Date: Wednesday, June 28, 2017 08:27:50
Attachment 1: IMO-Charge-Types-and-Equations.pdf

In advance just sending our charge type and equation document which is available at the following
link: http://www.ieso.ca/-/media/files/ieso/document-library/market-rules-and-manuals-library/market-manuals/settlements/imo-charge-types-and-equations.pdf

I will make reference to it in order to answer your questions around uplifts.

Regards,

Jeannette Briggs Director, Settlements - Corporate Services

Subject: FW: In advance of Wednesday's call with the IESO

Hi Jeannette,

Thank you for this. Your responses are very helpful.

I made some notes to myself (in blue) in the e-mail below. Since they will guide some of my questions on our call, I thought I would share them with you for reference.

Regards,

Lee Anne

Subject: In advance of Wednesday's call with the IESO

LeeAnne,

Here are the responses to your questions on Market Settlement. Susan Nicholson will answer the questions around accounting verbally. However, given the number of questions you had on settlement related issues, I thought it would be better to provide written responses. Of course, I am happy to discuss them further with you.

Market Administration/Settlement

Confirm/correct the following - see responses below :

Price IESO Market Participants pay comprised of:

- Electricity price:

· Electricity commodity price (HOEP) Non-dispatchable loads pay HOEP, Dispatchable loads pay MCP

· Global Adjustment Do all loads pay GA or only non-dispatchable loads paying HOEP?

- Wholesale Market Services Charges (includes IESO fee, Hourly, and Non-hourly Uplifts What are uplifts? How are they determined?, Government Programs Smart meters, for example, DR What is DR?, IESO fee)

- Transmission price

- Debt Retirement Charge

Note LDC's have "customers" and this is where you find Distribution charges and no DRC for residential customers Why is there no DRC for residential customers?, IESO's Wholesale Market Service Charge is called Wholesale Market Service Rate which is set annually by the OEB (each component set separately?) to be charged by LDC under their tariff to customers. LDCs pay the IESO Administered Market charges as invoiced and recover from customers through their approved OEB rates and tariffs. Differences in RPP (are all LDC customers RPP customers?)

collections verses commodity costs paid to the IESO are submitted monthly to the IESO to be included as a separate line set-offs to LDC invoices and the IESO holds the variance (debit/credit) Doesn't the HOEP rate flow through to consumers?

.

IESO only settles the electricity commodity price component and the related portion of the Global Adjustment – not sure what "only settles" see above we settle significantly more than commodity price component – in 2016 we settled $17.2B

Supply of electricity comes from:

Dispatchable generators – paid MCP

Non-dispatchable generators – paid MCP

I don't understand how the contracts work and what generators are under contract

1. OPG (paid 5 minute market clearing price (MCP) but settled for difference on the regulated rate set by OEB).

2. Non-utility generators (paid MCP when injecting and settled for differences. Financial settlement set by contract – contracts held by OEFC and the IESO)

3. Generation facilities including Bruce Power under contract with IESO (paid MCP when injecting and settled for differences - financial settlement set by contract)

4. Imports (paid HOEP or and under contract as in Hydro Quebec contract)

Are there are other suppliers that are paid HOEP? Fit and Micro-Fit which would not be "generation facilities" necessarily and often embedded within a LDC, merchant generators that are not under contract, a few NUGs that have not renewed contracts may be in this category too,

Portion of Global Adjustment determined by IESO driven by variances relating to #1, #2, #3 and other contracted supply above: 95.8%

What is the nature of the contracts IESO enters into? There are contracts within the IESO Administered Market for services such Ancillary Services (What is this? Does it make up part of the IESO fee?) and financial contracts for supply capacity that are not part of the IESO Administered Market but funded through GA. I don't understand this. Why are they not part of the IESO Administered Market?

Participation agreements

· IESO enters into participation agreements with all market participants (buyers and sellers) Yes PAs are entered for the IESO Administered Markets but we also have participation agreement with program participants, adherence to market rules is restricted for these MPs to rules around programs i.e. not all MRs are applicable.

· Participation agreements bind IESO and counterparty to follow market rules Yes as it relates to the IESO Administered Markets including ancillary services contracts. This has nothing to do with participants who are under supply contracts where IESO is counterparty. I don't understand this.

· Participation agreement would be the only contract IESO enters into with #1, #2, #4 above No if you are participating in the IESO Administered Markets you are a registered MPs with a PA. Unrelated, the same participant may have a separate **financial agreement** and contract with the IESO as counterparty. These are two separate and distinct treatments and should not be confused. In fact the IESO under Electricity Act has an object that there is effective separation between these two functions.

Supply contracts

· Since IESO does not buy and sell electricity, what is the contract for? (IESO paying for commitment that the counterparty will supply electricity into the IESO grid?) No we do not pay for supply of electricity through contracts. We contract for services within the IESO Administered Market all well defined in the market rules. All other contracts are financial contracts for capacity – this does not tie to any commitment within the IESO Administered Markets for the supply of electricity. The IESO administers a competitive transparent market based on bids/offers for consumption and regulation market I don't understand this

· Does the IESO negotiate the terms of these contracts? Policy is set by the Ministry of Energy in the form of directives and IESO implements the directives through financial contracts.

Buyers of electricity from IESO grid are comprised of:

· LDCs All LDCs are non-dispatchable loads

· Directly connected participants (do not necessarily need to large but typically are larger to make sense to be an MP) Directly connected participants can be dispatchable or non-dispatchable loads

The electricity commodity price paid by all buyers is HOEP. No, dispatchable loads pay MCP. There is an algorithm that determines MCP every 5 minutes based on supply/demand, bids/offers and the 12 MCPs create Hourly Ontario Energy Price (HOEP).

Non-dispatchable loads (which includes distributors, as well as municipalities, hospitals and large factories) pay HOEP

Dispatchable loads pay MCP

Although IESO determines HOEP, IESO is not really determining rates charged to

buyers because total price is a bundle of electricity at HOEP plus/minus Global Adjustment and OEB mandates that bundle must (over time) equal cost. The IESO settles the IESO Administered Market including MCP/HOEP, GA for Class A and Class B (does this cover all of the GA?), the amount for WSMC, and Transmission which are all billed to MPs (dispatchable and non-dispatchable loads?) including LDC based on their measured quantities of their delivery point meters registered with the IESO. I believe you are making reference to RPP customers of LDCs (what other types of customers does a LDC have?) which the OEB creates an RPP rate (Tier 1/ Tier 2, for conventional meters) and TOU (for smart meters) that over time (currently 6 months) adds to what the LDCs will pay the IESO for commodity (HOEP plus GA). Happy to explain further if unclear. Yes, please.

Regards,

Jeannette Briggs Director, Settlements - Corporate Services

LIST

IESO Charge Types and Equations

Issue 61.0

This document enumerates the various charge types and equations used in the IESO settlements process for IESO-Administered markets that are subject to a functional deferral, and those that are NOT subject to a functional deferral.

Disclaimer

The posting of documents on this Web site is done for the convenience of *market participants* and other interested visitors to the *IESO* Web site. Please be advised that, while the *IESO* attempts to have all posted documents conform to the original, changes can result from the original, including changes resulting from the programs used to format the documents for posting on the Web site as well as from the programs used by the viewer to download and read the documents. Table of Changes

Reference (Section and Paragraph)	Description of Change
Section 2.2	Added new charge type 1421 – 'Capacity Agreement Settlement Credit' as per IMDC-36. Added new charge type 1422 – 'Capacity Agreement Penalty Settlement Amount' as per IMDC-36. Added new charge type 1423 – 'Energy Sales Agreement Settlement Credit' as per IMDC-36. Added new charge type 1424 – 'Energy Sales Agreement Penalty Settlement Amount' as per IMDC-36. Added new charge type 1471 – 'Capacity Agreement Balancing Amount' as per IMDC-36. Added new charge type 1472 – 'Capacity Agreement Penalty Balancing Amount' as per IMDC-36. Added new charge type 1473 – 'Energy Sales Agreement Balancing Amount' as per IMDC-36. Added new charge type 1474 – 'Energy Sales Agreement Penalty Balancing Amount' as per IMDC-36. Added new charge type 1467 – 'Ontario Rebate for Electricity Consumers (8% Provincial Rebate) Balancing Amount' as per IMDC-33. Added new charge type 9982 – 'Ontario Rebate for Electricity Consumers (8% Provincial Rebate) Settlement Amount' as per IMDC-33. Modified formula for charge types 147 and 148 to include charge types 1471-1474 in GA recovery.
Section 2.4	Added rounding convention for new charge types 1421-1424, 1471-1474. 1467 and 9982.

1. Introduction

1.1 Purpose

The purpose of this document is to provide the reader with the formulas and variable definitions behind each different *charge type* implemented in the *IESO Settlements* process. Furthermore, this document relates each *charge type* to the high-level description of the *settlement amount* within the *IESO market rules* and, where applicable, notes any aspects of the implementation of the *charge type* itself.

1.2 Scope

This document provides the formulas for each *charge type* implemented in the *IESO Settlements* System and those *charge types* which are currently the subject of a Functional Deferral. This document does not, however, provide the format of the information provided to *market participants* on *settlement statements* with respect to each *charge type*. For more information on these topics, the reader is directed to the following Technical Interface Document - "Format Specification for Settlement Statement Files and Data Files".

1.3 Who Should Use This Document

This document is intended for *market participants* in the *IESO-administered markets* who are seeking information regarding the calculations of *settlement amounts* related to each *charge type*. Depending on the activity of the *market participant* in the various *IESO-administered markets*, these *charge types* may have varying degrees of relevance to each *market participant* with respect to their financial settlements.

1.4 Conventions

Usage of an italicized term shall take on the meaning ascribed to that term in the *IESO market rules*.

Unless otherwise noted, usage of variable subscripts and superscripts within this document shall mirror the same usage with in Chapter 9 of the *IESO market rules*. One notable exception is the usage of notation to sum across *settlement amounts* for *charge type* "c". This is further noted in Section 2.2 of this document.

1.5 How This Document is Organized

This document is divided in 6 major subsections as follows:

Section 2.1: A table containing a description of each variable used within **Section 2.2**.

Section 2.2: A table describing *IESO charge types* and equations that are part of an active *IESO-administered market*.

Section 2.3: This section contains a description of rounding conventions for variables described in **Section 2.1**.

Section 2.4: This section contains a description of rounding conventions for *charge type* calculations described in **Section 2.2**.

Section 2.5: This section provides a description of *physical bilateral contract quantities*, their usage by the settlements system, and their use by *market participants* as a vehicle for transferring components of *hourly uplift*.

Section 2.6: This section describes how Day-Ahead import, export and linked wheel transactions are subject to an "Offer Price Test" in order to determine if they are exempt from the Day-Ahead Failure Charges (*charge types*, 1135, 1136 and 1134).

– End of Section –

2. IESO Charge Types and Equations that are Part of an Active IESO-Administered Market

2.1 Variable Descriptions

The following table contains descriptions of each variable used within Section 2.2, describing *IESO charge types* and equations that are part of an active *IESO-administered market*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
This column denotes the abbreviated name of each variable used within Section 2.2.	The full name of each variable used within Section 2.2.	A brief description of each variable used within the formulas illustrated within Section 2.2.	The relevant reference to the variable in question within the *IESO market rules*. The format of each reference is: [Chapter] [Section no.] e.g. Chapter 9 Section 3.1.6 would appear as: 9.3.1.6	This section notes any aspects of the implementation of the variable within the *IESO settlements* process which are otherwise not described in the *IESO market rules* – OR – refers the reader to the appropriate documentation.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
AAD	Adjustment Account Disbursement	The total dollar value of all disbursements from the *IESO adjustment account* authorized by the *IESO Board* in the current *energy market billing period.*	9.6.18.6	Same as *IESO* market rules.
$AQEI_{k,h}^{m,t}$	Allocated Quantity of Energy Injected	Allocated quantity in MWh of *energy* injected by *market participant* 'k' at *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.9	Represents only those quantities derived from loss-adjusted and totalized *metering data.* Quantities derived from *interchange schedule data* is captured in the variable SQEI (see below).
$AQEW_{k,h}^{m,t}$	Allocated Quantity of Energy Withdrawn	Allocated quantity in MWh of *energy* withdrawn by *market participant* 'k' at *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.9	Represents only those quantities derived from loss-adjusted and totalized *metering data.* Quantities derived from *interchange schedule data* is captured in the variable SQEW (see below).
$AQOR_{r,k,h}^{m,t}$	Allocated Quantity of Operating Reserve	Allocated quantity in MW of *class r reserve* for *market participant* 'k' at *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.9	Same as *IESO market rules* and equivalent to DQSR (see below).
BE	Energy Offers	A matrix of 'n' *price-**quantity** pairs* offered by *market participant* 'k' to supply *energy* during *settlement hour* 'h'. *Offer prices* in this matrix may be altered to a **"lower limit"** for the purposes of calculating	9.3.5.2, 9.3.5.6 and 9.3.5.7	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		charge type 105 (Congestion Management *Settlement* Credit for *Energy)* where any such *offer price*: 1) Is associated with a *generation facility* located within Ontario; or imports and 2) Is less than a specified **"lower limit"** where such limit is the lesser of $0.00/MWh and the *energy market price* for the applicable *dispatch interval*. The situational criteria and threshold for applying such adjustments are further described in *IESO market rules* section 9.3.5.6. and 9.3.5.7.		
BL	Energy Bids	A matrix of 'n' *price-quantity pairs* bid by *market participant* 'k' to withdraw *energy* by a *dispatchable load* during *settlement hour* 'h'.	9.3.5.2	Same as *IESO market rules.*
BR_r	Operating Reserve Offers	A matrix of n *price-quantity pairs* offered by *market participant* 'k' to supply class r *operating reserve* during *settlement hour* 'h'.	9.3.5.2	Same as *IESO market rules.*
$BCQ_{s,k,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy bought	*Physical bilateral contract quantity* of *energy* in MWh bought by *buying market*	9.3.1.6	Same as *IESO market rules.*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		participant 'k' from *selling market participant* 's' at *RWM* or *intertie metering point* 'm' for each *metering interval* 't' in *settlement hour* 'h'.		
$BCQ_{k,b,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy sold	*Physical bilateral contract quantity* of *energy* in MWh sold by *selling market participant* 'k' to *buying market participant* 'b' at *RWM* or *intertie metering point* 'm' for each *metering interval* 't' in *settlement hour* 'h'.	9.3.1.6	Same as *IESO market rules*.
CGC	Submitted Combined Guaranteed Costs	A financial amount consisting of fuel cost components defined on a *per-start* basis for a given *generation unit* calculated in a manner consistent with the applicable *market manual*, and encompassing the following elements: 1) Fuel and operation and maintenance (O&M) costs associated with unit synchronization to the *IESO-controlled grid* for a given start-up event (costs submitted via *IESO* portal). 2) Fuel and O&M costs associated with moving the *generation unit* from a valid start to its *minimum loading point* (costs submitted via *IESO* portal).	9.4.7B	Same as *IESO market rules*.
$DA_BE_{k,h}^{m,t}$	*Energy Offer* submitted into the *schedule of record at a delivery point*	*Energy offers* submitted in day-ahead, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *delivery point* 'm' during *metering interval*	9.3.1.2B.7	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price-quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2		
$DA_BE_{k,h}^{i,t}$	*Energy Offer* submitted into the *schedule of record at a intertie metering point*	*Energy offers* submitted in day-ahead, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price-quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2	9.3.8A.2B and 9.3.8B.2	Same as *IESO market rules*
$DA_BL_{k,h}^{i,t}$	*Energy* Bids submitted into the *schedule of record*	Energy bids submitted in day-ahead, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price-quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2	9.3.1.2B.7 and 9.3.8D.2	Same as *IESO market rules*
DA_CGC	Submitted Day-Ahead Combined Guaranteed Costs	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT.	9.4.7D.1	Same as *IESO market rules*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		A financial amount consisting of fuel cost components defined on a *per-start* basis for a given *generation unit* calculated in a manner consistent with the applicable *market manual*, and encompassing the following elements: 1) Fuel and operation and maintenance (O&M) costs associated with unit synchronization to the *IESO-controlled grid* for a given start-up event (costs submitted via *IESO* portal). 2) Fuel and O&M costs associated with moving the *generation unit* from a valid start to its *minimum loading point* (costs submitted via *IESO* portal).		
$DA_DQSI_{k,h}^{m,t}$	*Schedule of Record* Dispatch Quantity of Energy Scheduled for Injection at a delivery point	Day-ahead constrained quantity scheduled for injection by *market participant* 'k' at *delivery point* 'm' during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2A	Same as *IESO market rules.*
$DA_DQSI_{k,h}^{i,t}$	*Schedule of Record* Dispatch Quantity of Energy Scheduled for Injection at an intertie metering point	Day-ahead constrained quantity scheduled for injection by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2A	Same as *IESO market rules.*
$DA_DQSW_{k,h}^{i,t}$	*Schedule of Record* Dispatch Quantity of Energy Scheduled for Withdrawal	Day-ahead constrained quantity scheduled for withdrawal by *market participant* 'k' at *intertie metering point* 'i' during metering interval 't' of settlement hour 'h'	9.3.1.2A	Same as *IESO market rules.*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$DA_ELMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the export zone	Day-ahead constrained schedule intertie price at the *delivery point* 'm' of the sink for the export transaction during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2A	Same as *IESO market rules.*
$DA_ILMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the import zone	Day-ahead constrained schedule intertie price at the *delivery point* 'm' of the source for the import transaction during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2A	Same as *IESO market rules.*
$DA_SNLC_{k,h}^{m}$	Speed-no-load costs submitted into the *schedule of record at a delivery point*	As-offered *speed-no-load cost* associated with *three-part offers* for a given *settlement hour* 'h' for *market participant* 'k' at *delivery point* 'm'	9.3.1.2B.7	Same as *IESO market rules.*
$DA_SNLC_{k,h}^{p}$	Speed-no-load costs submitted into the *schedule of record at a pseudo-unit*	As-offered *speed-no-load cost* associated with *three-part offers* for a given *settlement hour* 'h' for *market participant* 'k' at *pseudo-unit* 'p'	9.3.1.2B.7	Same as *IESO market rules.*
$DA_SUC_{k,h}^{m}$	Start-up costs submitted into the *schedule of record at a delivery point*	As-offered *start-up cost* associated with *three-part offers* for a given *settlement hour* 'h' for *market participant* 'k' at *delivery point* 'm' where *settlement hour* 'h' is the initial hour in the DACP start event	9.3.1.2B.7	Same as *IESO market rules.*
$DA_SUC_{k,h}^{p}$	Start-up costs submitted into the *schedule of record at a pseudo-unit*	As-offered *start-up cost* associated with *three-part offers* for a given *settlement hour* 'h' for *market participant* 'k' at *pseudo-unit* 'p' where *settlement hour* 'h' is the initial hour in the DACP start event	9.3.1.2B.7	Same as *IESO market rules.*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$DIPC_{k,h}^{m,t}$	Derived Interval Price Curve	*Energy price curves* derived per interval from submitted hourly day-ahead PSU *energy offers*, represented as a N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *delivery point* 'm' (where 'm' is a CT or ST delivery point) during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2	9.3.1.11	Same as *IESO market rules*. Refer to Market Manual 9.5, Appendix B for a detailed description of DIPC.
$DIGQ_{k,h}^{m,t}$	Derived Interval Guaranteed Quantity	Portion of the day-ahead constrained quantity scheduled for injection that is eligible for DA-PCG for *market participant* 'k' at *pseudo unit* 'p' during *metering interval* 't' of *settlement hour* 'h'	9.3.1.11	Same as *IESO market rules*. Refer to Market Manual 9.5, Appendix C for a detailed description of DIGQ.
$DQSI_{k,h}^{m,t}$	Dispatch Quantity of Energy Scheduled for Injection	Dispatch quantity of *energy* scheduled for injection in the *real-time schedule* by *market participant* 'k' at location 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3 and 9.3.1.4A	Same as *IESO market rules*. N.B. Location m is further subject to the functional deferral described in Section 3.1.4A of Chapter 9 of the *market rules* (ref. 9.3.1.4A).
$DQSR_{r,k,h}^{m,t}$	Dispatch Quantity Schedule of Operating Reserve	Dispatch quantity schedule of *class r reserve* for *market participant* 'k' at location 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.4 and 9.3.1.4A	Same as *IESO market rules*. N.B. Location m is further subject to the functional deferral described in Section 3.1.4A of Chapter 9 of the *market rules* (ref. 9.3.1.4A).

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$DQSW_{k,h}^{m,t}$	Dispatch Quantity of Energy Scheduled for Withdrawal	Dispatch quantity of *energy* scheduled for withdrawal in the *real-time schedule* by *market participant* 'k' at location 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3 and 9.3.1.4A	Same as *IESO market rules*. N.B. Location m is further subject to the functional deferral described in Section 3.1.4A of Chapter 9 of the *market rules* (ref. 9.3.1.4A).
DRACP	Demand Response Auction Clearing Price	The *demand response auction clearing price* for the *commitment period* and zone.	N/A	Refer to Market Manual 5.5
$DRACP_h$	Hourly Demand Response Auction Clearing Price	The *demand response auction clearing price* for the *commitment period* and zone divided by the hours of availability for a day.	N/A	Refer to Market Manual 5.5
$DRBOC_k$	Demand Response Buy-Out Capacity	The buy-out capacity is an amount that is being reduced from the *demand response capacity obligation* for *demand response market participant* 'k'.	N/A	Refer to Market Manual 5.5
$DRCO_k$	Demand Response Capacity Obligation (MW)	The *demand response capacity obligation* amount for the *commitment period* and zone for *demand response market participant* 'k'. The initial capacity obligation is acquired through the *demand response auction* and subject to being reduced via the buy-out process.	N/A	Refer to Market Manual 5.5

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$DREBQ_k$	Demand Response Energy Bid Quantity	The *demand response energy bid* quantity calculated for *demand response market participant* 'k' as the sum of the quantity of *demand response capacity* provided by all participating demand response resources.	N/A	Refer to Market Manual 5.5
DRNPF	Demand Response Non-Performance Factor	The non-performance factor as listed in Section 7.1 of Market Manual 12 that corresponds and applies to the month being settled.	N/A	Refer to Market Manual 5.5
DRSQty	Demand Response Scheduled Quantity	Calculated as (Total Bid Qty – Schedule) where 'Total Bid Qty' is the maximum quantity of the *demand response energy bid* and where 'Schedule' is the real-time constrained schedule quantity.	N/A	Refer to Market Manual 5.5
EEQ	Excluded Energy Quantity	The total volume of *energy* (MWh) supplied to Fort Frances Power Corporation Distribution Inc. by Abitibi-Consolidated Inc. during the month.	N/A – subject to regulations made pursuant to Bill 100.	N/A – See regulations.
$EGEI_k$	Embedded Generator Energy Injection	The total volume of *energy* (MWh) supplied by *embedded generator*s during the month to *distributors* who are *market participants* and to all embedded distributors to whom the *market participant* 'k' is the host *distributor*, adjusted for losses as required by the *OEB*, Retail Settlement Code.	N/A – subject to regulations made pursuant to Bill 100.	N/A – See regulations.
$EIM_{k,h}$	Operating Profit Function for the IMPORT of Energy	This Operating Profit function is used for the calculation of the Intertie Offer/Bid Guarantee	9.3.8A	$EIM_{k,h}$ IS NOT A VARIABLE

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
	under the Intertie Offer/Bid Guarantee Settlement Credit	Settlement Credit (IOBG) with respect the IMPORT of *energy*.		$EIM_{k,h}$ is the output of a particular usage of the Operating Profit (OP) function defined within Chapter 9, Section 3.8A. $EIM_{k,h}$ Input variables into the Operating Profit (OP) Function include: MQSI, EMP, and BE.
$EMP_h^{i,t}$	5-minute Energy Market Price at the Interties	Energy *market price* applicable to *intertie metering point* 'i' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$EMP_h^{m,t}$	5-minute Energy Market Price within Ontario	Energy *market price* applicable to *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$EMP_h^{REF,t}$	5-minute Energy Market Reference Price	Reference energy *market price* used to value losses in the calculation of the *Transmission Charge Reduction Fund*[1] during in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3 and 9.3.6.2	Same as *IESO market rules*.
ETS	Export Transmission Service Tariff Rate	Export Transmission Service Tariff Rate in units of $/MWh.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
FP_h^m	Fixed Energy Rate	A fixed *energy* rate for all *metering intervals* in *settlement hour* 'h'.	N/A – subject to regulations made pursuant to *Ontario Energy*	N/A – See regulations.

[1] *Market Rules* ref.: Section 3.6.2 of Chapter 9.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
			Board Act, 1998 until March 31, 2005 and by the *OEB* under such regulations commencing April 1, 2005.	
FPC_h^m	Rate for a designated group of *charge types* (see description of *charge type* 141)	This variable is reserved for *charge type* 141 and applies with respect to charges for the period commencing December 1, 2002 and ending March 31, 2005. See Ontario Regulation 436/02 and Ontario Regulation 98/05.	N/A – subject to regulations made pursuant to *Ontario Energy Board Act, 1998*.	N/A – See regulations
GA – $AQEW_{g,k,h,M}^{m,t}$	Allocated Quantity of Energy Withdrawn for elements of the Global Adjustment distribution	Allocated quantity in MWh of *energy* withdrawn by *market participant* or Distributor 'k' at *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h' in month 'M' for element "g" Where 'g' is 1 for Class A Market Participant or Consumer load, and 2 for *energy* withdrawn by Generator 'k' in the course of providing Ancillary Services.		
GRP	Generator Regulated Price	A regulated price ($/MWh) with respect to output of OPG's regulated generating stations, set by the *OEB*.	N/A – subject to regulation by the Ontario Energy Board.	N/A – See regulations

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$HOEP_h$	Hourly Ontario Energy Price	*Hourly Ontario Energy Price* in *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$IOG_FV_{k,h}^{i}$	IOG Floor Value	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT. The IOG_FVk,hi is a floor value (in dollars to the nearest cent) derived from: • The day-ahead offer prices for the import transaction submitted by the *market participant* over the range of the *pre-dispatch of record* constrained quantity scheduled for that import transaction; and • *Real-time* offer prices for the import transaction at the corresponding location in the corresponding *settlement hour* for any additional *energy* scheduled above and beyond the *pre-dispatch of record* constrained quantity scheduled for that import transaction: **NOTE:** The $IOG_FV_{k,h}^{i}$ is formulated in the manner described in Chapter 9, Section 3.8A.8 of the *IESO market rules* and is used in the formulation of the intertie offer guarantee adjustment (see also, Section 2.2 entry for	9.3.8A.8	Same as *IESO market rules* See Chapter 9, Section 3.8A.8 for details concerning its formulation.

Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		charge type 1137 within this document).		
$LCD_{k,h}^{m}$	Line Connection Demand (KW)	Billing Demand for Line Connection Transmission Service (KW) for *transmission customer* 'k' at transmission delivery point 'm' during *settlement hour* 'h' in which $LCD_{k,h}^{m}$ denotes the non-coincident peak demand for the month.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
MC_{h}^{m}	Minimum Consumption	Calculation of the self-induced dispatchable load CMSC clawback under Business Rule 2. The minimum consumption is equal to the quantity in the price quantity pair where the bidding price is MMCP (i.e., $2000) at *RWM metering point* 'm' for settlement hour 'h'.	9.3.5.1A	
MI	Ordered matrix of $MQSI_{k,h}^{i,t}$ and corresponding IOG *settlement amounts*	Used for the calculation of the IOG OFFSET *settlement amount*. A matrix of X pairs of *market schedule* quantities scheduled for injection by *market participant* 'k' at all *intertie metering points* 'i' in *metering interval* 't' of *settlement hour* 'h' ($MQSI_{k,h}^{i,t}$) paired with the corresponding component of the intertie offer guarantee settlement credit for each *intertie metering point* 'i'. See equation in Chapter 9, Section 3.8A.4 of the *IESO market rules* for further details.	9.3.8A.4	Same as *IESO market rules*.
$MLP_{k,h}^{m,t}$	Minimum Loading Point	Minimum output of *energy* the *market*	9.3.1.2B.7	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		participant 'k' at *delivery point* 'm' can maintain without ignition support in *metering interval* 't' of *settlement hour* 'h'		
$MLP_CONS_{k,h}^{m,t}$	Minimum Loading Point for a steam turbine resource or a combustion turbine resource associated to a pseudo unit	Minimum output of *energy* the *market participant* 'k' at *delivery point* 'm' can maintain without ignition support in *metering interval* 't' of *settlement hour* 'h'	9.3.1.2B.7	Same as *IESO market rules.* Refer to Market Manual 9.4, Section 4.1.2.2 for a detailed description of constraints applied for PCG eligible combined cycle plants.
$MQSI_{k,h}^{m,t}$	Market Quantity Scheduled for Injection	Market quantity scheduled for injection in the *market schedule* by *market participant* 'k' at *RWM* or *intertie metering point* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$MQSI\{adj\}_{k,h}^{m,t}$	Adjusted Market Quantity Scheduled for Injection	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT. Used for the calculation of the IOG OFFSET *settlement amount*. $MQSI\{adj\}_{k,h}^{i,t}$ is each (and where applicable, adjusted) quantity of *energy* scheduled for injection in the *market schedule* by *market participant* 'k' at an *intertie metering point* 'i' in *metering interval* 't' of *settlement hour* 'h' corresponding with each quantity, $MQSI_{x*,k,h}^{i,t}$	9.3.8A.4	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		in matrix MI, row x*.		
$MQSW_{k,h}^{m,t}$	Market Quantity Scheduled for Withdrawal	Market quantity scheduled for withdrawal in the *market schedule* by *market participant* 'k' at *RWM* or *intertie metering point* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$NSD_{k,h}^{m}$	Network Service Demand (KW)	The Billing Demand for Network Transmission Service (KW) is defined as the higher of: transmission customer coincident peak demand (KW) in the hour of the month when the total hourly demand of all PTS customers is highest for the month; and 85% of the customer peak demand in any hour during the peak period 7 AM to 7 PM (local time) on *business days* defined by the *IESO*. For the purposes of determining business days for calculating transmission charges, the *IESO* uses the holidays identified by the Ontario Energy Board. The peak period hours will be between 0700 and 1900 hours Eastern Standard Time during winter (i.e. during standard time) and 0600 to 1800 hours during summer (i.e. during daylight savings time), in conformance with the meter time standard used by the *IESO*	N/A	Subject to the OEB "Ontario Transmission Rate Order".

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		settlement systems.		
ONPAO	Ontario Power Generation Non-Prescribed Assets Output	OPG's Non-Prescribed Assets are those generation assets operated and controlled by Ontario Power Generation in service as of January 1, 2006, excluding Lennox Generating Station, that are not prescribed assets under section 78.1 of the *Ontario Energy Board Act, 1998* as amended by the "Electricity Restructuring Act, 2004". ONPAO refers to the generation output from OPG's Non-Prescribed Assets, over each hour of the quarter adjusted to take account of volumes sold through forward contracts in effect as of January 1, 2005. For greater certainty, any output from ONPA resulting from fuel conversion by Ontario Power Generation in ONPA, or incremental output from ONPA resulting from refurbishment or expansion is to be excluded from ONPAO. Incremental Output is defined as: generation output x (new total installed capacity – installed capacity as of January 1, 2006) / new total installed capacity	N/A	The formula for calculating the OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
OP	Operating Profit Function	The Operating Profit function is used for the calculation of the Congestion Management Settlement Credit (CMSC) with respect to constrained on/off payments for *energy*, *operating reserve*. It is also used for the calculation of the Day-Ahead Production Cost Guarantee components, the Day-Ahead Generator Withdrawal Charge, the Day-Ahead Import and Export failure charges, and the Import Offer Guarantee Settlement Credit.	9.3.5.2 and 9.3.8A.2	OP IS NOT A VARIABLE OP is a mathematical function defined within Chapter 9, section 3.5.2. of the *IESO market rules* Input variables include: MQSI, MQSW, SQROR AQEI, AQEW, AQOR SQEI, SQEW, DSQI, DSQW, DSQR DA_DQSI, DA_DQSW, PD_DQSI, PD_DQSW BE, BL, BR_r PD_BE, PD_BL DA_BE, DA_BL EMP MLP, MLP CONS DIPC OPCAP OP is also used within Chapter 9, Section 9.8A.2 of the *IESO market rules* to derive the Energy Import ($EIM_{k,h}$) sub-component of the Intertie Offer Settlement Credit

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
				(IOG) using the following input variables: MQSI BE EMP
$OPCAP_{k,h}^{m,t}$	Operating Capacity	De-rating of the generation unit by *market participant* 'k' at *delivery point* 'm' in *metering interval* 't' of *settlement hour* 'h'	9.3.1.2B.7	Same as *IESO market rules.*
$OPE\{adj\}_{k,h}^{i}$	Adjusted CMSC component for *energy* used in the DA-Ahead IOG	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT. This congestion management *settlement* credit *settlement amount* (CMSC) component is specifically used in the calculation of the Day-Ahead IOG for import transactions that are subject to a *constrained-on event* in the *real-time market.* $OPE\{adj\}_{k,h}^{i}$ is an adjusted component of The congestion management *settlement* credit *settlement amount* (CMSC) for *market participant* 'k' at *intertie metering point* 'i' for *settlement hour* 'h' in which the constrained schedule is the lesser of $PDR_DQSI_{k,h}^{i,t}$ or $DQSI_{k,h}^{i,t}$ but in all instances, greater than or equal to $MQSI_{k,h}^{i,t}$.	9.3.8A.2A	'OP' is a mathematical function used within Chapter 9, Section 9.3.8A.2A of the *IESO market rules* to derive Day-Ahead Intertie Offer Guarantee. Please see the *market rules* for information regarding its formulation.
ORL	Ontario Power Generation	For the period May 1, 2006 to April 30, 2007	N/A	The formula for calculating the

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
	Revenue Limit	ORL is equal to $46/ MWh. For the period May 1, 2007 to April 30, 2008 ORL is equal to $47/ MWh. For the period May 1, 2008 to April 30, 2009 ORL is equal to $48/ MWh.		OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).
PAA	Pilot Auction Amount	Refers to the Pilot Auction administered by the *Ontario Power Authority* in the first half of 2006. The volume in MWh over each hour in the quarter that is sold by Ontario Power Generation through the PA.	N/A	The formula for calculating the OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).
PAORL	Pilot Auction Ontario Power Generation Revenue Limit	For the period May 1, 2006 to April 30, 2007 PAORL is equal to $51/ MWh. For the period May 1, 2007 to April 30, 2008 PAORL is equal to $52/ MWh. For the period May 1, 2008 to April 30, 2009 PAORL is equal to $53/ MWh.	N/A	The formula for calculating the OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).
PAP	Pilot Auction Price	The weighted average auction price in $/ MWh over each hour of the quarter realized for the PAA by Ontario Power Generation.	N/A	The formula for calculating the OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).

Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$PGS_{h,M}$	Allocated Quantity of Energy Withdrawn by OPG at Beck Pump Generating Station	Allocated quantity in MWh of *energy* withdrawn by OPG at Beck Pump Generating Station in *metering interval* 't' of *settlement hour* 'h' for month 'M'.		
$PROR_{r,h}^{m,t}$	5-minute Operating Reserve Price	*Market price* in $/MW of *class r reserve* in *metering interval* 't' of *settlement hour* 'h' at *RWM* 'm' or *intertie metering point* 'm'.	9.3.1.4	Same as *IESO market rules*.
$PST_{k,h}^{p,t}$	Steam turbine portion from Daily Generator Data	The percentage of the *pseudo-unit*'s schedule that relates to the steam turbine in association with *offer k* for *market participant* 'k' at *pseudo unit* 'p' during *metering interval* 't' of *settlement hour* 'h'	7.2.2.2	Same as *IESO market rules*.
PTS-L	Provincial Transmission Service Line Connection Service Rate ($/KW)	Line Connection Transmission Tariff Service Rate in units of dollars per kilowatt.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
PTS-N	Provincial Transmission Service Network Service Rate ($/KW)	Network Transmission Tariff Service Rate in units of dollars per kilowatt.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
PTS-T	Provincial Transmission Service Transformation Connection Service Rate ($/KW)	Transformation Connection Service Transmission Tariff Rate in units of dollars per kilowatt.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
$QTR_{k,h}^{i,j}$	Quantity of Transmission Rights Owned	Quantity of TRs in MW assigned to *market participant* 'k' for transmission from injection *TR zone* 'i' to withdrawal *TR zone* 'j'.	9.3.1.8 and 8.4.2	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
RPP_l	Regulated Price Plan	A fixed *energy* rate for all *metering intervals* based on consumption level l.	N/A – subject to regulation by the *Ontario Energy Board*	N/A – See regulations.
RQ	Reallocate Quantity	A quantity derived from a *physical bilateral contract quantity* ($BCQ_{k,b,h}^{m,t}$ or $BCQ_{s,k,h}^{m,t}$) in order to reallocate a component of *hourly uplift* from the *buying market participant* to the *selling market participant* in direct proportion to the size of the *physical bilateral contract.*	N/A	See hourly uplift charge types in Section 2.2
$SQEI_{k,h}^{i,t}$	Scheduled Quantity of Energy Injected at an *intertie metering point*	Scheduled quantity in MWh of *energy* injected by *market participant* 'k' at *intertie metering point* 'i' for each *metering interval* 't' in *settlement hour* 'h'.	9.3.1.9	This variable is a sub-set of variable AQEI described in Section 3.1.9 of Chapter 9 of the *market rules*, specifically referring to those quantities derived from *interchange schedule data*.
$SQEW_{k,h}^{i,t}$	Scheduled Quantity of Energy Withdrawn at an *intertie metering point*	Scheduled quantity in MWh of *energy* withdrawn by *market participant* 'k' at *intertie metering point* 'i' for each *metering interval* 't' in *settlement hour* 'h'.	9.3.1.9	This variable is a subset of variable AQEW described in Section 3.1.9 of Chapter 9 of the *market rules*, specifically referring to those quantities derived from *interchange schedule data*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$SQROR_{r,k,h}^{m,t}$	Scheduled Quantity of class r Operating Reserve	Market Schedule quantity in MW of *class r reserve* for *market participant* 'k' in *metering interval* 't' of *settlement hour* 'h' at *RWM* 'm'.	9.3.1.4	Same as *IESO market rules*.
$TCD_{k,h}^{m}$	Transformation Connection Demand (KW)	Billing Demand for Transformation Connection Transmission Service (KW) for *transmission customer* 'k' at transmission delivery point m during *settlement hour* 'h' in which $TCD_{k,h}^{m}$ denotes the non-coincident peak demand for the month.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
$TD_{k,h,c}$	Total Market Settlement Amount	Total *settlement amount* (dollars) for the market used in *hourly uplift* and calculations for various other non-hourly *settlement amounts* for *market participant* 'k' or *transmission customer* 'k' during *settlement hour* 'h' with respect to *charge type* 'c'.	N/A	This is purely a notational term is used within the documentation to describe the aggregation of various *settlement amounts*. A summation across *charge type* 'c' denotes an aggregation of all *settlement amounts* for that *charge type* for the time period concerned. e.g.: $\sum_{c}^{T}$ indicates a summation of all *settlement amounts* for *charge type* 'c' during all *metering intervals* 'T'.
TLQ	Threshold Load Quantity	A threshold (kWh) with respect to monthly consumption of regulated customers, set by the *OEB*.	N/A – subject to regulation by the *Ontario Energy*	N/A – See regulations.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
			Board.	
TP_c	Tariff price	A stipulated rate ($/MWh, $/KW) used in the calculation of a specific *charge type* 'c'.	N/A	This is purely a notational term is used within the documentation to describe the unique per MW or per MWh rate applied to specific quantities in order to calculate various *settlement amounts*.
TRMP	TR Market Clearing Price	The price of each *transmission right* in a single round of a *TR auction*.	8.4.15	Same as *IESO market rules*.
TRCAD	TR Clearing Account Disbursements	The total dollar value of all disbursements from the *TR clearing account* authorized by the *IESO Board* in the current *energy market billing period*.	9.4.7.2	Same as *IESO market rules.*
$X_h^{m,t}$	Settlement Floor Price for exports	A *settlement* floor price for *energy* applicable to *intertie metering point* 'm' *metering interval* 't' in *settlement hour* 'h' as set in the applicable *market manual*. The need for a *settlement* floor price other than *MMCP* shall remain in effect only until floor prices for *energy offers* from *registered market participants* that are *variable generators* or nuclear *generators* go into effect.	9.3.1.3	Same as *IESO market rules*

2.2 Charge Types and Equations

The following table contains the *IESO charge types* and equations that are part of an active *IESO-administered market*.

Key to the Table Below	
Charge Type Number	The designation number for each *charge type* enumerated below – which correspond to the *charge type* numbers used on *settlement statements* and *invoices*.
Charge Type Name	The name of the *charge type*.
Settlement Amount Acronym	The abbreviated name of the variable used to describe the *settlement amount* within the *IESO market rules*.
Market Rules Refer.	The relevant reference to the variable in question within the *IESO market rules*. The format for each reference is: [Chapter] [Section number] For example: “Chapter 9 Section 3.1.6” would appear as: 9.3.1.6
Equation	The equation used by the *IESO settlements process* to calculate the *settlement amount* related to each *charge type*.

Key to the Table Below	
Settlement Resolution	The level of granularity by which the *IESO settlements process* calculates the *settlement amount* (for which the *charge type* is related), and provides the supporting data in the settlement data file. Where: • "Interval" means that the calculations are performed on the basis of each relevant, 5-minute *metering interval*; • "Hourly" means that the calculations are performed on the basis of each *settlement hour*; • "Daily" means that the calculations are performed on the basis of each calendar day; • "Monthly" means that the calculations are performed on the basis of a calendar month (equivalent to a real-time market *billing period*); • "Quarterly" means that the calculations are performed on the basis of 3 month intervals; • "Yearly" means that the calculations are performed on the basis of a calendar year.
Cashflow	This column indicates whether or not the *settlement amount* (for which the *charge type* is related) is: • "Due *IESO*" – which means, owed to the *IESO* by the *market participant*;*** or • "Due MP" – which means, owed to the *market participant* by the *IESO*;*** or • "Either Way" – which indicates that the *settlement amount* in question could be either owed to the *IESO* by the *market participant* or owed to the *market participant* by the *IESO* in any given time period (according to the applicable "settlements resolution"). *****NOTE in cases where a Cashflow is designated as "Due *IESO*" or "Due MP" this should be read in the context of its intended use in the normal course of *settlements*. However, such cashflows can always be REVERSED in situations where an adjustment is applied to a *market participant*, or the application of a per-unit charge in order to offset an adjustment to another *market participant*.**
HST Tax Treatment within Ontario	• This column indicates the percentage levy as per the Harmonized Sales Tax (HST). • Zone used for Tax Basis is (ONZN) for Ontario. • The applicable Zone ID may be found in column 7 of the applicable settlement statement detail record (see also, the Technical Interface Document entitled, "Detail Field Description"). • A complete list of Zones may be found in the Technical Interface Document entitled, "Standing Data".

Key to the Table Below	
HST Tax Treatment for U.S., Manitoba and Quebec Generation	• This column indicates the percentage levy as per the Harmonized Sales Tax (HST). • Zones used for Tax Basis are (NYSI) for US Generation, (MBSI) for Manitoba Generation and (PQSI) for Quebec Generation. • The applicable Zone ID may be found in column 7 of the applicable settlement statement detail record (see also, the Technical Interface Document entitled, "Detail Field Description"). • A complete list of Zones may be found in the Technical Interface Document entitled, "Standing Data".
HST Tax Treatment for US Load	• This column indicates the percentage levy as per the Harmonized Sales Tax (HST). • Zone used for Tax Basis is (NYSI) for US Load. • The applicable Zone ID may be found in column 7 of the applicable settlement statement detail record (see also, the Technical Interface Document entitled, "Detail Field Description"). • A complete list of Zones may be found in the Technical Interface Document entitled, "Standing Data".
HST Tax Treatment for Manitoba and Quebec Load	• This column indicates the percentage levy as per the Harmonized Sales Tax (HST). • Zones used for Tax Basis are (MBSI) for Manitoba Load and (PQSI) for Quebec Load. • The applicable Zone ID may be found in column 7 of the applicable settlement statement detail record (see also, the Technical Interface Document entitled, "Detail Field Description"). • A complete list of Zones may be found in the Technical Interface Document entitled, "Standing Data".
Comments	This column notes any *charge types* that are governed by various documentation other than the *IESO market rules*.

Charge Type Number	Charge Type Name	Settlement Amount Acronym	Market Rules Reference	Equation	Settlement Resolution	Cashflow (See Note at Beginning of this Section)	HST Tax Treatment within Ontario (%)	HST Tax Treatment for U.S., Manitoba, and Quebec Generation (%)	HST Tax Treatment for U.S. Load (%)	HST Tax Treatment for Manitoba and Quebec Load (%)	Comments
	Financial Market Charge Types

				'Operating Reserve Activation interval'); or • The load has been manually dispatched down for reliability (defined below – 'Manual Dispatch for Reliability'). In addition to the Business Rules 1 to 4 described above, *constrained off* CMSC is not allowed for hour 'h' if a *dispatchable load* changes its *energy bid* that results in a change in the *facility's market schedule* and the ramping up or down of the *dispatchable load*. **DEFINITIONS** – There are a number of definitions that are used in the specification of criteria for recovery of *constrained off* CMSC paid to dispatchable load facilities. These are: **Constrained-off event**: A *constrained off* event comprises one or more consecutive intervals where the *market schedule* is greater than the constrained schedule and the *market schedule* is greater than the actual quantity of energy withdrawn. Both conditions must exist to be considered a *constrained off* event.							The decision rule for ramping up or down is described in Market Manual 5.5: Settlements Part 5.5: Physical Markets Settlement Statements, section 1.6.9.3.

2.3 Rounding Conventions – by Settlement Variable

2.3.1 Key to the Table of Rounding Conventions for Individual Settlement Variables

Column Name	Description
Variable referenced in Section 2.1	This column provides the name of the variable listed in Section 2.1.
Data Description	The short name of the variable in question.
Number of decimal places (values published by upstream systems)	If this variable is available to *market participants* via another system besides *settlements*, this number of significant digits to the right of the decimal place in the published value. **NOTE:** "published" does not necessarily mean a public report or a report available to all *market participants*. E.g. *metering data* from the *metering database*.
Number of significant digits to the right of the decimal (values received by CRS)	This column discloses the accuracy of a settlement variable received by the *IESO* settlements system via an upstream system OR manually entered as the case may be.
Number of significant digits to the right of the decimal (externally passed from CRS in settlement statements or data files)	This column discloses the accuracy of a settlement variable appearing on a *settlement statement*. **NOTE: This should NOT be confused with the number of decimal places allowable in some columns on the *settlement statements* and data files as set out in, "Format Specification for Settlement Statements and Data Files."**
Comments	Any comments as to the availability of such variables. In some cases, variables are not made available to *market participants* via upstream systems and are noted as such. In other instances variables are not published in a report but are communicated in participant-specific messages (e.g. *bid/offer* confirmation).

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
AAD	Adjustment Account Disbursement	N/A	2	3	• Not published in upstream IESO systems
$AQEI_{k,h}^{m,t}$	Allocated Quantity of Energy Injected	2	3	3	• RMS presentation is in units of KW to TWO decimal places. • Unit change to MW to 3 decimal places occurs prior to transfer to CRS.
$AQEW_{k,h}^{m,t}$	Allocated Quantity of Energy Withdrawn	2	3	3	• RMS presentation is in units of KW to TWO decimal places. • Unit change to MW to 3 decimal places occurs prior to transfer to CRS.
$AQOR_{r,k,h}^{m,t}$	Allocated Quantity of Operating Reserve	1	1	1	• See SQROR.
BE	Energy Offers	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
BL	Energy Bids	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* ("*dispatch data*") are received.
BR_r	Operating Reserve Offers	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* ("*dispatch data*") are received.
$BCQ_{s,k,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy bought	N/A	1 or 3	1 or 3	• Not published via upstream *IESO* systems. • *Physical Bilateral Contract Data* is provided to the *IESO* by the *selling market participant*. • Accuracy driven by the submission at the MIM interface and the method used (i.e. absolute quantities vs. 100% of *PBC*).

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$BCQ_{k,b,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy sold	N/A	1 or 3	1 or 3	• Not published via upstream *IESO* systems. • *Physical Bilateral Contract Data* is provided to the *IESO* by the *selling market participant*. • Accuracy driven by the submission at the MIM interface and the method used (i.e. absolute quantities vs. 100% of *PBC*).
CGC	Combined Guaranteed Costs	N/A	2	2	• Not published via upstream *IESO* systems.
$DA_BE_{k,h}^{i,t}$	*Energy Offer* submitted into the *schedule of record*	N/A	N/A	N/A	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.
$DA_BE_{k,h}^{m,t}$	*Energy Offer* submitted into the *schedule of record at a delivery point*	N/A	N/A	N/A	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$DA_BL_{k,h}^{i,t}$	*Energy* Bids submitted into the *schedule of record*	N/A	N/A	N/A	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.
$DA_DQSI_{k,h}^{i,t}$	*Schedule of record* dispatch quantity scheduled for injection at an *intertie metering point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_DQSI_{k,h}^{m,t}$	*Schedule of record* dispatch quantity scheduled for injection at a *delivery point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_DQSW_{k,h}^{i,t}$	*Schedule of record* dispatch quantity scheduled for withdrawal at an *intertie metering point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_ELMP_{h}^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the export zone	2	2	2	• MIM Publication.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$DA_ILMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the import zone	2	2	2	• MIM Publication.
$DA_SNLC_{k,h}^{m}$	Speed-no-load costs submitted into the *schedule of record*	1	2	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_SNLC_{k,h}^{p}$	Speed-no-load costs for pseudo units submitted into the *schedule of record*	1	2	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_SUC_{k,h}^{m}$	Start-up costs submitted into the *schedule of record*	1	2	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_SUC_{k,h}^{p}$	Start-up costs for pseudo units submitted into the *schedule of record*	1	2	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DIPC_{k,h}^{m,t}$	Derived Interval Price Curve	1	2	1	• Derived price curve and therefore not published on *settlement statements*.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$DIGQ_{k,h}^{m,t}$	Derived Interval Guaranteed Quantity	1	1	1	• Derived schedule quantity and therefore not published on *settlement statements*.
$DQSI_{k,h}^{m,t}$	Dispatch Quantity of Energy Scheduled for Injection	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DQSR_{r,k,h}^{m,t}$	Dispatch Quantity Schedule of Operating Reserve	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DQSW_{k,h}^{m,t}$	Dispatch Quantity of Energy Scheduled for Withdrawal	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
DRACP	Demand Response Auction Clearing Price	2	2	2	• Published in post-auction report.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$DRACP_h$	Hourly Demand Response Auction Clearing Price	N/A	2	2	• Not published via upstream *IESO* systems.
$DRBOC_k$	Demand Response Buy-Out Capacity	N/A	3	3	• Not published via upstream *IESO* systems.
$DRCO_k$	Demand Response Capacity Obligation (MW)	1	3	3	• Published in private post-auction report.
$DREBQ_k$	Demand Response Energy Bid Quantity	N/A	1	1	• Not published via upstream *IESO* systems.
DRNPF	Demand Response Non-Performance Factor	N/A	1	1	• Not published via upstream *IESO* systems.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
DRSQty	Demand Response Scheduled Quantity	N/A	1	1	• Not published via upstream *IESO* systems.
EEQ	Excluded Energy Quantity	N/A	3	3	• Not published via upstream *IESO* systems.
$EGEI_k$	Embedded Generator Energy Injection	N/A	3	3	• Not published via upstream *IESO* systems.
$EIM_{k,h}$	Operating Profit Function for the IMPORT of Energy under the Intertie Offer/Bid Guarantee Settlement Credit	N/A See Section 2.4	N/A See Section 2.4	N/A See Section 2.4	• This acronym is associated with the energy import component of the Intertie Offer/Bid Guarantee Settlement Credit.
$EMP_h^{i,t}$	5-minute Energy Market Price at the Interties	2	2	2	• MIM Publication.
$EMP_h^{m,t}$	5-minute Energy Market Price within Ontario	2	2	2	• MIM Publication.
$EMP_h^{REF,t}$	5-minute Energy Market Reference Price	2	2	2	• MIM Publication.
ETS	Export Transmission Service Tariff Rate	N/A	2	2	• Not published via upstream *IESO* systems. • Subject to the OEB "Ontario Transmission Rate Order".

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
FP_h^m	Fixed Energy Rate	N/A	2	2	• Not published via upstream *IESO* systems.
FPC_h^m	Rate for a designated group of *charge types* (see description of *charge type* 141))	N/A	2	2	• Not published via upstream *IESO* systems.
GRP	Generator Regulated Price	N/A	2	2	• Not published via upstream *IESO* systems.
$HOEP_h$	Hourly Ontario Energy Price	2	2	2	• MIM Publication.
$LCD_{k,h}^m$	Line Connection Demand (KW)	2 and 3	3	3	• RMS presentation is in units of KW to 2 decimal places. • Unit changes to MW to 3 decimal places prior to transfer to the Transmission Tariff Demand Calculator (TTDC). • Unit changes to KW to 3 decimal places prior to transfer to CRS.
MC_h^m	Minimum Consumption	1	1	1	
MI	Ordered matrix of and corresponding IOG *settlement amounts*	1 and 2	2	2	• Derived set of variables and therefore not published on *settlement statements*.
$MLP_{k,h}^{m,t}$	Minimum Loading Point	1	1	1	• Not published via upstream *IESO* systems.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$MLP_CONS_{k,h}^{m,t}$	Minimum Loading Point for a steam turbine resource or a combustion turbine resource associated to a pseudo unit	1	1	1	• Not published via upstream *IESO* systems.
$MQSI_{k,h}^{m,t}$	Market Quantity Scheduled for Injection	1	1	1	
$MQSI\{adj\}_{k,h}^{m,t}$	Adjusted Market Quantity Scheduled for Injection	1	1	1	• Derived variable and therefore not published on *settlement statements.*
$MQSW_{k,h}^{m,t}$	Market Quantity Scheduled for Withdrawal	1	1	1	
$NSD_{k,h}^{m}$	Network Service Demand (KW)	2 and 3	3	3	• RMS presentation is in units of KW to 2 decimal places. • Unit changes to MW to 3 decimal places prior to transfer to the Transmission Tariff Demand Calculator (TTDC). • Unit changes to KW to 3 decimal places prior to transfer to CRS.
OP	Operating Profit Function	N/A See Section 2.4	N/A See Section 2.4	N/A See Section 2.4	• This acronym is associated with the operating profit equation used within the CMSC equation.
$OPCAP_{k,h}^{m,t}$	Operating Capacity	1	1	1	• Not published via upstream *IESO* systems.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$PB_IM_h^t$	Price bias adjustment factor for import transactions	2	2	2	• Published on by the *IESO* on a periodic basis.
$PB_EX_h^t$	Price bias adjustment factor for export transactions	2	2	2	• Published on by the *IESO* on a periodic basis.
$PD_BE_{k,h}^{i,t}$	*Energy Offer* submitted into the *Pre-dispatch*	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.
$PD_BL_{k,h}^{i,t}$	*Energy bids* submitted into the *Pre-dispatch*	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.
$PD_DQSI_{k,h}^{i,t}$	*Pre-dispatch* quantity scheduled for injection at an *intertie metering point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$PD_DQSW_{k,h}^{i,t}$	*Pre-dispatch* quantity scheduled for withdrawal at an *intertie metering point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$PD_ELMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the export zone	2	2	2	• MIM Publication.
$PD_EMP_h^{m,t}$	Pre-dispatch energy market price for Ontario	2	2	2	• MIM Publication.
$PD_ILMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the import zone	2	2	2	• MIM Publication.
$PROR_{r,h}^{m,t}$	5-minute Operating Reserve Price	2	2	5	• MIM Publication.
$PST_{k,h}^{p,t}$	Steam Turbine Portion from Daily Generator Data	1	1	1	• Not published via upstream *IESO* systems.
PTS-L	Provincial Transmission Service Line Connection Service Rate ($/KW)	N/A	2	2	• Not published via upstream *IESO* systems. • Subject to the OEB "Ontario Transmission Rate Order".
PTS-N	Provincial Transmission Service Network Service Rate ($/KW)	N/A	2	2	• Not published via upstream *IESO* systems. • Subject to the OEB "Ontario Transmission Rate Order".

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
PTS-T	Provincial Transmission Service Transformation Connection Service Rate ($/KW)	N/A	2	2	• Not published via upstream *IESO* systems. • Subject to the OEB "Ontario Transmission Rate Order".
$QTR_{k,h}^{i,j}$	Quantity of Transmission Rights Owned	PENDING	0	0	• TR's are in denominations to the nearest MW. • Upstream publication accuracy currently being resolved.
$SQEI_{k,h}^{i,t}$	Scheduled Quantity of Energy Injected at an *intertie metering point*	1	1	1	
$SQEW_{k,h}^{i,t}$	Scheduled Quantity of Energy Withdrawn at an *intertie metering point*	1	1	1	
$SQROR_{r,k,h}^{m,t}$	Scheduled Quantity of class r *Operating Reserve*	1	1	1	

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$TCD_{k,h}^{m}$	Transformation Connection Demand (KW)	2 and 3	3	3	• RMS presentation is in units of KW to 2 decimal places. • Unit changes to MW to 3 decimal places prior to transfer to the Transmission Tariff Demand Calculator (TTDC). • Unit changes to KW to 3 decimal places prior to transfer to CRS.
$TD_{k,h,c}$	Total Market Settlement Amount	N/A	N/A	N/A	• N/A- notational description of an aggregated financial amount (reported to the nearest cent when applicable).
TP_c	Tariff price	N/A	N/A	N/A	• N/A – notational description of tariff rate (reported to the nearest cent when applicable).
TRMP	TR Market Clearing Price	2	2	2	
TRCAD	TR Clearing Account Disbursements	N/A	2	2	• Not published via upstream *IESO* systems.

2.4 Rounding Conventions – by Charge Type

2.4.1 General Notes

- **The table below references significant digits to the right of the decimal place. This should NOT be confused with the number of decimal places allowable in some columns on the *settlement statements* and data files as set out in, "Format Specification for Settlement Statements and Data Files."**

- All **settlement amounts** reported by the *IESO* settlements system are rounded to the nearest cent (i.e. to two decimal places) on *settlement statements,* although some settlement calculations may only yield 1 significant digit to the right of the decimal place. In these instances, the financial amount is NOT further rounded to the nearest ten cents. **The table below does not include the final rounding step to the nearest cent, as this is done for ALL *settlement amounts*. Rather, it describes any intermediate calculations (particularly, those involving division) that involve rounding prior to the final calculation of the *settlement amount*.**

2.4.2 Key to the Table of Rounding Conventions

Column Name	Description
Charge Type Number	This table contains an entry for each *charge type* listed in Section 2.2 of this document ("IESO Charge Types and Equations").
Charge Type Name	The name of each of the *charge types*.
INPUT VARIABLES **Least number of significant digits to the right of the decimal**	In terms of assessing the accuracy of the final *settlement amount*, this column is derived from the settlement variable received by the *settlement* system with the LEAST number of significant digits to the right of the decimal place.
INPUT VARIABLES **Maximum number of significant digits to the right of the decimal**	In terms of assessing the accuracy of the final *settlement amount*, this column is derived from the settlement variable received by the *settlement* system with the MAXIMUM number of significant digits to the right of the decimal place.

Column Name	Description
INTERMEDIATE Rounding done by Settlements	This column indicates whether or not any **INTERMEDIATE** rounding is done by the *IESO settlement process*. **This does NOT include the final rounding of *settlement amounts* to 2 decimal places as the last step in the calculation of ALL *charge types*.**
INTERMEDIATE CALCULATION 1 (where intermediate rounding occurs)	This column ONLY describes an intermediate calculation of the *settlement amount* in which rounding occurs PRIOR to the final rounding of the *settlement amount* to the nearest cent.
Disposition of INTERMEDIATE CALCULATION 1	This column describes the disposition of the rounded value resulting from Intermediate Calculation 1.
INTERMEDIATE CALCULATION 2 (where intermediate rounding occurs)	This column ONLY describes an intermediate calculation of the *settlement amount* in which rounding occurs PRIOR to the final rounding of the *settlement amount* to the nearest cent.
Disposition of INTERMEDIATE CALCULATION 2	This column describes the disposition of the rounded value resulting from Intermediate Calculation 2.

Charge Type Number	Charge Type Name	INPUT VARIABLES Least number of significant digits to the right of the decimal	INPUT VARIABLES Maximum number of significant digits to the right of the decimal	Intermediate Rounding done by Settlements?	INTERMEDIATE CALCULATION 1 (where intermediate rounding occurs)	DISPOSITION OF INTERMEDIATE CALCULATION 1	INTERMEDIATE CALCULATION 2 (where intermediate rounding occurs)	DISPOSITION OF INTERMEDIATE CALCULATION 2
52	Transmission Rights Auction Settlement Debit	0	2	No				
100	Net Energy Market Settlement for Generators and Dispatchable Load	1	3	Yes	Numerator: BCQ Denominator: 12 Resulting Decimals: 3	BCQ quantities Multiplied by EMP when applicable.

2.5 Settlement of Physical Bilateral Contracts

2.5.1 Governing Rules

Settlement of *physical bilateral contracts* is discussed in Section 2.1 of Chapter 8, of the *IESO market rules*. In summary this particular *market rules* Section prescribes the prices to be applied to a *Physical Bilateral Contract Quantity of Energy Sold* ($BCQ_{k,b,h}^{m,t}$) or a *Physical Bilateral Contract Quantity of Energy Bought* ($BCQ_{s,k,h}^{m,t}$) at a *delivery point* or an *intertie metering point.* This treatment is summarized in the table below with respect to each settlement variable defined in **Section 2.1** and *charge type* described in **Section 2.2** of this document.

Location of Bilateral Contract	Settlement of Selling Market Participant	Settlement of Buying Market Participant	Charge Type
Non-dispatchable *delivery point*	• Debit the Physical Bilateral Contract Quantity of Energy Sold ($BCQ_{k,b,h}^{m,t}$) at the 5-Minute Energy Market Price within Ontario ($EMP_h^{m,t}$).	• Credit the Physical Bilateral Contract Quantity of Energy Bought ($BCQ_{s,k,h}^{m,t}$) at the *Hourly Ontario Energy Price* (HOEP).	101
Dispatchable *delivery point*	• Debit the Physical Bilateral Contract Quantity of Energy Sold ($BCQ_{k,b,h}^{m,t}$) at the 5-Minute Energy Market Price within Ontario ($EMP_h^{m,t}$).	• Credit the Physical Bilateral Contract Quantity of Energy Bought ($BCQ_{s,k,h}^{m,t}$) at the 5-Minute Energy Market Price within Ontario ($EMP_h^{m,t}$).	100
Intertie Metering Point	• Debit the Physical Bilateral Contract Quantity of Energy Sold ($BCQ_{k,b,h}^{m,t}$) at the 5-minute Energy Market Price at the *Interties* ($EMP_h^{i,t}$).	• Credit the Physical Bilateral Contract Quantity of Energy Bought ($BCQ_{s,k,h}^{m,t}$) at the 5-minute Energy Market Price at the *Interties* ($EMP_h^{i,t}$).	100

These financial credits and debits are then included the overall *settlement amounts* calculated for *charge types* 100 and 101 as per the equations in **Section 2.2**.

2.5.2 The Nature of the Bilateral Contract Quantity

$BCQ_{s,k,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy bought.	Physical bilateral contract quantity of *energy* in MWh bought by *buying market participant* 'k' from *selling market participant* '*s*' at *RWM* or *intertie metering point* 'm' for each *metering interval* 't' in *settlement hour* 'h'.
$BCQ_{k,b,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy sold.	Physical bilateral contract quantity of *energy* in MWh sold by *selling market participant* 'k' to *buying market participant* 'b' at *RWM* or *intertie metering point* 'm' for each *metering interval* 't' in *settlement hour* 'h'.

The submission of *physical bilateral contract data* is governed by Section 2.4 of Chapter 8 of the *IESO market rules*. Furthermore, Section 2.3 of Chapter 8 describes 2 distinct "forms" of *physical bilateral contract data* that may be submitted by the *selling market participant*. Specifically, the two forms of such data are as follows:

1. **Absolute quantities:** specifying the absolute quantity of *energy* in MWh sold by the *selling market participant* to the *buying market participant* for each *settlement hour* at a particular *delivery point* or *intertie metering point*; and
2. **Derived quantities****:** specifying that the *physical bilateral contract quantity* shall be 100% of the *energy* sold by the *selling market participant* to the *buying market participant* for each *settlement hour* as derived from a particular *delivery point* value (i.e. NOT an *intertie metering point*).

Where:

- The *delivery point* chosen by the *selling market participant* must belong to either the *selling market participant* or the buying *market participant*.
- If the *delivery point* is designated as a sub-type 'I' (injection) *delivery point*, 100% of all injected *energy* for each *metering interval* in each applicable *settlement hour* shall be used regardless of any *physical allocation data*.
- If the *delivery point* is designated as a sub-type 'W' (withdrawal) *delivery point*, 100% of all withdrawn *energy* for each *metering interval* in each applicable *settlement hour* shall be used regardless of any *physical allocation data*.

***** See derived quantities examples that follow.**

Derived Quantities Example 1: *Delivery point* belongs to the *SELLING market participant* and is a sub-type 'I' (injection) *delivery point.* (note parity with EXAMPLE 3)												
metering interval	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
ENERGY QUANTITY	10	10	10	0	0	0	**10**	**10**	0	0	10	10
ENERGY FLOW Injection (I) Withdrawal (W)	I	I	I	I	I	I	**W**	**W**	I	I	I	I
BCQ value used for settlement purposes (for both the *buying* and *selling market participant*)	10	10	10	0	0	0	**0**	**0**	0	0	10	10
Total Quantity for the hour	50 (SEE SECTION 2.5.3 FOR THE DATA PRESENTATION OF THE BILATERAL CONTRACT QUANTITY)											

Derived Quantities Example 2: *Delivery point* belongs to the *SELLING market participant* and is a sub-type 'W' (Withdrawal) *delivery point.* (note parity with EXAMPLE 4)												
metering interval	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
ENERGY QUANTITY	**10**	**10**	**10**	0	0	0	10	10	0	0	10	10
ENERGY FLOW Injection (I) Withdrawal (W)	**I**	**I**	**I**	W	W	W	W	W	W	W	I	I
BCQ value used for settlement purposes (for both the *buying* and *selling market participant*)	**0**	**0**	**0**	0	0	0	10	10	0	0	0	0
Total Quantity for the hour	20 (SEE SECTION 2.5.3 FOR THE DATA PRESENTATION OF THE BILATERAL CONTRACT QUANTITY)											

Derived Quantities Example 3: *Delivery point* belongs to the *BUYING market participant* and is a sub-type 'I' (injection) *delivery point.* (note parity with EXAMPLE 1)												
metering interval	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
ENERGY QUANTITY	10	10	10	0	0	0	**10**	**10**	0	0	10	10
ENERGY FLOW Injection (I) Withdrawal (W)	I	I	I	I	I	I	**W**	**W**	I	I	I	I
BCQ value used for settlement purposes (for both the *buying* and *selling market participant*)	10	10	10	0	0	0	**0**	**0**	0	0	10	10
Total Quantity for the hour	50 (SEE SECTION 2.5.3 FOR THE DATA PRESENTATION OF THE BILATERAL CONTRACT QUANTITY)											

Derived Quantities Example 4: *Delivery point* belongs to the *BUYING market participant* and is a sub-type 'W' (Withdrawal) *delivery point.* (note parity with EXAMPLE 2)												
metering interval	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
ENERGY QUANTITY	**10**	**10**	**10**	0	0	0	10	10	0	0	10	10
ENERGY FLOW Injection (I) Withdrawal (W)	**I**	**I**	**I**	W	W	W	W	W	W	W	I	I
BCQ value used for settlement purposes (for both the *buying* and *selling market participant*)	**0**	**0**	**0**	0	0	0	10	10	0	0	0	0
Total Quantity for the hour	20 (SEE SECTION 2.5.3 FOR THE DATA PRESENTATION OF THE BILATERAL CONTRACT QUANTITY)											

2.5.3 Time Resolution of Bilateral Contract Quantities and Rounding

Where a *physical bilateral contract* takes place at a non-dispatchable *delivery point*, the *Physical Bilateral Contract Quantity* of Energy Bought is reported by *settlement hour* as per the *market rules* (because the *Hourly Ontario Energy Price* is applied to this quantity – see Chapter 9, Section 3.3). At the same location however, the 'Physical Bilateral Contract Quantity of Energy Sold' is debited at the 5-minute energy market price. This latter, sold quantity must therefore be divided into 12, equal *metering intervals* (see Chapter 9, Section 3.1.6 of the *market rules*) and rounded to the appropriate number of significant digits (see Section 2.4 of this document). As a result, the summation of these 12, equal quantities may not equal the original, hourly value submitted in some circumstances due to this intermediate rounding. The table below summarizes this phenomenon in terms of the location sub-type and the applicable *charge type* used. The reader is directed to Section 2.4 of this document for further details.

		Location Type	Charge Type	Time Resolution used for settlements purposes	Intermediate Rounding Applied within Settlements System?
$BCQ_{s,k,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy bought.	Dispatchable *Delivery Point* (injection or withdrawal sub-type)	100	by *metering interval*	Yes – See Section 2.4
		Non-Dispatchable *Delivery Point* (injection or withdrawal sub-type)	101	by *settlement hour*	No
		Intertie metering point	100	by *metering interval*	Yes – See Section 2.4
$BCQ_{k,b,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy sold.	Dispatchable *Delivery Point* (injection or withdrawal sub-type)	100	by *metering interval*	Yes – See Section 2.4
		Non-Dispatchable *Delivery Point* (injection or withdrawal sub-type)	101	by *metering interval*	Yes – See Section 2.4
		Intertie metering point	100	by *metering interval*	Yes – See Section 2.4

2.5.4 Allocation of Hourly Uplift Components Between Buying and Selling Market Participants

Hourly uplift is defined in Section 3.9.1 of Chapter 9 of the *IESO market rules* and may be "disaggregated" (sic) on *settlement statements* into its component parts as per Section 3.9.2. The following components *hourly uplift* charges may be allocated from the *buying market participant* to the *selling market participant* as per the *physical bilateral contract data* submitted by the *selling market participant* (see also, *IESO market rules*, Chapter 8, Section 2.2.2).

Hourly Uplift Component Group	Associated Charge Types	Comments
Net Energy Market Settlement Credit (NEMSC) Hourly Uplift Component (also known as the "Losses" component)	150	• This hourly uplift component is an aggregation of *charge types* 100 (NEMSC), 101 (NEMSC), 104 (TRSC), and 103 (TCRF),. The aggregation of these *charge types* mathematically resolves down to the value of the difference between AQEI, AQEW, SQEW and SQEI quantities valued at the 5-minute Energy Market Reference Price ($EMP_h^{REF,t}$) for each *metering interval* in the *settlement hour* .
Operating Reserve Settlement Credit (ORSC) Hourly Uplift Component	250 252 254	• Separate *charge types* for recovery of ORSC *settlement amounts* paid to *market participants* for each class of *operating reserve*.
Intertie Failure Charge Rebate (IFCR) Hourly Uplift Component	186	Two components as follows: 1) *Charge type* 186: an aggregation of *charge types* 135 (Real-time Import Failure Charge), 136 (Real-time Export Failure Charge), 1134 (Day-Ahead Linked Wheel Failure Charge, 1135 (Day-Ahead Import Failure Charge) and 1136 (Day-Ahead Export Failure Charge). These *charge types* are primarily rebates back to *market participants* for amounts collected under these charges.
Congestion Management Settlement Credit (CMSC) Hourly Uplift Component	155	• Includes recovery of CMSC payments for *energy* and each class of *operating reserve*.

Hourly Uplift Component Group	Associated Charge Types	Comments
Transmission Rights Settlement Credit (TRSC) Hourly Uplift Component	NOT USED	• INCLUDED WITH THE "NET ENERGY MARKET SETTLEMENT CREDIT (NEMSC) Hourly Uplift COMPONENT". • SEE NOTE ABOVE.
Transmission Charge Reduction Fund (TCRF) Hourly Uplift Component	NOT USED	• INCLUDED WITH THE "NET ENERGY MARKET SETTLEMENT CREDIT (NEMSC) Hourly Uplift COMPONENT". • SEE NOTE ABOVE.
Operating Reserve Shortfall Settlement Debit (ORSSD) Hourly Uplift Component	201 203 205	• Separate *charge types* for distribution of ORSSD *settlement amounts* received from *market participants* for shortfalls in the provision of each class of *operating reserve.*

Each hourly uplift component group (i.e. not the individual *charge types* themselves) may be selected in any combination when the *physical bilateral contract data* is submitted by the *selling market participant*. Confirmation of this selection is included within the *settlement statement* supporting data files (type "B" records). A schematic overview of the format of type "B" records may be found within Table 3-2 of the *IESO's* Technical Interface Document entitled, "Format Specification for Settlement Statement Files and Data Files".

The effect of selecting an hourly uplift component group within *physical bilateral contract data,* is the creation of a "Reallocate Quantity (RQ)".

The RQ specific to a single *physical bilateral contract* is exactly equal to the quantity of *energy* involved in the contract itself.

The RQ specific to a single *market participant* is equal to the sum of all RQ quantities for which the *market participant* is the *selling market participant*, minus the sum of all RQ quantities for which the *market participant* is the *buying market participant*.

The RQ specific to a single *market participant* for a particular hourly uplift component group is equal to the sum of all RQ quantities designated to for that particular hourly uplift component group within *physical bilateral contract data* for which the *market participant* is the *selling market participant*, minus the sum of all RQ quantities for which the *market participant* is the *buying market participant*.

This RQ quantity is then applied to the calculation of the *settlement amounts* for each *charge type* associated with the hourly uplift component group as per the table above.

Therefore, when calculating the RQ quantity for a particular hourly uplift *charge type* for *market participant* 'k' at a particular location 'm' during a particular *metering interval* 't', the quantity may be expressed as follows:

$$RQ_{k,h}^{m,t} = \sum_{s,b} [BCQ_{k,b,h}^{m,t} - BCQ_{s,k,h}^{m,t}]$$

Where all variables are defined as per **Section 2.1**.

The RQ quantity is then used to either augment or decrease the *settlement amount* for the hourly uplift *charge type* "c" as follows:

$$\sum_c^{M,T} TD_{k,h,c} \times [(AQEW_{k,h}^{m,t} + SQEW_{k,h}^{i,t} + RQ_{k,h}^{m,t}) / \sum_k^{M,T} (AQEW_{k,h}^{m,t} + SQEW_{k,h}^{i,t})]$$

Where all variables are defined as per **Section 2.1**.

In the event that the term,

$$(AQEW_{k,h}^{m,t} + SQEW_{k,h}^{i,t} + RQ_{k,h}^{m,t}) < 0$$

Where:

$$RQ_{k,h}^{m,t} < 0 \text{ and } \left|RQ_{k,h}^{m,t}\right| > \left|(AQEW_{k,h}^{m,t} + SQEW_{k,h}^{i,t})\right| \text{ and } TD_{k,h,c} > 0$$

The calculation of the applicable hourly uplift charge type "c" will yield a net credit to the *buying market participant* as a result of the reallocated quantity exceeding their actual/scheduled withdrawals of *energy* for the *metering interval* 't' in question.

The above mechanism applies to those "associated charge types" that are enumerated in the table at the beginning of this Section. See Section 2.2 for specific listings of *charge types* and their respective equations.

2.6 Exemptions from the Day-Ahead Import Failure Charge, Day-Ahead Export Failure Charge, and Day-Ahead Linked Wheel Failure Charge

2.6.1 Purpose of this Section

This section describes how Day-Ahead Import transactions are subject to an "*Offer* Price Test" in order to determine if they are exempt from the Day-Ahead Import Failure Charge (*charge type* 1135), Day-Ahead Export Failure Charge (*charge type* 1136) and Day-Ahead Linked Wheel Failure Charge (*charge type* 1134)[2].

Generally speaking the applicability of the five Intertie Failure charges[3] is affected by the "Reason Codes" attached to the applicable *interchange schedule* received by the *Settlement Process*. The impact of these Reason Codes is outlined in Table 3-5 of the *IESO* Technical Interface document entitled, "Format Specifications for Settlement Statement Files and Data Files" (IMP_SPEC_0005). As noted in that table however, day-ahead import transactions arranged in the *pre-dispatch-of-record* that include the 'AUTO''NY90' or 'ADQh', or 'ORA' Reason Codes in the resulting real-time dispatch will be further subject to an "Offer Price Test" which determines whether or not the transaction in question is in fact exempt from the Day-Ahead Failure Charges.

2.6.2 Objective of the "Offer Price Test"

The main objective of the Offer Price Test is to grant an exemption from the DA-IFC, DA-EFC and DA-LWFC for those import and export transactions that make a best effort to ensure that they are scheduled in the *real-time market*. The Offer Price Test assesses "best effort" on the basis of the offer price of the transaction itself.

2.6.3 How the Offer Price Test Works

The Offer Price Test is a simple test that is performed on the first lamination of the *real-time market* import *offer*/or export *bid*. The "first lamination" is defined by the first two *price-quantity* ("p-q") *pairs* in the *real-time market offer* curve, where:

- The first *price-quantity pair* contains an *offer* or *bid* price and a quantity of zero; and

[2] The price test for the Day-Ahead Linked Wheel Failure Charge (1134) is used to determine exemption from the RT-EFC-DALW and RT-IFC-DALW portions only.
[3] Specifically, the Real-time Import Failure Charge (*charge type* 135), the Real-time Export Failure Charge (*charge type* 136), the Day-Ahead Import Failure Charge (*charge type* 1135), the Day-Ahead Export Failure Charge (*charge type* 1136) and the Day-Ahead Linked Wheel Failure Charge (*charge type* 1134).

- The second *price-quantity pair* contains the same *offer* or *bid* price as the first *price-quantity pair* and a non-zero quantity.

The Offer Price Test applies to any situation in which a day-ahead import or export transaction has a Reason Code, 'AUTO', 'NY90' 'ADQh', or 'ORA' assigned to the corresponding real-time import or export transaction at the same location. It is applicable to *any intertie metering point* where the underlying constrained scheduling point (CSP) is a "source" (i.e. applicable to imports only) or a "sink" (i.e. applicable to exports only).

If the transaction fails this test; it will not receive exemption status from the DA-IFC or DA-EFC. If the transaction passes this test, then it will be exempted from the DA-IFC or DA-EFC – without actually changing the Reason Code itself.

2.6.4 Input Data:

$DA_DQSI_{k,h}^{i,t}$	=	Day-ahead constrained quantity scheduled for injection by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'
$PD_DQSI_{k,h}^{i,t}$	=	*Pre- dispatch* constrained quantity scheduled for injection by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'.
$PD_BE_{k,h}^{i,t}$	=	*Energy offers* submitted in Pre-dispatch, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2
- MMCP	=	The *Minimum Market Clearing Price*.
$DA_DQSW_{k,h}^{i,t}$		Day-ahead constrained quantity scheduled for withdrawal by *market participant* 'k' at *intertie metering point* 'i' during metering interval 't' of settlement hour 'h'
$PD_DQSW_{k,h}^{i,t}$		*Pre- dispatch* constrained quantity scheduled for withdrawal by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'.
$PD_BL_{k,h}^{i,t}$		*Energy bids* submitted in *pre-dispatch*, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement*

hour 'h' arranged in ascending order by the offered price in each *price quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2

+MMCP = The *Maximum Market Clearing Price*.

2.6.5 Decision Logic Applied During the Offer Price Test for Import Transactions:

PART 1:

The first part of the test ensures that the original *schedule-of-record* schedule ($DA_DQSI_{k,h}^{i,t}$) for the import transaction is indeed GREATER THAN the resulting *Pre-dispatch schedule* ($PD_DQSI_{k,h}^{i,t}$) over the course of *settlement hour* 'h'.

IF $\sum^{T} DA_DQSI_{k,h}^{i,t} > \sum^{T} PD_DQSI_{k,h}^{i,t}$

THEN

Proceed to PART 2

ELSE

END of the test for this transaction.

PART 2:

The second part of the test ensures that the first lamination (i.e. as defined by the first 2 *price-quantity pairs*) of the offer curve submitted into the *pre-dispatch scheduling process*:

1) Was large enough to cover the entire quantity of the transaction originally scheduled by the *schedule-of-record* at the same *market participant/intertie metering point* combination (commonly referred to as a "MP/MSP/CSP triplet"); and,
2) Was offered at the *Minimum Market Clearing Price* (*-MMCP*).

The test is as follows:

For each *metering interval* 't' at *intertie metering point* 'i' where the transaction passed PART 1 for *settlement hour* 'h':

Let 'B' be matrix $PD_BE_{k,h}^{i,t}$ (see above for definition).

IF B[2,2] ≥ $DA_DQSI_{k,h}^{i,t}$ AND B[2,1] = -MMCP

THEN

Allow Reason Code to remain as-is, but exempt the transaction from the DA-IFC.

ELSE

Allow Reason Code to remain as-is, and do NOT exempt the transaction from the DA-IFC.

Implications:

- A day-ahead import transaction must be constrained down to a level lower than its original *schedule-of-record* schedule in order to receive exemption status;
- The entire amount of the constrained portion of the transaction must have been offered into the *Pre-dispatch* at *–MMCP* in order to receive exemption status (compare Figures 2-1 and 2-2 to see examples where this condition is met and not met respectively); and
- Only the first lamination (i.e. the first 2 p-q pairs) of the Pre-dispatch offer curve for each import transaction are relevant in performing this test (due to the existing market rule requirement that offer prices must be monotonically increasing).

2.6.6 Decision Logic Applied During the Offer Price Test for Export Transactions:

PART 1:

The first part of the test ensures that the original *schedule-of-record* ($DA_DQSW_{k,h}^{i,t}$) for the export transaction is indeed GREATER THAN the resulting *Pre-dispatch schedule* ($PD_DQSW_{k,h}^{i,t}$) over the course of *settlement hour* 'h'.

IF $\sum^{T} DA_DQSW_{k,h}^{i,t} > \sum^{T} PD_DQSW_{k,h}^{i,t}$

THEN

Proceed to PART 2

ELSE

END of the test for this transaction.

PART 2:

The second part of the test ensures that the first lamination (i.e. as defined by the first 2 *price-quantity pairs*) of the offer curve submitted into the *Pre-dispatch scheduling process*:

1) Was large enough to cover the entire quantity of the transaction originally scheduled by the *schedule-of-record* at the same *market participant/intertie metering point* combination (commonly referred to as a, "MP/MSP/CSP triplet"); and,
2) Was offered at the *Maximum Market Clearing Price* (+*MMCP*).

The test is as follows:

For each *metering interval* 't' at *intertie metering point* 'i' where the transaction passed PART 1 for *settlement hour* 'h':

Let 'B' be matrix $BL_{k,h}^{i,t}$ (see above for definition).

IF B[2,2] ≥ $DA_DQSW_{k,h}^{i,t}$ AND B[2,1] = +MMCP

THEN

Allow Reason Code to remain as-is, but exempt the transaction from the DA-EFC.

ELSE

Allow Reason Code to remain as-is, and do NOT exempt the transaction from the DA-EFC.

Implications:

- A day-ahead export transaction must be constrained down to a level lower than its original *schedule-of-record* in order to receive exemption status;
- The entire amount of the constrained portion of the transaction must have been offered into the *Pre-dispatch* at +*MMCP* in order to receive exemption status (compare Figures 2-1 and 2-2 to see examples where this condition is met and not met respectively); and
- Only the first lamination (i.e. the first 2 p-q pairs) of the Pre-dispatch offer curve for each export transaction are relevant in performing this test (due to the existing *market rule* requirement that *offer* prices must be monotonically decreasing).

2.6.7 Decision Logic Applied During the Offer Price Test for Linked Wheel Transactions:

The test seeks to demonstrate a best efforts attempt to schedule both the import and export legs of a day-ahead linked wheel (DALW) transaction through both:

- A Pre-dispatch bid at positive maximum market clearing price (+MMCP) for a quantity at least equal to the day-ahead export quantity, and
- A Pre-dispatch offer at negative maximum market clearing price (–MMCP) for a quantity at least equal to the day-ahead import quantity.

For import leg of the linked wheel, the decision logic for the price test is described in Section 2.6.5 with the following amendment:

For each *metering interval* 't' at *intertie metering point* 'i' where the transaction passed PART 1 for *settlement hour* 'h':

Let 'B' be matrix $PD_BE_{k,h}^{i,t}$ (see above for definition).

IF $B[2,2] \geq DA_DQSI_{k,h}^{i,t}$ AND B[2,1] = -MMCP

THEN

Allow Reason Code to remain as-is, but exempt the transaction from the **RT-IFC-DALW**.

ELSE

Allow Reason Code to remain as-is, and do NOT exempt the transaction from the **RT-IFC-DALW**.

For export leg of the linked wheel, the decision logic for the price test is described in Section 2.6.6 with the following amendment:

For each *metering interval* 't' at *intertie metering point* 'i' where the transaction passed PART 1 for *settlement hour* 'h':

Let 'B' be matrix $BL_{k,h}^{i,t}$ (see above for definition).

IF $B[2,2] \geq DA_DQSW_{k,h}^{i,t}$ AND B[2,1] = +MMCP

THEN

Allow Reason Code to remain as-is, but exempt the transaction from the **RT-EFC-DALW**.

ELSE

Allow Reason Code to remain as-is, and do NOT exempt the transaction from the **RT-EFC-DALW**.

Figure 2-1 – Example of an Import Transaction that PASSES the "Offer Price Test"

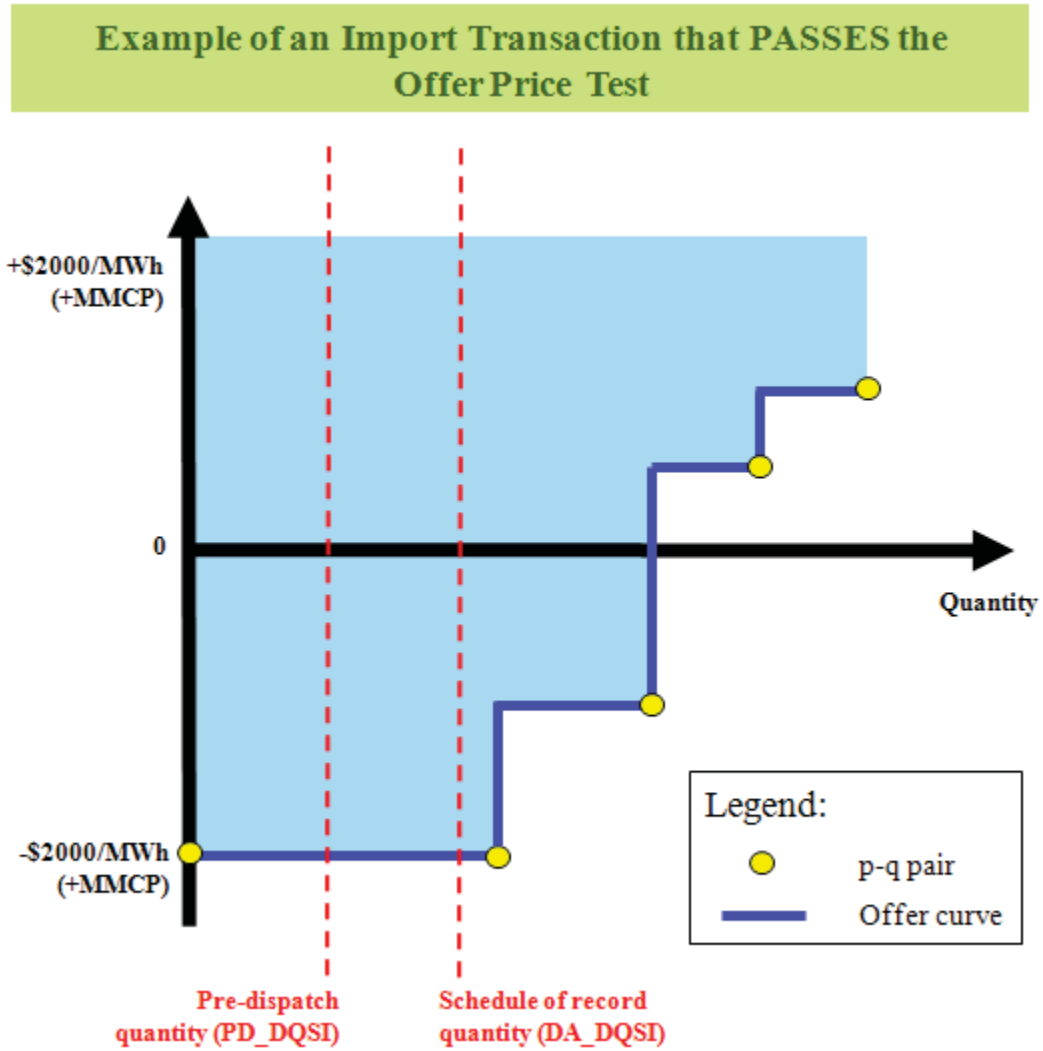

Figure 2-2 – Example of an Import Transaction that FAILS the "Offer Price Test"

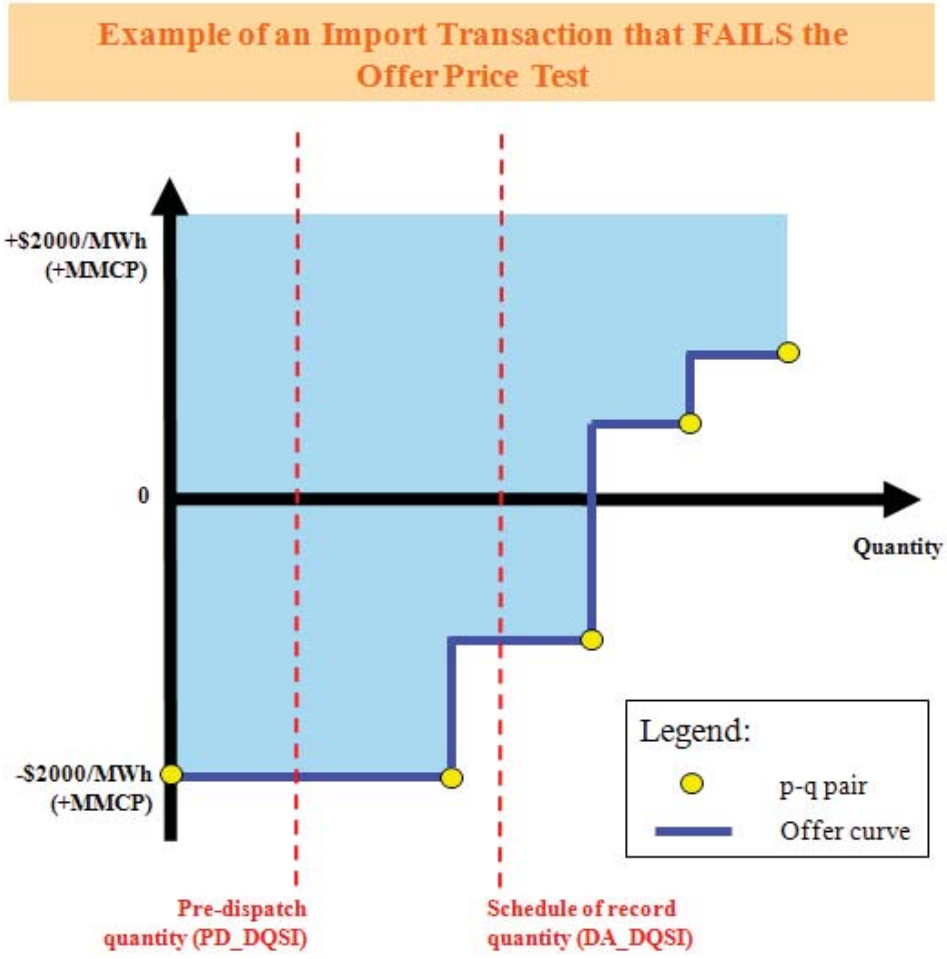

Figure 2-3 – Example of an Export Transaction that PASSES the "Offer Price Test"

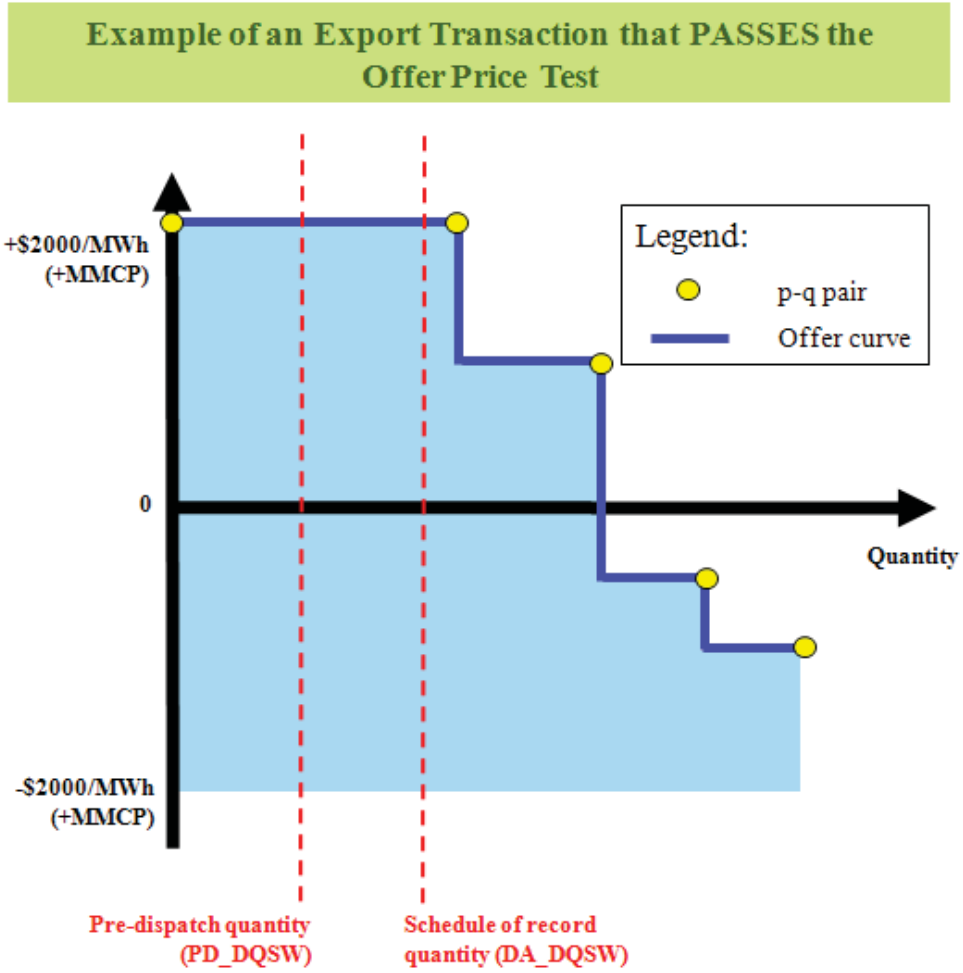

Figure 2-4 – Example of an Export Transaction that PASSES the "Offer Price Test"

Hi Ken – I was speaking to Michael Puskaric this morning and in the course of our conversation, I offered to provide them with a briefing on Fair Hydro. Given we are meeting with them next Monday, we thought we could tack it on to the end of the meeting on Financial Instruments. Do you think the FI discussion will take 2 hours?

Kim – I would love to have you there as well for the Fair Hydro portion of the

meeting. Are you available next Monday – from 11:30 to 12:30 to be at CPA Canada (Wellington and Blue Jays way). Our meeting with them on financial instruments is scheduled from 10-12, although I'm hoping we might be able to work through that discussion in 1.5 hours.

Thanks all,

Cindy

Memo Outline V1np_cv.pdf

Introduction

Describe current state – cash expenditures recovered in current rates (current structure provides for a variance account that is settled within 12 months – so not immediate aka monthly but not long-term)

Describe the objective of the FEP – lower current cost to ratepayers by deferring the recovery of cash expenditures to future periods (for energy already consumed by ratepayers).

Commented [VC(1]: Let's use FHP – Fair Hydro Plan

Objective

Assess the impact of the FEP on the financial statements of the GRE.

Basis of Accounting

GRE – PSAS

OGOs – line-by-line consolidation – PSAS

GBEs – modified equity accounting – IFRS

Analysis (in general, IESO first, then standalone trust, then trust in GRE)

IESO is OGO, so impact on IESO will flow through to GRE

Describe role of IESO - market settlement mechanism

Describe initial impact of FEP on IESO – creates funding shortfall (for costs already incurred on energy already consumed by ratepayers)

IESO has concluded it can recognize the shortfall as a RRA (ref to GAAP hierarchy – relevance of US GAAP)

Describe general concept of RRA

IESO is an OGO – must follow PSAS in GRE

Discuss pros and cons of RRA recognition under PSAS

Show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

I think we should include in this section some commentary on the fact that the Province's statements are currently impacted by RRA – through OPG and H1. Using RRA in IESO is not introducing a new concept into the financial statements of the Province if the substance of the RRA in IESO is similar to the substance of the RRAs in the two GBEs. One question to consider is whether there is substance to using a different accounting treatment in a commercial entity vs. a non-commercial entity. If OPG took on the

role of settling the market, should we get a different answer (e.g. could have structured in a different way)

Discuss need for funding of shortfall and proposed plan (sale of right to trust)

IESO has concluded that details of transaction would support sale treatment.

Discuss pros and cons of sale treatment

Assuming sale treatment, show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

Impact of trust on GRE will depend on two things: (i) who controls the trust, and (ii) how transaction is reported in trust.

Assume, to start, that trust will apply IFRS (for province's CFS, OPG and H1 will be reflected on an IFRS basis, even though both entities will continue to report on a US GAAP basis)

OPG has concluded that trust will recognize intangible asset as a result of the purchase transaction.

Discuss pros and cons of sale treatment and recognition of intangible asset. – not sure what is going to be discussed here – what's the argument not to recognize an intangible asset in the stand-alone f/s of OPG?

Analysis of whether OPG taking on this role impacts is status as a GBE

Show JEs

OPG has concluded they control the trust (discretionary decision) and, therefore, will consolidate.

Commented [VC(2]: Nadine – not sure what you mean by discretionary?

As GBE, OPG is included in GRE using modified equity. Therefore, net assets of trust are included in GRE (investment in GBE).

Provide support for non-Provincial control of Trust and d~~D~~iscuss pros and cons of control (include consideration as to whether Province could control if OPG doesn't).

Discuss 3020 issue if IESO cannot recognize RRA

Show comparison of JEs under both scenarios (modified equity via OPG vs. direct consolidation by GRE + sub-topics of RRA vs. no RRA).

Consider:

- Reference to OEB?
- Definition of an asset
- Reference to PSAS consolidation requirements (no requirement for independence and no elimination of assets/liabs of consolidated orgs upon consolidation just because province controls OEB)
- Impacts if OPG no longer controls the trust
- Impacts if regulatory charge is challenged as unconstitutional and the government legislates the charge as a tax
- What is the impact of 3rd party financing provided on the strength of the ability to collect from future ratepayers (assuming the guarantee is narrowing defined)?
- There are indemnities being provided by the province to IESO and OPG – how do these impact the analysis?
- The AG issued a statement on May 24 at the Committee Hearings -- should address those views. We should have Hansard of the Q&As by the end of the week as well, which we should consider.
- The FAO issued their report this week – not sure there is anything in that document that we need to address in this memo.
- What triggers would cause reassessment of the accounting.

Describe current state – cash expenditures recovered in current rates (current structure provides for a variance account that is settled within 12 months – so not immediate aka monthly but not long-term)

Describe the objective of the FEP – lower current cost to ratepayers by deferring the recovery of cash expenditures to future periods (for energy already consumed by ratepayers).

Commented [VC(1]: Let's use FHP – Fair Hydro Plan

Objective

Assess the impact of the FEP on the financial statements of the GRE.

Basis of Accounting

GRE – PSAS

OGOs – line-by-line consolidation – PSAS

GBEs – modified equity accounting – IFRS

Analysis (in general, IESO first, then standalone trust, then trust in GRE)

IESO is OGO, so impact on IESO will flow through to GRE

Describe role of IESO - market settlement mechanism

Describe initial impact of FEP on IESO – creates funding shortfall (for costs already incurred on energy already consumed by ratepayers)

IESO has concluded it can recognize the shortfall as a RRA (ref to GAAP hierarchy – relevance of US GAAP)

Describe general concept of RRA

IESO is an OGO – must follow PSAS in GRE

Discuss pros and cons of RRA recognition under PSAS

Show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

I think we should include in this section some commentary on the fact that the Province's statements are currently impacted by RRA – through OPG and H1. Using RRA in IESO is not introducing a new concept into the financial statements of the Province if the substance of the RRA in IESO is similar to the substance of the RRAs in the two GBEs. One question to consider is whether there is substance to using a different accounting treatment in a commercial entity vs. a non-commercial entity. If OPG took on the

role of settling the market, should we get a different answer (e.g. could have structured in a different way)

Discuss need for funding of shortfall and proposed plan (sale of right to trust)

IESO has concluded that details of transaction would support sale treatment.

Discuss pros and cons of sale treatment

Assuming sale treatment, show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

Impact of trust on GRE will depend on two things: (i) who controls the trust, and (ii) how transaction is reported in trust.

Assume, to start, that trust will apply IFRS (for province's CFS, OPG and H1 will be reflected on an IFRS basis, even though both entities will continue to report on a US GAAP basis)

OPG has concluded that trust will recognize intangible asset as a result of the purchase transaction.

Discuss pros and cons of sale treatment and recognition of intangible asset. – not sure what is going to be discussed here – what's the argument not to recognize an intangible asset in the stand-alone f/s of OPG?

Analysis of whether OPG taking on this role impacts is status as a GBE

Show JEs

OPG has concluded they control the trust (discretionary decision) and, therefore, will consolidate.

Commented [VC(2]: Nadine – not sure what you mean by discretionary?

As GBE, OPG is included in GRE using modified equity. Therefore, net assets of trust are included in GRE (investment in GBE).

Provide support for non-Provincial control of Trust and d~~D~~iscuss pros and cons of control (include consideration as to whether Province could control if OPG doesn't).

Discuss 3020 issue if IESO cannot recognize RRA

Show comparison of JEs under both scenarios (modified equity via OPG vs. direct consolidation by GRE + sub-topics of RRA vs. no RRA).

Consider:

- Reference to OEB?
- Definition of an asset
- Reference to PSAS consolidation requirements (no requirement for independence and no elimination of assets/liabs of consolidated orgs upon consolidation just because province controls OEB)
- Impacts if OPG no longer controls the trust
- Impacts if regulatory charge is challenged as unconstitutional and the government legislates the charge as a tax
- What is the impact of 3rd party financing provided on the strength of the ability to collect from future ratepayers (assuming the guarantee is narrowing defined)?
- There are indemnities being provided by the province to IESO and OPG – how do these impact the analysis?
- The AG issued a statement on May 24 at the Committee Hearings -- should address those views. We should have Hansard of the Q&As by the end of the week as well, which we should consider.
- The FAO issued their report this week – not sure there is anything in that document that we need to address in this memo.
- What triggers would cause reassessment of the accounting.

Hi Kim – Attached is a house book note for the market accounts – there is one question for you in there re: describing IESO's role with the LDCs (I took the description for the role with the generators from KPMG's memo, but didn't see a similar one for LDCs).

Also – Bharat is going to reach out to Susan or yourself re: why the amounts owed to the generators in 2014 in the OPA f/s (less than $500M) are so much lower than the balances at the end of March 2017 ($1.6 billion) – are we comparing apples to oranges?

Thanks,

Hi Ken – I was speaking to Michael Puskaric this morning and in the course of our conversation, I offered to provide them with a briefing on Fair Hydro. Given we are meeting with them next Monday, we thought we could tack it on to the end of the meeting on Financial Instruments. Do you think the FI discussion will take 2 hours?

Kim – I would love to have you there as well for the Fair Hydro portion of the meeting. Are you available next Monday – from 11:30 to 12:30 to be at CPA Canada (Wellington and Blue Jays way). Our meeting with them on financial instruments is scheduled from 10-12, although I'm hoping we might be able to work through that discussion in 1.5 hours.

Thanks all,

Cindy

I have a couple of comments. I apologize in advance that I have not been able to keep up with al the drafting and other decisions, so to the extent that these elements have already been agreed by OPG, I apologize.

1. "Clarification with respect to regulations" should refer to "any proposal to make ***or amend*** a regulation"

2. "Average baseline rate" is this calculated **before** the announced HST rebate?

3. "Fair Adjustment May 1, 2018 to April 30, 2022" – would like to make sure that the regulations allow for a pass-through of interest on investment assets in this time period.

4. "Principles of fair adjustment" why does this refer to the time value of money rather than funding costs of the investment assets?

5. "Fair Allocation Plan" this is still in the document, but now without any use or definition . Is this a holdover? Would be good to get rid of the concept completely

6. "Estimated funding amount" should include original issue discount (if any)

Subject: RE: Ontario Fair Hydro Plan

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April

28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Subject: RE: Ontario Fair Hydro Plan

All,

As requested, we set out below a list of major and minor issues compiled by Torys, Hunton and Williams and OPG. These are ordered as they arise in the Bill, not in the order of importance. We plan to follow up later this evening with a markup of the draft Bill that reflects these comments as well as a few drafting points.

Major Issues

1. It is critically important to have a definition of "transfer" that is broad enough. We had a mark-up as did Stikemans. I prefer ours but the two are not really that far apart. I would suggest a call with Ashbourne, Hamilton and Feldman tonight or tomorrow to get consensus.

2. Section 6.1. The process for determining the rate for electricity under 6.1xx may not be workable or requires further clarification, as well as confirmation that the OEB is capable of making the necessary calculations. It appears that the rate under 6.1 is that which is required for a specified consumer to receive a monthly total bill that is 25% less than it would have been for them if the OEB determined RPP solely using the method under s. 79.16(1)(b). Though the determination of the comparison rate by OEB seems straightforward, it is not clear who determines the rates that are required for specified consumers to receive monthly total invoices that are 25% less than they would have been. It appears that these rates may have to be determined on an individual consumer basis, or at least separately for the consumers of each electricity vendor. This is because a total bill for one consumer will have a different proportion of commodity vs. delivery and other charges than a total bill for another consumer. As such, it does not appear to be a single rate that the OEB can determine for every specified consumer, as this will not result in the necessary 25% reductions. If not the OEB, who is it? If it is the electricity vendors, what authority do they have to determine

these rates given prohibition under s. 78(2) of the OEB Act?

3. Section 8xx (2)(b) – delete “material” from last line of the paragraph – we probably don’t want to get into a dispute about whether a funding obligation was incurred in a manner that was in “material” conformity with the Financing Plan. In addition, as drafted, it would actually mean that if there were a material issue, the charge would be irrevocable, but if it was not material, then arguably the charge could be revocable.

[4. Section 10xx (1) – Will OPG, as Financial Services Manager, be able to determine the monthly clean energy adjustment?]

5. Prior Section 11xx (1), “The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor’s portion, as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period” should be reinserted.

6. Section 13(2) gives the Minister the ability to replace the Financial Services Manager. I think, because of section 17, this would mean that the Minister would have the ability to replace the FSM of an up and running financing entity. The Minister should not have that power. That power should only be exercisable by Debtholders. We had suggested bifurcating the role of the FSM for this purpose and limiting this replacement power to the purpose of preparing the Financing Plan. Perhaps another way of addressing this would be to have an explicit carve out to the effect that the Minister’s rights will not extend to OPG’s rights as FSM of a financing entity that has already issued funding obligations under section 17. This is also important in order to achieve the desired accounting treatment.

7. Section 15. The draft still has the FSM determining the fair allocation amount. This is OPG’s issue of greatest concern. We are attaching a proposal prepared by OPG to suggest a compromise between our last mark up, which had the Minister assume full responsibility, and the latest draft Bill which leaves the responsibility fully on OPG.

8. In s. 16(5) the draft Bill still proposes to treat the Financing Plan as a confidential document. We believe that unless the Minister allows for disclosure of the Financing

Plan we will not be able to satisfy disclosure obligations under securities laws.

9. s. 17(1) implies that the FSM may incur funding obligations itself. Is this a drafting error or is the intention to be building in flexibility so that OPG would be able to purchase the IESO funding shortfall itself in case OPG and the Dealers can't get a deal done quickly enough (impractical as that may be) ?

10. Section 22(2) still says that IESO does not retain any obligations in respect of the investment asset. This originally came from IESO and it should be dropped. It is incorrect. IESO does have obligations in respect of the investment asset. It has obligations in the Act and the regulations and it will have obligations in the master sale and servicing agreement.

11. Section 25xx (1) – delete references to "and recover amounts in respect of". Definition of clean energy adjustment already reflects that it is an amount and the financing entity should be entitled to the full clean energy adjustment.

12. Section 38 of our previous markup had a provision for "Standing and Remedies" of a financing entity which was derived from the OBCA and we believe it would be a serious gap not to have that.

<u>Minor Points</u>

13. The definition of clean energy initiative now appears to be narrower than the intentions seemingly expressed by the revised preamble. It should be revised accordingly.

14. The definition of "refinancing" doesn't work because it no longer requires replacing old funding obligations with new funding obligations.

15. Section 6. For the purposes of the definition of “RPP rate” in 6xx, it should be recognized that this is not a single rate established by the OEB. Rather, OEB establishes a number of RPP prices under the relevant clause. There are time of use prices and tiered prices. Within each of these, there are several prices depending on time of day or volume consumed. If this has not been considered, it will be important to determine how this affects the rest of the drafting and the ability to calculate the necessary amounts that depend on the “RPP rate”.

16. s. 9(2) does not expressly address how these errors would be dealt with. It would be nice to specify that they would be corrected pursuant to the true up procedure in 10(3).

17. I don’t think “fair adjustment” is defined anywhere anymore. In any event, I think sections 15(1)2 and 16(4)(b) are still adding dollar amounts to the fair adjustment, which I think is an adjustment to a rate ($/Kwh). I am not sure what is meant by “value of an fair adjustment” – is this supposed to be the monetary impact that the adjustment had when aggregated over all specified consumers ? It is not clear.

18. Section 15(2)3 still refers to time value of money or rate of inflation instead of actual financing charges on the funding obligations, which is the real factor that would have to be taken into account.

19. Changes to section 53.1 of the Electricity Act are behind our mark-up.

Subject: RE: Ontario Fair Hydro Plan

All - Thank you for the detailed comments that you provided on Saturday and Sunday. Please find attached the next turn of the legislation. We have tried to balance the comments that we received to address the points that you have raised. This draft does not reflect the drafting points that were raised over Monday and Tuesday and we will reflect those points in our next instructions to legislative counsel. Please review and identify any significant substantive issues by 6 p.m. today. We continue to work toward pens down on Friday, meaning the draft that we have at that point in time will be

proposed for introduction in the House. Thank you again for your contributions to this process.

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act,

2017". A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes' summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Fair Hydro Plan Act (April 26 2017) Consultation v4 (Torys Comments).pdf

Version 4

Torys/OPG Comments – April 26, 2017

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

[NTD: Amend all references to the Fair Hydro Plan Act to reflect new name.]

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

CONTENTS

PART I
GENERAL

[1] FLS: please see the preamble of the *Green Energy Act, 2009*.

1. Interpretation
2. Effect of invalidity, etc.
3. Purpose
4. Crown bound
5. Protection and assurances

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

6. Definitions
6.1 Specified RPP consumer, first fair adjustment
6.2 Specified consumers (non-RPP), first fair adjustment
6.3 Determination by Board
6.4 Implementation of rates
6.5 Effective date
6.6 Transition
7. Subsequent fair adjustments
7.1 Sub-meter customers

PART III
CLEAN ENERGY ADJUSTMENT

8. Specified consumers to pay
9. Irrevocability of amount
10. Determination of clean energy adjustment
11. IESO to receive amounts
12. Electricity vendor to invoice specified consumers

PART IV
IMPLEMENTATION
FINANCIAL SERVICES MANAGER

13. Appointment
14. Duties and powers
FAIR ALLOCATION AMOUNT
15. Financial Services Manager to calculate fair allocation amount
FINANCING PLAN
16. Financial Services Manager to prepare Financing Plan
17. Implementation of Financing Plan

PART V

37. Non-application, Financial Administration Act, s. 28
38. Regulations

PART VII
AMENDMENTS TO OTHER ACTS
ELECTRICITY ACT, 1998
AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

PART VII
COMMENCEMENT AND SHORT TITLE

103. Commencement
104. Short title

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the amount of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998* **[NTD: As payments made under 78.5 are not related to contracts, the lead-in language in (a) does not work for this sub-paragraph]**, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

[NTD: This definition appears narrower than the intentions expressed by the revised preamble. Whereas the preamble now refers to investments in generation, transmission and distribution, this definition appears focused on generation and CDM. Consider revising it accordingly, particularly if intent of preamble is to leave flexibility for determining the basis of cost deferrals under this legislation.]

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined under section 15xx;

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

"funding obligation" means,

(a) a payment obligation incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section 25xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." or "OPG" means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means the incurrence of debt in connection with a redemption, repayment or repurchase of a funding obligation, as may be further prescribed; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" includes an assignment, conveyance, disposition or sale and, in relation to the regulatory asset or portion thereof, includes any act of IESO which is expressed by IESO to be a transfer of all or any portion of the regulatory asset for purposes of this Act; ("French") **[NTD: It is important that this not be defined in an exhaustive manner, so that the common law definition of transfer is also maintained.]**

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

    i. The commodity price of the electricity used.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017. **[NTD: If an invoice amount pertains to a different invoice period, then this should refer to the order of the Board then in effect and not to the order specifically in effect on April 30, 2017]**

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

    iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

    v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

    i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

ii. A charge labelled as a "specific service charge" or "retail service charge".

iii. A rate rider [of the prescribed type or class]. **[NTD: Okay leaving this to the regulations.]**

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity **[NTD: "specified"?]** consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment asset, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the

Regulated Price Plan"; ("French") **[NTD: It should be recognized that this is not a single rate established by OEB. Rather, OEB establishes a number of RPP "prices" under 79.16(1)(b). There are time of use prices and tiered prices. Within each of these, there are several prices depending on time of day or volume consumed. It will be important to determine how this affects the rest of the drafting and the ability for the OEB to actually calculate the various RPP prices as contemplated.]**

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive, on a monthly basis an invoice amount that is 25 per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2).

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*.

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

[NTD: The process for determining the rate for electricity under 6.1xx may not be workable. It requires further clarification, as well as confirmation that the OEB is capable of making the necessary calculations. It appears that the rate under 6.1 is that which is required for a specified consumer to receive a monthly total bill that is 25% less than it would have been for them if the OEB determined RPP solely using the method under s. 79.16(1)(b). Though the determination of the comparison rate by OEB seems straightforward, it is not clear who determines the rates that are required for specified consumers to receive monthly total invoices that are 25% less than they would have been. It appears that these rates may have to be determined on an individual consumer basis, or at least separately for the consumers of each electricity vendor. This is because a total bill for one consumer will have a different

proportion of commodity vs. delivery and other charges than a total bill for another consumer. As such, it does not appear to be a single rate that the OEB can determine for all specified consumers, as this will not result in the necessary 25% reductions. If not the OEB, who is it? If it is the electricity vendors, they may not have the capability to make these calculations and do not appear to have authority to determine these rates given prohibition under s. 78(2) of the OEB Act]

Specified consumers (non-RPP), first fair adjustment

6.2xx The rate for electricity payable by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1).

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt its billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice from an electricity vendor that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty

(a) each clean energy adjustment is considered to be consistent with the fair allocation amount; and

(b) each clean energy adjustment is considered to relate to funding obligations that were incurred in a manner that was in conformity with the Financing Plan. **[NTD: We think this approach is preferable as it does not contemplate inconsistencies with the Act.]**

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the sum of the estimated finance amount and the other cost amount in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, other cost amount and true up amount

(2) The estimated finance amount, other cost amount and the true up amount shall be determined in accordance with the regulations.

[NTD: As agreed on a call with Finance Tax Policy, Scott Nelms and James Rehob on April 26, 2017, all taxes payable by a financing entity will be recovered from ratepayers. We propose that this be included as part of the "other cost amount".]

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the immediately preceding reference period,

    ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

    ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) The Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced by electricity vendors to recover the clean energy adjustment in respect of the reference period.

IESO to receive amounts

11xx. (1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion, as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period. The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(2) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

Same, held in trust

(3) All amounts received by the IESO in respect of the clean energy adjustment shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act.

IESO to remit

(4) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) **[NTD: "(5)"?]** and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on

a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) **[NTD: Incorrect cross-reference]** to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

Financial Services Manager

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager, provided that such termination will not affect the rights and obligations of the Financial Services Manager in respect of financing entities that have previously issued funding obligations.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Minister to prepare initial calculation of fair allocation amount

15xx. (1) The Minister shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of initial calculation

(1.1) The Minister shall calculate a fair allocation amount in respect of each reference period by the date that is **[20]** business days after the day this Act receives Royal Assent.

Certification

(1.2) The Minister shall certify to the Financial Services Manager the initial calculation of the fair allocation amount for each reference period, including the assumptions, methodology, accuracy of information and numbers used in such calculation. The assumptions and methodology for such calculation shall be set out in the regulations.

Financial Services Manager to update calculation

(1.3) For the reference periods commencing May 1, 2018, the Financial Services Manager shall prepare an updated calculation of the fair allocation amount in respect of each such reference period, as and when deemed necessary or appropriate by the Financial Services Manager but no less seldom and every five years, using the assumptions and methodology for such calculation set out in the regulations and updated information from the relevant parties. Any update to the fair allocation calculation shall be effective in accordance with subsections (4) and (5).

[NTD: OPG expects the method for the update calculation to be very prescriptive and set out in detail in the regulations. The regulations would also compel the IESO, OEB, LDCs and other relevant agencies to provide OPG with the necessary information to do the update calculation. OPG expects to use the model put together by the Province for the initial calculation and input the updated data from the agencies into the model to calculate the updated fair allocation amounts.]

Access to information

(1.4) The Minister shall make available, or cause to be made available, in a timely manner to the Financial Services Manager, all such information, including information from the IESO, the Board and electricity vendors, as requested by the Financial Services Manager to prepare updates to the calculation of the fair allocation amount.

Amount

(1.5) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. **[A portion]** of the value of any fair adjustment that has been made under Part II in respect of any previous reference period. **[NTD: What portion needs to be specified? Also, if the "value of any fair adjustment" is supposed to be a monetary amount to match paragraph 1, then we think you need to better define the concept. It appears that you may be contemplating that this is supposed to be the monetary impact that the adjustment had when aggregated over all specified consumers. If this is the case then the language needs to be clarified.]**

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Minister or the Financial Services Manager, as applicable, shall have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

ii. The expected number of specified consumers in respect of each reference period.

iii. The expected electricity consumption rates in respect of each reference period.

4. Such other principles as may be prescribed.

Method

(3) The Minister or the Financial Services Manager, as applicable, shall calculate a fair allocation amount in accordance with such methods as the Minister or the Financial Services Manager, as applicable, considers appropriate, having regard to the requirements of this Act.

Provision of updates to Minister

(4) The Financial Services Manager shall provide the Minister written notification of any updates to the calculation of the fair allocation amount made pursuant to subsection (1.3).

Effective date

(5) The fair allocation calculation or an amendment to the fair allocation calculation by the Minister takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided by the Minister to the Financial Services Manager. Any update to the fair allocation calculation prepared by the Financial Services Manager shall be effective 30 days after such update is provided to the Minister.

Publication

(6) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment asset in accordance with this Act or for purposes of refinancing a funding obligation.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align with the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during a reference period with the fair allocation amount determined in respect of the reference period under this Part as of the time of the incurrence. **[NTD: this deduction does not appear to be correct.]**

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Amendments to plan

(5) The Financial Services Manager may amend the Financing Plan at any time.

Same

(6) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

Financing entities

17xx. (1) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

(2) The Financial Services Manager shall cause financing entities to incur funding obligations only in material conformity with the applicable Financing Plan.

Same

(3) For greater certainty, subsection 17xx (4) applies despite the failure of the Financial Services Manager to comply with subsection (2).

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) A recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the balance at the time.

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in the regulatory asset or in the investment asset created by the transfer. **[NTD: IESO will still have obligations under this Act and the regulations and by contract in relation to the investment asset.]**

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment interest owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner of the regulatory asset.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) Each transfer of a regulatory asset or a portion of it either creates or increases the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor and IESO to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment. **[NTD: Reference to IESO to be added for purposes of its remittance obligations.]**

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment interest owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment interest owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any account of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, Ontario Power Generation Inc. or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

---

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

Standing and Remedies

39xx. (a) Any investment interest owner, any creditor of an investment interest owner and any Financial Services Manager may apply to a court for an order under this section.

(b) Where upon an application under subsection (a), the court is satisfied that the IESO, any electricity vendor or any other Person has not complied with, or is not complying with, this Act or the regulations to this Act, the court may make an order to rectify the matters complained of.

(c) In connection with an application under this section, the court may make any interim or final order it thinks fit, including an order restraining the conduct complained of and an order to compensate an investment interest owner, any creditor of an investment interest owner and any Financial Services Manager.

(d) The rights of an investment interest owner, any creditor of an investment interest owner and any Financial Services Manager under this section are in addition to any other rights any of them may have.

(e) In this section, court means the Superior Court of Justice.

(f) An appeal lies to the Court of Appeal from any order made by the court under this section.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(A) incurring liabilities in relation to the regulatory asset;

(B) transferring the regulatory asset for consideration; and

(C) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*.

200.1xx (1) Subsection 25.33 (1) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:

(c) amounts paid to or received from a [prescribed] financial services entity **[NTD: "financing entity"?]** or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and

(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.

(1.1) Subsection 25.33 (2) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:

(c) amounts paid to or received from a [prescribed] financial services entity **[NTD: "financing entity"?]** or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and

(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

   i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017,* or

   ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998]*.

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities and performing other services on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries (other than, for greater certainty, such a subsidiary that is that financing entity); and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity (other than, for greater certainty, such a subsidiary that is that financing entity).

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017*.

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017* and any regulations made thereunder. **[NTD: This would make it a deemed condition of license for electricity transmitters too, but transmitters are not "electricity vendors" that need to comply with this Act.]**

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Blackline - Fair Hydro Plan Act (Torys comments).pdf

Version 4

Torys/OPG Comments – April 26, 2017

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

[NTD: Amend all references to the Fair Hydro Plan Act to reflect new name.]

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

PART I
GENERAL

Interpretation
Definitions
1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the ~~value~~**amount** of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, ~~1998,~~**1998** [NTD: As payments made*

under 78.5 are not related to contracts, the lead-in language in (a) does not work for this sub-paragraph], and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

[NTD: This definition appears narrower than the intentions expressed by the revised preamble. Whereas the preamble now refers to investments in generation, transmission and distribution, this definition appears focused on generation and CDM. Consider revising it accordingly, particularly if intent of preamble is to leave flexibility for determining the basis of cost deferrals under this legislation.]

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined ~~in~~ under section 15xx;

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

(a) a payment obligation incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section ~~22~~**25**xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." **or "OPG"** means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means~~, subject to the regulations,~~ **the incurrence of debt in connection with** a redemption, repayment or repurchase of a funding obligation**, as may be further prescribed**; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" ~~means [TBD]; ("French")~~**includes an assignment, conveyance, disposition or sale and, in relation to the regulatory asset or portion thereof, includes any act of**

IESO which is expressed by IESO to be a transfer of all or any portion of the regulatory asset for purposes of this Act; ("French") [NTD: It is important that this not be defined in an exhaustive manner, so that the common law definition of transfer is also maintained.]

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or ~~the~~ has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

   i. a dwelling,

   ii. a property within the meaning of the *Condominium Act, 1998*,

   iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

   iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

    i. The commodity price of the electricity used.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017. **[NTD: If an invoice amount pertains to a different invoice period, then this should refer to the order of the Board then in effect and not to the order specifically in effect on April 30, 2017]**

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

    iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

    v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

ii. A charge labelled as a "specific service charge" or "retail service charge".

iii. A rate rider [of the prescribed type or class]. **[NTD: Okay leaving this to the regulations.]**

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers ~~and reflect the fair allocation~~; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity **[NTD: "specified"?]** consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment ~~interest~~**asset**, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French") **[NTD: It should be recognized that this is not a single rate established by OEB. Rather, OEB establishes a number of RPP "prices" under 79.16(1)(b). There are time of use prices and tiered prices. Within each of these, there are several prices depending on time of day or volume consumed. It will be important to determine how this affects the rest of the drafting and the ability for the OEB to actually calculate the various RPP prices as contemplated.]**

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive**, on** a monthly **basis an** invoice amount that is 25 per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2).

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*.

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

[NTD: The process for determining the rate for electricity under 6.1xx may not be workable. It requires further clarification, as well as confirmation that the OEB is capable of making the necessary calculations. It appears that the rate under 6.1 is that which is required for a specified consumer to receive a monthly total bill that is 25% less than it would have been for them if the OEB determined RPP solely using the method under s. 79.16(1)(b). Though the determination of the comparison rate by OEB seems straightforward, it is not clear who determines the rates that are required for specified consumers to receive monthly total invoices that are 25% less

than they would have been. It appears that these rates may have to be determined on an individual consumer basis, or at least separately for the consumers of each electricity vendor. This is because a total bill for one consumer will have a different proportion of commodity vs. delivery and other charges than a total bill for another consumer. As such, it does not appear to be a single rate that the OEB can determine for all specified consumers, as this will not result in the necessary 25% reductions. If not the OEB, who is it? If it is the electricity vendors, they may not have the capability to make these calculations and do not appear to have authority to determine these rates given prohibition under s. 78(2) of the OEB Act]

Specified consumers (non-RPP), first fair adjustment

6.2xx The rate for electricity payable by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1).

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt ~~is~~**its** billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice **from an electricity vendor** that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty~~, subsection (1) applies regardless of,~~

(a) ~~whether the~~**each** clean energy adjustment ~~was determined in a manner that was inconsistent with this Act~~**is considered to be consistent with the fair allocation amount**; and

(b) ~~whether the amount payable in respect of the~~**each** clean energy adjustment ~~relates~~**is considered to relate** to funding obligations that were incurred in a manner that was ~~not~~ in ~~material~~ conformity with the Financing Plan. **[NTD: We think this approach is preferable as it does not contemplate inconsistencies with the Act.]**

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding **the sum of** the estimated finance amount **and the other cost amount** in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, other cost amount and true up amount

(2) The estimated finance amount, other cost amount and the true up amount shall be determined in accordance with the regulations.

[NTD: As agreed on a call with Finance Tax Policy, Scott Nelms and James Rehob on April 26, 2017, all taxes payable by a financing entity will be recovered from ratepayers. We propose that this be included as part of the "other cost amount".]

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the immediately preceding reference period,

    ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

    ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) The Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced **by electricity vendors** to recover the clean energy adjustment in respect of the reference period.

IESO to receive amounts

11xx. ~~(2)~~ **1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion, as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period.** The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from

electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(~~3~~2) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

Same, held in trust

(~~4~~3) All amounts received by the IESO in respect of the clean energy adjustment shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act.

IESO to remit

(~~5~~4) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) **[NTD: "(5)"?]** and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) **[NTD: Incorrect cross-reference]** to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

Financial Services Manager

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager**, provided that such termination will not affect the rights and obligations of the Financial Services Manager in respect of financing entities that have previously issued funding obligations**.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

~~Financial Services Manager to calculate~~Minister to prepare initial calculation of fair allocation amount

15xx. (1) The ~~Financial Services Manager~~**Minister** shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of initial calculation

(1.1) The ~~Financial Services Manager~~**Minister** shall calculate a fair allocation amount in respect of each reference period ~~before any funding obligation is incurred [by a financing entity during the reference period]~~**by the date that is [20] business days after the day this Act receives Royal Assent**.

Certification

(1.2) The Minister shall certify to the Financial Services Manager **the initial calculation of the fair allocation amount for each reference period, including the assumptions, methodology, accuracy of information and numbers used in such calculation. The assumptions and methodology for such calculation shall be set out in the regulations.**

Financial Services Manager to update calculation

(1.3) For the reference periods commencing May 1, 2018, the Financial Services Manager shall prepare an updated calculation of the fair allocation amount in respect of each such reference period, as and when deemed necessary or appropriate by the Financial Services Manager but no less seldom and every five years, using the assumptions and methodology for such calculation set out in the regulations and updated information from the relevant parties. Any update to the fair allocation calculation shall be effective in accordance with subsections (4) and (5).

[NTD: OPG expects the method for the update calculation to be very prescriptive and set out in detail in the regulations. The regulations would also compel the IESO, OEB, LDCs and other relevant agencies to provide OPG with the necessary information to do the update calculation. OPG expects to use the model put together by the Province for the initial calculation and input the updated data from the agencies into the model to calculate the updated fair allocation amounts.]

Access to information

(1.4) The Minister shall make available, or cause to be made available, in a timely manner to the Financial Services Manager, all such information, including information from the IESO, the Board and electricity vendors, as requested by the Financial Services Manager to prepare updates to the calculation of the fair allocation amount.

Amount

(~~1.2~~**1.5**) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. **[A portion]** of the value of any fair adjustment that has been made under Part II in respect of any previous reference period. **[NTD: What portion needs to be specified? Also, if the "value of any fair adjustment" is supposed to be a monetary amount to match paragraph 1, then we think you need to better define the concept. It appears that you may be contemplating that this is supposed to be the monetary impact that the adjustment had when aggregated over all specified consumers. If this is the case then the language needs to be clarified.]**

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, **the Minister or** the Financial Services Manager**, as applicable,** shall ~~[comply with the regulations and]~~ have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

4. Such other principles as may be prescribed.

Method

(3) The **Minister or the** Financial Services Manager**, as applicable,** shall calculate a fair allocation amount in accordance with such methods as the **Minister or the** Financial Services Manager**, as applicable,** considers appropriate, having regard to the requirements of this Act.

~~Notification~~**Provision of updates to Minister**

(4) The Financial Services Manager shall ~~notify~~**provide** the Minister ~~of the methods used to calculate~~**written notification of any updates to the calculation of** the fair allocation amount ~~and any changes to those methods~~**made pursuant to subsection (1.3)**.

Effective date

(~~6~~**5**) The fair allocation calculation or an amendment to the fair allocation calculation **by the Minister** takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided ~~to the Minister in writing~~**by the Minister to the Financial Services Manager. Any update to the fair allocation calculation prepared by the Financial Services Manager shall be effective 30 days after such update is provided to the Minister**.

Publication

(~~7~~6) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment ~~interest~~**asset** in accordance with this Act **or for purposes of refinancing a funding obligation**.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align with the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during a reference period with the fair allocation amount determined in respect of the reference period under this Part as of the time of the incurrence~~, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period~~. **[NTD: this deduction does not appear to be correct.]**

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference

period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

~~**Confidentiality**~~

~~(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:~~

~~1. The Financing Plan.~~

~~2. Reports referred to in subsection (3.1).~~

~~3. Any other document that would reveal information contained in the Financing Plan or the reports.~~

Amendments to plan

(~~6~~5) The Financial Services Manager may amend the Financing Plan at any time.

Same

(~~7~~6) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

Financing entities

17xx. **(1)** In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

(~~1~~2) The Financial Services Manager shall **cause financing entities to** incur funding obligations **only** in material conformity with the applicable Financing Plan.

Same

(~~2~~3) For greater certainty, subsection 17xx (~~5~~4) applies despite the failure of the Financial Services Manager to comply with subsection (~~1~~2).

~~**Financing entities**~~

~~(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.~~

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) ~~Subject to any finding of [manifest error], a~~A recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the balance at the time.

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in~~, or any obligations in respect of,~~ the regulatory asset or in the investment asset created by the transfer. **[NTD: IESO will still have obligations under this Act and the regulations and by contract in relation to the investment asset.]**

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment ~~asset~~**interest** owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner of the regulatory asset.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) ~~The first~~**Each** transfer of ~~the~~**a** regulatory asset or a portion of it **either** creates **or increases** the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover ~~amounts in respect of~~ the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for ~~amounts in respect of~~ the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor **and IESO** to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment ~~of amounts in respect~~ of the clean energy adjustment. **[NTD: Reference to IESO to be added for purposes of its remittance obligations.]**

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment ~~asset~~**interest** owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the

investment ~~asset~~**interest** owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject

to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ~~ccount~~**account** of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to

collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, ~~OPG~~**Ontario Power Generation Inc.** or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

[5] FLS - see s. 51 of the Electricity Act, 1998
[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.
[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*

Standing and Remedies

39xx. (a) Any investment interest owner, any creditor of an investment interest owner and any Financial Services Manager may apply to a court for an order under this section.

(b) Where upon an application under subsection (a), the court is satisfied that the IESO, any electricity vendor or any other Person has not complied with, or is not complying with, this Act or the regulations to this Act, the court may make an order to rectify the matters complained of.

(c) In connection with an application under this section, the court may make any interim or final order it thinks fit, including an order restraining the conduct complained of and an order to compensate an investment interest owner, any creditor of an investment interest owner and any Financial Services Manager.

(d) The rights of an investment interest owner, any creditor of an investment interest owner and any Financial Services Manager under this section are in addition to any other rights any of them may have.

(e) In this section, court means the Superior Court of Justice.

(f) An appeal lies to the Court of Appeal from any order made by the court under this section.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(~~iv~~**A**) incurring liabilities in relation to the regulatory asset**;**

(~~v~~**B**) transferring the regulatory asset for consideration; **and**

(~~vi~~**C**) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, ~~2017;~~**2017.**

200.1xx (1) Subsection 25.33 (1) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:

(c) amounts paid to or received from a [prescribed] financial services entity **[NTD: "financing entity"?]** or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and

(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.

(1.1) Subsection 25.33 (2) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:

(c) amounts paid to or received from a [prescribed] financial services entity **[NTD: "financing entity"?]** or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and

(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017,* or

ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998]*.

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities **and performing other services on behalf of financing entities**, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a ~~special purpose~~ financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries **(other than, for greater certainty, such a subsidiary that is that financing entity)**; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity **(other than, for greater certainty, such a subsidiary that is that financing entity)**.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017*.

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, ~~2017.~~**2017*** **and any regulations made thereunder. [NTD: This would make it a deemed condition of license for electricity transmitters too, but transmitters are not "electricity vendors" that need to comply with this Act.]**

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Subject: RE: Ontario Fair Hydro Plan

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then

regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Attachment 1: image5ddddd.JPG

Carolyn,

OPG, Torys, the Dealers, Oslers and Hunton & Williams had a call yesterday with a view to coming up with broader issues for discussion at this afternoon's meeting. Below is a list of what we believe are the broader issues. We expect that on the drafting issues you and Blakes continue to try to move legislative counsel closer to the last version of the Blakes memo that you circulated along with the draft Bill on Saturday night. We are inclined to leave you to pursue that process and will reserve any drafting comments until we see the next version of the Bill.

Our larger issues are:

1. It appears as though IESO will not be able to create a funding shortfall (regulatory asset) in a month when the Fair Adjustment would be less than "Past Over-Charges". How will Investors be able to get comfort that IESO is not selling an

asset to a Financing Entity (FE) that might exceed "Past Over-Charges" ? Is there transparency around this calculation ? Is the information that would be required to due diligence this point publicly available ? Would it be reasonable to suggest that we could get a certification from MOE before each financing that the IESO shortfall together with all previous IESO shortfalls under this Act would not exceed Past Over-Charges ?

2. According to the note after s. 5 there will be a five year moratorium on clean energy adjustments (contrary to what we had been led to believe). This means that it will be necessary to capitalize all interest, financing charges and other expenses for five years. Hopefully this is just a case of the legislative drafting being behind the decision making. However, if this is the intention then it is a big problem. In additional to the financing challenges, we are advised that in order for the desired accounting treatment to be available it is necessary that there be sufficient cash flow to service the debt on a current basis. It will not be sufficient to purchase the regulatory asset at a deep discount or pay interest and expenses out of cash reserves.

3. In light of 2, the absence of a market disruption guarantee in s. 4 is most concerning. A market disruption guarantee could be contained in a contractual undertaking by the Crown, but since it is not included in s.4(3) lenders would have to be comfortable that the Province could do this outside of the provisions of the Act. We suggest that section 4(3) be revised to provide the Minister with the broadest possible authority to enter into agreements in support of the Fair Allocation Plan rather than the limited scope currently provided.

4. We need more specificity around the "funding obligation" definition. Permit this definition to refer to the Regs (ie, “payment obligations as may be prescribed”).

5. How will Investors get comfortable that particular funding obligations have been incurred in accordance with the Financing Plan. The proposal in s. 9x(2)(b) is one solution but there appears to be some reluctance in the note to draft. I am not sure there is anyone else other than the Province who is capable of covering the consequences if a funding obligation is declared invalid because it was not issued in accordance with the FP, but this does not appear to be covered by s. 4. Our understanding was that there should be no adverse consequences if funding obligations are issued in a way that does not fit the Financing Plan. This is far from clear in the draft Bill.

6. In s. 12x(3) IESO should not have a statutory duty to "make reasonably diligent efforts". The standard of care should be set out in the applicable agreements and we expect that it will be to use the same standard of care that IESO currently uses in its role of collecting the GA amounts for electricity generators. But the standard should not be hardwired into the statute. We are all in agreement that IESO is not guaranteeing collections.

7. Section 8.1, items 2 to 6 are far too vague to be able to verify compliance. In any event, Investors cannot be expected to take a risk that their debt is not incompliance with the FAP. There needs to be some way to get assurances from the Province that once the Financial Services Manager has authorized the issuance of funding obligations by a Financing Entity there is no risk of such debt being declared invalidly issued or being declared as unauthorized debt.

8. In section 8.0.1(a) we would like an explanation of what is intended to be included. It is not clear to our regulatory lawyers that this is all “green energy”.

9. Section 11(1) must not state that the Financing Plan is cost-effective. It will clearly not be as cost-effective as direct funding by the Province.

10. There is still no restriction on who can be an owner of an investment asset (although section 26(1) appears to be heading in that direction). Is it necessary to define Financing Entity and limit investment asset owners to FEs, or is it OK to have an operating enterprise as an investment asset owner so long as it is administered by OPG on behalf of Brookfield ? Dealers have a concern that perhaps the Province (through an agency or Crown corporation) could become an investment asset owner and through something like a “collective rights agreement” affect the rights of other investors.

11. Section 22(1) needs to define the IESO funding shortfall precisely and determinatively. It cannot be subject to 22(1.1)(1). It must be determined each month before it is sold. Also, the Act should provide the basis by which IESO (in the absence of a transfer) would be entitled to recover this shortfall. (We understand that is required in order for IESO to treat the shortfall as a regulatory asset.) Also, s. 22.1(1) is a problem because we cannot have the recorded amount subject to an approval order from OEB (otherwise, any financing would be conditional on getting that order and

ensuring that any possible appeal process has expired). Section 22.1(3) seems to contradict 22.1(1). Section 22.2(2) can't be based on actual use; it can only be based on estimated use. In sum, this section needs lots of work and probably much of it can be moved to the Regs.

12. Sections 23(1) and 23(2). We can't have the transfer of a regulatory asset be subject to the Financing Plan. Also, can't impose restrictions on the price at which IESO sells the regulatory asset. Sales must be conclusive and not subject to post-closing analysis.

13. Section 23.1 is a key section and it currently does not work as it should (hopefully because legislative counsel were working of an old version of the Blakes memo). I would redraft that section to read as follows:

'Upon transfer of the regulatory asset or a portion thereof to a transferee, the regulatory asset or portion thereof shall comprise a portion of the investment asset recoverable by the transferee in accordance with this Act and shall be immediately vested in such transferee."

I think it is also important to update the definition of "transfer" to catch the latest changes to the definition of "Disposition" in the Blakes memo (ie, that it includes a release by IESO of its right to recover its regulatory asset in order to enable the investment asset owner to recover such amount).

In a separate email we will also be sending to you and a smaller group than this some tax comments from OPG’s perspective.

Michael K. Feldman

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Subject: RE: Ontario Fair Hydro Plan

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then

regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Please find attached Osler's most significant points on the revised draft. This remains subject to ongoing review by Osler and the Dealers and further comments may follow. In addition, a number of points from our mark-up on Sunday did not make it into this draft of the legislation and in the interests of time we have not marked them back up, but they remain outstanding.

All - Thank you for the detailed comments that you provided on Saturday and Sunday. Please find attached the next turn of the legislation. We have tried to balance the comments that we received to address the points that you have raised. This draft does not reflect the drafting points that were raised over Monday and Tuesday and we will reflect those points in our next instructions to legislative counsel. Please review and identify any significant substantive issues by 6 p.m. today. We continue to work toward pens down on Friday, meaning the draft that we have at that point in time will be proposed for introduction in the House. Thank you again for your contributions to this process.

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the

Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Compare - Fair Hydro Act - Osler Comments on v 4.pdf

Version 4 (Osler comments April 26, 2017)

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

CONTENTS

PART I

[1] FLS: please see the preamble of the *Green Energy Act, 2009*.

GENERAL

1. Interpretation
2. Effect of invalidity, etc.
3. Purpose
4. Crown bound
5. Protection and assurances

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

6. Definitions
6.1 Specified RPP consumer, first fair adjustment
6.2 Specified consumers (non-RPP), first fair adjustment
6.3 Determination by Board
6.4 Implementation of rates
6.5 Effective date
6.6 Transition
7. Subsequent fair adjustments
7.1 Sub-meter customers

PART III
CLEAN ENERGY ADJUSTMENT

8. Specified consumers to pay
9. Irrevocability of amount
10. Determination of clean energy adjustment
11. IESO to receive amounts
12. Electricity vendor to invoice specified consumers

PART IV
IMPLEMENTATION
FINANCIAL SERVICES MANAGER

13. Appointment
14. Duties and powers

FAIR ALLOCATION AMOUNT

15. Financial Services Manager to calculate fair allocation amount

FINANCING PLAN

16. Financial Services Manager to prepare Financing Plan
17. Implementation of Financing Plan

PART V
THE REGULATORY ASSET

20. IESO funding shortfall
20.1 Variance account to be established, maintained
21. Regulatory asset established
22. Transfer of regulatory asset
23. Validity of transfer

PART VI
THE INVESTMENT ASSET

24. Effect of transfer
25. Investment asset established
26. Transfer of investment interest
27. Validity of transfer
28. Investment interest owner may grant security interest

PART VI
MISCELLANEOUS

29. Appointment of agent, invoicing or collection
30. Not Crown agent
31. Sequestration
32. Choice of law
33. Conflict
34. No further approvals, etc.
35. Immunity
36. References in marketing materials and offering documents
37. Non-application, Financial Administration Act, s. 28
38. Regulations

PART VII
AMENDMENTS TO OTHER ACTS
ELECTRICITY ACT, 1998
AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

PART VII
COMMENCEMENT AND SHORT TITLE
103. Commencement
104. Short title

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the value of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined in under section 15xx;

"finance amount" has the meaning given to it in the regulations. **[NTD: This will need to be defined, but this should be left to the regulations.]**

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

(a) a payment obligation (including principal, interest, and other amounts payable in connection therewith) incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section 22xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means, subject to the regulations, a redemption, repayment or repurchase of a funding obligation; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" means [TBD]; ("French") **[NTD: The Dealers concur with Stikeman's suggestion in Version 3 on how this should be defined.]**

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

i. The commodity price of the electricity used.

ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017.

iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge".

   iii. A rate rider [of the prescribed type or class].

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers and reflect the fair allocation; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French")

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive a monthly invoice amount that is **[25]** per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2). **[NTD: By providing each specified RPP consumer with a 25% rate cut, instead of a proxy "representative consumer", there would need to be a unique RPP rate for each customer based on that customer's historical bill, taking into account the fixed and variable components, to generate the intended reduction. This does not seem administratively workable.]**

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*. **[NTD: This would provide a 25% rate cut on top of the OEB's announced cut last week (since that rate would be the "comparison rate".]**

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

Specified consumers (non-RPP), first fair adjustment

6.2xx The **[rate for electricity payable]** **[NTD: Non-RPP customers do not pay an electricity rate, they pay HOEP. As drafted, this provision does not work.]** by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1). **[NTD: We are concerned that this regime for non-RPP customers may not work, but have not had the opportunity to work through it.]**

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt is billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment was determined in a manner that was inconsistent with this Act; and

(b) whether the amount payable in respect of the clean energy adjustment relates to funding obligations that were incurred in a manner that was not in material conformity with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the estimated finance amount in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, true up amount

(2) The estimated finance amount and the true up amount shall be determined in accordance with the regulations.

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the preceding period, **[NTD: It is not clear that this could be done for the immediately preceding reference period, since rates are set before the start of a reference period (i.e. when rates are set for a reference period, it will be done before the immediately preceding reference period has ended. Accordingly, we would suggest being less specific so the details of how the true up is calculated can be worked out later.]**

ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment in respect of a reference period and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) ~~The~~Without limiting the amount of the clean energy adjustment, the Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period. **[NTD: If the Board is doing anything other than a purely mathematical operation, this is problematic for financing. Given that this is qualified by the regulations, this clause would be acceptable if the regulations are sufficiently restrictive in what they specify.]**

IESO to receive amounts

11xx. (2) The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

3. Payments collected by the IESO pursuant to subsection 11xx(2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3) and all

proceeds of any such amounts, shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act. and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same invoice period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers including all proceeds of any such amounts shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager. **[NTD: If the Minister retains this power under the legislation, the documentation will need to restrict the Minister's right to change the Financial Services Manager without the lenders consent.]**

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of calculation

(1.1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period before any funding obligation is incurred [by a financing entity during the reference period].

Amount

(1.2) The fair allocation amount in respect of a reference period is the sum of the following amounts: **[NTD: This calculation still does not work. For example, it does not make sense to add estimated clean energy costs and estimated clean energy benefits together. This calculation is central to financeability since it drives the ability of interest obligations to become payable during the first 5 years (see s. 16xx(4)). Given how critical this calculation is to the overall regime, it should be moved to the regulations so it can be finalized later on in the process once the intent is better understood and all parties can confirm the final definition.]**

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Financial Services Manager shall [comply with the regulations and] have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

Method

(3) The Financial Services Manager shall calculate a fair allocation amount in accordance with such methods as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Notification to Minister

(4) The Financial Services Manager shall notify the Minister of the methods used to calculate the fair allocation amount and any changes to those methods.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment interest in accordance with this Act.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. ~~Any incurrence of a funding obligation should reasonably align with~~Funding obligations should be incurred such that, along with any previously incurred funding obligations, the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during ~~a~~each reference period will reasonably align with the fair allocation amount determined in respect of ~~the~~such reference period under this Part as ~~of~~estimated at the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period.

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not ~~be~~result in amounts payable in respect of the clean energy adjustment during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].**[NTD: Due to refinancing of short term debt, there may be amounts that become payable, but do not result in a clean energy**

adjustment. These short-term amounts must be permitted to become payable during the first five year period so long as there is no CEA.]

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Confidentiality

(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:

1. The Financing Plan.

2. Reports referred to in subsection (3.1).

3. Any other document that would reveal information contained in the Financing Plan or the reports.

Amendments to plan

(6) The Financial Services Manager may amend the Financing Plan at any time.

Same

(7) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, subsection 17xx (5) applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario

Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) ~~Subject to any finding of [manifest error], a~~A recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the

balance at the time. **[The "subject to" language seems to invite a challenge. If the IESO makes an error, we would expect an adjusting entry would be made.]**

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in, or any obligations in respect of, ~~the regulatory asset or in~~ the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment asset owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner ~~of the regulatory asset~~.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) The first transfer of the regulatory asset or a portion of it creates the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover amounts in respect of the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including

any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for amounts in respect of the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of amounts in respect of the clean energy adjustment.

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment asset owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ccount of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*

[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

~~**200.1xx (1) Subsection 25.33 (1) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:**~~

~~(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and~~

~~(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.~~

~~**(1.1) Subsection 25.33 (2) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:**~~

~~(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and~~

~~(d)amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.~~

[The amendments to the calculation of global adjustment in ss. 25.33 of the EA completely undermine the Fair Hydro Plan (i.e. this is a fatal flaw). By flowing this into GA, these costs/benefits would flow to all electricity consumers, not just "specified customers", and this approach results in double counting of costs/benefits since the amounts paid to/received from a financing entity have already found their way through global adjustment when the underlying cost was incurred by the IESO.]

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017,* or

ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998]*.

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a special purpose financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017.*

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017*.

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Fair Hydro Act - Osler Comments on v 4.pdf

Version 4 (Osler comments April 26, 2017)

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the value of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined in under section 15xx;

"finance amount" has the meaning given to it in the regulations. **[NTD: This will need to be defined, but this should be left to the regulations.]**

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

(a) a payment obligation (including principal, interest, and other amounts payable in connection therewith) incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section 22xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means, subject to the regulations, a redemption, repayment or repurchase of a funding obligation; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" means [TBD]; ("French") **[NTD: The Dealers concur with Stikeman's suggestion in Version 3 on how this should be defined.]**

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

    i. The commodity price of the electricity used.

ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017.

iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge".

   iii. A rate rider [of the prescribed type or class].

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers and reflect the fair allocation; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French")

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive a monthly invoice amount that is **[25]** per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2). **[NTD: By providing each specified RPP consumer with a 25% rate cut, instead of a proxy "representative consumer", there would need to be a unique RPP rate for each customer based on that customer's historical bill, taking into account the fixed and variable components, to generate the intended reduction. This does not seem administratively workable.]**

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*. **[NTD: This would provide a 25% rate cut on top of the OEB's announced cut last week (since that rate would be the "comparison rate".]**

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

Specified consumers (non-RPP), first fair adjustment

6.2xx The **[rate for electricity payable][NTD: Non-RPP customers do not pay an electricity rate, they pay HOEP. As drafted, this provision does not work.]** by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1). **[NTD: We are concerned that this regime for non-RPP customers may not work, but have not had the opportunity to work through it.]**

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt is billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment was determined in a manner that was inconsistent with this Act; and

(b) whether the amount payable in respect of the clean energy adjustment relates to funding obligations that were incurred in a manner that was not in material conformity with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the estimated finance amount in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, true up amount

(2) The estimated finance amount and the true up amount shall be determined in accordance with the regulations.

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the preceding period, **[NTD: It is not clear that this could be done for the immediately preceding reference period, since rates are set before the start of a reference period (i.e. when rates are set for a reference period, it will be done before the immediately preceding reference period has ended. Accordingly, we would suggest being less specific so the details of how the true up is calculated can be worked out later.]**

ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment in respect of a reference period and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) Without limiting the amount of the clean energy adjustment, the Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period. **[NTD: If the Board is doing anything other than a purely mathematical operation, this is problematic for financing. Given that this is qualified by the regulations, this clause would be acceptable if the regulations are sufficiently restrictive in what they specify.]**

IESO to receive amounts

11xx. (2) The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

3. Payments collected by the IESO pursuant to subsection 11xx(2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3) and all

proceeds of any such amounts, shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act, and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same invoice period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers including all proceeds of any such amounts shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager. **[NTD: If the Minister retains this power under the legislation, the documentation will need to restrict the Minister's right to change the Financial Services Manager without the lenders consent.]**

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of calculation

(1.1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period before any funding obligation is incurred [by a financing entity during the reference period].

Amount

(1.2) The fair allocation amount in respect of a reference period is the sum of the following amounts: **[NTD: This calculation still does not work. For example, it does not make sense to add estimated clean energy costs and estimated clean energy benefits together. This calculation is central to financeability since it drives the ability of interest obligations to become payable during the first 5 years (see s. 16xx(4)). Given how critical this calculation is to the overall regime, it should be moved to the regulations so it can be finalized later on in the process once the intent is better understood and all parties can confirm the final definition.]**

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Financial Services Manager shall [comply with the regulations and] have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

Method

(3) The Financial Services Manager shall calculate a fair allocation amount in accordance with such methods as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Notification to Minister

(4) The Financial Services Manager shall notify the Minister of the methods used to calculate the fair allocation amount and any changes to those methods.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment interest in accordance with this Act.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Funding obligations should be incurred such that, along with any previously incurred funding obligations, the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during each reference period will reasonably align with the fair allocation amount determined in respect of such reference period under this Part as estimated at the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period.

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not result in amounts payable in respect of the clean energy adjustment during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].**[NTD: Due to refinancing of short term debt, there may be amounts that become payable, but do not result in a clean energy adjustment. These short-term amounts must be permitted to become payable during the first five year period so long as there is no CEA.]**

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Confidentiality

(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:

1. The Financing Plan.

2. Reports referred to in subsection (3.1).

3. Any other document that would reveal information contained in the Financing Plan or the reports.

Amendments to plan

(6) The Financial Services Manager may amend the Financing Plan at any time.

Same

(7) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, subsection 17xx (5) applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties

arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) A recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the balance at the time. **[The "subject to" language seems to invite a challenge. If the IESO makes an error, we would expect an adjusting entry would be made.]**

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in, or any obligations in respect of, the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment asset owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) The first transfer of the regulatory asset or a portion of it creates the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover amounts in respect of the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for amounts in respect of the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of amounts in respect of the clean energy adjustment.

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment asset owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ccount of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*
[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

[The amendments to the calculation of global adjustment in ss. 25.33 of the EA completely undermine the Fair Hydro Plan (i.e. this is a fatal flaw). By flowing this into GA, these costs/benefits would flow to all electricity consumers, not just "specified customers", and this approach results in double counting of costs/benefits since the amounts paid to/received from a financing entity have already found their way through global adjustment when the underlying cost was incurred by the IESO.]

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017*, or

ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998*].

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a special purpose financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017*.

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017*.

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

All - Thank you for the detailed comments that you provided on Saturday and Sunday. Please find attached the next turn of the legislation. We have tried to balance the comments that we received to address the points that you have raised. This draft does not reflect the drafting points that were raised over Monday and Tuesday and we will reflect those points in our next instructions to legislative counsel. Please review and identify any significant substantive issues by 6 p.m. today. We continue to work toward pens down on Friday, meaning the draft that we have at that point in time will be proposed for introduction in the House. Thank you again for your contributions to this process.

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the

Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Compare - Fair Hydro Act - Osler Comments on v 4.pdf

Version 4 (Osler comments April 26, 2017)

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

CONTENTS

PART I

[1] FLS: please see the preamble of the *Green Energy Act, 2009*.

GENERAL

1. Interpretation
2. Effect of invalidity, etc.
3. Purpose
4. Crown bound
5. Protection and assurances

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

6. Definitions
6.1 Specified RPP consumer, first fair adjustment
6.2 Specified consumers (non-RPP), first fair adjustment
6.3 Determination by Board
6.4 Implementation of rates
6.5 Effective date

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the value of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined in under section 15xx;

"finance amount" has the meaning given to it in the regulations. **[NTD: This will need to be defined, but this should be left to the regulations.]**

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

(a) a payment obligation (including principal, interest, and other amounts payable in connection therewith) incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section 22xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means, subject to the regulations, a redemption, repayment or repurchase of a funding obligation; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" means [TBD]; ("French") **[NTD: The Dealers concur with Stikeman's suggestion in Version 3 on how this should be defined.]**

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

i. The commodity price of the electricity used.

ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017.

iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge".

   iii. A rate rider [of the prescribed type or class].

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers and reflect the fair allocation; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French")

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive a monthly invoice amount that is **[25]** per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2). **[NTD: By providing each specified RPP consumer with a 25% rate cut, instead of a proxy "representative consumer", there would need to be a unique RPP rate for each customer based on that customer's historical bill, taking into account the fixed and variable components, to generate the intended reduction. This does not seem administratively workable.]**

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*. **[NTD: This would provide a 25% rate cut on top of the OEB's announced cut last week (since that rate would be the "comparison rate".]**

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

Specified consumers (non-RPP), first fair adjustment

6.2xx The **[rate for electricity payable]** **[NTD: Non-RPP customers do not pay an electricity rate, they pay HOEP. As drafted, this provision does not work.]** by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1). **[NTD: We are concerned that this regime for non-RPP customers may not work, but have not had the opportunity to work through it.]**

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt is billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment was determined in a manner that was inconsistent with this Act; and

(b) whether the amount payable in respect of the clean energy adjustment relates to funding obligations that were incurred in a manner that was not in material conformity with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the estimated finance amount in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, true up amount

(2) The estimated finance amount and the true up amount shall be determined in accordance with the regulations.

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the preceding period, **[NTD: It is not clear that this could be done for the immediately preceding reference period, since rates are set before the start of a reference period (i.e. when rates are set for a reference period, it will be done before the immediately preceding reference period has ended. Accordingly, we would suggest being less specific so the details of how the true up is calculated can be worked out later.]**

ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment in respect of a reference period and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) ~~The~~Without limiting the amount of the clean energy adjustment, the Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period. **[NTD: If the Board is doing anything other than a purely mathematical operation, this is problematic for financing. Given that this is qualified by the regulations, this clause would be acceptable if the regulations are sufficiently restrictive in what they specify.]**

IESO to receive amounts

11xx. (2) The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

3. Payments collected by the IESO pursuant to subsection 11xx(2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3) and all

proceeds of any such amounts, shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act. and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same invoice period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers including all proceeds of any such amounts shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager. **[NTD: If the Minister retains this power under the legislation, the documentation will need to restrict the Minister's right to change the Financial Services Manager without the lenders consent.]**

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of calculation

(1.1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period before any funding obligation is incurred [by a financing entity during the reference period].

Amount

(1.2) The fair allocation amount in respect of a reference period is the sum of the following amounts: **[NTD: This calculation still does not work. For example, it does not make sense to add estimated clean energy costs and estimated clean energy benefits together. This calculation is central to financeability since it drives the ability of interest obligations to become payable during the first 5 years (see s. 16xx(4)). Given how critical this calculation is to the overall regime, it should be moved to the regulations so it can be finalized later on in the process once the intent is better understood and all parties can confirm the final definition.]**

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Financial Services Manager shall [comply with the regulations and] have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

Method

(3) The Financial Services Manager shall calculate a fair allocation amount in accordance with such methods as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Notification to Minister

(4) The Financial Services Manager shall notify the Minister of the methods used to calculate the fair allocation amount and any changes to those methods.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment interest in accordance with this Act.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. ~~Any incurrence of a funding obligation should reasonably align with~~Funding obligations should be incurred such that, along with any previously incurred funding obligations, the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during ~~a~~each reference period will reasonably align with the fair allocation amount determined in respect of ~~the~~such reference period under this Part as ~~of~~estimated at the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period.

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not ~~be~~result in amounts payable in respect of the clean energy adjustment during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].**[NTD: Due to refinancing of short term debt, there may be amounts that become payable, but do not result in a clean energy**

adjustment. These short-term amounts must be permitted to become payable during the first five year period so long as there is no CEA.]

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Confidentiality

(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:

1. The Financing Plan.

2. Reports referred to in subsection (3.1).

3. Any other document that would reveal information contained in the Financing Plan or the reports.

Amendments to plan

(6) The Financial Services Manager may amend the Financing Plan at any time.

Same

(7) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, subsection 17xx (5) applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario

Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) ~~Subject to any finding of [manifest error], a~~A recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the

balance at the time. **[The "subject to" language seems to invite a challenge. If the IESO makes an error, we would expect an adjusting entry would be made.]**

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in, or any obligations in respect of, ~~the regulatory asset or in~~ the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment asset owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner ~~of the regulatory asset~~.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) The first transfer of the regulatory asset or a portion of it creates the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover amounts in respect of the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including

any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for amounts in respect of the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of amounts in respect of the clean energy adjustment.

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment asset owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ccount of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*

[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

~~**200.1xx (1) Subsection 25.33 (1) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:**~~

~~(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and~~

~~(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.~~

~~**(1.1) Subsection 25.33 (2) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:**~~

~~(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and~~

~~(d)amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.~~

[The amendments to the calculation of global adjustment in ss. 25.33 of the EA completely undermine the Fair Hydro Plan (i.e. this is a fatal flaw). By flowing this into GA, these costs/benefits would flow to all electricity consumers, not just "specified customers", and this approach results in double counting of costs/benefits since the amounts paid to/received from a financing entity have already found their way through global adjustment when the underlying cost was incurred by the IESO.]

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017,* or

ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998]*.

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a special purpose financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017.*

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017*.

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Fair Hydro Act - Osler Comments on v 4.pdf

Version 4 (Osler comments April 26, 2017)

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the value of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined in under section 15xx;

"finance amount" has the meaning given to it in the regulations. **[NTD: This will need to be defined, but this should be left to the regulations.]**

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

(a) a payment obligation (including principal, interest, and other amounts payable in connection therewith) incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section 22xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means, subject to the regulations, a redemption, repayment or repurchase of a funding obligation; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" means [TBD]; ("French") **[NTD: The Dealers concur with Stikeman's suggestion in Version 3 on how this should be defined.]**

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

    i. The commodity price of the electricity used.

ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017.

iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge".

   iii. A rate rider [of the prescribed type or class].

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers and reflect the fair allocation; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French")

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive a monthly invoice amount that is **[25]** per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2). **[NTD: By providing each specified RPP consumer with a 25% rate cut, instead of a proxy "representative consumer", there would need to be a unique RPP rate for each customer based on that customer's historical bill, taking into account the fixed and variable components, to generate the intended reduction. This does not seem administratively workable.]**

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*. **[NTD: This would provide a 25% rate cut on top of the OEB's announced cut last week (since that rate would be the "comparison rate".]**

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

Specified consumers (non-RPP), first fair adjustment

6.2xx The **[rate for electricity payable][NTD: Non-RPP customers do not pay an electricity rate, they pay HOEP. As drafted, this provision does not work.]** by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1). **[NTD: We are concerned that this regime for non-RPP customers may not work, but have not had the opportunity to work through it.]**

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt is billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment was determined in a manner that was inconsistent with this Act; and

(b) whether the amount payable in respect of the clean energy adjustment relates to funding obligations that were incurred in a manner that was not in material conformity with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the estimated finance amount in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, true up amount

(2) The estimated finance amount and the true up amount shall be determined in accordance with the regulations.

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the preceding period, **[NTD: It is not clear that this could be done for the immediately preceding reference period, since rates are set before the start of a reference period (i.e. when rates are set for a reference period, it will be done before the immediately preceding reference period has ended. Accordingly, we would suggest being less specific so the details of how the true up is calculated can be worked out later.]**

ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment in respect of a reference period and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) Without limiting the amount of the clean energy adjustment, the Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period. **[NTD: If the Board is doing anything other than a purely mathematical operation, this is problematic for financing. Given that this is qualified by the regulations, this clause would be acceptable if the regulations are sufficiently restrictive in what they specify.]**

IESO to receive amounts

11xx. (2) The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

3. Payments collected by the IESO pursuant to subsection 11xx(2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3) and all

proceeds of any such amounts, shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act, and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same invoice period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers including all proceeds of any such amounts shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager. **[NTD: If the Minister retains this power under the legislation, the documentation will need to restrict the Minister's right to change the Financial Services Manager without the lenders consent.]**

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of calculation

(1.1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period before any funding obligation is incurred [by a financing entity during the reference period].

Amount

(1.2) The fair allocation amount in respect of a reference period is the sum of the following amounts: **[NTD: This calculation still does not work. For example, it does not make sense to add estimated clean energy costs and estimated clean energy benefits together. This calculation is central to financeability since it drives the ability of interest obligations to become payable during the first 5 years (see s. 16xx(4)). Given how critical this calculation is to the overall regime, it should be moved to the regulations so it can be finalized later on in the process once the intent is better understood and all parties can confirm the final definition.]**

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Financial Services Manager shall [comply with the regulations and] have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

Method

(3) The Financial Services Manager shall calculate a fair allocation amount in accordance with such methods as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Notification to Minister

(4) The Financial Services Manager shall notify the Minister of the methods used to calculate the fair allocation amount and any changes to those methods.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment interest in accordance with this Act.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Funding obligations should be incurred such that, along with any previously incurred funding obligations, the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during each reference period will reasonably align with the fair allocation amount determined in respect of such reference period under this Part as estimated at the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period.

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not result in amounts payable in respect of the clean energy adjustment during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].**[NTD: Due to refinancing of short term debt, there may be amounts that become payable, but do not result in a clean energy adjustment. These short-term amounts must be permitted to become payable during the first five year period so long as there is no CEA.]**

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Confidentiality

(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:

1. The Financing Plan.

2. Reports referred to in subsection (3.1).

3. Any other document that would reveal information contained in the Financing Plan or the reports.

Amendments to plan

(6) The Financial Services Manager may amend the Financing Plan at any time.

Same

(7) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, subsection 17xx (5) applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties

arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) A recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the balance at the time. **[The "subject to" language seems to invite a challenge. If the IESO makes an error, we would expect an adjusting entry would be made.]**

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in, or any obligations in respect of, the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment asset owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) The first transfer of the regulatory asset or a portion of it creates the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover amounts in respect of the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for amounts in respect of the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of amounts in respect of the clean energy adjustment.

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment asset owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ccount of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*
[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

[The amendments to the calculation of global adjustment in ss. 25.33 of the EA completely undermine the Fair Hydro Plan (i.e. this is a fatal flaw). By flowing this into GA, these costs/benefits would flow to all electricity consumers, not just "specified customers", and this approach results in double counting of costs/benefits since the amounts paid to/received from a financing entity have already found their way through global adjustment when the underlying cost was incurred by the IESO.]

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017*, or

ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998*].

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a special purpose financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017*.

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017*.

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

---

Please find enclosed Osler's comments on the draft legislation, also blacklined to v. 3. This remains subject to further review and comment by the Dealers.

We have done a preliminary review of the mark-ups from Torys/OPG and Stikeman/IESO, and are largely in agreement with their comments. However, we would note the following in respect of the Torys mark-up (which we have not yet had an opportunity to discuss with Torys):

(1) Torys proposed revision to add a new section (1.4) to new section 53.1 of the Electricity Act is problematic as drafted. If it is necessary to be included, we would like to see it limited to recording the assets and liabilities for accounting purposes and requiring a note on the balance sheet indicating that the assets are held in trust and not available to OPG's creditors; and

(2) we are concerned that the deemed trust language they added in 11xx(4) and 12xx(4) would not be enforceable on insolvency and that we would strongly prefer that true trusts be established.

Subject: RE: Ontario Fair Hydro Plan

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes' summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

[Notes re this draft:
- all numbering of provisions may need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)
- need to check consistency of various phrases (e.g. *during/for/in respect of* reference period; *owner of RA/IA vs. RA/IA owner; etc.)*]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1]

The Government of Ontario has established a regulatory framework related to the generation and sale of electricity, which has promoted and continues to promote significant investment to enable phasing out of coal fired generation, modernizing sites and facilities in the Province for the generation of electrical energy and the production therefrom,[2] and conservation and demand management.

The Government of Ontario is committed to ensuring that the costs of these investments, and the raising of money to fund the investments,[3] are allocated fairly among present and future generations of consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

[1] Note: please see the preamble of the *Green Energy Act, 2009*.
[2] Note: please see clause 92A (4) (b) of the Constitution, 1867: "des emplacements et des installations de la province destinés à la production d'énergie électrique, ainsi que de cette production meme".

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")
[Note - will need to check throughout the draft that references to CEA are clear as to whether it's the total CEA in respect of a reference period vs. the portion payable by a specified consumer.][NTD: Agreed. Consider splitting this into a defined term for the rate/charge and a defined term for the global amount.]

"clean energy benefits" means, in respect of a reference period, the value of the benefits determined to be derived by the specified consumers during the reference period as a result of the clean energy initiative[**, including as a result of past, present and expected future incurrences of clean energy costs**][**[NTD: What does this mean?]**]; ("French")

"clean energy costs" means, in respect of a reference period, the ~~value~~amount of the costs allocated to specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated costs to be incurred by the IESO under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management, including storage,

(iii) energy efficiency,

(iv) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(v) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"cumulative IESO funding shortfall" means, at any point in time, the sum of all prior IESO funding shortfalls minus any consideration received by the IESO from the sale of regulatory assets;

"electricity vendor"[4] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"estimated finance amount" means the amount calculated pursuant to the regulations;

"fair adjustment" means the determination of the rate payable for electricity in accordance with Part II; ("French")

"fair allocation" means ●;

"fair allocation amount" means the amount calculated pursuant to section 15xx;

"Financial Services Manager" means Ontario Power Generation Inc. [or such other person or entity as may be appointed as the Financial Services Manager by the Minister under section **]; ("French") **[NTD: Consider a bifurcation of the FSM duties into (i) preparation and update of the Financing Plan and (ii) administration of the investment asset. See s. 14xx.]**

"Financing Plan" means the plan prepared under section X, as amended from time to time in accordance with this Act; ("French")

[4] Note - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

"financing entity" means ●;

"funding obligation" means a payment obligation incurred by or on behalf of ~~the regulatory asset owner or~~ an investment asset owner under section x; ("French"). **[NTD: This revision is required because the fair allocation amount (per s. 15xx) cannot include IESO's "funding obligations".]**

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means, in respect of a ~~reference period~~calendar month, the amount determined under section 20xx for the ~~reference period~~calendar month; ("French")

"investment asset" means the investment asset created as described in section 22xx; ("French")

"investment asset owner" means a financing entity that acquires an investment interest in the investment asset; ("French") **[NTD: Should this reference any person to whom the investment interest is transferred to pursuant to section 26xx or reference a secured party who acquires an investment asset as a result of enforcement? See note to 22xx(3).]**

"investment interest" means an ownership interest in the investment asset, which entitles an investment asset owner to the rights and benefits specified in the agreement under which the ownership interest is transferred;

"invoice amount" means the amount, determined in accordance with subsections (2.1) and (2.2) and the regulations, that is payable by a specified consumer for the provision of electricity in Ontario during a period of time specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a) or such shorter period as may be ~~set out in the Fair Allocation Plan~~prescribed, in any event ending no later than April 30, 2047; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of an investment asset owner by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right established under section X to recover the IESO funding shortfall; ("French")

"regulatory asset owner" means ●;

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French") **[NTD: Move to regs.]**

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity**[, receives an invoice in respect of the account][NTD: Why is this limitation required?]** and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French") **[NTD: Move to regs.]**

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French") **[NTD: Move to regs.]**

"transfer" means an assignment, conveyance, disposition or sale; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria: **[NTD: Move to regs.]**

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

   i. a dwelling,

   ii. a property within the meaning of the *Condominium Act, 1998*,

   iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

   iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to subsection (2.2) and the regulations, the invoice amount for a specified consumer includes the following amounts: **[NTD: Move to regs.]**

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following:

   i. The commodity price of the electricity used during the invoice period.

   ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

   iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

iv. The amount of any harmonized sales tax payable [by the consumer?] under Part IX of the *Excise Tax Act* (Canada);

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO, such amounts as may be prescribed. ("French")

Same, exclusions

(2.2) Except as otherwise prescribed by the regulations, the invoice amount does not include any of the following amounts: **[NTD: Move to regs.]**

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity. **[NTD: What about service charges for the delivery of electricity, etc.? Also, why is this worded slightly differently than in OREC?]**

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge". **[NTD: What is intended here?]**

   iii. A rate rider. **[NTD: What is intended here? LDCs have lots of rate riders on their tariff sheets, most of which are legitimate costs tied to the supply of electricity.]**

5. Any other prescribed amounts.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer, **[NTD: Move to regs. This only works if all "specified consumers" fall into the residential rate class; otherwise, non-residential consumers will get residential rates.]**

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the *Ontario Energy Board Act, 1998*;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Transfer

(4) For greater certainty, a transfer of the regulatory asset or a portion of the regulatory asset includes any act of the IESO by which the IESO purports to dispose of its interest in the regulatory asset with the result of a ~~named~~specified person becoming the owner of an investment interest. **[NTD: Consider moving to s. 22xx]**

Effect of invalidity, etc.[5]

2xx. (1) For greater certainty, all of the ~~p~~provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect or invalidate a funding obligation, or any rights or obligations associated with such funding obligations, that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

3xx. (1) The purposes of this Act are,[6]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers over time ~~and that the process by which the Province raises money to fund the costs reflects the fair allocation~~; and

(b) to recognize that clean energy benefits that have accrued and that will accrue over time will continue to benefit present and future electricity consumers in the Province.

[5] Note: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[6] Note: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment ~~over other debts; or~~in relation to other charges or amounts used by specified consumers in connection with the supply of electricity;

(c) adversely affect any rights of the IESO or other party to transfer the regulatory asset or the consequences of any such transfer; or

(d) adversely affect the regulatory asset, an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements ~~for compensation~~

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of or in relation to this Act, including agreements regarding financial commitments, financial arrangements, guarantees, indemnities or similar transactions, including entering into agreements guaranteeing that if the IESO fails to carry out its obligations under this Act for any reason, including because the IESO is dissolved or restructured or because it comes insolvent, the Government of Ontario shall carry out those obligations or ensure they are carried out by another appropriate entity.

PART II
FAIR ADJUSTMENT

Fair adjustment, May 1, 2017 to April 30, 2018 [NTD: Minister's release post-OEB RPP announcement suggests a start date later than May 1.]

Definition

6xx. (1) In this section,

"average baseline invoice amount" means the average monthly electricity invoice amount that would be payable by a representative consumer under the average baseline rate; ("French")

"average baseline rate" means the average commodity rate that would be payable effective May 1, 2017 by the class of consumers prescribed by the regulations under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act, as determined by the Board by applying the method prescribed by the regulations under clause 79.16 (1) (b) of that Act; ("French") **[NTD: Consider the application of this clause in light of the April 20 rate cut announced by the OEB.]**

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

Rate determination

(2) Subject to subsection (3), [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] the commodity rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 is the average rate that would be payable by a representative consumer in order for the representative consumer to receive a monthly electricity invoice amount that is ~~25~~**[25][NTD: Consider implications of the April 20 rate cut announced by the OEB.]** per cent less than the average baseline invoice amount.

Sub-meter customers

(3) A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the commodity rate payable by each sub-meter customer is the commodity rate determined under subsection (2).

Determining commodity rate

(4) The commodity rate mentioned in subsection (2) shall be,

(a) determined by the Board within seven business days after this section receives Royal Assent; and

(b) effective as of the first day of the calendar month immediately following the determination.

[NTD: Consider whether it is necessary to override any Section 78 order, retailer agreement, or s. 79.16 of the Act (since it remains) in the same way language of s. 79.16 (beginning) does.]

Transition

(5) If, for technical or operational reasons, an electricity vendor, specified consumer or unit sub-meter provider is unable to adapt its invoices to comply with this section by the time it issues its first invoice for electricity consumed on or after May 1, 2017,

(a) the electricity vendor, specified consumer or unit sub-meter provider shall adapt its invoices as soon as possible and, in any event, no later than [August 1, 2017]; and

(b) the electricity vendor, specified consumer or unit sub-meter provider shall ensure that any specified consumer or sub-meter customer invoiced at a commodity rate higher than the applicable commodity rate receives the difference between the commodity rate shown on their invoice and the applicable commodity rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations. **[NTD: (1) See comment above regarding May 1 start date, and (2) LDCs have to change commodity rate now every six months. What would prompt the need for this?]**

Fair adjustment, May 1, 2018 to April 30, 2022

7xx. The Lieutenant Governor in Council may, [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] make regulations prescribing the commodity rate for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022. **[NTD: What about including interest on funding obligations in the Fair Adjustment in this period, or in the prescribed commodity rate? (See Section 16xx(4)(b) which seems to permit some funding obligations in the charging of CEAs during the first 5 years as long as the funding obligations are under the total fair allocation).]**

PART III
CLEAN ENERGY ADJUSTMENT

[NTD: Consider inserting the provisions re how it's calculated here.]

Specified consumers to pay clean energy adjustment

8xx. (1) Upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor, as agent of the investment asset owners, in accordance with such terms of payment as may

be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment is inconsistent with the fair allocation calculation applicable at the time when the payment is due; and

(b) whether the clean energy adjustment relates to funding obligations that were incurred in a manner that was inconsistent with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to each investment asset owner in respect of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise.

Irrevocability of clean energy adjustment

9xx. (1) The amount of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

~~(2) Subsection (1) does not apply to the extent that there is a calculation error~~**[NTD: The LDCs should not calculate the clean energy adjustment. The mechanics should, like the fair adjustment, be a non-discretionary calculation done by the ~~electricity vendor.~~OEB.]**

Determination of clean energy adjustment

10xx. (1) The clean energy adjustment payable by all specified consumers in respect of a reference period shall be determined as follows:

1. Calculate the estimated finance amount for the reference period in accordance with Schedule 1 and such additional rules as may be prescribed.

2. Add the true up amount for the reference period, as determined in accordance with the prescribed method, to the estimated finance amount calculated under paragraph 1.

[Note: Here the clean energy adjustment is a large amount, not a rate.]

True up amount

(2) For the purposes of paragraph 2 of subsection (1), the Lieutenant Governor in Council may make regulations prescribing the method for determining the true up amount, having regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the ~~estimated~~actual finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between amounts billed and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

    ii. variations in billings due to variations in electricity consumption.

IESO to issue remittance notice to electricity vendors

11xx. (1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion to be collected from specified consumers in accordance with section 12xx(2), as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period. **[NTD: Is the remittance notice in addition to, or separate from, the IESO's settlement processes?]**

IESO to collect

(2) The IESO shall, as an agent of the investment asset owners, collect the clean energy adjustment from electricity vendors ~~[~~in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, ~~1998]~~1998*, or as may be prescribed.

Collection account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of collecting those a~~cc~~mounts:

1. Amounts described in subsection 12 (~~4~~5).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8 (1).

3. Payments collected by the IESO pursuant to subsection 11 (2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3), and all proceeds of any such amounts shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (6), be received and held by the IESO in trust for the benefit of the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act~~.~~, and for greater certainty any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust. **[NTD: This Act or the PPSA? To confirm.]**

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment asset owners in accordance with the regulations.

Collection of outstanding amounts, regulatory asset

(6) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the applicable fair allocation calculation made by the Financial Services Manager under Part IV, the IESO may collect the difference from specified consumers to reduce any outstanding IESO funding shortfall.

Electricity vendor to invoice specified consumers

12xx. (1) The electricity vendor shall issue an invoice to each specified consumer ~~for the consumer's amount~~ of the clean energy adjustment in accordance with the regulations. **[NTD: The clean energy adjustment should be a charge.]**

Electricity vendor to collect

(2) Each electricity vendor shall, as an agent of the IESO and the investment asset owners, collect the clean energy adjustment from specified consumers ~~[in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998*]~~.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges for the same invoice period.

Held in trust

(4) All of the following amounts received by an electricity vendor and all proceeds of any such amounts shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be received and held by each electricity vendor in trust for the benefit of the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act~~:~~, and for greater certainty any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust **[NTD: Or the PPSA?]**:

1. Payments received from or on behalf of specified consumers under subsection 8 (1).

2. Portions of payments received from or on behalf of specified consumers under subsection 8 (1) that are allocated to the clean energy adjustment under subsection (3).

3. Payments received from or on behalf of specified consumers under subsection 12xx(2).

4. Portions of payments received from or on behalf of specified consumers under subsection 12xx(3).

5. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Remittance to IESO

(5) Each electricity vendor other than the IESO shall remit amounts described in subsection (5) to the IESO for the benefit of the investment asset owners or secured parties in accordance with the regulations.

Regulations

(6) If an electricity vendor fails, in the manner described in the regulations, to comply with the requirements of this section, the ~~electricity vendor~~IESO shall take such steps as the regulations may prescribe. **[NTD: Is this the intent? Otherwise this clause as drafted makes no sense.]**

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) [Note: To be elaborated.]

Termination

(2) The Minister may by written order terminate the appointment of an appointee as the Financial Services Manager if,

(a) the Minister has advised the appointee that the Financing Plan is either inconsistent with or is being implemented in a manner that is inconsistent with the principles set out in section x;

(b) the appointee has been afforded a reasonable opportunity to consider and address the inconsistency; and

(c) the appointee is unwilling or unable to address the inconsistency to the satisfaction of the Minister.

Replacement

(3) Upon terminating an appointment, the Minister may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may **[NTD: See also s. 17xx]** administer the investment asset on behalf of the investment asset owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section XX.

2. Providing information to electricity vendors, including the IESO, in respect of obligations under Part III.

3. Such other matters as may be prescribed.

For clarity, a person other than the Financial Services Manager may administer the investment asset on behalf of the investment asset owners.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate the fair allocation amount for the purposes of,

(a) fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of each reference period; and

(b) aligning funding obligations that may be incurred during each reference period with the allocation of the estimated clean energy costs and estimated clean energy benefits across present and future generations of specified consumers.

Amount

(1.1) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which the estimated [clean energy costs] [clean energy benefits] to be allocated to specified consumers in respect of the reference period exceeds the estimated amount of [the global adjustment] that would be borne by the specified consumers in respect of clean energy costs [in the absence of this Act]. **[NTD: We do not understand what this clause is intended to do. In addition, there should not be references to global adjustment as the allocation also includes energy costs (e.g. if global adjustment goes negative).]**

2. An allocable portion of the value of any fair adjustment, determined in accordance with subsection (3).

Principles

(2) In calculating the fair allocation amount [or in developing the fair allocation calculation?], subject to subsection (3), the Financial Services Manager shall have regard to the following principles:

1. Clean energy costs allocated to the specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits attributed to the specified consumers in respect of a reference period should be determined based on *[Insert principles]*.

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers for each reference period.

    iii. The expected electricity consumption rates for each reference period.

Allocation of fair adjustment

(3) If, before the Financial Services Manager has calculated the fair allocation amount in respect of a reference period, a fair adjustment has been made under Part II in respect of the reference period, the calculation shall include a portion of the value of the fair adjustment in the fair allocation calculation for each future reference period. **[NTD: Unclear.]**

Amendments to the fair allocation calculation

(4) The Financial Services Manager may amend the fair allocation calculation from time to time, as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Submission of fair allocation to Minister

(5) The Financial Services Manager shall provide to the Minister the fair allocation calculation and any amendments to the fair allocation calculation.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare and provide to the Minister a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred or potential transfers should be made for the purposes of this Act.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align the ~~expected~~estimated finance amount determined under Schedule 1 that would become due and payable during a reference period with the fair allocation amount determined for the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment for the reference period. **[NTD: This is already built into the calculation of the fair allocation amount in s. 15xx(1.1)(2).]**

2. Incurrences and transfers should be implemented in a manner that, as the Financial Services Manager considers to be reasonable, is cost effective and reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

[Note for reference: List of items for consideration in regulation: (a) anticipated IESO funding shortfalls and related transfer amounts; (b) the maturities of funding obligations; (c) the availability of refinancings, redemption opportunities and liquidity terms and conditions in order to achieve the objective contemplated in section X(1)(a); (d) the availability of currency and interest rate hedging facilities for the purpose of mitigating any differences between the ~~expected~~estimated finance amounts becoming due and payable during a reference period and the fair allocation amount for the reference period; (d) the amount and potential variability of interest rates and related financing costs; (e) available capital markets in which funding obligations may be incurred.]

Amendments to approved plan

(3) The Financial Services Manager may amend the Financing Plan at any time, without the approval of the Minister, subject to the requirements set out in this section.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would ~~become payable during the reference period and~~ result in a clean energy adjustment for the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount for the reference period and the amount of the fair adjustment for the reference period]. **[NTD: This is unclear.]**

Confidentiality of plan

(~~4~~5) The Financing Plan is deemed to be a record subject to section 17 of the *Freedom of Information and Protection of Privacy Act.*

Implementation of Financing Plan

17xx. (1) ~~The Financial Services Manager shall incur funding~~Funding obligations shall be incurred and ~~make~~ transfers shall be made in material conformity with the applicable Financing Plan. **[NTD: Revised to accommodate the comment on the definition of FSM about bifurcating the role.]**

Same

(2) For greater certainty, section ~~[paramountcy of funding obligations]~~17xx(5) applies despite the failure of the Financial Services Manager to comply with subsection (~~1~~4).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations and make transfers.

Prohibition

(~~3~~4) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

~~Effect of amendment to Fair Allocation Plan~~Financing Plan compliance

(~~4~~5) No funding obligation incurred and no transfer made by the Financial Services Manager shall be affected by any inconsistency with the Financing Plan, including any inconsistency with the principles set out in section X.

PART V
THE REGULATORY ASSET

Interpretation, portion of regulatory asset

18xx. If a transfer under this Part provides for the transfer of a portion of the regulatory asset, any references in this Part to the regulatory asset are deemed to be references to the portion of the regulatory asset transferred.

[Note: This is meant to assist with clarity in the subsequent provisions.]

Variance account

19xx. (1) The Board shall issue an accounting order ~~to authorize~~authorizing the IESO to~~ do the following~~:

1. ~~Create~~Establish a variance account for the purposes of this Act.

2. Record the IESO funding shortfall in the variance account from time to time.

3. Recover the IESO funding shortfall in accordance with section X and the regulations. **[NTD: Accounting orders don't allow for recovery. They are normally cleared via a rate order (after application).]**

No hearing

(2) The order of the Board shall be made in writing and without holding a hearing.

No appeals, etc.

(3) No appeal lies from the order of the Board.

IESO funding shortfall

20xx. (1) The IESO shall determine the amount of the IESO funding shortfall for each month in the following manner:

1. Calculate the sum of all invoice amounts that would have been issued to specified consumers for the month if Part II of this Act did not apply.

2. Calculate the sum of all invoice amounts issued to specified consumers for the month.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1, and make any other adjustments as may be prescribed.

Same

(2) To the extent that the IESO funding shortfall for any month is based on an estimate of the electricity to be used by specified consumers, the IESO shall record an adjustment in the variance account in the following month to reflect the difference between the estimate and the electricity actually used by specified consumers. **[NTD: Why would it be based on an estimate?]**

Recording of IESO funding shortfall

(3) IESO shall record the cumulative IESO funding shortfall from time to time, including adjustments resulting from the exercise of the right of recovery under section 21 and any transfer under section 22, in the variance account.

Recording determinative

(4) A recording of the IESO funding shortfall, including any adjustment or transfer, in the variance account is determinative of the amount of cumulative IESO funding shortfall at the time of the recording.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the cumulative IESO funding shortfall.

Same, restrictions

(2) The IESO's right to recover the cumulative IESO funding shortfall under subsection (1) is subject to the following:

1. The IESO shall not be entitled to collect any of the cumulative IESO funding shortfall from specified consumers before May 1, 2022.

2. The process by which the IESO may recover the cumulative IESO funding shortfall shall be established by the Board, having regard to the amount of the cumulative IESO funding shortfall from time to time and the [fair allocation calculation]. **[NTD: See Section 15xx "Fair Allocation Amount".]**

3. Such other restrictions as may be prescribed.

Transfer of regulatory asset

22xx. (1) The IESO may transfer all or a portion of the regulatory asset to any financing entity under the Financing Plan, which transfer creates the investment asset.

Same

(2) Upon receipt of any payment in consideration for the transfer of the regulatory asset,

(a) the IESO shall record the payment as a reduction of the IESO funding shortfall in the variance account; for clarity, the IESO funding shortfall shall not include any investment asset interest; and

(b) ~~unless otherwise provided for in this Act,~~ the IESO shall have no further right, title or interest in, or any obligations in respect of~~, the regulatory asset or in~~ the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity becomes an investment asset owner and acquires an investment interest. **[NTD: This subsection and the definition imply that the investment asset owner will always be a financing entity (which may or may not be created pursuant to subsection 17xx(3)). The financing entity and any trustee will be Ontario entities, so the various provisions related to the perfection of security interests etc. (e.g. in section 28xx) should work; however, if it is contemplated that the investment asset could be transferred ~~to~~ a non-Ontario entity pursuant to section 27xx or as a result of enforcement, further transfers may be subject to another jurisdiction's laws and another jurisdiction's laws related to the granting and perfection of security interests may apply. Conflict of laws rules will then apply.]**

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment asset owner of the regulatory asset, and the investment asset created by the transfer shall be immediately vested in the transferee.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer ~~of IESO's right to recover the IESO funding shortfall~~, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the cumulative IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons or any other persons.

PART VI
THE INVESTMENT ASSET

Interpretation, investment asset

24xx. If a transfer under this Part provides for the transfer of an investment asset, any references in this Part to the investment interest are deemed to be references to the specific investment interest transferred.

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication: **[NTD: See Torys comments from the prior draft.]**

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any ~~amounts that~~and all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

No set off, etc.

(2) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, an agent of the investment asset owner or ~~an owner of distribution system assets in the Province~~licensed distributor;

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); or **[NTD: This provision is likely unenforceable given federal paramountcy in respect of bankruptcy and insolvency law and the claims released thereunder. See, e.g., 407 ETR Concession Co. v. Canada (Superintendent of Bankruptcy)]**

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with section [xx] of the *Personal Property Security Act*.

Collective action required

(4) If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: Successors may need to be addressed here.]

Transfer of investment interest

26xx. An investment asset owner may transfer all or a portion of its rights and interests in an investment interest to any other investment asset owner, including by way

of a transfer of a divided or an undivided interest, in accordance with the Financing Plan. **[NTD: See note to 22xx(3)]**

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the owner of the investment interest acquired a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer. **[NTD: See note to 22xx(3)]**

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment asset owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment asset owner shall have priority over any liens in favour of such other persons.

Investment asset owner may grant security interest

28xx. (1) An investment asset owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person **[to secure a funding obligation]. [NTD: Consider whether this restriction is desirable if an investment asset owner is to be anyone other than a financing entity.]**

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms. **[NTD: See subsection (3) – Why both this Act and the PPSA?]**

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property,

except as otherwise provided for in this section, and any granting of a security interest by the owner of an investment interest to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment asset owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted. **[NTD: There are super-priority liens that could have priority over this security interest under federal insolvency laws; also consider whether subsection (3) and this subsection (5) are inconsistent, since the PPSA provisions incorporated under (3) would include the priority provisions.]**

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in any amounts, revenues or other proceeds ~~that are deposited in~~collected by the IESO in trust, including amounts that are deposited in the account to be created pursuant to subsection 11xx(3), any amounts, revenues or other proceeds collected by electricity vendors in trust pursuant to subsection 12xx(4) and any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person ~~who~~, including where such person may have commingled such amounts, revenues or other proceeds with other funds.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*. **[NTD: This section appears to**

be referring solely to agents appointed under section 29xx. Consider whether the Financial Services Manager, IESO, any financing entity and any others should be expressly listed.]

Sequestration

31xx. (1) A court in the Province may, upon application by an investment asset owner or a secured party, order the sequestration and payment of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment asset owner or secured party by any person or entity authorized to collect the clean energy adjustment, if such person or entity defaults on any required remittance of the clean energy adjustment, collections or remittances or fails, or indicates any intention to cease, to hold any such amounts, collections or remittances or proceeds thereof in trust and in segregated accounts as required by this Act.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Same

(3) An order under subsection (1) shall remain in full force and effect despite any bankruptcy, reorganization or other insolvency proceedings with respect to the person or entity who is subject to the order. **[NTD: The order will be likely be stayed on an insolvency and if the money has been spent rather than commingled, a sequestration order will not result in the recovery of the funds.]**

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest. **[NTD: What about the PPSA?] [NTD: See note to 22xx(3)]**

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan ~~or in relation to the establishment of the Fair Allocation Plan~~.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

~~**References in marketing materials and offering documents**~~

~~**36xx.** No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under this section unless the prescribed requirements, if any, are satisfied.~~

[NTD: Need to be able to disclose this without restriction to market the debt.]

Non-application, Financial Administration Act, s. 28[7]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations,

(a) defining any term used in this Act….

(b) prescribing types of payment obligations that constitute funding obligations;

(~~a~~c) governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment.

(~~b~~d) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

(e) **[in respect of a financing entity.]**

[7] Note - see s. 51 of the Electricity Act, 1998

[Note: reg-making powers to be dealt with in subsequent draft]**[NTD: This should be as broad as possible.]**

PART VII
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

201x. Section 53.1 of the Act would be amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under that Act and engaging in activities to

facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including the following:

1. Entering into contracts and undertakings on behalf of special purpose financing entities, including pre-formation contracts and undertakings and as principal in relation to matters permitted by the *Ontario Fair Hydro Plan Act, 2017* subject to the right of reimbursement from amounts available to the financing entity.

2. Preparing reports on behalf of the financing entity.

3. Enforcing the rights of the financing entity.

4. Signing offering documents as sponsor or otherwise on behalf of the financing entity.

5. Exercising the powers and performing the duties of the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*

6. Issuing non-equity securities in Ontario Power Generation Inc. or on if its subsidiaries, for the purpose of raising funds to acquire debt or equity interests in a financing entity whose activities are limited to the incurrence of funding obligations pursuant to the *Ontario Fair Hydro Plan Act, 2017.*

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create one or more subsidiaries, trusts or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a

subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 70 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1)]

[NTD: Is the plan to also amend the compliance/enforcement provisions of the OEB Act to bring breaches of this Act within the purview of the Board's enforcements powers?]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

SCHEDULE 1
ESTIMATED FINANCE AMOUNT

[NTD: This section should be moved to the regulations. The calculations below will require careful review once the financing structure is finalized, so it is premature to include them in the legislation.]

Estimated finance amount

1. The estimated finance amount for a reference period shall be determined by estimating, prior to the start of a reference period, the sum of the following:

1. The sum of all amounts that are payable during the reference period by or on behalf of the investment asset owners to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

2. The sum of all funding costs for the reference period, determined as follows:

    i. Calculate the aggregate of all interest, scheduled principal and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of investment assets owners during the reference period in respect of all funding obligations, including such amounts as may be prescribed.

    ii. Calculate the sum of the aggregate of all amounts received by or on behalf of investment asset owners during the reference period in respect of all funding obligations and such other amounts as may be prescribed.

    iii. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

3. The sum of all amounts payable during the reference period by or on behalf of investment asset owners to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable during the reference period by or on behalf of investment asset owners that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

1. Calculate the sum of all amounts deposited by or on behalf of investment asset owners during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn by or on behalf of investment asset owners during the reference period from deposits previously made as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

Fair Hydro Act (April 23 2017) [Osler comments].pdf

April 23, 2017 Osler Mark-up of Ver. 3

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

[Notes re this draft:
- all numbering of provisions may need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)
- need to check consistency of various phrases (e.g. *during/for/in respect of* reference period; *owner of RA/IA vs. RA/IA owner; etc.)*]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1]

The Government of Ontario has established a regulatory framework related to the generation and sale of electricity, which has promoted and continues to promote significant investment to enable phasing out of coal fired generation, modernizing sites and facilities in the Province for the generation of electrical energy and the production therefrom,[2] and conservation and demand management.

The Government of Ontario is committed to ensuring that the costs of these investments, and the raising of money to fund the investments,[3] are allocated fairly among present and future generations of consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

[1] Note: please see the preamble of the *Green Energy Act, 2009.*
[2] Note: please see clause 92A (4) (b) of the Constitution, 1867: "des emplacements et des installations de la province destinés à la production d'énergie électrique, ainsi que de cette production meme".
[3] Note: please see opening flush of s. 92A (4) of the Constitution Act, 1867

3. Purpose
4. Crown bound
5. Protection and assurances

PART II
FAIR ADJUSTMENT

6. Fair adjustment, May 1, 2017 to April 30, 2018
7. Fair adjustment, May 1, 2018 to April 30, 2022

PART III
CLEAN ENERGY ADJUSTMENT

8. Specified consumers to pay clean energy adjustment
9. Irrevocability of clean energy adjustment
10. Determination of clean energy adjustment
11. IESO to issue remittance notice to electricity vendors
12. Electricity vendor to invoice specified consumers

PART IV
IMPLEMENTATION
FINANCIAL SERVICES MANAGER

13. Appointment
14. Duties and powers

FAIR ALLOCATION AMOUNT

15. Financial Services Manager to calculate fair allocation amount

FINANCING PLAN

16. Financial Services Manager to prepare Financing Plan
17. Implementation of Financing Plan

PART V
THE REGULATORY ASSET

18. Interpretation, portion of regulatory asset
19. Variance account
20. IESO funding shortfall
21. Regulatory asset established
22. Transfer of regulatory asset
23. Validity of transfer

PART VI
THE INVESTMENT ASSET

24. Interpretation, investment asset
25. Investment asset established
26. Transfer of investment interest
27. Validity of transfer
28. Investment asset owner may grant security interest

PART VI
MISCELLANEOUS

29. Appointment of agent, invoicing or collection
30. Not Crown agent
31. Sequestration
32. Choice of law
33. Conflict
34. No further approvals, etc.
35. Immunity
36. References in marketing materials and offering documents
37. Non-application, Financial Administration Act, s. 28
38. Regulations

PART VII
AMENDMENTS TO OTHER ACTS
ELECTRICITY ACT, 1998
AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

PART VII
COMMENCEMENT AND SHORT TITLE

103. Commencement
104. Short title

Schedule 1 Estimated finance amount

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")
[Note - will need to check throughout the draft that references to CEA are clear as to whether it's the total CEA in respect of a reference period vs. the portion payable by a specified consumer.][NTD: Agreed. Consider splitting this into a defined term for the rate/charge and a defined term for the global amount.]

"clean energy benefits" means, in respect of a reference period, the value of the benefits determined to be derived by the specified consumers during the reference period as a result of the clean energy initiative**[, including as a result of past, present and expected future incurrences of clean energy costs][NTD: What does this mean?]**; ("French")

"clean energy costs" means, in respect of a reference period, the amount of the costs allocated to specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated costs to be incurred by the IESO under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management, including storage,

(iii) energy efficiency,

(iv) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(v) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"cumulative IESO funding shortfall" means, at any point in time, the sum of all prior IESO funding shortfalls minus any consideration received by the IESO from the sale of regulatory assets;

"electricity vendor"[4] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"estimated finance amount" means the amount calculated pursuant to the regulations;

"fair adjustment" means the determination of the rate payable for electricity in accordance with Part II; ("French")

"fair allocation" means ●;

"fair allocation amount" means the amount calculated pursuant to section 15xx;

"Financial Services Manager" means Ontario Power Generation Inc. [or such other person or entity as may be appointed as the Financial Services Manager by the Minister under section **]; ("French") **[NTD: Consider a bifurcation of the FSM duties into (i) preparation and update of the Financing Plan and (ii) administration of the investment asset. See s. 14xx.]**

"Financing Plan" means the plan prepared under section X, as amended from time to time in accordance with this Act; ("French")

[4] Note - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

"financing entity" means ●;

"funding obligation" means a payment obligation incurred by or on behalf of an investment asset owner under section x; ("French") **[NTD: This revision is required because the fair allocation amount (per s. 15xx) cannot include IESO's "funding obligations".]**

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means, in respect of a calendar month, the amount determined under section 20xx for the calendar month; ("French")

"investment asset" means the investment asset created as described in section 22xx; ("French")

"investment asset owner" means a financing entity that acquires an investment interest in the investment asset; ("French") **[NTD: Should this reference any person to whom the investment interest is transferred to pursuant to section 26xx or reference a secured party who acquires an investment asset as a result of enforcement? See note to 22xx(3).]**

"investment interest" means an ownership interest in the investment asset, which entitles an investment asset owner to the rights and benefits specified in the agreement under which the ownership interest is transferred;

"invoice amount" means the amount, determined in accordance with subsections (2.1) and (2.2) and the regulations, that is payable by a specified consumer for the provision of electricity in Ontario during a period of time specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a) or such shorter period as may be prescribed, in any event ending no later than April 30, 2047; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of an investment asset owner by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right established under section X to recover the IESO funding shortfall; ("French")

"regulatory asset owner" means ●;

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French") **[NTD: Move to regs.]**

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity**[, receives an invoice in respect of the account][NTD: Why is this limitation required?]** and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French") **[NTD: Move to regs.]**

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French") **[NTD: Move to regs.]**

"transfer" means an assignment, conveyance, disposition or sale; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria: **[NTD: Move to regs.]**

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to subsection (2.2) and the regulations, the invoice amount for a specified consumer includes the following amounts: **[NTD: Move to regs.]**

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following:

    i. The commodity price of the electricity used during the invoice period.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

    iv. The amount of any harmonized sales tax payable [by the consumer?] under Part IX of the *Excise Tax Act* (Canada);

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO, such amounts as may be prescribed. ("French")

Same, exclusions

(2.2) Except as otherwise prescribed by the regulations, the invoice amount does not include any of the following amounts: **[NTD: Move to regs.]**

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity. **[NTD: What about service charges for the delivery of electricity, etc.? Also, why is this worded slightly differently than in OREC?]**

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge". **[NTD: What is intended here?]**

   iii. A rate rider. **[NTD: What is intended here? LDCs have lots of rate riders on their tariff sheets, most of which are legitimate costs tied to the supply of electricity.]**

5. Any other prescribed amounts.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer, **[NTD: Move to regs. This only works if all "specified consumers" fall into the residential rate class; otherwise, non-residential consumers will get residential rates.]**

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the *Ontario Energy Board Act, 1998*;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Transfer

(4) For greater certainty, a transfer of the regulatory asset or a portion of the regulatory asset includes any act of the IESO by which the IESO purports to dispose of its interest in the regulatory asset with the result of a specified person becoming the owner of an investment interest. **[NTD: Consider moving to s. 22xx]**

Effect of invalidity, etc.[5]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect or invalidate a funding obligation, or any rights or obligations associated with such funding obligations, that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

3xx. (1) The purposes of this Act are,[6]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers over time; and

(b) to recognize that clean energy benefits that have accrued and that will accrue over time will continue to benefit present and future electricity consumers in the Province.

[5] Note: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*
[6] Note: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment in relation to other charges or amounts used by specified consumers in connection with the supply of electricity;

(c) adversely affect any rights of the IESO or other party to transfer the regulatory asset or the consequences of any such transfer; or

(d) adversely affect the regulatory asset, an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of or in relation to this Act, including agreements regarding financial commitments, financial arrangements, guarantees, indemnities or similar transactions, including entering into agreements guaranteeing that if the IESO fails to carry out its obligations under this Act for any reason, including because the IESO is dissolved or restructured or because it comes insolvent, the Government of Ontario shall carry out those obligations or ensure they are carried out by another appropriate entity.

PART II
FAIR ADJUSTMENT

Fair adjustment, May 1, 2017 to April 30, 2018 [NTD: Minister's release post-OEB RPP announcement suggests a start date later than May 1.]

Definition

6xx. (1) In this section,

"average baseline invoice amount" means the average monthly electricity invoice amount that would be payable by a representative consumer under the average baseline rate; ("French")

"average baseline rate" means the average commodity rate that would be payable effective May 1, 2017 by the class of consumers prescribed by the regulations under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act, as determined by the Board by applying the method prescribed by the regulations under clause 79.16 (1) (b) of that Act; ("French") **[NTD: Consider the application of this clause in light of the April 20 rate cut announced by the OEB.]**

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

Rate determination

(2) Subject to subsection (3), [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] the commodity rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 is the average rate that would be payable by a representative consumer in order for the representative consumer to receive a monthly electricity invoice amount that is **[25][NTD: Consider implications of the April 20 rate cut announced by the OEB.]** per cent less than the average baseline invoice amount.

Sub-meter customers

(3) A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the commodity rate payable by each sub-meter customer is the commodity rate determined under subsection (2).

Determining commodity rate

(4) The commodity rate mentioned in subsection (2) shall be,

(a) determined by the Board within seven business days after this section receives Royal Assent; and

(b) effective as of the first day of the calendar month immediately following the determination.

[NTD: Consider whether it is necessary to override any Section 78 order, retailer agreement, or s. 79.16 of the Act (since it remains) in the same way language of s. 79.16 (beginning) does.]

Transition

(5) If, for technical or operational reasons, an electricity vendor, specified consumer or unit sub-meter provider is unable to adapt its invoices to comply with this section by the time it issues its first invoice for electricity consumed on or after May 1, 2017,

(a) the electricity vendor, specified consumer or unit sub-meter provider shall adapt its invoices as soon as possible and, in any event, no later than [August 1, 2017]; and

(b) the electricity vendor, specified consumer or unit sub-meter provider shall ensure that any specified consumer or sub-meter customer invoiced at a commodity rate higher than the applicable commodity rate receives the difference between the commodity rate shown on their invoice and the applicable commodity rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations. **[NTD: (1) See comment above regarding May 1 start date, and (2) LDCs have to change commodity rate now every six months. What would prompt the need for this?]**

Fair adjustment, May 1, 2018 to April 30, 2022

7xx. The Lieutenant Governor in Council may, [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] make regulations prescribing the commodity rate for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022. **[NTD: What about including interest on funding obligations in the Fair Adjustment in this period, or in the prescribed commodity rate? (See Section 16xx(4)(b) which seems to permit some funding obligations in the charging of CEAs during the first 5 years as long as the funding obligations are under the total fair allocation).]**

PART III
CLEAN ENERGY ADJUSTMENT

[NTD: Consider inserting the provisions re how it's calculated here.]

Specified consumers to pay clean energy adjustment

8xx. (1) Upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor, as agent of the investment asset owners, in accordance with such terms of payment as may

be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment is inconsistent with the fair allocation calculation applicable at the time when the payment is due; and

(b) whether the clean energy adjustment relates to funding obligations that were incurred in a manner that was inconsistent with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to each investment asset owner in respect of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise.

Irrevocability of clean energy adjustment

9xx. (1) The amount of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

[NTD: The LDCs should not calculate the clean energy adjustment. The mechanics should, like the fair adjustment, be a non-discretionary calculation done by the OEB.]

Determination of clean energy adjustment

10xx. (1) The clean energy adjustment payable by all specified consumers in respect of a reference period shall be determined as follows:

1. Calculate the estimated finance amount for the reference period in accordance with Schedule 1 and such additional rules as may be prescribed.

2. Add the true up amount for the reference period, as determined in accordance with the prescribed method, to the estimated finance amount calculated under paragraph 1.

[Note: Here the clean energy adjustment is a large amount, not a rate.]

True up amount

(2) For the purposes of paragraph 2 of subsection (1), the Lieutenant Governor in Council may make regulations prescribing the method for determining the true up amount, having regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the actual finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between amounts billed and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

    ii. variations in billings due to variations in electricity consumption.

IESO to issue remittance notice to electricity vendors

11xx. (1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion to be collected from specified consumers in accordance with section 12xx(2), as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period. **[NTD: Is the remittance notice in addition to, or separate from, the IESO's settlement processes?]**

IESO to collect

(2) The IESO shall, as an agent of the investment asset owners, collect the clean energy adjustment from electricity vendors in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998*, or as may be prescribed.

Collection account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of collecting those amounts:

1. Amounts described in subsection 12 (5).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8 (1).

3. Payments collected by the IESO pursuant to subsection 11 (2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3), and all proceeds of any such amounts shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (6), be received and held by the IESO in trust for the benefit of the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act, and for greater certainty any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust. **[NTD: This Act or the PPSA? To confirm.]**

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment asset owners in accordance with the regulations.

Collection of outstanding amounts, regulatory asset

(6) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the applicable fair allocation calculation made by the Financial Services Manager under Part IV, the IESO may collect the difference from specified consumers to reduce any outstanding IESO funding shortfall.

Electricity vendor to invoice specified consumers

12xx. (1) The electricity vendor shall issue an invoice to each specified consumer of the clean energy adjustment in accordance with the regulations. **[NTD: The clean energy adjustment should be a charge.]**

Electricity vendor to collect

(2) Each electricity vendor shall, as an agent of the IESO and the investment asset owners, collect the clean energy adjustment from specified consumers.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on

a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges for the same invoice period.

Held in trust

(4) All of the following amounts received by an electricity vendor and all proceeds of any such amounts shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be received and held by each electricity vendor in trust for the benefit of the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act, and for greater certainty any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust **[NTD: Or the PPSA?]**:

1. Payments received from or on behalf of specified consumers under subsection 8 (1).

2. Portions of payments received from or on behalf of specified consumers under subsection 8 (1) that are allocated to the clean energy adjustment under subsection (3).

3. Payments received from or on behalf of specified consumers under subsection 12xx(2).

4. Portions of payments received from or on behalf of specified consumers under subsection 12xx(3).

5. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Remittance to IESO

(5) Each electricity vendor other than the IESO shall remit amounts described in subsection (5) to the IESO for the benefit of the investment asset owners or secured parties in accordance with the regulations.

Regulations

(6) If an electricity vendor fails, in the manner described in the regulations, to comply with the requirements of this section, the IESO shall take such steps as the regulations may prescribe. **[NTD: Is this the intent? Otherwise this clause as drafted makes no sense.]**

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) [Note: To be elaborated.]

Termination

(2) The Minister may by written order terminate the appointment of an appointee as the Financial Services Manager if,

(a) the Minister has advised the appointee that the Financing Plan is either inconsistent with or is being implemented in a manner that is inconsistent with the principles set out in section x;

(b) the appointee has been afforded a reasonable opportunity to consider and address the inconsistency; and

(c) the appointee is unwilling or unable to address the inconsistency to the satisfaction of the Minister.

Replacement

(3) Upon terminating an appointment, the Minister may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may **[NTD: See also s. 17xx]** administer the investment asset on behalf of the investment asset owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section XX.

2. Providing information to electricity vendors, including the IESO, in respect of obligations under Part III.

3. Such other matters as may be prescribed.

For clarity, a person other than the Financial Services Manager may administer the investment asset on behalf of the investment asset owners.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate the fair allocation amount for the purposes of,

(a) fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of each reference period; and

(b) aligning funding obligations that may be incurred during each reference period with the allocation of the estimated clean energy costs and estimated clean energy benefits across present and future generations of specified consumers.

Amount

(1.1) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which the estimated [clean energy costs] [clean energy benefits] to be allocated to specified consumers in respect of the reference period exceeds the estimated amount of [the global adjustment] that would be borne by the specified consumers in respect of clean energy costs [in the absence of this Act]. **[NTD: We do not understand what this clause is intended to do. In addition, there should not be references to global adjustment as the allocation also includes energy costs (e.g. if global adjustment goes negative).]**

2. An allocable portion of the value of any fair adjustment, determined in accordance with subsection (3).

Principles

(2) In calculating the fair allocation amount [or in developing the fair allocation calculation?], subject to subsection (3), the Financial Services Manager shall have regard to the following principles:

1. Clean energy costs allocated to the specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits attributed to the specified consumers in respect of a reference period should be determined based on *[Insert principles]*.

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers for each reference period.

    iii. The expected electricity consumption rates for each reference period.

Allocation of fair adjustment

(3) If, before the Financial Services Manager has calculated the fair allocation amount in respect of a reference period, a fair adjustment has been made under Part II in respect of the reference period, the calculation shall include a portion of the value of the fair adjustment in the fair allocation calculation for each future reference period. **[NTD: Unclear.]**

Amendments to the fair allocation calculation

(4) The Financial Services Manager may amend the fair allocation calculation from time to time, as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Submission of fair allocation to Minister

(5) The Financial Services Manager shall provide to the Minister the fair allocation calculation and any amendments to the fair allocation calculation.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare and provide to the Minister a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred or potential transfers should be made for the purposes of this Act.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align the estimated finance amount determined under Schedule 1 that would become due and payable during a reference period with the fair allocation amount determined for the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment for the reference period. **[NTD: This is already built into the calculation of the fair allocation amount in s. 15xx(1.1)(2).]**

2. Incurrences and transfers should be implemented in a manner that, as the Financial Services Manager considers to be reasonable, is cost effective and reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

[Note for reference: List of items for consideration in regulation: (a) anticipated IESO funding shortfalls and related transfer amounts; (b) the maturities of funding obligations; (c) the availability of refinancings, redemption opportunities and liquidity terms and conditions in order to achieve the objective contemplated in section X(1)(a); (d) the availability of currency and interest rate hedging facilities for the purpose of mitigating any differences between the estimated finance amounts becoming due and payable during a reference period and the fair allocation amount for the reference period; (d) the amount and potential variability of interest rates and related financing costs; (e) available capital markets in which funding obligations may be incurred.]

Amendments to approved plan

(3) The Financial Services Manager may amend the Financing Plan at any time, without the approval of the Minister, subject to the requirements set out in this section.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would result in a clean energy adjustment for the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount for the reference period and the amount of the fair adjustment for the reference period]. **[NTD: This is unclear.]**

Confidentiality of plan

(5) The Financing Plan is deemed to be a record subject to section 17 of the *Freedom of Information and Protection of Privacy Act.*

Implementation of Financing Plan

17xx. (1) Funding obligations shall be incurred and transfers shall be made in material conformity with the applicable Financing Plan. **[NTD: Revised to accommodate the comment on the definition of FSM about bifurcating the role.]**

Same

(2) For greater certainty, section 17xx(5) applies despite the failure of the Financial Services Manager to comply with subsection (4).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations and make transfers.

Prohibition

(4) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Financing Plan compliance

(5) No funding obligation incurred and no transfer made by the Financial Services Manager shall be affected by any inconsistency with the Financing Plan, including any inconsistency with the principles set out in section X.

PART V
THE REGULATORY ASSET

Interpretation, portion of regulatory asset

18xx. If a transfer under this Part provides for the transfer of a portion of the regulatory asset, any references in this Part to the regulatory asset are deemed to be references to the portion of the regulatory asset transferred.

[Note: This is meant to assist with clarity in the subsequent provisions.]

Variance account

19xx. (1) The Board shall issue an accounting order authorizing the IESO to:

1. Establish a variance account for the purposes of this Act.

2. Record the IESO funding shortfall in the variance account from time to time.

3. Recover the IESO funding shortfall in accordance with section X and the regulations. **[NTD: Accounting orders don't allow for recovery. They are normally cleared via a rate order (after application).]**

No hearing

(2) The order of the Board shall be made in writing and without holding a hearing.

No appeals, etc.

(3) No appeal lies from the order of the Board.

IESO funding shortfall

20xx. (1) The IESO shall determine the amount of the IESO funding shortfall for each month in the following manner:

1. Calculate the sum of all invoice amounts that would have been issued to specified consumers for the month if Part II of this Act did not apply.

2. Calculate the sum of all invoice amounts issued to specified consumers for the month.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1, and make any other adjustments as may be prescribed.

Same

(2) To the extent that the IESO funding shortfall for any month is based on an estimate of the electricity to be used by specified consumers, the IESO shall record an adjustment in the variance account in the following month to reflect the difference between the estimate and the electricity actually used by specified consumers. **[NTD: Why would it be based on an estimate?]**

Recording of IESO funding shortfall

(3) IESO shall record the cumulative IESO funding shortfall from time to time, including adjustments resulting from the exercise of the right of recovery under section 21 and any transfer under section 22, in the variance account.

Recording determinative

(4) A recording of the IESO funding shortfall, including any adjustment or transfer, in the variance account is determinative of the amount of cumulative IESO funding shortfall at the time of the recording.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the cumulative IESO funding shortfall.

Same, restrictions

(2) The IESO's right to recover the cumulative IESO funding shortfall under subsection (1) is subject to the following:

1. The IESO shall not be entitled to collect any of the cumulative IESO funding shortfall from specified consumers before May 1, 2022.

2. The process by which the IESO may recover the cumulative IESO funding shortfall shall be established by the Board, having regard to the amount of the cumulative IESO funding shortfall from time to time and the [fair allocation calculation].**[NTD: See Section 15xx "Fair Allocation Amount".]**

3. Such other restrictions as may be prescribed.

Transfer of regulatory asset

22xx. (1) The IESO may transfer all or a portion of the regulatory asset to any financing entity under the Financing Plan, which transfer creates the investment asset.

Same

(2) Upon receipt of any payment in consideration for the transfer of the regulatory asset,

(a) the IESO shall record the payment as a reduction of the IESO funding shortfall in the variance account; for clarity, the IESO funding shortfall shall not include any investment asset interest; and

(b) the IESO shall have no further right, title or interest in, or any obligations in respect of the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity becomes an investment asset owner and acquires an investment interest. **[NTD: This subsection and the definition imply that the investment asset owner will always be a financing entity (which may or may not be created pursuant to subsection 17xx(3)). The financing entity and any trustee will be Ontario entities, so the various provisions related to the perfection of security interests etc. (e.g. in section 28xx) should work; however, if it is contemplated that the investment asset could be transferred to a non-Ontario entity pursuant to section 27xx or as a result of enforcement, further transfers may be subject to another jurisdiction's laws and another jurisdiction's laws related to the granting and perfection of security interests may apply. Conflict of laws rules will then apply.]**

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment asset owner of the regulatory asset, and the investment asset created by the transfer shall be immediately vested in the transferee.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the cumulative IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons or any other persons.

PART VI
THE INVESTMENT ASSET

Interpretation, investment asset

24xx. If a transfer under this Part provides for the transfer of an investment asset, any references in this Part to the investment interest are deemed to be references to the specific investment interest transferred.

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication: **[NTD: See Torys comments from the prior draft.]**

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any and all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced,

collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

No set off, etc.

(2) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, an agent of the investment asset owner or licensed distributor;

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); or **[NTD: This provision is likely unenforceable given federal paramountcy in respect of bankruptcy and insolvency law and the claims released thereunder. See, e.g., 407 ETR Concession Co. v. Canada (Superintendent of Bankruptcy)]**

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with section [xx] of the *Personal Property Security Act*.

Collective action required

(4) If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: Successors may need to be addressed here.]

Transfer of investment interest

26xx. An investment asset owner may transfer all or a portion of its rights and interests in an investment interest to any other investment asset owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan. **[NTD: See note to 22xx(3)]**

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the owner of the investment interest acquired a valid property right and interest in, to and

under the applicable investment interest in accordance with the terms of the transfer. **[NTD: See note to 22xx(3)]**

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment asset owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment asset owner shall have priority over any liens in favour of such other persons.

Investment asset owner may grant security interest

28xx. (1) An investment asset owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person **[to secure a funding obligation]**. **[NTD: Consider whether this restriction is desirable if an investment asset owner is to be anyone other than a financing entity.]**

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms. **[NTD: See subsection (3) – Why both this Act and the PPSA?]**

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the owner of an investment interest to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment asset owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted. **[NTD: There are super-priority liens that could have priority over this security interest under federal insolvency laws; also consider whether subsection (3) and this subsection (5) are inconsistent, since the PPSA provisions incorporated under (3) would include the priority provisions.]**

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in any amounts, revenues or other proceeds collected by the IESO in trust, including amounts that are deposited in the account to be created pursuant to subsection 11xx(3), any amounts, revenues or other proceeds collected by electricity vendors in trust pursuant to subsection 12xx(4) and any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person, including where such person may have commingled such amounts, revenues or other proceeds with other funds.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*. **[NTD: This section appears to be referring solely to agents appointed under section 29xx. Consider whether the Financial Services Manager, IESO, any financing entity and any others should be expressly listed.]**

Sequestration

31xx. (1) A court in the Province may, upon application by an investment asset owner or a secured party, order the sequestration and payment of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment asset owner or secured party by any person or entity authorized to collect the clean energy adjustment, if such person or entity defaults on any required remittance of the clean energy adjustment, collections or remittances or fails, or indicates any intention to cease, to hold any such amounts, collections or remittances or proceeds thereof in trust and in segregated accounts as required by this Act.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Same

(3) An order under subsection (1) shall remain in full force and effect despite any bankruptcy, reorganization or other insolvency proceedings with respect to the person or entity who is subject to the order. **[NTD: The order will be likely be stayed on an insolvency and if the money has been spent rather than commingled, a sequestration order will not result in the recovery of the funds.]**

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest. **[NTD: What about the PPSA?] [NTD: See note to 22xx(3)]**

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged

neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

[NTD: Need to be able to disclose this without restriction to market the debt.]

Non-application, Financial Administration Act, s. 28[7]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations,

(a) defining any term used in this Act…

(b) prescribing types of payment obligations that constitute funding obligations;

(c) governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment.

(d) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

(e) **[in respect of a financing entity.]**

[Note: reg-making powers to be dealt with in subsequent draft]**[NTD: This should be as broad as possible.]**

PART VII
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

[7] Note - see s. 51 of the Electricity Act, 1998

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

201x. Section 53.1 of the Act would be amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under that Act and engaging in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including the following:

1. Entering into contracts and undertakings on behalf of special purpose financing entities, including pre-formation contracts and undertakings and as principal in relation to matters permitted by the *Ontario Fair Hydro Plan Act, 2017* subject to the right of reimbursement from amounts available to the financing entity.

2. Preparing reports on behalf of the financing entity.

3. Enforcing the rights of the financing entity.

4. Signing offering documents as sponsor or otherwise on behalf of the financing entity.

5. Exercising the powers and performing the duties of the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*

6. Issuing non-equity securities in Ontario Power Generation Inc. or on if its subsidiaries, for the purpose of raising funds to acquire debt or equity interests in a financing entity whose activities are limited to the incurrence of funding obligations pursuant to the *Ontario Fair Hydro Plan Act, 2017*.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create one or more subsidiaries, trusts or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 70 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1)]

[NTD: Is the plan to also amend the compliance/enforcement provisions of the OEB Act to bring breaches of this Act within the purview of the Board's enforcements powers?]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

SCHEDULE 1
ESTIMATED FINANCE AMOUNT

[NTD: This section should be moved to the regulations. The calculations below will require careful review once the financing structure is finalized, so it is premature to include them in the legislation.]

Estimated finance amount

1. The estimated finance amount for a reference period shall be determined by estimating, prior to the start of a reference period, the sum of the following:

1. The sum of all amounts that are payable during the reference period by or on behalf of the investment asset owners to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

2. The sum of all funding costs for the reference period, determined as follows:

    i. Calculate the aggregate of all interest, scheduled principal and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of investment assets owners during the reference period in respect of all funding obligations, including such amounts as may be prescribed.

    ii. Calculate the sum of the aggregate of all amounts received by or on behalf of investment asset owners during the reference period in respect of all funding obligations and such other amounts as may be prescribed.

    iii. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

3. The sum of all amounts payable during the reference period by or on behalf of investment asset owners to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable during the reference period by or on behalf of investment asset owners that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

1. Calculate the sum of all amounts deposited by or on behalf of investment asset owners during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn by or on behalf of investment asset owners during the reference period from deposits previously made as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

Attachment 5: Compare - Fair Hydro Act - Osler comments.pdf
Attachment 6: Fair Hydro Act (April 23 2017) [Osler comments].docx

---

Please find enclosed Osler's comments on the draft legislation, also blacklined to v. 3. This remains subject to further review and comment by the Dealers.

We have done a preliminary review of the mark-ups from Torys/OPG and Stikeman/IESO, and are largely in agreement with their comments. However, we would note the following in respect of the Torys mark-up (which we have not yet had an opportunity to discuss with Torys):

(1) Torys proposed revision to add a new section (1.4) to new section 53.1 of the Electricity Act is problematic as drafted. If it is necessary to be included, we would like to see it limited to recording the assets and liabilities for accounting purposes and requiring a note on the balance sheet indicating that the assets are held in trust and not available to OPG's creditors; and

(2) we are concerned that the deemed trust language they added in 11xx(4) and 12xx(4) would not be enforceable on insolvency and that we would strongly prefer that true trusts be established.

Subject: RE: Ontario Fair Hydro Plan

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes' summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Compare - Fair Hydro Act - Osler comments.pdf

~~**Version 3**~~
April 23, 2017 Osler Mark-up of Ver. 3

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

[Notes re this draft:
- all numbering of provisions may need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)
- need to check consistency of various phrases (e.g. *during/for/in respect of* reference period; *owner of RA/IA vs. RA/IA owner; etc.)*]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1]

The Government of Ontario has established a regulatory framework related to the generation and sale of electricity, which has promoted and continues to promote significant investment to enable phasing out of coal fired generation, modernizing sites and facilities in the Province for the generation of electrical energy and the production therefrom,[2] and conservation and demand management.

The Government of Ontario is committed to ensuring that the costs of these investments, and the raising of money to fund the investments,[3] are allocated fairly among present and future generations of consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

[1] Note: please see the preamble of the *Green Energy Act, 2009*.
[2] Note: please see clause 92A (4) (b) of the Constitution, 1867: "des emplacements et des installations de la province destinés à la production d'énergie électrique, ainsi que de cette production meme".
[3] Note: please see opening flush of s. 92A (4) of the Constitution Act, 1867

CONTENTS

PART I
GENERAL

1. Interpretation
2. Effect of invalidity, etc.
3. Purpose
4. Crown bound
5. Protection and assurances

PART II
FAIR ADJUSTMENT

6. Fair adjustment, May 1, 2017 to April 30, 2018
7. Fair adjustment, May 1, 2018 to April 30, 2022

PART III
CLEAN ENERGY ADJUSTMENT

8. Specified consumers to pay clean energy adjustment
9. Irrevocability of clean energy adjustment
10. Determination of clean energy adjustment
11. IESO to issue remittance notice to electricity vendors
12. Electricity vendor to invoice specified consumers

PART IV
IMPLEMENTATION
FINANCIAL SERVICES MANAGER

13. Appointment
14. Duties and powers

FAIR ALLOCATION AMOUNT

15. Financial Services Manager to calculate fair allocation amount

FINANCING PLAN

16. Financial Services Manager to prepare Financing Plan
17. Implementation of Financing Plan

PART V
THE REGULATORY ASSET

18. Interpretation, portion of regulatory asset
19. Variance account
20. IESO funding shortfall
21. Regulatory asset established
22. Transfer of regulatory asset
23. Validity of transfer

PART VI
THE INVESTMENT ASSET

24. Interpretation, investment asset
25. Investment asset established
26. Transfer of investment interest
27. Validity of transfer
28. Investment asset owner may grant security interest

PART VI
MISCELLANEOUS

29. Appointment of agent, invoicing or collection
30. Not Crown agent
31. Sequestration
32. Choice of law
33. Conflict
34. No further approvals, etc.
35. Immunity
36. References in marketing materials and offering documents
37. Non-application, Financial Administration Act, s. 28
38. Regulations

PART VII
AMENDMENTS TO OTHER ACTS
ELECTRICITY ACT, 1998
AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

PART VII
COMMENCEMENT AND SHORT TITLE

103. Commencement
104. Short title
Schedule 1 Estimated finance amount

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")
[Note - will need to check throughout the draft that references to CEA are clear as to whether it's the total CEA in respect of a reference period vs. the portion payable by a specified consumer.][NTD: Agreed. Consider splitting this into a defined term for the rate/charge and a defined term for the global amount.]

"clean energy benefits" means, in respect of a reference period, the value of the benefits determined to be derived by the specified consumers during the reference period as a result of the clean energy initiative[**, including as a result of past, present and expected future incurrences of clean energy costs**][**[NTD: What does this mean?]**]; ("French")

"clean energy costs" means, in respect of a reference period, the ~~value~~amount of the costs allocated to specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated costs to be incurred by the IESO under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management, including storage,

(iii) energy efficiency,

(iv) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(v) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"cumulative IESO funding shortfall" means, at any point in time, the sum of all prior IESO funding shortfalls minus any consideration received by the IESO from the sale of regulatory assets;

"electricity vendor"[4] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"estimated finance amount" means the amount calculated pursuant to the regulations;

"fair adjustment" means the determination of the rate payable for electricity in accordance with Part II; ("French")

"fair allocation" means ●;

"fair allocation amount" means the amount calculated pursuant to section 15xx;

"Financial Services Manager" means Ontario Power Generation Inc. [or such other person or entity as may be appointed as the Financial Services Manager by the Minister under section **]; ("French") **[NTD: Consider a bifurcation of the FSM duties into (i) preparation and update of the Financing Plan and (ii) administration of the investment asset. See s. 14xx.]**

"Financing Plan" means the plan prepared under section X, as amended from time to time in accordance with this Act; ("French")

[4] Note - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

"financing entity" means ●;

"funding obligation" means a payment obligation incurred by or on behalf of ~~the regulatory asset owner or~~ an investment asset owner under section x; ("French"). **[NTD: This revision is required because the fair allocation amount (per s. 15xx) cannot include IESO's "funding obligations".]**

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means, in respect of a ~~reference period~~calendar month, the amount determined under section 20xx for the ~~reference period~~calendar month; ("French")

"investment asset" means the investment asset created as described in section 22xx; ("French")

"investment asset owner" means a financing entity that acquires an investment interest in the investment asset; ("French") **[NTD: Should this reference any person to whom the investment interest is transferred to pursuant to section 26xx or reference a secured party who acquires an investment asset as a result of enforcement? See note to 22xx(3).]**

"investment interest" means an ownership interest in the investment asset, which entitles an investment asset owner to the rights and benefits specified in the agreement under which the ownership interest is transferred;

"invoice amount" means the amount, determined in accordance with subsections (2.1) and (2.2) and the regulations, that is payable by a specified consumer for the provision of electricity in Ontario during a period of time specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a) or such shorter period as may be ~~set out in the Fair Allocation Plan~~prescribed, in any event ending no later than April 30, 2047; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of an investment asset owner by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right established under section X to recover the IESO funding shortfall; ("French")

"regulatory asset owner" means ●;

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French") **[NTD: Move to regs.]**

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity**[, receives an invoice in respect of the account][NTD: Why is this limitation required?]** and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French") **[NTD: Move to regs.]**

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French") **[NTD: Move to regs.]**

"transfer" means an assignment, conveyance, disposition or sale; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria: **[NTD: Move to regs.]**

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

   i. a dwelling,

   ii. a property within the meaning of the *Condominium Act, 1998*,

   iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

   iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to subsection (2.2) and the regulations, the invoice amount for a specified consumer includes the following amounts: **[NTD: Move to regs.]**

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following:

   i. The commodity price of the electricity used during the invoice period.

   ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

   iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

iv. The amount of any harmonized sales tax payable [by the consumer?] under Part IX of the *Excise Tax Act* (Canada);

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO, such amounts as may be prescribed. ("French")

Same, exclusions

(2.2) Except as otherwise prescribed by the regulations, the invoice amount does not include any of the following amounts: **[NTD: Move to regs.]**

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity. **[NTD: What about service charges for the delivery of electricity, etc.? Also, why is this worded slightly differently than in OREC?]**

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge". **[NTD: What is intended here?]**

   iii. A rate rider. **[NTD: What is intended here? LDCs have lots of rate riders on their tariff sheets, most of which are legitimate costs tied to the supply of electricity.]**

5. Any other prescribed amounts.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer, **[NTD: Move to regs. This only works if all "specified consumers" fall into the residential rate class; otherwise, non-residential consumers will get residential rates.]**

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the *Ontario Energy Board Act, 1998*;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Transfer

(4) For greater certainty, a transfer of the regulatory asset or a portion of the regulatory asset includes any act of the IESO by which the IESO purports to dispose of its interest in the regulatory asset with the result of a ~~named~~specified person becoming the owner of an investment interest. **[NTD: Consider moving to s. 22xx]**

Effect of invalidity, etc.[5]

2xx. (1) For greater certainty, all of the ~~p~~provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect or invalidate a funding obligation, or any rights or obligations associated with such funding obligations, that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

3xx. (1) The purposes of this Act are,[6]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers over time ~~and that the process by which the Province raises money to fund the costs reflects the fair allocation~~; and

(b) to recognize that clean energy benefits that have accrued and that will accrue over time will continue to benefit present and future electricity consumers in the Province.

[5] Note: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[6] Note: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment ~~over other debts; or~~in relation to other charges or amounts used by specified consumers in connection with the supply of electricity;

(c) adversely affect any rights of the IESO or other party to transfer the regulatory asset or the consequences of any such transfer; or

(d) adversely affect the regulatory asset, an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements ~~for compensation~~

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of or in relation to this Act, including agreements regarding financial commitments, financial arrangements, guarantees, indemnities or similar transactions, including entering into agreements guaranteeing that if the IESO fails to carry out its obligations under this Act for any reason, including because the IESO is dissolved or restructured or because it comes insolvent, the Government of Ontario shall carry out those obligations or ensure they are carried out by another appropriate entity.

PART II
FAIR ADJUSTMENT

Fair adjustment, May 1, 2017 to April 30, 2018 [NTD: Minister's release post-OEB RPP announcement suggests a start date later than May 1.]

Definition

6xx. (1) In this section,

"average baseline invoice amount" means the average monthly electricity invoice amount that would be payable by a representative consumer under the average baseline rate; ("French")

"average baseline rate" means the average commodity rate that would be payable effective May 1, 2017 by the class of consumers prescribed by the regulations under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act, as determined by the Board by applying the method prescribed by the regulations under clause 79.16 (1) (b) of that Act; ("French") **[NTD: Consider the application of this clause in light of the April 20 rate cut announced by the OEB.]**

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

Rate determination

(2) Subject to subsection (3), [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] the commodity rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 is the average rate that would be payable by a representative consumer in order for the representative consumer to receive a monthly electricity invoice amount that is ~~25~~**[25][NTD: Consider implications of the April 20 rate cut announced by the OEB.]** per cent less than the average baseline invoice amount.

Sub-meter customers

(3) A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the commodity rate payable by each sub-meter customer is the commodity rate determined under subsection (2).

Determining commodity rate

(4) The commodity rate mentioned in subsection (2) shall be,

(a) determined by the Board within seven business days after this section receives Royal Assent; and

(b) effective as of the first day of the calendar month immediately following the determination.

[NTD: Consider whether it is necessary to override any Section 78 order, retailer agreement, or s. 79.16 of the Act (since it remains) in the same way language of s. 79.16 (beginning) does.]

Transition

(5) If, for technical or operational reasons, an electricity vendor, specified consumer or unit sub-meter provider is unable to adapt its invoices to comply with this section by the time it issues its first invoice for electricity consumed on or after May 1, 2017,

(a) the electricity vendor, specified consumer or unit sub-meter provider shall adapt its invoices as soon as possible and, in any event, no later than [August 1, 2017]; and

(b) the electricity vendor, specified consumer or unit sub-meter provider shall ensure that any specified consumer or sub-meter customer invoiced at a commodity rate higher than the applicable commodity rate receives the difference between the commodity rate shown on their invoice and the applicable commodity rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations. **[NTD: (1) See comment above regarding May 1 start date, and (2) LDCs have to change commodity rate now every six months. What would prompt the need for this?]**

Fair adjustment, May 1, 2018 to April 30, 2022

7xx. The Lieutenant Governor in Council may, [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] make regulations prescribing the commodity rate for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022. **[NTD: What about including interest on funding obligations in the Fair Adjustment in this period, or in the prescribed commodity rate? (See Section 16xx(4)(b) which seems to permit some funding obligations in the charging of CEAs during the first 5 years as long as the funding obligations are under the total fair allocation).]**

PART III
CLEAN ENERGY ADJUSTMENT

[NTD: Consider inserting the provisions re how it's calculated here.]

Specified consumers to pay clean energy adjustment

8xx. (1) Upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor, as agent of the investment asset owners, in accordance with such terms of payment as may

be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment is inconsistent with the fair allocation calculation applicable at the time when the payment is due; and

(b) whether the clean energy adjustment relates to funding obligations that were incurred in a manner that was inconsistent with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to each investment asset owner in respect of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise.

Irrevocability of clean energy adjustment

9xx. (1) The amount of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

~~(2) Subsection (1) does not apply to the extent that there is a calculation error~~**[NTD: The LDCs should not calculate the clean energy adjustment. The mechanics should, like the fair adjustment, be a non-discretionary calculation done by the ~~electricity vendor.~~OEB.]**

Determination of clean energy adjustment

10xx. (1) The clean energy adjustment payable by all specified consumers in respect of a reference period shall be determined as follows:

1. Calculate the estimated finance amount for the reference period in accordance with Schedule 1 and such additional rules as may be prescribed.

2. Add the true up amount for the reference period, as determined in accordance with the prescribed method, to the estimated finance amount calculated under paragraph 1.

[Note: Here the clean energy adjustment is a large amount, not a rate.]

True up amount

(2) For the purposes of paragraph 2 of subsection (1), the Lieutenant Governor in Council may make regulations prescribing the method for determining the true up amount, having regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the ~~estimated~~actual finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between amounts billed and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

    ii. variations in billings due to variations in electricity consumption.

IESO to issue remittance notice to electricity vendors

11xx. (1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion to be collected from specified consumers in accordance with section 12xx(2), as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period. **[NTD: Is the remittance notice in addition to, or separate from, the IESO's settlement processes?]**

IESO to collect

(2) The IESO shall, as an agent of the investment asset owners, collect the clean energy adjustment from electricity vendors ~~[~~in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, ~~1998]~~1998*, or as may be prescribed.

Collection account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of collecting those a~~cc~~mounts:

1. Amounts described in subsection 12 (~~4~~5).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8 (1).

3. Payments collected by the IESO pursuant to subsection 11 (2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3), and all proceeds of any such amounts shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (6), be received and held by the IESO in trust for the benefit of the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act~~.~~, and for greater certainty any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust. **[NTD: This Act or the PPSA? To confirm.]**

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment asset owners in accordance with the regulations.

Collection of outstanding amounts, regulatory asset

(6) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the applicable fair allocation calculation made by the Financial Services Manager under Part IV, the IESO may collect the difference from specified consumers to reduce any outstanding IESO funding shortfall.

Electricity vendor to invoice specified consumers

12xx. (1) The electricity vendor shall issue an invoice to each specified consumer ~~for the consumer's amount~~ of the clean energy adjustment in accordance with the regulations. **[NTD: The clean energy adjustment should be a charge.]**

Electricity vendor to collect

(2) Each electricity vendor shall, as an agent of the IESO and the investment asset owners, collect the clean energy adjustment from specified consumers ~~[in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998*]~~.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges for the same invoice period.

Held in trust

(4) All of the following amounts received by an electricity vendor and all proceeds of any such amounts shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be received and held by each electricity vendor in trust for the benefit of the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act~~:~~, and for greater certainty any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust **[NTD: Or the PPSA?]**:

1. Payments received from or on behalf of specified consumers under subsection 8 (1).

2. Portions of payments received from or on behalf of specified consumers under subsection 8 (1) that are allocated to the clean energy adjustment under subsection (3).

3. Payments received from or on behalf of specified consumers under subsection 12xx(2).

4. Portions of payments received from or on behalf of specified consumers under subsection 12xx(3).

5. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Remittance to IESO

(5) Each electricity vendor other than the IESO shall remit amounts described in subsection (5) to the IESO for the benefit of the investment asset owners or secured parties in accordance with the regulations.

Regulations

(6) If an electricity vendor fails, in the manner described in the regulations, to comply with the requirements of this section, the ~~electricity vendor~~IESO shall take such steps as the regulations may prescribe. **[NTD: Is this the intent? Otherwise this clause as drafted makes no sense.]**

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) [Note: To be elaborated.]

Termination

(2) The Minister may by written order terminate the appointment of an appointee as the Financial Services Manager if,

(a) the Minister has advised the appointee that the Financing Plan is either inconsistent with or is being implemented in a manner that is inconsistent with the principles set out in section x;

(b) the appointee has been afforded a reasonable opportunity to consider and address the inconsistency; and

(c) the appointee is unwilling or unable to address the inconsistency to the satisfaction of the Minister.

Replacement

(3) Upon terminating an appointment, the Minister may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may **[NTD: See also s. 17xx]** administer the investment asset on behalf of the investment asset owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section XX.

2. Providing information to electricity vendors, including the IESO, in respect of obligations under Part III.

3. Such other matters as may be prescribed.

For clarity, a person other than the Financial Services Manager may administer the investment asset on behalf of the investment asset owners.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate the fair allocation amount for the purposes of,

(a) fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of each reference period; and

(b) aligning funding obligations that may be incurred during each reference period with the allocation of the estimated clean energy costs and estimated clean energy benefits across present and future generations of specified consumers.

Amount

(1.1) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which the estimated [clean energy costs] [clean energy benefits] to be allocated to specified consumers in respect of the reference period exceeds the estimated amount of [the global adjustment] that would be borne by the specified consumers in respect of clean energy costs [in the absence of this Act]. **[NTD: We do not understand what this clause is intended to do. In addition, there should not be references to global adjustment as the allocation also includes energy costs (e.g. if global adjustment goes negative).]**

2. An allocable portion of the value of any fair adjustment, determined in accordance with subsection (3).

Principles

(2) In calculating the fair allocation amount [or in developing the fair allocation calculation?], subject to subsection (3), the Financial Services Manager shall have regard to the following principles:

1. Clean energy costs allocated to the specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits attributed to the specified consumers in respect of a reference period should be determined based on *[Insert principles]*.

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers for each reference period.

    iii. The expected electricity consumption rates for each reference period.

Allocation of fair adjustment

(3) If, before the Financial Services Manager has calculated the fair allocation amount in respect of a reference period, a fair adjustment has been made under Part II in respect of the reference period, the calculation shall include a portion of the value of the fair adjustment in the fair allocation calculation for each future reference period. **[NTD: Unclear.]**

Amendments to the fair allocation calculation

(4) The Financial Services Manager may amend the fair allocation calculation from time to time, as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Submission of fair allocation to Minister

(5) The Financial Services Manager shall provide to the Minister the fair allocation calculation and any amendments to the fair allocation calculation.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare and provide to the Minister a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred or potential transfers should be made for the purposes of this Act.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align the ~~expected~~estimated finance amount determined under Schedule 1 that would become due and payable during a reference period with the fair allocation amount determined for the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment for the reference period. **[NTD: This is already built into the calculation of the fair allocation amount in s. 15xx(1.1)(2).]**

2. Incurrences and transfers should be implemented in a manner that, as the Financial Services Manager considers to be reasonable, is cost effective and reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

[Note for reference: List of items for consideration in regulation: (a) anticipated IESO funding shortfalls and related transfer amounts; (b) the maturities of funding obligations; (c) the availability of refinancings, redemption opportunities and liquidity terms and conditions in order to achieve the objective contemplated in section X(1)(a); (d) the availability of currency and interest rate hedging facilities for the purpose of mitigating any differences between the ~~expected~~estimated finance amounts becoming due and payable during a reference period and the fair allocation amount for the reference period; (d) the amount and potential variability of interest rates and related financing costs; (e) available capital markets in which funding obligations may be incurred.]

Amendments to approved plan

(3) The Financial Services Manager may amend the Financing Plan at any time, without the approval of the Minister, subject to the requirements set out in this section.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would ~~become payable during the reference period and~~ result in a clean energy adjustment for the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount for the reference period and the amount of the fair adjustment for the reference period]. **[NTD: This is unclear.]**

Confidentiality of plan

(~~4~~5) The Financing Plan is deemed to be a record subject to section 17 of the *Freedom of Information and Protection of Privacy Act.*

Implementation of Financing Plan

17xx. (1) ~~The Financial Services Manager shall incur funding~~Funding obligations shall be incurred and ~~make~~ transfers shall be made in material conformity with the applicable Financing Plan. **[NTD: Revised to accommodate the comment on the definition of FSM about bifurcating the role.]**

Same

(2) For greater certainty, section ~~[paramountcy of funding obligations]~~17xx(5) applies despite the failure of the Financial Services Manager to comply with subsection (~~1~~4).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations and make transfers.

Prohibition

(~~3~~4) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

~~Effect of amendment to Fair Allocation Plan~~Financing Plan compliance

(~~4~~5) No funding obligation incurred and no transfer made by the Financial Services Manager shall be affected by any inconsistency with the Financing Plan, including any inconsistency with the principles set out in section X.

PART V
THE REGULATORY ASSET

Interpretation, portion of regulatory asset

18xx. If a transfer under this Part provides for the transfer of a portion of the regulatory asset, any references in this Part to the regulatory asset are deemed to be references to the portion of the regulatory asset transferred.

[Note: This is meant to assist with clarity in the subsequent provisions.]

Variance account

19xx. (1) The Board shall issue an accounting order ~~to authorize~~authorizing the IESO to~~ do the following~~:

1. ~~Create~~Establish a variance account for the purposes of this Act.

2. Record the IESO funding shortfall in the variance account from time to time.

3. Recover the IESO funding shortfall in accordance with section X and the regulations. **[NTD: Accounting orders don't allow for recovery. They are normally cleared via a rate order (after application).]**

No hearing

(2) The order of the Board shall be made in writing and without holding a hearing.

No appeals, etc.

(3) No appeal lies from the order of the Board.

IESO funding shortfall

20xx. (1) The IESO shall determine the amount of the IESO funding shortfall for each month in the following manner:

1. Calculate the sum of all invoice amounts that would have been issued to specified consumers for the month if Part II of this Act did not apply.

2. Calculate the sum of all invoice amounts issued to specified consumers for the month.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1, and make any other adjustments as may be prescribed.

Same

(2) To the extent that the IESO funding shortfall for any month is based on an estimate of the electricity to be used by specified consumers, the IESO shall record an adjustment in the variance account in the following month to reflect the difference between the estimate and the electricity actually used by specified consumers. **[NTD: Why would it be based on an estimate?]**

Recording of IESO funding shortfall

(3) IESO shall record the cumulative IESO funding shortfall from time to time, including adjustments resulting from the exercise of the right of recovery under section 21 and any transfer under section 22, in the variance account.

Recording determinative

(4) A recording of the IESO funding shortfall, including any adjustment or transfer, in the variance account is determinative of the amount of cumulative IESO funding shortfall at the time of the recording.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the cumulative IESO funding shortfall.

Same, restrictions

(2) The IESO's right to recover the cumulative IESO funding shortfall under subsection (1) is subject to the following:

1. The IESO shall not be entitled to collect any of the cumulative IESO funding shortfall from specified consumers before May 1, 2022.

2. The process by which the IESO may recover the cumulative IESO funding shortfall shall be established by the Board, having regard to the amount of the cumulative IESO funding shortfall from time to time and the [fair allocation calculation]. **[NTD: See Section 15xx "Fair Allocation Amount".]**

3. Such other restrictions as may be prescribed.

Transfer of regulatory asset

22xx. (1) The IESO may transfer all or a portion of the regulatory asset to any financing entity under the Financing Plan, which transfer creates the investment asset.

Same

(2) Upon receipt of any payment in consideration for the transfer of the regulatory asset,

(a) the IESO shall record the payment as a reduction of the IESO funding shortfall in the variance account; for clarity, the IESO funding shortfall shall not include any investment asset interest; and

(b) ~~unless otherwise provided for in this Act,~~ the IESO shall have no further right, title or interest in, or any obligations in respect of~~, the regulatory asset or in~~ the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity becomes an investment asset owner and acquires an investment interest. **[NTD: This subsection and the definition imply that the investment asset owner will always be a financing entity (which may or may not be created pursuant to subsection 17xx(3)). The financing entity and any trustee will be Ontario entities, so the various provisions related to the perfection of security interests etc. (e.g. in section 28xx) should work; however, if it is contemplated that the investment asset could be transferred ~~to~~ a non-Ontario entity pursuant to section 27xx or as a result of enforcement, further transfers may be subject to another jurisdiction's laws and another jurisdiction's laws related to the granting and perfection of security interests may apply. Conflict of laws rules will then apply.]**

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment asset owner of the regulatory asset, and the investment asset created by the transfer shall be immediately vested in the transferee.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer ~~of IESO's right to recover the IESO funding shortfall~~, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the cumulative IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons or any other persons.

PART VI
THE INVESTMENT ASSET

Interpretation, investment asset

24xx. If a transfer under this Part provides for the transfer of an investment asset, any references in this Part to the investment interest are deemed to be references to the specific investment interest transferred.

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication: **[NTD: See Torys comments from the prior draft.]**

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any ~~amounts that~~and all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

No set off, etc.

(2) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, an agent of the investment asset owner or ~~an owner of distribution system assets in the Province~~licensed distributor;

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); or **[NTD: This provision is likely unenforceable given federal paramountcy in respect of bankruptcy and insolvency law and the claims released thereunder. See, e.g., 407 ETR Concession Co. v. Canada (Superintendent of Bankruptcy)]**

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with section [xx] of the *Personal Property Security Act*.

Collective action required

(4) If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: Successors may need to be addressed here.]

Transfer of investment interest

26xx. An investment asset owner may transfer all or a portion of its rights and interests in an investment interest to any other investment asset owner, including by way

of a transfer of a divided or an undivided interest, in accordance with the Financing Plan. **[NTD: See note to 22xx(3)]**

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the owner of the investment interest acquired a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer. **[NTD: See note to 22xx(3)]**

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment asset owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment asset owner shall have priority over any liens in favour of such other persons.

Investment asset owner may grant security interest

28xx. (1) An investment asset owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person **[to secure a funding obligation]. [NTD: Consider whether this restriction is desirable if an investment asset owner is to be anyone other than a financing entity.]**

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms. **[NTD: See subsection (3) – Why both this Act and the PPSA?]**

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property,

except as otherwise provided for in this section, and any granting of a security interest by the owner of an investment interest to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment asset owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted. **[NTD: There are super-priority liens that could have priority over this security interest under federal insolvency laws; also consider whether subsection (3) and this subsection (5) are inconsistent, since the PPSA provisions incorporated under (3) would include the priority provisions.]**

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in any amounts, revenues or other proceeds ~~that are deposited in~~collected by the IESO in trust, including amounts that are deposited in the account to be created pursuant to subsection 11xx(3), any amounts, revenues or other proceeds collected by electricity vendors in trust pursuant to subsection 12xx(4) and any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person ~~who~~, including where such person may have commingled such amounts, revenues or other proceeds with other funds.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*. **[NTD: This section appears to**

be referring solely to agents appointed under section 29xx. Consider whether the Financial Services Manager, IESO, any financing entity and any others should be expressly listed.]

Sequestration

31xx. (1) A court in the Province may, upon application by an investment asset owner or a secured party, order the sequestration and payment of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment asset owner or secured party by any person or entity authorized to collect the clean energy adjustment, if such person or entity defaults on any required remittance of the clean energy adjustment, collections or remittances or fails, or indicates any intention to cease, to hold any such amounts, collections or remittances or proceeds thereof in trust and in segregated accounts as required by this Act.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Same

(3) An order under subsection (1) shall remain in full force and effect despite any bankruptcy, reorganization or other insolvency proceedings with respect to the person or entity who is subject to the order. **[NTD: The order will be likely be stayed on an insolvency and if the money has been spent rather than commingled, a sequestration order will not result in the recovery of the funds.]**

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest. **[NTD: What about the PPSA?] [NTD: See note to 22xx(3)]**

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan ~~or in relation to the establishment of the Fair Allocation Plan~~.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

~~**References in marketing materials and offering documents**~~

~~**36xx.** No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under this section unless the prescribed requirements, if any, are satisfied.~~

[NTD: Need to be able to disclose this without restriction to market the debt.]

Non-application, Financial Administration Act, s. 28[7]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations,

(a) defining any term used in this Act….

(b) prescribing types of payment obligations that constitute funding obligations;

(~~a~~c) governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment.

(~~b~~d) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

(e) **[in respect of a financing entity.]**

[7] Note - see s. 51 of the Electricity Act, 1998

[Note: reg-making powers to be dealt with in subsequent draft]**[NTD: This should be as broad as possible.]**

PART VII
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

201x. Section 53.1 of the Act would be amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under that Act and engaging in activities to

facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including the following:

1. Entering into contracts and undertakings on behalf of special purpose financing entities, including pre-formation contracts and undertakings and as principal in relation to matters permitted by the *Ontario Fair Hydro Plan Act, 2017* subject to the right of reimbursement from amounts available to the financing entity.

2. Preparing reports on behalf of the financing entity.

3. Enforcing the rights of the financing entity.

4. Signing offering documents as sponsor or otherwise on behalf of the financing entity.

5. Exercising the powers and performing the duties of the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*

6. Issuing non-equity securities in Ontario Power Generation Inc. or on if its subsidiaries, for the purpose of raising funds to acquire debt or equity interests in a financing entity whose activities are limited to the incurrence of funding obligations pursuant to the *Ontario Fair Hydro Plan Act, 2017.*

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create one or more subsidiaries, trusts or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a

subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 70 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1)]

[NTD: Is the plan to also amend the compliance/enforcement provisions of the OEB Act to bring breaches of this Act within the purview of the Board's enforcements powers?]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

SCHEDULE 1
ESTIMATED FINANCE AMOUNT

[NTD: This section should be moved to the regulations. The calculations below will require careful review once the financing structure is finalized, so it is premature to include them in the legislation.]

Estimated finance amount

1. The estimated finance amount for a reference period shall be determined by estimating, prior to the start of a reference period, the sum of the following:

1. The sum of all amounts that are payable during the reference period by or on behalf of the investment asset owners to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

2. The sum of all funding costs for the reference period, determined as follows:

    i. Calculate the aggregate of all interest, scheduled principal and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of investment assets owners during the reference period in respect of all funding obligations, including such amounts as may be prescribed.

    ii. Calculate the sum of the aggregate of all amounts received by or on behalf of investment asset owners during the reference period in respect of all funding obligations and such other amounts as may be prescribed.

    iii. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

3. The sum of all amounts payable during the reference period by or on behalf of investment asset owners to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable during the reference period by or on behalf of investment asset owners that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

1. Calculate the sum of all amounts deposited by or on behalf of investment asset owners during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn by or on behalf of investment asset owners during the reference period from deposits previously made as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

Fair Hydro Act (April 23 2017) [Osler comments].pdf

April 23, 2017 Osler Mark-up of Ver. 3

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

A proposal to create Legislation.

Ontario's Fair Hydro Plan Act, 2017, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

[Insert explanatory note.]

[Notes re this draft:
- all numbering of provisions may need to be re-done
- will need to check all definitions to ensure (1) that they are needed; and (2) that they work properly wherever the term is used in the Bill.
- additional consequential amendments likely required still
- overall organization of provisions still TBC (for now just trying to get all of the elements drafted and will reconsider architecture later)
- need to check consistency of various phrases (e.g. *during/for/in respect of* reference period; *owner of RA/IA vs. RA/IA owner; etc.)*]

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1]

The Government of Ontario has established a regulatory framework related to the generation and sale of electricity, which has promoted and continues to promote significant investment to enable phasing out of coal fired generation, modernizing sites and facilities in the Province for the generation of electrical energy and the production therefrom,[2] and conservation and demand management.

The Government of Ontario is committed to ensuring that the costs of these investments, and the raising of money to fund the investments,[3] are allocated fairly among present and future generations of consumers.

Therefore, Her Majesty, by and with the advice and consent of the Legislative Assembly of the Province of Ontario, enacts as follows:

[1] Note: please see the preamble of the *Green Energy Act, 2009.*
[2] Note: please see clause 92A (4) (b) of the Constitution, 1867: "des emplacements et des installations de la province destinés à la production d'énergie électrique, ainsi que de cette production meme".

Schedule 1 Estimated finance amount

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")
[Note - will need to check throughout the draft that references to CEA are clear as to whether it's the total CEA in respect of a reference period vs. the portion payable by a specified consumer.][NTD: Agreed. Consider splitting this into a defined term for the rate/charge and a defined term for the global amount.]

"clean energy benefits" means, in respect of a reference period, the value of the benefits determined to be derived by the specified consumers during the reference period as a result of the clean energy initiative**[, including as a result of past, present and expected future incurrences of clean energy costs][NTD: What does this mean?]**; ("French")

"clean energy costs" means, in respect of a reference period, the amount of the costs allocated to specified consumers during the reference period as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated costs to be incurred by the IESO under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management, including storage,

(iii) energy efficiency,

(iv) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(v) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"cumulative IESO funding shortfall" means, at any point in time, the sum of all prior IESO funding shortfalls minus any consideration received by the IESO from the sale of regulatory assets;

"electricity vendor"[4] means the IESO, a licensed distributor, a licensed retailer or such other person as may be prescribed; ("French")

"estimated finance amount" means the amount calculated pursuant to the regulations;

"fair adjustment" means the determination of the rate payable for electricity in accordance with Part II; ("French")

"fair allocation" means ●;

"fair allocation amount" means the amount calculated pursuant to section 15xx;

"Financial Services Manager" means Ontario Power Generation Inc. [or such other person or entity as may be appointed as the Financial Services Manager by the Minister under section **]; ("French") **[NTD: Consider a bifurcation of the FSM duties into (i) preparation and update of the Financing Plan and (ii) administration of the investment asset. See s. 14xx.]**

"Financing Plan" means the plan prepared under section X, as amended from time to time in accordance with this Act; ("French")

[4] Note - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

"financing entity" means ●;

"funding obligation" means a payment obligation incurred by or on behalf of an investment asset owner under section x; ("French") **[NTD: This revision is required because the fair allocation amount (per s. 15xx) cannot include IESO's "funding obligations".]**

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means, in respect of a calendar month, the amount determined under section 20xx for the calendar month; ("French")

"investment asset" means the investment asset created as described in section 22xx; ("French")

"investment asset owner" means a financing entity that acquires an investment interest in the investment asset; ("French") **[NTD: Should this reference any person to whom the investment interest is transferred to pursuant to section 26xx or reference a secured party who acquires an investment asset as a result of enforcement? See note to 22xx(3).]**

"investment interest" means an ownership interest in the investment asset, which entitles an investment asset owner to the rights and benefits specified in the agreement under which the ownership interest is transferred;

"invoice amount" means the amount, determined in accordance with subsections (2.1) and (2.2) and the regulations, that is payable by a specified consumer for the provision of electricity in Ontario during a period of time specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017,

(b) every six-month period following the period mentioned in clause (a) or such shorter period as may be prescribed, in any event ending no later than April 30, 2047; ("French")

"refinancing" means a repayment or repurchase of a funding obligation for cancellation by or on behalf of an investment asset owner by applying the net proceeds obtained by the owner incurring one or more other funding obligations; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right established under section X to recover the IESO funding shortfall; ("French")

"regulatory asset owner" means ●;

"representative consumer" means a consumer who meets the criteria set out in subsection (3); ("French") **[NTD: Move to regs.]**

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity**[, receives an invoice in respect of the account][NTD: Why is this limitation required?]** and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French") **[NTD: Move to regs.]**

"Toronto Hydro" means Toronto Hydro-Electric System Limited; ("French") **[NTD: Move to regs.]**

"transfer" means an assignment, conveyance, disposition or sale; ("French")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria: **[NTD: Move to regs.]**

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to subsection (2.2) and the regulations, the invoice amount for a specified consumer includes the following amounts: **[NTD: Move to regs.]**

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following:

    i. The commodity price of the electricity used during the invoice period.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*.

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

    iv. The amount of any harmonized sales tax payable [by the consumer?] under Part IX of the *Excise Tax Act* (Canada);

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO, such amounts as may be prescribed. ("French")

Same, exclusions

(2.2) Except as otherwise prescribed by the regulations, the invoice amount does not include any of the following amounts: **[NTD: Move to regs.]**

1. The balance of any amounts carried forward from previous invoices.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity. **[NTD: What about service charges for the delivery of electricity, etc.? Also, why is this worded slightly differently than in OREC?]**

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge". **[NTD: What is intended here?]**

   iii. A rate rider. **[NTD: What is intended here? LDCs have lots of rate riders on their tariff sheets, most of which are legitimate costs tied to the supply of electricity.]**

5. Any other prescribed amounts.

Representative consumer

(3) For the purposes of the definition of "representative consumer" in subsection (1), the consumer, **[NTD: Move to regs. This only works if all "specified consumers" fall into the residential rate class; otherwise, non-residential consumers will get residential rates.]**

(a) purchases electricity directly from Toronto Hydro;

(b) has an account with Toronto Hydro that falls within a residential-rate classification as specified in a rate order made by the Board under section 78 of the *Ontario Energy Board Act, 1998*;

(c) is invoiced by Toronto Hydro on a monthly basis;

(d) is not invoiced by Toronto Hydro for electricity on an equal monthly payment plan or an equal billing plan; and

(e) uses, on average, 750 kilowatt hours of electricity each month.

Transfer

(4) For greater certainty, a transfer of the regulatory asset or a portion of the regulatory asset includes any act of the IESO by which the IESO purports to dispose of its interest in the regulatory asset with the result of a specified person becoming the owner of an investment interest. **[NTD: Consider moving to s. 22xx]**

Effect of invalidity, etc.[5]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if some provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect or invalidate a funding obligation, or any rights or obligations associated with such funding obligations, that was incurred under this Act before the day that the provision was held to be invalid or ceased to be in effect.

Purpose

3xx. (1) The purposes of this Act are,[6]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers over time; and

(b) to recognize that clean energy benefits that have accrued and that will accrue over time will continue to benefit present and future electricity consumers in the Province.

[5] Note: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*
[6] Note: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the amount of the clean energy adjustment or lower the priority of the clean energy adjustment in relation to other charges or amounts used by specified consumers in connection with the supply of electricity;

(c) adversely affect any rights of the IESO or other party to transfer the regulatory asset or the consequences of any such transfer; or

(d) adversely affect the regulatory asset, an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of or in relation to this Act, including agreements regarding financial commitments, financial arrangements, guarantees, indemnities or similar transactions, including entering into agreements guaranteeing that if the IESO fails to carry out its obligations under this Act for any reason, including because the IESO is dissolved or restructured or because it comes insolvent, the Government of Ontario shall carry out those obligations or ensure they are carried out by another appropriate entity.

PART II
FAIR ADJUSTMENT

Fair adjustment, May 1, 2017 to April 30, 2018 [NTD: Minister's release post-OEB RPP announcement suggests a start date later than May 1.]

Definition

6xx. (1) In this section,

"average baseline invoice amount" means the average monthly electricity invoice amount that would be payable by a representative consumer under the average baseline rate; ("French")

"average baseline rate" means the average commodity rate that would be payable effective May 1, 2017 by the class of consumers prescribed by the regulations under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act, as determined by the Board by applying the method prescribed by the regulations under clause 79.16 (1) (b) of that Act; ("French") **[NTD: Consider the application of this clause in light of the April 20 rate cut announced by the OEB.]**

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

Rate determination

(2) Subject to subsection (3), [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] the commodity rate for electricity payable by a specified consumer for the period beginning on May 1, 2017 and ending on April 30, 2018 is the average rate that would be payable by a representative consumer in order for the representative consumer to receive a monthly electricity invoice amount that is **[25][NTD: Consider implications of the April 20 rate cut announced by the OEB.]** per cent less than the average baseline invoice amount.

Sub-meter customers

(3) A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the commodity rate payable by each sub-meter customer is the commodity rate determined under subsection (2).

Determining commodity rate

(4) The commodity rate mentioned in subsection (2) shall be,

(a) determined by the Board within seven business days after this section receives Royal Assent; and

(b) effective as of the first day of the calendar month immediately following the determination.

[NTD: Consider whether it is necessary to override any Section 78 order, retailer agreement, or s. 79.16 of the Act (since it remains) in the same way language of s. 79.16 (beginning) does.]

Transition

(5) If, for technical or operational reasons, an electricity vendor, specified consumer or unit sub-meter provider is unable to adapt its invoices to comply with this section by the time it issues its first invoice for electricity consumed on or after May 1, 2017,

(a) the electricity vendor, specified consumer or unit sub-meter provider shall adapt its invoices as soon as possible and, in any event, no later than [August 1, 2017]; and

(b) the electricity vendor, specified consumer or unit sub-meter provider shall ensure that any specified consumer or sub-meter customer invoiced at a commodity rate higher than the applicable commodity rate receives the difference between the commodity rate shown on their invoice and the applicable commodity rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations. **[NTD: (1) See comment above regarding May 1 start date, and (2) LDCs have to change commodity rate now every six months. What would prompt the need for this?]**

Fair adjustment, May 1, 2018 to April 30, 2022

7xx. The Lieutenant Governor in Council may, [to more fairly measure and allocate the clean energy costs and clean energy benefits among present and future generations of specified consumers,] make regulations prescribing the commodity rate for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022. **[NTD: What about including interest on funding obligations in the Fair Adjustment in this period, or in the prescribed commodity rate? (See Section 16xx(4)(b) which seems to permit some funding obligations in the charging of CEAs during the first 5 years as long as the funding obligations are under the total fair allocation).]**

PART III
CLEAN ENERGY ADJUSTMENT

[NTD: Consider inserting the provisions re how it's calculated here.]

Specified consumers to pay clean energy adjustment

8xx. (1) Upon receipt of an invoice that includes a clean energy adjustment, a specified consumer shall pay the clean energy adjustment to the electricity vendor, as agent of the investment asset owners, in accordance with such terms of payment as may

be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment is inconsistent with the fair allocation calculation applicable at the time when the payment is due; and

(b) whether the clean energy adjustment relates to funding obligations that were incurred in a manner that was inconsistent with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid clean energy adjustment that is required to be paid by a specified consumer under this section constitutes indebtedness of the consumer to each investment asset owner in respect of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer under the invoice or otherwise.

Irrevocability of clean energy adjustment

9xx. (1) The amount of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness created by the adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

[NTD: The LDCs should not calculate the clean energy adjustment. The mechanics should, like the fair adjustment, be a non-discretionary calculation done by the OEB.]

Determination of clean energy adjustment

10xx. (1) The clean energy adjustment payable by all specified consumers in respect of a reference period shall be determined as follows:

1. Calculate the estimated finance amount for the reference period in accordance with Schedule 1 and such additional rules as may be prescribed.

2. Add the true up amount for the reference period, as determined in accordance with the prescribed method, to the estimated finance amount calculated under paragraph 1.

[Note: Here the clean energy adjustment is a large amount, not a rate.]

True up amount

(2) For the purposes of paragraph 2 of subsection (1), the Lieutenant Governor in Council may make regulations prescribing the method for determining the true up amount, having regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the actual finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between amounts billed and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

    ii. variations in billings due to variations in electricity consumption.

IESO to issue remittance notice to electricity vendors

11xx. (1) The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor's portion to be collected from specified consumers in accordance with section 12xx(2), as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period. **[NTD: Is the remittance notice in addition to, or separate from, the IESO's settlement processes?]**

IESO to collect

(2) The IESO shall, as an agent of the investment asset owners, collect the clean energy adjustment from electricity vendors in accordance with the monthly settlement process set out in the market rules made under section 32 of the *Electricity Act, 1998*, or as may be prescribed.

Collection account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of collecting those amounts:

1. Amounts described in subsection 12 (5).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8 (1).

3. Payments collected by the IESO pursuant to subsection 11 (2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3), and all proceeds of any such amounts shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (6), be received and held by the IESO in trust for the benefit of the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act, and for greater certainty any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust. **[NTD: This Act or the PPSA? To confirm.]**

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment asset owners in accordance with the regulations.

Collection of outstanding amounts, regulatory asset

(6) If the total clean energy adjustment payable by specified consumers in respect of a reference period is less than the amount contemplated to be payable under the applicable fair allocation calculation made by the Financial Services Manager under Part IV, the IESO may collect the difference from specified consumers to reduce any outstanding IESO funding shortfall.

Electricity vendor to invoice specified consumers

12xx. (1) The electricity vendor shall issue an invoice to each specified consumer of the clean energy adjustment in accordance with the regulations. **[NTD: The clean energy adjustment should be a charge.]**

Electricity vendor to collect

(2) Each electricity vendor shall, as an agent of the IESO and the investment asset owners, collect the clean energy adjustment from specified consumers.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on

a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges for the same invoice period.

Held in trust

(4) All of the following amounts received by an electricity vendor and all proceeds of any such amounts shall, until paid to or for the benefit of the investment asset owner in accordance with subsection (5), be received and held by each electricity vendor in trust for the benefit of the investment asset owners or a secured party to whom a security interest in an investment interest is granted under this Act, and for greater certainty any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust **[NTD: Or the PPSA?]**:

1. Payments received from or on behalf of specified consumers under subsection 8 (1).

2. Portions of payments received from or on behalf of specified consumers under subsection 8 (1) that are allocated to the clean energy adjustment under subsection (3).

3. Payments received from or on behalf of specified consumers under subsection 12xx(2).

4. Portions of payments received from or on behalf of specified consumers under subsection 12xx(3).

5. Any proceeds arising from the exercise and enforcement of any rights and interests under or in respect of the investment asset.

Remittance to IESO

(5) Each electricity vendor other than the IESO shall remit amounts described in subsection (5) to the IESO for the benefit of the investment asset owners or secured parties in accordance with the regulations.

Regulations

(6) If an electricity vendor fails, in the manner described in the regulations, to comply with the requirements of this section, the IESO shall take such steps as the regulations may prescribe. **[NTD: Is this the intent? Otherwise this clause as drafted makes no sense.]**

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) [Note: To be elaborated.]

Termination

(2) The Minister may by written order terminate the appointment of an appointee as the Financial Services Manager if,

(a) the Minister has advised the appointee that the Financing Plan is either inconsistent with or is being implemented in a manner that is inconsistent with the principles set out in section x;

(b) the appointee has been afforded a reasonable opportunity to consider and address the inconsistency; and

(c) the appointee is unwilling or unable to address the inconsistency to the satisfaction of the Minister.

Replacement

(3) Upon terminating an appointment, the Minister may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may **[NTD: See also s. 17xx]** administer the investment asset on behalf of the investment asset owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section XX.

2. Providing information to electricity vendors, including the IESO, in respect of obligations under Part III.

3. Such other matters as may be prescribed.

For clarity, a person other than the Financial Services Manager may administer the investment asset on behalf of the investment asset owners.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate the fair allocation amount for the purposes of,

(a) fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of each reference period; and

(b) aligning funding obligations that may be incurred during each reference period with the allocation of the estimated clean energy costs and estimated clean energy benefits across present and future generations of specified consumers.

Amount

(1.1) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which the estimated [clean energy costs] [clean energy benefits] to be allocated to specified consumers in respect of the reference period exceeds the estimated amount of [the global adjustment] that would be borne by the specified consumers in respect of clean energy costs [in the absence of this Act]. **[NTD: We do not understand what this clause is intended to do. In addition, there should not be references to global adjustment as the allocation also includes energy costs (e.g. if global adjustment goes negative).]**

2. An allocable portion of the value of any fair adjustment, determined in accordance with subsection (3).

Principles

(2) In calculating the fair allocation amount [or in developing the fair allocation calculation?], subject to subsection (3), the Financial Services Manager shall have regard to the following principles:

1. Clean energy costs allocated to the specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits attributed to the specified consumers in respect of a reference period should be determined based on *[Insert principles]*.

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers for each reference period.

    iii. The expected electricity consumption rates for each reference period.

Allocation of fair adjustment

(3) If, before the Financial Services Manager has calculated the fair allocation amount in respect of a reference period, a fair adjustment has been made under Part II in respect of the reference period, the calculation shall include a portion of the value of the fair adjustment in the fair allocation calculation for each future reference period. **[NTD: Unclear.]**

Amendments to the fair allocation calculation

(4) The Financial Services Manager may amend the fair allocation calculation from time to time, as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Submission of fair allocation to Minister

(5) The Financial Services Manager shall provide to the Minister the fair allocation calculation and any amendments to the fair allocation calculation.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare and provide to the Minister a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred or potential transfers should be made for the purposes of this Act.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align the estimated finance amount determined under Schedule 1 that would become due and payable during a reference period with the fair allocation amount determined for the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment for the reference period. **[NTD: This is already built into the calculation of the fair allocation amount in s. 15xx(1.1)(2).]**

2. Incurrences and transfers should be implemented in a manner that, as the Financial Services Manager considers to be reasonable, is cost effective and reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

[Note for reference: List of items for consideration in regulation: (a) anticipated IESO funding shortfalls and related transfer amounts; (b) the maturities of funding obligations; (c) the availability of refinancings, redemption opportunities and liquidity terms and conditions in order to achieve the objective contemplated in section X(1)(a); (d) the availability of currency and interest rate hedging facilities for the purpose of mitigating any differences between the estimated finance amounts becoming due and payable during a reference period and the fair allocation amount for the reference period; (d) the amount and potential variability of interest rates and related financing costs; (e) available capital markets in which funding obligations may be incurred.]

Amendments to approved plan

(3) The Financial Services Manager may amend the Financing Plan at any time, without the approval of the Minister, subject to the requirements set out in this section.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would result in a clean energy adjustment for the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair allocation amount for the reference period and the amount of the fair adjustment for the reference period]. **[NTD: This is unclear.]**

Confidentiality of plan

(5) The Financing Plan is deemed to be a record subject to section 17 of the *Freedom of Information and Protection of Privacy Act.*

Implementation of Financing Plan

17xx. (1) Funding obligations shall be incurred and transfers shall be made in material conformity with the applicable Financing Plan. **[NTD: Revised to accommodate the comment on the definition of FSM about bifurcating the role.]**

Same

(2) For greater certainty, section 17xx(5) applies despite the failure of the Financial Services Manager to comply with subsection (4).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations and make transfers.

Prohibition

(4) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Financing Plan compliance

(5) No funding obligation incurred and no transfer made by the Financial Services Manager shall be affected by any inconsistency with the Financing Plan, including any inconsistency with the principles set out in section X.

PART V
THE REGULATORY ASSET

Interpretation, portion of regulatory asset

18xx. If a transfer under this Part provides for the transfer of a portion of the regulatory asset, any references in this Part to the regulatory asset are deemed to be references to the portion of the regulatory asset transferred.

[Note: This is meant to assist with clarity in the subsequent provisions.]

Variance account

19xx. (1) The Board shall issue an accounting order authorizing the IESO to:

1. Establish a variance account for the purposes of this Act.

2. Record the IESO funding shortfall in the variance account from time to time.

3. Recover the IESO funding shortfall in accordance with section X and the regulations. **[NTD: Accounting orders don't allow for recovery. They are normally cleared via a rate order (after application).]**

No hearing

(2) The order of the Board shall be made in writing and without holding a hearing.

No appeals, etc.

(3) No appeal lies from the order of the Board.

IESO funding shortfall

20xx. (1) The IESO shall determine the amount of the IESO funding shortfall for each month in the following manner:

1. Calculate the sum of all invoice amounts that would have been issued to specified consumers for the month if Part II of this Act did not apply.

2. Calculate the sum of all invoice amounts issued to specified consumers for the month.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1, and make any other adjustments as may be prescribed.

Same

(2) To the extent that the IESO funding shortfall for any month is based on an estimate of the electricity to be used by specified consumers, the IESO shall record an adjustment in the variance account in the following month to reflect the difference between the estimate and the electricity actually used by specified consumers. **[NTD: Why would it be based on an estimate?]**

Recording of IESO funding shortfall

(3) IESO shall record the cumulative IESO funding shortfall from time to time, including adjustments resulting from the exercise of the right of recovery under section 21 and any transfer under section 22, in the variance account.

Recording determinative

(4) A recording of the IESO funding shortfall, including any adjustment or transfer, in the variance account is determinative of the amount of cumulative IESO funding shortfall at the time of the recording.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the cumulative IESO funding shortfall.

Same, restrictions

(2) The IESO's right to recover the cumulative IESO funding shortfall under subsection (1) is subject to the following:

1. The IESO shall not be entitled to collect any of the cumulative IESO funding shortfall from specified consumers before May 1, 2022.

2. The process by which the IESO may recover the cumulative IESO funding shortfall shall be established by the Board, having regard to the amount of the cumulative IESO funding shortfall from time to time and the [fair allocation calculation].**[NTD: See Section 15xx "Fair Allocation Amount".]**

3. Such other restrictions as may be prescribed.

Transfer of regulatory asset

22xx. (1) The IESO may transfer all or a portion of the regulatory asset to any financing entity under the Financing Plan, which transfer creates the investment asset.

Same

(2) Upon receipt of any payment in consideration for the transfer of the regulatory asset,

(a) the IESO shall record the payment as a reduction of the IESO funding shortfall in the variance account; for clarity, the IESO funding shortfall shall not include any investment asset interest; and

(b) the IESO shall have no further right, title or interest in, or any obligations in respect of the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity becomes an investment asset owner and acquires an investment interest. **[NTD: This subsection and the definition imply that the investment asset owner will always be a financing entity (which may or may not be created pursuant to subsection 17xx(3)). The financing entity and any trustee will be Ontario entities, so the various provisions related to the perfection of security interests etc. (e.g. in section 28xx) should work; however, if it is contemplated that the investment asset could be transferred to a non-Ontario entity pursuant to section 27xx or as a result of enforcement, further transfers may be subject to another jurisdiction's laws and another jurisdiction's laws related to the granting and perfection of security interests may apply. Conflict of laws rules will then apply.]**

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment asset owner of the regulatory asset, and the investment asset created by the transfer shall be immediately vested in the transferee.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the cumulative IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons or any other persons.

PART VI
THE INVESTMENT ASSET

Interpretation, investment asset

24xx. If a transfer under this Part provides for the transfer of an investment asset, any references in this Part to the investment interest are deemed to be references to the specific investment interest transferred.

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests without duplication: **[NTD: See Torys comments from the prior draft.]**

1. The right to impose, bill, invoice, collect and receive the clean energy adjustment from specified consumers, including the right to determine the amount of the clean energy adjustment in accordance with this Act.

2. The right to receive and collect all amounts in respect of the clean energy adjustment that are imposed, billed and invoiced under this Act, including any and all amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge, bill and invoice the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of the clean energy adjustment.

6. All rights of any kind (whether in tort, contract or otherwise) that attach or are attendant or incidental to any of the other property rights or interests that comprise the regulatory asset owner's regulatory asset.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether such revenue, collections, claims, payments and proceeds are imposed, invoiced,

collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

No set off, etc.

(2) The investment asset shall not be set off or reduced by any person in any circumstance, including,

(a) by a consumer, an electricity vendor, an agent of the investment asset owner or licensed distributor;

(b) in connection with any default, bankruptcy, reorganization or other insolvency proceeding of a person mentioned in clause (a); or **[NTD: This provision is likely unenforceable given federal paramountcy in respect of bankruptcy and insolvency law and the claims released thereunder. See, e.g., 407 ETR Concession Co. v. Canada (Superintendent of Bankruptcy)]**

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with section [xx] of the *Personal Property Security Act*.

Collective action required

(4) If the investment asset owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment asset owner collectively and in coordination with all other investment asset owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment asset owner as a collective in accordance with its terms. [Note: Successors may need to be addressed here.]

Transfer of investment interest

26xx. An investment asset owner may transfer all or a portion of its rights and interests in an investment interest to any other investment asset owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan. **[NTD: See note to 22xx(3)]**

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the owner of the investment interest acquired a valid property right and interest in, to and

under the applicable investment interest in accordance with the terms of the transfer. **[NTD: See note to 22xx(3)]**

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment asset owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment asset owner shall have priority over any liens in favour of such other persons.

Investment asset owner may grant security interest

28xx. (1) An investment asset owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person **[to secure a funding obligation]**. **[NTD: Consider whether this restriction is desirable if an investment asset owner is to be anyone other than a financing entity.]**

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms. **[NTD: See subsection (3) – Why both this Act and the PPSA?]**

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the owner of an investment interest to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment asset owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted. **[NTD: There are super-priority liens that could have priority over this security interest under federal insolvency laws; also consider whether subsection (3) and this subsection (5) are inconsistent, since the PPSA provisions incorporated under (3) would include the priority provisions.]**

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in any amounts, revenues or other proceeds collected by the IESO in trust, including amounts that are deposited in the account to be created pursuant to subsection 11xx(3), any amounts, revenues or other proceeds collected by electricity vendors in trust pursuant to subsection 12xx(4) and any [investment asset account] or other account of any electricity vendor, the IESO, an agent of an electricity vendor or the IESO or other person, including where such person may have commingled such amounts, revenues or other proceeds with other funds.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*. **[NTD: This section appears to be referring solely to agents appointed under section 29xx. Consider whether the Financial Services Manager, IESO, any financing entity and any others should be expressly listed.]**

Sequestration

31xx. (1) A court in the Province may, upon application by an investment asset owner or a secured party, order the sequestration and payment of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment asset owner or secured party by any person or entity authorized to collect the clean energy adjustment, if such person or entity defaults on any required remittance of the clean energy adjustment, collections or remittances or fails, or indicates any intention to cease, to hold any such amounts, collections or remittances or proceeds thereof in trust and in segregated accounts as required by this Act.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Same

(3) An order under subsection (1) shall remain in full force and effect despite any bankruptcy, reorganization or other insolvency proceedings with respect to the person or entity who is subject to the order. **[NTD: The order will be likely be stayed on an insolvency and if the money has been spent rather than commingled, a sequestration order will not result in the recovery of the funds.]**

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest. **[NTD: What about the PPSA?] [NTD: See note to 22xx(3)]**

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required with respect to the actions to be taken in compliance with this Act, including actions to be taken under the Financing Plan.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged

neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

[NTD: Need to be able to disclose this without restriction to market the debt.]

Non-application, Financial Administration Act, s. 28[7]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations,

(a) defining any term used in this Act…

(b) prescribing types of payment obligations that constitute funding obligations;

(c) governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment.

(d) governing the inclusion of adjustments under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments.

(e) **[in respect of a financing entity.]**

[Note: reg-making powers to be dealt with in subsequent draft]**[NTD: This should be as broad as possible.]**

PART VII
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* would be amended by adding the following clauses:

[7] Note - see s. 51 of the Electricity Act, 1998

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

201x. Section 53.1 of the Act would be amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under that Act and engaging in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including the following:

1. Entering into contracts and undertakings on behalf of special purpose financing entities, including pre-formation contracts and undertakings and as principal in relation to matters permitted by the *Ontario Fair Hydro Plan Act, 2017* subject to the right of reimbursement from amounts available to the financing entity.

2. Preparing reports on behalf of the financing entity.

3. Enforcing the rights of the financing entity.

4. Signing offering documents as sponsor or otherwise on behalf of the financing entity.

5. Exercising the powers and performing the duties of the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*

6. Issuing non-equity securities in Ontario Power Generation Inc. or on if its subsidiaries, for the purpose of raising funds to acquire debt or equity interests in a financing entity whose activities are limited to the incurrence of funding obligations pursuant to the *Ontario Fair Hydro Plan Act, 2017*.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create one or more subsidiaries, trusts or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

202x. Section 89 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

203x. Section 90 of the Act would be amended by adding the following subsection:

Exception

(4) The requirement in subsection (1) to pay an amount to the Financial Corporation does not apply in respect of amounts payable to Ontario Power Generation Inc. or a subsidiary of Ontario Power Generation Inc. as a result of its functions as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

[Note: Drafting still to be added to the EA consequential amendments: ***All fees charged by OPG as the FSM shall be approved by the OEB before they are included in the calculation of clean energy adjustments.]***

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* would be amended by adding the following paragraph:

6. To facilitate the implementation of the [TBD - language should link up with language from new Act.]

205x. Section 70 of the Act would be amended by adding the following subsection

[Note - still need to draft new subs. 70 (2.1)]

[NTD: Is the plan to also amend the compliance/enforcement provisions of the OEB Act to bring breaches of this Act within the purview of the Board's enforcements powers?]

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

SCHEDULE 1
ESTIMATED FINANCE AMOUNT

[NTD: This section should be moved to the regulations. The calculations below will require careful review once the financing structure is finalized, so it is premature to include them in the legislation.]

Estimated finance amount

1. The estimated finance amount for a reference period shall be determined by estimating, prior to the start of a reference period, the sum of the following:

1. The sum of all amounts that are payable during the reference period by or on behalf of the investment asset owners to satisfy an obligation to repay, redeem or repurchase, or to provide for the repayment, redemption or repurchase, of all or a portion of the amount advanced to the owners under a funding obligation, excluding any payment made by applying the proceeds of a refinancing.

2. The sum of all funding costs for the reference period, determined as follows:

    i. Calculate the aggregate of all interest, scheduled principal and other periodic finance charges accruing, due and becoming payable or paid by or on behalf of investment assets owners during the reference period in respect of all funding obligations, including such amounts as may be prescribed.

    ii. Calculate the sum of the aggregate of all amounts received by or on behalf of investment asset owners during the reference period in respect of all funding obligations and such other amounts as may be prescribed.

    iii. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

3. The sum of all amounts payable during the reference period by or on behalf of investment asset owners to redeem, prepay or repurchase a funding obligation, including any premium, make-whole or other amount becoming payable under a funding obligation to give effect to the redemption, prepayment or repurchase.

4. The balance of the finance reserve at the end of the reference period, as determined under section 3 to this Schedule.

5. The sum of any other amounts payable during the reference period by or on behalf of investment asset owners that were incurred or committed to directly or indirectly in connection with the incurrence of funding obligations under the Financing Plan during the reference period, which may include such amounts as may be prescribed.

Funding costs

2. For the purposes of paragraph 2 of section 1 to this Schedule, the funding costs for a reference period are determined by taking the following steps:

Finance reserve balance

3. (1) For the purposes of paragraph 4 of section 1 to this Schedule, the balance of the finance reserve at the end of the reference period is determined by taking the following steps:

1. Calculate the sum of all amounts deposited by or on behalf of investment asset owners during the reference period in order to pre-fund, collateralize, over-collateralize or establish reserves for the ultimate payment of funding obligations or for related contingencies specified in the Financing Plan.

2. Calculate the sum of all amounts withdrawn by or on behalf of investment asset owners during the reference period from deposits previously made as described in paragraph 1.

3. Subtract the amount calculated under paragraph 2 from the amount calculated under paragraph 1.

All - Thank you for the detailed comments that you provided on Saturday and Sunday. Please find attached the next turn of the legislation. We have tried to balance the comments that we received to address the points that you have raised. This draft does not reflect the drafting points that were raised over Monday and Tuesday and we will reflect those points in our next instructions to legislative counsel. Please review and identify any significant substantive issues by 6 p.m. today. We continue to work toward pens down on Friday, meaning the draft that we have at that point in time will be proposed for introduction in the House. Thank you again for your contributions to this process.

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the

Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Compare - Fair Hydro Act - Osler Comments on v 4.pdf

Version 4 (Osler comments April 26, 2017)

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the value of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined in under section 15xx;

"finance amount" has the meaning given to it in the regulations. **[NTD: This will need to be defined, but this should be left to the regulations.]**

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

(a) a payment obligation (including principal, interest, and other amounts payable in connection therewith) incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section 22xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means, subject to the regulations, a redemption, repayment or repurchase of a funding obligation; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" means [TBD]; ("French") **[NTD: The Dealers concur with Stikeman's suggestion in Version 3 on how this should be defined.]**

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

i. The commodity price of the electricity used.

ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017.

iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge".

   iii. A rate rider [of the prescribed type or class].

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers and reflect the fair allocation; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French")

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive a monthly invoice amount that is **[25]** per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2). **[NTD: By providing each specified RPP consumer with a 25% rate cut, instead of a proxy "representative consumer", there would need to be a unique RPP rate for each customer based on that customer's historical bill, taking into account the fixed and variable components, to generate the intended reduction. This does not seem administratively workable.]**

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*. **[NTD: This would provide a 25% rate cut on top of the OEB's announced cut last week (since that rate would be the "comparison rate".]**

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

Specified consumers (non-RPP), first fair adjustment

6.2xx The **[rate for electricity payable]** **[NTD: Non-RPP customers do not pay an electricity rate, they pay HOEP. As drafted, this provision does not work.]** by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1). **[NTD: We are concerned that this regime for non-RPP customers may not work, but have not had the opportunity to work through it.]**

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt is billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment was determined in a manner that was inconsistent with this Act; and

(b) whether the amount payable in respect of the clean energy adjustment relates to funding obligations that were incurred in a manner that was not in material conformity with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the estimated finance amount in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, true up amount

(2) The estimated finance amount and the true up amount shall be determined in accordance with the regulations.

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the preceding period, **[NTD: It is not clear that this could be done for the immediately preceding reference period, since rates are set before the start of a reference period (i.e. when rates are set for a reference period, it will be done before the immediately preceding reference period has ended. Accordingly, we would suggest being less specific so the details of how the true up is calculated can be worked out later.]**

ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment in respect of a reference period and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) ~~The~~Without limiting the amount of the clean energy adjustment, the Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period. **[NTD: If the Board is doing anything other than a purely mathematical operation, this is problematic for financing. Given that this is qualified by the regulations, this clause would be acceptable if the regulations are sufficiently restrictive in what they specify.]**

IESO to receive amounts

11xx. (2) The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

3. Payments collected by the IESO pursuant to subsection 11xx(2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3) and all

proceeds of any such amounts, shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act. and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same invoice period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers including all proceeds of any such amounts shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager. **[NTD: If the Minister retains this power under the legislation, the documentation will need to restrict the Minister's right to change the Financial Services Manager without the lenders consent.]**

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of calculation

(1.1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period before any funding obligation is incurred [by a financing entity during the reference period].

Amount

(1.2) The fair allocation amount in respect of a reference period is the sum of the following amounts: **[NTD: This calculation still does not work. For example, it does not make sense to add estimated clean energy costs and estimated clean energy benefits together. This calculation is central to financeability since it drives the ability of interest obligations to become payable during the first 5 years (see s. 16xx(4)). Given how critical this calculation is to the overall regime, it should be moved to the regulations so it can be finalized later on in the process once the intent is better understood and all parties can confirm the final definition.]**

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Financial Services Manager shall [comply with the regulations and] have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

Method

(3) The Financial Services Manager shall calculate a fair allocation amount in accordance with such methods as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Notification to Minister

(4) The Financial Services Manager shall notify the Minister of the methods used to calculate the fair allocation amount and any changes to those methods.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment interest in accordance with this Act.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. ~~Any incurrence of a funding obligation should reasonably align with~~Funding obligations should be incurred such that, along with any previously incurred funding obligations, the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during ~~a~~each reference period will reasonably align with the fair allocation amount determined in respect of ~~the~~such reference period under this Part as ~~of~~estimated at the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period.

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not ~~be~~result in amounts payable in respect of the clean energy adjustment during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].**[NTD: Due to refinancing of short term debt, there may be amounts that become payable, but do not result in a clean energy**

adjustment. These short-term amounts must be permitted to become payable during the first five year period so long as there is no CEA.]

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Confidentiality

(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:

1. The Financing Plan.

2. Reports referred to in subsection (3.1).

3. Any other document that would reveal information contained in the Financing Plan or the reports.

Amendments to plan

(6) The Financial Services Manager may amend the Financing Plan at any time.

Same

(7) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, subsection 17xx (5) applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario

Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) ~~Subject to any finding of [manifest error], a~~A recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the

balance at the time. **[The "subject to" language seems to invite a challenge. If the IESO makes an error, we would expect an adjusting entry would be made.]**

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in, or any obligations in respect of, ~~the regulatory asset or in~~ the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment asset owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner ~~of the regulatory asset~~.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) The first transfer of the regulatory asset or a portion of it creates the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover amounts in respect of the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including

any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for amounts in respect of the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of amounts in respect of the clean energy adjustment.

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment asset owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ccount of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*

[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

~~**200.1xx (1) Subsection 25.33 (1) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:**~~

~~(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and~~

~~(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.~~

~~**(1.1) Subsection 25.33 (2) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:**~~

~~(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and~~

~~(d)amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.~~

[The amendments to the calculation of global adjustment in ss. 25.33 of the EA completely undermine the Fair Hydro Plan (i.e. this is a fatal flaw). By flowing this into GA, these costs/benefits would flow to all electricity consumers, not just "specified customers", and this approach results in double counting of costs/benefits since the amounts paid to/received from a financing entity have already found their way through global adjustment when the underlying cost was incurred by the IESO.]

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017,* or

ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998]*.

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a special purpose financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017.*

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017*.

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Fair Hydro Act - Osler Comments on v 4.pdf

Version 4 (Osler comments April 26, 2017)

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL
TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system is clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the value of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined in under section 15xx;

"finance amount" has the meaning given to it in the regulations. **[NTD: This will need to be defined, but this should be left to the regulations.]**

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

(a) a payment obligation (including principal, interest, and other amounts payable in connection therewith) incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section 22xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means, subject to the regulations, a redemption, repayment or repurchase of a funding obligation; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" means [TBD]; ("French") **[NTD: The Dealers concur with Stikeman's suggestion in Version 3 on how this should be defined.]**

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

    i. The commodity price of the electricity used.

ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017.

iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge".

   iii. A rate rider [of the prescribed type or class].

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers and reflect the fair allocation; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act, including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French")

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a specified RPP consumer who meets the prescribed criteria to receive a monthly invoice amount that is **[25]** per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2). **[NTD: By providing each specified RPP consumer with a 25% rate cut, instead of a proxy "representative consumer", there would need to be a unique RPP rate for each customer based on that customer's historical bill, taking into account the fixed and variable components, to generate the intended reduction. This does not seem administratively workable.]**

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*. **[NTD: This would provide a 25% rate cut on top of the OEB's announced cut last week (since that rate would be the "comparison rate".]**

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

Specified consumers (non-RPP), first fair adjustment

6.2xx The **[rate for electricity payable][NTD: Non-RPP customers do not pay an electricity rate, they pay HOEP. As drafted, this provision does not work.]** by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1). **[NTD: We are concerned that this regime for non-RPP customers may not work, but have not had the opportunity to work through it.]**

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt is billing practices and invoices to reflect the new rates.

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022.

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, which may include terms relating to late payment fees and interest charges.

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment was determined in a manner that was inconsistent with this Act; and

(b) whether the amount payable in respect of the clean energy adjustment relates to funding obligations that were incurred in a manner that was not in material conformity with the Financing Plan.

Indebtedness of specified consumer

(4) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's respective interest in the investment asset.

Same

(5) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(6) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the estimated finance amount in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, true up amount

(2) The estimated finance amount and the true up amount shall be determined in accordance with the regulations.

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the preceding period, **[NTD: It is not clear that this could be done for the immediately preceding reference period, since rates are set before the start of a reference period (i.e. when rates are set for a reference period, it will be done before the immediately preceding reference period has ended. Accordingly, we would suggest being less specific so the details of how the true up is calculated can be worked out later.]**

ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment in respect of a reference period and such other information related to the determination of the clean energy adjustment as may be prescribed.

Board to determine rates

(5) Without limiting the amount of the clean energy adjustment, the Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period. **[NTD: If the Board is doing anything other than a purely mathematical operation, this is problematic for financing. Given that this is qualified by the regulations, this clause would be acceptable if the regulations are sufficiently restrictive in what they specify.]**

IESO to receive amounts

11xx. (2) The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(3) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

3. Payments collected by the IESO pursuant to subsection 11xx(2).

Same, held in trust

(4) All amounts received by the IESO in respect of the clean energy adjustment, including without limitation all amounts received under subsection 11xx(3) and all

proceeds of any such amounts, shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners or a secured party to whom a security interest in an investment interest is granted under this Act, and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

IESO to remit

(5) The IESO shall remit amounts received by it in respect of the clean energy adjustment to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same invoice period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers including all proceeds of any such amounts shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners and, for greater certainty, any trust created by or established in accordance with this Act shall be a true trust and not a deemed trust.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager. **[NTD: If the Minister retains this power under the legislation, the documentation will need to restrict the Minister's right to change the Financial Services Manager without the lenders consent.]**

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of calculation

(1.1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period before any funding obligation is incurred [by a financing entity during the reference period].

Amount

(1.2) The fair allocation amount in respect of a reference period is the sum of the following amounts: **[NTD: This calculation still does not work. For example, it does not make sense to add estimated clean energy costs and estimated clean energy benefits together. This calculation is central to financeability since it drives the ability of interest obligations to become payable during the first 5 years (see s. 16xx(4)). Given how critical this calculation is to the overall regime, it should be moved to the regulations so it can be finalized later on in the process once the intent is better understood and all parties can confirm the final definition.]**

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Financial Services Manager shall [comply with the regulations and] have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

Method

(3) The Financial Services Manager shall calculate a fair allocation amount in accordance with such methods as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Notification to Minister

(4) The Financial Services Manager shall notify the Minister of the methods used to calculate the fair allocation amount and any changes to those methods.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment interest in accordance with this Act.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Funding obligations should be incurred such that, along with any previously incurred funding obligations, the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during each reference period will reasonably align with the fair allocation amount determined in respect of such reference period under this Part as estimated at the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period.

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not result in amounts payable in respect of the clean energy adjustment during the reference period in an amount that exceeds the [difference between the fair allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].**[NTD: Due to refinancing of short term debt, there may be amounts that become payable, but do not result in a clean energy adjustment. These short-term amounts must be permitted to become payable during the first five year period so long as there is no CEA.]**

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Confidentiality

(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:

1. The Financing Plan.

2. Reports referred to in subsection (3.1).

3. Any other document that would reveal information contained in the Financing Plan or the reports.

Amendments to plan

(6) The Financial Services Manager may amend the Financing Plan at any time.

Same

(7) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, subsection 17xx (5) applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario Power Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties

arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month shall be determined in accordance with the regulations.

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) A recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the balance at the time. **[The "subject to" language seems to invite a challenge. If the IESO makes an error, we would expect an adjusting entry would be made.]**

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in, or any obligations in respect of, the investment asset created by the transfer.

Same

(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment asset owner.

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner.

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. (1) The first transfer of the regulatory asset or a portion of it creates the investment asset.

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover amounts in respect of the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for amounts in respect of the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of amounts in respect of the clean energy adjustment.

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment asset owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ccount of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act. **[NTD: If IESO or an electricity vendor fails to hold funds in trust as required by this Act, an action for damages or another remedy should be available.]**

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*
[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

[The amendments to the calculation of global adjustment in ss. 25.33 of the EA completely undermine the Fair Hydro Plan (i.e. this is a fatal flaw). By flowing this into GA, these costs/benefits would flow to all electricity consumers, not just "specified customers", and this approach results in double counting of costs/benefits since the amounts paid to/received from a financing entity have already found their way through global adjustment when the underlying cost was incurred by the IESO.]

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017*, or

ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998*].

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a special purpose financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017*.

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*.

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017*.

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

All - Thank you for the detailed comments that you provided on Saturday and Sunday. Please find attached the next turn of the legislation. We have tried to balance the comments that we received to address the points that you have raised. This draft does not reflect the drafting points that were raised over Monday and Tuesday and we will reflect those points in our next instructions to legislative counsel. Please review and identify any significant substantive issues by 6 p.m. today. We continue to work toward pens down on Friday, meaning the draft that we have at that point in time will be proposed for introduction in the House. Thank you again for your contributions to this process.

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes' summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Version 4

STIKEMAN COMMENTS/EDITS – APRIL 26/17

This confidential draft document is provided for discussion purposes only. It should not be construed as representing the position adopted by the Government of Ontario on any of the topics included or not included in this document. The notes included in this document are intended only to help facilitate a discussion of the topics to which they relate. Any potential legislation is subject to the approval of the Ontario Legislature.

Confidential Draft

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

A proposal to create Legislation.

An Act to provide for the fair allocation of costs of electricity over time, if enacted

EXPLANATORY NOTE TO BE ADDED BY LEGISLATIVE COUNSEL TO ANY FINAL BILL PRIOR TO INTRODUCTION.

Confidential Draft

Preamble

The Government of Ontario is committed to fostering the development of a clean, modern and reliable electricity system with a diverse supply mix. The Government is also committed to removing barriers to and promoting opportunities for renewable and clean energy projects.[1] These commitments can only be achieved if costs are shared fairly among consumers, today and in the future.

Electricity rates have risen for two key reasons. First, decades of under-investment in the electricity system resulted in the need to invest more than $50 billion in generation, transmission and distribution assets to ensure the system ~~is~~will continue to be clean and reliable. Second, the decision to eliminate Ontario's use of coal and produce clean, renewable power has created additional costs.

The actions taken to achieve a clean, modern and reliable electricity system have resulted in significant costs to consumers today. The burden of financing these system improvements and funding key programs has unfairly fallen almost entirely on the shoulders of today's consumers.

The Government of Ontario is committed to ensuring that the costs of financing these investments and the associated charges to consumers are allocated fairly among present and future generations of consumers.

Recognizing that the electricity infrastructure that has been built and the policy decisions that have been made will create benefits for years to come, costs should be allocated fairly over time, so that consumers in the future pay their fair share for the benefits that they receive from the investments already made.

[1] FLS: please see the preamble of the *Green Energy Act, 2009*.

CONTENTS

PART I
GENERAL

1. Interpretation
2. Effect of invalidity, etc.
3. Purpose
4. Crown bound
5. Protection and assurances

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

6. Definitions
6.1 Specified RPP consumer, first fair adjustment
6.2 Specified consumers (non-RPP), first fair adjustment
6.3 Determination by Board
6.4 Implementation of rates
6.5 Effective date
6.6 Transition
7. Subsequent fair adjustments
7.1 Sub-meter customers

PART III
CLEAN ENERGY ADJUSTMENT

8. Specified consumers to pay
9. Irrevocability of amount
10. Determination of clean energy adjustment
11. IESO to receive amounts
12. Electricity vendor to invoice specified consumers

PART IV
IMPLEMENTATION
FINANCIAL SERVICES MANAGER

13. Appointment
14. Duties and powers

FAIR ALLOCATION AMOUNT

15. Financial Services Manager to calculate fair allocation amount

FINANCING PLAN

16. Financial Services Manager to prepare Financing Plan
17. Implementation of Financing Plan

PART V
THE REGULATORY ASSET

20. IESO funding shortfall
20.1 Variance account to be established, maintained
21. Regulatory asset established
22. Transfer of regulatory asset
23. Validity of transfer

PART VI
THE INVESTMENT ASSET

24. Effect of transfer
25. Investment asset established
26. Transfer of investment interest
27. Validity of transfer
28. Investment interest owner may grant security interest

PART VI
MISCELLANEOUS

29. Appointment of agent, invoicing or collection
30. Not Crown agent
31. Sequestration
32. Choice of law
33. Conflict
34. No further approvals, etc.

AMENDMENTS TO OTHER ACTS

Confidential Draft

ELECTRICITY ACT, 1998
AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998
PART VII
COMMENCEMENT AND SHORT TITLE
103. Commencement
104. Short title

PART I
GENERAL

Interpretation
Definitions

1xx. (1) In this Act,

"Board" means the Ontario Energy Board; ("French")

"clean energy adjustment" means the amount determined under section 10xx; ("French")

"clean energy benefits" means the value of the benefits determined to be derived by or accruing to the specified consumers as a result of the clean energy initiative, including as a result of clean energy costs; ("French")

"clean energy costs" means the value of the costs allocated to specified consumers as a result of the clean energy initiative, including as a result of past, present and expected costs incurred in respect of,

(a) the estimated amounts to be paid or reflected by the IESO in adjustments made under section 25.33 of the *Electricity Act, 1998* or any provision that is the successor to that provision, which relate to contracts for,

(i) renewable energy generation or capacity,

(ii) conservation and demand management,

(iii) energy storage,

(iv) energy efficiency,

(v) natural gas generation and capacity, excluding contracts relating to amounts payable by the IESO under section 78.2 of the *Ontario Energy Board Act, 1998* and excluding such other contracts as may be prescribed, or

(vi) payments made or expected to be made under section 78.5 of the *Ontario Energy Board Act, 1998*, and

Confidential Draft

(b) such other estimated costs as may be prescribed; ("French")

"clean energy initiative" means the policies of the Government of Ontario related to,

(a) fostering the growth of and investment in clean and renewable energy sources and technologies,

(b) removing barriers to and promoting opportunities for clean and renewable energy sources and technologies, and

(c) promoting conservation and demand management; ("French")

"electricity vendor"[2] means,

(a) a licensed distributor,

(b) a licensed retailer,

(c) the IESO in circumstances where the IESO directly invoices a specified consumer, or

(d) such other person as may be prescribed; ("French")

"fair allocation amount" means the amount determined in under section 15xx;

"financing entity" means an entity established or caused to be established under subsection 17xx (3); ("French")

"Financial Services Manager" means the Financial Services Manager appointed under section 13xx; ("French")

"Financing Plan" means the plan prepared under section 16xx, as amended from time to time in accordance with this Act; ("French")

"funding obligation" means,

(a) a payment obligation incurred in connection with the transfer of a regulatory asset or the refinancing of an existing funding obligation, or

[2] FLS - this is similar to the definition of "electricity vendor" in the Ontario Rebate for Electricity Consumers Act, 2016

Confidential Draft

(b) a payment obligation that meets such other criteria as may be prescribed; ("French")

"IESO" means the Independent Electricity System Operator continued under Part II of the *Electricity Act, 1998*; ("SIERE")

"IESO funding shortfall" means the amount determined under section 20xx; ("French")

"investment asset" means the rights and interests described in section ~~22~~24xx; ("French")

"investment interest owner" means a financing entity that has acquired and holds an investment interest; ("French")

"investment interest" means,

(a) an ownership interest in the investment asset, and

(b) in circumstances where the ownership interest is transferred, the rights and benefits specified in the agreement under which the interest is transferred; ("French")

"invoice amount" means, in respect of an invoice period, the sum of the amounts set out in subsection (2.1) in relation to the provision of electricity in Ontario to a specified consumer; ("French")

"invoice period" means the period in respect of which an invoice amount applies, as specified on an invoice issued by an electricity vendor; ("French")

"licensed distributor" means a person licensed under Part V of the *Ontario Energy Board Act, 1998* to own or operate a distribution system; ("French")

"licensed retailer" means a person who is licensed under Part V of the *Ontario Energy Board Act, 1998* to retail electricity; ("French")

"Minister" means the Minister of Energy or such other member of the Executive Council as may be assigned the administration of this Act under the *Executive Council Act*; ("ministre")

"Ontario Power Generation Inc." means the corporation incorporated as Ontario Power Generation Inc. under the *Business Corporations Act* on December 1, 1998; ("Ontario Power Generation Inc.")

"prescribed" means prescribed by the regulations; ("prescrit")

Confidential Draft

"reference period" means,

(a) the period beginning on May 1, 2017 and ending on October 31, 2017, and

(b) during the period beginning on November 1, 2017 and ending on April 30, 2047,

(i) every six-month period following the period mentioned in clause (a); or

(ii) any period shorter than six months, as may be prescribed; ("French")

"refinancing" means, subject to the regulations, the incurrence of debt in connection with a redemption, repayment or repurchase of a funding obligation; ("French")

"regulation" means a regulation made under this Act; ("règlement")

"regulatory asset" means the right and interest established under section 21xx; ("French")

"specified consumer" means,

(a) a person who has an account with an electricity vendor for the supply of electricity in Ontario and meets the criteria set out in subsection (2); or

(b) such other person as may be prescribed; ("French")

"sub-meter customer" means a person who is supplied electricity by a specified consumer, if an invoice for the electricity is issued to the person by the specified consumer, by an agent of the specified consumer or by a unit sub-meter provider providing unit sub-metering for the specified consumer; ("French")

"transfer" means [TBD]; ("French")

"unit sub-metering" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("activités liées aux compteurs divisionnaires d'unité")

"unit sub-meter provider" has the same meaning as in the *Energy Consumer Protection Act, 2010*; ("fournisseur de compteurs divisionnaires d'unité")

Specified consumers

(2) For the purposes of clause (a) of the definition of "specified consumer" in subsection (1), the person must meet any one of the following criteria:

Confidential Draft

1. The person has a demand for electricity of 50 kilowatts or less, or such other amount as may be prescribed.

2. The person annually uses not more than 250,000 kilowatt hours of electricity, or such other amount as may be prescribed.

3. The person carries on a business that is a farming business for the purposes of the *Farm Registration and Farm Organizations Funding Act, 1993* and either holds a valid registration number assigned under that Act or the has had the obligation to file a farming business registration form waived pursuant to an order made under subsection 22 (6) of that Act.

4. The person's account with the electricity vendor relates to,

    i. a dwelling,

    ii. a property within the meaning of the *Condominium Act, 1998*,

    iii. a residential complex within the meaning of subsection 2 (1) of the *Residential Tenancies Act, 2006*, without regard to section 5 of that Act, or

    iv. a property that includes one or more housing units and that is owned or leased by a co-operative within the meaning of the *Co-operative Corporations Act*.

5. The person satisfies such criteria as may be prescribed.

Invoice amount

(2.1) Subject to the regulations, the invoice amount for a specified consumer in respect of an invoice period includes the following amounts:

1. In circumstances where the electricity is provided by a licensed distributor or a licensed retailer, the following amounts in respect of the invoice period:

    i. The commodity price of the electricity used.

    ii. The rates and charges set out in the applicable rate order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998* and in effect on April 30, 2017.

    iii. Any adjustment on the invoice required under section 25.33 of the *Electricity Act, 1998*.

Confidential Draft

iv. The amount of any harmonized sales tax payable by the consumer under Part IX of the *Excise Tax Act* (Canada) in respect of the amounts mentioned in subparagraphs i, ii and iii;

v. Any other amounts as may be prescribed.

2. In circumstances where the electricity is provided by the IESO or other prescribed entity, such amounts as may be prescribed in respect of the invoice period. ("French")

Same, exclusions

(2.2) Subject to the regulations, an invoice amount does not include any of the following amounts:

1. The balance of any amounts carried forward from previous invoices in respect of previous invoice periods.

2. Penalties or interest.

3. Charges that do not relate to the use of electricity.

4. Any of the following charges that may be set out in an order issued by the Board under subsection 78 (3) of the *Ontario Energy Board Act, 1998*:

   i. A fixed monthly service charge payable by a generation facility within the meaning of section 56 of the *Ontario Energy Board Act, 1998* and classified as "microFIT".

   ii. A charge labelled as a "specific service charge" or "retail service charge".

   iii. A rate rider [of the prescribed type or class].

5. Any other prescribed amounts.

Effect of invalidity, etc.[3]

2xx. (1) For greater certainty, all of the provisions of this Act remain in full force and effect, even if one or more provisions are held to be invalid, the intention of the Legislature being to give separate and independent effect to the extent of its powers to every provision contained in this Act.

[3] FLS: this is from the *Climate Change Mitigation and Low-carbon Economy Act, 2016*

Confidential Draft

Same, funding obligation

(2) The fact that any provision of this Act is held to be invalid or ceases to be in effect for any reason does not affect the validity or enforceability of a funding obligation incurred under this Act before the day that the provision is held to be invalid or ceases to be in effect, or any rights or obligations associated with the funding obligation.

Purpose

3xx. (1) The purposes of this Act are,[4]

(a) to ensure that clean energy costs are fairly allocated among present and future specified consumers and reflect the fair allocation; and

(b) to recognize that clean energy benefits have accrued and will accrue over time and will continue to benefit present and future electricity consumers in the Province.

Crown bound

4xx. This Act binds the Crown.

Protection and assurances

Prohibition

5xx. (1) The Crown shall not do anything that would,

(a) hinder, delay, impair or prejudice the charging, collection or remittance of amounts in respect of the clean energy adjustment;

(b) except as expressly permitted by this Act, reduce the clean energy adjustment determined under this Act or lower the priority of the clean energy adjustment over other debts; or

(c) adversely affect an investment asset or a funding obligation.

Clarification with respect to regulations

(2) For greater certainty, the things prohibited under subsection (1) include the making or approving of a regulation under this Act.

Agreements for compensation

(3) The Minister may, with the approval of the Lieutenant Governor in Council, enter into agreements on behalf of the Province of Ontario with any person in respect of this Act,

[4] FLS: Please see the *Electricity Act, 1998* for much of the wording proposed in this section.

Confidential Draft

including agreements regarding the performance of IESO or electricity vendors under this Act or similar transactions.

Guarantee, indemnification

(4) The Lieutenant Governor in Council may by order,

(a) authorize the Minister of Finance, on behalf of the Province,

(i) to agree to guarantee or indemnify any debts, obligations, securities or undertakings associated with an investment interest, and

(ii) to determine terms and conditions and the amount on which the guarantee or indemnity will be given;

(b) impose terms and conditions, as it considers advisable, on which the Minister of Finance may, on behalf of the Province, agree to guarantee or indemnify as described in subclause (a) (ii); and

(c) specify a maximum liability for the guarantee or indemnity.

PART II
FAIR ADJUSTMENT OF ELECTRICITY RATES

Definitions

6xx. In this Part,

"effective date" means the date determined under section 6.5xx; ("French")

"RPP rate" means the rate determined by the Board under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*, which rate is commonly referred to as the Regulated Price Plan"; ("French")

"specified RPP consumer" means a specified consumer who meets the following criteria:

1. The consumer is a member of the class of consumers prescribed by the regulations made under the *Ontario Energy Board Act, 1998* for the purposes of subsection 79.16 (1) of that Act.

2. The consumer is subject to the RPP rate. ("French")

Specified RPP consumer, first fair adjustment

6.1xx (1) The rate for electricity payable by a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate required for a

Confidential Draft

specified RPP consumer who meets the prescribed criteria to receive a monthly invoice amount that is 25 per cent lower than the monthly invoice amount for that consumer under the comparison rate described in subsection (2).

Comparison rate

(2) The comparison rate is the rate that would be effective May 1, 2017, determined by the Board solely using the method prescribed by the regulations made under clause 79.16 (1) (b) of the *Ontario Energy Board Act, 1998*. **[NTD: Is it necessary to more explicitly tie this to what the rate would have been in the absence of the govt's fair hydro plan since the OEB will set reduced RPP rates on May 1 under the current statute/regs]**

Same

(3) For the purposes of subsection (2), the applicable method is the method on the day this section comes into force.

Specified consumers (non-RPP), first fair adjustment

6.2xx The rate for electricity payable by a specified consumer who is not a specified RPP consumer for the period beginning on the effective date and ending on April 30, 2018 is the rate that would be necessary in order for [the monthly global adjustment rate] in respect of a specified consumer who is not a specified RPP consumer (RPP) and who meets the prescribed criteria to be reduced by the same amount as the difference between the comparison rate referred to in subsection 6.1xx (2) and the rate determined under subsection 6.1xx (1). **[NTD: It is not clear what reduction is contemplated by this provision. It sounds like whereas RPP specified consumers are to receive a rate that will effect a 25% reduction to their total bill, non-RPP specified consumers will only be entitled to a rate that will effect a 25% reduction to the GA component of their bill. Or is the intent to reduce non-RPP specified consumers GA component by the $/kWh difference between the comparison rate and rate determined under subsection 6.1xx(1), i.e. a rate reduction factor?]**

Determination by Board

6.3xx The Board shall determine the rates mentioned in sections 6.1xx and 6.2xx no later than seven business days after the day this section receives Royal Assent.

Implementation of rates

6.4xx Each electricity vendor, [specified consumer who provides electricity to a sub-meter customer and unit sub-meter provider who provides unit sub-metering for a specified consumer] shall, no later than seven business days after the day on which the Board determines the rates under section 6.3xx, adapt ~~is~~its billing practices and invoices to reflect the new rates.

Confidential Draft

Effective date

6.5xx The rates determined under section 6.3xx are effective on the earlier of the following days:

1. The first day of the month immediately following the last day of the seven-day period referred to in section 6.4xx.

2. July 1, 2017.

Transition

6.6xx (1) This section applies if an electricity vendor, specified consumer or unit sub-meter provider is unable to comply with section 6.4xx for one of the following reasons:

1. There are fewer than seven days between the day of the Board's determination of rates under section 6.3xx and the effective date.

2. Technical or operational reasons.

Same

(2) In the circumstances described in subsection (1), the electricity vendor, specified consumer or unit sub-meter provider shall,

(a) adapt its invoices as soon as possible and, in any event, no later than August 1, 2017; and

(b) ensure that any specified consumer or sub-meter customer invoiced at a rate higher than the applicable rate determined by the Board receives the difference between the rate shown on their invoice and the applicable rate as a lump sum credit on the first invoice issued after the invoices have been adapted or by such other means as may be prescribed by the regulations.

Subsequent fair adjustments

7xx. The Lieutenant Governor in Council may make regulations prescribing the methodology to be applied by the Board to determine rates for electricity payable by specified consumers and sub-meter customers during the period beginning on May 1, 2018 and ending on April 30, 2022. **[NTD: we understand that the intent is to gradually smooth increases after 2022 by continuing the IESO's under-recovery/shortfall after 2022, albeit at a reduced level. If correct, this part of the Act would need to be further amended to provide authority to do this. Would also need to be reflected in the IESO funding shortfall provisions.]**

Confidential Draft

Sub-meter customers

7.1xx A specified consumer who provides electricity to a sub-meter customer and any unit sub-meter provider who provides unit sub-metering for the specified consumer shall ensure that the rate payable by each sub-meter customer is the applicable rate determined under this Part.

PART III
CLEAN ENERGY ADJUSTMENT

Specified consumers to pay

8xx. (1) Upon receipt of an invoice that includes an amount in respect of the clean energy adjustment, a specified consumer shall pay the amount to the electricity vendor, as agent of the investment interest owners, in accordance with such terms of payment as may be specified in the invoice, [which may include terms relating to late payment fees and interest charges~~.~~]. **[NTD: query whether such late payment/interest fees would be applicable to the CEA amount and/or whether would be better to leave to regs]**

Same

(2) For greater certainty, subsection (1) applies regardless of,

(a) whether the clean energy adjustment was determined in a manner that was ~~inconsistent~~consistent with this Act; and

(b) whether the amount payable in respect of the clean energy adjustment relates to funding obligations that were incurred in a manner that was not in material conformity with the Financing Plan.

Indebtedness of specified consumer

(~~4~~3) An unpaid amount that is required to be paid by a specified consumer under this section constitutes indebtedness of the specified consumer to each investment interest owner to the extent of each owner's ~~respective~~ interest in the investment asset.

Same

(~~5~~4) The indebtedness mentioned in subsection (4) is a single and separate debt obligation owed by the specified consumer and may be enforced independently from any other payment obligation or indebtedness owing by the specified consumer.

Recovery from sub-meter consumers

(~~6~~5) A specified consumer who provides electricity to a sub-meter customer may recover amounts in respect of the clean energy adjustment payable under this section from each sub-meter customer on a pro rata basis.

Confidential Draft

Irrevocability of amount

9xx. (1) An amount in respect of the clean energy adjustment shown on an invoice issued to a specified consumer under this Act is determinative of the amount of the consumer's indebtedness resulting from the clean energy adjustment and is irrevocable upon invoicing the consumer and may not be set off or by passed.

Exception

(2) Subsection (1) does not apply to the extent that there is a clerical, typographical or calculation-related error by the electricity vendor.

Determination of clean energy adjustment
Financial Services Manager to determine

10xx. (1) The Financial Services Manager shall determine the clean energy adjustment payable by all specified consumers in respect of each month in a reference period by adding the estimated finance amount in respect of the reference period to the true up amount in respect of the reference period.

Estimated finance amount, true up amount

(2) The estimated finance amount and the true up amount, which may be a positive or negative value, shall be determined in accordance with the regulations.

Regulations re true up amount

(3) The regulations under subsection (2) shall have regard to the following principles:

1. The true up amount should serve to ensure that the collection of the clean energy adjustment is sufficient to pay the finance amount when it is due.

2. The method for determining the true up amount should take into account historical and reasonably foreseeable,

    i. differences between the estimated and actual finance amount for the immediately preceding reference period,

    ii. differences between amounts invoiced and amounts collected due to various factors, including applicable taxes, consumer defaults and delays, billing lags and write-offs, and

    ii. variations in billings due to variations in electricity consumption.

Financial Services Manager to notify Board

(4) The Financial Services Manager shall, in accordance with the regulations, notify the Board of the clean energy adjustment and such other information related to the determination of the clean energy adjustment as may be prescribed.

Confidential Draft

Board to determine rates

(5) The Board shall, in accordance with the regulations, determine the rate at which specified consumers are invoiced to recover the clean energy adjustment in respect of the reference period.

IESO to receive amounts

11xx. (~~2~~1) The IESO shall, as an agent of the investment interest owners, receive amounts in respect of the clean energy adjustment paid to it from electricity vendors in accordance with the regulations and the market rules made under section 32 of the *Electricity Act, 1998*.

Account

(~~3~~2) All of the following amounts received by the IESO shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be deposited promptly into an account established for the purposes of receiving those amounts:

1. Amounts described in subsection 11xx (2).

2. Payments made by specified consumers directly to the IESO as electricity vendor under subsection 8xx (1).

Same, held in trust

(~~4~~3) All amounts received by the IESO in respect of the clean energy adjustment shall, until paid to or for the benefit of the investment interest owner, be received and held in trust by the IESO for the investment interest owners ~~or a secured party to whom a security interest in an investment interest is granted under this Act~~.

IESO to remit

(~~5~~4) The IESO shall remit amounts received by it in respect of the clean energy adjustment, inclusive of interest earned on the accounts referenced in subsection (2) to or for the benefit of the investment interest owners in accordance with the regulations.

Electricity vendor to invoice specified consumers

12xx. (1) Each electricity vendor shall issue an invoice to each of its specified consumers for the amount payable by the consumer in respect of the clean energy adjustment, as determined by applying the rate set by the Board under subsection 10xx (2) and in accordance with the regulations.

Electricity vendor to report

(1.1) Each electricity vendor shall, in accordance with the regulations, promptly report to the IESO the total amount invoiced to its specified consumers in respect of the clean

Confidential Draft

energy adjustment, the amount collected and such further information as may be prescribed.

Electricity vendor to collect

(2) Each electricity vendor shall, as agent of the investment interest owners, collect amounts in respect of the clean energy adjustment from specified consumers in accordance with the regulations.

Pro rating of payments

(3) If an electricity vendor receives a payment made by or on behalf of a specified consumer in respect of amounts payable under one or more invoices and the amount paid is less than the total amount payable, the electricity vendor shall allocate the payment on a pro rata basis to the clean energy adjustment and other amounts payable under the relevant invoices in respect of electricity charges in respect of the same period.

Held in trust

(4) Payments received by an electricity vendor from or on behalf of specified consumers shall, until paid to or for the benefit of the investment interest owner in accordance with subsection (5), be received by and held by each electricity vendor in trust for the benefit of the investment interest owners.

Remittance to IESO

(5) Each electricity vendor shall remit amounts described in subsection (5) to the IESO for the benefit of the investment interest owners in accordance with the regulations.

PART IV
IMPLEMENTATION

FINANCIAL SERVICES MANAGER

Appointment

13xx. (1) Subject to subsection (2), Ontario Power Generation Inc. is appointed as the Financial Services Manager for the purposes of this Act.

Replacement

(2) The Minister may terminate an appointment of a Financial Services Manager and may, in accordance with the regulations, appoint a new person or entity as the Financial Services Manager.

Duties and powers

14xx. (1) The Financial Services Manager shall perform the duties assigned to it under this Act and may administer the investment asset on behalf of the investment interest owners.

Confidential Draft

Same

(2) The administration of the investment asset may include the following:

1. Providing information, in accordance with the regulations, to the Board in respect of funding obligations and the determination of the clean energy adjustment in accordance with section 10xx.

2. Providing information to the IESO in respect of obligations under Part III.

3. Such other matters as may be prescribed.

Review of costs

(3) The Board shall review the administrative costs of the Financial Services Manager in accordance with the regulations.

FAIR ALLOCATION AMOUNT

Financial Services Manager to calculate fair allocation amount

15xx. (1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period~~, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period~~.

Timing of calculation

(1.1) The Financial Services Manager shall calculate a fair allocation amount in respect of each reference period before any funding obligation is incurred [by a financing entity during the reference period].

Amount

(1.2) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Confidential Draft

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Financial Services Manager shall [comply with the regulations and] have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.
3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

Method

(3) The Financial Services Manager shall calculate a fair allocation amount in accordance with such methods as the Financial Services Manager considers appropriate, having regard to the requirements of this Act.

Notification to Minister

(4) The Financial Services Manager shall notify the Minister of the methods used to calculate the fair allocation amount and any changes to those methods.

Effective date

(6) The fair allocation calculation or an amendment to the fair allocation calculation takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided to the Minister in writing.

Publication

(7) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

Confidential Draft

FINANCING PLAN

Financial Services Manager to prepare Financing Plan

16xx. (1) The Financial Services Manager shall prepare a written plan entitled the Financing Plan to be used by the Financial Services Manager to evaluate whether potential funding obligations should be incurred for the purposes of acquiring an investment interest in accordance with this Act.

Plan to be provided to Minister

(1.1) The Financial Services Manager shall provide the Financing Plan to the Minister.

Principles

(2) In preparing the Financing Plan, the Financial Services Manager shall have regard to the following principles:

1. Any incurrence of a funding obligation should reasonably align with the estimated finance amount, as determined in accordance with the regulations, that would, subject to any refinancing, become due and payable during a reference period with the fair allocation amount determined in respect of the reference period under this Part as of the time of the incurrence, in each case after reducing the fair allocation calculation by the amount of any fair adjustment in respect of the reference period.

2. Incurrences should be implemented in a manner that, in the opinion of the Financial Services Manager, is reasonable, cost effective and that reflects prevailing market terms and conditions.

3. Reasonable assumptions should be made regarding such matters as may be prescribed.

Limitation, first five year period

(4) In respect of each reference period from May 1, 2017 to April 30, 2022, no funding obligation shall be incurred that would become payable during the reference period and result in amounts payable in respect of the clean energy adjustment in respect of the reference period unless,

(a) no fair adjustment has been made under Part II in respect of the reference period; or

(b) if a fair adjustment has been made under Part II in respect of the reference period, the funding obligations incurred would not be payable during the reference period in an amount that exceeds the [difference between the fair

Confidential Draft

allocation amount in respect of the reference period and the amount of the fair adjustment in respect of the reference period].

Other reports

(3.1) The Financial Services Manager shall submit to the Minister such reports and information as the Minister may require from time to time and shall, if required by the Minister to do so, examine, report and advise on any question relating to the Financing Plan.

Confidentiality

(5) The following are deemed to be records subject to clauses 18 (1) (c) and (d) of the *Freedom of Information and Protection of Privacy Act*:

1. The Financing Plan.

2. Reports referred to in subsection (3.1).

3. Any other document that would reveal information contained in the Financing Plan or the reports.

Amendments to plan

(6) The Financial Services Manager may amend the Financing Plan at any time.

Same

(7) In the event that the Financing Plan is amended, any reference in this section to the Financing Plan is deemed to be a reference to the plan as amended.

Implementation of Financing Plan

17xx. (1) The Financial Services Manager shall incur funding obligations in material conformity with the applicable Financing Plan.

Same

(2) For greater certainty, subsection 17xx (5) applies despite the failure of the Financial Services Manager to comply with subsection (1).

Financing entities

(3) In accordance with the Financing Plan, the Financial Services Manager may establish or cause to be established one or more financing entities that may incur funding obligations.

Prohibition

(3.1) The Financial Services Manager shall not provide for funding obligations to be incurred with any recourse to any assets of an electricity vendor, the Board, Ontario Power

Confidential Draft

Generation Inc., the Province or the Lieutenant Governor in Council, except to the extent that any of these persons or entities may be liable to perform obligations or duties arising under this Act or under the express terms of a funding obligation or other agreement.

Effect of amendment to fair allocation amount

(4) Each funding obligation incurred and each transfer made by a financing entity is deemed to be consistent with the Financing Plan and [the fair allocation amount].

PART V
THE REGULATORY ASSET

IESO funding shortfall

20xx. (1) The IESO funding shortfall for each month commencing May 1, 2017 shall be determined by the IESO in accordance with the regulations. **[NTD: Does Act need to provide for recovery retroactive to May 1/17 prior to effective date of the new rate]**

Electricity vendors to provide information

(2) Electricity vendors shall provide to IESO such information as IESO may reasonably request for the purposes of determining the IESO funding shortfall under subsection (1) and such further information as may be prescribed.

Same

(3) IESO may rely on information provided by electricity vendors for the purposes of the determination under subsection (1).

Variance account to be established, maintained

20.1xx (1) The IESO shall establish and maintain a variance account for the purposes of this section.

Recording in variance account

(2) The IESO shall record the following in the variance account:

1. The amount of the IESO funding shortfall for each month.

2. All payments received by the IESO resulting from the exercise of the right of recovery under section 21xx and any transfer under section 22xx.

3. Such other adjustments as may be prescribed.

Recording determinative

(3) Subject to any finding of [manifest error], a recording by the IESO in the variance account of the balance is, as of the time of the recording, determinative of the balance at the time.

Confidential Draft

Rights of investment interest owner

(4) No change made by IESO to the balance in the variance account shall, if the previous balance was relied upon by an investment interest owner in the context of a transfer under section 22x, affect the rights of the investment interest owner acquired under the transfer.

Regulatory asset established

21xx. (1) The IESO has the right, exercisable in accordance with this Act and the regulations, to recover the balance recorded in the variance account from specified consumers.

Limitation

(2) Despite subsection (1), the IESO shall not be entitled to collect all or part of the balance recorded in the variance account from specified consumers before May 1, 2022.

Board to set rates

(3) The Board shall, from time to time, determine and set rates payable by specified consumers to allow for IESO to recover the balance recorded in the variance account.

Same, limitations

(4) The Board's powers under subsection (3) shall be exercised in accordance with the regulations.

Transfer of regulatory asset

22xx. (1) The IESO may from time to time transfer all or a portion of the regulatory asset to any financing entity.

Same

(2) Upon receipt by IESO of payment in consideration of a transfer of all or a portion of the regulatory asset, the transfer shall be valid and enforceable against the IESO and the IESO shall retain no further right, title or interest in, or any obligations in respect of, the regulatory asset or in the investment asset created by the transfer.

~~**Same**~~

~~(3) Upon transfer, the financing entity acquires an investment interest and becomes an investment asset owner.~~

[NTD: suggest moving to s 24xx(2)]

Validity of transfer

23xx. (1) A transfer of a regulatory asset under this Act is a valid and enforceable sale and absolute transfer to the investment interest owner of the regulatory asset.

Confidential Draft

Same

(2) Without limiting subsection (1), any transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of IESO's right to recover the IESO funding shortfall, and not merely as a security interest, and upon the absolute transfer the transferor shall retain no right, title or interest in the regulatory asset, including all rights to recover the IESO funding shortfall.

Deemed perfection, etc.

(3) At the time a transfer of a regulatory asset is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the transferee shall have priority over any liens in favour of those persons.

PART VI
THE INVESTMENT ASSET

Effect of transfer

24xx. **(1)** ~~The first~~**Each transfer of** ~~the~~**a regulatory asset or a portion of it either creates** ~~the~~**or adds to an investment asset. [NTD: does not make sense to refer to a first transfer as may transfer to multiple entities, so there is more than one first transfer]**

Same

(2) Upon any transfer of all or a portion of the regulatory asset to a financing entity, the investment asset resulting from the transfer is immediately vested in the financing entity, free and clear of any adverse claim, and the financing entity becomes an investment interest owner and acquires an investment interest**.**

Investment asset established

25xx. (1) The investment asset constitutes a current and irrevocable property right and interest consisting, collectively, of the following rights and interests of investment interest owners:

1. The right to impose, invoice, collect, receive and recover amounts in respect of the clean energy adjustment from specified consumers, including the right to determine the clean energy adjustment in accordance with this Act.

2. The right to receive, collect and recover amounts in respect of the clean energy adjustment that are imposed, invoiced and recoverable under this Act, including

Confidential Draft

any amounts in respect of the clean energy adjustment that are held by electricity vendors or other prescribed parties.

3. All rights and entitlements under such accounts as may be prescribed by regulation and all amounts on deposit in such accounts.

4. The right to enforce the duties and obligations under this Act of each electricity vendor to impose, attribute, charge and invoice for amounts in respect of the clean energy adjustment.

5. The right to enforce the duties and obligations under this Act of each electricity vendor to collect, receive and remit amounts received by it in respect of the clean energy adjustment, including all collections and the proceeds of any enforcement action undertaken by an electricity vendor to recover payment of amounts in respect of the clean energy adjustment.

6. All rights of any kind related to any of the other property rights or interests that comprise the investment interest.

7. All revenue, collections, claims, payments, money and proceeds of or derived from the rights described in paragraphs 1 to 6, regardless of whether it is invoiced, collected and maintained together with or commingled with other revenue, collections, claims, payments, money and proceeds.

Not affected by failure to impose etc. clean energy adjustment

(1.1) An investment interest is not affected by any failure to impose, attribute, invoice, accrue or collect amounts in respect of the clean energy adjustment.

No set off, etc.

(2) The investment asset shall not be set off,

(a) by a consumer, an electricity vendor, an agent of the investment interest owner or an owner of distribution system assets in the Province;

(b) in connection with any default of a person mentioned in clause (a); or

(c) by any affiliate or successor of a person mentioned in clause (a).

Exercise of rights

(3) The rights of the investment asset owner to collect and enforce its rights and interests in, to and in respect of the investment asset against a specified consumer shall be exercised in accordance with Part III of this Act.

Confidential Draft

Collective action required

(4) If the investment interest owner owns a right or interest in the investment asset that comprises less than the entire property right and interest constituted by the investment asset, the right or interest shall only be enforced by the investment interest owner collectively and in coordination with all other investment interest owners, and any agreement among that collective in furtherance of the collective action shall be valid and binding on the investment interest owner as a collective in accordance with its terms.

Transfer of investment interest

26xx. An investment interest owner may transfer all or a portion of its rights and interests in an investment interest to any other investment interest owner, including by way of a transfer of a divided or an undivided interest, in accordance with the Financing Plan.

Validity of transfer

27xx. (1) A transfer of an investment interest under this Act is a valid and enforceable sale and absolute transfer of the investment interest and confers upon the investment asset owner a valid property right and interest in, to and under the applicable investment interest in accordance with the terms of the transfer.

Same

(2) Without limiting subsection (1), a transfer that by its terms is intended to constitute a sale or absolute transfer shall be treated for all purposes as an absolute transfer of an investment interest owner's right, title and interest in, to and under an investment interest, and not merely as a security interest, and upon such absolute transfer the transferor shall retain no right, title or interest in the investment interest, subject to the transfer, including all rights to the investment interest arising after the transfer.

Deemed perfection, etc.

(3) At the time a transfer of an investment interest is made, the transfer shall be deemed to have been and shall be perfected, vested, valid and binding as against the transferor and all other persons who have claims of any kind against the transferor.

Priority of transfer, assignment, etc.

(4) Subsection (3) applies regardless of whether the persons who have claims have received notice of the transfer and the property rights and interests acquired by the investment interest owner shall have priority over any liens in favour of such other persons.

Investment interest owner may grant security interest

28xx. (1) An investment interest owner may grant a security interest over all or a specified portion of its right, title and interest in, to and under the investment interest to or in favour of any person to secure a funding obligation.

Confidential Draft

Validity

(2) A security interest granted under this Act shall be valid and enforceable in accordance with its terms.

Perfection and priority of security interests

(3) All provisions of the *Personal Property Security Act* shall apply to the investment asset and each investment interest on the basis that it is intangible personal property, except as otherwise provided for in this section, and any granting of a security interest by the investment interest owner to secure a funding obligation shall, subject to the terms of the funding obligation, give rise to a security interest in respect of which that Act applies and may be perfected by filing a financing statement under that Act on that basis.

Proceeds

(4) All proceeds of an investment interest that are subject to the security interest and that are received by the applicable investment interest owner shall immediately be subject to the security interest and shall be perfected without any physical delivery of the proceeds, registration of any financing statement or any further act.

Perfection

(5) The security interest shall be a continuously perfected security interest and shall have priority over any other lien, created by operation of law or otherwise, that may subsequently attach to the property rights and interests in the investment interest subject to the security interest, subject to the written consent of the person to whom the security interest has been granted.

Same

(6) The person to whom the security interest has been granted shall have a perfected security interest in revenues or other proceeds that are deposited in any ccount of any electricity vendor, an agent of an electricity vendor or other person who may have commingled such revenues or other proceeds with other funds.

Notice required

(7) The secured party shall be entitled to exercise the rights of an investment interest owner only after the secured party has given notice of the enforcement of its security interest to the IESO.

Definition

(8) For the purposes of this section, a security interest is perfected when it is perfected as described in the *Personal Property Security Act*.

Confidential Draft

PART VI
MISCELLANEOUS

Appointment of agent, invoicing or collection

29xx. If a prescribed circumstance applies, the Lieutenant Governor in Council may by regulation appoint a person to carry out some or all of the obligations of an electricity vendor under this Act in the place of an electricity vendor with respect to invoicing or collection.

Not Crown agent

30xx. For greater certainty, no agent appointed under this Act is an agent of the Crown for any purpose, despite the *Crown Agency Act*.

Sequestration

31xx. (1) A court in the Province may, upon application by an investment interest owner or a secured party, order the sequestration and payment of amounts in respect of the clean energy adjustment, collections and remittances, as applicable, for the benefit of the investment interest owner or secured party by any person or entity authorized to collect amounts in respect of the clean energy adjustment, including defaults on any required remittance of amounts in respect of the clean energy adjustment, collections or remittances.

Same

(2) An order under subsection (1) does not limit any other remedies available to the applicant.

Choice of law

32xx. The law governing, as applicable, the validity, enforceability, attachment, perfection, priority and exercise of remedies with respect to the transfer of an interest or right or creation of a security interest in the regulatory asset, the investment asset, the clean energy adjustment or the undertaking of the Crown under section x shall be the laws of the Province.

Conflict

33xx. The provisions of this Act and the regulations apply despite any provision of any other Act regarding the attachment, assignment or perfection, or the effect of perfection or priority of any transfer or security interest.

No further approvals, etc.

34xx. Despite any requirement under any Act, no approvals, notices or authorizations other than those specified in this Act are required to be taken under the Financing Plan or in relation to the determination of the fair allocation amount.

Confidential Draft

Immunity

35xx. (1) No action or other proceeding for damages shall be instituted against any employee of the Province, IESO, OPG or OEB for any act done in good faith in the execution or intended execution of any duty or authority under this Act or for any alleged neglect or default in the execution in good faith of any duty or authority under this Act.

Same

(2) Despite subsections 5 (2) and (4) of the *Proceedings Against the Crown Act*, subsection (1) does not relieve the Crown of liability in respect of a tort committed by a person mentioned in subsection (1) to which it would otherwise be subject.

References in marketing materials and offering documents

36xx. No person shall include, in marketing materials or offering documents relating to the financing of funding obligations, references to any rights, obligations, guarantees or undertakings arising under section 5xx unless the prescribed requirements, if any, are satisfied.

Non-application, Financial Administration Act, s. 28[5]

37xx. Section 28 of the *Financial Administration Act* does not apply with respect to any transaction or agreement or undertaking required, permitted, contemplated or authorized, directly or indirectly, under this Act.

Regulations

38xx. The Lieutenant Governor in Council may make regulations in respect of the following matters:

1. [6]Governing anything that is required or permitted to be prescribed or that is required or permitted to be done by, or in accordance with, the regulations or as authorized, specified or provided in the regulations.

2. Defining, for the purposes of a regulation, words and expressions used in this Act that are not defined in the Act.

x. Prescribing types of payment obligations that constitute funding obligations;

x. governing the calculation [true-up amount] and how the amount is to be applied to the clean energy adjustment;

Confidential Draft

[5] FLS - see s. 51 of the Electricity Act, 1998

[6] FLS - see s. 78 (1) of the Climate Change Mitigation and Low-carbon Economy Act, 2016 - paras. 1 and 2.

x. governing the inclusion of information under this Act on invoices, which may include requiring notice to be provided by electricity vendors to specified persons regarding the adjustments;

x. governing the inclusion of information about the clean energy adjustment and any other matters provided for under this Act on invoices issued to specified consumers, including the form that the information must take and the form of the invoices and any notice to be provided to the specified consumer under this Act[7];

x. prescribing the time within which any action required by this Act may be required to be done;

x. Providing for such other matters as the Lieutenant Governor in Council considers advisable to carry out the purpose of this Act.

PART VII[8]
AMENDMENTS TO OTHER ACTS

ELECTRICITY ACT, 1998

200x. (1) Subsection 6 (1) of the *Electricity Act, 1998* is amended by adding the following clauses:

(q.0.1) to exercise the powers and rights and to perform the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and to engage in activities to facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017*, including,

(i) entering into agreements or arrangements with any person for the purposes of the *Ontario Fair Hydro Plan Act, 2017*;

(ii) engaging in activities related to making payments to and receiving payments as contemplated under the *Ontario Fair Hydro Plan Act, 2017* and to engage in related settlement activities;

(iii) engaging in activities related to the creation, transfer and administration of the regulatory asset created under the *Ontario Fair Hydro Plan Act, 2017*, which activities may include,

[7] FLS - see *OEBA s.79.17 and 88(1)(z.11) and (z.12)*

[8] FLS: These amendments are drawn from previous drafting contained in gov2016.146.e05 (which was drafted as amendments to the EA, 1998).

Confidential Draft

(iv) incurring liabilities in relation to the regulatory asset

(v) transferring the regulatory asset for consideration;

(vi) acting as a recovery agent under the *Ontario Fair Hydro Plan Act, 2017*;

200.1xx (1) Subsection 25.33 (1) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:

(c) amounts ~~paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under]~~, as may be prescribed, paid or incurred by the IESO related to the *Ontario Fair Hydro Plan Act, 2017* ~~and any related amounts; and~~; **[NTD: we understand the purpose of this section is to provide another avenue of recovery for amounts that would not otherwise be recovered as part of the IESO funding shortfall under Part V]**

(d) ~~amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.~~

(1.1) Subsection 25.33 (2) of the Act is amended by striking out "and" at the end of clause (a) and by adding the following clauses:

(c) amounts paid to or received from a [prescribed] financial services entity or [a financing entity prescribed under] the *Ontario Fair Hydro Plan Act, 2017* and any related amounts; and

(d) amounts collected from consumers who are [specified consumers within the meaning of] the *Ontario Fair Hydro Plan Act, 2017* in respect of the clean energy adjustment and any related amounts.

(2) Subsection 25.33 (3) of the Act is amended by adding the following paragraph:

4. A consumer who is,

i. a [specified consumer within the meaning of] the *Ontario Fair Hydro Plan Act, 2017,* or

ii. prescribed by the regulations [made under the *Ontario Energy Board Act, 1998]*.

Confidential Draft

(3) Clause 25.33 (4) (b) of the Act is amended by adding "or as may be required under a regulation made under the *Ontario Fair Hydro Plan Act, 2017* or the *Ontario Energy Board Act, 1998*" at the end.

(4) Subsection 25.33 (5) of the Act is amended by adding "or under the *Ontario Fair Hydro Plan Act, 2017*" at the end

201x. Section 53.1 of the Act is amended by adding the following subsections:

Same, *Ontario Fair Hydro Plan Act, 2017*

53.1 (1.1) In addition to the objects mentioned in subsection (1), the objects of Ontario Power Generation Inc. include exercising the powers and rights and performing the duties and obligations assigned to it under the *Ontario Fair Hydro Plan Act, 2017* and engaging in activities to facilitate the implementation of that Act, including entering into contracts and undertakings on behalf of financing entities, subject to the right to be paid by the financing entities for those services.

Subsidiaries, etc.

(1.2) Ontario Power Generation Inc. may create or invest in one or more subsidiaries, trusts, partnerships or special purpose entities in order to more efficiently conduct its activities or achieve its objects.

Deemed assets, entity

(1.3) Despite any other provision of this Act, the *Business Corporations Act* or any other Act,

(a) the assets and liabilities of a special purpose financing entity shall not form part of the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries; and

(b) the assets and liabilities of Ontario Power Generation Inc. or any of its subsidiaries shall not form part of the assets and liabilities of a financing entity.

Definition, financing entity

(1.4) For the purposes of this section, "financing entity" has the same meaning as in the *Fair Hydro Plan Act, 2017.*

AMENDMENTS TO ONTARIO ENERGY BOARD ACT, 1998

204x. Subsection 1 (1) of the *Ontario Energy Board Act, 1998* is amended by adding the following paragraph:

6. To facilitate the implementation of the *Ontario Fair Hydro Plan Act, 2017.*

Confidential Draft

205x. Subsection 70 (2.1) of the Act is amended by adding the following paragraph:

4. The licensee is required to comply with the *Ontario Fair Hydro Plan Act, 2017*.

206x. Section 78.1 of the Act is amended by adding the following subsection:

Same, limitation re Ontario Power Generation Inc.

(3) The determination of a payment to Ontario Power Generation Inc. under this section shall not include any consideration of amounts related to activities of Ontario Power Generation Inc. carried out in relation to the *Ontario Fair Hydro Plan Act, 2017*.

Same

(3.1) The amounts referred to in subsection (3) include, without limitation, the following:

1. Amounts related to the appointment of Ontario Power Generation Inc. as the Financial Services Manager under the *Ontario Fair Hydro Plan Act, 2017*.

2. Amounts related to the charging of fees for performing duties as the Financial Services Manager.

3. Amounts related to exercising the powers and performing the duties of the Financial Services Manager.

4. Amounts related to the consolidation of the assets and liabilities for accounting purposes of any special purpose financing entities established under and for the purposes of that Act.

Short Title - this proposal for legislation would, if approved by the Legislature, have a short title to be determined by Government.

Timing – this proposal for legislation would, if approved by the Legislature, come into force on a date to be established by Government.

Subject: FW: In advance of Wednesday's call with the IESO

Hi Jeannette,

Thank you for this. Your responses are very helpful.

I made some notes to myself (in blue) in the e-mail below. Since they will guide some of my questions on our call, I thought I would share them with you for reference.

Regards,

Lee Anne

Subject: In advance of Wednesday's call with the IESO

LeeAnne,

Here are the responses to your questions on Market Settlement. Susan Nicholson will answer the questions around accounting verbally. However, given the number of questions you had on settlement related issues, I thought it would be better to provide written responses. Of course, I am happy to discuss them further with you.

Market Administration/Settlement

Confirm/correct the following - see responses below :

Price IESO Market Participants pay comprised of:

- Electricity price:

· Electricity commodity price (HOEP) Non-dispatchable loads pay HOEP, Dispatchable loads pay MCP

· Global Adjustment Do all loads pay GA or only non-dispatchable loads paying HOEP?

- Wholesale Market Services Charges (includes IESO fee, Hourly, and Non-hourly Uplifts What are uplifts? How are they determined?, Government Programs Smart meters, for example, DR What is DR?, IESO fee)

- Transmission price

- Debt Retirement Charge

Note LDC's have "customers" and this is where you find Distribution charges and no DRC for residential customers Why is there no DRC for residential customers?, IESO's Wholesale Market Service Charge is called Wholesale Market Service Rate which is set annually by the OEB (each component set separately?) to be charged by LDC under their tariff to customers. LDCs pay the IESO Administered Market charges as invoiced and recover from customers through their approved OEB rates and tariffs. Differences in RPP (are all LDC customers RPP customers?)

collections verses commodity costs paid to the IESO are submitted monthly to the IESO to be included as a separate line set-offs to LDC invoices and the IESO holds the variance (debit/credit) Doesn't the HOEP rate flow through to consumers?

.

IESO only settles the electricity commodity price component and the related portion of the Global Adjustment – not sure what "only settles" see above we settle significantly more than commodity price component – in 2016 we settled $17.2B

Supply of electricity comes from:

Dispatchable generators – paid MCP

Non-dispatchable generators – paid MCP

I don't understand how the contracts work and what generators are under contract

1. OPG (paid 5 minute market clearing price (MCP) but settled for difference on the regulated rate set by OEB).

2. Non-utility generators (paid MCP when injecting and settled for differences. Financial settlement set by contract – contracts held by OEFC and the IESO)

3. Generation facilities including Bruce Power under contract with IESO (paid MCP when injecting and settled for differences - financial settlement set by contract)

4. Imports (paid HOEP or and under contract as in Hydro Quebec contract)

Are there are other suppliers that are paid HOEP? Fit and Micro-Fit which would not be "generation facilities" necessarily and often embedded within a LDC, merchant generators that are not under contract, a few NUGs that have not renewed contracts may be in this category too,

Portion of Global Adjustment determined by IESO driven by variances relating to #1, #2, #3 and other contracted supply above: 95.8%

What is the nature of the contracts IESO enters into? There are contracts within the IESO Administered Market for services such Ancillary Services (What is this? Does it make up part of the IESO fee?) and financial contracts for supply capacity that are not part of the IESO Administered Market but funded through GA. I don't understand this. Why are they not part of the IESO Administered Market?

Participation agreements

· IESO enters into participation agreements with all market participants (buyers and sellers) Yes PAs are entered for the IESO Administered Markets but we also have participation agreement with program participants, adherence to market rules is restricted for these MPs to rules around programs i.e. not all MRs are applicable.

· Participation agreements bind IESO and counterparty to follow market rules Yes as it relates to the IESO Administered Markets including ancillary services contracts. This has nothing to do with participants who are under supply contracts where IESO is counterparty. I don't understand this.

· Participation agreement would be the only contract IESO enters into with #1, #2, #4 above No if you are participating in the IESO Administered Markets you are a registered MPs with a PA. Unrelated, the same participant may have a separate **financial agreement** and contract with the IESO as counterparty. These are two separate and distinct treatments and should not be confused. In fact the IESO under Electricity Act has an object that there is effective separation between these two functions.

Supply contracts

· Since IESO does not buy and sell electricity, what is the contract for? (IESO paying for commitment that the counterparty will supply electricity into the IESO grid?) No we do not pay for supply of electricity through contracts. We contract for services within the IESO Administered Market all well defined in the market rules. All other contracts are financial contracts for capacity – this does not tie to any commitment within the IESO Administered Markets for the supply of electricity. The IESO administers a competitive transparent market based on bids/offers for consumption and regulation market I don't understand this

· Does the IESO negotiate the terms of these contracts? Policy is set by the Ministry of Energy in the form of directives and IESO implements the directives through financial contracts.

Buyers of electricity from IESO grid are comprised of:

· LDCs All LDCs are non-dispatchable loads

· Directly connected participants (do not necessarily need to large but typically are larger to make sense to be an MP) Directly connected participants can be dispatchable or non-dispatchable loads

The electricity commodity price paid by all buyers is HOEP. No, dispatchable loads pay MCP. There is an algorithm that determines MCP every 5 minutes based on supply/demand, bids/offers and the 12 MCPs create Hourly Ontario Energy Price (HOEP).

Non-dispatchable loads (which includes distributors, as well as municipalities, hospitals and large factories) pay HOEP

Dispatchable loads pay MCP

Although IESO determines HOEP, IESO is not really determining rates charged to

buyers because total price is a bundle of electricity at HOEP plus/minus Global Adjustment and OEB mandates that bundle must (over time) equal cost. The IESO settles the IESO Administered Market including MCP/HOEP, GA for Class A and Class B (does this cover all of the GA?), the amount for WSMC, and Transmission which are all billed to MPs (dispatchable and non-dispatchable loads?) including LDC based on their measured quantities of their delivery point meters registered with the IESO. I believe you are making reference to RPP customers of LDCs (what other types of customers does a LDC have?) which the OEB creates an RPP rate (Tier 1/ Tier 2, for conventional meters) and TOU (for smart meters) that over time (currently 6 months) adds to what the LDCs will pay the IESO for commodity (HOEP plus GA). Happy to explain further if unclear. Yes, please.

Section 2.2	Added new charge type 1421 – 'Capacity Agreement Settlement Credit' as per IMDC-36. Added new charge type 1422 – 'Capacity Agreement Penalty Settlement Amount' as per IMDC-36. Added new charge type 1423 – 'Energy Sales Agreement Settlement Credit' as per IMDC-36. Added new charge type 1424 – 'Energy Sales Agreement Penalty Settlement Amount' as per IMDC-36. Added new charge type 1471 – 'Capacity Agreement Balancing Amount' as per IMDC-36. Added new charge type 1472 – 'Capacity Agreement Penalty Balancing Amount' as per IMDC-36. Added new charge type 1473 – 'Energy Sales Agreement Balancing Amount' as per IMDC-36. Added new charge type 1474 – 'Energy Sales Agreement Penalty Balancing Amount' as per IMDC-36. Added new charge type 1467 – 'Ontario Rebate for Electricity Consumers (8% Provincial Rebate) Balancing Amount' as per IMDC-33. Added new charge type 9982 – 'Ontario Rebate for Electricity Consumers (8% Provincial Rebate) Settlement Amount' as per IMDC-33. Modified formula for charge types 147 and 148 to include charge types 1471-1474 in GA recovery.
Section 2.4	Added rounding convention for new charge types 1421-1424, 1471-1474. 1467 and 9982.

1. Introduction

1.1 Purpose

The purpose of this document is to provide the reader with the formulas and variable definitions behind each different *charge type* implemented in the *IESO Settlements* process. Furthermore, this document relates each *charge type* to the high-level description of the *settlement amount* within the *IESO market rules* and, where applicable, notes any aspects of the implementation of the *charge type* itself.

1.2 Scope

This document provides the formulas for each *charge type* implemented in the *IESO Settlements* System and those *charge types* which are currently the subject of a Functional Deferral. This document does not, however, provide the format of the information provided to *market participants* on *settlement statements* with respect to each *charge type*. For more information on these topics, the reader is directed to the following Technical Interface Document - "Format Specification for Settlement Statement Files and Data Files".

1.3 Who Should Use This Document

This document is intended for *market participants* in the *IESO-administered markets* who are seeking information regarding the calculations of *settlement amounts* related to each *charge type*. Depending on the activity of the *market participant* in the various *IESO-administered markets*, these *charge types* may have varying degrees of relevance to each *market participant* with respect to their financial settlements.

1.4 Conventions

Usage of an italicized term shall take on the meaning ascribed to that term in the *IESO market rules*.

Unless otherwise noted, usage of variable subscripts and superscripts within this document shall mirror the same usage with in Chapter 9 of the *IESO market rules*. One notable exception is the usage of notation to sum across *settlement amounts* for *charge type* "c". This is further noted in Section 2.2 of this document.

1.5 How This Document is Organized

This document is divided in 6 major subsections as follows:

Section 2.1: A table containing a description of each variable used within **Section 2.2**.

Section 2.2: A table describing *IESO charge types* and equations that are part of an active *IESO-administered market*.

Section 2.3: This section contains a description of rounding conventions for variables described in **Section 2.1**.

Section 2.4: This section contains a description of rounding conventions for *charge type* calculations described in **Section 2.2**.

Section 2.5: This section provides a description of *physical bilateral contract quantities*, their usage by the settlements system, and their use by *market participants* as a vehicle for transferring components of *hourly uplift*.

Section 2.6: This section describes how Day-Ahead import, export and linked wheel transactions are subject to an "Offer Price Test" in order to determine if they are exempt from the Day-Ahead Failure Charges (*charge types*, 1135, 1136 and 1134).

– End of Section –

2. IESO Charge Types and Equations that are Part of an Active IESO-Administered Market

2.1 Variable Descriptions

The following table contains descriptions of each variable used within Section 2.2, describing *IESO charge types* and equations that are part of an active *IESO-administered market*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
This column denotes the abbreviated name of each variable used within Section 2.2.	The full name of each variable used within Section 2.2.	A brief description of each variable used within the formulas illustrated within Section 2.2.	The relevant reference to the variable in question within the *IESO market rules*. The format of each reference is: [Chapter] [Section no.] e.g. Chapter 9 Section 3.1.6 would appear as: 9.3.1.6	This section notes any aspects of the implementation of the variable within the *IESO settlements* process which are otherwise not described in the *IESO market rules* – OR – refers the reader to the appropriate documentation.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
AAD	Adjustment Account Disbursement	The total dollar value of all disbursements from the *IESO adjustment account* authorized by the *IESO Board* in the current *energy market billing period.*	9.6.18.6	Same as *IESO* market rules.
$AQEI_{k,h}^{m,t}$	Allocated Quantity of Energy Injected	Allocated quantity in MWh of *energy* injected by *market participant* 'k' at *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.9	Represents only those quantities derived from loss-adjusted and totalized *metering data.* Quantities derived from *interchange schedule data* is captured in the variable SQEI (see below).
$AQEW_{k,h}^{m,t}$	Allocated Quantity of Energy Withdrawn	Allocated quantity in MWh of *energy* withdrawn by *market participant* 'k' at *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.9	Represents only those quantities derived from loss-adjusted and totalized *metering data.* Quantities derived from *interchange schedule data* is captured in the variable SQEW (see below).
$AQOR_{r,k,h}^{m,t}$	Allocated Quantity of Operating Reserve	Allocated quantity in MW of *class r reserve* for *market participant* 'k' at *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.9	Same as *IESO market rules* and equivalent to DQSR (see below).
BE	Energy Offers	A matrix of 'n' *price-**quantity** pairs* offered by *market participant* 'k' to supply *energy* during *settlement hour* 'h'. *Offer prices* in this matrix may be altered to a **"lower limit"** for the purposes of calculating	9.3.5.2, 9.3.5.6 and 9.3.5.7	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		charge type 105 (Congestion Management *Settlement* Credit for *Energy)* where any such *offer price*: 1) Is associated with a *generation facility* located within Ontario; or imports and 2) Is less than a specified **"lower limit"** where such limit is the lesser of $0.00/MWh and the *energy market price* for the applicable *dispatch interval*. The situational criteria and threshold for applying such adjustments are further described in *IESO market rules* section 9.3.5.6. and 9.3.5.7.		
BL	Energy Bids	A matrix of 'n' *price-quantity pairs* bid by *market participant* 'k' to withdraw *energy* by a *dispatchable load* during *settlement hour* 'h'.	9.3.5.2	Same as *IESO market rules.*
BR_r	Operating Reserve Offers	A matrix of n *price-quantity pairs* offered by *market participant* 'k' to supply class r *operating reserve* during *settlement hour* 'h'.	9.3.5.2	Same as *IESO market rules*.
$BCQ_{s,k,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy bought	*Physical bilateral contract quantity* of *energy* in MWh bought by *buying market*	9.3.1.6	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		participant 'k' from *selling market participant* 's' at *RWM* or *intertie metering point* 'm' for each *metering interval* 't' in *settlement hour* 'h'.		
$BCQ_{k,b,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy sold	*Physical bilateral contract quantity* of *energy* in MWh sold by *selling market participant* 'k' to *buying market participant* 'b' at *RWM* or *intertie metering point* 'm' for each *metering interval* 't' in *settlement hour* 'h'.	9.3.1.6	Same as *IESO market rules*.
CGC	Submitted Combined Guaranteed Costs	A financial amount consisting of fuel cost components defined on a *per-start* basis for a given *generation unit* calculated in a manner consistent with the applicable *market manual*, and encompassing the following elements: 1) Fuel and operation and maintenance (O&M) costs associated with unit synchronization to the *IESO-controlled grid* for a given start-up event (costs submitted via *IESO* portal). 2) Fuel and O&M costs associated with moving the *generation unit* from a valid start to its *minimum loading point* (costs submitted via *IESO* portal).	9.4.7B	Same as *IESO market rules*.
$DA_BE_{k,h}^{m,t}$	*Energy Offer* submitted into the *schedule of record at a delivery point*	*Energy offers* submitted in day-ahead, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *delivery point* 'm' during *metering interval*	9.3.1.2B.7	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price-quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2		
$DA_BE_{k,h}^{i,t}$	*Energy Offer* submitted into the *schedule of record at a intertie metering point*	*Energy offers* submitted in day-ahead, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price-quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2	9.3.8A.2B and 9.3.8B.2	Same as *IESO market rules*
$DA_BL_{k,h}^{i,t}$	*Energy* Bids submitted into the *schedule of record*	Energy bids submitted in day-ahead, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price-quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2	9.3.1.2B.7 and 9.3.8D.2	Same as *IESO market rules*
DA_CGC	Submitted Day-Ahead Combined Guaranteed Costs	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT.	9.4.7D.1	Same as *IESO market rules*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		A financial amount consisting of fuel cost components defined on a *per-start* basis for a given *generation unit* calculated in a manner consistent with the applicable *market manual*, and encompassing the following elements: 1) Fuel and operation and maintenance (O&M) costs associated with unit synchronization to the *IESO-controlled grid* for a given start-up event (costs submitted via *IESO* portal). 2) Fuel and O&M costs associated with moving the *generation unit* from a valid start to its *minimum loading point* (costs submitted via *IESO* portal).		
$DA_DQSI_{k,h}^{m,t}$	*Schedule of Record* Dispatch Quantity of Energy Scheduled for Injection at a delivery point	Day-ahead constrained quantity scheduled for injection by *market participant* 'k' at *delivery point* 'm' during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2A	Same as *IESO market rules.*
$DA_DQSI_{k,h}^{i,t}$	*Schedule of Record* Dispatch Quantity of Energy Scheduled for Injection at an intertie metering point	Day-ahead constrained quantity scheduled for injection by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2A	Same as *IESO market rules.*
$DA_DQSW_{k,h}^{i,t}$	*Schedule of Record* Dispatch Quantity of Energy Scheduled for Withdrawal	Day-ahead constrained quantity scheduled for withdrawal by *market participant* 'k' at *intertie metering point* 'i' during metering interval 't' of settlement hour 'h'	9.3.1.2A	Same as *IESO market rules.*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$DA_ELMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the export zone	Day-ahead constrained schedule intertie price at the *delivery point* 'm' of the sink for the export transaction during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2A	Same as *IESO market rules.*
$DA_ILMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the import zone	Day-ahead constrained schedule intertie price at the *delivery point* 'm' of the source for the import transaction during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2A	Same as *IESO market rules.*
$DA_SNLC_{k,h}^{m}$	Speed-no-load costs submitted into the *schedule of record at a delivery point*	As-offered *speed-no-load cost* associated with *three-part offers* for a given *settlement hour* 'h' for *market participant* 'k' at *delivery point* 'm'	9.3.1.2B.7	Same as *IESO market rules.*
$DA_SNLC_{k,h}^{p}$	Speed-no-load costs submitted into the *schedule of record at a pseudo-unit*	As-offered *speed-no-load cost* associated with *three-part offers* for a given *settlement hour* 'h' for *market participant* 'k' at *pseudo-unit* 'p'	9.3.1.2B.7	Same as *IESO market rules.*
$DA_SUC_{k,h}^{m}$	Start-up costs submitted into the *schedule of record at a delivery point*	As-offered *start-up cost* associated with *three-part offers* for a given *settlement hour* 'h' for *market participant* 'k' at *delivery point* 'm' where *settlement hour* 'h' is the initial hour in the DACP start event	9.3.1.2B.7	Same as *IESO market rules.*
$DA_SUC_{k,h}^{p}$	Start-up costs submitted into the *schedule of record at a pseudo-unit*	As-offered *start-up cost* associated with *three-part offers* for a given *settlement hour* 'h' for *market participant* 'k' at *pseudo-unit* 'p' where *settlement hour* 'h' is the initial hour in the DACP start event	9.3.1.2B.7	Same as *IESO market rules.*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$DIPC_{k,h}^{m,t}$	Derived Interval Price Curve	*Energy price curves* derived per interval from submitted hourly day-ahead PSU *energy offers*, represented as a N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *delivery point* 'm' (where 'm' is a CT or ST delivery point) during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2	9.3.1.11	Same as *IESO market rules*. Refer to Market Manual 9.5, Appendix B for a detailed description of DIPC.
$DIGQ_{k,h}^{m,t}$	Derived Interval Guaranteed Quantity	Portion of the day-ahead constrained quantity scheduled for injection that is eligible for DA-PCG for *market participant* 'k' at *pseudo unit* 'p' during *metering interval* 't' of *settlement hour* 'h'	9.3.1.11	Same as *IESO market rules*. Refer to Market Manual 9.5, Appendix C for a detailed description of DIGQ.
$DQSI_{k,h}^{m,t}$	Dispatch Quantity of Energy Scheduled for Injection	Dispatch quantity of *energy* scheduled for injection in the *real-time schedule* by *market participant* 'k' at location 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3 and 9.3.1.4A	Same as *IESO market rules*. N.B. Location m is further subject to the functional deferral described in Section 3.1.4A of Chapter 9 of the *market rules* (ref. 9.3.1.4A).
$DQSR_{r,k,h}^{m,t}$	Dispatch Quantity Schedule of Operating Reserve	Dispatch quantity schedule of *class r reserve* for *market participant* 'k' at location 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.4 and 9.3.1.4A	Same as *IESO market rules*. N.B. Location m is further subject to the functional deferral described in Section 3.1.4A of Chapter 9 of the *market rules* (ref. 9.3.1.4A).

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$DQSW_{k,h}^{m,t}$	Dispatch Quantity of Energy Scheduled for Withdrawal	Dispatch quantity of *energy* scheduled for withdrawal in the *real-time schedule* by *market participant* 'k' at location 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3 and 9.3.1.4A	Same as *IESO market rules*. N.B. Location m is further subject to the functional deferral described in Section 3.1.4A of Chapter 9 of the *market rules* (ref. 9.3.1.4A).
DRACP	Demand Response Auction Clearing Price	The *demand response auction clearing price* for the *commitment period* and zone.	N/A	Refer to Market Manual 5.5
$DRACP_h$	Hourly Demand Response Auction Clearing Price	The *demand response auction clearing price* for the *commitment period* and zone divided by the hours of availability for a day.	N/A	Refer to Market Manual 5.5
$DRBOC_k$	Demand Response Buy-Out Capacity	The buy-out capacity is an amount that is being reduced from the *demand response capacity obligation* for *demand response market participant* 'k'.	N/A	Refer to Market Manual 5.5
$DRCO_k$	Demand Response Capacity Obligation (MW)	The *demand response capacity obligation* amount for the *commitment period* and zone for *demand response market participant* 'k'. The initial capacity obligation is acquired through the *demand response auction* and subject to being reduced via the buy-out process.	N/A	Refer to Market Manual 5.5

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$DREBQ_k$	Demand Response Energy Bid Quantity	The *demand response energy bid* quantity calculated for *demand response market participant* 'k' as the sum of the quantity of *demand response capacity* provided by all participating demand response resources.	N/A	Refer to Market Manual 5.5
DRNPF	Demand Response Non-Performance Factor	The non-performance factor as listed in Section 7.1 of Market Manual 12 that corresponds and applies to the month being settled.	N/A	Refer to Market Manual 5.5
DRSQty	Demand Response Scheduled Quantity	Calculated as (Total Bid Qty – Schedule) where 'Total Bid Qty' is the maximum quantity of the *demand response energy bid* and where 'Schedule' is the real-time constrained schedule quantity.	N/A	Refer to Market Manual 5.5
EEQ	Excluded Energy Quantity	The total volume of *energy* (MWh) supplied to Fort Frances Power Corporation Distribution Inc. by Abitibi-Consolidated Inc. during the month.	N/A – subject to regulations made pursuant to Bill 100.	N/A – See regulations.
$EGEI_k$	Embedded Generator Energy Injection	The total volume of *energy* (MWh) supplied by *embedded generator*s during the month to *distributors* who are *market participants* and to all embedded distributors to whom the *market participant* 'k' is the host *distributor*, adjusted for losses as required by the *OEB*, Retail Settlement Code.	N/A – subject to regulations made pursuant to Bill 100.	N/A – See regulations.
$EIM_{k,h}$	Operating Profit Function for the IMPORT of Energy	This Operating Profit function is used for the calculation of the Intertie Offer/Bid Guarantee	9.3.8A	$EIM_{k,h}$ IS NOT A VARIABLE

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
	under the Intertie Offer/Bid Guarantee Settlement Credit	Settlement Credit (IOBG) with respect the IMPORT of *energy*.		$EIM_{k,h}$ is the output of a particular usage of the Operating Profit (OP) function defined within Chapter 9, Section 3.8A. $EIM_{k,h}$ Input variables into the Operating Profit (OP) Function include: MQSI, EMP, and BE.
$EMP_h^{i,t}$	5-minute Energy Market Price at the Interties	Energy *market price* applicable to *intertie metering point* 'i' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$EMP_h^{m,t}$	5-minute Energy Market Price within Ontario	Energy *market price* applicable to *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$EMP_h^{REF,t}$	5-minute Energy Market Reference Price	Reference energy *market price* used to value losses in the calculation of the *Transmission Charge Reduction Fund*[1] during in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3 and 9.3.6.2	Same as *IESO market rules*.
ETS	Export Transmission Service Tariff Rate	Export Transmission Service Tariff Rate in units of $/MWh.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
FP_h^m	Fixed Energy Rate	A fixed *energy* rate for all *metering intervals* in *settlement hour* 'h'.	N/A – subject to regulations made pursuant to *Ontario Energy*	N/A – See regulations.

[1] *Market Rules* ref.: Section 3.6.2 of Chapter 9.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
			Board Act, 1998 until March 31, 2005 and by the *OEB* under such regulations commencing April 1, 2005.	
FPC_h^m	Rate for a designated group of *charge types* (see description of *charge type* 141)	This variable is reserved for *charge type* 141 and applies with respect to charges for the period commencing December 1, 2002 and ending March 31, 2005. See Ontario Regulation 436/02 and Ontario Regulation 98/05.	N/A – subject to regulations made pursuant to *Ontario Energy Board Act, 1998*.	N/A – See regulations
GA – $AQEW_{g,k,h,M}^{m,t}$	Allocated Quantity of Energy Withdrawn for elements of the Global Adjustment distribution	Allocated quantity in MWh of *energy* withdrawn by *market participant* or Distributor 'k' at *RWM* 'm' in *metering interval* 't' of *settlement hour* 'h' in month 'M' for element "g" Where 'g' is 1 for Class A Market Participant or Consumer load, and 2 for *energy* withdrawn by Generator 'k' in the course of providing Ancillary Services.		
GRP	Generator Regulated Price	A regulated price ($/MWh) with respect to output of OPG's regulated generating stations, set by the *OEB*.	N/A – subject to regulation by the Ontario Energy Board.	N/A – See regulations

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$HOEP_h$	Hourly Ontario Energy Price	*Hourly Ontario Energy Price* in *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$IOG_FV_{k,h}^{i}$	IOG Floor Value	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT. The IOG_FVk,hi is a floor value (in dollars to the nearest cent) derived from: • The day-ahead offer prices for the import transaction submitted by the *market participant* over the range of the *pre-dispatch of record* constrained quantity scheduled for that import transaction; and • *Real-time* offer prices for the import transaction at the corresponding location in the corresponding *settlement hour* for any additional *energy* scheduled above and beyond the *pre-dispatch of record* constrained quantity scheduled for that import transaction: **NOTE:** The $IOG_FV_{k,h}^{i}$ is formulated in the manner described in Chapter 9, Section 3.8A.8 of the *IESO market rules* and is used in the formulation of the intertie offer guarantee adjustment (see also, Section 2.2 entry for	9.3.8A.8	Same as *IESO market rules* See Chapter 9, Section 3.8A.8 for details concerning its formulation.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		charge type 1137 within this document).		
$LCD_{k,h}^{m}$	Line Connection Demand (KW)	Billing Demand for Line Connection Transmission Service (KW) for *transmission customer* 'k' at transmission delivery point 'm' during *settlement hour* 'h' in which $LCD_{k,h}^{m}$ denotes the non-coincident peak demand for the month.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
MC_{h}^{m}	Minimum Consumption	Calculation of the self-induced dispatchable load CMSC clawback under Business Rule 2. The minimum consumption is equal to the quantity in the price quantity pair where the bidding price is MMCP (i.e., $2000) at *RWM metering point* 'm' for settlement hour 'h'.	9.3.5.1A	
MI	Ordered matrix of $MQSI_{k,h}^{i,t}$ and corresponding IOG *settlement amounts*	Used for the calculation of the IOG OFFSET *settlement amount*. A matrix of X pairs of *market schedule* quantities scheduled for injection by *market participant* 'k' at all *intertie metering points* 'i' in *metering interval* 't' of *settlement hour* 'h' ($MQSI_{k,h}^{i,t}$) paired with the corresponding component of the intertie offer guarantee settlement credit for each *intertie metering point* 'i'. See equation in Chapter 9, Section 3.8A.4 of the *IESO market rules* for further details.	9.3.8A.4	Same as *IESO market rules*.
$MLP_{k,h}^{m,t}$	Minimum Loading Point	Minimum output of *energy* the *market*	9.3.1.2B.7	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		participant 'k' at *delivery point* 'm' can maintain without ignition support in *metering interval* 't' of *settlement hour* 'h'		
$MLP_CONS_{k,h}^{m,t}$	Minimum Loading Point for a steam turbine resource or a combustion turbine resource associated to a pseudo unit	Minimum output of *energy* the *market participant* 'k' at *delivery point* 'm' can maintain without ignition support in *metering interval* 't' of *settlement hour* 'h'	9.3.1.2B.7	Same as *IESO market rules.* Refer to Market Manual 9.4, Section 4.1.2.2 for a detailed description of constraints applied for PCG eligible combined cycle plants.
$MQSI_{k,h}^{m,t}$	Market Quantity Scheduled for Injection	Market quantity scheduled for injection in the *market schedule* by *market participant* 'k' at *RWM* or *intertie metering point* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules.*
$MQSI\{adj\}_{k,h}^{m,t}$	Adjusted Market Quantity Scheduled for Injection	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT. Used for the calculation of the IOG OFFSET *settlement amount*. $MQSI\{adj\}_{k,h}^{i,t}$ is each (and where applicable, adjusted) quantity of *energy* scheduled for injection in the *market schedule* by *market participant* 'k' at an *intertie metering point* 'i' in *metering interval* 't' of *settlement hour* 'h' corresponding with each quantity, $MQSI_{x*,k,h}^{i,t}$	9.3.8A.4	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		in matrix MI, row x*.		
$MQSW_{k,h}^{m,t}$	Market Quantity Scheduled for Withdrawal	Market quantity scheduled for withdrawal in the *market schedule* by *market participant* 'k' at *RWM* or *intertie metering point* 'm' in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.3	Same as *IESO market rules*.
$NSD_{k,h}^{m}$	Network Service Demand (KW)	The Billing Demand for Network Transmission Service (KW) is defined as the higher of: transmission customer coincident peak demand (KW) in the hour of the month when the total hourly demand of all PTS customers is highest for the month; and 85% of the customer peak demand in any hour during the peak period 7 AM to 7 PM (local time) on *business days* defined by the *IESO*. For the purposes of determining business days for calculating transmission charges, the *IESO* uses the holidays identified by the Ontario Energy Board. The peak period hours will be between 0700 and 1900 hours Eastern Standard Time during winter (i.e. during standard time) and 0600 to 1800 hours during summer (i.e. during daylight savings time), in conformance with the meter time standard used by the *IESO*	N/A	Subject to the OEB "Ontario Transmission Rate Order".

		settlement systems.		
ONPAO	Ontario Power Generation Non-Prescribed Assets Output	OPG's Non-Prescribed Assets are those generation assets operated and controlled by Ontario Power Generation in service as of January 1, 2006, excluding Lennox Generating Station, that are not prescribed assets under section 78.1 of the *Ontario Energy Board Act, 1998* as amended by the "Electricity Restructuring Act, 2004". ONPAO refers to the generation output from OPG's Non-Prescribed Assets, over each hour of the quarter adjusted to take account of volumes sold through forward contracts in effect as of January 1, 2005. For greater certainty, any output from ONPA resulting from fuel conversion by Ontario Power Generation in ONPA, or incremental output from ONPA resulting from refurbishment or expansion is to be excluded from ONPAO. Incremental Output is defined as: generation output x (new total installed capacity – installed capacity as of January 1, 2006) / new total installed capacity	N/A	The formula for calculating the OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
OP	Operating Profit Function	The Operating Profit function is used for the calculation of the Congestion Management Settlement Credit (CMSC) with respect to constrained on/off payments for *energy*, *operating reserve*. It is also used for the calculation of the Day-Ahead Production Cost Guarantee components, the Day-Ahead Generator Withdrawal Charge, the Day-Ahead Import and Export failure charges, and the Import Offer Guarantee Settlement Credit.	9.3.5.2 and 9.3.8A.2	OP IS NOT A VARIABLE OP is a mathematical function defined within Chapter 9, section 3.5.2. of the *IESO market rules* Input variables include: MQSI, MQSW, SQROR AQEI, AQEW, AQOR SQEI, SQEW, DSQI, DSQW, DSQR DA_DQSI, DA_DQSW, PD_DQSI, PD_DQSW BE, BL, BR_r PD_BE, PD_BL DA_BE, DA_BL EMP MLP, MLP CONS DIPC OPCAP OP is also used within Chapter 9, Section 9.8A.2 of the *IESO market rules* to derive the Energy Import ($EIM_{k,h}$) sub-component of the Intertie Offer Settlement Credit

Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
				(IOG) using the following input variables: MQSI BE EMP
$OPCAP_{k,h}^{m,t}$	Operating Capacity	De-rating of the generation unit by *market participant* 'k' at *delivery point* 'm' in *metering interval* 't' of *settlement hour* 'h'	9.3.1.2B.7	Same as *IESO market rules.*
$OPE\{adj\}_{k,h}^{i}$	Adjusted CMSC component for *energy* used in the DA-Ahead IOG	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT. This congestion management *settlement* credit *settlement amount* (CMSC) component is specifically used in the calculation of the Day-Ahead IOG for import transactions that are subject to a *constrained-on event* in the *real-time market.* $OPE\{adj\}_{k,h}^{i}$ is an adjusted component of The congestion management *settlement* credit *settlement amount* (CMSC) for *market participant* 'k' at *intertie metering point* 'i' for *settlement hour* 'h' in which the constrained schedule is the lesser of $PDR_DQSI_{k,h}^{i,t}$ or $DQSI_{k,h}^{i,t}$ but in all instances, greater than or equal to $MQSI_{k,h}^{i,t}$.	9.3.8A.2A	'OP' is a mathematical function used within Chapter 9, Section 9.3.8A.2A of the *IESO market rules* to derive Day-Ahead Intertie Offer Guarantee. Please see the *market rules* for information regarding its formulation.
ORL	Ontario Power Generation	For the period May 1, 2006 to April 30, 2007	N/A	The formula for calculating the

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
	Revenue Limit	ORL is equal to $46/ MWh. For the period May 1, 2007 to April 30, 2008 ORL is equal to $47/ MWh. For the period May 1, 2008 to April 30, 2009 ORL is equal to $48/ MWh.		OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).
PAA	Pilot Auction Amount	Refers to the Pilot Auction administered by the *Ontario Power Authority* in the first half of 2006. The volume in MWh over each hour in the quarter that is sold by Ontario Power Generation through the PA.	N/A	The formula for calculating the OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).
PAORL	Pilot Auction Ontario Power Generation Revenue Limit	For the period May 1, 2006 to April 30, 2007 PAORL is equal to $51/ MWh. For the period May 1, 2007 to April 30, 2008 PAORL is equal to $52/ MWh. For the period May 1, 2008 to April 30, 2009 PAORL is equal to $53/ MWh.	N/A	The formula for calculating the OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).
PAP	Pilot Auction Price	The weighted average auction price in $/ MWh over each hour of the quarter realized for the PAA by Ontario Power Generation.	N/A	The formula for calculating the OPG Rebate is subject to Ministerial Directive made under Order-in-Council 1062/2006 (May 17, 2006).

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$PB_IM_h^t$	Price bias adjustment factor for import transactions	Price bias adjustment factor for import transactions in effect during *metering interval* 't' of *settlement hour* 'h'.	9.3.8C.3	Same as *IESO market rules*
$PB_EX_h^t$	Price bias adjustment factor for export transactions	Price bias adjustment factor for export transactions in effect during *metering interval* 't' of *settlement hour* 'h'.	9.3.8C.5	Same as *IESO market rules*
$PD_BE_{k,h}^{i,t}$	*Energy Offer* submitted into the Pre-dispatch	*Energy offers* submitted in Pre-dispatch, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2	9.3.1.2D	Same as *IESO market rules.*
$PD_BL_{k,h}^{i,t}$	*Energy* Bid submitted into the Pre-dispatch	Energy bids submitted in *pre-dispatch*, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2	9.3.1.2D	Same as *IESO market rules.*

	intertie metering point	*intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'.		
$PD_DQSW_{k,h}^{i,t}$	*Pre-dispatch* quantity scheduled for withdrawal at an *intertie metering point*	*Pre- dispatch* constrained quantity scheduled for withdrawal by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'.	9.3.1.2C	Same as *IESO market rules*
$PD_ELMP_{h}^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the export zone	*Pre-dispatch* constrained schedule intertie price at the *delivery point* 'm ' of the sink for the export transaction during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2C	Same as *IESO market rules.*
$PD_EMP_{h}^{m,t}$	Pre-dispatch energy market price for Ontario	*Pre-dispatch* projected *energy market price* applicable to all *delivery points* 'm' in the Ontario zone in *metering interval* 't' of *settlement hour* 'h'.	9.3.1.2C	Same as *IESO market rules*
$PD_ILMP_{h}^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the import zone	*Pre-dispatch* constrained schedule intertie price at the *delivery point* 'm' of the source for the import transaction during *metering interval* 't' of *settlement hour* 'h'	9.3.1.2C	Same as *IESO market rules.*
$PDF_{k,m,d}$	Peak Demand Factor	The Peak Demand Factor for Class A Market Participant or Distributor 'k' for month 'm' with effectiveness ratio 'd'.	N/A – subject to regulation by the *Ontario Energy Board*	N/A – See regulations.
$PDR_BE_{k,h}^{i,t}$	*Energy Offer* submitted into the *pre-dispatch of record*	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT.	9.3.1.2B	Same as *IESO market rules*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
		Energy offers submitted into the *pre-dispatch of record*, represented as an n by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price-quantity pair*, where *offered prices* are in column 1 and *offered quantities* are in column 2.		
$PDR_DQSI_{k,h}^{i,t}$	*Pre-dispatch of record* dispatch quantity scheduled for injection at an *intertie metering point*	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT. *Pre-dispatch of record* constrained quantity scheduled for injection by *market participant* 'k' for an import transaction at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'.	9.3.1.2A	Same as *IESO market rules*
$PDR_DQSI_{k,h}^{m,t}$	*Pre-dispatch of record* dispatch quantity scheduled for injection at a *delivery point*	EFFECTIVE OCTOBER 13, 2011, THIS VARIABLE IS NO LONGER USED IN THE CALCULATION OF ANY SETTLEMENT. *Pre-dispatch of record* constrained quantity scheduled for injection by *market participant* 'k' at *delivery point* 'm' during *metering interval* 't' of *settlement hour* 'h'.	9.3.1.2A	Same as *IESO market rules*

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$PGS_{h,M}$	Allocated Quantity of Energy Withdrawn by OPG at Beck Pump Generating Station	Allocated quantity in MWh of *energy* withdrawn by OPG at Beck Pump Generating Station in *metering interval* 't' of *settlement hour* 'h' for month 'M'.		
$PROR_{r,h}^{m,t}$	5-minute Operating Reserve Price	*Market price* in $/MW of *class r reserve* in *metering interval* 't' of *settlement hour* 'h' at *RWM* 'm' or *intertie metering point* 'm'.	9.3.1.4	Same as *IESO market rules*.
$PST_{k,h}^{p,t}$	Steam turbine portion from Daily Generator Data	The percentage of the *pseudo-unit*'s schedule that relates to the steam turbine in association with *offer k* for *market participant* 'k' at *pseudo unit* 'p' during *metering interval* 't' of *settlement hour* 'h'	7.2.2.2	Same as *IESO market rules*.
PTS-L	Provincial Transmission Service Line Connection Service Rate ($/KW)	Line Connection Transmission Tariff Service Rate in units of dollars per kilowatt.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
PTS-N	Provincial Transmission Service Network Service Rate ($/KW)	Network Transmission Tariff Service Rate in units of dollars per kilowatt.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
PTS-T	Provincial Transmission Service Transformation Connection Service Rate ($/KW)	Transformation Connection Service Transmission Tariff Rate in units of dollars per kilowatt.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
$QTR_{k,h}^{i,j}$	Quantity of Transmission Rights Owned	Quantity of TRs in MW assigned to *market participant* 'k' for transmission from injection *TR zone* 'i' to withdrawal *TR zone* 'j'.	9.3.1.8 and 8.4.2	Same as *IESO market rules*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
RPP_l	Regulated Price Plan	A fixed *energy* rate for all *metering intervals* based on consumption level l.	N/A – subject to regulation by the *Ontario Energy Board*	N/A – See regulations.
RQ	Reallocate Quantity	A quantity derived from a *physical bilateral contract quantity* ($BCQ_{k,b,h}^{m,t}$ or $BCQ_{s,k,h}^{m,t}$) in order to reallocate a component of *hourly uplift* from the *buying market participant* to the *selling market participant* in direct proportion to the size of the *physical bilateral contract.*	N/A	See hourly uplift charge types in Section 2.2
$SQEI_{k,h}^{i,t}$	Scheduled Quantity of Energy Injected at an *intertie metering point*	Scheduled quantity in MWh of *energy* injected by *market participant* 'k' at *intertie metering point* 'i' for each *metering interval* 't' in *settlement hour* 'h'.	9.3.1.9	This variable is a sub-set of variable AQEI described in Section 3.1.9 of Chapter 9 of the *market rules*, specifically referring to those quantities derived from *interchange schedule data*.
$SQEW_{k,h}^{i,t}$	Scheduled Quantity of Energy Withdrawn at an *intertie metering point*	Scheduled quantity in MWh of *energy* withdrawn by *market participant* 'k' at *intertie metering point* 'i' for each *metering interval* 't' in *settlement hour* 'h'.	9.3.1.9	This variable is a subset of variable AQEW described in Section 3.1.9 of Chapter 9 of the *market rules*, specifically referring to those quantities derived from *interchange schedule data*.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
$SQROR_{r,k,h}^{m,t}$	Scheduled Quantity of class r Operating Reserve	Market Schedule quantity in MW of *class r reserve* for *market participant* 'k' in *metering interval* 't' of *settlement hour* 'h' at *RWM* 'm'.	9.3.1.4	Same as *IESO market rules*.
$TCD_{k,h}^{m}$	Transformation Connection Demand (KW)	Billing Demand for Transformation Connection Transmission Service (KW) for *transmission customer* 'k' at transmission delivery point m during *settlement hour* 'h' in which $TCD_{k,h}^{m}$ denotes the non-coincident peak demand for the month.	N/A	Subject to the OEB "Ontario Transmission Rate Order".
$TD_{k,h,c}$	Total Market Settlement Amount	Total *settlement amount* (dollars) for the market used in *hourly uplift* and calculations for various other non-hourly *settlement amounts* for *market participant* 'k' or *transmission customer* 'k' during *settlement hour* 'h' with respect to *charge type* 'c'.	N/A	This is purely a notational term is used within the documentation to describe the aggregation of various *settlement amounts*. A summation across *charge type* 'c' denotes an aggregation of all *settlement amounts* for that *charge type* for the time period concerned. e.g.: $\sum_{c}^{T}$ indicates a summation of all *settlement amounts* for *charge type* 'c' during all *metering intervals* 'T'.
TLQ	Threshold Load Quantity	A threshold (kWh) with respect to monthly consumption of regulated customers, set by the *OEB*.	N/A – subject to regulation by the *Ontario Energy*	N/A – See regulations.

Key to the Table Below				
Variable used within Section 2	**Data Description**	**Description**	**Market Rules Reference**	**Relation to the corresponding variable description within the IESO Market Rules**
			Board.	
TP_c	Tariff price	A stipulated rate ($/MWh, $/KW) used in the calculation of a specific *charge type* 'c'.	N/A	This is purely a notational term is used within the documentation to describe the unique per MW or per MWh rate applied to specific quantities in order to calculate various *settlement amounts*.
TRMP	TR Market Clearing Price	The price of each *transmission right* in a single round of a *TR auction*.	8.4.15	Same as *IESO market rules*.
TRCAD	TR Clearing Account Disbursements	The total dollar value of all disbursements from the *TR clearing account* authorized by the *IESO Board* in the current *energy market billing period*.	9.4.7.2	Same as *IESO market rules.*
$X_h^{m,t}$	Settlement Floor Price for exports	A *settlement* floor price for *energy* applicable to *intertie metering point* 'm' *metering interval* 't' in *settlement hour* 'h' as set in the applicable *market manual*. The need for a *settlement* floor price other than *MMCP* shall remain in effect only until floor prices for *energy offers* from *registered market participants* that are *variable generators* or nuclear *generators* go into effect.	9.3.1.3	Same as *IESO market rules*

2.2 Charge Types and Equations

The following table contains the *IESO charge types* and equations that are part of an active *IESO-administered market*.

Key to the Table Below	
Charge Type Number	The designation number for each *charge type* enumerated below – which correspond to the *charge type* numbers used on *settlement statements* and *invoices*.
Charge Type Name	The name of the *charge type*.
Settlement Amount Acronym	The abbreviated name of the variable used to describe the *settlement amount* within the *IESO market rules*.
Market Rules Refer.	The relevant reference to the variable in question within the *IESO market rules*. The format for each reference is: [Chapter] [Section number] For example: “Chapter 9 Section 3.1.6” would appear as: 9.3.1.6
Equation	The equation used by the *IESO settlements process* to calculate the *settlement amount* related to each *charge type*.

Key to the Table Below	
Settlement Resolution	The level of granularity by which the *IESO settlements process* calculates the *settlement amount* (for which the *charge type* is related), and provides the supporting data in the settlement data file. Where: • "Interval" means that the calculations are performed on the basis of each relevant, 5-minute *metering interval*; • "Hourly" means that the calculations are performed on the basis of each *settlement hour*; • "Daily" means that the calculations are performed on the basis of each calendar day; • "Monthly" means that the calculations are performed on the basis of a calendar month (equivalent to a real-time market *billing period*); • "Quarterly" means that the calculations are performed on the basis of 3 month intervals; • "Yearly" means that the calculations are performed on the basis of a calendar year.
Cashflow	This column indicates whether or not the *settlement amount* (for which the *charge type* is related) is: • "Due *IESO*" – which means, owed to the *IESO* by the *market participant*;*** or • "Due MP" – which means, owed to the *market participant* by the *IESO*;*** or • "Either Way" – which indicates that the *settlement amount* in question could be either owed to the *IESO* by the *market participant* or owed to the *market participant* by the *IESO* in any given time period (according to the applicable "settlements resolution"). *****NOTE in cases where a Cashflow is designated as "Due *IESO*" or "Due MP" this should be read in the context of its intended use in the normal course of *settlements*. However, such cashflows can always be REVERSED in situations where an adjustment is applied to a *market participant*, or the application of a per-unit charge in order to offset an adjustment to another *market participant*.**
HST Tax Treatment within Ontario	• This column indicates the percentage levy as per the Harmonized Sales Tax (HST). • Zone used for Tax Basis is (ONZN) for Ontario. • The applicable Zone ID may be found in column 7 of the applicable settlement statement detail record (see also, the Technical Interface Document entitled, "Detail Field Description"). • A complete list of Zones may be found in the Technical Interface Document entitled, "Standing Data".

Key to the Table Below	
HST Tax Treatment for U.S., Manitoba and Quebec Generation	• This column indicates the percentage levy as per the Harmonized Sales Tax (HST). • Zones used for Tax Basis are (NYSI) for US Generation, (MBSI) for Manitoba Generation and (PQSI) for Quebec Generation. • The applicable Zone ID may be found in column 7 of the applicable settlement statement detail record (see also, the Technical Interface Document entitled, "Detail Field Description"). • A complete list of Zones may be found in the Technical Interface Document entitled, "Standing Data".
HST Tax Treatment for US Load	• This column indicates the percentage levy as per the Harmonized Sales Tax (HST). • Zone used for Tax Basis is (NYSI) for US Load. • The applicable Zone ID may be found in column 7 of the applicable settlement statement detail record (see also, the Technical Interface Document entitled, "Detail Field Description"). • A complete list of Zones may be found in the Technical Interface Document entitled, "Standing Data".
HST Tax Treatment for Manitoba and Quebec Load	• This column indicates the percentage levy as per the Harmonized Sales Tax (HST). • Zones used for Tax Basis are (MBSI) for Manitoba Load and (PQSI) for Quebec Load. • The applicable Zone ID may be found in column 7 of the applicable settlement statement detail record (see also, the Technical Interface Document entitled, "Detail Field Description"). • A complete list of Zones may be found in the Technical Interface Document entitled, "Standing Data".
Comments	This column notes any *charge types* that are governed by various documentation other than the *IESO market rules*.

				'Operating Reserve Activation interval'); or • The load has been manually dispatched down for reliability (defined below – 'Manual Dispatch for Reliability'). In addition to the Business Rules 1 to 4 described above, *constrained off* CMSC is not allowed for hour 'h' if a *dispatchable load* changes its *energy bid* that results in a change in the *facility's market schedule* and the ramping up or down of the *dispatchable load*. **DEFINITIONS** – There are a number of definitions that are used in the specification of criteria for recovery of *constrained off* CMSC paid to dispatchable load facilities. These are: **Constrained-off event**: A *constrained off* event comprises one or more consecutive intervals where the *market schedule* is greater than the constrained schedule and the *market schedule* is greater than the actual quantity of energy withdrawn. Both conditions must exist to be considered a *constrained off* event.							The decision rule for ramping up or down is described in Market Manual 5.5: Settlements Part 5.5: Physical Markets Settlement Statements, section 1.6.9.3.

				Economic Constrained–off interval: A *dispatchable load* is considered to be 'economically *constrained off*' in an interval if the relevant nodal price is greater than or equal to the *bid* price for either the current interval, the next interval or the previous interval. The inequality should be applied to the last MW *constrained off*. **Operating Reserve Activation Interval (ORA)**: A *dispatchable load* is considered to be dispatched in an interval as part of an activation of *operating reserve* if one or more of the following conditions exist: a. The constrained schedule is labeled with the reason code 'ORA'. b. The interval is 1-3 intervals before an interval with the 'ORA' code. c. The interval is 1-3 intervals after an interval with the 'ORA' code. **Ramping Interval**: A *generation unit* is considered to be ramping up or ramping down when the unconstrained schedule differs between consecutive hours. A

2.3 Rounding Conventions – by Settlement Variable

2.3.1 Key to the Table of Rounding Conventions for Individual Settlement Variables

Column Name	Description
Variable referenced in Section 2.1	This column provides the name of the variable listed in Section 2.1.
Data Description	The short name of the variable in question.
Number of decimal places (values published by upstream systems)	If this variable is available to *market participants* via another system besides *settlements*, this number of significant digits to the right of the decimal place in the published value. **NOTE:** "published" does not necessarily mean a public report or a report available to all *market participants*. E.g. *metering data* from the *metering database*.
Number of significant digits to the right of the decimal (values received by CRS)	This column discloses the accuracy of a settlement variable received by the *IESO* settlements system via an upstream system OR manually entered as the case may be.
Number of significant digits to the right of the decimal (externally passed from CRS in settlement statements or data files)	This column discloses the accuracy of a settlement variable appearing on a *settlement statement*. **NOTE: This should NOT be confused with the number of decimal places allowable in some columns on the *settlement statements* and data files as set out in, "Format Specification for Settlement Statements and Data Files."**
Comments	Any comments as to the availability of such variables. In some cases, variables are not made available to *market participants* via upstream systems and are noted as such. In other instances variables are not published in a report but are communicated in participant-specific messages (e.g. *bid/offer* confirmation).

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
AAD	Adjustment Account Disbursement	N/A	2	3	• Not published in upstream IESO systems
$AQEI_{k,h}^{m,t}$	Allocated Quantity of Energy Injected	2	3	3	• RMS presentation is in units of KW to TWO decimal places. • Unit change to MW to 3 decimal places occurs prior to transfer to CRS.
$AQEW_{k,h}^{m,t}$	Allocated Quantity of Energy Withdrawn	2	3	3	• RMS presentation is in units of KW to TWO decimal places. • Unit change to MW to 3 decimal places occurs prior to transfer to CRS.
$AQOR_{r,k,h}^{m,t}$	Allocated Quantity of Operating Reserve	1	1	1	• See SQROR.
BE	Energy Offers	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
BL	Energy Bids	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* ("*dispatch data*") are received.
BR_r	Operating Reserve Offers	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* ("*dispatch data*") are received.
$BCQ_{s,k,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy bought	N/A	1 or 3	1 or 3	• Not published via upstream *IESO* systems. • *Physical Bilateral Contract Data* is provided to the *IESO* by the *selling market participant*. • Accuracy driven by the submission at the MIM interface and the method used (i.e. absolute quantities vs. 100% of *PBC*).

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$BCQ_{k,b,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy sold	N/A	1 or 3	1 or 3	• Not published via upstream *IESO* systems. • *Physical Bilateral Contract Data* is provided to the *IESO* by the *selling market participant*. • Accuracy driven by the submission at the MIM interface and the method used (i.e. absolute quantities vs. 100% of *PBC*).
CGC	Combined Guaranteed Costs	N/A	2	2	• Not published via upstream *IESO* systems.
$DA_BE_{k,h}^{i,t}$	*Energy Offer* submitted into the *schedule of record*	N/A	N/A	N/A	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.
$DA_BE_{k,h}^{m,t}$	*Energy Offer* submitted into the *schedule of record at a delivery point*	N/A	N/A	N/A	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$DA_BL_{k,h}^{i,t}$	*Energy* Bids submitted into the *schedule of record*	N/A	N/A	N/A	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.
$DA_DQSI_{k,h}^{i,t}$	*Schedule of record* dispatch quantity scheduled for injection at an *intertie metering point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_DQSI_{k,h}^{m,t}$	*Schedule of record* dispatch quantity scheduled for injection at a *delivery point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_DQSW_{k,h}^{i,t}$	*Schedule of record* dispatch quantity scheduled for withdrawal at an *intertie metering point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_ELMP_{h}^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the export zone	2	2	2	• MIM Publication.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$DA_ILMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the import zone	2	2	2	• MIM Publication.
$DA_SNLC_{k,h}^{m}$	Speed-no-load costs submitted into the *schedule of record*	1	2	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_SNLC_{k,h}^{p}$	Speed-no-load costs for pseudo units submitted into the *schedule of record*	1	2	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_SUC_{k,h}^{m}$	Start-up costs submitted into the *schedule of record*	1	2	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DA_SUC_{k,h}^{p}$	Start-up costs for pseudo units submitted into the *schedule of record*	1	2	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DIPC_{k,h}^{m,t}$	Derived Interval Price Curve	1	2	1	• Derived price curve and therefore not published on *settlement statements*.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$DIGQ_{k,h}^{m,t}$	Derived Interval Guaranteed Quantity	1	1	1	• Derived schedule quantity and therefore not published on *settlement statements*.
$DQSI_{k,h}^{m,t}$	Dispatch Quantity of Energy Scheduled for Injection	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DQSR_{r,k,h}^{m,t}$	Dispatch Quantity Schedule of Operating Reserve	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$DQSW_{k,h}^{m,t}$	Dispatch Quantity of Energy Scheduled for Withdrawal	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
DRACP	Demand Response Auction Clearing Price	2	2	2	• Published in post-auction report.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$DRACP_h$	Hourly Demand Response Auction Clearing Price	N/A	2	2	• Not published via upstream *IESO* systems.
$DRBOC_k$	Demand Response Buy-Out Capacity	N/A	3	3	• Not published via upstream *IESO* systems.
$DRCO_k$	Demand Response Capacity Obligation (MW)	1	3	3	• Published in private post-auction report.
$DREBQ_k$	Demand Response Energy Bid Quantity	N/A	1	1	• Not published via upstream *IESO* systems.
DRNPF	Demand Response Non-Performance Factor	N/A	1	1	• Not published via upstream *IESO* systems.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
DRSQty	Demand Response Scheduled Quantity	N/A	1	1	• Not published via upstream *IESO* systems.
EEQ	Excluded Energy Quantity	N/A	3	3	• Not published via upstream *IESO* systems.
$EGEI_k$	Embedded Generator Energy Injection	N/A	3	3	• Not published via upstream *IESO* systems.
$EIM_{k,h}$	Operating Profit Function for the IMPORT of Energy under the Intertie Offer/Bid Guarantee Settlement Credit	N/A See Section 2.4	N/A See Section 2.4	N/A See Section 2.4	• This acronym is associated with the energy import component of the Intertie Offer/Bid Guarantee Settlement Credit.
$EMP_h^{i,t}$	5-minute Energy Market Price at the Interties	2	2	2	• MIM Publication.
$EMP_h^{m,t}$	5-minute Energy Market Price within Ontario	2	2	2	• MIM Publication.
$EMP_h^{REF,t}$	5-minute Energy Market Reference Price	2	2	2	• MIM Publication.
ETS	Export Transmission Service Tariff Rate	N/A	2	2	• Not published via upstream *IESO* systems. • Subject to the OEB "Ontario Transmission Rate Order".

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
FP_h^m	Fixed Energy Rate	N/A	2	2	• Not published via upstream *IESO* systems.
FPC_h^m	Rate for a designated group of *charge types* (see description of *charge type* 141))	N/A	2	2	• Not published via upstream *IESO* systems.
GRP	Generator Regulated Price	N/A	2	2	• Not published via upstream *IESO* systems.
$HOEP_h$	Hourly Ontario Energy Price	2	2	2	• MIM Publication.
$LCD_{k,h}^m$	Line Connection Demand (KW)	2 and 3	3	3	• RMS presentation is in units of KW to 2 decimal places. • Unit changes to MW to 3 decimal places prior to transfer to the Transmission Tariff Demand Calculator (TTDC). • Unit changes to KW to 3 decimal places prior to transfer to CRS.
MC_h^m	Minimum Consumption	1	1	1	
MI	Ordered matrix of and corresponding IOG *settlement amounts*	1 and 2	2	2	• Derived set of variables and therefore not published on *settlement statements*.
$MLP_{k,h}^{m,t}$	Minimum Loading Point	1	1	1	• Not published via upstream *IESO* systems.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$MLP_CONS_{k,h}^{m,t}$	Minimum Loading Point for a steam turbine resource or a combustion turbine resource associated to a pseudo unit	1	1	1	• Not published via upstream *IESO* systems.
$MQSI_{k,h}^{m,t}$	Market Quantity Scheduled for Injection	1	1	1	
$MQSI\{adj\}_{k,h}^{m,t}$	Adjusted Market Quantity Scheduled for Injection	1	1	1	• Derived variable and therefore not published on *settlement statements.*
$MQSW_{k,h}^{m,t}$	Market Quantity Scheduled for Withdrawal	1	1	1	
$NSD_{k,h}^{m}$	Network Service Demand (KW)	2 and 3	3	3	• RMS presentation is in units of KW to 2 decimal places. • Unit changes to MW to 3 decimal places prior to transfer to the Transmission Tariff Demand Calculator (TTDC). • Unit changes to KW to 3 decimal places prior to transfer to CRS.
OP	Operating Profit Function	N/A See Section 2.4	N/A See Section 2.4	N/A See Section 2.4	• This acronym is associated with the operating profit equation used within the CMSC equation.
$OPCAP_{k,h}^{m,t}$	Operating Capacity	1	1	1	• Not published via upstream *IESO* systems.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$PB_IM_h^t$	Price bias adjustment factor for import transactions	2	2	2	• Published on by the *IESO* on a periodic basis.
$PB_EX_h^t$	Price bias adjustment factor for export transactions	2	2	2	• Published on by the *IESO* on a periodic basis.
$PD_BE_{k,h}^{i,t}$	*Energy Offer* submitted into the *Pre-dispatch*	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.
$PD_BL_{k,h}^{i,t}$	*Energy bids* submitted into the *Pre-dispatch*	N/A	1	1	• Not published via upstream *IESO* systems. • Confirmations passed to *market participants* as *bids*/*offers* (“*dispatch data*”) are received.
$PD_DQSI_{k,h}^{i,t}$	*Pre-dispatch* quantity scheduled for injection at an *intertie metering point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.
$PD_DQSW_{k,h}^{i,t}$	*Pre-dispatch* quantity scheduled for withdrawal at an *intertie metering point*	1	1	1	• Not published via upstream *IESO* systems. • Passed to *market participants* via dispatch messaging.

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$PD_ELMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the export zone	2	2	2	• MIM Publication.
$PD_EMP_h^{m,t}$	Pre-dispatch energy market price for Ontario	2	2	2	• MIM Publication.
$PD_ILMP_h^{m,t}$	*Pre-dispatch* constrained schedule price for an *intertie metering point* in the import zone	2	2	2	• MIM Publication.
$PROR_{r,h}^{m,t}$	5-minute Operating Reserve Price	2	2	5	• MIM Publication.
$PST_{k,h}^{p,t}$	Steam Turbine Portion from Daily Generator Data	1	1	1	• Not published via upstream *IESO* systems.
PTS-L	Provincial Transmission Service Line Connection Service Rate ($/KW)	N/A	2	2	• Not published via upstream *IESO* systems. • Subject to the OEB "Ontario Transmission Rate Order".
PTS-N	Provincial Transmission Service Network Service Rate ($/KW)	N/A	2	2	• Not published via upstream *IESO* systems. • Subject to the OEB "Ontario Transmission Rate Order".

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
PTS-T	Provincial Transmission Service Transformation Connection Service Rate ($/KW)	N/A	2	2	• Not published via upstream *IESO* systems. • Subject to the OEB "Ontario Transmission Rate Order".
$QTR_{k,h}^{i,j}$	Quantity of Transmission Rights Owned	PENDING	0	0	• TR's are in denominations to the nearest MW. • Upstream publication accuracy currently being resolved.
$SQEI_{k,h}^{i,t}$	Scheduled Quantity of Energy Injected at an *intertie metering point*	1	1	1	
$SQEW_{k,h}^{i,t}$	Scheduled Quantity of Energy Withdrawn at an *intertie metering point*	1	1	1	
$SQROR_{r,k,h}^{m,t}$	Scheduled Quantity of class r *Operating Reserve*	1	1	1	

Variable referenced in Section 2.1	Data Description	Number of DECIMAL PLACES (values published by upstream systems)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (values received by CRS)	MAXIMUM Number of SIGNIFICANT DIGITS to the right of the decimal (externally passed from CRS in settlement statements or data files)	Comments
$TCD_{k,h}^{m}$	Transformation Connection Demand (KW)	2 and 3	3	3	• RMS presentation is in units of KW to 2 decimal places. • Unit changes to MW to 3 decimal places prior to transfer to the Transmission Tariff Demand Calculator (TTDC). • Unit changes to KW to 3 decimal places prior to transfer to CRS.
$TD_{k,h,c}$	Total Market Settlement Amount	N/A	N/A	N/A	• N/A- notational description of an aggregated financial amount (reported to the nearest cent when applicable).
TP_c	Tariff price	N/A	N/A	N/A	• N/A – notational description of tariff rate (reported to the nearest cent when applicable).
TRMP	TR Market Clearing Price	2	2	2	
TRCAD	TR Clearing Account Disbursements	N/A	2	2	• Not published via upstream *IESO* systems.

2.4 Rounding Conventions – by Charge Type

2.4.1 General Notes

- **The table below references significant digits to the right of the decimal place. This should NOT be confused with the number of decimal places allowable in some columns on the *settlement statements* and data files as set out in, "Format Specification for Settlement Statements and Data Files."**

- All **settlement amounts** reported by the *IESO* settlements system are rounded to the nearest cent (i.e. to two decimal places) on *settlement statements,* although some settlement calculations may only yield 1 significant digit to the right of the decimal place. In these instances, the financial amount is NOT further rounded to the nearest ten cents. **The table below does not include the final rounding step to the nearest cent, as this is done for ALL *settlement amounts*. Rather, it describes any intermediate calculations (particularly, those involving division) that involve rounding prior to the final calculation of the *settlement amount*.**

2.4.2 Key to the Table of Rounding Conventions

Column Name	Description
Charge Type Number	This table contains an entry for each *charge type* listed in Section 2.2 of this document ("IESO Charge Types and Equations").
Charge Type Name	The name of each of the *charge types*.
INPUT VARIABLES **Least number of significant digits to the right of the decimal**	In terms of assessing the accuracy of the final *settlement amount*, this column is derived from the settlement variable received by the *settlement* system with the LEAST number of significant digits to the right of the decimal place.
INPUT VARIABLES **Maximum number of significant digits to the right of the decimal**	In terms of assessing the accuracy of the final *settlement amount*, this column is derived from the settlement variable received by the *settlement* system with the MAXIMUM number of significant digits to the right of the decimal place.

Column Name	Description
INTERMEDIATE Rounding done by Settlements	This column indicates whether or not any **INTERMEDIATE** rounding is done by the *IESO settlement process*. **This does NOT include the final rounding of *settlement amounts* to 2 decimal places as the last step in the calculation of ALL *charge types*.**
INTERMEDIATE CALCULATION 1 (where intermediate rounding occurs)	This column ONLY describes an intermediate calculation of the *settlement amount* in which rounding occurs PRIOR to the final rounding of the *settlement amount* to the nearest cent.
Disposition of INTERMEDIATE CALCULATION 1	This column describes the disposition of the rounded value resulting from Intermediate Calculation 1.
INTERMEDIATE CALCULATION 2 (where intermediate rounding occurs)	This column ONLY describes an intermediate calculation of the *settlement amount* in which rounding occurs PRIOR to the final rounding of the *settlement amount* to the nearest cent.
Disposition of INTERMEDIATE CALCULATION 2	This column describes the disposition of the rounded value resulting from Intermediate Calculation 2.

2.5 Settlement of Physical Bilateral Contracts

2.5.1 Governing Rules

Settlement of *physical bilateral contracts* is discussed in Section 2.1 of Chapter 8, of the *IESO market rules*. In summary this particular *market rules* Section prescribes the prices to be applied to a *Physical Bilateral Contract Quantity of Energy Sold* ($BCQ_{k,b,h}^{m,t}$) or a *Physical Bilateral Contract Quantity of Energy Bought* ($BCQ_{s,k,h}^{m,t}$) at a *delivery point* or an *intertie metering point.* This treatment is summarized in the table below with respect to each settlement variable defined in **Section 2.1** and *charge type* described in **Section 2.2** of this document.

Location of Bilateral Contract	Settlement of Selling Market Participant	Settlement of Buying Market Participant	Charge Type
Non-dispatchable *delivery point*	• Debit the Physical Bilateral Contract Quantity of Energy Sold ($BCQ_{k,b,h}^{m,t}$) at the 5-Minute Energy Market Price within Ontario ($EMP_h^{m,t}$).	• Credit the Physical Bilateral Contract Quantity of Energy Bought ($BCQ_{s,k,h}^{m,t}$) at the *Hourly Ontario Energy Price* (HOEP).	101
Dispatchable *delivery point*	• Debit the Physical Bilateral Contract Quantity of Energy Sold ($BCQ_{k,b,h}^{m,t}$) at the 5-Minute Energy Market Price within Ontario ($EMP_h^{m,t}$).	• Credit the Physical Bilateral Contract Quantity of Energy Bought ($BCQ_{s,k,h}^{m,t}$) at the 5-Minute Energy Market Price within Ontario ($EMP_h^{m,t}$).	100
Intertie Metering Point	• Debit the Physical Bilateral Contract Quantity of Energy Sold ($BCQ_{k,b,h}^{m,t}$) at the 5-minute Energy Market Price at the *Interties* ($EMP_h^{i,t}$).	• Credit the Physical Bilateral Contract Quantity of Energy Bought ($BCQ_{s,k,h}^{m,t}$) at the 5-minute Energy Market Price at the *Interties* ($EMP_h^{i,t}$).	100

These financial credits and debits are then included the overall *settlement amounts* calculated for *charge types* 100 and 101 as per the equations in **Section 2.2**.

2.5.2 The Nature of the Bilateral Contract Quantity

$BCQ_{s,k,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy bought.	Physical bilateral contract quantity of *energy* in MWh bought by *buying market participant* 'k' from *selling market participant* '*s*' at *RWM* or *intertie metering point* 'm' for each *metering interval* 't' in *settlement hour* 'h'.
$BCQ_{k,b,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy sold.	Physical bilateral contract quantity of *energy* in MWh sold by *selling market participant* 'k' to *buying market participant* 'b' at *RWM* or *intertie metering point* 'm' for each *metering interval* 't' in *settlement hour* 'h'.

The submission of *physical bilateral contract data* is governed by Section 2.4 of Chapter 8 of the *IESO market rules*. Furthermore, Section 2.3 of Chapter 8 describes 2 distinct "forms" of *physical bilateral contract data* that may be submitted by the *selling market participant*. Specifically, the two forms of such data are as follows:

1. **Absolute quantities:** specifying the absolute quantity of *energy* in MWh sold by the *selling market participant* to the *buying market participant* for each *settlement hour* at a particular *delivery point* or *intertie metering point*; and
2. **Derived quantities****:** specifying that the *physical bilateral contract quantity* shall be 100% of the *energy* sold by the *selling market participant* to the *buying market participant* for each *settlement hour* as derived from a particular *delivery point* value (i.e. NOT an *intertie metering point*).

Where:

- The *delivery point* chosen by the *selling market participant* must belong to either the *selling market participant* or the buying *market participant*.
- If the *delivery point* is designated as a sub-type 'I' (injection) *delivery point*, 100% of all injected *energy* for each *metering interval* in each applicable *settlement hour* shall be used regardless of any *physical allocation data*.
- If the *delivery point* is designated as a sub-type 'W' (withdrawal) *delivery point*, 100% of all withdrawn *energy* for each *metering interval* in each applicable *settlement hour* shall be used regardless of any *physical allocation data*.

***** See derived quantities examples that follow.**

Derived Quantities Example 1: *Delivery point* belongs to the *SELLING market participant* and is a sub-type 'I' (injection) *delivery point.* (note parity with EXAMPLE 3)												
metering interval	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
ENERGY QUANTITY	10	10	10	0	0	0	**10**	**10**	0	0	10	10
ENERGY FLOW Injection (I) Withdrawal (W)	I	I	I	I	I	I	**W**	**W**	I	I	I	I
BCQ value used for settlement purposes (for both the *buying* and *selling market participant*)	10	10	10	0	0	0	**0**	**0**	0	0	10	10
Total Quantity for the hour	50 (SEE SECTION 2.5.3 FOR THE DATA PRESENTATION OF THE BILATERAL CONTRACT QUANTITY)											

Derived Quantities Example 2: *Delivery point* belongs to the *SELLING market participant* and is a sub-type 'W' (Withdrawal) *delivery point.* (note parity with EXAMPLE 4)												
metering interval	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
ENERGY QUANTITY	**10**	**10**	**10**	0	0	0	10	10	0	0	10	10
ENERGY FLOW Injection (I) Withdrawal (W)	**I**	**I**	**I**	W	W	W	W	W	W	W	I	I
BCQ value used for settlement purposes (for both the *buying* and *selling market participant*)	**0**	**0**	**0**	0	0	0	10	10	0	0	0	0
Total Quantity for the hour	20 (SEE SECTION 2.5.3 FOR THE DATA PRESENTATION OF THE BILATERAL CONTRACT QUANTITY)											

Derived Quantities Example 3: *Delivery point* belongs to the *BUYING market participant* and is a sub-type 'I' (injection) *delivery point.* (note parity with EXAMPLE 1)												
metering interval	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
ENERGY QUANTITY	10	10	10	0	0	0	**10**	**10**	0	0	10	10
ENERGY FLOW Injection (I) Withdrawal (W)	I	I	I	I	I	I	**W**	**W**	I	I	I	I
BCQ value used for settlement purposes (for both the *buying* and *selling market participant*)	10	10	10	0	0	0	**0**	**0**	0	0	10	10
Total Quantity for the hour	50 (SEE SECTION 2.5.3 FOR THE DATA PRESENTATION OF THE BILATERAL CONTRACT QUANTITY)											

Derived Quantities Example 4: *Delivery point* belongs to the *BUYING market participant* and is a sub-type 'W' (Withdrawal) *delivery point.* (note parity with EXAMPLE 2)												
metering interval	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**
ENERGY QUANTITY	**10**	**10**	**10**	0	0	0	10	10	0	0	10	10
ENERGY FLOW Injection (I) Withdrawal (W)	**I**	**I**	**I**	W	W	W	W	W	W	W	I	I
BCQ value used for settlement purposes (for both the *buying* and *selling market participant*)	**0**	**0**	**0**	0	0	0	10	10	0	0	0	0
Total Quantity for the hour	20 (SEE SECTION 2.5.3 FOR THE DATA PRESENTATION OF THE BILATERAL CONTRACT QUANTITY)											

2.5.3 Time Resolution of Bilateral Contract Quantities and Rounding

Where a *physical bilateral contract* takes place at a non-dispatchable *delivery point*, the *Physical Bilateral Contract Quantity* of Energy Bought is reported by *settlement hour* as per the *market rules* (because the *Hourly Ontario Energy Price* is applied to this quantity – see Chapter 9, Section 3.3). At the same location however, the 'Physical Bilateral Contract Quantity of Energy Sold' is debited at the 5-minute energy market price. This latter, sold quantity must therefore be divided into 12, equal *metering intervals* (see Chapter 9, Section 3.1.6 of the *market rules*) and rounded to the appropriate number of significant digits (see Section 2.4 of this document). As a result, the summation of these 12, equal quantities may not equal the original, hourly value submitted in some circumstances due to this intermediate rounding. The table below summarizes this phenomenon in terms of the location sub-type and the applicable *charge type* used. The reader is directed to Section 2.4 of this document for further details.

		Location Type	Charge Type	Time Resolution used for settlements purposes	Intermediate Rounding Applied within Settlements System?
$BCQ_{s,k,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy bought.	Dispatchable *Delivery Point* (injection or withdrawal sub-type)	100	by *metering interval*	Yes – See Section 2.4
		Non-Dispatchable *Delivery Point* (injection or withdrawal sub-type)	101	by *settlement hour*	No
		Intertie metering point	100	by *metering interval*	Yes – See Section 2.4
$BCQ_{k,b,h}^{m,t}$	Physical Bilateral Contract Quantity of Energy sold.	Dispatchable *Delivery Point* (injection or withdrawal sub-type)	100	by *metering interval*	Yes – See Section 2.4
		Non-Dispatchable *Delivery Point* (injection or withdrawal sub-type)	101	by *metering interval*	Yes – See Section 2.4
		Intertie metering point	100	by *metering interval*	Yes – See Section 2.4

2.5.4 Allocation of Hourly Uplift Components Between Buying and Selling Market Participants

Hourly uplift is defined in Section 3.9.1 of Chapter 9 of the *IESO market rules* and may be "disaggregated" (sic) on *settlement statements* into its component parts as per Section 3.9.2. The following components *hourly uplift* charges may be allocated from the *buying market participant* to the *selling market participant* as per the *physical bilateral contract data* submitted by the *selling market participant* (see also, *IESO market rules*, Chapter 8, Section 2.2.2).

Hourly Uplift Component Group	Associated Charge Types	Comments
Net Energy Market Settlement Credit (NEMSC) Hourly Uplift Component (also known as the "Losses" component)	150	• This hourly uplift component is an aggregation of *charge types* 100 (NEMSC), 101 (NEMSC), 104 (TRSC), and 103 (TCRF),. The aggregation of these *charge types* mathematically resolves down to the value of the difference between AQEI, AQEW, SQEW and SQEI quantities valued at the 5-minute Energy Market Reference Price ($EMP_h^{REF,t}$) for each *metering interval* in the *settlement hour* .
Operating Reserve Settlement Credit (ORSC) Hourly Uplift Component	250 252 254	• Separate *charge types* for recovery of ORSC *settlement amounts* paid to *market participants* for each class of *operating reserve*.
Intertie Failure Charge Rebate (IFCR) Hourly Uplift Component	186	Two components as follows: 1) *Charge type* 186: an aggregation of *charge types* 135 (Real-time Import Failure Charge), 136 (Real-time Export Failure Charge), 1134 (Day-Ahead Linked Wheel Failure Charge, 1135 (Day-Ahead Import Failure Charge) and 1136 (Day-Ahead Export Failure Charge). These *charge types* are primarily rebates back to *market participants* for amounts collected under these charges.
Congestion Management Settlement Credit (CMSC) Hourly Uplift Component	155	• Includes recovery of CMSC payments for *energy* and each class of *operating reserve.*

Hourly Uplift Component Group	Associated Charge Types	Comments
Transmission Rights Settlement Credit (TRSC) Hourly Uplift Component	NOT USED	• INCLUDED WITH THE "NET ENERGY MARKET SETTLEMENT CREDIT (NEMSC) Hourly Uplift COMPONENT". • SEE NOTE ABOVE.
Transmission Charge Reduction Fund (TCRF) Hourly Uplift Component	NOT USED	• INCLUDED WITH THE "NET ENERGY MARKET SETTLEMENT CREDIT (NEMSC) Hourly Uplift COMPONENT". • SEE NOTE ABOVE.
Operating Reserve Shortfall Settlement Debit (ORSSD) Hourly Uplift Component	201 203 205	• Separate *charge types* for distribution of ORSSD *settlement amounts* received from *market participants* for shortfalls in the provision of each class of *operating reserve.*

Each hourly uplift component group (i.e. not the individual *charge types* themselves) may be selected in any combination when the *physical bilateral contract data* is submitted by the *selling market participant*. Confirmation of this selection is included within the *settlement statement* supporting data files (type "B" records). A schematic overview of the format of type "B" records may be found within Table 3-2 of the *IESO's* Technical Interface Document entitled, "Format Specification for Settlement Statement Files and Data Files".

The effect of selecting an hourly uplift component group within *physical bilateral contract data,* is the creation of a "Reallocate Quantity (RQ)".

The RQ specific to a single *physical bilateral contract* is exactly equal to the quantity of *energy* involved in the contract itself.

The RQ specific to a single *market participant* is equal to the sum of all RQ quantities for which the *market participant* is the *selling market participant*, minus the sum of all RQ quantities for which the *market participant* is the *buying market participant*.

The RQ specific to a single *market participant* for a particular hourly uplift component group is equal to the sum of all RQ quantities designated to for that particular hourly uplift component group within *physical bilateral contract data* for which the *market participant* is the *selling market participant*, minus the sum of all RQ quantities for which the *market participant* is the *buying market participant*.

This RQ quantity is then applied to the calculation of the *settlement amounts* for each *charge type* associated with the hourly uplift component group as per the table above.

Therefore, when calculating the RQ quantity for a particular hourly uplift *charge type* for *market participant* 'k' at a particular location 'm' during a particular *metering interval* 't', the quantity may be expressed as follows:

$$RQ_{k,h}^{m,t} = \sum_{s,b} [BCQ_{k,b,h}^{m,t} - BCQ_{s,k,h}^{m,t}]$$

Where all variables are defined as per **Section 2.1**.

The RQ quantity is then used to either augment or decrease the *settlement amount* for the hourly uplift *charge type* "c" as follows:

$$\sum_c^{M,T} TD_{k,h,c} \times [(AQEW_{k,h}^{m,t} + SQEW_{k,h}^{i,t} + RQ_{k,h}^{m,t}) / \sum_k^{M,T} (AQEW_{k,h}^{m,t} + SQEW_{k,h}^{i,t})]$$

Where all variables are defined as per **Section 2.1**.

In the event that the term,

$$(AQEW_{k,h}^{m,t} + SQEW_{k,h}^{i,t} + RQ_{k,h}^{m,t}) < 0$$

Where:

$$RQ_{k,h}^{m,t} < 0 \text{ and } \left|RQ_{k,h}^{m,t}\right| > \left|(AQEW_{k,h}^{m,t} + SQEW_{k,h}^{i,t})\right| \text{ and } TD_{k,h,c} > 0$$

The calculation of the applicable hourly uplift charge type "c" will yield a net credit to the *buying market participant* as a result of the reallocated quantity exceeding their actual/scheduled withdrawals of *energy* for the *metering interval* 't' in question.

The above mechanism applies to those "associated charge types" that are enumerated in the table at the beginning of this Section. See Section 2.2 for specific listings of *charge types* and their respective equations.

2.6 Exemptions from the Day-Ahead Import Failure Charge, Day-Ahead Export Failure Charge, and Day-Ahead Linked Wheel Failure Charge

2.6.1 Purpose of this Section

This section describes how Day-Ahead Import transactions are subject to an "*Offer* Price Test" in order to determine if they are exempt from the Day-Ahead Import Failure Charge (*charge type* 1135), Day-Ahead Export Failure Charge (*charge type* 1136) and Day-Ahead Linked Wheel Failure Charge (*charge type* 1134)[2].

Generally speaking the applicability of the five Intertie Failure charges[3] is affected by the "Reason Codes" attached to the applicable *interchange schedule* received by the *Settlement Process*. The impact of these Reason Codes is outlined in Table 3-5 of the *IESO* Technical Interface document entitled, "Format Specifications for Settlement Statement Files and Data Files" (IMP_SPEC_0005). As noted in that table however, day-ahead import transactions arranged in the *pre-dispatch-of-record* that include the 'AUTO''NY90' or 'ADQh', or 'ORA' Reason Codes in the resulting real-time dispatch will be further subject to an "Offer Price Test" which determines whether or not the transaction in question is in fact exempt from the Day-Ahead Failure Charges.

2.6.2 Objective of the "Offer Price Test"

The main objective of the Offer Price Test is to grant an exemption from the DA-IFC, DA-EFC and DA-LWFC for those import and export transactions that make a best effort to ensure that they are scheduled in the *real-time market*. The Offer Price Test assesses "best effort" on the basis of the offer price of the transaction itself.

2.6.3 How the Offer Price Test Works

The Offer Price Test is a simple test that is performed on the first lamination of the *real-time market* import *offer*/or export *bid*. The "first lamination" is defined by the first two *price-quantity* ("p-q") *pairs* in the *real-time market offer* curve, where:

- The first *price-quantity pair* contains an *offer* or *bid* price and a quantity of zero; and

[2] The price test for the Day-Ahead Linked Wheel Failure Charge (1134) is used to determine exemption from the RT-EFC-DALW and RT-IFC-DALW portions only.
[3] Specifically, the Real-time Import Failure Charge (*charge type* 135), the Real-time Export Failure Charge (*charge type* 136), the Day-Ahead Import Failure Charge (*charge type* 1135), the Day-Ahead Export Failure Charge (*charge type* 1136) and the Day-Ahead Linked Wheel Failure Charge (*charge type* 1134).

- The second *price-quantity pair* contains the same *offer* or *bid* price as the first *price-quantity pair* and a non-zero quantity.

The Offer Price Test applies to any situation in which a day-ahead import or export transaction has a Reason Code, 'AUTO', 'NY90' 'ADQh', or 'ORA' assigned to the corresponding real-time import or export transaction at the same location. It is applicable to *any intertie metering point* where the underlying constrained scheduling point (CSP) is a "source" (i.e. applicable to imports only) or a "sink" (i.e. applicable to exports only).

If the transaction fails this test; it will not receive exemption status from the DA-IFC or DA-EFC. If the transaction passes this test, then it will be exempted from the DA-IFC or DA-EFC – without actually changing the Reason Code itself.

2.6.4 Input Data:

$DA_DQSI_{k,h}^{i,t}$	=	Day-ahead constrained quantity scheduled for injection by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'
$PD_DQSI_{k,h}^{i,t}$	=	*Pre- dispatch* constrained quantity scheduled for injection by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'.
$PD_BE_{k,h}^{i,t}$	=	*Energy offers* submitted in Pre-dispatch, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h' arranged in ascending order by the offered price in each *price quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2
- MMCP	=	The *Minimum Market Clearing Price*.
$DA_DQSW_{k,h}^{i,t}$		Day-ahead constrained quantity scheduled for withdrawal by *market participant* 'k' at *intertie metering point* 'i' during metering interval 't' of settlement hour 'h'
$PD_DQSW_{k,h}^{i,t}$		*Pre- dispatch* constrained quantity scheduled for withdrawal by *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement hour* 'h'.
$PD_BL_{k,h}^{i,t}$		*Energy bids* submitted in *pre-dispatch*, represented as an N by 2 matrix of *price-quantity pairs* for each *market participant* 'k' at *intertie metering point* 'i' during *metering interval* 't' of *settlement*

hour 'h' arranged in ascending order by the offered price in each *price quantity pair* where offered prices 'P' are in column 1 and offered quantities 'Q' are in column 2

+MMCP = The *Maximum Market Clearing Price*.

2.6.5 Decision Logic Applied During the Offer Price Test for Import Transactions:

PART 1:

The first part of the test ensures that the original *schedule-of-record* schedule ($DA_DQSI_{k,h}^{i,t}$) for the import transaction is indeed GREATER THAN the resulting *Pre-dispatch schedule* ($PD_DQSI_{k,h}^{i,t}$) over the course of *settlement hour* 'h'.

IF $\sum^{T} DA_DQSI_{k,h}^{i,t} > \sum^{T} PD_DQSI_{k,h}^{i,t}$

THEN

Proceed to PART 2

ELSE

END of the test for this transaction.

PART 2:

The second part of the test ensures that the first lamination (i.e. as defined by the first 2 *price-quantity pairs*) of the offer curve submitted into the *pre-dispatch scheduling process*:

1) Was large enough to cover the entire quantity of the transaction originally scheduled by the *schedule-of-record* at the same *market participant/intertie metering point* combination (commonly referred to as a "MP/MSP/CSP triplet"); and,
2) Was offered at the *Minimum Market Clearing Price* (*-MMCP*).

The test is as follows:

For each *metering interval* 't' at *intertie metering point* 'i' where the transaction passed PART 1 for *settlement hour* 'h':

Let 'B' be matrix $PD_BE_{k,h}^{i,t}$ (see above for definition).

IF B[2,2] ≥ $DA_DQSI_{k,h}^{i,t}$ AND B[2,1] = -MMCP

THEN

Allow Reason Code to remain as-is, but exempt the transaction from the DA-IFC.

ELSE

Allow Reason Code to remain as-is, and do NOT exempt the transaction from the DA-IFC.

Implications:

- A day-ahead import transaction must be constrained down to a level lower than its original *schedule-of-record* schedule in order to receive exemption status;
- The entire amount of the constrained portion of the transaction must have been offered into the *Pre-dispatch* at *–MMCP* in order to receive exemption status (compare Figures 2-1 and 2-2 to see examples where this condition is met and not met respectively); and
- Only the first lamination (i.e. the first 2 p-q pairs) of the Pre-dispatch offer curve for each import transaction are relevant in performing this test (due to the existing market rule requirement that offer prices must be monotonically increasing).

2.6.6 Decision Logic Applied During the Offer Price Test for Export Transactions:

PART 1:

The first part of the test ensures that the original *schedule-of-record* ($DA_DQSW_{k,h}^{i,t}$) for the export transaction is indeed GREATER THAN the resulting *Pre-dispatch schedule* ($PD_DQSW_{k,h}^{i,t}$) over the course of *settlement hour* 'h'.

IF $\sum^{T} DA_DQSW_{k,h}^{i,t} > \sum^{T} PD_DQSW_{k,h}^{i,t}$

THEN

Proceed to PART 2

ELSE

END of the test for this transaction.

PART 2:

The second part of the test ensures that the first lamination (i.e. as defined by the first 2 *price-quantity pairs*) of the offer curve submitted into the *Pre-dispatch scheduling process*:

1) Was large enough to cover the entire quantity of the transaction originally scheduled by the *schedule-of-record* at the same *market participant/intertie metering point* combination (commonly referred to as a, "MP/MSP/CSP triplet"); and,
2) Was offered at the *Maximum Market Clearing Price* (+*MMCP*).

The test is as follows:

For each *metering interval* 't' at *intertie metering point* 'i' where the transaction passed PART 1 for *settlement hour* 'h':

Let 'B' be matrix $BL_{k,h}^{i,t}$ (see above for definition).

IF B[2,2] ≥ $DA_DQSW_{k,h}^{i,t}$ AND B[2,1] = +MMCP

THEN

Allow Reason Code to remain as-is, but exempt the transaction from the DA-EFC.

ELSE

Allow Reason Code to remain as-is, and do NOT exempt the transaction from the DA-EFC.

Implications:

- A day-ahead export transaction must be constrained down to a level lower than its original *schedule-of-record* in order to receive exemption status;
- The entire amount of the constrained portion of the transaction must have been offered into the *Pre-dispatch* at +*MMCP* in order to receive exemption status (compare Figures 2-1 and 2-2 to see examples where this condition is met and not met respectively); and
- Only the first lamination (i.e. the first 2 p-q pairs) of the Pre-dispatch offer curve for each export transaction are relevant in performing this test (due to the existing *market rule* requirement that *offer* prices must be monotonically decreasing).

2.6.7 Decision Logic Applied During the Offer Price Test for Linked Wheel Transactions:

The test seeks to demonstrate a best efforts attempt to schedule both the import and export legs of a day-ahead linked wheel (DALW) transaction through both:

- A Pre-dispatch bid at positive maximum market clearing price (+MMCP) for a quantity at least equal to the day-ahead export quantity, and
- A Pre-dispatch offer at negative maximum market clearing price (–MMCP) for a quantity at least equal to the day-ahead import quantity.

For import leg of the linked wheel, the decision logic for the price test is described in Section 2.6.5 with the following amendment:

For each *metering interval* 't' at *intertie metering point* 'i' where the transaction passed PART 1 for *settlement hour* 'h':

Let 'B' be matrix $PD_BE_{k,h}^{i,t}$ (see above for definition).

IF $B[2,2] \geq DA_DQSI_{k,h}^{i,t}$ AND B[2,1] = -MMCP

THEN

Allow Reason Code to remain as-is, but exempt the transaction from the **RT-IFC-DALW**.

ELSE

Allow Reason Code to remain as-is, and do NOT exempt the transaction from the **RT-IFC-DALW**.

For export leg of the linked wheel, the decision logic for the price test is described in Section 2.6.6 with the following amendment:

For each *metering interval* 't' at *intertie metering point* 'i' where the transaction passed PART 1 for *settlement hour* 'h':

Let 'B' be matrix $BL_{k,h}^{i,t}$ (see above for definition).

IF $B[2,2] \geq DA_DQSW_{k,h}^{i,t}$ AND B[2,1] = +MMCP

THEN

Allow Reason Code to remain as-is, but exempt the transaction from the **RT-EFC-DALW**.

ELSE

Allow Reason Code to remain as-is, and do NOT exempt the transaction from the **RT-EFC-DALW**.

Figure 2-1 – Example of an Import Transaction that PASSES the "Offer Price Test"

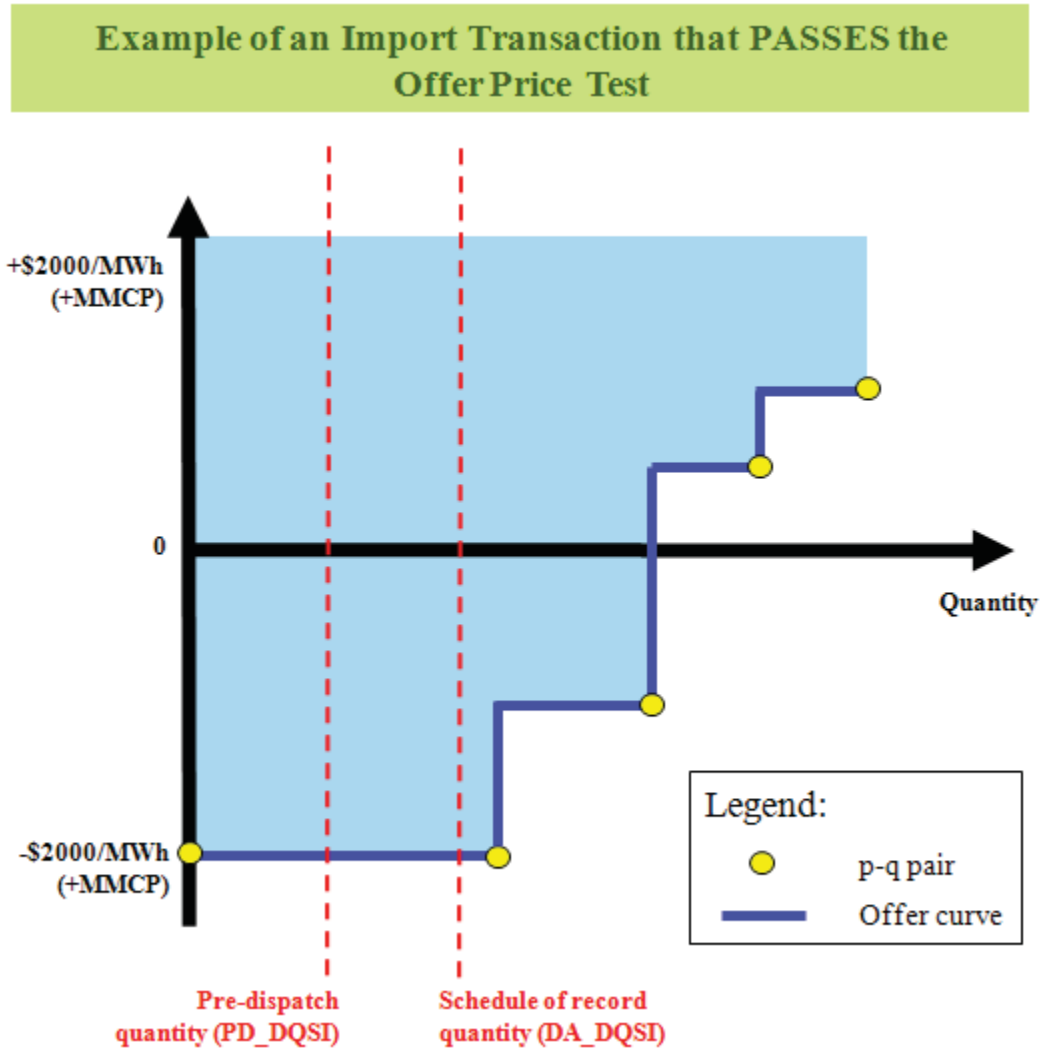

Figure 2-2 – Example of an Import Transaction that FAILS the "Offer Price Test"

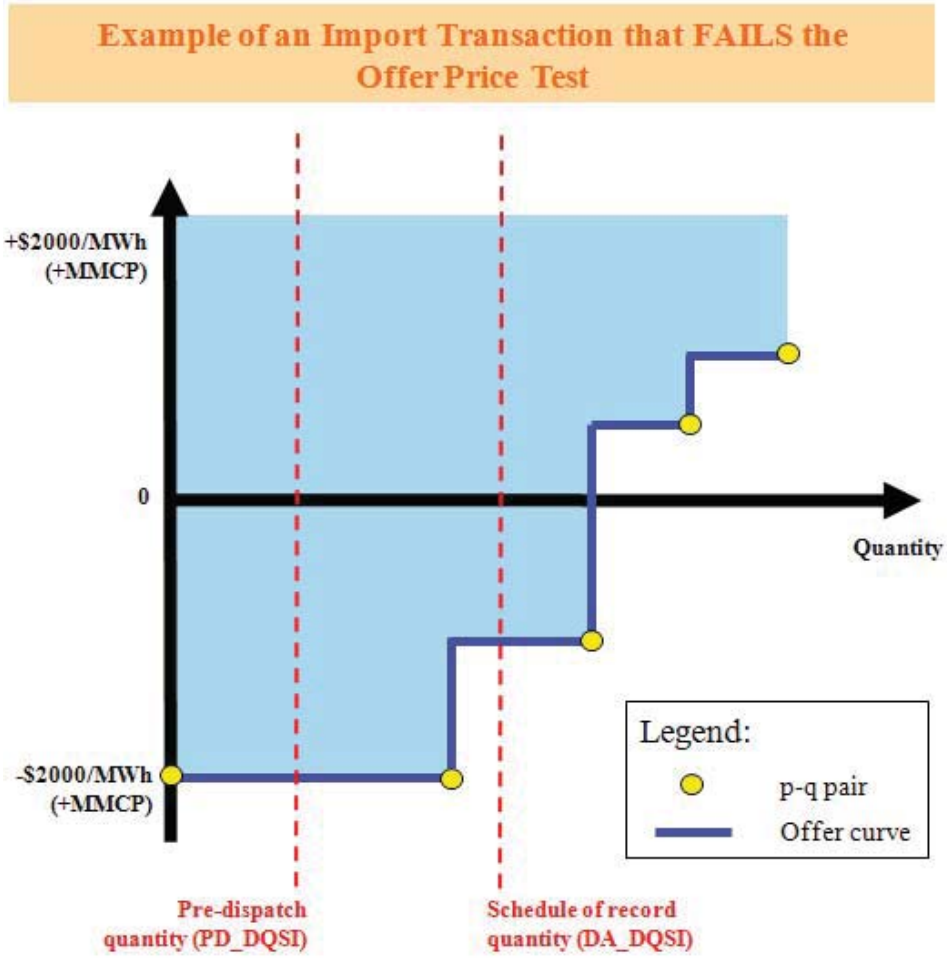

Figure 2-3 – Example of an Export Transaction that PASSES the "Offer Price Test"

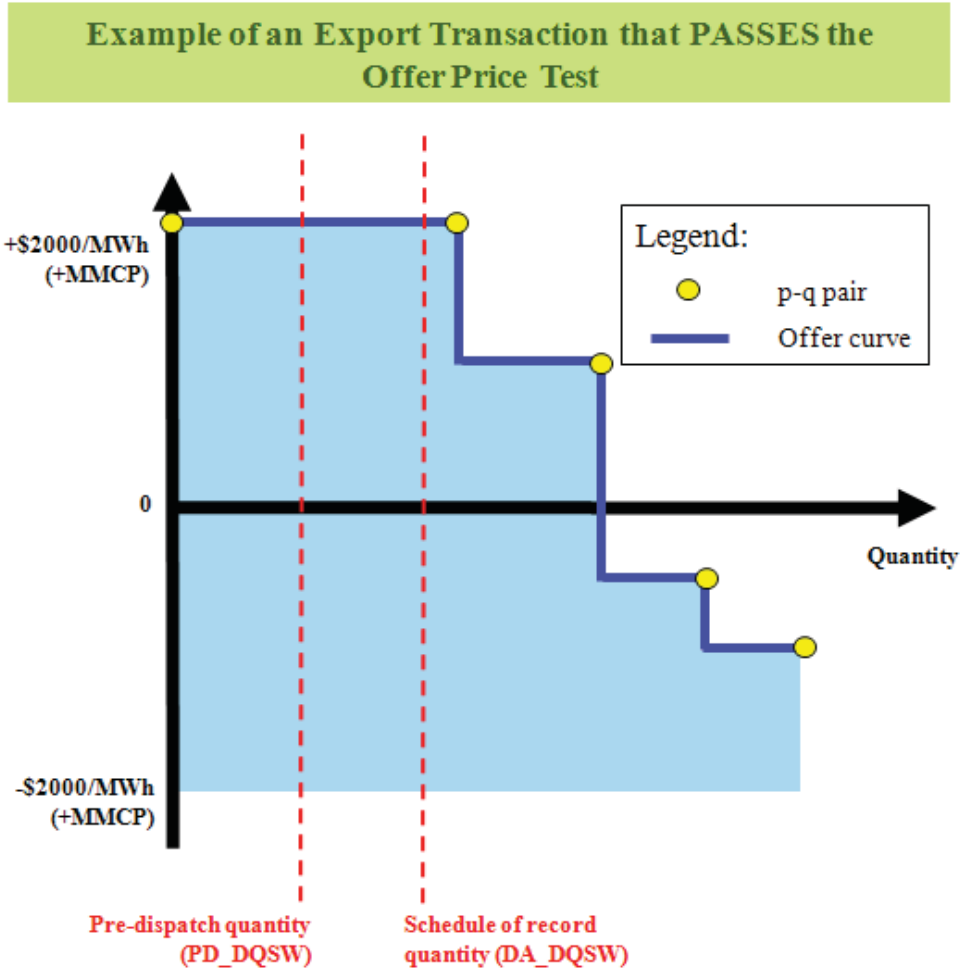

Figure 2-4 – Example of an Export Transaction that PASSES the "Offer Price Test"

Hi Ken – I was speaking to Michael Puskaric this morning and in the course of our conversation, I offered to provide them with a briefing on Fair Hydro. Given we are meeting with them next Monday, we thought we could tack it on to the end of the meeting on Financial Instruments. Do you think the FI discussion will take 2 hours?

Kim – I would love to have you there as well for the Fair Hydro portion of the

meeting. Are you available next Monday – from 11:30 to 12:30 to be at CPA Canada (Wellington and Blue Jays way). Our meeting with them on financial instruments is scheduled from 10-12, although I'm hoping we might be able to work through that discussion in 1.5 hours.

Thanks all,

Cindy

Memo Outline V1np_cv.pdf

Introduction

Describe current state – cash expenditures recovered in current rates (current structure provides for a variance account that is settled within 12 months – so not immediate aka monthly but not long-term)

Describe the objective of the FEP – lower current cost to ratepayers by deferring the recovery of cash expenditures to future periods (for energy already consumed by ratepayers).

Commented [VC(1]: Let's use FHP – Fair Hydro Plan

Objective

Assess the impact of the FEP on the financial statements of the GRE.

Basis of Accounting

GRE – PSAS

OGOs – line-by-line consolidation – PSAS

GBEs – modified equity accounting – IFRS

Analysis (in general, IESO first, then standalone trust, then trust in GRE)

IESO is OGO, so impact on IESO will flow through to GRE

Describe role of IESO - market settlement mechanism

Describe initial impact of FEP on IESO – creates funding shortfall (for costs already incurred on energy already consumed by ratepayers)

IESO has concluded it can recognize the shortfall as a RRA (ref to GAAP hierarchy – relevance of US GAAP)

Describe general concept of RRA

IESO is an OGO – must follow PSAS in GRE

Discuss pros and cons of RRA recognition under PSAS

Show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

I think we should include in this section some commentary on the fact that the Province's statements are currently impacted by RRA – through OPG and H1. Using RRA in IESO is not introducing a new concept into the financial statements of the Province if the substance of the RRA in IESO is similar to the substance of the RRAs in the two GBEs. One question to consider is whether there is substance to using a different accounting treatment in a commercial entity vs. a non-commercial entity. If OPG took on the

role of settling the market, should we get a different answer (e.g. could have structured in a different way)

Discuss need for funding of shortfall and proposed plan (sale of right to trust)

IESO has concluded that details of transaction would support sale treatment.

Discuss pros and cons of sale treatment

Assuming sale treatment, show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

Impact of trust on GRE will depend on two things: (i) who controls the trust, and (ii) how transaction is reported in trust.

Assume, to start, that trust will apply IFRS (for province's CFS, OPG and H1 will be reflected on an IFRS basis, even though both entities will continue to report on a US GAAP basis)

OPG has concluded that trust will recognize intangible asset as a result of the purchase transaction.

Discuss pros and cons of sale treatment and recognition of intangible asset. – not sure what is going to be discussed here – what's the argument not to recognize an intangible asset in the stand-alone f/s of OPG?

Analysis of whether OPG taking on this role impacts is status as a GBE

Show JEs

OPG has concluded they control the trust (discretionary decision) and, therefore, will consolidate.

Commented [VC(2]: Nadine – not sure what you mean by discretionary?

As GBE, OPG is included in GRE using modified equity. Therefore, net assets of trust are included in GRE (investment in GBE).

Provide support for non-Provincial control of Trust and d~~D~~iscuss pros and cons of control (include consideration as to whether Province could control if OPG doesn't).

Discuss 3020 issue if IESO cannot recognize RRA

Show comparison of JEs under both scenarios (modified equity via OPG vs. direct consolidation by GRE + sub-topics of RRA vs. no RRA).

Consider:

- Reference to OEB?
- Definition of an asset
- Reference to PSAS consolidation requirements (no requirement for independence and no elimination of assets/liabs of consolidated orgs upon consolidation just because province controls OEB)
- Impacts if OPG no longer controls the trust
- Impacts if regulatory charge is challenged as unconstitutional and the government legislates the charge as a tax
- What is the impact of 3rd party financing provided on the strength of the ability to collect from future ratepayers (assuming the guarantee is narrowing defined)?
- There are indemnities being provided by the province to IESO and OPG – how do these impact the analysis?
- The AG issued a statement on May 24 at the Committee Hearings -- should address those views. We should have Hansard of the Q&As by the end of the week as well, which we should consider.
- The FAO issued their report this week – not sure there is anything in that document that we need to address in this memo.
- What triggers would cause reassessment of the accounting.

Hi Lee Anne.

Sorry for the delay in getting back to you. My suggestions and comments are noted in the attached. I haven't had a chance to confer with Cindy, so hoping that she'll provide additional feedback to this version, or on your original version by tomorrow. Please let me know if you would like to discuss.

Nadine

Memo Outline V1np_cv.pdf

Introduction

Describe current state – cash expenditures recovered in current rates (current structure provides for a variance account that is settled within 12 months – so not immediate aka monthly but not long-term)

Describe the objective of the FEP – lower current cost to ratepayers by deferring the recovery of cash expenditures to future periods (for energy already consumed by ratepayers).

Commented [VC(1]: Let's use FHP – Fair Hydro Plan

Objective

Assess the impact of the FEP on the financial statements of the GRE.

Basis of Accounting

GRE – PSAS

OGOs – line-by-line consolidation – PSAS

GBEs – modified equity accounting – IFRS

Analysis (in general, IESO first, then standalone trust, then trust in GRE)

IESO is OGO, so impact on IESO will flow through to GRE

Describe role of IESO - market settlement mechanism

Describe initial impact of FEP on IESO – creates funding shortfall (for costs already incurred on energy already consumed by ratepayers)

IESO has concluded it can recognize the shortfall as a RRA (ref to GAAP hierarchy – relevance of US GAAP)

Describe general concept of RRA

IESO is an OGO – must follow PSAS in GRE

Discuss pros and cons of RRA recognition under PSAS

Show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

I think we should include in this section some commentary on the fact that the Province's statements are currently impacted by RRA – through OPG and H1. Using RRA in IESO is not introducing a new concept into the financial statements of the Province if the substance of the RRA in IESO is similar to the substance of the RRAs in the two GBEs. One question to consider is whether there is substance to using a different accounting treatment in a commercial entity vs. a non-commercial entity. If OPG took on the

Memo Outline V1np_cv.pdf

Introduction

Describe current state – cash expenditures recovered in current rates (current structure provides for a variance account that is settled within 12 months – so not immediate aka monthly but not long-term)

Describe the objective of the FEP – lower current cost to ratepayers by deferring the recovery of cash expenditures to future periods (for energy already consumed by ratepayers).

Commented [VC(1]: Let's use FHP – Fair Hydro Plan

Objective

Assess the impact of the FEP on the financial statements of the GRE.

Basis of Accounting

GRE – PSAS

OGOs – line-by-line consolidation – PSAS

GBEs – modified equity accounting – IFRS

Analysis (in general, IESO first, then standalone trust, then trust in GRE)

IESO is OGO, so impact on IESO will flow through to GRE

Describe role of IESO - market settlement mechanism

Describe initial impact of FEP on IESO – creates funding shortfall (for costs already incurred on energy already consumed by ratepayers)

IESO has concluded it can recognize the shortfall as a RRA (ref to GAAP hierarchy – relevance of US GAAP)

Describe general concept of RRA

IESO is an OGO – must follow PSAS in GRE

Discuss pros and cons of RRA recognition under PSAS

Show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

I think we should include in this section some commentary on the fact that the Province's statements are currently impacted by RRA – through OPG and H1. Using RRA in IESO is not introducing a new concept into the financial statements of the Province if the substance of the RRA in IESO is similar to the substance of the RRAs in the two GBEs. One question to consider is whether there is substance to using a different accounting treatment in a commercial entity vs. a non-commercial entity. If OPG took on the

role of settling the market, should we get a different answer (e.g. could have structured in a different way)

Discuss need for funding of shortfall and proposed plan (sale of right to trust)

IESO has concluded that details of transaction would support sale treatment.

Discuss pros and cons of sale treatment

Assuming sale treatment, show comparison of IESO JEs under both scenarios (RRA vs. no RRA)

Impact of trust on GRE will depend on two things: (i) who controls the trust, and (ii) how transaction is reported in trust.

Assume, to start, that trust will apply IFRS (for province's CFS, OPG and H1 will be reflected on an IFRS basis, even though both entities will continue to report on a US GAAP basis)

OPG has concluded that trust will recognize intangible asset as a result of the purchase transaction.

Discuss pros and cons of sale treatment and recognition of intangible asset. – not sure what is going to be discussed here – what's the argument not to recognize an intangible asset in the stand-alone f/s of OPG?

Analysis of whether OPG taking on this role impacts is status as a GBE

Show JEs

OPG has concluded they control the trust (discretionary decision) and, therefore, will consolidate.

Commented [VC(2]: Nadine – not sure what you mean by discretionary?

As GBE, OPG is included in GRE using modified equity. Therefore, net assets of trust are included in GRE (investment in GBE).

Provide support for non-Provincial control of Trust and d~~D~~iscuss pros and cons of control (include consideration as to whether Province could control if OPG doesn't).

Discuss 3020 issue if IESO cannot recognize RRA

Show comparison of JEs under both scenarios (modified equity via OPG vs. direct consolidation by GRE + sub-topics of RRA vs. no RRA).

Consider:

- Reference to OEB?
- Definition of an asset
- Reference to PSAS consolidation requirements (no requirement for independence and no elimination of assets/liabs of consolidated orgs upon consolidation just because province controls OEB)
- Impacts if OPG no longer controls the trust
- Impacts if regulatory charge is challenged as unconstitutional and the government legislates the charge as a tax
- What is the impact of 3rd party financing provided on the strength of the ability to collect from future ratepayers (assuming the guarantee is narrowing defined)?
- There are indemnities being provided by the province to IESO and OPG – how do these impact the analysis?
- The AG issued a statement on May 24 at the Committee Hearings -- should address those views. We should have Hansard of the Q&As by the end of the week as well, which we should consider.
- The FAO issued their report this week – not sure there is anything in that document that we need to address in this memo.
- What triggers would cause reassessment of the accounting.

Hi Kim – Attached is a house book note for the market accounts – there is one question for you in there re: describing IESO's role with the LDCs (I took the description for the role with the generators from KPMG's memo, but didn't see a similar one for LDCs).

Also – Bharat is going to reach out to Susan or yourself re: why the amounts owed to the generators in 2014 in the OPA f/s (less than $500M) are so much lower than the balances at the end of March 2017 ($1.6 billion) – are we comparing apples to oranges?

Thanks,

Hi Ken – I was speaking to Michael Puskaric this morning and in the course of our conversation, I offered to provide them with a briefing on Fair Hydro. Given we are meeting with them next Monday, we thought we could tack it on to the end of the meeting on Financial Instruments. Do you think the FI discussion will take 2 hours?

Kim – I would love to have you there as well for the Fair Hydro portion of the meeting. Are you available next Monday – from 11:30 to 12:30 to be at CPA Canada (Wellington and Blue Jays way). Our meeting with them on financial instruments is scheduled from 10-12, although I'm hoping we might be able to work through that discussion in 1.5 hours.

Thanks all,

Cindy

Attachment 1: image0d0a3f.JPG
Attachment 2: Proposed Alternative for Fair Allocation Calculation v2.docx
Attachment 3: Blackline -Fair Allocation Provisions - Proposed Alternative.pdf

---

All,

As requested, we set out below a list of major and minor issues compiled by Torys, Hunton and Williams and OPG. These are ordered as they arise in the Bill, not in the order of importance. We plan to follow up later this evening with a markup of the draft Bill that reflects these comments as well as a few drafting points.

<u>Major Issues</u>

1. It is critically important to have a definition of “transfer” that is broad enough. We

had a mark-up as did Stikemans. I prefer ours but the two are not really that far apart. I would suggest a call with Ashbourne, Hamilton and Feldman tonight or tomorrow to get consensus.

2. Section 6.1. The process for determining the rate for electricity under 6.1xx may not be workable or requires further clarification, as well as confirmation that the OEB is capable of making the necessary calculations. It appears that the rate under 6.1 is that which is required for a specified consumer to receive a monthly total bill that is 25% less than it would have been for them if the OEB determined RPP solely using the method under s. 79.16(1)(b). Though the determination of the comparison rate by OEB seems straightforward, it is not clear who determines the rates that are required for specified consumers to receive monthly total invoices that are 25% less than they would have been. It appears that these rates may have to be determined on an individual consumer basis, or at least separately for the consumers of each electricity vendor. This is because a total bill for one consumer will have a different proportion of commodity vs. delivery and other charges than a total bill for another consumer. As such, it does not appear to be a single rate that the OEB can determine for every specified consumer, as this will not result in the necessary 25% reductions. If not the OEB, who is it? If it is the electricity vendors, what authority do they have to determine these rates given prohibition under s. 78(2) of the OEB Act?

3. Section 8xx (2)(b) – delete “material” from last line of the paragraph – we probably don’t want to get into a dispute about whether a funding obligation was incurred in a manner that was in “material” conformity with the Financing Plan. In addition, as drafted, it would actually mean that if there were a material issue, the charge would be irrevocable, but if it was not material, then arguably the charge could be revocable.

[4. Section 10xx (1) – Will OPG, as Financial Services Manager, be able to determine the monthly clean energy adjustment?]

5. Prior Section 11xx (1), “The IESO shall, in accordance with the regulations, issue a remittance notice to each electricity vendor for the electricity vendor’s portion, as determined in accordance with the regulations, of the clean energy adjustment in respect of a reference period” should be reinserted.

6. Section 13(2) gives the Minister the ability to replace the Financial Services

Manager. I think, because of section 17, this would mean that the Minister would have the ability to replace the FSM of an up and running financing entity. The Minister should not have that power. That power should only be exercisable by Debtholders. We had suggested bifurcating the role of the FSM for this purpose and limiting this replacement power to the purpose of preparing the Financing Plan. Perhaps another way of addressing this would be to have an explicit carve out to the effect that the Minister's rights will not extend to OPG's rights as FSM of a financing entity that has already issued funding obligations under section 17. This is also important in order to achieve the desired accounting treatment.

7. Section 15. The draft still has the FSM determining the fair allocation amount. This is OPG's issue of greatest concern. We are attaching a proposal prepared by OPG to suggest a compromise between our last mark up, which had the Minister assume full responsibility, and the latest draft Bill which leaves the responsibility fully on OPG.

8. In s. 16(5) the draft Bill still proposes to treat the Financing Plan as a confidential document. We believe that unless the Minister allows for disclosure of the Financing Plan we will not be able to satisfy disclosure obligations under securities laws.

9. s. 17(1) implies that the FSM may incur funding obligations itself. Is this a drafting error or is the intention to be building in flexibility so that OPG would be able to purchase the IESO funding shortfall itself in case OPG and the Dealers can't get a deal done quickly enough (impractical as that may be) ?

10. Section 22(2) still says that IESO does not retain any obligations in respect of the investment asset. This originally came from IESO and it should be dropped. It is incorrect. IESO does have obligations in respect of the investment asset. It has obligations in the Act and the regulations and it will have obligations in the master sale and servicing agreement.

11. Section 25xx (1) – delete references to "and recover amounts in respect of". Definition of clean energy adjustment already reflects that it is an amount and the financing entity should be entitled to the full clean energy adjustment.

12. Section 38 of our previous markup had a provision for “Standing and Remedies” of a financing entity which was derived from the OBCA and we believe it would be a serious gap not to have that.

Minor Points

13. The definition of clean energy initiative now appears to be narrower than the intentions seemingly expressed by the revised preamble. It should be revised accordingly.

14. The definition of “refinancing” doesn’t work because it no longer requires replacing old funding obligations with new funding obligations.

15. Section 6. For the purposes of the definition of “RPP rate” in 6xx, it should be recognized that this is not a single rate established by the OEB. Rather, OEB establishes a number of RPP prices under the relevant clause. There are time of use prices and tiered prices. Within each of these, there are several prices depending on time of day or volume consumed. If this has not been considered, it will be important to determine how this affects the rest of the drafting and the ability to calculate the necessary amounts that depend on the “RPP rate”.

16. s. 9(2) does not expressly address how these errors would be dealt with. It would be nice to specify that they would be corrected pursuant to the true up procedure in 10(3).

17. I don’t think “fair adjustment” is defined anywhere anymore. In any event, I think sections 15(1)2 and 16(4)(b) are still adding dollar amounts to the fair adjustment, which I think is an adjustment to a rate ($/Kwh). I am not sure what is meant by “value of an fair adjustment” – is this supposed to be the monetary impact that the adjustment had when aggregated over all specified consumers ? It is not clear.

18. Section 15(2)3 still refers to time value of money or rate of inflation instead of actual financing charges on the funding obligations, which is the real factor that would have to be taken into account.

19. Changes to section 53.1 of the Electricity Act are behind our mark-up.

Michael K. Feldman

Subject: RE: Ontario Fair Hydro Plan

All - Thank you for the detailed comments that you provided on Saturday and Sunday. Please find attached the next turn of the legislation. We have tried to balance the comments that we received to address the points that you have raised. This draft does not reflect the drafting points that were raised over Monday and Tuesday and we will reflect those points in our next instructions to legislative counsel. Please review and identify any significant substantive issues by 6 p.m. today. We continue to work toward pens down on Friday, meaning the draft that we have at that point in time will be proposed for introduction in the House. Thank you again for your contributions to this process.

Subject: RE: Ontario Fair Hydro Plan

All - Please find attached the next turn in the consultation draft (v.3) of the proposed legislation. We have been working to address the feedback that you provided earlier in the week. A number of points remain in progress. As with the earlier versions, by sharing this document, we hope to continue to advance our discussions.

Our timeline has been extended and we are now working to a pens down date of April 28th. We will not get another extension. Accordingly, we ask for your detailed, written comments on the draft, which we require no later than Sunday at noon.

We will continue to work on the bill in the interim, so earlier instructions are helpful to us. With your input on this timeline, we expect to be able to provide one more circulation around Tuesday or Wednesday next week.

We have not had the opportunity to add notes or to update our crosswalk to the Blakes summary document.

We look forward to receiving your written comments.

Subject: Ontario Fair Hydro Plan

All - Please find attached the draft “Intergenerational Fairness in Hydro Rates Act, 2017”. A tremendous amount of work has gone into getting to this draft and much more work is required to get this ready for the House. The goal of sharing this document now is to further the process we have engaged in over the last weeks. In the attached, we have included notes to try to address where the drafting is not yet consistent with our thinking. These notes are neither comprehensive nor complete. They are intended only as flags and as colour to the draft. We have not forgotten the comments that you have already provided and we are continuing to working through the translation of the commercial terms we have been discussing into legislative language.

For ease of reference, included with the draft bill are the partially updated Blakes’ summary, a chart that attempts links the articles in that document to the sections of the bill (which is imperfectly numbered at best) and excerpts from the Electricity Act and the Ontario Energy Board Act, related to the consequential amendments.

In your review, please focus on the broad stroke concepts, rather than the minutia, and

keep in mind the cascade of instruments that will be required – legislation first, then regulations and finally commercial agreements. We look forward to discussing the broader concepts on Monday

Blackline -Fair Allocation Provisions - Proposed Alternative.pdf

FAIR ALLOCATION AMOUNT

~~Financial Services Manager to calculate~~Minister to prepare initial calculation of fair allocation amount

15xx. (1) The ~~Financial Services Manager~~Minister shall calculate a fair allocation amount in respect of each reference period, having regard to the need to align that amount with the finance amount payable during the reference period, for the purpose of fairly measuring and allocating the estimated clean energy costs and estimated clean energy benefits among the specified consumers in respect of the reference period.

Timing of initial calculation

(1.1) The ~~Financial Services Manager~~Minister shall calculate a fair allocation amount in respect of each reference period ~~before any funding obligation is incurred [by a financing entity during the reference period]~~by the date that is **[20]** business days after the day this Act receives Royal Asset.

Certification

(1.2) The Minister shall certify to the Financial Services Manager the initial calculation of the fair allocation amount for each reference period, including the assumptions, methodology, accuracy of information and numbers used in such calculation. The assumptions and methodology for such calculation shall be set out in the regulations.

Financial Services Manager to update calculation

(1.3) For the reference periods commencing May 1, 2018, the Financial Services Manager shall prepare an updated calculation of the fair allocation amount in respect of each such reference period, as and when deemed necessary or appropriate by the Financial Services Manager but no less seldom and every five years, using the assumptions and methodology for such calculation set out in the regulations and updated information from the relevant parties. Any update to the fair allocation calculation shall be effective in accordance with subsections (4) and (5).

[NTD: OPG expects the method for the update calculation to be very prescriptive and set out in detail in the regulations. The regulations would also compel the IESO, OEB, LDCs and other relevant agencies to provide OPG with the necessary information to do the update calculation. OPG expects to use the model put together by the Province for the initial calculation and input the updated data from the agencies into the model to calculate the updated fair allocation amounts.]

Access to information

(1.4) The Minister shall make available, or cause to be made available, in a timely manner to the Financial Services Manager, all such information, including information from the IESO, the Board and electricity vendors, as requested by the Financial Services Manager to prepare updates to the calculation of the fair allocation amount.

Amount

(~~1.2~~1.5) The fair allocation amount in respect of a reference period is the sum of the following amounts:

1. The amount, if any, by which, if this Act had not been enacted, the estimated clean energy costs and estimated clean energy benefits allocated to specified consumers in respect of the reference period would have exceeded the estimated amount of the adjustments provided for under section 25.33 of the *Electricity Act, 1998* and the regulations made under that provision that would have been borne by the specified consumers in respect of clean energy costs for the reference period.

2. A portion of the value of any fair adjustment that has been made under Part II in respect of any previous reference period.

Principles

(2) In calculating the estimated clean energy costs and estimated clean energy benefits to be allocated to specified consumers in respect of a reference period, the Minister or the Financial Services Manager, as applicable, shall ~~[comply with the regulations and]~~ have regard to the following principles:

1. Clean energy costs allocated to specified consumers in respect of a reference period should be allocated in proportion to the clean energy benefits attributed to the specified consumers in respect of the reference period.

2. The clean energy benefits allocated to the specified consumers in respect of a reference period should be determined in accordance with the regulations.

3. The fair allocation calculation should include reasonable assumptions regarding the following:

    i. The time value of money or the rate of inflation, for the purpose of equating nominal amounts over time.

    ii. The expected number of specified consumers in respect of each reference period.

    iii. The expected electricity consumption rates in respect of each reference period.

4. Such other principles as may be prescribed.

Method

(3) The Minister or the Financial Services Manager, as applicable, shall calculate a fair allocation amount in accordance with such methods as the Minister or Financial Services Manager, as applicable, considers appropriate, having regard to the requirements of this Act.

~~Notification~~Provision of updates to Minister

(4) The Financial Services Manager shall ~~notify~~provide the Minister ~~of the methods used to calculate~~written notification of any updates to the calculation the fair allocation amount ~~and any changes to those methods~~made pursuant to subsection (1.3).

Effective date

(~~6~~5) The fair allocation calculation or an amendment ~~to~~ the fair allocation calculation by the Minister takes effect on the day that is 30 days after the fair allocation calculation or the amendment, as the case may be, is provided ~~to the Minister in writing~~by the Minister to the Financial Services Manager. Any update to the fair allocation calculation prepared by the Financial Services Manager shall be effective 30 days after such update is provided to the Minister.

Publication

(~~7~~6) The Minister shall ensure that the fair allocation calculation and any amendments to it are made available to the public in a manner that the Minister considers appropriate.

All,

In case it is helpful for this afternoon’s meeting I have put the points from my last email into a Word document (attached) that might be easier to work with. I will bring extra copies t
