferred amounts are not all about "the useful life of new sources and technologies" then the description of the initiative should likely be broadened. (For example, if some of the deferred amount may be used to cover high wholesale prices, one could argue that the initiative is NOT about allocating costs fairly over time… it's just about pushing the cost increase to future consumers without considering what is "fair" across the generations.]

Article 2 - Definitions

The new legislation will include many new defined terms. One important term will be "Funding Shortfall" (or equivalent wording). This will be the net reduction in cash flows to IESO as a result of the reallocation of a portion of the Global Adjustment to later periods of time. Currently, the "Funding Shortfall" would be limited to the Global Adjustment attributable to the procurement contracts, but this is a question that still has to be settled.

Another important defined term that is worth noting is "Replacement Event". This is an event under which the market would want to replace a person who has responsibility to take essential actions under the program (including LDCs, IESO and OPG), like invoicing and collecting amounts.

Confidential Draft

The triggering events are likely to include insolvency and breach of duty/obligation.

Another key defined term is "Transition Charge". This is the amount that will be calculated and applied to the "deferral consumers", based on the amounts of payments due under funding obligations incurred to cover the funding shortfall (i.e., what we have until now been calling "deferral repayments").

Another important defined term will be "Treasury Plan". This will be the written plan prepared by OPG relating to the sale of the "regulatory asset(s)" to the OPG Financing Entity (sometimes previously referred to as the "Financing Trust") and the debt issued by the OPG Financing Entity to the markets.

Another defined term will be "True-up Amount". This is a key provision for the market. It allows for a catch-up for estimate/actual adjustments and to address consumer non-payment credit losses.

A further defined term will be "Undertaking of the Province". This will be a promise by the Government not to impair the program. This will be expected by the market, even though it will be understood that there may be issues for investors to enforce the promise, or get damages if there is a breach.

x. (1) Subsection 6 (1) of the Act would be amended by adding the following clauses:

(q.1) to enter into agreements or arrangements with the Financing Entity;

(q.2) to engage in activities related to making payments to and receiving payments from the Financing Entity under Part V.2, as required under this Act, and to engage in related settlement activities;

Note: Is some of this covered already by clause (i)? Could we address this by expanding upon clause (i)? Trying to understand whether there is any potential overlap.]

(q.3) to engage in activities related to the [sale/disposition/conveyance/assignment] of the [right/regulatory asset] created under section XX, which activities may include,

[Note: As discussed, please confirm terminology.]

(i) incurring liabilities in relation to the [right/asset];

Confidential Draft

(ii) [selling/assigning/disposing of?] the [right/asset] to the Financing Entity;

(iii) assigning [the right/asset] to third parties;

[Note: I don't understand (iii) -- I thought the rights to the asset were being assigned to the trust and nobody else?]

(q.4) acting as a recovery agent for the Financing Entity in relation to [the right/asset];

x. (1) Subsections 25.33 (1) and (2) of the Act would be repealed and the following substituted [TBD].

[Note: As per our telephone discussion today (March 27), there seems to be ongoing debate about the policy direction:

1. Do you want to amend the GAM so that the money received from the FE and the money recovered by the FE are part of the initial GA calculation?

2. Do you want to leave the GAM section as is and add a requirement (in a new section) for the IESO to conduct additional adjustments for a subset of the payments referred to in s. 25.33? This second adjustment would be engaged in after the existing GAM is calculated. So it would be a further adjustment of what has already been adjusted under the GAM.

Until this fundamental question is answered, we would be removing the proposed amendments to s. 25.33.]

OPTION 2:

Deferral adjustments, 25.33 amounts.

25.33.2 (0.1) For the purposes of this section and sections 25.34 and 25.35,

(a) "authorized entity" means **[the hydro financing trust established by Ontario Power Generation Inc. for the sole purpose of financing the recovery of the balance in the deferral account, or]** such **[other]** entity as may be prescribed by regulation;

(b) "deferral account" means the deferral account established under section 25.34;

(c) "deferral amount" means the amount recorded in the deferral account for each month during the deferral and recovery period;

(d) "deferral and recovery period" means the period from May 1, 2017 to April 30, 2047;

(e) "deferral consumer" means a consumer who is a member of a class of consumers prescribed by the regulations for the purposes of sections 25.34 and 25.35;

Confidential Draft

[NTD: This will be set out in a new subection 4(3) of O. Reg. 95/05 and will reflect OREC-eligible consumers other than non-grid connected customers of IPAs (who would not pay a GA charge anyway). Note that this is not quite the same as "RPP-eligible" consumers.]

(f) "electricity supply cost" means the amount calculated according to the formula:

$$(A + B + C + D) - E$$

where,

A is the amounts paid by the IESO to generators, the Financial Corporation and distributors, whether the amounts are determined under the market rules or under section 78.1, 78.2 or 78.5 of the *Ontario Energy Board Act, 1998,*

B is the amounts paid by the IESO to entities with whom the IESO has a procurement contract, as determined under the procurement contract,

[NTD: A and B use exactly the same wording as is set out in (a) and (b) of the existing ss. 25.33(1).]

C is

[NTD: C is the "net new" costs associated with the GA deferral. These are costs that the IESO will record in the GA deferral account established under s. 25.34, and that the IESO (or its assignee) will subsequently recover. These costs consist of the interest and financing-related admin costs associated with the GA deferral (which costs will be flowed through from the hydro financing trust to the IESO). These costs do not include the principal amount deferred and recovered, since that is already captured as part of A and B.

The "net new" costs in C will be recoverable solely from a newly prescribed class of consumers - deferral consumers (i.e. those consumers who will benefit from the GA deferral). The rules for the recovery of these costs will be part of a new subsection 4(3) of the RPP Regulation.]

D is any other amounts that may be prescribed by regulation,

[NTD: Paragraph D would give us flexibility to add new cost categories by reg. if/as needed now or later.]

[GGRA-related amendments are removed for the time-being]

and

E is any other amounts that may be prescribed by regulation;

[NTD: Paragraph E would give us flexibility to add new cost categories by reg.

Question for leg counsel: If in the future HOEP were to exceed contract prices and/or regulated rates, presumably the formula would still work (i.e. in such case the amounts for A and B would simply be negative amounts)?] *[ntd-LSB: IESO appears to agree with that idea, based on our shared appreciation of how EA s.25.33 works today.]*

(f) "reduction period" means the period commencing May 1, 2017 and ending April 30, 2018;

(g) "RPP Regulation" means Ontario Regulation 95/05 (Classes of Consumers and Determination of Rates).

Electricity pricing adjustments

Adjustments by IESO

(1) The IESO shall, through its billing and settlement systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of market participants in Ontario as are prescribed by regulation, reflect the electricity supply cost.

Adjustments by distributors and retailers

(2) Distributors and retailers shall, through their billing systems, make adjustments in accordance with the regulations that ensure that, over time, payments by such classes of consumers in Ontario as are prescribed by regulation, reflect the electricity supply cost.

[NTD: There will be two "classes of consumers in Ontario that are prescribed" for the purposes of RPP-"plus" deferral – the EA regulation that "prescribes" these two classes will refer to (or be aligned with) the two classes as described in the RPP Regulation. 1) The first class are the deferral consumers (see definition above), and 2) the second class (or defined base consumer) will be the "proxy" Toronto Hydro consumer whose bill will only be allowed to increase year-over-year according to rules prescribed in a new s. 6.1 of the RPP Regulation.]

Variance accounts

(3) The IESO shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by it under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation. *[ntd-DAN: I left "this section"*

even though this provision is part of a new s.25.33.2 – did you want "this section" to refer to "section 25.33"? If so, then we'd add this to the list we've started referencing proposed new s.25.34 and s.25.35. Consider.]

[Drafting note: We can prescribe the different variance accounts that must be maintained, and the different amounts that must be tracked and accounted for, by the IESO. Among other things, the IESO will presumably need to establish variance accounts related to the GA deferral and payback, to take into account timing and other differences. Any financing costs associated with these variance accounts (over and above the financing costs passed through to the IESO by the authorized entity (the hydro financing trust) would be subject to Board scrutiny.]

Same, distributors and retailers

(4) Distributors and retailers shall, in accordance with the regulations, establish and maintain such variance accounts as may be necessary to record all amounts payable or receivable by them under this section and under sections 25.34 and 25.35, in accordance with such rules and requirements as may be prescribed by regulation.

x. The Act would be amended by adding the following sections:

Deferral account

25.34 (1) The IESO shall establish a deferral account to record, for each month during the reduction period and the deferral and recovery period, the difference between,

(a) the amounts that would be payable by deferral consumers in respect of the electricity supply cost for the month under section 6.1 of the RPP Regulation; and

(b) the amounts payable by deferral consumers in respect of the electricity supply cost for the month under section 6.2 of the RPP Regulation.

[NTD: IESO to confirm whether the differences between (a) and (b) would be recorded monthly.

Explanatory note: The Board will determine a rate under a new s. 6.1 of the RPP Regulation that will essentially follow the same process the Board uses to establish the RPP rate, except that it will establish a rate for the deferral consumers (which is a slightly broader class than RPP consumers). The Board will also determine a "proxy" rate for the deferral consumers, calculated according to a different set of rules set out in a new s. 6.2 of the RPP Regulation. The rules in s. 6.2 will establish the "proxy" rate for a "proxy" Toronto Hydro customer consuming an average of 750 kWh/mth, to achieve an all-in tax-included total bill amount reduction of approximately 17% (the bill reduction for GA deferral + 8% OREC will result in an all-in bill reduction for May 1, 2017 – April 30, 2018 of 25% over the May 1, 2016 – April 30, 2017 period). There will be

additional rules dealing with bill increases and full repayment of the GA deferral by April 30, 2047.]

Note that because we refer to the new provisions in the RPP Regulation, we will need to amend that regulation *before* the introduction of the proposed legislative amendments. Drafting of the proposed RPP Regulation amendments is underway.

Do we need to create a parallel provision requiring distributors and retailers to establish deferral accounts as well?]

(2) The IESO shall record interest on the balance of the deferral account at a rate or rates reflecting the costs incurred by the IESO, or by any assignee under section 25.35, to finance the amounts recorded in the deferral account.

(3) The IESO shall also record in the deferral account the costs incurred by the IESO to finance the amounts recorded in the deferral account.

[NTD: This is a placeholder for what we will need here. The concept is that ss. (2) and (3) will ultimately apply to the interest and admin costs incurred by the hydro financing trust (assignee of the right of recovery under s. 25.35) in providing funds to the IESO to finance the GA deferral. Those interest costs and admin costs will be fully recoverable through section 25.35, subject to Board scrutiny presumably limited to verifying the calculations. This is not intended to address interest and costs incurred by the IESO and recorded in the variance accounts established under ss. 25.33(5).]

Recovery of GA deferral amounts

25.35 (1) The IESO shall have the right to fully recover the balance recorded in the deferral account. **[The Board shall authorize?]** recovery of the balance from the deferral consumers over the deferral recovery period in accordance with the prescribed rules.

[NTD: What role should the Board play in determining the amounts recovered each year (within the smoothing parameters that are prescribed)? For e.g., could the Board set rates such that the year-over-year increase in the proxy Toronto Hydro customer's all-in bill was less than the maximum permitted under the prescribed rules?

The prescribed rules will be set out in the new s. 6.2 of the RPP Regulation, which will determine how much the "proxy" Toronto Hydro customer's monthly average bill can increase year-over-year (after the reduction period). Basically, for the first four years after the reduction period, the increase will be limited to CPI. For the balance of the deferral and recovery period, the increases will be limited to 10%, with an overarching requirement that the deferral amounts be fully repaid by April 30, 2047.]

Assignment of right of recovery

(2) The IESO shall have the right to assign**[, in whole or in part?,]** to **[one or more?]** authorized entities, the IESO's rights under subsection (1).

[NTD: This is largely a placeholder for what needs to be addressed here. We will need to determine how to characterize this transaction. For e.g., will it be an outright assignment? Will it be a series of assignments? Should it be characterized as a "sale"? How will this transaction be implemented – e.g. by way of a contract between the IESO and the Trust? We will need the input of external counsel and others to ensure that it adequately supports the contemplated financings.]

Payments to assignee

(3) In the event of an assignment to an authorized entity under subsection (2), the IESO shall, through its billing and settlement systems, make payments to the authorized entity of the full amounts paid to the IESO in respect of the rights assigned.

[NTD: This is largely a placeholder for what needs to be addressed here. Iin addition to requiring IESO to make payments to the authorized entity, do we need to include explicit provisions giving the assignee the right to recover the amounts in the deferral account that are covered by the assignment?

We will need provisions dealing with billing and payment as between the authorized entity and IESO. We will also have to decide whether the interest and admin costs incurred by the authorized entity will simply be passed through to IESO, or whether the authorized entity (or OPG) will have an opportunity to keep any profits made on financing activities (swaps, etc.) by establishing some sort of "reference rate" that IESO would have to pay (and that might be different than the rate(s) the authorized entity would have to pay). A middle ground that could be considered would be to cap the amount of profits the authorized entity (or OPG) could make.

Along similar lines, the amounts charged by OPG to the authorized entity to provide admin services should be subject to Board review (e.g. for reasonableness). This would not jeopardize the ability of the authorized entity to recover all of its costs (since it would affect the amounts OPG could recover from the authorized entity).

We also need to contemplate a provision that if there is a change of law by the Government of Ontario that materially adversely affects the ability of the authorized entity to fully recover the assigned deferral account amounts, then repayment of those amounts will be accelerated and become immediately due and payable.]

x. The Act would be amended by adding the following provisions after s.29:

Transition Charges -- Ratepayer Obligation to Pay a Transition Charge

s.29.0.1 (1) Each consumer in the class of ratepayers to which this program applies (previously referred to as the "deferral consumers") will have a direct statutory obligation to the OPG Financing Entity to pay its share of the deferral repayments (principal, interest, financing costs).

Indebtedness of Ratepayers –
(2) This will be a debt owed by the consumer directly to the OPG Financing Entity. If it is not paid, the OPG Financing Entity can sue the consumer directly through the agreed procedures. This is identifying an explicit and identifiable revenue stream for the comfort of investors.

Separate tracking - distributors,
(3) This debt is separate from the debt owed by the consumer to its LDC, although the LDC will be the collection agent.

No set-off, etc. *[see similar provision at EA s.29.0.3(2)]*
(4) This debt cannot be netted out against any amount owed by the LDC to the consumer (e.g. year-end credit to consumer on equal monthly billing).

Allocation of Ratepayer Payments
(5) If a consumer pays less than its total invoiced amount, the payment will be allocated pro rata between the deferral repayment and the amounts owing to the LDC.

Transition Charges are Irrevocable

(6). This is intended to prohibit any reversal of amounts that must be paid to meet the terms and conditions of the funding obligations to be incurred under the program.

> **The deferral repayments are due regardless of whether a financing obligation incurred under the treasury plan is consistent with government policy at the time a related payment obligation arises.**
>
> **If the Fair Allocation Plan is amended after a funding obligation is properly incurred, any inconsistency in the payment profile will not impair the existing funding obligation or the pass-through of related payment amounts as Transition Charges.**

Anti-avoidance; No-by-pass

Confidential Draft

(7) The idea here tracks the U.S. transactions, which say that the obligation of a consumer to pay Transition Charges cannot be "by-passed". If a consumer leaves the grid, he or she will still be obligated. See the highlighted text in the definition of "Ratepayer" for a sense of how this may be accomplished.

> **This concept is a key to a rated market financing and will need to be developed further.**
>
> **For example, self-generating customers could be charged a flat fee (for example, equal to the amount that would be payable by the "representative" Toronto Hydro customer that underpins the current government policy on the 25% or some other basis.)**

Distributor, agent for Financing Entity,
s.29.0.2(1) LDC is agent for the OPG Financing Entity. LDC must invoice the deferral consumer the deferral repayment amount - referable to the items described in "Finance Amount" (i.e., an amount already borrowed).

IESO - Calculation of the Period Transition Charge

(2) IESO will calculate the total amount of deferral financing that will be repayable in an applicable [e.g. 6 month] period.

(3) IESO will then determine the deferral repayments due from deferral consumers based on a prescribed methodology for allocating payments to individual deferral consumers.

Notice of Transition Charges, IESO to distributors

(4) IESO will then inform each LDC of the amount of the deferral repayments to be included in the invoices issued to each deferral consumer in the LDC's service territory.

Adjustments *[ntd: Consider – Deferral repayment amount final]*

(5) Deferral consumers cannot challenge the amount of the deferral repayment showing on their invoice unless there is a substantial calculation error.

Successors of Electricity Distributors –
(6) Any successor of an LDC will be bound by the same obligations as the original LDC re: billing and collecting deferral repayments.

Confidential Draft

Successors of IESO –

(7) Any successor of the IESO will be bound by the same obligations as the original IES re: billing and collecting deferral repayments from distributors *[ntd-LSB: what about from consumers?].*

Appointment of an Alternative Invoicing Agent *[NTD – this provision may be moved closer to the powers/authorities of the OPG financing entity.]*

(8) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect deferral repayments. The LDC must sign whatever agreements and assignments are needed to enable the replacement agent to collect the deferral repayments from the LDC's deferral consumers.

Regulatory Asset Owner has Standing

(9) The OPG Financing Entity (or investors through their security) will be able to sue LDCs for failing to properly calculate or invoice the financing repayments.

29.0.3 Collections and Remittances [Collecting and Remitting Deferral Repayments]

(1) If a "replacement event" (as defined in any payment obligation incurred to fund a deferral) occurs in respect of an LDC or the IESO, the OPG Financing Entity can appoint someone else as the OPG Financing Entity's agent to collect and remit deferral repayments. The LDC (or IESO, as applicable) must sign whatever agreements and assignments are needed to enable the replacement agent to collect and remit the deferral repayments. "Replacement Events" are necessary to investors to safeguard against a person holding money in a distressed circumstance.

No Set-off, etc. *[see similar provision at EA s.29.0.1(3)]*

(2) The deferral repayments cannot be netted out against any amounts owed by the party responsible for collecting those repayments.

Sequestration,

(3) If any LDC or the IESO fails to remit deferral repayments, the OPG Financing Entity can get a court to order the LDC (or IESO, as applicable) to require them do so.

Confidential Draft

x. Subsection 53.1 (1) of the Act would be repealed and the following substituted:

Objects of Ontario Power Generation Inc.

53.1 (1) The objects of Ontario Power Generation Inc. include, in addition to any other objects, the following:

[Note: I know that the words "in addition to any other objects" appears in the current provision, but it seems very odd. This suggests that the objects are unlimited, which doesn't seem to be the intention but I could be wrong.]

1. Owning and operating generation facilities.

2. Establishing, operating and supervising the activities of entities for the purposes of supporting and promoting the government's hydro financing initiative.

3. Providing financial and other support to the IESO in its activities in relation to the hydro financing initiative.

4. Engaging in such financing, borrowing, lending and related activities and transactions to support the IESO with short-term or long-term financing.

5. Providing equity, not exceeding the prescribed amount, to support the financing capacity of the Financing Entity.

Subsidiaries

(1.1) Ontario Power Generation Inc. may create one or more subsidiaries in order to more efficiently conduct its activities or achieve its objects.

x. Section 53.2 of the Act would be repealed and the following substituted:

Rights of the Minister[1]

53.2 (1) The Minister, on behalf of Her Majesty in right of Ontario, may acquire, hold, dispose of and otherwise deal with securities or debt obligations of, or any other interest in, Ontario Power Generation Inc. or any of its subsidiaries.

Confidential Draft

[1] FLS - this provision is based on s. 49 of the Act

Agreements

(2) The Minister, on behalf of Her Majesty in right of Ontario, may enter into any agreement or arrangement that the Minister considers necessary or incidental to the exercise of a power under subsection (1).

x. The Act would be amended by adding the following Part:

PART V.2
HYDRO FINANCING INITIATIVE

FAIR HYDRO FINANCING PLAN

Establishment and adoption of the Fair Allocation Plan

A. 1 (1) The Minister of Energy [may/shall] establish a "fair allocation plan"

(a) The purpose of the plan is generally to try and reallocate the portion of GA attributable to the procurement contracts over the anticipated useful life of the generation assets under those contracts.

- **This is the intergenerational funding of the Green Generation Initiaitves.**
- **One policy question is whether the amounts deferred and the period over which the deferred amounts are repaid are to be limited to the portion of GA attributable to the procurement contracts and to the anticipated useful life of the [renewable] generation assets under those contracts.**

- From a constitutional validity perspective (and hence a financeability perspective) these limits are very important.

-Financial/economic modelling to verify this link is required.

Principles and Parameters,

(2) Based on this initial description (which is only illustrative to advance the initial stakeholder discussion), the Minister would determine the details of the "fair allocation plan", but must take into consideration the following principles:

- **The deferred GA costs should be spread over a period not exceeding the anticipated remaining useful life of the generation assets under the procurement contracts**
- **The plan should specify the length of the "reference periods", to identify which deferral consumers are responsible for which deferral repayments**

Confidential Draft

- **The share of the deferral repayments to be allocated to deferral consumers in each "reference period" should reflect a reasonable assessment of the remaining anticipated useful life of the generation assets under procurement contracts and perhaps to the benefits received by those deferral consumers from the procurement contracts (e.g. transition off coal)]**

- **No deferral consumer group should bear an unreasonably disproportionate share of the deferral repayments. That could be limited to a maximum amount, determined on a formula basis, if it makes sense tot he stakeholders**

- **In making the allocations, real (i.e. inflation-adjusted) dollars should be usedThe fair allocation plan is made using forward-looking information and projections.**

- **If, after the fact, the Minister determines that a Ratepayer Group paid more than would otherwise would have been the case had the projections for such period been accurate or other considerations come to light, adjustments to the plan could be made.**

Attribution Methodology

(3) The program will need to define how deferral consumers will be allocated an appropriate share of aggregate adjustment amount.

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

Confirmation][Review] of the Fair Allocation Plan – [OEB?]

(4) Consideration will be needed regarding the level of review and confirmation of the plan is needed or appropriate. For example, should the scope of review be limited to calculations only? If there is a need for review, then consideration will be needed as to who will be the reviewer and under what authority, etc.

THE TREASURY PLAN

Power to Prepare and Implement the Treasury Plan –

A.2 (1) The "Treasury Plan" will be prepared by OPG. It must follow the requirements set out in this Part. Accounting considerations will need to be factored into this delegation, as well as the degree of province input initially and on an on-

Confidential Draft

going basis. [Note for leg counsel: We will need to create the necessary sub-delegation authority]

Required Terms and Conditions of the Treasury Plan

(2) The Treasury Plan will establish the basis for OPG making funding decisions, which will need to align with the Fair Allocation Plan.

Power to Review and Approve the Treasury Plan

(3) The Minister may designate one or more persons to review, and require changes to the Treasury Plan. (This review could also be given to the Minister.) *[NTD-: Assumin no role for OEB – confirm. Any role for MOF/OFA here?]*

Obligation to Apply IESO Remittances,

(4) OPG will need to ensure that pass-through amounts, transferred to it as agent for the OPG Financing Entity, are only used to repay the debt and related costs.

Non-Recourse,

(5) The Treasury Plan will provide that the investors and other contracting parties will not have recourse to the IESO, LDCs, agents, the OEB or the Province, except where such parties fail to comply with applicable law. This may be modified in the contracts under which a financing arises.

> **NOTE: The documentation creating the Funding Obligations must expressly state that such obligations are not guaranteed by the Province.**
>
> **NOTE: See IESO/Stikeman's language for "Regulatory Asset" above.**

Incurrences are Binding,

(6) A failure to implement the Treasury Plan will not impair the pass-through of the deferral amounts or the validity of an otherwise valid funding obligation.

- **NOTE: Separate from the legislative provisions, we will also be preparing a very rough sketch of some of the items that might be included in the Treasury Plan direction.**
- **The sketch will be for illustration purposes only and will be for use in discussions with stakeholders including OPG and IESO.**

Crown bound, actions prohibited,

A.3 (1) No Action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or Collections – *[NTD: alternative* - Crown bound, prohibition against discriminatory action.

Confidential Draft

(2) The Province will be prohibited from taking or permitting any action to limit, alter, or impair or terminate Transition Charges, the Regulatory Asset or collections.

Undertaking and Agreement

(3) Under this Undertaking, the Province will agree for the benefit the OPG Financing Entity that it will not impair the value of the Regulatory Asset or the Transition Charges imposed under this Part. This "pledge" is in line with market expectations. Enforcement issues arise in this sort of undertaking, which will be assessed by the market and rating agencies based on the likelihood that a failure by the Province would lead to a successful damages claim. Unlike in the U.S., the law regarding such a claim is uncertain. Nevertheless, we expect that this sort of Undertaking will be requested in the legislation itself (i.e., requiring an act of the legislature to disavow – which is a higher bar than simply walking away from a contractual undertaking.

[Note: TBD where to place this Part within the Act and how to structure this Part. Temporary number (e.g. A1, A2, A3 etc.) has been used for now.]

FINANCING ENTITY

Financing Entity, established or prescribed

A1. (1) For the purpose of accomplishing the hydro financing initiative, the Minister may,

(a) direct Ontario Power Generation Inc. to establish and operate a trust; or

(b) direct Ontario Power Generation Inc. to [oversee? Administer?] an entity prescribed by the regulations.

[Note: Would the direction of the Minister include any additional instructions re timing etc.?]

Duty of Ontario Power Generation Inc.

(2) Ontario Power Generation Inc. shall comply with the direction of the Minister.

[Note: Once OPG takes action under A1 in accordance with the Minister's direction, what happens if at some point in the future, the Minister wants a different entity to take over the role of the FE? Is this a concern that needs to be addressed?]

Confidential Draft

Object of Financing Entity

A2. (1) The object of the Financing Entity is to finance the amounts required to accomplish the hydro financing initiative.

[Note: We are imposing several obligations on the Financing Entity (FE). As a practical matter, how will these obligations be enforced? Who will be responsible for meeting these obligations? (e.g. would there be directors or officers of the trust?). Or will the OPG be responsible for meeting these obligations as the body that establishes/manages the trust or oversees the designated entity?]

Activities

(2) To achieve the object, the Financing Entity shall engage in the following activities:

[Note: Just want to confirm that this should be "shall" and not "may".]

1. Borrowing funds from the Financial Corporation or from such other persons or entities [as may be prescribed?].

2. Investing funds.

3. Making payments and loans to the IESO or such other entity as may be prescribed in accordance with the regulations [or an order of the Board].

[Note: I think it would be best to specify whether the rules would be set out in a reg or in a Board order to avoid confusion.]

[Note: Should the "loans" language be removed, since you noted that the IESO is not "borrowing" from the FE?]

4. Receiving payments from the IESO or such other person or entity as may be prescribed in accordance with the regulations.

5. Issuing securities or debt ***[in the manner prescribed?].***

6. Engaging in any activities, including entering into such transactions, agreements or arrangements as may be prescribed and in accordance with the regulations.

Board review of expenditures, etc.

A3. (1) The Financing Entity shall, at least 60 days after the end of each fiscal year, submit its expenditures relating to its operations for the fiscal year including the expenses it has charged to Ontario Power Generation Inc. or the IESO, or that it has been charged by the Financial Corporation, in relation to those operations, to the Board for review.

Confidential Draft

[Note: The list of items that have to be reported on could be more prescriptive (e.g. specifying specific amounts to be set out) or it could also allow for the Board to specify what it wants to see in the report. Let me know if you'd like to adjust the wording of the requirement.]

Board recommendations, etc.

(2) The Board may review the expenditures and charges referred to in subsection (1) and make recommendations to the Financing Entity as are appropriate in order to ensure the most efficient operation and management of the Financing Entity in order to protect consumers.

[Note: Rather than saying "in order to protect consumers", should this say "in order to achieve the object of the FE"? Or perhaps this could just be deleted altogether with no need for replacement language.]

Deemed assets, entity,

A4. Despite any other provision of this Act or the *Business Corporations Act*, the assets and liabilities which are resident in and form part of the property of the Financing Entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries for any purpose.

[Note: You posed a question about excluding an OPG subsidiary from this rule. Please instruct.]

OBTAINING FINANCING

[Note: It will be important to read all of the provisions that follow against the provisions in the existing Act, to ensure there is no overlap/confusion being created due to potential interactions between existing authority and new authority. The drafting focus so far has just been to get the relevant substantive provisions into the draft without evaluating how they fit into the broader scheme of the Act.]

Ontario Power Generation Inc. to obtain financing

A5. (1) The IESO may direct Ontario Power Generation Inc. to cause the Financing Entity to engage in any of the following activities in order to accomplish the hydro financing initiative:

[Note: As a practical matter, how would OPG "cause the FE" to do these things? How is this different from "directing"?]

1. Financing, borrowing or lending to provide the IESO with short-term or long-term financing.

2. [Purchasing/receiving/obtaining the right created under section XX] and making any payments to the IESO that relate to the IESO's activities in support of the hydro financing initiative.

Confidential Draft

[Note: Not sure if the regulated assets would always be "purchased" or if other terminology might be needed. Please advise.]

3. Collecting from the IESO amounts that the IESO is required to pay in relation to its activities in support of the hydro financing initiative.

4. Assigning its [the IESO's?] rights to all or part of the regulatory assets established under section XXXX.

[Note: What is para. 4 about? If this is about forcing OPG to make the FE do things, then does this belong in the list? I thought that it was only the IESO that would be assigning the rights to the FE]

5. Such other activities as may be prescribed.

Same

(2) Ontario Power Generation Inc. shall comply with a direction under subsection (1) within the time specified in the direction [and any prescribed rules?].

IESO to enter into transactions

A6. (1) The IESO shall, in order to support the achievement of the hydro financing initiative, enter into transactions with the Financing Entity or any other entity for such amounts as are necessary to support the hydro financing initiative.

[Note: My understanding is that the need for "or any other entity" stems from the need to allow for the IESO to obtain temporary financing in the immediate term, before it is able to access the FE. Do you want to narrow this so that the IESO is only authorized to do this before the FE is up and running? Or do you want to keep it available on an ongoing basis?]

Same

(2) In entering into transactions under subsection (1), the IESO shall comply with the regulations.

RIGHT OF RECOVERY [CREATION OF REGULATORY ASSET]

[Note re the following provisions:
I found a provision dealing with the concept of "regulatory asset" in Bill 210 from 2002 (see s. 79.13 of the OEBA). It deems certain things to be regulatory assets but does not say much more. On the phone, you noted that the term "regulatory asset" does not have any legal meaning on its own but is just an accounting term that has been used to describe the statutorily created right of recovery. However, you also said that there may be a need to use this term in order to convey the intended meaning from an accounting perspective.

Confidential Draft

In order to ensure that the drafting captures the policy intent, please answer/address the following questions:

1. Should we be creating a statutory right of recovery or deeming certain amounts to be a regulatory asset? [NTD-LSB: Yes. The term "Regulatory Asset" has currency in commercial law (parliance) and since much of what we're doing is to support a securitization model, the term should remain for now. Further, the term "regulatory asset" was consistently referred to in the documents provided to ENERGY LSB by Blakes. Further, IESO/Stikemans offered up alternative language for the creation of a "regulatory asset" (as an intangible asset of sorts). You said you'd consult on whether the regulatory asset terminology is important to flag in the Bill.

2. You said you're not sure whether or not the Act will require the IESO to sell/assign the right. Please instruct. If it is optional for the IESO to sell/assign, then it seems that the right could in theory remain with the IESO (unless you are saying that the statute can just create the right of the FE to recover without any need for the right to be assigned/sold by the IESO… in which case please explain why we need to deal with the sale/assignment at all). Please clarify.

3. I'm assuming that if we are creating a right, then the right must be held by someone (e.g. the IESO) before it can be assigned/sold? So should the right be created in the Act for the IESO (e.g. the IESO has a right to recover the amounts from distributors and prescribed consumers) since the IESO would then sell/assign/transfer the right to the FE? The FE must also have the right to recover from the IESO itself, so that creates an extra complication.

4. Should there be some indication of when the right of recovery/regulatory assets will no longer continue to exist (e.g. once all of the amounts have been paid?). I notice that your instructions below about the debt indicate that the debt is no longer owing once the amounts are paid, but do we need to indicate that the regulatory asset also ceases to exist at that point?

Right of recovery created

A7. A right to recover the following amounts in full from the IESO, distributors and prescribed consumers is created.

1. The [deferred amount].

2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.

[Note: How will the Board be approving these costs? Is this related to the expenditure report submitted to the Board? That provision dealing with Board expenditures doesn't refer to any approval taking place… just a review and recommendations.]

Confidential Draft

[Note: Need to mention expenditures?]

3. Other amounts as may be prescribed or as may be approved by the Board.

Note: Are you going to be saying anything about how the interest will be calculated?

Sale [and/or?] assignment of [right? Regulatory assets?]

A8. (1) The IESO [may? Shall?], in accordance with the regulations, sell [and/or?] convey to the Financing Entity the right to recovery created established under section A7 on such terms and conditions as are provided for by the Financing Entity.

[Note: Your instructions include the terms "sell", "assign" and "convey" -- which are correct?]

[Note: Your instructions suggested that something other than the "regulatory assets" may need to be assigned to the FE. Are you referring to the "warehousing" liabilities assumed by the IESO in the early days? What else would need to be assigned? Could these items be listed above in A7 or is there a reason why they need to be kept separate?]

Sale deemed final

(2) The sale and conveyance referred to in subsection (1) is deemed to be final for all purposes.

[Note: What is this intended to achieve? Is this based on precedent language that has been interpreted to have the desired effect?]

Debts

(3) For greater certainty, the [amounts to which the FE has a right of recovery] are debts owing by the IESO, distributors and prescribed consumers to the Financial Entity until the amounts have been fully paid and fully discharged.

[Note: Why is subs. (3) necessary? Isn't it inherent in the sale of the regulatory assets that the FE would have acquired the future right to collect these amounts? Perhaps it is unclear that the amount can be collected from not just the IESO but from others down the chain. But isn't that what the "right of recovery" section above is meant to cover?]

[Note: I haven't checked to see how other similar provisions dealing with debts are drafted. Not sure we need the "for greater certainty" and also not sure what the distinction is between "fully paid" and "fully discharged". This provision will need further consideration. You also noted that you may want to specify who determines when all obligations have been satisfied.]

IESO to recover amounts

A9. The IESO shall recover the amounts set out in section A7 from distributors and prescribed consumers, in accordance with […]:

Note: how are the requirements that would determine recovery for this subsection meant to interact with the GAM reg?

Confidential Draft

[Note: The following two subsections are placeholders. You noted that *the provision is going to have to evolve to deal with consumers who exit the grid (disconnect) completely either because they leave the province or they decide to generate their own electricity and completely disconnect. You also want to be able to prescribe* methods of ensuring that the amounts required cannot be "by-passed". I'll need to understand what is meant by "by-passed".]

Distributors liable

(x) The IESO and distributors are entitled to compensation for any shortfall in relation to the amounts the IESO must pay to generators, the Financial Corporation or other persons including prescribed persons, under section 25.33 resulting from the IESO's activities under the hydro financing initiative.

Consumers liable

(X) Prescribed consumers are required to contribute towards the amount of any compensation referred to in subsection (4) in accordance with the amounts and methods prescribed by the regulations and such amounts shall not be by-passed.

USE OF FUNDS TO REDUCE ELECTRICITY BILLS

[Note: Depending on how things land with s. 25.33, this might be a place to explain how the transactions between the IESO and the FE translate into reduction in the electricity bills of RPP consumers. Regulations could specify how the IESO would ensure that the short-term rate reductions that flow from the FE amounts are only received by the targeted class of consumers and that this same class of consumers is the only class responsible for the repayment of FE funds in the long-term.]

ALTERNATIVE LANGUAGE – REGULATORY ASSET -- PROPOSED BY IESO (STIKEMANS)

Regulatory Asset Created

A7. (1) There is hereby created and conferred upon the IESO a "Regulatory Asset" consisting of the right to recover, in addition to the amounts otherwise recoverable, in accordance with the Regulations, the aggregate of the following amounts [from distributors and] prescribed consumers. **[Quare: do we regard the Regulatory Asset as a single asset in a variable amount or as different assets arising on each deferral]:**

1. The [deferred amount, including interest accrued thereon].
2. The amounts of costs relating to the operation or management of the Financing Entity, as are approved by the Board.
3. Other amounts as may be prescribed or as may be approved by the Board.

Confidential Draft

(2) The Regulatory Asset created by (1), shall constitute, for all purposes, a property right, shall be transferable by the IESO in accordance with Section A8, and shall constitute an intangible in which a security interest can be created for purposes of the *Personal Property Security Act*.

Election to Transfer Regulatory Asset

A8. (1) The IESO shall, from time to time, in accordance with the Regulations, elect to transfer to the Financing Entity all or any portion of the Regulatory Asset, on such terms and conditions as IESO may determine.

(2) Upon any election by the IESO pursuant to (1), the Financing Entity shall pay to the IESO in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, an amount, not less than the Deferred Amount, determined in accordance with the Regulations.

(3) Upon any election by the IESO pursuant to (1), the Financing Entity shall become the person entitled to the benefit of the Regulatory Asset, or the portion thereof in respect of which the election was made, free and clear of any adverse claim (other than any such claim created by the Financing Entity) and shall be entitled to exercise all of the rights and remedies conferred by or arising in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the IESO shall cease to have any rights (except as provided in Section A9) to or in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, all as if the Regulatory Asset, or the portion thereof in respect of which the election was made, had originally been conferred upon the Financing Entity and not the IESO.

(4) Upon any election by the IESO pursuant to (1), the IESO shall have no further rights or obligations in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and the Regulatory Asset, or the portion thereof in respect of which the election was made, shall not form part of the assets and liabilities of IESO for any purpose.

(5) The LG in Council may adopt regulations providing for the circumstances in which IESO shall make the election or elections provided for in (1).

Financing Entity may Grant Security Interest

A9. (1) The Financing Entity may, at any time after an election referred to in Section A8(1), create a security interest in favour of any person in all or any portion of the Regulatory Asset subject to such election, all on such terms and conditions as the Financing Entity may determine.

(2) Except as provided for in Regulations adopted pursuant to (3), *The Personal Property Security Act* shall apply to any security interest created pursuant to (1), except that the rights of the secured party on default shall be limited to receiving the amounts collected in respect of the Regulatory Asset, or the portion thereof subject to the security interest, as and when collected by the IESO in accordance with A10.

Confidential Draft

(3) The LG in Council may adopt regulations providing for the terms on which the security interest provided for in (1) can be created and perfected and for the priority of any such security interest.

IESO to Collect Amounts in Respect of the Regulatory Asset

A10. Subsequent to any election pursuant to Section A8, the IESO shall, as agent on behalf of the Financing Entity and any secured party, use reasonable efforts to collect the amounts owing in respect of the Regulatory Asset, or the portion thereof in respect of which the election was made, and shall promptly pay over to the Financing Entity or the secured party the amounts collected.

--------*END OF IESO/BLAKES ALTERNATIVE LANGUAGE FOR REG. ASSET ---*

------- *BLAKES VERSION OF LANGUAGE FOR REGULATORY ASSET*

The Regulatory Asset, Composition,

A7(1) The "regulatory asset" consists of the following:

- **present and future statutory obligation of:**
  - **deferral consumers - to make all deferral repayments (including interest and late payment fees)**
  - **LDCs - to invoice the deferral consumers for the deferral repayments and to remit the amounts collected to the IESO**
  - **IESO - to receive and remit the deferral repayments from LDCs to the OPG Financing Entity**
- **All deferral repayment amounts collected**
- **All amounts in LDC or IESO deferral payment bank accounts**

Validity of Dispositions

(2) This section is reinforcing by statute the "sale" of the asset to the Financing Entity. This has been an important feature of the legislation in other jurisdictions in similar circumstances. Specifically, it says that "Dispositions" of the Regulatory Asset are "true sales", and not subject to challenge. This is an essential requirement for a securitization transaction. This provision identifies possible grounds for a challenge that a sale took place and indicates that those events do not affect the validity of the sale.

Deemed Perfection and Priority of Dispositions

Confidential Draft

(3) This is reinforcing the automatic nature of the "sale" of the asset. It Provides for a clean sale to the OPG Financing Entity, free and clear of encumbrances (i.e., no specific need to "perfect" the sale.

Validity of Pledges,
(4) Statutory override permitting the OPG Financing Entity to give a security interest in the "regulatory asset" to investors.

> **This would give the investors (through an indenture) the right to enforce collection of the deferral repayments to pay off amounts owed by the OPG Financing Entity to the investors upon certain defaults by the OPG Financing Entity under an indenture.**

Deemed Perfection and Priority of Pledges
(5) This is reinforcing that a commercial pledge given by OPG Financing Entity is valid and will have priority without specific "perfection". The result is that a pledge of the Regulatory Asset as security in accordance with the Treasury Plan will be given priority to other claims. The Pledge includes proceeds from the Regulatory Asset and is not affected by comingling or the ordinary requirement to file a financing statement under the PPSA.

Enforcement of Property Rights –

(6) The rights of any Regulatory Asset Owner to collect and enforce its rights and interests in, to or in respect of the Regulatory Asset shall be exercised in the manner set forth in Article 5. ***[ntd-: NOT an annotation – pulled directly from Blakes' document.]***

Collective Action Required –
(7) This anticipates that the Regulatory Asset will be structured as a variable interest that can be divided between IESO (until it sells) and one or more OPG Financing Entitys. The likely format will be a co-ownership agreement, that will allow for different owners to have a fractional undivided ownership interest in the Regulatory Asset. Those will entitle the owners to a specified share of the cash flows, which will correspond to their finance payment obligations. This will allow for future financing flexibility.

MISCELLANEOUS

Fair Hydro Financing Plan, miscellaneous,

A.8 (1) Consideration will be given to whether any additional 'miscellaneous' provisions are needed (and expected by the market) to support the financing of this

Confidential Draft

structure. Some of these provisions are not typical in legislation, and so will need further consideration (in consultation with leg counsel).

Regulations

114(1.5) The LGIC may make regulations to implement the Fair Hydro Financing Initiative

-(a) The power to implement the program (and to set out some of the details of the program) through regulations is important. Decisions remain to be made (once the drafting is a little further advanced) about what provisions/details need to appear in the proposed legislation, and what provisions/details can be set out in regulations.

Confidential Draft

ONTARIO ENERGY BOARD ACT, 1998

x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [hydro financing initiative].

[Note: Would need to link with definition in the EA or else spell out the definition here - TBD.]

x. Section 27.1 of the Act would be amended by adding the following paragraph:

Hearings

(1.1) A directive may specify whether the Board is to hold a hearing, the circumstances under which a hearing may or may not be held and, if a hearing is to be held, the type of hearing to be held and the time within which it must be held.

The underlined is what makes this different from the other provisions in the Act that basically have the same wording. There are already a number of places in the Act where you have this type of hearings provision re directives (e.g., s. 27.2 (7)). If you basically want the same authority in each instance, then the wording should be consistent in each case. There are already some discrepancies between the current provisions (e.g., s. 27.2

(7) talks about types of hearings, whereas s. 28 (2) doesn't). Differences in wording will typically be presumed to be differences in meaning. So, the question is what you're intending to authorize in each case, and whether differences are intended. If you want the same thing everywhere, it should all be worded the same. Let me know.

[Note: Waiting for confirmation whether amendments to s. 78.7 are needed. Please advise.]

x. Section 78 of the Act would be amended by adding the following subsection after subsection (3.0.5):

Rates, fair hydro financing initiative activities -IESO, OPG, distributors, etc.
(3.0.6) The OEB would not be precluded from taking into account the performance of duties under this Part by any entity regulated by the OEB, including fees received by such entity in excess of the incremental costs of the provision of such services.

x. Section 79.16 (3) of the Act would be repealed and the following substituted:

Adjustment to eliminate variances

(3) In determining rates under clause (1) (b), the Board shall take into account balances in variance accounts established under section 25.33 of the *Electricity Act, 1998* and, subject to section X of that Act, make adjustments with a view to eliminating those balances within 12 months or such shorter time periods as the Minister may direct.
[Note: Please let me know what section the highlighted portion is supposed to refer to… is it the provision that says the IESO has the 30 year period to pay off the amount in the variance account for the hydro financing initiative? I wonder if this is confusing and whether the amendment to subs. (3) above works… it almost seems unnecessary to say that the Board has to "take into account" this balance, given that we are setting up a bunch of very specific rules about what has to be done by various entities in order to eliminate this amount. What would the Board be expected to do with information about this variance account? For consideration.]

Confidential Draft

PART VII.3

COMPLIANCE – FAIR HYDRO FINANCING INITIATIVE

Right of the [OEB] to Inspect Books and Records,
113 (1) OEB may be given the power to investigate compliance with the legislation and the power to examine books and records, etc.

Power to Investigate Compliance and Impose Regulatory Sanctions

(2) This legislation will not limit the OEB's power to investigate compliance or prevent or preclude the OEB's power to impose sanctions. The OEB can investigate compliance with this part and to impose regulatory sanctions for non-compliance.

Limitation, Board,

(2.1) The OEB cannot, however, take any action to affect the irrevocability of the Transition Charges or the Undertaking of the Province.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

All,

Attached for your review is a revised draft of the Change of Law Protection Agreement, clean and blacklined to the last version circulated by Blakes and reflecting the meetings held earlier today. As discussed, we need to provide the attached to the rating agencies **by no later than noon tomorrow** in order to meet our end of year financing deadline. Accordingly, we will be circulating a calendar invite to this group for 10 a.m. tomorrow morning to confirm the parties are signed off. If Osler or Blakes have any comments on the attached, we would ask that they be circulated to this group prior to the 10 a.m. call.

Kind regards,

Brett

Brett Saulnier

Subject: RE: Fair Hydro - Change of Law Protection Agreement

Hi,

Attached is a revised version of the Change of Law Protection Agreement. I believe that most of the changes reflected from last night's Osler version (blackline is attached) are of a drafting or conforming nature, other than: (1) the Province disagrees that Approved Refinancing terms should be unfettered by adherence conditions post-Suspension Event and (2) the proposed rating-based "materially and adversely" qualification in the definition of Protection Event (and in fact any such qualification) is not acceptable to the Province. With regard to (1), this version comes into line with the proposed approach (i.e., using a modified adherence condition) that was incorporated into the version of the Change of Law Process Agreement I circulated yesterday. A

further turn of that Agreement, to conform the open item identified in section 3.02 to the revised Change of Law Protection Agreement, is also included here for your reference.

Please note that the Province is working through the drafting concurrently and so further drafting comments may be provided.

As mentioned yesterday, the Province would like to proceed with the Ministers sign-off briefing early next week, on the basis that these versions (minus the explanatory notes) are now in substantially final form. Please identify if you believe there are other 'must have' points (other than the 2 mentioned above).

Regards, Steve

Subject: RE: Fair Hydro -- Change of Law Process Agreement

Hi,

Please find (attached) a further turn of the Change of Law Process Agreement, reflecting the Province's comments on the mark-up of the Agreement circulated yesterday afternoon by Torys. The attached blackline shows changes made to yesterday's Torys mark-up.

This version addresses concerns Rocco raised last night, to the extent the Province feels that the issues can be accommodated. For your information, I have set out below responses to Rocco's comments/observations (in CAPs).

The Province would like to proceed with the Ministers briefing early next week, on the basis that this version (minus the explanatory notes) is now in final form. If there are any critical revisions that the other parties believe reflect 'must have' priority, then the Province would like to have a call to discuss them as soon as possible.

Responses to Rocco's Points:

1. The change of the definition of Breach Event in Section 6.01 (i.e., the change to clause (a) and the addition of clause (b)) will result in an inconsistency with section 7.01(b) of the Change of Law Protection Agreement. This will require further consideration. [AGREED. 7.01(b) and 7.01(c) will need to mirror the cure language we settle on in the Process Agreement (see my earlier comments). Perhaps the "which continues …" language in 7.01(B) can be revised to read: "to the extent that the Province would be entitled to provide a Suspension Notice in accordance with the terms of the agreement or agreements between the Province and OPG under which such obligations, requirements and processes arise". SIMILAR CHANGE FOR 7.01(C).

2. The right of the Province to issue an objection notice under Section 3.04(b) in connection with a Transaction Document provided to the Province which is required for a Refinancing of an Approved Obligation remains an outstanding issue. Clearly, this will depend upon what Adherence Conditions will be required under Section 4.02 of the Change of Law Protection Agreement in order to permit such Refinancing to become an Approved Obligation. If the Adherence Conditions set out in Section 4.02(a) of the Province's draft of the Change of Law Protection Agreement of December 4 were to apply to such Refinancing, to the extent that such refinancing required a change to a Transaction Document (e.g., as a result of a change to some rating agency condition or criteria), the Province's ability to issue an objection notice and thereby prevent the issuance of a Process Certificate under Section 3.01 (by virtue of Section 3.04) would have the effect of preventing a Refinancing. We trust that this was an unintended outcome of the drafting of Section 3.04 and/or the Adherence Conditions applicable to Refinancings. [THAT IS THE INTENDED EFFECT. THE ADHERENCE CONDITIONS WOULD APPLY TO THE REFINANCING, SO IF THE REFINANCING TERMS DEVIATED MATERIALLY (BASED ON THE SUBSTANTIALLY IN THE FORM" THRESHOLD"), THEN OPG WOULD REQUIRE THE PROVINCE NOT TO OBJECT IN

ORDER TO PROCEED WITH THOSE NEW TERMS. OTHERWISE, THE REFINANCING COULD INCORPORATE TERMS AND CONDITIONS, WHICH WOULD BIND THE PROVINCE UNDER THE LIMITED GUARANTEE, THAT WOULD BE UNCONSTRAINED AND WITHOUT ANY ACCOUNTABILITY TO THE PROVINCE. IN ROCCO'S EXAMPLE, THAT MIGHT MEAN THAT OPG WOULD NEED TO RESORT TO UNRATED DEBT, IF THE PROVINCE WAS UNWILLING TO ACCEPT THE NEW TERMS. PRESUMABLY EVERYONE WOULD ACT RATIONALLY. HOWEVER, AS A FAILSAFE, OPG COULD OFFER INCREASED PRICING IN ORDER TO ATTRACT INVESTORS TO ACCEPT THE EARLIER VETTED TERMS (BASED ON THE THEN ACCEPTED REVIEWED DOCUMENTATION).]

3. Given that the Indenture Trustee is not a party to the Change of Law Process Agreement, the Province and OPG can amend the terms and conditions of this agreement without the consent of the indenture Trustee. Specified Creditors under an Approved Obligation need to be assured that the Province cannot prevent a Refinancing of an Approved Obligation either by virtue of the objection notice discussed in point #2 above or as a result of a future amendment to the agreement. There are a couple of ways to deal with this point. The first is to a add a beneficiary/third party rights clause in the Change of Law Process Agreement which acknowledges that the Indenture Trustee is a beneficiary of certain provisions of this agreement and as a result, the agreement cannot be amended without the consent of the Indenture Trustee. The second is to ensure that the Adherence Conditions relating to Refinancings under the Change of Law Protection Agreement are not dependent upon the terms of the Change of Law Process Agreement. In light of the desire to not disclose the terms and conditions of the Change of Law Process Agreement to the rating agencies, especially at this late stage in the process, we would expect that the latter approach would be preferable. [THE SUGGESTION REGARDING THE PROVINCE PREVENTING A REFINANCING IS ADDRESSED IN #2. IF THE REFINANCING TERMS WOULD EXCEED THE SCOPE OF THE TRANSACTION DOCUMENTS REVIEWED AND NOT OBJECTED TO BY THE PROVINCE, THEN THAT SUGGESTS THERE IS A MATERIAL EFFECT ON THE PROVINCE AND SO THE PROVINCE WOULD NEED THE ABILITY TO REVIEW AND CONSIDER THE PROPRIETY OF THOSE NEW TERMS FROM ITS PERSPECTIVE. AS FOR THE STANDALONE NATURE OF THE PROCESS AGREEMENT, THE INTENTION IS THAT THE PROCESS AGREEMENT BE UNCOUPLED AND NOT PART OF THE COLLATERAL, AND AS MICHAEL FELDMAN HAS EXPLAINED, LEAVE FUTURE FLEXIBILITY FOR THIS LONG-TERM STRUCTURE. TO ADDRESS ROCCO'S CONCERN THAT THE PROVINCE AND OPG COULD CHANGE THE UNDERLYING OBLIGATIONS APPLICABLE TO ADHERENCE IN RELATION TO A NEW OBLIGATION, REQUIREMENT OR PROCESS IN THE PROCESS AGREEMENT THAT WOULD MAKE A REFINANCING LESS LIKELY TO OCCUR, WE HAVE ADDED AND USED IN THE ATTACHED VERSION A NEW DEFFINTION:

“Approved Refinancing” means a Certified Primary Obligation proposed to be incurred as a Refinancing of an existing Certified Primary Obligation in respect of which the Adherence Conditions had been satisfied on the date such existing Certified Primary Obligation was incurred, that, at the time of incurrence, satisfies each of each of the Adherence Conditions except that the certificate contemplated to be delivered under Section 4.02(b) shall instead confirm that OPG has delivered to the Province a certificate by its applicable officers confirming that OPG would be in compliance with all obligations to the Province and internal requirements and processes in connection with the adherence of the Limited Guarantee to the proposed Certified Primary Obligation that applied as between the Province and OPG on the date of issuance of such existing Certified Primary Obligation.” Various references to “Refinancing” in the Protection Agreement can also be revised to refer to “Approved Refinancing”, as required.

Subject: RE: Fair Hydro -- Change of Law Process Agreement

I have reviewed the revised draft of the Change of Law Process Agreement that Torys has prepared and would like to pass along the following comments/observations:

1. The change of the definition of Breach Event in Section 6.01 (i.e., the change to clause (a) and the addition of clause (b)) will result in an inconsistency with section 7.01(b) of the Change of Law Protection Agreement. This will require further consideration.

2. The right of the Province to issue an objection notice under Section 3.04(b) in connection with a Transaction Document provided to the Province which is required for a Refinancing of an Approved Obligation remains an outstanding issue. Clearly, this will depend upon what Adherence Conditions will be required under Section 4.02 of the Change of Law Protection Agreement in order to permit such Refinancing to become an

Approved Obligation. If the Adherence Conditions set out in Section 4.02(a) of the Province's draft of the Change of Law Protection Agreement of December 4 were to apply to such Refinancing, to the extent that such refinancing required a change to a Transaction Document (e.g., as a result of a change to some rating agency condition or criteria), the Province's ability to issue an objection notice and thereby prevent the issuance of a Process Certificate under Section 3.01 (by virtue of Section 3.04) would have the effect of preventing a Refinancing. We trust that this was an unintended outcome of the drafting of Section 3.04 and/or the Adherence Conditions applicable to Refinancings.

3. Given that the Indenture Trustee is not a party to the Change of Law Process Agreement, the Province and OPG can amend the terms and conditions of this agreement without the consent of the indenture Trustee. Specified Creditors under an Approved Obligation need to be assured that the Province cannot prevent a Refinancing of an Approved Obligation either by virtue of the objection notice discussed in point #2 above or as a result of a future amendment to the agreement. There are a couple of ways to deal with this point. The first is to a add a beneficiary/third party rights clause in the Change of Law Process Agreement which acknowledges that the Indenture Trustee is a beneficiary of certain provisions of this agreement and as a result, the agreement cannot be amended without the consent of the Indenture Trustee. The second is to ensure that the Adherence Conditions relating to Refinancings under the Change of Law Protection Agreement are not dependent upon the terms of the Change of Law Process Agreement. In light of the desire to not disclose the terms and conditions of the Change of Law Process Agreement to the rating agencies, especially at this late stage in the process, we would expect that the latter approach would be preferable.

Subject: Fair Hydro -- Change of Law Process Agreement

Blakes team,

Please find attached OPG and Torys' comments on the Process Agreement reflecting our discussions from yesterday's call. Please note that this draft is subject to continuing review and comment by Osler and the dealers. As discussed at the tail end of our call yesterday, the section in the Process Agreement that gives the Province the right to object to new and material changes to transaction documents dovetails with the Protection Agreement so additional comments from Oslers may be forthcoming on this draft.

We are working on getting you a revised draft of the Protection Agreement either later today or tomorrow. In the meantime, please let us know if you have any comments or questions on the Process Agreement.

Best Regards,

Nina

TORYS
LLP

23239360-v30-Change of Law Protection Agreement.pdf

Draft: December 12, 2017

HER MAJESTY THE QUEEN IN RIGHT OF ONTARIO, AS REPRESENTED BY THE MINISTER OF ENERGY AND THE MINISTER OF FINANCE

AND

COMPUTERSHARE TRUST COMPANY OF CANADA, AS TRUSTEE OF FAIR HYDRO TRUST

AND

ONTARIO POWER GENERATION INC., AS FINANCIAL SERVICES MANAGER AND AS MANAGER OF FAIR HYDRO TRUST

AND

BNY TRUST COMPANY OF CANADA, AS INDENTURE TRUSTEE

CHANGE OF LAW PROTECTION AGREEMENT

Dated as of [■], 2017

This **AGREEMENT**, among Her Majesty the Queen in Right of Ontario, as represented by the Minister of Energy and the Minister of Finance (the "**Province**"), Computershare Trust Company of Canada, in its capacity as trustee (the "**Financing Entity Trustee**") of Fair Hydro Trust, a trust organized under the laws of the Province of Ontario (the "**Financing Entity**"), Ontario Power Generation Inc., in its capacity as Manager of the Financing Entity and in its capacity as the Financial Services Manager in accordance with the Act (the "**FSM**") and BNY Trust Company of Canada, a trust company existing under the laws of Canada, as Indenture Trustee, is made and entered into as of [■], 2017.

RECITALS

Pursuant to Subsection 5(3) of the *Ontario Fair Hydro Plan Act, 2017* (the "**Act**"), the Lieutenant Governor in Council may by order, authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province of Ontario, to agree to guarantee or indemnify certain debts, obligations, securities or undertakings associated with an Investment Interest.

Pursuant to an Order in Council 1981/2017 (the "**OIC**"), the Lieutenant Governor in Council has, among other things, authorized the Minister of Energy and the Minister of Finance, acting together on behalf of the Province of Ontario, to enter into one or more agreements to guarantee or indemnify the debts, obligations, securities or undertakings of one or more financing entities established or caused to be established pursuant to Subsection 22(2) of the Act by the FSM and that may incur Funding Obligations in connection with one or more Investment Interests.

Pursuant to a Declaration of Trust dated as of ■, 2017, the Financing Entity was established as a "financing entity" (as defined in the Act) for the purposes contemplated in the Act.

The Financing Entity Trustee, in its capacity as trustee of the Financing Entity, and the Indenture Trustee are parties to the Trust Indenture and propose to create and issue series of notes, bonds and other securities as contemplated therein, and to provide security over the assets and undertaking of the Financing Entity in respect of such notes, bonds and securities, as well as other Obligations Secured.

The Minister of Energy and the Minister of Finance, acting together on behalf of the Province of Ontario, have determined to provide protections and assurances to the Indenture Trustee, for the benefit of the Beneficiaries, in respect of Primary Obligations that constitute Approved Obligations, in order to address concerns that would arise from a change or adverse determination of law, subject in each case to the satisfaction of the Adherence Conditions at the time the Approved Obligation is incurred. This Agreement sets out the terms and conditions of such protections and assurances.

All things necessary to make this Agreement a valid and legally binding agreement of the Province, the Financing Entity, the FSM and the Indenture Trustee, in accordance with the Act, the OIC and the Trust Indenture, have been done.

AGREEMENT OF THE PARTIES

In consideration of the respective agreements herein contained, the parties hereto covenant and agree as follows:

ARTICLE I
DEFINITIONS AND OTHER PROVISIONS OF GENERAL APPLICATION

1.01 Interpretation

For all purposes of this Agreement, except as otherwise expressly provided or unless the context otherwise requires:

(a) the terms used in this Agreement that are defined in Schedule A have the meanings assigned to them in Schedule A, and any other capitalized terms not defined herein shall have the meanings assigned to them in the Trust Indenture;

(b) words importing the singular shall include the plural and vice versa, words importing general shall include all genders or the neuter, and words importing the neuter shall include all genders;

(c) all references to any Person shall include such Person's permitted successors and assigns, and any reference to a Person in a particular capacity excludes such Person in other capacities;

(d) references to any law, rule, regulation or order of a Governmental Authority (including, for greater certainty, references to the Act and the General Regulation) shall include such law, rule, regulation or order as from time to time in effect, including any amendment, modification, codification, replacement or reenactment thereof or any substitution therefor;

(e) the word "will" shall be construed to have the same meaning and effect as the word "shall". The word "or" is not exclusive;

(f) any reference to this Agreement or any other agreement, document or instrument shall be construed as a reference to this Agreement or, as the case may be, such other agreement, document or instrument as the same may have been, or may from time to time be, amended, varied, replaced, amended and restated, supplemented or otherwise modified;

(g) all references in this Agreement to designated "Articles", "Sections", "Subsections", "Schedules", "Exhibits" and other subdivisions are to the designated Articles, Sections, Subsections, Schedules, Exhibits and other subdivisions of this Agreement as originally executed. The words "herein", "hereof" and "hereunder" and other words of similar import refer to this Agreement as a whole and not to any particular Article, Section, Subsection, Schedule, Exhibit or other subdivision;

(h) "including" and words of similar import will be deemed to be followed by "without limitation"; and

(i) with respect to the computation of periods of time from a specified date to a later specified date, unless otherwise expressly stated, the word "from" means "from and including" and the words "to" and "until" each mean "to but excluding".

1.02 Trustee to act in accordance with the Trust Indenture

Any action taken, required to be taken or permitted to be taken by the Indenture Trustee under this Agreement shall only be taken in the manner, at the times, for the purposes, subject to the prerequisites, conditions, requirements and limitations, and with the benefits, exculpations, indemnities and protections that are provided to the Indenture Trustee, in each case in respect of such action taken, required to be taken or permitted to be taken by it under the Trust Indenture.

1.03 Proof of Approved Obligations

The efficacy of any agreement, instrument or writing evidencing a Primary Obligation may, in the absence of manifest error, be conclusively proved in any manner that the Manager deems to be sufficient.

Each statement delivered by the Manager under Section 2.01(a)i shall constitute *prima facie* evidence of the amount which, as at the date of the statement so prepared, is due and payable by the Financing Entity to the Beneficiaries and/or the Indenture Trustee and each of the parties hereby acknowledges and agrees that, absent manifest error, it shall be bound by each such statement. The Manager shall act diligently in the preparation of each such statement and shall provide the Indenture Trustee and the Province with all supporting computations and calculations used by the Manager to prepare each such statement promptly following a request therefor made by the Indenture Trustee or the Province.

1.04 Limitation on Rights of and Actions by Specified Creditors

Specified Creditors, as Beneficiaries, shall not have or be permitted to exercise any rights, interests, or elections under this Agreement, other than in the manner and to the extent effected and exercised under, in accordance with and subject to the limitations set forth in the Trust Indenture as of the date of this Agreement.

1.05 Province Retains Rights of Beneficiaries

Without limiting any rights of subrogation or succession that arise pursuant to applicable law or pursuant to the Province's rights as an assignee, subrogee or pursuant to Section 2.01 or Section 5.01, all of the rights, interests, elections and privileges that would arise in favour of a Beneficiary under the Trust Indenture or other Funding Obligation Agreement under which a related Primary Obligation arises shall automatically arise, vest in and be available to the Province to the extent of the performance by the Province of the Primary Obligation.

1.06 Effect of Headings

The Article and Section headings herein are for convenience only and will not affect the construction hereof.

1.07 Successors and Assigns

All covenants and agreements in this Agreement by the parties will bind their respective successors and permitted assigns, whether so expressed or not. All covenants and agreements of the Indenture Trustee, the Financing Entity, the Financing Entity Trustee, the Manager or the FSM in this Agreement shall bind their respective successors, co-trustees and agents.

1.08 Severability

Each of the provisions contained in this Agreement is distinct and severable and a declaration of invalidity or unenforceability of any such provision or part thereof by a court of competent jurisdiction will not affect the validity or enforceability of any other provision hereof. To the extent permitted by applicable law, the parties waive any provision of law which renders any provision of this Agreement invalid or unenforceable in any respect.

1.09 Governing Law

THIS AGREEMENT WILL BE CONSTRUED IN ACCORDANCE WITH AND GOVERNED BY THE LAWS OF THE PROVINCE OF ONTARIO AND THE FEDERAL LAWS OF CANADA APPLICABLE THEREIN, AND THE OBLIGATIONS, RIGHTS AND REMEDIES OF THE PARTIES HEREUNDER SHALL BE DETERMINED IN ACCORDANCE WITH SUCH LAWS.

1.10 Proceedings Against the Crown Act

NOTHING IN THIS AGREEMENT OR THE PROGRAM AGREEMENTS AFFECTS THE RIGHTS, PROTECTIONS AND IMMUNITIES OF THE CROWN UNDER THE PROCEEDINGS AGAINST THE CROWN ACT (ONTARIO).

1.11 Attornment

EACH PARTY SUBMITS TO THE EXCLUSIVE JURISDICTION OF ANY ONTARIO COURTS SITTING IN TORONTO IN ANY ACTION, APPLICATION, REFERENCE OR OTHER PROCEEDING ARISING OUT OF OR RELATED TO THIS AGREEMENT. THE PARTIES HERETO HEREBY WAIVE ANY RIGHT THEY MAY HAVE TO REQUIRE A TRIAL BY JURY OF ANY PROCEEDING COMMENCED IN CONNECTION WITH THIS AGREEMENT.

1.12 Counterparts; Electronic Delivery

This Agreement may be executed in any number of counterparts, each of which so executed will be deemed to be an original, but all such counterparts will together constitute one and the same instrument. Delivery of an executed signature page to this Agreement by a party by

electronic transmission will be as effective as delivery of a manually executed copy of the Agreement by such party.

1.13 Change of Law Protection Agreement Referred to in the Trust Indenture

This Agreement is the "Change of Law Protection Agreement" referred to in the Trust Indenture.

1.14 Non-Business Days

Whenever any payment to be made hereunder shall be stated to be due, any period of time would begin or end, any calculation is to be made or any other action to be taken hereunder shall be stated to be required to be taken, on a day other than a Business Day, then (notwithstanding any other provision of this Agreement) such payment shall be made, such period of time shall begin or end, such calculations shall be made and such other action shall be taken on the next succeeding Business Day.

1.15 Waiver, Amendment

Except as expressly provided in this Agreement, no amendment or waiver of this Agreement will be binding unless executed in writing by the party to be bound thereby. No waiver of any provision of this Agreement will constitute a waiver of any other provision nor will any waiver of any provision of this Agreement constitute a continuing waiver unless otherwise expressly provided. A party's failure or delay in exercising any right under this Agreement will not operate as a waiver of that right. A single or partial exercise of any right will not preclude a party from any other or further exercise of that right or the exercise of any other right.

1.16 Interest Act

For the purpose of disclosure pursuant to the *Interest Act* (Canada), the yearly rate of interest to which any rate of interest payable under this Agreement that is calculated on any basis other than a full calendar year is equivalent may be determined by multiplying such rate by a fraction, the numerator of which is the actual number of days in the calendar year in which such yearly rate of interest is to be ascertained and the denominator of which is the number of days comprising such other basis. The parties further agree that for the purposes of the *Interest Act* (Canada), (i) the principle of deemed reinvestment of interest shall not apply to any interest calculation under this Agreement, and (ii) the rates of interest stipulated in this Agreement are intended to be nominal rates and not effective rates or yields.

1.17 Currency

Unless stated otherwise, all amounts herein are stated in Canadian Dollars.

1.18 References to Acts of the Financing Entity

For greater certainty, where any reference is made in this Agreement, or in any other instrument executed pursuant hereto or contemplated hereby to which the Financing Entity or the

Financing Entity Trustee, as trustee of the Financing Entity, is party, to an act to be performed by, an appointment to be made by, an obligation or liability of, an asset or right of, a discharge or release to be provided by, a suit or proceeding to be taken by or against, or a covenant, representation or warranty (other than relating to the constitution or existence of the Financing Entity) by or with respect to (i) the Financing Entity or (ii) the Financing Entity Trustee, such reference shall be construed and applied for all purposes as if it referred to an act to be performed by, an appointment to be made by, an obligation or liability of, an asset or right of, a discharge or release to be provided by, a suit or proceeding to be taken by or against or a covenant, representation or warranty (other than relating to the constitution or existence of the Financing Entity) by or with respect to, the Financing Entity Trustee as trustee of the Financing Entity.

1.19 Judgment Currency

(a) If for the purpose of obtaining judgment in any court or for any other purposes (other than conversions specifically provided for in the agreement under which an Approved Obligation arises), it is necessary to convert any amount due under this Agreement from the currency in which it is due (the "**Original Currency**") into another currency (the "**Second Currency**"), the rate of exchange applied shall be that at which, in accordance with normal banking procedures, the purchaser could purchase, in the New York foreign exchange market, the Original Currency with the Second Currency on the date on which judgment is given. The obligation of the Province in respect of any Original Currency due from it to the Indenture Trustee under this Agreement shall, notwithstanding any judgment or payment in such other currency, be discharged only to the extent that, on the Business Day following receipt of any sum so paid or adjudged to be due under this Agreement in the Second Currency, the Indenture Trustee may, in accordance with normal banking procedures, purchase in the New York foreign exchange market the Original Currency with the amount of the Second Currency so paid or so adjudged to be due; and if the amount of the Original Currency so purchased is less than the amount originally due in the Original Currency, the Province shall indemnify the Indenture Trustee against such loss.

(b) The term "rate of exchange" in this Section 1.19 means the spot rate at which the Indenture Trustee, in accordance with normal practice, is able on the relevant date to purchase the Original Currency with the Second Currency and includes any premium and costs of exchange payable in connection with such purchase.

ARTICLE II
AGREEMENT TO PERFORM APPROVED OBLIGATIONS

2.01 Limited Guarantee

(a) Upon the occurrence of a Protection Event, the Indenture Trustee may deliver a written demand, substantially in the form attached as **[Exhibit A]** (a "**Payment Demand**"), to the Province requiring the Province to make payments in respect of the Approved Obligations at the times, in the amounts and subject to the requirements specified in this Agreement. From and after such delivery of a

Payment Demand, the Province shall make the following payments in respect of the Approved Obligations (the "**Limited Guarantee**"), the Financing Entity shall pay, and the Province shall be entitled to be paid, the Subrogation Amounts specified below, and the following terms shall apply:

i. Not less than three (3) Business Days prior to each day when any payment or payments are to be made in respect of one or more Approved Obligations occurring after such delivery of a Payment Demand (each such day, a "**Guarantee Payment Date**"), the Manager shall deliver a written statement setting forth the Aggregate Approved Obligations Amount, if any, in respect of the Approved Obligations that are due and payable on such Guarantee Payment Date, together with a detailed description identifying such Approved Obligations and the nature and amount of payments due and payable thereunder on the Guarantee Payment Date, the aggregate outstanding amount payable by the Financing Entity under such Approved Obligations as of the date of such written statement, and details regarding any default in performance by any party obligated thereunder.

ii. On each such Guarantee Payment Date, the Province shall deposit the Aggregate Approved Obligations Amount into the Protection Account.

iii. On each such Guarantee Payment Date, the Financing Entity and the Indenture Trustee shall ensure that the amounts on deposit in the Protection Account are applied to pay each Beneficiary to whom an amount is due and payable under an Approved Obligation on the Guarantee Payment Date the Approved Obligation Amount for such Beneficiary in respect of such Approved Obligation on such Guarantee Payment Date; provided that if the amount deposited pursuant to clause 2.01(a)ii is insufficient to pay all such Approved Obligation Amounts in full, the amount on deposit in the Protection Account on the Guarantee Payment Date shall be applied to pay Beneficiaries in the order of priority in which such Approved Obligations are payable under the payment provisions of the Trust Indenture applicable to the making of such payments on the Guarantee Payment Date (each, a "**Beneficiary Payee**" and each payment made to a Beneficiary Payee on a Guarantee Payment Date, a "**Guarantee Payment**").

iv. On the first Guarantee Payment Date and on each subsequent Guarantee Payment Date, Payment Date or other day on which any amount is required to be paid in respect of any Obligations Secured under the Trust Indenture (a "**Subrogation Payment Date**"), the Issuer and the Indenture

Trustee shall ensure that the applicable payment provisions of the Trust Indenture shall be applied and operate on the following basis[1]:

(A) If such day is a Guarantee Payment Date, then for each Approved Obligation for which amounts are paid to a Beneficiary Payee on such day pursuant to clause 2.01(a)iii in respect of principal, interest or any other amounts ("**Payable Approved Amounts**"), the amounts payable by the Financing Entity in respect of such amounts for such Approved Obligation shall be reduced by the respective amounts of such payments to the Beneficiary Payee, and equivalent amounts shall be payable by the Financing Entity to the Province as "**Subrogation Amounts**" in respect of such Approved Obligations, such Subrogation Amounts being payable in the same order of priority and with the same entitlements accruing to the Province as applied in respect of the related Payable Approved Amounts which were previously owing to the Beneficiary Payee, and to reflect this subrogation the payments set out in clause 2.01(a)iv(B) below shall be made by the Financing Entity.

(B) If the Province has made all deposits required to be made by it on each Guarantee Payment Date occurring on or before such day in accordance with clause 2.01(a)ii (or the related Approved Obligation Amounts have otherwise all been paid in full), then in respect of each Approved Obligation for which any related Subrogation Amounts have not yet been paid in full to the Province, the Financing Entity shall pay to the Province from amounts available under the Trust Indenture payment provisions and in accordance with the priority of payment provisions in the Trust Indenture the amount that would be payable on such date in satisfaction of the relevant Payable Approved Amounts, as determined without regard to any Guarantee Payment paid on any Guarantee Payment Date and also without regard to the corresponding reduction of the amounts owing to present and former Beneficiary Payees pursuant to subclause 2.01(a)iv(A) up to the amount of the unpaid related Subrogation Amounts.

(C) No Beneficiary having a right to be paid an amount in respect of an Approved Obligation, and no other Person entitled under an Obligation Secured, in each case that

[1] Explanatory Note: The deletion of the paramountcy provision is acceptable as long as section 2.01 if fully reflected in the Trust Indenture. To be confirmed.

ranks equal with or subordinate to the Payable Approved Amount in respect of which a Subrogation Amount is payable to the Province under subclause 2.01(a)iv(B), shall be entitled to make any claim or assert any right in or to the amounts paid or payable to the Province under such subclause (including any right of set-off, offset, reimbursement, contribution or indemnity) and no such Beneficiary or other Person shall have any right or interest in, to or under the Collateral or any proceeds therefrom in respect of any such Subrogation Amount.

(D) For greater certainty, the entitlements of the Province in respect of Subrogation Amounts arising in respect of Payable Approved Obligations that are interest and principal obligations on Notes shall be treated for all purposes of the Trust Indenture as interest and principal obligations, respectively, arising under Notes having the same priority as and any applicable voting rights[2] under the related Approved Obligations, and accordingly the Province (and any successor, assignee or transferee of such entitlements) shall be entitled to all of the rights, entitlements, interests and privileges of a Holder of such a Notes in accordance with the Trust Indenture, as supplemented by the Supplemental Indenture or other indenture document under which the related Approved Obligations were issued.

(b) On each Guarantee Payment Date and upon demand by the Province, the Indenture Trustee shall release and pay to the Province free and clear of any Liens any amount remaining on deposit in the Protection Account that has not been applied to pay Guarantee Payments to Beneficiary Payees on the Guarantee Payment Date in accordance with clause 2.01(a)iii or that otherwise remains on deposit in the Protection Account on the relevant date.

(c) In preparing any payment instructions under the Trust Indenture, the Manager shall reflect the amounts payable under Section 2.01(a), if applicable.

(d) The Province shall, as a payee of Subrogation Amounts under clause 2.01(a)iv(B) and as a payee of any amounts payable under clause 2.01(a)v, be a "Specified Creditor" under the Trust Indenture and have the benefit of the Collateral thereunder.

[2] Explanatory Note: As discussed, the Province understands that voting rights may be muted by the "outstanding" language in the Trust Indenture. Nevertheless, if voting rights would arise under the Trust Indenture they should be available to the Province.

(e) For greater certainty, the Limited Guarantee will not apply to any amount or obligation of the Financing Entity that is not or does not arise under an Approved Obligation and will be limited to the right to receive the Approved Obligation Amounts, if any, for payment to Beneficiary Payees and will be subject to the priorities and to the Province's rights to Subrogation Amounts, set forth in Section 2.01(a).

(f) Except as expressly provided in this Agreement, the Province's obligation to provide and perform the Limited Guarantee shall be irrevocable, absolute and unconditional.

(g) Any amount payable by the Province under the Limited Guarantee in respect of an Approved Obligation that is not paid by the Province when required herein shall bear interest from the applicable due date until paid in full at the rate or rates expressed to be payable on the Approved Obligation by their terms.

(h) Any amount payable to the Province in respect of a Subrogation Amount shall bear interest from and including the date of payment by the Province of the related Guarantee Payment to but excluding the date of payment of the Subrogation Amount to the Province, such interest to accrue at the rate equivalent to the applicable interest rate borne by the related Approved Obligation, and such interest amounts shall be added to their respective Subrogated Amounts and shall consequently be payable in the same priority as the relevant Subrogated Amount under clause 2.01(a)iv(B), all such accruing interest amounts to be calculated and added to the Subrogation Amounts by the Manager in its discretion acting in a commercially reasonable fashion.

(i) The right to deliver a Payment Demand and thereupon enforce the Limited Guarantee shall constitute the only remedy available to the Indenture Trustee (and to the Beneficiaries, to the extent they are permitted to exercise any rights, interests, or elections under and in accordance with the Trust Indenture) under this Agreement. Under no circumstances shall the Province be obligated to pay or indemnify the Indenture Trustee or any Beneficiary for consequential, special or punitive damages, or for economic loss or loss of profits; provided that, for greater certainty, economic loss shall not include any amount in respect of any amount due and payable to a Beneficiary Payee under the Limited Guarantee.

2.02 Intentionally Deleted.

2.03 Absence of Set-off

Subject to applicable law, the Province acknowledges and agrees that each payment to be made by the Province hereunder in respect of an Approved Obligation shall be made as required in whole, without application of any right of set-off and without regard to any equities as between or among any of the Province, the Beneficiaries and/or the Indenture Trustee.

2.04 Payment into Protection Account in Satisfaction

(a) On or before the date of delivery of a Payment Demand to the Province, the Indenture Trustee shall cause to be established and maintained an Eligible Deposit Account (the "**Protection Account**") in the name of the Indenture Trustee, bearing a designation clearly indicating that the funds and other property credited thereto are held for the benefit of the Indenture Trustee and the Beneficiaries. The Protection Account shall be under the control of the Indenture Trustee for the benefit of the Beneficiaries. If, at any time, the institution holding the Protection Account ceases to be an Eligible Institution, the FSM shall notify the Indenture Trustee, and the Indenture Trustee upon being notified in writing of such ineligibility (or the FSM on its behalf) shall within 30 days (or such longer period, not to exceed 45 days, so long as the Rating Agency Condition is satisfied) establish a new Protection Account that is an Eligible Deposit Account and shall transfer any funds or other property from such Protection Account to such new Protection Account. From the date each such new Protection Account is established, it shall be the "Protection Account" for purposes of this Agreement. Funds credited to the Protection Account will be invested and held in accordance with Section **[7.03]** of the Trust Indenture on the basis that it is an Issuer Account.

(b) Notwithstanding the priority of payment requirements set forth in the Trust Indenture and any legal rule concerning the imputation of payments, the Financing Entity and the Indenture Trustee shall ensure that all amounts paid by the Province into the Protection Account on a Guarantee Payment Date in respect of an Approved Obligation are applied to pay the amounts due and payable to the Beneficiary Payee as and to the extent provided for in Section 2.01(a). Upon a payment having been made by or on behalf of the Province into the Protection Account, the amounts so paid shall for all purposes be considered to have been applied to pay the applicable Beneficiary Payee as provided for in Section 2.01(a) and thereby reduce the amount due and payable to such Beneficiary Payee in respect of the applicable Approved Obligations, whereupon an affected Beneficiary Payee shall have no continuing rights, interests or entitlements (including rights as a secured party) in respect of the Approved Obligation to the extent so paid. For greater certainty, the obligations arising in respect of an applicable Approved Obligation shall not be reduced by such payment as the Province shall become entitled to be paid related Subrogation Amounts and the rights contemplated under Section 2.01(a) and Section 5.01 in relation to such continuing obligations.

2.05 Certain Waivers

The Province hereby waives:

(a) any requirement, and any right to require, that any power be exercised or any action be taken against the Financing Entity or any Collateral for any of the Approved Obligations;

(b) all notices which may be required by applicable law to preserve any rights against the Province hereunder, including any notice of default, demand, dishonour, presentment and protest;

(c) diligence; and

(d) any defence based upon, arising out of or in any way related to any claim that any election of remedies by the Beneficiaries impaired, reduced, released or extinguished any rights that the Province might otherwise have had against the Financing Entity or any other surety.

The Province agrees that each such waiver is made with full knowledge of its significance and consequences and if any such waiver is determined to be contrary to any applicable law or public policy, such waiver shall be effective only to the maximum extent permitted by applicable law.

2.06 Additional Security

This Agreement shall be in addition to and without prejudice to any other security by whomsoever given, held at any time by the Indenture Trustee or for the benefit of any of the Beneficiaries.

2.07 Continuing Liability of the Province

The Approved Obligations shall be deemed not to have been paid, observed or performed, and the liability of the Province hereunder in respect thereof shall continue and not be discharged, to the extent that any payment, observance or performance thereof by the Financing Entity, or out of the proceeds of any Collateral, is recovered from or reimbursed by or for the account of any of the Beneficiaries for any reason, including a preference or fraudulent transfer or by virtue of any subordination (whether present or future or contractual or otherwise) of the Approved Obligations, whether such recovery or payment over is effected by any judgment, decree or order of any court or Governmental Authority, by any plan of reorganization or by settlement or compromise by any of the Beneficiaries (whether or not consented to by the Financing Entity or the Province) of any claim for any such recovery or payment over.

2.08 Continuance of the Limited Guarantee

Subject to Section 2.07, the Limited Guarantee shall continue in full force and effect until the indefeasible payment, observance and performance in full of the Approved Obligations in accordance with Section 8.01.

2.09 Modifications of Approved Obligations

The Province expressly authorizes the Indenture Trustee, at any time and from time to time, without notice and without affecting the liability of the Province hereunder, but subject to compliance with the requirements of the Program Agreements and this Agreement, to:

(a) accept new, additional or replacement instruments, documents, agreements or security in connection with all or any part of the Approved Obligations;

(b) accept partial payments on the Approved Obligations; and

(c) waive, release, reconvey, terminate, abandon, subordinate, exchange, substitute, transfer, compound, compromise, liquidate and enforce all or any part of the Approved Obligations and any security or guarantee therefor, and apply any such security and direct the order or manner of sale thereof as the Indenture Trustee (for the benefit of the Beneficiaries) in its discretion may determine.

ARTICLE III
THE INDENTURE TRUSTEE

3.01 The Indenture Trustee

This Agreement is made in favour of the Indenture Trustee in its capacity as trustee under the Trust Indenture. Accordingly, in the event of a new trustee being appointed under the Trust Indenture, such new trustee shall thereupon become and be the Indenture Trustee hereunder, but nevertheless, the Indenture Trustee shall forthwith assign, transfer and make over to the new trustee hereunder this Agreement. All provisions of the Trust Indenture for the protection of the Indenture Trustee or for facilitating the administration of the trusts or otherwise relating to the Indenture Trustee solely as to its holding of the rights thereunder shall apply *mutatis mutandis* to this Agreement and the Indenture Trustee's duties hereunder.

3.02 Acceptance of Trusts

The Indenture Trustee hereby accepts the trusts hereof and agrees to carry out and discharge the same unless and until a new trustee shall be appointed as contemplated in Section 3.01.

ARTICLE IV
APPROVED OBLIGATIONS

4.01 Approval Process

Except as provided in Section 7.02, a Primary Obligation that is not a Certified Primary Obligation shall be an Approved Obligation. A Certified Primary Obligation shall constitute an Approved Obligation if (i) the Adherence Conditions applicable thereto have been satisfied at the time the Primary Obligation was incurred or (ii) the Province, in its sole discretion, designates in writing that it is an Approved Obligation.

4.02 Adherence Conditions

(a) The following shall be the Adherence Conditions applicable in relation to each Certified Primary Obligation:

i. the Certified Primary Obligation when incurred is an Obligation Secured under the Trust Indenture; and

ii. OPG, as FSM, delivers an Adherence Compliance Certificate in the form attached hereto as Exhibit B signed by the Chief Financial Officer and the Treasurer of OPG, or any two Executive Officers of OPG (for clarity, such certificate is to be provided by such officers in their capacity as officers of OPG acting in its capacity as FSM) and addressed to the Indenture Trustee, on or before the incurrence of the Certified Primary Obligation (provided that delivery may not be more than 5 Business Days before the incurrence of the Certified Primary Obligation); and

iii. the Province has not provided a Suspension Notice to the Indenture Trustee, OPG and the Financing Entity.

(b) Without limiting any obligations of OPG to the Province arising other than pursuant to this Agreement, satisfaction of the Adherence Conditions for a Certified Primary Obligation shall be deemed satisfaction of the Adherence Conditions in respect of all principal, interest and other amounts owing under the Certified Primary Obligation, as such Certified Primary Obligation may be amended, restated, supplemented or modified from time to time.

(c) For greater certainty, there shall be no Adherence Conditions applicable in relation to a Primary Obligation that is not a Certified Primary Obligation.

4.03 Evidence of Satisfaction

An Adherence Compliance Certificate delivered in accordance with clause 4.02(a)ii shall be determinative as to whether the applicable Adherence Condition with respect thereto has been satisfied, notwithstanding that such certificate may include inaccuracies, be incomplete or otherwise be defective or deficient, and such closing certificate may be relied upon by any addressee as conclusive evidence of same. An Adherence Compliance Certificate that purports on its face to be signed by officers specified in clause 4.02(a)ii may be relied upon by any addressee without further enquiry or evidence as to the incumbency or signatures of such officers. If an Adherence Compliance Certificate is not delivered in accordance with the timing requirements of clause 4.02(a)ii such certificate may be delivered at a later date, and be effective as if it had been delivered in accordance with the timing requirement of clause 4.02(a)ii if at the time such certificate was otherwise required to be delivered OPG had delivered to the Province all certifications required by the Province in connection with the adherence of the Limited Guarantee to the Certified Primary Obligation.

ARTICLE V
PROVINCE MATTERS

5.01 Assignment and Subrogation

(a) Upon paying an amount in respect of an Approved Obligation to or at the direction of the Indenture Trustee in satisfaction of the Limited Guarantee, the Province (in addition to and without prejudice to any rights it otherwise has in law or equity) shall be subrogated and entitled to all of the applicable Beneficiary's

rights and interests under and in respect of the Approved Obligation to the extent of such payment, and shall be entitled to (i) the right and entitlement to be paid and receive the related Subrogation Amounts, (ii) the benefits of the related Collateral and (iii) all proceeds therefrom. The Province shall have and be entitled to enforce all rights and interests (including as a Specified Creditor under the Trust Indenture on the basis contemplated in Section 5.01(b)), under and in respect of such Approved Obligation to the extent of the payment by the Province in respect of the Approved Obligation as an absolute assignee of the applicable Beneficiary, with effect from and after the time of such payment, without any further requirement for notice to or acceptance by the Financing Entity of such absolute assignment and without any reduction, set-off or counterclaim on account of any amounts that may, at or after the time of payment, be or become owing by the Beneficiary to the Financing Entity and unaffected by any other rights or equities that arise thereafter as between the Beneficiary and the Financing Entity. The Indenture Trustee shall recognize the Province as being entitled to all of the rights, interests and entitlements of the Beneficiary (including as a Specified Creditor under the Trust Indenture on the basis contemplated in Section 5.01(b)) in respect and to the extent of the Approved Obligation so paid, determined as of the time of payment, for all purposes under the Trust Indenture, and the Province shall be treated as a Specified Creditor in respect thereof for all purposes under the Trust Indenture and any other agreement under which the Approved Obligation arises.

(b) The Province (i) acknowledges and agrees in favour of the Indenture Trustee that, upon being subrogated and entitled to all of the applicable Beneficiary's rights and interests under and in respect of the Approved Obligation in accordance with Section 5.01(a), the Province, in its capacity as a Specified Creditor, will be subject to the provisions applicable to Specified Creditors under the Trust Indenture, including Sections **[7.04]** through **[7.11]** and **[8.13]** (Payment Priorities), Section **[7.12]** (Payments Held in Trust), Section **[8.11]** (Control by Controlling Class Creditors), Section **[8.12]** (Limitation on Suits), Section **[8.14]** (Limited Recourse), Article IX (The Indenture Trustee), including all limitations of liability thereunder, Section **[9.14]** (Communications to Specified Creditors) and Section **[16.01]** (No Petition); (ii) consents, requests and authorizes the Issuer and the Indenture Trustee to (x) add the Province to the register of Specified Creditors described in subsection **[13.13(b)]** of the Trust Indenture and (y) disseminate the notice details of the Province to other Specified Creditors for the purposes set out in subsection **[9.14(b)]** of the Trust Indenture, and (iii) confirms that it will execute and deliver, or cause to be executed and delivered, all such further agreements, documents and instruments in connection with this Section 5.01 as the Indenture Trustee may request from time to time for the purpose of giving effect to the terms of this Section 5.01.

5.02 <u>Priorities</u>

For greater certainty, the rights, interests and entitlements of the Province as an assignee and subrogee of and with respect to an Approved Obligation and the Payable Approved Amounts

thereunder shall rank equally with the rights, interests and entitlements of a Beneficiary to whom a Limited Guarantee payment is made in respect of, and to the extent of the payment made to satisfy, the Approved Obligation and the Province shall not be subject to postponement or subordination with respect thereto except to the extent of the priorities established in relation to the Approved Obligation under the Trust Indenture in the manner and to the extent contemplated in Section **[7.10]** of the Trust Indenture.

5.03 Intentionally Deleted

5.04 Representations and Warranties

The Province hereby represents and warrants that:

(a) the execution and delivery of, and the performance of its obligations under, this Agreement by the Province have been authorized by all necessary action on the part of the Province;

(b) the execution and delivery of, and the performance of its obligations under, this Agreement by the Province do not result in the violation of any applicable law; and

(c) this Agreement has been duly executed and delivered by the Province.

ARTICLE VI
INDENTURE TRUSTEE MATTERS

6.01 Limited Recourse

No recourse may be taken, directly or indirectly, with respect to the obligations of the Financing Entity under this Agreement, or any certificate or other writing delivered in connection herewith or therewith, against (a) the Financing Entity Trustee in its individual capacity, (b) any owner of a beneficial interest in the Financing Entity or (c) any partner, owner, beneficiary, agent, officer, director, employee or agent of the Financing Entity Trustee in its individual capacity, any holder of a beneficial interest in the Financing Entity or the Financing Entity Trustee or of any successor or assign of the Financing Entity Trustee in its individual capacity, except as any such Person may have expressly agreed (it being understood that the Financing Entity Trustee has no such obligations in its individual capacity).

6.02 Not Responsible for Recitals

The recitals contained herein will be taken as the statements of the Province, the Financing Entity and the FSM, and the Indenture Trustee assumes no responsibility for their correctness. The Indenture Trustee makes no representations as to the validity or sufficiency of this Agreement.

6.03 Representations and Covenants of the Indenture Trustee

The Indenture Trustee represents, warrants and covenants that:

(a) the Indenture Trustee is a trust company organized, existing and in good standing under the laws of Canada;

(b) the Indenture Trustee has full power and authority to execute, deliver and perform this Agreement and has taken all necessary action to authorize the execution, delivery and performance by it of this Agreement;

(c) this Agreement has been duly executed and delivered by the Indenture Trustee and constitutes its legal, valid and binding obligation in accordance with its terms; and

(d) the Indenture Trustee is authorized to carry on the business of a trust company in each of the provinces and territories of Canada. If, notwithstanding the provisions of this subsection 6.03(d), the Indenture Trustee ceases to be so authorized to carry on business, the validity and enforceability of this Agreement shall not be affected in any manner whatsoever by reason only of such event.

ARTICLE VII
SUSPENSION OF ADHERENCE FOR NEW PRIMARY OBLIGATIONS

7.01 Suspension Notice

Upon:

(a) a Program Breach;

(b) a default in the performance, or breach, of any covenants of OPG, as FSM, or OPG, in its corporate capacity, in each case to the Province in connection with its obligations to the Province pursuant to internal requirements and processes in connection with the provision or adherence of the Limited Guarantee to or in respect of any Certified Primary Obligation and the expiration of any applicable cure period;

(c) a representation or warranty made by OPG or a certification made by one or more officers of OPG, in each case whether as FSM or in its corporate capacity, to the Province in connection with its obligations to the Province and its internal requirements and processes in connection with the provision or adherence of the Limited Guarantee to or in respect of any Certified Primary Obligations, proves to be incorrect in any material respect on the date made and the expiration of any applicable cure period; or

(d) the FSM no longer being the Manager or actions having been taken by or on behalf of the Indenture Trustee to remove the FSM as the Manager;

the Province may declare that the Limited Guarantee under this Agreement shall not apply to any Primary Obligations incurred on or after such declaration, excluding Post-Suspension Refinancings or Pre-Approved Refinancings, by delivering a written notice in

the form of Exhibit C (a "**Suspension Notice**") to the Indenture Trustee, the FSM and the Financing Entity.

7.02 Suspension

If a Suspension Notice has been provided under Section 7.01 (the provision of such notice being a "**Suspension Event**"), the Limited Guarantee shall not apply in respect of: (i) any Primary Obligation incurred, excluding Post-Suspension Refinancings, or (ii) any amendment of any Primary Obligation that has a Material Effect, unless otherwise agreed to by the Province, in each case, on or after the time such Suspension Notice is delivered.

7.03 Additional Right of the Province Regarding Post-Suspension Refinancings

Following the occurrence of a Suspension Event, the Limited Guarantee shall continue to apply in respect of any Post-Suspension Refinancing (for greater certainty, without regard to the satisfaction of any Adherence Conditions); provided that prior to the Financing Entity incurring any Primary Obligation constituting a Post-Suspension Refinancing, the Manager shall provide the Province with at least 30 days' notice of its intention to seek a Post-Suspension Refinancing and prior to incurrence, which notice shall describe the material covenants, events of default, representations and warranties and indemnities of the Financing Entity and other material terms, excluding financial terms, rates and levels, and that shall be in respect of the full amount of the amount becoming due and payable in respect of the applicable Primary Obligation less amounts otherwise available to the Financing Entity from other available or committed sources (the "**Proposal**"), and during such 30 day period the Province may, but is not obligated to, offer to fund such Post-Suspension Refinancing or arrange for another Person to fund such Post-Suspension Refinancing on the same terms as set out in the Proposal or on such other terms as may be considered by the Province to be not more onerous on the Financing Entity and that are acceptable on that basis to the Financing Entity, acting reasonably. If, within such 30-day period, the Province elects to offer to fund such Post-Suspension Refinancing as provided in the preceding sentence, the Manager shall accept such offer; however, if the Province does not elect to offer to fund such Post-Suspension Refinancing, the Manager shall cause the Financing Entity to incur Primary Obligations constituting such a Post-Suspension Refinancing on substantially the same terms as than those set out in the Proposal if the Post-Suspension Refinancing can be completed by the Financing Entity in compliance with the Act, or on such other terms as would not have a Material Effect.

7.04 No Impact on Adherence

For greater certainty, the occurrence of a Suspension Event or a failure by the FSM or the Financing Entity to perform its covenants under this Agreement will not invalidate or extinguish the obligations of the Province under the Limited Guarantee in respect of Approved Obligations in existence prior to the occurrence of the Suspension Event or in respect of any Post-Suspension Refinancing.

ARTICLE VIII
MISCELLANEOUS

8.01 Term of Agreement

This Agreement will continue until the later of: (a) the date that no amount is or may become due and payable by the Province under the Limited Guarantee and (b) the date that no amount is or may become due and payable to the Province in respect of any Subrogation Amount.

8.02 Notices

Any notice or other communication required or permitted to be given hereunder will be in writing and will be given by prepaid first-class mail, by facsimile or other means of electronic communication or by hand-delivery as hereinafter provided. Any such notice or other communication, if mailed by prepaid first-class mail at any time other than during a general discontinuance of postal service due to strike, lockout or otherwise, will be deemed to have been received on the fourth Business Day after the post-marked date thereof, or if sent by facsimile or other means of electronic communication, will be deemed to have been received on the Business Day following the sending, or if delivered by hand will be deemed to have been received at the time it is delivered to the applicable address noted below either to the individual designated below or to an individual at such address having apparent authority to accept deliveries on behalf of the addressee. Notice of change of address will also be governed by this Section. In the event of a general discontinuance of postal service due to strike, lock-out or otherwise, notices or other communications will be delivered by hand or sent by facsimile or other means of electronic communication and will be deemed to have been received in accordance with this Section. Notices and other communications will be addressed as follows:

(a) if to the Financing Entity:

Fair Hydro Trust
700 University Avenue
Toronto, Ontario M5G 1X6
Attention: General Counsel
Fax: (416) 592-4189

with copies to:

Computershare Trust Company of Canada, in its capacity as Financing Entity
Trustee for Fair Hydro Trust
100 University Avenue, 11th Floor
Toronto, Ontario M5J 2Y1
Attention: Manager, Corporate Trust
Fax: (416) 981-9777
Email: corporatetrust.toronto@computershare.com

(b) if to the FSM:

Ontario Power Generation Inc.
700 University Avenue
Toronto, Ontario M5G 1X6
Attention: General Counsel
Fax: (416) 592-4189

(c) if to the Province:

Minister of Finance
[Address]
Attention: [■]
Fax: (416) [■]
Email: [■]

and

Minister of Energy
[Address]
Attention: [■]
Fax: (416) [■]
Email: [■]

With copies to:

Deputy Minister of Finance
[Address]
Attention: [■]
Fax: (416) [■]
Email: [■]

and

Deputy Minister of Energy
[Address]
Attention: [■]
Fax: (416) [■]
Email: [■]

(d) if to the Indenture Trustee:

[Address]
Attention: [■]
Fax: (416) [■]
Email: [■]

or to such other addresses as a party may from time to time notify the other parties in accordance with this Section 8.02.

8.03 Assignment

(a) None of the rights or obligations hereunder shall be assignable or transferable by any party without the prior written consent of the other parties, except as otherwise provided for herein.

(b) Any purported assignment of this Agreement in violation of this Section 8.03 shall be null and void.

8.04 Enurement

This Agreement will enure to the benefit of and be binding upon the parties hereto and their respective successors and permitted assigns.

8.05 FIPPA

The parties acknowledge that the Province will be bound by the *Freedom of Information and Protection of Privacy Act* (Ontario) and that any information provided to the Province, or any agent or representative of the Province in connection with this Agreement may be subject to disclosure in accordance with the act or as otherwise required by law.

8.06 No Petition

The Province agrees, to the fullest extent permitted by applicable law, that at no time until one year and one day following repayment in full of all Primary Obligations shall it commence, or join in commencing, a bankruptcy case or other insolvency or similar proceeding under the laws of any jurisdiction against the Financing Entity.

8.07 Notice to Rating Agencies

OPG, as FSM, shall deliver prompt written notice to the Rating Agencies of the occurrence of (i) a Protection Event; (ii) receipt of a Suspension Notice delivered by the Province pursuant to Section 7.01; and (iii) an assignment of this Agreement by any party pursuant to Section 8.03.

8.08 Third Party Rights

This Agreement is not intended to create rights for any Person not party to this Agreement. Beneficiaries derive their benefits hereunder through the Indenture Trustee and shall be subject to the provisions applicable to Specified Creditors in the Trust Indenture.

8.09 Delivery of Executed Copies

Each party acknowledges delivery of a fully executed copy of this Agreement.

[Signature page to follow]

IN WITNESS WHEREOF, the parties hereto have caused this Agreement to be duly executed as of the day and year first above written.

SCHEDULE A
DEFINED TERMS

"**Acceleration**" has the meaning ascribed to the term "acceleration of a funding obligation" in the General Regulation.

"**Act**" has the meaning ascribed thereto in the first paragraph of the recitals in this Agreement.

"**Adherence Compliance Certificate**" means a certificate in the form attached hereto as Exhibit B delivered by the FSM in accordance with Section 4.02(a)ii.

"**Adherence Conditions**", means, in respect of a Certified Primary Obligation, the conditions set out in Section 4.02.

"**Aggregate Approved Obligations Amount**" means, in respect of a Guarantee Payment Date, the aggregate of the Approved Obligation Amounts for such Guarantee Payment Date.

"**Approved Obligation**" means a Primary Obligation that constitutes an Approved Obligation pursuant to Section 4.01.

"**Approved Obligation Amount**" means, for a Beneficiary in respect of an Approved Obligation under which an amount is due and payable on a Guarantee Payment Date:

(a) if no Acceleration has occurred in respect of any Obligation Secured on or before the Guarantee Payment Date, the amount due and payable to the Beneficiary on such Guarantee Payment Date in respect of the Approved Obligation (for greater certainty, determined on the assumption that there are adequate amounts available under the applicable payment provisions of the Trust Indenture to pay in full all amounts referred to in such payment provisions that are due and payable on the Guarantee Payment Date); and

(b) if an Acceleration has occurred in respect of any Obligations Secured on or before the Guarantee Payment Date, the amount that would be available to be paid to the Beneficiary on such Guarantee Payment Date in respect of the Approved Obligation under the applicable payment provisions of the Trust Indenture, determined on the assumption that the amount available for allocation to Specified Creditors in accordance with such applicable payment provisions of the Trust Indenture in respect of each relevant month during each Reference Period is equal to the estimated Finance Amount determined in respect of such Reference Period for purposes of section 15(1) of the Act (in effect on the date hereof), including section 6.1 of the General Regulation (in effect on the date hereof), divided by the number of months in such Reference Period.

"**Beneficiaries**" means the Specified Creditors to whom the Financing Entity owes a payment obligation pursuant to one or more Approved Obligations from time to time.

"**Beneficiary Payee**" has the meaning ascribed thereto in Section 2.01(a)iii.

"**Business Day**" means any day other than a Saturday, a Sunday or a day on which banking institutions in Toronto, Ontario are authorized or obligated by applicable law, regulation or executive order to be closed.

"**Capital Account**" has the meaning ascribed to the term "capital account" in the General Regulation.

"**Certified Primary Obligations**" means Primary Obligations that are: (i) incurred by or on behalf of the Financing Entity to fund its ownership of an Investment Interest, including any Refinancing, other than a Post-Suspension Refinancing or a Pre-Approved Refinancing, of such a Primary Obligation (for greater certainty, including, in the case of any Certified Primary Obligation permitting funding transactions pursuant to a Funding Obligation Agreement applicable to the Certified Primary Obligation, each individual borrowing or funding utilization thereunder), (ii) incurred by or on behalf of the Financing Entity upon the Financing Entity entering into a Derivative Agreement, in which case the Certified Primary Obligation therefor shall be the Master Agreement applicable to such Derivative Agreement and not any individual trade confirmation other than a trade confirmation that modifies or purports to override the express terms or conditions of the related Master Agreement, or (iii) incurred by or on behalf of the Financing Entity upon entering into a contract that has a term of more than three (3) years which is not terminable by the Financing Entity giving three (3) years' notice or less and expected (as determined by the Manager, acting reasonably) aggregate payments by the Financing Entity thereunder during the term of such contract are or would be in excess of C$5,000,000 (that, for greater certainty, is not otherwise captured in clauses (i) and (ii) above).

"**Change of Law Protection Agreement**" means this Agreement.

"**Declaration of Trust**" means the declaration of trust made as of [■], 2017 under which the Financing Entity was established.

"**Derivative Agreement**" means any rate swap transaction, basis swap, forward rate transaction, bond option, interest rate option, foreign exchange transaction, cap transaction, floor transaction, collar transaction, currency swap transaction, cross-currency rate swap transaction, currency option, total return swap transaction, credit default swap transaction or any other similar transaction (including any option with respect to any of those transactions) or any combination of these transactions entered into from time to time by the Financing Entity in connection with or related to Funding Obligations.

"**Executive Officer**" has the meaning ascribed to the term "executive officer" in National Instrument 51-102 – *Continuous Disclosure Obligations* of the Canadian Securities Administrators.

"**Finance Amount**" has the meaning ascribed to the term "finance amount" in the Act as of the date of this Agreement.

"**Finance Reserve Account**" has the meaning ascribed to the term "finance reserve account" in the General Regulation.

"**Financing Entity**" has the meaning ascribed thereto in the first paragraph of this Agreement.

"**Financing Entity Trustee**" has the meaning ascribed thereto in the first paragraph of this Agreement until a successor Financing Entity Trustee shall have become such pursuant to the applicable provisions of the Trust Indenture and the Declaration of Trust, and thereafter "Financing Entity Trustee" means and includes such Person.

"**Financing Plan**" has the meaning ascribed to the term "Financing Plan" in the Act.

"**FSM**" has the meaning ascribed thereto in the first paragraph of this Agreement.

"**Funding Obligation**" has the meaning ascribed to the term "funding obligation" in the Act as of the date of this Agreement.

"**Funding Obligation Agreement**" has the meaning ascribed thereto in the Trust Indenture.

"**General Regulation**" means O. Reg. 206/17 made under the Act.

"**Guarantee Payment**" has the meaning ascribed thereto in Section 2.01(a)iii.

"**Guarantee Payment Date**" has the meaning ascribed thereto in Section 2.01(a)i.

"**Governmental Authority**" means any nation or government, any federal, state, provincial, local or other political subdivision thereof and any court, administrative agency or other instrumentality or entity exercising executive, legislative, judicial, regulatory or administrative functions of government.

"**Holder**" has the meaning ascribed thereto in the Trust Indenture as of the date hereof.

"**IESO**" has the meaning ascribed thereto in the Act.

"**Indenture Trustee**" means the Person named as the Indenture Trustee in the first paragraph of this Agreement until a successor Indenture Trustee shall have become such pursuant to the applicable provisions of the Trust Indenture and this Agreement, and thereafter "Indenture Trustee" means and includes such Person.

"**Investment Interest**" has the meaning ascribed to the term "investment interest" in the Act as of the date of this Agreement.

"**Legislature**" means the Legislature of the Province of Ontario.

"**Liens**" has the meaning ascribed thereto in the Trust Indenture as of the date hereof.

"**Limited Guarantee**" has the meaning ascribed thereto in Section 2.01(a).

"**Management Agreement**" means the management agreement dated [■], 2017 between the Manager and the Financing Entity, as amended, supplemented, restated or otherwise modified from time to time.

"**Manager**" means OPG, in its capacity as manager of the Financing Entity under the Management Agreement.

"**Master Agreement**" means an agreement in the form of a Master Agreement as published by ISDA or any replacement or substitute or functional equivalent of such agreement.

"**Master Transfer and Servicing Agreement**" means the master transfer and servicing agreement dated [■], 2017 between the Financing Entity and IESO, as amended, supplemented, restated or otherwise modified from time to time.

"**Material Effect**" means a material effect on the obligations (including as a result of a change in the nature, scope or extent of the Primary Obligation and the effect on the Province's obligations therefor under the Limited Guarantee) that could reasonably be expected to affect (i) the timing of or circumstances under which Primary Obligations would or may become due or accrue (including as a result of any default, acceleration, termination, wind-up, liquidation or realization); (ii) the appointment, obligations or duties of OPG as the Manager; (iii) the existence, powers or authority of the Financing Entity or the Financing Entity Trustee; (iv) the obligations of the Indenture Trustee to or in respect of the Province as a Specified Creditor; (v) the limitations and requirements otherwise applicable to the capital structure of the Financing Entity under any existing Program Agreement; (vi) the payment provisions and associated priorities set forth in the Trust Indenture; (vii) the obligations or liability of the Financing Entity to pay any tax, (viii) compliance by the FSM with the then applicable Financing Plan; (ix) the circumstances in which a Protection Event could arise; (x) compliance by the FSM, the Financing Entity or IESO with the Act or the General Regulation; (xi) the nature or character of the payment obligations (but, subject to compliance with the Financing Plan, irrespective of the amount payable thereunder) that could become payable under the Limited Guarantee; or (xii) the Province's rights of subrogation or assignment (including pursuant to Sections 1.05, 2.01 or 5.01 of this Agreement) or its interests as a subrogee or an assignee, that would arise as a result of performing the Limited Guarantee in respect of the applicable Primary Obligation.

"**Notes**" has the meaning ascribed thereto in the Trust Indenture as of the date hereof.

"**OIC**" has the meaning ascribed thereto in the second paragraph of the recitals in this Agreement.

"**OPG**" means Ontario Power Generation Inc., a corporation established under the laws of the Province of Ontario.

"**Original Currency**" has the meaning ascribed thereto in Section 1.19(a).

"**Payable Approved Amounts**" has the meaning ascribed thereto in 2.01(a).

"**Payment Date**" has the meaning ascribed thereto in the Trust Indenture as of the date hereof.

"**Payment Demand**" has the meaning ascribed thereto in Section 2.01(a).

"**Person**" means any individual, corporation, limited liability company, unlimited liability company, estate, partnership, joint venture, association, joint stock company, trust (including any beneficiary thereof), unincorporated organization or Governmental Authority.

"**Post-Suspension Refinancing**" means a Funding Obligation that is an Obligation Secured and that is incurred on or after the occurrence of a Suspension Event in compliance with the requirements of Section 7.03, as a Refinancing of one or more Series of Approved Obligations (including any Pre-Approved Refinancing that is authorized to be incurred on or after the occurrence of a Suspension Event), in each case the proceeds of which, together with any other funds that may be available, in full such Series of Approved Obligations.

"**Pre-Approved Refinancing**" means a Refinancing of a Certified Primary Obligation in respect of which the Province has, prior to the incurrence of such Certified Primary Obligation, further agreed shall not be a Certified Primary Obligation, subject to compliance with such conditions and requirements as may be specified in such further agreement.

"**Primary Obligations**" means any Obligation Secured (a) that is a Funding Obligation or (b) that otherwise is a payment obligation of the Financing Entity that gives rise to a Finance Amount, in each case other than (i) any amounts required to be deposited by or on behalf of the Financing Entity into any Capital Account or Finance Reserve Account; and (ii) any obligation to pay the Financing Entity or on the Financing Entity's direction any remaining amounts in the Collection Account pursuant to the Trust Indenture.

"**Program Breach**" means an acceleration of Funding Obligations in accordance with the provisions of the Trust Indenture or an event of default, early amortization event, termination event or similar event or circumstance (including any event that with the passage of time or the giving of notice would become such an event) of or in respect of the obligations of any party under any Program Agreement, including under this Agreement, the Trust Indenture, the Master Transfer and Servicing Agreement or any Derivative Agreement.

"**Protection Account**" has the meaning ascribed to such term in Section 2.04(a).

"**Protection Event**" means the occurrence of any of the following events:

(a) (i) the Legislature repeals (and does not replace on an equivalent basis) or amends the Act or any portion thereof as in effect on the date hereof;

(ii) the Legislature enacts or amends any other statute;

(iii) the Lieutenant Governor in Council repeals (and does not replace on an equivalent basis) the regulations made under the Act or any portion thereof as in effect on the date hereof; or

(iv) the Lieutenant Governor in Council, a minister of the Crown, an official of the government or a board or commission all the members of which are appointed by the Lieutenant Governor in Council makes or amends any "regulation" (as defined in Part III of the *Legislation Act, 2006*) as in effect on the date hereof;

(v) the implementation of a change in the organization or structure of the IESO or Ontario's electricity market undertaken at the initiative of the Province or an entity controlled by the Province,

in each case, that (X) adversely affects the ability of the Financing Entity to receive amounts in respect of its Investment Interest so that it can pay Approved Obligations, in each case determined after taking into account and having regard to (i) any funds available at such time to apply to such Approved Obligations, including in any Finance Reserve Account, Capital Account or collateral posting account applicable under a Derivative Agreement, (ii) the availability of any credit enhancement agreement to which the Financing Entity is a party and (iii) any reasonably expected potential effect of a True-up Amount in the Reference Period immediately following the occurrence of an event described in any of clauses (i) to (v) of this paragraph (a), or (Y) adversely affects the enforceability of, or adversely changes, the terms and conditions of this Agreement or of any of the agreements under which Approved Obligations arise; or

(b) a court of competent jurisdiction determines that all or a portion of the Act or the regulations made under the Act, as in effect on the date hereof, is *ultra vires* or invalid in a way that adversely affects the ability of the Financing Entity to receive amounts in respect of its Investment Interest so that it can pay Approved Obligations and that has the effect of the Financing Entity not in fact having sufficient funds to pay such Approved Obligations that have become due and payable, in each case determined after taking into account and having regard to (i) any funds available at such time to apply to such Approved Obligations, including in any Finance Reserve Account, Capital Account or collateral posting account applicable under a Derivative Agreement, (ii) the availability of any credit enhancement agreement to which the Financing Entity is a party and (iii) any reasonably expected potential effect of a True-up Amount in the Reference Period immediately following the occurrence of an event described in paragraph (b).

"**Province**" has the meaning ascribed thereto in the first paragraph of this Agreement.

"**Rating Agency**" has the meaning ascribed thereto in the Trust Indenture, except that the reference to "Issuer Funding Obligation" in the definition of "Rating Agency" in the Trust Indenture shall be replaced with a reference to an Issuer Funding Obligation that is an Approved Obligation.

"**Rating Agency Condition**" has the meaning ascribed thereto in the Trust Indenture, except that the reference to "Issuer Funding Obligation" in the definition of "Rating Agency Condition" in the Trust Indenture shall be replaced with a reference to an Issuer Funding Obligation that is an Approved Obligation.

"**Reference Period**" has the meaning ascribed to the term "reference period" in the Act.

"**Refinancing**" has the meaning ascribed to the term "refinancing" in the Act as of the date hereof, as more particularly described and given meaning in the General Regulation as of the date hereof.

"**Second Currency**" has the meaning ascribed thereto in Section 1.19(b).

"**Specified Creditor**" has the meaning ascribed thereto in the Trust Indenture on the date hereof.

"**Subrogation Amount**" has the meaning ascribed thereto in subclause 2.01(a)iv(B).

"**Subrogation Payment Date**" has the meaning ascribed thereto in clause 2.01(a)iv.

"**Suspension Event**" has the meaning ascribed thereto in Section 7.02.

"**Suspension Notice**" has the meaning ascribed thereto in Section 7.01.

"**this Agreement**" means this agreement, as amended, supplemented, restated or otherwise modified from time to time.

"**True-up Amount**" has the meaning ascribed to the term "true up amount" in the Act as of the date hereof.

"**Trust Indenture**" means the trust indenture between the Financing Entity and the Indenture Trustee dated as of [■], 2017, as amended, supplemented, restated or otherwise modified from time to time.

EXHIBIT A
FORM OF PAYMENT DEMAND

TO: Her Majesty the Queen in Right of Ontario, as represented by the Minister of Energy and the Minister of Finance (the "**Province**")

Reference is made to the Change of Law Protection Agreement dated [■], 2017 among the Province, Computershare Trust Company of Canada, as trustee of Fair Hydro Trust (the "**Financing Entity**"), Ontario Power Generation Inc., in its capacity as Manager of the Financing Entity and in its capacity as the Financial Services Manager under the *Fair Hydro Plan Act, 2017*, and the Indenture Trustee (the "**Change of Law Protection Agreement**"). Capitalized terms used and not defined herein shall have the meanings ascribed to such terms in the Change of Law Protection Agreement.

Pursuant to and in accordance with section 2.01(a) of the Change of the Law Protection Agreement, the Indenture Trustee hereby demands payment from the Province in respect of the Approved Obligations at the times, in the amounts and subject to the requirements specified in the Change of Law Protection Agreement.

DATED as of the [■] day of [■], [■].

EXHIBIT B
FORM OF ADHERENCE COMPLIANCE CERTIFICATE UNDER SECTION 4.02(a)

TO: **BNY TRUST COMPANY OF CANADA**, in its capacity as Indenture Trustee (the "**Indenture Trustee**") under the Master Trust Indenture dated as of December ●, 2017 between Fair Hydro Trust and the Indenture Trustee (the "**Master Trust Indenture**")

Reference is made to the Change of Law Protection Agreement dated [■], 2017 among the Province of Ontario, Computershare Trust Company of Canada, as trustee of Fair Hydro Trust, Ontario Power Generation Inc., in its capacity as Manager of the Financing Entity and in its capacity as the Financial Services Manager under the *Fair Hydro Plan Act, 2017*, and the Indenture Trustee (the "**Change of Law Protection Agreement**"). Capitalized terms used and not defined herein shall have the meanings ascribed to such terms in the Change of Law Protection Agreement.

Each of the undersigned, being the ● and ● of OPG acting in its capacity as FSM and holding the offices set forth under their names and signatures below, pursuant to and accordance with clause 4.02(a)ii of the Change of Law Protection Agreement, hereby certifies for and on behalf of OPG, in its capacity as Financial Services Manager, and not in such officer's personal capacity and intending that this certificate may be relied on by the addressees hereof without independent inquiry, that:

1. I have read and understand the provisions of the Change of Law Protection Agreement, the Master Trust Indenture and all other documents and materials necessary to enable me to deliver this certificate.
2. If the Certified Primary Obligation is a Refinancing, the proceeds of the Refinancing will be used solely for the purpose of repaying one or more Certified Primary Obligations in respect of which the Adherence Conditions in Subsection 4.02(a) of the Change of Law Protection Agreement had been satisfied, including one or more other Refinancings in respect of which the Adherence Conditions in Subsection 4.02(a) of the Change of Law Protection Agreement had been satisfied.
3. OPG has delivered to the Province a certificate signed by the Chief Financial Officer and the Treasurer of OPG, or any two Executive Officers of OPG (for clarity, such certificate was provided by such officers in their capacity as officers of OPG acting in its capacity as FSM) confirming that OPG has complied with all of its obligations to the Province and internal requirements and processes in connection with the adherence of the Limited Guarantee to the Certified Primary Obligation.

DATED as of the [■] day of [■], [■].

Name: [3]	Name:
Office:	Office:

[3] This certificate must be signed by two officers of OPG being either (i) the Chief Financial Officer and the Treasurer, or (ii) any two Executive Officers (as defined in the Change of Law Protection Agreement) of OPG.

EXHIBIT C
SUSPENSION NOTICE

TO: Ontario Power Generation Inc., in its capacity as Financial Services Manager

AND TO: Fair Hydro Trust

AND TO: Computershare Trust Company of Canada, in its capacity as trustee of Fair Hydro Trust

AND TO: BNY Trust Company of Canada, as Indenture Trustee

Reference is made to the Change of Law Protection Agreement dated [■], 2017 among the Province, Computershare Trust Company of Canada, as trustee of Fair Hydro Trust (the "**Financing Entity**"), Ontario Power Generation Inc., in its capacity as Manager of the Financing Entity and in its capacity as the Financial Services Manager under the *Fair Hydro Plan Act, 2017*, and the Indenture Trustee (the "**Change of Law Protection Agreement**"). Capitalized terms used and not defined herein shall have the meanings ascribed to such terms in the Change of Law Protection Agreement. All references in this Suspension Notice to "Articles" or "Sections" refer to Articles or Sections of the Change of Law Protection Agreement.

The Province has a reasonable basis for concluding that an event described in clauses (a) to (d) of Section 7.01 has occurred. Pursuant to Section 7.01, the Province hereby declares that the Limited Guarantee shall hereby not apply in respect of (i) any Primary Obligation incurred, excluding Post-Suspension Refinancings or Pre-Approved Refinancings or (ii) any amendment of any Primary Obligation that has a Material Effect, unless otherwise agreed to by the Province, in each case, on or after delivery of this Suspension Notice.

This Suspension Notice is hereby delivered to the FSM, the Financing Entity and the Indenture Trustee in accordance with Section 8.02 of the Change of Law Protection Agreement.

COMPUTERSHARE TRUST COMPANY OF CANADA, AS TRUSTEE OF FAIR HYDRO TRUST

AND

ONTARIO POWER GENERATION INC., AS FINANCIAL SERVICES MANAGER AND AS MANAGER OF FAIR HYDRO TRUST

AND

BNY TRUST COMPANY OF CANADA, AS INDENTURE TRUSTEE

CHANGE OF LAW PROTECTION AGREEMENT

Dated as of [■], 2017

This **AGREEMENT**, among Her Majesty the Queen in Right of Ontario, as represented by the Minister of Energy and the Minister of Finance (the "**Province**"), Computershare Trust Company of Canada, in its capacity as trustee (the "**Financing Entity Trustee**") of Fair Hydro Trust, a trust organized under the laws of the Province of Ontario (the "**Financing Entity**"), Ontario Power Generation Inc., in its capacity as Manager of the Financing Entity and in its capacity as the Financial Services Manager in accordance with the Act (the "**FSM**") and BNY Trust Company of Canada, a trust company existing under the laws of Canada, as Indenture Trustee, is made and entered into as of [■], 2017.

RECITALS

Pursuant to Subsection 5(3) of the *Ontario Fair Hydro Plan Act, 2017* (the "**Act**"), the Lieutenant Governor in Council may by order, authorize the Minister of Energy and the Minister of Finance, acting together on behalf of the Province of Ontario, to agree to guarantee or indemnify certain debts, obligations, securities or undertakings associated with an Investment Interest.

Pursuant to an Order in Council 1981/2017 (the "**OIC**"), the Lieutenant Governor in Council has, among other things, authorized the Minister of Energy and the Minister of Finance, acting together on behalf of the Province of Ontario, to enter into one or more agreements to guarantee or indemnify the debts, obligations, securities or undertakings of one or more financing entities established or caused to be established pursuant to Subsection 22(2) of the Act by the FSM and that may incur Funding Obligations in connection with one or more Investment Interests.

Pursuant to a Declaration of Trust dated as of ■, 2017, the Financing Entity was established as a "financing entity" (as defined in the Act) for the purposes contemplated in the Act.

The Financing Entity Trustee, in its capacity as trustee of the Financing Entity, and the Indenture Trustee are parties to the Trust Indenture and propose to create and issue series of notes, bonds and other securities as contemplated therein, and to provide security over the assets and undertaking of the Financing Entity in respect of such notes, bonds and securities, as well as other Obligations Secured.

The Minister of Energy and the Minister of Finance, acting together on behalf of the Province of Ontario, have determined to provide protections and assurances to the Indenture Trustee, for the benefit of the Beneficiaries, in respect of Primary Obligations that constitute Approved Obligations, in order to address concerns that would arise from a change or adverse determination of law, subject in each case to the satisfaction of the Adherence Conditions at the time the Approved Obligation is incurred. This Agreement sets out the terms and conditions of such protections and assurances.

All things necessary to make this Agreement a valid and legally binding agreement of the Province, the Financing Entity, the FSM and the Indenture Trustee, in accordance with the Act, the OIC and the Trust Indenture, have been done.

AGREEMENT OF THE PARTIES

In consideration of the respective agreements herein contained, the parties hereto covenant and agree as follows:

ARTICLE I
DEFINITIONS AND OTHER PROVISIONS OF GENERAL APPLICATION

1.01 Interpretation

For all purposes of this Agreement, except as otherwise expressly provided or unless the context otherwise requires:

(a) the terms used in this Agreement that are defined in Schedule A have the meanings assigned to them in Schedule A, and any other capitalized terms not defined herein shall have the meanings assigned to them in the Trust Indenture;

(b) words importing the singular shall include the plural and vice versa, words importing general shall include all genders or the neuter, and words importing the neuter shall include all genders;

(c) all references to any Person shall include such Person's permitted successors and assigns, and any reference to a Person in a particular capacity excludes such Person in other capacities;

(d) references to any law, rule, regulation or order of a Governmental Authority (including, for greater certainty, references to the Act and the General Regulation) shall include such law, rule, regulation or order as from time to time in effect, including any amendment, modification, codification, replacement or reenactment thereof or any substitution therefor;

(e) the word "will" shall be construed to have the same meaning and effect as the word "shall". The word "or" is not exclusive;

(f) any reference to this Agreement or any other agreement, document or instrument shall be construed as a reference to this Agreement or, as the case may be, such other agreement, document or instrument as the same may have been, or may from time to time be, amended, varied, replaced, amended and restated, supplemented or otherwise modified;

(g) all references in this Agreement to designated "Articles", "Sections", "Subsections", "Schedules", "Exhibits" and other subdivisions are to the designated Articles, Sections, Subsections, Schedules, Exhibits and other subdivisions of this Agreement as originally executed. The words "herein", "hereof" and "hereunder" and other words of similar import refer to this

Agreement as a whole and not to any particular Article, Section, Subsection, Schedule, Exhibit or other subdivision;

(h) "including" and words of similar import will be deemed to be followed by "without limitation"; and

(i) with respect to the computation of periods of time from a specified date to a later specified date, unless otherwise expressly stated, the word "from" means "from and including" and the words "to" and "until" each mean "to but excluding".

1.02 Trustee to act in accordance with the Trust Indenture

Any action taken, required to be taken or permitted to be taken by the Indenture Trustee under this Agreement shall only be taken in the manner, at the times, for the purposes, subject to the prerequisites, conditions, requirements and limitations, and with the benefits, exculpations, indemnities and protections that are provided to the Indenture Trustee, in each case in respect of such action taken, required to be taken or permitted to be taken by it under the Trust Indenture.

1.03 Proof of Approved Obligations

The efficacy of any agreement, instrument or writing evidencing a Primary Obligation may, in the absence of manifest error, be conclusively proved in any manner that the Manager deems to be sufficient.

Each statement delivered by the Manager under Section 2.01(a)i shall constitute *prima facie* evidence of the amount which, as at the date of the statement so prepared, is due and payable by the Financing Entity to the Beneficiaries and/or the Indenture Trustee and each of the parties hereby acknowledges and agrees that, absent manifest error, it shall be bound by each such statement. The Manager shall act diligently in the preparation of each such statement and shall provide the Indenture Trustee and the Province with all supporting computations and calculations used by the Manager to prepare each such statement promptly following a request therefor made by the Indenture Trustee or the Province.

1.04 Limitation on Rights of and Actions by Specified Creditors

Specified Creditors, as Beneficiaries, shall not have or be permitted to exercise any rights, interests, or elections under this Agreement, other than in the manner and to the extent effected and exercised under, in accordance with and subject to the limitations set forth in the Trust Indenture as of the date of this Agreement.

1.05 Province Retains Rights of Beneficiaries

Without limiting any rights of subrogation or succession that arise pursuant to applicable law or pursuant to the Province's rights as an assignee, subrogee or pursuant to Section 2.01 or Section 5.01, all of the rights, interests, elections and privileges that would arise in favour of a Beneficiary under the Trust Indenture or other Funding Obligation Agreement under which a

related Primary Obligation arises shall automatically arise, vest in and be available to the Province to the extent of the performance by the Province of the Primary Obligation.

1.06 Effect of Headings

The Article and Section headings herein are for convenience only and will not affect the construction hereof.

1.07 Successors and Assigns

All covenants and agreements in this Agreement by the parties will bind their respective successors and permitted assigns, whether so expressed or not. All covenants and agreements of the Indenture Trustee, the Financing Entity, the Financing Entity Trustee, the Manager or the FSM in this Agreement shall bind their respective successors, co-trustees and agents.

1.08 Severability

Each of the provisions contained in this Agreement is distinct and severable and a declaration of invalidity or unenforceability of any such provision or part thereof by a court of competent jurisdiction will not affect the validity or enforceability of any other provision hereof. To the extent permitted by applicable law, the parties waive any provision of law which renders any provision of this Agreement invalid or unenforceable in any respect.

1.09 Governing Law

THIS AGREEMENT WILL BE CONSTRUED IN ACCORDANCE WITH AND GOVERNED BY THE LAWS OF THE PROVINCE OF ONTARIO AND THE FEDERAL LAWS OF CANADA APPLICABLE THEREIN, AND THE OBLIGATIONS, RIGHTS AND REMEDIES OF THE PARTIES HEREUNDER SHALL BE DETERMINED IN ACCORDANCE WITH SUCH LAWS.

1.10 Proceedings Against the Crown Act

NOTHING IN THIS AGREEMENT OR THE PROGRAM AGREEMENTS AFFECTS THE RIGHTS, PROTECTIONS AND IMMUNITIES OF THE CROWN UNDER THE PROCEEDINGS AGAINST THE CROWN ACT (ONTARIO).

1.11 Attornment

EACH PARTY SUBMITS TO THE EXCLUSIVE JURISDICTION OF ANY ONTARIO COURTS SITTING IN TORONTO IN ANY ACTION, APPLICATION, REFERENCE OR OTHER PROCEEDING ARISING OUT OF OR RELATED TO THIS AGREEMENT. THE PARTIES HERETO HEREBY WAIVE ANY RIGHT THEY MAY HAVE TO REQUIRE A TRIAL BY JURY OF ANY PROCEEDING COMMENCED IN CONNECTION WITH THIS AGREEMENT.

1.12 Counterparts; Electronic Delivery

This Agreement may be executed in any number of counterparts, each of which so executed will be deemed to be an original, but all such counterparts will together constitute one and the same instrument. Delivery of an executed signature page to this Agreement by a party by electronic transmission will be as effective as delivery of a manually executed copy of the Agreement by such party.

1.13 Change of Law Protection Agreement Referred to in the Trust Indenture

This Agreement is the "Change of Law Protection Agreement" referred to in the Trust Indenture.

1.14 Non-Business Days

Whenever any payment to be made hereunder shall be stated to be due, any period of time would begin or end, any calculation is to be made or any other action to be taken hereunder shall be stated to be required to be taken, on a day other than a Business Day, then (notwithstanding any other provision of this Agreement) such payment shall be made, such period of time shall begin or end, such calculations shall be made and such other action shall be taken on the next succeeding Business Day.

1.15 Waiver, Amendment

Except as expressly provided in this Agreement, no amendment or waiver of this Agreement will be binding unless executed in writing by the party to be bound thereby. No waiver of any provision of this Agreement will constitute a waiver of any other provision nor will any waiver of any provision of this Agreement constitute a continuing waiver unless otherwise expressly provided. A party's failure or delay in exercising any right under this Agreement will not operate as a waiver of that right. A single or partial exercise of any right will not preclude a party from any other or further exercise of that right or the exercise of any other right.

1.16 Interest Act
